UNDERGRADUATE GUIDE

The *Guide* contains information about the many academic programs that make the University of Wisconsin–Madison one of the world's foremost institutions of higher education.

The *Guide* is published online only. It is not available in printed format.

The information in the *Guide* applies to all undergraduate students at the university regardless of their classification (school/college affiliation). Information in the individual school/college sections applies specifically to students who intend to graduate from one of those schools or colleges.

It is important for students to be familiar with all the information that applies to them. Students are strongly encouraged to consult their advisors at least once each semester to be certain they are completing requirements that apply to their degree and major programs.

The *Guide* is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

For more information about admission expectations, academic preparation, the application process, and important dates and deadlines, contact:

Office of Admission and Recruitment (<https://www.admissions.wisc.edu/>)
702 West Johnson Street, Suite 1101
Madison, WI 53715-1007
onwisconsin@admissions.wisc.edu
608-262-3961

Schedule a campus tour at VisitBucky (<https://www.admissions.wisc.edu/visitbucky/>) or call 608-262-3961.

UW–Madison summer brochures and program information are available from the Division of Continuing Studies (<http://continuingstudies.wisc.edu/>).

All entering students, to protect their interests, should become well acquainted with the regulations regarding student academic and nonacademic misconduct. Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at:

Office of the Registrar (<https://registrar.wisc.edu/>)
333 East Campus Mall #10101
Madison, WI 53715-1384

ACCREDITATION

The University of Wisconsin–Madison is accredited by the Higher Learning Commission (<http://www.hlcommission.org/>).

230 South Lasalle Street, Suite 7-500
Chicago, IL 60604
Telephone 1-800-621-7440
www.hlcommission.org (<http://www.hlcommission.org>)

UW–Madison, which was first accredited in 1913, was last accredited in 2019, and will go through a reaccreditation process again in 2028–29.

Student achievement data (<https://apir.wisc.edu/students/student-achievement-data/>)

SAFE LEARNING AND WORK ENVIRONMENT

Guide to creating and maintaining a Safe Learning and Work Environment at UW–Madison: Responsibilities, Resources, and Reporting Requirements. (<https://compliance.wisc.edu/safe-learning-work-guide/>)

REGISTRATION WITH MINNESOTA OFFICE OF HIGHER EDUCATION

The University of Wisconsin-Madison is a public institution registered as a "Private Institution" with the Minnesota Office of Higher Education pursuant to sections 136A.61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

EQUAL OPPORTUNITY, EQUAL ACCESS, AND NON-DISCRIMINATION

The University of Wisconsin – Madison is committed to providing equal opportunity and equal access in compliance with all applicable federal and state laws and regulations and University of Wisconsin System and university non-discrimination policies and procedures.

POLICIES & PROCEDURES

The Office of Compliance promotes ethical conduct and compliance with all applicable laws, regulations and UW–Madison policies. UW–Madison's non-discrimination statement, contact information for the university's Equal Opportunity Investigations Administrator, Title IX Coordinator, ADA Coordinator as well as information regarding UW–Madison's Equal Opportunity Complaint process is available on the Office of Compliance's website (<https://compliance.wisc.edu/eo-complaint/>).

DISABILITY RESOURCES

The McBurney Disability Resource Center is an office within the Division of Student Affairs that views disability as an important aspect of the diversity of UW–Madison. We are committed to creating an accessible and inclusive educational experience for students. We do this by partnering with students, faculty, and staff to design accessible environments and to provide academic accommodations so that students can engage, explore and participate in the Wisconsin Idea.

We work with UW–Madison students with physical, learning, hearing, vision, psychological, health and other disabilities substantially affecting a major life activity (e.g., walking, communicating, learning, seeing, breathing, reading, etc.). Many students have non-apparent disabilities such as depression, anxiety, autism spectrum, learning disabilities, AD/HD and health conditions such as Crohn's disease or fibromyalgia.

Common accommodations include extended time and/or small group environment for exams, notetaking support, sign language interpreting, real time and media captioning, and conversion of printed materials to accessible formats. McBurney Center staff members also collaborate with students and faculty to determine reasonable flexibility with regard to attendance, participation, and deadlines for conditions that fluctuate in severity over the course of enrollment. The Center makes referrals to other campus offices or community resources for non-classroom accommodations related to housing, transportation, personal care needs, and so on. Students should contact the Center upon admission to begin

the eligibility for services process. Early notice is essential in order to have accommodations in place prior to the start of the semester. For detailed information, see [How to apply for accommodations \(https://mcburney.wisc.edu/apply-for-accommodations/\)](https://mcburney.wisc.edu/apply-for-accommodations/).

McBurney Disability Resource Center
702 West Johnson Street, Suite 2104
Madison, WI 53706
608-263-2741 (voice)
608-225-7956 (text)

mcburney@studentlife.wisc.edu
www.mcburney.wisc.edu (<http://www.mcburney.wisc.edu/>)

The information, policies, and rules contained herein are subject to change. The information in this catalog is current as of June 1, 2021. Later revisions are announced through department or program offices. Students are responsible for knowing current university regulations. University offices can provide current information about possible changes.

ADMISSION

OFFICE OF ADMISSIONS AND RECRUITMENT

Students seeking to earn a bachelor's degree from the University of Wisconsin–Madison will apply for admission through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>). Undergraduate admission is competitive and selective; professional admissions counselors review applications using a holistic process. We focus on academic excellence, reviewing high school and college coursework (when applicable), the courses students have chosen to take, the rigor and breadth of the curriculum, and how the student has performed in their coursework. We also consider written essays, letters of recommendation, extracurricular involvement, and test scores when applicable.

Our review process is designed to help us identify students who are not only academically stellar but also have qualities such as leadership, concern for humanity, and achievement in the arts, athletics, and other areas. We also seek diversity in personal background and experience for potential contribution to the University of Wisconsin–Madison community.

We invite and encourage all students considering the University of Wisconsin–Madison to join us on campus for a tour (<http://guide.wisc.edu/undergraduate/apps.admissions.wisc.edu/visitbucky/>). There are many options to explore and discover what UW–Madison has in store.

APPLY ([HTTPS://ADMISSIONS.WISC.EDU/HOW-DO-I-APPLY-TO-UW-MADISON/](https://admissions.wisc.edu/how-do-i-apply-to-uw-madison/))

To submit an application for admission review the application dates and deadlines as well as the required application materials listed on our website.

Dates and Deadlines (<https://admissions.wisc.edu/deadlines/>)
Freshman Applicants (<https://admissions.wisc.edu/apply-as-a-freshman/>)
Transfer Applicants (<https://admissions.wisc.edu/apply-as-a-transfer/>)

Reentry Applicants (<https://admissions.wisc.edu/apply-as-a-reentry-student/>)

FRESHMEN

Competitive freshman applicants have taken advantage of the rigor offered at their high schools, performed well in challenging courses, and have strong ACT or SAT scores. Beyond academic excellence we are looking for students who demonstrate leadership, community engagement, and passion.

