

CLINICAL NUTRITION, MS

THE HEALTHCARE SYSTEM IS CHANGING RAPIDLY

Health professions have increased educational standards beyond the bachelor's degree; in fact, the Commission on Dietetic Registration has increased the requirements to be eligible to take the Registration Exam for Dietitians to the completion of a master's degree beginning in 2024. To remain competitive in the field and obtain the advanced competencies and skills needed in the job market, completion of a master's degree is becoming essential.

CURRICULUM OVERVIEW

The MS in Clinical Nutrition is focused on core nutrition, clinical nutrition, professional skills, and electives. This is advanced learning at its best and is ideal for people with a strong background in clinical nutrition, confidence working at the graduate level, and a commitment to become leaders in clinical nutrition and dietetics. The curriculum is designed to prepare students to translate research; recognize and formulate responses to evolving developments in clinical nutrition practice, policy, and research; and lead and manage professional teams to design nutrition-related services.
