ASTRONOMY, MS

LEARNING OUTCOMES

LEARNING OUTCOMES

- Demonstrate a broad understanding of core astrophysical topics including gravitational dynamics; radiative processes; the interstellar medium; the formation, structure, and evolution of stars and galaxies; cosmology; and observational and numerical techniques.
- 2. Identify sources and assemble evidence pertaining to questions or challenges in their area of concentration.
- 3. Synthesize knowledge from disparate sources and evaluate evidence for and against hypotheses.
- 4. Demonstrate academic mastery in their area of concentration, including an understanding of appropriate research methodologies, current theories, recent findings, and their broader implications.
- 5. Recognize and apply principles of ethical and professional conduct.