Students are considered freshman applicants if they have not yet completed high school (secondary-level education); have not earned a GED/HSED (but will by the time they enroll at UW–Madison); or have not enrolled in a college or university in a degree-granting program since graduating high school or earning a GED/HSED. For more information about admission requirements and expectations of freshman applicants please see our website (<https://admissions.wisc.edu/apply-as-a-freshman/>).

TRANSFER STUDENTS

Successful transfer applicants will have a consistently high or upward grade trend; a strong cumulative grade point average; and rigorous coursework in English composition, college-level math, science, social science, humanities, literature, and foreign language. Admission to the university does not guarantee acceptance to an intended major, which is a separate process from undergraduate admission.

Students are considered transfer applicants if they have enrolled in an accredited college or university in a degree-granting program after graduating from high school or earning a GED/HSED. Students must have 24 transferable credits earned at a college or university after high school graduation to be eligible for admission as a transfer applicant. For more information about admission requirements and expectations of transfer applicants please see our website (<https://admissions.wisc.edu/apply-as-a-transfer/>).

Prospective transfer students can begin satisfying UW–Madison general education and degree requirements before transferring. Transfer credit is generally given for college-level courses taken at a degree-granting institution accredited by a CHEA-recognized organization (<http://chea.org/>). Courses must be similar in nature, level, and content to UW–Madison undergraduate courses and apply to a UW–Madison academic program. Students may wish to consult the UW–Madison Transfer Credit Policy (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) for more details.

REENTERING STUDENTS

Students previously registered at UW–Madison in an undergraduate degree program who wish to resume undergraduate study after an absence of a semester or more are considered reentry students. Reentry students must file an application for readmission but are not subject to the application fee.

To guarantee an early enrollment appointment time, reentry students should submit the complete application by February 1 for the fall term or by October 1 for the spring term. In addition to submitting an application (<https://admissions.wisc.edu/apply-as-a-reentry-student/>), reentry applicants must submit official transcripts for any work completed elsewhere since last enrolled at UW–Madison, a list of courses in progress (if applicable), and an academic action from the dean's office if they are in "dropped" or "must obtain permission to continue" status.

NONDEGREE UNIVERSITY SPECIAL AND GUEST STUDENTS

Undergraduate students visiting from other universities or recent UW–Madison graduates may desire to enroll at UW–Madison as nondegree University Special and Guest students. Contact the Division of Continuing Studies, Adult Career and Special Student Services (<http://www.continuingstudies.wisc.edu/advising/>).

PLACEMENT AND CREDIT BY EXAM

PLACEMENT TESTS

Each student comes to UW–Madison with a unique set of skills and academic preparation. To assess where each student stands in beginning to meet their General Education Requirements (p. 23), placement tests provide academic advisors with the tools to help determine in which courses students should enroll. Placement tests are required of all incoming freshman and some transfer students depending on college course work. Other exams such as ACT, SAT, SAT II, TOEFL, Advanced Placement (AP), International Baccalaureate (IB), etc. do not satisfy the requirement of placement tests, however, scores on these exams may assist in appropriate course enrollment advising.

UW Placement tests are developed by faculty and instructional staff from various UW System campuses and led by Testing and Evaluation Services (<https://testing.wisc.edu/>) (T&E). T&E conducts studies to support the development of these tests and effectively uses the results to place incoming students into appropriate levels of English, math, and foreign language.

Outlined below are the situations typical for requiring placement tests. The Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>) determines which placement tests are required. After students are admitted to the University of Wisconsin–Madison, they will receive an email from the Office of Admissions and Recruitment indicating which placement tests are required.

LANGUAGE PLACEMENT EXAMS

Freshmen who have previous experience in Spanish, French, or German and who plan to take coursework in this language at UW–Madison must take a placement test in that language to qualify and enroll in classes beyond the entry level language course. Previous experience may include native speakers and those who have previous coursework in the language. If you are interested in taking a course in another world language, visit the language placement exam web page (<http://guide.wisc.edu/undergraduate/languages.wisc.edu/placement-testing/>) for more information. Many programs have a world language requirement. Be sure to review the Guide (<https://guide.wisc.edu/undergraduate/>) to determine your degree requirements for world language and consult with your advisor at SOAR. UW–Madison offers language instruction in more than 30 languages. For additional information about placement, see Languages at UW–Madison (<http://languages.wisc.edu/advising/placement/>).

MATH PLACEMENT EXAMS

This examination is required for students admitted to undergraduate degree granting programs who:

1. Are admitted as first-year students
2. Are admitted as transfer students and
 - A. Have not previously completed the UW System math placement exam.

OR

B. Do not have credit for the UW–Madison direct equivalent of MATH 112, MATH 113, MATH 114, MATH 211, or any MATH course that is numbered higher than 211.

(For students who have a course in progress at the time of admission, it is assumed they will complete the course, so they are not asked to take the placement test; if they do not complete or pass the course, they may be required to take the placement test to demonstrate minimum math proficiency.)

OR

C. Have completed the equivalent of MATH 96 at a UW System institution.

Notes:

Students must demonstrate minimum math proficiency before they enroll in a Quantitative Reasoning Part A course. Satisfaction of Quantitative Reasoning Part A from a math course that is transferred in does not automatically exempt students from the UW math placement test. MATH 101 equivalents will be converted to MATH 96, and/or will be reviewed by the math department for possible MATH 96. See also the Mathematics Placement Chart (<https://www.math.wisc.edu/undergraduate/math-placement-tech-algorithm-uw-madison/>).

ENGLISH PLACEMENT EXAMS

Two exams—the UW English Placement Test (UWEPT) and the UW–Madison English as a Second Language Assessment Test (MSNESLAT)—are used to place students into courses focused on development of skills needed for success in college-level communication tasks.

UW English Placement Test (UWEPT)

The UWEPT is taken by students admitted to undergraduate degree-granting programs who:

1. Are admitted as first-year students and are not required to take the MSNESLAT (see next section)
2. Are admitted as transfer students and are not required to take the MSNESLAT (see next section) and
 - A. Have not previously completed the UW System English Placement Exam.

OR

B. Do not have credit for the UW–Madison equivalent of a Communication Part A (p. 23) course.

UW–Madison English as a Second Language Assessment Test (MSNESLAT)

The MSNESLAT is taken by all students who are required to submit a TOEFL or IELTS score for admission to UW–Madison.

