TABLE OF CONTENTS

Undergraduate Guide 8
College of Agricultural and Life Sciences 31
Agricultural and Applied Economics 41
Agricultural and Applied Economics, B.S. 42
Agricultural Business Management, B.S. 46
Business Management for Agricultural and Life Sciences, Certificate 50
Development Economics, Certificate 51
Agricultural and Life Sciences - College-Wide 53
College of Agricultural and Life Sciences Honors 53
Individual Major, B.S. 54
Landscape Architecture, BSLA 57
Agronomy 62
Agronomy, B.S. 63
Animal Sciences 69
Animal Sciences, B.S. 69
Bacteriology 74
Biology, B.S. (CALS) 74
Biology: Evolutionary Biology 83
Biology: Plant Biology 89
Microbiology, B.S. (CALS) 92
Biochemistry 96
Biochemistry, B.S. (CALS) 97
Biological Systems Engineering 106
Biological Systems Engineering, B.S. 106
Biological Systems Engineering: Food and Bioprocess Engineering 115
Biological Systems Engineering: Machinery Systems Engineering 116
Biological Systems Engineering: Natural Resources and Environmental Engineering 117
Community and Environmental Sociology 117
Community and Environmental Sociology, B.S. 118
Food Systems, Certificate 122
Dairy Science 124
Dairy Science, B.S. 124
Entomology 128
Entomology, B.S. 129
Food Science 133
Food Science, B.S. 133
Science of Fermented Food and Beverages, Certificate 138
Forest and Wildlife Ecology 138
Forest Science, B.S. 139
Wildlife Ecology, B.S. 147
Genetics 153
Genetics and Genomics, B.S. 153
Horticulture 158
Horticulture, B.S. 159
Life Sciences Communication 166
Life Sciences Communication, B.S. 166
Nutritional Sciences 169
Global Health, Certificate 170
Nutritional Sciences, B.S. 175
Nutritional Sciences, B.S. Nutrition and Dietetics 180
Plant Pathology 185
Plant Pathology, B.S. 186
Soil Science 191
Environmental Sciences, B.S. (CALS) 192
Soil Science, B.S. 199
College of Engineering 207
Biomedical Engineering 217
Biology in Engineering for Engineering Majors, Certificate 218
Biomedical Engineering, B.S. 220
Chemical and Biological Engineering 227
Chemical Engineering, B.S. 228
Civil and Environmental Engineering 233
Civil Engineering, B.S. 235
Civil Engineering: Construction Engineering and Management 240
Civil Engineering: Environmental Engineering 241
Geological Engineering, B.S. 242
Electrical and Computer Engineering 248
Computer Engineering, B.S. 249
Electrical Engineering, B.S. 254
Engineering - College-wide 260
College of Engineering Honors in the Liberal Arts 260
International Engineering, Certificate 260
Naval Science, BNS 261
Technical Communication, Certificate 262
Technical Japanese Studies for Undergraduates, Certificate 265
Engineering Physics 266

Engineering for Energy Sustainability, Certificate 266
Engineering Mechanics, B.S. 269
Engineering Mechanics: Astronautics 274
Engineering Physics, B.S. 276
Nuclear Engineering Materials, Certificate 281
Nuclear Engineering, B.S. 282
Industrial and Systems Engineering 289
Industrial Engineering, B.S. 290
Materials Science and Engineering 296
Materials Science and Engineering, B.S. 296
Mechanical Engineering 300
Engineering Thermal Energy Systems, Certificate 301
Manufacturing Engineering, Certificate 302
Mechanical Engineering, B.S. 304
College of Letters & Science 309
African Cultural Studies 358
African Cultural Studies, B.A. 358
African Cultural Studies, B.S. 364
Afro-American Studies 369
Afro-American Studies, B.A. 369
Afro-American Studies, B.S. 374
Afro-American Studies, Certificate 378
American Indian Studies Program 379
American Indian Studies, Certificate 380
Anthropology 381
Anthropology, B.A. 383
Anthropology, B.S. 388
Archaeology, Certificate 393
Art History 396
Art History, B.A. 397
Art History, B.S. 405
Art History, Certificate 414
Material Culture Studies, Certificate 417
Asian American Studies Program 420
Asian American Studies, Certificate 420
Asian Languages and Cultures 422
Asian Languages and Cultures, B.A. 425
Asian Languages and Cultures: East Asian Studies 433
Asian Languages and Cultures: South Asian Studies 435
Asian Languages and Cultures: Southeast Asian Studies 437
Asian Languages and Cultures, B.S. 438
Asian Languages and Cultures: East Asian Studies 447
Asian Languages and Cultures: South Asian Studies 449
Asian Languages and Cultures: Southeast Asian Studies 451
Chinese Professional Communications, Certificate 453
Chinese, B.A. 456
Chinese, B.S. 463
Japanese Professional Communication, Certificate 471
Japanese, B.A. 474
Japanese, B.S. 480
Astronomy 487
Astronomy–Physics, B.A. 487
Astronomy–Physics, B.S. 491
Atmospheric and Oceanic Sciences 494
Atmospheric and Oceanic Sciences, B.A. 495
Atmospheric and Oceanic Sciences, B.S. 500
Environmental Sciences, B.A. (L&S) 505
Environmental Sciences, B.S. (L&S) 513
Biology Core Curriculum 521
Biology Core Curriculum Honors, Certificate 521
Botany 524
Botany, B.A. 524
Botany, B.S. 528
Conservation Biology, B.A. 533
Conservation Biology, B.S. 539
Center for Law, Society, and Justice 546
Criminal Justice, Certificate 547
Legal Studies, B.A. 549
Legal Studies, B.S. 555
Chemistry 561
Chemistry, B.A. 563
Chemistry, B.S. 570
Chicana/o and Latina/o Studies 577
Chicana/o and Latina/o Studies, Certificate 578
Classical and Ancient Near Eastern Studies 580
Classical Humanities, B.A. 582
Classical Humanities, B.S. 587
Classical Studies, Certificate 593
Classics, B.A. 595
Classics, B.S. 599

UNDERGRADUATE GUIDE

The *Guide* contains information about the many academic programs that make the University of Wisconsin–Madison one of the world's foremost institutions of higher education.

The *Guide* is published online only. It is not available in printed format.

The information in the *Guide* applies to all undergraduate students at the university regardless of their classification (school/college affiliation). Information in the individual school/college sections applies specifically to students who intend to graduate from one of those schools or colleges.

It is important for students to be familiar with all the information that applies to them. Students are strongly encouraged to consult their advisors at least once each semester to be certain they are completing requirements that apply to their degree and major programs.

The *Guide* is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

For more information about admission expectations, academic preparation, the application process, and important dates and deadlines, contact:

Office of Admission and Recruitment (https://www.admissions.wisc.edu)
702 West Johnson Street, Suite 1101
Madison, WI 53715-1007
onwisconsin@admissions.wisc.edu
608-262-3961

Schedule a campus at VisitBucky (https://www.admissions.wisc.edu/visitbucky) or call 608-262-3961.

UW–Madison summer brochures and program information are available from the Division of Continuing Studies (http://continuingstudies.wisc.edu).

All entering students, to protect their interests, should become well acquainted with the regulations regarding student academic and nonacademic misconduct. Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at:

Office of the Registrar (https://registrar.wisc.edu)
333 East Campus Mall #10101
Madison, WI 53715-1384

ACCREDITATION

The University of Wisconsin–Madison is accredited by the Higher Learning Commission (http://www.hlcommission.org).

230 South Lasalle Street, Suite 7-500
Chicago, IL 60604
Telephone 1-800-621-7440
www.hlcommission.org (http://www.hlcommission.org)

UW–Madison, which was first accredited in 1913, was last accredited in 2019, and will go through a reaccreditation process again in 2028–29.

SAFE LEARNING AND WORK ENVIRONMENT

Guide to creating and maintaining a Safe Learning and Work Environment at UW–Madison: Responsibilities, Resources, and Reporting Requirements. (https://compliance.wisc.edu/safe-learning-work-guide)

REGISTRATION WITH MINNESOTA OFFICE OF HIGHER EDUCATION

The University of Wisconsin-Madison is a public institution registered as a "Private Institution" with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

AFFIRMATIVE ACTION AND COMPLIANCE STATEMENT

The University of Wisconsin–Madison is committed to providing equal opportunity and equal access and to complying with all applicable federal and state laws and regulations and University of Wisconsin System and university non-discrimination policies and procedures. For information on all covered bases, the names of the Title IX and Americans with Disabilities Act Coordinators, and the processes for how to file a complaint alleging discrimination, please contact the Office of Compliance (https://compliance.wisc.edu). The Office of Compliance is located at 361 Bascom Hall, 500 Lincoln Drive, Madison WI 53706 and can be reached at Voice: 608-265-6018 (relay calls accepted); Fax: 608 263-4725; Email: uwcomplianceoffice@wisc.edu.

The following are the nondiscrimination bases for covering students and applicants for admission to the university; university employees and applicants for employment at the university; and those wishing to take part in university programs and activities, including visitors to campus.

STUDENTS/EDUCATIONAL PROGRAMS

- age
- ancestry
- color
- creed
- disability
- ethnicity (specifically involving harassment by UW employees)
- gender identity or expression
- marital or parental status
- national origin
- pregnancy
- race
- religion
- retaliation for opposing discrimination, making a complaint of discrimination or taking part in an investigation relating to discrimination
- sex
- sexual orientation
- or any other category protected by law, including physical condition or developmental disability as defined in Wisconsin Statutes§51.01(5).

EMPLOYEES/APPLICANTS

- age
- ancestry
- arrest record
- color
- conviction record
- creed
- disability
- ethnicity (specifically involving harassment by university employees)
- gender identity or expression
- genetic information including genetic testing
- honesty testing
- marital or parental status
- military service
- national origin
- pregnancy
- race
- religion
- retaliation for opposing discrimination, making a complaint of discrimination or taking part in an investigation relating to discrimination
- sex
- sexual orientation
- use or nonuse of lawful products off the employer's premises during nonworking hours,
- veteran status
- declining to attend a meeting or participate in any communication about religious matters or political matters, or any other category protected by law

VISITORS AND PROGRAM PARTICIPANTS/UNIVERSITY ACTIVITIES

- age
- ancestry
- color
- creed
- disability
- national origin
- race
- retaliation for making a complaint of discrimination, or taking part in an investigation relating to discrimination, or opposing discrimination
- sex
- sexual orientation

Also covered is any other non-discrimination category that may be subsequently added, even if not included in the above list, as a result of federal or State of Wisconsin court, legislative, or regulatory action, or action taken by UWS or the University.

INFORMATION FOR STUDENTS WITH DISABILITIES

The McBurney Disability Resource Center provides disability-related services and accommodations to undergraduate, graduate, professional, Special, and guest students. The center works closely with students and faculty on the provision of reasonable accommodations to ensure access to the learning environment. Common accommodations include extended time and/or small group environment for exams, class notetakers, sign language interpreting, real time and media captioning, and conversion of printed materials to an accessible format. McBurney staff members also collaborate with students and faculty to determine reasonable flexibility with regard to attendance, participation, and deadlines for disorders that fluctuate in severity over the course of enrollment. The center makes referrals to other campus offices or community resources for nonclassroom accommodations related to housing, transportation, personal care needs, and so on. Students should contact the center upon admission to begin the eligibility for services process. Early notice is essential in order to have accommodations in place prior to the start of the semester. For detailed information, see How to Become a McBurney Client (http://mcburney.wisc.edu/students/howto.php).

McBurney Disability Resource Center
702 West Johnson Street, Suite 2104
Madison, WI 53706
608-263-2741 (voice)
608-225-7956 (text)

mcburney@studentlife.wisc.edu
www.mcburney.wisc.edu (http://www.mcburney.wisc.edu)

The information, policies, and rules contained herein are subject to change. The information in this catalog is current as of June 1, 2019. Later revisions are announced through department or program offices. Students are responsible for knowing current university regulations. University offices can provide current information about possible changes.

ADMISSION

OFFICE OF ADMISSIONS AND RECRUITMENT

Students seeking to earn a bachelor's degree from the University of Wisconsin–Madison will apply for admission through the Office of Admissions and Recruitment (https://www.admissions.wisc.edu). Undergraduate admission is competitive and selective; professional admissions counselors review applications using a holistic process. We focus on academic excellence, reviewing high school and college coursework (when applicable), the courses students have chosen to take, the rigor and breadth of the curriculum, and how the student has performed in their coursework. We also consider written essays, letters of recommendation, and extracurricular involvement.

Our review process is designed to help us identify students who are not only academically stellar but also have qualities such as leadership, concern for humanity, and achievement in the arts, athletics, and other areas. We also seek diversity in personal background and experience for potential contribution to the University of Wisconsin–Madison community.

We invite and encourage all students considering the University of Wisconsin–Madison to join us on campus for a tour (https://www.admissions.wisc.edu/visitbucky). There are many options to explore and discover what UW–Madison has in store.

APPLY (HTTPS://WWW.ADMISSIONS.WISC.EDU/APPLY)

To submit an application for admission review the application dates and deadlines as well as the required application materials listed on our website.

Dates and Deadlines (https://www.admissions.wisc.edu/apply)
Freshman Applicants (https://www.admissions.wisc.edu/apply/freshman/materials.php)
Transfer Applicants (https://www.admissions.wisc.edu/apply/transfer/materials.php)
Reentry Applicants (https://www.admissions.wisc.edu/apply/reentry)

FRESHMEN

Competitive freshman applicants have taken advantage of the rigor offered at their high schools, performed well in challenging courses, and have strong ACT or SAT scores. Beyond academic excellence we are looking for students who demonstrate leadership, community engagement, and passion.

Students are considered freshman applicants if they have not yet completed high school (secondary-level education); have not earned a GED/HSED (but will by the time they enroll at UW–Madison); or have not enrolled in a college or university in a degree-granting program since graduating high school or earning a GED/HSED. For more information about admission requirements and expectations of freshman applicants please see our website (https://www.admissions.wisc.edu/apply/freshman/requirements.php).

TRANSFER STUDENTS

Successful transfer applicants will have a consistently high or upward grade trend; a strong cumulative grade point average; and rigorous coursework in English composition, college-level math, science, social science, humanities, literature, and foreign language. Admission to the university does not guarantee acceptance to an intended major, which is a separate process from the undergraduate admission process.

Students are considered transfer applicants if they have enrolled in an accredited college or university in a degree-granting program after graduating from high school or earning a GED/HSED. Students must have 24 transferable credits earned at a college or university after high school graduation to be eligible for admission as a transfer applicant. For more information about admission requirements and expectations of transfer applicants please see our website (https://www.admissions.wisc.edu/apply/transfer/requirements.php).

Prospective transfer students can begin satisfying UW–Madison general education and degree requirements before transferring. For more information on selecting courses for the purpose of satisfying UW–Madison requirements, see Transfer Admissions (https://www.admissions.wisc.edu/apply/transfer). Transfer credit is generally given for college-level courses taken at a degree-granting institution accredited by a CHEA-recognized organization (http://chea.org). Courses must be similar in nature, level, and content to UW–Madison undergraduate courses and apply to a UW–Madison academic program. Students may wish to consult the UW–Madison Transfer Credit Policy (https://www.admissions.wisc.edu/apply/transfer/transfer_credit.php) for more details.

REENTERING STUDENTS

Students previously registered at UW–Madison in an undergraduate degree program who wish to resume undergraduate study after an absence of a semester or more are considered reentry students. Reentry students must file an application for readmission but are not subject to the application fee.

To guarantee an early enrollment appointment time, reentry students should submit the complete application by February 1 for the fall term or by October 1 for the spring term. In addition to submitting an application, reentry applicants must submit official transcripts for any work completed elsewhere since last enrolled at UW–Madison, a list of courses in progress (if applicable), and an academic action from the dean's office if they are in "dropped" or "must obtain permission to continue" status.

NONDEGREE UNIVERSITY SPECIAL AND GUEST STUDENTS

Undergraduate students visiting from other universities or recent UW–Madison graduates may desire to enroll at UW–Madison as nondegree University Special and Guest students. Contact the Division of Continuing Studies, Adult Career and Special Student Services (http://www.continuingstudies.wisc.edu/advising).

PLACEMENT TESTS

Each student comes to UW–Madison with a unique set of skills and academic preparation. To asses where each student stands in beginning to meet their General Education Requirements (p. 22), placement tests provide academic advisors with the tools to help determine in which courses students should enroll. Placement tests are required of all incoming freshman and some transfer students depending on college course work. Other exams such as ACT, SAT, SAT II, TOEFL, Advanced Placement (AP), International Baccalaureate (IB), etc. do not satisfy the requirement of placement tests, however, scores on these exams may assist in appropriate course enrollment advising.

UW Placement tests are developed by faculty and instructional staff from various UW System campuses and led by Testing and Evaluation Services (https://testing.wisc.edu) (T&E). T&E conducts studies to support the development of these tests and effectively uses the results to place incoming students into appropriate levels of English, math, and foreign language.

Outlined below are the situations typical for requiring placement tests. The Office of Admissions and Recruitment (https://www.admissions.wisc.edu) determines which placement tests are required. After students are admitted to the University of Wisconsin–Madison, they will receive an email from the Office of Admissions and Recruitment indicating which placement tests are required.

LANGUAGE PLACEMENT EXAMS

The UW System offers placement exams for French, German and Spanish that are available through the Regional Placement Testing Program. Students are encouraged to take a foreign language placement test if they plan to continue studying a foreign language they have already taken in high school or college. If no placement exam is taken, students may enroll in the first semester course. UW–Madison offers language instruction in more than 30 languages. For additional information about

placement, see Languages at UW–Madison (http://languages.wisc.edu/advising/placement).

MATH PLACEMENT EXAMS

This examination is required for students admitted to undergraduate degree granting programs who:

1. Are admitted as first-year students
2. Are admitted as transfer students and

A. Have not previously completed the UW System math placement exam.

OR

B. Do not have credit for the UW–Madison direct equivalent of MATH 112, MATH 113, MATH 114, MATH 211, or any MATH course that is numbered higher than 211.

(For students who have a course in progress at the time of admission, it is assumed they will complete the course, so they are not asked to take the placement test; if they do not complete or pass the course, they may be required to take the placement test to demonstrate minimum math proficency.)

OR

C. Have completed the equivalent of MATH 96 at a UW System institution.

Notes:

Students must demonstrate minimum math proficiency before they enroll in a Quantitative Reasoning Part A course. Satisfaction of Quantitative Reasoning Part A from a math course that is transferred in does not automatically exempt students from the UW math placement test. MATH 101 equivalents will be converted to MATH 96, and/or will be reviewed by the math department for possible MATH 96.
See also the Mathematics Placement Chart (https://www.math.wisc.edu/undergraduate/math-placement-tech-algorithm-uw-madison).

ENGLISH PLACEMENT EXAMS

Two exams—the UW English Placement Test (UWEPT) and the UW–Madison English as a Second Language Assessment Test (MSNESLAT)—are used to place students into courses focused on development of skills needed for success in college-level communication tasks.

UW English Placement Test (UWEPT)

The UWEPT is taken by students admitted to undergraduate degree-granting programs who:

1. Are admitted as first-year students and are not required to take the MSNESLAT (see next section)

OR

2. Are admitted as transfer students and are not required to take the MSNESLAT (see next section) and

A. Have not previously completed the UW System English Placement Exam.

OR

B. Do not have credit for the UW–Madison equivalent of a Communication Part A (p. 22) course.

UW–Madison English as a Second Language Assessment Test (MSNESLAT)

The MSNESLAT is taken by all students who are required to submit a TOEFL or IELTS score for admission to UW–Madison.

The MSNESLAT is designed to evaluate English language proficiency, and to place students into English as a Second Language courses that help students improve skills in the written and spoken English used in academic contexts. Students who take the MSNESLAT and obtain a score that does not exempt them from ESL 118 must satisfy the university's expectation of college-level English language proficiency. This can be done by taking ESL 118 or by achieving a score of exempt on the MSNESLAT.

RETROACTIVE LANGUAGE CREDIT

In some schools and colleges at UW–Madison, it is possible to earn retro credits for prior work completed in a foreign language. To earn these credits, students must take a course above the first-semester level on the UW–Madison campus in French, German, Hebrew, Italian, Latin, Portuguese, Spanish, or any other language in which they have some proficiency and the course is also offered on the UW–Madison campus. The course must be designated with the Foreign Language attribute of 2nd, 3rd, 4th, or 5th semester language course and must be the first foreign language course taken by the student after enrolling in the university. Students who take a college-level language course while still in high school may still pursue retro credits at the university.

Students interested in earning retro credits should plan to take the foreign language placement test and consult with the foreign language advisor at SOAR (http://soar.wisc.edu). Students must enroll in the language course prior to earning 30 degree credits (including credits transferred from other colleges but not including AP, CLEP, IB or retro credits in another language) and earn a grade of B or better. UW–Madison honors retro credits earned at previous UW institutions as long as the student enrolled in the course prior to earning 30 credits and earned a grade of B or better. Native speakers of a language are not eligible to earn retro credits in that language. For more information, see Retroactive Credits (p. 313) in the College of Letters & Science section of the *Guide*.

ADVANCED PLACEMENT (AP) AND INTERNATIONAL BACCALAUREATE (IB)

Both Advanced Placement (https://www.admissions.wisc.edu/apply/freshman/apib.php) and International Baccalaureate (https://www.admissions.wisc.edu/apply/freshman/apib.php) Higher Level examinations offer the possibility of receiving credits at UW–Madison. Many high schools offer courses through the College Board's Advanced Placement (AP) program or the International Baccalaureate (IB) program. UW–Madison offers degree credit based on a student's performance on the AP and IB exams administered in high schools. (AP and IB exams must be taken before entering UW–Madison.) Students who receive credit for a particular course through AP or IB and take the same course at UW–Madison will not receive degree credit twice; however, the grade in the UW–Madison course will be included in the overall grade point average.

GCE ADVANCED LEVEL (A-LEVEL)

In many cases, students may receive advanced-standing credit for some A-level (https://www.admissions.wisc.edu/apply/freshman/apib.php) exams. After a student has been admitted, the Office of Admissions and Recruitment (https://www.admissions.wisc.edu) will perform an official evaluation of credit for A-Level exam results. In order to grant the credit, we require an official copy of the A-Level exam certificate from the examination board. Credits will not be posted from Results Slips or internal school transcripts. Review the chart (https://www.admissions.wisc.edu/apply/freshman/apib.php) to see how A-

Level credit will be awarded. Examinations not listed in this chart will be evaluated by the Office of Admissions and Recruitment for appropriate advanced standing credit.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) (https://www.admissions.wisc.edu/apply/freshman/apib.php) allows students who have gained college-level knowledge outside the classroom to take examinations for possible college credit. Each exam is 90 minutes long and is made up primarily of multiple-choice questions. Some exams include an essay; however, UW–Madison does not require the essay for any CLEP exam. Credit will be granted only to those students who have completed fewer than 16 semester hours of college credit when the examinations are taken. Students must earn a minimum score of 65 to receive credit. The scores for awarding credit at the University of Wisconsin–Madison do not necessarily match those recommended by the American Council on Education.

CREDIT BY DEPARTMENTAL EXAMINATION

Students may acquire knowledge, skills, and competencies through experiences that are academic in nature but may not necessarily correspond to a setting in which UW–Madison awards traditional credit. Credit by department examination is one opportunity for undergraduate students to demonstrate mastery of material that is equivalent to what would be learned in a specific UW–Madison course. The course credits granted through departmental examination are based on a student's demonstration that they have mastered the learning outcomes equivalent to those for the specified course. Examples of circumstances that will lead students to seek credit by examination may be: they completed preparation for advanced placement exams in high school but were unable to take the AP test; they have placement test scores that place them in a course lower than what they think they are prepared for; they did not get transfer equivalency for a course but they judge that they have completed the material in a course at another university.

To learn more about obtaining credit by departmental examination including eligibility and fees, review the policy here (https://kb.wisc.edu/page.php?id=49600).

ADVISING

WHAT IS ADVISING?

At UW–Madison advising is a partnership between students and the network of advisors they build during their time here. Advising is one of the most essential resources available to students and can play a pivotal role in the college experience and beyond. Advisors can help students get the most out of their Wisconsin Experience by helping them make well-informed decisions, sharing strategies for success, supporting them as they encounter challenges, connecting them to resources, and providing information about campus policies and procedures.

There are many reasons to see an advisor and advising is not limited to certain subjects or specific months of the year. Here are some of the many topics that advisors can help students with:

- Setting academic, career, and life goals
- Connecting a major to a career
- Creating a graduation timeline plan
- Selecting courses and fulfilling degree requirements
- Connecting with tutors
- Getting involved with campus organizations
- Practicing for job interviews
- Choosing a study abroad program
- Finding an internship
- Researching volunteer opportunities
- Understanding university policies and deadlines
- Talking about graduate school
- Proofreading resumes and cover letters

To find contact information for advisors, including the assigned advisor, see this link (http://www.advising.wisc.edu/content/find-an-advisor).

SCHOOL AND COLLEGE ACADEMIC ADVISING OFFICES

UW–Madison has eight undergraduate schools and colleges. All undergraduates are assigned to an advisor in their area of academic interest, or to a Cross-College Advising Service advisor who specializes in working with students who are deciding on an academic major.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES (CALS)

Academic Affairs Office
cals.wisc.edu/academics/undergraduate-students/advising (http://cals.wisc.edu/academics/undergraduate-students/advising)

COLLEGE OF ENGINEERING (EGR)

Engineering Academic Advising

BBA Advising Center
bus.wisc.edu/bba/mybiz (http://bus.wisc.edu/bba/mybiz)

CROSS-COLLEGE ADVISING SERVICE (CCAS)

The Cross-College Advising Service (CCAS) (https://ccas.wisc.edu) is a campuswide advising office for undergraduates who are in the process of deciding on a major and want to explore the many academic opportunities on campus. CCAS also assists students who are considering changing majors or who have not been admitted to limited-enrollment programs and are evaulating other options. CCAS advisors are knowledgeable about all the programs and majors offered by the eight undergraduate schools and colleges on campus. Each year at SOAR (Student Orientation, Advising, and Registration) (http://soar.wisc.edu), approximately one-third of entering students in the entering class self-identify as "undecided/exploring" and are assigned to CCAS advisors.

In addition to the main CCAS office in Ingraham Hall, CCAS has residence hall advising offices in Chadbourne Residential College, Sellery Hall, Witte Hall, Ogg Hall, and Dejope Hall. The Dejope office is available to all students in Lakeshore-area residence halls.

CAREER PLANNING

HANDSHAKE

Students can find jobs and internships, and connect to campus career centers and events through their free UW–Madison Handshake account. The Handshake app is available on the MyUW dashboard—add the Handshake app by visiting my.wisc.edu (https://my.wisc.edu).

All students are encouraged to work with a career advisor. Each individual school or college offers career services, and the Career Exploration Center (CEC) works with students exploring different majors and careers. Links to each of the campus career services offices are available online at careers.wisc.edu (https://careers.wisc.edu).

Career planning is a multi-year process that includes self-assessment and reflection, exploring academic and career options, gaining experience in areas of interest, and ultimately organizing and conducting a job or graduate school search.

Students work with professional career advisors to engage in a wide variety of career planning activities to prepare for life after earning a degree from UW–Madison: educational workshops, job shadowing, informational interviewing, mock interviews, internships, career fairs and more. Active engagement in these activities assists students in achieving career readiness, which is “the attainment and demonstration of competencies that prepare college graduates for a successful transition into the workplace.” (National Association of Colleges and Employers).

CAREER ADVISING

CAREER EXPLORATION CENTER (CEC)

The Career Exploration Center (CEC) (https://ccas.wisc.edu/careerexplorationcenter) is the leading campus resource for undergraduate students exploring majors and careers. CEC professional career advisors help students focus on their interests, values, and strengths to give them the tools they need to make decisions about their careers and their futures.

The CEC offers individual career advising appointments, workshops on a variety of topics that engage students in major and career exploration, a robust career library, career assessments (often referred to as “career tests”), and the Majors Fair**,** which provides students the opportunity to speak with representatives from more than 100 academic programs in one place.

PRE-PROFESSIONAL STUDY

CENTER FOR PRE-HEALTH ADVISING

prehealth.wisc.edu (https://prehealth.wisc.edu)

Pre-Health—e.g., Pre-Med, Pre-PA, Pre-OT, Pre-Vet MD—is not an undergraduate major. Students should major in areas of true interest and work closely with the Center for Pre-Health Advising (CPHA) if they are considering further schooling and careers in the following areas: medicine, dentistry, occupational therapy, physical therapy, physician assistant, public health, pharmacy, chiropractic, optometry, veterinary medicine, or other graduate-level health programs.

CENTER FOR PRE-LAW ADVISING

prelaw.wisc.edu (https://prelaw.wisc.edu)

Pre-law is not an undergraduate major. Students should work with the Center for Pre-Law Advising if they are considering, preparing for, or applying to law school.

STUDY ABROAD ADVISING

SCHOOL/COLLEGE STUDY ABROAD OFFICES

Several schools and colleges have their own study abroad offices and offer information about study abroad programs that are directly related to certain areas of study.

- College of Agricultural and Life Sciences
- College of Engineering
- University of Wisconsin Law School
- Wisconsin School of Business

INTERNATIONAL ACADEMIC PROGRAMS (IAP)

studyabroad.wisc.edu (http://studyabroad.wisc.edu)

International Academic Programs (IAP) offers more than 200 programs on six continents for students of all majors. Courses through IAP programs can count toward degree requirements, allowing students to stay on track for graduation. Scholarships, grants, and financial aid are available.

INTERNATIONAL INTERNSHIPS

internships.international.wisc.edu (http://internships.international.wisc.edu)

The International Internship Program (IIP) works with students of all majors looking to gain experience and explore careers through international internships. Students can intern around the world or in the United States. Advising, academic credits, and scholarships are available.

NON-UNIVERSITY STUDY ABROAD

Students considering participating in a study abroad program sponsored by a university other than UW–Madison should contact International Academic Programs (IAP) for more information.

GRADUATING IN FOUR YEARS OR FEWER

UW–Madison encourages, supports, and expects students to work with academic advisors to create, maintain, and plan a graduation timeline. Students should consult with their assigned academic advisor(s) before each enrollment period, and more as needed.

To ensure a timely graduation, students should discuss the following topics with their advisor:

- Exploring interests while making progress on degree requirements
- Setting and achieving academic and career goals
- Academic challenges and connecting to resources that support academic success
- Procedures and requirements for declaring a major
- Using the Degree Audit Reporting System (DARS) (https://registrar.wisc.edu) to check progress toward the degree
- Any changes to a declared major, as well as alternative plans if applying to a competitive limited-enrollment program
- A strategic course schedule to stay on track for graduation

A reciprocal agreement for a four-year graduation plan is available for most degree programs to students entering UW–Madison as freshmen. Students interested in the agreement must attend SOAR (Student Orientation, Advising, and Registration). For more information see UW–Madison Four-Year Graduation Agreement (https://provost.wisc.edu/uw-madison-four-year-graduation-agreement).

DEGREE AUDIT REPORTING SYSTEM (DARS)

A Degree Audit Reporting System (DARS) (https://registrar.wisc.edu/dars_student.htm) report is an automated summary of a student's degree progress. All schools and colleges at UW-Madison use DARS to audit the progress of *most* undergraduate degree programs and certificates.

DARS reports indicate which requirements are completed, which are complete with in-progress courses, and which remain unsatisfied. The report may specify courses that meet unsatisfied requirements. For most undergraduate programs, DARS is the tool used to determine completion of the program and/or eligibility to graduate.

Students can request and review their DARS in the Student Center via MyUW, and should contact their assigned advisor(s) for help reading and interpreting their DARS report.

OFFICER EDUCATION

The Reserve Officers Training Corps (ROTC) prepares students to become commissioned officers in the U.S. Air Force, Army, Navy, or Marines, as well as for civilian careers. Students may be enrolled in ROTC while pursuing a degree at UW–Madison. ROTC courses are open to all undergraduates who have met the prerequisites. The number of ROTC credits that count toward a UW–Madison degree can vary by department and school or college. Prospective and registered students should contact the military program offices listed in this section of the catalog for information about regular course offerings, summer camp programs, and scholarships.

AIR FORCE ROTC—AEROSPACE STUDIES

The Air Force ROTC (AFROTC) program is the primary path available to enter the U.S. Air Force as an officer. Students enroll in the AFROTC program while working toward the bachelor's degree in **any major** they choose. They attend an aerospace studies class each semester, a hands-on leadership laboratory, and weekly physical fitness sessions, while learning about how the Air Force works and deciding which job fields match their interests. Upon graduating, they enter **active duty** service as second lieutenants, in leadership and management roles in the Air Force.

Most career fields have an active-duty commitment of four years after college. If students choose to separate from the Air Force at that time, they can pursue other careers with experience and the distinction of "military officer" on their resumes.

AFROTC is designed for students with three or more years remaining until graduation. To receive an officer's commission, AFROTC cadets must complete all necessary requirements for a degree as well as courses specified by the Air Force. Courses are often taken for academic credit as part of a student's electives. The amount of credit given toward a degree for AFROTC academic work is determined by the student's school or college, and major department.

REQUIRED COURSES FOR AIR FORCE ROTC/AEROSPACE STUDIES

General Military Course, total of 4 credit hours:

Code	Title	Credits
A F AERO 101	The Foundations of the United States Air Force I	1
A F AERO 102	The Foundations of the United States Air Force II	1
A F AERO 201	The Evolution of US Air and Space Power I	1
A F AERO 202	The Evolution of US Air and Space Power II (General Military Course, total of 4 credit hours:)	1

Professional Officer Course, total of 12 credit hours:

Code	Title	Credits
A F AERO 301	Leadership Studies I	3
A F AERO 302	Leadership Studies II	3
A F AERO 401	National Security Affairs	3
A F AERO 402	Preparation for Active Duty	3

Scholarships are available to qualified applicants. Scholarships may provide full tuition, laboratory and incidental fees, and reimbursement for textbooks. In addition, scholarship cadets receive a nontaxable allowance ranging from $300 to $500 per month, depending on academic/AFROTC year. Juniors and seniors automatically receive $450 and $500, respectively.

All AFROTC courses are open to all students regardless of membership in the program. Students are invited to take one of the program's courses to determine if AFROTC is right for them with no obligation to join. For more information, please contact the Recruiting Officer at 608-262-3440 or 608-265-4812; afrotc@mailplus.wisc.edu.

MILITARY SCIENCE—ARMY ROTC

The Army Reserve Officers' Training Corps (ROTC) is the nation's largest leadership and management-development training program. It offers the opportunity to earn a commission as a Second Lieutenant for Active Duty, Army Reserve, or Army National Guard while pursuing an academic degree. It enables young men and women to prepare themselves to be leaders in the Army or the civilian career field of their choice. The traditional four-year Army ROTC Program is divided into a two-year Basic Course and a two-year Advanced Course. A non-contracted student enrolled in the Basic Course does not incur a military service obligation.

BASIC COURSE

This instruction introduces the student to fundamental military and leadership subjects. It is normally taken over four successive semesters, but may be completed in as few as two semesters. Students should discuss available options with the Scholarship & Enrollment Officer before registering for courses if they have fewer than four semesters to complete the Basic Course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take our class and lab with no military obligation. Students can enroll in a lecture without enrolling in the lab, but cannot enroll in a lab without the corresponding lecture. Labs are intended to provide practical leadership experience and military skills training such as map reading, land navigation, field training, and rifle marksmanship. Additionally, students who start in the Aerospace Studies or Naval Science programs can switch to Military Science and continue on toward graduation with no penalty.

Code	Title	Credits
MIL SCI 101	Foundations of Officership	1
MIL SCI 110	Leadership Lab 1A	1
MIL SCI 102	Basic Leadership	1
MIL SCI 111	Leadership Lab 1B	1
MIL SCI 201	Individual Leadership Studies	2
MIL SCI 210	Leadership Lab 2A	1
MIL SCI 202	Leadership and Teamwork	2
MIL SCI 211	Leadership Lab 2B	1

ADVANCED COURSE

Students who have completed the Basic Course or an equivalency (see Two-Year Program) and have passed all enrollment eligibility criteria continue on into the Advanced Course. This course consists of the following lectures, leadership labs, a military history course, physical fitness training sessions, and a four-week summer camp (Advance Camp) at Fort Knox, Ky. During labs and physical training sessions students are

provided practical leadership opportunities to prepare them for Advance Camp and their future military careers. Students normally attend Advance Camp between their junior and senior years of Military Science. Students must complete all components of this course to earn a commission.

Code	Title	Credits
MIL SCI 301	Leadership and Problem Solving	2
MIL SCI 310	Leadership Lab 3A	1
MIL SCI 302	Leadership and Ethics	2
MIL SCI 311	Leadership Lab 3B	1
MIL SCI 401	Leadership and Management	2
MIL SCI 410	Leadership Lab 4A	1
MIL SCI 402	Officership	2
MIL SCI 411	Leadership Lab 4B	1
MIL SCI 491	American Military History	3

TWO-YEAR PROGRAM

Students who are veterans, members of the Army National Guard/ Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the Advanced Course. Students who did not complete the ROTC Basic Course (see above), to include graduate and doctoral students, but have two years of academic study remaining may be eligible to attend Basic Camp. This option compresses the Basic Course curriculum into a four-week summer camp held at Fort Knox, KY prior to starting the Advanced Course. Students who believe they qualify for this program should consult with the Scholarship & Enrollment Officer for more information.

SCHOLARSHIPS

Qualified students may compete for Army ROTC scholarships ranging from two to three years in duration. High school students can apply for a four year scholarship during their senior year of high school. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition & fees (both in and out-of-state) or room and board (capped at $5,000/semester) but not both, $600/semester for textbooks and laboratory expenses, and a tax fee subsistence stipend of $420 for each month of the regular school year. Interested students should consult with the Scholarship & Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Josh Beyerl in the Department of Military Science, 1910 Linden Drive, 608-262-3411, armyrotc@mailplus.wisc.edu.

NAVAL SCIENCE—NAVAL ROTC

MISSION

The Naval ROTC Program was established to develop future officers mentally, morally and physically and to instill in them with the highest ideals of duty, and loyalty, and with the core values of honor, courage and commitment in order to commission college graduates as Naval officers who possess a basic professional background, are motivated toward careers in the Naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship and government.

PROGRAM DESCRIPTION

The purpose of the Naval ROTC Program is to educate and train qualified young men and women for service as commissioned officers in the Navy's unrestricted line, and the Marine Corps. As the largest single source of Navy and Marine Corps officers, the Naval ROTC Scholarship Program plays an important role in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Selected applicants for the four-year Naval ROTC Scholarship Program are awarded scholarships through a highly competitive national selection process, and receive full tuition, books stipend, educational fees and other financial benefits. Upon graduation, midshipmen are commissioned as active duty officers in the Navy's unrestricted line or the Marine Corps.

The four-year Naval ROTC Scholarship Program is available to qualified students who graduate from high school before August 1 of the year they intend to start college, and have earned less than 30 credit hours of college-level courses.

Students may affiliate with the Naval ROTC program, with the approval of the Professor of Naval Science, as College Program midshipmen, but receive none of the monetary benefits of scholarship students. College program midshipmen may apply and compete for 3-, 2-, or 1-year NROTC scholarships in each of their freshman, sophomore and junior academic years.

Students selected for the Navy ROTC Scholarship Program make their own arrangements for college enrollment and room and board, and take the normal course load required by the college or university for degree completion.

Upon graduation, midshipmen who complete all academic requirements in the Navy ROTC program are commissioned as an Ensign in the Navy or a 2nd Lieutenant in the Marine Corps and will be required to serve a minimum of five years of active military service. (Additional service requirements may apply for specific service assignments; e.g., pilot, nuclear power officer.)

PROGRAM REQUIREMENTS

- Complete all requirements for a bachelor's degree.
- Complete specified Naval Science courses:

Navy Option

Code	Title	Credits
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 202	Navigation	3
NAV SCI 301	Naval Engineering	3
NAV SCI 302	Naval Weapons	3
NAV SCI 401	Naval Operations	3
NAV SCI 402	Naval Leadership and Ethics	3

Marine Option

Code	Title	Credits
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 350	Fundamentals of Maneuver Warfare	3
NAV SCI 351	Land Campaigns	3
NAV SCI 402	Naval Leadership and Ethics	3

- In addition (or concurrent) to prescribed undergraduate degree and Naval Science course load, midshipmen must also satisfy these academic requirements:
  - Calculus (two semesters, by end of sophomore year). Not required for Marine option students.
  - Physics (two-semesters of calculus-based physics, by end of junior year). Not required for Marine option students.
  - English grammar and composition (two-semesters).
  - National Security Policy/American Military Affairs (one-semester).
  - World Culture/Regional Studies (one-semester; certain countries or cultures do not satisfy). Not required for Marine option students.
- Maintain a minimum, cumulative 2.5 GPA.
- Register for, and attend a one credit Naval Science leadership lab each semester (NAV SCI 175 Introductory Naval Laboratory I, NAV SCI 176 Introductory Naval Laboratory II, NAV SCI 275 Elementary Naval Laboratory I, NAV SCI 276 Elementary Naval Laboratory II, NAV SCI 375 Intermediate Naval Laboratory I, NAV SCI 376 Intermediate Naval Laboratory II, NAV SCI 475 Advanced Naval Laboratory I, NAV SCI 476 Advanced Naval Laboratory II)
- Participate in a 4-6-week training period each summer

SUMMER TRAINING REQUIREMENTS

A significant portion of a midshipman's professional training during their four-year curriculum is received during summer training.

Navy option midshipmen attend summer training, to include Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors and seniors.

Marine Corps option summer training includes Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors. All rising senior Marine option midshipmen attend the 6-week Marine Corps Officer Candidates School in Quantico, VA.

Midshipmen must ultimately make decisions as to which warfare area they will request to be commissioned into; CORTRAMID and the various summer training programs are designed to instill awareness of these areas and provide midshipmen with the background necessary to make informed decisions regarding their career choice. Midshipmen select their order of preference of available warfare communities and are ultimately assigned based on their class rank and the needs of the Navy and Marine Corps.

POSSIBLE SUMMER TRAINING ASSIGNMENTS

- CORTRAMID: Midshipmen assigned to this training will travel to a Fleet concentration area on either the East or West coast and spend a week with each of the following warfare communities: surface ship, submarine, aviation, and Marine Corps.
- Nuclear Power: Midshipmen can be assigned to a nuclear submarine or aircraft carrier.
- Ashore Aviation Option: Selected, qualified midshipmen train with a shore-based Navy aviation squadron, including flight time if feasible.
- Surface Warfare: Midshipmen can be assigned to a Navy ship in the United States or in overseas ports.

PEOPLE

Air Force ROTC—Aerospace Studies: Lieutenant Colonel John Pecarina, Professor of Aerospace Studies/Detachment Commander; Captain Shane Schuelke, Assistant Professor of Aerospace Studies/Recruiting Officer

Military Science—Army ROTC: Professor Lieutenant Colonel Cheney; Assistant Professor Captain Schwartz, Assistant Professor; Assistant Professor Captain Ali; Assistant Professor Captain Schultz; Enrollment Officer: Josh Beyerl

Naval Science—Professor, CAPT Zacharski; Associate Professor CDR Burmeister; Assistant Professors LT Cero, LT Heimke, and Marine Capt. Simonds. The assistant professors act as undergraduate advisors and may be contacted through the department office.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The Wisconsin (https://wisconsinexperience.wisc.edu)Experience is UW–Madison's vision for the total student experience, which combines learning in and out of the classroom. Tied to the Wisconsin Idea and steeped in our long-standing institutional values—the commitment to the truth, shared participation in decision-making, and service to local and global communities—the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

Through the Wisconsin Experience, our students will engage in the following areas of intellectual and personal growth.

Empathy and Humility

- Develop and demonstrate cultural understanding of self and others
- Engage locally, nationally, and globally in a respectful and civil manner
- Appreciate and celebrate one another's abilities, views, and accomplishments

Relentless Curiosity

- Actively learn with expert instructors, scholars, and peers
- Engage in creative inquiry, scholarship, and research
- Develop resilience, and foster courage in life and learning

Intellectual Confidence

- Develop competence, depth, and expertise in a field of study
- Integrate ideas and synthesize knowledge across multiple contexts
- Exercise critical thinking and effective communication

Purposeful Action

- Apply knowledge and skills to solve problems
- Engage in public service, partner with others, and contribute to community
- Lead for positive change

STUDENT LEARNING AT UW–MADISON

Student engagement and activism are deeply rooted in UW–Madison's rich history of academic and research excellence. Occasionally, students are expected to help the university better understand and improve student learning by participating in evaluative activities, which include surveys, focus groups, and questionnaires, and by providing examples of their work through presentations, posters, demonstrations, and writing samples. We rely on the student perspective when assessing the effectiveness of academic and co-curricular programs. By participating, students help improve their own educational and related experiences and contribute to better educational experiences for future students.

ACADEMIC ENRICHMENT AND HONORS PROGRAMS

UW–Madison offers students many ways to enrich their academic program, regardless of the major field of study they choose to pursue. Engaging in research, studying abroad, being part of learning communities, participating in university honors, becoming a student leader, engaging in service learning—these are all vital components that enhance and strengthen classroom learning. This partnership between in- and out-of-classroom learning form the foundation of the *Wisconsin Experience*. The university encourages students to take advantage of opportunities to integrate their learning experiences.

Honors Programs

Honors programs, which vary slightly among the schools and colleges, are designed for students who wish to undertake work that is more intensive than regular coursework. High grade point averages are required to maintain honors student standing. Students should refer to Honors and Scholars Programs (http://provost.wisc.edu/honors_schools_colleges.htm) for more information including specific school or college programs or to contact an honors advisor.

Undergraduate Research Opportunities

One of the most exciting things in life is to discover something new. UW–Madison provides unique opportunities to learn from and work with some of the world's leading researchers and scholars. Options range from assisting with professors' ongoing research to designing and directing one's own projects. For many examples, see Undergraduate Research Opportunities (http://provost.wisc.edu/undergradresearch.htm). The Undergraduate Research Scholars Program (http://urs.ls.wisc.edu) is one opportunity available in the first or second year of study. Students may cap off their undergraduate degree with a senior thesis or senior honors thesis and are encouraged to present their work at the Undergraduate Symposium. For program descriptions, see Undergraduate Symposium (https://ugradsymposium.wisc.edu). For a sampling of the many grants and awards available to support and honor this work, visit the Undergraduate Academic Awards Office (http://provost.wisc.edu/undergrad/scholarship.html).

Service Learning

Undergraduates have access to more than 100 service-learning courses each year. These courses emphasize hands-on experiences that address real-world issues as a venue for educational growth. More information on service learning is available at the Morgridge Center for Public Service (http://morgridge.wisc.edu).

Learning Communities

UW–Madison's rich tradition of supporting learning communities (http://www.housing.wisc.edu/residencehalls-lc.htm) means that the traditional classroom is not the only place where students learn. Students may choose to participate in any of the many residential and nonresidential learning communities, where students, faculty, and staff work together as both learners and teachers to pursue their academic interests. For more information about residential options, see this link (http://www.housing.wisc.edu/residencehalls-lc.htm).

STUDY ABROAD PROGRAMS

Studying abroad extends the boundaries of the classroom to the world. It is an exciting way for students to complement and enhance their on-campus learning while earning meaningful credit toward the major and degree. Each year UW–Madison sends more than 2,000 students on study abroad programs around the globe, including domestic study away options within the United States.

International Academic Programs (IAP) (https://www.studyabroad.wisc.edu) serves as the central study abroad office on campus, offering more than 200 programs in over 60 countries around the world. IAP program offerings, available to all majors for students at all levels, range from short-term faculty-led opportunities to intensive language study, internships, a semester or a year at a university abroad, service-learning, and programs with special themes. Students can visit the Study Abroad Resource Center, 301 Red Gym, to meet with returned study abroad students and professional study abroad advisors who can help students prepare and research study abroad options.

Additionally, in partnership with IAP, the College of Agricultural and Life Sciences, the College of Engineering, and the Wisconsin School of Business offer programs geared specifically for their academic disciplines. All approved UW–Madison programs share policies, procedures, and best practices, and are featured on the UW Study Abroad Program Search (https://studyabroad.wisc.edu/programs).

The Value of Study Abroad

Employers are increasingly looking for workers who not only have technical knowledge, but also "soft skills" such as critical thinking, problem solving, time management, and communication skills deemed necessary for success in a global workforce. Study abroad is one of the best ways students can acquire global skills and stand out to potential employers. Study abroad alumni have better job prospects. Based on a survey conducted by IES Abroad (http://thepienews.com/news/us-study-abroad-alumni-have-better-job-prospects), 90 percent of study abroad alumni found their first job within six months of graduation. In addition to being able to experience new customs, cultures, interests, and food, alumni have reported that study abroad increased their confidence and had a lasting impact on their worldview (https://www.iesabroad.org/study-abroad/benefits/alumni-survey-results).

Regardless of major, students will find that study abroad has much to offer. The variety of program sites and durations (semester, spring

break, summer, winter, year) allow students to select programs based on individual academic interests and personal goals and objectives.

Access and Meaningful Credit for All Majors

In general, credits earned abroad can count toward fulfilling (https://studyabroad.wisc.edu/academics) college and major requirements in any UW–Madison school or college. Seniors in most schools and colleges who complete their major and degree requirements while abroad on a UW–Madison program can graduate at the end of their study abroad program.

Each study program has its own eligibility requirements. Students are encouraged to talk with their academic advisors early in their academic careers about how study abroad can fit into their academic plans and future career goals. We are also working with departments to create Major Advising Pages (https://studyabroad.wisc.edu/academics/major-advising-pages-maps) to highlight programs that work best for students' degree plans.

Costs and Funding

Students who are thinking about studying abroad or have already decided to do so may be concerned about how they will fund the experience. We frequently hear from students that the program cost is a primary factor in deciding whether they are able to pursue studying abroad. Instead of tuition, students pay a program fee to cover the actual costs of the experience, which is unique to each program. Programs vary widely in cost, so it is likely that we have a program for every budget. Sometimes studying abroad is no more expensive than studying on campus, and other times the cost can be higher. We work with students to create funding (https://studyabroad.wisc.edu/funding) plans for their time abroad.

Students who study abroad in UW–Madison-sponsored programs may be eligible to use federal financial aid toward the costs of the program. Students should meet with the UW–Madison Office of Student Financial Aid to discuss eligibility requirements. In addition, students can apply for scholarships (https://www.studyabroad.wisc.edu/scholarships.html) specifically designated for use with study abroad programs. These include UW–Madison, national, and international scholarship opportunities. Students can also use most campus and academic department scholarships for UW–Madison-sponsored study abroad programs.

Diversity and Inclusion

UW Study Abroad is committed to providing quality study abroad and domestic study away programs for every UW–Madison student. We work strategically to identify, address, and remove barriers that may prevent participation and to provide a welcoming and inclusive environment for students. Our staff actively engages with students, faculty, and staff from diverse backgrounds and prioritizes the continuous development of our knowledge and cultural competence. We also recognizes the importance of increasing access to study abroad for historically underrepresented student populations. We are committed to diversity and inclusion so that every student can engage with and understand their identity through a new lens and continue to develop and make progress on their personal, professional, and academic goals.

REQUIREMENTS FOR UNDERGRADUATE DEGREES

REQUIREMENTS FOR UNDERGRADUATE DEGREES

The University of Wisconsin–Madison sets minimum standards that must be met by all students pursuing an undergraduate degree. The information in the following paragraphs provides general information about study at UW–Madison. Requirements may vary among the schools and colleges, and for specific programs. Students should learn about and understand the specific requirements for their program of study.

TOTAL DEGREE CREDITS

To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit). Requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. Undergraduate Majors (p. 12).

RESIDENCE CREDIT

Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats, as credits earned in UW–Madison Study Abroad/Study Away programs. Some schools and colleges may have additional requirements concerning courses taken in residence; students should refer to the specific school or college section of the *Guide* or consult with an advisor.

UNDERGRADUATE MAJOR DECLARATION

Undergraduate degrees at UW–Madison presume that students are completing a program of study that consists of a degree program that combines the requirements for the degree with focused study in a discipline, or that combines school or collegewide requirements with an undergraduate major in which they pursue focused study. All undergraduates are expected to have declared or to have been admitted to their focused area of study by the end of the semester in which they have accumulated 86 credits. Students who have not met this expectation may be prevented from enrolling in future terms until they meet with their advisor. Some schools and colleges have additional requirements governing when majors may be declared; students should refer to the specific school or college section of the *Guide* and consult with an advisor about declaring their major. For additional details, see Policy on Major Declaration for Schools/Colleges That Enroll Undergraduates (https://kb.wisc.edu/vesta/page.php?id=58465).

ACADEMIC PROBATION

Undergraduate students must maintain the minimum academic thresholds, including the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

GENERAL EDUCATION REQUIREMENTS

All undergraduate students at UW–Madison must complete the university-wide General Education Requirements, which are designed to convey the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. These requirements provide for breadth across the humanities and arts, social studies, and natural sciences; competence in communication, critical thinking, and analytical skills necessary for success in college and beyond; and investigation of the issues raised by living in a culturally diverse society. This core is intended to provide students with intellectual and practical skills, basic knowledge of human cultures and the physical world, strategies for understanding these topics, and tools intended to contribute to their sense of personal and social responsibility. General Education complements the work students do in their majors and degrees. Together, these requirements help students learn what they need to know not just for making a living, but also for making a life.

Completing the General Education Requirements is an important part of achieving these competencies, and to do so, students choose from many courses in communication, ethnic studies, quantitative reasoning, and breadth of study across disciplines in the natural sciences, humanities, literature, and arts, and social and behavioral sciences.

Each school and college may choose to allow General Education courses to count toward other degree and/or major requirements. Students should always check with their advisors to discuss any additional degree requirements and determine if students are required to take specific General Education courses or to complete the requirements in a particular order. Students should review their Degree Audit (DARS) report to see how they are progressing toward fulfilling the General Education requirements. Please refer to this website (https://gened.wisc.edu) for more information about the requirements.

The university-wide General Education requirements are:

BREADTH, 13–15 CREDITS, DISTRIBUTED OVER THREE AREAS

All students must complete 13–15 credits of coursework intended to provide a **breadth** of experience across the major modes of academic inquiry. This requirement encourages students to adopt a broad intellectual perspective, to examine the world through investigative, critical, and creative strategies practiced in the natural (computational, biological, and physical) sciences, social and behavioral sciences, as well as in the arts and humanities.

Learning Outcomes: Students acquire critical and creative thinking skills as well as enhance their problem-solving skills through a breadth of study across the humanities and arts, social studies, computational, biological sciences and physical sciences.

In courses satisfying the Breadth requirement, students will:

- articulate examples of significant contributions to human understanding achieved through various “ways of knowing” found in the arts and humanities; social and behavioral sciences; and computational, biological, and physical sciences.
- recognize and articulate the ways in which different disciplines approach questions that call upon different tools of inquiry, understanding, and creative enterprise.
- identify ways in which multiple tools of inquiry and understanding can be used to achieve greater insight into resolving “big” questions (e.g., climate change, poverty, global health etc.), evaluating the strengths and weaknesses of those approaches, and understanding which complementary approaches will help achieve meaningful change.
- evaluate different modes of inquiry across the humanities and arts; social studies; computational, biological, and physical sciences, and identify strengths and weaknesses of those approaches across disciplines when approaching a question.

To achieve these outcomes, students are required to complete courses in the following areas.

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research, understand, communicate about, and interpret creatively the world around us. These "ways of knowing" intersect and overlap, and the ideas presented in one area will often inform and transform what students know and how they think about the others. Students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand their own and others' experience, and to behave in socially responsible ways. (For more information about how this exposure to breadth of inquiry and expression enriches students’ undergraduate experience and complements intensive study in the major, please see the General Education Requirements (https://gened.wisc.edu) website.)

COMMUNICATION, 3 TO 5/6 CREDITS

The **Communication** requirement helps to ensure that all graduates of UW–Madison acquire essential communication and research-gathering skills necessary for success in university course work and beyond. Communication–A (**Comm–A**) and Communication–B (**Comm–B**) courses train students to gather and assess information from a variety of sources and to present different kinds of information, insight, and analysis to diverse audiences. These courses are essential for students’ career success and their preparation for public life in a rapidly changing world. While Comm–A courses focus exclusively on essential communication skills, Comm–B courses provide content instruction in a specific discipline and teach research, writing, and speaking skills in conjunction with the course content. Comm–B courses are offered by departments across campus and vary widely in topic, content, and format.

Learning Outcomes: Students develop skills that enable them to be effective speakers and writers in and out of the classroom.

In courses satisfying the Communication requirement, students will:

- make effective use of information retrieved, organized, and synthesized from appropriate sources.
- present ideas and information clearly and logically to achieve a specific purpose.
- make effective use of communicative forms appropriate to a specific discipline, and adapted to the intended audience.

- use appropriate style and conventions associated with particular communicative forms, genres, or disciplines.

To achieve these outcomes, students must complete the following Communication requirements:

- **Part A. Literacy Proficiency.** 2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete coursework to fulfill this requirement, students may be exempted from Part A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year of undergraduate study.
- **Part B. Enhancing Literacy Proficiency.** 2–3 credits of more advanced coursework for students who have completed or been exempted from Part A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

Please note: Because English is the language of instruction at UW–Madison, Communication A and B courses are taught in English, and student work in them is also completed in English.

ETHNIC STUDIES, 3 CREDITS

The **Ethnic Studies** requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are expected to complete this requirement within the first 60 credits of undergraduate study

Learning Outcomes: Students draw connections between historical and present day circumstances, and consider perceptions and cultural assumptions when examining questions and making decisions.

In courses satisfying the Ethnic Studies requirement, students will:

- articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.
- recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity.
- examine questions and make decisions with consideration for the cultural perspectives and worldviews of others.

The skills listed above apply to students' lives inside and outside the classroom, and by pursuing these objectives, students will further enhance their ability to participate in a multicultural society more effectively, respectfully, and meaningfully. Students complete this requirement by taking one course of at least 3 credits that is designated as an Ethnic Studies course.

QUANTITATIVE REASONING, 3 TO 6 CREDITS

Quantitative Reasoning is the process of forming conclusions, judgments or inferences from quantitative information. The Quantitative Reasoning requirement at UW–Madison has two parts: Part A and B. **Quantitative Reasoning A** courses provide students with skills in mathematics, computer science, statistics or formal logic that are needed for dealing with quantitative information. The acquired skills are broad-based in order to have a positive impact on the readiness of students to take a Quantitative Reasoning B course in a variety of disciplines. **Quantitative Reasoning B** courses allow students to enhance their Quantitative Reasoning Proficiency in a more advanced setting, where they make significant use of quantitative tools in the context of other course material.

Learning Outcomes:

Quantitative Reasoning Part A:

In an introductory course in college-level mathematics, computer science, statistics, or formal logic that is intended to prepare students for more advanced work in a disciplinary context, students will:

- solve problems;
- draw conclusions; and
- develop models and/or interpret data and/or devise algorithms.

Quantitative Reasoning Part B:

In the disciplinary or interdisciplinary context of a course designed to build on the tools of college-level mathematics, computer science, statistics, or formal logic, students will:

- manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information;
- evaluate models and arguments using quantitative information; and
- express and interpret in context models, solutions, and/or arguments using verbal, numerical, graphical, algorithmeic, computational, or symbolic techniques.

The **Quantitative Reasoning Part A** requirement can be satisfied by:

- approved college work while in high school, AP test scores, or placement testing; or
- taking a 3 credit course at UW–Madison with a Quantitative Reasoning A designation.

The **Quantitative Reasoning Part B** requirement, which enhances students' proficiency in this domain, can be satisfied by taking a designated QR-B course of at least 3 credits in a variety of fields of study. Students are encouraged to select a course in keeping with their interests or to satisfy other requirements for their major or degree program.

To ensure timely completion of the undergraduate degree, students must demonstrate minimum math proficiency before they can enroll in a Quantitative Reasoning Part A course. They should complete Part A of the Quantitative Reasoning requirement by the end of their first year, and must complete Part A before they enroll in Part B.

IDENTIFYING COURSES THAT MEET GENERAL EDUCATION REQUIREMENTS

The university offers hundreds of courses that meet the requirements described above. Students should consider their own interests and check with their advisor when deciding which courses to complete. Please note that many undergraduate programs of study have breadth requirements that go beyond these basic university-wide requirements.

The following language is used in the UW–Madison course listings to indicate how courses count toward satisfying the communication, quantitative reasoning, and ethnic studies portions of the General

Education Requirements. Courses that satisfy these requirements are also tagged with a mortarboard symbol. #

- Communication Part A
- Communication Part B
- Ethnic Studies
- Quantitative Reasoning Part A
- Quantitative Reasoning Part B

Note: Some Communication Part B courses carry Communication B credit only at the lecture or section level and/or only in certain semesters; these courses will be indicated in the Schedule of Classes.

Course descriptions also include information about whether courses meet General Education Humanities, Natural Science, or Social Studies Breadth Requirements. (Click on course numbers in the *Guide* to see this information.) Students should also be aware that each school and college may, at its own discretion, designate additional courses that satisfy these requirements. For this reason, students should consult their advisors to obtain information about how these requirements are implemented in the school or college in which they are enrolled.

GENERAL EDUCATION POLICIES

Only undergraduate-level college courses may satisfy General Education Requirements

Directed or Individualized Study may not be used to satisfy General Education Requirements.

Because these requirements assume that students are engaged in focused study within the designated area of general education, requirements cannot be met with portions of courses.

Exemption from General Education: All students are required to meet the fundamental degree requirements of the university, which include general education.

Disability-Based Waivers:The university has determined that waivers to the communication and quantitative reasoning portions of the general education component would fundamentally alter the nature of the University of Wisconsin–Madison degree. Students should not expect to obtain disability-based waivers to the communication and quantitative reasoning portions of the General Education Requirements.

Pass/Fail: Effective fall 2012, all courses taken to meet the University General Education Requirements must be taken on a graded basis. These grades are included in students' GPA calculations according to school/college GPA rules.

GRADUATING

Declaration of Intent to Graduate. When students expect to graduate, they must indicate their intent by completing the graduation application available in the MyUW Student Center. It is the policy of UW–Madison that all work for the degree must be completed and all degree requirements satisfied before the degree can be conferred.

Conferral of Degrees. When students have been certified as having completed all university general education, degree, and major requirements, the degree will be awarded. When the degree is awarded, a diploma will be issued, listing the degree earned, and the transcript updated to reflect the degree, major, and any other approved academic programs completed. Students who have holds (https://kb.wisc.edu/helpdesk/page.php?id=4139) *on their records will not receive their diplomas, or be able to order transcripts, until the holds are cleared.*

Commencement. Students who wish to attend the spring or winter commencement ceremony must indicate their intent by completing the graduation application available via Student Center in My UW (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e4s1) *by the posted deadline* (https://commencement.wisc.edu/information-for-graduates)*. Students may participate in the commencement ceremony* (https://commencement.wisc.edu)*, in which the chancellor and deans symbolically confer the degrees, even if all degree requirements have not been completed. Neither participation in the ceremony nor listing in the program conveys degree conferral. Students will not receive the diploma or transcript notation until all degree requirements are certified as complete by their respective school or college. Should a student's graduation plans change, updates to the intended term of graduation must be indicated via the graduation application in the MyUW Student Center.*

ENROLLMENT AND RECORDS

The Office of the Registrar (https://registrar.wisc.edu) is responsible for maintaining the academic records of students who attend the University of Wisconsin–Madison and for many services associated with these records, including enrollment and grading. The office is located at:

333 East Campus Mall #10101
608-262-3811

Many student services are available online in the Student Center on My UW–Madison (My UW) (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e2s1), including enrolling for courses, viewing grades, and updating address and emergency contact information. Students are responsible for the accuracy of the addresses provided in My UW and for the courses selected when they enroll.

My UW is available to eligible students, who gain access by using their Net ID and password. Access to My UW–Madison is available from any computer with Internet access. For further information about My UW–Madison, see DoIT (Division of Information Technology) (http://it.wisc.edu).

ENROLLMENT

Students enroll for courses, obtain information about deadlines, view their class schedule, and more in the Student Center's Course Search & Enroll (http://public.enroll.wisc.edu) application on My UW (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e3s1). Information about key deadlines and course enrollment are also available at the Office of the Registrar website (https://registrar.wisc.edu). Additional assistance with the course enrollment process is available by calling 608-262-3811 or sending an e-mail to registrar@em.wisc.edu.

GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits taken for which grades of A through F are received. Semester grades are reported by letter only; plus and minus signs are not authorized. The highest possible GPA is 4.0, representing A grades in every course; the lowest possible is 0.0. The following is the official scale of grades at UW–Madison.

GRADES WITH ASSOCIATED GRADE POINTS PER CREDIT

Grade		Grade Points Per Credit
A	Excellent	4
AB	Intermediate Grade	3.5
B	Good	3
BC	Intermediate Grade	2.5
C	Fair	2
D	Poor	1
F	Failure	0

Excluded from the grade point average are:

S or U (Satisfactory or Unsatisfactory) in courses taken on the pass/fail basis: S for grades A through C; U for grades D and F.

Cr or N (Credit or No Credit) in courses offered on a credit/no credit basis.

I (Incomplete), a temporary grade used when work is not completed during a term. The symbol IN will be used to indicate an incomplete in a Cr/N course.

Audited courses, denoted as AU in place of a number of credits on grade reports and transcripts, are graded either S (Satisfactory) or NR (No Report).

P (Progress), a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.

DR (Dropped), recorded for any course officially dropped later than two days before the last day to add courses.

NW (No Work) is used to indicate that the student never attended and no work was submitted.

In those relatively few cases in which no authorized grade is reported for a student at the close of a term, NR (No Report) will be used to signify the fact for record purposes.

CREDIT/NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

PASS/FAIL

POLICY ON USE OF PASS/FAIL GRADING OPTION FOR UNDERGRADUATES

This policy concerns the use of the pass/fail grading option for degree-seeking undergraduate students. According to the UW–Madison grading scale, grades of S (satisfactory) and U (unsatisfactory) are the transcripted grades that are used for what is commonly known as pass/fail. It applies only to courses that use the default A–F grading scale and that also allow students to choose to take a course on a pass/fail (PF) basis.[1]

The instructor enters the letter grade earned by students on the grade roster, and those letter grades are subsequently recorded as a pass (S) or fail (U) on the student record. A pass (S) will be recorded when a letter grade of A through C is earned. A fail (U) will be recorded when a letter grade of D or F is earned. In addition to the S or U notation, the student transcript includes the symbol # for courses that were taken on a pass/fail basis. Neither the S nor the U is used in computing the grade point average. Instructors are not informed that a student has elected to take the course pass/fail.

STUDENT ELIGIBILITY

Students must be in good academic standing according to their school/college in order to be eligible to request the pass/fail grading option.

Undergraduates may carry one course on a pass/fail basis per term and a maximum of 16 credits during their undergrad career. The summer sessions collectively count as a single term.

Required courses cannot be taken on a pass/fail basis. The student's school or college may review the request to take a course pass/fail and reject requests for nonelective work. It may be difficult for the school or college official to determine whether a course is an elective or being used to fulfill a requirement since a student's enrollment or the way a course is being used in the specific program of study may change. Ultimately it is the student's responsibility to be sure that the requested course is an elective. Students are strongly advised to consult with an academic advisor before taking a course pass/fail. Courses taken on a pass/fail basis will not count for nonelective requirements even if they would normally count toward such requirements.

Each school or college is responsible for clearly communicating to its students what the definition of "good academic standing" is and what a free elective is.

In each school or college, the office responsible for academic policy exceptions is authorized to make exceptions to the pass/fail policy.

PROCESS FOR REQUESTING THE PASS/FAIL GRADING OPTION

Students indicate that they would like to have a course they are enrolled in graded on a pass/fail basis by completing a course change request via their Student Center (see Course (https://registrar.wisc.edu/course_change_request.htm)Change Request for detailed information). Students may submit pass/fail requests via their Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed).

The deadline for requesting the pass/fail grading option is posted on the Office of the Registrar website. These deadlines are based on the idea that the pass/fail option is intended to encourage students to explore educational opportunities that they might otherwise not be willing to attempt. Pass/fail is not intended as a way for students to avoid academic consequences.

Once the student has submitted the request to take a course on a pass/fail basis the request is routed via SIS workflow to an academic dean in the school or college for approval or further communication with the student. The school/college official must approve the request before the grading option is changed to pass/fail by the Office of the Registrar.

Students can see whether a course is being graded on a pass/fail basis in their Student Center.

[1] For study abroad programs operated by the College of Engineering, courses taken abroad toward an engineering major will be posted as

pass/fail. This occurs automatically and is not a student option; this practice is not covered or affected by this policy.

FAILURES

Every course grade of F counts as 0 grade points and remains permanently on the transcript. If the course is repeated, the original F will remain on the transcript and will be included in computing the GPA.

INCOMPLETES

An Incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester. If a student is unable to take or complete the final examination because of illness or other circumstances beyond his or her control, the student may be granted an Incomplete. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of such proof the grade shall be F; even with such proof, if the instructor is convinced that the student cannot pass, the grade shall be F.

Undergraduate students enrolled in the College of Letters & Science must complete the course work for which they received the Incomplete by the end of the fourth week of classes of their next term of enrollment at UW-Madison (exclusive of summer sessions). Failure to do so will result in a lapse into a grade of F, unless the time limit has been formally extended. Letters & Science students should see the L&S section on Incompletes (p. 335) for important details.

Undergraduates enrolled in schools or colleges other than Letters & Science must complete the course work for which they received the Incomplete by the end of their next term of enrollment (exclusive of summer sessions). Incompletes incurred in the last term of enrollment may not be removed after five years of absence from the university without special advance permission of the student's associate or assistant dean. Such Incompletes remain on the record but do not lapse into a grade of F.

AUDIT

Students may audit eligible courses with instructor and academic dean consent, and if no laboratory or performance skills are involved. Auditors may not recite or take examinations but are expected to attend classes regularly and do some assigned work. Although courses for which students enroll as an auditor are factored into tuition, such courses do not earn academic credit and do not count in determining full-time/part-time load for enrollment certification in an academic term. The deadline to change a course from credit to audit is the end of the fourth week of classes. School and college policies may vary from this description. Students are advised to consult with the instructor concerning specific course requirements that must be satisfied.

CLASS STANDING

Students are classified by year according to the number of credits and grade points they have earned:

Freshman: less than 24 credits
Sophomore: at least 24 credits
Junior: at least 54 credits
Senior: at least 86 credits

TUITION AND FEES

The UW System Board of Regents sets tuition and fee rates annually. Rates are subject to change without notice.

The tuition and fee schedule is available on the Office of the Registrar website (https://registrar.wisc.edu/tuition_&_fees.htm). Students who enroll after the first Friday of the official first week of classes are assessed a late initial enrollment fee. Exception: Special and Guest students have until the Friday of the second week of classes to enroll.

Enrolled students can view tuition charges/payments, financial aid (loans, grants, scholarships) received, and refunds on their My UW (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e5s1) Student Center, Tuition Account Summary. Students can also access links to view and pay tuition eBills, set up Authorized Payers for tuition account access, and enroll for eRefund.

The Bursar's Office provides the tuition bill as an eBill which is published on the Tuition Account eBill/ePayment site. Students and their Authorized Payers receive an email alert when the eBill is available to view.

For questions about tuition rates, tuition account activity and billing questions, contact the Bursar's Office.
tuition@bussvc.wisc.edu (include student ID and name)
608-262-3611
333 East Campus Mall #10501
Madison, WI 53715-1383

PAYMENT OF TUITION AND FEES

Tuition payment options are: make an online ePayment; mail a check to the Bursar's Office at the address above; pay in person at the Bursar's Office; or put a check in the first-floor lobby or 10th-floor dropbox. For detailed payment information, see Tuition & Fee Payments (http://www.bussvc.wisc.edu/bursar/otherpay.html) on the bursar's website.

If tuition is not paid by the due date, a late fee is assessed and a hold is placed on the student account to prevent future enrollment and release of official transcripts and diplomas, until the account is paid.

RESIDENCE FOR TUITION PURPOSES

Wisconsin Statutes, Section 36.27(2), governs resident status for tuition purposes at all University of Wisconsin System institutions. Students who do not qualify under one of the exceptions in the statute will be assessed nonresident tuition. In determining resident status for tuition purposes, standards are different from those used for voting, paying taxes, applying for various licenses, and the like. In general, a student must be a bona fide resident of Wisconsin for at least 12 months before enrollment for any term in order to be eligible for in-state tuition. However, a student who comes to Wisconsin primarily for educational reasons does not automatically qualify as a Wisconsin resident even after living in Wisconsin for a year or more.

For more information and the full text of Wisconsin Statutes, Section 36.27(2), see the Office of the Registrar website (https://registrar.wisc.edu/residence.htm) or contact a residence counselor at 608-262-1355; residencefortuition@registrar.wisc.edu.

MINNESOTA RECIPROCITY FOR TUITION RATES

Minnesota residents who are certified by the Minnesota Office of Higher Education for the appropriate term to attend UW–Madison under the Minnesota–Wisconsin Tuition Reciprocity Agreement will be assessed the approved reciprocity tuition rate, plus the segregated fees assessed all UW–Madison students. Students under this program will be classified as nonresidents of Wisconsin.

It is the student's responsibility to inquire about application procedures, deadline dates, and reapplication procedures. Students may apply online on the Minnesota Office of Higher Education website (http://www.ohe.state.mn.us). Questions may be directed to the Minnesota Office of Higher Education:
1450 Energy Park Drive, Suite 350
St. Paul, MN 55108-5227
651-642-0567 or 1-800-657-3866

They may also be directed to the UW–Madison Office of the Registrar (https://registrar.wisc.edu):
333 East Campus Mall #10101
Madison, WI 53715-1384
registrar@em.wisc.edu
608-262-3811

RULES, RIGHTS, AND RESPONSIBILITIES

STUDENT PRIVACY RIGHTS (FERPA)

Students have the right to inspect and review most education records maintained about them by the University of Wisconsin–Madison and, in many cases, decide if a third person can obtain information from them. Students may challenge information in their records which they believe to be inaccurate, misleading, or inappropriate.

The university has adopted a policy statement implementing all provisions of the Family Educational Rights and Privacy Act (FERPA). A copy of this statement may be obtained at the Office of the Registrar (https://registrar.wisc.edu), 333 East Campus Mall #10101. The university, in accordance with the act, has designated the following as "directory information," which is publicly available unless a student asks to have any or all of it withheld: name; postal address; telephone numbers; e-mail addresses; date of birth; major field(s) of study and number of academic credits earned toward degree; attendance status (including current year, credit load, and full-or part-time status); dates of attendance (matriculation and withdrawal dates); degrees and awards received (type of degree and date granted); previously attended educational agencies or institutions; participation in officially recognized activities; and participation in athletics and weight and height of athletes.

Students wishing to keep some or all of their "directory information" confidential should restrict their information in the Student Center in My UW (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO?execution=e6s1). Students with questions about the provisions of the act or who believe the university is not complying with the act may obtain assistance from the Office of the Registrar:
333 East Campus Mall #10101
Madison, WI 53715-1384
reginfo@em.wisc.edu
608-262-3811

Students have the right to file complaints alleging university noncompliance with the act with the federal agency that enforces the act. The address is: The Family Educational Rights and Privacy Act (http://www2.ed.gov/policy/gen/guid/fpco/ferpa) Office, Department of Education, 330 Independence Avenue SW, Washington, DC 20201.

Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at:
Office of the Registrar (https://registrar.wisc.edu)
333 East Campus Mall #10101
Madison, WI 53715-1384

AVAILABILITY OF ACADEMIC RECORD INFORMATION TO PARENTS OR GUARDIANS OR OTHERS

A student may authorize a third party (e.g., a parent, guardian, spouse, potential employer, etc.) access to academic record information. An authorization form is available at the Office of the Registrar's website, or by visiting the Office of the Registrar (https://registrar.wisc.edu), 333 East Campus Mall #10101. The authorization form permits release of specified information on a one-time basis to the specified third party. If no authorization is on file, it will be assumed that the student does not wish to give a third party access to academic record information. This policy is designed to give students specific control over the parties to whom academic record information may be released.

Grade reports will not be sent by the university to parents or guardians. Students are urged to keep their parents informed of their academic progress.

ACADEMIC INTEGRITY

UW–Madison students have the obligation to conduct their academic work in a manner consistent with high standards of academic integrity. They also have the right to expect that they and other students will be graded fairly, and they have the rights of due process should they be accused of academic misconduct. Therefore, it is important that students:

- become familiar with the rules of academic misconduct (UWS Ch. 14);
- ask their instructors if they are unsure whether something is acceptable (for example, how to use sources in a paper or whether to work with another student on an assignment);
- let instructors know if they think they see incidents of misconduct;
- be aware that helping someone else cheat is a violation of the rules; and

For complete discussion of the rules regarding academic integrity, see the Office of Student Conduct and Community Standards website (https://conduct.students.wisc.edu/academic-integrity), or contact them via phone at 608-263-5700 or room 70 Bascom Hall

STUDENT RIGHTS AND RESPONSIBILITIES

Every member of the University of Wisconsin–Madison community has the right to expect to conduct his or her academic and social life in an environment free from threats, danger, or harassment. Students also have the responsibility to conduct themselves in a manner compatible with membership in the university and local communities. UWS Chapters 17

and 18 of the Wisconsin Administrative Code list the university policies students are expected to uphold and describes the procedures used when students are accused of misconduct. Chapter 17 also lists the possible responses the university may apply when a student is found to violate policy. The process used to determine any violations and disciplinary actions is an important part of UWS 17. For the complete text of UWS Chapter 17, see Office of Student Conduct and Community Standards website (https://conduct.students.wisc.edu/academic-integrity), or contact them via phone at 608-263-5700 or room 70 Bascom Hall.

No student may be denied admission to, participation in or the benefits of, or discriminated against in any service, program, course or facility of the [UW] system or its institutions or centers because of the student's race, color, creed, religion, sex, national origin, disability, ancestry, age, sexual orientation, pregnancy, marital status or parental status.

STUDENT GRIEVANCE PROCEDURE

Any student at UW–Madison who feels that he or she has been treated unfairly has the right to voice a complaint and receive a prompt hearing of the grievance. The basis for a grievance can range from something as subtle as miscommunication to the extreme of harassment.

Each school or college has a procedure to hear grievances. Generally the process involves an informal attempt to solve the problem, if appropriate. If not, more formal proceedings can be undertaken until a resolution is reached. Advisors and school or college offices have detailed information. For assistance in determining options, students can contact the on-call dean in the Dean of Students Office, 608-263-5700, Room 70 Bascom Hall, Monday–Friday, 8:30 a.m.–4:30 p.m.

SEEKING ASSISTANCE

A student can seek help at many places on campus, for both personal and academic problems. For answers to general questions on many topics, a good place to start is Ask Bucky (https://info.wisc.edu/ask-bucky), which is an excellent general referral service.

For personal problems, Counseling Services, a unit of University Health Services (http://www.uhs.wisc.edu), offers a variety of individual, group and couple counseling services. Experienced counselors, psychologists, and psychiatrists are available to assist students in overcoming depression and managing anxiety, and in developing self-awareness and understanding, independence, and self-direction. The counseling staff is experienced and sensitive to students of diverse cultural and ethnic backgrounds. Counseling Services is located at 333 East Campus Mall; 608-265-5600. In addition, an on-call dean in Student Assistance and Judicial Affairs is usually available by telephone (608-263-5700) or on a walk-in basis (75 Bascom Hall) Monday–Friday, 8:30 a.m.–4:30 p.m.

For academic problems, many places can offer help. The student should first discuss the problem with the professor or TA. If the problem is not resolved at that time, the student can speak with an academic advisor or the chair of the department. If further assistance is needed, the student should contact one of the academic deans in the school or college.

ALCOHOLEDU (HTTPS://WWW.UHS.WISC.EDU/PREVENTION/SUBSTANCE-ABUSE/ALCOHOLEDU)

AlcoholEdu is an online course overseen by University Health Services that educates students about the impacts of alcohol and provides them with the information to make healthy decisions. All incoming degree seeking undergraduate students--including first-year and transfer students--must complete *AlcoholEdu*. The program consists of two parts, both of which must be completed.

STUDENT LIFE

Nine departments and several programs work together to collaborate with many campus partners and students during their time at UW–Madison. We know that the Wisconsin Experience (https://students.wisc.edu/wisconsin-experience) has the potential to be transformative. Therefore, we strive to develop world leaders, engaged citizens, and interesting people. We have high expectations for students.

To help students make the most of their Wisconsin Experience, we urge them to get involved in activities that matter, to consider themselves representatives of the university, to act with integrity in all that they do, and to show respect to everyone they encounter. Students should take pride in themselves as world citizens and as scholars, demonstrate a strong work ethic, and capitalize on their opportunities and challenges. In promoting this behavior, we encourage students to think not just about their future, but about their legacy.

That is what it means to be a student at Wisconsin. That is what it means to do things that matter and to have purpose. Badgers are here to make the world a better place.

The Division of Student Life supports student success at UW–Madison. If students are looking to get involved with student government for a student organization; are interested in learning more about leadership opportunities; seeking identity-based spaces and resources; are facing a conduct violation; or just need to talk, we are here. Explore the nine departments:

ASSOCIATED STUDENTS OF MADISON (ASM)

4301 Student Activity Center
333 East Campus Mall
608-265-4276 (265-4ASM)
Web: asm.wisc.edu (http://asm.wisc.edu)
Facebook: Associated Students of Madison (https://www.facebook.com/ASMStudentGov)
Twitter: @ASMstudentgovt (https://twitter.com/search?q=%40ASMstudentgovt&src=typd)

- Promotes student voice as it pertains to legislative, diversity, and university affairs
- Distributes funding for student activities, organizations, and events to maximize student involvement in shaping campus life
- Supports elected student representatives
- The Open Seat Food Pantry strives to alleviate the stresses of food insecurity for those who need support.

CENTER FOR THE FIRST-YEAR EXPERIENCE

155 Middleton Building
1305 Linden Drive
608-263-0367
Email: newstudent@studentlife.wisc.edu
Web: newstudent.wisc.edu (http://newstudent.wisc.edu)

Facebook: UW First-Year Experience (https://www.facebook.com/UWNewStudent)
Twitter: @UWNewStudent (https://twitter.com/search?q=%40UWNewStudent&src=typd)

- Collaborates with campus partners to plan and implement Student Orientation, Advising, and Registration (SOAR) for incoming undergraduates and their families
- Oversees the Transfer Transition Program, which provides pre-advising services to prospective students and support services to new transfer students on campus
- Assists incoming students with the academic and social transitions to the university through direct and indirect programming
- Offers seminar courses on the Wisconsin Experience and provides consultation and support to faculty and graduate students who work with first-year students
- Facilitates Our Wisconsin (https://ourwisconsin.students.wisc.edu), an inclusion program designed to develop community and a sense of belonging among all students, regardless of their background or identity

CENTER FOR LEADERSHIP & INVOLVEMENT

Third Floor, Red Gym
716 Langdon Street
608-263-0365
Email: cfli@studentlife.wisc.edu
Web: cfli.wisc.edu (http://cfli.wisc.edu)
Facebook: UWCfLI (https://ourwisconsin.students.wisc.edu)
Twitter: @UWCfLI (https://twitter.com/search?q=%40UWCfLI&src=typd)

- Facilitates the registration and advising for more than 1,000 student organizations, including fraternities and sororities
- Hosts student organization fairs in fall and spring
- Supports the Adventure Learning Programs (ALPs), Student Leadership Program, the Wisconsin Band, and the Wisconsin Singers
- Administers and confers UW–Madison Leadership Certificate

DEAN OF STUDENTS OFFICE

70 Bascom Hall
500 Lincoln Drive
608-263-5700
Email: dean@studentlife.wisc.edu
Web: doso.students.wisc.edu/ (https://doso.students.wisc.edu)

- Provides walk-in or call-in assistance
- Provides crisis loans and referral services to campus and community resources
- Responsible for academic and nonacademic misconduct process
- Promotes academic integrity
- Works to assess potential threats and promote campus safety
- Supports faculty and staff who have concerns about students they teach or employ
- Bias Response Process: UW–Madison takes incidents of hate and bias seriously and will investigate and respond appropriately to reported or observed incidents of bias or hate

GENDER AND SEXUALITY CAMPUS CENTER

123 Red Gym
716 Langdon Street
Phone: 608-265-3344
Email: lgbt@studentlife.wisc.edu
Web: lgbt.wisc.edu (http://lgbt.wisc.edu)
Facebook: Gender and Sexuality Campus Center (https://www.facebook.com/uwgscc)
Twitter: @UWGSCC (https://twitter.com/UWGSCC)

- Educates faculty, staff, and students about sexual orientation and gender identity via ally and topic-specific training
- Provides support to LGBTQ and ally communities as well as resource materials in the resource library, online, and through discussion groups
- Organizes the Queer Emerging Leaders Program, the LGBTQ+ Leadership Institute, and a mentoring program
- Coordinates identity- and community-building events, including Out and About Month and Coming Out Month

INTERNATIONAL STUDENT SERVICES

217 Red Gym
716 Langdon Street
608-262-2044
Email: iss@studentlife.wisc.edu
Web: iss.wisc.edu (http://iss.wisc.edu)
Faceboook: International Student Services at UW–Madison (https://www.facebook.com/ISSatUW)
Twitter: @UW_ISS (https://twitter.com/UW_ISS)

- Provides advising for more than 6,000 international students and their dependents
- Issues nonimmigrant student visa documents and provides information on immigration regulations and procedures
- Provides orientation for new arrivals, as well as continuing support services and programs for cultural adjustment and integration to campus and community life

MCBURNEY DISABILITY RESOURCE CENTER

702 West Johnson Street, Suite 2104
608-263-2741
Email: mcburney@studentlife.wisc.edu
Web: mcburney.wisc.edu (http://mcburney.wisc.edu)
Facebook: McBurney Disability Resource Center (https://www.facebook.com/McBurney-Disability-Resource-Center-1408271469436889)
Text: 608-263-2741

- Promotes accessible, open, and welcoming campus community for students with disabilities
- Works with students with a variety of disabilities such as psychological/mental health, learning, chronic health, ADHD, vision, hearing, mobility, etc.
- Develops individualized accommodation plan for students with disabilities and provides classroom accommodations to students

with disabilities taking undergraduate, grauate, and professional school courses
- Provides information and referral services on disability issues for students, faculty, staff, and campus visitors
- Offers peer education and campus programming around disability issues and inclusive practices

MULTICULTURAL STUDENT CENTER

716 Langdon Street
608-262-4503
Web: msc.wisc.edu (http://msc.wisc.edu)
Facebook: UW–Madison Multicultural Student Center (https://www.facebook.com/UWMulticultural)
Twitter: @UWMulticultural (https://twitter.com/@UWMulticultural)

- Ensures that students of all racial and cultural backgrounds are successful and feel welcome
- Hosts workshops and guest speakers on topics such as race and identity, allyship, supporting LGBTQ+ students of color, and creating a more inclusive campus
- Organizes the Multicultural Orientation and Reception and the Way Up Student Organization Festival
- Provides opportunities for leadership, skill development, and recognition through programs like the Multicultural Leadership Summit and the Multicultural Leadership Awards and Graduation Celebration
- In May 2016, more than 750 members of the campus community helped welcome and open the Black Cultural Center. In fall 2018, two new cultural centers opened: The Latinx Cultural Center and the Asian Pacific Islander Desi American (APIDA) Cultural Center opened, all located in the Red Gym, 716 Langdon Street.

OFFICE OF STUDENT CONDUCT AND COMMUNITY STANDARDS

500 Lincoln Drive
608-263-5700
Email: dean@studentlife.wisc.edu
Web: conduct.students.wisc.edu (https://conduct.students.wisc.edu)

- Upholds every student's right to learn in a community that is safe
- Fosters integrity and accountability
- Provides leadership in reducing high-risk student drinking
- Partners with instructors to resolve academic misconduct incidents

ACADEMIC CALENDAR

ACADEMIC CALENDAR

Establishment of the academic calendar (https://www.secfac.wisc.edu/academic-calendar.htm) for the University of Wisconsin–Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty Senate and State of Wisconsin legislation. Approximately every five years, the Faculty Senate approves a new academic calendar which spans a future five-year period.
The current calendar was adopted by the Faculty Senate in September 2016.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Agricultural and Life Sciences provides educational opportunities to students seeking a wide variety of careers. The students enrolled in the college come from diverse urban, farm, suburban, and rural nonfarm backgrounds, and they have an array of interests.

Students pursue careers in biotechnology, business, communications, engineering, conservation and recreation, health, or public service in agricultural, environmental, and biological sciences industries. Many students continue their education in graduate schools throughout the nation and world or enter professional schools in medicine or veterinary medicine.

EQUIPPING STUDENTS FOR 21ST-CENTURY CAREERS

The college's goal is to ensure that every student develops:

- specialized knowledge in at least one discipline, along with an education broad enough to meet the challenges of changing careers and opportunities
- the ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving
- the ability to communicate effectively through writing and speaking by observing, reading, listening, and using appropriate information technologies
- a global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society
- the ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy
- a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics

DEGREES/MAJORS/CERTIFICATES

The College of Agricultural and Life Sciences provides opportunities for study in a wide variety of department majors and interdisciplinary programs or specializations. In some instances, majors and degrees are offered cooperatively with other schools and colleges at UW–Madison. **Students are responsible for knowing academic requirements for graduation** and should consult with an advisor regularly.

Freshmen are encouraged to declare a degree and major so that an advisor can be assigned in their area of interest, but students are encouraged to change majors if academic or professional goals change. However, incoming first-year students unsure about which CALS major to declare may opt to remain undeclared while exploring their options. Interested students should contact CALS Transitional Advising and Outreach Services (https://cals.wisc.edu/academics/undergraduate-students/advising) for more information. In addition to their major, students may also elect to complete one or more certificate programs. See the Certificate Programs Offered—Official List (http://registrar.wisc.edu/documents/85_Official_Certificates.pdf) for a complete

list. Some of the certificate programs offered in CALS are available to students across campus, regardless of their major.

- Agricultural and Applied Economics, B.S. (p. 42)
- Agricultural Business Management, B.S. (p. 46)
- Agronomy, B.S. (p. 63)
- Animal Sciences, B.S. (p. 69)
- Biochemistry, B.S. (CALS) (p. 97)
- Biological Systems Engineering, B.S. (p. 106)
- Biology, B.S. (CALS) (p. 74)
- Business Management for Agricultural and Life Sciences, Certificate (p. 50)
- Community and Environmental Sociology, B.S. (p. 118)
- Dairy Science, B.S. (p. 124)
- Development Economics, Certificate (p. 51)
- Entomology, B.S. (p. 129)
- Environmental Sciences, B.S. (CALS) (p. 192)
- Food Science, B.S. (p. 133)
- Food Systems, Certificate (p. 122)
- Forest Science, B.S. (p. 139)
- Genetics and Genomics, B.S. (p. 153)
- Global Health, Certificate (p. 170)
- Horticulture, B.S. (p. 159)
- Individual Major, B.S. (p. 54)
- Landscape Architecture, BSLA (p. 57)
- Life Sciences Communication, B.S. (p. 166)
- Microbiology, B.S. (CALS) (p. 92)
- Nutritional Sciences, B.S. (p. 175)
- Nutritional Sciences, B.S. Nutrition and Dietetics (p. 180)
- Plant Pathology, B.S. (p. 186)
- Science of Fermented Food and Beverages, Certificate (p. 138)
- Soil Science, B.S. (p. 199)
- Wildlife Ecology, B.S. (p. 147)

PEOPLE

CALS DEAN AND DIRECTOR

Kathryn VandenBosch
Meet the College Leadership (https://cals.wisc.edu/about-cals/leadership)

ACADEMIC DEAN'S OFFICE

CALS Office of Academic Affairs
116 Agricultural Hall
1450 Linden Drive
Madison, WI 53706

academicaffairs@cals.wisc.edu
608-262-3003

The Office of Academic Affairs is the academic dean's office for CALS undergraduate students. The office assists students with university and college policies and procedures such as changing a major, transferring into CALS, awarding dean's list, interpreting degree audit for graduation, student appeals, and more.

ACADEMIC AND CAREER ADVISING

Academic and career advising is supported in CALS departments by faculty and academic staff. CALS Academic Affairs offers the following resources for all CALS students:

TRANSITIONAL ADVISING AND OUTREACH SERVICES (TAOS)

CALS Transitional Advising and Outreach Services (TAOS) supports prospective, incoming, and continuing undergraduates to successfully transition into CALS. We do this through a variety of outreach, advising, and academic support initiatives. In addition to serving as the primary academic advising home for the CALS Undeclared Major (ALS 000), TAOS works with on- and off-campus students to explore academic opportunities in the college, oversees on-campus transfers, and coordinates CALS Student Orientation, Advising, and Registration (SOAR). In all of these efforts, TAOS supports CALS in creating a welcoming, inclusive learning environment for our diverse student body.

The undeclared major option (ALS 000) is primarily intended for first and second-year students who are unsure of which CALS major(s) they would like to pursue. CALS undeclared students must declare a major by their fourth semester on campus. Exceptions to these policies may be made when there are extenuating circumstances.

For more information on TAOS, transferring to CALS, or entering CALS as an undeclared first-year or continuing student, please contact the CALS Academic Affairs Office, 608-262-3003, academicaffairs@cals.wisc.edu.

DEAN ON CALL

Dean on Call is available in 116 Agricultural Hall from noon – 3:30, Monday through Wednesday and Friday during the academic year and Tuesday through Thursday during the summer. Students with emergency situations or questions regarding academic policies or procedures are welcome to utilize Dean on Call on a drop-in, first come, first served basis. Students typically consult with their advisor prior to meeting with a Dean on Call.

CAREER SERVICES

CALS Career Services provides resources and advising for students to explore career interests and develop skills as they seek employment or admission to graduate or professional programs. Advising appointment and programming information can be found on the Career Services website (https://cals.wisc.edu/academics/undergraduate-students/career-services). Contact Career Services at career@cals.wisc.edu.

ENTERING THE COLLEGE

ADMISSION

Information on admission to the university as a freshman, transfer, or international student is available through the Office of Admissions and Recruitment (http://www.admissions.wisc.edu).

Prospective students with questions about study in the College of Agricultural and Life Sciences may contact the Office of Academic Affairs (http://www.cals.wisc.edu/academics) at 608-262-3003.

First-Year Summer Start (http://cals.wisc.edu/quickstart): Incoming first-year CALS students can get a jump-start on their education by taking one or both of the following courses the summer prior to their first semester on campus: QuickStart: Foundations (online first-year seminar) and

Quickstart: Connect2Campus (in-person campus immersion experience). Participants will learn about campus resources and opportunities as well as develop a personalized roadmap to reach their academic, personal, and career goals.

TRANSFER STUDENTS

Many students transfer into the College of Agricultural and Life Sciences from other schools and colleges at UW–Madison, from elsewhere in the UW System, or from other universities. The CALS Office of Academic Affairs can provide advice on transfer policies and degree requirements and help transfer students make plans to complete their education in the college. With some specialized majors in the college (e.g., biological systems engineering), an early transfer is advisable. Students should check with the CALS Office of Academic Affairs, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003; see also this website (https://cals.wisc.edu/academics/prospective-students).

Some students transfer after their freshman year, some as late as junior year, although a minimum of 30 credits in residence is required for all students. Transfer credits are evaluated by the UW–Madison Office of Admissions after the student has been accepted to the university.

Students transferring to UW–Madison from other UW System campuses or from a Wisconsin Technical College can evaluate course transferability using the Transfer Information System (TIS) (http://www.uwsa.edu/tis).

ON-CAMPUS TRANSFER

Students will be considered for transfer to the College of Agricultural and Life Sciences from other schools and colleges at UW–Madison if they:

1. are in good academic standing with the college or school in which they are enrolled,
2. meet any special requirements as specified by the intended major, and
3. have earned fewer than 86 credits, which is the threshold for senior status.

Students who have been dropped by another college or school must be readmitted to that college or school before being considered for transfer into the College of Agricultural and Life Sciences. However, being readmitted for transfer purposes by another school or college does not guarantee acceptance by CALS.

Ideally, the transfer should be initiated in advance of the semester in which enrollment is planned. Students may initiate the transfer process at any time during the semester. However, the Office of the Registrar determines when transfers may be completed; this window generally is open from approximately the second through the twelfth week of classes. Students may transfer during the summer session only if they are enrolled in summer courses. Consult the Office of Academic Affairs (http://www.cals.wisc.edu/academics) website or email (academicaffairs@cals.wisc.edu) for details.

SPECIAL STUDENTS

There are two basic categories of Special students at UW–Madison:

1. the College Special, who is allied with a college and must obtain an "Academic Action" from an academic dean to enroll each semester, and
2. the University Special, who is a nondegree student not allied with a particular college or school and is admitted through the Division of Continuing Studies (http://guide.wisc.edu/nondegree).

The College of Agricultural and Life Sciences Special student classification is currently on hiatus. Information about the University Special student classification is available from the Division of Continuing Studies (http://continuingstudies.wisc.edu/advising/prospective.htm).

WISCONSIN EXPERIENCE

From a first-year seminar course to completion of a culminating major-related capstone experience, CALS students have the opportunity to participate in multiple *signature CALS experiences*. These experiences are defined by high-impact experiential learning and serve as the foundation of a CALS education, regardless of a student's major.

Here are ***ten ways*** to get involved and begin to create your own legacy on campus:

1. First-Year Summer Start (https://cals.wisc.edu/quickstart). Incoming first-year CALS students can get a jump-start on their education by taking one or both of the following courses the summer prior to their first semester on campus: QuickStart: Foundations (online first-year seminar) and QuickStart: Connect2Campus (in-person campus immersion experience). Participants will learn about campus resources and opportunities as well as develop a personalized roadmap to reach their academic, personal, and career goals.
2. First-Year Seminar (p. 34). All first-year CALS students are provided a seamless transition to college by enrolling in one of several seminars with typically fewer than 25 students, close interaction with the instructor, and the opportunity to participate in meaningful dialogue about their experiences at UW–Madison.
3. CALS Honors Program (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program). Highly motivated students can pursue a more rigorous course of study and be recognized for their achievements.
4. Study Abroad (https://cals.wisc.edu/academics/undergraduate-students/studyabroad). Students can choose from short-term programs of a few weeks to a full semester or year abroad based on their interests and academic plans. Combined with the International Studies (p. 34) requirement, CALS students develop the skills needed to successfully interact, motivate and work with a culturally diverse population.
5. Internships (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/internships). Real-world work or field experience will: (a) help students explore a career or job, (b) increase post-graduation employment opportunities, and (c) broaden professional networks.
6. Leadership and Student Organizations (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/leadership-programs). CALS has many opportunities for students to learn about and practice leadership including a leadership seminar, a leadership retreat, student organizations (over 30 in CALS and 1000 campuswide), and college committees.
7. Mentored Research / Independent Study (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/mentored-research-independent-studies). UW–Madison is known for

its cutting-edge research. Students have the opportunity to be part of the discovery process by earning academic credit.

8. Service (http://www.morgridge.wisc.edu). CALS students have a strong record of service to the local, state, and international communities. Visit the Morgridge Center for opportunities.
9. Facilities (https://cals.wisc.edu/about-cals/visit-cals). CALS has outstanding facilities for student housing, instruction, and research. From the Allen Centennial Garden with the former dean's residence to 13 Agricultural Research Stations, students experience hands-on and unique learning environments.
10. Capstone (p. 34). Students integrate and apply knowledge in a culminating learning experience designed to prepare them to address real-world problems after graduation.

The majority of CALS students complete several of the signature experiences above.

For example, in 2017-2018:

- 59% of CALS graduates completed internships or field experiences
- 50% of CALS graduates completed mentored research experiences
- 100% of CALS graduates completed a capstone experience

POLICIES AND REGULATIONS

Policies may be found on the Office of Academic Affairs KnowledgeBase (https://kb.wisc.edu/cals/academicaffairs).

REQUIREMENTS

All undergraduate students in CALS must satisfy a set of college and university requirements:

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * * The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		

Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

Students are advised to complete introductory and basic course requirements (i.e., biological and physical sciences, chemistry, mathematics, communications, etc.) early in their academic programs.

Students must also satisfy a minimum of 15 credits in the selected major (these 15 credits may not be double counted with CALS or General Education requirements) and a Capstone course that meets the stated criteria (and may be included in the 15 credits toward the major).

CALS FIRST-YEAR SEMINAR REQUIREMENT

Courses meeting the CALS first-year seminar requirement must meet most of the following criteria:

- The course is designed specifically for first-year undergraduate students, to support their academic and personal transition to UW–Madison. For example, the course may acquaint students with academic, campus and community resources to assist in their transition through presentations, discussion, projects, or papers. Because students took this course, their transition to UW–Madison is more rapid and well supported.
- Course enrolls fewer than 25 students or a significant portion of the course meets in groups of fewer than 25 students. A larger lecture course will be considered if students interact regularly in sustained and substantive small groups with a faculty member or well-prepared graduate student or peer. This interaction must go beyond review of material and question and answer and be an ongoing relationship.
- Students receive frequent feedback from the instructor(s) on their academic performance and receive a grade in the course.
- Students are put in circumstances that essentially demand they interact with faculty and peers about substantive matters. As a result of taking this course, students have gotten to know their instructor(s) and peers through meaningful course-related dialogue.
- Students will experience diversity through meaningful dialogue with people who are different from themselves and/or engage with diversity through course content which addresses inclusivity, diversity and identity.
- Students experience an integration of experiential and classroom learning. For example, students might be asked to attend a student organization meeting, meet with a faculty or staff member, or participate in research or service.
- Students have opportunities to integrate, synthesize and apply knowledge while exploring big questions and big ideas.
- The learning objectives for the course are aligned with the UW–Madison Essential Learning Outcomes (https://assessment.provost.wisc.edu/uw-madison-essential-learning-outcomes).

APPROVED FIRST-YEAR SEMINAR COURSES

Code	Title	Credits
AFROAMER 271	Selected Topics in African American Culture [1]	3
BIOCHEM 100	Biochemistry Freshman Seminar	1
BSE 170	Product Design Practicum	2
COUN PSY 115	Human Resources Development: Educational Effectiveness [2]	1
COUN PSY 125	The Wisconsin Experience Seminar	1
DY SCI 272	Pre-Capstone Seminar	1
ENVIR ST 117	GreenHouse Roots Seminar	1
F&W ECOL 101	Orientation to Wildlife Ecology	1
GENETICS 155	Freshman Seminar in Genetics	1
INTEGSCI 100	Exploring Biology	2
INTEGSCI 110	BioHouse Seminar: Biology for the 21st Century	1
INTEGSCI 140	Exploring Service in Science	1
INTER-AG 140	CALS QuickStart: Foundations	1
INTER-AG 155	Issues in Agriculture, Environment, and Life Sciences	1
INTER-AG 165	Introduction to International Issues in Agricultural & Life Sciences	1
INTER-AG 175	WISE Seminar	1
INTEREGR 170	Design Practicum	3
INTER-HE 201	Belonging, Purpose and the Ecology of Human Happiness: EcoYou	3
ILS 138	CRC First-Year Seminar: Foundations of a Liberal Arts Education	1
First Year Interest Groups (All) [3]		

1 Approved topic: Multiculturalism & Social Justice (Seminar for Multicultural Learning Community)

2 Approved topics: First-Year Transition Active Student and PEOPLE First Year Experience Seminar

3 For more information, see http://figs.wisc.edu/

REQUEST TO CONSIDER COURSE FOR FIRST-YEAR SEMINAR REQUIREMENT

Faculty and staff interested in submitting a course to count for the First-Year Seminar requirement may complete an online survey (https://uwmadison.co1.qualtrics.com/jfe/form/SV_8vKNkjVTZsDzGfz) with the following information:

- Updated course syllabus
- Statement of how the course meets the criteria
- Contact information for the course coordinator

CALS INTERNATIONAL STUDIES REQUIREMENT

Required of all CALS majors, the intent of the International Studies requirement is to deepen student knowledge and understanding of international issues related to scientific and sociological themes in CALS; develop openness, awareness and respect with regard to other cultures; and prepare students to address global challenges as engaged employees and active citizens.

The following learning outcomes must be satisfied for courses to fulfill the international studies requirement:

- Identify and explain, to diverse audiences, global issues pertaining to one or more CALS Priority Themes (https://cals.wisc.edu/about-cals/initiatives/strategic-plan/priority-themes)
- Demonstrate critical thinking and comparative perspectives with respect to experiences or cultural approaches to international challenges

Courses that satisfy the 3-credit CALS International Studies requirement must meet all of the following criteria:

- Be connected to one or more of the CALS Priority Themes
- Include substantial international comparative content
- Include substantial non-U.S. content (typically >50% of the content or assignments or grade in the course)
- Facilitate active student engagement consistent with the learning outcomes and university assessment criteria
- Fulfill 3 credits (either by a single course or a pair of courses)

APPROVED INTERNATIONAL STUDIES COURSES (EFFECTIVE FALL 2019)

Code	Title	Credits
The 3 credit requirement may be fulfilled as either a stand-alone 3 credit course or as a set of courses as listed below.		
AN SCI/DY SCI 370	Livestock Production and Health in Agricultural Development	3
A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 319	The International Agricultural Economy	3
A A E/AGRONOMY/ INTER-AG/ NUTR SCI 350	World Hunger and Malnutrition	3
A A E/INTL ST 373	Globalization, Poverty and Development	3
A A E/INTL ST 374	The Growth and Development of Nations in the Global Economy	3
A A E/ECON 473	Economic Growth and Development in Southeast Asia	3
A A E/ECON 474	Economic Problems of Developing Areas	3
A A E/ECON/ INTL BUS 462	Latin American Economic Development	3
A A E/ECON 477	Agricultural and Economic Development in Africa	3
AGRONOMY 377	Cropping Systems of the Tropics	3
C&E SOC/ENVIR ST/ SOC 540	Sociology of International Development, Environment, and Sustainability	3
DY SCI/AGRONOMY/ INTER-AG 471	Food Production Systems and Sustainability	3
ENTOM/ ENVIR ST 201	Insects and Human Culture-a Survey Course in Entomology	3
ENTOM/ ZOOLOGY 371	Medical Entomology	3
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species	3
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	3
HORT 370	World Vegetable Crops	3
PL PATH/ BOTANY 123	Plants, Parasites, and People	3
PL PATH 311	Global Food Security	3
HORT/ AGRONOMY 376 & HORT 378	Tropical Horticultural Systems and Tropical Horticultural Systems International Field Study	3
DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 472 & DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 473	Animal Agriculture and Global Sustainable Development and International Field Study in Animal Agriculture and Sustainable Development	3
The following courses also fulfill the international studies requirement, but will require manual modification of a student's degree audit through completion of a simple DARS Update Form. See https://cals.wisc.edu/academics/undergraduate-students/cals-international-studies-requirement/.		
F&W ECOL 375	Special Topics (Forest and Climate Change Policy) [1]	3
BIOCHEM 699	Special Problems (UW SCORE Cambridge International Research Program (England)) [1]	3
BIOCHEM 699	Special Problems (UW SCORE Oxford International Research Program (England)) [1]	3
BIOCHEM 699	Special Problems (UW SUPERG International Research Program (Germany)) [1]	3
NUTR SCI/INTER-AG 421	Global Health Field Experience (UW Mobile Clinics and Health Care in Uganda) [1]	3
NUTR SCI 375 & NUTR SCI/INTER-AG 421	Special Topics and Global Health Field Experience (Sri Lanka Pre-departure Seminar and Community Health and Asset-Based Community Development in Sri Lanka) [1]	3

NUTR SCI/INTER-AG 421	Global Health Field Experience (UW Ghanaian Health and Food Systems: Human, Agricultural & Environmental Health) [1]	3
NUTR SCI 375 & NUTR SCI/INTER-AG 421	Special Topics and Global Health Field Experience (Uganda Pre-departure Seminar and UW Agriculture, Health and Nutrition in Uganda) [1]	3
NUTR SCI/INTER-AG 421	Global Health Field Experience (UW Health, Education and Tanzanian Culture) [1]	3
MICROBIO 304 & POP HLTH 645	Biology of Microorganisms Laboratory and Global Health Field Course (Thailand) [1]	3
MICROBIO 399	Coordinative Internship/Cooperative Education (UW Microbiology International Internships (Thailand)) [1]	3

[1] Some courses are "special topics" courses, internships, directed study, or specific sections. Only the specific course sections listed are approved to meet the CALS International Studies requirement, and will require manual modification of a student's degree audit through completion of a simple DARS Update Form. See https://cals.wisc.edu/academics/undergraduate-students/cals-international-studies-requirement/

Students: See https://cals.wisc.edu/academics/undergraduate-students/cals-international-studies-requirement/ for circumstances under which exceptions will be considered and the appeal process. Appeals will only be considered under special circumstances and if the course meets all the criteria above.

