

# POPULATION HEALTH, DOCTORAL MINOR

## ADMISSIONS

In order to have approval to pursue the population health minor, please send an email to the Population Health Sciences graduate program coordinator, Quinn Fullenkamp ([quinn.fullenkamp@wisc.edu](mailto:quinn.fullenkamp@wisc.edu)), explaining the sequence of courses that you plan to take toward the doctoral minor requirement. Be sure to include course completion dates. Your plan will be approved via email. When you are ready to have your warrant signed, email Quinn Fullenkamp again to make arrangements to obtain a signature.

The population health minor is open to students in any major field of graduate studies at the University of Wisconsin. Given the necessarily quantitative emphasis of the coursework, a prior one-semester course in biostatistics (such as POP HLTH/B M I 551, B M I/STAT 541 or STAT/F&W ECOL/HORT 571) is required or can be taken simultaneously (prior to B M I/POP HLTH 552) with coursework for the minor.