The MSNESLAT is designed to evaluate English language proficiency, and to place students into English as a Second Language courses that

help students improve skills in the written and spoken English used in academic contexts. Students who take the MSNESLAT and obtain a score that does not exempt them from ESL 118 must satisfy the university's expectation of college-level English language proficiency. This can be done by taking ESL 118 or by achieving a score of exempt on the MSNESLAT.

DEPARTMENTAL PLACEMENT TESTS

This is a summary of the Departmental Placement Exam policy. Click [here](#) to view the official policy in its entirety in the UW-Madison Policy Library.

In cases where a student has acquired knowledge, skills or competencies through experiences that are academic in nature and where there is an equivalent UW-Madison course, a department may offer credit by departmental exam which can then be used to meet course requisites and fulfill degree requirements. However, a student may not need the equivalent course for credit and simply wish to demonstrate competency to take course(s) at a higher level which require that competency. The departmental placement exam is a systematic, documented way that will allow a student to demonstrate the academic knowledge, skills or experience required at a level that replaces the taking of a requisite for-credit course.

Departments must propose and have approved the placement exams they offer. Listed below are approved placement exams.

Chinese

Score	Placement Into
10	ASIALANG 101 (First Semester Chinese)
20	ASIALANG 111 (Elementary Chinese II)
30	ASIALANG 102 (Second Semester Chinese)
40	ASIALANG 201 (Third Semester Chinese)
50	ASIALANG 202 (Fourth Semester Chinese)
60	ASIALANG 301 (Fifth Semester Chinese)
70	ASIALANG 302 (Sixth Semester Chinese)

Filipino

Score	Placement Into
10	ASIALANG 123 (First Semester Filipino)
30	ASIALANG 124 (Second Semester Filipino)
40	ASIALANG 223 (Third Semester Filipino)
50	ASIALANG 224 (Fourth Semester Filipino)
60	ASIALANG 323 (Fifth Semester Filipino)
70	ASIALANG 324 (Sixth Semester Filipino)

Hindi

Score	Placement Into
10	ASIALANG 133 (First Semester Hindi)
30	ASIALANG 134 (Second Semester Hindi)
40	ASIALANG 233 (Third Semester Hindi)
50	ASIALANG 234 (Fourth Semester Hindi)
60	ASIALANG 333 (Fifth Semester Hindi)
70	ASIALANG 334 (Sixth Semester Hindi)

Hmong

Score	Placement Into
10	ASIALANG 125 (First Semester Hmong)
30	ASIALANG 126 (Second Semester Hmong)

40	ASIALANG 225 (Third Semester Hmong)
50	ASIALANG 226 (Fourth Semester Hmong)
60	ASIALANG 325 (Fifth Semester Hmong)
70	ASIALANG 326 (Sixth Semester Hmong)

Indonesian

Score	Placement Into
10	ASIALANG 127 (First Semester Indonesian)
30	ASIALANG 128 (Second Semester Indonesian)
40	ASIALANG 227 (Third Semester Indonesian)
50	ASIALANG 228 (Fourth Semester Indonesian)
60	ASIALANG 348 (Fifth Semester Indonesian)
70	ASIALANG 328 (Sixth Semester Indonesian)
80	ASIALANG 421 (Seventh Semester Asian Language)
90	ASIALANG 422 (Eighth Semester Asian Language)

Japanese

Score	Placement Into
10	ASIALANG 103 (First Semester Japanese)
20	ASIALANG 114 (Second Semester Elementary Japanese)
30	ASIALANG 104 (Second Semester Japanese)
40	ASIALANG 203 (Third Semester Japanese)
50	ASIALANG 204 (Fourth Semester Japanese)
60	ASIALANG 303 (Fifth Semester Japanese)

Korean

Score	Placement Into
10	ASIALANG 105 (First Semester Korean)
30	ASIALANG 106 (Second Semester Korean)
40	ASIALANG 205 (Third Semester Korean)
50	ASIALANG 206 (Fourth Semester Korean)
60	ASIALANG 305 (Fifth Semester Korean)
70	ASIALANG 306 (Sixth Semester Korean)
80	ASIALANG 405 (Seventh Semester Korean)
90	ASIALANG 406 (Eighth Semester Korean)

Persian

Score	Placement Into
10	ASIALANG 137 (First Semester Persian)
30	ASIALANG 138 (Second Semester Persian)
40	ASIALANG 237 (Third Semester Persian)
50	ASIALANG 238 (Fourth Semester Persian)
60	ASIALANG 337 (Fifth Semester Persian)
70	ASIALANG 338 (Sixth Semester Persian)

Thai

Score	Placement Into
10	ASIALANG 129 (First Semester Thai)
30	ASIALANG 130 (Second Semester Thai)
40	ASIALANG 229 (Third Semester Thai)
50	ASIALANG 230 (Fourth Semester Thai)
60	ASIALANG 329 (Fifth Semester Thai)
70	ASIALANG 330 (Sixth Semester Thai)

Tibetan

Score	Placement Into
10	ASIALANG 135 (First Semester Modern Tibetan)
30	ASIALANG 136 (Second Semester Modern Tibetan)
40	ASIALANG 235 (Third Semester Modern Tibetan)
50	ASIALANG 236 (Fourth Semester Modern Tibetan)
60	ASIALANG 335 (Fifth Semester Tibetan)
70	ASIALANG 336 (Sixth Semester Tibetan)

Urdu

Score	Placement Into
10	ASIALANG 139 (First Semester Urdu)
30	ASIALANG 140 (Second Semester Urdu)
40	ASIALANG 239 (Third Semester Urdu)
50	ASIALANG 240 (Fourth Semester Urdu)
60	ASIALANG 339 (Fifth Semester Urdu)
70	ASIALANG 340 (Sixth Semester Urdu)

Vietnamese

Score	Placement Into
10	ASIALANG 131 (First Semester Vietnamese)
30	ASIALANG 132 (Second Semester Vietnamese)
40	ASIALANG 231 (Third Semester Vietnamese)
50	ASIALANG 232 (Fourth Semester Vietnamese)
60	ASIALANG 331 (Fifth Semester Vietnamese)
70	ASIALANG 332 (Sixth Semester Vietnamese)
80	ASIALANG 421 (Seventh Semester Asian Language)
90	ASIALANG 422 (Eighth Semester Asian Language)

RETROACTIVE LANGUAGE CREDIT

In some schools and colleges at UW–Madison, it is possible to earn retro credits for prior work completed in a foreign language. To earn these credits, students must take a course above the first-semester level on the UW–Madison campus in French, German, Hebrew, Italian, Latin, Portuguese, Spanish, or any other language in which they have some proficiency and the course is also offered on the UW–Madison campus. The course must be designated with the Foreign Language

attribute of 2nd, 3rd, 4th, or 5th semester language course and must be the first foreign language course taken by the student after enrolling in the university. Students who take a college-level language course while still in high school may still pursue retro credits at the university.