CALS CAPSTONE LEARNING EXPERIENCE REQUIREMENT

A CALS Capstone is a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance with the intent of facilitating the transition to post-baccalaureate life.

A Capstone Experience should:

- Develop problem solving skills
- Expose the student to multidisciplinary approach
- Develop teamwork and interpersonal skills, including the ability to communicate effectively to multiple audiences
- Develop skills in accessing and using information resources (e.g., electronic databases, library resources, national repositories)
- Address societal, economic, ethical, scientific, and professional issues
- Communicate and extend the capstone experience via written, oral, and/or multimedia reports by each student

The Capstone Experience will normally be completed during the student's final 2 or 3 semesters. The intent is to have the student utilize and integrate their undergraduate learning into a culminating, or capstone, experience. Students should consult with their departmental faculty advisors for specific information regarding this requirement. Where appropriate, students should submit a copy of the final project materials to the campus library (via Minds@UW (http://uwdcc.library.wisc.edu/minds/index.shtml) or similar).

CALS HONORS IN THE MAJOR COLLEGE-LEVEL REQUIREMENTS

CALS has two different avenues to earn an Honors degree designation. Students may complete either based on their interests and goals. Students are not allowed to complete both types of honors. In either option, a student must successfully complete a Senior Honors Thesis approved by the research mentor or committee. Information about CALS Honors in Research can be found here (p. 41).

Honors in the Major offers CALS students an advanced program of study within the students' major field and closely related disciplines. In this path, students must complete a specified number of Honors credits in a designated set of courses. Students must be well-prepared in courses leading into the major field of study and be willing to devote time and energy to a rigorous academic experience. Well-prepared students who plan to obtain advanced degrees in the discipline should consider applying to participate in Honors in the Major. This option is only available for specific majors in the college (see the Requirements tab for the major, or visit the CALS Honors website (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-the-major) for more information).

To earn Honors in the Major, students must first be admitted to the college's Honors Program, and must maintain a cumulative GPA of at least 3.25 with a minimum GPA of 3.0 in Honors (or equivalent) coursework. Students may apply for admission to the Honors Program for Honors in the Major at any time but are strongly advised to apply before the junior year. A departmental advisor or advisory committee monitors progress toward Honors in the Major. The department will certify satisfactory completion to the Associate Dean of Academic Affairs prior to graduation.

The Honors in the Major requirements vary by department, but all are approved by the College Honors Committee to include the following requirements:

1. Students must successfully complete at least 20 credits of courses taken for Honors (or equivalent) from a list of courses provided by the department. The list may include Honors and advanced non-Honors courses that add rigor to the undergraduate program in the major.
2. Students must prepare a Senior Honors Thesis (including preparing a research proposal, conducting the research, and presenting the results orally and in writing). A student's faculty advisor is responsible for approving the Senior Honors Thesis, in consultation with the student's research mentor if different from the advisor. The department sets the number of Senior Honors Thesis credits (681–682) for the project. Thesis credits are not included in the 20 credits of Honors (or equivalent) course work required to earn Honors in the Major.
3. Students must present their Senior Honors Thesis at the CALS Undergraduate Research Symposium or another public research arena.
4. The thesis must be approved by both the student's advisor and mentor (if different from the advisor) and submitted electronically to CALS Academic Affairs before the student can

be awarded the Honors designation. The following documents must accompany the thesis:

a. Cover Sheet. Students electing to make their theses public should use the Submitting Your Honors Thesis Cover Sheet (https://cals.wisc.edu/wp-content/uploads/2017/05/publiccoversheet_form.pdf)—*with* permission to post on Minds@UW (https://minds.wisconsin.edu/handle/1793/21798); those choosing not to make their theses public should use the Submitting Your Honors Thesis Cover Sheet (https://cals.wisc.edu/wp-content/uploads/2017/05/notpubliccoversheet_form.pdf)—*without* permission to post on Minds@UW (https://minds.wisconsin.edu/handle/1793/21798). If a student opts to make his or her thesis available to the public, Steenbock Library will upload the thesis to the College of Agricultural and Life Sciences Honors and Undergraduate Research Program section of Minds@UW (https://minds.wisconsin.edu/handle/1793/21798). This is an excellent way for students to showcase their work to employers, graduate schools, family, and friends, and to provide examples of Honors theses to future Honors students.
b. Abstract Page. The Abstract Page (https://cals.wisc.edu/wp-content/uploads/2017/05/Abstract_Form.doc) requires an abstract of not more than 150 words and must be signed by both the student and his/her research mentor.
c. Presentation Form. The presentation form (https://cals.wisc.edu/wp-content/uploads/2017/05/thesispresentation_form.pdf) requires student and mentor signatures with attached documentation of the presentation.

Upon successful completion of program requirements, students will receive an Honors designation on their transcript.

DEGREES OFFERED

The College of Agricultural and Life Sciences offers five bachelor of science (B.S.) degree programs:

B.S. DEGREE
B.S.–AGRICULTURAL BUSINESS MANAGEMENT (P. 46)
B.S.–BIOLOGICAL SYSTEMS ENGINEERING (P. 106)
B.S.– NUTRITION AND DIETETICS (P. 180)
B.S.–LANDSCAPE ARCHITECTURE (P. 57)

The B.S. degree program provides a broad and general foundation for almost two dozen majors in the college: agricultural business management, agricultural and applied economics, agronomy, animal science, biochemistry, biology, biological systems engineering, community and environmental sociology, dairy science, entomology, environmental sciences, food science, forest science, genetics and genomics, horticulture, landscape architecture, life sciences communication, microbiology, nutritional sciences, nutrition and dietetics, plant pathology, soil science, and wildlife ecology.

MULTIPLE DEGREES OR MAJORS

Under certain circumstances it may be possible for a student to earn more than one undergraduate major or degree. It is expected that the programs be significantly different from each other and that approval be received prior to the student having earned 86 credits. More information is available below and via Academic Affairs in 116 Agricultural Hall.

SECOND BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Those with a bachelor of science (B.S.) or bachelor of arts (B.A.) degree from the University of Wisconsin–Madison or other accredited institution may, if eligible, pursue a second bachelor's degree from the College of Agricultural and Life Sciences.
Those who have been out of school for one semester or more must apply for admission (or readmission) with the regular undergraduate application. Continuing UW–Madison students do not need to submit this form. All candidates need an academic dean's permission from the Office of Academic Affairs to work toward a second bachelor's degree. A minimum of a 2.0 GPA is required. Several college majors require a higher GPA.

The following requirements for the second bachelor's degree must be met:

- Students must complete a minimum of **30 credits in residence**, of which 15 or more must be in the major field as specified by the major department. These credits are in **addition** to credits earned for the first degree.
- Candidates must **complete all university, college, major, and curricular degree program requirements.** Credits earned for the first degree will apply toward appropriate requirements for the second. However, students must take at least 30 additional credits, as noted above. Students with their first B.S. degree from the college must select a new major or degree program.

All second-degree candidates must be accepted by the department offering their program of interest and have their program approved by the college before beginning the program.

EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

A student who wishes to earn **two undergraduate degrees simultaneously** (in contrast to earning two undergraduate **majors** simultaneously) should consult with the Office of Academic Affairs as early as possible in the academic career regarding feasibility.

If the two degrees to be earned are within the College of Agricultural and Life Sciences, at least 30 additional credits and all course and grade point requirements must be completed. Thus, a minimum of 150 credits (for most majors) would be required. Some courses may satisfy requirements for both degrees. **A student must have an advisor in both major fields.** To work on two degrees simultaneously within the college, a student should seek permission as *early* as possible to ensure that it is feasible to complete both degrees.

If the two degrees to be earned are from two different colleges (one degree in Agricultural and Life Sciences and one degree in another school or college on this campus), the undergraduate dean in both colleges must approve the student's plan. Note that not all colleges will allow dual degrees. Where allowed, the following academic policies shall be followed (additional policies may exist):

1. Admission into the other college or school shall be based on that particular college or school admission criteria.
2. A student may seek two baccalaureate degrees simultaneously (in contrast to two majors), each from a different college, provided that

the two degree programs differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits and that the student's program is **approved by both colleges before the student has earned 86 credits.** The degrees from each college will be awarded simultaneously.

Special applications and additional information pertaining to the earning of two undergraduate degrees simultaneously are available from the Office of Academic Affairs, 116 Agricultural Hall.

EARNING TWO UNDERGRADUATE MAJORS SIMULTANEOUSLY

CALS permits undergraduates to pursue two CALS majors simultaneously. The following policies and procedures have been established for this program:

a. The student must have approval in advance from their CALS major advisor, the advisor of their desired second major, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
b. The student must satisfy all requirements of both majors. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.

The diploma awarded will be based on the certification of completion of the degree. The transcript of grades will note the completion of requirements for two or more majors.

EARNING A LETTERS AND SCIENCE MAJOR WHILE COMPLETING A DEGREE PROGRAM IN THE COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Letters & Science (L&S) permits undergraduates currently enrolled in the College of Agricultural and Life Sciences to complete an additional undergraduate major offered by L&S and have this fact noted on the transcript.

The following policies and procedures have been established for this program:

1. The student must have advance approval from their CALS major advisor, their L&S major advisor, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The L&S major is not to substitute for any major in CALS.
3. The student must satisfy all requirements of the L&S major, both the requirements established by the department (i.e., certain courses) and those established by L&S (e.g., 15 credits of advanced work in the major in residence at UW–Madison). The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.
4. Requests for substitutions or other modifications of the requirements of a given L&S major must be acted on by an L&S dean, in consultation with the Associate Dean for Academic Affairs in CALS, before enrollment in the course.

RESOURCES

STUDENT SERVICES

Staff in the Office of Academic Affairs provide a variety of services. They certify students for their respective degrees upon graduation, maintain student records, administer scholastic policies, administer college scholarships and loans, coordinate development of curricula, act on student withdrawals, counsel students about career and study opportunities, host interviews and career-related events and workshops, oversee one undergraduate housing unit, operate the Farm and Industry Short Course, assist with degree audit reports, help departments plan and assess educational programs, and coordinate and maintain programs for students and staff. Special counseling is available for interested minority or disadvantaged students, students with disabilities, and students with unusual circumstances or needs.

STUDENT ADVISING

Every student enrolled in the college has an assigned advisor. Students are expected to consult their advisors before each registration period, and are encouraged to consult their advisors throughout the year. Faculty/department staff advisors help students plan their coursework to meet their educational objectives. When students enroll in the college as beginning freshmen or as transfer students, they are assigned an advisor in their major field of study. Advisors will talk with students about educational and career objectives and counsel them about meeting degree requirements and planning their educational programs.

Once students have decided on an area of study, their advisors will guide them toward courses in that area and advise them on how to fulfill university and college requirements. Students can change their advisor if they change their major or if they find a different advisor with interests more similar to their own. The change is made through the department or through the Office of Academic Affairs.

Students are encouraged to seek advice from university faculty and staff, in addition to their assigned advisor. There are many people on campus who are willing and able to help students; however, it is the student's responsibility to seek advice.

CAREER SERVICES

The College of Agricultural and Life Sciences provides resources and advising for students to explore career interests and develop skills as they seek employment or admission to graduate or professional programs. CALS Career Services, located in 116 Agricultural Hall, assists students with the full time and internship search process by helping them learn how to articulate their skills and abilities to future employers and graduate/professional schools. The career services team manages the campus wide career and internship fairs held twice per year. They also arrange workshops and classroom visits on a variety of career development topics and host recruiters for networking events, on-campus interviews, and industry panel discussions. Many students secure internships and full time employment through connections with employers on campus. Students are encouraged to utilize CALS Career Services early in their undergraduate experience. See CALS Career Services (https://cals.wisc.edu/academics/undergraduate-students/career-services) for more information.

The Career Services Office is operated as a service to students. The college cannot guarantee job placement.

INTERNATIONAL ACADEMIC OPPORTUNITIES

Today's college graduates must be prepared for the international community in which they will live and work. Study and research abroad programs offer students unique experiences, which cannot be replicated on the UW–Madison campus. The College of Agricultural and Life Sciences (CALS) offers 35+ short and long-term programs in more than 20 countries, the majority of which are open to students from across campus. All programs carry UW–Madison academic credit and many fulfill the field experience requirement for the undergraduate certificate in global health (p. 170). International academic opportunities allow students to enrich their education by experiencing other cultures and broadening their understanding of agricultural and life sciences outside the United States. CALS programs address topics such as food security and sustainable food systems, agriculture and nutrition, health care, environmental health, and climate change, among others. Students may also receive academic credit for participating in study abroad programs administered by UW's International Academic Programs (IAP) office. To learn more about CALS Study Abroad, please visit Study Abroad (https://cals.wisc.edu/academics/undergraduate-students/studyabroad).

The CALS study abroad team, including student peer advisors, is located in the Office of Academic Affairs, 116 Agricultural Hall. Students are welcome to stop by for more information or contact us via email at studyabroad@cals.wisc.edu.

FINANCIAL RESOURCES

In addition to university scholarships, grants, loans, and employment available at the Office of Student Financial Aid (https://financialaid.wisc.edu) (333 East Campus Mall), scholarships and loans are available to qualified students in the College of Agricultural and Life Sciences.

AGRICULTURAL AND LIFE SCIENCES SCHOLARSHIPS

CALS has an extensive scholarship program. All CALS students must apply every year to be considered for a scholarship. One application allows consideration for any scholarships administered by the college. The application cycle runs from early November to early February every year. Selection of recipients is determined by the CALS Scholarships and Loans Committee.

The scholarship application is available through the Wisconsin Scholarship Hub (WiSH (https://wisc.academicworks.com)), which can be found through the Student Services tab in MyUW or through the Finances section of Student Center. Applicants must follow all prompts to ensure completion of the application process.

Scholarships with a financial need component require a current Free Application for Federal Student Aid (FAFSA (http://www.fafsa.ed.gov)) on file with the university.

AGRICULTURAL AND LIFE SCIENCES LOANS

Several short-term loan funds have been established for students in the college. Students may borrow money for up to six months at no interest, or very low interest, provided the money is repaid when due. Students must be able to provide a specific plan for loan repayment. No prior authorizations are needed, and the loan amount is available from the Bursar's Office on the same day the application is approved. Applications for these short-term loans are available in the Office of Academic Affairs.

STUDENT EMPLOYMENT

Many College of Agricultural and Life Sciences students gain valuable experience by working part-time in jobs related to their interests. Working in a laboratory is often the first step for students who are interested in conducting their own research.

Some students are hired directly by specific departments as a result of the students' interests and experience. Also, the university maintains a Student Job Center (http://jobcenter.wisc.edu) in the Office of Student Financial Aid, 333 East Campus Mall, to help students find part-time work.

AGRICULTURAL AND LIFE SCIENCES STUDENT ORGANIZATIONS

Agricultural and Life Sciences students will find many organizations and clubs to meet their professional interests. Student organizations provide a vehicle for students to gain leadership experience and develop professional skills. For more information see the Registered Student Organization (RSO) Directory (https://win.wisc.edu/organizations) and CALS Student Organizations and Clubs (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/student-organization).

PREPARATION FOR PROFESSIONAL CAREERS IN VETERINARY MEDICINE AND MEDICINE

For information about preparation for professional careers in veterinary medicine and medicine, visit the Center for Pre-Health Advising (http://www.prehealth.wisc.edu).

FACILITIES

The College of Agricultural and Life Sciences has outstanding facilities for student housing, instruction, and research.

The college operates one residence hall, Jorns Hall. Those interested in this housing option should call 608-262-2270 or visit FISC Housing (http://fisc.cals.wisc.edu/housing).

Staff and students also make extensive use of off-campus sites such as the University Arboretum and 13 Agricultural Research Stations located throughout the state. The college includes many specialized instructional and research facilities. On-campus facilities include a livestock laboratory, instructional greenhouses, a number of instructional computer labs, and the Biotechnology, Microbial Sciences, and Biochemistry buildings.

The Steenbock Memorial Library (http://steenbock.library.wisc.edu) serves the College of Agricultural and Life Sciences with a collection of more than 600,000 books, bound journals, and government publications, and a variety of seating and study rooms for individual and group use. The library operates a public-access computer facility with a wide range of hardware and software. The building is a memorial to biochemist Harry Steenbock for his outstanding contributions to Wisconsin and to the health of humanity. Steenbock Library has received awards for its design and for its service to students, faculty, and academic staff. Steenbock Library staff help students and faculty locate reference material for their research through workshops on using the library and through personal assistance with search strategies.

HONORS

DEAN'S LIST

Students who achieve at a high level academically are recognized by the dean. Selections to the Dean's List are announced at the close of each semester. The student's achievement for only the single semester is considered and is noted on the transcript. To be placed on the Dean's List, a student must have achieved at least a 3.5 GPA or above for *the semester's study load of not less than 12 credits, on a regular grade basis* (A, AB, B, BC, C, D, F), regardless of overall grade point average, and must not have received a grade of F or an Incomplete for any course, or a U (for a pass/fail course) or an N (for Credit/No Credit graded course that was not passed).

CRITERIA FOR "GRADUATED WITH DISTINCTION" AND "GRADUATED WITH HIGHEST DISTINCTION"

Students who have a cumulative GPA that places them in the top 20 percent of the graduating class in the college will graduate with "Distinction"; those in the upper 5 percent, with "Highest Distinction." These students must have at least 60 credits on the Madison campus. The notations on the student's transcript will read "Graduated with Distinction" or "Graduated with Highest Distinction." The registrar determines which students meet these criteria.

DISTINCTIVE SCHOLASTIC ACHIEVEMENT

A *preliminary* list of those degree candidates who may be eligible for Graduation with Distinction is prepared by the registrar prior to commencement. These students are eligible to wear a cardinal stole with their caps and gowns at commencement. Inclusion on the Distinctive Scholastic Achievement list does not guarantee Graduation with Distinction, which is determined after final grades are awarded.

HONORS PROGRAM

The CALS Honors Program allows talented and highly motivated students to continue challenging themselves in the classroom and beyond. The objective of the Honors Program is to help students develop critical thinking and problem solving abilities through specialized courses and to provide students the challenge of designing, conducting, and reporting research in collaboration with faculty from one of the world's leading research institutions.

HONORS

CALS has two different avenues to earn an Honors degree designation. Students may complete either based on their interests and goals. Students are not allowed to complete both types of honors. In either option, a student must successfully complete a Senior Honors Thesis approved by the research mentor or committee.

Honors in Research (p. 53)
Students engage in the university's great research tradition through the completion of two research projects: an introductory project and a senior thesis project. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to the hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery. Students who successfully complete Honors in Research (p. 53) will receive an Honors designation on their diploma.

Honors in the Major (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-the-major) Students complete a specified number of Honors credits in a designated set of courses to gain advanced knowledge and inquiry within their major field of interest. A limited number of CALS majors offer this program option; more information is located on the Requirements tab for the major. Students who successfully complete Honors in the Major will receive an Honors designation on their transcript.

For complete information contact the Office of Academic Affairs, 116 Agricultural Hall, 608-262-3003.

AGRICULTURAL AND APPLIED ECONOMICS

The Department of Agricultural and Applied Economics (AAE) at the University of Wisconsin–Madison was founded in 1909 and was the first department of agricultural economics in the United States. The department offers two undergraduate programs—agricultural and applied economics (p. 42) and agricultural business management (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/agricultural-applied-economics/business-management-abm). Both majors will give students a strong base in economics and how it is applied to real-world situations. The teaching and research in AAE focuses on the areas of development economics, environmental economics and managerial economics.

The department also offers two certificates to undergraduate students enrolled at the University of Wisconsin–Madison: the certificate in business management for agricultural and life sciences (p. 50) and the certificate in development economics (p. 51).

DEGREES/MAJORS/CERTIFICATES

- Agricultural and Applied Economics, B.S. (p. 42)
- Agricultural Business Management, B.S. (p. 46)
- Business Management for Agricultural and Life Sciences, Certificate (p. 50)
- Development Economics, Certificate (p. 51)

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to students declared in both of our majors, agricultural & applied economics and agricultural business management. Students in either of our majors or who have declared the certificate in business management for agricultural & life sciences (p. 50) are also eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://renk.aae.wisc.edu) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

RESOURCES

The **Agricultural Business Management Club** at UW–Madison is a group of motivated students interested in careers involving agriculture and/or business. The club offers members the opportunity to learn more about the agribusiness industry and make connections through career speakers, field trips and social events.

There are a number of other student organizations of interest to students in our majors. For more information, please visit the CALS Student Organization (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/student-organizations/#association-of-women-in-agriculture) website.

AGRICULTURAL AND APPLIED ECONOMICS, B.S.

Students develop and use economic data and models to analyze and understand a wide range of issues—including environmental problems, world hunger, energy and climate change, business economics and finance, economic development, globalization and trade, biotechnology, land-use management, and community development. Course subjects include economics, environmental economics, managerial economics, financial management, commodities and futures markets, the global economy, development in Latin America, Africa, and Asia, cooperatives, international trade, pollution, and regulation. Students acquire the necessary skills to pursue a rewarding career in consulting, government, business, or international organizations, or a graduate degree in economics, public policy, business or law.

Major requirements usually met in the freshman and sophomore years are: A A E 215, ECON 102, an elementary course in statistics, and one semester of calculus (MATH 211, MATH 217 or MATH 221).

Other major requirements are: ECON 301 and ECON 302, A A E 500 (a "capstone" course), and a minimum of 15 additional credits in AAE courses. Students may select an area of concentration within the major from four choices: Applied Economics, Development Economics, Environmental Economics or Managerial Economics. These 15 credits are selected by the student with the assistance of an advisor and must be at the 200 level or above (does not include A A E 215, A A E 299 or A A E 500).

Students completing the agricultural and applied economics major are awarded the bachelor of science degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.		
Select one of the following:		5
MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
Select one of the following:		3-6
ECON 310	Statistics: Measurement in Economics	
STAT 301	Introduction to Statistical Methods	
STAT 324	Introductory Applied Statistics for Engineers	
STAT 371	Introductory Applied Statistics for the Life Sciences	
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
GEN BUS 306 & GEN BUS 307	Business Analytics I and Business Analytics II	
Core		
A A E 215	Introduction to Agricultural and Applied Economics [1]	4
or ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	3-4
ECON 301	Intermediate Microeconomic Theory	4
or ECON 311	Intermediate Microeconomic Theory - Advanced Treatment	
ECON 302	Intermediate Macroeconomic Theory	4
or ECON 312	Intermediate Macroeconomic Theory - Advanced Treatment	
Concentrations within the Major		
Students must complete 15 credits of AAE courses 200-level or above. Students may choose to focus their studies on an area of concentration as follows: [2]		15
Applied Economics		
Development Economics		
Environmental Economics		
Managerial Economics		
Capstone		
A A E 500	Senior Capstone Experience	3
Total Credits		41-45

1 A A E 215 Introduction to Agricultural and Applied Economics satisfies QR-B credit.

2 A A E 215 Introduction to Agricultural and Applied Economics, A A E 299 Independent Study and A A E 500 Senior Capstone Experience may not count toward the 15 credits required in the major.

CONCENTRATIONS WITHIN THE MAJOR

APPLIED ECONOMICS

Code	Title	Credits
AAE courses, 200 level and above [1]		15
Total Credits		15

[1] AAE courses 200 level and above may not include A A E 215 Introduction to Agricultural and Applied Economics, A A E 299 Independent Study, or A A E 500 Senior Capstone Experience.

DEVELOPMENT ECONOMICS

Code	Title	Credits
Select any of the following courses:		
A A E/INTL ST 373	Globalization, Poverty and Development	3
A A E/INTL ST 374	The Growth and Development of Nations in the Global Economy	3
A A E/ECON/ INTL BUS 462	Latin American Economic Development	3
A A E/ECON 473	Economic Growth and Development in Southeast Asia	3
A A E/ECON 474	Economic Problems of Developing Areas	3
A A E/ECON 477	Agricultural and Economic Development in Africa	3
AAE courses, 200 level and above [1]		

[1] AAE courses 200 level and above may not include A A E 215 Introduction to Agricultural and Applied Economics, A A E 299 Independent Study, or A A E 500 Senior Capstone Experience.

ENVIRONMENTAL ECONOMICS

Code	Title	Credits
Select any of the following courses:		
A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 246	Climate Change Economics and Policy	3
A A E/ECON/ ENVIR ST 343	Environmental Economics	4
A A E/ECON/ F&W ECOL 531	Natural Resource Economics	3
A A E/ECON/ ENVIR ST/ URB R PL 671	Energy Economics	3
AAE courses, 200 level and above [1]		

[1] AAE courses 200 level and above may not include A A E 215 Introduction to Agricultural and Applied Economics, A A E 299 Independent Study, or A A E 500 Senior Capstone Experience.

MANAGERIAL ECONOMICS

Code	Title	Credits
Select any of the following courses:		
A A E 320	Farming Systems Management	3
A A E 322	Commodity Markets	3
A A E 419	Agricultural Finance	3
A A E/ECON 421	Economic Decision Analysis	4
AAE courses, 200 level and above [1]		

[1] AAE courses 200 level and above may not include A A E 215 Introduction to Agricultural and Applied Economics, A A E 299 Independent Study, or A A E 500 Senior Capstone Experience.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Use economic concepts to think critically about real-world problems and public policy debates.
2. Use appropriate quantitative techniques to analyze economic problems.
3. Communicate results effectively orally and in writing.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE AGRICULTURAL & APPLIED ECONOMICS FOUR-YEAR PLAN

Freshman

Fall	Credits	Spring	Credits
MATH 211 or 221[1]	5	COMM B	3
COMM A[2]	3	Chemistry Course	4-5
A A E 215 or ECON 101[3]	4	CALS Science Requirement	3
First Year Seminar	1	Electives[4]	6

Elective	4		
	15		13-16

Total Credits 28-31

Junior

Fall	Credits	Spring	Credits
Concentration Courses	6	Concentration Courses	3
ECON 302	4	Electives	12
Electives	6		
	16		15

Total Credits 31

Senior

Fall	Credits	Spring	Credits
Concentration Courses	6	Capstone Course	3
Electives	9	Electives	12
	15		15

Total Credits 30

1 Students must complete MATH 211 or MATH 217 or MATH 221. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand, this level of competence may require as many as three semesters of coursework in mathematics.

2 The communications requirement includes Communication Parts A & B. Completing this requirement early will help the students with written and oral assignments in future courses.

3 Students should complete the basic courses in economics early in their programs so that they can have greater choice in courses in the major.

4 Students should choose electives that satisfy one of the UW requirements (ethnic studies or social sciences or humanities) or the college requirements. See Requirements tab for details.

ADVISING AND CAREERS

For more information or to declare a major in agricultural and applied economics, contact:

Linda Davis
Department of Agricultural and Applied Economics
University of Wisconsin–Madison
424 Taylor Hall
608-262-9488
linda.davis@wisc.edu
Schedule an appointment using Starfish.

CAREERS

Students with a degree in agricultural and applied economics may specialize in international development, environmental policy, or managerial economics. They often find careers in policy analysis, environmental management, business analysis, trade or consulting. They can find employment with a variety of employers such as nonprofit organizations, government agencies, co-operatives, multinational firms, agribusiness companies, financial institutions and the food or retailing industry. Many students pursue graduate degrees in economics, business, public policy, law or other areas.

Students can use the services provided by the CALS Career Services Office (https://cals.wisc.edu/academics/undergraduate-students/career-services), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake (https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake), an online job/internship posting tool that provides students with hundreds of job and internship listings.

WISCONSIN EXPERIENCE

CAPSTONE

Students with a major in agricultural and applied economics (AAE) must all complete the senior capstone requirement. For our majors, the capstone is a specific class which offers students the opportunity to work in a group with other students in their area of interest to produce a final project and present it to their fellow students and AAE faculty. Students will have the opportunity to demonstrate how the concepts they have learned in their AAE classes are applied to real-world situations.

STUDY ABROAD

Many students with a major in agricultural and applied economics choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare students to participate in today's global economy. International Academic Programs (IAP) (https://www.studyabroad.wisc.edu) serves as the primary study abroad office on campus, offering over 200 programs in over 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (https://cals.wisc.edu/academics/undergraduate-students/studyabroad). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

RENK SCHOLARSHIP PROGRAM

Agricultural and applied economics majors are eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://renk.aae.wisc.edu) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

INDEPENDENT STUDY

Students in the agricultural and applied economics major may have the opportunity to work with an AAE faculty member on an independent study project. They will work with one of our faculty and engage in independent reading and research for credit. Students will have the opportunity to experience the excitement and frustrations of doing research, while learning techniques that might prove useful in future projects.

RESOURCES AND SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to students declared in both of our majors, agricultural and applied economics and agricultural business management. Students in either of these majors or who have declared the certificate in business management for agricultural and life sciences (p. 50) are also eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://renk.aae.wisc.edu) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

The Agricultural Business Management Club at UW–Madison is a group of motivated students interested in careers involving agriculture and/or business. The club offers members the opportunity to learn more about the agribusiness industry and make connections through career speakers, field trips and social events.

AGRICULTURAL BUSINESS MANAGEMENT, B.S.

Today's businesses and industries in the agricultural and food sectors of the economy are growing rapidly. Agribusiness industries, such as those that supply farm inputs or process and market agricultural products, need staff who are educated in both business and agriculture. Students in agricultural business management also find employment in companies specializing in biological systems engineering, landscape architecture, biotechnology, food technology, food science, food marketing, and large-scale farm enterprises.

The bachelor of science degree program in agricultural business management enables students to obtain a strong foundation in economics to learn how businesses make decisions and minimize risk and how to use applied mathematics and statistics to analyze prices and markets. Agricultural and applied economics (AAE) courses constitute a substantial segment of the curriculum for the B.S. degree in agricultural business management. In addition to general college requirements, a major in ABM includes courses in economics, math, and statistics. ABM students will also take a minimum of 12 credits from the School of Business. (See Requirements tab for more information.)

Agricultural business management emphasizes coursework in the functional areas of the business school: accounting, finance, marketing, management, and human resources.

Code	Title	Credits
Students will learn:		
	Skills for running a business	
	Finance and economic decision analysis	
	Analytical and managerial tools	
	Organization of the food system	
	Commodity markets	
	Senior capstone project integrates learning from major coursework	

A degree in agricultural business management prepares students for a career in agribusiness or other fields of business. The Department of Agricultural and Applied Economics may be consulted for specific career information for the major.

Students completing the agricultural business management major are awarded the *Bachelor of Science–Agricultural Business Management* degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information

about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

A A E 500	Senior Capstone Experience	3
Total Credits		51-53

[1] ACCT I S 100 is a prerequisite for ACCT I S 211.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Use economic concepts to think critically about real-world problems and business management issues.
2. Use appropriate quantitative techniques to analyze business management issues.
3. Communicate results effectively orally and in writing.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

Total Credits 30

[1] Students must complete MATH 211 Calculus or MATH 217 or MATH 221. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand, this level of competence may require as many as three semesters of coursework in mathematics.

[2] The communications requirement includes Communication Parts A & B. Completing this requirement early will help the students with written and oral assignments in future courses.

[3] Students should complete the basic courses in economics early in their programs so that they can have greater choice in courses in the major.

[4] Students should choose electives that satisfy one of the UW requirements (ethnic studies or social sciences or humanities) or the college requirements. See Requirements tab for details.

[5] ABM students are required to take 9 credits from FINANCE/ ECON 300, GEN BUS 301, GEN BUS 310, GEN BUS 311, MARKETNG 300, M H R 300 (Organizational Behavior), M H R 305 (Human Resources), and ACCT I S 211.

ADVISING AND CAREERS

For more information or to declare a major in agricultural business management, contact:

Linda Davis
Department of Agricultural and Applied Economics
University of Wisconsin–Madison
424 Taylor Hall
608-262-9488
linda.davis@wisc.edu
Schedule an appointment using Starfish.

CAREERS

Students with a degree in agricultural business management often find careers in areas such as banking and finance, business analysis, marketing, management, commodities trading, sales or consulting.

Types of employers:

- Agribusiness firms
- Financial institutions, banks or investment firms
- Local, state or federal government agencies
- Co-operatives
- Retail food companies
- Tech companies

Students can use the services provided by the CALS Career Services Office (https://cals.wisc.edu/academics/undergraduate-students/career-services), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake (https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake), an online job/internship posting tool that provides students with hundreds of job and internship listings.

WISCONSIN EXPERIENCE

CAPSTONE

Students with a major in agricultural business management (ABM) must complete the senior capstone requirement. For our majors, the capstone is a specific class which offers students the opportunity to work in a group with other students in their area of interest to produce a final project and present it to their fellow students and Agricultural & Applied Economics faculty. Students will have the opportunity to demonstrate how the concepts they have learned in their ABM classes are applied to real-world situations.

INTERNSHIP

Internships allow students to gain professional experience and skills that future employers value. Agricultural business management students are encouraged to complete an internship during their undergraduate years and some of them choose to receive academic credit for their internship. An internship lets you experience a career to see if it's the right one for you, allows you to gain useful skills, and provides an opportunity to make connections with professionals in the industry. Students usually complete an internship during the summer after their sophomore or junior year.

RENK SCHOLARSHIP PROGRAM

Agricultural business managemnt majors are eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute

(https://renk.aae.wisc.edu) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

STUDY ABROAD

Students with a major in agricultural business management may choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare students to participate in today's global economy. International Academic Programs (IAP) (https://www.studyabroad.wisc.edu) serves as the primary study abroad office on campus, offering over 200 programs in over 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service-learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (https://cals.wisc.edu/academics/undergraduate-students/studyabroad). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

RESOURCES AND SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to students declared in both of our majors, agricultural & applied economics and agricultural business management. Students in either of our majors or who have declared the certificate in business management for agricultural and life sciences (p. 50) are also eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://renk.aae.wisc.edu) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

The Agricultural Business Management Club at UW–Madison is a group of motivated students interested in careers involving agriculture and/or business. The club offers members the opportunity to learn more about the agribusiness industry and make connections through career speakers, field trips, and social events.

BUSINESS MANAGEMENT FOR AGRICULTURAL AND LIFE SCIENCES, CERTIFICATE

Basic business literacy can benefit all graduates, no matter what their field or intended career. When entering the professional world, CALS students are increasingly confronted with contexts that require an understanding of basic business and management concepts. The certificate in business management for agricultural and life sciences can provide students with the business skills that employers value.

The certificate offers students in the College of Agricultural and Life Sciences (CALS) the opportunity to gain business knowledge and have it recorded on their transcript. The certificate is designed specifically for students intending to pursue careers in agriculture and life sciences, and enrollment is open only to undergraduates currently enrolled in CALS. This professional credential is offered by the Department of Agricultural and Applied Economics, the Department of Life Sciences Communication, and the Renk Agribusiness Institute, with the collaboration of the School of Business.

HOW TO GET IN

To declare this certificate, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32). Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

REQUIREMENTS

Code	Title	Credits
Completion of the certificate requires a total of six courses.		
The following four courses are required:		
A A E 215	Introduction to Agricultural and Applied Economics	4
LSC 270	Marketing Communication for the Sciences	3
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	3
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	3
Select two courses from the following:		*6*
A A E 319	The International Agricultural Economy	
A A E 320	Farming Systems Management	
A A E 322	Commodity Markets	
A A E 323	Cooperatives	
A A E 419	Agricultural Finance	
A A E/ECON 421	Economic Decision Analysis	
A A E/ECON 526	Quantitative Methods in Agricultural and Applied Economics	
A A E/M H R 540	Intellectual Property Rights, Innovation and Technology	
DY SCI 233	Dairy Herd Management I	
DY SCI 234	Dairy Herd Management II	
DY SCI 535	Dairy Farm Management Practicum	
LSC 250	Research Methods in the Communication Industry	
LSC 251	Science, Media and Society	
LSC 431	Advertising in the Life Sciences	
LSC 432	Social Media for the Life Sciences	
LSC 435	Theory and Practice of Integrated Marketing Communication	
Total Credits		19

No substitutions are allowed for the core courses. Students may count no more than two courses toward both their major requirements and these certificate requirements.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand general business concepts.
2. Understand business management fundamentals in an agricultural and life sciences context.
3. Understand economics, marketing and communication as they relate to business management in agricultural and life science industries.

ADVISING AND CAREERS

For more information or to declare the certificate in business management for agricultural and life sciences, contact:

Linda Davis
Department of Agricultural and Applied Economics
University of Wisconsin–Madison
424 Taylor Hall
608-262-9488
linda.davis@wisc.edu
Schedule an appointment using Starfish.

CAREERS

Students pursing the certificate in business management for agricultural and life sciences are often interested in careers such as running a research lab, managing the books on their family farm, banking, business analysis, marketing, or management and sales, depending on their major. When combined with their major, the certificate can provide a basic background in business management that many employers find valuable.

Students can use the services provided by the CALS Career Services Office (https://cals.wisc.edu/academics/undergraduate-students/career-services), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake (https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake), an online job/internship posting tool that provides students with hundreds of job and internship listings.

RESOURCES AND SCHOLARSHIPS

RENK SCHOLARSHIP PROGRAM

Students declared in the certificate for business management for agricultural and life sciences are eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://renk.aae.wisc.edu) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

AGRICULTURAL BUSINESS MANAGEMENT CLUB

The Agricultural Business Management Club at UW–Madison is a group of motivated students interested in careers involving agriculture and/or business. The club offers members the opportunity to learn more about the agribusiness industry and make connections through career speakers, field trips and social events.

DEVELOPMENT ECONOMICS, CERTIFICATE

The certificate in development economics gives students a solid foundation of analytical skills that will enable them to better understand the challenges created by world poverty. They will learn how economics can be used to address the problems of poverty and the impact of globalization on growth and development. Students will focus on such

issues as: the relationship between population growth and economic growth, the major debates about food self-sufficiency and food security, how child labor and gender discrimination limit economic development and what environmental problems are posed by economic development.

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison.

HOW TO GET IN

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison. In order to declare the certificate, the student must have successfully completed A A E 215 Introduction to Agricultural and Applied Economics, ECON 101 Principles of Microeconomics or ECON 111 Principles of Economics-Accelerated Treatment or a comparable introductory economics course. Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

REQUIREMENTS

Code	Title	Credits
In order to declare the certificate, the student must have successfully completed one of the following:		
A A E 215	Introduction to Agricultural and Applied Economics	
ECON 101	Principles of Microeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	

Code	Title	Credits
The certificate requires five courses.		
Complete two core courses:		
A A E/ECON 474	Economic Problems of Developing Areas	3
A A E/INTL ST 373	Globalization, Poverty and Development	3
or A A E/ INTL ST 374	The Growth and Development of Nations in the Global Economy	
Select one course from the following:		*3*
A A E 319	The International Agricultural Economy	
A A E/ AGRONOMY/ INTER-AG/ NUTR SCI 350	World Hunger and Malnutrition	
A A E/ INTL ST 373	Globalization, Poverty and Development	
A A E/ INTL ST 374	The Growth and Development of Nations in the Global Economy	
A A E/ECON/ INTL BUS 462	Latin American Economic Development	
A A E/ECON 473	Economic Growth and Development in Southeast Asia	
A A E/ECON 477	Agricultural and Economic Development in Africa	
Select one course from the following:		*3*
C&E SOC/ POP HLTH/ SOC 380	Contemporary Population Problems for Honors	
C&E SOC/ ENVIR ST/ SOC 540	Sociology of International Development, Environment, and Sustainability	
C&E SOC/ SOC 630	Sociology of Developing Societies/ Third World	
ECON 364	Survey of International Economics	
ECON 464	International Trade	
ECON 467	International Industrial Organizations	
ECON 475	Economics of Growth	
GEOG/ ENVIR ST 339	Environmental Conservation	
INTL BUS 200	International Business	
INTL BUS/ FINANCE 445	Multinational Business Finance	
INTL ST 402	Topics in Politics and Policy in the Global Economy	
POLI SCI 348	Analysis of International Relations	
POLI SCI 350	International Political Economy	
POLI SCI 351	Politics of the World Economy	
Select one additional course from any of the courses listed above		*3*
Total Credits		15

A student may combine this certificate with any other certificate and/or major. However, students with a major in agricultural and applied economics, a major in economics, or a major in the Politics and Policy in the Global Economy option in international studies may count no more than 6 credits toward both their major requirements and the requirements for the certificate in development economics.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand the impacts of global economic processes, such as trade foreign investment, and migration, on growth and development.
2. Understand the contributions of private and public investments in areas such as agriculture, education, environmental resources, health care, industrialization, and technology adoption to growth and development, and the methods for measuring those effects.

ADVISING AND CAREERS

CAREERS

Students pursuing the certificate in development economics are often interested in careers in international development. Depending on their major, they often find careers in policy analysis, consulting, or working abroad. They can find employment with a variety of employers such as nonprofit organizations, government agencies, cooperatives, or multinational firms. Many students pursue graduate degrees in economics, public policy, law, or other areas.

STUDY ABROAD

Many students declared in the certificate in development economics choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare them to participate in today's global economy. International Academic Programs (IAP) (https://www.studyabroad.wisc.edu) serves as the primary study abroad office on campus, offering more than 200 programs in more than 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (https://cals.wisc.edu/academics/undergraduate-students/studyabroad). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

AGRICULTURAL AND LIFE SCIENCES - COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

- College of Agricultural and Life Sciences Honors (p. 53)
- Individual Major, B.S. (p. 54)
- Landscape Architecture, BSLA (p. 57)

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES HONORS

The CALS Honors Program allows talented and highly motivated students to continue challenging themselves in the classroom and beyond. CALS has two different avenues to earn an Honors degree designation: Honors in Research or Honors in Major. Information about Honors in Major is located in the "requirements" tab for each major.

HONORS IN RESEARCH

Students completing the CALS Honors in Research track engage in the university's great research tradition through the completion of two research projects: an introductory project and a senior thesis project. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to the hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery. Students who successfully complete Honors in Research will receive an Honors designation on their diploma.

HOW TO GET IN

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

The Honors in Research track requires students to complete two research projects, an introductory project and a senior thesis project. Students work under the guidance of a faculty mentor for both projects.

In the course of this program, it is expected that the student will: (i) learn the background and methods of the discipline; (ii) identify an interesting and tractable problem or question for study; (iii) learn to draft a proposal defending the relevance and appropriateness of specific research efforts; (iv) demonstrate appropriate skills in working on that problem in a manner appropriate to a professional in the discipline; (v) analyze and interpret the results of their efforts; and (vi) present these results as a thesis and in an approved public forum.

To earn Honors in Research, students must first be admitted to the college's Honors Program. Students must then make satisfactory progress toward the program requirements listed below and maintain a 3.25 GPA. Failure to maintain this progress will result in removal of the student from the Honors Program.

Program requirements:

- Identify a research mentor
- Complete introductory (one-semester) research project and presentation
- Complete three seminar courses (one credit each)
  - Inter-Ag 288 (spring of freshman year)
  - Inter-Ag 388 (spring of sophomore year)
  - Inter-Ag 488 (spring of junior year)
- Enroll in Senior Honors Thesis credits (681 and 682; or 699 in the mentor's department) for two semesters at a minimum of two credits each semester
- Complete a Senior Honors Thesis research project and presentation
- Submit the Senior Honors Thesis and related documentation to CALS Academic Affairs

Additional information can be found on the Honors website (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-research).

ADVISING AND CAREERS

Questions may be directed to the CALS Honors Program Manager at academicaffairs@cals.wisc.edu or 608-262-3003.

INDIVIDUAL MAJOR, B.S.

The individual major is a flexible program for undergraduates in the College of Agricultural and Life Sciences who want to attain a specific academic goal that is not easily attained through a major in one or more departments. The major must involve courses from several departments, must be at least as rigorous as a regular departmental major, and must be targeted at a special intellectual problem or academic need identified by the student. The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Approval is not guaranteed, so students should be prepared to pursue alternative options and are encouraged to discuss these with their advisor.

The individual major is available in the bachelor of science degree program. The transcript will indicate "Individual Major" until the degree is awarded. It will then show the exact name of the approved "individual major."

Students are strongly encouraged to consult with an assistant dean in the CALS Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

HOW TO GET IN

The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. The process to request to pursue an individual major is outlined below.

The student selects a three-person faculty committee from departments offering courses in the proposed major. The major advisor is from a CALS department that offers many of the courses in the proposed individual major. No more than two members of the committee can be from a single department. The student must submit a proposed plan of study to the committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The plan should include: the title of the proposed major; the rationale for the major; learning outcomes for the major and a brief assessment plan; the list of courses and the reasons for including each course in the major; and a semester plan for degree completion. The student is required to earn at least 30 credits after the term in which the proposal is approved. Thus, early planning is essential.

If the faculty committee approves the plan, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the Curriculum Committee to present the proposal. The Curriculum Committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the Curriculum Committee is final. Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the Curriculum Committee.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

INDIVIDUAL MAJOR REQUIREMENTS

DEVELOPMENT OF THE INDIVIDUAL MAJOR

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. Development of the individual major is the responsibility of the student. The student should identify a faculty major advisor from the CALS department that offers many of the courses in the proposed individual major. In addition, the student should select two additional faculty from departments offering the courses in the proposed major to serve on the faculty committee. The student should consult with the faculty members and an assistant dean in Academic Affairs as a plan of study is developed. The plan of study must include the following:

- title of proposed major
- rationale for the major (what specific goal does the major achieve that cannot be achieved through one or more existing majors? what is the targeted intellectual problem? why is the major necessary for achieving the student's academic and career goals?)
- 3-5 learning outcomes for the major with a brief explanation of how learning will be assessed
- list of courses, including the reason for including each course in the major (how does each course contribute to the major learning outcomes?)
- semester plan for degree completion and estimated graduation term (if graduation exceeds four total years, include a justification for the extended time-to-degree; note that the student must earn at least 30 credits after the term in which the proposal is approved)

APPROVAL OF THE INDIVIDUAL MAJOR

Once the plan of study is developed, the student submits the plan to the faculty committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The faculty committee may require revisions prior to approval. Once approved, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the curriculum committee to present the proposal. The curriculum committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the curriculum committee is final. Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the curriculum committee.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

Students will develop learning outcomes as part of the individual major proposal process in consultation with their faculty mentors and an assistant dean. Review the Provost's website (https://assessment.provost.wisc.edu/student-learning-outcomes/writing-student-learning-outcomes) for guidelines on developing learning outcomes.

FOUR-YEAR PLAN

Students will develop a semester-by-semester plan as part of the proposal process for the individual major, in consultation with their faculty mentors and an assistant dean. Review the Four-Year Plans available for similar or related majors in the *Guide* to begin planning. Students should submit the proposal early in their academic career but no later than achieving senior standing (86 credits) to ensure timely progress to degree completion.

ADVISING AND CAREERS

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

Students are required to identify a faculty advisor as part of the process for requesting approval to pursue an individual major. The faculty advisor serves as the student's academic advisor along with support from the other members of the student's faculty committee. Additionally, students must work closely with an assistant dean in Academic Affairs throughout development and completion of the major.

WISCONSIN EXPERIENCE

From a first-year seminar course to completion of a culminating, major-related capstone experience, CALS students have the opportunity to participate in multiple *signature CALS experiences*. These experiences are defined by high-impact experiential learning and serve as the foundation of a CALS education, regardless of a student's major.

Here are ***ten ways*** to get involved and begin to create your own legacy on campus:

1. First-Year Seminar (p. 34): All incoming CALS students are provided a seamless transition to college by enrolling in one of several seminars with typically fewer than 25 students, close interaction with the instructor, and the opportunity to participate in meaningful dialogue about their experiences at UW–Madison.
2. CALS Honors Program (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program): Highly motivated students can pursue a more rigorous course of study and be recognized for their achievements.
3. International Experience (https://cals.wisc.edu/academics/undergraduate-students/international-programs): Students can choose from short-term programs of a few weeks to a full semester abroad based on their interests and academic plans. Combined with the International Studies (p. 34) requirement, CALS students develop the skills needed to successfully interact, motivate, and work with a culturally diverse population.
4. Internships (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/internships): Real-world work or field experience will: (a) help students explore a career or job, (b) increase postgraduation employment opportunities, and (c) broaden professional networks.
5. Leadership Education (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/leadership-programs): CALS has many opportunities for students to learn about and practice leadership including a leadership seminar, a leadership retreat, student organizations, and college committees.
6. Mentored Research / Independent Study (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/mentored-research-independent-studies): UW–Madison is known for its cutting-edge research. Students have the opportunity to be part of the discovery process by earning academic credit.
7. Service (http://www.morgridge.wisc.edu): CALS students have a strong record of service to the local, state, and international communities. Visit the Morgridge Center (https://morgridge.wisc.edu) for opportunities.
8. Student Organizations (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/student-organizations): CALS has more than 30 student organizations, and there are more than 1,000 campus-wide.
9. Facilities (https://cals.wisc.edu/about-cals/visit-cals): CALS has outstanding facilities for student housing, instruction, and research. From the Allen Centennial Garden with the former dean's residence to 13 Agricultural Research Stations, students experience hands-on and unique learning environments.
10. Capstone (p. 34): Students integrate and apply knowledge in a culminating learning experience designed to prepare them to address real-world problems after graduation.

The majority of CALS students complete several of the signature experiences above.

- 63% of CALS students complete internships or field experiences.
- 75% of CALS students complete community service or volunteer activities.
- 50% of CALS students complete mentored research experiences.

LANDSCAPE ARCHITECTURE, BSLA

With the merger of the departments of Landscape Architecture and Urban and Regional Planning creating the Department of Planning and Landscape Architecture with a new home in the College of Letters & Science admissions to the CALS Landscape Architecture BSLA have been suspended as of spring 2018 and will be discontinued as of fall 2021. If you have any questions, please contact the department. (info@dpla.wisc.edu)

The department of Planning and Landscape Architecture offers a Bachelor of Landscape Architecture (p. 1250)**, first available for declaration fall 2018.**

Students who enjoy art, science, technology, problem-solving, and design should consider a career in landscape architecture. Graduates in landscape architecture influence the design and management of cities, parks, and open spaces. They often advise park managers, citizen groups, landowners, and state agencies. Landscape architects design public and private outdoor spaces, restore and help preserve natural areas, develop and implement regional planning and public policy, and revitalize urban neighborhoods. The Professional Landscape Architecture degree program focuses on form-giving design, design implementation, and professional practice. Emphasis is placed on principles of design theory and process; problem solving in relationship to human needs and aspirations, and environmental awareness and stewardship; and on the development of technical proficiencies required of professional practice. Students learn site analysis, graphic communication, design synthesis, construction technology, and planting design.

The Professional Landscape Architecture degree program provides professional education accredited by the American Society of Landscape Architects (ASLA). Completion of this program is the first step in becoming a licensed landscape architect. The program emphasizes the exploration and understanding of design processes and graphic and verbal communication skills. The program also develops a student's sensitivity to natural, physical, historical, and cultural contexts of landscape design.

Students completing the requirements for this program are granted a *Bachelor of Science–Landscape Architecture* degree.

HOW TO GET IN

Admissions to the Landscape Architecture BSLA have been suspended as of spring 2018 and will be discontinued as of fall 2021. If you have any questions, please contact the department. (academicaffairs@cals.wisc.edu)

All students interested in enrolling in the professional degree program are enrolled as pre–landscape architecture majors. Admission to the professional program is on a competitive basis.

1. **Admission to the Pre–Landscape Architecture Program.** Applicants must satisfy the admission policies for the college (apply to the UW–Madison Office of Admissions and Recruitment); entering freshmen follow the instructions on the admissions application and list landscape architecture as their intended major. During the first year the student enrolls as a pre-landscape architecture student (PLA–1 classification) and concentrates on the completion of the prerequisite courses and university/college degree requirements.
2. **Eligibility for Consideration into the Landscape Architecture Accredited Professional Program.** Eligibility for consideration into the Landscape Architecture Accredited Professional Program (landscape architecture degree program) depends on fulfillment of these requirements: students may apply for formal admission to the program during the spring semester of each academic year. Selections are made only once a year for the fall semester. The first round of selections takes place in early summer. All students will be notified of their status at least two weeks before the start of the fall semester. Students who plan to complete their prerequisite courses during the summer session must so indicate on their application. The department will admit up to a maximum of 22 students, as resources permit. Selection will be based on a letter of intent, written by the applicant, which addresses her or his reasons for wanting to enter the major, and on grades earned in the following six prerequisite courses:

Code	Title	Credits
LAND ARC 250	Survey of Landscape Architecture Design (fall semester)	3
LAND ARC 210	Introduction to Landscape Architecture Design [1]	4
LAND ARC 211	Landscape Inventory and Evaluation Methods	4
M E 160	Architectural Graphics	3
Select one of the following:		3
ART 102	Two-Dimensional Design	
ART 112	Drawing I	
DS 120	Design: Fundamentals I	

[1] Prior to fall 2018, LAND ARC 201 and 312 were required for admission. LAND ARC 210 Introduction to Landscape Architecture Design is a combination of these two courses. Students who already completed LAND ARC 201 or 312 should talk with their advisor regarding options.

AND the applicant must have completed at least 24 credit hours. Cumulative GPA will be considered.
Note: Application forms for consideration of admission to the Landscape Architecture professional program are available from the Department of Landscape Architecture, 1 Agricultural Hall, 1450 Linden Drive.

3. **Selection Policies.** On-campus selections for admission will be made as soon as possible after spring semester grades are received. Advanced-standing transfer students and second degree majors must have their final transcripts on file (in Room 116 Agricultural Hall) as soon as possible after the close of their spring term, but no later than June 15. The department must be notified immediately if a grade report is incorrect, as selections must be made on the basis of information available at the time of selection.
4. **Notification of Status.** Applicants who have completed their prerequisite courses at the end of spring semester will be notified of their status between June 1 and July 1 of each year for fall semester admission. Decisions on those applicants completing prerequisites during summer session will be made as soon as grades are received.
Note: Students not selected for admission may enroll for a second time with a pre–landscape architecture classification (PLA–2) and

seek admission for the following fall by reapplying during the spring semester. If not selected after a second application, students will need to transfer to another program on the Madison campus or to another institution. Students will not be able to register in pre–landscape architecture for a third year.

5. **Appeal Procedures.** An appeal to the department's curriculum committee may be presented to clarify an error of fact or extenuating circumstances.
6. **Reentering Landscape Architecture Students. Note:** Those students who are accepted and enroll in LAND ARC 261 Principles of Landscape Architecture Design and Graphics and drop the course during the fall semester must reapply for admission by April 15 if they wish to be considered for the following fall.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Courses may not double count within the degree (unless specifically noted otherwise), but courses counted toward the degree requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the degree that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
Select one of the following:		3-5
MATH 211	Calculus	
MATH 221	Calculus and Analytic Geometry 1	
STAT 301	Introduction to Statistical Methods	
Biology		
Select one of the following options:		5-6
Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
Option 2:		
BOTANY 100	Survey of Botany	
And select one of the following:		
BOTANY/ F&W ECOL 402	Dendrology	
HORT 227	Propagation of Horticultural Plants	

or another 2 credits of lab or field-based botany, horticulture, agronomy, or landscape architecture		
Select one of the following:		3-4
BOTANY/ ENVIR ST/ ZOOLOGY 260	Introductory Ecology	
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	
BOTANY/ F&W ECOL/ ZOOLOGY 460	General Ecology	
Foundation		
Engineering		
BSE 201	Land Surveying Fundamentals	1
Select one of the following (or equivalent):		3-4
LAND ARC/ ENVIR ST/ SOIL SCI 695	Applications of Geographic Information Systems in Natural Resources	
GEOG/CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems	
URB R PL 590	Contemporary Topics in Urban and Regional Planning (GIS for Planners)	
Soil Science		
SOIL SCI 301	General Soil Science	4
or SOIL SCI/ ENVIR ST/ GEOG 230	Soil: Ecosystem and Resource	
Additional Foundation Courses		
ENVIR ST/GEOG 127	Physical Systems of the Environment	5
DS 221	Person and Environment Interactions	3
Select 3 credits from any Art History class designated humanities		3
Select 3 credits from any ANTHRO course, GEOG courses listed below, any HISTORY course, any PHILOS course, any PSYCH course, any SOC course		3
Core		
LAND ARC 260	History of Landscape Architecture	3
LAND ARC 261	Principles of Landscape Architecture Design and Graphics	4

GEOG 358	Human Geography of Southeast Asia	3
GEOG 501	Space and Place: A Geography of Experience	3
GEOG/URB R PL 506	Historical Geography of European Urbanization	3
GEOG 508	Landscape and Settlement in the North American Past	3
GEOG 510	Economic Geography	4
GEOG/ENVIR ST 537	Culture and Environment	4
GEOG 538	The Humid Tropics: Ecology, Subsistence, and Development	4

BREADTH OR DEPTH REQUIREMENT

Must complete a professional depth or breadth requirement. Choose option A, B, or C, and select one course from the list of courses provided (Option A has six possible paths).

OPTION A

Choose one course from one of the following specialty areas:

Cultural and Historic Landscapes

Code	Title	Credits
Select one of the following:		3
LAND ARC 677	Cultural Resource Preservation and Landscape History	
FOLKLORE 399	Directed Study in Folklore for Undergraduates	
FOLKLORE/ L I S 490	Field Methods and the Public Presentation of Folklore	
FOLKLORE/ ANTHRO 639	Field School: Ethnography of Wisconsin Festivals	
GEOG 501	Space and Place: A Geography of Experience	
HISTORY/ CHICLA 152	The U.S. West Since 1850	3-4
HISTORY/ ENVIR ST/ GEOG 460	American Environmental History	

Land-Use Planning and Sustainable Development

Code	Title	Credits
Select one of the following:		
C&E SOC/SOC/ URB R PL 617	Community Development	
ENVIR ST/ F&W ECOL/ ZOOLOGY 360	Extinction of Species	
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	
F&W ECOL 375	Special Topics	
GEOG/ ENVIR ST 339	Environmental Conservation	
PHILOS/ ENVIR ST 441	Environmental Ethics	
SOC/C&E SOC/ URB R PL 645	Modern American Communities	
SOIL SCI/ ENVIR ST/ LAND ARC 695	Applications of Geographic Information Systems in Natural Resources	
URB R PL 590	Contemporary Topics in Urban and Regional Planning	
or URB R PL 611	Urban Design: Theory and Practice	

Design, Conservation, Management: Native Plant Communities

Code	Title	Credits
Select one of the following:		3
BOTANY/ AGRONOMY/ SOIL SCI 370	Grassland Ecology	
BOTANY 400	Plant Systematics	
BOTANY 401	Vascular Flora of Wisconsin	
BOTANY/ F&W ECOL 402	Dendrology	
BOTANY 403	Field Collections and Identification	
BOTANY/ ZOOLOGY 450	Midwestern Ecological Issues: A Case Study Approach	
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	
BOTANY 575	Special Topics	
BOTANY/ LAND ARC 670	Adaptive Restoration Lab	
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	
LAND ARC/ ENVIR ST 361	Wetlands Ecology	
LAND ARC 651	Plant Community Restoration and Management Workshop	
LAND ARC 668	Restoration Ecology	
SOIL SCI/ PL PATH 323	Soil Biology	

Ornamental Plants and Landscape Maintenance

Code	Title	Credits
Select one of the following:		3
AGRONOMY/ HORT 328	Integrated Weed Management	
HORT 227	Propagation of Horticultural Plants	
HORT/ PL PATH 261	Sustainable Turfgrass Use and Management	
HORT/F&W ECOL/ LAND ARC/ PL PATH 309	Diseases of Trees and Shrubs	
HORT 320	Environment of Horticultural Plants	
HORT/ AGRONOMY/ SOIL SCI 326	Plant Nutrition Management	
HORT/ SOIL SCI 332	Turfgrass Nutrient and Water Management	

Site Inventory Analysis

Code	Title	Credits
Select one of the following:		3
ENVIR ST 375	Field Ecology Workshop	
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	
GEOG/ ENVIR ST 325	Analysis of the Physical Environment	

Design and Artistic Expression

Code	Title	Credits
Select one of the following:		3
ART 214	Sculpture I	
ART 328	The Computer in the Visual Arts	
ART 428	Digital Imaging Studio	
ART 608	Interdisciplinary Critique in the Visual Arts	
ART HIST 468	Frank Lloyd Wright	
DS 220	Design: Fundamentals II	
DS 320	Design: Sketching and Rendering	
DS 323	Computer Aided Design: Architecture and Interiors	

OPTION B: SECOND MAJOR OR CERTIFICATE IN A RELATED FIELD

A student who is pursuing a double major or a certificate in a related field (horticulture, art history, art business, etc.) has the option to use the completion of the second major or certificate to fulfill the landscape architecture breadth or depth requirement.

OPTION C: ADVISOR-APPROVED BREADTH OR DEPTH AREA

In special circumstances students may request a substitution for the additional breadth/depth course. The course may come from any department but must relate to some aspect of the profession. The course must be approved by the student's advisor and by the Landscape Architecture Curriculum Committee. Students must provide an explanation of why they want to make the substitution.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Integrate social, cultural, ecological and technological dimensions in solving novel design and planning problems concerning the betterment of rural and urban natural and cultural landscapes.
2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.
3. Demonstrate competence, creativity, and critical judgment in applying the intellectual and technical skills necessary to the professional practice of landscape architecture; in particular the skills of problem#solving surrounding spatial, three#dimensional design of outdoor spaces, including, in particular: site inventory and analysis; community participation; programming; synthesis; communication; implementation; evaluation; and management.
4. Apply and evaluate the components of a professional curriculum as defined by the Landscape Architecture Accreditation Board, the accrediting organization for landscape architecture programs.
5. Understand, apply and evaluate the principles, theories and recent research findings in the field of landscape architecture.
6. Demonstrate advanced communication skills, including graphic, verbal, and written presentation skills.
7. Be able to perform as an entry-level landscape architect in a public or private office or agency setting.

3 If taking BOTANY 100 Survey of Botany, a 2-credit lab or field course in botany, horticulture, or agronomy must also be taken prior to graduation.

4 Consult advisor about options for completing the chemistry requirement

5 Required if students take BOTANY 100 Survey of Botany

6 Also counts as COMM-B

ADVISING AND CAREERS

Students are assigned to a faculty advisor once they declare the major. Prospective students should contact the undergraduate academic coordinator, Debi Griffin (dagriffin@wisc.edu, 608-263-7301) for more information.

The Professional Landscape Architecture degree program provides professional education accredited by the American Society of Landscape Architects (ASLA). Completion of this program is the first step in becoming a licensed landscape architect.

AGRONOMY

Agronomy is plant biology striving to meet the world's expanding need for food, fiber, and fuel in an efficient, environmentally sound, and sustainable manner.

An undergraduate student majoring in agronomy earns a bachelor of science degree. The agronomy curriculum offers undergraduate and graduate studies in plant biotechnology, breeding, genetics, physiology, crop management and protection strategies, agroecology, and sustainable agriculture. Agronomy undergraduate students concentrate on plant science courses but also select related courses in soil science, genetics, economics, business, engineering, entomology, and the animal sciences, depending upon their interests.

The current demand for agronomy graduates exceeds supply, and we expect the demand to increase. Career possibilities include biotechnology, research, agri-business, resource conservation, and crop production and management. In addition to classroom learning, students gain practical experience in their area of interest and earn degree credit at the same time through internships and independent study. The agronomy major also serves as an excellent foundation for students interested in pursuing advanced studies in plant biotechnology, breeding, genetics,

physiology, crop management, agroecology, or sustainable agriculture. Graduate programs are described in the *Graduate Guide*.

RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

In addition, the department awards money each year to students who wish to study abroad.

AGRONOMY, B.S.

CREATING A HEALTHIER, MORE PRODUCTIVE, MORE RESILIENT AGRICULTURE FOR WISCONSIN AND THE WORLD.

That is the challenge taken up by the faculty, staff and students of the Department of Agronomy.

We generate and apply knowledge about the plants that feed and benefit humankind. Agronomic crops are typically grown for grain to feed people and livestock, or are processed into products. Feed crops are grown specifically to meet the nutritional needs of livestock. Forage crops are grown for their stems, leaves, and other edible plant parts.

We find and implement solutions to problems and opportunities concerning efficiency and sustainability of crop production and in safe and environmentally sound ways.

We generate knowledge on the genetics, genomics, biochemistry, and physiology of plants.

We study the interactions among cropping systems, climate, and the environment. We emphasize sustainable agriculture, whether precision, traditional or organic, in order to reduce the impact on the environment and the inhabitants of our planet.

We work to ensure that agricultural systems and products in Wisconsin and the world are able to meet rapidly-changing needs and those of future generations.

Undergraduates in the Department of Agronomy earn a bachelor of science degree to prepare them for everything from pursuit of a graduate degree to careers in science, education, agriculture, agribusiness, and environment and conservation.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Articulate the role of biological processes, management systems, environmental influences, and economic and social factors on world food, feed, and fiber production. Specific topics that all students should have knowledge of include: photosynthesis, nutrient cycling, genetic inheritance, and management and uses of primary U.S. crop species.
2. Develop a global perspective and appreciate the interdependencies among individuals and their workplaces, communities, environments, and the planet; and an understanding of the role of science in society.
3. Communicate effectively through writing and speaking, and will be able to identify and critically evaluate available sources of information.
4. Demonstrate the ability to critically and creatively analyze problems and evaluate systems.

3 Fourteen (14) credits of agronomy electives required. See Requirements tab for details.

ADVISING AND CAREERS

ADVISING

The Department of Agronomy is faculty-advised, meaning that faculty members take on the responsibility of guiding and advising undergraduates through graduation. Students and faculty are matched as closely as possible by interest. All new freshmen and transfer students are temporarily advised by the student services coordinator until the advising relationship between professor and student is established. If you would like to have a conversation about joining the agronomy department, please contact agronomy@wisc.edu (agronomy.wisc.edu).

CAREERS

An agronomy degree is an open door to careers in many related fields such as biotechnology, plant genetics, crop management, agricultural financial management, farming, seed sales, crop consulting, Certified Crop Advising, Certified Professional Agronomy, agribusiness, extension agronomy, agricultural education, government work, and international agronomy.

GENETICS

The fastest growing sector of agriculture is plant breeding, genetics, and genomics. Plant scientists are working at the field, plant, cellular, and molecular level to create cultivars that are hardier, disease resistant, nutritious, and affordable. The industry's growth is currently outstripping the rate of graduation; graduates can take their pick of interesting, fulfilling careers in the public and private sectors.

BIOFUELS

The biofuel industry is also experiencing rapid growth, with research and development being focused on sugar-based biofuels, cellulosic biofuels, and biodiesels, made from plants as varied as switchgrass, sugar cane, corn, and wood pulp. These energy crops are harvested and processed into alternatives to fossil fuels.

AGRIBUSINESS

In agribusiness agronomists take data and translate it into real world applications. They sell tools for crop production, provide agricultural loans, consult on crops, manage businesses, and much more. They are often responsible for translating technical research data into applications. Numerous agronomy graduates are also involved in the sale of agricultural products, which are vital to today's economy. Other successful agronomists serve as crop advisers, farm managers, consultants, bank loan specialists, managers, and much more.

RESEARCH/EDUCATION AND EXTENSION

Agronomic educators specialize in teaching and working with high school and college students. They also teach and advise students who chose advanced studies for a master's degree and/or Ph.D. They are extensively involved in research, publishing findings on a regular basis and making scientific advances.

Extension agronomists usually work for a state, local, or national government; they consult with farmers and others to help find answers to their specific problems and help farmers translate research results into usable management practices. Government-employed agronomists also work with farmers and ranchers to plan for soil and water conservation so crops and land can be managed efficiently and with minimal impact to the environment.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in agronomy, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Badger Crops Club (https://www.facebook.com/badgercropsclub), a professional, social, and educational group for agronomy students and students in related fields interested in any aspect of crop production.
- Collegiate FFA (http://collegiateffamadison.weebly.com), an official collegiate chapter of the National FFA organization.
- AWA (http://awamadison.org)—the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (http://wiseli.engr.wisc.edu)—Women in Science and Engineering Leadership Institute, a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Study Abroad: Agronomy majors have the opportunity to go on experiential study abroad programs, where students can immerse themselves in research or global agronomy field experiences. Students can review the International Academic Programs website (https://studyabroad.wisc.edu) and the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the agronomy department or through other plant-, soil-, or ecology-related departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with faculty members.

RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

In addition, the department awards funds every year to students who wish to study abroad.

ANIMAL SCIENCES

The Department of Animal Sciences was formed as the union of the departments of Meat and Animal Science and Poultry Science in 1996. Majors in both animal sciences and poultry science are available.

ANIMAL SCIENCES, B.S.

Animal science students focus on the biology of domesticated animals, including cattle, goats, horses, poultry, sheep, swine, as well as meat derived from the traditional meat animal species. Some attention is directed toward the companion animal species, including dogs and cats. The major emphasizes integration of biological principles from the gene to the organ to the herd or flock. Core courses in the major include animal breeding, veterinary genetics, animal physiology, reproductive physiology, comparative animal nutrition, animal health, and meat science. Additional courses include career orientation, animal handling, assessing animal welfare, biology of companion animals, composition of meat animals, human/animal symbiosis, ruminant nutrition, monogastric nutrition, beef cattle production, swine production, equine business, livestock production in agricultural development, and laboratory techniques in mammalian gamete and embryo biology.

The major offers a science track which includes math, physics, organic chemistry and biochemistry for students with interests in postgraduate work in veterinary medicine, animal science, medicine, or other graduate programs. The major also offers a business emphasis which includes economics, accounting, marketing, farm management, commodity markets, agricultural finance, and other courses from the School of Business.

A student majoring in animal sciences is placed in the bachelor of science degree program. Completion of the degree program in four years is the norm.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. or AN SCI/DY SCI 363	Principles of Animal Breeding	
Select one of the following:		3
AN SCI/DY SCI 373	Animal Physiology [2]	
AN SCI/ DY SCI 434	Reproductive Physiology	
AN SCI/DY SCI 414	Ruminant Nutrition & Metabolism	2
AN SCI 415	Application of Monogastric Nutrition Principles	2
AN SCI 431	Beef Cattle Production	3
AN SCI 432	Swine Production	3
AN SCI 433	Equine Business & Management	3
AN SCI/FOOD SCI 515	Commercial Meat Processing	2
Up to 3 credits from courses listed below can go toward the required 12 credits of depth:		3
AN SCI 399	Coordinative Internship/Cooperative Education	
AN SCI 681	Senior Honor Thesis	
AN SCI 682	Senior Honors Thesis	
AN SCI 699	Special Problems	

[1] Meets CALS International Studies requirement.

[2] ANAT&PHY 335 Physiology can substitute for AN SCI/DY SCI 373 Animal Physiology in the An Sci Depth section only.

EMPHASIS COURSES

SCIENCE EMPHASIS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
PHYSICS 103	General Physics	4
CHEM 343	Introductory Organic Chemistry	3
BIOCHEM 501	Introduction to Biochemistry	3
or BMOLCHEM 503	Human Biochemistry	
Select 9 credits from the following:		9
CHEM 344	Introductory Organic Chemistry Laboratory	
CHEM 345	Intermediate Organic Chemistry	
MICROBIO 303	Biology of Microorganisms	
MICROBIO 304	Biology of Microorganisms Laboratory	
M M & I/ MICROBIO/PATH-BIO 528	Immunology	
PHYSICS 104	General Physics	
PSYCH 449	Animal Behavior	
Total Credits		24

BUSINESS EMPHASIS

Up to two courses may be applied to Certificate in Business Mgmt. for Ag. & Life Sciences.

Code	Title	Credits
A A E 215	Introduction to Agricultural and Applied Economics [1]	4
or ECON 101	Principles of Microeconomics	
A A E 320	Farming Systems Management	3
A A E 322	Commodity Markets	3
Select one of the following:		3
M H R 305	Human Resource Management	
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	
Select one of the following:		3
BMOLCHEM 314	Introduction to Human Biochemistry	
CHEM 341	Elementary Organic Chemistry	
BIOCHEM 501	Introduction to Biochemistry	
Select 9 credits from the following:		9
A A E 419	Agricultural Finance	
ACCT I S 100	Introductory Financial Accounting	
or ACCT I S 300	Accounting Principles	
AGRONOMY/ HORT/SOIL SCI 326	Plant Nutrition Management	
ECON/FINANCE 300	Introduction to Finance	
M H R 300	Managing Organizations	
MARKETNG 300	Marketing Management	
MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
MICROBIO 303	Biology of Microorganisms	
MICROBIO 304	Biology of Microorganisms Laboratory	
PHYSICS 103	General Physics	
SOIL SCI 301	General Soil Science	
Total Credits		25

[1] A A E 215 Introduction to Agricultural and Applied Economics not accepted as a prerequisite for some advanced Business courses. A A E 215 carries only QR-B credit if taken fall 2011 or later.

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Knowledge and comprehension) Develop the working vocabulary of an animal scientist, a working knowledge of the basic anatomy, biochemistry, physiology, and genetics of animal and meat biology, and the applied nutrition, breeding, product harvest and processing skills, necessary to manage animal production systems. Demonstrate knowledge through rigorous examination and demonstration through hands-on instructional laboratory activities.
2. (Analytical processing) Develop the ability to reduce complex datasets and scientific information into meaningful relationships and correlations, and using the scientific literature, develop hypotheses to test the cause of predicted relationships using the scientific method. Demonstrate skills through a senior capstone experience and through individualized research opportunities and instructional activities.
3. (Integration for application) Apply knowledge to develop solutions to real world problems. Identify problems yet to be investigated and in need of advanced study. Ability to integrate and apply knowledge is demonstrated through our internship programs, animal related job experiences, club activities, and problems sets that students solve in exams and laboratory settings.
4. (Critical thinking) Find their sources of information using peer reviewed research articles. Learn not only to question popular press, but understand that even in the scientific literature there are contradictory findings. Capacity to synthesize scientific literature such that they can communicate a position backed with strong scientific support. Skills are demonstrated through the reading, writing and discussion of science-based papers in key courses during their educational process and through an oral presentation in their capstone course.
5. (Effective communication) Communicate, both in writing and orally, the science behind the biology and management of domestically farmed animals. Communications provide new insights into animal production, and are explained in a manner fitting with the audience. Ability to communicate is measured by their effectiveness in presenting research posters and presentations, their analysis of the literature in papers and presentations in class and during their senior capstone course.

1. If placed into MATH 112, you must defer CHEM 103 until spring semester.
2. Choose Science or Business Emphasis; see Requirements tab for details.
3. 12 credits required; see Requirements tab for options.
4. Select from AN SCI 289 Honors Independent Study, AN SCI 699 Special Problems, AN SCI 681 Senior Honor Thesis, AN SCI 682 Senior Honors Thesis, AN SCI 299 Independent Study, or AN SCI 399 Coordinative Internship/Cooperative Education.

ADVISING AND CAREERS

All students receive individualized advising from their academic advisor. Students are assigned an academic advisor upon declaration of the major and are expected to meet with their advisor each semester before registering for courses in the upcoming semester. Academic advisors will assist students in developing an individualized, four-year curricular plan. Internships and research experience are encouraged.

Numerous graduates have completed double majors with Life Sciences Communication, Genetics, and departments outside of CALS such as Spanish, according to the interests and aspirations of the student. Interested students should contact J. Liv Sandberg (sandberg@ansci.wisc.edu) (608-263-4303) with questions.

Career opportunities exist in the meat, reproductive technology, feed, agribusiness, agri-marketing, and biotechnology industries. Occasionally, students have found positions within zoos. Many students pursue graduate education in veterinary medicine, animal science, medicine, or other programs.

WISCONSIN EXPERIENCE

Undergraduates majoring in animal sciences at UW–Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students' specific academic and career goals. There are numerous opportunities to conduct research with faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the university to stakeholders in Wisconsin and beyond for the betterment of society.

Students majoring in animal sciences are involved in a wide variety of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as clubs, research, volunteering, internships, and study abroad.

By joining one of the several clubs listed below, majors get to know their fellow students outside the classroom. The following opportunities can help students connect with other students interested in animal sciences and other biological science majors, build relationships with faculty and staff, and contribute to out-of-classroom learning.

- Pre Vet Club (https://prevetassociation.weebly.com)
- Poultry Club (https://win.wisc.edu/organization/poultryclub)
- Badger Meat Science Club (https://win.wisc.edu/organization/badgermeatscienceclub)
- Saddle and Sirloin Club (https://win.wisc.edu/organization/saddleandsirloin)
- Hoofer Riding Club (https://win.wisc.edu/organization/hooferridingclub)
- Badger Dairy Club (https://win.wisc.edu/organization/badgerdairyclub)
- Collegiate FFA (http://collegiateffamadison.weebly.com)
- Association of Women in Agriculture (http://awamadison.org)
- Meat Lab/Bucky's Butchery: Interested in meat science? The meat-processing facilities within the animal sciences department apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.
- Study Abroad: Animal science majors have the opportunity to go on experiential study abroad programs, where they can immerse themselves in research or global, animal field experiences. Students can review the International Academic Programs website (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/animal-sciences/animal-sciences-bs/%20https://www.studyabroad.wisc.edu) and the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Research/Lab Experience: Students are encouraged to get involved in research, whether in the animal sciences department or through other biology -elated departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be found primarily by contacting faculty members.

Students are also involved in prehealth organizations, volunteer and shadowing opportunities, publishing in an undergraduate science journal, biotechnology and agricultural internships, and other related experiences on and off campus.

BACTERIOLOGY

Contact Katy France, student services coordinator, 262-2975, kfrance@bact.wisc.edu, for information about the undergraduate program, declaring the microbiology major, career opportunities, and advisor assignments.

Microorganisms are the oldest life forms on earth and impact our lives and the well being of the planet in innumerable ways. The field of microbiology has become even more prominent in recent years because of increased concerns about bioterrorism, infectious disease, and environmental manipulation. The microbiology major offered by the Department of Bacteriology provides training in broad aspects of microbiology with emphasis on 21st-century laboratory skills.

Core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, microbial ecology, food microbiology, host-parasitic interactions, microbial pathogenesis, immunology, virology, fermentation, and microbial biotechnology.

Instructional laboratory courses provide hands-on experience with modern techniques and equipment. Students have many opportunities for independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as molecular or cell biology.

Students who end their training with a bachelor's degree are well prepared for a wide variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process and training in microbiology itself allow microbiology graduates to enter fields as diverse as business, technical service, sales, or technical writing.

The department also serves as the administrative home for the biology major in the College of Agricultural and Life Sciences.

BIOLOGY, B.S. (CALS)

The biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:

1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain pre-professional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists, and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Agricultural and Life Sciences and the College of Letters & Science.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses as detailed below. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

In addition to the standard Biology major, there are two Named Options:

- Biology with an Option in Plant Biology
- Biology with an Option in Evolutionary Biology

Students may complete only one Biology major/option and must declare the option they are pursuing.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		5-10
MATH 221	Calculus and Analytic Geometry 1	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
Complete one of the following:		3-4
MATH 222	Calculus and Analytic Geometry 2	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-14

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Total Credits		13-18

Physics

Code	Title	Credits
First semester Physics (complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

Code	Title	Credits
Select one of the following options: [1]		10-16
Option A:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	
Foundational Course (complete one of the following): [2]		3-6
AGRONOMY/ HORT 338	Plant Breeding and Biotechnology	
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 508	General Biochemistry II	
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology [3]	
GENETICS 466	Principles of Genetics	
GENETICS 468	General Genetics 2	
MICROBIO 470	Microbial Genetics & Molecular Machines	
Total Credits		13-22

1 For AP Biology policy, as it applies to introductory biology in the biology major, see this link (https://biologymajor.wisc.edu/resources/ap-ib-biology-policy).

2 Courses taken to meet the Foundation requirement may not also count for the Intermediate/Advanced requirement below.

3 Students may use BIOCORE 381 and BIOCORE 383 to contribute to ***both*** Introductory Biology ***and*** Foundation.

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course.** Approved lab courses are indicated by footnote.

- Complete one course and at least two credits from either category A or B.
- Complete one course and at least two credits from either category C or D.
- Complete one course and at least two credits from an unused category (A, B, C, D, or E).

CAPSTONE REQUIREMENT

Code	Title	Credits
Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.		
ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 486	Principles of Physiology Laboratory [1]	2
BMOLCHEM 504	Human Biochemistry Laboratory	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4
BOTANY/ LAND ARC 670	Adaptive Restoration Lab	2
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
MICROBIO 551	Capstone Research Project in Microbiology	2
PL PATH 315	Plant Microbiomes	4
ZOOLOGY 316	Laboratory for Limnology-Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3

[1] To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

BIOLOGY NAMED OPTIONS

Instead of completing the requirements above, students may choose to select one of the options below.

View as listView as grid

- **BIOLOGY: EVOLUTIONARY BIOLOGY** (P. 83)
- **BIOLOGY: PLANT BIOLOGY** (P. 89)

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must complete a senior honors thesis; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Know and understand core concepts that unify the breadth of biological sciences including: evolution; structure and function; information flow, exchange, and storage; pathways for transformations of energy and matter; and systems.
2. Demonstrate practical skills of a professional biologist including: problem#solving by engaging the process of science; written and verbal proficiency; laboratory skills; quantitative analysis skills; and teamwork skills.
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

FOUR-YEAR PLAN

Four-year road maps for the biology major are designed to support biological science major exploration. The road map is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and the Course Guide/Schedule of Classes. Your specific program of study could, and probably will, look different. You should customize the road map to fit your unique path at UW–Madison. Consult with your advisor about the best path for you.

FOUR-YEAR PLAN

ADVISING AND CAREERS

ADVISING

Your advisor is here to guide you through the biology major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising

appointment, visit UW Undergraduate Advising (http://advising.wisc.edu/content/expectations-about-advising).

In the biology major, students are assigned to an advisor according to last name. Please schedule an advising appointment here (http://biologymajor.wisc.edu/advising).

CAREERS

The biology major encourages students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the CALS Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

College of Agricultural and Life Sciences graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

- Schedule a Career Advising appointment (https://cals.wisc.edu/academics/undergraduate-students/career-services/students)
- Explore CALS Career Services for Students (https://cals.wisc.edu/academics/undergraduate-students/career-services/resources)

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biology, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Beta Beta Beta Biological Honor Society (https://win.wisc.edu/organization/tribeta) is an honor and professional organization for undergraduate students in the biological sciences. Its activities are designed to stimulate interest, scholarly attainment, and investigation in the biological sciences, and to promote the dissemination of information and new interpretations among students in life sciences. The society offers its members the unique opportunity to publish their undergraduate work in the pages of its journal, BIOS.
- Biology majors have the opportunity to go on experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biology Major Advising Page (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biology) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when incorporating study abroad into an academic plan.
- Students are encouraged to get involved in research in any life science department. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be identified by inquiring directly (https://biology.wisc.edu/finding-mentor) with faculty members, reading the Biology Major Newsletter (https://biologymajor.wisc.edu/newsletters), or announcement on the Student Job Center (https://jobcenter.wisc.edu).

BIOLOGY: EVOLUTIONARY BIOLOGY

The **Evolutionary Biology Option** allows biology majors to concentrate their studies in evolution and to have this reflected on their transcript. Since there is no evolutionary biology major available at UW–Madison, this is the only mechanism to indicate specialization in this rapidly growing and popular field. In taking this option students will be able to fulfill their intermediate/advanced biology requirement with courses that emphasize evolutionary biology, ranging from required courses in fundamental evolutionary biology to more advanced optional courses that cover a wide range of evolutionary biology topics. They will also get to take a one-credit seminar course in evolutionary biology.

Who should enroll in this option? Students with broad interest in the biological sciences who want to:

- Prepare for graduate study in evolutionary biology or related fields
- Prepare for professional studies (e.g. medical school, veterinary school, dentistry)
- Concentrate their biological studies in evolutionary biology

REQUIREMENTS

MAJOR OPTION REQUIREMENTS

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses as detailed below. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
Complete one of the following: [1]		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-13

[1] Students completing the Evolutionary Biology option are required to complete either STAT 301 or STAT 371.

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Total Credits		13-18

Physics

Code	Title	Credits
First semester Physics (Complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

Code	Title	Credits
Select one of the following options: [1]		10-16
Option A:		10
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		13
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		10
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	
Foundational Course (complete one): [2]		3-6
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology [3]	
GENETICS 466	Principles of Genetics	
GENETICS 468	General Genetics 2	
Total Credits		46-55

[1] For AP Biology policy, as it applies to introductory biology in the biology major, see this link (https://biologymajor.wisc.edu/resources/ap-ib-biology-policy).

[2] Courses taken to meet the Foundation requirement may not also count for the Intermediate/Advanced requirement below.

[3] Students may use BIOCORE 381 and BIOCORE 383 toward ***both*** Introductory Biology ***and*** Foundation.

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required as follows and must include **one approved lab course.** (Approved lab courses are indicated by footnote):

- Complete the Evolutionary Biology course listed below.
- Complete one course and at least two credits from category A or B.
- Complete one course and at least two credits from category C.
- Complete one course and at least two credits from category D.
- Additional courses needed to reach 13 Intermediate/Advanced credits may be taken from any category (A, B, C, D, E).

Required Evolutionary Biology course

CAPSTONE REQUIREMENT

Code	Title	Credits
Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.		
ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 486	Principles of Physiology Laboratory [1]	2
BMOLCHEM 504	Human Biochemistry Laboratory	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4
BOTANY/ LAND ARC 670	Adaptive Restoration Lab	2
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
MICROBIO 551	Capstone Research Project in Microbiology	2
PL PATH 315	Plant Microbiomes	4
ZOOLOGY 316	Laboratory for Limnology-Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3

[1] To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

	12-16		12-16

Total Credits 24-32

1 Math determined by placement scores. Biology majors must complete MATH 171/MATH 217 or MATH 221 plus one additional math/stats course.

2 See CALS requirements (https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#requirementstext) for a list of approved First-Year Seminar courses.

3 Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/BOTANY/ZOOLOGY 152 & a foundational course or BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/BOTANY 130 & a foundational course or BIOCORE (three lectures and two labs required).

4 See Requirements tab for intermediate/advanced biology course lists.

BIOLOGY: PLANT BIOLOGY

The **Plant Biology Option** allows biology majors to focus their studies on plant science and to have this reflected on their transcript. There are a number of departments at UW–Madison who host plant science-based majors, including agronomy, botany, horticulture, plant pathology, and forest and wildlife ecology. While those specialized majors offer in-depth programs in their disciplines, the Plant Biology option allows students to pursue a course of study within the biology major and explore plant biology at the same time. Students in this option can fulfill their requirements with courses that emphasize various aspects of plant science, including anatomy, physiology, genetics, crop production, disease resistance, and molecular techniques in plant improvement. Students also participate in a one credit seminar called Frontiers in Plant Science taught by two faculty from plant science departments.

Who should enroll in this option? Students with broad interest in biological sciences who also want to:

- Prepare for graduate work in a plant science field
- Prepare for advanced study or graduate work in a natural or environmental science field
- Concentrate their studies on the biology of plants

REQUIREMENTS

MAJOR OPTION REQUIREMENTS

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses as detailed below. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
Complete one of the following:		3-4
MATH 222	Calculus and Analytic Geometry 2	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-14

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Total Credits		13-18

Physics

Code	Title	Credits
First Semester Physics (complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second Semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

Code	Title	Credits
Select one of the following options: [1]		10-16
Option A:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	

BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology
Option B:	
BIOCORE 381	Evolution, Ecology, and Genetics
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory
BIOCORE 383	Cellular Biology
BIOCORE 384	Cellular Biology Laboratory
BIOCORE 485	Principles of Physiology
Option C:	
ZOOLOGY/ BIOLOGY 101	Animal Biology
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory
BOTANY/ BIOLOGY 130	General Botany
Foundational Course (complete one of the following): [2]	3-6
AGRONOMY/ HORT 338	Plant Breeding and Biotechnology
BIOCHEM 501	Introduction to Biochemistry
BIOCHEM 508	General Biochemistry II
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology [3]
GENETICS 466	Principles of Genetics
GENETICS 468	General Genetics 2
Total Credits	13-22

[1] For AP Biology policy, as it applies to introductory biology in the biology major, see this link (https://biologymajor.wisc.edu/resources/ap-ib-biology-policy).

[2] Courses taken to meet the Foundation requirement may not also count for the Intermediate/Advanced requirement below.

[3] Students may use BIOCORE 381 and BIOCORE 383 toward ***both*** Introductory Biology ***and*** Foundation.

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course.** Approved lab courses are indicated by footnote.

- Complete one course and at least two credits from either category A or B.
- Complete one course and at least two credits from either category C or D.
- Complete one course and at least two credits from any unused category (A, B, C, D, or E).

A. Cellular and Subcellular Biology

1 Math determined by placement scores. Biology majors must complete MATH 171/MATH 217 or MATH 221 plus one additional math/stats course. **Stats recommended.**

2 See CALS requirements (https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#requirementstext) for a list of approved First-Year Seminar courses.

3 Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/BOTANY/ZOOLOGY 152 & a foundational course or **(recommended)** BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/BOTANY 130 & a foundational course or BIOCORE (three lectures and two labs required).

4 See Requirements tab for intermediate/advanced biology course lists.

MICROBIOLOGY, B.S. (CALS)

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The **microbiology major**, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques - gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

HOW TO GET IN

Incoming or current students in good academic standing may declare the microbiology major at any time.

Schedule an appointment (https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html;jsessionid=89D5FEA38114F159C48E4959F05B91E1.primary) with Katy France to discuss the microbiology major, appropriate coursework, how to declare, and so on.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
Mathematics		
Select one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
Statistics		
Select one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT/B M I 541	Introduction to Biostatistics	
General Chemistry		
Select one of the following: [1]		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Organic Chemistry		
Select ALL of the following:		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Biology Foundation		
Select one of the following:		10-13
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology [2]	
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384 & BIOCORE 485	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory and Principles of Physiology [2]	

ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
Physics		
Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics [3]	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics [3]	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
Biochemistry		
Select one of the following:		3-6
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	
Microbiology Courses		
Microbiology Core (all required):		
Except where noted, all Microbiology Core courses are offered every fall and spring semester.		
MICROBIO 303	Biology of Microorganisms	3
MICROBIO 304	Biology of Microorganisms Laboratory	2
MICROBIO 305	Critical Analyses in Microbiology	1
MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms	3
MICROBIO 470	Microbial Genetics & Molecular Machines	3
MICROBIO 526	Physiology of Microorganisms	3
MICROBIO 527	Advanced Laboratory Techniques in Microbiology (FALL ONLY)	2
Microbiology Capstone (required):		
MICROBIO 551	Capstone Research Project in Microbiology (SPRING ONLY)	2
Microbiology Electives		
Select at least 6 credits; at least 3 credits must come from Set A. Note that not all elective courses are offered every semester.		
Set A:		3-6
MICROBIO/ FOOD SCI 324	Food Microbiology Laboratory	
MICROBIO/ FOOD SCI 325	Food Microbiology	
MICROBIO 330	Host-Parasite Interactions	
MICROBIO 375	Special Topics	
MICROBIO/SOIL SCI 425	Environmental Microbiology	
MICROBIO/SOIL SCI 523	Soil Microbiology and Biochemistry	
MICROBIO/ M M & I/PATH-BIO 528	Immunology	
MICROBIO/ ONCOLOGY 545	Topics in Biotechnology (topics vary by semester)	
MICROBIO/ GENETICS 607	Advanced Microbial Genetics	
MICROBIO/ BIOCHEM/ GENETICS 612	Prokaryotic Molecular Biology	
MICROBIO/ PL PATH 622	Plant-Bacterial Interactions	
MICROBIO 632	Industrial Microbiology/ Biotechnology	
MICROBIO/ ONCOLOGY/PL PATH 640	General Virology-Multiplication of Viruses	
MICROBIO/ BOTANY/ GENETICS/M M & I/PL PATH 655	Biology and Genetics of Fungi	
MICROBIO/ BMOLCHEM 668	Microbiology at Atomic Resolution	
Set B:		0-3
BIOCHEM/M M & I 575	Biology of Viruses	
BIOCHEM 601	Protein and Enzyme Structure and Function	
BOTANY 330	Algae	
BOTANY/PL PATH 332	Fungi	
BOTANY/ENTOM/ PL PATH 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	
CHEM 565	Biophysical Chemistry	
COMP SCI/ B M I 576	Introduction to Bioinformatics	
F&W ECOL/SURG SCI 548	Diseases of Wildlife	
FOOD SCI 550	Fermented Foods and Beverages	
M M & I 301	Pathogenic Bacteriology	
M M & I/ENTOM/ PATH-BIO/ ZOOLOGY 350	Parasitology	
M M & I 410	Medical Mycology	
M M & I 554	Emerging Infectious Diseases and Bioterrorism	
M M & I/POP HLTH 603	Clinical and Public Health Microbiology	
Total Credits		64-87

1 The completion of CHEM 115 Chemical Principles I and CHEM 116 Chemical Principles II also satisfies the General Chemistry requirement.

2 (BIOLOGY/BOTANY/ZOOLOGY 151 Introductory Biology and BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology) or (BIOCORE 381 Evolution, Ecology, and Genetics / BIOCORE 382 Evolution, Ecology, and Genetics Laboratory / BIOCORE 383 Cellular Biology / BIOCORE 384 Cellular Biology Laboratory / BIOCORE 485 Principles of Physiology) are recommended.

[3] (PHYSICS 103 / PHYSICS 104) or (PHYSICS 207 / PHYSICS 208) are recommended.

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take MICROBIO 681 Senior Honors Thesis and MICROBIO 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology
2. Apply the scientific method to questions. Formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving
4. Access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Learn about and demonstrate personal and professional ethics.

FOUR-YEAR PLAN

	12-18		13-19

Total Credits 105-138

* Students planning to pursue graduate studies in a biological science are encouraged to take MATH 221 Calculus and Analytic Geometry 1, MATH 222 Calculus and Analytic Geometry 2, PHYSICS 201 General Physics and PHYSICS 202 General Physics or PHYSICS 207 General Physics and PHYSICS 208 General Physics, and BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II (see Note 7). Also recommended: CHEM 565 Biophysical Chemistry and MICROBIO/BIOCHEM/GENETICS 612 Prokaryotic Molecular Biology.

1 Choose 1 of 2 sequences: CHEM 103 General Chemistry I and CHEM 104 General Chemistry II or CHEM 109 Advanced General Chemistry. Students who take CHEM 109 Advanced General Chemistry and plan to attend medical or other professional schools are advised to take one additional inorganic course (CHEM 311 Chemistry Across the Periodic Table or CHEM 327 Fundamentals of Analytical Science).

2 Math course determined by placement scores. Microbio majors must complete math through calculus (choose from MATH 171 Calculus with Algebra and Trigonometry I & MATH 217 Calculus with Algebra and Trigonometry II or MATH 221 Calculus and Analytic Geometry 1), and statistics (choose from STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences, or STAT/B M I 541 Introduction to Biostatistics).

3 Electives can be scheduled according to the student's preference. Consult your advisor and the Requirements tab.

4 The three choices are 1) ZOOLOGY/BIOLOGY/BOTANY 151 Introductory Biology and ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology; 2) ZOOLOGY/BIOLOGY 101 Animal Biology, ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory and BOTANY/BIOLOGY 130 General Botany; or 3) Biocore. Biocore is a 3 to 4 semester sequence. Students must complete the first three lectures and the first two labs. The Biocore courses are BIOCORE 381 Evolution, Ecology, and Genetics, BIOCORE 382 Evolution, Ecology, and Genetics Laboratory, BIOCORE 383 Cellular Biology, BIOCORE 384 Cellular Biology Laboratory, BIOCORE 485 Principles of Physiology, BIOCORE 587 Biological Interactions.

5 Physics may be taken in year 1, 2, 3, or 4 depending on the student's schedule.

6 Undergraduate research courses include 299, 699, 681#682 (Honors Thesis), 691#692 (Thesis). Both semesters are required for thesis credit. Students are encouraged to take several semesters of research (internship opportunities, 399, are also encouraged).

7 If BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II are taken, both semesters must be completed (take BIOCHEM 507 General Biochemistry I in fall semester of year 3 and BIOCHEM 508 General Biochemistry II in spring semester of year 3).

ADVISING AND CAREERS

Current UW–Madison students can schedule initial advising (https://calendar.wisc.edu/scheduling-assistant/schedule/RAUHTzYt/view.html) in the microbiology major with Katy France.

Prospective/future UW–Madison students should send an email to Katy France, katy.france@wisc.edu, to set up an appointment, which can be conducted in person or via phone call.

Read about and explore possible microbiology careers at the American Society for Microbiology website (https://www.asm.org/Careers/Career-Planning).

Learn more about health-related careers through the ExploreHealthCareers.org website (https://explorehealthcareers.org).

BIOCHEMISTRY

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school

admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

BIOCHEMISTRY, B.S. (CALS)

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

HOW TO GET IN

Students may declare the major via an appointment with the undergraduate advisor at any time. Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences (CALS) have the option to declare biochemistry at SOAR. Students may otherwise declare after they have begun their undergraduate studies. The biochemistry major is offered through either CALS or the College of Letters & Science (L&S). Students interested in the differences or transferring between CALS and L&S should meet with the advisor to discuss this in more detail.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3

or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

REQUIREMENTS FOR THE MAJOR

MATHEMATICS

Code	Title	Credits
Select one of the following options:		
MATH 221 & MATH 222	Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2	9
MATH 171 & MATH 217 & MATH 222	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II and Calculus and Analytic Geometry 2	14
MATH 275 & MATH 276	Topics in Calculus I and Topics in Calculus II	10

CHEMISTRY

General Chemistry

Code	Title	Credits
Select one of the following options:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Organic Chemistry

Code	Title	Credits
Select ALL of the following courses:		
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2

Analytical Chemistry

Code	Title	Credits
Select one of the following options:		
CHEM 327	Fundamentals of Analytical Science	4
CHEM 329	Fundamentals of Analytical Science	4
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Physical Chemistry

Code	Title	Credits
Must complete 4 credits of physical chemistry. Select one of the following options:		
CHEM 565	Biophysical Chemistry (recommended)	4

CHEM 561 & CHEM 563	Physical Chemistry and Physical Chemistry Laboratory	4-5

BIOLOGY

Students must complete either Option A (introductory + upper-level biology), or Option B (Biocore), for 16 total credits of biological science coursework.

Option A (Introductory + Upper-Level Biology)

Option A Introductory Biology

Code	Title	Credits
Select one of the following introductory biology options:		
BIOLOGY/BOTANY/ ZOOLOGY 151 & BIOLOGY/BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)	10
BIOLOGY/ ZOOLOGY 101 & BIOLOGY/ ZOOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	10

AND Option A Upper-Level Biology

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits—more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the course list below. To see courses offered in specific upcoming semesters, please see the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/advanced-biology-courses-undergraduate-program).

Important: Biochemistry courses on this list can count only for "upper-level biology" if they are above-and-beyond what is needed to fulfill the "biochemistry" portion of the major. For example, if students have taken BIOCHEM 501, they will need one upper-level biochemistry elective to fulfill the biochemistry requirement, and then any additional biochemistry courses taken can count for upper-level biology. A course may not double count in both the "upper-level biology" and the "biochemistry" requirements for the major.

Option B (Biocore)

Option B (Biocore)

Biocore is an honors-level, integrated sequence of lecture and lab courses that covers introductory and intermediate biology topics. Students must apply and be accepted to the program to take BIOCORE classes.

Code	Title	Credits
Select ALL of the following lecture courses:		
BIOCORE 381	Evolution, Ecology, and Genetics	3
BIOCORE 383	Cellular Biology	3
BIOCORE 485	Principles of Physiology	3
BIOCORE 587	Biological Interactions	3
AND, select two of the following lab classes:		

BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	2
BIOCORE 384	Cellular Biology Laboratory	2
BIOCORE 486	Principles of Physiology Laboratory	2

PHYSICS (CALCULUS-BASED)

Code	Title	Credits
Select one of the following options: [1]		
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (recommended)	10
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	10

[1] Students should consult with their advisor if they have credit for PHYSICS 103 and/or PHYSICS 104 to discuss options.

BIOCHEMISTRY

One set of introductory coursework ***and*** the capstone course are required, for a total of ***three*** BIOCHEM courses.

Introductory Courses

Code	Title	Credits
Select one of the following options:		
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II (recommended)	6
OR		
BIOCHEM 501	Introduction to Biochemistry	3
AND one of the following upper-level biochemistry electives:		
BIOCHEM/ NUTR SCI 510	Nutritional Biochemistry and Metabolism	
BIOCHEM 550	Topics in Medical Biochemistry	
BIOCHEM/ M M & I 575	Biology of Viruses	
BIOCHEM 601	Protein and Enzyme Structure and Function	
BIOCHEM/B M I/ BMOLCHEM/ MATH 606	Mathematical Methods for Structural Biology	
BIOCHEM/B M I/ BMOLCHEM/ MATH 609	Mathematical Methods for Systems Biology	
BIOCHEM/ GENETICS/ MICROBIO 612	Prokaryotic Molecular Biology	
BIOCHEM/ GENETICS/ MD GENET 620	Eukaryotic Molecular Biology	
BIOCHEM/ BOTANY 621	Plant Biochemistry	
BIOCHEM 625	Mechanisms of Action of Vitamins and Minerals	
BIOCHEM/ PHMCOL-M/ ZOOLOGY 630	Cellular Signal Transduction Mechanisms	
BIOCHEM/ NUTR SCI 645	Molecular Control of Metabolism and Metabolic Disease	

Capstone Course (required)

Code	Title	Credits
BIOCHEM 551	Biochemical Methods	4

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

HONORS IN THE MAJOR IN BIOCHEMISTRY: REQUIREMENTS

To earn Honors in the Major in Biochemistry, students must satisfy the requirements for the major (above) as well as the following requirements. All courses used for Honors in the Major requirements must receive "B" or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all BIOCHEM courses, and all courses accepted in the major
- Complete BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II for Honors
- Complete a two-semester Senior Honors Thesis for 6 credits total in either BIOCHEM (BIOCHEM 681 Senior Honors Thesis and BIOCHEM 682 Senior Honors Thesis) CHEM (CHEM 681 Senior Honors Thesis and CHEM 682 Senior Honors Thesis) or related

biological science department (other departments must receive approval from the advisor) and present research in a public forum

- Complete at least 14 credits for Honors or equivalent. Any combination of the following coursework may count towards these 14 credits:
  - Honors courses that would fulfill the biological science requirement in the major (listed in the major requirements section), including coursework in introductory biology, upper-level biology, and/or BIOCORE
  - Statistics coursework, does not need to be taken for Honors (STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences, or STAT/B M I 541 Introduction to Biostatistics)
  - Biochemistry elective coursework, does not need to be taken for Honors (NUTR SCI/BIOCHEM 510 Nutritional Biochemistry and Metabolism, BIOCHEM 550 Topics in Medical Biochemistry, M M & I/BIOCHEM 575 Biology of Viruses, BIOCHEM 601 Protein and Enzyme Structure and Function, MATH/B M I/BIOCHEM/BMOLCHEM 606 Mathematical Methods for Structural Biology, MATH/B M I/BIOCHEM/BMOLCHEM 609 Mathematical Methods for Systems Biology, MICROBIO/BIOCHEM/GENETICS 612 Prokaryotic Molecular Biology, MD GENET/BIOCHEM/GENETICS 620 Eukaryotic Molecular Biology, BOTANY/BIOCHEM 621 Plant Biochemistry, BIOCHEM 625 Mechanisms of Action of Vitamins and Minerals, BIOCHEM/PHMCOL-M/ZOOLOGY 630 Cellular Signal Transduction Mechanisms, BIOCHEM/NUTR SCI 645 Molecular Control of Metabolism and Metabolic Disease)
  - Honors coursework in math, chemistry, and/or physics from the list below:

Math

Code	Title	Credits
MATH 275	Topics in Calculus I	5
MATH 276	Topics in Calculus II	5
MATH 341	Linear Algebra	3
MATH 375	Topics in Multi-Variable Calculus and Linear Algebra	5
MATH 376	Topics in Multi-Variable Calculus and Differential Equations	5
MATH 521	Analysis I	3
MATH 522	Analysis II	3
MATH 541	Modern Algebra	3
MATH 542	Modern Algebra	3

Chemistry

Code	Title	Credits
CHEM 109	Advanced General Chemistry	5
CHEM 115	Chemical Principles I	5
CHEM 116	Chemical Principles II	5
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 329	Fundamentals of Analytical Science	4
CHEM 547	Advanced Organic Chemistry	3
CHEM 561	Physical Chemistry	3
CHEM 565	Biophysical Chemistry	4
CHEM 563	Physical Chemistry Laboratory	1-2
CHEM 562	Physical Chemistry	3
CHEM 564	Physical Chemistry Laboratory	1

Physics

Code	Title	Credits
PHYSICS 201	General Physics	5
PHYSICS 202	General Physics	5
PHYSICS 207	General Physics	5
PHYSICS 208	General Physics	5
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 247	A Modern Introduction to Physics	5
PHYSICS 248	A Modern Introduction to Physics	5
PHYSICS 249	A Modern Introduction to Physics	4

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Identify the fundamental biochemical principles that underlie all biological processes.
2. Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
3. Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
4. Demonstrate professional and ethical responsibility in scientific research.
5. Design and conduct quantitative experiments and/or interpret data to address a scientific question.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE BIOCHEMISTRY FOUR-YEAR PLAN

Freshman

Fall	Credits	Spring	Credits
CHEM 103 or 109	4-5	CHEM 104 (if needed)	5
MATH 221	5	MATH 222	4
COMM A or Elective	3	Humanities Course	3
INTER-AG 155 or BIOCHEM 100[1]	1	Elective	3
	13-14		15

Total Credits 28-29

Sophomore

Fall	Credits	Spring	Credits
CHEM 343	3	CHEM 344	2
BIOCORE 381 & BIOCORE 382 (or ZOOLOGY 151)[2]	5	CHEM 345	3
Humanities Course	3	BIOCORE 383 & BIOCORE 384 (or ZOOLOGY 152)	5
Social Science Course	3	Ethnic Studies Course	3
	14		13

Electives	2-3		
	16-17		15

Total Credits 31-32

Senior

Fall	Credits	Spring	Credits
CHEM 565 or BIOCHEM 551	4	BIOCHEM 551 or CHEM 565	4
BIOCHEM 691 or 681[4]	2-3	BIOCHEM 692 or 682	2-3
Electives or Remaining Requirements	6-10	Electives or Remaining Requirements	6-10
	12-17		12-17

Total Credits 24-34

1 First-year students interested in exploring the major can enroll in INTER-AG 155 or BIOCHEM 100.

2 BIOCORE sequence requires four lecture courses plus two lab courses. Student may also take ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152 plus 6 credits of upper-level Biology instead of BIOCORE.

3 Students must take either: (1) both BIOCHEM 507 and BIOCHEM 508 or (2) BIOCHEM 501 and one additional course in Biochemistry from the 500/600-level electives.

4 Senior Thesis, independent study or work experience in laboratory are strongly recommended, but are not required. However, a Senior Honors Thesis is required to earn Honors in the Major.

ADVISING AND CAREERS

HOW TO SEEK ADVISING

- To schedule an appointment with the advisor, use the Scheduling Assistant (https://calendar.wisc.edu/scheduling-assistant).
- Send an email with brief questions to undergradadvisor@biochem.wisc.edu.
- Drop-in advising hours for quick (10–15 minute) questions, on a first-come, first-serve basis, are posted on the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/advising-information-undergraduate-program) each semester.

