HUMAN ECOLOGY, M.S.

LEARNING OUTCOMES

- 1. Articulate, critique, or elaborate the theories, research methods, and approaches to inquiry or schools of practice in one's area of study.
- Identify sources and assemble evidence pertaining to questions or challenges in the area of study.
- 3. Understand the social, political, ethical, and economic contexts of research and creative scholarship.
- 4. Compare and contrast multiple paradigms for describing reality (e.g., personal history, world view, philosophic tradition, discipline).
- Understand the Human Ecology perspective by examining and explaining the relations among humans and their natural, social, and build environments using an interdisciplinary and transdisciplinary lens.
- Select and/or utilize the most appropriate methodologies and practices.
- 7. Recognize the nature and significance of diversity as related to one's area of study.
- 8. Communicate clearly in ways appropriate to a variety of audiences.
- 9. Recognize and apply principles of ethical conduct.