Students interested in earning retro credits should plan to take the foreign language placement test and consult with the foreign language advisor at SOAR (<http://soar.wisc.edu/>). Students must enroll in the language course prior to earning 30 degree credits (including credits transferred from other colleges but not including AP, CLEP, IB or retro credits in another language) and earn a grade of B or better. UW–Madison honors retro credits earned at previous UW institutions as long as the student enrolled in the course prior to earning 30 credits and earned a grade of B or better. Native speakers of a language are not eligible to earn retro credits in that language. For more information, see *Retroactive Credits* (p. 326) in the College of Letters & Science section of the *Guide*.

ADVANCED PLACEMENT (AP) AND INTERNATIONAL BACCALAUREATE (IB)

Both Advanced Placement (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) and International Baccalaureate (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) Higher Level examinations offer the possibility of receiving credits at UW–Madison. Many high schools offer courses through the College Board's Advanced Placement (AP) program or the International Baccalaureate (IB) program. UW–Madison offers degree credit based on a student's performance on the AP and IB exams administered in high schools. (AP and IB exams must be taken before entering UW–Madison.) Students who receive credit for a particular course through AP or IB and take the same course at UW–Madison will not receive degree credit twice; however, the grade in the UW–Madison course will be included in the overall grade point average.

GCE ADVANCED LEVEL (A-LEVEL)

In many cases, students may receive advanced-standing credit for some A-level (<https://registrar.wisc.edu/credit-by-exam-2/>) exams. After a student has been admitted, the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/>) will perform an official evaluation of credit for A-Level exam results. In order to grant the credit, we require an official copy of the A-Level exam certificate from the examination board. Credits will not be posted from Results Slips or internal school transcripts. Review the chart (<https://registrar.wisc.edu/credit-by-exam-2/>) to see how A-Level credit will be awarded. Examinations not listed in this chart will be evaluated by the Office of Admissions and Recruitment for appropriate advanced standing credit.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) (<https://registrar.wisc.edu/credit-by-exam-2/>) allows students who have gained college-level knowledge outside the classroom to take examinations for possible college credit. Each exam is 90 minutes long and is made up primarily of multiple-choice questions. Some exams include an essay; however, UW–Madison does not require the essay for any CLEP exam. Credit will be granted only to those students who have completed fewer than 16 semester hours of college credit when the examinations are taken. Students must earn a minimum score of 65 to receive credit. The scores for awarding credit at the University of Wisconsin–Madison do

not necessarily match those recommended by the American Council on Education.

CREDIT BY DEPARTMENTAL EXAMINATION

This is a summary of the Departmental Credit by Exam policy. Click [here](https://policy.wisc.edu/library/UW-1005/) (<https://policy.wisc.edu/library/UW-1005/>) to view the official policy in its entirety in the UW-Madison Policy Library.

Students may acquire knowledge, skills, and competencies through experiences that are academic in nature but may not necessarily correspond to a setting in which UW–Madison awards traditional credit. Credit by department examination is one opportunity for undergraduate students to demonstrate mastery of material that is equivalent to what would be learned in a specific UW–Madison course. The course credits granted through departmental examination are based on a student's demonstration that they have mastered the learning outcomes equivalent to those for the specified course. Examples of circumstances that will lead students to seek credit by examination may be: they completed preparation for advanced placement exams in high school but were unable to take the AP test; they have placement test scores that place them in a course lower than what they think they are prepared for; they did not get transfer equivalency for a course but they judge that they have completed the material in a course at another university.

Departments must propose and have approved the exams they offer. Listed below are the courses that have been approved for credit by exam.

Animal and Dairy Science

Code	Title	Credits
AN SCI/DY SCI 101	Introduction to Animal Sciences	4

For more information on how to earn credit by exam for this course, see the exam information (<https://andysci.wisc.edu/animal-science-dairy-science-101-credit-by-exam/>).

Chemistry

Code	Title	Credits
CHEM 105	General Chemistry I ¹	3
CHEM 106	General Chemistry II ²	4

For more information on how to earn credit by exam for these courses, see the exam information (<https://chem.wisc.edu/chemistry-credit-by-examination/>).

¹ CHEM 101 General Chemistry I Laboratory + CHEM 105 General Chemistry I = CHEM 103 General Chemistry I

² CHEM 102 General Chemistry II Laboratory + CHEM 106 General Chemistry II = CHEM 104 General Chemistry II

Math

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus–Functions of Several Variables	4

For more information on how to earn credit by exam for these courses, see the exam information (<https://www.math.wisc.edu/undergraduate/calculusexam/>).

ADVISING

WHAT IS ADVISING?

At UW–Madison advising is a partnership between students and the network of advisors they build during their time here. Advising is one of the most essential resources available to students and can play a pivotal role in the college experience and beyond. Advisors can help students get the most out of their Wisconsin Experience by helping them make well-informed decisions, sharing strategies for success, supporting them as they encounter challenges, connecting them to resources, and providing information about campus policies and procedures.

There are many reasons to see an advisor and advising is not limited to certain subjects or specific months of the year. Here are some of the many topics that advisors can help students with:

- Setting academic, career, and life goals
- Connecting a major to a career
- Creating a graduation timeline plan
- Selecting courses and fulfilling degree requirements
- Connecting with tutors
- Getting involved with campus organizations
- Practicing for job interviews
- Choosing a study abroad program
- Finding an internship
- Researching volunteer opportunities
- Understanding university policies and deadlines
- Talking about graduate school
- Proofreading resumes and cover letters

To find contact information for advisors, including the assigned advisor, see this link (<https://advising.wisc.edu/find-an-advisor/>).

SCHOOL AND COLLEGE ACADEMIC ADVISING OFFICES

UW–Madison has eight undergraduate schools and colleges. All undergraduates are assigned to an advisor in their area of academic interest, or to a Cross-College Advising Service advisor who specializes in working with students who are deciding on an academic major.

CROSS-COLLEGE ADVISING SERVICE (CCAS)

The Cross-College Advising Service (CCAS) (<https://ccas.wisc.edu/>) is a campus-wide advising office for undergraduate students who are in the process of deciding on a major and want to explore the many academic opportunities on campus. CCAS also assists students who are considering changing majors or who have not been admitted to limited-enrollment programs and are evaluating other options. CCAS advisors are knowledgeable about all the programs and majors offered by the eight undergraduate schools and colleges on campus. Each year at SOAR (Student Orientation, Advising, and Registration) (<http://soar.wisc.edu/>), nearly 2000 students in the entering class self-identify as "undecided/exploring" and are assigned to CCAS advisors.