CAREER EXAMPLES

- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- The American Society for Biochemistry and Molecular Biology (ASBMB) UW–Madison Student Chapter (https://win.wisc.edu/organization/ASBMB) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
- Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (https://biochem.wisc.edu/undergraduate_program/advising-information-undergraduate-program) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistry-related departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (https://biochem.wisc.edu/undergraduate_program/research-opportunities-undergraduate-program) and the advisor can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

BIOLOGICAL SYSTEMS ENGINEERING

The biological systems engineering program is a professional program leading to the degree of Bachelor of Science–Biological Systems Engineering jointly granted by the College of Engineering and the College of Agricultural and Life Sciences. A student may study in the General program, or specialize in food and bioprocess engineering, natural resources and environmental engineering, or machinery systems engineering. It is intended for students interested in engineering as applied to all aspects of food and fiber production and biologically related engineering applications. All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET (http://www.abet.org) (Accreditation Board for Engineering and Technology).

BIOLOGICAL SYSTEMS ENGINEERING, B.S.

Biological systems engineering (BSE) is the application of engineering principles to biological and agricultural systems which greatly impact our food, fiber and renewable energy resources. Since biological systems engineering programs focus heavily on the protection and conservation of natural resources, it is not uncommon for them to be described as sustainable engineering programs.

Within the BSE program a student must enroll in either the *General Program* area or in one of the following three specialization areas: *Machinery Systems Engineering, Natural Resources and Environmental Engineering,* or *Food and Bioprocess Engineering*. The specialization in

Food and Bioprocess Engineering is split into a Food Engineering track and a Bioprocess Engineering track.

Students who complete all degree requirements are awarded a *Bachelor of Science–Biological Systems Engineering* degree. A student who completes one of the three program specializations will have the area of specialization identified on the official transcript. The BSE program, like all undergraduate engineering programs on the UW–Madison campus, is accredited by ABET (http://www.abet.org). Accreditation by ABET is an indication of program quality and has major benefits for individuals seeking registration as a licensed professional engineer. A UW–Madison BSE graduate may apply for licensure as a registered professional engineer once they have passed the Fundamentals of Engineering (FE) exam, obtained four years of qualifying engineering work experience, and have passed the Professional Engineering (PE) exam. To obtain a BSE degree from UW–Madison, a student must have taken (but is not required to have passed) the FE exam as part of their Senior Design sequence. Information about the FE exam can be found at Fundamentals of Engineering Exam (http://ncees.org/exams/fe-exam).

Graduates work in career fields associated with the growth, harvest, transportation, processing and storage of food, feedstuffs, biomass for energy production and forestry products. This includes, but is not limited to, jobs involving the design, construction and management of: bio-energy production facilities, greenhouses, food processing plants, soil management systems and erosion control structures, irrigation and drainage systems, wastewater and solid waste treatment/recycling operations, animal housing facilities, aquaculture enterprises, systems for improved air quality, and equipment for agricultural production, material handling, processing, and packaging. Job opportunities for BSE graduates remain plentiful and show no signs of decreasing given (1) the increase in world population and corresponding increasing need for food, fiber and renewable energy, (2) the measurable shortage of highly trained technical personnel in the United States, and (3) the constantly expanding emphasis on protection and conservation of natural resources.

The UW-Madison BSE program is traditionally known for its emphasis on undergraduate education which is reflected in outstanding one-on one advising and smaller class sizes.

The BSE program requires completion of a minimum of 125 credits to be eligible for graduation. Note that this is higher than the minimum for other CALS programs.

BIOLOGICAL SYSTEMS ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The Department of Biological Systems Engineering recognizes that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path graduates choose, be it a job, graduate school, or volunteer service, be it in engineering or another field, we have for our graduates the following objectives; that they will:

1. Exhibit strong skills in problem solving, leadership, teamwork, and communication;
2. Use these skills to contribute to their communities;
3. Make thoughtful, well-informed career choices; and
4. Demonstrate a continuing commitment to and interest in their own and others' education.

HOW TO GET IN

Entry to this professional program requires students to meet the five admission requirements detailed below. Students are admitted to the department as pre-Biological Systems Engineering until they meet the admission criteria. **Admission eligibility must be confirmed by the department.**

1. Must complete a minimum of 24 degree credits.
2. Must have completed a minimum of 17 graded credits of calculus, statistics, chemistry, computer science, statics, biology, and physics courses required for a BSE degree.
3. Must have a math and science grade point average (M&SGPA) of at least 2.80 with a minimum grade of C in every course used to calculate the M&SGPA. The M&SGPA is based on: math courses numbered 217 and above (MATH 228 is excluded); statistics courses numbered 224 and above; all chemistry courses; all biology courses (courses with biological science breadth; maximum three courses, any required course must be included if taken); computer sciences courses numbered 302 and above (COMP SCI 402 is excluded); E M A 201 Statics; and physics courses numbered 201 and above. For any course that a student repeats, only the most recent grade will be used in the calculation. Any transfer course from another university that is included in the previous list must be included in the GPA calculation.
4. Must be in good academic standing—i.e., not on academic probation or dropped status.
5. Must successfully complete introductory chemistry (CHEM 103 General Chemistry I & CHEM 104 General Chemistry II, or CHEM 109 Advanced General Chemistry, or equivalent) and math through MATH 222 Calculus and Analytic Geometry 2.

Revisions to #3 effective for students joining the department in 2019: Grades in courses Math 228 and Computer Science 402 are excluded from calculation. A maximum of three courses with biological science breadth may be used. If BSE 349 has been completed, it must be included in the calculation.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

NAMED OPTIONS WITHIN THE MAJOR

Students may complete the Biological Systems Engineering General Program or select a Named Option. The course requirements on this page represent the general program. Students are encouraged to consider one of the Named Options (Food and Bioprocess Engineering; Machinery Systems Engineering; or Natural Resources and Environmental Engineering). Links to learn more about these options, including the course requirements, are included below.

View as listView as grid

- **BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING** (P. 115)
- **BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING** (P. 116)
- **BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING** (P. 117)

MAJOR REQUIREMENTS

Code	Title	Credits
Major Requirements		
Common Requirements		53
General Program Classes and Technical Electives		43
Capstone		5
Total Credits		101

COMMON REQUIREMENTS

Code	Title	Credits
The Biological Systems Engineering program requires completion of a minimum of 125 credits to be eligible for graduation. Note that this is higher than the minimum for other CALS programs.		
Mathematics and Statistics		
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus–Functions of Several Variables	4
MATH 319	Techniques in Ordinary Differential Equations	3
or MATH 320	Linear Algebra and Differential Equations	
STAT 324	Introductory Applied Statistics for Engineers	3
Chemistry		
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry (Recommended)	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II [1]	
Biology		
BSE 349	Quantitative Techniques for Biological Systems	3
One additional Biological Science breadth Course; the following courses are preferred choices: [2]		2-5
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	

BIOLOGY/BOTANY 130	General Botany	
BIOLOGY/ ZOOLOGY 101	Animal Biology	
MICROBIO 101	General Microbiology [3]	
MICROBIO 303	Biology of Microorganisms [3]	
Physics		
E M A 201	Statics [4]	3
PHYSICS 202	General Physics	5
Foundation		
BSE 270	Introduction to Computer Aided Design	3
Select one of the following:		3
COMP SCI 310	Problem Solving Using Computers (Preferred)	
CBE 255	Introduction to Chemical Process Modeling	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	
Select one of the following:		3
I SY E 313	Engineering Economic Analysis (Preferred)	
M E 314	Manufacturing Fundamentals	
ACCT I S 300	Accounting Principles	
ECON/FINANCE 300	Introduction to Finance	
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	
Core		
BSE 249	Engineering Principles for Biological Systems [5]	3
or CBE 250	Process Synthesis	
BSE 365	Measurements and Instrumentation for Biological Systems	3
BSE 308	Career Management for Engineers	1
Total Credits		53-60

1 Taking the combination of CHEM 103 and CHEM 104 instead of CHEM 109 may increase the total minimum number of credits required for graduation.

2 Any biological science course of 2 or more credits is accepted. Additional courses taken may be counted as Technical Electives.

3 MICROBIO 101 or MICROBIO 303 required for Food & Bioprocess Engineering specialization.

4 E M A 201 Statics is an acceptable prerequisite for PHYSICS 202 General Physics.

5 Students selecting the Food & Bioprocess Engineering option who plan to enroll in CBE 310 Chemical Process Thermodynamics and CBE/B M E 320 Introductory Transport Phenomena must take CBE 250 here as a prerequisite. Students selecting the Food & Bioprocess Engineering option who plan to enroll in M E 361 Thermodynamics and M E 363 Fluid Dynamics are recommended to take BSE 249 here.

GENERAL PROGRAM REQUIREMENTS

Code	Title	Credits
M E 361	Thermodynamics [1]	3
or CBE 310	Chemical Process Thermodynamics	
Select one of the following: [1]		3-4
M E 363	Fluid Dynamics	
CIV ENGR 310	Fluid Mechanics	
B M E/CBE 320	Introductory Transport Phenomena	
BSE 464	Heat and Mass Transfer in Biological Systems	3
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
Select a minimum of three of the following:		6-9
BSE 201	Land Surveying Fundamentals	
BSE/ ENVIR ST 367	Renewable Energy Systems	
BSE/CIV ENGR/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	
BSE/FOOD SCI/ M E 441	Rheology of Foods and Biomaterials	
BSE 460	Biorefining: Energy and Products from Renewable Resources	
BSE 461	Food and Bioprocessing Operations	
BSE 472	Sediment and Bio-Nutrient Engineering and Management	
BSE 473	Irrigation and Drainage Systems Design	
BSE/M E 475	Engineering Principles of Agricultural Machinery	
BSE/M E 476	Engineering Principles of Off-Road Vehicles	
BSE 571	Small Watershed Engineering	
BSE/ FOOD SCI 642	Food and Pharmaceutical Separations	
Select a minimum of 9 credits of 300 level or above non-BSE engineering courses		9
Total Credits		27-31

1 Take BSE 249 and M E 361 and M E 364, or take CBE 250 and CBE 310 and CBE/B M E 320.

TECHNICAL ELECTIVES

Select courses from one or more of the following four technical elective categories to bring the total number of credits in the General Program Area or in the selected specialization area to 43. See the BSE Undergraduate Student Handbook for a list of recommended technical electives for various areas of specialization.

A. INTRODUCTION TO ENGINEERING COURSES (FRESHMEN ONLY)

Code	Title	Credits
INTEREGR 170	Design Practicum	3
BSE 170	Product Design Practicum	2

B. INDEPENDENT STUDY/INSTRUCTION COURSES

CALS or CoE courses with a 001, 299, 399, or 699 course number. No more than 3 credits of coursework in this category can be used to meet technical elective requirements.

C. UPPER-LEVEL COURSES

Part 1. Upper-Level Engineering Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Any Engineering course numbered 300 or above		
E M A 202	Dynamics	3
or M E 240	Dynamics	

Part 2. Upper-Level Science Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Advanced biological, natural, and physical science courses (i.e., courses with a B, N, or P designation)		
CHEM 341	Elementary Organic Chemistry	3
CHEM 342	Elementary Organic Chemistry Laboratory	1
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
CHEM/M S & E 421	Polymeric Materials	3
AGRONOMY/ATM OCN/SOIL SCI 532	Environmental Biophysics	3

D. LOWER-LEVEL SCIENCE AND ENGINEERING COURSES, BREADTH COURSES

Elementary and intermediate biological, natural and physical science courses except elementary and intermediate math courses; College of Engineering courses with a 100 or 200 level designation; College of Agricultural and Life Sciences courses, Institute of Environmental Studies courses, and/or School of Business courses. Independent study/instruction courses cannot be counted in this category. No more than 12 credits of coursework in this category can be used to meet technical elective requirements.

CAPSTONE

Code	Title	Credits
BSE 508	Biological Systems Engineering Design Practicum I	2
BSE 509	Biological Systems Engineering Design Practicum II [1]	3
Fundamentals of Engineering Exam [1]		

[1] Grades for BSE 509 will not be posted until proof of examination is presented.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. The ability to analyze systems, components and processes. This includes: the ability to apply knowledge of mathematics, science, and engineering fundamentals; the ability to use the techniques and tools of modern engineering practice; the ability to identify, formulate, and solve engineering problems.
2. The ability to create a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
3. The ability to formulate and conduct basic investigations such as laboratory experiments, prototype tests, field trials, computer simulations and market analyses.
4. The ability to identify important resources, and to retrieve, interpret, analyze and critique information for use in solving engineering problems and conducting basic investigations.
5. The ability to communicate effectively. This includes: the ability to effectively orally communicate; the ability to write in a clear, concise, grammatically correct and organized manner; the ability to document work activities and properly archive information; the ability to develop appropriate illustrations including hand sketches, computer generated drawings/graphs and pictures.
6. An understanding of professional and ethical responsibility.
7. The ability to function on multidisciplinary teams.
8. The broad education necessary to understand and assess the impact of engineering solutions in a global, economic, environmental, and societal context.
9. Recognition of the need, and the ability to engage in lifelong learning.
10. Knowledge of contemporary issues.

[1] If CHEM 103 & CHEM 104 is taken in place of CHEM 109, it is suggested to take CHEM 103 in the fall semester and CHEM 104 in the spring semester of year 1, and move Biological Science to the fall semester of year 2.

[2] SOIL SCI 301 General Soil Science is offered Fall semesters and is a 4 credit alternative to SOIL SCI/ENVIR ST/GEOG 230 Soil: Ecosystem and Resource.

[3] Plan BSE 473 Irrigation and Drainage Systems Design for Fall term of year 3 or 4 as available in odd years.

- Need 125 credits to complete degree.

ADVISING AND CAREERS

Students are assigned a faculty advisor when they declare the major or become pre-biological systems engineering. Prospective students should contact the department at bse@wisc.edu or 608-262-3310 for more information.

Graduates work in career fields associated with the growth, harvest, transportation, processing and storage of food, feedstuffs, biomass for energy production and forestry products. This includes, but is not limited to, jobs involving the design, construction and management of: bio-energy production facilities, greenhouses, food processing plants, soil management systems and erosion control structures, irrigation and drainage systems, wastewater and solid waste treatment/recycling operations, animal housing facilities, aquaculture enterprises, systems for improved air quality, and equipment for agricultural production, material handling, processing, and packaging. Job opportunities for BSE graduates remain plentiful and show no signs of decreasing given (1) the increase in world population and corresponding increasing need

for food, fiber and renewable energy, (2) the measurable shortage of highly trained technical personnel in the United States, and (3) the constantly expanding emphasis on protection and conservation of natural resources.

WISCONSIN EXPERIENCE

Through our curriculum, BSE students have opportunities for many high-impact learning experiences including hands-on lab courses, involvement in student organizations, and BSE's capstone design classes. Introductory engineering courses and career management courses are built into the curriculum to make sure you have a community to succeed both at UW and after you graduate.

Beyond traditional classes, our students work or perform independent study with professors not only in BSE but throughout the campus. Many campus labs and shops need students who know how to design and build systems, skills at which you will excel through your experiences in BSE. Outside the university, BSE students can take advantage of internships and co-ops, but are also in high demand for programs such as Peace Corps and Engineers without Borders. BSE has an active student organization ASABE (http://asabe.bse.wisc.edu), where students network with professionals and provide service projects to the community.

As a BSE student, you will be proud that you are contributing to the social and economic well-being of Wisconsin and beyond by designing solutions to feed and fuel the world in a sustainable manner. Many of our students go on to work in the following areas:

- Machinery systems that support the agricultural production sector including precision agriculture, cultural and processing technology, and logistics for crop and animal production with a focus on dairy facilities and milking technology.
- Natural resource systems that support both agricultural producers and environmental agencies in the areas of air and water quality, and waste mitigation and utilization.
- Food production systems that support the food industry striving for improvements in food processing, safety, and security.
- Bioprocessing systems that support bioenergy and bioproducts industries including biomass production and logistics systems, biomass conversion technologies, and forest products.

Or, you may take the skills you learn through your experiences at BSE and apply them to a brand new challenge. We are excited to see what you will do.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

All BSE students are encouraged to apply annually for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). Each year the BSE department selects more than two dozen outstanding students to receive financial support through scholarships.

THE BSE SHOP

The Biological Systems Engineering Shop is dedicated to providing BSE students a hands-on experience with machining equipment found throughout the production sector of industry. The shop, located at 540 Elm Drive, is open to all BSE students who have completed the *shop safety form* (renewed annually) and have read and understood the *Shop Rules and Regulations*. In addition, a yearly refresher is required which consists of watching the shop safety presentation and completing a short, yearly safety quiz. Whether you have never worked in a shop before, or already feel at home working with this type of machinery, we welcome you to the BSE Shop and want to make you feel comfortable in this learning environment.

BSE students are welcome to learn various machining and metal fabrication techniques as well as woodworking skills. These skills are aimed at improving students' understanding of the design, fabrication, and assembly processes through one-on-one training and hands-on operation of the machines—before they enter the workforce. To operate any of the shop machines, students must first be authorized by completing the online *Canvas course* and provide a one-on-one, hands-on operation with the shop supervisor to demonstrate understanding of the machine's controls and capabilities. To maintain a safe work environment, the shop is under 24-hour video surveillance. For additional details, please see Shop Info for Students (https://bse.wisc.edu/bse-shop-home/shop-info-for-students).

CAE COMPUTER LAB

A dedicated student computer lab in room 217 of the Agricultural Engineering Building offers 10 computer workstations and space for group work. These machines have the same software packages as those found in Computer Aided Engineering labs on the Engineering campus. A CAE printer is also provided.

THE B1 LOUNGE

In the basement of the Agricultural Engineering Building is a large room with multiple tables and chairs that can be used for group study or individual work. Department-wide social events are also held here. A microwave oven and vending machines are available for student use.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING

Food and bioprocess engineers develop and manage equipment and systems that process and distribute food and other biologically based materials. They are required by the food industry to help develop processes that add value to food products. These processing technologies are designed to improve the storage life and marketability of food products, reduce their transportation costs, handle processing wastes, and develop alternative uses for biological materials. (For example, newspaper and soy flour are used to make the construction material, Environ™, and corn stalks can be used to make chemical absorbent pads.)

The food industry makes up one of the largest segments of our nation's economy and continues to enjoy steady growth due to the ever-changing needs of consumers and increased awareness of nutritional and environmental issues. Food and bioprocess engineers play a vital role in meeting this need. From potato chips to microwavable entrees, food and bioprocess engineers continue to develop processes to convert raw materials from the farm to food products for the dining room table.

REQUIREMENTS

Code	Title	Credits

BSE 571	Small Watershed Engineering
Total Credits	19-20

TECHNICAL ELECTIVES

See Major Requirements (p. 107).

CAPSTONE

See Major Requirements (p. 107).

FOUR-YEAR PLAN

BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING

Machinery systems engineering is what many students initially perceive biological systems engineering to be. These engineers are trained to design machines for production agriculture and construction. Concepts covered in this field include power transmission, traction, hydraulic power, and crop handling, such as planting and harvesting.

Over the past 50 years, machines have improved production efficiency in all aspects of life. Machinery systems engineers have played a key role in moving society from the highly manual culture of the early 20th century to the highly technical culture of the late 20th century. Even with these advances, the job of the machinery systems engineer is not complete. Concern for our natural environment and worker safety, and the constant desire to reduce costs and energy consumption while improving production efficiency, will continue to challenge machinery systems engineers.

Total Credits		33-34

TECHNICAL ELECTIVES

See Major Requirements (p. 107).

CAPSTONE

See Major Requirements (p. 107).

FOUR-YEAR PLAN

BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING

Natural resources and environmental engineers work with all kinds of natural resources, like water, soil, plants, and air. For example, they could be responsible for the design of livestock or wildlife watering stations in a natural forest or the design of a recycling waste management system on a dairy farm. Graduates find challenging and rewarding work with engineering and environmental consultants, with government agencies like the Forest Service, and with companies such as Valmont Irrigation and Creative Habitat.

Conserving soil and water resources is critical to our future. Expanding populations and increasing needs for food, goods, and services are placing an ever growing demand upon our precious soil and water resources. Natural resources and environmental engineers are finding ways to manage and conserve our resources today so that we can meet the demands of the future.

CAPSTONE

See Major Requirements (p. 107).

FOUR-YEAR PLAN

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

Sociologists study human social behavior and how societies are organized. The Department of Community and Environmental Sociology's focus is on the relationship between people and their natural environment and with the communities in which people live, work, and play.

A major in community and environmental sociology is good preparation for jobs that involve an understanding of social issues, require knowledge of the functioning and organization of communities and the relationship between people and the natural environment, and involve data collection or data analysis. Community and environmental sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and cooperative or agribusiness enterprises. A major in community and environmental sociology also provides excellent preparation for careers in international development, law, and further academic work in sociology or other social sciences.

The Department of Community and Environmental Sociology offers a wide range of courses for both beginning and advanced students. The department's introductory course, C&E SOC/SOC 140 Introduction to Community and Environmental Sociology, is designed to explore the changing nature of rural development in the global economy.

UW–Madison community and environmental sociologists teach about a wide range of issues that are of critical importance to people and communities from Wisconsin to the low-income countries of the developing world. For example, students can study such matters as the growing controversies around energy, the implementation of environmental laws, sustainability, and the special problems and unique concerns of people in resource-dependent communities. Students can also focus on issues such as the effect of new agricultural technologies on family farms, the ways gender and race affect educational and occupational opportunities, and how community leaders and citizens address problems such as urban sprawl or rural poverty. In addition, students can examine issues such as population growth, the causes of world hunger, tropical rainforest destruction, and the prospects for achieving sustainable development in poor countries.

Many community and environmental sociology students build on their major by selecting one of the certificate programs available from the College of Agricultural and Life Sciences or from other UW–Madison schools or colleges. Certificate programs enable students to expand their skills and study particular topics or issues in more depth. Community and environmental sociology majors often choose certificate programs in the concentration in analysis and research, global health, food systems, criminology, and environmental studies. Many students choose to pursue a double major, combining C&E sociology with fields such as Spanish, environmental studies, nutritional sciences, agronomy, biology, wildlife ecology, or environmental science. Students have also combined their undergraduate major in C&E sociology with graduate work in public policy through the La Follette School of Public Affairs accelerated master's of public affairs program.

Students have also combined their undergraduate major in C&E sociology with graduate work in public policy through the La Follette School of Public Affairs accelerated master's of public affairs program.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Core		
C&E SOC/SOC 140	Introduction to Community and Environmental Sociology	3
C&E SOC/SOC 475	Classical Sociological Theory	3
C&E SOC/SOC 357	Methods of Sociological Inquiry	3-4
C&E SOC/SOC 360	Statistics for Sociologists I [1]	4
Electives within the Major [2]

Select 6-9 credits from the Environment course set [3]		6-9
Capstone		
C&E SOC 500	Capstone Experience	3
Total Credits		28-35

1 We strongly encourage our majors to take C&E SOC/SOC 360 Statistics for Sociologists I, if they have not already taken a statistics course at time of major declaration. Acceptable statistics courses other than C&E SOC/SOC 360 Statistics for Sociologists I are: STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences, ECON 310 Statistics: Measurement in Economics, PSYCH 210 Basic Statistics for Psychology, GEOG 360 Quantitative Methods in Geographical Analysis, MATH/STAT 310 Introduction to Probability and Mathematical Statistics II, and GEN BUS 303 Business Statistics. Please note that statistics courses taken outside the major do not count toward the credit requirement in the major.

2 Must complete a total of 15 credits of Community and Environment electives. No more than 6 credits may be 100- or 200-level courses. At least 6 credits must be taken in each course set.

3 Consult advisor to request permission to use C&E SOC 299 Independent Study, C&E SOC 399 Coordinative Internship/ Cooperative Education, or C&E SOC 699 Special Problems toward the Community or Environmental course sets. No more than 4 such credits may be counted toward the major.

CREDIT REQUIREMENT

Must complete a total of 30 credits of C&E SOC courses. Students may count up to 4 credits of Independent Study (C&E SOC 299 Independent Study, C&E SOC 699 Special Problems), Internship (C&E SOC 399 Coordinative Internship/Cooperative Education), or Thesis (C&E SOC 681 Senior Honors Thesis/C&E SOC 682 Senior Honors Thesis/C&E SOC 691 Senior Thesis/C&E SOC 692 Senior Thesis) here, with permission of their advisor.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand how social science arguments are constructed and evaluated.
2. Develop ability to assess data quality and understand whether particular data is appropriate to answer specific questions.

3. Learn general theories on basic social processes, especially those related to the relationships between society and the environment and the social organization of communities.
4. Learn communication skills in the social sciences.

Total Credits 30

1 Electives should be chosen in order to satisfy UW and CALS requirements. See Requirements tab for details.

2 C&E SOC electives include the Community course set and the Environmental course set. See Requirements tab for details.

3 Students may take the capstone course either semester of their senior year. The fall semester and spring semester courses may have different content.

The above plan assumes that a student enters with standard high school preparation (algebra, geometry, third-year math, two years' foreign language).

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students are welcome to contact Professors Leann Tigges (lmtigges@wisc.edu) or Gary Green (gpgreen@wisc.edu) for more information.

Community and environmental sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and public health. A major in community and environmental sociology also provides excellent preparation for graduate school and careers in international development, law, public policy and nursing, and further academic work in sociology and other social sciences. In addition, recent graduates have been employed by state and local governments and not-for-profit environmental organizations. Many have gone on to serve communities through Peace Corps, Teach for America, and AmeriCorps, and some have established their own business in food and health-related industries.

WISCONSIN EXPERIENCE

The program excels in offering our majors high-impact experiences that characterize the Wisconsin Experience, from rich capstone courses to varied internships and study-abroad experiences.

- Many of our students spend a summer or a semester studying abroad. Some students attend universities in Europe, Latin America, and Asia, while other students participate in a variety of alternative learning experiences. Study abroad programs offer the opportunity to earn credits toward your degree while learning about new cultures, communities, and environments.
- Students also gain experiences outside of the classroom through internships and community based service learning courses, such as Professor Stoecker's offering of the Capstone Course (C&E SOC 500 Capstone Experience).
- The variety of internships undertaken by our majors is vast but all offer students the opportunity to apply their knowledge to "real world" settings. A list of some of the internship opportunities is provided on

our website (http://dces.wisc.edu/programs/opportunities/possible-internships).

- Our majors have opportunities to enhance their research skills by working on a faculty member's research, undertaking a senior thesis project, and through completion of the Concentration in Analysis and Research (https://www.ssc.wisc.edu/soc/ugrad/car.php).

FOOD SYSTEMS, CERTIFICATE

The certificate in food systems is a 16-credit option open to all undergraduate students. It assembles an interdisciplinary curriculum, integrating different paradigms across all aspects of food production, distribution, and consumption, along with the context and values inherent to the systems.

For students in food or agriculture-related majors, the certificate in food systems will provide a broader context to their disciplinary studies.

For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students of any discipline, the certificate will help students be more informed consumers and citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental outcomes of different patterns of production, processing, distribution, and consumption.

HOW TO GET IN

Undergraduate students of any major are welcome to pursue the certificate in food systems.

Students are eligible to declare the certificate once they complete one of the three core courses (AGROECOL/AGRONOMY/C&E SOC/ENTOM/ENVIR ST 103 Agroecology: An Introduction to the Ecology of Food and Agriculture, C&E SOC/A A E/SOC 340 Issues in Food Systems, and DY SCI/AGRONOMY/INTER-AG 471 Food Production Systems and Sustainability) with a grade of B or better. While there are different pathways to complete the certificate, students who declare and plan their coursework earlier in their careers will be in a better position to complete the required coursework.

Students who meet the eligibility criteria should fill out this short questionnaire (https://uwmadison.co1.qualtrics.com/jfe/form/SV_0JPABAckGujKA2p) and then contact Megan Banaszak (mbanaszak@wisc.edu) to declare the certificate.

REQUIREMENTS

The certificate in food systems requires that students take two highly interdisciplinary core courses (6 total credits), and at least one course in each of three thematic elective categories (for 9 total credits across electives), plus a one credit culminating activity such as an internship, independent study, or appropriate capstone. The course list below provides a complete list of courses that satisfy each requirement.

MINIMUM REQUIREMENTS:

- 2.0 GPA in certificate courses
- At least 50% of certificate courses taken in-residence (i.e. at UW-Madison or through a UW-Madison sponsored study abroad program)
- Minimum of 16 credits total

Code	Title	Credits
Core Courses		
Select two of the following:		6-7
AGROECOL/ AGRONOMY/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	
C&E SOC/A A E/ SOC 340	Issues in Food Systems	
DY SCI/ AGRONOMY/ INTER-AG 471	Food Production Systems and Sustainability	
Elective Courses		
Select at least one course from each list: Provisioning, Context, and Values for a total of 9 credits		9
Provisioning (production, processing, distribution)		
AGRONOMY 100	Principles and Practices in Crop Production	
AGRONOMY 300	Cropping Systems	
AGRONOMY 377	Cropping Systems of the Tropics	
AN SCI/ DY SCI 101	Introduction to Animal Sciences	
AN SCI/ DY SCI 370	Livestock Production and Health in Agricultural Development	
BOTANY/ PL PATH 123	Plants, Parasites, and People	
FOOD SCI 301	Introduction to the Science and Technology of Food	
HORT 120	Survey of Horticulture	
HORT/ AGRONOMY 376	Tropical Horticultural Systems	
HORT 370	World Vegetable Crops	
HORT 378	Tropical Horticultural Systems International Field Study	
Context (policy, economics, law, society)		
A A E 215	Introduction to Agricultural and Applied Economics	
AGRONOMY/ HORT 360	Genetically Modified Crops: Science, Regulation & Controversy	
AN SCI/ FOOD SCI 321	Food Laws and Regulations	
AN SCI/DY SCI/ FOOD SCI/ SOIL SCI 472	Animal Agriculture and Global Sustainable Development	
AN SCI/DY SCI/ FOOD SCI/ SOIL SCI 473	International Field Study in Animal Agriculture and Sustainable Development	
C&E SOC/ F&W ECOL/ SOC 248	Environment, Natural Resources, and Society	

ENVIR ST/ F&W ECOL 515	Natural Resources Policy
GEOG/ ENVIR ST 309	People, Land and Food: Comparative Study of Agriculture Systems
GEOG/ ENVIR ST 534	Environmental Governance: Markets, States and Nature
MED HIST/ AGRONOMY/ C&E SOC/ PHILOS 565	The Ethics of Modern Biotechnology
Values (nutrition, equity, environment)	
A A E 323	Cooperatives
A A E/ AGRONOMY/ INTER-AG/ NUTR SCI 350	World Hunger and Malnutrition
AGRONOMY/ BOTANY/ SOIL SCI 370	Grassland Ecology
BOTANY/ AMER IND/ ANTHRO 474	Ethnobotany
C&E SOC/ SOC 341	Labor in Global Food Systems
C&E SOC/ SOC 222	Food, Culture, and Society
ENVIR ST/ GEOG 309	People, Land and Food: Comparative Study of Agriculture Systems
FOLKLORE/ AMER IND/ ANTHRO/ GEN&WS 437	American Indian Women
HORT 350	Plants and Human Wellbeing
NUTR SCI 132	Nutrition Today
NUTR SCI 332	Human Nutritional Needs
SOIL SCI/ ENVIR ST/ GEOG 230	Soil: Ecosystem and Resource
Food Systems Culmination Activity [1]	
Select one of the following:	1
Independent Study	
C&E SOC 299	Independent Study
C&E SOC 699	Special Problems
Food Systems Internship	
C&E SOC 399	Coordinative Internship/Cooperative Education
Total Credits	16-17

[1] Culminating activities must be formally pre-approved and incorporated into an independent study (299) or internship (399) within the Department of Community and Environmental Sociology. Click HERE (https://uwmadison.co1.qualtrics.com/jfe/form/SV_eaks3WTTYEkj7Xn) for more information and a form to request approval of a culminating activity.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Evaluate critically the key elements of a food system.
2. Evaluate critically how political, social, economic, and environmental forces interact to shape food systems.
3. Evaluate critically the biophysical processes inherent in various agricultural production systems.
4. Evaluate critically how individuals from different backgrounds interact with local and global food systems as humans, consumers, producers, and citizens.
5. Evaluate critically the social, economic, and environmental outcomes of different food systems.

ADVISING AND CAREERS

ADVISING

Questions about the certificate may be directed to the advisor, Megan Banaszak (mbanaszak@wisc.edu), or to the Faculty Chair, Steve Ventura (sventura@wisc.edu).

CAREERS

For students in food or agriculture related majors, the certificate in food systems will provide a broader context to their disciplinary studies. As they seek careers, they will be able to provide evidence of enhancing their disciplinary learning and skills with a broader framework of food system concepts, including ideas for enhancing food system sustainability. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students in any discipline, the certificate in food systems will help them be more informed consumers and better informed citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental consequences of production, processing, distribution, and consumption.

PEOPLE

Faculty across campus teach courses in the certificate. Please use the Guide to seek out information on individual courses.

For general certificate inquiries or questions about the culminating experience, please contact the Faculty Chair, Steve Ventura (sventura@wisc.edu, 608-262-6416).

For direct advising on curricular requirements, or to declare the certificate, contact Megan Banaszak (mbanaszak@wisc.edu).

WISCONSIN EXPERIENCE

- Integrated, interdisciplinary course work
- Professional development opportunities, including options to intern off campus
- Hands-on culminating experience

DAIRY SCIENCE

Undergraduates in dairy science prepare for a variety of career opportunities that require a strong background in applied animal biology. Careers include: agribusiness, dairy farm management, technical service and consulting, research, and teaching. Students also enroll in the department to prepare for veterinary school, medical school, or graduate school. Coursework in the major includes animal genetics, lactation, reproduction, nutrition and management. The department may be consulted for additional details and for specific career information.

The dairy science major can be earned under the bachelor of science degree program. The dairy science major may be combined with other majors such as agricultural and applied economics, biological systems engineering, genetics, life sciences communication, and agronomy. Multiple out-of-classroom learning opportunities are included in the curriculum and internships on farms or with agribusiness are required to provide the practical training needed for success in any 21st-century careers. Many students gain valuable experience through part-time employment in research labs or in the student-operated dairy cattle instruction and research center.

Discoveries from the research laboratories reach the classroom long before they appear in textbooks. Students benefit from integration of the instructional and research programs of the department. The co-curricular Badger Dairy Club (https://win.wisc.edu/organization/badgerdairyclub) involves students in dairy industry events that provide leadership and networking opportunities in a vibrant industry.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		3-5
MATH 112	Algebra	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I	
Select one of the following:		3
STAT 301	Introduction to Statistical Methods	
or STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		4-5
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options: [1]		9-10
Option 1:		
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
AGRONOMY 100	Principles and Practices in Crop Production	
Option 2:		
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	
Option 3:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Select one of the following:		3
GENETICS 466	Principles of Genetics	
CHEM 341	Elementary Organic Chemistry	
CHEM 343	Introductory Organic Chemistry	
MICROBIO 101	General Microbiology	
MICROBIO 303	Biology of Microorganisms	
M M & I 341	Immunology	
Biochemistry		
Select one of the following:		3-6
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	

BMOLCHEM 314	Introduction to Human Biochemistry (offered during summer session only)	
Economics		
Select one of the following:		4
A A E 215	Introduction to Agricultural and Applied Economics	
ECON 101	Principles of Microeconomics	
DAIRY SCIENCE		
Core		
AN SCI/DY SCI 101	Introduction to Animal Sciences	4
DY SCI 233	Dairy Herd Management I	3
DY SCI 234	Dairy Herd Management II	3

DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 473	International Field Study in Animal Agriculture and Sustainable Development	
DY SCI 534	Reproductive Management of Dairy Cattle	
DY SCI 681	Senior Honors Thesis [2]	
DY SCI 682	Senior Honors Thesis [2]	
DY SCI 699	Special Problems [2]	
Total Credits		65-79

1. Consult with your advisor regarding use of BIOCORE courses (BIOCORE 381 Evolution, Ecology, and Genetics, BIOCORE 382 Evolution, Ecology, and Genetics Laboratory, BIOCORE 383 Cellular Biology, BIOCORE 384 Cellular Biology Laboratory, and BIOCORE 485 Principles of Physiology) to satisfy Introductory Biology and Genetics for the major.
2. Consult with your advisor for details.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Gain knowledge of current and emerging research based information in animal biology and management sciences to support dairy production.
2. Gain intellectual, practical and attitudinal skills needed to identify and solve problems and challenges facing dairy producers and allied industries.
3. Gain in life-long learning skills to enable graduates to adapt to changing technological, economic and social circumstances throughout their professional career.

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students are welcome to contact Ted Halbach (tjhalbach@wisc.edu, 608-219-5289) for more information.

Undergraduates in dairy science prepare for a variety of career opportunities that require a strong background in applied animal biology. Careers include: agribusiness, dairy farm management, technical service and consulting, research, and teaching. Students also enroll in the department to prepare for veterinary school, medical school, or graduate school. Coursework in the major includes animal genetics, lactation, reproduction, nutrition and management. The department may be consulted for additional details and for specific career information.

ENTOMOLOGY

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insects species—with estimates ranging as widely as from 3 to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded humans —sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, research and extension work, state and federal government service, industry, and research institutes.

Students can complete an undergraduate major in entomology under the bachelor of science degree program.

Students interested in graduate work should consult the Graduate Guide (http://guide.wisc.edu/graduate).

See the department website (http://www.entomology.wisc.edu) for current course rotation information.

- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1

International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics		
Select one of the following (or placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I [1]	
Select one of the following:		5
MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology		
Option 1:		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
Option 2:		
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
Option 3:		
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
Select 12 additional credits from any biological or physical science course (at least 8 credits must be 300-level or 200-level courses with the intermediate-level designation). [2]		
Physics		
Select one of the following:		3-5
PHYSICS 103	General Physics	
PHYSICS 107	The Ideas of Modern Physics	
PHYSICS 109	Physics in the Arts	
PHYSICS 115	Energy	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Entomology Core		
ENTOM/ZOOLOGY 302	Introduction to Entomology	4
Select 11 credits as follows:		11
Must select at least 3 credits from at least two subsets (organismal, suborganismal, or applied)		
May select up to 3 credits from subset called "other"		
Capstone		
ENTOM 468	Studies in Field Entomology [3]	3
Total Credits		36-43

1. If MATH 171 is taken, student must take MATH 217.
2. Suggested courses/subjects include GENETICS 466, CHEM 341, CHEM 342 CHEM 343, CHEM 344, CHEM 345, PHYSICS 104, PHYSICS 202, PHYSICS 208, ENTOM not used elsewhere, BOTANY, ZOOLOGY, F&W ECOL, MICRO, PL PATH.
3. ENTOM 468, taken after the junior year, is the recommended capstone course (can double count in Core Courses). ENTOM 681 Senior Honors Thesis, ENTOM 682 Senior Honors Thesis, ENTOM 691 Senior Thesis, ENTOM 699 Special Problems can be substituted in special circumstances (and can double count up to 3 credits in Core Category); see advisor.

SUBSET COURSES

ORGANISMAL

Code	Title	Credits
ENTOM 331	Taxonomy of Mature Insects	4
ENTOM 432	Taxonomy and Bionomics of Immature Insects	4
ENTOM 450	Basic and Applied Insect Ecology [1]	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory (requires enrollment in ENTOM 450) [1]	1
ENTOM 468	Studies in Field Entomology	3
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3
The following three courses:		3
ENTOM/ AGRONOMY/ F&W ECOL/ M&ENVTOX 632	Ecotoxicology: The Chemical Players	

ENTOM/ AGRONOMY/ F&W ECOL/ M&ENVTOX 633	Ecotoxicology: Impacts on Individuals	
ENTOM/ AGRONOMY/ F&W ECOL/ M&ENVTOX 634	Ecotoxicology: Impacts on Populations, Communities and Ecosystems	
ENTOM 701	Advanced Taxonomy	3

[1] ENTOM 450 Basic and Applied Insect Ecology and ENTOM 451 Basic and Applied Insect Ecology Laboratory can count toward either the organismal or applied categories, not both

SUBORGANISMAL

Code	Title	Credits
ENTOM 321	Physiology of Insects	3
ENTOM/BOTANY/ PL PATH 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	3
ENTOM/GENETICS/ ZOOLOGY 624	Molecular Ecology	3

APPLIED

Code	Title	Credits
ENTOM/M M & I/ PATH-BIO/ ZOOLOGY 350	Parasitology	3
ENTOM 351	Principles of Economic Entomology	3
ENTOM/ ZOOLOGY 371	Biology of Disease Vectors	3
ENTOM 450	Basic and Applied Insect Ecology [1]	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory [1]	1
ENTOM/ F&W ECOL 500	Insects in Forest Ecosystem Function and Management	2

[1] ENTOM 450 Basic and Applied Insect Ecology and ENTOM 451 Basic and Applied Insect Ecology Laboratory can count toward either the organismal or applied categories, not both

OTHER

Code	Title	Credits
ENTOM 375	Special Topics	1-4
ENTOM 399	Coordinative Internship/Cooperative Education	1-8
ENTOM 681	Senior Honors Thesis	2-4
ENTOM 682	Senior Honors Thesis	2-4
ENTOM 691	Senior Thesis	2
ENTOM 699	Special Problems	1-4

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences focusing on insects.
2. Knowledge of laboratory and/or field methodology.
3. Explain and apply scientific methods including designing and conducting experiments and testing hypotheses.
4. Recognize relationships between structure and function at all levels including molecular, cellular, organismal and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physics, and technology to answer biological questions using the scientific method.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE ENTOMOLOGY FOUR-YEAR PLAN

Freshman

Fall	Credits	Spring	Credits
CHEM 103 or 109	4-5	CHEM 104	5
MATH 112, 113, 114, or 171	3-5	MATH 113, 211, 217, or 221	3-5
COMM A or Elective	3	Electives (to reach ~15 credits)	5-8
First Year Seminar	1		
Additional Elective Course[1]	3		
	14-17		13-18

Total Credits 27-35

Sophomore

Fall	Credits	Spring	Credits
MATH 211, 217, 221, or STAT 371	3-5	ZOOLOGY/BIOLOGY/ BOTANY 152 or BOTANY 130	5
ZOOLOGY/BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 (or ZOOLOGY 151)	5	Electives	10

Electives	4-6	
	12-16	15

Total Credits 27-31

Junior

Fall	Credits	Spring	Credits
ENTOM/ZOOLOGY 302	4	Biological or Physical Elective	3
PHYSICS 103, 107, 109, 115, 201, or 207	4-5	Breadth Course in Core	3
Electives (to reach ~ 15 credits)	4-8	Electives (to reach ~15 credits)	6-9
	12-17		12-15

Total Credits 24-32

Junior

Summer	Credits
ENTOM 468 (Capstone, even #'d summers)	3
	3

Total Credits 3

Senior

Fall	Credits	Spring	Credits
Biological or Physical Elective Course	3	Biological or Physical Elective	6
Breadth Course(s) in Core	3-6	Breadth Course in Core	3
Electives (to reach ~15 credits)	6-9	Electives	6
	12-18		15

Total Credits 27-33

[1] When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)
For additional Biological or Physical Science courses students may want to choose from the following depending on interest
* Health/graduate school: CHEM 343/CHEM 344/CHEM 345, PHYSICS 104 or PHYSICS 207, GENETICS 466, MICROBIO 303/MICROBIO 304, BIOCHEM 501
* Ecology: F&W ECOL/ENVIR ST/ZOOLOGY 360, BOTANY/F&W ECOL/ZOOLOGY 460, F&W ECOL 550, ZOOLOGY/ANTHRO/BOTANY 410, BOTANY 400 or BOTANY 401.
* Agriculture: PL PATH 300, AGRONOMY 300, SOIL SCI 301

Students may reduce the number of required courses via:

- Testing out of Comm-A
- Using ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology to satisfy Comm-B
- Testing out of Quantitative Reasoning, Part A
- Earning AP/IB credits
- Using ENTOM/ZOOLOGY 371 Biology of Disease Vectors for International Course

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN ENTOMOLOGY

Undergraduate students are assigned to two advisors, the entomology undergraduate faculty advisor Dr. Dan Young (http://labs.russell.wisc.edu/ento/people/faculty/young) and Todd Courtenay (**todd.courtenay@wisc.edu**). However, since the vast majority of entomology B.S. students do independent research during their undergraduate career, it is important to meet with other entomology faculty members (http://labs.russell.wisc.edu/ento/people/faculty) to learn about all of the research possibilities.

Undergraduates in entomology are strongly urged to meet with their advisor before they enroll for the upcoming term.

For more information about the entomology B.S. or the department in general, please contact Dr. Dan Young or the Student Services Coordinator, Todd Courtenay (**todd.courtenay@wisc.edu**).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to entomology students, please visit our Internship & Job Resources (http://labs.russell.wisc.edu/ento/graduate-study/internships-and-job-resources) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to entomology B.S. students, please visit the CALS Career Services (https://cals.wisc.edu/academics/undergraduate-students/career-services) page. Students in the major are welcome to make an individual appointment with Todd Courtenay (**todd.courtenay@wisc.edu**) to discuss a number of career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

Liesch, Patrick (PJ), Assistant Faculty Associate Insect Diagnostic Lab

WISCONSIN EXPERIENCE

While entomology clearly is "big science," our department prides itself on a "small campus" feel in which we get to know our undergraduate students during their time with us.

In the classroom, we strive to maintain labs at not more than 15-20 students to maximize individualized and participatory learning. Students are given additional opportunities for deep and engaged learning experiences through honors options that are generally available for most courses and field and/or lab experiences in many of the upper-level courses.

Very nearly all our majors have opportunities to work alongside our faculty and graduate students in research labs and in the field. Our major accommodates 1–3 credits (of the 15 entomology credits required to major) in the area of directed/independent study and internships to promote extracurricular and outside the traditional classroom learning.

Many of our undergraduate majors are also involved in service learning and teaching through our departmental "Insect Ambassadors (http://labs.russell.wisc.edu/insectambassadors)" outreach program to K/12, various clubs, and organizations. We are committed (http://labs.russell.wisc.edu/ento/outreach) to the UW System goal to provide Wisconsin's citizens with opportunities to benefit from, and contribute to, the state's growing "knowledge economy" through the land-grant university three-fold mission of teaching, research and public service. We also have an active Undergraduate Entomology Society for majors—or any UW–Madison students interested in entomology. Research and internship opportunities are also available in the UW Insect Research Collection (WIRC) (http://labs.russell.wisc.edu/wirc) as well as possible participation in WIRC sponsored collecting expeditions in Wisconsin and around the United States.

FOOD SCIENCE

Food science is the application of science and engineering to the production, processing, distribution, preparation, and evaluation of food.

The Department of Food Science at the University of Wisconsin–Madison has been a part of the College of Agricultural and Life Sciences for more than 100 years instructing generations of food science and industry leaders. Housed in the recently remodeled Babcock Hall, the Department of Food Science offers students a truly unique undergraduate and graduate experience. Known for our distinguished and dedicated faculty and staff, students find the Department of Food Science a stimulating and encouraging environment to study and conduct research.

The Department of Food Science's undergraduate program offers students valuable real-world experience and leadership skills by providing an innovative curriculum; varied club and extracurricular activities; research lab opportunities; access to a fully functional and award winning dairy plant; professional and industry contacts and experience; numerous internships and scholarships, and nearly 100% job placement.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

NUTR SCI/A A E/AGRONOMY/INTER-AG 350 World Hunger and Malnutrition is recommended to fulfill the CALS International Studies requirement.

Code	Title	Credits
Mathematics and Statistics		
This major requires calculus. Prerequisites may need to taken before enrollment in calculus.		
Select one of the following:		5
MATH 217	Calculus with Algebra and Trigonometry II [1]	
MATH 221	Calculus and Analytic Geometry 1	
Select one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Physics		
Select one of the following:		4-5
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Biology		
Select one of the following (see below):		16-18
Biochem/Botany/Microbio/Zoology (Path 1)		
Biocore (Path 2)		
Foundation		
Econ or Ag & Applied Econ		
Select one of the following:		3
A A E 215	Introduction to Agricultural and Applied Economics	
A A E 323	Cooperatives	
ECON 101	Principles of Microeconomics	

ECON 111	Principles of Economics-Accelerated Treatment	
Nutritional Science		
NUTR SCI/ BIOCHEM 510	Nutritional Biochemistry and Metabolism	3
or NUTR SCI 332	Human Nutritional Needs	
Core		
FOOD SCI 301	Introduction to the Science and Technology of Food	3
AN SCI/FOOD SCI 321	Food Laws and Regulations	1
FOOD SCI/MICROBIO 324	Food Microbiology Laboratory	2
FOOD SCI/MICROBIO 325	Food Microbiology	3
FOOD SCI 410	Food Chemistry	3
FOOD SCI 412	Food Analysis	4
FOOD SCI 432	Principles of Food Preservation	3
FOOD SCI 440	Principles of Food Engineering	3
FOOD SCI 514	Integrated Food Functionality	4
FOOD SCI 532	Integrated Food Manufacturing	4
Integrated Food Product Elective		
Select one of the following (2 credits minimum):		2
FOOD SCI 511	Chemistry and Technology of Dairy Products	
FOOD SCI/ AN SCI 515	Commercial Meat Processing	
FOOD SCI 535	Confectionery Science and Technology	
FOOD SCI 550 & FOOD SCI 551	Fermented Foods and Beverages and Food Fermentation Laboratory	
FOOD SCI 550 & FOOD SCI 552	Fermented Foods and Beverages and Food Fermentation Laboratory: The Science of Wine	
Science Elective		
Any 400-level or above course with Physical Science designation		3
Capstone		
FOOD SCI 602	Senior Project	2
FOOD SCI 603	Senior Seminar	1
Total Credits		85-92

[1] MATH 217 Calculus with Algebra and Trigonometry II requires MATH 171 Calculus with Algebra and Trigonometry I as a prerequisite.

BIOLOGY PATHS

BIOCHEM/BOTANY/MICROBIO/ZOOLOGY (PATH 1)

Code	Title	Credits
BIOLOGY/BOTANY/ ZOOLOGY 151	Introductory Biology	5
Select one of the following:		3-5
Any 400-level or above course with Biological Science designation		
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
MICROBIO 101	General Microbiology	3
or MICROBIO 303	Biology of Microorganisms	
MICROBIO 102	General Microbiology Laboratory	2
or MICROBIO 304	Biology of Microorganisms Laboratory	
BIOCHEM 501	Introduction to Biochemistry	3
Total Credits		16-18

BIOCORE (PATH 2)

Code	Title	Credits
BIOCORE 381	Evolution, Ecology, and Genetics	3
BIOCORE 383	Cellular Biology	3
BIOCORE 485	Principles of Physiology	3
BIOCORE 587	Biological Interactions	3
Select two of the following:		4
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 486	Principles of Physiology Laboratory	
Total Credits		16

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel

their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take FOOD SCI 681 Senior Honors Thesis and FOOD SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Clearly and effectively communicate, both verbally and written, to a diverse range of audiences including technical experts and a lay audience.
2. Apply quantitative problem solving and critical thinking skills in all aspects of food science.
3. Rigorously apply scientific principles and quantitative reasoning to solve food science problems (technical competence).
4. Demonstrate the ability to work both independently and in groups across a wide range of situations.

2 MATH 221 will satisfy the Quantitative Reasoning B requirement.

3 Electives can be found on the Requirements tab.

4 Students must select at least one course from FOOD SCI 511 Chemistry and Technology of Dairy Products (spring semester), FOOD SCI/AN SCI 515 Commercial Meat Processing (fall semester), FOOD SCI 535 Confectionery Science and Technology (fall semester), or FOOD SCI 550 Fermented Foods and Beverages (spring semester) and either FOOD SCI 551 Food Fermentation Laboratory (spring

semester) or FOOD SCI 552 Food Fermentation Laboratory: The Science of Wine (fall semester).

5 Students must complete two science elective courses: (1) at least 3 credits of any 400-level or above biological science course or BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology (2) at least 3 credits of any 400-level or above physical science course.

6 Combination of FOOD SCI 602 Senior Project and FOOD SCI 603 Senior Seminar satisfy Comm B requirement.

Note: Students must complete a minimum of 120 credits. This may require taking 16 credits per semester for at least four semesters.

ADVISING AND CAREERS

Students are assigned a faculty or staff advisor once they declare the major. Advisors are prepared to help with curricular planning and course access; major and degree questions; discussion of independent study and lab research experience; and navigating internship and scholarship opportunities. Declared food science majors must meet with their assigned advisor prior to registration. Additional information can be found on the department's website (https://foodsci.wisc.edu/advising.php).

Prospective food science majors should contact the Department of Food Science at foodsci@wisc.edu or 608-262-3046 for more information.

PEOPLE

PROFESSORS

Damodaran, Etzel, Hartel, Ingham, Lucey, Parkin, Rankin (chair)

ASSISTANT PROFESSORS

Bolling, Huynh, Ikeda, vanPijkeren

WISCONSIN EXPERIENCE

Food science students are strongly encouraged to develop leadership skills through a variety of extracurricular experiences.

FOOD SCIENCE CLUB

The Food Science Club has garnered Gold status from the Institute of Food Technologists Student Association for many years, placing highly every year in the Chapter of the Year competition. This acclaim comes from the wide array of activities offered by the club each year.

- *Product Development teams*. Join teams of students who develop new products, from idea conception to manufacture, for submission to national competitions. Our student teams place highly every year, in part because of the extremely supportive culture within the program.
- *Outreach*. Each semester, club members participate in outreach activities (WI Science Festival, Science Expeditions, local school activities, etc.) that promote food science to grade school and high school students. Activities such as Peeps Jousting, gummy bear production, chocolate rheology, flavor and sensory science, and many others, help demonstrate various science principles and generate interest in science among younger students.
- *Fundraising activities*. A Bucky Puck, an ice cream sandwich with Cookies and Cream ice cream, is the main fundraising product of the club. You can help make them and then help sell them to various events. Other fundraising activities include selling Babcock ice cream at Taste of Madison, silent auctions at professional meetings, and merchandise sales. Funds raised through these activities help support other club activities.
- *Food and Health Initiative*. Are you interested in developing healthy food alternatives? This program is for you then. Hear from a variety of experts on various topics of interest, including gluten-free pasta, sugar and health, GMO foods, and many others.
- *Food Systems Initiative*. Food science focuses on converting raw materials into edible food products. But there is so much more to the broader food landscape. This initiative focuses on the wider scope of food, investigating how food scientists can interact with food production and social issues related to food.
- *Social activities*. Each month, a fun social activity allows students to mingle in a friendly environment. For example, you can make (and eat) Thanksgiving dinner in November and enjoy chocolate-covered anything at the February social.
- *College Bowl*. Which state has the largest production of ginseng? Questions like this serve as the focal point of College Bowl, a food science trivia competition for both undergraduate and graduate students. The team competes first in the regional competition, and if successful then moves on to the national competition. Yes, Wisconsin is the largest producer of ginseng in the United States.
- *Company info sessions*. Each club meeting is sponsored by a food company that also gives a brief presentation about itself. Additional info sessions are sponsored on an individual basis.

SUMMER INTERNSHIPS

Spending a summer working and gaining experience at a food company is a great way to apply classroom learning to the real world. With over 40 companies visiting the program each year, numerous opportunities are available for any student interested in a summer internship. Students spend their summers at companies that include General Mills, Pepsico, Kraft-Heinz, Foremost Farms, Agropur, Schreiber Cheese, and many more. These internships are generally paid (sometimes quite well) and many have lodging subsidies.

RESEARCH/WORK EXPERIENCE

Another way to gain practical experience is to work in the building or on campus.

- *Research labs*. Food science faculty welcome undergraduates to gain experience conducting meaningful research in their labs.
- *Babcock Dairy Plant*. Want practical experience in a fully operational dairy plant? Consider signing up for part-time work in the Babcock Dairy Plant gaining experience in a wide range of practical jobs, from quality control to production.
- *Center for Dairy Research (CDR)*. Also within Babcock Hall is the internationally renowned Center for Dairy Research. Students can conduct research, work in the analytical labs or participate on the CDR Sensory Panel to gain invaluable practical experience.
- *Food Research Institute (FRI)*. Housed in the Microbial Sciences Building, FRI conducts industry oriented research on a wide range of food safety topics.
- *Meat Lab/Bucky's Butchery*. Interested in meat science? The meat processing facilities within the animal sciences department actually apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.

SCIENCE OF FERMENTED FOOD AND BEVERAGES, CERTIFICATE

The purpose of this certificate program is to provide undergraduates at UW–Madison with an opportunity to gain unique knowledge and skill sets specific to the fermented food and beverage industries. Students that successfully complete this program will graduate with a competitive edge and leadership potential specific to career opportunities in this unique and growing field.

HOW TO GET IN

This certificate is open to all degree-seeking undergraduate students. Students must be over the age of 21 by the time they take the lab requirements (FOOD SCI 551 Food Fermentation Laboratory or FOOD SCI 552 Food Fermentation Laboratory: The Science of Wine). For more information, or to declare the certificate, contact Monica Theis (mltheis@wisc.edu (http://guide.wisc.eduemail:mltheis@wisc.edu)). Students are strongly encouraged to declare the certificate early in their academic career to ensure timely completion of certificate requirements.

REQUIREMENTS

Code	Title	Credits
FOOD SCI 410	Food Chemistry	3
FOOD SCI 550	Fermented Foods and Beverages	2
FOOD SCI 551	Food Fermentation Laboratory	1
or FOOD SCI 552	Food Fermentation Laboratory: The Science of Wine	
MICROBIO/ FOOD SCI 325	Food Microbiology	3
MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms	3
MICROBIO 526	Physiology of Microorganisms	3
MARKETNG 300	Marketing Management	3
Total Credits		18

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Identify and describe how microbial and chemical features of ingredients and raw materials influence the quality and functionality of fermented foods and beverages.
2. Explain the compositional features of ingredients and raw materials specific to various fermented foods and beverages.
3. Identify and describe the operational units and transformational processes unique to the production of fermented foods and beverages.
4. Design and produce fermented foods and/or beverages that meet specified standards for styles or varieties.
5. Measure and interpret analytics to assess quality and correct defects.
6. Describe the concept of branding and its impact on marketing fermented foods and beverages.

ADVISING AND CAREERS

For more information or to declare the certificate in the science of fermented food and beverages, contact:

Monica Theis
mltheis@wisc.edu
608-263-2225
Babcock Hall Room 127A
1605 Linden Dr, Madison, WI 53706

PEOPLE

David Ryder, adjunct professor, Food Science
Monica Theis, senior lecturer, Food Science
Nick Smith, ecologist and instructor

WISCONSIN EXPERIENCE

The experiences offered through this certificate provide students with a number of opportunities to fulfill the Wisconsin Experience. In addition to 17 credits of rigorous course work with a focus on the science of fermentations, students work directly with local brewers, winemakers and bakers where they can explore innovations in product development, apply their knowledge and help local industries solve problems specific to their craft. Engagement allows for intellectual growth as well as an appreciation for the influence of local culture and values on what makes for "good" food and beverages.

Our industry and campus partners celebrate curiosity and exploration by allowing students to experiment with novel ingredients such as wild yeast, winter hardy grapes and local hops. Most exciting of all, students find that they can make a direct contribution to food and beverage products that are launched into the Wisconsin marketplace.

FOREST AND WILDLIFE ECOLOGY

The Department of Forest and Wildlife Ecology provides science-based teaching that prepares future natural resource professionals to sustainably manage and conserve forests and wildlife. Building on the rich traditions of Aldo Leopold (the Department's first chair), we offer students an interdisciplinary environment to learn about the natural world, apply science to management toward sustainable ecological systems, and understand complex human-environment relationships. We offer two undergraduate majors—forest science and wildlife ecology—that provide opportunities for employment in the public, private, and non-governmental sectors. Students can also gain a strong foundation for graduate training in forestry, wildlife, ecology, and related fields. The forest science program is accredited by the Society of American Foresters. The wildlife ecology major provides a path to becoming a certified wildlife biologist. Both degrees provide a mix of field, lab, and classroom experiences.

The department also offers graduate programs at the M.S. and Ph.D. levels. See the Graduate Guide (http://guide.wisc.edu/graduate) for additional information.

FOREST SCIENCE, B.S.

Forest ecosystems cover one third of the world's land area and nearly half of Wisconsin. They provide a range of benefits to society including wood and fiber, wildlife habitat, biological diversity, clean water, carbon storage, recreation, beauty, and cultural values. The Department of Forest and Wildlife Ecology trains foresters to sustainably manage forests toward sustainable ecological, social, and economic outcomes. Forest science students also learn how to respond to forest disturbances from insects, diseases, fire, and other changes. Beyond a core of basic science and forestry coursework, students have flexibility to customize their learning experience within one of three tracks: forest conservation, forests and the environment, and forest management. All three tracks meet accreditation standards of the Society of American Foresters, a key credential that employers seek. Students are also well positioned to pursue graduate training in forestry, ecology, remote-sensing, natural resource policy, and related fields.

Students learn through a mix of classroom, laboratory, and field instruction that emphasizes independent thinking and problem-solving. Students make frequent visits to forests to develop and hone their skills, essential for future job opportunities. Students also engage professional and student-led trainings and networking that further build skills. Graduates go on to jobs in private, public, and non-governmental sectors or pursue graduate degrees.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
Select one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	
Chemistry		
Select one of the following:		4-5
CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World	
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1 (recommended introduction to biology sequence):		
BOTANY/ BIOLOGY 130 & ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	General Botany and Animal Biology and Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
Option 3:		
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
Economics		
A A E 215	Introduction to Agricultural and Applied Economics [1]	4
or ECON 101	Principles of Microeconomics	
Conservation		
Select one of the following: [2]		2-4
ENVIR ST/ LAND ARC 361	Wetlands Ecology	
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species (recommended) [3]	
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	

F&W ECOL/ BOTANY/ ENVIR ST/ ZOOLOGY 651	Conservation Biology (recommended)	
GEOG/ ENVIR ST 339	Environmental Conservation	
Core		
Grade of C or better required in each core course		
SOIL SCI 301	General Soil Science	4
F&W ECOL 300	Forest Biometry	4
GEOG/CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems	3-4
or F&W ECOL/ ENVIR ST/G L E/ GEOG/GEOSCI/ LAND ARC 371	Introduction to Environmental Remote Sensing	
F&W ECOL/ HORT/LAND ARC/ PL PATH 309	Diseases of Trees and Shrubs	3
F&W ECOL 399	Coordinative Internship/Cooperative Education	1-8
BOTANY/F&W ECOL 402	Dendrology	2
F&W ECOL 410 & F&W ECOL 411	Principles of Silviculture and Practices of Silviculture	4
F&W ECOL 415	Tree Physiology	3
F&W ECOL/ ENTOM 500	Insects in Forest Ecosystem Function and Management	2
F&W ECOL 501	Forest Fire Behavior and Management	1
ENVIR ST/F&W ECOL 515	Natural Resources Policy	3
F&W ECOL 550 & F&W ECOL 551	Forest Ecology and Forest Ecology Lab	4
A A E/ENVIR ST/F&W ECOL 652	Decision Methods for Natural Resource Managers	4
F&W ECOL 658	Forest Resources Practicum	3
Electives		
Select one of the following tracks:		12
Forest Management Track		
Forest Conservation Track		
Forests & Environment Track		
Capstone		
Grade of C or better required in Capstone		
F&W ECOL 590	Integrated Resource Management	3
Total Credits		84-96

1 A A E 215 only carries QR-B credit if taken fall 2011 or later.

2 These courses may double count as track electives.

3 F&W ECOL/ENVIR ST/ZOOLOGY 360 Extinction of Species may also fulfill CALS International Studies requirement.

MINIMUM GRADE REQUIREMENT

Students who declare the major in fall 2012 or later will be required to receive a grade of C or higher on all of the Forest Science Core courses and the Capstone. Students who receive a grade of D or below will be required to retake the course for graduation.

TRACKS

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take F&W ECOL 681 Senior Honors Thesis and F&W ECOL 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Ecology) Understanding of taxonomy and ability to identify forest and other tree species, their distribution, and associated vegetation and wildlife.
2. (Ecology) Understanding of soil properties and processes, hydrology, water quality, and watershed functions.
3. (Ecology) Understanding of ecological concepts and principles including the structure and function of ecosystems, plant and animal communities, competition, diversity, population dynamics, succession, disturbance, and nutrient cycling.
4. (Ecology) Ability to make ecosystem, forest, and stand assessments.
5. (Ecology) Understanding of tree physiology and the effects of climate, fire, pollutants, moisture, nutrients, genetics, insects and diseases on tree and forest health and productivity.
6. (Forest Resources Measurement and Management) Ability to identify and measure land areas and conduct spatial analysis.
7. (Forest Resources Measurement and Management) Ability to design and implement comprehensive inventories that meet specific objectives using appropriate sampling methods and units of measurement.
8. (Forest Resources Measurement and Management) Ability to analyze inventory data and project future forest, stand, and tree conditions.
9. (Forest Resources Measurement and Management) Ability to develop and apply silvicultural prescriptions appropriate to management objectives, including methods of establishing and influencing the composition, growth, and quality of forests, and understand the impacts of those prescriptions.
10. (Forest Resources Measurement and Management) Ability to analyze the economic, environmental, and social consequences of forest resource management strategies and decisions.
11. (Forest Resources Measurement and Management) Ability to develop management plans with specific multiple objectives and constraints.
12. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market forces, processing systems, transportation and harvesting activities that translate human

demands for timber-based and other consumable forest products into the availability of those products.

13. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market, and non-market forces that avail humans the opportunities to enjoy non-consumptive products and services of forests.
14. (Forest Resources Measurement and Management) Understanding of the administration, ownership, and organization of forest management enterprises.
15. (Forest Resource Policy, Economics, and Administration) Understanding of forest policy and the processes by which it is developed.
16. (Forest Resource Policy, Economics, and Administration) Understanding of how federal, state, and local laws and regulations govern the practice of forestry.
17. (Forest Resource Policy, Economics, and Administration) Ability to understand the integration of technical, financial, human resources, and legal aspects of public and private enterprises.

Track Course	3	Electives	6
Electives (to reach ~15 credits)	3		
	14-16		16

Total Credits 30-32

1 When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)

2 BOTANY/BIOLOGY 130 + ZOOLOGY/BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 are strongly recommended to satisfy the introductory biology requirement for forest science, but students may use ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102.

3 F&W ECOL/ENVIR ST/G L E/GEOG/GEOSCI/LAND ARC 371 is available in fall semesters only.

4 Summer (following second or third year): F&W ECOL 658 (3 cr., even-numbered summers) and F&W ECOL 399 (1 cr.)—4 cr. total.

Students may reduce the number of required courses via: testing out of Comm-A; using ZOOLOGY/BIOLOGY/BOTANY 152 to satisfy Comm-B; testing out of Quantitative Reasoning, Part A; earning AP/IB credits; and/or using F&W ECOL/ENVIR ST/ZOOLOGY 360 to satisfy International Studies requirement.

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN FOREST SCIENCE

All undergraduate students are assigned to an advisor when they declare the major. If you were not assigned an advisor, do not know who your advisor is, would like to talk to someone about switching advisors, or

if your advisor is not available, please contact our student services coordinator, Todd Courtenay (**todd.courtenay@wisc.edu**).

Undergraduates in forest science are required to meet with their advisor before they can enroll for the upcoming term. Please remember to bring a DARS report with you to any advising appointment. You can request a DARS through your student center in MyUW (http://my.wisc.edu). Although drop-ins and emergencies may be accommodated by someone in the department, the student is best served by making an appointment with the assigned advisor.

For more information about the forest science B.S. or the department in general, please contact the student services coordinator, Todd Courtenay (**todd.courtenay@wisc.edu**).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to forest science and wildlife ecology students, please visit our Internship & Job Resources page (https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources). For more information on other academic, co-curricular, financial aid, and career opportunities and services available to forest science B.S. students, please visit the CALS Career Services page (https://cals.wisc.edu/academics/undergraduate-students/career-services). Students in the major are welcome to make an individual appointment with Todd Courtenay (**todd.courtenay@wisc.edu**) to discuss a number of career-related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

The federal Bureau of Labor Statistics updated its Career Outlook: Careers in Forestry (http://www.bls.gov/careeroutlook/2016/article/forestry-careers.htm) page in August 2016 and it gives a great overview of the types of jobs related to forestry. This website is an excellent way to learn more about careers in forestry, upcoming trends, and related careers.

WISCONSIN EXPERIENCE

FORESTRY FIELD CAMP AT THE KEMP NATURAL RESOURCES STATION

F&W ECOL 658 Forest Resources Practicum is an intensive, three-week field course conducted in even-numbered years at the Kemp Natural Resources Station (http://www.kemp.wisc.edu) in Woodruff, Wisconsin. Affectionately known as Forestry Camp, F&W ECOL 658 Forest Resources Practicum introduces students to the complexities of forest ecosystems. Through a series of integrated exercises, students learn first hand about forest ecosystem structure, function, processes, and services. Along the way students develop the knowledge necessary to conduct a comprehensive forest resource assessment. Subject areas include: basic field skills, plant identification, GPS & GIS, timber cruising, forest soils, wildlife identification and survey methods, forest ecology, and forest habitat classification. Forestry Camp also provides students with opportunities to work closely with faculty and "real world" natural resource professionals in a beautiful north woods setting.

INTERNSHIPS

All forest science students are required to complete either an internship or professional work experience for their degree. Students are encouraged to talk to their advisor about internship possibilities and departmental internship policies.In order to receive credit for an internship for the forest science major, students must find an internship, get it approved by their advisor through the agreement form (http://forestandwildlifeecology.triforce.cals.wisc.edu/wp-content/uploads/sites/111/2017/07/forest_internship_agreement_form_1182.docx), and enroll in F&W ECOL 675 Professional Development in Forest & Wildlife Ecology in the following fall semester. These steps need to be completed by May 15. Students who have questions about the internship can also talk to Todd Courtenay, the student services coordinator.

INDEPENDENT STUDY CREDITS

Any student completing either F&W ECOL 299 Independent Study or F&W ECOL 699 Special Problems credits is required to complete the Forest & Wildlife Ecology Independent Study Agreement form (http://forestandwildlifeecology.triforce.cals.wisc.edu/wp-content/uploads/sites/111/2017/07/IS_agreement_form_fwe_1176.docx) with the independent study instructor. A copy of this form should be kept by both the student and the instructor.

FORESTRY CLUB

Forest science undergraduates have an active student organization called the Forestry Club. For more information on the club and their activities, please see their website (http://labs.russell.wisc.edu/forestryclub) or their Facebook Page (http://go.wisc.edu/pq634x).

ACCREDITATION

Accreditation

Society of American Foresters (https://www.eforester.org)

Accreditation status: Accredited. Next accreditation review: 2027.

WILDLIFE ECOLOGY, B.S.

Wildlife ecologists apply science to manage and conserve wildlife populations and their habitats. The Department of Forest and Wildlife Ecology trains wildlife ecologists and managers to meet the complex needs of wildlife in a human-dominated world. Students receive training in species ecology, physiology and habitat management, techniques of monitoring species, and conservation, through a curriculum solidly grounded in the natural sciences. Beyond a core of basic science and wildlife coursework, students have flexibility to customize their learning experience within one of two tracks: natural sciences and natural resources. The natural sciences track includes coursework that will qualify a student for certification as a wildlife biologist by The Wildlife Society.

Students learn through a mix of classroom, laboratory, and field instruction that emphasize independent thinking and problem-solving. Students make frequent visits to the field to develop and hone their skills, essential for future jobs or graduate work. There is intense competition for career openings in the wildlife field. Most opportunities are with state and federal agencies, but options also exist with private conservation groups and educational institutions. To be most competitive for limited job opportunities, students should pursue a master's degree. The Graduate Guide (http://guide.wisc.edu/graduate) describes the department's graduate programs.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1

International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I	
Select one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
STAT/B M I 541	Introduction to Biostatistics	
STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	
Chemistry		
Select one of the following:		4-5
CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World (only for Natural Resources track students)	
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1 (recommended):		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
Option 2:		
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany

F&W ECOL 655	Animal Population Dynamics	3
Plant Taxonomy		
BOTANY 400	Plant Systematics	4
or BOTANY 401	Vascular Flora of Wisconsin	
Anatomy/Physiology		
Select one of the following:		3-5
F&W ECOL 401	Physiological Animal Ecology (recommended)	
ANAT&PHY 335	Physiology	
ZOOLOGY 430	Comparative Anatomy of Vertebrates	
ZOOLOGY 611	Comparative and Evolutionary Physiology	
Evolution/Genetics		
Select one of the following:		3-5
ZOOLOGY/ ANTHRO/ BOTANY 410	Evolutionary Biology	
GENETICS 466	Principles of Genetics	
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory [1]	
Wildlife Biology		
Select one of the following:		5-6
ZOOLOGY/ AN SCI/ F&W ECOL 520 & ZOOLOGY/ AN SCI/ F&W ECOL 521	Ornithology and Birds of Southern Wisconsin [2]	
ZOOLOGY/ ENVIR ST 510 & ZOOLOGY/ ENVIR ST 511	Ecology of Fishes and Ecology of Fishes Lab	
Breadth		
Select 3 credits from breadth courses (below)		3
Track Courses		
Select one of the following:		14-17
Natural Sciences Track		
Natural Resources Track		
Capstone		
Select one of the following (or see advisor):		3

F&W ECOL 577	Complexity and Conservation of White-tailed Deer (formerly 375, Complexity & Conservation of White-tailed Deer)	
F&W ECOL 599	Wildlife Research Capstone	
Total Credits		74-84

[1] Only allowed for students who completed the rest of the Biocore curriculum listed under Biology.

[2] Required for TWS certification

BREADTH COURSES

Code	Title	Credits
AGRONOMY/ BOTANY/ SOIL SCI 370	Grassland Ecology	3
ENVIR ST/ LAND ARC 361	Wetlands Ecology	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain basic principles in biological sciences and major concepts in wildlife ecology including, population ecology, organismal biology, plant ecology/taxonomy, and genetics/evolution.
2. Explain and discuss principles of wildlife management including natural resource legislation, policy, and applications.
3. Explain and apply the scientific methods including designing and conducting experiments and testing hypotheses.
4. Explain and demonstrate techniques for collection of data in laboratory and field settings, keep accurate records, and analyze data to address hypotheses.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form. Provide opportunity to develop these communication skills.

	10-18		12-18

Total Credits 22-36

1. Gen#Ed requirements include communications, ethnic studies, humanities, social science, or international studies. See Requirements tab for more details.
2. BOTANY 400 offered in Fall
3. Or fall
4. Or other physiology
5. Or F&W ECOL/BOTANY/ENVIR ST/ZOOLOGY 651 in spring; F&W ECOL/ENVIR ST/ZOOLOGY 360 counts for the CALS International Studies requirement, but F&W ECOL/BOTANY/ ENVIR ST/ZOOLOGY 651 does not
6. F&W ECOL 577 offered in Fall

   Possible places where students may cut down on courses: COMM#A placement test, COMM#B taken as ZOOLOGY/BIOLOGY/ BOTANY 152, QR#A placement test, AP/IB credits (biology, social sciences, humanities, language, chemistry, physics, math, statistics), Natural Resources Management electives course for social science course, F&W ECOL/ENVIR ST/ZOOLOGY 360 for international studies
   - Students should take elective courses in place of the Gen#Ed courses once they have completed their Gen#Ed requirements

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN WILDLIFE ECOLOGY

All undergraduate students are assigned to an advisor when they declare the major. If you were not assigned an advisor, do not know who your advisor is, would like to talk to someone about switching advisors, or if your advisor is not available, please contact our student services coordinator, Todd Courtenay (**todd.courtenay@wisc.edu**).

Undergraduates in wildlife ecology are required to meet with their advisor before they can enroll for the upcoming term. Please remember to bring a DARS report with you to any advising appointment. You can request a DARS through your student center in MyUW (http://my.wisc.edu). Although drop-ins and emergencies can be accommodated by someone in the department, the student is best served if they make an appointment with their assigned advisor.

For more information about the wildlife ecology B.S. or the department in general, please contact the student services coordinator, Todd Courtenay (**todd.courtenay@wisc.edu**).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to forest and wildlife ecology students please visit our Internship & Job Resources (https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to forest & wildlife ecology students, please visit the CALS Career Services page (https://cals.wisc.edu/academics/undergraduate-students/career-services). Students in the major are welcome to make an individual appointment with Todd Courtenay (**todd.courtenay@wisc.edu**) to discuss a number of career-related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

WILDLIFE ECOLOGY SUMMER FIELD CAMP AT KEMP NATURAL RESOURCES STATION

Every other summer, wildlife ecology students have the option of participating in the Wildlife Ecology Summer Field Camp at Kemp Natural Resources Station (http://www.kemp.wisc.edu) in northern Wisconsin as F&W ECOL 424 Wildlife Ecology Summer Field Practicum. The two-week field class emphasizes research and habitat management techniques through individual and group field work, tours, demonstrations, and lectures. Transportation and lodging are provided to the participants.

INDEPENDENT STUDY CREDITS

Any student completing either F&W ECOL 299 Independent Study or F&W ECOL 699 Special Problems credits is required to complete the Forest & Wildlife Ecology Independent Study Agreement form (http://forestandwildlifeecology.triforce.cals.wisc.edu/wp-content/uploads/sites/111/2017/07/IS_agreement_form_fwe_1176.docx) with the independent study instructor. A copy of this form should be kept by both the student and the instructor. The only exception is for students using the independent study credits for their capstone; those students should use the capstone agreement form.

INDEPENDENT STUDY CAPSTONE

The majority of wildlife ecology majors complete one of the two capstone courses (F&W ECOL 577 Complexity and Conservation of White-tailed Deer or F&W ECOL 599 Wildlife Research Capstone), but students also have the option of completing an independent study capstone, typically F&W ECOL 699 Special Problems. Students who wish to pursue this option will need to submit the independent study capstone form (http://forestandwildlifeecology.triforce.cals.wisc.edu/wp-content/uploads/sites/111/2017/05/capstone_agreement_form_we_1176.doc) to their faculty advisor in order to receive permission to use the independent study option towards the capstone requirement for graduation.

INTERNSHIPS

Even though it is not required for graduation, wildlife ecology students often elect to do a summer internship to gain additional skills.

Students are encouraged to talk to their advisor about internship possibilities, departmental internship policies and how to receive credit (F&W ECOL 399 Coordinative Internship/Cooperative Education) for an internship. The Departmentof Forest and Wildlife Ecology strongly encourages all students pursuing an internship to use the following two forms:

- F&W ECOL 399 Internship agreement form (http://forestandwildlifeecology.triforce.cals.wisc.edu/wp-content/uploads/sites/111/2017/05/399_agreement_form_1176.docx)
- F&W ECOL 399 Internship evaluation form (http://forestandwildlifeecology.triforce.cals.wisc.edu/wp-content/uploads/sites/111/2017/05/internship_evaluation_form_1176.docx)

Students should note that any internship done for credit will require a faculty sponsor to enroll in a section of F&W ECOL 399 Coordinative Internship/Cooperative Education.

THE WILDLIFE SOCIETY

There is a UW–Madison chapter of the Wildlife Society. For more information on the society please visit the Wildlife Society University of Wisconsin–Madison Student Chapter website (http://labs.russell.wisc.edu/tws) or its Facebook Page (http://go.wisc.edu/toat54).

GENETICS

This department offers an undergraduate major under the bachelor of science degree program. The basic requirements of this curriculum include: two years of chemistry, one year of physics, one year of general biology, one semester of calculus, and biostatistics. The major requirements include: one year of general genetics, introductory biochemistry, laboratory experience, and 12 credits of genetics and genetics-related courses chosen from an approved list.

Genetics is a bachelor's program for students seeking to understand how genes shape life, from fundamental cellular functions to population dynamics, and for students preparing to apply genetic and genomic concepts in such areas as medicine, biotechnology, biomedical research, agriculture, journalism, and public policy.

Advances in genome sequencing, bioinformatics, and our ability to manipulate the DNA of many organisms, including humans, have brought genetics to the forefront of many issues facing our society. These advances drive the growing need for health care providers, scientists and other professionals with a strong foundation in genetic and genomic analysis. Through coursework and diverse research opportunities, genetics majors gain broad insight into inheritance, gene function, genome organization, evolution, cutting-edge genetic technologies and therapies, and more.

A B.S. degree with a major in genetics positions students for many jobs in the biotechnology industry. Genetics majors are well prepared to pursue research-focused Ph.D. programs that provide further training for careers in biomedical and agricultural research. Genetics majors are highly competitive for admission to top medical schools, where there is a growing focus on personalized medicine, and genetic counseling programs.

GENETICS AND GENOMICS, B.S.

Genetics and genomics is a bachelor's program for students seeking to understand how genes shape life, from fundamental cellular functions to population dynamics, and for students preparing to apply genetic and genomic concepts in such areas as medicine, biotechnology, biomedical research, agriculture, journalism, and public policy.

Advances in genome sequencing, bioinformatics, and our ability to manipulate the DNA of many organisms, including humans, have brought genetics to the forefront of many issues facing our society. These advances drive the growing need for health care providers, scientists and other professionals with a strong foundation in genetic and genomic analysis. Through coursework and diverse research opportunities, genetics majors gain broad insight into inheritance, gene function, genome organization, evolution, cutting-edge genetic technologies and therapies, and more.

A B.S. degree with a major in genetics and genomics positions students for many jobs in the biotechnology industry. Genetics and genomics majors are well prepared to pursue research-focused Ph.D. programs that provide further training for careers in biomedical and agricultural research. Genetics and genomics majors are highly competitive for admission to top medical schools, where there is a growing focus on personalized medicine, and genetic counseling programs.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option

to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following:		5-10
MATH 221	Calculus and Analytic Geometry 1	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
STAT 371	Introductory Applied Statistics for the Life Sciences	3
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Physics		
Select one of the following:		10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics (recommended)	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics (recommended)	
Biology		
Select one of the following options:		10
Option 1:		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)	

Option 2:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	
Option 3:		
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	
Select two of the following labs:		
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 486	Principles of Physiology Laboratory	
Core Biology Requirements		
Select one of the following options:		6
Option 1:		
GENETICS 467 & GENETICS 468	General Genetics 1 and General Genetics 2 (preferred)	
Option 2: [1]		
GENETICS 466	Principles of Genetics (consult advisor (467 & 468 preferred))	
additional 3 credit subset 1 course (see course list below)		
BIOCHEM 501	Introduction to Biochemistry [2]	3
or BIOCHEM 507	General Biochemistry I	
Select 2 credits from the following:		2
GENETICS 545	Genetics Laboratory	
GENETICS 299	Independent Study [3]	
GENETICS 699	Special Problems [3]	
GENETICS 681	Senior Honors Thesis	
GENETICS 682	Senior Honors Thesis	
GENETICS 399	Coordinative Internship/Cooperative Education	
Electives		
Select 12 credits with 6 credits minimum from subset 1 (see course list below)		12
Capstone		
Select one of the following:		3-9
Option 1:		
GENETICS 527	Developmental Genetics for Conservation and Regeneration (offered in fall semester) [4]	
Option 2:		
GENETICS 566	Advanced Genetics (offered in spring semester)	
Option 3:		
GENETICS 564	Genomics and Proteomics (offered in spring semester) [4]	
Option 4 (must be taken concurrently):		
GENETICS 699	Special Problems (offered in fall semester)	
GENETICS 567	Companion Research Seminar (offered in fall semester)	
Option 5 (must be taken concurrently):		
GENETICS 681	Senior Honors Thesis	
GENETICS 682	Senior Honors Thesis	
GENETICS 567	Companion Research Seminar (offered in fall semester)	
Total Credits		67-82

1 Subset 1 course will not count toward 12 subset credits.

2 If BIOCHEM 507 is taken, it must be taken as a part of BIOCHEM 507 General Biochemistry I & BIOCHEM 508 General Biochemistry II, which counts in Subset 2 of electives.

3 Consult with your advisor if genetics-related research will be performed in a department other than Genetics.

4 May count for Subset 1 or Capstone.

SUBSET COURSES

SUBSET 1

Code	Title	Credits
GENETICS 520	Neurogenetics	2
GENETICS 525	Epigenetics	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
GENETICS 528	Banking Animal Biodiversity: International Field Study in Costa Rica	1
GENETICS 546		3
GENETICS 548	The Genomic Revolution	3
GENETICS/HORT 550	Molecular Approaches for Potential Crop Improvement	3
GENETICS/ MD GENET/ ZOOLOGY 562	Human Cytogenetics	2
GENETICS 564	Genomics and Proteomics	3
GENETICS/ MD GENET 565	Human Genetics	3
GENETICS/ MICROBIO 607	Advanced Microbial Genetics	3
GENETICS/ BIOCHEM/ MICROBIO 612	Prokaryotic Molecular Biology	3
GENETICS/ BIOCHEM/ MD GENET 620	Eukaryotic Molecular Biology	3
GENETICS/ CHEM 626	Genomic Science	2
GENETICS 627	Animal Developmental Genetics	3
GENETICS 631	Plant Genetics	2
GENETICS 633	Population Genetics	3
GENETICS/BOTANY/ M M & I/MICROBIO/ PL PATH 655	Biology and Genetics of Fungi	3
GENETICS/ MD GENET 662	Cancer Genetics	3
GENETICS/ MD GENET 677	Advanced Topics in Genetics [1]	1-3

MICROBIO 470	Microbial Genetics & Molecular Machines	3
AGRONOMY/ BOTANY/HORT 339	Plant Biotechnology: Principles and Techniques I	4
BIOCHEM 550	Topics in Medical Biochemistry	2

SUBSET 2

Code	Title	Credits
AGRONOMY/ HORT 338	Plant Breeding and Biotechnology	3
AGRONOMY/ BOTANY/HORT 340	Plant Cell Culture and Genetic Engineering	4
AGRONOMY/HORT 501	Principles of Plant Breeding	3
AGRONOMY/HORT 502	Techniques of Plant Breeding	1
BIOCHEM 508	General Biochemistry II	3-4
BIOCORE 485	Principles of Physiology	3
BIOCORE 587	Biological Interactions	3
B M I/COMP SCI 576	Introduction to Bioinformatics	3
BMOLCHEM 504	Human Biochemistry Laboratory	3
BOTANY 563	Phylogenetic Analysis of Molecular Data	3
BOTANY/ZOOLOGY 410	Evolutionary Biology	3
DY SCI/AN SCI 361	Introduction to Animal and Veterinary Genetics	2
DY SCI/AN SCI 362	Veterinary Genetics	2
DY SCI/AN SCI 363	Principles of Animal Breeding	2
GENETICS/ BIOLOGY 522	Evolution Seminar Series-Undergraduate	1
HORT/PATH-BIO 500	Molecular Biology Techniques	3
MICROBIO 303	Biology of Microorganisms	3
MICROBIO 304	Biology of Microorganisms Laboratory	2
MICROBIO/M M & I/ PATH-BIO 528	Immunology	3
MICROBIO/ ONCOLOGY 545	Topics in Biotechnology	1
MICROBIO/ PL PATH 622	Plant-Bacterial Interactions	2-3
MICROBIO 632	Industrial Microbiology/ Biotechnology	2
MICROBIO/ ONCOLOGY/ PL PATH 640	General Virology-Multiplication of Viruses	3
M M & I 341	Immunology	3
M M & I 460	Techniques in DNA Science for Microbiologists	3
PL PATH/BOTANY/ ENTOM 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	3
ZOOLOGY/ENVIR ST/ F&W ECOL 360	Extinction of Species	3
ZOOLOGY 425	Behavioral Ecology	3
ZOOLOGY 470	Introduction to Animal Development	3
ZOOLOGY 555	Laboratory in Developmental Biology	3
ZOOLOGY 570	Cell Biology	3
A biological science course as approved by advisor (must have significant genetics component)		

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate an understanding of genetic principles at the level of molecules, cells, systems, organisms, populations and ecosystems.
2. Use quantitative approaches to evaluate experimental design, critically interpret, and analyze data sets from primary research papers.
3. Integrate genetic data and apply the scientific method to formulate research questions.
4. Communicate genetic concepts to multiple audiences with written, oral and visual presentations.
5. Understand mechanisms of segregation and expression of genetic material during development and homeostasis.
6. Apply primary genetic approaches used to study biological processes, including the use of model organisms.
7. Describe how environmental influences may modify the inheritance and expression of the genetic material.
8. Apply the use of quantitative methods to implement genetic analysis, including the linkage of gene variants with traits.
9. Appreciate how the fields of genomics, proteomics and other data-driven approaches facilitate research and clinical assessment.
10. Understand the contribution of genetics analysis to elucidating population history and evolution.
11. Address the connection between genetics and trends in clinical practice, such as personalized medicine, cloning and regenerative biology.
12. Understand evolutionary processes, with current variation in human traits as its natural outcome.

13. Appreciate the contributions of genetic methods to sustainability, including food production, bio-energy generation and the preservation of ecosystems and biodiversity.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE GENETICS AND GENOMICS FOUR YEAR PLAN

Freshman

Fall	Credits	Spring	Credits
CHEM 103 or 109	4-5	CHEM 104 (or elective course)	5

Electives (Humanities, Social Sciences, Ethnic Studies)	3	Genetics Capstone	3
Electives	6	Electives	6
	17-18		14-15

Total Credits 31-33

1 Instead of BIOLOGY/BOTANY/ZOOLOGY 151 Introductory Biology, students can take either (BIOCORE 381 Evolution, Ecology, and Genetics & BIOCORE 382 Evolution, Ecology, and Genetics Laboratory) or (ZOOLOGY/BIOLOGY 101 Animal Biology & ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory).

2 Instead of BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology, students can take either (BIOCORE 383 Cellular Biology & BIOCORE 384 Cellular Biology Laboratory) or BOTANY/BIOLOGY 130 General Botany.

3 Physics could be taken in year 2 (consult your advisor).

4 If in CALS Honors in Research.

Notes:

- 120 total credits required for bachelor's degree—aim for 15 credits per semester.
- Students who have not maintained a GPA of at least 2.5 by the end of their first two years, or transfer students by the end of their first year in residence, need to evaluate their major and career options with an advisor.
- Freshmen are recommended to take GENETICS 155 Freshman Seminar in Genetics , 1-credit freshman seminar course offered in the fall to fulfill the first year seminar requirement.
- Study Abroad is an enriching experience. Check with your advisor on how you can fulfill your curriculum and study abroad.
- UGA (Undergraduate Genetics Association): check out the club's website: facebook.com/groups/UGA.UWMadison (https://www.facebook.com/groups/UGA.UWMadison)

ADVISING AND CAREERS

UNDERGRADUATE ADVISORS

Tilmann, Kit; Vermillion Kalmon, Katie; Loewen, Carin; Foley, Lauren

Students should make advising appointments through the Starfish App on MyUW.

CAREERS

The biotechnology industry has exploded within the last decade, providing many diverse career opportunities for our graduates. A strong background in genetics will prepare you for careers in research technical support, technical writing, quality control, assay development, technical services, and sales or marketing. Entry level job titles: Research Laboratory Technician, Assistant Scientist, Clinical Research Associate, Agricultural Consultant, Science Writer

Many of our graduates continue their education by pursuing an advanced degree. Our students are competitive for admission to medical schools, veterinary schools, and graduate schools throughout the country. Students may elect a Ph.D. in genetics to prepare them for careers in research, academia, and industry. Others may elect an M.S. program for a career in genetics counseling.

WISCONSIN EXPERIENCE

Students are highly encouraged to apply what they are learning in the classroom to out-of-classroom experiences, connect with other students in genetics and other biological science majors, and to build relationships with faculty and staff.

- A minimum of one semester of mentored research is required, and most students elect to participate in more. The Genetics website (https://genetics.wisc.edu) and undergraduate advisors can help students find these experiences. Students conduct research experiences for course credit or pay, depending on the lab. Many students present their work during lab meetings, professional conferences, and campus events.
- The Undergraduate Genetics Association (UGA) (https://www.facebook.com/groups/UGA.UWMadison) is the pre-professional student organization for majors in genetics or students interested in genetics. They provide professional development opportunities, networking, information about current genetic research, how to get involved in research or internships, and career and job information.
- Students are also involved in pre-health organizations, volunteer and shadowing opportunities, publishing in an undergraduate science journal, biotechnology and agricultural internships, and other related experiences on and off campus.

HORTICULTURE

The Department of Horticulture at the University of Wisconsin–Madison is one of the four original departments of the College of Agricultural and Life Sciences and was founded in 1889. The department provides programs that are focused on fundamental studies of plant biology, crop production, and utilization of horticultural crops. It also seeks to provide educational opportunities for the pursuit of careers in horticulture, strengthen the competitive position of Wisconsin's horticulture industry, and increase the use of plants for environmental improvement and as a source of personal enrichment. The work of department faculty, staff, and students has made substantial impacts in the state and nation for over 125 years and continues to do so.

The department prides itself on cutting edge research focusing on horticultural plants, solving problems for our horticultural industry partners and farmers, helping students gain key experiences in research and outreach during their degree programs, and serving both the State of Wisconsin and the broader scientific community through the generation of new knowledge, techniques, and discoveries that can benefit society.

The department maintains a vibrant undergraduate major. Innovative ideas have been generated from among our undergraduates, including the Campus Food Shed (https://campusfoodshed.wordpress.com), a program to redistribute unused produce from nearby farms to the campus community free of charge. Instruction is offered in all of the primary areas of horticulture and additional coursework is available in a number of subjects including molecular biology and bioinformatics. Approximately $25,000 in scholarship funds are available annually to undergraduate students in the department each year. The department's graduate program offers both M.S. and Ph.D. degrees in a variety of specialties. Many graduate students advised by horticulture faculty also pursue graduate degrees in programs such as plant breeding and plant genetics, cell and molecular biology, and agroecology. The department has also recently created a new M.S. program that has an emphasis in organic and sustainable production. The department offers some unique international opportunities in Costa Rica and other Central American countries that focus on tropical horticulture.

The Department of Horticulture is home to a number of successful outreach programs that serve the citizens, public sector, and businesses of the State of Wisconsin. These include the Nutrient and Pest Management Program, the Integrated Pest and Crop Management Program, the Crop Diagnostic Training program, the IR-4 program, the Master Gardener Program, and the Allen Centennial Gardens. In addition to these activities, faculty and staff are active in field days, Extension programs, courses, seminars, and webinars, and author newsletters and other media that are distributed statewide.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

The Department of Horticulture offers several departmental scholarships (https://horticulture.wisc.edu/academics/undergraduate-program/

scholarships-and-awards) that students can apply for through the CALS Scholarship Application (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education). The application opens at the beginning of November and remains open until the beginning of February each academic year. Students only need to fill out one single application to be considered for all CALS scholarships.

FACILITIES

Several important supporting facilities are associated with the Department of Horticulture, including:

- Allen Centennial Garden (https://allencentennialgarden.org)
- D.C. Smith Greenhouse (http://dcsmithgreenhouse.cals.wisc.edu)
- Arlington Horticulture Farms (http://arlington.ars.wisc.edu)
- U.S. Potato Genebank (https://www.ars-grin.gov/nr6)
- O.J. Noer Turfgrass Center (http://ojnoer.ars.wisc.edu)
- Longenecker Gardens (https://arboretum.wisc.edu)

HORTICULTURE, B.S.

Horticulturists work to enrich our lives by integrating and applying plant science, environmental science, molecular biology, biotechnology, genetics, physiology, and management. Specifically, horticultural science deals with the development, production, growth, distribution, and use of fruits, vegetables, greenhouse crops, ornamentals, turf, and specialty plant crops (used for flavoring and medicine). Horticultural science is one of the most diverse biological sciences one can study at a university. Not only are the biology and genetics of crop plants interesting, but the application of this knowledge is equally important in a myriad of situations. Undergraduate horticulture majors will obtain specialized training in greenhouse/field management and the production and use of fruits, vegetables, nuts, herbaceous/woody ornamentals, and turfgrass through the bachelor of science degree program.

In addition to obtaining a job with an undergraduate degree in horticulture, the major provides an excellent background for graduate study in the field of plant sciences. Areas of graduate study include plant breeding and plant genetics, horticulture, agronomy, plant pathology, or other related fields such as biology, environmental science, natural resource management, agroecology, and genetics.

Students with either undergraduate or graduate degrees in horticulture have a variety of career opportunities. Recent studies show that there are more jobs in agriculture in the U.S. than there are students graduating with agricultural bachelor of science degrees to fill them. Estimates in 2015 showed that there were 57,900 job openings in agriculture and related fields and only 35,400 students graduating annually in those areas. As our world grapples with the need to contribute science-based solutions to feeding 9 billion people by 2050, students trained in the agricultural and horticultural sciences will be called on to contribute.

Horticulture graduates may find opportunities in working on developing higher yielding crops or crops that can withstand more stressful growing conditions. Others may find opportunities working on improving qualities such as flavor, appearance, texture, and postharvest shelf life for a wide range of horticultural commodities from fruits to vegetables to flowers. Sustainable production is a particular area of growth where horticultural expertise can make a contribution. Students may wish to read a recent report from the United States Department of Agriculture and Purdue University (https://www.purdue.edu/usda/employment/wp-content/uploads/2015/04/2-Page-USDA-Employ.pdf) on the subject of employment opportunities in this area.

The horticulture degree serves as excellent preparation for careers in food production, plant nurseries, community supported agriculture (CSA), public gardens, landscaping, greenhouse production, teaching, public parks, vegetable fields, golf courses, urban agriculture, extension and community based educational work, work in research labs, and the health sciences. In addition, many horticultural science majors go on to work in public sector jobs including city and state positions with the Department of Natural Resources, the Wisconsin Department of Agriculture, and University of Wisconsin Extension. Students with degrees in horticulture also work in hospitals (horticultural therapy), aerospace (food and recycling in space labs), and zoos (managing environments for animals and visitors). Although the career opportunities are numerous, horticulture students have a common desire to work intensively with plants to improve our environment and our health.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement.

A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I [1]	
Select one of the following:		3-5
MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II [1]	
MATH 221	Calculus and Analytic Geometry 1	
MATH 222	Calculus and Analytic Geometry 2	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
COMP SCI 300	Programming II	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10-12
Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 383	Cellular Biology	
And select two of the following:		
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 486	Principles of Physiology Laboratory	
Agricultural Breadth		
ENTOM/ ZOOLOGY 302	Introduction to Entomology	3-4
or ENTOM 351	Principles of Economic Entomology	

GENETICS 466	Principles of Genetics	3
Select one of the following:		3-4
BOTANY 300	Plant Anatomy	
BOTANY 305	Plant Morphology and Evolution	
BOTANY 500	Plant Physiology	
PL PATH 300	Introduction to Plant Pathology	3-4
or PL PATH/ F&W ECOL/HORT/ LAND ARC 309	Diseases of Trees and Shrubs	
SOIL SCI 301	General Soil Science	4
Horticultural Core		
HORT 120	Survey of Horticulture	3
HORT 121	Horticulture Colloquium	1
HORT 227	Propagation of Horticultural Plants	3
HORT 320	Environment of Horticultural Plants	3
HORT/AGRONOMY/ SOIL SCI 326	Plant Nutrition Management	3
Select one of the following:		3
HORT 334 & HORT 335	Greenhouse Cultivation and Greenhouse Cultivation Lab [2]	
HORT 375	Special Topics (Organic Vegetable Production)	
Select three of the following:		9
HORT 234	Ornamental Plants	
HORT/ PL PATH 261 & HORT/ PL PATH 262	Sustainable Turfgrass Use and Management and Turfgrass Management Laboratory	
HORT 375	Special Topics (Arboriculture and Landscape Maintenance)	
or HORT/ LAND ARC 263	Landscape Plants I	
HORT 345	Fruit Crop Production (alternate years) [2]	
HORT 370	World Vegetable Crops	
Electives		
Select 5 elective credits (see list below)		5
Capstone		
Select one of the following:		1-3
A course as approved by advisor and chair of the curriculum committee, usually taken as the following: [3]		
HORT/ AGRONOMY 376 & HORT 378	Tropical Horticultural Systems and Tropical Horticultural Systems International Field Study	
HORT 399	Coordinative Internship/Cooperative Education	
HORT 699	Special Problems	
Total Credits		70-84

1 If MATH 171 is taken, MATH 217 must also be taken.

2 Alternate years.

3 Example activities include broad-based internships or broad-based international study.

ELECTIVE COURSES

Students may not double count courses within the major requirements (Agricultural Breadth, Horticultural Core, Electives, Capstone)

Code	Title	Credits
Business and Economics		
A A E 215	Introduction to Agricultural and Applied Economics	4
A A E/ENVIR ST 244	The Environment and the Global Economy	4

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take HORT 289 Honors Independent Study, HORT 681 Senior Honors Thesis and HORT 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist for Horticulture (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information. The Department of Horticulture also works collaboratively to strongly support students through the Honors in Research program.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire, integrate and apply knowledge of plant science to horticultural systems.
2. Demonstrate interdisciplinary knowledge and competency in managing horticultural systems.
3. Synthesize knowledge and use insight and creativity to better understand and improve horticultural systems.
4. Appreciate and communicate the diverse impacts of horticulture on people.
5. Demonstrate professionalism and proficiency in skills that relate to horticulture.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE HORTICULTURE FOUR-YEAR PLAN (WITH BOTANY/BIOLOGY 130 IN THE FIRST SEMESTER)

Freshman

Fall	Credits	Spring	Credits
HORT 120	3	MATH 113	3
HORT 121	1	Ethnic Studies Course	3

2 Offered alternate years

[3] Note that at least 120 credits must be completed to be eligible for graduation. Aim to complete an average of 15 credits per semester.

Note: HORT 121 Horticulture Colloquium can be taken in any year

ADVISING AND CAREERS

ADVISING

Undergraduate students in the Department of Horticulture are assigned to a minimum of two advisors: our staff advisor and a faculty mentor. Prospective students should meet with the staff advisor first; the advisor will help match students to a faculty mentor in the area of interest. Current students can meet with either the staff advisor or their assigned faculty mentor. Students are required to meet with their advisor at least once each semester.

STAFF ADVISOR

Our staff advisor is available to help prospective and current students with major exploration, general degree requirements and policies, academic planning, campus resources, and so on.

Contact: Kathryn Jones, kjones26@wisc.edu; schedule an advising appointment **via Starfish** (https://advising.wisc.edu/facstaff/starfish/starfish-student-resources)**.**

FACULTY MENTORS

Our faculty mentors are available to help current students with internships and careers, graduate school preparation, research opportunities, etc. Contact information for faculty mentors is available on the faculty profile page (https://horticulture.wisc.edu/faculty-and-staff-2/faculty-and-staff).

CAREERS

A degree in horticulture serves as excellent preparation for careers in: applied plant science, food crop production, plant breeding & plant genetics, urban agriculture, gardening, landscaping, community supported agriculture (CSA), extension and community based educational work, horticulture education, research, greenhouse production, horticultural therapy, etc. For sample career profiles in horticulture, see Career Opportunities (https://horticulture.wisc.edu/academics/undergraduate-program/research-career-opportunities-3) on the department website.

INSTRUCTIONAL STAFF

Calderon, Ellison, Futa, Luby, Oosterwyk

WISCONSIN EXPERIENCE

Students in the horticulture program have some unique opportunities for learning outside the classroom. Many of our students participate in internships during the summer and even during academic semesters at locations that vary from seed companies to wineries to public gardens. Multiple internship opportunities for horticulture students exist on or near campus at facilities such as the Allen Centennial Garden (https://allencentennialgarden.org), the UW Arboretum (https://arboretum.wisc.edu), and the Agricultural Research Stations (http://ars.wisc.edu).

Horticulture students have unique opportunities to contextualize the learning acquired in traditional face-to-face courses on campus, by participating in short term field experiences abroad lead by program leaders from the department of Horticulture. The UW Tropical Horticulture in Costa Rica (https://studyabroad.wisc.edu/program/?programId=517) program allows a closer look at tropical horticultural systems during the fall semester, complemented with a two-week intensive field experience in Costa Rica during winter break. Students have the opportunity to visit tropical crop plantations (for example—banana, pineapple, cacao, coffee, palm oil) and contrast different agricultural practices (small & large scale, organic, conventional). The fall semester course (HORT/AGRONOMY 376 Tropical Horticultural Systems) taken in conjunction with the international field trip (HORT 378 Tropical Horticultural Systems International Field Study) fulfills the horticulture major capstone requirement.

The UW Community-Based Learning and Sustainable Food Systems in Guatemala (https://studyabroad.wisc.edu/program/?programId=652) program offers an opportunity to integrate topics of agriculture, sustainability, health and nutrition with a community-based learning component. This is another two-week opportunity to study abroad that takes place in mid-May.

In addition to these opportunities to work on tropical crops, the department of Horticulture offers the UW Food Systems and the Environment in Northern Japan (https://studyabroad.wisc.edu/program/?programId=650), another two-week field study that takes place in mid-August. In this program, students from UW are partnered with students from Obihiro University of Agriculture and Veterinary Medicine, and through a combination of lectures and site visits they will compare and contrast the landscape and ecology of Japan and Wisconsin.

The Department of Horticulture has a very active undergraduate club known as the Horticulture Society (https://win.wisc.edu/organization/hortsociety). The mission of the Horticulture Society is to interest and acquaint students in the college with career opportunities and requirements in the field of horticulture and related fields. They aim to provide opportunities to further this interest through combined effort and achievement; to create awareness and interest in students entering the college with the field of horticulture; to be available to industrious students interested in expanding their knowledge of horticulture; and promote an exchange of ideas and mutual understanding. The Society is made up of undergraduates, some of whom are majoring in horticulture. A faculty advisor works with the group, and the group meets bi-monthly. The society travels to horticultural events and meetings, visits botanical gardens and arboreta around the country, has traveled internationally, and runs programming for children at elementary schools and gardens around Wisconsin. The society runs a large and successful plant sale each fall on campus.

LIFE SCIENCES COMMUNICATION

The Department of Life Sciences Communication (LSC) prepares students for careers as professional communicators in scientific and technical fields or for graduate and professional school. Scientific areas of expertise include the environment and natural resources, health and nutrition, agriculture, new technologies and social sciences. LSC is a world leader in science communication and our instructors are a mix of world-class researchers and real-world practitioners of regional or national profiles.

Graduates of the program are highly sought after by employers across both scientific and communication industries. Key to the education that LSC students receive is a combination of theoretical grounding and state-of-the-art practical applications. Students receive instruction across multimedia platforms such as print, audio, video and web. They are taught how to target and create communications for both news and marketing. Most important, they learn how to plan strategically and implement the most effective communications for diverse audiences.

Students can choose to pursue LSC as a stand-alone major but many choose to add an additional major and/or certificate(s) to complement what they learn in LSC. Examples of double majors and certificates pursued by our students include biology, dairy science, genetics, environmental studies, political science, business and global health.

LIFE SCIENCES COMMUNICATION, B.S.

The Department of Life Sciences Communication (LSC) prepares students for careers as professional communicators in scientific and technical fields or for graduate and professional school. Scientific areas of expertise include the environment and natural resources, health and nutrition, agriculture, new technologies and social sciences. LSC is a world leader in science communication and our instructors are a mix of world-class researchers and real-world practitioners of regional or national profiles.

Graduates of the program are highly sought after by employers across both scientific and communication industries. Key to the education that LSC students receive is a combination of theoretical grounding and state-of-the-art practical applications. Students receive instruction across multimedia platforms such as print, audio, video and web. They are taught how to target and create communications for both news and marketing. Most important, they learn how to plan strategically and implement the most effective communications for diverse audiences.

