### BREADTH REQUIREMENTS

This program requires students to have taken coursework in several areas of Geography to show breadth of knowledge in the field. Most students have completed the coursework for the breadth requirements prior to entering the program. Typically, these courses are not seminars. Students must have completed the equivalent of one undergraduate-level course in each subarea (Physical Geography and Earth System Science, Human Geography, People-Environment Geography, Cartography/GIS). Students who begin the program lacking one or more of the breadth courses are expected to complete such coursework during the master's program. One course taken for breadth can also be used to fulfill degree requirements.