In addition to the main CCAS office in Ingraham Hall, CCAS has residence hall advising offices in Chadbourne Residential College, Witte Hall, Ogg Hall, and Dejope Hall. The Dejope office is available to all students in Lakeshore-area residence halls.

CAREER PLANNING HANDSHAKE

Students can find jobs and internships, and connect to campus career centers and events through their free UW–Madison Handshake account. The Handshake app is available on the MyUW dashboard—add the Handshake app by visiting [my.wisc.edu \(https://my.wisc.edu/\)](https://my.wisc.edu).

All students are encouraged to work with a career advisor. Each individual school or college offers career services, and the Career Exploration Center (CEC) works with students exploring different majors and careers. Links to each of the campus career services offices are available online at [careers.wisc.edu \(https://careers.wisc.edu\)](https://careers.wisc.edu).

Career planning is a multi-year process that includes self-assessment and reflection, exploring academic and career options, gaining experience in areas of interest, and ultimately organizing and conducting a job or graduate school search.

Students work with professional career advisors to engage in a wide variety of career planning activities to prepare for life after earning a degree from UW–Madison: educational workshops, job shadowing, informational interviewing, mock interviews, internships, career fairs and more. Active engagement in these activities assists students in achieving career readiness, which is "the attainment and demonstration of competencies that prepare college graduates for a successful transition into the workplace." (National Association of Colleges and Employers).

CAREER ADVISING

CAREER EXPLORATION CENTER (CEC)

The Career Exploration Center (CEC) (<https://ccas.wisc.edu/careerexplorationcenter/>) supports undecided and exploring students to make decisions about their futures based on their interests, values, and skills through individual advising appointments, workshops, events, a career library, and campus & community outreach.

PRE-PROFESSIONAL STUDY

At UW-Madison, students interested in pursuing graduate-level health professions and law have access to specialized Pre-Professional Advising resources. Pre-Professional Advising is made up of two co-located and highly collaborative career advising units: The Center for Pre-Health Advising and the Center for Pre-Law Advising. The units share a joint mission of helping to increase access, equity, and diversity within the fields of health and law.

CENTER FOR PRE-HEALTH ADVISING

prehealth.wisc.edu (<https://prehealth.wisc.edu>)

Pre-Health—e.g., Pre-Med, Pre-PA, Pre-OT, Pre-Vet MD—is not an undergraduate major, it is an intention. Students should major in areas of true interest, meet regularly with their academic advisor(s), and proactively utilize the resources offered by the Center for Pre-Health Advising (CPHA) if they are considering further schooling and careers in the following areas: medicine, dentistry, occupational therapy, physical therapy, physician assistant, public health, chiropractic, optometry, veterinary medicine, or other graduate-level health programs. Students interested in PharmD are strongly encouraged to access advising through the UW School of Pharmacy, due to the many unique aspects of pursuing this degree.

CENTER FOR PRE-LAW ADVISING

prelaw.wisc.edu (<https://prelaw.wisc.edu>)

Pre-law is not an undergraduate major, it is an intention. Students should major in areas of true interest, meet regularly with their academic advisor(s), and proactively utilize the resources offered by the Center for Pre-Law Advising (CPLA) for support in considering, preparing for, and applying to law school.

STUDY ABROAD ADVISING**SCHOOL/COLLEGE STUDY ABROAD**

Several schools and colleges have their own study abroad advising locations and offer information about study abroad programs that are directly related to certain areas of study.

- College of Agricultural and Life Sciences
- College of Engineering
- University of Wisconsin Law School
- Wisconsin School of Business

INTERNATIONAL ACADEMIC PROGRAMS (IAP)

studyabroad.wisc.edu (<http://studyabroad.wisc.edu>)

International Academic Programs (IAP) offers more than 200 programs on six continents for students of all majors. Courses through IAP programs can count toward degree requirements, allowing students to stay on track for graduation. Scholarships, grants, and financial aid are available.

INTERNATIONAL INTERNSHIPS

internships.international.wisc.edu (<http://internships.international.wisc.edu>)

The International Internship Program (IIP) works with students of all majors looking to gain experience and explore careers through international internships. Students can intern with organizations around the world. Advising, academic credits, and scholarships are available.

NON-APPROVED STUDY ABROAD

Students considering participating in a study abroad program sponsored by a university other than UW–Madison should review this page: <https://studyabroad.wisc.edu/nonapproved/> for more information.

GRADUATING IN FOUR YEARS OR FEWER

UW–Madison encourages, supports, and expects students to work with academic advisors to create, maintain, and plan a graduation timeline. Students should consult with their assigned academic advisor(s) before each enrollment period, and more as needed. Additionally, each major in

the Guide includes a four-year plan to help students map out a path to graduation, with help from advisor(s).

To ensure a timely graduation, students should discuss the following topics with their advisor:

- Exploring interests while making progress on degree requirements
- Setting and achieving academic and career goals
- Academic challenges and connecting to resources that support academic success
- Procedures and requirements for declaring a major
- Using the Degree Audit Reporting System (DARS) (<https://registrar.wisc.edu/dars-student/>) to check progress toward the degree
- Any changes to a declared major, as well as alternative plans if applying to a competitive limited-enrollment program
- A strategic course schedule to stay on track for graduation

DEGREE AUDIT REPORTING SYSTEM (DARS)

A Degree Audit Reporting System (DARS) (https://registrar.wisc.edu/dars_student.htm) report is an automated summary of a student's degree progress. All schools and colleges at UW-Madison use DARS to audit the progress of *most* undergraduate degree programs and certificates.

DARS reports indicate which requirements are completed, which are complete with in-progress and planned courses, and which remain unsatisfied. The report may specify courses that meet unsatisfied requirements. For most undergraduate programs, DARS is the tool used to determine completion of the program and/or eligibility to graduate.

Students can request and review their DARS in the Student Center via MyUW, or through the Course Search & Enroll app, and should contact their assigned advisor(s) for help reading and interpreting their DARS report.

OFFICER EDUCATION

The Reserve Officers Training Corps (ROTC) prepares students to become commissioned officers in the U.S. Air Force, Army, Navy, or Marines, as well as for civilian careers. Students may be enrolled in ROTC while pursuing a degree at UW-Madison. ROTC courses are open to all undergraduates who have met the prerequisites. The number of ROTC credits that count toward a UW-Madison degree can vary by department and school or college. Prospective and registered students should contact the military program offices listed in this section of the catalog for information about regular course offerings, summer camp programs, and scholarships.