Students can choose to pursue LSC as a stand-alone major but many choose to add an additional major and/or certificate(s) to complement what they learn in LSC. Examples of double majors and certificates pursued by our students include biology, dairy science, genetics and genomics, environmental studies, political science, business and global health.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. Students must have a minimum of 15 credits within the LSC major that do not double count with CALS or university "general education" requirements.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or placement exam recommended to fulfill the CALS Quantitative Reasoning Part A requirement):		3-5
MATH 112	Algebra	
or MATH 114	Algebra and Trigonometry	
Select one of the following (recommended to fulfill the CALS Quantitative Reasoning Part B requirement):		3-4
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
C&E SOC/ SOC 360	Statistics for Sociologists I	
Foundation Course		
LSC 111	Science and Technology Newswriting	3
or LSC 212	Introduction to Scientific Communication	
Core		
LSC 250	Research Methods in the Communication Industry	3
LSC 251	Science, Media and Society	3
Select two of the following:		6
LSC 270	Marketing Communication for the Sciences	
LSC 314	Introduction to Digital Video Production	
LSC 320	Feature Writing	
LSC 332	Print and Electronic Media Design	
LSC 350	Visualizing Science and Technology	
LSC 360	Information Radio	
Concentration within the Major		
Select 6 credits from one of the following concentrations:		6
Communication Strategy		
Communication Skills and Technologies		
Capstone		
LSC 515	Social Marketing Campaigns in Science, Health and the Environment	3
or LSC 640	Case Studies in the Communication of Science and Technology	
Total Credits		30-33

CONCENTRATIONS WITHIN THE MAJOR

COMMUNICATION STRATEGY

Communication Strategy Concentration: focuses on the skills and theory necessary to effectively communicate with audiences in the life sciences context, while satisfying the long terms strategic goals of an organization; it includes courses in advertising, social marketing, and risk communication.

Code	Title	Credits
Select two of the following:		6
LSC 431	Advertising in the Life Sciences	
LSC 432	Social Media for the Life Sciences	
LSC 435	Theory and Practice of Integrated Marketing Communication	
LSC 440	Contemporary Communication Technologies and Their Social Effects	
LSC/ AMER IND 444	Native American Environmental Issues and the Media	
LSC/COM ARTS/ JOURN 617	Health Communication in the Information Age	
LSC 625	Risk Communication	
LSC 660	Data Analysis in Communications Research	

COMMUNICATION SKILLS AND TECHNOLOGIES

Communication Skills and Technology Concentration: focuses on the skills required to translate organized information into informative and persuasive messages for a variety of media, such as newswriting, documentary photography, publications editing, web design and video production.

Code	Title	Credits
Select two of the following:		6
LSC 430	Communicating Science with Narrative	
LSC 432	Social Media for the Life Sciences	
LSC 450	Documentary Photography for the Sciences	
LSC 532	Web Design for the Sciences	
LSC 614	Advanced Video Production	

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Specialized knowledge in theoretical and applied communication of science and technology, along with an education broad enough to meet the challenges of changing careers and opportunities.
2. The ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving.
3. The ability to communicate effectively across media and a broad range of audiences.
4. A global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
5. The ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy.
6. A respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

ADVISING AND CAREERS

Current and prospective students should contact the advisor, Tera Holtz Wagner (tholtz@wisc.edu), with questions. Declared majors are required to meet with the advisor at least once per semester prior to registration.

Our graduates secure communications positions in areas like advertising and marketing, public relations, writing, and digital media in industries related to health, agriculture, biotechnology and the environment. Many students also go on to graduate or professional school in the social, biological or physical sciences. We encourage you to check out our website (http://lsc.wisc.edu) to view recent alumni features.

WISCONSIN EXPERIENCE

STUDYING ABROAD

LSC majors can find study abroad and internship abroad opportunities on the International Academic Programs (https://www.studyabroad.wisc.edu) and International Internship Program (http://internships.international.wisc.edu) websites. Travel opportunities range from one to two weeks to an entire academic year, and many students pursue volunteer, research or internship opportunities while abroad.

INTERNSHIPS

LSC notifies majors of abundant opportunities to apply for summer and academic year internships related to science communication. Students intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies. The Wisconsin Technology Council and Farm Journal, Inc. actively offer internship opportunities to LSC seniors.

LSC CAPSTONES ARE SERVICE-LEARNING COURSES

All LSC seniors can select their final capstone course from either LSC 515 or LSC 640. LSC 515 Social Marketing Campaigns in Science, Health and the Environment partners with a real-life client to create a strategic marketing campaign for issues of social significance, such as environmental conservation. Students in LSC 640 Case Studies in the Communication of Science and Technology participate in internships throughout the semester that put their communication skillset into practice for science and technology organizations.

NUTRITIONAL SCIENCES

Nutritional sciences is an independent discipline rooted in biology and biochemistry. The major integrates the study of nutrition with studies of the role of diet in health and disease, and with studies of the biological, genetic, social, and economic factors influencing the diet and nutritional status of humans. Nutritional sciences combines the basic and applied sciences that address issues relevant to agriculture and medicine. The Department of Nutritional Sciences offers two areas of study, both of which require a core of courses that emphasize the chemistry and physiology of nutrition. Additional courses focus on the biochemical, clinical, business, or public health aspects of nutrition. Students who complete the nutritional sciences major in the dietetics degree program receive the bachelor of science–dietetics degree, and students who complete the nutritional sciences major in the bachelor of science degree program receive the bachelor of science degree.

Students who wish to gain practical experience are encouraged to participate in independent studies and coordinative internships, as well as laboratory and clinical research projects offered through the department, the Waisman Center and Interdepartmental Graduate Program in Nutritional Sciences. In addition to the financial support offered by these opportunities, the department annually awards a number of scholarships. All students are also encouraged to apply for scholarships awarded by the College of Agricultural and Life Sciences and UW–Madison.

The department also serves as the administrative home for the popular undergraduate certificate in global health. The certificate is open to all undergraduate UW–Madison students and complements a variety of majors.

GLOBAL HEALTH, CERTIFICATE

The undergraduate certificate in global health is a 15-credit program open to all undergraduate students at the University of Wisconsin–Madison.

All students, especially those who identify as pre-health, are familiar with the concept of health care, the idea of preventing and treating mental and physical health conditions in individuals. The certificate's coursework discusses medicine and particularly the need to improve access to care for all, but it also introduces students to the field of public health, a model for promoting health and well-being that seeks to identify and address the root causes of health problems for populations rather than for individuals.

Public health practitioners focus on preventive, population-level approaches to health promotion. For example, public health work related to substance abuse among UW–Madison students involves education and outreach to high-risk groups as well as facilitating access to treatment. Other public health researchers, government officials, nonprofit staff, and community leaders might work with entire rural communities in a developing country to improve access to clean water, or work on a global scale to try to reduce migration driven by climate change-related declines in food production.

Solutions to public health problems require expertise from many disciplines and the certificate welcomes both pre-health science students and diverse other students who are passionate about improving the well-being of humans, non-human animals, and the environment through changes in politics, economics, culture, and society in general.

Certificate students must complete credit-bearing field work but may or may not actually go abroad to do it—the "global" in "global health" refers both to our desire to achieve equity in health for all people worldwide and to the goal of studying and finding solutions to health issues that cross both geographic and socioeconomic boundaries. There are large differences or "disparities" in health and well-being between different populations in Madison and across the United States such that many students choose to study a health problem locally and make connections to the handling of the same problem in other populations and places.

The certificate is administered by the College of Agricultural and Life Sciences (CALS) and the Global Health Institute (GHI) in partnership with faculty and staff across campus.

Learn more about the program on its website (http://ghi.wisc.edu/education/undergraduate-certificate).

HOW TO GET IN

Undergraduate students from all majors on campus are encouraged to consider completing the certificate in global health.

Students may declare after completing any one of the program's three core courses. While admission to the certificate is not competitive, students should be aware that enrollment in the core courses occurs on a first-come, first-served basis. Information about declaring the certificate can be found on the program website (http://ghi.wisc.edu/education/undergraduate-certificate/completing).

There is no guarantee that all interested students will be able to complete the certificate, but completion is most likely for students who take the program's core courses as early as possible.

ENROLLMENT IN CERTIFICATE COURSES

While interested students would ideally take at least one of the certificate's core courses as freshmen or sophomores, many students do not get into these courses until their junior or senior years, which can make planning difficult. Students can complete the program's requirements in any order, but there are two important things to keep in mind:

- Some field experience options have a core course as a prerequisite.
- Whenever students are finished with the requirements of the degree/major(s), they may not extend time on campus just to complete the certificate.

Though the courses may be taken in any order, the ideal timing for the program's requirements is as follows:

- NUTR SCI/AGRONOMY/ENTOM 203 Introduction to Global Health —take fall of the freshman or sophomore year
- POP HLTH 370 Introduction to Public Health: Local to Global Perspectives and/or MED HIST/ENVIR ST 213 Global Environmental Health: An Interdisciplinary Introduction —take any spring from sophomore to senior year

- *two or three elective courses*—choose and complete these any time after taking one of the three core courses
- *1–3 credits of field experience*—summer between junior and senior years or six months on either side of that summer

REQUIREMENTS

Code	Title	Credits
Core Courses		
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	3
MED HIST/ ENVIR ST 213	Global Environmental Health: An Interdisciplinary Introduction [1]	3
or POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	
Field Experience		
Field experiences range in length from one week to one year and typically carry from one to four credits. The field experience can be completed in the US or abroad but must be completed for credit and must be approved by certificate staff. Some experiences are "preapproved" while others such as internships must be submitted for approval. Volunteering that includes clinical work is strongly discouraged and is not accepted as field experience. See the program's field experience web page and handbook for more details.		1-4
Electives		
Select from electives list (see below) to reach a minimum of 15 credits total for the certificate. [2]		6-8

[1] Completing both of these courses is encouraged, and students who do so can count one as an elective.

[2] The certificate does not support tracks or specialties but students may choose to concentrate their electives in one or more functional areas (topics of study covered in graduate programs in public health and related fields). Note that many courses span multiple functional areas but are only listed once.
Some courses listed here are "special topics" courses. These are courses whose topic changes from semester to semester and even between sections in the same semester. Sections of these courses accepted by the certificate are shown in parentheses (like this). Use of approved sections to meet the certificate's electives requirement is fine but requires manual modification of a student's degree audit, typically during the student's last term on campus.

Footnotes related to electives

[1] "Functional areas"/topics for study commonly used in graduate programs in public health and related fields:

- **Aging**—Focuses on solutions to aging-related challenges, promoting healthy aging, longevity and disability prevention, and the relationship between health risk factors and aging.
- **Agronomy/Horticulture/Plant Breeding**—The management of crops, soils, fertilizers, water, and other agricultural inputs and the assessment of the degree to which different practices meet goals for productivity, efficiency, human and animal nutrition, and environmental impact.
- **Animal Science/Dairy Science**—Study of the management of domesticated animals, including assessment of the degree to which different practices meet goals for productivity, efficiency, humane treatment, and environmental impact
- **Biomedical Lab Sciences**—Focuses on laboratory techniques in areas such as microbiology, immunology, virology, molecular biology, as applied to research on public health issues.
- **Biostatistics**—Study of theories and techniques for collecting, analyzing, and interpreting quantitative data relevant to public health issues.
- **Chronic Disease**—Focuses on the etiology and prevention of chronic disease, while addressing interventions such as policy change, education, and various services to reduce chronic disease morbidity and mortality at the level of community and individual behavior.
- **Clinical Research**—Use of statistical methods in the design and execution of studies involving a person or group of persons and addressing public health problems.
- **Communication Sciences and Disorders**—Focuses on the practice of public health as applied to disorders of speech production/perception, hearing, and language organization.
- **Community Health**—Focuses on work with defined communities to identify and resolve public health problems and to promote well-being.
- **Dental Public Health**—The science of preventing dental diseases and promoting dental health on a community basis, including dental education of the public, applied dental research, and administration of group dental care programs.
- **Environmental Health/Environmental Science/Environmental Economics**—Study of assessment, control, prevention, and cost implications of factors in the environment that can adversely affect the health of present and future generations.
- **Epidemiology**—Application of the scientific method to the study of disease in populations for the purpose of prevention and control.
- **Exercise Science**—The theory-based, research-led study of the impact of physical exercise on the body and health.
- **Food Safety**—Focuses on identification and decreasing the risk to the public from foodborne illness by surveillance, monitoring occurrences of bacterial pathogens, and response to public complaints.
- **Genetics**—Explores the impact of genes on public health and disease prevention, including how genes and the environment interact to affect distribution of disease in human populations.
- **Health Administration**—Study of the skills, values, and conceptual abilities needed for management roles in health care, health policy, and public health.
- **Health Economics/Health Finance**—Study of the composition, use, and impact of finances that fund all components of the public health system. This includes the pricing, production, and distribution of health services.
- **Health Education/Behavioral Sciences**—Interdisciplinary study focusing on how health education can affect behavior and lifestyle decisions that have an impact on public health.
- **Health Law**—The impact of law on the furnishing and administration of health services, and study of legal structures that define government's authority in the interest of public health.
- **Health Promotion and Communications**—Organized response to promote health and prevent illness, injury, and disability using communication mediums.
- **Health Services Research**—Research on the cost, access, and quality of the health care system, and on policy issues affecting the organization, financing, and delivery of health care services.
- **Immunology**—The relationship between body systems, pathogens, and immunity, the development and function of immune cells, and the mechanisms of disease and immunology.
- **Infectious Diseases**—Study of illnesses resulting from the transmission of microbial agents through diverse pathogens, disease surveillance, outbreak investigation, and the prevention of infectious diseases.
- **Informatics**—Interdisciplinary science dealing with the structure, acquisition, and use of biomedical information, ranging from theoretical model contraction to building and evaluating applied systems.

- **Injury/Violence**—The study of the epidemiology, risk factors, and effective prevention strategies for unintentional and violence-related injury.
- **Management and Health Policy**—Study of legislative, administrative, and budget systems affecting health services, competencies associated with health care management, and the role of leadership in public health.
- **Maternal and Child Health**—Focuses on the improvement of public health delivery systems for women, children, and their families through advocacy, education, and research.
- **Mental Health**—Emphasizes early intervention, prevention of mental illness, and promotion of mental health through public health education.
- **Microenterprise and Microlending—**Focuses on the development of small businesses using small amounts of credit, often but not always in developing country settings. Explores the impact of small businesses on individual, family, and community health and well-being.
- **Minority Health and Health Disparities**—Addresses factors causing gaps in quality of health care across social, ethnic, sexual orientation, and socioeconomic groups.
- **Multicultural Studies**—Focuses on the impact of social identities in determining behavior during illness and decisions regarding care, and the importance of understanding basic attitudes of a cultural group for successful health promotion and prevention programs.
- **Neuroscience**—An interdisciplinary field which may include research in areas such as molecular neuroscience, neurophysiology, and computational modeling, with applications for vaccine development, response to bioterrorism attacks, and control or prevention of diseases such as Alzheimer's and Parkinson's.
- **Nutrition/Public Health Nutrition**—Focuses on the improvement of the nutritional health of the whole population and vulnerable subgroups within the population, and emphasizes health promotion and disease prevention.
- **Occupational Health/Industrial Hygiene**—Focuses on the anticipation, recognition, evaluation, communication, prevention, and control of environmental stressors in the workplace that may result in injury, illness or impairment, or affect the wellbeing of the community.
- **Parasitology**—Study of human parasites and of public health measures that contribute to the prevention and control of diseases caused by parasites.
- **Population and Reproductive Health**—Factors influencing human reproductive health and dynamics of population growth with the goal of avoiding disease and disability related to sexuality and reproduction.
- **Population Sciences**—Study of the science of demography and health implications of major population issues, including population size, composition, distribution, and change.
- **Poverty and Development**—Involves exploration of the relative availability of resources and services between different populations and geographic areas.
- **Preparedness Response and Recovery**—Focuses on the public health infrastructure needed to monitor the environment, assess needs of vulnerable populations, and allocate resources in times of community emergency.
- **Public Health Ethics**—Involves a systematic process to clarify, prioritize, and justify possible courses of public health action based on ethical principles, values and beliefs of stakeholders, and scientific and other information. Public ethics is a field of study that seeks to clarify principles guiding actions, and a field of practice that applies relevant principles and values to decision making.
- **Public Health Leadership**—Prepares public health practitioners with knowledge and skills needed to mobilize, coordinate, and direct broad collaborative actions within the complex public health system.
- **Public Health Medicine**—Protects and improves the health of the community through preventive medicine by providing public health training for clinicians such as doctors, dentists, and nurses.
- **Public Health Policy**—The collected laws, regulations, and approaches taken to making decisions and implementing policy to protect the health of communities and populations. Public health policy issues include a wide range of topics including health care reform, insurance reform, prevention of communicable diseases, food safety, and stem cell research.
- **Public Health Practice**—Application of knowledge and competencies in performance of essential public health services.
- **Risk Assessment**—Determination of the probability that a specific public health environmental or other threat will occur, with a focus on adverse health effects, risk perception, communication, and management.
- **Social Determinants of Health**—Study of the political, cultural, and societal systems that influence behaviors and lifestyle decisions that have an impact on health.
- **Substance Use/Harm Reduction**—Study of theory and methods for research on substance use and community-based prevention, control, and treatment.
- **Toxicology**—Study of the adverse effects of chemicals or other physical agents on human beings and other living organisms.
- **Tropical Medicine—**Deals with infectious and other diseases occurring or originating primarily in tropical and subtropical regions.
- **Veterinary Public Health**—Study of the prevention and control of zoonotic diseases—transmissible from animals to humans—in both animal and human populations.
- **Women's Health**—Etiology, prevention, and treatment of public health problems affecting women and other high-risk groups.

[2] This course is what UW calls a "special topics" course. These are courses whose topic changes from semester to semester and even between sections in the same semester. Sections of these courses accepted by the certificate in the past are shown in parentheses (like this). Use of approved sections to meet the certificate's electives requirement is fine, but they are not always seen automatically by the certificate's degree audit. Questions about these courses should be directed to certificate advising staff.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand the global burden of disease, threats to well-being, and the root causes of these conditions.
2. Identify parallels between local, domestic, and international health issues.
3. Become informed citizens in an increasingly interconnected world.
4. Collaborate and communicate effectively with diverse colleagues and local partners.
5. Respectfully engage with other cultures.

ADVISING AND CAREERS

Details about advising for the certificate are available on the program's advising page (http://ghi.wisc.edu/education/undergraduate-certificate/advising).

The certificate maintains a handbook (http://ghi.wisc.edu/education/undergraduate-certificate/handbook) with lengthy sections about careers, including suggested global health-related work opportunities to pursue in students' first one to two years after college.

Advisors:

Katie Freeman, advises last names A–M
kmfreeman2@wisc.edu
608-262-3718
Scheduling assistant (https://calendar.wisc.edu/scheduling-assistant/public/profiles/FQybpanE.html)

Devika Suri, advises last names N–Z

dsuri@wisc.edu
608-262-3427
Scheduling assistant (https://calendar.wisc.edu/scheduling-assistant/public/profiles/WxqFOGQx.html)

PEOPLE

Please see the Certificate in Global Health website (http://ghi.wisc.edu/education/undergraduate-certificate/#Who) for a list of certificate staff and ways to contact them.

WISCONSIN EXPERIENCE

A unique aspect of the certificate is the requirement of a field experience, which can take the form of a study abroad field course, an internship, or site visits right here in Wisconsin. You will have the opportunity to get out of the classroom and see the connections between human, animal, and environmental health while deepening your understanding of the social and cultural contexts that influence health and wellness. The experience also increases your comfort in working with a diversity of people and introduces you to many types of careers in global health.

Click here (http://ghi.wisc.edu/education/undergraduate-certificate/field-experiences) to learn more about our field experiences or set up an appointment to talk with an advisor.

NUTRITIONAL SCIENCES, B.S.

The bachelor of science with a major in nutritional science builds on a core set of nutrition courses with additional courses emphasizing the chemistry and biology of nutrients from the molecular to the systemic level. Students in this program often pursue graduate study in medicine, nutritional sciences, and other biological sciences. Graduates also find employment in agribusiness, the food industry, government agencies, health fields, and human services. Others may pursue advanced degrees in nutrition, the health and social sciences, and international studies. Students concerned with food and nutrition problems of developing countries can also enroll in courses that treat the agricultural, environmental, economic, and social context of such problems with the nutrition core.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1

International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I [1]	
Select one of the following:		3-5
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Introductory Biology		
Select one of the following options:		10
Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
Nutritional Sciences Biology		
Select one of the following options:		8-13
Option 1:		
ANAT&PHY 335	Physiology	
GENETICS 466	Principles of Genetics	
And select one of the following: [2]		
MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory	
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	
Option 2: [3]		
BIOCORE 485	Principles of Physiology	
BIOCORE 486	Principles of Physiology Laboratory	
BIOCORE 587	Biological Interactions	
Physics		
Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	
Core		
NUTR SCI/AN SCI/ DY SCI 311	Comparative Animal Nutrition	3
or NUTR SCI 332	Human Nutritional Needs	
NUTR SCI 431	Nutrition in the Life Span	3
BIOCHEM/NUTR SCI 510	Nutritional Biochemistry and Metabolism	3
Select one of the following:		3-7
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	
BMOLCHEM 503	Human Biochemistry	
Electives within the Major		
Select 6 credits from the following:		6
A A E/ AGRONOMY/ INTER-AG/NUTR SCI 350	World Hunger and Malnutrition	
ANAT&PHY 337	Human Anatomy	
ANAT&PHY 338	Human Anatomy Laboratory	
ANTHRO 365	Medical Anthropology	
BIOCHEM 550	Topics in Medical Biochemistry	
BIOCHEM/ M M & I 575	Biology of Viruses [4]	
BIOCHEM/ NUTR SCI 645	Molecular Control of Metabolism and Metabolic Disease [5]	
BMOLCHEM 504	Human Biochemistry Laboratory	

C&E SOC/ SOC 533	Public Health in Rural & Urban Communities
CHEM 311	Chemistry Across the Periodic Table
CHEM 327	Fundamentals of Analytical Science
CHEM 329	Fundamentals of Analytical Science
DY SCI 305	Lactation Physiology
FOOD SCI/ AN SCI 321	Food Laws and Regulations
FOOD SCI/ MICROBIO 325	Food Microbiology
GENETICS 545	Genetics Laboratory
HORT/ AGRONOMY 338	Plant Breeding and Biotechnology
HORT/ AGRONOMY/ BOTANY 339	Plant Biotechnology: Principles and Techniques I
HORT/ AGRONOMY 360	Genetically Modified Crops: Science, Regulation & Controversy
MED HIST/ PHILOS 515	Public Health Ethics
MED HIST/ PHILOS 558	Ethical Issues in Health Care
M M & I/ MICROBIO/PATH-BIO 528	Immunology
M M & I/PATH-BIO 529	Immunology Laboratory
NEURODPT 533	Molecular Physiology
NUTR SCI 375	Special Topics
NUTR SCI/INTER-AG 421	Global Health Field Experience
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory
NUTR SCI/ KINES 525	Nutrition in Physical Activity and Health
NUTR SCI 540	Community Nutrition Programs and Policy Issues
NUTR SCI/ BIOCHEM 619	Advanced Nutrition: Intermediary Metabolism of Macronutrients [4]
NUTR SCI/ POP HLTH 621	Introduction to Nutritional Epidemiology [4]
NUTR SCI 623	Advanced Nutrition: Minerals [4]
NUTR SCI 625	Advanced Nutrition: Obesity and Diabetes [4]
NUTR SCI/ AN SCI 626	Experimental Diet Design [4]
NUTR SCI 627	Advanced Nutrition: Vitamins [4]
NUTR SCI 631	Clinical Nutrition I
NUTR SCI/PHM PRAC 672	Herbals, Homeopathy, and Dietary Supplements
NUTR SCI 681	Senior Honors Thesis [5]
NUTR SCI 682	Senior Honors Thesis [5]
NUTR SCI 691	Senior Thesis-Nutrition [5]
NUTR SCI 692	Senior Thesis [5]
NUTR SCI 699	Special Problems [6]
ONCOLOGY 401	Introduction to Experimental Oncology
PATH 404	Pathophysiologic Principles of Human Diseases
PHM SCI 401	Survey of Pharmacology
POP HLTH 370	Introduction to Public Health: Local to Global Perspectives
ZOOLOGY 470	Introduction to Animal Development
ZOOLOGY 570	Cell Biology
Capstone	
Select one of the following:	1-8
NUTR SCI 499	Capstone in Nutrition
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory
NUTR SCI 681 & NUTR SCI 682	Senior Honors Thesis and Senior Honors Thesis
NUTR SCI 691 & NUTR SCI 692	Senior Thesis-Nutrition and Senior Thesis
NUTR SCI 699	Special Problems [7]
Total Credits	66-91

1 If MATH 171 Calculus with Algebra and Trigonometry I is taken, students must take MATH 217 Calculus with Algebra and Trigonometry II.

2 Consult advisor about combining MICROBIO 303 with MICROBIO 102.

3 If the Biocore sequence is taken to fulfill the first biology requirement, it must be taken to fulfill the second biology requirement.

4 These courses are taught primarily to graduate students. Permission to enroll from instructor may be required.

5 Note that for NUTR SCI 681/NUTR SCI 682 (Senior Honors Thesis) and NUTR SCI 691/NUTR SCI 692 (Senior Thesis), both courses in the sequence must be completed in order to earn a grade.

6 May count up to 6 credits of NUTR SCI 699 Special Problems towards the electives requirement.

7 Consult advisor regarding the possibility of completing NUTR SCI 699 Special Problems for capstone.

RECOMMENDED NUTRITIONAL SCIENCE ELECTIVES

Code	Title	Credits
BIOCHEM 550	Topics in Medical Biochemistry	2
C&E SOC/SOC 222	Food, Culture, and Society	3
FOOD SCI/ MICROBIO 324	Food Microbiology Laboratory	2
FOOD SCI/ MICROBIO 325	Food Microbiology	3
FOOD SCI 410	Food Chemistry	3
M M & I/MICROBIO/ PATH-BIO 528	Immunology	3
MED HIST/ ENVIR ST 213	Global Environmental Health: An Interdisciplinary Introduction	3
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	3
NUTR SCI/ KINES 525	Nutrition in Physical Activity and Health	3

NUTR SCI/ POP HLTH 621	Introduction to Nutritional Epidemiology	1
NUTR SCI/ PHM PRAC 672	Herbals, Homeopathy, and Dietary Supplements	2-3
ONCOLOGY 401	Introduction to Experimental Oncology	2
PATH 404	Pathophysiologic Principles of Human Diseases	3
PHM SCI 401	Survey of Pharmacology	3
POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	3
SOC 531	Sociology of Medicine	3
ZOOLOGY 570	Cell Biology	3
ZOOLOGY/ BIOCHEM/PHMCOL-M 630	Cellular Signal Transduction Mechanisms	3

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take NUTR SCI 681 Senior Honors Thesis and NUTR SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
2. Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
3. Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
4. Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
5. Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
6. Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
7. Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
8. Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

NUTR SCI Elective[5]	3	Electives[2]	9
Electives[2]	6		
	15		14-16

Total Credits 29-31

1 CHEM 103/CHEM 104 or CHEM 109 is required.

2 UW and CALS general education requirements are listed on the Requirements tab. Other recommended electives: Math (http://guide.wisc.edu/courses/math) through MATH 222 (second semester calculus), CHEM 561 Physical Chemistry, and foreign language.

3 BIOCORE 381/BIOCORE 382, BIOCORE 383/BIOCORE 384, BIOCORE 485/BIOCORE 486, BIOCORE 587 also accepted.

4 ANTHRO 104 fulfills both the Ethnic Studies and International Studies requirements.

5 Select 3 credits from NUTR SCI/A A E/AGRONOMY/INTER-AG 350, NUTR SCI 540, NUTR SCI 631, NUTR SCI/PHM PRAC 672, NUTR SCI 681, NUTR SCI 682, NUTR SCI 691, NUTR SCI 692, NUTR SCI 699, FOOD SCI/MICROBIO 325, FOOD SCI 410, FOOD SCI 412 or FOOD SCI 514.

- 120 credits required for graduation.

ADVISING AND CAREERS

Prospective and declared students should contact the Student Services Coordinator, Katie Butzen at kbutzen@wisc.edu for questions.

Students in this program often pursue graduate study in Medicine, nutritional sciences, and other biological sciences. Graduates also find employment in agribusiness, the food industry, government agencies, health fields, and human services. Others may pursue advanced degrees in nutrition, the health and social sciences, and international studies.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in dietetics and nutrition, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Dietetics and Nutrition Club (DNC) (https://win.wisc.edu/organization/dnc), a student organization open to anyone interested in meeting others pursuing dietetics and nutrition. Involvement in the DNC is a great way to find out about events and opportunities to network within the field of nutrition and dietetics. See the DNC Facebook page here (https://www.facebook.com/groups/DNC.UWMadison/?ref=ts&fref=ts).
- AWA (http://awamadison.org), the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (http://wiseli.engr.wisc.edu), Women in Science and Engineering Leadership Institute—a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the Department of Nutritional Sciences, or through other departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with advisors, instructors, and faculty members. Learn more about faculty research here (https://nutrisci.wisc.edu/people/faculty-staff).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Bursar's Office (http://www.bussvc.wisc.edu/bursar/bursar.html) website lists the average tuition and fee expenses for full-time resident and nonresident undergraduates.

Students seeking a degree are eligible to obtain federal financial aid. For further information about receiving financial aid at the University of Wisconsin–Madison, visit the university's Financial Aid (https://financialaid.wisc.edu) website.

Each year the Department of Nutritional Sciences awards $40,000–$50,000 in scholarships to nutritional sciences majors. In order to be considered for a DNS Scholarship, students must have a current FAFSA filed and must have submitted a scholarship application.

A list of scholarships for nutritional sciences and dietetics students is available on the department's website (https://nutrisci.wisc.edu/undergraduate/scholarships).

NUTRITIONAL SCIENCES, B.S. NUTRITION AND DIETETICS

The popular dietetics degree program combines clinical and managerial courses with the nutrition core to prepare students to become registered dietitian nutritionists (RDN). RDNs work in hospitals, outpatient clinics, schools, colleges, wellness programs and nursing homes as well as in public health agencies, the food industry, and research labs. Students meet the following criteria as a pathway for becoming an RDN:

1. Fulfill all academic course requirements of the Didactic Program in Dietetics (DPD) according to the Accreditation Council for Education in Nutrition and Dietetics (ACEND) 2017 Standards of Education

2. Receive a Nutritional Sciences, B.S. Dietetics

3. Complete an ACEND-accredited Dietetic Internship Program

4. Pass a national exam administered by the Commission on Dietetic Registration (CDR). Effective January 1, 2024, the CDR will require a minimum of a master's degree to be eligible to take the registration examination to become an RDN. Students who complete the nutritional sciences major in the dietetics degree program receive the Bachelor of Science—Dietetics degree.

For complete program information, see the department website (https://nutrisci.wisc.edu).

HOW TO GET IN

ADMISSION TO NUTRITION AND DIETETICS DEGREE PROGRAM

Students will have Pre-Dietetics classification until admission to the nutrition and dietetics degree program (Dietetics classification) as defined by completion of prerequisite courses with a cumulative GPA of ≥2.800, as well as, an overall GPA of ≥2.800. Students must apply for and be admitted to the program no later than the end of the semester in which the student accumulates 86 credits, which is senior standing. Department approval is required for admission. Students who are not admitted to the program by the time they accumulate 86 credits will not be allowed to continue in the Pre-Dietetics classification.[1]

To be admitted to the B.S. nutrition and dietetics program, the following requirements must be met effective fall 2019:

1. A minimum overall cumulative GPA of 2.800. Cumulative GPA will be based on UW–Madison courses only.
2. Students **must** have completed one semester at UW–Madison before applying.
3. A minimum mean GPA of 2.800 in the following required[2] prerequisite courses:

Code	Title	Credits
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Select one of the following:		5
ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102	Animal Biology and Animal Biology Laboratory	
ZOOLOGY/BIOLOGY/BOTANY 151	Introductory Biology	
ANAT&PHY 335	Physiology	5

NUTR SCI 332	Human Nutritional Needs	3
Select one of the following:		3-4
PSYCH 202	Introduction to Psychology	
MICROBIO 101	General Microbiology	
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
GEN BUS 300	Professional Communication	

1 This policy is applicable to undergraduate students entering or transferring into Pre-Dietetics classification fall 2018 and beyond. Students who have already completed a college degree (B.S. or B.A.) may choose to pursue the nutrition and dietetics program as either a second degree candidate, or as a Didactic Program in Dietetics (DPD) completer. Because they have already completed a bachelor's degree, second-degree candidates and DPD completers are not required to follow this progression policy. Progression for these students will be closely monitored by the program coordinator.

2 Any transfer course from another university that will be used to meet the above required courses **cannot** be included in the GPA calculation. If the same course is taken more than once, only the grade from the last time the course was taken will be used in the GPA calculation.

Note: Admission to the DPD program is competitive, as enrollment is limited by accreditation standards; students meeting the minimum criteria are not guaranteed admission.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		3-5
MATH 112	Algebra	
MATH 114	Algebra and Trigonometry [1]	
Select one of the following:		3-4
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		5-9

CHEM 109	Advanced General Chemistry	
CHEM 341	Elementary Organic Chemistry	3
or CHEM 343	Introductory Organic Chemistry	
Select one of the following:		3
BMOLCHEM 503	Human Biochemistry	
BIOCHEM 501	Introduction to Biochemistry	
Biology		
Select one of the following:		5
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
Select one of the following: [2]		5
MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory	
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	
Foundation		
ANAT&PHY 335	Physiology	5
PSYCH 202	Introduction to Psychology	3
GEN BUS 300	Professional Communication	3-4
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	3
ED PSYCH 301	How People Learn	3
Core		
FOOD SCI 301	Introduction to the Science and Technology of Food	3
FOOD SCI 437	Food Service Operations	3
FOOD SCI 438	Food Service Operations Lab	1
NUTR SCI 200	The Professions of Dietetics and Nutrition	1
NUTR SCI 332	Human Nutritional Needs	3
NUTR SCI 431	Nutrition in the Life Span	3
BIOCHEM/NUTR SCI 510	Nutritional Biochemistry and Metabolism	3
NUTR SCI 631	Clinical Nutrition I	3
NUTR SCI 632	Clinical Nutrition II	3
Capstone		
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory	1
NUTR SCI 520	Applications in Clinical Nutrition	3
Total Credits		71-79

1 Note that placement into MATH 114 does not guarantee that credit has been earned for MATH 112.

2 Consult advisor about combining MICROBIO 303 with MICROBIO 102.

Note: recommended electives for nutrition and dietetics students can be found on the Advising and Careers tab.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
2. Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
3. Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
4. Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
5. Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
6. Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.

7. Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
8. Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

	15-16		15-16

Total Credits 30-32

1 Offered only fall semester

2 Offered only spring and summer semesters

3 Offered only spring semester

- See Advising and Careers tab for recommended supporting courses
- Students interested in pursuing the nutrition and dietetics program must first complete specific prerequisite courses, hold pre-dietetics classification, and must achieve the necessary grade point average criteria. Consult http://www.nutrisci.wisc.edu for specific information on admission requirements and application procedure.

ADVISING AND CAREERS

ADVISING

Prospective and declared students should contact the student services coordinator with questions.

CAREERS

Registered dietitian nutritionists (RDN) work in hospitals, outpatient clinics, schools, colleges, wellness programs and nursing homes as well as in public health agencies, the food industry, and research labs. Students who fulfill the requirements of the Didactic Program in Dietetics and receive a Nutritional Sciences B.S. in Dietetics are qualified to complete a post-graduate Dietetic Internship. Upon completing the Dietetic Internship, a graduate is eligible to take the examination administered by the Commission on Dietetic Registration leading to certification as a RDN.

RECOMMENDED ELECTIVES FOR DIETETICS STUDENTS

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in dietetics and nutrition, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Dietetics and Nutrition Club (DNC) (https://win.wisc.edu/organization/dnc), a student organization open to anyone interested in meeting others pursuing dietetics and nutrition. Involvement in the DNC is a great way to find out about events and opportunities to network within the field of nutrition and dietetics. See the DNC Facebook page here (https://www.facebook.com/groups/DNC.UWMadison/?ref=ts&fref=ts).
- Academy of Nutrition and Dietetics (AND) (http://www.eatrightpro.org), the world's largest organization of food and nutrition professionals. AND provides public information on advocacy, leadership, career development, dietetics resources, position and practice papers; student membership rates and privileges can be found here (http://www.eatrightpro.org/resources/membership/membership-types-and-criteria/student-member).
- Wisconsin Academy of Nutrition and Dietetics (WAND) (http://www.eatrightwisc.org/default.asp), Wisconsin's chapter of AND.
- Collegiate FFA (http://collegiateffamadison.weebly.com), an official collegiate chapter of the National FFA organization.
- AWA (http://awamadison.org), the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (http://wiseli.engr.wisc.edu), Women in Science and Engineering Leadership Institute—a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the Department of Nutritional Sciences, or through other departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with advisors, instructors, and faculty members. Learn more about faculty research here (https://nutrisci.wisc.edu/people/faculty-staff).

CERTIFICATION/LICENSURE

ELEVATED EDUCATION REQUIREMENTS FOR THE FUTURE REGISTERED DIETITIAN NUTRITIONIST (RDN)

The registration examination for RDNs is designed to evaluate a candidate's ability to perform at the entry-level, and currently, candidates must hold the minimum of a baccalaureate degree to take the exam. In 2013, Commission on Dietetics Registration (CDR) moved to change the entry-level registration eligibility requirements for RDNs; instead of requiring a Baccalaureate degree, the educational preparation for the future entry-level RDN is now the minimum of a master's degree. **CDR's mandate goes into effect January 1, 2024.**

CURRENT STUDENTS

Students completing dietetics coursework and a dietetic internship by January 1, 2024 will still be eligible to take the RDN exam with a baccalaureate degree.

PROSPECTIVE STUDENTS

Freshmen declaring Pre-Dietetics in 2020 and beyond will be held to the new 2024 mandate, which will require students to hold the minimum of a master's degree in order to be eligible to take the RDN exam.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Bursar's Office (https://bursar.wisc.edu/tuition-and-fees) lists the tuition and fee expenses for full-time resident and nonresident undergraduates.

Students seeking a degree are eligible to obtain federal financial aid. For further information about receiving financial aid at the University of Wisconsin-Madison, visit the Office of Student Financial Aid (https://financialaid.wisc.edu) website.

Each year the Department of Nutritional Sciences awards $40,000–$50,000 in scholarships to nutritional sciences majors. In order to be considered for a DNS Scholarship, students must have a current FAFSA filed and a completed scholarship application submitted. A list of available DNS scholarships may be accessed on our Scholarships (https://nutrisci.wisc.edu/undergraduate/scholarships) page.

ACCREDITATION

Accreditation

Accreditation Council for Education in Nutrition and Dietetics (https://www.eatrightpro.org/acend)

Accreditation status: Accredited. Next accreditation review: 2026.

PLANT PATHOLOGY

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

For those interested in graduate studies, the Department of Plant Pathology offers a broad program leading to M.S. and Ph.D. degrees, which is described in the Graduate Guide (http://guide.wisc.edu/graduate).

PLANT PATHOLOGY, B.S.

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

This major is earned through the bachelor of science degree program.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3

CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Core Mathematics		
Select one of the following (or may be satisfied by placement exam):		5-6
MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry

CHEM 109	Advanced General Chemistry	
Introductory Biology		
Select one of the following options:		10
Option 1 (preferred):		
BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
Option 2:		
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
Option 3:		
BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
Core Physics		
Select one of the following:		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Plant Pathology Core		
PL PATH 300	Introduction to Plant Pathology	4
PL PATH/BOTANY 332	Fungi	4
Another Pl Path course above 300 [1]		3
Capstone		
PL PATH 590	Capstone in Plant Pathology	3
Track		
Select one of the following:		29-39
Plant-Microbe Biology Track		
Plant Health and Industry Track		
Total Credits		67-83

[1] Not including PL PATH 375 Special Topics or independent study credits—PL PATH 299 Independent Study, PL PATH 399 Coordinative Internship/Cooperative Education, PL PATH 590 Capstone in Plant Pathology, PL PATH 681 Senior Honors Thesis, PL PATH 682 Senior Honors Thesis, or PL PATH 699 Special Problems.

TRACKS

PLANT–MICROBE BIOLOGY TRACK

Code	Title	Credits
Additional Mathematics and Statistics		
Select one of the following:		5
MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II [1]	
MATH 221	Calculus and Analytic Geometry 1	
Select one of the following:		3-4
MATH 222	Calculus and Analytic Geometry 2 [2]	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Additional Chemistry		
Select one of the following options:		4-8
CHEM 343 & CHEM 344 & CHEM 345	Introductory Organic Chemistry and Introductory Organic Chemistry Laboratory and Intermediate Organic Chemistry	
CHEM 341 & CHEM 342	Elementary Organic Chemistry and Elementary Organic Chemistry Laboratory	
Biology		
Select one of the following options:		5-8
Option 1:		
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	
GENETICS 466	Principles of Genetics	
Option 2:		
Select two of the following:		
BIOCORE 485	Principles of Physiology	
BIOCORE 486	Principles of Physiology Laboratory	
BIOCORE 587	Biological Interactions	
Additional Physics		
Select one of the following:		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	

PHYSICS 208	General Physics	
Plant Physiology		
BOTANY 500	Plant Physiology	3-4
Plant-Microbe Electives		
Select 5 credits from the following:		5
BIOCHEM 501	Introduction to Biochemistry	
BOTANY 300	Plant Anatomy	
BOTANY 400	Plant Systematics	
or BOTANY 401	Vascular Flora of Wisconsin	
BOTANY/ F&W ECOL/ ZOOLOGY 460	General Ecology	
ENTOM/ ZOOLOGY 302	Introduction to Entomology	
Any PL PATH course above 300		
Total Credits		29-39

[1] MATH 171 is a prerequisite for MATH 217.

[2] MATH 221 Calculus and Analytic Geometry 1/Math 217 is a prerequisite for MATH 222 Calculus and Analytic Geometry 2

PLANT HEALTH AND INDUSTRY TRACK

LSC 270	Marketing Communication for the Sciences	
M H R 300	Managing Organizations	
M H R 305	Human Resource Management	
Total Credits		36-37

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences including Plant Pathology.
2. Appropriately use biological instrumentation and laboratory techniques.
3. Explain and apply the scientific method including designing and conducting experiments and testing hypotheses.
4. Recognize the relationship between structure and function at all levels: molecular, cellular, organismal, and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physical sciences, and technology to answer biological questions using the scientific method.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE PLANT PATHOLOGY FOUR-YEAR PLAN—PLANT-MICROBE BIOLOGY TRACK

Freshman

Fall	Credits	Spring	Credits

Gen Ed[1]	0-10	Gen Ed[1]	0-15
	8-23		9-30

Total Credits 17-53

[1] Gen-Ed requirements include communications, ethnic studies, humanities, social science, or international studies. See Requirements tab for more details.

Note: Possible places where students may cut down on courses: COMM-A placement test, COMM-B taken as ZOOLOGY/BIOLOGY/BOTANY 152, QR-A placement test, AP/IB credits (biology, social sciences, humanities, language, chemistry, physics, math, statistics)

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN PLANT PATHOLOGY

Students in plant pathology are assigned two advisors, the staff advisor, Todd Courtenay (**todd.courtenay@wisc.edu)** and one of our faculty advisors. Current faculty advisors include:

Caitilyn Allen
Jeri Barak (lead faculty advisor)
Amanda Gevens
Mehdi Kabbage
Paul Koch
Richard Lankau
Patty McManus

Undergraduates in plant pathology are required to meet with their advisor before they can enroll for the upcoming term. A hold will be placed on student records until they meet with their advisor.

For more information about the Plant Pathology major or the department in general, please contact either the lead undergraduate advisor, Associate Professor Jeri Barak, or the student services coordinator, Todd Courtenay. Students with questions regarding lab positions (both paid and unpaid) in plant pathology should contact Associate Professor Jeri Barak.

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to plant pathology students please visit our Internship & Job Resources (http://www.plantpath.wisc.edu/student-internships-jobs) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to plant pathology students, please visit the CALS Career Services (https://cals.wisc.edu/academics/undergraduate-students/career-services) page. Students in the major are welcome to make an individual appointment with Todd Courtenay, (**todd.courtenay@wisc.edu**) to discuss career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Undergraduates majoring in plant pathology at UW–Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students' specific academic and career goals. There are numerous opportunities to conduct research with internationally prominent faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the university to stakeholders in Wisconsin and beyond for the betterment of society.

Plant pathology offers paid research internships during summer term, as well as paid or credit-earning research opportunities year-round. Undergraduates get a firsthand view of how research is conducted and what it means to be a professional scientist.

By joining the Plant Pathology Undergraduate Club, majors get to know their fellow students outside the classroom. The department provides resources for students to meet experts who lead discussions on a range of topics including cutting-edge research and technology, career options, and how to apply and compete for jobs.

SOIL SCIENCE

The Department of Soil Science provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion management; soil fertility and plant nutrition; soil physical and chemical characterization; biogeochemistry; urban soils; soil carbon; soil health; soil contaminants; waste management; pedology; and land-use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

The department also serves as the administrative home for the environmental sciences major in the College of Agricultural and Life Sciences.

DEGREES/MAJORS/CERTIFICATES

- Environmental Sciences, B.S. (CALS) (p. 192)
- Soil Science, B.S. (p. 199)

PEOPLE

FACULTY

Assistant Professor Francisco Arriaga

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and non- inversion tillage for traditional cropping systems.

Associate Professor Nicholas Balster

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

Professor Phillip Barak

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

Professor William Bleam

Surface and Colloid Chemistry: Physical chemistry of soil colloids and sorption processes, chemistry of humic substances, factors controlling biological availability of contaminants to microorganisms, magnetic resonance and synchrotron studies of adsorption and precipitation.

Professor Alfred Hartemink

Pedology and Digital Soil Mapping: Pedology, soil carbon; digital soil mapping; tropical soils; history and philosophy of soil science.

Assistant Professor Jingyi Huang

Soil Physics, Proximal and Remote Sensing, Soil Monitoring and Management, Digital Soil Mapping: Application of proximal and remote sensing technologies for understanding the movement of water, heat, gas, and solutes in soils across different spatial and temporal scales; application of physical and empirical models for monitoring, mapping, and managing soil changes due to natural processes and human activities.

Professor Carrie Laboski

Soil Fertility and Nutrient Management: Sustaining agricultural production and environmental quality; elucidate the biogeochemistry and subsequent best management practices for N, P, and K fertilizers and animal manures; soil fertility related to lime, secondary, and micronutrients; evaluation of soil and plant diagnostic tests; development of tools to assist producers, ag. professionals, and regulatory agencies to sustain economically sound production of grain and forage crops.

Professor Joel Pedersen

Environmental Chemistry/Biochemistry: Behavior of organic contaminants, macromolecules, and engineered nanoparticles in natural and engineered environments.

Associate Professor Matthew Ruark

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

Professor Douglas Soldat

Turfgrass and Urban Soils: Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

Professor Stephen Ventura

Geographic Information Systems (joint w/Nelson Institute for Environmental Studies): Geographic information systems (GIS), biofuels and production on marginal lands, public participation GIS, urban agriculture, landscape process modeling, soil survey and soil information systems, land and resource tenure, GIS and land use planning.

Assistant Professor Thea Whitman

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

RESOURCES AND SCHOLARSHIPS

Financial support—in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs—is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph.D. degrees (see the *Graduate Guide*).

ENVIRONMENTAL SCIENCES, B.S. (CALS)

The environmental sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in environmental sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences, and the College of Letters & Science.

The environmental sciences major can be earned in either the College of Agricultural and Life Sciences (CALS) or the College of Letters & Science (L&S) under the bachelor of science (B.S.) or bachelor of arts (B.A.) degree program. An undergraduate B.S. degree is offered through both colleges. A B.A. option is offered through L&S only. Students are encouraged to review the degree requirements for both L&S and CALS and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CALS, the major is housed administratively in the Department of Soil Science.
- In L&S, the major is housed administratively in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus including environmental studies, life sciences communication, agronomy, soil science, landscape architecture, foreign language/culture, and a number of other disciplines.

HOW TO GET IN

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (http://envirosci.wisc.edu/advising).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

REQUIREMENTS FOR THE MAJOR

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of **15 credits** must be completed in the major that are not used elsewhere.

MATHEMATICS AND STATISTICS

This major requires calculus. Prerequisites may need to be taken before enrollment in calculus. Refer to the Course Guide for information about calculus prerequisites.

Code	Title	Credits
Select one of the following:		5-10
MATH 221	Calculus and Analytic Geometry 1 (Recommended)	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 211	Calculus	
Select one of the following:		3
STAT 302	Accelerated Introduction to Statistical Methods	
STAT/MATH 309	Introduction to Probability and Mathematical Statistics I	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-13

CHEMISTRY

Code	Title	Credits
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	5-9
or CHEM 109	Advanced General Chemistry

MAJOR ELECTIVES

There are two ways to complete this requirement, either by distributing 12 credits across at least three categories, or by concentrating those credits in a single category.[1]

DISTRIBUTED ELECTIVES

Students choosing the Distributed Electives path must complete a total of **12 credits** of Environmental Sciences Electives from the categories below, including **at least one course** from **each** category.

Ecology

Code	Title	Credits
AGRONOMY 300	Cropping Systems	3
AGRONOMY/ BOTANY/ SOIL SCI 370	Grassland Ecology	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4

URB R PL/ECON/ ENVIR ST/ POLI SCI 449	Government and Natural Resources	3-4

[1] Students may consult their environmental sciences advisor regarding alternate ways to complete the major electives requirement.

CAPSTONE [1]

Code	Title	Credits
AGRONOMY 500	Senior Capstone Experience	2
BOTANY/ENVIR ST/ F&W ECOL/ ZOOLOGY 651	Conservation Biology	3
CIV ENGR 515	Hydroclimatology for Water Resources Management	3
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	3
F&W ECOL 577	Complexity and Conservation of White-tailed Deer	3
F&W ECOL 590	Integrated Resource Management	3
F&W ECOL 599	Wildlife Research Capstone	3
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	3-4
LAND ARC 611	Senior Capstone in Landscape Architecture	4
LAND ARC 668	Restoration Ecology	3
PL PATH 315	Plant Microbiomes	4
SOIL SCI 499	Soil Management	3

[1] Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise, greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.
4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.
6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

[1] Completion of BIOLOGY/BOTANY/ZOOLOGY 152 fulfills the Communication Part B university requirement.

ADVISING AND CAREERS

ADVISING

Students wishing to declare the environmental sciences major should meet with an academic advisor. Contact information for advisors can be found here (http://envirosci.wisc.edu/advising).

CALS undergraduate students interested in pursuing the environmental sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the environmental sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

CAREERS

A major in environmental sciences serves as excellent preparation for careers of great diversity, including environmental modeling, agricultural scientist, botanist, ecologist, forest ranger, oceanographer, agricultural technician, engineering technician, forester, air and water quality manager, environmental analyst, park ranger, air pollution analyst, environmental consultant, environmental educator, geologist, project manager, environmental engineer, geophysicist, biologist, hazardous waste manager, hydrologist, environmental lawyer, chemical technician, soil conservation technician, chemist, management consultant, teacher, meteorologist, urban and regional planner, civil engineer, environmental planner, microbiologist/wastewater plant operator, natural resource specialist, wildlife manager, conservationist, or zoologist. For more info about careers, please visit our website (http://envirosci.wisc.edu/careers-internships).

PEOPLE

EXECUTIVE COMMITTEE

Nick Balster, Associate Professor, Department of Soil Science
Jonathan Martin, Professor, Department of Atmospheric and Oceanic Sciences

STAFF ADVISORS

Kathryn Jones, Student Services Coordinator (CALS)
Eric Schueffner, Physical Sciences Undergraduate Advisor (L&S)

WISCONSIN EXPERIENCE

As an interdisciplinary cross-college major, students majoring in environmental sciences are involved in a wide array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (https://advising.wisc.edu/content/research-opportunities), volunteering (https://morgridge.wisc.edu), internships (https://envirosci.wisc.edu/careers-internships), and study abroad (https://www.studyabroad.wisc.edu).

Many students are also involved in the Environmental Sciences Organization (ESO) at UW–Madison (https://win.wisc.edu/organization/ESO), a student organization designed primarily for students in the environmental sciences major (both CALS and L&S) but open to students with a strong interest in the field.

SOIL SCIENCE, B.S.

The Department of Soil Science provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion management; soil fertility and plant nutrition; soil physical and chemical characterization; biogeochemistry; urban soils; soil carbon; soil health; soil contaminants; waste management; pedology; and land use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban

planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a Bachelor of Science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 32).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Specific requirements for all majors in the college and other information on academic matters can be obtained from the Office of Academic Affairs (http://www.cals.wisc.edu/academics), College of Agricultural and Life Sciences, 116 Agricultural Hall, 1450 Linden Drive, Madison, WI 53706; 608-262-3003. Academic departments and advisors also have information on requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies and Science), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 34)		1
International Studies (p. 34)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 34)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following courses:		3-5
MATH 112	Algebra	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I [1]	
Select one of the following courses:		3-4
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	

STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	
Chemistry		
Select one of the following options:		5-9
Option 1:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
Option 2:		
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1 (recommended):		
BOTANY/ BIOLOGY 130	General Botany [2]	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
Core		
SOIL SCI 301	General Soil Science	4
SOIL SCI 325	Soils and Landscapes	3
Select one of the following courses:		3
SOIL SCI 321	Soils and Environmental Chemistry	
SOIL SCI 621	Soil Chemistry	
SOIL SCI/ AGRONOMY/ HORT 326	Plant Nutrition Management	
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants	
Select one of the following courses:		3
SOIL SCI 322	Physical Principles of Soil and Water Management	
SOIL SCI 622	Soil Physics	
Select one of the following courses:		3
SOIL SCI/ PL PATH 323	Soil Biology	
SOIL SCI/ MICROBIO 425	Environmental Microbiology	
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry	
Specialization		
Students must complete 1 of 3 specializations: 1. Environmental Soil Science 2. Soil and Food Systems 3. Turf and Grounds (see below)		28-51
Capstone [3]		
Select one of the following courses:		3-4
SOIL SCI 499	Soil Management [4]	
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	
Total Credits		68-99

1 Note that MATH 171 & MATH 217 must be taken as a sequence.

2 BOTANY/BIOLOGY 130 is required by the Turf and Grounds Track.

3 Consult advisor to request permission to substitute another course for the Capstone requirement. Course must meet CALS Capstone Characteristics described in the Undergraduate Catalog and be approved by advisor and 116 Ag Hall.

4 SOIL SCI 499 capstone required for Turf and Grounds Track.

SPECIALIZATIONS WITHIN THE MAJOR

ENVIRONMENTAL SOIL SCIENCE

Code	Title	Credits
Mathematics		
Select one of the following courses:		5
MATH 211	Calculus	
MATH 221	Calculus and Analytic Geometry 1	
MATH 217	Calculus with Algebra and Trigonometry II	
Physics		
Select one of the following courses:		4-5
PHYSICS 103	General Physics (recommended)	
PHYSICS 104	General Physics	
PHYSICS 207	General Physics	
PHYSICS 208	General Physics	
Chemistry		
Select one of the following options:		4-8
Option 1:		
CHEM 311	Chemistry Across the Periodic Table	
CHEM 327	Fundamentals of Analytical Science	
or CHEM 329	Fundamentals of Analytical Science	
Option 2:		
CHEM 341 & CHEM 342	Elementary Organic Chemistry and Elementary Organic Chemistry Laboratory	
Option 3:		
CHEM 343 & CHEM 344 & CHEM 345	Introductory Organic Chemistry and Introductory Organic Chemistry Laboratory and Intermediate Organic Chemistry	
Physical Environment		6-8
Select one course from the following:		
ATM OCN 100	Weather and Climate	
ATM OCN 101	Weather and Climate	

ATM OCN/ SOIL SCI 132	Earth's Water: Natural Science and Human Use
GEOG/ ENVIR ST 120	Introduction to the Earth System
GEOG/ ENVIR ST 127	Physical Systems of the Environment
GEOSCI/ ENVIR ST 106	Environmental Geology
GEOSCI 202	Introduction to Geologic Structures
SOIL SCI 131	Earth's Soil: Natural Science and Human Use
SOIL SCI 321	Soils and Environmental Chemistry
SOIL SCI/ AGRONOMY/ HORT 326	Plant Nutrition Management

Select at least one course from the following:

GEOG/CIV ENGR 320	Geomorphology
ATM OCN/ GEOG 323	Science of Climate Change
GEOG/ ENVIR ST 325	Analysis of the Physical Environment
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality
SOIL SCI/ F&W ECOL/ HORT 524	Urban Soil and Environment
SOIL SCI 621	Soil Chemistry
SOIL SCI 622	Soil Physics
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants
AGRONOMY/ATM OCN/SOIL SCI 532	Environmental Biophysics
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology
GEOG 578	GIS Applications

Living Environment 9-14

Select one course from the following:

AGRONOMY 100	Principles and Practices in Crop Production
AGRONOMY 300	Cropping Systems
GEOG/ ENVIR ST 309	People, Land and Food: Comparative Study of Agriculture Systems
ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources
HORT 345	Fruit Crop Production
HORT 370	World Vegetable Crops
AGROECOL 400	Study Abroad in Agroecology
SOIL SCI/ AGRONOMY/ BOTANY 370	Grassland Ecology
SOIL SCI/ MICROBIO 425	Environmental Microbiology
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry

Select one course from the following:

BOTANY/F&W ECOL/ZOOLOGY 460	General Ecology
F&W ECOL 550 & F&W ECOL 551	Forest Ecology and Forest Ecology Lab
GENETICS 466	Principles of Genetics
BOTANY 500	Plant Physiology
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry
GENETICS 545	Genetics Laboratory
BOTANY 563	Phylogenetic Analysis of Molecular Data
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants
SOIL SCI/ CIV ENGR/ M&ENVTOX 631	Toxicants in the Environment: Sources, Distribution, Fate, & Effects

Select one of the following options:

Option 1:	
MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory
Option 2:	
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory
Option 3:	
BOTANY 330 & BOTANY/ PL PATH 332	Algae and Fungi

Environmental Policy, Management, and Analysis 9-12

Select one of the following courses:

SOIL SCI/ENVIR ST 101	Forum on the Environment
ENVIR ST 112	Environmental Studies: Social Science Perspectives
ENVIR ST 113	Environmental Studies: Environmental Humanities
ENVIR ST/ILS 126	Principles of Environmental Science
ENVIR ST/GEOG 127	Physical Systems of the Environment
A A E/F&W ECOL 652	Decision Methods for Natural Resource Managers
SOIL SCI/ENVIR ST 575	Assessment of Environmental Impact
GEOG/ SOIL SCI 526	Human Transformations of Earth Surface Processes

Select one of the following courses:

ECON 101	Principles of Microeconomics
ECON 111	Principles of Economics-Accelerated Treatment

A A E 215	Introduction to Agricultural and Applied Economics
A A E/ ENVIR ST 244	The Environment and the Global Economy
A A E 319	The International Agricultural Economy
ENVIR ST/ M&ENVTOX/PL PATH 368	Environmental Law, Toxic Substances, and Conservation
Select one of the following courses:	
ENVIR ST/ F&W ECOL/G L E/ GEOG/GEOSCI/ LAND ARC 371	Introduction to Environmental Remote Sensing
ENVIR ST/ F&W ECOL/G L E/ GEOG/GEOSCI/ LAND ARC 372	Intermediate Environmental Remote Sensing
ENVIR ST/LAND ARC/SOIL SCI 695	Applications of Geographic Information Systems in Natural Resources
Total Credits	37-52

SOIL AND FOOD SYSTEMS

Code	Title	Credits
Physical Environment		8-10
Select one of the following courses:		
ATM OCN 100	Weather and Climate	
SOIL SCI/ ATM OCN 132	Earth's Water: Natural Science and Human Use	
ATM OCN 101	Weather and Climate	
ATM OCN/ GEOG 323	Science of Climate Change

HORT 120	Survey of Horticulture	
HORT/ PL PATH 262	Turfgrass Management Laboratory	
HORT 461	Advanced Turfgrass Management and Physiology	

[1] Counts toward Soil Science Major Biology requirements, above.

HONORS IN THE MAJOR

Admission to the Honors Program is not competitive provided students meet the required admission criteria.

Admission Criteria for New Freshmen:

- In the upper 10% of their high school graduating class
- ACT score of 28 or higher
- SAT score of at least 1240

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25

Highly motivated students can apply for admission to the program in the absence of these requirements by including a letter with their application addressed to the Honors Dean in 116 Agricultural Hall explaining why they should be in the program.

HOW TO APPLY

Apply to the program online (https://cals.wisc.edu/wp-content/uploads/2017/05/honorsapplication_form.pdf) or pick up an application in the Office of Academic Affairs, 116 Agricultural Hall. Applications are accepted at any time.

New freshmen will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after meeting with the advisor for that major by completing the application form and selecting Honors in the Major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after meeting with the major advisor).

HOW TO CANCEL PARTICIPATION

Students who are no longer interested in pursuing Honors should complete the form to cancel their participation. Students may cancel their participation at any time, and this will not be noted on the student's transcript.

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take SOIL SCI 681 Senior Honors Thesis and SOIL SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. To instill in our undergraduate majors the knowledge base required for them to intelligently discuss, debate and communicate those aspects of soil science pertinent to their degree, specialization and career goals.
2. To provide our undergraduates with the skills and experience needed to identify and solve problems and issues of the types they may encounter in their professions.
3. To ensure that our undergraduates possess an awareness of and an appreciation for the potential impacts of soil, water, crop and waste management practices, and land use on the quality of the environment.

ADVISING AND CAREERS

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students should contact the undergraduate coordinator, Julie Garvin (jgarvin2@wisc.edu, 608-262-2239), with questions.

Most of our graduates find employment in a diversity of private and commercial enterprises and governmental agencies. Recent examples of employment include laboratory technician, turf and grounds manager, agrichemical sales representative, environmental scientist, land use planner, land zoning administrator, project manager, wetlands delineator, and hydrogeologist. Approximately 12% of our undergraduates pursue advanced degrees.

PEOPLE

FACULTY

Assistant Professor Francisco Arriaga

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and non- inversion tillage for traditional cropping systems.

Associate Professor Nicholas Balster

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

Professor Phillip Barak

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

Professor William Bleam

Surface and Colloid Chemistry: Physical chemistry of soil colloids and sorption processes, chemistry of humic substances, factors controlling biological availability of contaminants to microorganisms, magnetic resonance and synchrotron studies of adsorption and precipitation.

Professor Alfred Hartemink

Pedology, Digital Soil Mapping: Pedology; soil carbon; digital soil mapping; tropical soils; history and philosophy of soil science.

Assistant Professor Jingyi Huang

Soil Physics, Proximal and Remote Sensing, Soil Monitoring and Management, Digital Soil Mapping: Application of proximal and remote sensing technologies for understanding the movement of water, heat, gas, and solutes in soils across different spatial and temporal scales; application of physical and empirical models for monitoring, mapping, and managing soil changes due to natural processes and human activities.

Professor Carrie Laboski

Soil Fertility and Nutrient Management: Sustaining agricultural production and environmental quality; elucidate the biogeochemistry and subsequent best management practices for N, P, and K fertilizers and animal manures; soil fertility related to lime, secondary, and micronutrients; evaluation of soil and plant diagnostic tests; development of tools to assist producers, ag.

professionals, and regulatory agencies to sustain economically sound production of grain and forage crops.

Professor Joel Pedersen

Environmental Chemistry/Biochemistry: Behavior of organic contaminants, macromolecules, and engineered nanoparticles in natural and engineered environments.

Associate Professor Matthew Ruark

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

Associate Professor Douglas Soldat

Turfgrass and Urban Soils: Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

Professor Stephen Ventura

Geographic Information Systems (Joint w/Nelson Institute for Environmental Studies): Geographic information systems (GIS), biofuels and production on marginal lands, public participation GIS, urban agriculture, landscape process modeling, soil survey and soil information systems, land and resource tenure, GIS and land use planning.

Assistant Professor Thea Whitman

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

WISCONSIN EXPERIENCE

Students majoring in soil science are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (https://envirosci.wisc.edu/resources), volunteering (https://morgridge.wisc.edu), internships (https://envirosci.wisc.edu/careers-internships), and study abroad (https://www.studyabroad.wisc.edu).

The department also has a UW–Madison Soils Club (http://www.soils.wisc.edu/soils_club), a student organization designed primarily for students in the soil science major but open to students with a strong interest in the field.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support—in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs—is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph. D. degrees—see the *Graduate Guide* (http://guide.wisc.edu/graduate).

COLLEGE OF ENGINEERING

Engineers design products and develop solutions to society's national and global challenges. The variety of engineering projects requires engineers to have an understanding of people and their values. Engineers blend their knowledge and practical experience with their communication and teamwork skills to work as members of diverse, multidisciplinary teams. Engineers frequently make decisions affecting the development of society and the direction it will take.

The University of Wisconsin–Madison College of Engineering is one of the best places in the world for an engineering education. The outstanding curriculum and the world-class faculty focus on providing students with the technological tools, resources, and knowledge to develop solutions to problems in fields ranging from medicine to energy to manufacturing—and many more.

In the classroom and in the lab, students study and grow their skills, yet they also enrich their academic experience outside of the classroom through opportunities such as international study, field research, internships, laboratory experience, and entrepreneurial opportunities.

Learning isn't confined to the classroom. It can happen anywhere—in the Engineering Hall study lounge, in the state-of-the-art makerspace, or in casual conversation on Engineering Mall. As Badger engineers, students are surrounded by some of the smartest, most innovative people in the world. The faculty do more than teach. They immerse students in interdisciplinary activities and offer real design challenges—and students can actually design and build products that solve those challenges.

In a college internationally renowned for its research, there also are many opportunities for undergraduate students to work directly with faculty members to propose and conduct research, and to publish and patent their results.

The Wisconsin Experience is not limited to academics. Across the university, there are a host of ways to get involved in the campus community. From the UW Marching Band to student government, students can find a home at UW.

A College of Engineering education will not only offer students the time of their lives, it will also prepare them to change life as we know it.

DEGREES/MAJORS/CERTIFICATES

- Biology in Engineering for Engineering Majors, Certificate (p. 218)
- Biomedical Engineering, B.S. (p. 220)
- Chemical Engineering, B.S. (p. 228)
- Civil Engineering, B.S. (p. 235)
- Computer Engineering, B.S. (p. 249)
- Electrical Engineering, B.S. (p. 254)
- Engineering for Energy Sustainability, Certificate (p. 266)
- Engineering Mechanics, B.S. (p. 269)
- Engineering Physics, B.S. (p. 276)
- Engineering Thermal Energy Systems, Certificate (p. 301)
- Geological Engineering, B.S. (p. 242)

- Industrial Engineering, B.S. (p. 290)
- International Engineering, Certificate (p. 260)
- Manufacturing Engineering, Certificate (p. 302)
- Materials Science and Engineering, B.S. (p. 296)
- Mechanical Engineering, B.S. (p. 304)
- Naval Science, BNS (p. 261)
- Nuclear Engineering Materials, Certificate (p. 281)
- Nuclear Engineering, B.S. (p. 282)
- Technical Communication, Certificate (p. 262)
- Technical Japanese Studies for Undergraduates, Certificate (p. 265)

PEOPLE

"If you think of the challenges that we face—energy, transportation, clean air and water, building the next generation of computing and communications technologies as we use up our raw materials —those are problems engineers must address. I'd like our students and faculty to take the leadership role in solving those problems in their classrooms and research."

—Dean Ian Robertson

COLLEGE OF ENGINEERING LEADERSHIP (HTTPS://WWW.ENGR.WISC.EDU/ABOUT/LEADERSHIP)

Dean: Ian M. Robertson
Executive Associate Dean: David A. Noyce
Associate Dean for Research and Graduate Affairs: Darryl Thelen
Associate Dean and Chief Financial Officer: Adam Whitehorse
Associate Dean for Undergraduate Affairs: Manuela Romero
Associate Dean for Advancement: Cathleen Walters
Associate Dean for Engineering Professional Development: Edward G. Borbely
Director of Faculty Development: Douglass Henderson

ENTERING THE COLLEGE

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

POLICIES AND REGULATIONS

REGULATIONS

Official regulations regarding enrollment, scholarship, and graduation for undergraduates in the College of Engineering.

A printer-friendly PDF can be found on the College of Engineering Regulations page (https://ugregulations.engr.wisc.edu).

ADMISSIONS

1. Direct Admission

New students are admitted directly to the degree program (major) of their choice or to the College of Engineering as Engineering Undecided. Progression requirements must then be satisfied as described in Regulations 3–7.

2. Degree Programs (Majors)

Biomedical Engineering (BME)
Chemical Engineering (CHE)
Civil Engineering (CEE)

Computer Engineering (CMPE)
Electrical Engineering (EE)
Engineering Mechanics (EM)
Engineering Physics (EP)
Geological Engineering (GLE)
Industrial Engineering (IE)
Materials Science and Engineering (MSE)
Mechanical Engineering (ME)
Nuclear Engineering (NE)

PROGRESSION

3. First Year Progression Requirements

To automatically progress in a College of Engineering (CoE) degree program (major) after direct admission or to switch between engineering degree programs, students must complete the following requirements after their first two semesters of residency at UW–Madison:

A. 24 credits completed at UW–Madison. Special topics, independent study, seminar, pass/fail, and credit/no credit courses will not be included in the 24 credits except for required English as a Second Language courses.
B. General Education Communications Part A (Comm A) requirement. If Comm A is not completed as a graded course at UW–Madison (i.e., completed through placement test, AP/IB, or transfer credit), then a liberal studies course of at least 3 credits with a breadth designation of Humanities, Literature, or Social Sciences must be taken on a graded basis at UW–Madison.
C. Introduction to Engineering: course specified by degree program or INTEREGR 170 Design Practicum for Engineering Undecided students.
D. Math course sequence through MATH 222 Calculus and Analytic Geometry 2 or MATH 276 Topics in Calculus II
E. Four core courses, required for engineering degree programs (majors), completed at UW–Madison, as defined below:

1. **Math**: A minimum of two math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above; or one math course 300 level or above. If the math requirement for the degree program (major) is complete or the student has completed the calculus sequence through MATH 234 Calculus--Functions of Several Variables, then additional math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above or additional courses from the science requirement in Regulation 3.E.2. can be taken to complete the four core course requirement. Excludes MATH 228 WES Calculus Supplement, MATH/HIST SCI 473 History of Mathematics, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

2. **Science**: A minimum of two science courses required for engineering degree programs (majors) as defined in the table below. If the math and science requirements for the degree program are complete, then departmental engineering courses 200 level and above can be taken to complete the four core course requirement. Excludes EPD, InterEGR, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

- For Chemical Engineering majors, the following science requirements apply:
  i. One course must be CHEM 104 General Chemistry II or higher
  ii. One course must be PHYSICS 201 General Physics/E M A 201 Statics or higher

If above two requirements are completed, select from additional science courses below.

- For majors in Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Engineering Physics, Geological Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, and Nuclear Engineering, the following science requirements apply:
  i. One course must be either CHEM 104 General Chemistry II or higher OR PHYSICS 201 General Physics/E M A 201 Statics or higher
  ii. One other science course, from the following:
    - Chemistry, all classes
    - E M A 201 Statics, E M A 202 Dynamics, M E 240 Dynamics
    - PHYSICS 201 General Physics and above
    - Statistics, calculus-based
    - E P 271 Engineering Problem Solving I
    - COMP SCI 200 Programming I and COMP SCI 300 Programming II or above, excluding COMP SCI 304 WES-CS Group Meeting
    - Excludes special topics, independent study, seminar, pass/fail, and credit/no credit courses

F. Core and Overall GPA requirements must be satisfied as defined by CoE departments for each engineering degree program (major) (http://progression.engr.wisc.edu). All graded UW–Madison courses referenced in E.1. and E.2. above and any departmental engineering courses level 200 or above will be counted in the Core GPA (excludes EPD, InterEGR, special topics, independent study, and seminar courses). All graded UW–Madison courses are counted in the Overall GPA. For one and only one of these core courses that a student has repeated, the more recent of the two grades will be used in the calculation of Core and Overall GPAs. Students may not be on academic probation for GPA reasons for automatic completion of first year progression requirements.

Students who do not meet the first year progression requirements to automatically progress in a degree program (major) can be considered for non-automatic progression (Regulation 4) or extension (Regulation 5).

4. Consideration for Non-Automatic Progression

Students who do not meet progression GPAs but meet all other progression requirements will be considered for progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends.

5. Extension for First Year Progression Requirements

A. Students who will not meet progression requirements due to University of Wisconsin placement and/or assessment tests

(math and ESL) will be granted a one semester extension up to their fourth semester if they are making satisfactory progress in a degree program (major).

B. Students who do not meet the requirements in Regulation 3 may apply for a one semester extension but not beyond their fourth semester. Students granted extensions will be considered for non-automatic progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends. Extensions will be evaluated only in cases where it is mathematically possible during the one semester extension to meet progression GPAs for intended program.

6. Diversity of Student Body

When the number of non-automatic considerations and/or applications for admission to a degree program (major) exceed the capacity of that program, progression and admission will be limited to capacity. In order to implement the University's goals of achieving a heterogeneous and diverse student body, selection of students under consideration or admission to a program operating at capacity will be based on demographic background, written statement, rigor of completed courses, and grade trends.

7. Progression Requirement Completion and Extension Application

Students are required to submit to the dean's office an application for progression for a degree program (major) or an application for an extension by the deadline. Deadlines will be posted on the College of Engineering website at Progression Requirements (http://progression.engr.wisc.edu) and emailed to students in the College of Engineering.

REGISTRATION

8. Definitions

A. Full-time student: One carrying a minimum credit load of 12 credits. All students are expected to be full-time unless they have the permission of the dean to be part-time. A student carrying less than the minimum credit load without the dean's permission will be placed on probation at the end of the semester.

B. Part-time student: One who has the dean's permission to carry less than the minimum credit load (Regulation 9.F.).

C. Semester: A term of 15 weeks minimum duration.

D. Session: A term of less than 15 weeks duration (e.g., summer session or intersession).

E. Modular Course: A course that is offered during a semester, but which lasts fewer than 15 weeks.

9. Credit Load Constraints

A. Maximum credit load: 20 enrolled credits per semester.

B. Minimum credit load: 12 enrolled credits per semester or enrolled for one cooperative education program credit as an engineering co-op student during a co-op work period.

C. For sessions there is no minimum credit load; the maximum credit load equals the number of weeks in the session.

D. A student not on academic probation may freely choose to carry any number of credits between a minimum credit load and a maximum credit load.

E. A student may carry more than a maximum credit load only with the recommendation of an advisor and with written approval of the dean.

F. Part-time student: A student who wishes to carry less than a minimum credit load in a specific semester for definitive reasons—e.g., a verifiable disability, or a necessity of employment or other outside obligations exceeding 15 hours per week—must request written permission from the dean to become a part-time student. Part-time permissions must be renewed during the first two weeks of each semester. Part-time students must satisfy all regulations other than the minimum credit load. For any semester for which part-time permission is granted and the one following it, the academic status of the student is the responsibility of the student.

G. A student on academic probation is advised to carry not more than 14 credits per semester unless repeating a course. For every three credits being repeated, the student is advised to carry not more than one additional credit beyond 14, up to a maximum of 16 credits.

10. Student Responsibility for Scheduling

Each student is responsible for arranging a course list that will permit satisfactory progress towards degree requirements and a class schedule that (a) avoids class and final exam scheduling conflicts, (b) avoids an excessively demanding final exam schedule, and (c) verifies registration in chosen classes.

11. Access to Courses

Departments may specify courses as not open to students who need to complete progression requirements, or as open only to students in a specific degree program (major).

12. Transfer of Degree Applicable Credits

A course taken anywhere other than UW–Madison, or by independent study or resident extension, is transferable to the College of Engineering, in credits only, if it is transferable to the UW–Madison. The course counts toward graduation only if it satisfies a graduation requirement of the curriculum to which it is to be applied and only if it was passed with a grade of C (2.0 on a 4.0 scale) or better.

13. Transfer of Grades

Grades for courses taken anywhere other than UW–Madison are not transferable, even if the credits for those courses are transferable.

14. Adding Courses

Within other limits of these regulations a student may add full-semester courses only during the first two weeks of classes. (Regulation 19).

15. Dropping Courses

Within other limits of these regulations, a student may drop full-semester courses only during the first nine weeks of classes. Courses dropped after two days before the last day to add courses are noted on the transcript as DR. (Regulations 14, 19 and 22.G.).

16. Course Substitutions

A student may substitute courses that deviate from the requirements of a published curriculum of the College of Engineering upon the recommendation of the student's degree-granting department and with the approval of the college governance committee.

17. Pass/Fail and Credit/No Credit Courses

Pass/fail is a student-option alternative way of being graded in a regularly graded course. Credit/no credit describes courses approved for two-level grading and is not a student option.

A student may change the grading option of a full-semester course to or from pass/fail only during the first four weeks of classes. (Regulation 19). These courses must be free electives. Only students in good standing may elect the pass/fail privilege.

The pass/fail agreement is between the student and the Registrar, and is not revealed to the person teaching the course. The person teaching the course submits the appropriate letter grade to the Registrar, who converts C or higher grades to S (Satisfactory), D and F grades to U (Unsatisfactory).

Courses designated as credit/no credit will not be counted in determining the number of pass/fail courses the student may elect.

18. Audited Courses

A student may audit a course only if the instructor consents. Auditors are expected to attend with a reasonable regularity and to participate in the class, as determined by the instructor. Audited courses carry no degree credit, do not count in determining the minimum number of credits permitted in each term, and are not included in the calculation of the GPA. The only valid grade for audited courses is a grade of S (Satisfactory) or NR (No Report). A student may change to or from credit to audit only during the first four weeks of classes (Regulation 19).

19. Courses Scheduled for Fewer Than 15 Weeks

Deadlines for sessions and modular courses are listed on the Office of the Registrar's website.

PERFORMANCE AND EVALUATION

20. Attendance

Each student is expected to attend all assigned classes during the regular meeting times, and take all of the examinations for those courses at the regularly scheduled times. In the case of course or examination absences excused for a reason acceptable to the course instructor, the student is expected to make up the work within a reasonable time, and may do so without a grade penalty.

21. Grading System

Course grades are reported by letter only; plus and minus grades are not authorized. The following grades are included in computing grade point average (GPA) and point-credit ratio (PCR).

Grade: A

Grade Points: Excellent

Per Credit: 4.0

Grade: AB

Grade Points: Intermediate

Per Credit: 3.5

Grade: B

Grade Points: Good

Per Credit: 3.0

Grade: BC

Grade Points: Intermediate

Per Credit: 2.5

Grade: C

Grade Points: Fair

Per Credit: 2.0

Grade: D

Grade Points: Poor

Per Credit: 1.0

Grade: F

Grade Points: Failure

Per Credit: 0.0

22. Special-Purpose Grades

The following ways of reporting course grades are also used and, except for NR, do not affect GPA or PCR

A. S (Satisfactory) or U (Unsatisfactory) — used to report pass/fail courses (Regulation 17). S is also used in audited courses (Regulation 18).
B. CR (Credit) or N (No Credit) — used to report credit/no credit courses (Regulation 17).
C. NR (No Report) — signifying that no grade has been reported to the Registrar's Office — a temporary grade that must be replaced by an A-F grade; also used for a permanent grade in audited courses (Regulation 18).
D. NW (No Work) — student enrolls in a course and then never attends. This means that instructor has no evidence that student ever attended.
E. I (Incomplete) — a temporary grade (Regulation 27); EI is used for an extended incomplete (requires a dean's action); IN is used to indicate an incomplete in a credit/no credit course; PI is used for a permanent incomplete (Regulation 28).
F. P (Progress) — a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.
G. DR (Dropped) — indicates the course was dropped after the initial drop deadline noted on the Office of the Registrar's website.
H. W (Withdrew) — indicates the student withdrew from the university after the initial drop deadline noted on the Office of the Registrar's website.

23. Course Grade Changes

The final course grade may be changed only by the professor in charge of the course section, and then only to correct a clerical error in the computation or reporting of the original grade.

24. Grade Point Average (GPA) and Point-Credit Ratio (PCR)

Grade point average (GPA) is computed by dividing the total number of grade points earned at UW–Madison by the total number of credits attempted (excluding pass/fail or credit/no credit courses)

at UW–Madison. The point-credit ratio (PCR) differs from the grade point average in that it involves only those credits that count toward graduation and the related grade points. When a course is repeated, the credits and grade points earned only for the final attempt are included in the point-credit ratio.

25. Dean's Honor List

At the end of each semester the names of all full-time students in good standing with a 3.5 or higher semester GPA and cumulative GPA of at least 3.0 will be included on the Dean's Honor List. Students must have received no incompletes and no unreported grades. A notation of "Dean's Honor List" and date will be entered on the student's transcript.

26. Repeating Courses

Any course may be repeated at the student's option. In the case of a required course in which the student earned a grade of D and which is a prerequisite to another required course, the student is encouraged (or may be required by departmental regulation) to repeat the course. For courses taken more than once, all grades count in the grade point computations, but only the last grade for the course is applied to the student's point-credit ratio.

27. Incomplete

An incomplete may be reported for a student who has carried a subject with a passing grade, but because of illness or other unusual and substantiated cause beyond the student's control has been unable to complete the final examination or some limited amount of term work. A student who stays away from a final examination without proof of being prevented from attending as indicated above will receive a grade of F, N, or U (whichever is appropriate). Even with such proof, if the term work has convinced the instructor that the student cannot pass, the grade shall be F, N, or U (whichever is appropriate).

28. Resolution of an Incomplete

At the instructor's option, a course marked incomplete may be completed at any time no later than last day of class of the student's next semester of attendance at UW–Madison, or it will lapse into a fail. An incomplete may not be removed after five years of absence from UW–Madison without special permission of the dean. Such an incomplete remains on the record with a grade of PI and does not lapse into an F, N, or U.

29. Final Exam Rescheduling

A student may be permitted to take an examination at other than the regularly scheduled time only with permission of the instructor. Permission will be granted only for illness or other unusual and substantiated cause beyond the student's control. (Regulation 10).

30. Withdrawal

In order to withdraw from the University a student should consult an advisor and must obtain the dean's signature for the official withdrawal. Grades of W will be recorded for courses in progress if the student withdraws after 2 days before the last day to add classes (Regulations 14, 19 and 22.H.).

A. After eight weeks of classes but prior to the last three weeks of scheduled classes, such withdrawal will be approved by the dean only for non-academic reasons or to transfer out of the College of Engineering.
B. No official withdrawal will be granted in the last three weeks of scheduled classes. Grades of Incomplete, if justified (Regulation 27), or F, N, or U (instead of W) will be recorded for students who leave the University during this time.

31. Year Classification

The year classification of a student is determined by the number of credits passed and the number of grade points earned, applicable to the student's degree, as indicated by the following tabulation:

Freshman
Numerical Classification of Year: 1
Minimum Credits Passed: 0
Minimum Grade Points Earned: 0

Sophomore
Numerical Classification of Year: 2
Minimum Credits Passed: 24
Minimum Grade Points Earned: 48

Junior
Numerical Classification of Year: 3
Minimum Credits Passed: 54
Minimum Grade Points Earned: 108

Senior
Numerical Classification of Year: 4
Minimum Credits Passed: 86
Minimum Grade Points Earned: 172

For the purpose of year classification only, pass/fail and credit/no credit courses and courses transferred from another campus are assumed to have earned 2.0 grade points per credit.

32. Good Standing

A student is in good academic standing unless on academic probation or dropped.

33. Probation

A student is placed on academic probation when that student has, in the semester just completed,

A. Attained less than a 2.0 GPA; or
B. Passed fewer than 12 credits without part-time permission from the dean.

Once on probation, the student is continued on probation until either removed from probation or dropped (Regulations 8.A., 9.F., and 37).

34. Removal From Probation

All of the following requirements must be satisfied for the removal of a student from academic probation (Regulation 37):

A. A cumulative GPA of at least 2.0;
B. A GPA of at least 2.0 for the semester just completed;
C. At least 12 credits passed in the semester just completed;
D. A total of at least 24 degree credits passed in the two most recent semesters in residence.

35. Drop (Regulation 37)

A. A student on academic probation will be dropped at the end of any semester for which that student has attained a GPA of less than 2.0, or passed fewer than 12 credits without part-time permission from the dean, or passed

less than 3/4 of the credits attempted as a part-time student.

B. A student not on academic probation will be dropped at the end of any semester for which that student has passed less than half of the credits attempted.

36. Readmission

A student who has been dropped for academic reasons may be readmitted by the dean only after the student has been out of the College of Engineering for at least one semester.

37. Session Actions

No academic actions (probation, drop, removed from probation) will be taken at the end of sessions (Regulation 8.D.).

38. Graduation

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all the following graduation requirements have been met:

A. Have fulfilled the published graduation requirements of that curriculum, with all substitutions formally approved, and have achieved a minimum 2.0 GPA overall.

B. Have a PCR (Regulation 24) of at least 2.0 for those semesters and sessions containing the last 60 credits taken at UW–Madison or for all credits taken at UW–Madison if fewer than 60.

C. A departmental PCR of at least 2.0 for all courses taken in the degree-granting department that count toward graduation.

D. Have completed at least 30 credits in residence in the College of Engineering, including 15 credits of work in the degree-granting department.

E. Have completed the last two semesters in residence in the College of Engineering as a full-time student.

F. Have a GPA of at least 2.0 both for the last semester and also for the combined last two semesters.

39. Graduation with Distinction and Highest Distinction

Students who have earned at least 60 credits on the University of Wisconsin–Madison campus and whose total cumulative GPA is in the top 5 percent of the College graduating class will receive the designation "Graduated With Highest Distinction," or if in the next 15 percent, "Graduated with Distinction." The appropriate designation is entered as a permanent record on the student's transcript.

APPEAL

40. Appeal

The Dean of the College of Engineering has the authority to suspend or modify the operation of these regulations if their enforcement is judged to work an injustice to the student.

POLICIES

ACCREDITATION

The following engineering undergraduate degree programs described in this catalog are accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org):

Biological Systems Engineering (with College of Agricultural and Life Sciences)
Biomedical Engineering
Chemical Engineering
Civil Engineering
Computer Engineering
Electrical Engineering
Engineering Mechanics
Geological Engineering
Industrial Engineering
Materials Science and Engineering
Mechanical Engineering
Nuclear Engineering

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

ADDITIONAL MAJOR

Engineering students may earn an additional major and have the additional major noted on their transcript at the time of graduation. This includes most majors in the College of Letters & Science as well as Education Studies and Theatre & Drama in the School of Education. To qualify, the student must have approval in advance from both the department offering the major and the academic dean of the College of Engineering. Students must satisfy all requirements for their declared additional major prior to or concurrently with the engineering degree. For further details, contact the College of Engineering Dean's Office, 2620 Engineering Hall.

Adding additional majors from colleges other than Letters & Science and majors not approved in the School of Education is not accepted. For example, majors such as art (School of Education) and forestry (College of Agricultural and Life Sciences) cannot be completed in conjunction with an engineering degree. Likewise, students cannot pursue more than one undergraduate engineering degree concurrently.

STUDENT GRIEVANCES

In compliance with Title IX regulations, the College of Engineering has a grievance procedure to handle student complaints. Students should follow these steps until a resolution is achieved:

1. Attempt to resolve the grievance directly with the individual involved.
2. If that approach seems unsatisfactory, and the grievance involves a teaching assistant (TA), consult the professor in charge of the course.
3. If necessary, discuss the grievance with the appropriate department chair.

4. The next level involves the academic dean. Students should contact Manuela Romero in 2620 Engineering Hall or at mromero@wisc.edu.
5. All students have the right to appeal to the dean of the college, Ian Robertson, 608-262-3482, if they feel their case has not been justly handled by another dean.
6. Only a few grievances are really serious and difficult to resolve. In these instances, the dean seeks a solution that, as best as can be determined, is appropriate, just, legal and in the best interests of all concerned.

AUTHORITY LIMITS ON GRADES

There are areas in which the dean does not have authority to override an instructor, such as determination of a student's grade. However, it has happened that the department chair has intervened, for example, by having a grade determined by committee rather than by the course instructor.

It has also occurred, by agreement between deans, department chairs and faculty, that a misgraded course was dropped from the student's record and credit given for the controversial course by having the student pass the next higher course.

GRIEVANCE EXAMPLES

The following is a list of student grievances (in no particular order of frequency or importance) that have occurred:

- Discrimination based on sex, religion or political views
- Course or exam grade disputes
- Required class or examination attendance at other than regularly scheduled (timetable) times
- Changes in course content contrary to catalog description or division approval
- Difficulty in obtaining space in a critical course
- Personality conflicts between student and instructor
- Difficulty obtaining an appointment with instructor
- Unwillingness of instructor to estimate a grade before the course drop deadline date
- Teaching above the level of the class, which includes the assumption of an unlisted course prerequisite
- Intelligibility of instructors, especially those for whom English is a second language
- Excessive instructor class absences
- Rescheduled final exams by majority approval or apparent unanimity, to possible disadvantage of the minority
- Sexual harassment (Contact Manuela Romero, 608-262-3484; Jason Jankoski, 608-890-0921; or the Division of Student Life, 75 Bascom Hall, 608-263-5700)

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING CURRICULA

The graduation requirements for each of the engineering degrees are presented in the form of four-year programs of study. These four-year schedules are available, but rarely followed without deviation. Some students can proceed more rapidly; many must proceed more slowly and take nine or more semesters to complete the degree. Flexibility in course selection is also present though elective categories within curricula.

All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org)**. Among other criteria, ABET requires that students complete:**

- One year of a combination of college-level mathematics and basic sciences (some with experimental experience) appropriate to the discipline.
- One and one-half years of engineering topics, consisting of engineering sciences and engineering design appropriate to the student's field of study.
- A general education component that complements the technical content of the curriculum and is consistent with the program and institution objectives.
- In addition, students must be prepared for engineering practice through the curriculum, culminating in a major design experience based on the knowledge and skills acquired in earlier coursework and incorporating appropriate engineering standards and multiple realistic constraints.

Engineering curricula continuously evolve. The requirements that apply to a particular student are determined by the date (catalog year) that a student enters a degree-granting program. At that point, the curriculum becomes fixed throughout the period it takes for a student to complete the degree, although new changes that benefit a student can be adopted by a particular student if he or she so chooses.

The curricular descriptions below do not address how these requirements are satisfied; students seldom need to be concerned with these details. However, if deviations from a curriculum are requested, they must not violate any of the accreditation requirements.

DEVIATION FROM PRESCRIBED CURRICULA

Circumstances deemed acceptable for deviating from the outlined engineering curricula are included in each departmental description. The choice of courses to fulfill elective credit requirements provide students with considerable flexibility in their programs. In addition, some departments permit the substitution of elective courses for required ones and also offer outstanding undergraduate students the opportunity to enroll in graduate courses. These options aid the student in tailoring a course of study to meet personal goals more closely.

DEFINITION OF ELECTIVES

There are general types of elective courses including technical electives, liberal studies and free electives.

Technical electives are limited to courses in engineering and closely related fields.

Liberal studies electives are those courses that are classified as either humanities, literature, social studies or as foreign language.

Free electives are courses completely free of any restrictions or requirements other than the course prerequisites.

Other specific elective requirements are established and described in department curricula.

To assist the student in gaining a better understanding of individuals and societies, and to reduce problems of transferring from one curriculum to another, engineering curricula require adherence to the Liberal Studies Guidelines (see below). Some require slight variations from those guidelines.

INDEPENDENT STUDY

Students who have high grade point averages may satisfy some elective credits by independent study of subjects or problems suitable for analytical investigative work. The student must identify a professor who is willing to supervise study of interest to the student. Together they must agree upon the work to be done, the credits earned (usually 1-3), and the course number (199, 299, 399, 499, 599, or 699) for which the student is to enroll before the beginning of a semester. Weekly meetings with the professor to discuss questions and report progress are customary.

LIBERAL STUDIES GUIDELINES

The College of Engineering requires one semester's worth of liberal elective courses in humanities, literature and social science for graduation. The college specifies that students should obtain both **breadth** (i.e., both social science *and* literature or humanities), and **depth** (i.e., more than one course in the same department).

The college has established general liberal elective guidelines that have been adopted by all departments, some of which have additional stipulations (see below).

FOR ALL ENGINEERING STUDENTS

As a graduation requirement, and to fulfill campus general education guidelines, all engineering undergraduate students must take 15 or 16 credits of liberal electives. These credits must fulfill the following subrequirements.

1. A minimum of two courses from the same department or program. At least one of these two courses must be above the elementary level. (i.e., must have I, A, or D level designator), as indicated in Course Guide.
2. A minimum of 6 credits designated as humanities or literature, and an additional minimum of 3 credits designated as social science. Foreign language courses count as humanities credits.[1]
3. At least one course of at least 3 credits designated as ethnic studies (lower case "e" in the Course Guide). These credits may help satisfy subrequirements 1 or 2 as well, but they count only once toward the total required credits.

[1] **Exception:** "Retrocredits," which are credits awarded by foreign language departments for successful completion of a higher level course, do not count toward this subrequirement, nor toward the total credits required (15 or 16). They are still helpful: If a student completes one foreign language course at the intermediate level and is awarded retrocredits, then subrequirement 1 above is satisfied because the student is judged to have achieved "depth" in liberal studies.

ADDITIONAL RESTRICTIONS/SUBREQUIREMENTS FOR SPECIFIC DEPARTMENTS

Civil and Environmental Engineering: An economics course (from an approved list) and an environmental studies course (with approved characteristics) are required.

Industrial Engineering: ECON 101 Principles of Microeconomics or ECON 111 Principles of Economics-Accelerated Treatment is required.

RESOURCES

The solutions to challenges great and small lie not in the hands of one person, but emerge from the diverse ideas, perspectives and backgrounds of many people working together. Whether a prospective or current faculty member, staff member, or student, members of the College of Engineering create a welcoming community where they can be themselves and strive to become whatever they want to be. Here are some of the services and organizations that students can utilize along the way.

ENGINEERING SCHOLARSHIPS

The College of Engineering awards over two million dollars in scholarships each year to its students.

High school students applying for admission to UW–Madison in engineering are eligible to compete for merit- and need-based scholarships via the application for the Engineering Freshman Academic Achievement Award. This application is available through the Wisconsin Scholarship Hub (WiSH) (https://wisc.academicworks.com). (Note: students should not wait for notification that they have been admitted to UW–Madison before they apply for a freshman scholarship.)

Each spring, continuing students are eligible to apply for collegewide and departmental scholarships. The application period is approximately March 1–May 1. Beginning March 1, students can apply for these awards by visiting the Wisconsin Scholarship Hub (WiSH) (https://wisc.academicworks.com).

ACADEMIC ADVISING

Each College of Engineering program has academic advisors (https://www.engr.wisc.edu/academics/student-services/academic-advising) dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor in their student center.

UNDERGRADUATE LEARNING CENTER

The Undergraduate Learning Center (https://www.engr.wisc.edu/academics/student-services/ulc) (ULC) in the College of Engineering provides tutoring and academic support programs for engineering undergraduates wanting to excel in their courses. The ULC is a place where students study, form study groups, and discuss engineering concepts and problem solving strategies with their peers and with the tutors and facilitators.

Drop-In-Tutoring Sessions

Sessions are offered for over 60 courses in mathematics, chemistry, physics, statistics, computer sciences, and engineering. The sessions provide help with homework problems and exam preparation. Drop-in tutoring sessions are offered each evening from Sunday to Thursday, resulting in approximately 12,000 student visits last year.

PrEPS (Practicing Engineering Problem Solving) Labs

Labs were developed to help students succeed in core courses that have traditionally proved challenging for students. The courses targeted are early in the engineering curricula and contain dense material content delivered at a fast pace. The labs reinforce concepts through practicing problem solving skills. Students commit to meeting twice every week for 60–75 minutes per meeting.

PrEPS Study Tables

Study tables support the same courses as the PrEPS Labs but with a less structured approach. PrEPS Study Tables allow small groups of students who are interested in extra study time to meet regularly to discuss homework and concepts from the course.

Tutoring by Request

Based on the Tutorial Services Room model developed at MIT, the College of Engineering offers Tutoring by Request (TBR) for students in critical need. Assistance is offered in a variety of courses, ranging from gateway courses such as chemistry, math, physics courses, to intermediate-level engineering courses.

Special Courses and Workshops

Special courses are targeted toward helping students learn topics that span multiple courses such as math concepts common to a variety of introductory engineering courses. Workshops are offered in topics such as MATLAB, R, and vector review to help students be successful in their engineering courses.

INTERNATIONAL ENGINEERING STUDIES & PROGRAMS

In today's global marketplace, there is an increasing need for broadly educated engineering graduates with cross-cultural skills, international understanding and proficiency in more than one language. The College of Engineering is committed to providing and expanding international opportunities that will assist engineering students in obtaining these important skills.

International Engineering Studies and Programs (http://international.engr.wisc.edu) (IESP) runs semester, year-long and summer study abroad programs at leading engineering schools in many countries around the world. These programs, selected specifically for engineering students, help ensure students continue to make progress toward degree requirements and have a meaningful experience abroad.

The college also offers a Certificate in International Engineering. Courses in language and culture taken abroad and in Madison can count toward this certificate, which demonstrates the student's knowledge of a specific country or region. This credential appears on the student's transcript, strengthens the resume, and testifies to their preparation for an international career.

For more information, contact the International Engineering Studies & Programs Office at international@engr.wisc.edu or 608-263-2191.

ENGINEERING CAREER SERVICES WITH COOPERATIVE EDUCATION

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website (https://ecs.wisc.edu) or call 608-262-3471.

DIVERSITY AFFAIRS OFFICE

The Diversity Affairs Office (DAO) supports the mission of the College of Engineering to broaden participation in engineering and create an inclusive learning environment for all students. Centered on the core values of community, inclusion and social justice, DAO programs are designed to attract and support underrepresented students of color, women of all backgrounds, low-income students, and first-generation college students. The DAO has an office suite with study and student meeting areas that is available to all College of Engineering undergraduates.

Undergraduate Programs

The Leaders in Engineering Excellence and Diversity (LEED) Scholars is a community and continuing scholarship program providing students with monthly student development meetings, leadership opportunities, academic enhancement, adjunct advising, peer mentoring and networking, personal and career development, engagement in social justice, and community outreach. LEED Scholars events are open to any student interested in engaging in a diverse learning community.

The DAO has an advisor relationship and provides meeting space to the National Society of Black Engineers (NSBE-WBESS), Society of Hispanic Professional Engineers (SHPE), and Society of Women Engineers (SWE).

High School Programs and Outreach

The DAO, with the help of undergraduate student leaders, offers engineering outreach visits at the college and at Wisconsin high schools. In the summer we offer residential programs for talented high school students underrepresented in engineering, including the Engineering

Summer Program and Engineering Tomorrow's Careers (Society of Women Engineers).

Other Programs

The DAO develops programs and provides services designed to promote a welcoming climate that celebrates diversity for everyone in the College of Engineering. The variety of events and projects include: Women in Engineering events, a regular college climate survey, Diversity Discussions, and Welcoming Classroom training for new Teaching Assistants.

COMPUTER-AIDED ENGINEERING CENTER

The Computer-Aided Engineering Center (CAE) (http://www.cae.wisc.edu) provides computing resources, facilities and services for students, faculty, and staff in the college. The broad range of services and resources include:

- Windows and Linux computer classrooms;
- open labs which have Windows and Linux workstations;
- industry-standard engineering software;
- software and services available on students' personal computers;
- reliable file storage for coursework;
- customer consulting and help-desk services.

The CAE walk-in help desk is located at 1410 Engineering Drive; helpdesk@cae.wisc.edu; (helpdesk@cae.wisc.edu) 608-262-5349. For more information, see the CAE website (http://www.cae.wisc.edu).

COUNSELING SERVICES

Confidential counseling services are available through University Health Services (https://www.uhs.wisc.edu) at no cost to engineering students. It is easier to concentrate on studies if one can deal effectively with personal, academic, and career concerns. Talking with someone who is objective and empathetic can help students sort through such concerns. Appointments can be made by phone or in person.

University Health Services
333 East Campus Mall
Madison, WI 53715-1384
608-265-5600

REGISTERED STUDENT ORGANIZATIONS

The College of Engineering offers so much more than just a first-class engineering education. Students have access to a wide variety of groups, opportunities, organizations and services that will help make their time on campus memorable and unique. There are more than 50 engineering affiliated student organizations (https://www.engr.wisc.edu/academics/beyond-the-classroom/student-organizations) on campus. Students can get involved in organizations that range from competitive—such as teams that build and race vehicles or concrete canoes—to service-oriented, honors societies, and student government. The College of Engineering also offers many discipline-related student chapters of professional organizations that will connect students with their peers and also help them make professional contacts.

HONORS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates—not just a few—excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

ENGINEERING HONORS IN RESEARCH

Select students in degree-granting departments may pursue the Honors in Research distinction in certain departments. It requires completion of a certain number of semesters of faculty-guided independent study work and completion of a written thesis. Honors in Research programs have been developed for majors in biomedical engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, engineering mechanics, geological engineering, industrial engineering, materials science and engineering, mechanical engineering, and nuclear engineering. Interested students should contact their department for more information.

ENGINEERING HONORS IN THE LIBERAL ARTS (EHLA)

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (https://www.engr.wisc.edu/academics/undergraduate-academics/honors) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "!" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

BIOMEDICAL ENGINEERING

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but

with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

BIOLOGY IN ENGINEERING FOR ENGINEERING MAJORS, CERTIFICATE

The biology in engineering certificate (BEC) is designed for engineering students who want to strengthen their biology backgrounds. It is offered especially to encourage engineering students in traditional disciplines to prepare themselves to understand the special engineering problems in biology and medicine. A student successfully fulfilling the requirements will have the notation "Biology in Engineering Certificate" added to the transcript.

HOW TO GET IN

The Biology in Engineering Certificate was designed and is administered by a Biology in Engineering Certificate Committee composed of faculty from multiple engineering disciplines. Students normally should begin the program during their sophomore or junior year, but seniors may also apply.

Prerequisites to enter the certificate program:

- Prior admission to an engineering B.S. degree program (http://guide.wisc.edu/undergraduate/engineering/#degreesmajorscertificatestext) or Biological Systems Engineering (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/biological-systems-engineering/biological-systems-engineering-bs) through the College of Agricultural and Life Sciences (http://guide.wisc.edu/undergraduate/agricultural-life-sciences) at the UW-Madison.
- Students pursuing an undergraduate degree at UW-Madison need to have completed at least one intermediate-level (minimum 200-level) engineering course.

Click here (https://www.engr.wisc.edu/academics/undergraduate-academics/biology-in-engineering-certificate) for certificate application.

REQUIREMENTS

The certificate requires a minimum of 15 credits:

GENERAL BIOLOGY: 5 CREDITS

Code	Title	Credits
Choose one combination:		5
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	5
BIOCORE 383 & BIOCORE 384	Cellular Biology and Cellular Biology Laboratory	5
ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102	Animal Biology and Animal Biology Laboratory	5
ZOOLOGY/BIOLOGY/BOTANY 151	Introductory Biology	5
ZOOLOGY/BIOLOGY/BOTANY 152	Introductory Biology	5

ZOOLOGY 153	Introductory Biology (and)	3
BIOLOGY/ ZOOLOGY 102	Animal Biology Laboratory (or)	

choose 2 more credits from list below

ADVANCED BIOLOGY: 5-CREDIT MINIMUM

Code	Title	Credits
Advanced Biology (5 cr. minimum): Recommended to choose a lecture/lab combination as outlined below, but any combination of courses is acceptable		5
ANAT&PHY 335	Physiology	5
ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	5
BIOCORE 587	Biological Interactions	3
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 507	General Biochemistry I	3
BIOCHEM 508	General Biochemistry II	3-4
BMOLCHEM 314	Introduction to Human Biochemistry	3
GENETICS 466 & GENETICS 545	Principles of Genetics and Genetics Laboratory	5
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	5
MICROBIO/ FOOD SCI 324 & MICROBIO/ FOOD SCI 325	Food Microbiology Laboratory and Food Microbiology	5
MICROBIO 330	Host-Parasite Interactions	3
M M & I 301 & M M & I 302	Pathogenic Bacteriology and Medical Microbiology Laboratory	5
M M & I 341	Immunology	3
M M & I/MICROBIO/ PATH-BIO 528 & M M & I/PATH-BIO 529	Immunology and Immunology Laboratory	5
M M & I/ BIOCHEM 575	Biology of Viruses	2
ZOOLOGY/ ENVIR ST 315 & ZOOLOGY 316	Limnology-Conservation of Aquatic Resources and Laboratory for Limnology-Conservation of Aquatic Resources	4-5
ZOOLOGY/ENTOM/ M M & I/PATH-BIO 350 & ZOOLOGY/M M & I/ PATH-BIO 351	Parasitology and Parasitology Laboratory	5
ZOOLOGY/ANTHRO/ BOTANY 410	Evolutionary Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY 470 & ZOOLOGY 555	Introduction to Animal Development and Laboratory in Developmental Biology	6
ZOOLOGY 504	Modeling Animal Landscapes	3-5
ZOOLOGY/ ENVIR ST 510 & ZOOLOGY/ ENVIR ST 511	Ecology of Fishes and Ecology of Fishes Lab	5
ZOOLOGY/ PSYCH 523	Neurobiology	3
ZOOLOGY 525	Tropical Herpetology	1
ZOOLOGY 570	Cell Biology	3
ZOOLOGY 611 & ZOOLOGY 612	Comparative and Evolutionary Physiology and Comparative Physiology Laboratory	5

BIOLOGY IN ENGINEERING: 3-CREDIT MINIMUM

Code	Title	Credits
Biology in Engineering (3 cr. minimum): Choose one		3
B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/PHM SCI 430	Biological Interactions with Materials	3
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/M E 505	Biofluidics	3
B M E/CBE 510	Introduction to Tissue Engineering	3
B M E/CBE 520	Stem Cell Bioengineering	3
B M E 545	Engineering Extracellular Matrices	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E/M E 615	Tissue Mechanics	3
B M E/MED PHYS/ PHMCOL-M/ PHYSICS/ RADIOL 619	Microscopy of Life	3
BSE 249	Engineering Principles for Biological Systems	3
BSE 349	Quantitative Techniques for Biological Systems	3
BSE 364	Engineering Properties of Food and Biological Materials	3
BSE 365	Measurements and Instrumentation for Biological Systems	3
BSE/FOOD SCI/ M E 441	Rheology of Foods and Biomaterials	3
BSE/FOOD SCI 642	Food and Pharmaceutical Separations	2-3
CBE/B M E 560	Biochemical Engineering	3
CBE 781	Biological Engineering: Molecules, Cells & Systems	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR 322	Environmental Engineering Processes	3

CIV ENGR 502	Environmental Organic Chemistry	3
CIV ENGR/ SOIL SCI 623	Microbiology of Waterborne Pathogens and Indicator Organisms	3
COMP SCI/B M I 576	Introduction to Bioinformatics	3
E C E 542	Introduction to Microelectromechanical Systems	3
I SY E/B M E 564	Occupational Ergonomics and Biomechanics	3
INTEREGR 301	Engineering and Biology: Technological Symbiosis	1-4

SEMINAR: 1 CREDIT

Code	Title	Credits
Seminar Course (1 cr.): Choose one		1
B M E/BSE/CBE 517	Biology in Engineering Seminar	1
B M E 515	Therapeutic Medical Devices	1

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Develop an understanding of basic biology and a selected area of advanced biology.
2. Develop an understanding of the challenges in biology, medicine, public health, and environmental health that are currently being addressed by engineering research and development.
3. Demonstrate proficiency in the application of engineering principles to solve problems in the field based on biological principles.

BIOMEDICAL ENGINEERING, B.S.

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

To prepare students for such careers, the 128-credit, four-year BME undergraduate degree emphasizes engineering design; access to cooperatives/internships at local or national medical device

manufacturers, hospitals, or laboratories; continuous advising; flexibility in engineering specialization areas; participation in program evaluation and improvement; study-abroad opportunities; and an option to complete a one-year M.S degree following the undergraduate program.

