

CLINICAL NUTRITION, M.S.

LEARNING OUTCOMES

1. Articulating and integrating specialized knowledge in the field of advanced clinical nutrition - including energy metabolism, micronutrient requirements, and nutrigenomics needed to meet the challenges of future careers and opportunities.
2. Articulating and demonstrating advanced skills in nutritional assessment and nutritional care of patients with complicated disorders/diseases in a clinical or community setting.
3. Demonstrating advanced skills in nutrition counseling and education needed to precipitate behavior and cognitive change.
4. Formulating systems to gather, analyze and interpret data from a practice setting to develop appropriate protocols and care plans using the nutritional care process.
5. Formulate problem statements and writing research proposals using appropriate study design.
6. Demonstrating an ability to understand, interpret, evaluate, and design clinical nutrition research.
7. Demonstrating high level problem-solving, critical thinking, and use of informatics required in advanced clinical nutrition practice.
8. Demonstrating advanced professional skills in communication, information and project management, leadership, and ethics.