AIR FORCE ROTC—AEROSPACE STUDIES

The Air Force ROTC (AFROTC) program is the primary path available to enter the U.S. Air Force as an officer. Students enroll in the AFROTC program while working toward the bachelor's degree in **any major** they choose. They attend an aerospace studies class each semester, a hands-on leadership laboratory, and weekly physical fitness sessions, while learning about how the Air Force works and deciding which job fields

match their interests. Upon graduating, they enter **active duty** service as second lieutenants, in leadership and management roles in the Air Force.

Most career fields have an active-duty commitment of four years after college. If students choose to separate from the Air Force at that time, they can pursue other careers with experience and the distinction of "military officer" on their resumes.

AFROTC is designed for students with three or more years remaining until graduation. To receive an officer's commission, AFROTC cadets must complete all necessary requirements for a degree as well as courses specified by the Air Force. Courses are often taken for academic credit as part of a student's electives. The amount of credit given toward a degree for AFROTC academic work is determined by the student's school or college, and major department.

REQUIRED COURSES FOR AIR FORCE ROTC/AEROSPACE STUDIES

General Military Course, total of 4 credit hours:

Code	Title	Credits
A F AERO 101	Heritage and Values I	1
A F AERO 102	Heritage and Values II	1
A F AERO 201	Team and Leadership Fundamentals I	1
A F AERO 202	Team and Leadership Fundamentals II (General Military Course, total of 4 credit hours:)	1

Professional Officer Course, total of 12 credit hours:

Code	Title	Credits
A F AERO 301	Leading People and Effective Communication I	3
A F AERO 302	Leading People and Effective Communication II	3
A F AERO 401	National Security Affairs	3
A F AERO 402	Leadership Responsibilities & Commissioning Preparation	3

Scholarships are available to qualified applicants. Scholarships may provide full tuition, laboratory and incidental fees, and reimbursement for textbooks. In addition, scholarship cadets receive a nontaxable allowance ranging from \$300 to \$500 per month, depending on academic/AFROTC year. Juniors and seniors automatically receive \$450 and \$500, respectively.

All AFROTC courses are open to all students regardless of membership in the program. Students are invited to take one of the program's courses to determine if AFROTC is right for them with no obligation to join. For more information, please contact the Recruiting Officer at 608-262-3440 or 608-265-4812; afrotc@mailplus.wisc.edu.

MILITARY SCIENCE—ARMY ROTC

The Army Reserve Officers' Training Corps (ROTC) is the nation's largest leadership and management-development training program. It offers the opportunity to earn a commission as a Second Lieutenant for Active Duty, Army Reserve, or Army National Guard while pursuing an academic degree. It enables young men and women to prepare themselves to be leaders in the Army or the civilian career field of their choice. The traditional four-year Army ROTC Program is divided into a two-year Basic

Course and a two-year Advanced Course. A non-contracted student enrolled in the Basic Course does not incur a military service obligation.

BASIC COURSE

This instruction introduces the student to fundamental military and leadership subjects. It is normally taken over four successive semesters, but may be completed in as few as two semesters. Students should discuss available options with the Scholarship & Enrollment Officer before registering for courses if they have fewer than four semesters to complete the Basic Course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take our class and lab with no military obligation. Students can enroll in a lecture without enrolling in the lab, but cannot enroll in a lab without the corresponding lecture. Labs are intended to provide practical leadership experience and military skills training such as map reading, land navigation, field training, and rifle marksmanship. Additionally, students who start in the Aerospace Studies or Naval Science programs can switch to Military Science and continue on toward graduation with no penalty.

Code	Title	Credits
MIL SCI 101	Foundations of Officership	1
MIL SCI 110	Leadership Lab 1A	1
MIL SCI 102	Basic Leadership	1
MIL SCI 111	Leadership Lab 1B	1
MIL SCI 201	Individual Leadership Studies	2
MIL SCI 210	Leadership Lab 2A	1
MIL SCI 202	Leadership and Teamwork	2
MIL SCI 211	Leadership Lab 2B	1

ADVANCED COURSE

Students who have completed the Basic Course or an equivalency (see Two-Year Program) and have passed all enrollment eligibility criteria continue on into the Advanced Course. This course consists of the following lectures, leadership labs, a military history course, physical fitness training sessions, and a four-week summer camp (Advance Camp) at Fort Knox, Ky. During labs and physical training sessions students are provided practical leadership opportunities to prepare them for Advance Camp and their future military careers. Students normally attend Advance Camp between their junior and senior years of Military Science. Students must complete all components of this course to earn a commission.

Code	Title	Credits
MIL SCI 301	Leadership and Problem Solving	2
MIL SCI 310	Leadership Lab 3A	1
MIL SCI 302	Leadership and Ethics	2
MIL SCI 311	Leadership Lab 3B	1
MIL SCI 401	Leadership and Management	2
MIL SCI 410	Leadership Lab 4A	1
MIL SCI 402	Officership	2
MIL SCI 411	Leadership Lab 4B	1
MIL SCI 491	American Military History	3

TWO-YEAR PROGRAM

Students who are veterans, members of the Army National Guard/ Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the Advanced Course. Students who did not complete the ROTC Basic

Course (see above), to include graduate and doctoral students, but have two years of academic study remaining may be eligible to attend Basic Camp. This option compresses the Basic Course curriculum into a four-week summer camp held at Fort Knox, KY prior to starting the Advanced Course. Students who believe they qualify for this program should consult with the Scholarship & Enrollment Officer for more information.

SCHOLARSHIPS

Qualified students may compete for Army ROTC scholarships ranging from two to three years in duration. High school students can apply for a four year scholarship during their senior year of high school. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition & fees (both in and out-of-state) or room and board (capped at \$5,000/semester) but not both, \$600/semester for textbooks and laboratory expenses, and a tax fee subsistence stipend of \$420 for each month of the regular school year. Interested students should consult with the Scholarship & Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Josh Beyerl in the Department of Military Science, 1910 Linden Drive, 608-262-3411, armyrotc@mailplus.wisc.edu.

NAVAL SCIENCE—NAVAL ROTC MISSION

The Naval ROTC Program was established to develop future officers mentally, morally and physically and to instill in them with the highest ideals of duty, and loyalty, and with the core values of honor, courage and commitment in order to commission college graduates as Naval officers who possess a basic professional background, are motivated toward careers in the Naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship and government.

PROGRAM DESCRIPTION

The purpose of the Naval ROTC Program is to educate and train qualified young men and women for service as commissioned officers in the Navy's unrestricted line, and the Marine Corps. As the largest single source of Navy and Marine Corps officers, the Naval ROTC Scholarship Program plays an important role in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Selected applicants for the four-year Naval ROTC Scholarship Program are awarded scholarships through a highly competitive national selection process, and receive full tuition, books stipend, educational fees and other financial benefits. Upon graduation, midshipmen are commissioned as active duty officers in the Navy's unrestricted line or the Marine Corps.