The cornerstone of the BME program is its **unique, seven-semester design curriculum**. Students take an advising/design project course the freshman year and every semester during the sophomore through senior years. A faculty member advises small teams of students, serving as advisor/consultant/mentor, to guide them through real-world design projects solicited from clients throughout the university, medical profession, industry, and the community. These clients serve as resources for students in their project, conduct discussions, and expose the students to various aspects of the BME field. Over the course of each semester, teams design, fabricate, and ultimately present a product that meets the needs of the client. This novel approach gives students an exceptionally balanced education by incorporating clinical and biomedical industry experience, thus expanding their network. Overall, the design experiences highlight the very multidisciplinary nature of BME.

Within the program, BME students choose a course of study that emphasizes one of the following four specializations within the field:

1. **Bioinstrumentation and medical devices** is the application of electronics, measurement principles, and techniques to develop devices used in diagnosis and treatment of disease. Examples include the electrocardiogram, brain–computer interface, implantable electrodes, sensors, tumor ablation and other medical devices. Neuroengineering, a subfield, involves using engineering technology to study the function of neural systems and the development of implantable technology for neuroprosthetic and rehabilitation applications.
2. **Biomedical imaging and optics** involves the design and enhancement of systems for noninvasive anatomical, cellular, and molecular imaging. In addition to common imaging techniques such as magnetic resonance imaging (MRI), computed tomography (CT), and positron emission tomography (PET), biomedical imaging includes topics such as biophotonics, optics, and multimode imaging, and is now expanding to serve functional and therapeutic purposes as well. Advanced capabilities result when fundamentals of engineering, physics, and computer science are applied in conjunction with the expertise of clinical collaborators.
3. **Biomechanics** applies engineering mechanics for understanding biological processes and for solving medical problems at systemic, organ, tissue, cellular, and molecular levels. This includes the mechanics of connective tissues (ligament tendon, cartilage and bone) as well as orthopedic devices (fracture fixation hardware and joint prostheses), vascular remodeling (pulmonary hypertension), muscle mechanics with injury and healing, human motor control, neuromuscular adaptation (with age, injury, and disease), microfluidics for cellular applications, cellular motility and adhesion, and rehabilitation engineering (quantifying, adapting and restoring function for those who lost abilities).
4. **Biomaterials/cellular/tissue engineering** involves the characterization and use of structural materials, derived from synthetic or natural sources, to design medical products that safely interact with tissues for therapeutic or diagnostic purposes such as artificial blood vessels, heart valves, orthopedic joints, and drug delivery vehicles. Tissue engineers understand structure–function relationships in normal and pathological tissues to engineer living tissues and/or biological substitutes to restore, maintain, or improve function. At the cellular and molecular level this includes the study or manipulation of biological processes such as the cell's differentiation, proliferation, growth, migration, and apoptosis.

Although the various disciplines within BME can be separately defined, solving a biomedical program requires an overall understanding of the field. For example, the design of an artificial hip requires an understanding of the forces and **biomechanics** of human movement as well as the mechanical and material properties of the prosthetic device. The **material** choice and topography play a critical role in cellular and tissue integration, which ultimately leads to long-term stability of the implant. In addition, **biomedical imaging** techniques are required to characterize the morphology of the diseased hip and the success of the procedure. Finally, **instrumentation** devices are utilized during the hip replacement surgery.

Students choose the biomedical engineering field to be of service to people; for the excitement of working with living systems; and to apply advanced technology to the complex problems of medical care. Students in the BME program can expect to develop skills in innovative thinking, critical analysis of ethics, project management, and technical writing, all in an environment that cultivates creativity, teamwork, and curiosity. With many possible focuses within the major, BME students have the opportunity to explore and cultivate their interests in specific topics while applying the concepts of engineering to medical applications, hands-on projects, and cutting-edge research.

Students successfully completing the B.S. degree in BME with an overall GPA of 3.0 or a GPA of 3.25 for the last 60 credits of the B.S. program are eligible to apply for the one-year M.S. degree.

BIOMEDICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path graduates choose, be it a job, postgraduate education, or volunteer service, be it in engineering or another field, we have for our graduates the following objectives; that they will:

1. exhibit strong skills in problem solving, leadership, teamwork, and communication;
2. use these skills to contribute to their communities;
3. make thoughtful, well-informed career choices; and
4. demonstrate a continuing commitment to and interest in their own and others' education.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics		*19*
Science		*37*
General Education		*21*
Engineering Courses:		
Introduction to Engineering		3
Engineering Mechanics Core Courses		6
Biomedical Engineering Core Courses		18
Biomedical Engineering Area Technical Elective Requirements		15
Biomedical Advanced Technical Elective		3
Engineering Technical Elective		3
Total Credits		At least 128

MATHEMATICS

Code	Title	Credits
MATH 221 & MATH 222 & MATH 234	Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2 and Calculus--Functions of Several Variables	13
MATH 320	Linear Algebra and Differential Equations	3
or MATH 319	Techniques in Ordinary Differential Equations	
B M E 325	Applied Statistics for Biomedical Engineers	3
or STAT 324	Introductory Applied Statistics for Engineers	
or STAT/ MATH 431	Introduction to the Theory of Probability	
Total Credits		19

SCIENCE

Code	Title	Credits
COMP SCI 220	Data Programming I	3-4
or COMP SCI 200	Programming I	

or COMP SCI 300	Programming II	
or COMP SCI 310	Problem Solving Using Computers	
E M A 201	Statics (only statics counts for Engineering credits below)	3
or PHYSICS 201	General Physics	
or PHYSICS 207	General Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
One of the following:		5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 343	Introductory Organic Chemistry	3
or CHEM 341	Elementary Organic Chemistry	
CHEM 345 & CHEM 344	Intermediate Organic Chemistry and Introductory Organic Chemistry Laboratory	5
or CHEM 327	Fundamentals of Analytical Science	
or CHEM 329	Fundamentals of Analytical Science	
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory (or)	5
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology (or)	
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	
ANAT&PHY 335	Physiology (or)	5
ANAT&PHY 435	Fundamentals of Human Physiology (or)	
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	
ANAT&PHY 337	Human Anatomy	3
or ZOOLOGY 430	Comparative Anatomy of Vertebrates	
or ZOOLOGY 470	Introduction to Animal Development	
or ZOOLOGY/ PSYCH 523	Neurobiology	
or ZOOLOGY 570	Cell Biology	
or ZOOLOGY 611	Comparative and Evolutionary Physiology	
or GENETICS 466	Principles of Genetics	
or BIOCORE 587	Biological Interactions	
Total Credits		37-42

GENERAL EDUCATION

Code	Title	Credits
Communications A		*3*
LSC 100	Science and Storytelling	
or COM ARTS 10	Introduction to Speech Composition	
or ENGL 100	Introduction to College Composition	
or ESL 118	Academic Writing II	
Communications B		
E P D 397	Technical Communication	3
or ZOOLOGY/ BIOLOGY/ BOTANY 152	Introductory Biology	
or BIOCORE 384	Cellular Biology Laboratory	
At least 15 credits of liberal studies following the College of Engineering guidelines (p. 214)		*15*
Total Credits		21

ENGINEERING COURSES

Code	Title	Credits
Introduction to Engineering		*3*
INTEREGR 170	Design Practicum	
Required engineering mechanics core courses		*6*
E M A 201	Statics	
E M A 303	Mechanics of Materials	
or M E 306	Mechanics of Materials	
Required B M E core courses		*18*
B M E 200	Biomedical Engineering Design	
B M E 201	Biomedical Engineering Fundamentals and Design	
B M E 300	Biomedical Engineering Design	
B M E 301	Biomedical Engineering Design	
B M E 310	Bioinstrumentation	
B M E 315	Biomechanics	
B M E 400	Capstone Design Course in Biomedical Engineering	
B M E 402	Biomedical Engineering Design	
B M E/ PHM SCI 430	Biological Interactions with Materials	
Engineering area technical electives (see below)		*15*
One advanced B M E technical elective from any area selected from an approved list of courses		*3*
Engineering technical elective: Any engineering course(s) from a degree-granting engineering program [1]		*3*
Total Credits		48

1
- EPD courses are not included in this category.
- InterEGR courses are not included in this category except INTEREGR 301 Engineering and Biology: Technological Symbiosis
- Only 3 credits of an engineering independent study may count (e.g., B M E 399 Independent Study, B M E 489 Honors in Research , CBE 699 Advanced Independent Studies, etc.).
- Special topics courses must have prior approval of the B M E Curriculum Committee.

BIOMEDICAL ENGINEERING AREA TECHNICAL ELECTIVE REQUIREMENTS

Choose 15 credits of area technical electives in one of the following tracks and at least one advanced B M E elective:

Bioinstrumentation and Medical Devices:

Code	Title	Credits
Required Area Elective		
E C E 230	Circuit Analysis	4
Area Electives in Bioinstrumentation		11

Choose from any ECE course, the courses below, and from the advanced BME electives in this area		
M E 445	Mechatronics in Control & Product Realization	3
Advanced BME Area Technical Electives in Bioinstrumentation and Medical Devices		
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/ MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3

Biomedical Imaging and Optics:

Code	Title	Credits
Required Area Elective		
E C E 330	Signals and Systems	3
Area Electives in Biomedical Imaging		12
Choose from the following and from the advanced BME electives in this area		
E C E 203	Signals, Information, and Computation	3
E C E 331	Introduction to Random Signal Analysis and Statistics	3
E C E 431	Digital Signal Processing	3
E C E/COMP SCI 533	Image Processing	3
B M E/H ONCOL/ MED PHYS/ PHYSICS 501	Radiological Physics and Dosimetry	3
B M E/ MED PHYS 566	Physics of Radiotherapy	4
B M E/ MED PHYS 567	The Physics of Diagnostic Radiology	4
B M E/ MED PHYS 573	Medical Image Science: Mathematical and Conceptual Foundations	3
B M E/ MED PHYS 574	Imaging in Medicine: Applications	3
N E 305	Fundamentals of Nuclear Engineering	3
N E 408	Ionizing Radiation	3
N E 427	Nuclear Instrumentation Laboratory	2
Advanced BME Area Technical Electives in Biomedical Imaging		
B M E/ MED PHYS 530	Medical Imaging Systems	3
B M E/ MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E/ MED PHYS 568	Magnetic Resonance Imaging (MRI)	2
B M E/MED PHYS/ PHMCOL-M/ PHYSICS/ RADIOL 619	Microscopy of Life	3
B M E/CHEM/ MED PHYS 650	Biological Optical Microscopy	3

Biomechanics:

Code	Title	Credits
Required Area Elective		
E M A 202	Dynamics	3
or M E 240	Dynamics	
Area Electives in Biomechanics		12
Choose from any E M A or M E course, the courses below, and from the advanced B M E electives in this area		
M S & E 350	Introduction to Materials Science	3
or M S & E 351	Materials Science-Structure and Property Relations in Solids	
M S & E/CHEM 421	Polymeric Materials	3
CBE/B M E 320	Introductory Transport Phenomena	4
or B M E/CBE 330	Engineering Principles of Molecules, Cells, and Tissues	
CBE 324	Transport Phenomena Lab	3
CBE/M E 525	Macromolecular Hydrodynamics	3
Advanced B M E Area Technical Electives		
B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/M E 505	Biofluidics	3
B M E/I SY E 564	Occupational Ergonomics and Biomechanics	3
B M E/M E 603	Topics in Bio-Medical Engineering	1-3
B M E/M E 615	Tissue Mechanics	3

Biomaterials/Cell/Tissue Engineering:

Code	Title	Credits
Required Area Elective		
B M E/CBE 330	Engineering Principles of Molecules, Cells, and Tissues	4
or B M E/CBE 320	Introductory Transport Phenomena	
Area Electives in Biomaterials/Cell/Tissue Engineering		12
Choose from any CBE or M S & E course, the courses below, and from the advanced B M E electives in this area		
M E 417	Transport Phenomena in Polymer Processing	3
M E 418	Engineering Design with Polymers	3
M E/STAT 424	Statistical Experimental Design	3
M E/BSE/ FOOD SCI 441	Rheology of Foods and Biomaterials	3
B M E 511	Tissue Engineering Laboratory	1
Advanced BME Area Technical Electives in Biomaterials/ Cell/Tissue Engineering		
B M E/CBE 510	Introduction to Tissue Engineering	3
B M E/CBE 520	Stem Cell Bioengineering	3
B M E 545	Engineering Extracellular Matrices	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3
B M E/CBE 560	Biochemical Engineering	3
B M E/M E 615	Tissue Mechanics	3

TOTAL DEGREE CREDITS: AT LEAST 128

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
MATH 221	5	MATH 222	4
CHEM 109 (or CHEM 103 & CHEM 104)[1, Med]	5	E M A 201, PHYSICS 201, or PHYSICS 207[3, Med]	3
Communications A	3	CHEM 343 or 341[4, Med]	3
INTEREGR 170[2]	3	Liberal Studies Elective	3
		COMP SCI 200, 220, 300, or 310[5]	3-4
	16		16-17

Second Year

Fall	Credits	Spring	Credits
B M E 200[6]	1	B M E 201	2
MATH 234	4	MATH 320 or 319	3
PHYSICS 202 or 208[Med]	5	E M A 303 or M E 306	3
CHEM 345 or 327[4, Med]	3	Select one of the following options:	5
B M E 325, STAT 324, or STAT 431[5, Med]	3	ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	
		ZOOLOGY/BIOLOGY/ BOTANY 151[Med]	
		BIOCORE 381 & BIOCORE 382 (the first lab-382- is recommended not required)[7, Med]	
		B M E 310[8]	3
	16		16

Third Year

Fall	Credits	Spring	Credits
B M E 300[6]	1	B M E 301[6]	1
CHEM 344 (or CHEM 327 in second year)[Med]	2	Liberal Studies Elective	1
E P D 397 (if ZOOLOGY 152 or BIOCORE 384 is not taken)[9]	3	Free elective credits	3
Liberal Studies Elective	2	Select one of the following options:[Med]	5
Engineering Technical Elective	2	ANAT&PHY 335	
B M E 315[8]	3	ANAT&PHY 435	
Area-Required Engineering Technical Elective	3	BIOCORE 485 & BIOCORE 486	
E C E 230		B M E/PHM SCI 430[8]	3
E C E 330		Area-Engineering Technical Elective	3
E M A 202 or M E 240			
B M E/CBE 330 or 320			
	16		16

Fourth Year

Fall	Credits	Spring	Credits
B M E 400	3	B M E 402[6]	1
Liberal Studies Elective	3	Liberal Studies Elective[Med]	3
Free elective credits	1	Liberal Studies Elective[Med]	3
Advanced Zoology Elective, select one of the following:	3	Free elective credits	2

ANAT&PHY 337	Engineering Technical Elective	1
GENETICS 466	Advanced Biomedical Engineering Technical Elective	3
ZOOLOGY 430	Area-Engineering Technical Elective	3
ZOOLOGY 470		
ZOOLOGY/ PSYCH 523		
ZOOLOGY 570		
ZOOLOGY 611		
BIOCORE 587		
Area-Engineering Technical Elective	3	
Area-Engineering Technical Elective	3	
	16	16

Total Credits 128-129

FOOTNOTES

Med—These courses are identified as requirements for most medical schools and are included within the 128 degree credits. Students not wishing to attend medical school may choose other listed options. Choosing other options (such as CHEM 103/CHEM 104 vs. CHEM 109 or E P D 397vs. ZOOLOGY/BIOLOGY/BOTANY 152) will affect the total number of credits.
Medical schools have varying requirements. Liberal electives, free electives, and zoology electives can often be used to satisfy these. **Check requirements early.** For example, to prepare for the MCAT it is recommended that students take psychology and sociology. In addition, UW–Madison and others require an intermediate humanities or social science with an intensive writing component (Comm B). All these can be fulfilled within the liberal studies requirements and thus early planning starting freshman year is important. A good resource is: http://prehealth.wisc.edu/.

1 CHEM 103 General Chemistry I & CHEM 104 General Chemistry II may be substituted for CHEM 109 Advanced General Chemistry. For this choice, the excess 4 credits are counted as free electives. Most medical schools require one year of basic chemistry. UW–Madison's medical school (and others) accepts CHEM 109 Advanced General Chemistry as a full-year equivalent.

2 INTEREGR 170 Design Practicum is required only for students directly admitted to B M E as freshmen and counts toward the 48 engineering credits.

3 If PHYSICS 201 General Physics is chosen instead of E M A 201 Statics, another engineering course from a degree-granting engineering program must be substituted for E M A 201 Statics. The excess 5 credits from PHYSICS 201 General Physicss are counted as free elective credits.PHYSICS 207 General Physics –PHYSICS 208 General Physics may be used to substitute for –PHYSICS 201 General Physics - PHYSICS 202 General Physics

4 CHEM 341 Elementary Organic Chemistry may be substituted by those students who are not interested in satisfying premed requirements and who expect to take only one semester of organic chemistry (CHEM 341 Elementary Organic Chemistry is not permitted as a prerequisite for CHEM 344 Introductory Organic Chemistry Laboratory/CHEM 345 Intermediate Organic Chemistry).
Either CHEM 344 Introductory Organic Chemistry Laboratory/ CHEM 345 Intermediate Organic Chemistryy or CHEM 327 Fundamentals of Analytical Science (or CHEM 329 Fundamentals of Analytical Science) is required.
Premeds or students interested in biomaterials/cellular/tissue engineering should choose to take CHEM 343 Introductory Organic Chemistry, CHEM 344 Introductory Organic Chemistry Laboratory, and CHEM 345 Intermediate Organic Chemistry.

5 It is recommended that students take statistics and/or computer science in the freshman year for those needing additional core course options.

6 Students who are admitted late to the program and/or students who take part in another experience (such as co-op and/or study abroad) missing B M E 200 Biomedical Engineering Design, B M E 300 Biomedical Engineering Design, B M E 301 Biomedical Engineering Design, or B M E 402 Biomedical Engineering Design may substitute for up to two of these course for the semester they are not in the program or at UW-Madison.
Approved substitutions include: B M E 1 Cooperative Education Program 1 cr, engineering research credit, or any 200-level or above additional engineering technical elective lab experience.
For more information on the unique design sequence see: http://bmedesign.engr.wisc.edu/about/.

7 Students very serious about medical school and learning about biology may select to apply for BIOCORE, a rigorous biology honors program:

- BIOCORE 381 Evolution, Ecology, and Genetics
- BIOCORE 382 Evolution, Ecology, and Genetics Laboratory
- BIOCORE 383 Cellular Biology
- BIOCORE 384 Cellular Biology Laboratory
- BIOCORE 485 Principles of Physiology
- BIOCORE 486 Principles of Physiology Laboratory

The BIOCORE courses have limited enrollment and students must be accepted into this program (applying as freshman). It is generally advisable to complete the entire sequence once it is started.
Only BIOCORE 382 Evolution, Ecology, and Genetics Laboratory is not required and is not necessary to fulfill premed requirements; however, it is recommended as it has been helpful in understanding the BICORE lab process. If all the other BIOCORE courses are taken (a total of 16 cr), this will replace the ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory, the Advanced Life Science Elective, ANAT&PHY 335 Physiology, and E P D 397 Technical Communication.

8 The three core courses are all required: B M E 310 Bioinstrumentation, B M E 315 Biomechanics, B M E/PHM SCI 430 Biological Interactions with Materials, but they can be taken in any order. It is recommended that students take one in the track of interest first, or as early as possible.

9 ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology, which satisfies Communication Part B, may be substituted for E P D 397 Technical Communication. For the Biocore program, BIOCORE 384 Cellular Biology Laboratory substitutes for E P D 397 Technical Communication.
Students interested in going to medical school should use this space/credits for BIOCHEM 501 Introduction to Biochemistry which is required for the MCAT.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

CHEMICAL AND BIOLOGICAL ENGINEERING

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis

for advanced study in graduate school, or for further training in medicine, law, or policy.

CHEMICAL ENGINEERING, B.S.

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

CHEMICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The department recognizes that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths.

Whatever path graduates choose, be it a job, graduate school, or volunteer service, be it in engineering or another field, within the next 5 years and beyond, we have for our graduates the following objectives:

1. That they will exhibit strong skills in problem-solving, leadership, teamwork, and communication;

2. That they will use these skills to contribute to their communities;
3. That they will make thoughtful, well-informed career choices; and
4. That they will demonstrate a continuing commitment to and interest in education (their own and others').

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the chemical engineering degree program.

Code	Title	Credits
Mathematics		19
Physics		10
Chemistry		20
Life Science		6
Core Engineering Requirement		49
Professional Breadth		6
Communication Skills		6
Liberal Studies Requirement		16
Total Credits		132

MATHEMATICS REQUIREMENT

Transfer students must have equivalent math courses to meet the calculus requirement with a minimum of 12 credits to cover the three-course basic math sequence. Any deficiency in total math credits must be made up with electives in science or engineering.

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
or MATH 319	Techniques in Ordinary Differential Equations	
STAT 324	Introductory Applied Statistics for Engineers	3
Total Credits		19

PHYSICS REQUIREMENT

Transfer students who receive fewer than 6 credits for the required courses must make up the credit shortage with another physics course.

Code	Title	Credits
PHYSICS 201	General Physics	5
or PHYSICS 207	General Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
Total Credits		10

CHEMISTRY REQUIREMENT

Credit shortages cause by transfer of freshman chemistry courses at fewer than 9 credits must be made up with chemistry, biochemistry, or chemical engineering courses.

Code	Title	Credits
General Chemistry (choose one)		*5*
CHEM 109	Advanced General Chemistry ((preferred))	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 329	Fundamentals of Analytical Science	4
CHEM 343 & CHEM 345 & CHEM 344	Introductory Organic Chemistry and Intermediate Organic Chemistry and Introductory Organic Chemistry Laboratory	8
CHEM 562	Physical Chemistry	3
Total Credits		20

LIFE SCIENCE

Students who meet the Introductory Biology requirement with an AP exam are encouraged to take two advanced biology electives.[1]

Code	Title	Credits
Introductory Biology requirement (choose one)		*3*
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
Advanced Biology requirement (choose one)		*3*
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
ZOOLOGY 570	Cell Biology	
GENETICS 466	Principles of Genetics	
MICROBIO 303	Biology of Microorganisms	
Total Credits		6

[1] BIOCORE 381 Evolution, Ecology, and Genetics and BIOCORE 383 Cellular Biology may be used to satisfy the Life Sciences Requirements.

CORE ENGINEERING REQUIREMENT

Code	Title	Credits
CBE 150	Introduction to Chemical Engineering	1
CBE 250	Process Synthesis	3
CBE 255	Introduction to Chemical Process Modeling	3
CBE 310	Chemical Process Thermodynamics	3
CBE 311	Thermodynamics of Mixtures	3
CBE/B M E 320	Introductory Transport Phenomena	4
CBE 324	Transport Phenomena Lab	3
CBE 326	Momentum and Heat Transfer Operations	3
CBE 424	Operations and Process Laboratory	5
CBE 426	Mass Transfer Operations	3
CBE 430	Chemical Kinetics and Reactor Design	3
Select one of the following:		*3*
CBE 440	Chemical Engineering Materials	
CBE 540	Polymer Science and Technology	
CBE 547	Introduction to Colloid and Interface Science	
CBE 450	Process Design	3
CBE 470	Process Dynamics and Control	3
CBE Electives [2]		6
Total Credits		49

[2] Chemical Engineering electives may be chosen from any of the CBE courses that are not required, numbered 300 or above (excluding seminar courses). A maximum of two credits of co-op work (CBE 1 Cooperative Education Program) may be used to meet the CBE elective requirement. BSE/FOOD SCI 642 Food and Pharmaceutical Separations can be taken as a CBE elective. Qualified undergraduates may take graduate-level (600 or 700) courses to fulfill this requirement.

PROFESSIONAL BREADTH

Select 6 credits

Code	Title	Credits
Professional Breadth Credits [3]		6
Courses 300+ from the following College of Engineering departments and programs may be used:		
Biomedical Engineering		
Civil and Environmental Engineering		
Electrical and Computer Engineering		
Engineering Mechanics and Astronautics		
Engineering Professional Development		
Geological Engineering		
Industrial Engineering		
Interdisciplinary Courses (Engineering)		
Materials Science and Engineering [4]		
Mechanical Engineering		
Nuclear Engineering		
Engineering Physics		
Courses 300+ from the following departments in the College of Letters and Sciences may be used:		
Chemistry		
Computer Sciences		
Math		
Physics		
The following courses may also be used:		
ACCT I S 300	Accounting Principles	
MICROBIO 303	Biology of Microorganisms	
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 383	Cellular Biology	
BSE/ FOOD SCI 642	Food and Pharmaceutical Separations	
ECON/A A E/ ENVIR ST 343	Environmental Economics	
ENVIR ST/ PHILOS 441	Environmental Ethics	
FINANCE/ ECON 300	Introduction to Finance	
GENETICS 466	Principles of Genetics	
HIST SCI 337	History of Technology	
STAT/M E 424	Statistical Experimental Design	
ZOOLOGY 570	Cell Biology	
Total Credits		6

Students may petition the department to allow other courses related to engineering professional practice. To request that a course not listed above be used, the student should fill out the Professional Breadth Requirement Course Request form available online and submit it to the advisor. The department will then determine if the course can be counted toward the Professional Breadth Requirement. Petitions must be submitted before the beginning of the semester in which the course is to be taken.

[3] The objective of this requirement is to provide students with skills to interact with professionals from other disciplines. Suitable courses for this requirement include courses in engineering (excluding CBE) and science, as well as a variety of other disciplines.

[4] Full degree credit is not allowed if a student takes both CBE 440 Chemical Engineering Materials and M S & E 350 Introduction to Materials Science. In this case M S & E 350 will be awarded only 1 degree credit.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition [5]	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3

[5] For Part A of the General Education Communication Requirement (3 cr) students must select one course with an "a" designation in "g" of the "geBLC" information in the Course Guide. Some students will be exempt from this requirement based on their placement test scores or advanced placement in English.
CBE 424 Operations and Process Laboratory satisfies Part B of the General Education Communication Skills Requirement.

LIBERAL STUDIES ELECTIVES

Students must complete 16 credits of liberal studies according to the College of Engineering requirements[6].

[6] 1. Liberal studies elective courses must be classified as either Humanities, Social Studies, or Literature courses (identified by the letters H, S, L, or Z in "B" of the "geBLC" information in the Guide). At least six credits must have a breadth designation of Humanities (H, L, or Z), and at least three credits must have a designation of Social Studies (S or Z). Foreign language courses count as H credits.
2. A three-credit ethnic studies course must be selected from the College of Letters & Science. Acceptable courses are identified by the letter "e" in Guide. If appropriate, the ethnic studies course may be among those used to satisfy the concentration requirement.
3. A minimum of two liberal studies courses must be taken from the same department or program. At least one of these two courses must be at an intermediate or advanced level (designated in Guide).
4. Retroactive credits may be awarded for foreign-language work done in high school. The following conditions apply:

- A university-level foreign language course must be taken before the student has earned 30 college credits in residence.
- Retroactive Language Credit Request Form must be completed and submitted to the language instructor during the first two weeks of class.
- The student must earn a B or better in this course.
- Such credits do not count toward the 16 liberal-studies credits required. They may, however, be used to satisfy the concentration and depth requirements as stated in number three above and count as degree credits.

5. English composition courses, English as a Second Language courses, and basic communications arts courses are not accepted as liberal studies electives.

FREE ELECTIVES

Students fulfilling their course requirements with fewer than 132 credits must take additional free-elective credits to comply with the 132-credit minimum graduation requirement.

COURSE SUBSTITUTION REGULATIONS

1. Any student may, with advisor approval, replace up to 12 credits of required courses in the curriculum, except CBE 424 Operations and Process Laboratory, by an equal number of credits of other courses within the limitations listed under (3) below.
2. Any student who wishes to amend the curriculum by more than 12 credits or wishes to appeal the advisor's decision in (1) or to request exception to (3) below must submit a written request to the chair of the department, who will bring it to the department faculty for consideration.
3. Restrictions on course substitutions are as follows:
   a. Physics course may be replaced by science or engineering courses.
   b. Chemistry/life science courses must be replaced by courses with significant chemistry/life science content.
   c. Engineering courses must be replaced by engineering courses.
   d. Lab courses must be replaced by courses with an equal number of hours of lab courses.
   e. English as a Second Language courses, and MATH 112 Algebra, MATH 113 Trigonometry, and MATH 114 Algebra and Trigonometry may not be used for course substitutions.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. ability with engineering application of the basic sciences to the design, analysis, and control of chemical, physical, and biological processes, including the hazards associated with these processes.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
CHEM 109	5	CHEM 329	4
MATH 221	5	MATH 222	4
CBE 150	1	PHYSICS 201	5

Materials Elective	3 Professional Breadth Elective	3	
Liberal Studies Elective	3		
	15	12	5

Total Credits 132

1 CBE 250 Process Synthesis and CBE/B M E 320 Introductory Transport Phenomena both require a grade of C or better.

2 CHEM 343 Introductory Organic Chemistry requires a grade of C or better.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

CIVIL AND ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering offers two ABET-accredited undergraduate degree programs, one leading to a B.S. Civil Engineering (BSCE) degree (http://guide.wisc.edu/undergraduate/engineering/civil-environmental-engineering/civil-engineering-bs) and the other leading to a B.S. Geological Engineering (BSGLE) degree (http://guide.wisc.edu/undergraduate/engineering/civil-environmental-engineering/geological-engineering-bs). The BSCE degree program includes two options, one in Construction Engineering and Management (CEM) (http://guide.wisc.edu/undergraduate/engineering/civil-environmental-engineering/civil-engineering-bs/civil-engineering-construction-engineering-management-bs) and the other in Environmental Engineering (http://guide.wisc.edu/undergraduate/engineering/civil-environmental-engineering/civil-engineering-bs/civil-engineering-environmental-engineering-bs).

Civil and environmental engineers are responsible for the sustainable design of facilities that protect the health and welfare of communities and the environment, while also ensuring society's financial health. More specifically, they are responsible for the conception, design, and construction of public works such as:

- the highways, streets, and bridges that we walk, bike, and drive on
- the water systems and earthworks that treat the water we drink, manage the water we swim in and boat on, and protect us and our property from floodwaters
- the homes, schools, factories, theaters, and stadiums in which we live, learn, work, and play
- the airports, railways, waterways, and harbors that provide additional mobility for people and the materials they produce and consume
- the treatment and emission systems that ensure the safety of the air we breathe
- the recycling, reuse, and disposal systems used to minimize the production of and also provide for the containment of the solid and hazardous wastes we produce
- the production and transmission facilities for the electricity we use, including generation facilities for both conventional and renewable energy sources

Civil and environmental engineers are also responsible for the operation of these facilities, an aspect of the field that is being rapidly integrated into the Internet of Things with real-time "big data" collection systems for automated control. This makes it possible for society to rely on:

- autonomous cars, trucks, and mass transport systems, providing safer travel with reduced traffic congestion, improved roadway capacity, reduced energy consumption and air emissions
- smart water infrastructure, including systems that will reduce water consumption, save energy, and improve community resiliency in the wake of natural and human-caused disasters
- intelligent buildings, including systems that reduce energy consumption, improve employee and student comfort, and allow for adaptation of structural systems to changing wind and seismic loads

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in the different civil and environmental engineering disciplines. These disciplines include construction engineering and management, environmental engineering, geological and geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Civil and environmental engineers perform their work in an interdisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF BACHELOR OF SCIENCE IN CIVIL ENGINEERING (BSCE) PROGRAM

Create, integrate, and transfer civil and environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

CIVIL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Prepare BSCE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

RESOURCES AND SCHOLARSHIPS

FACILITIES

Facilities available include modern and fully equipped laboratories for instruction and research in the following areas:

Environmental Engineering
Fluid Mechanics
Geoengineering
Hydraulics
Data Acquisition and Analysis
Structures and Materials Testing
Transportation Engineering
Environmental Chemistry and Technology

CIVIL ENGINEERING, B.S.

The Department of Civil and Environmental Engineering offers an ABET-accredited B.S. degree in civil engineering, which may be accompanied by an option in environmental engineering or in construction engineering and management.

Civil and environmental engineers are responsible for the sustainable design of facilities that protect the health and welfare of communities and the environment, while also ensuring society's financial health. More specifically, they are responsible for the conception, design, and construction of public works such as:

- the highways, streets, and bridges that we walk, bike, and drive on
- the water systems and earthworks that treat the water we drink, manage the water we swim in and boat on, and protect us and our property from floodwaters
- the homes, schools, factories, theaters, and stadiums in which we live, learn, work, and play
- the airports, railways, waterways, and harbors that provide additional mobility for people and the materials they produce and consume
- the treatment and emission systems that ensure the safety of the air we breathe
- the recycling, reuse, and disposal systems used to minimize the production of and also provide for the containment of the solid and hazardous wastes we produce
- the production and transmission facilities for the electricity we use, including generation facilities for both conventional and renewable energy sources

Civil and environmental engineers are also responsible for the operation of these facilities, an aspect of the field that is being rapidly integrated into the Internet of Things with real-time "big data" collection systems for automated control. This makes it possible for society to rely on:

- autonomous cars, trucks, and mass transport systems, providing safer travel with reduced traffic congestion, improved roadway capacity, reduced energy consumption and air emissions
- smart water infrastructure, including systems that will reduce water consumption, save energy, and improve community resiliency in the wake of natural and human-caused disasters
- intelligent buildings, including systems that reduce energy consumption, improve employee and student comfort, and allow for adaptation of structural systems to changing wind and seismic loads

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in the different civil and environmental engineering disciplines. These disciplines include construction engineering and management, environmental engineering, geological and geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Civil and environmental engineers perform their work in an interdisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF BACHELOR OF SCIENCE IN CIVIL ENGINEERING (BSCE) PROGRAM

Create, integrate, and transfer civil and environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

CIVIL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Prepare BSCE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering

offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the civil engineering degree program (classification changed to CEE) in fall 2016 or later.

Code	Title	Credits
Introduction to Engineering		3
Mathematics and Statistics		19
Basic Science		16
Engineering Mechanics		10
Civil Engineering Mechanics		6
Civil Engineering Tools		6
Civil Engineering Breadth		21
Civil Engineering Design		10
Civil Engineering Electives		12
Communications		8
Liberal Studies		16
Free Elective		1
Total Credits		128

INTRODUCTION TO ENGINEERING

Code	Title	Credits
INTEREGR 170	Design Practicum	3
Total Credits		3

MATHEMATICS AND STATISTICS REQUIREMENT

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus–Functions of Several Variables	4
One of the following courses:		*3*
STAT 324	Introductory Applied Statistics for Engineers	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
One of the following advanced mathematics courses:		*3*

MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations	
Total Credits		19

BASIC SCIENCE REQUIREMENT

Code	Title	Credits
One of the following:		*5*
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
One of the following:		*5*
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
One of the following:		*3*
GEOSCI 100	Introductory Geology: How the Earth Works	
GEOSCI/ ENVIR ST 106	Environmental Geology	
One of the following:		*3*
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BOTANY/ ENVIR ST 260	Introductory Ecology	
MICROBIO 101	General Microbiology	
Total Credits		16

ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
E M A 201	Statics	3
E M A 202	Dynamics	3
or M E 240	Dynamics	
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
E M A/M E 307	Mechanics of Materials Lab	1
Total Credits		10

CIVIL ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
CIV ENGR 310	Fluid Mechanics	3
CIV ENGR/E M A 395	Materials for Constructed Facilities	3
Total Credits		6

CIVIL ENGINEERING TOOLS REQUIREMENT

Code	Title	Credits
M E 170	Civil Engineering Graphics	2-3
or M E 231	Geometric Modeling for Design and Manufacturing	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	4
Total Credits		6-7

CIVIL ENGINEERING BREADTH REQUIREMENT

Code	Title	Credits
CIV ENGR 311	Hydroscience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 330	Soil Mechanics	3
CIV ENGR 340	Structural Analysis I	3
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 494	Civil and Environmental Engineering Decision Making	3
CIV ENGR 498	Construction Project Management	3
Total Credits		21

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4
Every student must take at least one class in at least two of the following CEE disciplines, for a total of 6 credits. One of the two classes MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.		6
Water Resources		
CIV ENGR 414	Hydrologic Design	
Environmental		
CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 522	Hazardous Waste Management	
Structural		
CIV ENGR 442	Wood Structures I	
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
CIV ENGR 641	Highway Bridges	
Geological		
CIV ENGR/ G L E 530	Seepage and Slopes	
CIV ENGR/ G L E 531	Retaining Structures	
CIV ENGR/ G L E 532	Foundations	
Transportation		
CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other classes will count towards the electives requirement (see section below).

Total Credits 10

ENGINEERING ELECTIVES REQUIREMENT

1. Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the Bachelor of Science in Civil Engineering program. INTEREGR and E P D courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CIV ENGR) do not qualify for meeting this requirement.
2. Students must take at least 3 credits of CEE coursework in addition to the civil engineering design requirement. **Note:** Students in the Construction Engineering Management or Environmental Engineering option programs must select from a set of CIV ENGR courses approved for those options. [1,2]
3. Students must take at least 6 credits of coursework that meets at least one of the following[1,2]:
   a. Any course offered by an engineering department, including but not limited to CIV ENGR.
   b. Any Intermediate or Advanced level course with a breadth designation of Biological Sciences, Physical Sciences and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities or Literature.
   c. Any of the following business courses: ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process

Total Credits: 12

[1] Up to three credits of CIV ENGR 1 Cooperative Education Program may be used towards Item 2 or 3.

[2] Up to six credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used towards Item 2 or 3.

COMMUNICATIONS

Code	Title	Credits
Communications A (choose one)		*3*
ENGL 100	Introduction to College Composition	
LSC 100	Science and Storytelling	
COM ARTS 100	Introduction to Speech Composition	
ESL 118	Academic Writing II	
Speech-Related Course (choose one)		*2*
E P D 275	Technical Presentations [1]	
COM ARTS 105	Public Speaking	
COM ARTS 181	Elements of Speech-Honors Course	
COM ARTS 262	Theory and Practice of Argumentation and Debate	
COM ARTS 266	Theory and Practice of Group Discussion	
Writing-Related Courses (choose one)		*3*
E P D 397	Technical Communication [1]	
ENGL 201	Intermediate Composition	

Total Credits 8

[1] E P D 275 Technical Presentations and E P D 397 Technical Communication strongly recommended to satisfy these requirements.

LIBERAL STUDIES REQUIREMENTS

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 214) [1]		16
Requirements specific to Civil Engineering:		
An economics course must be selected from the following list:		
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
A minimum of three credits of environmental studies course that meets the breadth designations of humanities, literature, and/or social science. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.		

Total Credits 16

[1] All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.
Note: See a CEE advisor for additional information.

- **CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING** (P. 241)

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (a) An ability to apply knowledge of mathematics, science, and engineering.
2. (b) An ability to design and conduct experiments, as well as to analyze and interpret data.
3. (c) An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
4. (d) An ability to function on multidisciplinary teams.
5. (e) An ability to identify, formulate, and solve engineering problems.
6. (f) An understanding of professional and ethical responsibility.
7. (g) An ability to communicate effectively.
8. (h) The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.
9. (i) A recognition of the need for, and an ability to engage in life-long learning.
10. (j) A knowledge of contemporary issues.
11. (k) An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
12. (l) An ability to explain basic concepts in management, business, public policy, and leadership.
13. (m) An ability to explain the importance of professional licensure.
14. (n) An ability to understand common failure mechanisms of a component, process, or system and their causes and prevention.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

CIVIL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT

The Department of Civil and Environmental Engineering offers an undergraduate option in construction engineering and management. Students taking the CEM option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science–Civil Engineering with option: Construction Engineering and Management.

Students pursuing the CEM option take the same core courses in mathematics, natural sciences, engineering, communications, and liberal studies as do the other civil engineering students. The applied engineering requirements within the CEM curriculum differ from those of BSCE in that students are required to complete courses in construction management and courses in the School of Business. Students must also complete two 1-credit co-op or internship experiences. The total number of credits required for the CEM option is 132 instead of 128.

REQUIREMENTS

REQUIREMENTS

Code	Title	Credits
Choose one:		3
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
Must take:		
CIV ENGR 578	Senior Capstone Design [1]	4
Select one of the following:		3
CIV ENGR 392	Building Information Modeling (BIM) [2]	
CIV ENGR 414	Hydrologic Design	
CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 522	Hazardous Waste Management	
CIV ENGR/ G L E 530	Seepage and Slopes	
CIV ENGR/ G L E 531	Retaining Structures	
CIV ENGR/ G L E 532	Foundations	
CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	
Must take:		
CIV ENGR/BSE 491	Legal Aspects of Engineering	3
CIV ENGR 492	Integrated Project Estimating and Scheduling	3
Students must take two 1-credit co-ops or internships. A summer internship equals 1 credit; a co-op equals 1 credit.		2
Select one of the following:		3
CIV ENGR 496	Electrical Systems for Construction	
CIV ENGR 497	Mechanical Systems for Construction	
Select two of the following:		6
ACCT I S 300	Accounting Principles	
FINANCE/ ECON 300	Introduction to Finance	
M H R 300	Managing Organizations	
REAL EST/ A A E/ECON/ URB R PL 306	The Real Estate Process	

REAL EST 611	Residential Property Development	
Total Credits		27

1 Must complete either CIV ENGR 445 Steel Structures I or CIV ENGR 447 Concrete Structures I before taking.

2 This course is only available as a design course for CEM option students.

CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering offers an undergraduate option in environmental engineering. Students taking the environmental engineering option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science–Civil Engineering with option: Environmental Engineering.

Students pursuing the environmental engineering option take the same core courses in mathematics, natural sciences, engineering, communications, and liberal studies as do the other civil engineering students. The applied engineering requirements within the environmental engineering curriculum differ from those of BSCE in that students are required to complete several courses with an emphasis in water resources, environmental fluid mechanics, environmental chemistry and biotechnology, water and wastewater treatment, geoenvironmental and hazardous wastes engineering, air pollution control engineering, or occupational health engineering.

REQUIREMENTS

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4
Every student must take at least one course in the environmental or water resources discipline and another course in a different discipline, for a total of 6 credits. One of the two courses MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.		6
Water Resources		
CIV ENGR 414	Hydrologic Design	
Environmental		
CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 522	Hazardous Waste Management	
Structural		
CIV ENGR 442	Wood Structures I	
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
CIV ENGR 641	Highway Bridges	
Geological		
CIV ENGR/ G L E 530	Seepage and Slopes	
CIV ENGR/ G L E 531	Retaining Structures	
CIV ENGR/ G L E 532	Foundations	
Transportation		
CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	
Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other courses will count toward the electives requirement (see section below).		
Total Credits		10

ENGINEERING ELECTIVES REQUIREMENT

1. Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the bachelor of science in civil engineering program. InterEGR and EPD courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CEE) do not qualify for meeting this requirement.
2. Select at least one of the following: CIV ENGR 322 Environmental Engineering Processes or CIV ENGR 410 Hydraulic Engineering.
3. Students must take at least 6 credits of coursework that meets at least one of the following[1, 2, 3]:
   a. Any course offered by an engineering department, including but not limited to CEE.
   b. Any intermediate- or advanced-level course with a breadth designation of Biological Sciences, Physical Sciences, and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities, or Literature.
   c. Any of the following business courses: ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process.

Total Credits: 12

1 Up to 3 credits of CIV ENGR 1 Cooperative Education Program may be used toward Item 3.

2 Up to 6 credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used toward Item 3.

3 Depending on their choice of courses, students may need to take some of these 6 credits to satisfy the breadth requirement below.

ENVIRONMENTAL ENGINEERING BREADTH REQUIREMENT

Courses selected to meet the design and electives requirement above must also be selected in a manner that meets this requirement. At least one CEE course must be selected from at least three of the specialty groups in the table below.

Code	Title	Credits
Water Resources		
CIV ENGR 410	Hydraulic Engineering	3
CIV ENGR 412	Groundwater Hydraulics	3
CIV ENGR 414	Hydrologic Design	3
CIV ENGR 415	Hydrology	3
CIV ENGR 416	Water Resources Systems Analysis	3
CIV ENGR 619	Special Topics in Hydrology	1-3
Environmental Fluid Mechanics		
CIV ENGR 411	Open Channel Hydraulics	3
CIV ENGR 514	Coastal Engineering	2-3
CIV ENGR 618	Special Topics in Hydraulics and Fluid Mechanics	1-3
Environmental Chemistry & Biotechnology		
CIV ENGR 500	Water Chemistry	3
CIV ENGR 501	Water Analysis-Intermediate	3
CIV ENGR/ SOIL SCI 623	Microbiology of Waterborne Pathogens and Indicator Organisms	3
CIV ENGR 629	Special Topics in Environmental Engineering (Topic: Environmental Microbial Biotechnology)	1-3
Water & Wastewater Treatment		
CIV ENGR 322	Environmental Engineering Processes	3
CIV ENGR/BSE/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	2
CIV ENGR 426	Design of Wastewater Treatment Plants	3
CIV ENGR 428	Water Treatment Plant Design	3
Geoenvironmental & Hazardous Wastes		
CIV ENGR/G L E 421	Environmental Sustainability Engineering	3
CIV ENGR 427	Solid and Hazardous Wastes Engineering	3
CIV ENGR 522	Hazardous Waste Management	3
CIV ENGR/G L E 633	Waste Geotechnics	3
CIV ENGR/G L E 635	Remediation Geotechnics	3
Occupational & Public Health		
CIV ENGR 422	Elements of Public Health Engineering	3
Air Pollution Control		
CIV ENGR 423	Air Pollution Effects, Measurement and Control	3
CIV ENGR 609	Special Topics in Water Chemistry (Topic: Aerosol and Air Pollution Lab)	1-3

GEOLOGICAL ENGINEERING, B.S.

Geological engineering integrates two disciplines—geology and engineering. Geologists study the earth—its origins, its composition, and its evolution. Engineers apply scientific principles to practical ends, such as the design and construction of facilities for practical use by society.

Geological engineering is interdisciplinary, with faculty from the College of Engineering and the College of Letters & Science.

Geological engineers find the best way to use the earth's resources to solve technical problems while protecting the environment. They solve a variety of practical problems associated with rock and soils using principles of sustainable engineering. They design and construct structures, transportation facilities, dams, tunnels, and power plants. They mitigate naturally occurring phenomena such as floods, landslides, and earthquakes, and develop safe and environmentally sound sources of energy and minerals. Geological engineers also manage groundwater and surface water resources to ensure the public has access to safe drinking water. They also design and construct subsurface repositories for waste disposal and remediate contaminated sites.

Students pursuing the B.S. degree are encouraged to obtain an additional major in geoscience. The B.S. program is set up so that students can obtain a degree in geological engineering and an additional major in geoscience in a single 125-credit program. No extra credits are required to obtain the additional major in geoscience. The B.S. degree in geological engineering is accredited by the Accreditation Board of Engineering and Technology (ABET), which is required to obtain a professional engineering license.

GEOLOGICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Graduates will be prepared to assume positions as geological engineers upon graduation. After proper training and exposure to a comprehensive education in our program, our graduates will demonstrate during the five years after graduation their ability to:

1. apply geological engineering principles, analyses, and synthesis to design and implement projects in the natural and built environment;
2. incorporate economic, environmental, political, ethical, social, safety, and global considerations to generate sustainable solutions in the natural and built environment;
3. exhibit strong communication, leadership, and teamwork skills;
4. serve others through professional responsibility and participation in professional and public activities and good citizenship; and
5. demonstrate a continuing commitment to and interest in their own and others' education.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general

college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Students must complete the College of Engineering Liberal Studies Requirements (http://guide.wisc.edu/undergraduate/engineering/#requirementstext).

Students are encouraged to download a GLE Undergraduate Handbook from the Current Students/Undergraduate page on the department website (http://www.engr.wisc.edu/geological-engineering). The handbook has detailed curriculum information as well as other practical information for undergraduate students to supplement the information provided here.

Students completing the geological engineering degree are also eligible to earn an additional major in geoscience with no additional coursework. Students are encouraged to declare an additional major in geoscience. Students must contact an advisor to complete the necessary paperwork to declare an additional major in geoscience.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics		13
Engineering Principles and Professional Issues		11-14
Physical Science, Engineering Science, and Geoscience		44
Required Geological Engineering Courses		18
Technical Electives		15
Geological Engineering Design		
Communication Skills		8-9
Liberal Studies Electives		16
Fundamentals of Engineering Exam		
Total Credits		125-129

MATHEMATICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus--Functions of Several Variables	4
Total Credits		13

ENGINEERING PRINCIPLES AND PROFESSIONAL ISSUES

Code	Title	Credits
STAT 324	Introductory Applied Statistics for Engineers	3
or STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	4
I SY E 313	Engineering Economic Analysis	3
Select one:		1-4
E P D 690	Special Topics in Engineering Professional Development (Topic: Core Competence in Sustainability)	
ENVIR ST 250	Introduction to Sustainability Science	
ENVIR ST/ GEOG 339	Environmental Conservation	
ENVIR ST/ PHILOS 441	Environmental Ethics	
G L E 401	Special Topics in Geological Engineering (Topic: Ethics & Professionalism - GLE)	
Total Credits		11-14

PHYSICAL SCIENCE, ENGINEERING SCIENCE AND GEOSCIENCE

Code	Title	Credits
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
E M A 201	Statics	3
E M A 202	Dynamics	3
or M E 240	Dynamics	
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
CIV ENGR 310	Fluid Mechanics	3
GEOSCI 100	Introductory Geology: How the Earth Works	3
or GEOSCI/ ENVIR ST 106	Environmental Geology	
GEOSCI 202	Introduction to Geologic Structures	4
GEOSCI 204	Geologic Evolution of the Earth	4
GEOSCI/G L E 360	Principles of Mineralogy	3
GEOSCI/G L E 370	Elementary Petrology	3
GEOSCI/G L E 431	Sedimentary & Stratigraphy Lab	1
GEOSCI/G L E 455	Structural Geology	4
Total Credits		44-48

REQUIRED GEOLOGICAL ENGINEERING COURSES

Code	Title	Credits
G L E 171	Introduction to Geological Engineering	1
G L E/CIV ENGR 330	Soil Mechanics	3
G L E/GEOSCI/ M S & E 474	Rock Mechanics	3
G L E 479	Geological Engineering Design	3
G L E/GEOSCI 594	Introduction to Applied Geophysics	3
G L E/GEOSCI 595	Field Methods in Applied and Engineering Geophysics	1
G L E/GEOSCI 627	Hydrogeology	4
Total Credits		18

TECHNICAL ELECTIVES (15 CREDITS)

Students must take at least 15 credits of Technical Electives, of which 5-6 credits must be design focused.

Design-focused technical electives (choose one of the following options):

Option 1: G L E 401 Special Topics in Geological Engineering (Topic: Intro to Slope Stability) and G L E 401 Special Topics in Geological Engineering (Topic: Intro to Foundation Engr) and G L E 401 Special Topics in Geological Engineering (Topic: Intro to Undrgrnd Opening Engr) are required. Choose one additional technical elective from the technical elective list courses noted with a (D).

Option 2: G L E 401 Special Topics in Geological Engineering (Topic: Intro to Foundation Engr) and G L E 401 Special Topics in Geological Engineering (Topic: Intro to Undrgrnd Opening Engr) and G L E/ CIV ENGR 530 Seepage and Slopes are required.

Option 3: G L E 401 Special Topics in Geological Engineering (Topic: Intro to Slope Stability) and G L E 401 Special Topics in Geological Engineering (Topic: Intro to Undrgrnd Opening Engr) and G L E/ CIV ENGR 532 Foundations are required.

The remaining technical elective credits may be selected from the technical elective list below. Students may take up to 6 credits of G L E 489 Honors in Research as technical electives. The technical electives are organized into five tracks, described below. Students may select courses within these tracks to focus coursework in a particular area. However, students may complete the technical electives requirement using courses listed in multiple tracks.

Suggested technical electives and associated credits (D indicates design course) for each track are included below. One credit of G L E 1 Cooperative Education Program can be used as a technical elective.

Energy, Minerals & Mining

Geological engineers possess knowledge and a skill set that serve society's need to manage extraction of traditional energy and mineral resources in more sustainable and efficient ways, and to lead in new technologies to limit carbon emissions through geological sequestration or to develop geothermal energy in deeper reservoirs.

Within this track, the 16 credits of liberal studies can be framed to match those of the Energy Institute certificate in Energy Sustainability (p. 266).

Code	Title	Credits
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 562	Special Topics in Chemical Engineering (Topic: Energy & Sustainability)	1-3
CIV ENGR/ENVIR ST/ GEOG 377	An Introduction to Geographic Information Systems	4
E M A 405	Practicum in Finite Elements	3
GEOSCI/ ENVIR ST 410	Minerals as a Public Problem	3
GEOSCI/ ENVIR ST 411	Energy Resources	3
GEOSCI 457	Conducted Field Trip	2
GEOSCI 459	Field Geology	6
GEOSCI 515	Principles of Economic Geology	4
G L E 401	Special Topics in Geological Engineering (D) [1]	1-3
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 531	Retaining Structures (D)	3
G L E 801	Special Topics in Geological Engineering (Topic: Geomechanics)	1-3

[1] Only certain G L E 401 topics count as design courses.

Sustainability & Environment

Methods for quantifying the long-term effects of development, natural resource extraction, and environmental damage are often neglected or misapplied in cost-benefit life cycle analysis. This track intends to produce professionals capable of leading the field in sustainable design and construction. The Sustainability & Environment track focuses on quantification, design, and optimization in relation to the use of natural resources and construction materials/methods as well as minimizing the long-term impacts of these activities.

Code	Title	Credits
BSE/DS/ LAND ARC 356	Sustainable Residential Construction	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 562	Special Topics in Chemical Engineering (Topic: Energy & Sustainability)	1-3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 421	Environmental Sustainability Engineering	3

SOIL SCI 321	Soils and Environmental Chemistry	3
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality	3

[1] Only certain G L E 401 Special Topics in Geological Engineering topics count as design courses.

Geohazards

The number of fatalities and amount of economic loss due to geohazards increase every year. These losses may result from various geohazards, such as volcanic eruptions, earthquakes, landslides, flooding and tsunamis. The Geohazards track aims to provide students with the necessary skills to perform analyses that minimize loss of life and economic costs associated with geohazards.

Water

Water is an essential resource for humans and ecosystems. Water is also linked to mineral and energy resource production, waste management, and land reclamation. Population growth and climate change are creating increasing challenges to this resource. Development and sustainable management of groundwater and surface water, including prevention and mitigation of water quality problems, require combined expertise in geoscience, hydrology, and water resources engineering offered through the Water track.

CIV ENGR 618	Special Topics in Hydraulics and Fluid Mechanics (D) [1]	1-3
CIV ENGR 619	Special Topics in Hydrology	1-3
GEOSCI/GEOG 320	Geomorphology	3
GEOSCI/GEOG 326	Landforms-Topics and Regions	3
GEOSCI/GEOG 420	Glacial and Pleistocene Geology	3
GEOSCI 430	Sedimentology and Stratigraphy	3

GEOSCI/G L E 629	Contaminant Hydrogeology (D)	3
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 732	Unsaturated Soil Geoengineering	3

[1] Must take one of these topics: "Waterfront & Coastal Planning" or "Lake & River Rehabilitation."

Infrastructure

There are many challenges that need to be overcome to address the aging infrastructure of this country as well as to develop cost effective solutions for new infrastructure in developing nations. The Infrastructure track is developed to provide students a background that enables them to perform engineering calculations to design, construct, assess the current condition (level of safety), and develop repair and retrofit solutions for civil engineering structures resting on, or constructed in, soil or rock.

Code	Title	Credits
CIV ENGR 649	Special Topics in Structural Engineering (Topic: Sustainable Construction)	1-3
E M A 405	Practicum in Finite Elements	3
GEOSCI/GEOG 320	Geomorphology	3
GEOSCI/GEOG 420	Glacial and Pleistocene Geology	3
GEOSCI 430	Sedimentology and Stratigraphy	3
G L E 401	Special Topics in Geological Engineering (D) [1]	1-3
G L E/CIV ENGR/ ENVIR ST/ GEOSCI 444	Practical Applications of GPS Surveying	2
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 531	Retaining Structures (D)	3
G L E/CIV ENGR 532	Foundations (D)	3
G L E/CIV ENGR 730	Engineering Properties of Soils	3
G L E/CIV ENGR 735	Soil Dynamics (D)	3

[1] Only certain G L E 401 topics count as design courses.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
E P D 275	Technical Presentations	2-3
or COM ARTS 105	Public Speaking	
or COM ARTS 181	Elements of Speech-Honors Course	
or COM ARTS 262	Theory and Practice of Argumentation and Debate	
or COM ARTS 266	Theory and Practice of Group Discussion	
E P D 397	Technical Communication	3
Total Credits		8-9

LIBERAL STUDIES (16 CREDITS)

Students must complete the **16 credits** of College of Engineering Liberal Studies Requirements (http://guide.wisc.edu/undergraduate/engineering/#requirementstext).

FUNDAMENTALS OF ENGINEERING EXAM

All students must take the Fundamentals of Engineering exam.

HONORS IN RESEARCH

Students in geological engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of **at least** 3.5 may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in G L E 489 Honors in Research.

A senior thesis worth 3 credits of G L E 489 Honors in Research is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the geological engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Geological Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in G L E 489 Honors in Research.
4. Completion of a senior honors thesis with a final grade of B or better.

Students interested in the Honors in Research program should contact their advisor or the G L E chair for more information. Applications to the program are to be submitted to the G L E chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the G L E chair.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Total Credits 125-129

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

RESOURCES AND SCHOLARSHIPS

FACILITIES

The geological engineering program utilizes laboratories that are shared with other departments. They include:

Land Information and Surveying Laboratories
Fluid Mechanics Laboratory
Materials Testing Laboratory
Geology and Hydrogeology Laboratories
Rock Mechanics Laboratory
Geotechnical and Geoenvironmental Laboratories
The Halliburton Geoscience Visualization Center

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ELECTRICAL AND COMPUTER ENGINEERING

The Department of Electrical and Computer Engineering offers the B.S., M.S. and Ph.D. degrees in electrical engineering and the B.S. degree in computer engineering.

Electrical engineers design and develop anything and everything that uses electricity. From the power systems that bring electricity to our homes and communications systems that allow us to keep in touch with family and friends, to the electronic devices, electrical appliances, computers, sensors, and medical equipment that shape our everyday lives. Typical careers may find an EE collaborating with medical doctors or astronauts in the space program, designing advanced automotive and transportation systems, and interacting with other engineers and professionals. Many EEs work as scientists, inventing new kinds of electronic technology, instrumentation, and devices to help people.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for the current revolution in computers and communications. This focus on software and digital hardware distinguishes the computer engineer from the electrical engineer.

The curricula in the Department of Electrical and Computer Engineering require a strong background in mathematics, physics, and computer science. In addition to basic course requirements in these areas, elective credits in the curriculum permit the student to pursue more advanced courses in these areas or in other fields, such as chemistry, biology, and mechanics. Additional electives in liberal studies broaden the programs to include such areas as economics, sociology, psychology, and history.

The electrical engineering and computer engineering programs share many courses in the first few semesters, including digital systems, electrical circuits, and electromagnetic fields. Computer engineering students take additional courses in computer science to provide the software part of their background. In the junior year, the electrical engineering program focuses on areas such as electromagnetic fields and analog electronics whereas computer engineering deals with computer hardware design and combined hardware/software design concepts. Technical elective freedom in both curricula makes it possible for students to choose from approximately 50 more specialized courses at the junior and senior levels in electrical and computer engineering, as well as courses from other departments. In both curricula, a student can choose a broad program covering an introductory treatment of a variety of areas or focus in one or two specialized areas. An advising program, beginning in the freshman year, helps students plan their program.

To provide students with hands-on experience in electrical and computer engineering, specialized lab courses are offered at the senior level. For example, one involves the design and fabrication of integrated circuits and the other design and prototyping of a computer. Both classroom instruction and lab work are offered in signal processing and in embedded systems, with microprocessors and personal computers incorporated into larger systems. Independent study and design projects are encouraged at the senior level and an honors research program is available which spans multiple years of the undergraduate program.

Although the B.S. in electrical engineering and B.S. in computer engineering programs are intended to prepare students for immediate entry into the profession of engineering, increasingly, students find an additional year or more of study leading to the M.S. degree very desirable. The Ph.D. degree is the most advanced degree and emphasizes training in research.

COMPUTER ENGINEERING, B.S.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for the current revolution in computers and communications. This focus on software and digital hardware distinguishes the computer engineer from the electrical engineer.

ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or non-profit using their degree knowledge or skills for professional functions such

as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the computer engineering degree program (classification changed to CMPE) in fall 2017 or later.

Code	Title	Credits
Mathematics		19
Science		20-21
Computer Engineering Core		32
Computer Engineering Advanced Electives		16
Professional Electives		9
Communication Skills		6

Liberal Studies	15
Free Elective	3
Total Credits	120-121

MATHEMATICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus--Functions of Several Variables [1]	4
MATH/ COMP SCI 240	Introduction to Discrete Mathematics	3
or MATH/ COMP SCI/ STAT 475	Introduction to Combinatorics	
Probability/Statistics Elective (select one)		*3*
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
MATH/STAT 431	Introduction to the Theory of Probability	
E C E 331	Introduction to Random Signal Analysis and Statistics	
Total Credits		19

[1] MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234.

SCIENCE

Code	Title	Credits
COMP SCI 300	Programming II	3
COMP SCI 400	Programming III	3
PHYSICS 201	General Physics [1]	5
or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Select one of the following: [2]		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
Total Credits		20-21

[1] Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics or E M A 201 Statics and M E 240 Dynamics.

COMPUTER ENGINEERING CORE

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 210	Introductory Experience in Electrical Engineering	2
E C E 219	Analytical Methods for Electromagnetics Engineering	1
E C E 220	Electrodynamics I	3
E C E 230	Circuit Analysis	4
E C E/COMP SCI 252	Introduction to Computer Engineering	2
E C E 270	Circuits Laboratory I	1
E C E 315	Introductory Microprocessor Laboratory	1
E C E 340	Electronic Circuits I	3
E C E/COMP SCI 352	Digital System Fundamentals	3
E C E 353	Introduction to Microprocessor Systems	3
E C E/COMP SCI 354	Machine Organization and Programming	3
E C E 551	Digital System Design and Synthesis	3
Total Credits		32

COMPUTER ENGINEERING ADVANCED ELECTIVES

Code	Title	Credits
Electronic Circuits Elective		*3*
E C E 342	Electronic Circuits II	
E C E 447	Applied Communications Systems	
E C E 541	Analog MOS Integrated Circuit Design	
E C E 542	Introduction to Microelectromechanical Systems	
E C E 548	Integrated Circuit Design	
E C E 555	Digital Circuits and Components	
Systems Software Elective		*3-4*
E C E/ COMP SCI 506	Software Engineering	
COMP SCI 536	Introduction to Programming Languages and Compilers	
COMP SCI 537	Introduction to Operating Systems	
COMP SCI 564	Database Management Systems: Design and Implementation	
Capstone Design		*4*
E C E 453	Embedded Microprocessor System Design	
E C E 454	Mobile Computing Laboratory [1]	
E C E 554	Digital Engineering Laboratory	
CMPE Elective I		*3*
E C E 537	Communication Networks	
E C E/ COMP SCI 552	Introduction to Computer Architecture	
E C E 553	Testing and Testable Design of Digital Systems	
E C E 556	Design Automation of Digital Systems	
CMPE Elective II		*3*
Select from E C E 399 - E C E 699		

Select from COMP SCI 400 - COMP SCI 699 [1]	
Total Credits	16-17

[1] E C E 454 Mobile Computing Laboratory and COMP SCI 407 Foundations of Mobile Systems and Applications cannot both be taken for degree credit.

PROFESSIONAL ELECTIVES

Code	Title	Credits
Professional Electives		9
Courses to be taken in an area of professional interest. The following courses are acceptable as professional electives if the courses are not used to meet any other degree requirements.		
E C E 1	Cooperative Education Program (One co-op credit can count towards professional electives.)	
E C E/ PHYSICS 235	Introduction to Solid State Electronics	
E C E 320	Electrodynamics II	
E C E 330	Signals and Systems	
E C E 331	Introduction to Random Signal Analysis and Statistics	
E C E 332	Feedback Control Systems	
E C E 334	State Space Systems Analysis	
E C E 335	Microelectronic Devices	
E C E 342	Electronic Circuits II (may be used if not already used as an Electronic Circuits Advanced Elective)	
E C E 355	Electromechanical Energy Conversion	
E C E 356	Electric Power Processing for Alternative Energy Systems	
E C E 379	Special Topics in Electrical and Computer Engineering (Topic: Data Science & Engineering)	
E C E courses numbered 399 and higher		
COMP SCI courses numbered 400 and higher		
MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations [1]	
MATH 321	Applied Mathematical Analysis	
MATH 322	Applied Mathematical Analysis	
MATH 340	Elementary Matrix and Linear Algebra [1]	
MATH 341	Linear Algebra	
MATH courses numbered 400 and higher		
STATS courses numbered 400 and higher		
Any biological sciences course that is designated as intermediate or advanced level		
Any physical science course that is designated as intermediate or advanced level		
Any natural science course that is designated as advanced level, except that math, computer sciences, and statistics courses must follow the above criteria		
Engineering courses numbered 300 and higher that are not E C E or cross-listed with E C E		
Up to six credits of Professional Electives can be taken from School of Business classes numbered 300 and higher.		
DS 501	Special Topics (Wearable Technologies)	
DANCE 560	Current Topics in Dance: Workshop (Making Digital Lighting Controls)	

[1] Students may only earn degree credit for MATH 320 Linear Algebra and Differential Equations or MATH 340 Elementary Matrix and Linear Algebra, not both.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or COM ARTS 181	Elements of Speech-Honors Course	
or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3
Total Credits		6

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete requirements (p. 214) [1]		15
Total Credits		15

[1] All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. **Note**: See an E C E advisor and/or the EE Curriculum Guide (https://www.engr.wisc.edu/department/electrical-computer-engineering/academics/bachelor-of-science-computer-engineering) for additional information.

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work | Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ELECTRICAL ENGINEERING, B.S.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or nonprofit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/

cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the electrical engineering degree program (classification changed to EE) in Fall 2017 or later.

Code	Title	Credits
Mathematics		16
Science		17-18
Electrical Engineering Core		31
Electrical Engineering Advanced Electives		24
Professional Electives		9
Communication Skills		6
Liberal Studies		15
Free Elective		2
Total Credits		120-121

MATHEMATICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus–Functions of Several Variables [1]	4
Probability and Statistics Elective		3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT/M E 424	Statistical Experimental Design	
MATH/STAT 431	Introduction to the Theory of Probability	
E C E 331	Introduction to Random Signal Analysis and Statistics	
Total Credits		16

[1] MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234.

SCIENCE

Code	Title	Credits
COMP SCI 300	Programming II	3
PHYSICS 201	General Physics [1]	5

or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Select one of the following:		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
Total Credits		17-18

[1] Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics or E M A 201 Statics and M E 240 Dynamics.

ELECTRICAL ENGINEERING CORE

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 210	Introductory Experience in Electrical Engineering	2
E C E 219	Analytical Methods for Electromagnetics Engineering	1
E C E 220	Electrodynamics I	3
E C E 230	Circuit Analysis	4
E C E/PHYSICS 235	Introduction to Solid State Electronics	3
E C E/COMP SCI 252	Introduction to Computer Engineering	2
E C E 270	Circuits Laboratory I	1
E C E 271	Circuits Laboratory II	1
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E/COMP SCI 352	Digital System Fundamentals	3
E C E 370	Advanced Laboratory	2
Total Credits		31

ELECTRICAL ENGINEERING ADVANCED ELECTIVES

Students must take 22 credits in at least three of six areas and at least 2 credits in two laboratory courses.

- At least 9 credits must be in courses numbered 400 and above.
- At least one course must be a capstone design course.
- Students can count 1 credit of E C E 1 Cooperative Education Program toward advanced electives.
- Students can count up to 6 credits of E C E 399 Independent Study , E C E 489 Honors in Research or E C E 699 Advanced Independent Study towards advanced electives.
- Students can take E C E 379 Special Topics in Electrical and Computer Engineering and E C E 601 Special Topics in Electrical and Computer Engineering as advanced electives.

Laboratory

Code	Title	Credits
Select at least one course from E C E 301 to E C E 317		
An additional laboratory course must be taken from the following list:		
E C E 303	Introduction to Real-Time Digital Signal Processing	
E C E 304	Electric Machines Laboratory	
E C E 305	Semiconductor Properties Laboratory	
E C E 306	Linear Active Circuits Laboratory	
E C E 308	Nonlinear Electronic Circuits Laboratory	
E C E 313	Optoelectronics Lab	
E C E 315	Introductory Microprocessor Laboratory	
E C E 317	Sensors Laboratory	
E C E 432	Digital Signal Processing Laboratory	
E C E 453	Embedded Microprocessor System Design	
E C E/B M E 462	Medical Instrumentation [1]	
E C E 504	Electric Machine & Drive System Laboratory	
E C E 512	Power Electronics Laboratory	
E C E 545	Advanced Microwave Measurements for Communications	
E C E 549	Integrated Circuit Fabrication Laboratory	
E C E 554	Digital Engineering Laboratory	
E C E/M E 577	Automatic Controls Laboratory	

Fields & Waves

Code	Title	Credits
E C E 320	Electrodynamics II	3
E C E 420	Electromagnetic Wave Transmission	3
E C E 434	Photonics	3
E C E/N E/ PHYSICS 525	Introduction to Plasmas	3
E C E/N E/ PHYSICS 527	Plasma Confinement and Heating	3
E C E/N E 528	Plasma Processing and Technology	3
E C E 536	Integrated Optics and Optoelectronics	3
E C E/PHYSICS 546	Lasers	2-3
E C E 547	Advanced Communications Circuit Design [1]	3

Systems & Control

Code	Title	Credits
E C E 332	Feedback Control Systems	3
E C E 334	State Space Systems Analysis	3
E C E/M E 439	Introduction to Robotics [1]	3
E C E/M E 577	Automatic Controls Laboratory [1]	4

Power & Machines

Code	Title	Credits
E C E 355	Electromechanical Energy Conversion	3
E C E 356	Electric Power Processing for Alternative Energy Systems	3
E C E 411	Introduction to Electric Drive Systems	3
E C E 412	Power Electronic Circuits [1]	3
E C E 427	Electric Power Systems	3
E C E 504	Electric Machine & Drive System Laboratory	2-3
E C E 511	Theory and Control of Synchronous Machines	3
E C E 512	Power Electronics Laboratory [1]	3

Communications & Signal Processing

Code	Title	Credits
E C E 331	Introduction to Random Signal Analysis and Statistics	3
E C E 401	Electro-Acoustical Engineering	3
E C E 431	Digital Signal Processing [1]	3
E C E 432	Digital Signal Processing Laboratory [1]	3
E C E/COMP SCI/ MATH 435	Introduction to Cryptography	3
E C E 436	Communication Systems I [1]	3
E C E 437	Communication Systems II [1]	3
E C E 447	Applied Communications Systems [1]	3
E C E/COMP SCI/ M E 532	Matrix Methods in Machine Learning [1]	3
E C E/COMP SCI 533	Image Processing [1]	3
E C E 537	Communication Networks [1]	3
E C E/COMP SCI/ M E 539	Introduction to Artificial Neural Network and Fuzzy Systems [1]	3
E C E/MATH 641	Introduction to Error-Correcting Codes	3

Circuits & Devices

Code	Title	Credits
E C E 335	Microelectronic Devices	3
E C E 342	Electronic Circuits II	3
E C E 445	Semiconductor Physics and Devices	3
E C E/B M E 462	Medical Instrumentation [1]	3
E C E 466	Electronics of Solids	3
E C E 541	Analog MOS Integrated Circuit Design [1]	3
E C E 542	Introduction to Microelectromechanical Systems [1]	3
E C E 545	Advanced Microwave Measurements for Communications [1]	3
E C E 548	Integrated Circuit Design [1]	3
E C E 549	Integrated Circuit Fabrication Laboratory [1]	3
E C E 555	Digital Circuits and Components [1]	3

Computers & Computing

Code	Title	Credits
E C E 353	Introduction to Microprocessor Systems	3
E C E 453	Embedded Microprocessor System Design [1]	4
E C E 454	Mobile Computing Laboratory [1]	4
E C E/B M E 463	Computers in Medicine	3
E C E 551	Digital System Design and Synthesis [1]	3
E C E/COMP SCI 552	Introduction to Computer Architecture	3
E C E 553	Testing and Testable Design of Digital Systems [1]	3
E C E 554	Digital Engineering Laboratory [1]	4
E C E 556	Design Automation of Digital Systems [1]	3

[1] Designated as a capstone course. Students can also take E C E 491 Senior Design Project for capstone credit.

PROFESSIONAL ELECTIVES

Code	Title	Credits
Classes to be taken in an area of professional interest. The following courses are acceptable as professional electives if the courses are not used to meet any other degree requirements.		*9*
MATH/ COMP SCI 240	Introduction to Discrete Mathematics	
E C E 320	Electrodynamics II	
E C E 331	Introduction to Random Signal Analysis and Statistics	
E C E 332	Feedback Control Systems	
E C E 334	State Space Systems Analysis	
E C E 335	Microelectronic Devices	
E C E 342	Electronic Circuits II	
E C E 353	Introduction to Microprocessor Systems	
E C E/ COMP SCI 354	Machine Organization and Programming	
E C E 355	Electromechanical Energy Conversion	
E C E 356	Electric Power Processing for Alternative Energy Systems	
E C E 379	Special Topics in Electrical and Computer Engineering (Topic: Data Science & Engineering)	
E C E courses numbered 399 and higher		
COMP SCI courses numbered 400 and higher		
MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations [1]	

MATH 321	Applied Mathematical Analysis
MATH 322	Applied Mathematical Analysis
MATH 340	Elementary Matrix and Linear Algebra [1]
MATH 341	Linear Algebra
MATH courses numbered 400 and higher	
STATS courses numbered 400 and higher	
Any biological science course that is designated as intermediate or advanced	
Any physical science course that is designated as intermediate or advanced	
Any natural science course that is designated as advanced except that Math, Computer Sciences, and Statistics courses must follow the above criteria	
Engineering courses numbered 300 and higher that are not E C E or cross-listed with E C E	
Up to six credits of Professional Electives can be taken from School of Business classes numbered 300 and higher.	
DS 501	Special Topics (Wearable Technologies)
DANCE 560	Current Topics in Dance: Workshop (Making Digital Lighting Controls)

[1] Students may only earn degree credit for MATH 320 Linear Algebra and Differential Equations or MATH 340 Elementary Matrix and Linear Algebra, not both.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or COM ARTS 181	Elements of Speech-Honors Course	
or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3
Total Credits		6

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete requirements (p. 214) [1]		15
Total Credits		15

[1] All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. **Note**: See an E C E advisor and/or the EE Curriculum Guide for additional information.

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ENGINEERING - COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

- College of Engineering Honors in the Liberal Arts (p. 260)
- International Engineering, Certificate (p. 260)
- Naval Science, BNS (p. 261)
- Technical Communication, Certificate (p. 262)
- Technical Japanese Studies for Undergraduates, Certificate (p. 265)

COLLEGE OF ENGINEERING HONORS IN THE LIBERAL ARTS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates—not just a few—excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

HOW TO GET IN

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (https://www.engr.wisc.edu/academics/undergraduate-academics/honors) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

REQUIREMENTS

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "!" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

INTERNATIONAL ENGINEERING, CERTIFICATE

The certificate in international engineering provides recognition for a student's efforts to prepare for an international career by learning about one or more countries outside the United States. An undergraduate student in the College of Engineering or the Department of Biological Systems Engineering can earn the certificate by completing at least 16 credits in courses with a primary focus on the language, culture, history, geography, society, or institutions of a particular country or region of the world.

HOW TO GET IN

The application process is outlined on the Certificate in International Engineering website (https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-in-international-engineering). Students must have a cumulative GPA of at least 2.75 and have met progression requirements to apply.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

A minimum of 16 credits is required.

LANGUAGE COURSES (0-9 CREDITS)

Although not required, a maximum of 9 credits may be devoted to courses in a foreign language. Only foreign language courses beyond the initial 8 credits in that particular language may be used to satisfy this requirement. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

AREA STUDIES COURSES (6-15 CREDITS)

A minimum of 6 credits must be devoted to courses with a major emphasis on the culture, history, geography, society, or institutions of one country or the countries in a geographically identifiable region of the world. These courses must be selected from at least two departments. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

INTERNATIONAL EXPERIENCE

A documented stay of five weeks or longer for study or engineering-related volunteer or work (including internship and co-op) in the designated country or region is required.

INTERNATIONAL ENGINEERING COURSE

After one's international experience, successful completion of the 1-credit course INTEREGR 413 Current Issues in International Engineering is required. **This course is offered during the fall semester only.**

Students may not elect the pass/fail option for any course that is used to satisfy the requirements for the certificate, with the exception of courses taken on a study abroad program through International Engineering Studies and Programs (IESP) (http://international.engr.wisc.edu). Successful completion of certificate requirements will be noted on the student's official transcript. For additional information, contact International Engineering Studies and Programs (http://international.engr.wisc.edu) (Room 1150 Engineering Hall, 1415 Engineering Drive; international@engr.wisc.edu).

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Study the language and/or culture of a specific area of the world.
2. Obtain a significant international experience in that same area of the world (meaning spending 5 weeks or more in the area).
3. Understand and be able to articulate specific insights about the international dimension of engineering as a profession.

NAVAL SCIENCE, BNS

The College of Engineering recommends candidates for the bachelor of naval science degree.

Earning both the BNS degree and the B.S. degree in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

For additional information see the Officer Education (p. 18) section of the *Guide*.

HOW TO GET IN

The naval science BNS is not a stand-alone degree. Students interested in pursuing this degree should consult with the Navy ROTC:
1610 University Ave, Madison, WI 53726 | 608-262-3794 | nrotc.admin@wisc.edu

REQUIREMENTS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree. Requirements for the degree are:

1. A total of 136 credits including no fewer than 100 credits of elected and required courses in one of the engineering curricula.
2. Completion of these additional requirements as approved by the Department of Naval Science: English, two semesters; American Military Affairs/National Security Policy, one semester (see below).

Earning both the BNS degree and the B.S. in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

REQUIRED COURSES:

Code	Title	Credits
Naval Laboratory (1 cr each):		8-10
NAV SCI 175	Introductory Naval Laboratory I	
NAV SCI 176	Introductory Naval Laboratory II	
NAV SCI 275	Elementary Naval Laboratory I	
NAV SCI 276	Elementary Naval Laboratory II	
NAV SCI 375	Intermediate Naval Laboratory I	
NAV SCI 376	Intermediate Naval Laboratory II	
NAV SCI 475	Advanced Naval Laboratory I	
NAV SCI 476	Advanced Naval Laboratory II	
NAV SCI 575	Professional Naval Laboratory I [1]	
NAV SCI 576	Professional Naval Laboratory II [1]	
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs [2]	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 402	Naval Leadership and Ethics	3
Six credits of English. Must be writing-intensive and focus on areas of grammar and composition. Accepted courses include those designated COM A or COM B		6
Three credits of American Military History or National Security Policy. Accepted courses include:		3
POLI SCI 104	Introduction to American Politics and Government	
POLI SCI 140	Introduction to International Relations	
POLI SCI 160	Introduction to Political Theory	
POLI SCI/ LEGAL ST 217	Law, Politics and Society	
POLI SCI 347	Terrorism	
POLI SCI 348	Analysis of International Relations	
POLI SCI 356	Principles of International Law	

POLI SCI 377	Nuclear Weapons and World Politics
HISTORY 427	The American Military Experience to 1902
HISTORY 428	The American Military Experience Since 1899
MIL SCI 491	American Military History
Completion of one of the following tracks:	
Navy-Option Track:	
NAV SCI 202	Navigation
NAV SCI 301	Naval Engineering
NAV SCI 302	Naval Weapons
NAV SCI 401	Naval Operations
Six credits of calculus to include a first- and second-semester course [3]	
Six credits of calculus-based physics to include a first- and second-semester course [3]	
Three credits of World Culture and Regional Studies. Must have an emphasis on regions encompassed by Sub-Sahara Africa, North Africa, Central Asia, East Asia, South Asia, Southwest Asia, Southeast Asia, Central America, Middle East, or Russia/Eastern Europe	
Marine Corps-Option Track:	
NAV SCI 350	Fundamentals of Maneuver Warfare
NAV SCI 351	Land Campaigns

1 Add NAV SCI 575 Professional Naval Laboratory I if taking a 9th semester, NAV SCI 576 Professional Naval Laboratory II if taking a 10th semester.

2 May substitute HISTORY 427 The American Military Experience to 1902 or HISTORY 428 The American Military Experience Since 1899.

3 AP/IB/Transfer credits accepted only for first-semester course.

Also, to be conferred a BNS degree, the candidate must satisfy the degree requirements for *any* Engineering major, and the above-stated Naval Science requirements.

LEARNING OUTCOMES

1. Understand and apply the fundamentals and principles of Naval Science.
2. Understand and apply Naval Science professional knowledge and core competencies.
3. Be prepared to perform successfully in the technical and critical reasoning requirements of their careers and pursue continuing education in a field of application within the Naval Service.
4. Understand and demonstrate a strong sense of personal integrity, honor, and individual responsibility and associated ethical leadership required of military officers.

FOUR-YEAR PLAN

A four-year plan is forthcoming.

ADVISING AND CAREERS

Naval science BNS students should meet with the Navy ROTC for advising:
1610 University Avenue Madison, WI 53726; 608-262-3794;
nrotc.admin@wisc.edu

TECHNICAL COMMUNICATION, CERTIFICATE

The Technical Communication Certificate (TCC) has established itself as a program that meets industry and government agencies' demands for students with skills as communicators and for communication specialists. Because employers value well-developed communication skills, TCC courses will enhance success in co-op/intern positions and post-graduation careers. TCC graduates overwhelmingly confirm not only that the certificate gave them an edge over other candidates during the recruitment process, but also that the communication knowledge, skills, and attitudes they acquired while in the program helped them succeed in their jobs and helped prepare them for the diverse communication and management tasks in today's multifunctional team environments.

The Technical Communication Certificate, housed in the College of Engineering, complements all undergraduate degrees, but is especially designed to fit in well with an engineering degree. TCC students gain experience in career-applicable skills by

- Receiving education in principles and processes for communicating about technical subjects (including problem solving methods, audience analysis, rhetorical analysis, conventions of format, and usability testing).
- Gaining education in the fundamentals of written, oral, and visual communication (including organization, structure, style, mechanics, format, and delivery).
- Learning effective interpersonal communication and management skills (including teamwork, interviewing, leading and facilitating groups, project management, and international communication).
- Gaining opportunities to research and think analytically about contemporary issues and to consider ethical issues.
- Using current technology to encourage effective communication in a variety of environments (including use of the web, distance communication, electronic publishing, group software, and layout and presentation software).

While the certificate is designed especially for engineering students, students from other fields sometimes seek out the program to enhance their career options. Students who complete the certificate will have the notation "Technical Communication Certificate" added to their transcripts.

Aside from the relevant courses offered in the TCC, students especially value the close contact with faculty through advising and development of a TC Certificate Portfolio. Students in the program often take on leadership roles in other college or campus student organizations and projects, further developing their communication, team, and management skills.

HOW TO GET IN

Undergraduates who would like to enroll in the Technical Communication Certificate may download the TCC Application form (PDF) (https://tc.engr.wisc.edu/certificate/applying-to-the-technical-communication-certificate). Email the completed TCC Application along with a PDF of your current DARS report to Laura Grossenbacher, Director of the Tech Comm Program, at lrgrossenbac@wisc.edu. Graduate students and non-degree-seeking students cannot enroll in the TCC.

PREREQUISITES FOR ADMISSION TO THE TCC PROGRAM

- A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 out of 5).
- Four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course.
- Three courses (9-credit minimum) in humanities, social sciences, and/or foreign language.
- Overall GPA of at least 2.5.

Applications are accepted throughout the semester, though students are encouraged to submit applications as early as possible so they have ample time to plan their coursework. The program will notify all new admissions via email.

REQUIREMENTS

To graduate with the certificate in technical communication, students must complete at least 24 credits, with a minimum of 9 credits in technical proficiency courses and a minimum of 15 credits in both technical and non-technical communication courses.

In addition to course requirements, students must achieve at least a B in the required Technical Communication (E P D 397) and the Technical Communications Internship (E P D 398). All students must complete the program within five years from their application date. Students must meet regularly with their assigned certificate advisor and must compile and submit a portfolio of their work for the internship course. Students cannot count courses completed on a pass/fail basis toward the certificate.

Substitution of courses substantively equivalent to those listed will be considered by the Technical Communication Curriculum Committee. Students must submit requests for substitution with supporting material before beginning the course.

PREREQUISITES

Code	Title	Credits
A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 or 5)		
Select four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course		
Select three courses (9-credit minimum) in liberal studies including a foreign language		
Overall GPA of at least 2.5		

TECHNICAL PROFICIENCY

Code	Title	Credits
Select a minimum of one course each from three areas:		9
Mathematics/Statistics		
Computer Science		
Management/Economics/Business		
Total Credits		9

Mathematics/Statistics

Code	Title	Credits
Mathematics or Statistics courses (200-level or above)

PSYCH/I SY E 653	Organization and Job Design	3
SOC 250	Organizations and Society	3-4
SOC 535	Talk and Social Interaction	3
Independent Study courses by instructor approval only [2]		

[1] Note: These E P D courses **do NOT count toward** the TCC:
- E P D 654 Teaching in Science and Engineering
- E P D 690 Core Competency in Sustainability
- E P D 690 ATE Powertrain
- E P D 690 Essential Skills for Engineering Productivity

[2] Special credits in Technical Communication include E P D 299 Sophomore Independent Study, E P D 399 Junior Independent Study and E P D 499 Senior Independent Study.

SENIOR DESIGN OR CAPSTONE

Code	Title	Credits
Select one of the following:		3
B M E 400	Capstone Design Course in Biomedical Engineering	
CIV ENGR 578	Senior Capstone Design	
G L E 479	Geological Engineering Design	
E M A 469	Design Problems in Engineering	
I SY E 476	Industrial Engineering Projects	
M E 349	Engineering Design Projects	
M E 351	Interdisciplinary Experiential Design Projects I	
M E 352	Interdisciplinary Experiential Design Projects II	
M S & E 470	Capstone Project I	
M S & E 471	Capstone Project II	
N E 571	Economic and Environmental Aspects of Nuclear Energy	

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand and apply principles and processes for communicating about technical subjects to diverse audiences.
2. Understand and apply fundamentals of written, oral, and visual communication.
3. Apply improved skills in interpersonal communication, teamwork, and management.
4. Research, identify, and think analytically about social, global, economic, political, environmental, and ethical issues as they impact technical projects or engineering work.
5. Use current technology to communicate effectively in a variety of formats and environments.
6. Engage in real world experiences through communication internships and guest lectures.

TECHNICAL JAPANESE STUDIES FOR UNDERGRADUATES, CERTIFICATE

Admissions to the Certificate in Technical Japanese Studies for Undergraduates have been suspended as of fall 2017 and will be discontinued as of fall 2021. If you have any questions, please contact the department.

Japanese has become an important language in engineering and in business. In all major industrial fields Japanese technology is regarded as world class. An increasing number of American companies are establishing technical operations in Japan. These companies need engineers who can read and communicate in both English and Japanese. To meet this need, the College of Engineering offers a sequence of courses leading to a Certificate in Technical Japanese Studies for Undergraduates. This option is recommended for students who seek a balance among comprehension of technical Japanese, the ability to use Japanese in daily life, and an understanding of Japanese culture.

REQUIREMENTS

This undergraduate certificate is being discontinued, and no new students are admitted. If you began the program in a prior year, please refer to the Guide from your admission term.

In order to receive this certificate a student must complete a minimum of 18 credits. This certificate is available to **all** undergraduate students at UW–Madison, regardless of major. Students may not elect the pass/fail option for any course that is used to satisfy the requirements for this certificate. Students who receive this certificate develop conversational and written skills in colloquial Japanese, as well as reading and translation skills in technical Japanese. These skills are valued by employers when students apply for Japan-related jobs. The following courses are required:

Code	Title	Credits
Japanese Language Courses (12 credits)		
Previously E-ASIAN 104 and E-ASIAN 203, 6 credits each, now discontinued		

Technical Japanese Courses (6 credits)		
E P D 374	Intermediate Technical Japanese I	3
E P D 375	Intermediate Technical Japanese II [1]	3
Total Credits		6

[1] The combination of E P D 374 and E P D 375 will give students experience reading Japanese essays on a range of scientific and technical topics—including computer science, physics, chemistry, and various fields of engineering. Students read and translate essays from all of these fields into English. In the process, students develop a strong technical vocabulary in Japanese and learn expressions that frequently appear in Japanese journal articles and technical reports.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Acquire a fundamental understanding of modern Japanese grammar.
2. Acquire a basic vocabulary in scientific and technical fields in Japanese.
3. Be able to translate scientific or technical documents in his/her field from Japanese into English.

ENGINEERING PHYSICS

The Department of Engineering Physics (EP) within the University of Wisconsin–Madison College of Engineering is the home of three undergraduate degree programs (nuclear engineering; engineering mechanics and astronautics; and engineering physics) and two graduate degree programs (nuclear engineering and engineering physics; and engineering mechanics). The department's faculty conducts research in the areas of nuclear systems, plasma physics and fusion energy science, and experimental and theoretical mechanics. This combination of topics fosters synergies with respect to neutronics, nuclear materials, mechanics of novel materials, fluid dynamics, and computation. The graduate nuclear engineering program has been ranked in the top four, nationally, by *U.S. News and World Report* in each of the past ten years.

DEGREES/MAJORS/CERTIFICATES

- Engineering for Energy Sustainability, Certificate (p. 266)
- Engineering Mechanics, B.S. (p. 269)
- Engineering Physics, B.S. (p. 276)
- Nuclear Engineering Materials, Certificate (p. 281)
- Nuclear Engineering, B.S. (p. 282)

Superconductivity and Cryogenics Laboratories

ENGINEERING FOR ENERGY SUSTAINABILITY, CERTIFICATE

Equity and sustainability of energy resources in the face of increasing global population and economic development are key issues at the center of the public discourse today. The objective of this certificate program is to offer undergraduate students a suite of courses addressing energy sustainability. The courses span across the engineering curriculum, with firm roots in real-world design and engineering practices.

Students enrolled as degree-seeking undergraduates with a minimum GPA of 2.5 and a plan of study to fulfill the certificate requirements may enroll in the program. Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program; however, students may take courses that fulfill certificate requirements before submitting an application.

HOW TO GET IN

DECLARING THE CERTIFICATE

A student interested in completing the certificate program must contact a designated faculty member in the major department to apply. The student and faculty member must complete a Declaration of Intent and Study Plan to enter the certificate program.

Required: Declaration of Intent and Study Plan (https://energy.wisc.edu/sites/default/files/dec_of_intent-2019.pdf)

See the People (http://guide.wisc.edu/undergraduate/engineering/engineering-physics/engineering-energy-sustainability-certificate/#peopletext) tab to find your designated faculty contact.

When the student and faculty member have filled out and signed the Declaration of Intent and Study Plan, the student must hand them in to Room 2150 Wisconsin Energy Institute.

REQUIREMENTS

REQUIREMENTS

Students must select 16 "sustainability credits" from a suite of available courses that are divided into the following categories:

- Liberal Studies and Science (Minimum of 3, maximum of 6 sustainability credits)
- Engineering (Minimum of 3, maximum of 6 sustainability credits)
- Capstone (Minimum of 3, maximum of 6 sustainability credits)
- Seminar (1 sustainability credit required)

The seminar requirement is fulfilled through the course CBE 555 Seminar-Chemical Engineering Connections, or E P 602 Special Topics in Engineering Physics (Sustainable Energy Challenges and Solutions), both of which are open to all engineering majors.

Not all courses have the same number of sustainability credits as academic credits; some courses have fewer sustainability credits depending on how closely related they are to energy and sustainability. Students should review the sustainability credits associated with each course while filling out their study plan.

PRE-APPROVED COURSES

Liberal Studies and Science

Capstone

Courses numbered 489, 491, 599, 601, and 699 (not exhaustive) are examples of courses that may count towards this requirement. See capstone course guidelines for more information (https://energy.wisc.edu/education/for-students/academic-programs/certificate-energy-sustainability/capstone-guidelines).

Seminar

Code	Title	Credits
E P 602	Special Topics in Engineering Physics [1] sustainability credit	1-3
CBE 555	Seminar-Chemical Engineering Connections [1] sustainability credit	1

COURSE AUTHORIZATION

Some courses may require additional approval to appear in students' DARS reports as having fulfilled part of the certificate requirements. Students who are taking a course for the capstone requirement must fill out this DARS Authorization Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_bpFYQNVcKo4Uogl) to receive the proper number of sustainability credits. For more information on obtaining credits for capstone courses, see Capstone Course Guidelines (http://energy.wisc.edu/education/energy-certificate/capstone-guidelines).

In addition, students who wish to receive sustainability credits for courses that are not currently on the pre-approved list may also complete the DARS Authorization Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_bpFYQNVcKo4Uogl) and explain why the course should receive sustainability credits.

Once a form is filled out, it will be sent to the certificate faculty committee for approval. To expedite the approval process, students should submit their DARS Authorization Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_bpFYQNVcKo4Uogl) before or near the beginning of the semester in which they plan to take the course.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand the physical properties and processes related to energy resources and the conversion technologies involved.
2. Understand how energy decisions are impacted by environmental, social, economic or political factors.
3. Synthesize knowledge of the technical/physical aspects of energy with the social/environmental factors to analyze how energy choices impact the sustainability of energy systems.
4. Apply interdisciplinary energy knowledge to analyze, design or solve a matter of real world significance related to sustainability of energy use.

PEOPLE

ENGINEERING MECHANICS, B.S.

The Department of Engineering Physics administers the B.S., M.S., and Ph.D. degrees in engineering mechanics. The B.S. degree in engineering mechanics may be accompanied by an option in astronautics (p. 274).

Engineering mechanics is the scholarly term for the study of forces and the resulting deformations, accelerations, motions, vibrations and other action that they cause. As such, engineering mechanics forms the foundation of a degree in aerospace, mechanical or civil engineering and it is fundamental to important parts of biomedical engineering, chemical engineering, materials science, and other engineering disciplines. Hence, a degree in engineering mechanics provides a broad scientific background which enables its graduates to tackle challenging problems in most fields of engineering. The curriculum emphasizes the basic sciences—mathematics, computer science, physics and the engineering sciences—fluid dynamics, thermodynamics, mechanics, materials science, and electrical engineering. Although the degree program is entitled engineering mechanics at UW–Madison, the program is most comparable to aerospace engineering and mechanical engineering programs at various universities across the United States. However, internationally, this field is more commonly known as "mechanics" rather than "mechanical engineering" or "aerospace engineering." A few select universities in the United States offer programs that are similar to UW–Madison's engineering mechanics program under titles such as "engineering science" or "theoretical and applied mechanics."

The objective of the program is to provide the student with a broad background in the fundamental physical sciences and applied mathematics, coordinated with both theoretical and applied engineering methods and experimental techniques. This type of educational background will give the student the degree of versatility necessary for dealing with the variety and complexity of modern technological problems as well as the ability to adapt to the rapidly changing needs and interests of industry, government, and society.

An education in engineering mechanics provides many advantages. First, the foundation offered by a degree in mechanics allows our graduates to more easily interact with co-workers on interdisciplinary teams including chemists, physicists, and mathematicians. Second, many industrial organizations prefer engineers that have a broad, fundamental scientific background rather than a narrow view of just one discipline. Third, and probably most important, great changes have taken place in science and engineering during recent years. Among the most important of these have been the rapid diffusion of scientific knowledge and disciplines into engineering, the increasing use of analytical and computer methods for the solution of practical problems, the need for a better understanding of the properties and behavior of materials, and the increasing need for engineers who can adapt known methods to new situations and develop new experimental and analytical methods. By focusing on core competency in physics and applied mathematics the engineering mechanics degree prepares students for these challenges.

The required courses taken early in the curriculum are intended to give the student a fundamental background in mathematics, science, and engineering. In addition to developing versatility through exposure to important concepts in various scientific fields, the required courses allow the students to identify areas of interest. With the relatively large number of elective credits available in the latter part of the program, the student may either continue to follow a general program or may prefer to concentrate elective courses in such areas as stress analysis and structural mechanics, dynamics and vibrations, aerodynamics and flight mechanics, experimental mechanics, applied mathematics, materials science, geological engineering, biomechanics, aerospace mechanics, mechanical systems analysis, etc.

Engineering mechanics graduates are sought by most industries and governmental agencies including in particular those participating in the newly developing areas of engineering such as space technology, performance of new structural materials, and so on. Their work often involves participation in design, research and development projects where the problems are sufficiently complex or unusual that their solutions require engineers with (1) a thorough understanding of the fundamentals of engineering, (2) advanced education in the established experimental and analytical methods, and (3) the ability to develop new experimental and analytical methods to attack problems for which standard methods, formulas, and materials have not yet been developed. The program also provides excellent preparation for graduate study in a variety of related disciplines.

ENGINEERING MECHANICS AND NUCLEAR ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The faculty recognize that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths. Initially, we expect graduates will begin their careers in fields that utilize their knowledge, education and training in solid mechanics and fluid mechanics as it applies to aeronautics/astronautics and mechanics in design and manufacturing.

Whatever path our graduates choose to pursue, our educational objectives for the nuclear engineering and engineering mechanics programs are to allow them to:

1. Exhibit strong performance and continuous development in problem-solving, leadership, teamwork, and communication, initially applied to nuclear engineering or engineering mechanics, and demonstrating an unwavering commitment to excellence.

2. Demonstrate continuing commitment to, and interest in, his or her training and education, as well as those of others.
3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
4. Contribute to their communities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING MECHANICS CURRICULUM

The following curriculum applies to students who entered the College of Engineering in fall 2018 or later.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		22
Science		10
Engineering Science		27
Engineering Mechanics Core		31
EMA Electives		9
Technical Electives		5
Communication Skills		8
Liberal Studies		16
Total Credits		128

MATHEMATICS AND STATISTICS

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 214) [1]		16
Total Credits		16

[1] Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 128

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext).

- **ENGINEERING MECHANICS: ASTRONAUTICS** (P. 274)

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn a Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Total Credits 128-129

1 It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

2 Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

3 Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

4 After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.

5 Students electing E M A 545 Mechanical Vibrations instead of E M A 542 Advanced Dynamics should note that E M A 545 Mechanical Vibrations is offered in the spring semester only.

6 STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/MATH 431 Introduction to the Theory of Probability can be used as a substitute.

7 E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that EMA/ME 540 and EMA/ME 570 are typically offered in the fall. EMA 611 and EMA 522 are typically offered in the spring.

8 M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 is offered in the spring semester only.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned an Engineering Mechanics faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ENGINEERING MECHANICS: ASTRONAUTICS

The astronautics option in engineering mechanics prepares students for design, development, and research, with an emphasis on applied mathematics and astronautics. Its purpose is to improve and expand the educational opportunities of students at the university who wish to pursue careers in astronautics and space-related areas. This is accomplished by providing in depth exposure to course sequences in astrodynamics, orbital mechanics, and flight dynamics, as well as a core curriculum of structural and material analysis, advanced dynamics, and vibrations. The program requires a minimum of 128 credits; students selecting this option must submit an option declaration form to the department office.

Liberal Studies Elective	4	Liberal Studies Elective	3
	16		14

Total Credits 128

1 It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

2 Students who were not able to take INTEREGR 170 (https://guide.wisc.edu/search/?P=INTEREGR%20170) Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

3 Students may substitute PHYSICS 201 General Physics , 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

4 After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.

5 STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/MATH 431 Introduction to the Theory of Probability can be used as a substitute.

6 E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 and E M A/M E 570 are typically offered in the fall. E M A 611 and E M A 522 are typically offered in the spring.

7 M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 is offered in the spring semester only.

8 Students electing E M A 601 Special Topics in Engineering Mechanics must take the section with the topic of Rocket Propulsion. It is offered in the fall semester only.

ENGINEERING PHYSICS, B.S.

The Department of Engineering Physics offers the B.S. degree in engineering physics. The degree is designed to provide graduates with skills in emerging technological areas. They are well prepared for pursuing advanced graduate degrees and for employment in high-tech startup companies and traditional engineering firms, as well as positions in academia, government, and national laboratories.

Students specialize in one of three technological focus areas: nanoengineering, plasma science and engineering, and scientific computing.

Distinguishing features of the engineering physics degree include a strong emphasis on math, physics, and engineering fundamentals; choice of a technical focus area; and emphasis on research as part of a campus research group or through individually mentored research with a faculty member, culminating in a senior thesis.

THE OBJECTIVES OF THE ENGINEERING PHYSICS PROGRAM ARE TO:

- Educate students to think and participate deeply, creatively, and analytically in emerging areas of engineering technology.
- Educate students in the basics of instrumentation, design of laboratory techniques, measurement, data acquisition, interpretation, and analysis.
- Educate students in the methodology of research.
- Provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum.
- Foster the development of effective oral and written communication skills.
- Expose students to environmental, ethical and contemporary issues.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying

to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who entered the program after fall 2018.

Code	Title	Credits
Mathematics and Statistics		25
Science		28
Engineering Science		25
Focus Area		22
Technical Electives		6
Communication Skills		8
Liberal Studies		16
Total Credits		130

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus--Functions of Several Variables	4
MATH 319	Techniques in Ordinary Differential Equations	3
MATH 321	Applied Mathematical Analysis	3
MATH 340	Elementary Matrix and Linear Algebra	3
or MATH 341	Linear Algebra	
STAT 324	Introductory Applied Statistics for Engineers	3
or STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
or STAT/MATH 431	Introduction to the Theory of Probability	
Total Credits		25

SCIENCE

Code	Title	Credits
Select one of the following:		5-10
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
PHYSICS 241	Introduction to Modern Physics	3
or PHYSICS 205	Modern Physics for Engineers	
PHYSICS 322	Electromagnetic Fields	3
E P 271	Engineering Problem Solving I	3
or COMP SCI 310	Problem Solving Using Computers	
M S & E 351	Materials Science-Structure and Property Relations in Solids	3
or CBE 440	Chemical Engineering Materials	

N E 305	Fundamentals of Nuclear Engineering	3
or PHYSICS 531	Introduction to Quantum Mechanics	
Computing Elective (select one)		3
COMP SCI 300	Programming II	
COMP SCI 412	Introduction to Numerical Methods (required for students in Scientific Computing Focus Area)	
E P/E M A 471	Intermediate Problem Solving for Engineers	
E P/E M A 476	Introduction to Scientific Computing for Engineering Physics	
Total Credits		28-33

ENGINEERING SCIENCE

Code	Title	Credits
E M A 201	Statics	3
or PHYSICS 201	General Physics	
or PHYSICS 207	General Physics	
PHYSICS 311	Mechanics	3
or E M A 202	Dynamics	
or M E 240	Dynamics	
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
E M A/M E 307	Mechanics of Materials Lab	1
M E 361	Thermodynamics	3
or M S & E 330	Thermodynamics of Materials	
E C E 376	Electrical and Electronic Circuits	3
or PHYSICS 321	Electric Circuits and Electronics	
M E 363	Fluid Dynamics	3
M E 364	Elementary Heat Transfer	3
or M S & E 331	Transport Phenomena in Materials	
INTEREGR 170	Design Practicum	3
Total Credits		25

FOCUS AREA

Research and Development/Senior Thesis

Expectations for Research Projects

Completion of the engineering physics degree program requires satisfactory completion of the E P 468 Introduction to Engineering Research, E P 469 Research Proposal in Engineering Physics, E P 568 Research Practicum in Engineering Physics I, and E P 569 Research Practicum in Engineering Physics II coursework sequence, which culminates in a senior research thesis. The research topic chosen by the student and agreed upon by the advisor should be on a topic connected to the chosen Focus Area. The research conducted should be such that the student participates in the creation of new knowledge, experiences the excitement of the research process, and makes a contribution so that it would be appropriate to include the student's name on a scholarly publication if one results from the research.

Senior Thesis

A senior thesis, completed during enrollment in E P 569 Research Practicum in Engineering Physics II is required. The senior thesis is a written document reporting on a substantial piece of work. It should be written in the style of a graduate thesis. The faculty advisor, in consultation with a research mentor, determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the engineering physics department office.

On or before the Friday of finals week of the semester in which E P 569 Research Practicum in Engineering Physics II is taken, the senior thesis must be presented orally by the student to a committee of three professors in a publicly announced seminar. Interested faculty and students will be invited to attend.

Research and Development

E P D 397	Technical Communication	3
Total Credits		8

LIBERAL STUDIES

Code	Title	Credits
Complete Requirements (p. 214) [1]		

[1] Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but theyonly count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 130–132

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering research practices to produce results that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to apply experimental, theoretical, and computational methods to address scientific and engineering objectives
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
CHEM 109[1]	5	E M A 201	3

		Liberal Studies Elective	3
	16		17

Total Credits 130-131

1 It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

2 Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

3 Topics from MATH 321 Applied Mathematical Analysis are applied in PHYSICS 322 Electromagnetic Fields, and some students may find it helpful to take PHYSICS 322 Electromagnetic Fields after MATH 321 Applied Mathematical Analysis if PHYSICS 322 Electromagnetic Fields is not required for focus area courses.

4 Students are encouraged to take E P 468 Introduction to Engineering Research during their second year to allow for more flexibility in the research sequence.

5 Students in the nanoengineering focus area should take PHYSICS 531 Introduction to Quantum Mechanics.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned an Engineering Physics faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

RESOURCES AND SCHOLARSHIPS

FACILITIES

Facilities available for instruction and research include:

Fluid Mechanics and Heat Transfer Laboratories
Instructional Computing Labs (in Computer Aided Engineering)
Nanomechanics Laboratory
Nuclear Instrumentation Laboratory
Plasma Physics Laboratories
Superconductivity and Cryogenics Laboratories

NUCLEAR ENGINEERING MATERIALS, CERTIFICATE

The goal of this certificate is to combine a comprehensive set of course curricula that will provide students with an understanding of the challenges and remedial measures associated with materials in nuclear energy systems. It includes courses in radiation damage, nuclear fuel performance, corrosion, and joining/welding. A laboratory course will provide hands-on experimental analysis in the areas of corrosion, welding, radiation damage, and non-destructive evaluation.

Students learn the challenges and remedial measures associated with materials in nuclear energy system and conduct experimental analysis in corrosion, welding, radiation damage, and nondesctructive evaluation.

REQUIREMENTS

Code	Title	Credits
Required courses (10 credits)		
N E/M S & E 423	Nuclear Engineering Materials [1]	3
N E 424	Nuclear Materials Laboratory	1
N E 541	Radiation Damage in Metals [1]	3
M S & E/M E 435	Joining of Materials: Structural, Electronic, Bio and Nano Materials	3
or M S & E/ M E 462	Welding Metallurgy	
Elective courses (minimum 6 cr.)		
CIV ENGR 445	Steel Structures I	3
CIV ENGR 447	Concrete Structures I	3
M S & E 330	Thermodynamics of Materials	4
M S & E 352	Materials Science-Transformation of Solids	3
M S & E/N E 433	Principles of Corrosion	3
M S & E 463	Materials for Elevated Temperature Service	3
M S & E 560	Fundamentals of Atomistic Modeling	3
M S & E 570	Properties of Solid Surfaces	3

[1] Because M S & E 350 Introduction to Materials Science or M S & E 351 Materials Science-Structure and Property Relations in Solids are prerequisites for N E/M S & E 423 Nuclear Engineering Materials and N E 541 Radiation Damage in Metals, students are expected to take one of the two of these courses as prerequisites for the certificate.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Identify the challenges and remedial measures associated with materials in nuclear energy systems by integrating the contents within each class into a complete understanding.
2. Describe and apply basic radiation damage, nuclear fuel performance, corrosion, and joining/welding concepts.
3. Design and conduct basic hands-on experiments in the areas of nuclear materials characterization.
4. Discuss scientifically and confidently about nuclear materials degradation issues with experts.

