1

ATHLETIC TRAINING, M.S.

LEARNING OUTCOMES

- Understand the role of the athletic trainer within the broader health care system.
- 2. Demonstrate appropriate oral and written communication skills.
- Develop and apply strategies to prevent the incidence and/or severity of injury and illnesses.
- 4. Demonstrate the clinical skills needed to appropriately diagnose patients for treatment and referral.
- 5. Apply clinical and decision-making skills to respond to acute injury and illness, including emergencies.
- 6. Assess patient status and develop treatment and rehabilitation that are consistent with contemporary disablement models.
- 7. Demonstrate clinical scholarship in the form of evidence appraisal and application to influence athletic training practice.
- 8. Maintain the highest standards of clinical practice by examining the quality of patient care through the use of patient outcomes.
- Apply research methods to develop and evaluate clinical questions applicable to practice-based research environments while demonstrating an understanding of ethical research practice.