The four-year Naval ROTC Scholarship Program is available to qualified students who graduate from high school before August 1 of the year they intend to start college, and have earned less than 30 credit hours of college-level courses.

Students may affiliate with the Naval ROTC program, with the approval of the Professor of Naval Science, as College Program midshipmen, but receive none of the monetary benefits of scholarship students. College program midshipmen may apply and compete for 3-, 2-, or 1-year NROTC scholarships in each of their freshman, sophomore and junior academic years.

Students selected for the Navy ROTC Scholarship Program make their own arrangements for college enrollment and room and board, and take the normal course load required by the college or university for degree completion.

Upon graduation, midshipmen who complete all academic requirements in the Navy ROTC program are commissioned as an Ensign in the Navy or a 2nd Lieutenant in the Marine Corps and will be required to serve a minimum of five years of active military service. (Additional service requirements may apply for specific service assignments; e.g., pilot, nuclear power officer.)

PROGRAM REQUIREMENTS

- Complete all requirements for a bachelor's degree.
- Complete specified Naval Science courses:

Navy Option

Code	Title	Credits
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 202	Navigation	3
NAV SCI 301	Naval Engineering	3
NAV SCI 302	Naval Weapons	3
NAV SCI 401	Naval Operations	3
NAV SCI 402	Naval Leadership and Ethics	3

Marine Option

Code	Title	Credits
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 350	Fundamentals of Maneuver Warfare	3
NAV SCI 351	Land Campaigns	3
NAV SCI 402	Naval Leadership and Ethics	3

- In addition (or concurrent) to prescribed undergraduate degree and Naval Science course load, midshipmen must also satisfy these academic requirements:
 - Calculus (two semesters, by end of sophomore year). Not required for Marine option students.
 - Physics (two-semester of calculus-based physics, by end of junior year). Not required for Marine option students.
 - English grammar and composition (two-semester).
 - National Security Policy/American Military Affairs (one-semester).
 - World Culture/Regional Studies (one-semester; certain countries or cultures do not satisfy). Not required for Marine option students.
- Maintain a minimum, cumulative 2.5 GPA.
- Register for, and attend a one credit Naval Science leadership lab each semester (NAV SCI 175 Introductory Naval Laboratory I, NAV SCI 176 Introductory Naval Laboratory II, NAV SCI 275 Elementary Naval Laboratory I, NAV SCI 276 Elementary Naval Laboratory II, NAV SCI 375 Intermediate Naval Laboratory I, NAV SCI 376 Intermediate Naval Laboratory II, NAV SCI 475

Advanced Naval Laboratory I, NAV SCI 476 Advanced Naval Laboratory II)

- Participate in a 4-6-week training period each summer

SUMMER TRAINING REQUIREMENTS

A significant portion of a midshipman's professional training during their four-year curriculum is received during summer training.

Navy option midshipmen attend summer training, to include Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors and seniors.

Marine Corps option summer training includes Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors. All rising senior Marine option midshipmen attend the 6-week Marine Corps Officer Candidates School in Quantico, VA.

Midshipmen must ultimately make decisions as to which warfare area they will request to be commissioned into; CORTRAMID and the various summer training programs are designed to instill awareness of these areas and provide midshipmen with the background necessary to make informed decisions regarding their career choice. Midshipmen select their order of preference of available warfare communities and are ultimately assigned based on their class rank and the needs of the Navy and Marine Corps.

POSSIBLE SUMMER TRAINING ASSIGNMENTS

- CORTRAMID: Midshipmen assigned to this training will travel to a Fleet concentration area on either the East or West coast and spend a week with each of the following warfare communities: surface ship, submarine, aviation, and Marine Corps.
- Nuclear Power: Midshipmen can be assigned to a nuclear submarine or aircraft carrier.
- Ashore Aviation Option: Selected, qualified midshipmen train with a shore-based Navy aviation squadron, including flight time if feasible.
- Surface Warfare: Midshipmen can be assigned to a Navy ship in the United States or in overseas ports.

PEOPLE

Air Force ROTC—Aerospace Studies: Lieutenant Colonel John Pecarina, Professor of Aerospace Studies/Detachment Commander; Major Christopher Johnson, Assistant Professor of Aerospace Studies/Recruiting Officer; Captain Shane Schuelke, Assistant Professor of Aerospace Studies/Operations Flight Commander

Military Science—Army ROTC: Professor Lieutenant Colonel Cheney; Assistant Professor Captain Schwartz, Assistant Professor; Assistant Professor Captain Ali; Assistant Professor Captain Schultz; Enrollment Officer: Josh Beyerl

Naval Science—Professor, CAPT Zacharski; Associate Professor CDR Burmeister; Assistant Professors LT Cero, LT Heimke, and Marine Capt. Simonds. The assistant professors act as undergraduate advisors and may be contacted through the department office.

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

The Wisconsin (<https://wisconsinexperience.wisc.edu>) Experience is UW–Madison’s vision for the total student experience, which combines learning in and out of the classroom. Tied to the Wisconsin Idea and steeped in our long-standing institutional values—the commitment to the truth, shared participation in decision-making, and service to local and global communities—the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

Through the Wisconsin Experience, our students will engage in the following areas of intellectual and personal growth.

Empathy and Humility

- Develop and demonstrate cultural understanding of self and others
- Engage locally, nationally, and globally in a respectful and civil manner
- Appreciate and celebrate one another’s abilities, views, and accomplishments

Relentless Curiosity

- Actively learn with expert instructors, scholars, and peers
- Engage in creative inquiry, scholarship, and research
- Develop resilience, and foster courage in life and learning

Intellectual Confidence

- Develop competence, depth, and expertise in a field of study
- Integrate ideas and synthesize knowledge across multiple contexts
- Exercise critical thinking and effective communication

Purposeful Action

- Apply knowledge and skills to solve problems
- Engage in public service, partner with others, and contribute to community
- Lead for positive change

STUDENT LEARNING AT UW–MADISON

Student engagement and activism are deeply rooted in UW–Madison’s rich history of academic and research excellence. Occasionally, students are expected to help the university better understand and improve student learning by participating in evaluative activities, which include surveys, focus groups, and questionnaires, and by providing examples of their work through presentations, posters, demonstrations, and writing samples. We rely on the student perspective when assessing

the effectiveness of academic and co-curricular programs. By participating, students help improve their own educational and related experiences and contribute to better educational experiences for future students.

ACADEMIC ENRICHMENT AND HONORS PROGRAMS

UW–Madison offers students many ways to enrich their academic program, regardless of the major field of study they choose to pursue. Engaging in research, studying abroad, being part of learning communities, participating in university honors, becoming a student leader, engaging in service learning—these are all vital components that enhance and strengthen classroom learning. This partnership between in- and out-of-classroom learning form the foundation of the *Wisconsin Experience*. The university encourages students to take advantage of opportunities to integrate their learning experiences.