NUCLEAR ENGINEERING, B.S.

The Department of Engineering Physics offers the B.S. degree in nuclear engineering and M.S. and Ph.D. degrees in nuclear engineering and engineering physics.

Nuclear engineering is defined as the application of nuclear and radiation processes in technology. An important application is the generation of electricity using nuclear reactors. Another important application is in medicine, where radiation and radioisotopes are used to diagnose and treat illness. Nuclear engineering offers students an important opportunity to help meet the energy needs of our society and to contribute to the improvement of health through medical applications. Further, because the nuclear engineering curriculum is very rich in engineering physics, graduates are prepared to work in a number of technical activities outside the nuclear engineering field.

Nuclear energy, both from fission and fusion, offers a promising approach to meeting the nation's energy needs--an approach that may preserve jobs, raise the standard of living of Americans, and alleviate the depletion of natural resources including natural gas, petroleum, and coal. Even more important, nuclear energy offers the only practical, environmentally benign approach to generating electricity on a large scale because it releases no harmful SO2, NOX, CO2, or particulate matter into the atmosphere. Nuclear energy has played, and continues to play, an important role in space exploration. Nuclear engineering has enabled the use of isotopic power supplies in deep space probes like the Cassini mission, and may eventually be used to design fission or fusion-based systems for more demanding missions

Since the discovery of fission many years ago, electricity is being produced commercially in a several hundred billion-dollar industry. Applications of radioactive tracers have been made in medicine, science, and industry. Radiation from particle accelerators and materials made radioactive in nuclear reactors are used worldwide to treat cancer and other diseases, to provide power for satellite instrumentation, to preserve food, to sterilize medical supplies, to search for faults in welds and piping, and to polymerize chemicals. Low energy plasmas are used in the manufacture of microelectronics components and to improve the surface characteristics of materials. High energy plasmas offer the possibility of a new energy source using thermonuclear fusion.

Because the breadth and rate of change in this field requires that the nuclear engineer have a broad educational background, the curriculum consists of physics, math, materials science, electronics, thermodynamics, heat transfer, computers, courses in the humanities and social science areas, and numerous elective courses. Courses of a specific nuclear engineering content come primarily in the third and fourth years.

The curriculum prepares students for careers in the nuclear industry and government—with electric utility companies, in regulatory positions with the federal or state governments, or for major contractors on the design and testing of improved reactors for central station power generation or for propulsion of naval vessels.

The curriculum also prepares the graduate for work in many areas where a broad technical background is more important than specialization in a specific field. Thus, the graduate is also prepared to work in any area where a broad engineering background is helpful, such as management, technical sales, or law. The curriculum gives students excellent preparation for graduate study in the fission and fusion areas, medical and health physics, applied superconductivity, particle accelerator technology, and other areas of engineering science in addition to study in areas such as materials science, physics, mathematics, and medicine.

OBJECTIVES OF THE NUCLEAR ENGINEERING PROGRAM

- educate students in the fundamental subjects necessary for a career in nuclear engineering, and prepare students for advanced education in it and related fields;
- educate students in the basics of instrumentation, design of laboratory techniques, measurement, and data acquisition, interpretation and analysis;
- educate students in the methodology of design;
- provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum;
- foster the development of effective oral and written communication skills;
- expose students to environmental, ethical and contemporary issues.

ENGINEERING MECHANICS AND NUCLEAR ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The faculty recognize that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths. Initially, we expect graduates will begin their careers in fields that utilize their knowledge, education and training in solid mechanics and fluid mechanics as it applies to aeronautics/astronautics and mechanics in design and manufacturing.

Whatever path our graduates choose to pursue, our educational objectives for the nuclear engineering and engineering mechanics programs are to allow them to:

1. Exhibit strong performance and continuous development in problem-solving, leadership, teamwork, and communication, initially applied to nuclear engineering or engineering mechanics, and demonstrating an unwavering commitment to excellence.
2. Demonstrate continuing commitment to, and interest in, his or her training and education, as well as those of others.
3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
4. Contribute to their communities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

NUCLEAR ENGINEERING CURRICULUM

The nuclear engineering curriculum is divided into two options, one emphasizing nuclear power and one emphasizing medical and other nonpower applications of radiation sciences. The power option is more appropriate for students seeking careers in the nuclear power industry, while the radiation sciences option is better suited for students interested in medical and non-power applications.

POWER OPTION CURRICULUM

The following curriculum applies to students who entered the program after fall 2018.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		22
Science		13
Engineering Science		32
Nuclear Engineering Core		24
Nuclear Engineering Electives		11
Introduction to Engineering		3
Communication Skills		8
Liberal Studies		16
Total Credits		129

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
MATH 321	Applied Mathematical Analysis	3
STAT 324	Introductory Applied Statistics for Engineers	3
or STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
or STAT/ MATH 431	Introduction to the Theory of Probability	
Total Credits		22

SCIENCE

Code	Title	Credits
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
PHYSICS 241	Introduction to Modern Physics	3
or PHYSICS 205	Modern Physics for Engineers	
Total Credits		13-17

ENGINEERING SCIENCE

Code	Title	Credits
E M A 201	Statics	3

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 214) [1]		16
Total Credits		16

[1] Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext).

RADIATION SCIENCES TRACK CURRICULUM

The following curriculum applies to students who entered the program after fall 2018. Students selecting the radiation sciences option must submit an option declaration form to the department office.

3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. *Note:* Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext).

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Total Credits 129

1. It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits. Three credits of CHEM 103/CHEM 104 may be counted towards Technical Electives credits.
2. Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the Departments of Chemistry, Computer Sciences, Mathematics, and Physics.
3. Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
4. After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.
5. M E 363 Fluid Dynamics and M E 364 Elementary Heat Transfer are acceptable substitutions for CBE/B M E 320 Introductory Transport Phenomena.

5. PHYSICS 623 Electronic Aids to Measurement is recommended for students in the Radiation Sciences track.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned a Nuclear Engineering faculty advisor. Before enrolling in courses each semester, students must meet with their

faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

INDUSTRIAL AND SYSTEMS ENGINEERING

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best —the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in five main areas:

- Decision Science and Operations Research
- Health Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Production Systems
- Quality Engineering

Although there is no sub major within IE, it is possible to achieve a degree of specialization through a judicious choice of IE technical electives. Courses focusing on teams and design projects prepare students to succeed in the workplace.

DEGREES/MAJORS/CERTIFICATES

INDUSTRIAL ENGINEERING, B.S.

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best —the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in five main areas:

- Decision Science and Operations Research
- Health Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Production Systems
- Quality Engineering

Although there is no sub major within IE, it is possible to achieve a degree of specialization through a judicious choice of IE technical electives. Courses focusing on teams and design projects prepare students to succeed in the workplace.

INDUSTRIAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

1. Graduates will demonstrate competence in the professional practice of industrial engineering.
2. Graduates will demonstrate the skills needed to assume leadership in their workplaces and profession.
3. Graduates will act with professional and ethical responsibility, and appreciate the impact of proposed solutions in a global/societal context.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to

meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the industrial engineering degree program beginning in fall 2018 or later. Required courses are indicated. The *Industrial Engineering Undergraduate Curriculum Guide* (https://www.engr.wisc.edu/department/industrial-systems-engineering/academics/bachelor-of-science-in-industrial-and-systems-engineering) contains lists of courses that fulfill the requirements in the following categories: General Education Communication Elective, Mathematics, Science, Engineering and Science Electives, IE Required Courses, IE Technical Electives, Junior Design and Senior Design. For Liberal Studies Electives refer to the College of Engineering Liberal Studies Guidelines.

Code	Title	Credits
Mathematics and Statistics		22
Science		18
Engineering and Science Electives		15
Required I SY E Courses		32
I SY E Technical Electives		12
Communication Skills and Liberal Studies		21
Total Credits		120

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4

MATH 234	Calculus--Functions of Several Variables	4
MATH 340	Elementary Matrix and Linear Algebra	3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	3
STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	3
Total Credits		22

SCIENCE

Code	Title	Credits
Select one of the following:		5
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
E M A 201 & E M A 202	Statics and Dynamics [1]	
E M A 201 & M E 240	Statics and Dynamics [1]	
Select one of the following:		5
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Select one of the following:		5
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Select one of the following:		3 or 4
COMP SCI 200	Programming I	
COMP SCI 220	Data Programming I	
COMP SCI 300	Programming II	
Total Credits		18-19

[1] E M A 202 or M E 240 will fulfill Engineering Science credit requirements.

ENGINEERING AND SCIENCE ELECTIVES

Fifteen credits in engineering and science are required, with at least three credits coming from engineering science, computer science, and statistics. Courses that can be used to fulfill the requirements are listed below:

Engineering Science - minimum 3 credits

Code	Title	Credits
All engineering courses between 200-699 [1]		

[1] Courses in I SY E or E P D (or cross-listed with these departments) will NOT fulfill this requirement.

Statistics - minimum 3 credits

Code	Title	Credits
E C E 379	Special Topics in Electrical and Computer Engineering (Topic: Data Science & Engineering) [2]	1-4
I SY E 412	Fundamentals of Industrial Data Analytics [3]	3
I SY E 575	Introduction to Quality Engineering [3, 4]	3
STAT 333	Applied Regression Analysis	3
STAT 303	R for Statistics I	1
STAT 304	R for Statistics II	1
STAT 304	R for Statistics II	1
STAT 349	Introduction to Time Series	3
STAT 351	Introductory Nonparametric Statistics	3
STAT/M E 424	Statistical Experimental Design [3, 4]	3
STAT/COMP SCI 471	Introduction to Computational Statistics	3
Statistics course at the 500 level or greater that are not cross-listed with I SY E [5]		

[2] This course can be used as an Engineering Science or Statistics elective, but it cannot be used to fulfill both requirements.

[3] This course can be used as a Statistics elective or as an ISY E Technical Elective, but it cannot be used to fulfill both requirements.

[4] Credit will not be given for both I SY E 575 Introduction to Quality Engineering and STAT/M E 424 Statistical Experimental Design to fulfill requirements for the I SY E undergraduate program.

[5] Must get department approval. STAT/B M I 511 Introduction to Biostatistical Methods for Public Health and STAT/B M I 541 Introduction to Biostatistics do NOT fulfill this requirement.

Computer Science - minimum 3 credits

Code	Title	Credits
COMP SCI 200	Programming I	3
COMP SCI 220	Data Programming I	4
COMP SCI 270	Fundamentals of Human-Computer Interaction	3
COMP SCI 300	Programming II [6]	3
COMP SCI 310	Problem Solving Using Computers	3
COMP SCI 320	Data Programming II	4
COMP SCI 368	Learning a Programming Language	1
COMP SCI 369	Web Programming	3
COMP SCI 400	Programming III	3
COMP SCI 412	Introduction to Numerical Methods	3
Computer Science courses at the 500 level or greater that are not cross-listed with I SY E		

[6] COMP SCI 300 Programming II can be used as the Science-Computer Science requirement or as a Computer Science elective, but it cannot be used to fulfill both requirements.

Mathematics - optional

Code	Title	Credits
MATH/ COMP SCI 240	Introduction to Discrete Mathematics	3
MATH 319	Techniques in Ordinary Differential Equations	3
MATH/STAT 431	Introduction to the Theory of Probability	3
MATH 441	Introduction to Modern Algebra	3
MATH/COMP SCI/ STAT 475	Introduction to Combinatorics	3

Mathematics courses at the 500 level or greater that are not cross-listed with I SY E	

Biology and Other Science - optional

Code	Title	Credits
ANAT&PHY 335	Physiology	5
CHEM 343	Introductory Organic Chemistry	3
ZOOLOGY/ BIOLOGY 101	Animal Biology	3
ZOOLOGY/BOTANY/ ENVIR ST 260	Introductory Ecology	3
ZOOLOGY/BIOLOGY/ BOTANY 151	Introductory Biology	5
ZOOLOGY 153	Introductory Biology	3

REQUIRED I SY E COURSES

Code	Title	Credits
ACCT I S 300	Accounting Principles	3
or ACCT I S 100	Introductory Financial Accounting	
I SY E 313	Engineering Economic Analysis	3
I SY E 315	Production Planning and Control	3
I SY E 320	Simulation and Probabilistic Modeling	3
I SY E 321	Simulation Modeling Laboratory	1
I SY E 323	Operations Research-Deterministic Modeling	3
I SY E 348	Introduction to Human Factors Engineering Laboratory	1
I SY E/PSYCH 349	Introduction to Human Factors	3
I SY E 350	Junior Design Laboratory	3
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis	3
I SY E 417	Health Systems Engineering	3
I SY E 450	Senior Design Project	3
Total Credits		32

I SY E TECHNICAL ELECTIVES

Twelve credits required.

Human Factors - minimum 3 credits

Code	Title	Credits
I SY E 515	Engineering Management of Continuous Process Improvement	3
I SY E/COMP SCI/ DS 518	Wearable Technology	3
I SY E/PSYCH 549	Human Factors Engineering	3
I SY E 552	Human Factors Engineering Design and Evaluation	3
I SY E 555	Human Performance and Accident Causation	3
I SY E/ MED PHYS 559	Patient Safety and Error Reduction in Healthcare	2
I SY E/B M E 564	Occupational Ergonomics and Biomechanics	3
I SY E 601	Special Topics in Industrial Engineering [1]	1-3
I SY E 602	Special Topics in Human Factors	3
I SY E/ PHARMACY 608	Safety and Quality in the Medication Use System	3
I SY E 610	Design of Program Evaluation Systems	3
I SY E/B M I 617	Health Information Systems	3
I SY E/PSYCH 652	Sociotechnical Systems	3
I SY E/PSYCH 653	Organization and Job Design	3
I SY E/B M E 662	Design and Human Disability and Aging	3
I SY E 699	Advanced Independent Study [1]	1-3
OTM 758	Managing Technological and Organizational Change	3

Quantitative Methods - minimum 3 credits

Code	Title	Credits
I SY E 412	Fundamentals of Industrial Data Analytics [2]	3
I SY E/COMP SCI/ MATH 425	Introduction to Combinatorial Optimization	3
I SY E/CIV ENGR/ N E 460	Uncertainty Analysis for Engineers	3
I SY E/M E 510	Facilities Planning	3
I SY E/M E 512	Inspection, Quality Control and Reliability	3
I SY E/M E 513	Analysis of Capital Investments	3
I SY E 516	Introduction to Decision Analysis	3
I SY E 517	Decision Making in Health Care	3
I SY E/COMP SCI/ E C E 524	Introduction to Optimization	3
I SY E/COMP SCI/ MATH/STAT 525	Linear Optimization	3
I SY E/ COMP SCI 526	Advanced Linear Programming	3-4
I SY E 575	Introduction to Quality Engineering [2,3]	3
I SY E/OTM 578	Facilities Location Models	3
I SY E 601	Special Topics in Industrial Engineering [1]	1-3
I SY E 605	Computer Integrated Manufacturing	3
I SY E 612	Information Sensing and Analysis for Manufacturing Processes	3
I SY E 615	Production Systems Control	3
I SY E 620	Simulation Modeling and Analysis	3
I SY E 624	Stochastic Modeling Techniques	3
I SY E/MATH/OTM/ STAT 632	Introduction to Stochastic Processes	3
I SY E/MATH/ OTM 633	Queuing Theory and Stochastic Modeling	3
I SY E/ COMP SCI 635	Tools and Environments for Optimization	3
I SY E/M E 641	Design and Analysis of Manufacturing Systems	3
I SY E/M E 643	Performance Analysis of Manufacturing Systems	3

I SY E 645	Engineering Models for Supply Chains	3
I SY E/INFO SYS/ OTM 671	E-Business: Technologies, Strategies and Applications	3
I SY E 699	Advanced Independent Study [1]	1-3
I SY E/INFO SYS 722	Computer-Based Data Management	3
or INFO SYS 422	Computer-Based Data Management	
STAT/M E 424	Statistical Experimental Design [3]	3

Quality Engineering - minimum 3 credits

Code	Title	Credits
I SY E/M E 512	Inspection, Quality Control and Reliability	3
I SY E 515	Engineering Management of Continuous Process Improvement	3
I SY E 575	Introduction to Quality Engineering [2,3]	3
I SY E 601	Special Topics in Industrial Engineering [1]	1-3
I SY E 699	Advanced Independent Study [1]	1-3
STAT/M E 424	Statistical Experimental Design [3]	3

Additional I SY E elective or internship/co-op - optional

Code	Title	Credits
E P D 275	Technical Presentations	2
INTEREGR 110	Introduction to Engineering	1
INTEREGR 170	Design Practicum	3
I SY E 1	Cooperative Education Program	1
I SY E 191	The Practice of Industrial Engineering [4]	1
I SY E 389	Honors in Research	1-3
I SY E 489	Honors in Research	1-3
I SY E 520	Quality Assurance Systems	3
I SY E 601	Special Topics in Industrial Engineering [1]	1-3
I SY E 699	Advanced Independent Study [1]	1-3

1 Any Special Topics course (601) or Independent Study (699) MUST have prior approval to be used as a technical elective. No more than three credits may be taken in I SY E 699 Advanced Independent Study in fulfillment of the requirement for I SY E technical electives.

2 This course can be used as a Statistics elective or as an I SY E Technical Elective, but it cannot be used to fulfill both requirements.

3 Credit will not be given for both I SY E 575 Introduction to Quality Engineering and STAT/M E 424 Statistical Experimental Design.

4 I SY E 191 will count as a 1 credit undesignated I SY E Technical Elective for I SY E students. This course is not required for transfer students.

COMMUNICATION SKILLS AND LIBERAL STUDIES

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3
Liberal Studies Electives (according to CoE requirements) (p. 214)		11
ECON 101	Principles of Microeconomics	4
Total Credits		21

MINIMUM REQUIRED CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies
8. Recognize, describe, predict and analyze systems behavior
9. Understand physiological, cognitive, and sociotechnical aspects of humans as components in complex systems design
10. Apply the techniques, skills, and modern engineering tools necessary for engineering practice, such as quality engineering, optimization, simulation, and project management

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

MATERIALS SCIENCE AND ENGINEERING

The Department of Materials Science and Engineering offers B.S., M.S., and Ph.D. degrees in Materials Science and Engineering and an M.S. degree in Nanomaterials and Nanoengineering. The Nanomaterials and Nanoengineering degree is offered as a one-year name option (within the Materials Science and Engineering M.S. degree program).

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society. Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

MATERIALS SCIENCE AND ENGINEERING, B.S.

The Department of Materials Science and Engineering offers B.S., M.S., and Ph.D. degrees in Materials Science and Engineering and an M.S. degree in Nanomaterials and Nanoengineering. The Nanomaterials and Nanoengineering degree is offered as a one-year name option (within the Materials Science and Engineering M.S. degree program).

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society. Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

MATERIALS SCIENCE AND ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Objective 1: Skills and Tools. Graduates will be applying the tools and skills acquired during their undergraduate experience either in post-graduate educational programs or as employees in materials-related industries.

Objective 2: Early Career Growth. Graduates will have experienced professional growth in their chosen post-baccalaureate pursuits, for example, through acquisition of advanced degrees or advancement in employment rank.

Objective 3: Professional Citizenship. Graduates will have demonstrated awareness of contemporary issues in technology and society and ethical responsibility.

Objective 4: Life-Long Learning: Graduates will have demonstrated a continuing commitment to learning.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education
- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the materials science and engineering degree program (MS&E) in or after fall semester of 2019.

Code	Title	Credits
Mathematics and Statistics		19
General Science and Engineering Foundations		25-26
MS&E Required Courses		43
Materials Emphasis Elective Requirements		12
Communication Skills		6
Liberal Studies		16
Free Electives		6-7
Total Credits		At least 128

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 275	Topics in Calculus I	

MATH 234	Calculus--Functions of Several Variables	4
MATH 319	Techniques in Ordinary Differential Equations	3
or MATH 320	Linear Algebra and Differential Equations	
STAT 324	Introductory Applied Statistics for Engineers	3
Total Credits		19

GENERAL SCIENCE AND ENGINEERING FOUNDATIONS

Code	Title	Credits
Science		
Physics		
PHYSICS 201	General Physics	5
or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Chemistry		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	5
or CHEM 109	Advanced General Chemistry	
CHEM 343	Introductory Organic Chemistry	3
or CHEM 341	Elementary Organic Chemistry	
Science Elective		
Select one of the following:		3
CHEM 311	Chemistry Across the Periodic Table	
CHEM 327	Fundamentals of Analytical Science	
CHEM 329	Fundamentals of Analytical Science	
CHEM 345	Intermediate Organic Chemistry	
PHYSICS 205	Modern Physics for Engineers	
PHYSICS/ E C E 235	Introduction to Solid State Electronics	
PHYSICS 241	Introduction to Modern Physics	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
Engineering Foundation		
Introduction to Engineering		
M S & E 260	Materials Experience (or another CoE Intro to Engineering course)	2
Computer Sciences		
Select one of the following:		3-4
COMP SCI 200	Programming I	
COMP SCI 220	Data Programming I	
COMP SCI 300	Programming II	
COMP SCI 320	Data Programming II	
COMP SCI 310	Problem Solving Using Computers	
COMP SCI 400	Programming III	
Total Credits		25-26

MATERIALS SCIENCE AND ENGINEERING REQUIRED COURSES

Code	Title	Credits
M S & E 330	Thermodynamics of Materials	4
M S & E 331	Transport Phenomena in Materials	3
M S & E 332	Macroprocessing of Materials	3
M S & E 333	Microprocessing of Materials	3
M S & E 351	Materials Science-Structure and Property Relations in Solids	3
M S & E 352	Materials Science-Transformation of Solids	3
M S & E 360	Materials Laboratory I	1
M S & E 361	Materials Laboratory II	2
M S & E 362	Materials Laboratory III	2
M S & E/CHEM 421	Polymeric Materials	3
M S & E 441	Deformation of Solids	3
M S & E 451	Introduction to Ceramic Materials	3
M S & E 456	Electronic, Optical, and Magnetic Properties of Materials	3
M S & E 460	Introduction to Computational Materials Science and Engineering	3
M S & E 470	Capstone Project I	1
M S & E 471	Capstone Project II	3
Total Credits		43

MATERIALS SCIENCE AND ENGINEERING EMPHASIS ELECTIVES

Code	Title	Credits
Select 6 credits from: M S & E courses numbered 400 or above, B M E/PHM SCI 430, M E 417, M E 418, or M E 419 [1]		6
Select 6 credits of select engineering, science and math/ statistics coursework in consultation with an M S & E faculty advisor [2]		6
Total Credits		12

1 M S & E 699 Independent Study cannot be used to fulfill this requirement.

2 Select 6 credits of coursework from M S & E courses numbered 400 or above, other engineering, Biochemistry, Chemistry, Computer Sciences, Math, Physics, Statistics, or Zoology courses numbered 300 or above, or up to 3 credits of combined M S & E 1 Cooperative Education Program and/or M S & E 699 Independent Study research credit (or from another engineering department). M S & E advisor approval of the set of selections is required. Course sets may be broad-based or concentrated in a subfield of materials science and engineering.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	

or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3
Total Credits		6

LIBERAL STUDIES

Complete 16 credits of liberal studies requirements (p. 214).[3]

[3] Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D).
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

FREE ELECTIVES

Select 6-7 elective credits.[4]

[4] The above subject requirements can be met with 121 credits of UW courses. Students must complete 128 credits of coursework to earn the B.S. in materials science and engineering. The 6-7 elective credits may be earned by choosing elective courses that carry more credits than the requirement's minimum credit load or by taking any additional coursework of the student's choice.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

MECHANICAL ENGINEERING

Mechanical engineers are problem-solvers who make things work better, more efficiently, and more economically. They are innovators, coming up with original ideas to apply scientific knowledge in new ways. Mechanical engineers are builders, designing and developing machines and systems that make life easier. Mechanical engineers have strong science, mathematics, and technology backgrounds.

Manufacturing processes, design of mechanical equipment and systems, and energy generation and utilization are traditional mechanical engineering fields. Students receive basic preparation in all of these areas. Through choice of elective courses they may further specialize in areas such as automatic control systems, renewable energy systems, robotics, product design, biomedical engineering, computational mechanics, manufacturing systems engineering, etc. Mechanical engineering prepares students for entrance into industry, for independent business (e.g., consulting, contracting, or manufacturing), or for work in government agencies. A degree in mechanical engineering may be used as a background for medicine, law, or business, as well as for graduate work in engineering.

Work in these areas requires a solid background in mathematics, statistics, mechanics, physics, machine design, thermal sciences, materials, the use of computers, and manufacturing processes. Mechanical engineers must also possess good communication skills and be able to work in teams. Mechanical engineers should be aware of social and environmental consequences of their work.

With these skills, broad training, and an emphasis on systems design, mechanical engineers are in demand in practically every type of manufacturing, consulting, sales, and research organization. Mechanical engineers may work in automotive, materials processing, heavy equipment, paper, plastics, power, aerospace, chemical, electronics, or many other large and small industries. Their work may involve research and development of new products, design of equipment or systems, supervision of production, plant engineering, administration, sales engineering, or testing of individual components or complete assemblies.

Although many special areas exist in the profession, mechanical engineering can be subdivided into energy systems and mechanical systems.

The energy systems field has taken on special significance with the current awareness of the limited energy sources and the effects of energy use on the environment. In this field, mechanical engineers carry out work on the behavior of liquids, gases, and solids as they are used in all types of energy-conversion systems. Automotive engines, gas turbines, steam power plants, refrigeration systems, air pollution control, cryogenics and

energy utilization require this type of background. To be proficient in this the engineer must have a knowledge of thermodynamics, fluid dynamics, heat transfer, and related subjects.

The mechanical systems field covers the design and manufacturing of products and equipment. Mechanical engineers who focus on design conceive of new devices and machines and also refine and improve existing designs. The design engineer must be proficient in kinematics, machine elements, mechanics, strength and properties of materials, dynamics, vibrations, etc. Mechanical engineers who focus on manufacturing are involved with planning and selecting manufacturing methods, with designing and developing manufacturing equipment, and with increasing the efficiency and productivity of current manufacturing technologies for polymer, metal, and ceramic products. The manufacturing engineer uses chemistry, materials science, mechanics of materials, materials processing principles and practices, principles of computer control, engineering statistics, and other physical and thermal sciences to improve manufacturing operations and systems, and the products they produce. Increasingly, the systems that mechanical engineers work with incorporate biological and information technology components.

ENGINEERING THERMAL ENERGY SYSTEMS, CERTIFICATE

Efficient use of thermal energy is an increasingly popular area of interest for UW–Madison engineering students and employers. The objective of the certificate in engineering thermal energy systems program is to provide students in the College of Engineering with an organized set of courses that will improve their capacity to analyze and design innovative thermal energy systems. These systems include, but are not limited to, energy conversion systems and their fuels, refrigeration, combustion, and solar energy. Thermal energy systems either employ thermal energy directly or convert thermal energy to other energy forms.

HOW TO GET IN

Students who wish to apply for admission into this certificate program will need to complete a major/certificate declaration form obtained from the student services office. Once approved by the student services office and the student's faculty advisor, the form will be forwarded to the Dean's Office to be added to the student record. The student services office will, in conjunction with the student's advisor and curriculum committee chair, assist the student in selecting appropriate courses that fulfill certificate requirements. If a Special student does not have a home department in the College of Engineering, the Department of Mechanical Engineering will advise and sponsor the student in this program. To receive the certificate, the applicant must achieve a GPA of 3.0 or higher in the proposed courses listed on the completed form.

Submit the completed Declaration of Intent Form (https://www.engr.wisc.edu/app/uploads/2016/02/certificate-in-engineering-thermal-energy-systems-declaration-of-intent.pdf) to student services.

REQUIREMENTS

The certificate, geared toward UW–Madison undergraduate students, requires a total of 18 completed credits. Up to 9 of the credits can be thermal-energy-related courses that are required in the student's undergraduate major. The additional 9 credits must be selected from an assortment of approved elective courses in the College of Engineering.

COURSES

Courses not on this list must be specifically approved by the certificate curriculum committee.

Code	Title	Credits
Mechanical Engineering		
M E 460	Applied Thermal / Structural Finite Element Analysis	3
M E 461	Thermal Systems Modeling	3
M E 466	Air Pollution Effects, Measurements and Control	3
M E 469	Internal Combustion Engines	3
M E/N E 520	Two-Phase Flow and Heat Transfer	3
M E 561	Intermediate Thermodynamics	3

Biological Systems Engineering		
BSE 460	Biorefining: Energy and Products from Renewable Resources	3
Materials Science and Engineering		
M S & E 463	Materials for Elevated Temperature Service	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Follow a directed sequence of technical elective courses specializing in thermal energy systems.
2. Synthesize knowledge gained from a curriculum that focuses on applying fundamentals of engineering to the analysis of thermal energy systems.
3. Be prepared for the job market with a solid background in the energy field.

MANUFACTURING ENGINEERING, CERTIFICATE

OVERVIEW

Are you a student interested in manufacturing? Do you like drawing on a variety of skills and knowledge to solve complex problems? If so, you may wish to consider this certificate.

Because manufacturing itself is complex and broad, manufacturing engineers apply many engineering principles and work in a multidisciplinary world. This certificate allows students to emphasize either manufacturing systems or manufacturing processes—or, they can choose to spread courses evenly across both. Through this certificate, students will gain an understanding of these two areas of manufacturing. Undergraduates in industrial and systems engineering or mechanical engineering can pursue this certificate without adding time to the degree.

HOW TO GET IN

ENROLLMENT

This undergraduate certificate is open to all undergraduate students at the University of Wisconsin–Madison. Mechanical engineering and Industrial and Systems Engineering students can complete this certificate without adding time to degree.

ADMISSION

Admission into the undergraduate Certificate in Manufacturing Engineering requires:

- Undergraduate standing at UW–Madison
- Cumulative GPA (at UW–Madison) greater than or equal to 3.0

- Green Shop Pass with CNC 1 upgrade (College of Engineering TEAM Lab, formerly known as the Student Shop)
- Completion of the admissions form
- Meeting with a faculty advisor

Students must complete an admissions form, obtain the required signatures, and bring the form to one of the student services coordinators for the Department of Mechanical Engineering. The form will be used to ensure that students have completed the Green Shop Pass and CNC 1 upgrade in the College of Engineering TEAM Lab, meet the GPA requirement for admission, meet the course grade requirement for courses already completed, and list courses that are planned in order to satisfy the certificate program. The form will contain fields for the following information:

- Study plan (courses that have been taken, are being taken, and plan to take)
  - Core courses
  - Elective courses
  - Grades for any courses that have already been taken
  - When future courses will be taken
- Cumulative GPA at time of admission
- Expected graduation date
- Major
- Signature from a key program faculty member indicating that the student meets the admission requirements and has discussed the study plan with the faculty member

COMPLETION

In order to successfully complete the undergraduate certificate in manufacturing engineering, students must:

- Have been admitted to the certificate
- Maintain a cumulative GPA of 3.0 or greater for the courses taken for the certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.
- Have received a grade of BC or higher in all courses taken for the certificate. If a course is repeated, the highest grade received in the course is used for this criteria.

REQUIREMENTS

The core courses were chosen to include three manufacturing process-focused courses as well as two manufacturing systems-focused courses. A manufacturing engineer must be multidisciplinary because of the complex and broad nature of manufacturing as an application of many engineering principles. The objective of the core course requirements is to provide students with basic understanding of manufacturing systems and basic understanding of manufacturing processes.

The certificate requires a total of 18 credits.

Code	Title	Credits
Three courses must be from the following Core Courses with a grade of BC or better:		9
M S & E 332	Macroprocessing of Materials	
M E 313	Manufacturing Processes	
M E 314	Manufacturing Fundamentals [1]	
I SY E 315	Production Planning and Control	
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis [1]	
An additional three courses must be from any of the following Elective Courses with a grade of BC or better, with at least one course from each of the two categories:		9
1. Mechanical and Materials Engineering Electives		
M E 314	Manufacturing Fundamentals [1]	
M E 417	Transport Phenomena in Polymer Processing	
M E 418	Engineering Design with Polymers	
M E 419	Fundamentals of Injection Molding	
M E 420	Introduction to Polymer Composites Processing	
M E 429	Metal Cutting	
M E 437	Advanced Materials Selection	
M E/E C E 439	Introduction to Robotics	
M E 447	Computer Control of Machines and Processes	
M E 449	Redesign and Prototype Fabrication	
M E 514	Additive Manufacturing	
M S & E 333	Microprocessing of Materials	
M E 531	Digital Design and Manufacturing	
M S & E 461	Advanced Metal Casting	
M S & E/M E 462	Welding Metallurgy	
2. Industrial & Systems Engineering Electives		
I SY E 412	Fundamentals of Industrial Data Analytics	
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis [1]	
I SY E/M E 510	Facilities Planning	
I SY E/M E 512	Inspection, Quality Control and Reliability	
I SY E/B M E 564	Occupational Ergonomics and Biomechanics	
I SY E 575 or M E/ STAT 424	Introduction to Quality Engineering Statistical Experimental Design	
I SY E 605	Computer Integrated Manufacturing	
I SY E 615	Production Systems Control	
I SY E/M E 641	Design and Analysis of Manufacturing Systems	
I SY E/M E 643	Performance Analysis of Manufacturing Systems	
Total Credits		18

[1] If M E 314 Manufacturing Fundamentals and/or I SY E 415 Introduction to Manufacturing Systems, Design and Analysis are taken as part of the Core Course Requirement, then they cannot also count as an elective.

No exceptions or substitutions to the core courses are allowed.

Elective courses not listed must be specifically approved by the curriculum committee of the department teaching the course. The request must include the course number, course name, name and contact information for the professor currently teaching or planning to teach the course; syllabus; and which category it should be listed under. Courses

that are approved by the curriculum committee of the department teaching the course must be sent to the certificate program director. Only formal courses will be considered.

Only courses taken for a letter grade count toward this certificate. Only courses in which a grade of BC or better is received count toward this certificate. Courses taken at other institutions may be counted toward this certificate if they have been identified as equivalent through the existing process. At least 50% of the courses (i.e., three courses) for this certificate must be earned in residence on the UW–Madison campus.

Students must maintain a cumulative GPA of 3.0 or better for the courses taken for this certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate knowledge of the fundamental concepts of manufacturing discrete parts.
2. Utilize skills related to manufacturing engineering.
3. Communicate effectively in the methods related to manufacturing engineering.
4. Generate solutions to problems that may arise in manufacturing engineering.

MECHANICAL ENGINEERING, B.S.

Mechanical engineers are problem-solvers who make things work better, more efficiently, and more economically. They are innovators, coming up with original ideas to apply scientific knowledge in new ways. Mechanical engineers are builders, designing and developing machines and systems that make life easier. Mechanical engineers have strong science, mathematics, and technology backgrounds.

Manufacturing processes, design of mechanical equipment and systems, and energy generation and utilization are traditional mechanical engineering fields. Students receive basic preparation in all of these areas. Through choice of elective courses they may further specialize in areas such as automatic control systems, renewable energy systems, robotics, product design, biomedical engineering, computational mechanics, manufacturing systems engineering, etc. Mechanical engineering prepares students for entrance into industry, for independent business (e.g., consulting, contracting, or manufacturing), or for work in government agencies. A degree in mechanical engineering may be used as a background for medicine, law, or business, as well as for graduate work in engineering.

Work in these areas requires a solid background in mathematics, statistics, mechanics, physics, machine design, thermal sciences, materials, the use of computers, and manufacturing processes. Mechanical engineers must also possess good communication skills and be able to work in teams. Mechanical engineers should be aware of social and environmental consequences of their work.

With these skills, broad training, and an emphasis on systems design, mechanical engineers are in demand in practically every type of manufacturing, consulting, sales, and research organization. Mechanical engineers may work in automotive, materials processing, heavy equipment, paper, plastics, power, aerospace, chemical, electronics, or many other large and small industries. Their work may involve research and development of new products, design of equipment or systems, supervision of production, plant engineering, administration, sales engineering, or testing of individual components or complete assemblies.

Although many special areas exist in the profession, mechanical engineering can be subdivided into energy systems and mechanical systems.

The energy systems field has taken on special significance with the current awareness of the limited energy sources and the effects of energy use on the environment. In this field, mechanical engineers carry out work on the behavior of liquids, gases, and solids as they are used in all types of energy-conversion systems. Automotive engines, gas turbines, steam power plants, refrigeration systems, air pollution control, cryogenics and energy utilization require this type of background. To be proficient in this the engineer must have a knowledge of thermodynamics, fluid dynamics, heat transfer, and related subjects.

The mechanical systems field covers the design and manufacturing of products and equipment. Mechanical engineers who focus on design conceive of new devices and machines and also refine and improve existing designs. The design engineer must be proficient in kinematics, machine elements, mechanics, strength and properties of materials, dynamics, vibrations, etc. Mechanical engineers who focus on manufacturing are involved with planning and selecting manufacturing methods, with designing and developing manufacturing equipment, and with increasing the efficiency and productivity of current manufacturing technologies for polymer, metal, and ceramic products. The manufacturing engineer uses chemistry, materials science, mechanics of materials, materials processing principles and practices, principles of computer control, engineering statistics, and other physical and thermal sciences to improve manufacturing operations and systems,

and the products they produce. Increasingly, the systems that mechanical engineers work with incorporate biological and information technology components.

MECHANICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Graduates from the undergraduate program in mechanical engineering will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals. We encourage this diversity of paths.

Independent of whether our graduates choose to pursue a professional career, postgraduate education, or volunteer service in engineering or a different field; we expect that our graduates will achieve the following objectives within three to five years after graduation:

1. They will exhibit a fundamental understanding of broader engineering disciplines with strong skills in mechanical engineering, problem solving, leadership, teamwork, and communication.
2. They will use these skills to contribute to their organizations and communities.
3. They will make thoughtful, well-informed decisions in their career and life.
4. They will demonstrate a continuing commitment to and interest in their own and other's education.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (https://www.admissions.wisc.edu/apply) need to indicate an engineering major (https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to undergraduate students admitted to the Mechanical Engineering degree program in Fall 2016 or later. Check with the department for any recent changes. Students admitted before Fall 2016 can locate their curriculum at this link (https://www.engr.wisc.edu/department/mechanical-engineering/academics/bachelor-of-science-in-mechanical-engineering).

Code	Title	Credits
Mathematics and Statistics		19
Basic Science		14
Non–Mechanical Engineering		12
Mechanical Engineering Core		50
Technical Electives		9
Math/Science Electives		3
Communication Skills		6
Liberal Studies		15
Total Credits		128

MATHEMATICS/STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
STAT 324	Introductory Applied Statistics for Engineers	3
Total Credits		19

All transfer students must have the equivalent of the above courses. If the above requirement is fulfilled with fewer than 19 credits, the balance becomes free elective credits.

Transfer students may fulfill the statistics requirement with other statistics courses having a calculus prerequisite and the approval of the mechanical engineering department via a Course Substitution Form.

BASIC SCIENCE

Code	Title	Credits
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
COMP SCI 220	Data Programming I	4
PHYSICS 202	General Physics [1]	5
Total Credits		14-18

[1] Students following the normal M E course sequence need not take PHYSICS 201 General Physics to satisfy the prerequisites for PHYSICS 202 General Physics.

NON-MECHANICAL ENGINEERING

Code	Title	Credits
E M A 201	Statics	3
M S & E 350	Introduction to Materials Science	3
E C E 376	Electrical and Electronic Circuits	3
E C E 377	Fundamentals of Electrical and Electro-mechanical Power Conversion	3
or M E 346	Introduction to Feedback Control for Mechanical Engineers	
Total Credits		12

MECHANICAL ENGINEERING CORE

Code	Title	Credits
M E 201	Introduction to Mechanical Engineering	3
M E 231	Geometric Modeling for Design and Manufacturing	3
M E 240	Dynamics	3
M E 306	Mechanics of Materials	3
M E/E M A 307	Mechanics of Materials Lab	1
M E 313	Manufacturing Processes	3
M E 314	Manufacturing Fundamentals	3
M E 331	Computer-Aided Engineering	3
M E 340	Dynamic Systems	3
M E 342	Design of Machine Elements	3
M E 351 & M E 352	Interdisciplinary Experiential Design Projects I and Interdisciplinary Experiential Design Projects II	6
M E 361	Thermodynamics	3
M E 363	Fluid Dynamics	3
M E 364	Elementary Heat Transfer	3
M E 368	Engineering Measurements and Instrumentation	4
M E 370	Energy Systems Laboratory	3
Total Credits		50

TECHNICAL ELECTIVES

Code	Title	Credits
The mechanical engineering curriculum requires a total of 9 credits of technical electives. A minimum of 3 of those 9 credits must be from formal M E courses numbered 400 and higher. A formal course is defined as a class that meets regularly in a lecture format to study a selected topic. The educational mission is assisted with homework and exams. Formal courses include online courses but do not include seminar, survey, independent study, research, or similar courses.		9
Technical electives include engineering, mathematics, physics, chemistry, statistics, and computer science courses numbered 400 and higher. INTEREGR and E P D courses are limited to those listed below. The following courses are also accepted as technical electives:		
ANAT&PHY 335	Physiology	5

BMOLCHEM 314	Introduction to Human Biochemistry	3
BSE 351	Structural Design for Agricultural Facilities	3
BSE 364	Engineering Properties of Food and Biological Materials	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE/B M E 320	Introductory Transport Phenomena	4
CBE 326	Momentum and Heat Transfer Operations	3
CHEM 341	Elementary Organic Chemistry	3
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CIV ENGR 311	Hydroscience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 330	Soil Mechanics	3
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 392	Building Information Modeling (BIM)	3
CIV ENGR 415	Hydrology	3
COMP SCI 300	Programming II	3
COMP SCI/E C E 354	Machine Organization and Programming	3
COMP SCI/ INFO SYS 371	Technology of Computer-Based Business Systems	3
E C E 320	Electrodynamics II	3
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E 342	Electronic Circuits II	3
E C E/COMP SCI 352	Digital System Fundamentals	3
E C E 353	Introduction to Microprocessor Systems	3
E C E/COMP SCI 354	Machine Organization and Programming	3
E C E 355	Electromechanical Energy Conversion	3
E C E 356	Electric Power Processing for Alternative Energy Systems	3
E P 272	Engineering Problem Solving Using Maple	1
E P D 374	Intermediate Technical Japanese I	3
E P D 375	Intermediate Technical Japanese II	3
E P D 660	Core Competencies of Sustainability	3
INTEREGR 301	Engineering and Biology: Technological Symbiosis	1-4
I SY E 315	Production Planning and Control	3
I SY E 323	Operations Research-Deterministic Modeling	3
I SY E/PSYCH 349	Introduction to Human Factors	3
MATH 321	Applied Mathematical Analysis	3
MATH 322	Applied Mathematical Analysis	3
M E 273	Engineering Problem Solving with EES	1
M S & E 330	Thermodynamics of Materials	4
M S & E 332	Macroprocessing of Materials	3
M S & E 352	Materials Science-Transformation of Solids	3
N E 305	Fundamentals of Nuclear Engineering	3
PHYSICS 205	Modern Physics for Engineers	3
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 311	Mechanics	3
PHYSICS 321	Electric Circuits and Electronics	4
PHYSICS 322	Electromagnetic Fields	3
PHYSICS 325	Optics	4
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	3
STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	3
STAT 333	Applied Regression Analysis	3
STAT 349	Introduction to Time Series	3
STAT 351	Introductory Nonparametric Statistics	3

Up to 3 technical elective credits may be obtained for non-formal courses such as independent study courses (M E 489, M E 491, M E 492, and other engineering independent study courses numbered 399 and higher); Cooperative Education (M E 1); and E P D 690, "Wisconsin Engineer Magazine."

MATH/SCIENCE ELECTIVES

Code	Title	Credits
The mechanical engineering curriculum requires 3 credits of math/science electives. Any formal course listed as a biological science and numbered 100 or higher will satisfy this requirement. In addition, any formal course offered by an engineering department, or listed as a physical or natural science, and numbered 200 or higher, will also satisfy this requirement. INTEREGR and E P D courses will not satisfy the math/science elective requirement.		3
Total Credits		3

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or ESL 118	Academic Writing II	
E P D 397	Technical Communication	3
Total Credits		6

LIBERAL ELECTIVES

Code	Title	Credits
The Mechanical Engineering curriculum requires 15 credits of liberal elective courses. See College of Engineering Liberal Studies Requirements for details.		
Complete Requirements (p. 214)		15
Total Credits		15

ADDITIONAL INFORMATION

Students fulfilling all course requirements with fewer than 128 credits must comply with the credit minimum by taking additional free elective credits. Students in good standing may take free elective courses pass/fail (see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext) for details). Pass/fail courses do not count toward specific degree requirements.

Independent Studies and projects courses:

Code	Title	Credits
M E 291	Ungergraduate Mechanical Engineering Projects	1-3
M E 299	Independent Study	1-3
M E 489	Honors in Research	1-3
M E 491	Mechanical Engineering Projects I	1-3
M E 492	Mechanical Engineering Projects II	1-3

Students must have a cumulative 2.5 GPA or a 3.0 GPA for their previous two semesters and have written permission to enroll from their research advisor.

For information on credit loads, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
MATH 221	5	MATH 222	4
CHEM 103[1]	4	CHEM 104[1]	5
M E 201	3	E M A 201[2]	3
Liberal Elective	3	M E 231	3
		Communication A	3
	15		18

Second Year

Fall	Credits	Spring	Credits
MATH 234	4	M E 361	3

Math/Science Elective		M E 342	3
Liberal Elective	3	M E 313	3
		E P D 397	3
		Liberal Elective	3
	15		18

Fourth Year

Fall	Credits	Spring	Credits
M E 351	3	M E 352	3
M E 314	3	M E 370	3
M E 368	4	Technical Elective	3
Technical Elective	3	Technical Elective	3

Liberal Elective	3 Liberal Elective	3
	16	15

Total Credits 129

1 CHEM 109 Advanced General Chemistry may be taken in place of CHEM 103 General Chemistry I and CHEM 104 General Chemistry II; however, students may need to take additional free electives to meet the minimum number of credits required for the degree.

2 After completing E M A 201 Statics, students may take M E 240 Dynamics and M E 306 Mechanics of Materials/M E/E M A 307 Mechanics of Materials Lab in either order or concurrently.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

COLLEGE OF LETTERS & SCIENCE

WHY CHOOSE THE COLLEGE OF LETTERS & SCIENCE (L&S)?

What's so great about a liberal arts education from UW–Madison?

For one thing, it makes for a college experience that is rich in discovery, exploration, personal growth, and new ideas.

But while your courses may be fascinating, liberating, eye-opening and mind-blowing, a liberal arts degree from UW–Madison keeps working for you long after you have graduated.

By pursuing a degree in the liberal arts—a bachelor of arts or a bachelor of science—you are preparing for long-term satisfaction in work and in life. A liberal arts degree is a journey of self-discovery, as you explore new topics and discuss ideas with a wide range of people. You delve deeply into a broad range of subjects beyond just your major. When you graduate, you aren't narrowly prepared for one field. You've developed writing, presentation, and analytical skills. You've been exposed to the scientific method, as well as literary analysis. A chemistry major, for example, will also graduate with knowledge of a language, history, social science, the arts, and more.

WHY DOES THIS MATTER?

Because the more you know, the more curious you become. Curious people seek opportunities to enrich and expand their lives. Learning leads to conversation, dialogue, innovation, advancement. Employers

value liberal arts majors because they are problem-solvers, out-of-the-box thinkers, and good communicators.

CAN A 4-YEAR DEGREE FROM L&S REALLY OPEN DOORS WITH EMPLOYERS?
Yes, it can. Based on a recent L&S alumni survey rigorously designed and administered by the university's nationally renowned survey center, our graduates' employment rates are on par with the School of Business and the College of Engineering, and out-perform the national average for university graduates. They work for an extremely wide range of fields, including technology, corporate management, education, and nonprofits.

L&S alumni also report high job satisfaction and believe that their academic preparation gave them an advantage compared to employees from other colleges and universities.

Then there's our L&S Career Initiative (http://ls.wisc.edu/lsci) (LSCI)—unique among large public universities. Funded by alumni and sponsored by key employers, the LSCI is designed to help each and every one of our students—not just the extra-motivated or well-connected few—define his or her path. We start where *you* are—and go from there. From the basics of resume-building, to connecting with alumni mentors, to landing an internship, the resources are at your fingertips.

BUT WE VALUE LEARNING FOR ITS OWN SAKE, HERE.
You will never regret your liberal arts degree from UW–Madison, because it gives you the opportunity to explore subjects that fascinate you, as well as prepare you for a successful career. You will connect with wonderful faculty from 125 departments, programs, centers and institutes, whose mentoring and teaching will influence your goals and direction. And you will gain an appreciation for learning that will last a lifetime.

The University of Wisconsin–Madison is one of the great universities of the world, and the College of Letters & Science (http://www.ls.wisc.edu) is at its center. Students who earn a bachelor of arts or bachelor of science degree in the College of Letters & Science (L&S) complement their broad study in the liberal arts and sciences with in-depth study of one or more particular fields, or "majors." Majors range from African cultural studies to philosophy in the humanities, from astronomy to zoology in the natural sciences, and from Afro-American studies to sociology in the social sciences.

In addition to the bachelor of arts and bachelor of science degrees available in L&S, the college also offers a limited number of special degrees. These programs often have additional admission requirements and require completion of additional requirements in the major.

Finally, a wide array of certificate programs are also available for students who have special interests in such diverse topics as integrated liberal studies; international, global, and area studies; religious, ethnic, and gender studies; and more.

DEGREES/MAJORS/CERTIFICATES

All students pursuing their undergraduate studies in the College of Letters & Science **must** fulfill the following requirements:

- General Education Requirements (p. 22)
- Letters & Science Requirements (p. 344)
- Major/Degree/Certificate Requirements (See below)

Certificates *are not required* for graduation from L&S. With a few exceptions, students are expected to complete all requirements for a certificate program prior to graduating.

L&S will award all declared and completed certificates upon graduation with the L&S degree. **Certificates that are not complete at the time of graduation will not be awarded.** Students who have satisfied all major and degree requirements will not be delayed from graduating if they have unmet requirements in a declared certificate program.

Although most certificates **must** be completed at the same time students have completed all of their major and degree requirements, there are a very limited number of certificates that are available to students after they graduate. Students who have completed a substantial portion (as least 12 credits) of a certificate at UW–Madison, and who may need one or two additional courses to complete the certificate, may do so immediately after completing a bachelor's degree. This provision is not universal; it applies to a limited number of certificates only. Students seeking to complete certificates eligible under this provision should enroll in the remaining coursework as a University Special (non-degree) student. A certificate must be completed within a year of completion of the bachelor's degree. More information about L&S certificates can be found at certificate programs (p. 313) under Courses and Enrollment.

For general information about certificates and which ones can be earned/completed as a University Special, see undergraduate/special student certificates (http://guide.wisc.edu/nondegree/undergraduate-special-student-certificates).

NOTE: Major requirements are the same whether a student pursues a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.) degree.

ENTERING THE COLLEGE

ADMISSIONS

Any student interested in earning an undergraduate degree in the College of Letters & Science will need to apply for admission through the Office of Admissions and Recruitment at UW–Madison. Information on applying to the university as a freshman, transfer, or international student is available through the Office of Admissions and Recruitment (https://www.admissions.wisc.edu/apply).

Prospective students with questions about study in the College of Letters & Science may contact L&S Academic Advising Services (http://advising.ls.wisc.edu) at 608-262-5858 or Cross-College Advising Service (https://ccas.wisc.edu) at 608-265-5460. Students should also feel free to contact the major department (p. 310) directly if they have specific questions about a particular major.

TRANSFER STUDENTS

Transfer students interested in earning an undergraduate degree in the College of Letters & Science will need to apply for admission through the Office of Admissions and Recruitment at UW–Madison. Transfer students must complete all Letters & Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS (https://registrar.wisc.edu/dars-student) report which will explain how their transfer credits will apply toward L&S requirements. Students can request and review their DARS in the Student Center via My UW (https://my.wisc.edu). Students can also request DARS for programs, majors, or certificates that they have not declared but are interested in declaring. These reports are called "what-if" reports. (Please note that some programs may not be available in DARS. For information about requirements in a program not available in DARS, contact the advisor for the particular program.)

Please note that the DARS audit serves as the *document of record* (DOR) for students in the College of Letters & Science. The DOR is used to certify completion of degree requirements, and it is retained according to university record retention and archival polices.

Students can transfer only a limited number of credits from non-degree-granting accredited institutions and correspondence courses. See non-degree-granting accredited institutions' transfer credit limitation (p. 313) in the *Guide* under ***Credits***.

Transfer students who have more than 30 degree credits ***are ineligible*** to earn retroactive credits in a foreign language on the UW–Madison campus. See credit by course examination/retroactive credits (p. 313) in the *Guide* under ***Credits***.

Advisors for freshman and sophomore students are in the L&S Academic Advising Services (608-262-5858) in 101 Ingraham Hall and the Cross-College Advising Service (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major. **All L&S undergraduate students are expected to declare a major by the time they have 86 degree credits**.

Transfer students should note that the L&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007 are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous catalogs under Archive (http://guide.wisc.edu/archive) for more information.)

Because some requirements in force before this edition of the *Guide* differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog or *Guide* in force at the time of their first matriculation to college. (See past catalogs (http://guide.wisc.edu/archive) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

ON-CAMPUS TRANSFER

Continuing UW–Madison students must have a minimum 2.000 cumulative grade point average ***and*** a UW–Madison grade point average of at least 2.000 in their most recent semester of work in order to transfer into the College of Letters & Science. First-semester and new transfer students without a UW–Madison grade point average may transfer into Letters & Science provided they meet university admission requirements (three units of math and two units of a single foreign language). Students admitted to the university with admission deficiencies must remove those deficiencies before they are eligible to transfer into L&S. **For more information about transferring into L&S, call 608-262-5858 or refer to request to transfer into L&S** (https://advising.ls.wisc.edu/transfer).

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters & Science will receive no more than 18 credits per semester toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for studies in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 344).)

UNIVERSITY SPECIAL STUDENTS

If you are not currently enrolled in a UW–Madison degree program but wish to take courses within the College of Letters & Science at UW–Madison for credit or as an auditor, it may be best to consider becoming a University Special student. Information about becoming a non degree-seeking student at UW–Madison can be found at Adult Career and Special Student Services (https://acsss.wisc.edu/apply).

WISCONSIN EXPERIENCE

THE WISCONSIN EXPERIENCE: ESSENTIAL LEARNING IN THE COLLEGE OF LETTERS & SCIENCE

The three elements of learning described below—tools, breadth, and depth—work together to create a broad and rich education in the liberal arts and sciences, and promote attainment of core areas of essential learning: knowledge of human cultures and the natural and physical world, intellectual and practical skills, personal and social responsibility, and integrative and applied learning. These and countless other experiences comprise the Letters & Science approach to helping students obtain a distinctive *Wisconsin Experience*.

Additional information about the Wisconsin Experience (https://students.wisc.edu/wisconsin-experience) can be found through the Office of Admissions and Recruitment/Why UW (https://www.admissions.wisc.edu/why/wisconsin_experience.php) link.

POLICIES AND REGULATIONS

ACADEMIC STATUS

ACADEMIC PROBATION

Every student is expected to maintain at least a C average (2.000 grade point average) on all work carried, whether passed or not, in each term (fall, spring, and summer). Failure to earn this minimum grade point average will result in a status of **probation, strict probation, or dropped**, as shown below.

Every student can determine their academic status at the end of each term (fall, spring, or summer) based on the probationary status when the term began and the grade point average earned during that term.

1. If a student is not on probation and:
   a. earns a grade point average in the fall term, spring term, or summer term between 1.000–1.999: placed on **probation**.
   b. earns a grade point average in the fall term, spring term, or summer term less than 1.000: placed on **strict probation**.
2. If a student is on probation and:
   a. earns a grade point average in the fall term, spring term, or summer term between 1.500–1.999: placed on **strict probation**.
   b. earns a grade point average in the fall term, spring term, or summer term less than 1.500: **dropped for at least one year**.
3. If a student is on strict probation and the grade point average is less than 2.000: **dropped for at least one year**.

If a student is dropped for one year, the student must stay out of school for a minimum of twelve (12) months. For more information on Academic Probation and Drop, refer to Probation (http://saa.ls.wisc.edu/probation-overview.htm) and What exactly is the L&S Academic Probation System? (https://kb.wisc.edu/ls/page.php?id=21180)

ACADEMIC SUSPENSION (DROPPED FOR ONE YEAR)

An L&S undergraduate student on academic probation will be dropped (placed on academic suspension) for at least one year at the end of any term in which the student has had at least two terms below a 2.000 grade point average (GPA). The College of Letters & Science undergraduate probation system is as follows:

- If a student is not on probation and earns a term GPA of 1.000–1.999, the student is placed on **probation.**
- If a student is not on probation and earns a term GPA of less than 1.000, the student is placed on **strict probation**.

- If a student is on probation and earns a term GPA of 1.500–1.999, the student is placed on **strict probation**.
- If a student is on probation and earns a term GPA of less than 1.500, the student is **dropped for one (1) year**.
- If a student is on strict probation and earns a term GPA below 2.000, the student is **dropped on one (1) year**.

Students have the opportunity to appeal the "dropped for one year" status from the University of Wisconsin–Madison by participating in the Appeals Process (also known as Faculty Appeals). It is important to note that appealing one's drop status ***does not*** guarantee a student will be immediately readmitted to the university to continue his/her undergraduate studies. For more information about appealing, see appeal dropped status (http://saa.ls.wisc.edu/probation-appeals-process.htm) or contact L&S Undergraduate Academic Deans' Services (https://saa.ls.wisc.edu/offices/academic-deans-services) for more assistance.

APPEALS

Exceptions for Students in Dropped Status

An L&S undergraduate student who has been placed on academic suspension or dropped for academic reasons may appeal for readmission. More detailed information can be found at appeal dropped status (faculty appeals) (http://saa.ls.wisc.edu/probation-appeals-process.htm).

- Students dropped at the end of fall term who wish to continue in school in the spring term **must** appeal in January for readmission the week before spring term classes begin.
- Students dropped at the end of spring term who wish to continue in school for the summer or fall term must appeal for readmission the week before the beginning of the first three-week summer term begins for students who wish to take summer classes, **or** before the eight-week summer term begins for students who do not wish to take summer courses.
- Students dropped at the end of a summer term who wish to continue in school for the fall term **must** appeal in August for readmission the week before fall term classes begin.

Additional information concerning appeals is available at Appeal Dropped Status (http://saa.ls.wisc.edu/probation-appeals-process.htm).

Exceptions to Basic Degree Requirements

A student wishing to request an exception to a basic degree requirement must first confer with an academic dean (https://saa.ls.wisc.edu/offices/academic-deans-services). Only in extremely rare and unusual circumstances will any exception be made.

Exceptions to Major Requirements

A student wishing to request an exception to a requirement in the major must first confer with the advisor or chair of the department. If the department supports the request, a DARS exception is submitted on behalf of the student to Academic Information Management (AIM) in L&S Student Academic Affairs.

Exceptions to College Rules

A student wishing to request an exception to college rules should consult an academic dean in L&S Undergraduate Academic Deans' Services (https://saa.ls.wisc.edu/offices/academic-deans-services). The dean will consider the request on an individual basis and make a decision to grant or to deny the request.

CLASS STANDING

Students are classified by year according to the number of degree credits they have earned:

Freshman: A student has fewer than 24 degree credits
Sophomore: A student has at least 24 degree credits
Junior: A student has at least 54 degree credits
Senior: A student has at least 86 credits

These credits must be in courses that count toward a Letters & Science degree. Advanced Placement (AP), College-Level Examination Program (CLEP), International Baccalaureate (IB) credits, credit by department examination, and retroactive credits (retrocredits) **will** count toward a student's class standing (level).

Every L&S undergraduate student is expected to maintain at least a C average (2.000 grade point average) on all work carried, whether passed or not, in each term (fall, spring, & summer). Failure to earn this minimum grade point average will result in a status of probation, strict probation or dropped. For more information, see the entries Academic Probation and Academic Suspension above.

DEAN'S LIST

The College of Letters & Science Dean's List is established at the end of each fall and spring terms. To be eligible for the Dean's List in a given term, students ***must***:

- complete a minimum of 12 graded* credits in that term with a minimum GPA of 3.600 for students who are classified as freshmen (fewer then 24 credits) and sophomores (at least 24 credits), ***or***
- complete a minimum of 12 graded* credits in that term with a minimum GPA of 3.850 for students who are classified as juniors (at least 54 credits) and seniors (at least 86 credits)
  - **Note***: Advanced Placement (AP), College-Level Examination Program (CLEP), International Baccalaureate (IB) credits, credit by department examination, transfer credits, and retroactive credits (retrocredits)* ***will*** *count toward a student's class standing (level).*

**The grades used to determine the dean's list eligibility are: A, AB, B, BC, C, D, and F. A student must have a minimum of 12 credits from this list of grades in order to qualify for the L&S Dean's List.*

An entry, "Dean's List," appears on the student's grade report and on the transcript.

- Students who have P grades for their senior thesis (regardless of whether they have 12 other graded credits), as well as students with unresolved grades of NR, I, and Q **are not** eligible for the Dean's List until they get these outstanding temporary grades resolved.
- Once a student has resolved any outstanding grade issues and believes he/she qualifies to be on the Dean's List, the student should contact L&S Undergraduate Academic Deans' Services (https://saa.ls.wisc.edu/offices/academic-deans-services) for more assistance.
- ***Please note that the College of Letters & Science does not "round up" for the purpose of tabulating the GPA for the Dean's List***. For example, an L&S sophomore with a fall or spring term GPA of 3.599 is not eligible for the Dean's List since the minimum GPA for freshmen and sophomores to qualify for the Dean's List is 3.600.

More information can be found at Dean's List (https://registrar.wisc.edu/deanslist) and How do I qualify for the Dean's List? (https://kb.wisc.edu/ls/page.php?id=21121) For information about class standing, see How can I determine my classification or class standing? (https://kb.wisc.edu/ls/page.php?id=38197)

DISTINCTION IN THE MAJOR

This award is granted at graduation, upon the recommendation of a department to the dean, to any L&S undergraduate student **not** earning the Honors Degree (i.e., Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors) who has done superior work in the major and who has passed a comprehensive examination on that work. The comprehensive examination may be omitted for the student with a 3.500 grade point average in the major who successfully completes special work prescribed by the department. The award is noted on the student's transcript.

GOOD ACADEMIC STANDING

L&S undergraduate students are considered in good academic standing if they have a cumulative (CUM) GPA of at least a 2.000 and their most recent GPA is at least a 2.000. Students in good academic standing are not on any form of academic probation and are not at risk of being dropped from the university. For more information, see how do I know if I am in good academic standing if I am an L&S undergraduate student (https://kb.wisc.edu/ls/page.php?id=38198).

ADMISSIONS AND TRANSFERS

ON-CAMPUS TRANSFERS

The College of Letters & Science (L&S) welcomes current UW–Madison students with an established GPA to transfer into the college if they meet certain requirements:

- Continuing students must have a 2.000 cumulative GPA at UW–Madison **and**
- A 2.000 in their most recent semester/term at UW–Madison, including summer term.
- A student dropped for academic reasons must be readmitted by the original school or college on the UW–Madison campus before initiating an L&S transfer.

Please note: Only new freshmen (first-year students) and transfer students who ***do not*** have an established UW–Madison GPA may request to transfer into the College of Letters & Science *during their first term on campus without having an established GPA*.

Students interested in transferring into L&S must carefully review the L&S Transfer Workshop presentation (https://lsaas.wiscweb.wisc.edu/wp-content/uploads/sites/392/2018/01/Transfer-Workshop-Online-PPT_2017.pdf) and complete the online Transfer Request Form (https://saa.ls.wisc.edu/policies-forms/ls-on-campus-transfer-request/transfer-to-ls-request-form). For more information on transferring into L&S, please contact L&S Academic Advising Service at 608-262-5858.

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters & Science will receive no more than 18 credits per term (fall or spring) toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for studies in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 344).)

READMISSION

Students who have been required by the College of Letters & Science to take off time from their undergraduate studies at UW–Madison due to past academic performance (dropped/academic suspension) must apply for readmission with an academic dean in the College of Letters & Science in order to be eligible for reentry through the Office of Admissions and Recruitment. For more detailed information about apply for readmission, refer to readmission (http://saa.ls.wisc.edu/readmission.htm) through L&S Student Academic Affairs. More detailed information about the readmission process can be found by contacting L&S Undergraduate Academic Deans Services (https://saa.ls.wisc.edu/offices/academic-deans-services) (lsdeans@saa.ls.wisc.edu or 608-262-0617).

REENTRY

Students who previously attended the University of Wisconsin–Madison but have not been enrolled in courses for at least one term/semester (not including the summer term) are considered reeentry students. The primary admission consideration for a reentry student would be his/her academic record while previously enrolled at UW–Madison. For more information about this process, refer to reentry admissions (https://www.admissions.wisc.edu/apply/reentry) via the Office of Admissions and Recruitment website.

Note: Any L&S undergraduate student who has been dropped (put on academic suspension) for at least one year due to their academic performance must also apply

for readmissions through the College of Letters & Science. For more information, please refer to readmission (http://saa.ls.wisc.edu/readmission.htm).

TRANSFER STUDENTS

Transfer students must complete all Letters & Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS (p. 330) report, which will explain how their transfer credits will apply toward L&S requirements. DARS reports can be requested from the Degree Audit section of the registrar's office or accessed via My UW–Madison (http://my.wisc.edu).

Students can transfer only a limited number of credits from non-degree-granting accredited institutions and correspondence courses. See non-degree-granting accredited institutions' transfer credit limitation (p. 313) in the *Guide* under ***Credits***.

Transfer students who have more than 30 degree credits are ineligible to earn retroactive credits in a foreign language on the UW–Madison campus. See credit by course examination/retroactive credits (p. 313) in the *Guide* under ***Credits***.

Advisors for freshman and sophomore students are in the L&S Academic Advising Services (608-262-5858) in 101 Ingraham Hall and the Cross-College Advising Service (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major.

Transfer students should note that the L&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007, are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous catalogs under Archive (http://guide.wisc.edu/archive) for more information.)

Because some requirements in force before this edition of the Guide differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog in force at the time of their first matriculation to college. (See past catalogs (http://guide.wisc.edu/archive) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

TRANSFER STUDENTS WITH AN ASSOCIATE DEGREE FROM A UW SYSTEM INSTITUTION OR WISCONSIN TECHNICAL COLLEGE SYSTEM SCHOOL

Effective summer/fall 2012, all new transfer students with an associate's degree from either a UW System (UWS) institution or one of the Wisconsin Technical College System (WTCS) schools that award a liberal arts associate's degree (i.e., Madison College, MATC-Milwaukee, Nicolet, Chippewa Valley, Western) will have their University General Education Requirement (UGER) (p. 22) breadth requirements satisfied in all undergraduate schools/colleges on the UW–Madison campus. **L&S undergraduates should be aware that they may need to complete additional coursework to satisfy L&S breadth** (p. 344) **and other degree requirements.** Students should consult their DARS and speak with their undergraduate advisors if they have additional questions regarding satisfying L&S requirements.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by both WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical fields will not have their UGER breadth requirements satisfied.

UWS and WTCS transfer students with a qualifying liberal arts associate's degree are EXEMPT from meeting the following University General Education Breadth requirements:

- Natural Science—two (2) courses for a total of 6 credits
- Humanities/Literature/Arts—6 credits
- Social Studies—3 credits

Students will still be required to meet other University General Education Requirements (p. 22).

Please note: Students in the College of Letters & Science must meet the L&S breadth requirements (p. 344) with specific transfer courses or courses taken in residence.

COURSES AND ENROLLMENT

AUDIT

A student may enroll in a course (i.e., a lecture course) on an audit basis ***only*** with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. Courses with laboratory or performance skills may not be audited. Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester/term program load for purposes of determining fees and maximum credits carried. Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. **Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage.** See What does it mean to audit a course? (https://kb.wisc.edu/ls/page.php?id=26734) for more details.

L&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available at Course Change Request (https://registrar.wisc.edu/course_change_request.htm)) to Suite 110 Ingraham Hall, 1155 Observatory Drive. (***Course Change Requests can be accessed through an individual's Student Center in My UW*** (https://my.wisc.edu) ***under: Course Enrollment/Term Information/Course Change Request***.) Students **will not** be able to submit or cancel a request to audit a course after the fourth (4th) week of the fall or spring term. Please note that

the audit deadline differs for summer and modular session courses.

- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed. More specific information about deadlines can be found at modular courses (https://registrar.wisc.edu/modular) on the Registrar's website.
- Audited courses, denoted as such by "AU" in place of a number of credits, are graded either "S" (Satisfactory) or "NR" (No Report) or "NW" (No work). **AU is not a grade**.
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits). Students should consult an advisor in the Office of Student Financial Aid (https://financialaid.wisc.edu) for more detailed information.
- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the Veteran Services & Military Assistance Center (http://veterans.wisc.edu).

BREADTH COURSES

Natural Sciences (Breadth designations B, N, P, W, X, or Y)

Courses with the **natural sciences** (which include studies in the physical and biological sciences) designation focus on knowing the world through scientific inquiry—assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. Laboratory components give students firsthand experience in methods of scientific research. These courses help students see both the explanatory and creative processes in science that are transforming our world.

Arts & Humanities (Breadth designations H, L, X, or Z)

Courses with the "arts and humanities" designation focus on exploring the human condition and appreciation for the complexities of their own and other people's perspectives. Employing analytical, critical, and interpretive methods, these courses teach a wide array of skills necessary to understand and analyze past, present, and future of the world around us. Literature courses (labeled with an “L” designation) are a subset of Humanities courses; they may be used to meet Humanities requirements or specific Literature requirements if students have them.

After completing an Arts & Humanities course, a student should be able to:

- comprehend and employ various approaches to interpreting and creating cultural artifacts such as works of art, literature, music, architecture, philosophy, film, etc.
- demonstrate knowledge of major movements, trends, or events in the development of world cultures
- demonstrate an appreciation of the complexities of the interpretative process within historical and cultural contexts
- apply critical approaches to the works and alternative ways of considering them
- empathize, think critically about, and appreciate the complexities of their own culture and larger global community.

Literature (Breadth designation L)

Courses with "literature" designation focus on the reading and interpretation of texts in multiple genres, including fictional and nonfictional prose, poetry, and drama, as well as digital media, from a range of cultures, in translation or in their original languages. They teach skills of literary analysis while examining the relation between the texts and the cultures, historical periods, and ideas that produced them. These courses are a subset of Humanities and may be used to meet either Humanities requirements or specific Literature requirements if students have them.

Social Sciences (Breadth designations S, W, Y, Z)

In the **social sciences**, students learn other ways to understand humanity. Courses in this area are found in a wide range of fields that share a common focus on the systematic study of personal interactions, and the interactions of society and institutions. These fields use quantitative and qualitative research strategies to look at the variety and scale of these interactions, and in these courses, students learn how to formulate research questions and determine what techniques are best used to answer those questions.

These "ways of knowing" the world around us intersect and overlap, and the ideas presented in one area will often inform and transform what we know or think about what we know about the others. Taken as a whole, the breadth requirement is intended to help UW–Madison graduates appreciate the many and complex ways to understand the world around us. By these means, students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand humanity, and to behave in socially responsible ways

Note that graduate courses do not count toward the L&S undergraduate intermediate/advanced level or breadth requirement and will not be approved to count for L&S breadth/level based on a student's academic interests or graduation needs if a student is approved to take a graduate-level course.

CERTIFICATE PROGRAMS

Students who intend to complete a certificate program in Letters & Science are encouraged to meet with the certificate advisor as soon as possible to determine eligibility requirements that may apply. Admission to a certificate program (http://guide.wisc.edu/explore-majors) requires meeting with the advisor to declare the specific certificate program. Students should use a degree audit (DARS (https://

registrar.wisc.edu/dars-student)) to monitor their progress in completing their certificate(s) since DARS is the official document used to certify completion of certificate programs. Students who decide not to complete the program after being admitted ***must cancel*** the certificate declaration with the certificate advisor. See DARS (https://registrar.wisc.edu/dars_student.htm) for more information.

Although **most** L&S certificates must be completed ***before*** students earn their undergraduate degrees, there are a few certificates that are available to L&S undergraduate students after they graduate. For students who have substantially completed a certificate at UW–Madison (at least 12 credits) and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student (https://acsss.wisc.edu/apply).

The following certificates may be awarded only to students who were declared in the certificate program at the time of graduation from UW–Madison and who completed a substantial amount of the work in the program (at least 12 credits) while enrolled as an undergraduate here. ***Students must complete the requirements for the following certificates within 12 months of graduation***.

- Archaeology (p. 393)
- East Asian Studies (p. 869)
- Mathematics (p. 1145)
- Criminal Justice (p. 547)
- Medieval Studies (p. 852)
- Religious Studies (p. 1284)

For the following certificates students must hold a baccalaureate degree (other conditions my apply as noted above) if they wish to earn these certificates after graduation:

- American Indian Studies (p. 380)
- Computer Sciences (p. 663) (may not have a major in computer sciences or a degree in electrical and computer engineering)
- Folklore (http://guide.wisc.edu/undergraduate/letters-science/comparative-literature-folklore-studies/folklore-certificate) (admission to program is suspended)
- German (p. 789)
- Gender and Women's Studies (p. 741)
- Teaching English to Speakers of Other Languages (p. 694)

Students are advised of the following details regarding certificate programs:

- **Some certificate programs may require or encourage students to take courses that are not designated as Liberal Arts and Science courses.** These courses ***do not*** count toward satisfaction of the requirement that students complete 108 credits in Liberal Arts and Sciences.
- Students may elect to count these credits among the allowed 12 free elective credits in the degree but should also be mindful of the fact that these courses **will not** count toward fulfilling breadth or level within L&S.
- An exception ***will not*** be made to count non Liberal Arts and Science courses for breadth and level if a student is using these credits to fulfill a certificate program and/or trying to fulfill other major/degree requirements.
- Completion of some certificate programs may require students to take more than 12 non–Liberal Arts and Sciences credits. ***Students may not count more than 12 non–Liberal Arts and Sciences credits toward their L&S degree under any circumstances***.
- **Certificate programs are optional and are not required for graduation.** Because failure to complete a certificate program will not affect eligibility to graduate, students should understand that, *unless the certificate program is allowed to grant awards to University Special students*, they **must** complete all certificate requirements before graduation or they will not be able to complete the certificate program at a later date.
- **Course work being taken to satisfy certificate requirements should not be taken on a pass/fail basis.** Students should consult the advisor for the particular certificate program for more information about taking classes to satisfy certificate requirements.

CLASS ATTENDANCE POLICY

It is expected that every student will be present at all classes. Students are required to be present at the opening of the term and to remain until the work of the term (which includes the final examination period) is completed. **Note that any excused or unexcused absences may have a negative impact on a student's final grade in a course.** See the faculty senate approved class attendance policy (https://secfac.wisc.edu/governance/faculty-legislation/ii-108-class-attendance-policy), class attendance guidance (https://doso.wiscweb.wisc.edu/wp-content/uploads/sites/273/2017/09/Class-Attendance-2.pdf), and what is the class attendance policy for students at UW–Madison (https://kb.wisc.edu/ls/page.php?id=24628) for more details. Additional information can be found at what is the UW–Madison policy regarding accommodating religious observances and making up exams/assignments (https://kb.wisc.edu/page.php?id=21698).

It is against university policy for a student to attend classes without being enrolled. Student should be aware that instructors may require enrolled students to attend scheduled meetings of a class and/or to participate in other course-related activities, including online learning. Students are responsible for materials present in such meetings or activities. Because courses are designed and conducted in diverse ways, instructors are expected to inform students in writing at the beginning of each course if there are specific expectations for attendance/participation. This includes whether any component of the grade for the class is based on such attendance/participation.

CONCURRENT REGISTRATION AND ENROLLMENT AT UW–MADISON AND ANOTHER INSTITUTION

The College of Letters & Science recognizes that in some circumstances, courses offered by other institutions of higher learning (e.g., Madison Area Technical College [Madison College], Edgewood College, etc.) can complement the course of study offered by the residence program at UW–Madison. Permission is required to be enrolled at UW–Madison while also taking a class at another institution. This permission must be obtained before enrolling in the course at the other institution.

Any student interested in being concurrently enrolled for the fall or spring semester must demonstrate that special circumstances are involved. Please note that simple preference or convenience is not considered a strong reason for getting permission to be concurrently enrolled. It is strongly recommended that students not use concurrent enrollment as a means by which particular degree or major requirements are taken entirely out of residence. Students who are granted permission to be concurrently enrolled are bound by the L&S regulation that students cannot take more than 18 credits in either the fall or spring term (the maximum credit load for the summer session is 12).

To obtain special permission to be concurrently enrolled, refer to concurrent enrollment request form (https://saa.ls.wisc.edu/policies-forms/concurrent-enrollment/concurrent-enrollment-request-form).

- An L&S undergraduate student requesting concurrent enrollment should be beyond the first year of college and have a UW–Madison cumulative GPA of at least 2.500
- Permission for concurrent enrollment should be obtained before enrolling in the outside institution's course and prior to the 3rd week of classes (fall or spring term).
    - For the fall term, the deadline to request to be concurrently enrolled is Friday of the second week of the term.
    - For the spring term, the deadline to request to be concurrently enrolled is Friday of the second week of the term.
- Students requesting permission to be concurrently enrolled should demonstrate that special circumstances are involved. Simple preference or convenience is not a valid reason for granting permission to take an outside course concurrently with a residence program at UW–Madison.
- Students who are given permission to be concurrently enrolled are bound by the College of Letters & Science enrollment regulation of 18 credits maximum (which includes the total number of credits taken at both UW–Madison and the non-residence institution). If a student will exceed 18 credits in either the fall or spring term, the student must fill out the credit overload form (https://saa.ls.wisc.edu/policies-forms/credit-overload/credit-overload-form).
- Students may never receive credit for more than 20 credits in either the fall or spring term. In addition, a student may never receive more than 12 (13 with dean's permission) during the summer term.
- Courses taken through the UW Extension/UW Independent Learning program are considered concurrently enrolled when students enroll in one of these classes while also taking classes at UW–Madison. When permission to take a course through Independent Learning is granted, the course(s) must be completed during the UW semester/term in which the course was authorized to be taken.
    - For example, a student who receives permission in fall 2019 to take a course through Independent Learning while also enrolled at UW–Madison must complete this course by the end of the fall 2019 term.
- It might be possible to get a UW–Madison Division of Extension Independent Learning Tuition Waiver (https://lssaa.wiscweb.wisc.edu/wp-content/uploads/sites/144/2017/04/UW-Extension-Independent-Learning-Form.pdf) for a course taken through Independent Learning during the fall or spring term. Please refer to concurrent enrollment and guidelines for a tuition waiver (https://registrar.wisc.edu/guidelines-for-tuition-waivers/#guide) for more information about the criteria to qualify for a tuition waiver for UW–Madison Division of Extension courses and the tuition waiver form.
- **If the Independent Learning course being taken puts a student above 18 credits during the fall or spring term, the student will need to pay for the extra credits not covered by the tuition waiver.**
- **All** students **must** pay an administrative fee to take an Independent Learning course, even if the student receives a tuition waiver. More information about fees and the tuition waive can be found at il.wisconsin.edu or by calling 1-877-UW-LEARN (895-3276)
- General questions about taking courses through Independent Learning can be directed to il@uwex.edu.

To request permission to be concurrently enrolled, a student must fill out the following concurrent enrollment request form (https://saa.ls.wisc.edu/policies-forms/concurrent-enrollment/concurrent-enrollment-request-form).

COURSE LEVEL

Each L&S course and each approved non-L&S course that satisfies the L&S liberal arts and science (LAS) requirement have been evaluated for level. Course levels are indicated with each course listed in this. **Only courses that indicate level after the *course designation* category for a course will count toward level in L&S for students. Note that graduate courses do not count toward the L&S undergraduate intermediate/advanced level requirement and will not be approved to count for L&S breadth/level based on a student's academic interests or graduation needs if a student is approved to take a graduate-level course.**

Elementary

Elementary-level courses are usually designed with first-year students (freshmen) and second-year students (sophomores) in mind with either very little or no prior knowledge of the discipline. However, these courses may also be suitable for third-year students (juniors) and fourth-year students (seniors) with limited background in the discipline. Elementary-level courses may act as a stepping stone for more advanced-level work or may, or may also be an ends in themselves by providing breadth, enrichment, or general knowledge. Elementary-level courses typically have one or more of the following characteristics:

- **Breadth**: Students gain some basic understanding of the extent of a field or disciple. Students may also have the opportunity to learn how one field fits into or relates to other fields.
- **Foundation**: Students become acquainted with principles, terms, methods, and perspectives of a discipline or professional field, as a basis for more advanced or specialized study.

Intermediate

Intermediate-level courses may be best defined in relation to elementary and advanced-level work. They are a step beyond elementary-level courses that prepare students for more advanced work. Courses at this level are typically taken by second year students (sophomores) with some familiarity and knowledge of the discipline. Expectations of student performance may include making connections between basic terms and concepts within the discipline, and developing written and oral communication skills specific to the discipline.

- These courses typically require more preparation than elementary-level courses and less preparation than advanced-level coursework (and should have defined prerequisites).
- Intermediate-level courses are beyond the introduction of the discipline and the entry level of more general liberal arts skills, but are not yet as highly specialized or in-depth as advance-level work.

Advanced

Advanced-level courses are usually designed with juniors or seniors in mind, although these courses may also be appropriate for advanced-level students with lower class standing (i.e., freshmen and sophomores). They typically have one or more of the following characteristics:

- **Depth/Focus**: Students engage with in-depth study of a discipline's theories and methods, developing an understanding of the applications and limitations of them. Courses typically require significant independent thinking on the part of the student or may offer opportunities for research.
- **Specialization**: Students develop specific intellectual and professional abilities that will enable them to be successful in a field or professional practice.
- **Refinement of Liberal Arts Skills**: Students build upon "entry study Liberal Arts skills" noted above, applying these skills more discerningly or in more challenging contexts.
- **Integration**: Students integrate knowledge gained form earlier studies such as a capstone experience.

CREDIT AND NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. Credit/No Credit courses are designated in the Guide under Courses. The transcript for the course will indicate either CR (meaning the student earned credits for the course) or N (meaning the the student did not earn any credit for the class). Students may not take such courses on any other basis.

CROSS-LISTED COURSES

Cross-listed courses are courses offered under more than one department heading. **Cross-listed courses (i.e., courses offered by more than one department) will be assigned the same number in each department in which it is offered (e.g, African 277, which is cross-listed with approximately five majors/departments (AFROAMER, ANTHRO GEOG, HISTORY, POLI SCI, SOC)).** The courses will carry identical L&S course attributes (breadth and level), will have the identical Guide descriptions in each listing, and will have identical course prerequisites. All cross-listed courses:

1. Must be approved by the University Curriculum Committee (**all** departments must submit a letter of support)
2. Must have the same Course Guide number (e.g., Biology 151, Botany 151, and Zoology 151)

Students completing two majors may count cross-listed courses (i.e., courses listed in both major departments) in partial satisfaction of the requirements for both majors. For more information, see w (https://kb.wisc.edu/ls/page.php?id=21663)hat is a cross-listed course? How is it different from a "meets-with" course? (https://kb.wisc.edu/ls/page.php?id=21663)

DEADLINES

If an L&S student wishes to drop a course (or courses), this means that the student will drop one or more classes from a specific semester or term while still staying enrolled in at least one course. For more information about dropping a course, see what does it mean to drop a course (https://kb.wisc.edu/ls/page.php?id=21705). Students should always consult the drop deadline for each term.

- Information about the drop and withdrawal deadlines for the fall and spring terms is located at Dates & Deadlines (https://registrar.wisc.edu/dates) on the Registrar's website.

- Modular course deadlines are different from the regular drop deadlines in the fall or spring term. Information about these deadlines are located at modular courses (https://registrar.wisc.edu/modular).
- For summer drop deadlines, students should consult the Key Deadlines information on the Registrar's homepage under Dates & Deadlines (https://registrar.wisc.edu/dates) and Guidelines for Summer Enrollment Actions (https://summer.wisc.edu/wp-content/uploads/2015/02/key-deadlines.pdf).

Students on F-1 or J-1 student visas are required by regulations governing their status to enroll in a minimum of 12 credits during the fall and spring terms. If an L&S undergraduate student on an F-1 (or J-1) student visa wishes to drop below full-time status (fewer than 12 credits), the student must obtain permission from International Student Services (ISS). For more information about full-time enrollment for international students, see important immigration reminders from ISS (https://iss.wisc.edu/important-immigration-reminders-from-iss), full time enrollment (https://iss.wisc.edu/students/current-students/f1-information/full-time-enrollment), and reduced course load (https://iss.wiscweb.wisc.edu/wp-content/uploads/sites/174/2017/05/Reduced-Course-Load-Application.pdf).

L&S students who are athletes and need to drop below 12 credits must speak with their athletic advisor at the Fetzer Center (https://uwbadgers.com/sports/2015/08/21/GEN_20140101255.aspx) to drop below full-time status during the academic year. NCAA regulations require student athletes maintain full-time status (a minimum of 12 credits) during the fall and spring terms.

If a student wishes to drop all of his/her classes and not stay enrolled in any classes for a specific semester or term, the student will need to formally withdraw from the semester. For more information about withdrawing, see what does it mean to withdraw from the university (https://kb.wisc.edu/ls/page.php?id=21703).

DIRECTED OR INDEPENDENT STUDY

Directed/Independent Study offers the student an opportunity to work with a faculty member on an individual study program. A student who is stimulated by a particular concept or problem encountered in a course can pursue and develop that interest in depth through a Directed Study project. Such individualized study can make a valuable contribution to a student's educational experience.

- Directed/Independent Study courses ***cannot*** be used to fulfill any UW–Madison General Education Requirements (GER) (http://www.ls.wisc.edu/gened) or L&S breadth requirements (p. 344) under any circumstances.
- **Directed/Independent Study courses *may not* be taken on a pass/fail or audit basis.**
- **L&S undergraduates are not permitted to take graduate level directed study (courses numbered 799, 899, and 999) under any circumstance.**

Directed Study courses are made available by departments on the basis of a student's preparation and motivation and a faculty member's willingness to accept the student in such an endeavor. See L&S Undergraduate Directed/Independent Study Course Guidelines (https://kb.wisc.edu/ls/page.php?id=20133) for more detailed information.

Departments may offer Directed Study at the elementary, intermediate, or advanced level under the following course numbers:

- **198 or 199.** Directed Study courses numbered 198 or 199 have a credit range of 1 to 3 credits, are considered elementary level, and are intended for freshmen and sophomores, though, in exceptional cases, juniors and seniors may be appropriately admitted if the nature of the course so allows.
- **298 or 299.** Directed Study courses numbered 298 or 299, including supervised reading in foreign languages and in subjects related to students' major fields, have a credit range of 1 to 3 credits and are considered intermediate level.
- **698 or 699.** Directed Study courses numbered 698 or 699 (and other courses with numbers ending in 98/99, between 398 and 699) have a credit range of 1 to 6 credits, are considered advanced level, and are offered primarily for juniors and seniors. However, in unusual cases, freshmen and sophomores with exceptional preparation and motivation may be admitted. At this level, it is a prerequisite to have had previous or concurrent exposure to the subject on an intermediate level.

Directed Study courses with a number ending in 98 (e.g., 198, 698) are carried on a Credit/No Credit (Cr/N) basis. No grades are awarded for these courses. The student earns credit for the course if the instructor is satisfied with the work the student has performed. If not, there is no Failure; the student simply is not awarded any credit for the course. Not all departments offer Directed Study courses on a Cr/N basis. Courses ending in 99 are graded. (See Grades and GPA (https://registrar.wisc.edu/grades_and_gpa.htm) for more information)

Prior to registration and before the end of the second week of classes, students are responsible for making all arrangements with the faculty member who agrees to direct their work. The student and faculty member should prepare a study plan, determine the time and place for regular meetings, the number of credits to be earned, and how to enroll in the course.

Notes:

- Directed Study courses **do not** satisfy basic or breadth requirements. Thus, Directed Study courses ***cannot*** be used to fulfill any degree requirements such as B.A./B.S. Foreign Language, General Education Requirements (Comm A, Comm

B, QR A, QR B, Ethnic Studies), or L&S Breadth (Humanities, Natural Science, Social Science).

- Directed Study courses may generally be repeated for credit if course content is not duplicated.
- **Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).**
- All Directed Study courses (graded or not) count toward the maximum number of credits that may be counted in the major if taken in the major department.
- Many majors strictly limit the number of Directed Study credits that can be earned in the major.
- Directed Study courses are not intended as placeholder credits for registration purposes, and students with special rules for full-time status should consult the undergraduate deans before enrolling in Directed Study courses after the enrollment period.

Directed Study courses taken in non-L&S departments may be counted as Liberal Arts and Science (C) courses provided that they are offered at the 300-or-above level. Because these experiences are intended to provide intensive, one-on-one experiences with faculty, departments are not allowed to use Directed Study courses to teach group instruction courses.

DROP NOTATION

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see Deadlines at a Glance (http://www.registrar.wisc.edu/spring_deadlines_at_a_glance.htm) on the Office of the Registrar website. Please note that L&S does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

The drop notation will only show that a student has dropped a course(s) before the official drop deadline. A "DR" on a student's academic record does not have any negative implications for students when they are applying to graduate schools or seeking employment. The "DR" was instituted as a means to document when a course was dropped after the first eight days in the fall and spring semesters (or the appropriate period during the summer session or module courses).

FOREIGN LANGUAGE

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement in order to graduate. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the College Disabilities Curricular Accommodations Committee. (See foreign language substitution package (https://saa.ls.wisc.edu/foreign-language-substitution-package). For more information, contact L&S Undergraduate Academic Deans' Services, 608-262-0617, or the McBurney Disability Resource Center, 608-263-2741, TEXT: 608-225-7956.)

In meeting the foreign language requirement, students may combine high school and college work as appropriate. This will allow a student to make full use of high school work in more than one foreign language, or will facilitate the study of a second foreign language that may not have been available in high school. Students who have learned a foreign language in a nonacademic setting may meet the foreign language requirement by successfully completing the appropriate level language course at the university or by successfully completing an appropriate attainment examination if authorized by the appropriate language department. **Students do not fulfill the L&S foreign language BA or BS requirement by simply taking a placement test and attaining a certain placement in a course.**

Foreign language requirements for the B.A. and B.S. degrees differ.

For the **B.S. degree,** the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd semester of one college-level language (e.g., ANTHRO/LACIS 363, SCAND ST 201, SLAVIC 207, SPANISH 203, etc.)

For the **B.A. degree,** the foreign language requirement may be met in one of two ways: (1) completion of the fourth level (unit) in one language, ***or*** (2) completion of the third level (unit) in one language **and** completion of the second level (unit) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **or**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd semester/level

of a second foreign language (e.g., ASIALANG 203, HEBR-MOD 201, etc.) at the college level, **or**

- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd semester/level of a second foreign language (e.g., ASIALANG 128, GERMAN 112, LATIN 104, etc.) at the college level

Students who intend to enroll in a foreign language in which they have had previous non-college instruction must take the UW System placement test in that language.

Notes:

- Students proficient in an American Indian language may be able to use this language to satisfy the foreign language requirement. The American Indian Language Committee will make arrangements to test and/or certify a student's level of proficiency. Students should contact an L&S academic dean for further information.
- Students may take an examination to meet all, or part of, the college foreign language requirement in languages not taught on this campus only if there is a current UW–Madison faculty member qualified to administer and evaluate an examination to determine a student's competence in the language and level of proficiency. (**The UW–Madison faculty member's department must also support and endorse the administering of this special examination.**) No degree credits are earned for this examination, but level of proficiency established will be accepted toward the foreign language requirement.
- Some languages (e.g., American Sign Language) are taught only through the second semester at UW–Madison. Students may, however, count UW–Madison approved transfer courses beyond this level toward the foreign language requirement and/or satisfy the foreign language requirement by examination in these languages. Substitutions to the foreign language requirement are available for L&S students with certain disabilities that make a course substitution appropriate. ***Extensive and very specific documentation is required from students and disability specialists if individuals wish to be considered for an L&S foreign language substitution package***.

GRADUATE COURSES

All courses numbered 700 and above are graduate courses and considered advanced (A). **Enrollment in these courses is strictly limited to *only* graduate-level students. L&S undergraduates who, on the rare occasion, are permitted to enroll in graduate level courses and receive passing grades in these classes will be awarded undergraduate degree credit. *L&S undergraduate students SHOULD NOT enroll (or be permitted to enroll) in graduate courses if they are not making satisfactory progress toward their undergraduate degree or if taking graduate-level courses would delay their time to graduation*.**

- L&S students who receive permission to enroll in L&S graduate courses may count those credits toward completion of their Liberal Arts and Sciences credit requirement. These credits may be used to satisfy the requirements related to mastery of intermediate/advanced level work, but since these courses do not carry breadth designations, they ***do not*** satisfy breadth requirements.
- Graduate-level courses **cannot** be used as required coursework for a student's undergraduate major or degree requirements.
- L&S students who enroll in **non-L&S** graduate courses may count those credits as part of their free electives in the degree. **These credits may not be used to satisfy breadth or level requirements**.
- Grades earned by undergraduates who complete graduate courses will be included in all relevant grade point average calculations (see Quality of Work Requirements (p. 341) for the list of areas in which these averages are calculated). Most graduate courses restrict enrollment to students who have graduate standing, or who have received the instructor's consent to enroll.
- Students can count up to seven (7) credits of graduate-level coursework earned as an undergraduate toward future graduate studies.
- **Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).**

Provided that an instructor wishes to allow undergraduates to enroll in a graduate course, students who wish to enroll in the courses should meet with the instructor, who can evaluate whether or not the student should be allowed to register. This decision is made at the instructor's discretion, based on such considerations as whether or not the student has met course prerequisites, is prepared to perform graduate-level work in the course, and is likely to successfully complete the course. Instructors are not obligated to accommodate undergraduate student requests to enroll in graduate-level courses. Furthermore, it should be noted that all students in graduate-level courses are expected to be held to a similar performance standard with respect to quality, quantity, and type of work performed.

HISTORICAL COURSE DESIGNATIONS AND BREADTH REQUIREMENTS

All L&S undergraduate students are required to fulfill the L&S Breadth of Exploration in the Liberal Arts and Sciences. The L&S Breadth includes:

- Humanities: 12 credits (of which 6 credits **must** be Literature credit)
- Social Science: 12 credits
- Natural Science: 12 credits

NOTE: Although all L&S undergraduates must complete a minimum of 12 natural science credits in order to graduate, there are differences between the B.A. and B.S. natural science breadth requirement.

Bachelor of Arts (B.A.) candidates must complete a minimum of **one (1)** 3-credit Biological Science

course **and one (1)** 3-credit Physical Science course. The additional 6 credits can be any combination of natural, biological or physical science credits to bring the total to 12 credits.

Bachelor of Science (B.S.) candidates must complete a minimum of 6 credits of Physical Science **and** 6 credits of Biological Science.

Only those courses that have **both** a specific Breadth designation and "C" in the "L&S Credit Type" section of the former Course Guide (http://public.my.wisc.edu) under **Additional Info** or in the current Guide (http://guide.wisc.edu/courses) with breadth in the course designation section count toward the breadth requirement. The following types of courses **do not** count toward the breadth requirement:

- elementary-level courses in mathematics
- elementary- and intermediate-level courses in foreign language or courses in conversation and composition in a foreign language
- English composition
- directed study/independent study courses
- practical and skill courses such as elementary-level courses in journalism, public speaking, acting, and theater production; courses in art; and courses in music performance
- **free elective coursework**

The following types of courses are inappropriate for satisfying the breadth requirement, and so lack breadth designation:

- courses that are highly specialized or narrowly pre-professional in nature; and
- internships, practicums, directed study, tutorials, senior theses, and other courses whose content is negotiated between students and faculty on an individual basis.

Courses designated as Natural Science (N) partially satisfy the natural science requirement but not the specific physical or biological sciences course requirements. **If a course can meet more than one breadth designation, students may select the division in which they want that course to count for purposes of the breadth requirement; however, the course may be counted only once and in only one division.**

The following is a list of symbols located in the "**geBLC**" column of the former *Timetable*, the UW–Madison Transfer Equivalency Database (TED) (http://www.admissions.wisc.edu/transfer/ted), and the Transfer Information System (TIS) (http://tis.uwsa.edu). These symbols are still used to designate course attributes in L&S. The symbols are as follows:

Letters in the "**g**" column (or the Gen Ed designation in the "Gen-Ed" section of the ***Course Guide*** under **Additional Info**) identify a course which counts toward either the Communication requirement or the Quantitative Reasoning requirement for general education as follows:

a—course counts toward the Communication Part A requirement.
b—course counts toward the Communication Part B requirement.
q—course counts toward the Quantitative Reasoning Part A requirement.
r—course counts toward the Quantitative Reasoning Part B requirement.

The symbol "e" in the "**e**" column (or "*yes*" in the "Ethnic" section of the ***Course Guide*** under **Additional Info**) identifies a course that counts toward the L&S Ethnic Studies requirement.

Symbols in the "**B**" column (or the breadth designation in the "Breadth"section of the ***Course Guide*** under **Additional Info**) show how courses count in meeting the breadth requirement for the L&S B.A./B.S. degrees.

B—Biological Science. Counts toward the Natural Science requirement.
H—Humanities
I—Interdivisional. Does not satisfy any breadth requirement
L—Literature. Counts toward the Humanities requirement
N—Natural Science. Satisfies the Natural Science requirement but not the Biological or Physical Science requirements
P—Physical Science. Counts toward the Natural Science requirement
S—Social Science
W—Either Social Science or Natural Science
X—Either Humanities or Natural Science
Y—Either Biological Sciences or Social Science
Z—Either Humanities or Social Science

Symbols in the "**L**" column (or the level designation in the "Level" section of the ***Course Guide*** under **Additional Info**) show course level. Sixty credits of advanced and intermediate level courses are required for the L&S B.A./B.S. degrees.

E—Elementary
I—Intermediate
A—Advanced
D—Intermediate or Advanced

Symbols in the "**C**" column are:
C—courses which count for degree credit in L&S and which count as part of the 100 credits in L&S for students under the 1971 degree requirements or for the 108 Liberal Arts and Science (LAS) credits for students under BABS07.

Course Level

Each L&S course and each approved non-L&S course have been evaluated for level:

- Elementary (E),
- Intermediate (I),
- Advanced (A), or
- Intermediate/Advanced (D).

Course levels are indicated with each course listed in the Guide (http://guide.wisc.edu/courses) that also count

for L&S Liberal Arts and Science credit. **Only courses that are designated as counting as Liberal Arts and Science credit in the Guide are able to count toward level in L&S for students.**

INTERNATIONAL STUDENTS AND NON-NATIVE SPEAKERS OF ENGLISH TAKING ENGLISH AS A SECOND LANGUAGE COURSES (ESL)

English as a Second Language

Students for whom English is a second language must have a facility in English adequate for university work. Results of the UW–Madison ESL assessment test (MSN-ESLAT) may require students to take one or more English as a Second Language courses. English language proficiency is met by completing ESL 118. Students who are placed into ESL courses and who also need to take a course in residence to complete the General Education Communication Part A requirement may only take ESL 118 to meet that requirement. An exempt score on the MSN–ESLAT will satisfy both the English language proficiency requirement and the Communication A requirement. Because students who take ESL courses are frequently retested, it is possible to earn an exempt score upon completion of any of ESL 114, ESL 115, ESL 116, or ESL 117. Additional information can be found at can an L&S undergraduate student earn degree credit for more than one ESL course (https://kb.wisc.edu/ls/page.php?id=85642).

All ESL courses completed in residence, and all credit earned in those courses, will appear on students' transcripts. ESL courses numbered below 118 are not considered Liberal Arts and Science courses, but may be counted among L&S students' free electives in the degree. To learn more about the 108 Liberal Arts and Science credits L&S students are required to take, see the College of Letters & Science Requirements information (p. 344).

Degree Requirements

In general, international students must complete the same degree requirements as any other entering student. The College of Letters & Science makes some exceptions to this policy. For instance the College may waive the foreign language requirement for the B.A. and B.S. degrees for students who are native speakers of a foreign language.

For the purpose of exemption from the foreign language requirement, a "native speaker" is a student who graduates from or completes a major portion (the equivalent of at least five semesters) of a secondary school in a non-English-speaking school system. Exemption is not automatic. Students who believe they may qualify for an exemption should contact the Office of Admissions and Recruitment or an L&S academic dean to determine how their language background may be applicable toward the foreign language requirement.

Students whose native language is not English may not receive degree credit for work in their native language through Credit by Examination except for literature credit.

Special Advisor

International students can receive advising information from their department advisors. International Student Services (ISS) (https://iss.wisc.edu) (716 Langdon Street, Room 217 Red Gym, 608-262-2044; iss@studentlife.wisc.edu) can also offer assistance and advising in non-curricular matters such as visa-related issues.

LIBERAL ARTS AND SCIENCE COURSES

Courses that have been approved as Liberal Arts and Science (LAS) classes are expected to encourage students in one or more of the three "habits of the mind" of liberal arts education, as specified by the College of Letters & Science. These include:

1. Skilled written and verbal communication, excelling in formulating and expressing a point of view, reflecting and questioning current knowledge through reading, research and consideration of the views of others.
2. The ability to draw flexibly upon and apply the modes of thought of the major areas of knowledge.
3. Knowledge of our basic cultural heritage as a multifaceted and often contested history.

For more detailed information, refer to criteria for Liberal Arts and Science Courses (https://kb.wisc.edu/ls/page.php?id=43819).

The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences* courses. These courses are so designated within the Guide (http://guide.wisc.edu/courses) and count toward the L&S degree requirements, including requirements related to breadth and level.

PASS/FAIL

Any L&S undergraduate student in good academic standing is eligible to take ***one*** **(1)** course per term/semester on a pass/fail (S/U) basis. ***For the College of Letters & Science, good academic standing means that a student does not have one of the following statuses:***

- **probation**
- **strict probation**
- **continued probation**
- **continued strict probation**
- **dropped status**

For information about probation, see probation rules (https://saa.ls.wisc.edu/policies-forms/probation/probation-rules).

- **Undergraduates may carry only one course on a pass/fail basis per term (fall, spring, summer) and a maximum of sixteen (16) credits during their entire undergraduate career.**
- First-semester freshmen and transfer students without an established UW–Madison GPA are eligible

to take **one (1)** course for pass/fail in their first term at UW–Madison.

- Summer sessions collectively count as a single term. Thus, a student can only take **one (1)** course on a pass/fail basis during the summer.

Any student who takes a pass/fail course must earn at least a C to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U will be recorded by the Registrar's Office in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see What does it mean to take a course pass/fail? (https://kb.wisc.edu/ls/page.php?id=21102)

Notes:

- Students must submit (or cancel) pass/fail requests via their Student Center link (https://login.wisc.edu/?appurl=my.wisc.edu/portal) by the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students **may not** cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.
- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to what does it mean to take a course pass/fail (http://kb.wisc.edu/ls/page.php?id=21102) and Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm).
- **Students cannot cancel a pass/fail request after the deadline if they need the course to fulfill a major or degree requirement at a later date. It is the student's responsibility to determine whether or not s/he can take a course on a pass/fail basis.**
- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW (http://my.wisc.edu) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm) on the Registrar's website.
- **Only elective work may be carried on a pass/fail basis.** Thus, pass/fail **cannot** be declared or used to fulfill the following requirements:
    - Breadth (humanities, literature, social science, natural science)
    - Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
    - Math
    - Ethnic Studies
    - General Education Requirements (Comm A, Comm B, QR A, QR B)
    - Major requirements
- L&S undergraduates may take courses in their major or major department for pass/fail after fulfilling their major requirements. **However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements.** Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.
- Courses carried on a pass/fail basis **cannot** fulfill any other college requirements except for the 60 intermediate/advanced level credits and 108 Liberal Arts and Science (LAS) credits needed to graduate.
- **Directed Study courses may not be taken on a pass/fail basis.**
- Pass/fail work **may not** be used as part of the coursework offered in satisfaction of the individual major.
- **Students may not take foreign language courses on a pass/fail basis until the foreign language requirement for their degree program has been satisfied**.
- **Students pursuing certificate programs should check with the certificate advisor(s) about policies concerning pass/fail for certificate program courses since many certificate programs do not allow coursework to be taken for pass/fail.**

For further information, deadline dates, and instructions for registration stop by the College of Letters & Science Academic Deans' Services in Suite 110 Ingraham Hall, 1155 Observatory Drive, or call 608-262-0617 for more assistance.

PRE-PROFESSIONAL COURSES

Pre-Medicine is not a major

College of Letters & Science students who wish to prepare for a career in medicine should enroll in courses which lead to completion of degree requirements in any major and simultaneously fulfill the pre-medical requirements of the medical school of their choice. Students considering a pre-medical program should go to the Center for Pre-Health Advising where they will receive information and advice as needed. See Center for Pre-Health Advising (http://www.prehealth.wisc.edu) for more information.

See coursework (https://prehealth.wisc.edu/coursework) for information about courses that support the required and suggested coursework for medical school and other health professional programs. Students should keep in mind that this is a general guideline and requirements differ among medical schools.

- *UW–Madison School of Medicine and Public Health (SMPH),* prerequisites can be found at MD Program

Admissions (http://www.med.wisc.edu/education/md/admissions/premedical-requirements/110).

- *For students planning to take the MCAT,* see frequently asked questions (FAQ) (http://www.med.wisc.edu/education/md/admissions/frequently-asked-questions-faqs/108) at MD Program Admissions for an academic planning guide.

Pre-Law

Pre-law is **not** a major at UW–Madison. For more information for students who are considering, preparing for, or applying to law school, please refer to the Center for Pre-Law Advising (https://prelaw.wisc.edu) for more information.

Pre-Veterinary Medicine

Pre-veterinary medicine is **not** a major at UW–Madison. Students interested in pursuing a career in veterinary medicine are encouraged to choose a major of interest that can be pursued simultaneously while completing the 60 credits of required coursework. Students may select an academic major in any school or college to be eligible for admission. One major does not have an advantage over another with respect to admission to veterinary school. For more information about pre-veterinary medicine and planning coursework, contact the Academic Affairs Office, School of Veterinary Medicine, Room 2268, 2015 Linden Drive, 263-2525, or the College of Agricultural and Life Sciences, Room 116 Agricultural Hall.

PREREQUISITE COURSEWORK BACKGROUND

The College of Letters & Science recognizes that some courses that meet general degree requirements (e.g., language, math, ESL) require prior knowledge in that subject. For purposes of distinguishing between necessary prerequisites and electives, coursework that is regarded as prerequisite to courses meeting general degree requirements is considered "necessary" and not purely elective.

REGISTRATION CHANGES

Students may make changes in their registration (add and/or drop courses, change sections in a course, or change the number of credits in a course) via their Student Center in My UW according to the deadlines published by the Office of the Registrar (http://www.registrar.wisc.edu/schedule_of_classes.htm) each semester and summer session. For more specific information about this process, please refer to Course Change Request (http://registrar.wisc.edu/course_change_request.htm). **Students are strongly encouraged to check their current registration and verify they are properly enrolled in the correct courses using** My UW (http://my.wisc.edu). For general questions about this process, contact your undergraduate advisor or L&S Undergraduate Academic Deans' Services at 608-262-0617.

Students who enroll for a course must either complete the course or drop it by the deadline for dropping courses.

REPEAT OF COLLEGE COURSES NOT FOR CREDIT (RETAKING PASSED COLLEGE-LEVEL COURSES ON A REFRESHER BASIS)

Credit will not be granted for the same course twice. Students who wish to refresh their knowledge may repeat courses, but not for credit. All instances of that course will calculate in the semester GPA and in the university cumulative GPA. Repeated courses **do not** calculate in L&S requirements for quality of work (p. 341) (GPA minimums for Intermediate/Advanced work and GPA requirements in the major).

