

# SCHOOL PSYCHOLOGY, PH.D.

## LEARNING OUTCOMES

1. Demonstrate a strong foundation in current and past theories, research findings, and methodologies in school psychology. Use critical thinking skills to synthesize existing knowledge, evaluate strengths and limitations in existing theory and research, and identify issues in need of additional inquiry - including conceptual and methodological approaches available to address these issues.
2. Demonstrate a knowledge of and sensitivity to human diversity in terms of individual abilities, orientations, and sociocultural backgrounds with implications for school psychology and related fields.
3. Retrieve, evaluate, and interpret professional and scientific literature; use this information to develop or adapt theoretical frameworks and derive testable hypotheses or predictions for research / program evaluation projects relevant to school psychology and related fields.
4. Learn to design realistic and feasible research or assessment projects in school psychology and to prepare necessary protocols that are sensitive to the backgrounds of individuals who are the focus of their work.
5. Conduct independent research and analyze and interpret resulting data in school psychology and related fields.
6. Create clear and concise reports of their research or program evaluations relevant to school psychology and related fields that are appropriate to the intended audiences, which may include fellow scholars (via scholarly journals), practitioners (via practitioner journals or reports), and lay audiences (via online or other published reports).
7. Communicate effectively in collaborative work, instructional activities, and/or consultation settings with students and professional colleagues.
8. Conduct research or program implementation / evaluation in accordance with ethical standards established in school psychology and related fields.