Credits carried on a refresher basis count toward the maximum credits permitted each term. Grades in refresher-basis courses count only in the university grade point average, which may be significant in determining a student's probationary status and eligibility to continue. **Repeating a course will not remove the prior grade(s) earned for that course from the student's record.** Please refer to is it possible to retake a course that I have already passed or received degree credit for (https://kb.wisc.edu/ls/page.php?id=21934).

Transfer students must be particularly careful to avoid taking courses on the Madison campus that duplicate courses taken at another institution. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower level course in a sequence if students have already received credit for a higher level course in that sequence (e.g., a student who has received credit for Math 221 could not take Math 112 for credit). Students should carefully check the Evaluation of Transfer Credits prepared by the Office of Admissions and Recruitment and should consult an advisor or academic dean before enrolling.

First-year students (freshmen) should also be mindful of the fact that they will not receive credit again for any course(s) they have already received credit for via AP or college courses they took during high school and transferred to UW–Madison.

REPEAT OF HIGH SCHOOL OR COLLEGE COURSEWORK FOR CREDIT

Students who enter the College of Letters & Science with degree credit for academic work will not receive additional degree credit for repeating that course, for taking an equivalent course, or for taking a lower-level course in a sequence after completing a higher course in that sequence (e.g., a student who has received credit for Math 221 could not take Math 112 for credit). See i (https://kb.wisc.edu/ls/page.php?id=21934)s it possible to retake a course that I have already passed or received degree credit (https://kb.wisc.edu/ls/page.php?id=21934) for more information.

WITHDRAWAL

Withdrawal from school means dropping all courses currently in progress for the term in which the withdrawal is processed. Before the first day of classes in a term, students may remove themselves from classes by dropping **all** of their courses via My UW–Madison. Detailed information about the withdrawal process for L&S undergraduates can be found at withdrawing from semester/term (http://saa.ls.wisc.edu/policies-withdrawal.htm).

After the first day of classes and through the withdrawal deadline published in the Deadlines at a Glance section on the registrar's website (Office of the Registrar (http://registrar.wisc.edu)), L&S undergraduate students may cancel their enrollment (withdraw from the term) by going to their Student Center in My UW and accessing the Term Withdrawal tab under Course Enrollment. For more detailed information, refer to canceling your enrollment -withdrawals (https://registrar.wisc.edu/canceling_your_enrollment_withdrawal_info.htm). Additional information about the withdrawal process can be found at what does it mean if I withdraw from the term (https://kb.wisc.edu/ls/page.php?id=21703).

Students who find it necessary may withdraw at any time during the first 12 weeks of a semester without needing special permission to return for a later term. Summer deadlines for withdrawal are published in the summer by the Office of the Registrar (http://registrar.wisc.edu). Students are encouraged to confer with a dean regarding the possible effects of withdrawal upon their academic work.

Students who have neglected their classes, or who have earned unsatisfactory grades, or who have a pattern of withdrawals may need permission of an academic dean to return at a later date.

Letters & Science undergraduate students wishing to withdraw **after** the deadline **must** obtain permission from an academic dean by setting up an individual appointment through L&S Undergraduate Academic Deans' Services (608-262-0617). Failure to obtain this permission results in the recording of Failures for all courses.

CREDITS

CREDIT LOAD

Full-time student status (12–18 credits). The usual study load of a student is about 15 credits per semester/term, with an ordinary range of 12 to 18 credits. *Please note that international students and athletes must be enrolled for a minimum of 12 credits in the fall and spring semesters/terms.* For more information, please contact International Student Services (http://www.iss.wisc.edu) (608-262-2044) or the Fetzer Student Athlete Academic Center (http://www.uwbadgers.com/facilities/fetzer-center.html)(608-262-1787).

- For students receiving financial aid, federal regulations require any student receiving financial assistance to maintain academic progress and be working toward a degree. See satisfactory academic progress (SAP) (http://www.finaid.wisc.edu/259.htm) for more details.

Light load (fewer than 12 credits). A program of fewer than 12 credits may be carried **without** the specific authorization of an academic dean. However, students are encouraged to consult their undergraduate advisor or an academic dean regarding the decision to carry a light load. A light load may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits), dependent health insurance, international student visa status, University Housing accommodations, or athletic eligibility. Several terms with a courseload of fewer than 12 credits will also have an impact on a student's graduation progress.

Heavy load (19 or 20 credits). Students who have a cumulative GPA of 3.000 or better at the University of Wisconsin–Madison may enroll for 19 or 20 credits during the fall or spring term with permission from an academic dean in L&S Undergraduate Academic Deans' Services (http://saa.ls.wisc.edu/credit-overload.htm). *Additional fees per credit are assessed for all credits above 18.* **Under no circumstances may a student carry more than 20 credits in one semester.**

- See credit overload/heavy program (https://kb.wisc.edu/ls/page.php?id=21177) for more information.
- L&S students who wish to take an overload and qualify to take 19 or 20 credits should fill out the Credit Overload Request (http://saa.ls.wisc.edu/credit-overload.htm). For more assistance, please stop by 110 Ingraham Hall, or call 608-262-0617 during regular business hours.

Summer Sessions Credit Load (a maximum of 12 credits). In general a student may carry one (1) credit per week of instruction during the summer session. The overall limit for summer work is 12 credits (or 13 with special permission). The credit limit per summer session is the number of weeks of the session. Thus, a student can earn only 3 credits in a 3-week summer session. A student needs permission from an academic dean to carry one (1) additional credit per weeks in a session (e.g., four (4) credits in a 3-week session). An academic dean's permission usually requires a 3.000 cumulative GPA.

Students must carry courses for the number of credits assigned to the courses in the Guide (http://guide.wisc.edu/courses).

For more information regarding credit load, see what is the common credit load for L&S undergraduate students during the semester (https://kb.wisc.edu/ls/page.php?id=26734).

CREDIT BY COURSE EXAMINATION/RETROACTIVE CREDITS (RETROCREDITS)

The College of Letters & Science will award degree credit for foreign language work successfully completed in high school under certain circumstances **and** if an additional foreign language course is taken **at UW–Madison**. In no case can a student earn retroactive credits simply by taking a placement test or other exam. **A student must take the appropriate UW–Madison language class at UW–Madison to earn retroactive credits**.

Students who qualify for retrocredits after completing the appropriate language course on the UW–Madison campus will automatically receive retrocredits approximately two to three months after all grades have been posted for all students. This benefit is available to freshmen (first-year students), and can be exercised when the following conditions are met:

- **The course must be a student's first course at the college level in the language.** This does not

include college-level coursework taken prior to graduating from high school, but does include courses transferred from another institution where a student was working towards an undergraduate degree or coursework a student completed after graduating from high school.

- **The course must be designated appropriate for earning retroactive credits.** These courses are designated with the Foreign Language Level attribute of 2 ,3, 4, and 5 in the ***Guide*** under *Courses* (see ***course designation***).
- **A student must take the course before he/she has earned 30 degree credits.** This **does not** include AP, CLEP, IB, or other college credit earned in high school, nor does it include retroactive credits earned in another language. It **does** include courses transferred from another institution where you were working toward a degree.
- **A student must earn a B or better in the class.**

If a student meets all of the conditions listed above, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester (e.g., if the language was completed in the fall term, the retroactive credits should appear on a student's record by the beginning of the spring term). If retroactive credits do not appear on a qualified student's records by the end of the **fourth** week of the following term, the student should fill out a Retroactive Language Request Form (http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf) and submit that form to the office of the academic dean at the student's particular school or college. For students earning an undergraduate degree in the College of Letters & Science, the form should be delivered to L&S Undergraduate Academic Deans' Services (http://saa.ls.wisc.edu/deans-services.htm). Non-L&S degree-seeking candidates should speak with the undergraduate academic service unit in the school or college for more guidance.

- Retroactive credits (retrocredits) **will not** automatically be posted for students who have already earned retrocredits. If a student is still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), the student will need to fill out the Retroactive Language Request Form (http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf) and deliver it to the L&S Academic Deans' Services Office in 110 Ingraham Hall if the student is an L&S undergraduate. For further information, contact L&S Academic Deans' Services at 608-262-0617.

Please note:

- **Native speakers of a language are not eligible to earn retroactive credits in that language**.
- Students can earn retrocredits in more than one language as long as they are within the 29-credit limit and meet the other requirements listed above to earn retrocredits.
    - Retroactive credits (retrocredits) will not be posted automatically for students who have already earned retrocredits. If students are still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), they will need to fill out the Retroactive Language Credit Request Form (http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf) and deliver it to L&S Undergraduate Academic Deans' Services in 110 Ingraham Hall to be reviewed if they are an L&S undergraduate student.
- Retrocredits can only be earned for the first four semesters/levels of a language sequence. For example, a student who tests into SPANISH 311 can earn a maximum of sixteen retrocredits (SPANISH 101, SPANISH 102, SPANISH 203, and SPANISH 204). The maximum number of credits earned will be impacted if the student already has AP credits for a particular course.
- **Effective summer 2019, the maximum number of retrocredits a student can earn in the Chinese/Japanese language sequence is sixteen (16) credits.** For example, a student who tests into ASIALANG 301 and successfully completes this course can earn a maximum of sixteen (16) retrocredits (ASIALANG 101, ASIALANG 102, ASIALANG 201, and ASIALANG 202).
- UW–Madison will honor retroactive credits earned at another UW System institution provided that these credits were earned according to UW–Madison policy. Students will need to work with the Office of Admissions and Recruitment (https://www.admissions.wisc.edu/apply/freshman/apib.php) at UW–Madison to make sure the retrocredits from the other institution get posted to their official UW–Madison records.

For more information about retroactive credits, refer to Retroactive Credits (http://languages.wisc.edu/advising/retro) and is it possible for an L&S undergraduate to earn retrocredits (https://kb.wisc.edu/ls/page.php?id=23736).

CREDIT BY DEPARTMENTAL EXAMINATION

The College of Letters & Science allows degree credit, as well as placement credit, for the mastery of some L&S coursework as demonstrated by appropriate achievement tests. The intent of these examinations is to increase opportunities for obtaining degree credit for college-level work done in high school or elsewhere.

Credit may be earned on the basis of an examination given by a department when a student has demonstrated possession of knowledge equivalent to what would be learned in a specific course taught in that department. The credit given is for knowledge possessed by the student regardless of where they have gained that knowledge. Examinations for credit must be administered as soon as possible, but in any case before the end of the student's first semester in residence following the experience that provided the knowledge to be tested.

Any department wishing to do so may give degree credit by examination for any of its elementary- or intermediate-level courses other than Honors courses and Directed Study.

Students who wish to establish credit by department examination must take a separate examination for each course in which credit is sought.

Departments will indicate which, if any, of their courses covering work that may have been taken in high school may permit degree credit on the basis of appropriate national tests taken in high school. In addition, general degree and specific subject credit may be obtained by examination under the College Level Examination Program (CLEP). (See College-Level Examination Program (p. 9).)

In no case may students receive degree credit more than once for the same college-level work. If degree credit is obtained for a given course by taking an examination, the student may not enroll in the course for degree credit, and vice versa.

Credits earned by examination **do not** count toward the residence requirement. Students are encouraged to take departmental examinations for credit prior to earning 90 degree credits (including the semester in which the 90th credit is earned) in order to avoid complications with the residence requirement. It is possible for students to fulfill all or part of the college foreign language requirement without receiving credit.

The provision for credits by examination offers students an opportunity to complete the baccalaureate degree requirements in less than four years should they so desire. Students wishing to take examinations to earn credit should contact the department office.

ENGLISH AS A SECOND LANGUAGE (ESL)

English as a Second Language

Students for whom English is a second language must have a facility in English adequate for university work. Results of the UW–Madison ESL assessment test (MSN-ESLAT) may require students to take one or more English as a Second Language courses. English language proficiency is met by completing ESL 118. Students who are placed into ESL courses and who also need to take a course in residence to complete the General Education Communication Part A requirement may only take ESL 118 to meet that requirement. An exempt score on the MSN–ESLAT will satisfy both the English language proficiency requirement and the Communication A requirement. Because students who take ESL courses are frequently retested, it is possible to earn an exempt score upon completion of any of ESL 114, ESL 115, ESL 116, or ESL 117. Additional information can be found at can an L&S undergraduate student earn degree credit for more than one ESL course (https://kb.wisc.edu/ls/page.php?id=85642).

All ESL courses completed in residence, and all credit earned in those courses, will appear on students' transcripts. ESL courses numbered below 118 **are not** considered Liberal Arts and Science courses, but may be counted among L&S students' free electives in the degree. To learn more about the 108 Liberal Arts and Science credits L&S students are required to take, see the College of Letters & Science Requirements information (p. 344).

Degree Requirements

In general, international students must complete the same degree requirements as any other entering student. The College of Letters & Science makes some exceptions to this policy. For instance the College may waive the foreign language requirement for the B.A. and B.S. degrees for students who are native speakers of a foreign language.

For the purpose of exemption from the foreign language requirement, a "native speaker" is a student who graduates from or completes a major portion (the equivalent of at least five semesters) of a secondary school in a non-English-speaking school system. Exemption is not automatic. Students who believe they may qualify for an exemption should contact the Office of Admissions and Recruitment or an L&S academic dean to determine how their language background may be applicable toward the foreign language requirement.

Students whose native language is not English may not receive degree credit for work in their native language through Credit by Examination except for literature credit.

Special Advisor

International students can receive advising information from their department advisors. The Office of International Student Services (http://iss.wisc.edu) (716 Langdon Street, Room 217 Red Gym, 608-262-2044; iss@studentlife.wisc.edu) can also offer assistance and advising in non-curricular matters such as visa-related issues.

FREE ELECTIVES

If a student so chooses, he or she may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (http://guide.wisc.edu/courses), and are not designated as courses in the Liberal Arts and Sciences. Thus, these courses ***do not*** carry breadth or level in L&S.

Credit earned in these courses apply to the degree requirements in the following ways:

- Courses taken as free electives in the degree may be carried and will appear on the transcript showing credits, grade, and grade points.
- These credits will count as part of the semester load and will count toward satisfaction of the minimum progress requirements.
- These credits and grade points will be included in calculating a student's semester and cumulative grade point average.
- Free electives in the degree **cannot** be used to satisfy the L&S requirement that students complete a substantial portion of their degree credits in intermediate and advanced work.

- Courses that are taught in L&S departments but not designated as Liberal Arts and Science courses (e.g., Music and Music Performance courses numbered 099 and below) may be counted for credit as free electives in the degree. (For B.A./B.S. Music majors, Music and Music Performance courses numbered 099 and below that are not required for the major may be counted as free electives.) Students with questions regarding a particular course offered by a school or college outside L&S as it relates to the requirement to complete 108 Liberal Arts and Science credits should consult an academic dean before registration.

NON-DEGREE-GRANTING ACCREDITED INSTITUTIONS' TRANSFER CREDIT LIMITATION

Of the credits required for graduation, not more than 72 may be carried at non-degree-granting accredited institutions. However, of the last 60 credits earned before graduation, not more than 12 may be carried at these non-degree-granting accredited institutions.

NON-L&S COURSES AND L&S DEGREE CREDIT

Liberal Arts and Science Courses

The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences (LAS)* courses. These courses are designated as such in the Guide (http://guide.wisc.edu/courses)). LAS courses count toward the L&S degree requirements, including requirements related to breadth and level.

Non-L&S Courses Cross-listed with L&S Departments

A course offered in the College of Letters & Science that carries the C designation and which is crosslisted with a department in another school or college is considered a Liberal Arts and Science course. Such courses are designated as counting for Liberal Arts and Science (LAS) credit in L&S within the Guide (http://guide.wisc.edu/courses). As LAS courses, they may be counted as part of the major and count as part of the 108 Liberal Arts and Science credits required for an L&S degree.

Non-L&S Courses Required for L&S Majors

Courses taught in departments located in schools or colleges other than L&S, but which are required for completion of an L&S major, are considered Liberal Arts and Science courses. Such courses will *either* designated as Liberal Arts and Science courses in the Guide (http://guide.wisc.edu/courses), or their Liberal Arts and Sciences status will appear in the DARS degree audit. In both cases, these courses count as part of the 108 L&S credits required for a degree.

Free Electives in the Degree

If a student so chooses, he or she may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (http://guide.wisc.edu/courses), and are not designated as courses in the Liberal Arts and Sciences. Also refer to free electives (https://kb.wisc.edu/ls/page.php?id=23921).

DEGREES

ASSOCIATE DEGREE POLICY

Effective summer/fall 2012, all new transfer students with an associate's degree from either a UW System (UWS) institution or one of the Wisconsin Technical College System (WTCS) schools that award a liberal arts associate's degree (i.e., Madison College, MATC–Milwaukee, Nicolet, Chippewa Valley, Western) will have their University General Education (UGER) (p. 22) breadth requirements satisfied in all undergraduate schools/colleges on the UW–Madison campus. Students pursuing their undergraduate degrees in the College of Letters & Science ***may*** need to take additional coursework to fulfill the L&S breadth requirements (p. 344). Students should consult with their undergraduate advisor(s) if they have additional questions.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by **both** WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical fields will not have their UGER breadth requirements satisfied.

UWS and WTCS transfer students with a qualifying liberal arts associate's degree are EXEMPT from meeting the following **University General Education Breadth** requirements:

- Natural Science—two (2) courses for a total of 6 credits
- Humanities/Literature/Arts—6 credits
- Social Studies—3 credits

Students will still be required to meet other University General Education Requirements (p. 22).

Please note:

- Students in the College of Letters & Science must meet the L&S breadth requirements (p. 344) with specific transfer courses or courses taken in residence.

DEGREE AND DIPLOMA INFORMATION

The College of Letters & Science offers the following degrees:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Landscape Architecture*
- Bachelor of Music*
- Bachelor of Arts–Journalism*
- Bachelor of Science–Journalism*

- Bachelor of Social Work*
- Bachelor of Science–Applied Mathematics, Engineering and Physics*

*These specialized degree programs have requirements for completion distinct from the L&S BA/BS requirements. Students who complete these requirements are awarded these degrees in lieu of the general Bachelor of Arts or Bachelor of Science. More L&S degree information is available at Degrees/Majors/Certificate (p. 310).

A UW–Madison undergraduate diploma lists only the degree title. Diplomas ***do not*** list major(s) or certificate(s) students complete as undergraduates. Major and certificate information can be found on a student's official UW–Madison transcript.

- If a student is completing a bachelor of science degree with majors in history and economics, the degree on the student's diploma will be **Bachelor of Science**.
- If a student is completing a bachelor of arts degree, majoring in psychology and journalism, the degree on the student's diploma will be **Bachelor of Arts–Journalism**.

SECOND UNDERGRADUATE DEGREE

Students are not permitted to earn two undergraduate liberal arts degrees. Students interested in earning a second undergraduate degree must consult an academic dean in the College of Letters & Science Undergraduate Academic Deans' Services (608-262-0617; Suite 110 Ingraham Hall, 1155 Observatory Drive).

Please note that students who already have a Bachelor of Arts or Bachelor of Science degree in general are not able to earn another B.A. or B.S. since two-thirds of their coursework for the second degree will be the same. Thus, a student who has a liberal arts degree with a science major is usually not considered a likely candidate for a second degree in the College of Letters & Science if the student wants to come back to do a second liberal arts degree in another humanities, social science, or natural science major. Students who have earned a music degree (MUS), for example, might be able to earn a B.A. or B.S..

Students admitted as candidates for a second undergraduate degree are subject to the L&S Academic Probation and Drop system. Requirements for admission to candidacy for a second degree are:

1. An undergraduate degree earned at UW–Madison or elsewhere. **The second degree must be substantially different from the first degree**. In other words, a student who has a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree ***would not*** be able to earn another B.A. or B.S. degree. Thus a student who already has a liberal arts degree with a liberal arts major such as Chemistry or History is not considered a likely candidate for a second liberal arts degree in the College of Letters & Science (L&S) if the student wants to come back to do a second liberal arts degree with another major offered within L&S such as Computer Science, Economics, Mathematics, or Spanish. (Also, students who started an additional major but did not declare it prior to graduating ***are not eligible*** to return as a second-degree student to finish up coursework for the 2nd or additional major.)
2. Satisfaction of all basic admissions requirements to UW–Madison, including geometry.
3. Submission of transcripts from all schools attended (especially if the first degree was not earned a UW–Madison). One set of transcripts must be sent to the Office of Admissions and Recruitment at UW–Madison and a second set of transcripts must be brought to the meeting with the academic dean in L&S Undergraduate Academic Services.
4. Minimum of 3.000 GPA on first undergraduate degree program. Coursework at all colleges attended (including UW–Madison, if applicable) is used to calculate this GPA.
5. An L&S academic dean will check for math and foreign language deficiencies.
6. Admission to the proposed major (a letter of support from the department confirming a student has met all basic entrance requirements to the major and is eligible to declare if admitted for a second undergraduate degree). **Please note that obtaining an endorsement from the department *does not* guarantee acceptance for a second undergraduate degree if the student does not meet the other criteria listed above.** If a student is lacking admission to or recommendation from the major department, the student could register as a University Special student but may not register in the College of Letters & Science.
7. Written permission from an L&S academic dean.

To earn a second undergraduate degree from UW–Madison, students must:

1. Satisfy all Letters & Science degree requirements.
2. Satisfy all Quality of Work requirements.
3. Complete at least 30 credits in Letters & Science at UW–Madison after the first degree has been awarded, regardless of whether or not the first degree was an L&S degree. **Note that the second degree must be significantly different from the first.**
4. Complete a minimum of 108 Liberal Arts and Science credits which may include courses completed during the student's first degree program.

SENIOR THESIS

Any senior who so desires may write a senior thesis. A thesis may not carry less than 4 or more than 8 credits and **must be carried over a two-semester period.** A senior thesis must represent treatment of some phase of the student's work in the major; the subject requires approval by the student's advisor and the faculty member in charge of the field of concentration (usually the department chair). Thesis students enroll for thesis course numbers 691 **and** 692 (students in

the Honors Program enroll in 681 **and** 682 for a minimum of 6 credits and a maximum of 8 credits in total).

- Students **must** complete **both** 691 **and** 692 *or* 681 **and** 682 of the two-semester course sequence. A student **cannot** substitute one of the sequence courses with a directed study or other course.
- The two-semester course sequence must be in the same department (e.g., ANTHRO 691 ***and*** ANTHRO 692).
- Students **cannot** take the two-semester course sequence in one semester or term.

Students enrolled in a 691/692 or 681/682 senior thesis sequence will receive a grade of "P" (Progress) for the first half of the senior sequence (691 or 681) until they complete both semesters. This designation of "Progress" is a temporary grade used only for courses that span more than one semester/term (typically a senior thesis). When the course is completed, a final grade replaces the P for each term. The "P" does not count in any GPA computation. In addition, the "P" grade does not count for credit until it is replaced by a final grade.

EXAMS

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) enables those students who have attained college-level competency outside the classroom to take examinations for college credit or placement. The General Examinations measure undergraduate achievement in five basic areas of liberal arts education:

- English composition
- Humanities
- Mathematics
- Natural Sciences
- Social Sciences/History

The Subject Examinations measure achievement in undergraduate courses. Both sets of examinations are aimed at the public-at-large, returning service personnel, and entering freshmen. Credit will be granted for the General Examination according to the criteria established ONLY to freshmen before they have earned more than 15 degree credits in a residence program or elsewhere. Only a limited number of departments accept CLEP Subject Examination credits. A continuing student with no more than 15 completed degree credits may register for the General or Subject Examination(s) by contacting the Office of Testing and Evaluation Services, 608-262-5863. For further information, consult L&S Undergraduate Academic Deans' Services at 608-262-0617 or the Office of Admissions and Recruitment (https://www.admissions.wisc.edu/apply/freshman/apib.php), 608-262-3961.

EXAMINATIONS FOR PLACEMENT

English

All students must take English placement tests to determine level of competence unless competence has been successfully demonstrated prior to enrollment through coursework (including AP and IB credits). On the basis of their test scores, most students will be required to enroll in and successfully complete a Communication Part A course. This course should be completed within a student's first 30 credits after enrollment.

Non-native speakers of English assigned to courses in English as a Second Language on the basis of their English as a Second Language (ESL) assessment test should see International Students and Non-Native Speakers of English (p. 325).

Foreign Language

Students at UW–Madison who plan to resume the study of a foreign language begun in high school must take the UW System placement examination in that language and consult the foreign language department advisor for appropriate course placement.

Before enrolling in a level either higher or lower than the level of placement indicated by the examination, students should consult the foreign language department advisor. Without regard to any work taken in high school, students may enroll for degree credit in any course offered for degree credit by the college, provided they meet its prerequisites and provided they have not already received college credit for this course or an equivalent course or a higher level course in the same subject by course completion or examination.

This placement procedure permits students who are not confident about their high school foreign language work to retake that work in college before proceeding to more advanced study of that language. Students who feel they are ready to work at a higher level than that indicated by the placement test may do so. In no case may students receive degree credit more than once for the same level college work.

Mathematics

Entering freshmen are required to complete the appropriate placement test in mathematics. This test determines minimum math competency and placement. Students who do not demonstrate minimum competency in math will be required to complete additional non-degree-credit math courses within the first 30 credits after enrollment.

The results of the placement test in mathematics are binding. Students continuing in mathematics must enroll in the level of mathematics course that is indicated by the examination. However, students who feel their placement examination results are not valid or appropriate may appeal the placement by conferring with the undergraduate advisor in the mathematics department. If the advisor agrees, the student may carry a course below or above the placement indicated for degree credit provided previous college credit has not been granted by course completion or examination.

FINAL EXAMINATIONS (ACADEMIC SUMMARY PERIOD)

Following the regularly scheduled instructional period each semester is an eight-day summary period. Usually the first

day of the summary period is for individual study and review, and no classes or exams are to be scheduled during this designated period. The last seven days are prescheduled to include one two-hour summary block for each course of two or more credits. This two-hour block shall be used for an examination or for other instructional activities as deemed appropriate by the instructional unit offering the course. **During the two weeks preceding the summary period, examinations covering the content of the entire course cannot be given.** Take-home examinations are due at the scheduled two-hour block.

Faculty policy prohibits giving or taking final examinations earlier than the time assigned in the Course Guide. Students may arrange a make-up examination at a later date only if the professor is willing and if there is a valid reason for missing a final examination. (See the Guide entry "Incompletes (p. 335)" below.)

Students are required to attend all of their final exams. Leaving prior to the final examination period and not taking finals will have a negative impact on a student's final grade in a course or courses. See class attendance policy (https://kb.wisc.edu/ls/page.php?id=24628) for more information.

MIDTERM EXAM POLICY INFORMATION

Information about midterm evening exam policy along with fall, spring, and summer term final exam policy can be found at midterm and final exam policy information (https://registrar.wisc.edu/documents/exam_policy.pdf) on the Registrar's website. Additional information can also be located at midterm grades (https://registrar.wisc.edu/mid_term_grades.htm) and upcoming final exam periods (https://registrar.wisc.edu/midterm_and_final_exam_information_faculty.htm).

- It is implicitly understood that no exams, papers, or assignments will be required during any break period (e.g., spring break) or major holiday.

GRADES

AUDIT

A student may enroll in a course on an audit (AU) basis only with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. ***Courses with laboratory or performance skills may not be audited. (***L&S undergraduate students are not allowed to audit classes required for their major or degree with the purpose of getting some background prior to formally enrolling in the courses). Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester/term program load for purposes of determining fees and maximum credits carried.

Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. **Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage.** See w (https://kb.wisc.edu/ls/page.php?id=26734)hat does it mean to audit a course (https://kb.wisc.edu/ls/page.php?id=26734) for more details.

L&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available at Course Change Request (https://registrar.wisc.edu/course_change_request.htm)) to Suite 110 Ingraham Hall, 1155 Observatory Drive. (***Course Change Requests can be accessed through an individual's Student Center in My UW*** (https://my.wisc.edu) ***under: Course Enrollment/Term Information/Course Change Request***.) Students **will not** be able to submit or cancel a request to audit a course after the fourth week of the fall or spring term.

- Audited courses, noted as such by "AU" in place of a number of credits, are graded either "S" (Satisfactory) or "NR" (No Report) or "NW" (No Work). ***AU is not a grade.***
- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed.
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits). Students should consult an advisor in the Office of Student Financial Aid (http://www.finaid.wisc.edu) for more detailed information.
- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the Veteran Services & Military Assistance Center (http://veterans.wisc.edu).

CREDIT/NO-CREDIT COURSES

A limited number of courses on campus are offered on a Credit/No Credit basis. Please note that Credit/No Credit is not the same as Pass/Fail. At the completion of the course the student is given a grade of CR or N rather than a letter grade (A, AB, B, BC, C, D, F). A grade of CR will give a student degree credit but will not have any grade points associated with it to be figured into the grade-point average calculation. A grade of N will award no degree credit. Credit/No Credit courses are identified in the Class Search—Class Details page as a Grading basis of "Credit/No Credit".

FAILURES

Students who have earned a grade of F may repeat the failed course in residence. **The original grade of F remains permanently on a student's record and is averaged into the semester and overall grade point average (GPA).** The failure will be counted as zero grade points per credit in computing the GPA. If a student repeats the failed course, the course will appear on the student's transcript twice with the original grade of F recorded and the new grade also recorded. Both grades will be counted in determining all applicable quality of work requirements. **Multiple failures in the same course all count in the GPA and will appear on a student's permanent records.** See can I retake a course that I have failed (https://kb.wisc.edu/ls/page.php?id=21933) for more details.

A course failed in residence at UW–Madison may be repeated for credit at any other educational institution. However the new grade earned out of residence will not have an impact on the student's UW–Madison GPA.

GRADE CHANGE AND APPEAL

In accordance to current faculty policy and in an effort to main both equity and consistency, final term grades can be changed only because of "clerical error". Students ***cannot*** petition to improve a course grade by offering to rewrite a paper, turn in additional work, or retake a final exam (or exams). The only exception wold be if:

1. the option to improve a grade is available to **all** students in a given course, **AND**
2. this option is stated explicitly in the course syllabus

A change of grade is allowed only if there has been a clerical error. If an L&S undergraduate student believes a clerical error has been made in the awarding of the final grade for a course, the student should first meet with the instructor of the course to determine whether such an error has occurred. Requests for a change of grade must be signed by both the instructor of the course and the chair of the department. Students who believe they have been unfairly graded in a course should follow the appeal procedure established by the department in which the course grade was given.

The appeal procedure typically requires the student to first meet with the instructor of the course to discuss the issue, followed by a meeting with the department chair or department committee. If the issue is still unresolved after the department appeal procedure is completed, the student's last recourse would be to appeal to one of the Associate Deans in the College of Letters & Science based on the discipline of the course in question. Appeals of final grades must be initiated within the semester immediately following the term in which the course is taken. For more information, see What is the process for appealing a grade for an L&S undergraduate student? (https://kb.wisc.edu/ls/page.php?id=28334)

GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits carried, whether passed or not. Semester/term grades are reported by letter only (A, AB, B, BC, C, D, F); plus and minus signs are not authorized. The highest possible GPA is 4.000, representing A grades in every course; the lowest possible is 0.000.

For more detailed information, see valid instructor assigned grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

For more information on the grading system, also see the section on undergraduate grades and grade point average (GPA) (http://registrar.wisc.edu/grades_and_gpa.htm) on the registrar's website.

INCOMPLETES

A grade of incomplete (I) may be reported for a student who has been enrolled in a course with a passing grade until near the end of the semester/term and then, due to illness or some other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination (or to complete some limited amount of term work). An Incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof the grade reported will be an F. Even when a student can provide verifiable documentation, a student may still earn a grade of F if the quality of the student's work convinces the instructor that the student cannot successfully pass the course.

Any subject taken by an L&S undergraduate student marked Incomplete must be completed by the end of the fourth week of classes of the student's next semester in residence at the University (exclusive of summer sessions) or it will lapse into a Failure. If an instructor grants an extended incomplete (EI), a grade change will need to be filed by the instructor, approved by the chairperson of the department, and forwarded to L&S Undergraduate Academic Deans' Services in 110 Ingraham Hall. In such cases the grade of I is replaced with the grade of extended incomplete (EI).

NOTE: Extended Incompletes (EI) must be removed and replaced with the final grade by the last day of classes prior to the start of final exams or they will lapse into Failures.

Incompletes incurred in the last semester in residence at UW–Madison may not be removed after five years of absence from the University without special advance permission from L&S Undergraduate Academic Deans' Services. Such Incompletes must remain on the record with grades of permanent incomplete (PI) and do not lapse into failures.

If a student enrolls with an Incomplete grade from a previous semester and is dropped later in the term because the Incomplete has lapsed to an F or has been changed to a low grade, the student will be withdrawn with an effective date within the refund period closest to the time of the student's actual withdrawal if the student has not been granted permission to continue by an L&S academic dean.

For further information, see What does it mean if my instructor gives me a grade of incomplete? (https://kb.wisc.edu/ls/page.php?id=21330) on the L&S website and Incompletes (https://registrar.wisc.edu/incompletes) on the registrar's website.

NO WORK GRADE

Students will receive a grade of No Work (NW) on their official records if they enrolled in a course and then never attended. Instructors may award this grade only when the instructor has no evidence that the student ever attended or submitted any work. Any student who does attend for part of the semester/term and then stops participating is not eligible to receive a grade of NW. The No Work notation does not have an impact on a student's semester/term or cumulative GPA. For more information, see Valid Instructor Assigned Grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

A course failed in residence at UW–Madison may be repeated for credit at any other educational institution; however the

new grade earned out of residence will not have an impact on the student's UW–Madison grade point average (GPA).

PASS/FAIL

Any L&S undergraduate student in good academic standing is eligible to take **one** course per term/semester on a pass/fail (S/U) basis. ***For the College of Letters & Science, good academic standing means that a student does not have one of the following statuses:***

- **probation**
- **strict probation**
- **continued probation**
- **continued strict probation**
- **dropped status**

For information about probation, see academic probation and drop (p. 25).

- **Undergraduates may carry only one course on a pass/fail basis per term (fall, spring, summer) and a maximum of sixteen (16) credits during their entire undergraduate career.**
- First-semester freshmen and transfer students without an established UW–Madison GPA are eligible to take **one (1)** course for pass/fail in their first term at UW–Madison.
- Summer sessions collectively count as a single term. Thus, a student can only take **one (1)** course on a pass/fail basis during the summer.

Any student who takes a pass/fail course must earn at least a C to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U will be recorded by the Registrar's Office in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see What does it mean to take a course pass/fail? (https://kb.wisc.edu/ls/page.php?id=21102)

Notes:

- Students must submit (or cancel) pass/fail requests via their Student Center link (https://my.wisc.edu) by the end of the fourth (4th) week of fall and spring terms. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students **may not** cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.
- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to what does it mean to take a course pass/fail (http://kb.wisc.edu/ls/page.php?id=21102) and Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm).
- **Students cannot cancel a Pass/Fail request after the deadline if s/he needs the course to fulfill a major or degree requirement at a later date. It is the student's responsibility to determine whether or not s/he can take a course on a pass/fail basis.**
- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW–Madison (http://my.wisc.edu) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to the registrar's website (http://registrar.wisc.edu/pass_fail_option.htm).
- **Only elective work may be carried on a pass/fail basis.** Thus, pass/fail **cannot** be declared or used to fulfill the following requirements:
  - Breadth (humanities, literature, social science, natural science)
  - Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
  - Math
  - Ethnic Studies
  - General Education Requirements (Comm A, Comm B, QR A, QR B)
  - Major requirements
- L&S undergraduates may take courses in their major or major department for pass/fail. **However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements.** Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.
- Courses carried on a pass/fail basis **cannot** fulfill any other college requirements except for the 60 intermediate/advanced level credits and 108 Liberal Arts and Science (LAS) credits needed to graduate.
- **Directed Study courses may not be taken on a pass/fail basis.**
- Pass/fail work **may not** be used as part of the coursework offered in satisfaction of the individual major.
- **Students may not take foreign language courses on a pass/fail basis until the foreign language requirement for their degree program has been satisfied**.
- **Students pursuing certificate programs should check with the certificate advisor(s) about policies concerning pass/fail for certificate program courses since many certificate programs do not allow coursework to be taken for pass/fail.**

For further information, deadline dates, and instructions for registration stop by the College of Letters & Science Academic

Deans' Services in Suite 110 Ingraham Hall, 1155 Observatory Drive, or call 608-262-0617 for more assistance.

Q GRADE

A "Q" grade is assigned by an instructor when there is a discrepancy between the work completed by a student and the student's official registration. The Office of the Registrar will post the temporary Q grade/mark to a student's record until the discrepancy is resolved. A student will receive a Q in one of three situations:

1. a student registers for a variable-credit course and completes the work that is appropriate for a different number of credits;
2. a student registers for Honors credit and does not complete the Honors portion of the work; and
3. a student does not register for Honors but completes the Honors work appropriate for an Honors designation.

In each of the three cases listed above, students will need to work with the instructor to correct the situation before a grade can be reported. The correct grade will need to be forwarded by the instructor to L&S Undergraduate Academic Deans' Services (https://saa.ls.wisc.edu/offices/academic-deans-services). For more information, see Valid Instructor Assigned Grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

GRADUATION

DIPLOMA AND DEGREE INFORMATION

A UW–Madison undergraduate diploma lists only the degree title. Diplomas ***do not*** list major(s) or certificate(s) students complete as undergraduates. Major and certificate information is located on a student's official UW–Madison transcript.

- If a student is completing a bachelor of science degree with majors in history and economics, the degree on the student's diploma will be **Bachelor of Science**.
- If a student is completing a bachelor of arts degree, majoring in psychology and journalism, the degree on the student's diploma will be **Bachelor of Arts–Journalism**.

The following information will appear on an L&S undergraduate student's diploma:

- Degree Title (e.g., Bachelor of Arts, Bachelor of Music, etc.)
- Degree Conferral Date (e.g., May 10, 2020 for spring 2020 graduates)
- Honors in the Liberal Arts (if a student declares and successfully completes the requirements)
- Honors in the Major (if a student declares and successfully completes the requirements)
- Comprehensive Honors (if a student declares and successfully completes the requirements)

The College of Letters & Science offers the following degrees which will appear on an L&S undergraduate student's diploma:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Landscape Architecture*
- Bachelor of Music*
- Bachelor of Arts–Journalism*
- Bachelor of Science–Journalism*
- Bachelor of Social Work*
- Bachelor of Science–Applied Mathematics, Engineering and Physics*

*These specialized degree programs have requirements for completion distinct from the L&S BA/BS requirements. Students who complete these requirements are awarded these degrees in lieu of the general Bachelor of Arts or Bachelor of Science. More L&S degree information is available at Degrees/Majors/Certificate (p. 310).

FOREIGN LANGUAGE

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the L&S Disabilities Curricular Accommodations Committee (DCAC) for review.

B.A. Degree

For the **B.A. degree,** the foreign language requirement may be met in one of two ways: (1) completion of the fourth unit (level) in one language, or (2) completion of the third unit (level) in one language **and** completion of the second unit (level) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **OR**

- completed the 4th unit of a college language course (e.g., ASIALANG 202, AFRICAN 324 , GERMAN 204 , SLAVIC 208 , etc.), **OR**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd unit/semester of a second foreign language (e.g., ASIALANG 203, GERMAN 203 , GREEK 305 , etc.) at the college level, **OR**
- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd unit/semester of a second foreign language (e.g., ASIALANG 126 , GERMAN 112 , ITALIAN 102 , etc.) at the college level

B.S. Degree

For the **B.S. degree,** the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd unit/semester of one college-level language (e.g., AFRICAN 333 , ASIALANG 201, FRENCH 203 , etc.)

Foreign Language Substitution

The Foreign Language Substitution package (FLSP) is for degree-seeking candidates in the College of Letters & Science (L&S) only who are seeking to fulfill the L&S foreign language requirement and also have a documented disability in foreign language acquisition.

What is a Foreign Language Substitution?

The Foreign Language Substitution Package is designed to fulfill the College of Letters & Science faculty's intention in requiring foreign language as a part of the college curriculum. Specifically, the Foreign Language Substitution Package, like the foreign language requirement, provides students with information about language in general as well as the literature and culture of the people using a particular language. Courses used to meet the substitution must be approved by the designated academic dean in L&S Undergraduate Academic Deans' Services (http://saa.ls.wisc.edu/deans-services.htm) (110 Ingraham Hall (http://www.map.wisc.edu/?initObj=0056&wing=)). Classes used for the substitution package ***cannot*** be used to fulfill any of the following requirements:

- Major requirements
- Breadth (humanities, literature, social science, science)
- Ethnic studies
- General Education Requirements (Comm A, Comm B, QR-A, QR-B)

How do I qualify for a Foreign Language Substitution?

The Disabilities Curricular Accommodations Committee (DCAC) of the College of Letters & Science can approve a substitution to the foreign language requirement for students in Letters & Science only with certain disabilities that make a course substitution appropriate. Extensive and very specific documentation is required from students and disability specialists. Further information may be obtained from the L&S Undergraduate Academic Deans' Services (http://saa.ls.wisc.edu/foreign-language-substitution-package.htm) (Room 110, Ingraham Hall, at 1155 Observatory Drive; 608-262-0617) or the McBurney Disability Resource Center (https://mcburney.wisc.edu)(702 West Johnson Street; 608-263- 2741).

Note that an appointment at the McBurney Center is required before submitting the application. This appointment should be made no less than one semester/term prior to applying for the substitution package. McBurney Center staff will help you determine what documentation is necessary for the application, as well as assess whether additional testing is required.

After meeting with a McBurney Center staff member, a student should fill out and complete an application for the substitution package. The deadline to submit a completed copy is at the end of the fourth week of the fall and spring terms. Applications are not accepted during the summer term. All students who submitted a completed application by the deadline should hear back from the Disabilities Curricular Accommodations Committee (DCAC) regarding the status of their application within six to eight weeks after the deadline.

Please make sure you submit your original completed application AND also four (4) additional copies of your completed application to Suite 110 Ingraham Hall at 1155 Observatory Drive before 4:00 p.m. on Friday of the deadline. (The deadline to submit a completed application for consideration is the end of the 4th week of the fall and spring terms.) A completed application must include five (5) copies of each of the five items below:

1. High school transcript and transcripts from other post-secondary institutions you may

have attended prior to UW–Madison (you will need to contact original high school or other institution of higher learning for these records if you do not have copies)
2. UW–Madison transcript
3. Copy of your most recent DARS (Please go to your My UW and access the Student Center to request a DARS.)
4. Student application form (see p. 7 of Foreign Language Substitution Package application located at Foreign Language Substitution Package (http://saa.ls.wisc.edu/foreign-language-substitution-package.htm))
5. Copy of McBurney Faculty Notification Letter (or confirmation letter of accommodations received) if student has one
6. Other relevant and current disability documentation assembled in consultation with McBurney Center staff

What are the requirements for a Foreign Language Substitution?

1. General Language: If approved for an L&S foreign language substitution package, both **B.A.** and **B.S.** degree candidates must complete one (1) course having to do with language in general (selected from an approved list of classes). If a student's official UW–Madison records has at least one unit (year) of a high school foreign language, this requirement is fulfilled. If a student has not taken a foreign language in high school, please select **one (1)** course from either a, b, or c listed below:

a. LINGUIS 101 (Linguistics)
b. CS&D 240 (Communication Sciences & Disorders)
c. ENGL 201 , ENGL 207 , ENGL 304 , ENGL 307 , ENGL 400, ENGL 407 , ENGL 408 , ENGL 409 (English)

2. Cultural Context:

B.A. students must complete the following:

Three (3) courses related to a country, region, or a group of countries sharing a common language in the following areas:
a. Literature
b. History or Culture
c. General elective

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.A. degree. Students must then also take a Literature course and General elective in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a, b, and c above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (http://saa.ls.wisc.edu/deans-services.htm)**.**

B.S. students must complete the following:
Two (2) courses related to a country, region, or a group of countries sharing a common language in the following areas:
a. Literature
b. History or Culture

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.S. degree. Students pursuing a B.S. must also take a Literature course in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a and b above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (http://saa.ls.wisc.edu/deans-services.htm)**.**

What are my responsibilities as a student to complete the Foreign Language Substitution?

Students must submit five (5) copies of all required materials to the Disabilities Curricular Accommodations Committee in L&S Academic Deans' Services (Suite 110 Ingraham Hall, 1155 Observatory Drive, 608-262-0617) by the end of the fourth (4th) week of the semester (fall or spring term) in which they would like to present their case for review. ***Applications are not accepted or reviewed during the summer.***

Completed applications will be reviewed approximately six (6) weeks after the official deadline. Students will then be notified shortly after the Disabilities Curricular Accommodations Committee meets regarding the results.
Students who are approved for a foreign language substitution package must make an appointment to speak with an academic dean in L&S Undergraduate Academic Deans' Services (110 Ingraham Hall; 608-262-0617) to talk about the next steps they will need to take in order to complete their substitution package. **Students will not be able to complete their approved foreign language substitution package until they have met with an academic dean to select the appropriate courses they need to fulfill this requirement.**

Students who have not been previously diagnosed as learning-disabled or hearing-impaired should plan three to four months to schedule required

testing and to receive results and interpretation of the testing.

Contact the McBurney Disability Resource Center (http://www.mcburney.wisc.edu) for current information about the tests required. Results of the specified tests taken within the previous four years are acceptable; retesting is required if test results are not at least this current.

For persons with a hearing loss, certain criteria must be met to apply for a substitution to the foreign language requirement. Contact the McBurney Disability Resource Center for details.

GENERAL EDUCATION REQUIREMENTS

The University of Wisconsin–Madison General Education Requirements (GER) (http://guide.wisc.edu/undergraduate/#requirementsforundergraduatestudytext) are courses that provide for breadth across the humanities and arts, social studies, and natural sciences. All students except those who matriculated at a college or university prior to May 20, 1996, must satisfy the university-wide General Education Requirements. The requirements consist of:

Breath (University Breadth)

All students must complete 13–15 credits of course work intended to provide a breadth of experience across the major modes of intellectual inquiry. Breadth course work is intended to give students a broad intellectual perspective on their undergraduate education and their world by encouraging them to look at and understand subjects through the various modes of inquiry used in the natural, physical and social sciences, arts, and humanities.

Students are required to complete the following breadth requirements:

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research and explore, and ultimately understand, the world around us. These many "ways of knowing" are intended to enrich the undergraduate experience and complement intensive study in students' majors. Through these courses, many students discover subjects and ideas that will become lifetime interests, or that offer the creative stimulus to see their favorite subjects from new perspectives. **Note that the College of Letters & Science undergraduate breadth requirements exceed campus General Education requirements. Students who transfer to another UW–Madison school or college before completing the L&S breadth and ethnic studies may need to complete additional General Education requirements.** For more information, about L&S breadth, please refer to College of Letters & Science (http://gened.wisc.edu/ReqAdditional/#LnS).

Communication

Communication, 3 to 5/6 credits

Communication A (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/CommACriteria-2012.pdf). Literacy Proficiency. 2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete course work to fulfill this requirement, students may be exempted from Communication A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year.

Communication B (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/CommB%20Fall%202016%20Criteria.pdf). Enhancing Literacy Proficiency. 2–3 credits of more advanced course work for students who have completed or been exempted from Communication A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

Ethnic Studies

Ethnic Studies, 3 credits

All students must take one course of at least 3 credits which is designated as an Ethnic Studies course. The ethnic studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are encouraged to complete this requirement by the end of their second year. Please note that many ethnic studies courses may also fulfill breadth and other requirements.

Information about criteria and leaning outcomes for ethnic studies courses (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/Criteria_and_Learning_Outcomes_2015.3.15.pdf) can be found on the General Education website (http://gened.wisc.edu/CoursesNew).

Quantitative Reasoning

Quantitative Reasoning, 3 to 6 credits

Quantitative Reasoning A (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/QRCriteria.pdf). Quantitative Reasoning Proficiency. Three (3) credits of mathematics or formal logic. Students may be exempted from Quantitative Reasoning A by approved college work while in high school, AP test scores, or placement testing. Some students, however, may

need to complete a prerequisite before enrolling in a Quantitative Reasoning A course. To ensure timely progress to completion of the undergraduate degree, students should complete this requirement by the end of their first year.

Quantitative Reasoning B (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/QRCriteria.pdf). Enhancing Quantitative Reasoning Proficiency. Three (3) credits of more advanced course work for students who have completed or been exempted from Quantitative Reasoning A. (Students must satisfy Quantitative Reasoning A before they may go on to Quantitative Reasoning B.) Courses that satisfy this requirement are offered in a variety of fields of study. Students are encouraged to select a course in keeping with their interests or other requirements of their intended field(s) of study.

For more information regarding the UW–Madison General Education Requirements, see General Education Requirements (p. 22).

GRADUATION AWARDS

Graduation with Distinction

The award of "Graduation with Distinction" will be noted on the transcript of students who have earned a grade point average that places them within the top 20% of the students graduating that term in their college/school provided 60 or more credits have been earned at UW–Madison. The Office of the Registrar performs a preliminary calculation for students declaring intent to graduate and then makes a temporary posting that is included in the program for commencement. However, the final notation of Graduation with Distinction depends upon last term grades, as calculated by the registrar and relative to the performance of all students in that particular graduating class. For more detailed information, see how do I know if I qualify for graduation with distinction or distinction in the major (https://kb.wisc.edu/ls/page.php?id=22260).

Note: UW–Madison (except for the Law School) **does not** use the Latin honors ***cum laude***, ***magna cum laude***, or **summa cum laude** to indicate level of distinction when conferring academic degrees. Instead, L&S undergraduate students are eligible to receive one of the following distinctions (*Graduation with Distinction*, *Distinction in the Major*, or *Thesis of Distinction*) at the end of their academic career

Distinction in the Major

This award is granted at graduation, upon the recommendation of a department to the dean, to any student ***not*** earning the Honors Degree (i.e., Honors in the Major, Honors in the Liberal Arts, or Comprehensive Honors) who has done superior work in the major and who has passed a comprehensive examination on that work. The comprehensive examination may be omitted for the student with a 3.500 grade point average in the major who successfully completes special work prescribed by the department. The award is noted on the student's transcript.

Thesis of Distinction

This award is granted at graduation, upon recommendation of a department to the dean, to any student ***not*** earning the Honors Degree (i.e., Honors in the Major, Honors in the Liberal Arts, or Comprehensive Honors) who has written an exceptionally good or original thesis, without consideration of the student's record in other work. The chair of the department appoints a committee of at least two members, including the thesis advisor, to read the thesis and make an appropriate recommendation. These theses are retained in the department. The award is noted on the student's transcript.

LETTERS & SCIENCE BREADTH

All L&S undergraduate students are required to fulfill the L&S Breadth of Exploration in the Liberal Arts and Sciences. The L&S Breadth includes:

- Humanities : 12 credits (of which 6 credits **must** be Literature credit)
- Social Science: 12 credits
- Natural Science: 12 credits
  - **Bachelor of Arts** (B.A.) candidates must complete a minimum of **one (1)** 3+ credit Biological Science course **and one (1)** 3+ credit Physical Science course. The additional six (6) credits can be any combination of natural, biological or physical science credits to bring the total to twelve (12) credits.
  - **Bachelor of Science** (B.S.) candidates must complete a minimum of **six (6)** credits of Physical Science **and six (6)** credits of Biological Science.

LIBERAL ARTS AND SCIENCE CREDITS

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree (General Course) at least 108 credits must be in courses designated as Liberal Arts and Science (LAS) courses. These courses are designated in the Guide (http://guide.wisc.edu/courses) as satisfying this particular requirement. Nearly every course taught in L&S is designated in this way.

QUALITY OF WORK REQUIREMENTS

A total of 120 degree credits is required for graduation, with a minimum 2.000 grade point average on all courses taken, whether or not each course is passed.

The quality of work requirements establish a minimum grade point average in four specific areas that **must be met** to receive a Letters & Science degree. In order to satisfy these requirements, the student must earn a minimum 2.000 grade point average on all courses carried at UW–Madison, whether passed or not, in these four areas:

1. All courses in the major (or majors);
2. All upper-level courses in the major, as designated by the major department for the 15-credit residence requirement;

3. All courses designated intermediate or advanced;
4. All courses carried for a grade at UW–Madison (cumulative grade point average, as reported by the Registrar Office). Courses carried on a refresher basis (see Repeat of College Courses Not for Credit) are excluded from the grade point average as determined for categories 1, 2, and 3 above. **Repeating a failed course will not remove the failure from the student's record or from GPA calculations**. This summary of college grade point requirements does not include those for admission to certain majors and special courses within the college or to other colleges and schools within the university, or to honors courses.

RESIDENCE REQUIREMENTS

The UW–Madison Experience

In order to receive an undergraduate degree from the College of Letters & Science, a student must earn a minimum of 30 credits in the senior year (after a student has completed 86 degree credits). This requirement intends to ensure that a student's depth of study—which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research—is a uniquely UW–Madison experience. The credits do not have to be contiguous for the requirement to be met. Because the requirement begins with the 87th credit, students have the flexibility to take 4 credits out of residence in the senior year without needing to obtain special permission. Exceptions to the senior residence requirement may be granted in cases where a student is in good academic standing and has a specific need to take fewer than 30 credits in the senior year. Retroactive credits, AP credits, and credits granted by examination ***are not*** considered *in residence*. Courses that **do not** count as *in residence* include:

- UW–Madison Division of Extension and other transfer credit
- Courses completed at other UW system schools
- Courses taken abroad through another institution
- AP (Advanced Placement) credit
- Credit by examination
- Retroactive credit

There are no exceptions to the requirement that 30 overall degree credits be taken in residence.

Senior Residence

The 30 minimum credits a student must earn in residence should be completed in the senior year (***after a student has completed 86 degree credits***). This requirement intends to ensure that the student's depth of study—which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research—are uniquely *UW–Madison* experiences. These credits do not have to be contiguous for the requirement to be met. Because the requirement begins with the 87th credit, students have the flexibility to take four (4) credits out of residence in the senior year without needing to obtain special permission.

Exceptions to the senior residence requirement may be granted in cases where a student is in good academic standing (http://guide.wisc.edu/undergraduate/letters-science/#policiesandregulationstext) and has a specific need to take fewer than 30 credits in their senior year. Consult an L&S academic dean (https://saa.ls.wisc.edu/offices/academic-deans-services) for more information.

L&S undergraduate students must **also** complete at least 15 credits in upper-level courses in their major(s) **at UW–Madison**. Refer to major requirements for a specific major to get more information about major residence requirements.

TOTAL DEGREE CREDITS

To receive an undergraduate degree, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit) for most baccalaureate degrees granted by the College of Letters & Science. The total credits for the degree includes the University General Education Requirements, L&S Breadth, major requirements, and also elective credits not associated with any specific requirement, that allow students to explore other areas of academic interest. The requirements for some programs may exceed 120 degree credits. Students should consult with their academic/major advisor and DARS for information on specific credit requirements.

MAJOR INFORMATION

ACCEPTANCE INTO A MAJOR

A department, program, or school may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of particular courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school, as outlined in the degrees/majors/certificates (p. 310) section of this Guide. Students should consult the department advisor for information. Only the department can make an exception. Students not accepted in a major or special degree program must select a different major.

COMPLETING AN L&S MAJOR FOR NON-L&S UNDERGRADUATES

Non L&S undergraduate students in other schools/colleges on the UW–Madison campus (e.g., Business, CALS, Education, Engineering, etc.) are eligible to complete a major in L&S **without having to complete L&S degree requirements** if they receive permission from their home school/college.

The process for obtaining special permission to pursue an L&S major varies based on the student's home school/college. Non L&S undergraduate students must contact the appropriate L&S major department/unit about the steps they will need to take in order to declare an additional major and fulfill all of the major requirements within the College of Letters & Science.

COMPLETING A MAJOR OUTSIDE L&S

L&S undergraduate students must complete at least **one** major in the College of Letters & Science. Currently, L&S undergraduates may declare one additional major in the School of Education. The two options for L&S undergraduates in Education are:

- Education Studies
- Theatre and Drama

These are currently the only non-L&S majors that L&S students may declare. These additional majors are available to almost all L&S undergraduates (i.e., BA, BS, AMEP, BA/BS-Journalism, BA/BS-Social Work, and Bachelor of Music) who meet admission requirements for the additional majors. **Please note that an L&S undergraduate student must first declare a major in L&S before being eligible to declare one of the approved non-L&S majors.** A student earning an L&S undergraduate degree ***cannot*** graduate within L&S with only an approved non-L&S major.

The following policies apply to L&S students with an additional non-L&S major.

- At this time, only the two School of Education majors listed above are available for L&S undergraduates to pursue outside the College of Letters & Science. Additional majors in a school/college other than the School of Education or the College of Letters & Science may not be declared.
- **Prior to declaring one of the two approved Education majors, an L&S student must have already declared at least one (1) L&S major.**
- In order to graduate, an L&S undergraduate must complete at least one L&S major in addition to all other L&S degree requirements. A student cannot earn an L&S undergraduate degree if the student cancels his/her L&S major(s) after completing the requirements for the additional non-L&S major.
- L&S will not delay graduating students who have not completed the requirements for majors outside of L&S. Thus, students with these additional Education majors will be graduated at the end of the semester in which they complete their L&S requirements, even if School of Education major requirements have not been completed.
- Any courses required for the non-L&S major that **are not** designated as Liberal Arts and Science (LAS) courses ***will not*** count toward satisfying the requirement that students complete 108 credits in Liberal Arts and Science.
- Students may elect to count these credits among the allowed 12 free elective credits in the degree but should also be mindful of the fact that these courses ***will not*** count toward fulfilling breadth or level within L&S.
- **An exception *will not* be made to count non Liberal Arts and Science courses for breadth and level for courses required to complete a non-L&S major even if the student receives permission to pursue the additional non-L&S major.**
- An L&S student who will be graduated without completing their declared School of Education major should work with their advisor in the School of Education to determine whether options are available to them to finish up their additional major in Education.

Students interested in completing an additional major outside the College of Letters & Science other than the approved majors above must first consult the dean's office for the other school or college (e.g., Student Academic Affairs and Career Development Office (https://sohe.wisc.edu/prospective-students/advising) in SoHE, etc.). If the other school or college approves the additional major, students must consult with an L&S academic dean to see if this is possible or if they will need to transfer to the other school/college to complete their degree. **Students in other schools/colleges on the UW–Madison campus (e.g., CALS, Education, etc.) are eligible to complete a major in L&S without having to complete L&S degree requirements if they receive permission from an academic dean in their home school/college**.

HOW TO DECLARE AND CANCEL A MAJOR

Students **must** declare a major through the department or unit administering that program. (**Please note that all L&S undergraduate students are required to declare at least one major by the time they have 86 degree credits.**) Students should speak with the advisor for the major/certificate/special degree program to determine their eligibility to declare and the process for declaring the major. If a student does not plan on completing the requirements for a declared major, the student must return to that department or unit office to cancel the major. **Currently L&S undergraduate students may have as many majors as they wish, but they must go to the academic department/unit administering the major in order to declare each major or cancel any major they do not plan to complete.** Additional information can be found at declaring a major (https://advising.wisc.edu/content/declaring-major).

MAJOR DECLARATION POLICY

All L&S undergraduate students **are required** to declare a major or be admitted into a program before or upon the completion of 86 degree credits (which includes credits from transfer, AP, test, study abroad, or retroactive credits). **Students who have not declared by the time they have reached 86 degree credits will have an enrollment hold placed on their records preventing them from registering for future terms.** Students who are having difficulty declaring a major should speak with their assigned academic advisor as soon as possible to discuss options available to them.

Major declaration has benefits that are critical to student success. Students with majors:

- Can plan for timely graduation, which uses their resources wisely. Graduating on time lowers the overall cost of education and allows students to pursue their next life goals.
- Connect to the major department, gaining access to departmental advising resources, faculty contacts, and courses limited to majors.
- Connect with other students who are pursuing similar academic interests.
- Get timely and important information about the major (advising hours and workshops, upcoming courses, social events, student groups, speakers, opportunities, etc.).

- "Lock in" major requirements, so if those requirements change, students are held to the rules in place whey they declared.

Declaring a major is an essential part of a student's academic career, and is integral to timely graduation; the great majority of students *do* declare their majors by the time they earn 86 credits. This policy is intended to help undeclared students reach out to advisors so they find majors that suit their talents and interests. This policy is also intended to make the best use of both student and university resources, and to help students and their advisors create a plan for academic success and timely graduation.

RESIDENCE REQUIREMENT IN THE MAJOR

All students, especially those students who participate in UW–Madison sponsored Study Abroad programs, must complete a minimum of 15 credits, at any level, in their major or major department, in courses taken on the UW–Madison campus. These credits **may not include** retroactive credit (retrocredits) or credit earned by department examination.

UPPER-LEVEL WORK IN THE MAJOR

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major department or program. (Please see the section on Residence Requirements (https://saa.ls.wisc.edu/policies-forms/residence-requirement-30-credit-rule) for additional information about credits taken "in residence.") Furthermore, students must earn a minimum 2.000 grade point average on all upper-level work taken in the major, in residence.

REQUIREMENTS

Students pursuing an undergraduate degree in Letters & Science must complete the University General Education Requirements (GER) (p. 22) and the following L&S requirements:

Code	Title	Credits
Foreign Language		
Mathematics		
Breadth		
Depth		
Major Study		
Requirements that apply to all majors		
Acceptance as a major		
Mastery of intermediate/advanced work		
Residence requirement in the major		
Residence requirements		
Quality of work requirements		

FOREIGN LANGUAGE

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the L&S Disabilities Curricular Accommodations Committee (DCAC) for review.

B.A. Degree

For the **B.A. degree,** the foreign language requirement may be met in one of two ways: (1) completion of the fourth unit (level) in one language, or (2) completion of the third unit (level) in one language **and** completion of the second unit (level) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **OR**
- completed the 4th unit of a college language course (e.g., AFRICAN 334, GERMAN 204, SLAVIC 208, etc.), **OR**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd unit/semester of a second foreign language (e.g., GERMAN 213, ITALIAN 203, etc.) at the college level, **OR**
- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd unit/semester of a second foreign language (e.g., ASIALANG 106, GERMAN 102, SLAVIC 112, etc.) at the college level

B.S. Degree

For the **B.S. degree,** the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd unit/semester of one college-level language (e.g., AFRICAN 333, FRENCH 203, SPANISH 203, etc.)

Foreign Language Substitution

The Foreign Language Substitution package (FLSP) is for degree-seeking candidates in the College of Letters & Science (L&S) only who are seeking to fulfill the L&S foreign language requirement and also have a documented disability in foreign language acquisition.

What is a Foreign Language Substitution?

The Foreign Language Substitution Package is designed to fulfill the College of Letters & Science faculty's intention in requiring foreign language as a part of the college curriculum. Specifically, the Foreign Language Substitution Package, like the foreign language requirement, provides students with information about language in general as well as the literature and culture of the people using a particular language. Courses used to meet the substitution must be approved by the designated academic dean in L&S Undergraduate Academic Deans' Services (110 Ingraham Hall (https://saa.ls.wisc.edu/offices/academic-deans-services)). Classes used for the substitution package ***cannot*** be used to fulfill any of the following requirements:

- Major requirements
- Breadth (humanities, literature, social science, science)
- Ethnic studies
- General Education Requirements (Comm A, Comm B, QR-A, QR-B)

How do I qualify for a Foreign Language Substitution?

The Disabilities Curricular Accommodations Committee (DCAC) of the College of Letters & Science can approve a substitution to the foreign language requirement for students in Letters & Science only with certain disabilities that make a course substitution appropriate. Extensive and very specific documentation is required from students and disability specialists. Further information may be obtained from the L&S Undergraduate Academic Deans' Services (http://saa.ls.wisc.edu/foreign-language-substitution-package.htm) (Room 110, Ingraham Hall, at 1155 Observatory Drive; 608-262-0617) or the McBurney Disability Resource Center (https://mcburney.wisc.edu)(702 West Johnson Street; 608-263-2741).

Note that an appointment at the McBurney Center is required before submitting the application. This appointment should be made no less than one semester/term prior to applying for the substitution package. McBurney Center staff will help you determine what documentation is necessary for the application, as well as assess whether additional testing is required.

After meeting with a McBurney Center staff member, a student should fill out and complete an application for the substitution package. The deadline to submit a completed copy is at the end of the fourth week of the fall and spring terms. Applications are not accepted during the summer term. All students who submitted a completed application by the deadline should hear back from the Disabilities Curricular Accommodations Committee (DCAC) regarding the status of their application within six to eight weeks after the deadline.

Please make sure you submit your original completed application and also four (4) additional copies of your completed application to Suite 110 Ingraham Hall at 1155 Observatory Drive before 4:00 p.m. on Friday of the deadline. (The deadline to submit a completed application for consideration is the end of the 4th week of the fall and spring terms.) A completed application must include five (5) copies of each of the five items below:

1. High school transcript and transcripts from other post-secondary institutions you may have attended prior to UW–Madison (you will need to contact original high school or other institution of higher learning for these records if you do not have copies)
2. UW–Madison transcript
3. Copy of your most recent DARS (Please go to your My UW and access the Student Center to request a DARS.)
4. Student application form (see p. 7 of Foreign Language Substitution Package application located at Foreign Language Substitution Package (http://saa.ls.wisc.edu/foreign-language-substitution-package.htm))
5. Copy of McBurney Faculty Notification Letter (or confirmation letter of accommodations received) if student has one
6. Other relevant and current disability documentation assembled in consultation with McBurney Center staff

What are the requirements for a Foreign Language Substitution?

1. General Language: If approved for an L&S foreign language substitution package, both **B.A.** and **B.S.** degree candidates must complete one (1) course having to do with language in general (selected from an approved list of classes). If a student's official UW–Madison records has at least one unit (year) of a high school foreign language, this requirement is fulfilled. If a student has not taken a foreign language in high school, please select **one (1)** course from either a, b, or c listed below:

a. LINGUIS 101 (Linguistics)
b. CS&D 240 (Communication Sciences & Disorders)
c. ENGL 201, ENGL 207, ENGL 304, ENGL 307, ENGL 400, ENGL 407, ENGL 408, ENGL 409 (English)

2. Cultural Context:

B.A. students must complete the following:

Three (3) courses related to a country, region, or a group of countries sharing a common language in the following areas:
a. Literature
b. History or Culture
c. General elective

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.A. degree. Students must then also take a Literature course and General elective in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a, b, and c above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (http://saa.ls.wisc.edu/deans-services.htm)**.**

  B.S. students must complete the following: **Two (2)** courses related to a country, region, or a group of countries sharing a common language in the following areas:
  a. Literature
  b. History or Culture

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.S. degree. Students pursuing a B.S. must also take a Literature course in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a and b above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (http://saa.ls.wisc.edu/deans-services.htm)**.**

What are my responsibilities as a student to complete the Foreign Language Substitution?

Students must submit five (5) copies of all required materials to the Disabilities Curricular Accommodations Committee in L&S Academic Deans' Services (Suite 110 Ingraham Hall, 1155 Observatory Drive, 608-262-0617) by the end of the fourth (4th) week of the semester (fall or spring semester) in which they would like to present their case for review. ***Applications are not accepted or reviewed during the summer.***

Completed applications will be reviewed approximately six (6) weeks after the official deadline. Students will then be notified shortly after the Disabilities Curricular Accommodations Committee meets regarding the results. Students who are approved for a foreign language substitution package must make an appointment to speak with an academic dean in L&S Undergraduate Academic Deans' Services (110 Ingraham Hall; 608-262-0617) to talk about the next steps they will need to take in order to complete their substitution package. **Students will not be able to complete their approved foreign language substitution package until they have met with an academic dean to select the appropriate courses they need to fulfill this requirement.**

Students who have not been previously diagnosed as learning-disabled or hearing-impaired should plan three to four months to schedule required testing and to receive results and interpretation of the testing. Contact the McBurney Disability Resource Center (http://www.mcburney.wisc.edu) for current information about the tests required. Results of the specified tests taken within the previous four years are acceptable; retesting is required if test results are not at least this current.

For persons with a hearing loss, certain criteria must be met to apply for a substitution to the foreign language requirement. Contact the McBurney Disability Resource Center for details.

MATHEMATICS

Mathematics is a principal tool of knowledge. Algebra and geometry provide the minimum of mathematics skills that an educated person needs in today's world, and competence in these areas is required for admission to the university. Since mathematics underlies quantitative work in all sciences, and the level of mathematical background required has been steadily increasing in most areas of science, the L&S math requirements should be viewed as minimums. **Please note that some majors require additional work in mathematics.**

New freshmen (first-year students) and transfer students who do not meet satisfactory minimal competencies in mathematics upon admission or whose mathematics placement test scores place them in MATH 96 must begin to take remedial course work in mathematics during their first or second semester and continue each semester thereafter, if necessary, until they have satisfactorily completed the mathematics proficiency requirement. Students who do not accomplish this will need to obtain permission to continue in the College of Letters & Science.

Both **B.A. and B.S. degrees** require that students satisfy *minimum math competency* by having completed the three units of math required for admission. A unit is one year of high school work or one semester of college work. This will ordinarily include one unit each of high school algebra, geometry, and an additional unit of mathematics. ***High school courses in general mathematics or business mathematics will not satisfy the minimum math competency.***

B.A. Degree

For the **B.A. degree**, no additional math is required beyond completion of the university's General Education Quantitative Reasoning A and B requirements. ***However, certain L&S majors may require students to do additional math coursework even though students are pursuing a B.A. degree***.

B.S. Degree

The **B.S. degree** requires an additional two courses at the intermediate level in mathematics, computer sciences, or statistics. If this work is taken on the college level, it **must** be at least a 3-credit course ***and*** must be taken in the departments of Mathematics (http://guide.wisc.edu/courses/math), Computer Sciences (http://guide.wisc.edu/courses/comp_sci), or Statistics (http://guide.wisc.edu/courses/stat) only. Courses in sociometrics (e.g., SOC/C&E SOC 360, SOC/C&E SOC 361, etc.), econometrics (e.g., ECON 310), psychometrics (PSYCH 210), etc. **do not** count toward the B.S. degree mathematics requirement. **Only one (1) course in Computer Science (COMP SCI) *and* only one (1) course in**

Statistics (STAT) may be counted toward the BS mathematics requirement.

BREADTH

Ways of Knowing

At the heart of any degree in the liberal arts and sciences is an active understanding of the variety and breadth of the many scholarly approaches to knowing the world. Every student in the College of Letters & Science experiences significant exposure to three principal fields of knowledge: the arts and humanities, the social sciences, and the natural sciences. These broad fields of knowledge are not the same as the areas of depth that we call "majors." In fact, any particular major—or even a particular course within a major—might well involve more than one of these fields of knowledge. (For example, imagine a seminar on "people and the environment" that combines historical background, research on social patterns of energy use, and scientific understandings of climate.) Working together, each of these three fields of knowledge represents a particular "way of knowing" about the world around us.

Arts and Humanities

Courses in the **arts and humanities** involve knowing the world through the production and analysis of artistic, literary, and scholarly work. Some courses examine the fine and performing arts, or literature, presenting students with opportunities to interpret and think critically about these creative expressions of the human condition. Other courses help students to understand and compare religious and philosophical conceptions of humankind. Still other courses take on historical subjects, focusing on moments of change and periods of continuity for the peoples and regions of the world. These courses all encourage students to analyze the range of creative and cultural artifacts, expressions, and ideas of human existence—history, literature, art, culture, folklore—and to use that information to better understand humanity and to cultivate civic and social responsibility.

Social Sciences

Courses in the **social sciences** involve knowing the world through the systematic study of human society, interactions, and institutions. The social sciences explore these issues from a wide range of perspectives and research techniques, both quantitative and qualitative. Through these courses students learn how to formulate research questions and determine what techniques are best used to answer those questions—for example, exploring ideas and developing theories, conducting surveys and building models, or observing and participating in social life itself. Developing such analytical skills assists students as they approach complex problems and seek to solve them in both the workplace and the community.

Natural Sciences

Courses in the **natural sciences** involve knowing the world through scientific inquiry—assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. The natural sciences are often divided into the **physical sciences** (dealing with matter and energy, or the study of the earth, atmosphere, and oceans) and the **biological sciences** (dealing with life and living systems, like plants, animals, and environments). These courses often contain laboratory components that allow students to gain firsthand experience in scientific research methods. By completing this requirement, science and non-science majors alike will gain an appreciation for science as a way of systematically looking at the natural world, understanding how this process can be used to inform decision-making in a wide range of political, economic, and social contexts.

Together, these broad "ways of knowing" give students a complementary set of tools for seeing, imagining, and asking questions about the world—tools that enhance creative problem solving no matter what the field. And, because twenty-first-century knowledge is not neatly compartmentalized, it is worth noting that these areas of study intersect and overlap; courses in some areas draw upon strategies used in the others. Experiences in "breadth" courses can be life-changing: we frequently hear that a course taken to fulfill a breadth requirement introduced someone to a subject that became a new major, a new way of looking at a current major, or a lifelong interest. For more information, visit the KnowledgeBase help document (https://kb.wisc.edu/ls/page.php?id=27031).

A liberal education involves not only the nature and kinds of knowledge but also the purpose for which knowledge should be used. These considerations are embodied in the breadth or distribution requirement and call for knowledge in several fields of learning. The purpose of this breadth requirement is to ensure that a degree candidate will obtain an understanding of approaches in the humanities, social sciences, biological sciences, and physical sciences adequate for use both as a citizen and as a specialist.

Breadth Requirements

The L&S breadth requirement is met with 36 credits in the three broad areas of knowledge: humanities, social sciences, and natural sciences. (This may include courses beyond the elementary level in mathematics, computer sciences, and statistics.) Please note that if a course can satisfy more than one breadth designation (such as a "Z" course, which can meet EITHER Humanities OR Social Science), students may select the course designation in which they want the course to count for the purpose of fulfilling a particular breadth requirement. However, this course may be counted only once and in only one area. **Credits cannot be split between two distinct breadth areas**.

Courses that carry L&S breadth credit are expected to broaden significantly a student's understanding of the world and a general disciplinary approach to problems studied, questions asked, modes of inquiry undertaken to answer those questions, analysis of research findings, communication about results, and implications for further study and/or action. Many courses in L&S carry a breadth designation; however, some types of courses may not convey breadth.

B.A. Degree

Humanities: Students are required to complete ***12 credits*** in the humanities, 6 of which ***must*** be in literature. Look in the courses (http://guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

Social Sciences: Students are required to complete ***12 credits*** in social sciences. Look in the courses (http://guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

Natural Sciences: Students are required to complete ***12 credits*** in natural sciences. Students ***must*** take at least one ***3+ credit*** course in **physical science AND** one ***3+ credit*** course in **biological science**. The additional six (6) credits can be any

combination of natural, biological or physical science credits to bring the total to **twelve (12)** credits. Look in the courses (http://guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

B.S. Degree

Humanities: Students are required to complete ***12 credits*** in the humanities, 6 of which ***must*** be in literature. Look in the courses (http://guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

Social Sciences: Students are required to complete ***12 credits*** in social sciences. Look in the courses (http://guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

Natural Sciences: Students are required to complete ***12 credits*** in natural sciences. Students must complete ***6 credits*** in **physical science** AND ***6 credits*** in **biological science**. Look in the courses (http://guide.wisc.edu/courses) section of the Guide under Course Designation for course qualifications.

DEPTH: UNDERSTANDING A FIELD OF STUDY (MAJOR)

The process of declaring and completing a major—often, but not always, attached to a particular university department—provides students with an opportunity to concentrate on an in-depth investigation of at least one subject or issue, putting their tools for learning and ways of knowing to focused use. This intensive understanding of one topic helps students to appreciate the potential depth of the others. A student's work in the major reflects a continuing progression of skills, knowledge, and values, where advanced learning opportunities in upper-level coursework grow from and expand upon earlier experiences, helping students build additional depth in writing, speaking, information literacy, and critical thinking skills from the perspective of a particular discipline. In senior capstone or independent research projects, students are frequently asked to synthesize what they have learned and apply it in a variety of new situations. By the conclusion of their studies, students in the major are better able to understand themselves and their society, to develop their intellectual powers outside of a University setting, and to make productive contributions to the world around them. (See list of L&S majors (p. 310).)

MAJOR STUDY

Every candidate for an L&S baccalaureate degree **must** satisfy a depth requirement encompassing a specified and approved major field of study. Students may elect a department major, a major in a recognized interdisciplinary program, or may develop an individual major if approved by a faculty review committee. Students in Letters & Science may not complete the depth requirement with any department or program outside the college, except for the departments of Biochemistry, Environmental Sciences, and Microbiology. These departments are the only exceptions.

All L&S undergraduate students are required to declare a major by the time they have earned 86 degree credits. Students who do not declare a major by the appropriate time will have an enrollment hold placed on their records so they cannot enroll in future terms.

[1] All L&S undergraduate students are required to declare a major or be admitted into an L&S special degree program upon the completion of 86 credits (including credits from transfer, AP, test, study abroad, or retroactive credits).

Students have three choices in meeting the depth requirement in the College of Letters & Science:

1. Single Major
2. Multiple Majors
3. Individual Major

Single Major

Students may fulfill the requirements of a single major as outlined in the descriptions of the various L&S majors (p. 310).

Multiple Majors

All students may satisfy the requirements for more than one major, either department and/or interdisciplinary major, and have this fact noted on the transcript and other university records.

Students may complete one or more established majors and one individual major if approved by a faculty review committee. **No student may earn more than one individual major**. Students completing two or more majors may count courses crosslisted in each major department in partial satisfaction of the requirements for each major.

Individual Major (p. 1103)

REQUIREMENTS THAT APPLY TO ALL MAJORS

Major Declaration Policy

Policy

All L&S undergraduate students are required to declare a major or be admitted into a program before or upon the completion of 86 credits (including transfer credits, AP, test credits, study abroad, or retroactive credits). Any student pursuing undergraduate studies in Letters & Science ***must*** declare at least **one** (1) major in L&S in order to graduate.

Major declaration has benefits that are critical to student success. Students with majors:

- Can plan for timely graduation, which uses their resources wisely. Graduating on time lowers the overall cost of education and allows students to pursue their next life goals.
- Connect to the major department, gaining access to departmental advising resources, faculty contacts, and courses limited to majors.
- Connect with other students who are pursuing similar academic interests.
- Get timely and important information about the major (advising hours and workshops, upcoming courses, social events, student groups, speakers, opportunities, etc.).
- "Lock in" major requirements, so if those requirements change, students are held to the rules in place whey they declared.

Declaring a major is an essential part of a student's academic career, and is integral to timely graduation; the great majority of students *do* declare their majors by the time they earn 86 credits. This policy is intended to help undeclared students reach out to advisors so they find majors that suit their talents and interests. This policy is also intended to make the best use of both student

and university resources, and to help students and their advisors create a plan for academic success and timely graduation.

How to Declare and Cancel a Major

Students must declare a major through the department administering that program. Students should request a Major/Certificate Declaration form from the academic department/unit administering the major. This form should be completed by the student and left at the department office administering the major. If a student decides to change his/her major later, the student should return to that department office and cancel his/her major. **Students may have as many majors as they wish, but they must complete the Major/Certificate Declaration form for each major and cancel any major they feel they cannot complete.**

Mastery of Upper-Level Work in the Major

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major department or program. (Please see the section on Residence Requirements below for additional information about credits taken "in residence.") Furthermore, students must earn a minimum 2.000 grade point average on all upper-level work taken in the major, in residence.

Residence Requirement in the Major (also known as the "Study Abroad Stipulation")

All students, especially those students who participate in UW–Madison sponsored Study Abroad programs, must complete a minimum of 15 credits, at any level, in their major or major department, in courses taken on the UW–Madison campus. These credits may not include retroactive credit or credit earned by department examination.

Advising

Questions about choosing a major can be discussed with department advisors and faculty, academic deans, members of L&S Undergraduate Academic Services and the L&S Honors Program office, and with the Cross-College Advising Service staff. For additional information about advising, see the description of L&S advising programs (p. 351).

Completing a Major Outside L&S

L&S students must complete at least one major in the College of Letters & Science to satisfy the depth requirement. Students interested in completing an additional major outside the College of Letters & Science must first consult the dean's office for the other school or college. If the other school or college approves the additional major, students must consult with an L&S academic dean to get permission to pursue a second major outside L&S.

Total Degree Credits: 120

A minimum of 120 degree credits is required for most baccalaureate degrees granted by the College of Letters & Science. The total credits for the degree encompass the requirements detailed above, but also include elective credits not associated with any specific requirement, that allow students to explore other areas of academic interest. The total credit requirement for some special programs is more than 120 degree credits. The college allows degree credit, as well as placement credit, for the mastery of some L&S course work as demonstrated by successfully completing appropriate tests. (See Credit by Departmental Examination (p. 9)).

Liberal Arts and Science Credits: 108

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree (General Course) at least 108 credits must be in courses designated as Liberal Arts and Science (LAS) courses. These courses appear in the Guide as L&S credit and can be identified by looking at the ***course designation*** section for a course in the Guide (http://guide.wisc.edu/courses). Nearly every course taught in L&S is designated in this way.

Non–L&S Courses and L&S Degree Credit

Liberal Arts and Science ("C") Courses. The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences* (LAS) courses. These courses appear in the Guide as L&S credit and can be identified by looking at the ***course designation*** section for a course in the Guide (http://guide.wisc.edu/courses). Courses designated as liberal arts and science courses count toward the L&S degree requirements, including requirements related to breadth and level.

Non–L&S Courses Crosslisted with L&S Departments. A course offered in the College of Letters & Science that counts as L&S credit and which is crosslisted with a department in another school or college is considered a Liberal Arts and Science course. These courses appear in the Guide as L&S credit and can be identified by looking at the ***course designation*** section for a course in the Guide (http://guide.wisc.edu/courses). As L&S credits, they may be counted as part of the major and count as part of the 108 Liberal Arts and Science credits required for an L&S degree.

Non-L&S Courses Required for L&S Majors. Courses taught in departments located in schools or colleges other than L&S, but which are required for completion of an L&S major, are considered Liberal Arts and Science courses. Such courses will *either* carry the L&S credit designation in the Guide (http://guide.wisc.edu/courses), or their Liberal Arts and Sciences status will appear in the DARS degree audit. In both cases, these courses count as part of the 108 L&S credits required for a degree.

Free Electives in the Degree. If a student so chooses, he or she may count for degree credit up to twelve (12) credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (http://guide.wisc.edu/courses), and are not designated as courses in the Liberal Arts and Sciences, or L&S credit courses.

Credit earned in these courses apply to the degree requirements in the following ways:

- Courses taken as free electives in the degree may be carried and will appear on the transcript showing credits, grade, and grade points.

- These credits will count as part of the semester load and will count toward satisfaction of the minimum progress requirements.
- These credits and grade points will be included in calculating a student's semester and cumulative grade point average.
- Free electives in the degree cannot be used to satisfy the L&S requirement that students complete a substantial portion of their degree credits in intermediate and advanced work (see the section Mastery of Intermediate/Advanced Work below).
- Courses that are taught in L&S departments but not designated as Liberal Arts and Science courses (e.g., Music and Music Performance courses numbered 099 and below) may be counted for credit as free electives in the degree. (For B.A./B.S. Music majors, Music and Music Performance courses numbered 099 and below that are not required for the major may be counted as free electives.) Students with questions regarding a particular course offered by a school or college outside L&S as it relates to the requirement to complete 108 Liberal Arts and Science credits should consult an academic dean before registration.

ACCEPTANCE AS A MAJOR

A department, program, or school may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of particular courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school as outlined under the L&S majors (p. 310) section of the Guide. Students should consult the department advisor or the school or college dean's office for information. Only the department or school can make an exception. Students not accepted in a major or school must select a different major.

MASTERY OF INTERMEDIATE/ADVANCED WORK

All L&S courses and those taught outside L&S and approved for L&S degree credit are designated by departments as elementary, intermediate, or advanced. A minimum of 60 credits must be earned in courses designated by the departments as intermediate or advanced, with a grade point average of 2.000 on all courses carried whether passed or not. The purpose of this requirement is to encourage students to undertake advanced work to the greatest possible extent and to insure that they will achieve greater sophistication and a deeper mastery of subject matter as they advance through the baccalaureate curriculum. **Credits earned in courses taken as free electives in the degree cannot be used to meet this requirement.**

RESIDENCE REQUIREMENT IN THE MAJOR

All L&S undergraduate students must complete 15 degree credits of upper-level work in their major in residence. Credits are considered **in residence** if earned in a UW–Madison degree credit course, including those taken on a UW–Madison study abroad program. Transfer credit, courses completed at other UW System schools, UW Extension courses, or courses taken abroad through a nonresidence program are not considered in residence. Upper-level courses are classes determined by the major program/department to be in-depth within the context of that particular major.

RESIDENCE REQUIREMENTS

The UW–Madison Experience. In order to receive an undergraduate degree from the College of Letters & Science, all L&S students must earn a minimum of 30 degree credits in residence at the University of Wisconsin-Madison. Credits are considered *in residence* if they are earned for UW-Madison course work, including courses taken on a UW-Madison-administered study abroad program. Retroactive credits, AP credits, and credits granted by examination ***are not*** considered *in residence*. Courses that **do not** count as *in residence* include:

- UW–Extension and other transfer credit
- Courses completed at other UW system schools
- Courses taken abroad through another institution
- AP (Advanced Placement) credit
- Credit by examination
- Retroactive credit

There are no exceptions to the requirement that 30 overall degree credits be taken in residence.

Senior Residence Rule. The 30 minimum credits a student must earn in residence should be completed in the senior year (***after a student has completed 86 degree credits***). This requirement intends to ensure that the student's depth of study -- which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research -- are uniquely *UW-Madison* experiences. These credits do not have to be contiguous for the requirement to be met. Because the requirement begins with the 87th credits, students have the flexibility to take four (4) credits out of residence in the senior year without needing to obtain special permission. Exceptions to the senior residence requirement may be granted in cases where a student is in good academic standing (http://guide.wisc.edu/undergraduate/letters-science/#policiesandregulationstext) and has a specific need to take fewer than 30 credits in their senior year. Consult an L&S academic dean (https://saa.ls.wisc.edu/offices/academic-deans-services) for more information.

L&S undergraduate students must **also** complete at least 15 credits in upper-level courses in their major(s) **at UW–Madison**. Refer to major requirements for a specific major to get more information about major residence requirements.

QUALITY OF WORK REQUIREMENTS

A total of 120 degree credits is required for graduation, with a **minimum** 2.000 grade point average on all courses taken, whether or not each course is passed.

The quality of work requirements establish a minimum grade point average in four specific areas that **must be met** to receive a Letters & Science degree. In order to satisfy these requirements, the student must earn a minimum 2.000 grade point average on all courses carried at UW–Madison, whether passed or not, in these four areas:

1. All courses in the major (or majors);
2. All upper-level courses in the major, as designated by the major department for the 15-credit residence requirement;
3. All courses designated intermediate (I) or advanced (A);
4. All courses carried for a grade at UW–Madison (cumulative grade point average, as reported by the registrar). Courses carried on a refresher basis (see Is it possible to retake a course that I have already passed or received degree credit (https://kb.wisc.edu/ls/page.php?id=21934)) are excluded from the grade point average as determined for categories 1, 2, and 3 above. Repeating a failed course **will not** remove the failure from the student's record or from GPA calculations. This summary of college grade point requirements does not include those for admission to certain majors and special courses within the college or to other colleges and schools within the university, or to honors courses.

FOUNDATIONS: TOOLS FOR LEARNING

For all UW–Madison undergraduates, these learning experiences begin with students satisfying the university's General Education Requirements—usually by taking courses taught within the College of Letters & Science. These common foundations cover key topics which are necessary for any undergraduate major and any prospective career: oral and written communication; mathematical and logical reasoning; and the diversity of cultures within global society.

In addition to these university-wide requirements, all L&S students must attain knowledge of a foreign language, in work that combines training in both communication and culture, so students may better understand and participate in the global community of the twenty-first century. Together, these "tools for learning" may be acquired through many different courses taught by many different departments. The key is that they are never taught in isolation, but always considered together with broad exposure to various "ways of knowing" from the arts and humanities, the natural sciences, and the social sciences. (For more on the General Education Requirements, see Requirements for Undergraduate Study (p. 22); (http://www.ls.wisc.edu/gened) for more on the L&S requirements, see Letters & Science Degrees (p. 344).)

LETTERS & SCIENCE DEGREES

The College of Letters & Science offers two basic degrees for students in the General Course and five other degrees for students in special programs. Students in the General Course, regardless of major, may earn either a Bachelor of Arts or a Bachelor of Science degree. The special degrees are: Bachelor of Science–Applied Mathematics, Engineering, and Physics (AMEP); Bachelor of Arts–Journalism or Bachelor of Science–Journalism; Bachelor of Landscape Architecture; Bachelor of Music; and Bachelor of Social Work. (For details, see sections for AMEP (p. 1119), Journalism (p. 1285), Landscape Architecture (p. 1250), Music (p. 1146), and Social Work (p. 1296) in the L&S section of this Guide.) ***Students who have multiple majors in L&S earn only one undergraduate degree.***

Honors degrees may be earned in all of the above (except for Landscape Architecture) upon completion of the L&S Honors Program. See L&S Honors Program (p. 354) for more information. Majors completed in the General Course and for the Bachelor of Music degree will be posted on the transcript.

RESOURCES

ADVISING IN LETTERS & SCIENCE

Academic advising is an essential component of undergraduate education, and the college's commitment to providing quality advising for undergraduates is reflected in the many advising programs it offers. Students who have not yet declared a major are assigned an advisor in L&S Academic Advising Services Services or the Cross-College Advising Service (see below). Students who have declared a major are assigned an advisor in their department or program.

All of the advising programs share the goal of assisting students in making responsible, informed decisions as they develop educational plans compatible with their potential, their interests, and their career and life ambitions. Advisors provide much more than information about course selection and academic programs; they encourage students to ask questions about the nature and direction of their learning, and they work with students to find meaningful answers to those questions. Advising involves a process in which students learn to think critically about the variety of options available to them and develop decision-making skills that will enable them to choose wisely. As adults, students themselves, however, must assume primary responsibility for choosing their academic program and making progress toward their degree.

ACADEMIC ADVISING SERVICES (AAS)

Letters & Science Academic Advising Services provides advising to pre-declared Letters & Science (L&S) undergraduate students who intend to complete a specific L&S degree and major.

We assist and support students in exploring their educational goals, learning about academic requirements, navigating the university structure, and progressing toward degree completion.

Contact Information

Academic Advising Services (http://advising.ls.wisc.edu)

CROSS-COLLEGE ADVISING SERVICES (CCAS)

Advisors at the Cross-College Advising Service (CCAS) provide personalized advising to help you develop a plan for choosing your major and exploring careers. We are here to help you make decisions about what to major in and also answer your general questions about academics and life on campus.

We'll meet you at SOAR, and after that help you plan your future courses, talk about your academic interests and options, and refer you to other helpful campus resources. We're also here to encourage you when things are going well, as well as support you when times are difficult.

CENTER FOR ACADEMIC EXCELLENCE (CAE)

The College of Letters & Science Center for Academic Excellence (CAE) provides an enriching, inclusive community and academic support for L&S students who have been historically underrepresented in higher education, including first-generation and low-income students , and students of color. CAE offers a variety of engagement opportunities, including high-touch advising, tutoring programs, health and wellness events, social events, graduate school preparation, and connections with High Impact Practices. CAE also assists in campus-wide efforts to fully integrate diverse voices into the university community to facilitate a welcoming, responsive, and validating campus climate for our students.

HONORS

The L&S Honors Program (p. 354) attracts some of UW–Madison's most talented undergraduates who challenge and learn from each other while working closely with faculty members. By bringing students and professors closer together in small classes and individual research settings, the Honors Program fosters a feeling of community even as students push themselves to explore the very frontiers of knowledge. In addition to traditional course work, most Honors students pursue research projects of their own, and many find this experience so exciting that they go on to earn advanced degrees in the nation's best graduate and professional schools.

MAJOR ADVISING

Students who are eligible to declare their major should do so as soon as possible. All L&S undergraduate students are expected to declare their major(s) by the time they have earned 86 degree credits. All declared students will be advised by the advisor connect with their particular major/program. For more information about advising in the major, refer to the advising and careers tab for each major/special degree program under the L&S Degrees/Majors/Certificates (p. 310) section of the Guide.

OTHER ACADEMIC RESOURCES

L&S UNDERGRADUATE ACADEMIC DEANS' SERVICES

Academic deans provide up-to-date information on college policies, procedures, and deadlines; campus resources; and degree requirements. Academic deans also offer limited academic advising and make decisions regarding exceptions to college policy. They work closely with advising staff in L&S Academic Advising Services, department advisors, and other student service personnel on the UW–Madison campus. In an institution as diverse as the University of Wisconsin–Madison, students have a wide range of values, interests, and skills. Moreover, as they progress through an academic program, their questions and concerns often change. Therefore, students are encouraged to seek the help of several different types of academic advisors during their years on campus. The university provides a system of staff and faculty advisors to address these ongoing and changing concerns.

ADVISING IN THE MAJOR

Juniors, seniors, and any other students who are preparing for, or have declared, a major or are contemplating a major in the College of Letters and Science, are encouraged to meet with an advisor in that major department. Each department has a faculty or staff member who serves as a department advisor. This person knows about prerequisites to courses, program planning for students majoring in the department, major requirements, and in some cases, general career information related to the field. A department advisor can help students make satisfactory progress toward completing requirements in the major, and can suggest courses that address students' interests and help them achieve their goals.

Juniors and seniors are encouraged to seek advice from these department advisors as soon as possible. **Please note that the assignment of a departmental advisor and declaring a major in a particular department(s) are not automatic. Students must go to the department office to declare their major and to be assigned a departmental advisor for the major.** Students are also advised to meet with departmental advisors early in their academic career since some majors require students to fulfill prerequisite classes and earn a minimum GPA in the designated coursework before they are eligible to declare the specific major. It is very important that students contact the major department(s) as early as possible so they aware of any prerequisites.

Transfer students often come to the campus knowing their intended major. These students may go directly to the department advisors for any help they need in pursuing/declaring the major.

Students classified in any of the special degree programs (Applied Mathematics, Engineering and Physics, Journalism, Landscape Architecture, Music, Social Work) may refer to the specific special degree under Degree/Majors/Certificate (p. 310) tab within this Guide for names of professors associated with the various programs, then consult with the appropriate advisor.

Students pursuing Honors in the Major (HM) are encouraged to work closely with the honors coordinator in their major department regarding course and research opportunities within the department or field of interest. Special departmental advisors are available to help any students, primarily sophomores, juniors, and seniors, who have decided on their major. These advisors are located in department offices throughout

the campus. Office hours vary among departments. Consult a staff telephone directory for a list of department offices and locations, or see the department descriptions in this catalog.

INTERNATIONAL INTERNSHIP PROGRAM (IIP)

The International Internship Program (IIP) (http://internships.international.wisc.edu) at UW–Madison is a resource for undergraduate students from all disciplines seeking to gain hands-on international experience. IIP's mission is to identify, cultivate and promote high quality internships that advance the professional training of UW–Madison undergraduate students; foster global competency; and reinforce academic learning through practical application.

IIP cultivates internship opportunities around the world specifically for Badgers. IIP also identifies and promotes existing international internship and research opportunities offered by other campus offices or international organizations. Both types of opportunities can be found via the IIP database and other search resources are also listed on the website. IIP offers advising for any undergraduates who are exploring internships abroad whether they are just getting started, applying to an IIP-cultivated position, or finding their own. IIP can help with questions related to the many questions that come up with international internships including visas, agreements, academic credit, and scholarships.

The Worldwide Internship Program (WIP) (https://internships.international.wisc.edu/students/wip), a partnership with International Academic Programs (IAP), is a program for students interning outside their home countries to earn academic credit through an online course via which they engage with other UW–Madison students interning around the world. WIP offers students interning abroad structure through academic reflection, insurance and emergency support and may help with eligibility for visas or scholarships. IIP works with students doing internships for credit or not and offers advising, pre-departure and re-entry programming for any student interning abroad. For information about scholarships and other funding, see IIP's need-based WIP grants (https://wisc.academicworks.com/?orgId=710&schollId=6121) and IIP Funding (https://internships.international.wisc.edu/students/funding).

An international internship is often located outside the United States, but IIP also promotes internship opportunities to apply international skills and interests domestically. There are many variables in international internships (compensation, duration, location, fees, credit and more) that IIP can help navigate.

For more information on interning abroad visit International Internship Program(IIP) (http://internships.international.wisc.edu) or call or e-mail (internships@international.wisc.edu) to discuss how IIP can support departments or students.

PRE-PROFESSIONAL STUDY

General information can be found at Pre-Law (https://prelaw.wisc.edu) and Pre-Health (https://prehealth.wisc.edu).

SCHOLARSHIPS

The College of Letters & Science welcomes incoming and continuing students to apply for scholarship opportunities created by the support of our donor friends. The undergraduate scholarships program provides support to students who intend to receive a degree from the College of Letters & Science. With over 63 majors and special degree programs which include journalism, music, social work, and applied mathematics, engineering, and physics (p. 310), the College of Letters & Science (L&S) strongly supports the role of a broad and deeply educated citizenry. Letters & Science graduates use this strong foundation to flourish in their chosen careers (http://ls.wisc.edu/about/lsci?p=careerinitiative.html). For more information, see overview of scholarships (http://scholarships.ls.wisc.edu).

Helps first- and second-year undergraduates get hands-on experience in research

STUDY ABROAD

About 25% of undergraduates make study abroad an integral part of their UW–Madison experience.

International Academic Programs (IAP) (https://www.studyabroad.wisc.edu) at UW–Madison offers over 200 study abroad options in about 60 countries on 6 continents. In addition to taking the opportunity to learn new languages, understand new cultures and see the world, UW–Madison students study abroad to complement their on-campus academic goals, strengthen their professional potential and enrich their personal lives.

Students of all academic levels and majors study abroad. While many programs include language training—from the basics to full language immersion—most IAP programs have no language requirement and include courses taught in English.

All courses taken abroad through IAP count as "in-residence" credit, just like taking courses on campus at UW–Madison, so students advance towards their degrees while abroad. And study abroad isn't limited to classroom experience. Many students also complete internships, do research, fieldwork and service learning.

In addition to resources on health, safety, academic planning and other aspects, UW–Madison students receive the information and guidance they need to plan a study abroad experiences that fits their budgets. Many study abroad programs cost about the same or less than studying on campus, and student financial aid can be applied in most cases.

While IAP offers programs to students of all majors, including to students in the College of Agricultural and Life Sciences in collaboration with the CALS International Programs office, the College of Engineering and the School of Business also offer programs tailored specifically to the needs of their students. All of these program options are listed here (https://www.studyabroad.wisc.edu/programs).

For more information on study abroad at UW–Madison, see Study Abroad (http://studyabroad.wisc.edu) or call 608-265-6329.

SUCCESSWORKS

SuccessWorks (https://careers.ls.wisc.edu), 711 State Street, Suite 300, 608-262-3921.

At the College of Letters & Science (L&S) SuccessWorks advisors work with students from the time they are interested in exploring career options through preparing and conducting a successful job search or graduate school application—in other words, from freshman year through one year after graduation. Don't hesitate to get started early! We help students reflect and capitalize on their academic skills, explore and try out occupations, participate in internships, and network with professionals in the field. In addition to traditional resume and interview services, SuccessWorks offers one-on-one advising, career and internship courses, occupation-specific advising and resources, the L&S Badger Internship Program, internship scholarships, a mentoring program, and much more. Together we can develop a plan and the tools you need to achieve your goals!

UNDERGRADUATE RESEARCH SCHOLARS PROGRAM

The Undergraduate Research Scholars program (URS) is dedicated to enhancing the academic experience of UW–Madison students by providing first and second year undergraduates with opportunities to earn credit for participating in the research and creative work with UW–Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities. Please refer to Undergraduate Research Scholars (https://urs.ls.wisc.edu) for more information.

HONORS

L&S HONORS PROGRAM

The College of Letters & Science Honors Program seeks to provide students with a small, liberal arts college experience within this large university. The Honors Program is home to more than 1,200 motivated, curious and high-achieving students, all pursuing one of three degree tracks: Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors—the highest undergraduate degree awarded by the college. In addition to an enhanced curriculum that offers small, faculty-led courses, the program also offers academic advising services; grants, scholarships, and awards; and many professional development and co-curricular opportunities. Events, term-specific deadlines, course descriptions for the upcoming semester and much more can be found on the L&S Honors Program website (http://honors.ls.wisc.edu). We welcome inquiries via phone at 608-262-2984. The L&S Honors Program is located in the historic Washburn Observatory at 1401 Observatory Drive in Madison, WI 53706.

HOW TO GET IN

Students may apply to enter the L&S Honors Program in any semester of their undergraduate careers. Any UW–Madison Honors credits earned before admission to the Honors Program may be applied toward Honors degree requirements. Eligibility criteria and admissions procedures differ for the different Honors degrees.

ADMISSION TO HONORS IN THE LIBERAL ARTS (HLA)

To become a candidate for the Honors in the Liberal Arts degree, a student must apply directly to the L&S Honors Program. Students may apply at any point in their undergraduate careers provided they meet the eligibility requirements described below.

All students admitted to the university and to the College of Letters & Science are invited to apply to be considered for admission to the Honors Program to pursue the Honors in the Liberal Arts degree. Interested students can apply via an online application form. L&S admitted students receive an invitation message by email that contains the URL to the online application. Admission to the program is competitive, and space is limited.

Continuing and transfer students with a cumulative grade point average of 3.300 or above who are currently enrolled at UW–Madison or who are transferring to UW–Madison from another college or university may apply to the L&S Honors Program at any time. Applications are available from the Honors Program website (http://honors.ls.wisc.edu) and admission

decisions are usually made within three weeks of submission of the completed application and supporting materials. While continuing or transfer students having 60 or more credits at the time of application to the Honors Program are eligible to participate in the Honors in the Liberal Arts (HLA) degree track, they are encouraged to consider Honors in the Major (HM) as an option (see below), since they may find it difficult to complete the HLA degree requirements if beginning that program in the junior or senior year.

ADMISSION TO HONORS IN THE MAJOR (HM)

Students interested in pursuing an Honors in the Major degree are encouraged to consult the department listings (p. 310) in this Guide and speak with the department's academic advisors, who will be able to explain admissions procedures and requirements for the degree. After officially declaring the major and receiving authorization from the department to declare Honors in the Major, students must submit a completed Honors in the Major Declaration Form to the Honors Program office. These forms may be obtained from either the departmental advisor or the Honors Program office.

REQUIREMENTS

Honors may be earned in any L&S undergraduate degree (Bachelor of Arts; Bachelor of Science; Bachelor of Science–Applied Mathematics, Engineering, and Physics; Bachelor of Arts–Journalism or Bachelor of Science–Journalism; Bachelor of Music; and Bachelor of Social Work). For students who complete the requirements, Honors will appear on diplomas and transcripts (for example, B.A. with Honors in the Liberal Arts or B.S. with Honors in the Major).

HONORS IN THE LIBERAL ARTS (HLA)

Honors in the Liberal Arts is often the primary focus for most first- and second-year Honors students. It requires students earn Honors credits in a breadth of disciplines and is meant to enrich and enhance a student's academic experience outside of the major. Students who complete this curriculum develop strong skills in communication, critical thinking and complex problem solving, which will serve them well regardless of career path. The specific requirements for the HLA degree are:

1. completion of the L&S general degree requirements;
2. a cumulative grade point average of at least 3.300;
3. completion of at least 24 credits in Honors courses with grades of B or better;
4. of the 24 Honors credits, at least 6 must be in the humanities, 6 in the social sciences, and 6 in the natural sciences; and
5. of the 24 Honors credits, at least 15 must be "Automatic Honors" credits—that is, in courses that carry the "Honors Only" or "Accelerated Honors" designations in the Course Guide (http://public.my.wisc.edu).

HONORS IN THE MAJOR (HM)

After formally declaring a major in the College of Letters & Science, students may opt to pursue Honors in that Major. Honors in the Major requirements can be completed independently from Honors in the Liberal Arts; they may also be completed in conjunction with Honors in the Liberal Arts (which would result in a Comprehensive Honors degree). Each academic department and program in the college, with approval of the Faculty Honors Committee, establishes its own requirements for the Honors in the Major degree. Honors in the Major is intended for students who are interested in original research and who wish to graduate with the best possible undergraduate training in the discipline. Honors in the Major is especially appropriate for students who are considering graduate work, or who want a particularly rigorous training in research, reasoning, and writing skills useful to a wide range of career choices.

Although many of the specific requirements for HM vary by department, all students pursuing Honors in the Major must:

1. complete the L&S general degree requirements;
2. complete the regular major requirements;
3. obtain an overall cumulative grade point average of at least 3.300;
4. earn a grade of B or better in all courses counting towards Honors in the Major requirements; and
5. successfully complete a capstone experience during their senior year, typically a Senior Honors Thesis (see below for more information).

In addition to these collegewide requirements, Honors in the Major students may be required to complete additional upper-level, Honors coursework; participate in department research colloquia; and meet a minimum grade point average in all classes in the major (typically between 3.300 and 3.500).

As mentioned above, most departments require a Senior Honors Thesis as the culmination of their Honors in the Major curriculum. In departments for which a research thesis is not the most appropriate capstone, an alternative such as a performance, a professional practicum, or a major piece of creative writing may be required instead. The two-semester Honors thesis or capstone project is often the most challenging part of the Honors in the Major experience, and for most students it also proves to be the most rewarding. The Senior Honors Thesis is a two-semester (or summer and semester) effort; students first enroll in Senior Honors Thesis 681, followed the next term by Senior Honors Thesis 682 (some departments may use different numeric designations for Senior Honors Thesis options). These two courses may not be taken concurrently. The final grade for the entire thesis is assigned after 682 has been completed.

Students who intend to complete Honors in the Major and write a Senior Honors Thesis should consult with department advisors as early as possible. They are also strongly encouraged to begin working with a faculty advisor no later than the beginning of the junior year in order to formulate a research topic, which will enhance the student's potential for success in research grant funding cycles for their senior year. Some departments offer special courses designed to facilitate the organization, planning, and execution of Honors thesis projects. Other departments encourage (and some require) students to take a directed study or tutorial course with the thesis advisor sometime during the junior year. Students who receive funding from the L&S Honors Program for their thesis research should submit an unbound copy of their thesis to the Honors Program Office.

Students pursuing Honors in the Major in two majors may apply for Dual Thesis Authorization, which will allow them to write one interdisciplinary thesis to satisfy both major capstone requirements. Please see the Honors Program Associate Director for Academic Services to learn more about the application process prior to enrolling in the 681 course.

Prior authorization is needed when students intend to complete either 681 or 682 while away from UW–Madison. Consult with the Associate Director for Academic Services if this is your intention.

COMPREHENSIVE HONORS

Students who complete the requirements for both Honors in the Liberal Arts and Honors in the Major in at least one department or program earn

Comprehensive Honors, the highest undergraduate degree awarded by the College.

HOW TO EARN HONORS CREDIT

There are three unique Honors course designations, each described here:

- "Honors Only" courses are reserved for Honors candidates. They are generally small classes, led by a faculty member and designed for substantive engagement, or discussion sections or labs reserved for Honors students in larger non-Honors lecture courses. The enrollment system will automatically assign Honors credit to all enrolled students. These "Honors Only" courses are sometimes denoted with the symbol "H".
- "Accelerated Honors" are open to all students. Honors credit is awarded in recognition of the rigor and pace of the course. These Honors courses are often conducted at a faster pace than the non-Honors course counterparts or are upper-level capstone courses in a major that require significant engagement with the course material. As with "Honors Only" designated courses, the enrollment system will automatically assign Honors credit to all enrolled students. These "Accelerated Honors" courses are sometimes denoted with the symbol "!".
- "Honors Optional" designates courses for which Honors is available through an optional Honors component of the course curriculum. These courses are open to all students for enrollment. Opting into the Honors component of the course is done through the enrollment process. Students enrolled in an "Honors Optional" course are advised to consult with the instructor during the first weeks of the term to determine the Honors curriculum if it is not outlined on the syllabus. Instructors either have designated Honors curricula or students may be encouraged to develop a project idea of their own. These "Honors Optional" courses are sometimes denoted with the symbol "%".

When the Schedule of Classes is published for the upcoming term, students can use the Enroll App to identify which courses are being offered for Honors and with which designation. A course being offered for Honors in a past term in no way guarantees that it will be offered for Honors in a future term.

Honors candidates may also earn Honors credit through the following methods:

- Designing and successfully completing an additional Honors project for a course not carrying any of the Honors designations above in the given term. This option requires consent of the instructor and approval of the L&S Honors Program. To request permission from the Honors Program, students must submit a completed Green Sheet Agreement form and all supporting documentation to the Honors Program office no later than the eighth week of a regular semester, or the fourth week of an eight-week summer term. Green Sheets are available on the Honors Program website (http://honors.ls.wisc.edu). Supporting documentation includes a formal proposal outlining the additional Honors project in up to 500 words, and a completed Course Change Request Form. Additional information is available from Honors advisors and on the Honors Program website.
- Students who study abroad on a non-Honors study abroad program may petition to have one course (up to four credits) per semester abroad count toward Honors requirements. Upon returning from abroad, students are asked to write a petition in which they are required to reflect on the nature of the course taken abroad and explain why the course meets the desired criteria for general Honors credit, Honors breadth credit and/or Automatic Honors credit. For more details about the petition process, please consult the Honors Program website (http://honors.ls.wisc.edu).
- Studying abroad in an Honors Study Abroad Program. (Currently programs are available in Ecuador and Utrecht, Netherlands.) Students may earn up to 16 Honors credits. Students receive Honors credit in these cases through the study abroad equivalency process upon their return from abroad.

In all cases, to receive Honors credit in a course, students must earn a final grade of B or higher in that course. If a grade of BC or lower is earned in an Honors course, the Honors notation remains on the student's record, but the course does not count toward Honors degree requirements. If the course is retaken for Honors, regardless of the grade earned during this second attempt, the course cannot satisfy an Honors degree requirement.

Students may not receive Honors credit in courses carried on a pass/fail basis.

ADVISING AND CAREERS

The University of Wisconsin–Madison can seem overwhelming because of its size and the complexity of its policies and procedures. Academic advisors help students get (and maintain) their bearings on campus. The L&S Honors Program has a team of specially trained academic and peer advisors who accompany and support Honors candidates as they pursue diverse educational and co-curricular experiences compatible with their long-term goals. Advising occurs through a variety of formats including small group workshops, individual appointments, drop-in hours and email. Additional information is available on the Honors Program website (http://honors.ls.wisc.edu).

The L&S Honors Program encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S SuccessWorks office to help students leverage the academic skills learned in your major(s) and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, regardless of major or career goals.

PEOPLE

Faculty Director: Dr. Sabine Gross, Chair of L&S Faculty Honors Committee and Professor of German
Associate Director for Administration: Dr. Matt Kohlstedt
Associate Director for Academic Services: Sara Stephenson
Program Administrator: Erin Warner
Academic Advisor: Aimee Drolet and Christine Evans

POLICIES

CRITERIA FOR REMAINING IN GOOD STANDING IN HLA

Students must obtain a grade point average of 3.300 or higher to be eligible to graduate with an Honors in the Liberal Arts degree. As such, we encourage students to strive for at least this GPA each academic term. The Honors Program advising team will work with students on an improvement plan should their GPA drop below 3.300. Students must also make satisfactory progress toward degree requirements, meaning:

1. successfully complete (grade of B or higher) at least one Honors course (any designation) by the end of the third semester on campus and
2. successfully complete (grade of B or higher) at least two Automatic Honors courses by the end of the fifth semester on campus.

Students may withdraw from HLA at any time by completing an Honors in the Liberal Arts Withdrawal Form, available from the Honors Program office, and submitting it to the Honors Program.

CRITERIA FOR REMAINING IN GOOD STANDING IN HM

Because each department sets its own criteria for the HM degree program, students are encouraged to work closely with departmental advisors to stay on track towards successful completion. In addition to the criteria established by individual departments, all students must obtain a cumulative grade point average of 3.300 or higher in UW–Madison coursework to be eligible to graduate with the Honors in the Major degree. Students may withdraw from HM at any time by submitting a completed Honors in the Major Withdrawal Form, available from either the department advisor or the Honors Program office.

HONORS IN THE INDIVIDUAL MAJOR

To complete the Individual Major with Honors, the student must earn Honors credit in at least 20 of the 36 or more credits comprising the Individual Major and must complete a Senior Honors Thesis of 6–8 credits. Students wishing to complete an Honors in the Major degree with an Individual Major should append to their Individual Major proposal a specific outline of how the Honors in the Major requirements would be met, including appropriate Honors-caliber courses, upper-level seminars, and a two-semester capstone project, typically a Senior Honors Thesis. The proposal for Honors in the Individual Major will be reviewed by the Honors Program Associate Director for Academic Services. This individual is authorized to determine whether requests for exceptions to the approved HM requirements will be approved.

HONORS TRANSFER CREDIT

Honors credit earned at other institutions is not currently accepted towards L&S Honors Program degree requirements.

GRANTS AND AWARDS

The L&S Honors Program strives to support Honors students as they pursue original research, study abroad, attend academic conferences, and pursue other endeavors that complement their learning and growth. The following funding opportunities are regularly offered. Please see the L&S Honors Program website (http://honors.ls.wisc.edu) for additional opportunities, specific deadlines and additional information about the applications process.

WELTON SOPHOMORE SUMMER HONORS RESEARCH APPRENTICESHIPS

These competitively awarded grants provide funding for Honors students who learn more about the research process by working as research apprentices with UW–Madison faculty. Students may not earn course credit for this work. For past students, these apprenticeships often evolved into paid research positions and/or Senior Honors Thesis projects. Applications for the Welton are submitted and considered early in the spring term.

TREWARTHA UNDERGRADUATE THESIS RESEARCH AWARD

This grant enables Honors students to undertake more demanding and extensive Honors Senior Thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients receive funds (up to $1500) to cover travel expenses and other costs needed to complete the research. These resources may enable students to travel to archives or research sites, or to initiate other research activities that require special funding. Each year 12–16 Trewartha awards are granted. Applications for the Trewartha are submitted and considered during the fall term.

MARK MENSINK HONORS RESEARCH GRANT

The Mark Mensink Honors Research Grant is the L&S Honors Program's most prestigious grant, awarded in recognition of an exceptional thesis proposal. The purpose of the grant is to enable its recipient to undertake more demanding and extensive Honors senior thesis research than might otherwise be possible due to limited resources or time. Students do not apply specifically for the Mensink award. The Mensink is awarded to a particularly promising Trewartha applicant.

HONORS SUMMER SENIOR THESIS RESEARCH GRANT

These grants enable students to undertake more demanding and extensive senior thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients are awarded a cash stipend of up to $3000 to cover research-related expenses. Such resources may enable students to travel to archives or research sites, arrange participant interviews or initiate other research activities that require special funding. Applications for summer research grants are submitted and considered during the spring term.

LEADERSHIP TRUST AWARD

The Leadership Trust Award supports students as they plan, develop and implement projects designed to improve UW–Madison, the community and/or the university student body. Each year, up to two (2) students receive awards equal to two (2) semesters of resident, full-time tuition plus project funds up to $3000 as justified in the submitted project budget. Past award recipients have established mentoring programs for underrepresented students; collaborated with local organizations to improve community access to fresh, healthy and local produce; and founded an academic journal, the Madison Journal of Literary Criticism, to increase students' opportunities to see their work published. Applicants are asked to identify a UW–Madison faculty member who will serve in an advisory/resource capacity and award winners are expected to submit progress reports to the L&S Faculty Honors Committee. Applications for the Leadership Trust Award are submitted and considered during the spring term for the following academic year.

STUDY ABROAD AWARDS

Up to four $1,500 travel awards will be awarded to eligible L&S Honors Program students who plan to study abroad. Students studying for either a semester or a year abroad are eligible, however preference will be given to students participating in a year-long program. Applications for this funding opportunity are available in the spring term.

BROMLEY RESEARCH CONFERENCE TRAVEL GRANT

These awards are meant to support students who present at and/or attend regional or national professional conferences. Priority is given to those who plan to present. The award amount is up to $500. The

application process is competitive and students with the most promising proposals are selected.

AFRICAN CULTURAL STUDIES

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department —Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues ranging from gender and sexuality to whiteness to diasporic internet use.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (http://www.studyabroad.wisc.edu) and visit the Majors Advising Page (https://www.studyabroad.wisc.edu/map_africanlanguages.asp).

For more information, students should feel free to contact the Department of African Cultural Studies (http://african.wisc.edu) or the advisor (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html) at any time.

AFRICAN CULTURAL STUDIES, B.A.

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department —Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues ranging from gender and sexuality to whiteness to diasporic internet use.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (http://www.studyabroad.wisc.edu) and visit the Majors Advising Page (https://www.studyabroad.wisc.edu/map_africanlanguages.asp).

For more information, students should feel free to contact the Department of African Cultural Studies (http://african.wisc.edu) or the advisor (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html) at any time.

HOW TO GET IN

Declaring the major in African cultural studies is as easy as meeting with the advisor. Make an appointment today (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	• Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non–L&S degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

Principal African languages taught by the department are Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu. The program supports the study of various other African languages through courses and/or individualized study.

REQUIREMENTS FOR THE MAJOR

30 credits and eight courses as follows:

LANGUAGE

Code	Title	Credits
4th unit of one African language		4
AFRICAN 324	Fourth Semester Arabic	
AFRICAN 334	Fourth Semester Swahili	
AFRICAN 338	Fourth Semester-A Language of Southern Africa	

AFRICAN 374	Fourth Semester Yoruba	
AFRICAN 394	Fourth Semester-A Language of West Africa	
Total Credits		4

CULTURE STUDIES

Code	Title	Credits
AFRICAN 100	Introduction to African Cultural Expression	3
One 200-level course:		3-4
AFRICAN 201	Introduction to African Literature	
AFRICAN/ FOLKLORE 210	The African Storyteller	
AFRICAN 211	The African Autobiography	
AFRICAN 212	Introduction to African Popular Culture	
AFRICAN/ AFROAMER 220	HipHop, Youth Culture, and Politics in Senegal	
AFRICAN 230	Introduction to Yoruba Life and Culture	
AFRICAN 231	Introduction to Arabic Literary Culture

HISTORY 201	The Historian's Craft (Roman Africa)	
HISTORY 278	Africans in the Americas, 1492-1808	
HISTORY 279	Afro-Atlantic History, 1808-Present	
HISTORY 377	History of Africa, 1500 to 1870	
HISTORY 378	History of Africa Since 1870	
HISTORY 444	History of East Africa	
HISTORY 445	History of Equatorial Africa	
LITTRANS 226	Introduction to Luso-Afro-Brazilian Literature	
LITTRANS 334	In Translation: The Art of Isak Dinesen/Karen Blixen	
MUSIC/ AFROAMER/ DANCE 318	Cultural Cross Currents: West African Dance/Music in the Americas	
POLI SCI 329	African Politics	
POLI SCI/ GEN&WS 429	Gender and Politics in Comparative Perspective	
POLI SCI 455	African International Relations	
PORTUG/ AFRICAN 451	Lusophone African Literature	
6th-unit language courses:		

AFRICAN 436	Advanced Studies in Swahili Language-Readings	
AFRICAN 330	Sixth Semester Arabic	
AFRICAN 476	Sixth Semester Yoruba	
AFRICAN 494	Sixth Semester, A Language of Southern Africa	
AFRICAN 496	Sixth Semester, A Language of Northern Africa	
AFRICAN 498	Sixth Semester, A Language of West Africa	
Total Credits		18-21

ELECTIVES

Credits in any African Language or Culture Studies course (listed above) or any of the following courses to achieve 30 credits and eight courses in the major.

Code	Title	Credits
AFRICAN 323	Third Semester Arabic	4
AFRICAN 333	Third Semester Swahili	4
AFRICAN 337	Third Semester-A Language of Southern Africa	4
AFRICAN 373	Third Semester Yoruba	4
AFRICAN 475	Fifth Semester Yoruba	3
AFRICAN 493	Fifth Semester, A Language of Southern Africa	3
AFRICAN 495	Fifth Semester, A Language of Northern Africa	3
AFRICAN 497	Fifth Semester, A Language of West Africa	3

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all AFRICAN and major courses

2.000 GPA on 15 upper-level major credits, taken in residence [1]

15 credits in AFRICAN, taken on the UW–Madison campus

[1] Courses with Intermediate or Advanced level are considered upper level in this major.

HONORS IN THE MAJOR

Students may declare Honors in the African Cultural Studies Major in consultation with the African Cultural Studies undergraduate advisor. To be admitted to the Honors Program in African Cultural Studies, students must have achieved a 3.300 university GPA and a 3.300 GPA in all AFRICAN courses as well as all courses accepted in the major.

Honors in the African Cultural Studies Major Requirements

To earn a B.A. or B.S. with Honors in the Major in African Cultural Studies students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN courses, and all courses accepted in the major
3. Complete a minimum of 15 credits in the major for Honors while in residence at UW–Madison from the following:
   a. 9 credits in courses numbered 200 and above
   b. A two-semester Senior Honors Thesis

   in AFRICAN 681 and AFRICAN 682, for a total of 6 credits.

1.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
3. (Content) Develop a level of proficiency in the different “ways of knowing” Africa and the diaspora through language, literatures, and cultures.
4. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
5. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
6. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
7. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
8. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
9. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.

10. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
11. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
First semester African language	5	Second semester African language	5
AFRICAN 100	3	AFRICAN/ AFROAMER 233 or 297[1]	3
Communication Part A (complete during first year)	3	Quatitative Reasoning Part A (complete during first year)	3
L&S Breadth	3	L&S Breadth	3
	14		14

Second Year

Fall	Credits	Spring	Credits
Third semester African language	4	Fourth semester African language	4
AFRICAN 201[2]	3	AFRICAN/ FOLKLORE 210 or 300[3]	3
L&S Breadth	3	Quantitative Reasoning Part B	3
L&S Breadth	3	L&S Breadth	3
L&S Breadth	3	L&S Breadth	3
	16		16

Third Year

Fall	Credits	Spring	Credits
300-599 level African course	3	AFRICAN 405	3
L&S Breadth	3	Elective	3
Elective	3	Elective	3
Electrive	3	Elective	3
Elective	3	Elective	3
	15		15

Fourth Year

Fall	Credits	Spring	Credits
AFRICAN 403	3	Elective course outside the Department	3
Elective	3	Elective	3
Elective	3	Elective	3
Elective	3	Elective	3
Elective	3	Elective	3
	15		15

Total Credits 120

1 Fulfills Ethnic Studies requirement
2 Fulfills Communication Part B and L&S Breadth Literature requirement
3 Fulfills L&S Breadth Literature requirement

ADVISING AND CAREERS

ADVISING

How does the major in African cultural studies fit into my educational goals?

While there are a wide variety of reasons to visit your major advisor, there seem to be two recurring questions:

1. Can I complete the major during the time I have left at UW?
2. Which classes will be offered in the future?

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *Global HipHop and Social Justice* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style—e.g., do you prefer multiple choice or essays? Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements
- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations
- Finding volunteer and/or internship opportunities
- Talking about your challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school
- Proofreading resumes and cover letters

Ready to meet with the ACS advisor? Make an appointment today (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html).

CAREERS

While many students have a difficult time believing it, a humanities major such as ours enables students who complete it to consider just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

Think about what you learn in a classroom setting as well as what you do each day to be a successful student; the skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- proper research design and methodology
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- broader knowledge of career and graduate-study options

One of the more significant skills majors develop is **language acquisition**. Your study of an African language sets you apart and demonstrates your willingness to explore and expand your understanding of history and culture. In addition, the study of these less commonly taught languages shows discipline and perseverance.

Overall, you will have a wide variety of skills and talents to start you on the path to a rewarding career!

Visit our website (http://african.wisc.edu/programs/undergraduate/careers-skill-development) for more information.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)
- Learn how we're transforming career preparation: L&S Career Initiative (http://ls.wisc.edu/lsci)

RESOURCES AND SCHOLARSHIPS

RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UW–Madison (http://www.languages.wisc.edu).

Learn more about scholarships (http://www.languages.wisc.edu/beyond/scholarships) and other opportunities for funded language study.

AFRICAN CULTURAL STUDIES, B.S.

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department —Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues ranging from gender and sexuality to whiteness to diasporic internet use.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (http://www.studyabroad.wisc.edu) and visit the Majors Advising Page (https://www.studyabroad.wisc.edu/map_africanlanguages.asp).

For more information, students should feel free to contact the Department of African Cultural Studies (http://african.wisc.edu) or the advisor (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html) at any time.

HOW TO GET IN

Declaring the major in African cultural studies is as easy as meeting with the advisor. Make an appointment today (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and

degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non-L&S-degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

Principal African languages taught by the department are Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu. The program supports the study of various other African languages through courses and/or individualized study.

REQUIREMENTS FOR THE MAJOR

30 credits and eight courses as follows:

LANGUAGE

Code	Title	Credits
4th unit of one African language		4
AFRICAN 324	Fourth Semester Arabic	
AFRICAN 334	Fourth Semester Swahili	
AFRICAN 338	Fourth Semester-A Language of Southern Africa	
AFRICAN 374	Fourth Semester Yoruba	
AFRICAN 394	Fourth Semester-A Language of West Africa	
Total Credits		4

CULTURE STUDIES

Code	Title	Credits
AFRICAN 100	Introduction to African Cultural Expression	3
One 200-level course:		3-4
AFRICAN 201	Introduction to African Literature	
AFRICAN/ FOLKLORE 210	The African Storyteller

HISTORY 279	Afro-Atlantic History, 1808-Present
HISTORY 377	History of Africa, 1500 to 1870
HISTORY 378	History of Africa Since 1870
HISTORY 444	History of East Africa
HISTORY 445	History of Equatorial Africa
LITTRANS 226	Introduction to Luso-Afro-Brazilian Literature
LITTRANS 334	In Translation: The Art of Isak Dinesen/Karen Blixen
MUSIC/ AFROAMER/ DANCE 318	Cultural Cross Currents: West African Dance/Music in the Americas
POLI SCI 329	African Politics
POLI SCI/ GEN&WS 429	Gender and Politics in Comparative Perspective
POLI SCI 455	African International Relations
PORTUG/ AFRICAN 451	Lusophone African Literature
6th-unit language courses:	
AFRICAN 436	Advanced Studies in Swahili Language-Readings
AFRICAN 330	Sixth Semester Arabic
AFRICAN 476	Sixth Semester Yoruba
AFRICAN 494	Sixth Semester, A Language of Southern Africa
AFRICAN 496	Sixth Semester, A Language of Northern Africa
AFRICAN 498	Sixth Semester, A Language of West Africa
Total Credits	18-21

ELECTIVES

Credits in any African Language or Culture Studies course (listed above) or any of the following courses to achieve 30 credits and eight courses in the major:

Code	Title	Credits
AFRICAN 323	Third Semester Arabic	4
AFRICAN 333	Third Semester Swahili	4
AFRICAN 337	Third Semester-A Language of Southern Africa	4
AFRICAN 373	Third Semester Yoruba	4
AFRICAN 475	Fifth Semester Yoruba	3
AFRICAN 493	Fifth Semester, A Language of Southern Africa	3
AFRICAN 495	Fifth Semester, A Language of Northern Africa	3
AFRICAN 497	Fifth Semester, A Language of West Africa	3

RESIDENCE AND QUALITY OF WORK

2.000 GPA in all AFRICAN and major courses

2.000 GPA on 15 upper-level major credits, taken in residence [1]

15 credits in AFRICAN, taken on the UW–Madison campus

[1] Courses with Intermediate or Advanced level are considered upper level in this major.

HONORS IN THE MAJOR

Students may declare Honors in the African Cultural Studies Major in consultation with the African Cultural Studies undergraduate advisor. To be admitted to the Honors Program in African Cultural Studies, students must have achieved a 3.300 university GPA and a 3.300 GPA in all AFRICAN courses as well as all courses accepted in the major.

Honors in the African Cultural Studies Major Requirements

To earn a B.A. or B.S. with Honors in the Major in African Cultural Studies students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN courses, and all courses accepted in the major
3. Complete a minimum of 15 credits in the major for Honors while in residence at UW–Madison from the following:
   a. 9 credits in courses numbered 200 and above
   b. A two-semester Senior Honors Thesis

   in AFRICAN 681 and AFRICAN 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
3. (Content) Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
4. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
5. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
6. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
7. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
8. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
9. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
10. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
11. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
First semester African language	5	Second semester African language	5
AFRICAN 100	3	AFRICAN/ AFROAMER 233 or 297[1]	3
Communication Part A (complete during first year)	3	Quatitative Reasoning Part A (complete during first year)	3
L&S Breadth	3	L&S Breadth	3
	14		14

Second Year

Fall	Credits	Spring	Credits
Third semester African language	4	Fourth semester African language	4
AFRICAN 201[2]	3	AFRICAN/ FOLKLORE 210 or 300[3]	3
L&S Breadth	3	Quantitative Reasoning Part B	3
L&S Breadth	3	L&S Breadth	3
L&S Breadth	3	L&S Breadth	3
	16		16

Third Year

Fall	Credits	Spring	Credits
300-599 level African course	3	AFRICAN 405	3
L&S Breadth	3	Elective	3
Elective	3	Elective	3
Electrive	3	Elective	3
Elective	3	Elective	3
	15		15

Fourth Year

Fall	Credits	Spring	Credits
AFRICAN 403	3	Elective course outside the Department	3
Elective	3	Elective	3
Elective	3	Elective	3
Elective	3	Elective	3
Elective	3	Elective	3
	15		15

Total Credits 120

1 Fulfills Ethnic Studies requirement
2 Fulfills Communication Part B and L&S Breadth Literature requirement
3 Fulfills L&S Breadth Literature requirement

ADVISING AND CAREERS

ADVISING

How does the major in African cultural studies fit into my educational goals?

While there are a wide variety of reasons to visit your major advisor, there seem to be two recurring questions:

1. Can I complete the major during the time I have left at UW?
2. Which classes will be offered in the future?

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *Global HipHop and Social Justice* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style—e.g., do you prefer multiple choice or essays? Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements

- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations
- Finding volunteer and/or internship opportunities
- Talking about your challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school
- Proofreading resumes and cover letters

Ready to meet with the ACS advisor? Make an appointment today (https://calendar.wisc.edu/scheduling-assistant/public/profiles/YjfjFEtg.html).

CAREERS

While many students have a difficult time believing it, a humanities major such as ours enables students who complete it to consider just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

Think about what you learn in a classroom setting as well as what you do each day to be a successful student; the skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- proper research design and methodology
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- broader knowledge of career and graduate-study options

One of the more significant skills majors develop is **language acquisition**. Your study of an African language sets you apart and demonstrates your willingness to explore and expand your understanding of history and culture. In addition, the study of these less commonly taught languages shows discipline and perseverance.

Overall, you will have a wide variety of skills and talents to start you on the path to a rewarding career!

Visit our website (http://african.wisc.edu/programs/undergraduate/careers-skill-development) for more information.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)
- Learn how we're transforming career preparation: L&S Career Initiative (http://ls.wisc.edu/lsci)

PEOPLE

FACULTY

To view full faculty profiles, visit our website (https://african.wisc.edu/people/faculty).

Matthew H. Brown: African screen media (particularly "Nollywood"), oral traditions, literature
Vlad Dima: French New Wave cinema, Francophone cinemas, film theory, television studies

RESOURCES AND SCHOLARSHIPS

RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UW–Madison (http://www.languages.wisc.edu).

Learn more about scholarships (http://www.languages.wisc.edu/beyond/scholarships) and other opportunities for funded language study.

AFRO-AMERICAN STUDIES

The Department of Afro-American Studies at the University of Wisconsin–Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct African American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the African American experience.

The department offers an undergraduate major and certificate. The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the "Bridge" programs which enable them to move directly into Ph.D. programs in English and history. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, community theater, college classes for low-income adults, and various support activities for the National Voting Rights Museum in Selma, Alabama. The department prides itself on positive working relationships with our colleagues in traditional disciplines as well as the other ethnic programs, the Department of Gender and Women's Studies, the Department of African Cultural Studies, and the School of Education. A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to the deeper understanding of race in America and the world.

RESIDENCE & QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses

2.000 GPA on at least 15 credits of upper-level work in the major, in residence[2]

15 credits in AFROAMER, taken on the UW–Madison campus

[2] Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

DISTINCTION

Distinction in the Major

Afro-American studies majors not enrolled for Honors in the Major may receive the "Distinction in the Major" notation on the transcript by earning a 3.750 grade point average in major courses and successfully completing the AFROAMER 691–AFROAMER 692 Senior Thesis project.

Thesis of Distinction

The award Thesis of Distinction is granted for an exceptionally good or original thesis, without consideration of the student's record in other work. A committee of at least two faculty members will evaluate the thesis and recommend to the dean the granting of this award when appropriate.

HONORS IN THE MAJOR

Students may declare Honors in the Afro-American Studies Major in consultation with the Afro-American Studies undergraduate advisor(s).

HONORS IN THE AFRO-AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in Afro-American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	3
AFROAMER/ ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4
AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
AFROAMER/ AFRICAN/HISTORY/ POLI SCI 297	African and African-American Linkages: An Introduction	4
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4
AFROAMER/ ASIAN AM 443	Mutual Perceptions of Racial Minorities	3

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world.
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

Total Credits 117

1 Many AFROAMER courses from Arts & Culture carry Humanities breadth and will also meet the L&S Breadth requirement for Humanities (up to 6 credits).

2 AFROAMER literature courses will satisfy the L&S Literature Breadth requirement (6 credits of Literature course work).

3 Nearly all AFROAMER courses carry the Ethnic Studies (ESR) designation and will apply to General Education and the major. Students should complete ESR within first 60 credits.

4 Many AFROAMER courses in History & Society will carry Social Science Breadth and also meet the L&S Breadth requirements for Social Science (12 credits) course work.

5 Students must declare a major by the time they reach 86 credits.

ADVISING AND CAREERS

ADVISING

Students are limited to a maximum of 6 credits of Directed Study courses (AFROAMER 199 or AFROAMER 699). With consent of the undergraduate adviser, students may substitute directed studies or thesis credits to satisfy requirements for the major.

The Department of Afro-American Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)

PEOPLE

Professors Adell, Drewal, Greene, Plummer, Thornton, Werner, Whitmire

Associate Professor Clark-Pujara

Assistant Professors Almiron, Brown, Davis

AFRO-AMERICAN STUDIES, B.S.

The Department of Afro-American Studies at the University of Wisconsin–Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct African American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the African American experience.

The department offers an undergraduate major and certificate. The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the "Bridge" programs which enable them to move directly into Ph.D. programs in English and history. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, community theater, college classes for low-income adults, and various support activities for the National Voting Rights Museum in Selma, Alabama. The department prides itself on positive working relationships with our colleagues in traditional disciplines as well as the other ethnic programs, the Department of Gender and Women's Studies, the Department of African Cultural Studies, and the School of Education. A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to the deeper understanding of race in America and the world.

HOW TO GET IN

Students should inform the Department of Afro-American Studies Office of their intention to major and be assigned an advisor within the department.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and

degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non-L&S-degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

REQUIREMENTS FOR THE MAJOR

The major in Afro-American studies requires **a minimum of 30 credits.** 15 credits must be numbered 300 and above. Students must take 2 courses from each of the four areas listed below: 1) Literature; 2) History and Society; 3) Arts and Culture; 4) Seminars and Advanced Courses; and Electives to achieve a total of 30 credits.

LITERATURE

Code	Title	Credits
Two Courses From:		6

RESIDENCE & QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses

2.000 GPA on at least 15 credits of upper-level work in the major, in residence[2]

15 credits in AFROAMER, taken on the UW–Madison campus

[2] Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

DISTINCTION

Distinction in the Major

Afro-American studies majors not enrolled for Honors in the Major may receive the "Distinction in the Major" notation on the transcript by earning a 3.750 grade point average in major courses and successfully completing the AFROAMER 691–AFROAMER 692 Senior Thesis project.

Thesis of Distinction

The award Thesis of Distinction is granted for an exceptionally good or original thesis, without consideration of the student's record in other work. A committee of at least two faculty members will evaluate the thesis and recommend to the dean the granting of this award when appropriate.

HONORS IN THE MAJOR

Students may declare Honors in the Afro-American Studies Major in consultation with the Afro-American Studies undergraduate advisor(s).

HONORS IN THE AFRO-AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in Afro-American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	3
AFROAMER/ ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4
AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
AFROAMER/ AFRICAN/HISTORY/ POLI SCI 297	African and African-American Linkages: An Introduction	4
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4
AFROAMER/ ASIAN AM 443	Mutual Perceptions of Racial Minorities	3

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world.
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

Total Credits 117

1 Many AFROAMER courses from Arts & Culture carry Humanities breadth and will also meet the L&S Breadth requirement for Humanities (up to 6 credits).

2 AFROAMER literature courses will satisfy the L&S Literature Breadth requirement (6 credits of Literature course work).

3 Nearly all AFROAMER courses carry the Ethnic Studies (ESR) designation and will apply to General Education and the major. Students should complete ESR within first 60 credits.

4 Many AFROAMER courses in History & Society will carry Social Science Breadth and also meet the L&S Breadth requirements for Social Science (12 credits) course work.

5 Students must declare a major by the time they reach 86 credits.

ADVISING AND CAREERS

ADVISING

Students are limited to a maximum of 6 credits of Directed Study courses (AFROAMER 199 or AFROAMER 699). With consent of the undergraduate adviser, students may substitute directed studies or thesis credits to satisfy requirements for the major.

The Department of Afro-American Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Professor Sandra Adell, Undergraduate and Certificate advisor in the major

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

Associate Professor Clark-Pujara

Assistant Professors Almiron, Brown, Davis

AFRO-AMERICAN STUDIES, CERTIFICATE

The certificate in Afro-American studies introduces undergraduate students to the interdisciplinary study of African American, African diaspora and African history, society, and culture. Students may choose courses in African American history, literature, black women's studies, art history, visual culture, music history and sociology. The certificate offers students opportunities to engage in interdisciplinary study and practice that will complement their major and enhance their intellectual and creative participation in their chosen professions and as citizens in our global society.

HOW TO GET IN

To declare a certificate in Afro-American studies, students must be enrolled as an undergraduate at the University of Wisconsin–Madison. Interested students must contact the department's undergraduate adviser to declare the certificate and be assigned a faculty adviser in their area of interest. Students may not declare both the certificate and the major in Afro-American studies.

REQUIREMENTS

CERTIFICATE REQUIREMENTS

Certificate students must plan with a faculty adviser a cohesive program consisting of 15 credits chosen from undergraduate AFROAMER courses.

- At least one 3-credit course must focus on Afro-American history (see list below).
- A minimum of 9 credits must be completed from AFROAMER courses numbered 300–699.
- At least one 3-credit course must be advanced (AFROAMER 500–697).
- A maximum of 3 credits of directed study (AFROAMER 699) may count toward the certificate.
- Students may not substitute courses from other academic programs or subject listings to fulfill the requirements for this program.

Code	Title	Credits
All certificate students must take one 3-credit course in Afro-American history:		3
AFROAMER 231	Introduction to Afro-American History	
AFROAMER 272	Race and American Politics from the New Deal to the New Right	
AFROAMER 302	Undergraduate Studies in Afro-American History	
AFROAMER/ HISTORY 321	Afro-American History Since 1900	
AFROAMER/ HISTORY 322	Afro-American History to 1900	
AFROAMER/ GEN&WS 324	Black Women in America: Reconstruction to the Present	
AFROAMER/ GEN&WS 326	Race and Gender in Post-World War II U.S. Society	
AFROAMER/ HISTORY 393	Slavery, Civil War, and Reconstruction, 1848-1877	
AFROAMER/ GEN&WS 624	African American Women's Activism (19th & 20th Centuries)	
AFROAMER/ GEN&WS 625	Gender, Race and the Civil Rights Movement	

AFROAMER/ HISTORY 628	History of the Civil Rights Movement in the United States	
AFROAMER 631	Colloquium in Afro-American History	
AFROAMER 671	Selected Topics in Afro-American History	
AFROAMER electives to meet the minimum credit requirement for the certificate		12
Total Credits		15

RESIDENCE & QUALITY OF WORK

At least 8 credits must be taken in residence. Courses taken on a UW–Madison study abroad program are considered resident credits; however, study abroad courses must qualify as Afro-American studies credit.

A minimum 2.500 GPA in all courses eligible for the certificate is required. All certificate courses must be graded; credit/no credit and pass/fail do not qualify.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. To familiarize students with the history, culture and social conditions of African Americans in the United States.
2. To introduce students to an interdisciplinary approach to the study of race, gender, and ethnicity in America.
3. To prepare students for careers in institutions that address the needs of multicultural communities.

AMERICAN INDIAN STUDIES PROGRAM

The American Indian Studies Program seeks to provide and maintain the highest levels of education, scholarship, leadership, and support to all students, staff, and faculty at the university. As an integral part of the university, the program maintains a special focus on assisting and supporting American Indians in their educational endeavors. In addition to the commitment to the university community, the program provides consultation and services to numerous local, state, and national organizations.

It is the mission of the American Indian Studies Program to provide leadership to other university departments and programs in the pursuit of American Indian course development and scholarship. In addition, the program serves as a resource center and support for individuals who are interested in American Indian culture, history, research, and contemporary life.

AMERICAN INDIAN STUDIES, CERTIFICATE

CERTIFICATE IN AMERICAN INDIAN STUDIES

A certificate in American Indian studies is a way of giving recognition to students who have made a significant effort to learn about American Indian culture and the place of American Indians in American society. Students receiving a certificate will have the achievement officially recorded via transcript notation.

WHAT CAN I DO WITH A CERTIFICATE IN AMERICAN INDIAN STUDIES?

Students of American Indian studies go on to successful careers in administration, advising, academics, advocacy, the arts, business, community outreach, consulting, education, government, health or health education, journalism, library science, literacy programming, lobbying, management, politics, publishing, school counseling, social work, research, and many more.

HOW TO GET IN

To begin the certificate declaration process, students must submit the Certificate Program Application form to the American Indian Studies office. Students should contact the AIS certificate advisor to obtain the form and to obtain more details about the program. The certificate is open to Special students and undergraduate students regardless of the college of enrollment.

REQUIREMENTS

REQUIREMENTS FOR THE CERTIFICATE

15 credits are required, as follows:

Code	Title	Credits
Introduction to American Indian Studies:		
AMER IND 100	Introduction to American Indian Studies	3
FOUR courses from AT LEAST TWO of the following areas:		*12*
History		
AMER IND/ HISTORY 490	American Indian History	
Literature and Media		
AMER IND/ ENGL 275	American Indian Oral Literatures	
AMER IND 325	American Indians in Film	
AMER IND/ LSC 444	Native American Environmental Issues and the Media	
Anthropology		
AMER IND/ ANTHRO 314	Indians of North America	
AMER IND 320	Native Peoples of the Southwest	
AMER IND/ ANTHRO 353	Indians of the Western Great Lakes	
AMER IND/ ANTHRO 354	Archaeology of Wisconsin	
Language		
AMER IND 301	First Semester Ojibwe	
AMER IND 302	Second Semester Ojibwe	
AMER IND/ LINGUIS 371	Survey of North American Indian Languages	
AMER IND 401	Ojibwe Language III	
AMER IND 402	Ojibwe Language IV	
American Indian Social and Cultural Issues		
AMER IND 250	Indians of Wisconsin	
AMER IND/ ANTHRO/ FOLKLORE/ GEN&WS 437	American Indian Women	
AMER IND 450	Issues in American Indian Studies	
AMER IND/ ANTHRO/ BOTANY 474	Ethnobotany	
AMER IND/ HDFS 522	American Indian Families	
AMER IND/ C&E SOC/ SOC 578	Poverty and Place	
Additional credits to meet the minimum number of credits and courses required for the Certificate		
Total Credits		15

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA on all coursework eligible to meet the certificate requirements.
- 6 credits may be taken as pass/fail. All other credits must be taken for a letter grade.
- 8 credits of the certificate coursework must be completed in residence.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. Apply knowledge and methods of inquiry characteristic of this interdisciplinary field.
2. Apply knowledge of historical precedents to contemporary issues.
3. Demonstrate knowledge of the creativity and ethos contained within the diverse ways of knowing (Indigenous Knowledge Systems) among American Indian nations and communities.
4. Apply knowledge of the effects (ongoing) of oppression and racism that American Indians experience.
5. Demonstrate knowledge of the contributions of American Indian value-belief systems and practical knowledge across all fields of human endeavor.

ADVISING AND CAREERS

Students are required to declare the American Indian studies (AIS) certificate. For academic advising regarding the certificate, students should contact the AIS certificate advisor to obtain more details about the certificate program and general academic advising. Contact Denise Wiyaka at denise.wiyaka@wisc.edu or request information by sending an email to ais@letsci.wisc.edu. Students can also visit the AIS office at 316 Ingraham Hall.

ANTHROPOLOGY

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand

the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

ANTHROPOLOGY, B.A.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	• Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/ Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non–L&S degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
Complete two:		*6*
ANTHRO 212	Principles of Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 490	Undergraduate Seminar	3
ANTHRO electives		15
Total Credits		30

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ANTHRO and major courses
- 2.000 GPA in 15 upper-level major credits in residence[1]
- 15 credits in ANTHRO, taken on campus

[1] ANTHRO 300 and above are upper-level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361, ANTHRO/LACIS 362, ANTHRO/LACIS 363, ANTHRO/LACIS 364, ANTHRO/LACIS 376, ANTHRO/LACIS 377).

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Anthropology major advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the Anthropology major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all ANTHRO and major courses
- Complete the following coursework:

Code	Title	Credits
Biological Anthropology (complete one):		*3*
ANTHRO 105	Principles of Biological Anthropology	
ANTHRO 302	Hominoid Evolution	
ANTHRO 303	Human Skeletal Anatomy	
ANTHRO 304	Heredity, Environment and Human Populations	
ANTHRO/ BOTANY/ ZOOLOGY 410	Evolutionary Biology	
ANTHRO 411	The Evolution of the Genus, Homo	
ANTHRO 420	Introduction to Primatological Research	
ANTHRO 454	Study Abroad: Topics in Biological Anthropology	
ANTHRO 458	Primate Behavioral Ecology	
ANTHRO 601	Proseminar in Biological Anthropology

Total Credits		18

DISTINCTION IN THE MAJOR

Undergraduate students who are not declared for Honors in the Major are eligible for Distinction in the Major if they have a 3.500 GPA or higher in the Anthropology major and have produced exceptional written work in a thesis, seminar, or directed study course. Contact the Anthropology major advisor for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people’s relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and bio# anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist you and your advisor(s). Use it along with your DARS report and the Course Guide. You will make your own four-year plan based on your placement scores, incoming credits, and individual interests. As you become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, you will likely adjust the order of your courses to make room for these experiences. There are many ways to complete the anthropology major in four years, and to combine it with other majors and certificates: you will probably revise your 4-year plan several times during college.

First Year

Fall	Credits	Spring	Credits
ANTHRO 100-200 level course	3	ANTHRO 100-200 level course	3
Science Breadth	3	Ethnic Studies course in ANTHRO	3
Communication A	3	Literature Breadth	3
Quantitative Reasoning A	3	Physical Science Breadth	3
Foreign Language (if needed)	4	Foreign Language (if needed)	4
	16		16

Second Year

Fall	Credits	Spring	Credits

Total Credits 120

ADVISING AND CAREERS

ADVISING

Students interested in anthropology and declaring the major should contact the department directly by calling the general number (608-262-2866) or stopping by 5240 William H. Sewell Social Science Building for individual advising.

CAREER EXPLORATION

Anthropology encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

ANTHROPOLOGY, B.S.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to

the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * * The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non-L&S-degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
Complete two:		*6*
ANTHRO 212	Principles of Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 490	Undergraduate Seminar	3
ANTHRO electives		15
Total Credits		30

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ANTHRO and major courses
- 2.000 GPA in 15 upper-level major credits in residence[1]
- 15 credits in ANTHRO, taken on campus

[1] ANTHRO 300 and above are upper-level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361, ANTHRO/LACIS 362, ANTHRO/LACIS 363, ANTHRO/LACIS 364, ANTHRO/LACIS 376, ANTHRO/LACIS 377).

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Anthropology major advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the Anthropology major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all ANTHRO and major courses
- Complete the following coursework:

Code	Title	Credits
Biological Anthropology (complete one):		*3*
ANTHRO 105	Principles of Biological Anthropology	

ANTHRO 302	Hominoid Evolution	
ANTHRO 303	Human Skeletal Anatomy	
ANTHRO 304	Heredity, Environment and Human Populations	
ANTHRO/ BOTANY/ ZOOLOGY 410	Evolutionary Biology	
ANTHRO 411	The Evolution of the Genus, Homo	
ANTHRO 420	Introduction to Primatological Research	
ANTHRO 454	Study Abroad: Topics in Biological Anthropology	
ANTHRO 458	Primate Behavioral Ecology	
ANTHRO 601	Proseminar in Biological Anthropology	
ANTHRO 603	Seminar in Evolutionary Theory	
ANTHRO 604	Seminar: Topics in Physical Anthropology of the Living	
ANTHRO 605	Seminar-Current Problems in Paleoanthropology	
ANTHRO/ NTP/PSYCH/ ZOOLOGY 619	Biology of Mind	
ANTHRO 658	Ecological Models of Behavior	
ANTHRO 668	Primate Conservation	
Cultural Anthropology (complete one):		*3*
ANTHRO 104	Cultural Anthropology and Human Diversity	
ANTHRO/ FOLKLORE/ INTL ST/ LINGUIS 211	Global Language Issues	
ANTHRO/ MED HIST 231	Introduction to Social Medicine	
ANTHRO 237	Cut 'n' Mix: Music, Race, and Culture in the Caribbean

ANTHRO 606	Ethnicity, Nations, and Nationalism	
ANTHRO 690	Problems in Anthropology	
ANTHRO 681 & ANTHRO 682	Senior Honors Thesis and Senior Honors Thesis	6
Total Credits		18

DISTINCTION IN THE MAJOR

Undergraduate students who are not declared for Honors in the Major are eligible for Distinction in the Major if they have a 3.500 GPA or higher in the Anthropology major and have produced exceptional written work in a thesis, seminar, or directed study course. Contact the Anthropology major advisor for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people’s relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and bio# anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

FOUR-YEAR PLAN

This sample four-year plan is a tool to assist you and your advisor(s). Use it along with your DARS report and the Course Guide. You will make your own four-year plan based on your placement scores, incoming credits, and individual interests. As you become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, you will likely adjust the order of your courses to make room for these experiences. There are many ways to complete the anthropology major in four years, and to combine it with other majors and certificates: you will probably revise your 4-year plan several times during college.

ARCHAEOLOGY, CERTIFICATE

The archaeology certificate is designed to help students to develop the knowledge and practical skills needed to analyze archaeological materials and to participate in archaeological field research. Students who complete the certificate, along with a B.A. or B.S. degree from UW–Madison, improve their competitiveness in graduate school applications and are qualified for entry-level employment opportunities in archaeology. In addition to providing a strong intellectual foundation in archaeology and hands-on experience in fieldwork, the certificate provides an interdisciplinary link to courses in three or more departments, exposing students to diverse approaches to the study of our global human heritage.

Ancient history is a puzzle made up of innumerable fragments—pieces of bone, pottery, stone, and metal; remnants of architecture and monuments; residues of food; and traces of other things. Archaeology is the field of study that provides the tools to discover these fragments and piece them together to reconstruct a picture of the ancient world and to illuminate the stories of past peoples. An accurate understanding of the past is critical for developing a better present and future.

Through their participation in the archaeology certificate program, students gain an appreciation of the diversity of human societies and a fuller understanding of the cultural processes that have resulted in the way that we live today. Students explore the origins of subsistence

strategies, trade, technology, belief systems, and conflict that are relevant to understanding the human condition in our modern world.

For further information about the archaeology certificate, including a list of core faculty, please see the Department of Anthropology website (http://www.anthropology.wisc.edu/for-undergraduates/the-certificate-in-archaeology).

HOW TO GET IN

To declare an archaeology certificate, should contact or visit the Department of Anthropology.

REQUIREMENTS

7 COURSES AND 21 CREDITS [4]

Credits must be distributed in at least three SUBJECTs, and must meet these requirements:

Introductory course

Code	Title	Credits
Complete one:		3
ANTHRO 102	Archaeology and the Prehistoric World	
ANTHRO 105	Principles of Biological Anthropology	
ANTHRO 212	Principles of Archaeology	
Total Credits		3

Area courses

Code	Title	Credits
Complete 6 credits from:		6
ANTHRO 309	Prehistoric Europe	
ANTHRO 310	Topics in Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 333	Prehistory of Africa	
ANTHRO/ AMER IND 354	Archaeology of Wisconsin	
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
ART HIST 600	Special Topics in Art History [1]	
CLASSICS/ JEWISH 241	Introduction to Biblical Archaeology	
CLASSICS 320	The Greeks	
CLASSICS 322	The Romans	
CLASSICS 379	Eureka! Technology and Practice in the Ancient World	
CLASSICS/ JEWISH 452	Biblical Archaeology	
CLASSICS 602	The Ancient Mediterranean City	
HISTORY 303	A History of Greek Civilization	
HISTORY 307	A History of Rome	
HISTORY/ MEDIEVAL 313	Introduction to Byzantine History and Civilization	
HISTORY 377	History of Africa, 1500 to 1870	
Total Credits		6

[1] Must be an archaeology topic.

Methods

Code	Title	Credits
Complete 6 credits from:		6
ANTHRO 302	Hominoid Evolution	
ANTHRO 303	Human Skeletal Anatomy	
ANTHRO 311	Archaeological Chemistry	
ANTHRO 352	Ancient Technology and Invention	
ANTHRO 391	Bones for the Archaeologist	
ANTHRO 696	Archaeological Methods of Curation	
BOTANY 240	Plants and Humans	
ANTHRO/ BOTANY/ ZOOLOGY 410	Evolutionary Biology	
BOTANY/ AMER IND/ ANTHRO 474	Ethnobotany	
CLASSICS 430	Topics in Classical Archaeology	
ENVIR ST/ ATM OCN/GEOG/ GEOSCI 335	Climatic Environments of the Past	
ENVIR ST/ CIV ENGR/ GEOG 377	An Introduction to Geographic Information Systems	
ENVIR ST/ CIV ENGR/G L E/ GEOSCI 444	Practical Applications of GPS Surveying	
GEOG/ GEOSCI 320	Geomorphology	
GEOG 329	Landforms and Landscapes of North America	
GEOG 360	Quantitative Methods in Geographical Analysis	
GEOG 370	Introduction to Cartography	
GEOG/CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems	
GEOG/ GEOSCI 420	Glacial and Pleistocene Geology	
GEOG/ GEOSCI 527	The Quaternary Period	
GEOG/ATM OCN/ ENVIR ST 528	Past Climates and Climatic Change	
GEOSCI 202	Introduction to Geologic Structures	
GEOSCI/ GEOG 320	Geomorphology	

GEOSCI/ GEOG 326	Landforms-Topics and Regions
GEOSCI/ GEOG 420	Glacial and Pleistocene Geology
GEOSCI 430	Sedimentology and Stratigraphy
GEOSCI/ CIV ENGR/ ENVIR ST/ G L E 444	Practical Applications of GPS Surveying
GEOSCI/G L E 594	Introduction to Applied Geophysics
ZOOLOGY/ ANTHRO/ BOTANY 410	Evolutionary Biology
Total Credits	6

Field course

Code	Title	Credits
ANTHRO 370	Field Course in Archaeology	3-6
Total Credits		3-6

Capstone

Code	Title	Credits
Choose from:		3-4
ANTHRO 352	Ancient Technology and Invention [2]	
ANTHRO 490	Undergraduate Seminar [3]	
Total Credits		3-4

[2] ANTHRO 352 can count either for a methods course **or** for the capstone course, but not both.

[3] ANTHRO 490 is a Topics course. In order to meet the capstone requirement, it must be on an archaeology topic.

[4] Courses taken Pass/Fail do not count.

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA on all certificate-approved courses
- At least 11 Certificate credits, taken in Residence

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW–Madison (at least 12 credits) and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

1. acquire specialized training in archaeological research, which may include: obtaining basic knowledge of and skills in observational methods and recording of information for a variety of lines of archaeological evidence, putting these abilities into practice in the classroom and outside of the classroom, developing research questions and the analytical skills necessary to address them, strengthening archaeological interpretations through critical thinking and reference to empirical evidence, gaining experience in considering a problem, synthesizing information from disparate sources, and evaluating contrasting arguments, being able to distinguish between empirical research and speculation, communicating archaeological findings through written and oral expression.
2. obtain comparative global knowledge of archaeology, material culture, and the evolution of people's relationships with the physical world.
3. become aware of the ethical practice of archaeology and heritage preservation.
4. synthesize information relevant to archaeological research across multiple disciplines.
5. gain an appreciation of cultural diversity through time and space.

ADVISING AND CAREERS

Students wishing to receive advising for the archaeology certificate should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building. The telephone number for the department is 608-262-2866.

ART HISTORY

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions, in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged.

Assistant Professors Nelson, Pruitt

Affiliate Professors Aylward, Clark, Kern, Nadler

Affiliate Associate Professor Abdu'Allah

Affiliate UW–Milwaukee Associate Professors Benyamin, Sen

Affiliate UW–Milwaukee Assistant Professor Moon

ART HISTORY, B.A.

OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non–UW study abroad programs, the Office of Admissions and Recruitment (http://www.admissions.wisc.edu/equivalencies). For more information, see the Study Abroad website (http://www.studyabroad.wisc.edu).

HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (https://arthistory.wisc.edu/academics/undergrad/advising).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	• Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/ Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non–L&S degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

REQUIREMENTS IN THE MAJOR

FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

- Complete the fourth unit of a foreign language; ***or***
- Complete the third unit of a foreign language ***and*** the second unit of an additional foreign language.

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

200-level ART HIST (two required)

Code	Title	Credits
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 203	Survey of Asian Art	
ART HIST/ AFROAMER 204	Introduction to Visual Cultures	
ART HIST 205	Global Arts	
ART HIST 210	A History of the World in 20 Buildings	
ART HIST 227	The Ends of Modernism	
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	
ART HIST/ ANTHRO/DS/ HISTORY/ LAND ARC 264	Dimensions of Material Culture	

300-level ART HIST (three required)

Code	Title	Credits
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST 301	Myths, Loves, and Lives in Greek Vases	
ART HIST 302	Greek Sculpture	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 308	Later Chinese Art: From the Tenth Century to the Present	
ART HIST 310	Icons, Religion, and Empire: Early Christian and Byzantine Art, ca. 200-1453	
ART HIST 318	Romanesque and Gothic Art and Architecture	
ART HIST 320	Italian Renaissance Art	
ART HIST 321	Italian Art: 1250-1400	
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500	
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy	

ART HIST 330	The Painting & Graphic Arts of Germany 1350-1530
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel
ART HIST 332	Northern Painting and Graphics from Bosch and Holbein to Bruegel
ART HIST 333	Netherlandish Painting of the 17th Century
ART HIST 335	Study Abroad in Ancient/Medieval Art
ART HIST 336	Study Abroad in Renaissance/ Baroque/Northern Art
ART HIST 337	Study Abroad in 18th-20th Century Art
ART HIST 338	Study Abroad in African/Asian Art
ART HIST 341	Italian Baroque Art
ART HIST 346	British Art and Society from the Eighteenth Century to the Present
ART HIST 350	19th Century Painting in Europe
ART HIST 351	20th Century Art in Europe
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present
ART HIST 355	History of Photography
ART HIST 358	European Architecture: The Modern Movements
ART HIST/ AMER IND 359	American Indian Art History: Contemporary Issues
ART HIST 360	Gore Luxury Identity Mimesis: Northern Renaissance
ART HIST/DS 363	American Decorative Arts and Interiors: 1620-1840
ART HIST 364	History of American Art: Art, Material Culture, and Constructions of Identity, 1607-present
ART HIST 365	The Concept of Contemporary Art
ART HIST 367	American Architecture: Colonial and Federal
ART HIST 368	American Architecture: The 19th Century
ART HIST 371	Chinese Painting
ART HIST 372	Arts of Japan
ART HIST/ RELIG ST 373	Great Cities of Islam
ART HIST 375	Later Japanese Painting and Woodblock Prints
ART HIST/ ASIAN 379	Cities of Asia

400-level ART HIST (two required)

Code	Title	Credits
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
ART HIST 407	Topics in Nineteenth Century Art	
ART HIST 408	Topics in Twentieth-Century Art	
ART HIST 409	Topics in Contemporary Art	
ART HIST 411	Topics in Asian Art	
ART HIST 412	Topics in African and African Diaspora Art History	
ART HIST 413	Art and Architecture in the Age of the Caliphs	
ART HIST/ MEDIEVAL 415	Topics in Medieval Art	
ART HIST 420	Topics in Italian Renaissance Art	
ART HIST 425	Race and Gender in Italian Early Modern Art	
ART HIST/ ASIAN 428	Visual Cultures of India	
ART HIST 430	When Art Was Science: Western Europe c. 1400-1800	
ART HIST 431	Topics in Theory	
ART HIST 432	Multiculturalism and the New Museology	
ART HIST 435	Study Abroad in Ancient/Medieval Art	
ART HIST 436	Study Abroad in Renaissance/ Baroque/Northern Art	
ART HIST 437	Study Abroad in 18th-20th Century Art	
ART HIST 438	Study Abroad in African/Asian Art	
ART HIST 440	Art and Power in the Arab World	
ART HIST 449	Topics in Architectural History	
ART HIST 454	Art in Germany, 1900-1945	
ART HIST 457	History of American Vernacular Architecture and Landscapes	
ART HIST 463	Topics in American Material Culture	
ART HIST/DS/ HISTORY 464	Dimensions of Material Culture	
ART HIST 468	Frank Lloyd Wright	
ART HIST 469	Interdisciplinary Studies in the Arts	
ART HIST 475	Japanese Ceramics and Allied Arts	
ART HIST/ RELIG ST 478	Art and Religious Practice in Medieval Japan	
ART HIST 479	Art and History in Africa	

500-level ART HIST (one required)

Code	Title	Credits
ART HIST 500	Proseminar: Special Topics in Art History	
ART HIST 505	Proseminar in Ancient Art	
ART HIST 506	Curatorial Studies Exhibition Practice	
ART HIST 515	Proseminar in Medieval Art	
ART HIST 525	Proseminar in Italian Renaissance Art	
ART HIST 535	Proseminar in Northern European Painting	
ART HIST 555	Proseminar in 19th Century European Art	
ART HIST 556	Proseminar in 20th Century European Art	
ART HIST 563	Proseminar in Material Culture	

ART HIST 565	Proseminar in American Art
ART HIST 567	Proseminar in American Architecture
ART HIST 569	Interdisciplinary Studies in the Arts
ART HIST 575	Proseminar in Japanese Art
ART HIST 576	Proseminar in Chinese Art
ART HIST 579	Proseminar in African Art

Electives to meet minimum nine courses required

Code	Title	Credits
ART HIST 100-699		

CHRONOLOGICAL DISTRIBUTION

Of the nine required ART HIST courses, at least one course from each area:

Ancient to Medieval

Code	Title	Credits
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST 301	Myths, Loves, and Lives in Greek Vases	
ART HIST 302	Greek Sculpture	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture [1]	
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 310	Icons, Religion, and Empire: Early Christian and Byzantine Art, ca. 200-1453	
ART HIST 318	Romanesque and Gothic Art and Architecture	
ART HIST 321	Italian Art: 1250-1400	
ART HIST 335	Study Abroad in Ancient/Medieval Art	
ART HIST 371	Chinese Painting [1]	
ART HIST 372	Arts of Japan [1]	
ART HIST/ ASIAN 379	Cities of Asia [1]	
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
ART HIST 413	Art and Architecture in the Age of the Caliphs	
ART HIST/ MEDIEVAL 415	Topics in Medieval Art	
ART HIST 435	Study Abroad in Ancient/Medieval Art	
ART HIST 440	Art and Power in the Arab World [1]	
ART HIST 475	Japanese Ceramics and Allied Arts [1]	
ART HIST/ RELIG ST 478	Art and Religious Practice in Medieval Japan	

[1] Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of of those areas. Students with questions should consult the academic advisor for this program.

Early Modern (Circa 1400–Circa 1800)

Code	Title	Credits
ART HIST 305	History of Islamic Art and Architecture [1]	
ART HIST 308	Later Chinese Art: From the Tenth Century to the Present [1]	
ART HIST 320	Italian Renaissance Art	
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500	
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy	
ART HIST 330	The Painting & Graphic Arts of Germany 1350-1530	
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel	
ART HIST 332	Northern Painting and Graphics from Bosch and Holbein to Bruegel	
ART HIST 333	Netherlandish Painting of the 17th Century

ART HIST 457	History of American Vernacular Architecture and Landscapes
ART HIST 463	Topics in American Material Culture
ART HIST 468	Frank Lloyd Wright

[1] Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of of those areas. Students with questions should consult the academic advisor for this program.

THEORY AND METHOD DISTRIBUTION

Of the nine required ART HIST courses, at least one course from:

Code	Title	Credits
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST 355	History of Photography	
ART HIST 409	Topics in Contemporary Art	
ART HIST/ ASIAN 428	Visual Cultures of India	
ART HIST 430	When Art Was Science: Western Europe c. 1400-1800	
ART HIST 431	Topics in Theory	
ART HIST 432	Multiculturalism and the New Museology	
ART HIST 449	Topics in Architectural History	
ART HIST 463	Topics in American Material Culture	
ART HIST/DS/ HISTORY 464	Dimensions of Material Culture	
ART HIST 469	Interdisciplinary Studies in the Arts	
ART HIST 601	Introduction to Museum Studies I	
ART HIST 602	Introduction to Museum Studies II	
ART HIST 603	Curatorial Studies Colloquium	
ART HIST/ ASIAN 621	Mapping, Making, and Representing Colonial Spaces	
ART HIST/ HISTORY/JOURN/ L I S 650	History of Books and Print Culture in Europe and North America	

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence[2]
- 15 credits in ART HIST taken on the UW–Madison campus

[2] ART HIST courses numbered 300–699 are considered upper-level in the major.

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such as form, color, light, proportion, viewpoint, material, and narrative structure.
2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

Senior Thesis	3	Senior Thesis in major	3
Literature Breadth	3	Elective	6
	15		15

Total Credits 120

ADVISING AND CAREERS

ADVISING

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options. We also work closely with SuccessWorks at the College of Letters & Science to help students best apply the knowledge and skills acquired in the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors—as well as from L&S Advising—about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters & Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

Notes about the major requirements:

- Art history AP credits with a score of 4 or higher and 100-level art history courses count only toward the nine course minimum but do not count toward distribution requirements.
- Courses at the 200-level count only toward the nine course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: **1.** 300 level *AND* **2.** Chronological—either Ancient to Medieval or Early Modern *AND* **3.** Geographic—either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements. The following courses may satisfy distribution requirements even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one are of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

Career Resources:

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)
- Learn how we're transforming career preparation: L&S Career Initiative (http://ls.wisc.edu/lsci)

Art History Department Resources

- Art history professional development webpage (https://arthistory.wisc.edu/undergraduate-program/#professional-development)
- What to do with an art history degree? (http://arthistory.wisc.edu/why-major-in-art-history.htm)
- Art history majors discuss the value of the degree (http://arthistory.wisc.edu/testimonials.htm)
- Art history's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

This directed study may serve as an elective for the new undergraduate certificate in Curatorial Studies, as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print of online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3-credit internship, the student must average approximately 12 hours a week throughout the semester, including working at the host institution on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of 1 hour each month. Requires permission to work with faculty member to receive credit for internship project. 1–3 cr.

WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

ART HISTORY, B.S.

OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across

human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non–UW study abroad programs, the Office of Admissions (http://www.admissions.wisc.edu/equivalencies). For more information, see the Study Abroad website (http://www.studyabroad.wisc.edu).

HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (https://arthistory.wisc.edu/academics/undergrad/advising).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non-L&S-degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

REQUIREMENTS IN THE MAJOR

FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

- Complete the fourth unit of a foreign language; ***or***
- Complete the third unit of a foreign language ***and*** the second unit of an additional foreign language.

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

200-level ART HIST (two required)

Code	Title	Credits
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 203	Survey of Asian Art	
ART HIST/ AFROAMER 204	Introduction to Visual Cultures	
ART HIST 205	Global Arts	
ART HIST 210	A History of the World in 20 Buildings	
ART HIST 227	The Ends of Modernism	
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	
ART HIST/ ANTHRO/DS/ HISTORY/ LAND ARC 264	Dimensions of Material Culture	

300-level ART HIST (three required)

Code	Title	Credits
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST 301	Myths, Loves, and Lives in Greek Vases	
ART HIST 302	Greek Sculpture	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	Early Chinese Art: From Antiquity to the Tenth Century	
ART HIST 308	Later Chinese Art: From the Tenth Century to the Present	
ART HIST 310	Icons, Religion, and Empire: Early Christian and Byzantine Art, ca. 200-1453	
ART HIST 318	Romanesque and Gothic Art and Architecture	
ART HIST 320	Italian Renaissance Art	
ART HIST 321	Italian Art: 1250-1400	
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500	
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy	
ART HIST 330	The Painting & Graphic Arts of Germany 1350-1530	
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel	
ART HIST 332	Northern Painting and Graphics from Bosch and Holbein to Bruegel	
ART HIST 333	Netherlandish Painting of the 17th Century	
ART HIST 335	Study Abroad in Ancient/Medieval Art	
ART HIST 336	Study Abroad in Renaissance/ Baroque/Northern Art	
ART HIST 337	Study Abroad in 18th-20th Century Art	
ART HIST 338	Study Abroad in African/Asian Art	
ART HIST 341	Italian Baroque Art	
ART HIST 346	British Art and Society from the Eighteenth Century to the Present	
ART HIST 350	19th Century Painting in Europe	
ART HIST 351	20th Century Art in Europe	
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST 355	History of Photography	
ART HIST 358	European Architecture: The Modern Movements

ART HIST 603	Curatorial Studies Colloquium	
ART HIST/ ASIAN 621	Mapping, Making, and Representing Colonial Spaces	
ART HIST/ HISTORY/JOURN/ L I S 650	History of Books and Print Culture in Europe and North America	

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence[2]
- 15 credits in ART HIST taken on the UW–Madison campus

[2] ART HIST courses numbered 300–699 are considered upper-level in the major.

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such as form, color, light, proportion, viewpoint, material, and narrative structure.
2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

FOUR-YEAR PLAN

Electives	6	Literature Breadth	3
Senior Thesis	3	Senior Thesis in major	3
Literature Breadth	3	Elective	6
	15		15

Total Credits 120

ADVISING AND CAREERS

ADVISING

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options. We also work closely with SuccessWorks at the College of Letters & Science to help students best apply the knowledge and skills acquired in the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors—as well as from L&S Advising—about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters & Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

Notes about the major requirements:

- Art history AP credits with a score of 4 or higher and 100-level art history courses count only toward the nine course minimum but do not count toward distribution requirements.
- Courses at the 200-level count only toward the nine course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: **1.** 300 level *AND* **2.** Chronological—either Ancient to Medieval or Early Modern *AND* **3.** Geographic—either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements. The following courses may satisfy distribution requirements even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one are of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

Career Resources:

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)
- Learn how we're transforming career preparation: L&S Career Initiative (http://ls.wisc.edu/lsci)

Art History Department Resources

- Art history professional development webpage (https://arthistory.wisc.edu/undergraduate-program/#professional-development)
- What to do with an art history degree? (http://arthistory.wisc.edu/why-major-in-art-history.htm)
- Art history majors discuss the value of the degree (http://arthistory.wisc.edu/testimonials.htm)
- Art history's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

This directed study may serve as an elective for the new undergraduate certificate in Curatorial Studies, as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar

with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print of online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3-credit internship, the student must average approximately 12 hours a week throughout the semester, including working at the host institution on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of 1 hour each month. Requires permission to work with faculty member to receive credit for internship project. 1–3 cr.

Affiliate UW–Milwaukee Assistant Professor Moon

WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

ART HISTORY, CERTIFICATE

The art history certificate requires four courses and is open to any undergraduate major.

The certificate is designed to meet twenty-first century needs by promoting visual literacy in an increasingly visual world. Our classes teach critical and creative approaches to analysis, problem-solving, writing, and visual communication using a variety of artistic media, including painting, sculpture, architecture, photography, prints, ephemera, and the decorative arts.

Students earning the certificate will hone skills in visual analysis and interpretation that make them more competitive in a variety of today's fields of employment, including (but not limited to) professions in the arts, in social sciences, and in physical sciences—all of which require the skills taught in our courses.

*Note for students who are thinking about declaring the art history certificate as well as the material culture certificate: Undergraduate students may request permission to complete both the art history certificate and the material culture certificate but ***only one course*** can overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.

HOW TO GET IN

Students are eligible to declare the certificate at any point in their studies. We encourage students to declare as early as possible in order to plan their required coursework. Students should contact the undergraduate advisor to declare the certificate.

*Students thinking about declaring both the Art History Certificate **and** the Material Culture Certificate must have permission of the program advisor.*

REQUIREMENTS

REQUIREMENTS FOR THE CERTIFICATE

Four courses and 12 credits are required, as follows:

INTERMEDIATE SURVEY COURSE

Complete one of:

Code	Title	Credits

ELECTIVES

To attain the minimum 4 courses and 12 credits, complete any course listed above not needed for the area requirements, or any of these courses:

Code	Title	Credits
ART HIST 101	The Study of Art, Present and Past	4
ART HIST 103	Topics in Art History	3-4
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	3-4
ART HIST 105	Introductory Topics in Art History	3
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	4
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	4
ART HIST 203	Survey of Asian Art	3-4
ART HIST/ AFROAMER 204	Introduction to Visual Cultures	3
ART HIST 205	Global Arts	4
ART HIST 206	Survey of Photography: 1839 to 1989	3-4
ART HIST 210	A History of the World in 20 Buildings	3
ART HIST 227	The Ends of Modernism	4
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	3
ART HIST/ AFROAMER 242	Introduction to Afro-American Art	3
ART HIST 601	Introduction to Museum Studies I	3
ART HIST 602	Introduction to Museum Studies II	3
ART HIST 681	Senior Honors Thesis	3
ART HIST 682	Senior Honors Thesis	3
ART HIST 691	Senior Thesis	3-6
ART HIST 692	Senior Thesis	3-6
ART HIST 697	Undergraduate Curatorial Studies Internship (Directed Study)	1-3
ART HIST 698	Directed Study	2-3
ART HIST 699	Directed Study	1-3

RESIDENCE AND QUALITY OF WORK

- At least 6 Certificate credits must be earned in residence
- A 2.000 GPA is required in all courses approved for the certificate

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Describe objects and images accurately; identify different stylistic characteristics and media; recall artists and art movements; analyze images.
2. Interpret art in context of deeper historical knowledge of specific cultures, acquire critical reading skills, integrate research.
3. Apply critical reading and writing skills, produce original interpretations, make plausible arguments based on visual and historical evidence, acquire sophisticated research abilities; formal oral presentation skills.

ADVISING AND CAREERS

Advising questions may be directed to the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), or the director of undergraduate studies in the department.

Each fall, the department hosts an Art History Majors and Career Fair for majors and certificate students as well as anyone interested in the field. We discuss course opportunities and internships on campus and in the community. We also invite alumni to speak about their career paths. Our director of undergraduate studies also hosts a workshop on "How to Apply to Graduate School" each fall. We also work with SuccessWorks (https://careers.ls.wisc.edu) to organize events for our students.

PEOPLE

PEOPLE

Professors Andrzejewski, Cahill, Casid, Chopra, Dale, Marshall, Martin, Phillips, Rosenblum (chair)
Associate Professors Li, Phillips-Court
Assistant Professors Nelson, Pruitt
Affiliate Professors Aylward, Clark, Kern, Nadler
Affiliate Associate Professor Abdu'Allah

MATERIAL CULTURE STUDIES, CERTIFICATE

The certificate in material culture studies has two interrelated goals. First, students will become acquainted with the field of material culture studies and its methodologies. They will learn what kinds of objects are considered in the study of material culture (from small, intimate artifacts of daily life to large cultural landscapes) and how scholars and professionals from different fields and in different contexts enlist material culture in their research and activities. They will gain an appreciation for the information artifacts can provide. They will learn the kinds of questions that can be asked of objects and the kind of information that artifacts can show us. They will become familiar with (and able to distinguish between) descriptive and interpretive components of material culture study, and gain an awareness of the variety of methods. Second, students will gain an appreciation for the ways that "things" help us to connect to the world and see it in a new way, and the ways "things" give meaning to our lives and the lives of those around us.

Note for students who are thinking about declaring the material culture certificate as well as the art history certificate: Undergraduate students may request permission to complete both the material culture certificate and the art history certificate but **only one course** can overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.

HOW TO GET IN

Students are required to declare the material culture studies certificate with the program's certificate faculty director, Professor Ann Smart Martin, or the undergraduate program advisor in the Department of Art History, Teddy Kaul. Students are strongly urged to meet with the faculty director, or the undergraduate advisor, at their earliest convenience to declare the certificate.

Professor Smart Martin can be reached at asmartin@wisc.edu or by phone at 608-263-5684 to set up an appointment. Teddy Kaul is located in the Conrad A. Elvehjem Building in room 222; he can be reached at ejkaul@wisc.edu, or by phone at 608-263-2373, to set up an appointment.

*Note for students who are thinking about declaring the Material Culture Certificate as well as the Art History Certificate: Undergraduate students may request permission to complete both the Material Culture certificate and the Art History certificate but ***only one course*** can overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.

REQUIREMENTS

CERTIFICATE REQUIREMENTS

The Material Culture Studies Certificate Program requires that students complete **13 credits,** which includes the two core courses and two elective courses from the list below. An internship/practicum experience is recommended, but not required.

GOAL OF CERTIFICATE REQUIREMENTS

The goal of the certificate requirements is to provide students with a set of interdisciplinary skills, including the development of visual literacy, and an understanding of specific methods and theories of material culture analysis as they are most often practiced. A student might select electives to specialize in a particular geographic area of study or type of object, or to provide maximum depth in a certain period of time.

QUALITY OF WORK AND RESIDENCY REQUIREMENTS

A cumulative 2.000 GPA required for all certificate coursework.
7 credits, counting for the certificate, taken in residence at UW–Madison.

SCAND ST 296	The Scandinavian Heritage in America	3
SCAND ST/ FOLKLORE 440	Scandinavian American Folklore	3
THEATRE 327	History of Costume for the Stage	3

[1] Prerequisite: no prerequisites. Course is rotated among teams of two faculty members from the core material culture staff. The course explores the field of material culture, introducing the range of approaches and topics within it. Faculty, staff, and professionals from different disciplines and fields are invited to discuss their work and perspective, and discuss current literature.

[2] The intent of this requirement is to have an intensive small-size seminar to teach the methods used by material culture scholars, a set of tools for analysis, hands-on training and more familiarity with material culture theories, themes and objects.

[3] Choices should be clustered around a focus. For example, one strategy is to take a range of courses related to a specific geographic area, specialization, or time period. Other students may choose to pursue a cluster of courses that emphasizes nationally emerging specializations within the field of material culture including courses related to museums/exhibitions, historic preservation, archival technology, or product design. Students should work with a material culture faculty member to develop this focus. Other courses can be selected as electives from traditional disciplinary approaches and content, but must be approved by the chair of the Material Culture Advisory Committee. Students must work closely with both their advisor within their home major and an advisor among material culture advisors to assure that both major and certificate requirements are fulfilled.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Acquisition of skills to describe and analyze objects of multiple types, scales and media that constitute the material world across time and space.
2. Understanding of the complex and multiple ways that objects and people relate in both the past and in the present using trans-disciplinary perspectives.
3. Ability to interpret and otherwise make meaning from objects using methods and theories from multiple disciplines including but not limited to art history, archaeology, anthropology, design, folklore/ folklife studies, geography, history, literary studies, landscape history, and science studies.

4. Discernment of the importance of materiality and making in the production and shaping of culture.
5. Fluency in using research resources and tools appropriate for specific kinds of objects.
6. Demonstration of particular skills for object-based research projects, as well as online and in-person exhibitions, using objects and collections to prepare students for careers that include positions in museums, archives, and other professional contexts.
7. Coherent presentation of ideas in multiple media (oral, visual, digital, and written).

ADVISING AND CAREERS

ADVISING

All students should meet with the certificate's faculty director (Professor Ann Smart Martin, 205 Conrad A. Elvehjem Building; asmartin@wisc.edu (asmartin@wisc.edu) 608-263-5684) at or near the beginning of work on the certificate. At that meeting, students work with the director to outline their course of study, and to match a course plan with their interests. After a plan is in place, students are encouraged to stay in regular contact with the undergraduate program advisor (Teddy Kaul, 222 Conrad A. Elvehjem Building; ejkaul@wisc.edu; 608-263-2373) as they continue through the program. Each term the program's director or advisor will contact all certificate students, asking those nearing completion of their certificate coursework to send a notification that includes an estimate of when they will be completing the certificate requirements. For more information about the certificate and contact information for the advisor, see the program website (http://materialculture.wisc.edu).

CAREERS: WHAT CAN MATERIAL CULTURE DO FOR YOU? LIFE-PRACTICE AND CAREERS

Interdisciplinary practice is central to material culture analysis. Significant engagement with material culture can have a noteworthy positive effect on students from a wide range of majors in their preparation for future careers. Understanding principles of design, analyzing the cultural meaning of physical objects, and gaining knowledge of varied systems of making, distributing, and using artifacts and consumer goods throughout history are all broadly applicable learning outcomes. The curricula of the 21st century often place extra value on science and technology, to the detriment of the study of the arts and humanities. The Material Culture Program helps integrate these and other disparate spheres into a university education. One undergraduate student summed it thus:

> I ended up being able to use what I learned in material culture for my research in human computer interaction and design. I think having a background in material culture strengthened my skills as a user experience designer (which is what I will be doing at Intel after graduation).
>
> Erica Lewis, 2016
> Undergraduate certificate student
> Engineering/Materials Design

Other material culture certificate holders have gone on to careers in museums, galleries, historic sites, historic preservation, digital media, design practice, universities, and business. Another former student comments:

Having worked in museums large and small, in education, exhibition design and development, collections, and interpretation - I draw on my background in Material Culture on a daily basis. As a historian, the practice of reading and contextualizing objects as primary sources is essential. But even more than an academic approach, the empathy one develops when learning to understand the world through the stuff of daily life is invaluable to the interdisciplinary collaboration of today's workplace.

ASIAN AMERICAN STUDIES PROGRAM

The Asian American Studies Program is an interdisciplinary program that focuses on the scholarship and experiences of Americans, Pacific Islanders, and immigrants to the United States from Asian heritage groups. The program sheds light on Asian American experiences and concerns, both historically and in contemporary society. The certificate in Asian American studies provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, communities, and culture. The program also serves as a teaching and resource center not only for Asian Americans but for the University and Madison community as a whole.

Courses offered by the program and through other departments incorporate the perspective of a variety of disciplines: anthropology, communication arts, cultural studies dance, education, English, ethnic studies, film, history, human development and family studies, journalism, literature, media, political science, popular culture, psychology, sociology, theatre, and visual arts. New course topics are introduced each year. Examples of past topics include: Asian American History, Asian American Literature, Asian American Women Writers, Asian Americans in the Midwest, Hmong American Studies, Contemporary Legal Issues in Asian American Communities, Mixed Race Asian Americans, Asian American Cultural Politics, Southeast Asian Americans in U.S. Schools, Asian American Dance, Asian Americans & Media, Afro-Asian Improvisational Dance, Psychology of Hmong Americans, and community-based research and service-learning courses.

All program courses fulfill the ethnic studies requirement and breadth requirements in the appropriate divisions.

ASIAN AMERICAN STUDIES, CERTIFICATE

The Asian American studies certificate program provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, history, literature, and culture. Interdisciplinary in nature, the certificate can be obtained by completing 15 credits of coursework.

Students receiving a certificate will have a transcript notation indicating that they have received a certificate in Asian American studies. A certificate in Asian American studies acknowledges that a student has made a significant effort to learn about Asian American history and culture, the social location of Asian Americans in U.S. society and transnationally, and the experiences of Asian Americans, historically and contemporarily.

The certificate program is open to any undergraduate student regardless of major or college who has an interest in Asian American studies and is in good academic standing at the University of Wisconsin–Madison. Interested students should contact Program Administrator/Academic Advisor Nhung Nguyen (https://aas.wiscweb.wisc.edu/staff/nhungnguyen) to discuss their study plans and file a Certificate Declaration form. While many of the courses below are cross-listed, registration under Asian American ensures that credits earned for the certificate are recognized by the registrar's office upon filing a Certificate Declaration form. Not all courses are offered each term. Topic courses may be repeated for credit.

HOW TO GET IN

For more information or to declare a certificate, please contact Nhung Nguyen, Program Administrator/Academic Advsior at asianamerican@letsci.wisc.edu or 608-263-2976. Students may also contact Director Cindy I-Fen Cheng at cicheng@wisc.edu.

Download a certificate declaration form here (https://asianamerican.wisc.edu/certificate).

REQUIREMENTS

Students gain knowledge about specific ethnic groups, socioeconomic political histories, cultures, and contemporary issues through an Asian American lens.

15 CREDITS ARE REQUIRED, TO INCLUDE:

Code	Title	Credits

ASIAN LANGUAGES AND CULTURES

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

STUDY ABROAD

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all U.S. institutions, and #16 among all U.S. universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High).

Currently there are 60 study abroad programs across Asia. Students who participate in approved programs will receive residence credit for study abroad. More information about study abroad, application process and costs is available through International Academic Programs (https://www.studyabroad.wisc.edu). With preplanning students may fulfill major requirements during study abroad. It is important to meet with the undergraduate advisor to create a study plan.

Students can also gain professional experience, through various internship opportunities abroad. More information about internship opportunities is available through International Internship Programs (http://internships.international.wisc.edu).

STARTING COURSEWORK TOWARDS THE MAJOR

Students may declare the Asian Languages and Cultures major at any time. Before declaring the major, students may begin coursework to explore the language and fields of interest. Those students who have studied an Asian language prior to coming to UW–Madison will have to take a placement test (https://alc.wisc.edu/languages/placement-tests) to determine the best class to enroll in on campus.

Code	Title	Credits
The courses noted below are open to freshman and have no prerequisites:		
ASIAN 100	Gateway to Asia: Special Topics	3-4

PEOPLE

FACULTY

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialities range from medical humanities in India, the Hinduist roots of yoga, or inflecting contemporary mindfulness practice with insights from Tibetan buddhism, to human rights in Thailand - from Chinese ghost stories, traditional Sinology, and mathematically inflected Chinese philology, to sociolinguistics, discourse analysis, and pragmatics in Mandarin, Japanese, Korean, and Indonesian - and from critical reading of late-Heian tale fiction, early modern Japanese comedic narratives, and haiku, to manga, anime, and Japanese counterculture.

EAST ASIA

Charo D'Etcheverry (http://alc.wisc.edu/about/faculty/charo-detcheverry) (Associate Professor). Area: Classical Japanese Literature

Naomi Geyer (http://alc.wisc.edu/about/faculty/naomi-geyer) (Associate Professor). Area: Japanese Language

Rania Huntington (http://alc.wisc.edu/about/faculty/rania-huntington) (Professor). Area: Ming and Qing Narrative and Drama, Chinese Literature of the weird and supernatural

Adam L. Kern (http://alc.wisc.edu/about/faculty/adam-l-kern) (Professor). Area: Popular Literature, Culture, Poetry, Theater, and Visual Culture of early modern-modern Japan.

Byung-jin Lim (http://alc.wisc.edu/about/faculty/byung-jin-lim) (Associate Professor) .Area: Korean Language and Linguistics, Second / Foreign Language Acquisition, Korean Language Textbook Development

Junko Mori (http://alc.wisc.edu/about/faculty/steve-ridgely) (Professor). Area: Japanese Linguistics, Applied Linguistics, Sociolinguistics

Takako Nakakubo (http://alc.wisc.edu/about/faculty/takako-nakakubo) (Faculty Associate). Area: Second Language Acquisition of Japanese, Japanese Pedagogy

William Nienhauser (http://alc.wisc.edu/about/faculty/william-nienhauser) (Professor). Area: Early Traditional Chinese Fiction and History; early poetry (Du Fu and Tao Qian)

Steve Ridgely (http://alc.wisc.edu/about/faculty/steve-ridgely) (Associate Professor). Area: Modern Japanese Literature, Pop culture, TransAsian studies

Hongming Zhang (http://alc.wisc.edu/about/faculty/hongming-zhang) (Professor). Area: Chinese Linguistics; History of Chinese Language; Teaching Chinese as a Second Language

Weihua Zhu (http://alc.wisc.edu/about/faculty/weihua-zhu) (Assistant Professor). Area: Chinese Language, Pedagogy and Second Language Acquisition

SOUTH ASIA

Gudrun Bühnemann (http://alc.wisc.edu/about/faculty/gudrun-b%C3%BChnemann) (Professor). Area: Sanskrit Language and Literature; Buddhism in India and Nepal; Hinduism; Tantrism; Yoga Studies

Anthony Cerulli (http://alc.wisc.edu/about/faculty/anthony-cerulli) (Associate Professor). Area: Theory and Method in the Study of Religion in South Asia; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture; Malayalam Language.

John D. Dunne (http://alc.wisc.edu/about/faculty/john-d-dunne) (Professor). Area: Buddhist Philosophy and Contemplative Practice; Religious Studies; Cognitive Science of Religion

SOUTHEAST ASIA

Erlin Barnard (http://alc.wisc.edu/about/faculty/erlin-barnard) (Faculty Associate) Area: Indonesian Language, Language Pedagogy; Materials Development; Second Language Acquisition

Tyrell Haberkorn (Associate Professor) Area: Violence, Human Rights, Sovereignty, Arbitrary Detention, Land Rights, Agrarian Struggle,

Historiographies of Repression, Gender Studies, Socialism, Dissident Literature, Southeast Asia (Thailand).

LANGUAGE INSTRUCTORS

Language instructors (http://alc.wisc.edu/about/language-instructors) are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (https://flas.wisc.edu)
FLAS fellowships are funded by the U.S. Department of Education and administered by the UW's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (https://flas.wisc.edu/Languages.html)of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Scholarships@UW–Madison (https://scholarships.wisc.edu/Scholarships)
This is the primary campus wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (https://awards.advising.wisc.edu)
We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (https://awards.advising.wisc.edu/scholarships/nationally-competitive) and campus-wide awards (https://awards.advising.wisc.edu/scholarships/campus-wide) for research, service and leadership—activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (https://awards.advising.wisc.edu/schedule-an-appointment) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (http://borenawards.org)
Campus Representative: Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director, International Academic Programs
These scholarships provide up to $20,000 to U.S. undergraduate students to study abroad in areas of the world that are critical to U.S. interests and underrepresented in study abroad, including Africa, Asia, Central & Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (http://borenawards.org/boren_scholarship/preferences.html)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (http://borenawards.org/boren_scholarship/preferences.html)).

Critical Language Scholarship Program (http://www.clscholarship.org)
Campus Representative: Mark Lilleleht (awards@iris.wisc.edu), Assistant Director, IRIS
The CLS program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities are encouraged to apply.

Gilman Scholarship Program
Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

ASIAN LANGUAGES AND CULTURES, B.A.

The 21st century has been called the "Asian Century." Indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors who opt the ALC major study Asia in a robustly transnational and transhistorical perspective, working with faculty across the department. Alternatively, majors may choose to take a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia, thereby electing to work more closely with the professors who specialize in these specific regions.

East Asia
The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, B. Nienhauser, S. Ridgely, H. Zhang, W. Zhu.

South Asia
The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

Southeast Asia
The Southest Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai and Vietnamese language; and probe Human rights in Thailand; explore literature of the region; and history and politics in Southeast Asia. ALC faculty and instructors offering courses in this option include: E. Barnard, T. Haberkorn, C. Lee, J. Surasin, S. Suryani, H. Dinh, S. Zamar.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu); Center for South Asia (https://southasia.wisc.edu); and Center for Southeast Asian Studies (https://seasia.wisc.edu).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

HOW TO GET IN

DECLARATION

Students who who have prior experience in a language must take a placement test before enrolling in a language course beyond the first-semester level. For information about the placement test and test dates, please visit the department website (http://alc.wisc.edu/languages/placement-tests).

To declare the major, students must meet with the undergraduate advisor to review the requirements and discuss course options.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Fulfilled with completion of University General Education requirements Quantitative Reasoning a (QR A) and Quantitative Reasoning b (QR B) coursework. Please note that some majors may require students to complete additional math coursework beyond the B.A. mathematics requirement.
Foreign Language	• Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include one 3+ credit course in the biological sciences; must include one 3+ credit course in the physical sciences
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non–L&S degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

REQUIREMENTS FOR THE MAJOR

Students must take 30 credits as follows: [2]

INTRODUCTORY COURSE

Code	Title	Credits
ASIAN 100	Gateway to Asia: Special Topics [1]	3-4
or ASIAN 300	Topics in Asian Studies

RESIDENCY AND QUALITY OF WORK

- 2.000 GPA in all ASIAN, ASIALANG, and approved courses for the major
- 2.000 GPA in 15 upper level major credits, taken in residence [3]
- 15 credits in the major, taken in residence

[3] Intermediate and Advanced level Major courses are Upper Level

HONORS IN THE MAJOR

Honors in the Major is not currently available for this major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree — To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study aa new language and culture and how to advance their proficiency as life-long learners.\\n

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss
1244 Van Hise Hall
608-890-0138
rweiss@wisc.edu
Schedule an advising appointment (https://calendar.wisc.edu/scheduling-assistant/public/profiles/fUerTooa.html)

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options or advance through their four-year plans.

INTERNATIONAL DIRECTIONS ADVISING

LANGUAGE INSTITUTE

The Language Institute (https://languages.wisc.edu) provides academic and career advising to undergraduate students interested in languages and international area studies. The International Directions advisor provides academic and career advising to undergraduate students who are interested in languages and international area studies. Learn more (https://languages.wisc.edu/advising).

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of

Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)
- Learn how we're transforming career preparation: L&S Career Initiative (http://ls.wisc.edu/lsci)

PEOPLE

FACULTY

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialities range from traditional medicine in India, the Hinduist roots of yoga, or diversifying contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, anime, and Japanese counterculture. Visit our faculty pages (https://alc.wisc.edu/about/faculty) for more information on areas of expertise, current research, teaching and publications.

Erlin Barnard esbarnard@wisc.edu
Faculty Associate
Fields of Study: Language Pedagogy; Materials Development; Second Language Acquisition

Gudrun Bühnemann gbuhnema@wisc.edu
Professor
Fields of Study: Sanskrit language and literature; Buddhism in India and Nepal; Hinduism; Tantrism and Yoga Studies

Anthony Cerulli acerulli@wisc.edu
Associate Professor
Fields of Study: Hinduism; Religion in South Asia; Medical Humanities; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture

Charo D'Etcheverry cdetcheverry@wisc.edu
Associate Professor
Fields of Study: Classical Japanese literature (especially court fiction & its reception and early kabuki)

Anatoly Detwyler detwyler@wisc.edu
Assistant Professor
Fields of Study: Modern Chinese literature and history, comparative new media, information studies

John D. Dunne jddunne@wisc.edu
Professor
Fields of Study: Buddhist philosophy and contemplative practice; Religious Studies; Cognitive Science of Religion; Contemplative Science

Naomi Geyer nfgeyer@wisc.edu
Associate Professor
Fields of Study: Japanese Language, Language Pedagogy, Pragmatics

Tyrell Haberkorn tyrell.haberkorn@wisc.edu
Associate Professor
Fields of Study: Violence, Human Rights, Sovereignty, Arbitrary Detention, Land Rights, Agrarian Struggle, Historiographies of Repression, Gender Studies, Socialism, Dissident Literature, Southeast Asia (Thailand).

Rania Huntington huntington@wisc.edu
Professor
Fields of Study: Ming and Qing narrative and drama, literature of the weird and supernatural, memory in literature, depiction of women in literature

Adam L. Kern alkern@wisc.edu
Professor
Fields of Study: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyôshi, etc) and beyond.

Hieyoon Kim Hieyoon.kim@wisc.edu
Assistant Professor
Fields of Study: Cinema; Media activism; Cultural Studies; History of Modern and Contemporary Korea

Byung-jin Lim byungjin.lim@wisc.edu
Associate Professor
Fields of Study: Korean Language and Linguistics, Second/Foreign Language Acquisition, Computer-Mediated Communication, Korean Language Textbook Development

Junko Mori jmori@wisc.edu
Professor
Fields of Study: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Takako Nakakubo tnakakubo@wisc.edu
Faculty Associate
Fields of Study: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies

William Nienhauser whnienha@wisc.edu
Professor
Fields of Study: Early traditional fiction and history; early poetry (especially Du Fu and Tao Qian)

Steve Ridgely steve.ridgely@wisc.edu
Associate Professor
Fields of Study: Modern Japanese literature, Cultural Theory, Transasian Studies

Hongming Zhang hzhang6@wisc.edu
Professor

Fields of Study: Chinese linguistics; syntax-phonology interface; prosodic phonology; poetic prosody; history of Chinese language; teaching Chinese as a second language

Weihua Zhu wzhu34@wisc.edu (wzhu34@wisc.edu)
Assistant Professor
Fields of Study: Discourse Analysis, Pragmatics, Pedagogy and Second Language Acquisition

WISCONSIN EXPERIENCE

UNDERGRADUATE RESEARCH

Students in the ALC department academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (https://teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduate-research) that provide research opportunities for undergraduates at UW–Madison including:

- Hilldale Undergraduate/Faculty Research Fellowships (https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship)
- McNair Scholars (http://grad.wisc.edu/mcnair)
- Summer Research Programs (https://grad.wisc.edu/diversity/srop)
- Undergraduate Research Scholars (https://urs.ls.wisc.edu)
- The Wisconsin Idea Undergraduate Fellowship Program (https://morgridge.wisc.edu/students/wisconsin-idea-fellowships)

WISCONSIN SUMMER LANGUAGE INSTITUTES

Each summer around 200 undergraduate students, graduate students, professionals, and others come to UW-Madison to study a language at the Wisconsin Intensive Summer Language Institutes (WISLI) (https://wisli.wisc.edu). WISLI is host to five summer language institutes which offer high-quality courses in 30 less commonly taught languages:

Arabic, Persian, and Turkish Language Immersion Institute (APTLII) (https://aptlii.wisc.edu)
Central Eurasian Studies Summer Institute (CESSI) (https://cessi.wisc.edu)
South Asia Summer Language Institute (SASLI) (https://sasli.wisc.edu)
Southeast Asian Studies Summer Institute (SEASSI) (https://seassi.wisc.edu)

STUDY ABROAD

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all U.S. institutions, and #16 among all U.S. universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High). There are nearly 60 study abroad opportunities across Asia. Approved UW programs will allow students to receive residents credit while abroad. With pre-planning students may also fulfill major requirements on academic programs abroad, however careful planning and discussion with your advisor are key. For more information about programs, application process and fees, visit: International Academic Programs (https://www.studyabroad.wisc.edu).

Students may also gain career and professional experience, through various internship opportunities abroad. To review opportunities, application process and fees, visit: International Internship Programs (http://internships.international.wisc.edu).

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (https://flas.wisc.edu)
Center for East Asian Studies FLAS Coordinator: Laurie Dennis, ldennis@wisc.edu (ldennis@international.wisc.edu), 325 Ingraham Hall
Center for South Asian FLAS Coordinator: Lalita du Perron, duperron@southasia.wisc.edu, 203 Ingraham
Center for Southeast Asian Studies FLAS Coordinator: Michael Cullinane, mmcullin@wisc.edu, (mjstuden@wisc.edu) 207 Ingraham

FLAS fellowships are funded by the U.S. Department of Education and administered by the UW's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (https://flas.wisc.edu/Languages.html)of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are **two separate competitions** requiring **two separate and complete applications**.

Scholarships@UW-Madison (https://scholarships.wisc.edu/Scholarships)
This is the primary campus wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (https://awards.advising.wisc.edu)
We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (https://awards.advising.wisc.edu/scholarships/nationally-competitive) and campus-wide awards (https://awards.advising.wisc.edu/scholarships/campus-wide) for research, service and leadership—activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (https://awards.advising.wisc.edu/schedule-an-appointment) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (http://borenawards.org)

Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to $20,000 to U.S. undergraduate students to study abroad in areas of the world that are critical to U.S. interests and underrepresented in study abroad, including Africa, Asia, Central and Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (http://borenawards.org/boren_scholarship/preferences.html)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (http://borenawards.org/boren_scholarship/preferences.html)). Undergraduates with questions about the Boren Scholarship (https://www.borenawards.org/scholarships/program-basics/boren-scholarship-basics) should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs.

Critical Language Scholarship Program (http://www.clscholarship.org)
Campus Representative: Mark Lilleleht, Assistant Director for Awards, at awards@iris.wisc.edu

The CLS program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities are encouraged to apply.

Gilman Scholarship Program
Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES

East Asia
The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, B. Nienhauser, S. Ridgely, H. Zhang, W. Zhu.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu); Center for South Asia (https://southasia.wisc.edu); and Center for Southeast Asian Studies (https://seasia.wisc.edu).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE EAST ASIAN OPTION

30 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the East Asian Option:

FOUR-YEAR PLAN

See Four Year Plan for the Asian Languages and Cultures Major; your course choices for the East Asian Studies Named Option will focus on that region.

ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES

South Asia
The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu); Center for South Asia (https://southasia.wisc.edu); and Center for Southeast Asian Studies (https://seasia.wisc.edu).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE SOUTH ASIAN STUDIES OPTION

30 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the South Asian Option:

FOUR-YEAR PLAN

See Four Year Plan for the Asian Languages and Cultures Major; your course choices for the Southeast Asian Studies Named Option will focus on that region.

ASIAN LANGUAGES AND CULTURES, B.S.

The 21st century has been called the "Asian Century." Indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors who opt the ALC major study Asia in a robustly transnational and transhistorical perspective, working with faculty across the department. Alternatively, majors may choose to take a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia, thereby electing to work more closely with the professors who specialize in these specific regions.

East Asia
The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, B. Nienhauser, S. Ridgely, H. Zhang, W. Zhu.

South Asia
The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

Southeast Asia

The Southest Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai and Vietnamese language; and probe Human rights in Thailand; explore literature of the region; and history and politics in Southeast Asia. ALC faculty and instructors offering courses in this option include: E. Barnard, T. Haberkorn, C. Lee, J. Surasin, S. Suryani, H. Dinh, S. Zamar.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu); Center for South Asia (https://southasia.wisc.edu); and Center for Southeast Asian Studies (https://seasia.wisc.edu).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

HOW TO GET IN

DECLARATION

Students who who have prior experience in a language must take a placement test before enrolling in a language course beyond the first-semester level. For information about the placement test and test dates, please visit the department website (http://alc.wisc.edu/languages/placement-tests).

To declare the major, students must meet with the undergraduate advisor to review the requirements and discuss course options.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 22) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * * The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a bachelor of science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum. View a comparison of the degree requirements here. (https://pubs.wisc.edu/home/archives/ug15/images/babs2009.pdf)

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Two (2) 3+ credits of intermediate/advanced level MATH, COMP SCI, STAT Limit one each: COMP SCI, STAT
Foreign Language	Complete the third unit of a foreign language Note: A unit is one year of high school work or one semester/term of college work.
L&S Breadth	• Humanities, 12 credits: 6 of the 12 credits must be in literature • Social Sciences, 12 credits • Natural Sciences, 12 credits: must include 6 credits in biological science; and must include 6 credits in physical science
Liberal Arts and Science Coursework	108 credits
Depth of Intermediate/Advanced work	60 intermediate or advanced credits
Major	Declare and complete at least one (1) major
Total Credits	120 credits
UW-Madison Experience	30 credits in residence, overall 30 credits in residence after the 86th credit
Minimum GPAs	2.000 in all coursework at UW–Madison 2.000 in intermediate/advanced coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S *only need to fulfill the major requirements* and do not need to complete the L&S breadth and

degree requirements above. Please note that the following special degree programs are not considered majors so are not available to non-L&S-degree-seeking candidates:

- **Applied Mathematics, Engineering and Physics (Bachelor of Science–Applied Mathematics, Engineering and Physics)**
- **Journalism (Bachelor of Arts–Journalism; Bachelor of Science–Journalism)**
- **Music (Bachelor of Music)**
- **Social Work (Bachelor of Social Work)**

View as listView as grid

- **ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES** (P. 433)
- **ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES** (P. 435)
- **ASIAN LANGUAGES AND CULTURES: SOUTHEAST ASIAN STUDIES** (P. 437)

RESIDENCY AND QUALITY OF WORK

- 2.000 GPA in all ASIAN, ASIALANG, and approved courses for the major
- 2.000 GPA in 15 upper level major credits, taken in residence [3]
- 15 credits in the major, taken in residence

[3] Intermediate and Advanced level Major courses are Upper Level

HONORS IN THE MAJOR

Honors in the Major is not currently available for this major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study aa new language and culture and how to advance their proficiency as life-long learners.\\n

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss
1244 Van Hise Hall
608-890-0138
rweiss@wisc.edu
Schedule an advising appointment (https://calendar.wisc.edu/scheduling-assistant/public/profiles/fUerTooa.html)

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options or advance through their four-year plans.

INTERNATIONAL DIRECTIONS ADVISING

LANGUAGE INSTITUTE

The Language Institute (https://languages.wisc.edu) provides academic and career advising to undergraduate students interested in languages and international area studies. The International Directions advisor provides academic and career advising to undergraduate students who are interested in languages and international area studies. Learn more (https://languages.wisc.edu/advising).

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https://careers.ls.wisc.edu/handshake) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (https://careers.ls.wisc.edu)
- Set up a career advising appointment (https://careers.ls.wisc.edu/make-an-appointment)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://careers.ls.wisc.edu/handshake)
- Learn how we're transforming career preparation: L&S Career Initiative (http://ls.wisc.edu/lsci)

PEOPLE

FACULTY

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialities range from traditional medicine in India, the Hinduist roots of yoga, or diversifying contemporary mindfulness practice with insights from Tibetan Buddhism, to human rights in Thailand—from Chinese ghost stories, traditional poetics and philology, to sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages—and from analysis of classical Japanese tale fiction, early modern comedic narratives, manga, anime, and Japanese counterculture. Visit our faculty pages (https://alc.wisc.edu/about/faculty) for more information on areas of expertise, current research, teaching and publications.

Erlin Barnard esbarnard@wisc.edu
Faculty Associate
Fields of Study: Language Pedagogy; Materials Development; Second Language Acquisition

Gudrun Bühnemann gbuhnema@wisc.edu
Professor
Fields of Study: Sanskrit language and literature; Buddhism in India and Nepal; Hinduism; Tantrism and Yoga Studies

Anthony Cerulli acerulli@wisc.edu
Associate Professor
Fields of Study: Hinduism; Religion in South Asia; Medical Humanities; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture

Charo D'Etcheverry cdetcheverry@wisc.edu
Associate Professor
Fields of Study: Classical Japanese literature (especially court fiction & its reception and early kabuki)

Anatoly Detwyler detwyler@wisc.edu
Assistant Professor
Fields of Study: Modern Chinese literature and history, comparative new media, information studies

John D. Dunne jddunne@wisc.edu
Professor
Fields of Study: Buddhist philosophy and contemplative practice; Religious Studies; Cognitive Science of Religion; Contemplative Science

Naomi Geyer nfgeyer@wisc.edu
Associate Professor
Fields of Study: Japanese Language, Language Pedagogy, Pragmatics

Tyrell Haberkorn tyrell.haberkorn@wisc.edu
Associate Professor
Fields of Study: Violence, Human Rights, Sovereignty, Arbitrary Detention, Land Rights, Agrarian Struggle, Historiographies of Repression, Gender Studies, Socialism, Dissident Literature, Southeast Asia (Thailand).

Rania Huntington huntington@wisc.edu
Professor
Fields of Study: Ming and Qing narrative and drama, literature of the weird and supernatural, memory in literature, depiction of women in literature

Adam L. Kern alkern@wisc.edu
Professor
Fields of Study: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyôshi, etc) and beyond.

Hieyoon Kim Hieyoon.kim@wisc.edu
Assistant Professor
Fields of Study: Cinema; Media activism; Cultural Studies; History of Modern and Contemporary Korea

Byung-jin Lim byungjin.lim@wisc.edu
Associate Professor
Fields of Study: Korean Language and Linguistics, Second/Foreign Language Acquisition, Computer-Mediated Communication, Korean Language Textbook Development

Junko Mori jmori@wisc.edu
Professor
Fields of Study: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Takako Nakakubo tnakakubo@wisc.edu
Faculty Associate
Fields of Study: Second Language Acquisition of Japanese, Japanese Pedagogy, Learning Strategies

William Nienhauser whnienha@wisc.edu
Professor
Fields of Study: Early traditional fiction and history; early poetry (especially Du Fu and Tao Qian)

Steve Ridgely steve.ridgely@wisc.edu
Associate Professor
Fields of Study: Modern Japanese literature, Cultural Theory, Transasian Studies

Hongming Zhang hzhang6@wisc.edu
Professor
Fields of Study: Chinese linguistics; syntax-phonology interface; prosodic phonology; poetic prosody; history of Chinese language; teaching Chinese as a second language

Weihua Zhu wzhu34@wisc.edu (wzhu34@wisc.edu)
Assistant Professor
Fields of Study: Discourse Analysis, Pragmatics, Pedagogy and Second Language Acquisition

WISCONSIN EXPERIENCE

UNDERGRADUATE RESEARCH

Students in the ALC department academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (https://teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduate-research) that provide research opportunities for undergraduates at UW–Madison including:

- Hilldale Undergraduate/Faculty Research Fellowships (https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship)
- McNair Scholars (http://grad.wisc.edu/mcnair)
- Summer Research Programs (https://grad.wisc.edu/diversity/srop)
- Undergraduate Research Scholars (https://urs.ls.wisc.edu)
- The Wisconsin Idea Undergraduate Fellowship Program (https://morgridge.wisc.edu/students/wisconsin-idea-fellowships)

WISCONSIN SUMMER LANGUAGE INSTITUTES

Each summer around 200 undergraduate students, graduate students, professionals, and others come to UW–Madison to study a language at the Wisconsin Intensive Summer Language Institutes (WISLI) (https://wisli.wisc.edu). WISLI is host to five summer language institutes which offer high-quality courses in 30 less commonly taught languages:

Arabic, Persian, and Turkish Language Immersion Institute (APTLII) (https://aptlii.wisc.edu)
Central Eurasian Studies Summer Institute (CESSI) (https://cessi.wisc.edu)
South Asia Summer Language Institute (SASLI) (https://sasli.wisc.edu)
Southeast Asian Studies Summer Institute (SEASSI) (https://seassi.wisc.edu)

STUDY ABROAD

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all U.S. institutions, and #16 among all U.S. universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-

Students-Reaches-New-High). There are nearly 60 study abroad opportunities across Asia. Approved UW programs will allow students to receive residents credit while abroad. With pre-planning students may also fulfill major requirements on academic programs abroad, however careful planning and discussion with your advisor are key. For more information about programs, application process and fees, visit: International Academic Programs (https://www.studyabroad.wisc.edu).

Students may also gain career and professional experience, through various internship opportunities abroad. To review opportunities, application process and fees, visit: International Internship Programs (http://internships.international.wisc.edu).

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (https://flas.wisc.edu)
Center for East Asian Studies FLAS Coordinator: Laurie Dennis, ldennis@wisc.edu (ldennis@international.wisc.edu), 325 Ingraham Hall
Center for South Asian FLAS Coordinator: Lalita du Perron, duperron@southasia.wisc.edu, 203 Ingraham
Center for Southeast Asian Studies FLAS Coordinator: Michael Cullinane, mmcullin@wisc.edu, (mjstuden@wisc.edu) 207 Ingraham

FLAS fellowships are funded by the U.S. Department of Education and administered by the UW's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.html), and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (https://flas.wisc.edu/Languages.html)of your chosen language.

Applicants must be U.S. citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are **two separate competitions** requiring **two separate and complete applications**.

Scholarships@UW-Madison (https://scholarships.wisc.edu/Scholarships)
This is the primary campus wide portal for applicants, current students, and everyone looking for scholarship opporunities on campus.

Undergraduate Academic Awards Office (https://awards.advising.wisc.edu)
We help UW-Madison undergraduates and recent graduates pursue nationally competitive scholarships (https://awards.advising.wisc.edu/scholarships/nationally-competitive) and campus-wide awards (https://awards.advising.wisc.edu/scholarships/campus-wide) for research, service and leadership—activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (https://awards.advising.wisc.edu/schedule-an-appointment) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (http://borenawards.org)
Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to $20,000 to U.S. undergraduate students to study abroad in areas of the world that are critical to U.S. interests and underrepresented in study abroad, including Africa, Asia, Central and Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (http://borenawards.org/boren_scholarship/preferences.html)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (http://borenawards.org/boren_scholarship/preferences.html)). Undergraduates with questions about the Boren Scholarship (https://www.borenawards.org/scholarships/program-basics/boren-scholarship-basics) should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs.

Critical Language Scholarship Program (http://www.clscholarship.org)
Campus Representative: Mark Lilleleht, Assistant Director for Awards at awards@iris.wisc.edu

The CLS program is part of the U.S. Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities are encouraged to apply.

Gilman Scholarship Program
Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for U.S. citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES

The 21st century has been called the "Asian Century." Indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors who opt the ALC major study Asia in a robustly transnational and transhistorical perspective, working with faculty across the department. Alternatively, majors may choose to take a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia, thereby electing to work more closely with the professors who specialize in these specific regions.

East Asia
The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, B. Nienhauser, S. Ridgely, H. Zhang, W. Zhu.

South Asia
The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

Southeast Asia
The Southest Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai and Vietnamese language; and probe Human rights in Thailand; explore literature of the region; and history and politics in Southeast Asia. ALC faculty and instructors offering courses in this option include: E. Barnard, T. Haberkorn, C. Lee, J. Surasin, S. Suryani, H. Dinh, S. Zamar.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu); Center for South Asia (https://southasia.wisc.edu); and Center for Southeast Asian Studies (https://seasia.wisc.edu).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE EAST ASIAN OPTION

30 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the East Asian Option:

EAST ASIAN INTERMEDIATE LANGUAGE

Code	Title	Credits
Complete a sequence:		
ASIALANG 201 & ASIALANG 202	Third Semester Chinese and Fourth Semester Chinese	8
ASIALANG 203 & ASIALANG 204	Third Semester Japanese and Fourth Semester Japanese	8

FOUR-YEAR PLAN

See Four Year Plan for the Asian Languages and Cultures Major; your course choices for the East Asian Studies Named Option will focus on that region.

ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES

The 21st century has been called the "Asian Century." Indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors who opt the ALC major study Asia in a robustly transnational and transhistorical perspective, working with faculty across the department. Alternatively, majors may choose to take a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia, thereby electing to work more closely with the professors who specialize in these specific regions.

East Asia
The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, B. Nienhauser, S. Ridgely, H. Zhang, W. Zhu.

South Asia
The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

Southeast Asia
The Southest Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai and Vietnamese language; and probe Human rights in Thailand; explore literature of the region; and history and politics in Southeast Asia. ALC faculty and instructors

offering courses in this option include: E. Barnard, T. Haberkorn, C. Lee, J. Surasin, S. Suryani, H. Dinh, S. Zamar.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu); Center for South Asia (https://southasia.wisc.edu); and Center for Southeast Asian Studies (https://seasia.wisc.edu).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.