Honors Programs

Honors programs, which vary slightly among the schools and colleges, are designed for students who wish to undertake work that is more intensive than regular coursework. High grade point averages are required to maintain honors student standing. Students should refer to Honors Programs (<https://teachlearn.provost.wisc.edu/honors-programs/>) for more information including specific school or college programs or to contact an honors advisor.

Undergraduate Research Opportunities

One of the most exciting things in life is to discover something new. UW–Madison provides unique opportunities to learn from and work with some of the world’s leading researchers and scholars. Options range from assisting with professors’ ongoing research to designing and directing one’s own projects. For many examples, see Undergraduate Research Opportunities (<https://teachlearn.provost.wisc.edu/undergraduate-research/>). The Undergraduate Research Scholars Program (<http://urs.is.wisc.edu/>) is one opportunity available in the first or second year of study. Students may cap off their undergraduate degree with a senior thesis or senior honors thesis and are encouraged to present their work at the Undergraduate Symposium. For program descriptions, see Undergraduate Symposium (<https://ugradsymposium.wisc.edu/>). For a sampling of the many grants and awards available to support and honor this work, visit the Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>).

Service Learning

Undergraduates have access to more than 100 service-learning courses each year. These courses emphasize hands-on experiences that address real-world issues as a venue for educational growth. More information on service learning is available at the Morgridge Center for Public Service (<http://morgridge.wisc.edu/>).

Learning Communities

UW–Madison’s rich tradition of supporting learning communities (<https://www.housing.wisc.edu/residence-halls/learning-communities/>) means that the traditional classroom is not the only place where students learn. Students may choose to participate in any of the many residential and nonresidential learning communities, where students, faculty, and staff work together as both learners and teachers to pursue their academic interests. For more information about residential options, see this link (<https://www.housing.wisc.edu/residence-halls/learning-communities/>).

STUDY ABROAD PROGRAMS

Studying abroad extends the boundaries of the classroom to the world. It is an exciting way for students to complement and enhance their on-

campus learning while earning meaningful credit toward the major and degree. Each year UW–Madison sends more than 2,000 students on study abroad programs around the globe, including domestic study away options within the United States.

International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) serves as the central study abroad office on campus, offering more than 200 programs in over 60 countries around the world. IAP program offerings, available to all majors for students at all levels, range from short-term faculty-led opportunities to intensive language study, internships, a semester or a year at a university abroad, service-learning, and programs with special themes. Students can visit the Study Abroad Resource Center, 301 Red Gym, to meet with returned study abroad students and professional study abroad advisors who can help students prepare and research study abroad options.

Additionally, in partnership with IAP, the College of Agricultural and Life Sciences, the College of Engineering, and the Wisconsin School of Business offer programs geared specifically for their academic disciplines. All approved UW–Madison programs share policies, procedures, and best practices, and are featured on the UW Study Abroad Program Search (<https://studyabroad.wisc.edu/programs/>).

The Value of Study Abroad

Employers are increasingly looking for workers who not only have technical knowledge, but also “soft skills” such as critical thinking, problem solving, time management, and communication skills deemed necessary for success in a global workforce. Study abroad is one of the best ways students can acquire global skills and stand out to potential employers. Study abroad alumni have better job prospects. Based on a survey conducted by IES Abroad (<http://thepienews.com/news/us-study-abroad-alumni-have-better-job-prospects/>), 90 percent of study abroad alumni found their first job within six months of graduation. In addition to being able to experience new customs, cultures, interests, and food, alumni have reported that study abroad increased their confidence and had a lasting impact on their worldview (<https://www.iesabroad.org/study-abroad/benefits/alumni-survey-results/>).

Regardless of major, students will find that study abroad has much to offer. The variety of program sites and durations (semester, spring break, summer, winter, year) allow students to select programs based on individual academic interests and personal goals and objectives.

Access and Meaningful Credit for All Majors

In general, credits earned abroad can count toward fulfilling (<https://studyabroad.wisc.edu/academics/>) college and major requirements in any UW–Madison school or college. Seniors in most schools and colleges who complete their major and degree requirements while abroad on a UW–Madison program can graduate at the end of their study abroad program.

Each study program has its own eligibility requirements. Students are encouraged to talk with their academic advisors early in their academic careers about how study abroad can fit into their academic plans and future career goals. We are also working with departments to create Major Advising Pages (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/>) to highlight programs that work best for students' degree plans.

Costs and Funding

Students who are thinking about studying abroad or have already decided to do so may be concerned about how they will fund the experience. We frequently hear from students that the program cost is a primary factor in deciding whether they are able to pursue studying abroad. Instead

of tuition, students pay a program fee to cover the actual costs of the experience, which is unique to each program. Programs vary widely in cost, so it is likely that we have a program for every budget. Sometimes studying abroad is no more expensive than studying on campus, and other times the cost can be higher. We work with students to create funding (<https://studyabroad.wisc.edu/funding/>) plans for their time abroad.

Students who study abroad in UW–Madison-sponsored programs may be eligible to use federal financial aid toward the costs of the program. Students should meet with the UW–Madison Office of Student Financial Aid to discuss eligibility requirements. In addition, students can apply for scholarships (<https://www.studyabroad.wisc.edu/scholarships.html>) specifically designated for use with study abroad programs. These include UW–Madison, national, and international scholarship opportunities. Students can also use most campus and academic department scholarships for UW–Madison-sponsored study abroad programs.

Diversity and Inclusion

UW Study Abroad is committed to providing quality study abroad and domestic study away programs for every UW–Madison student. We work strategically to identify, address, and remove barriers that may prevent participation and to provide a welcoming and inclusive environment for students. Our staff actively engages with students, faculty, and staff from diverse backgrounds and prioritizes the continuous development of our knowledge and cultural competence. We also recognize the importance of increasing access to study abroad for historically underrepresented student populations. We are committed to diversity and inclusion so that every student can engage with and understand their identity through a new lens and continue to develop and make progress on their personal, professional, and academic goals.

REQUIREMENTS FOR UNDERGRADUATE DEGREES

REQUIREMENTS FOR UNDERGRADUATE DEGREES

This is a summary of the Requirements for Undergraduate Degrees policy. Click here (<https://policy.wisc.edu/library/UW-1060/>) to view the official policy in its entirety in the UW–Madison Policy Library.

The University of Wisconsin–Madison sets minimum standards that must be met by all students pursuing an undergraduate degree. The information in the following paragraphs provides general information about study at UW–Madison. Requirements may vary among the schools and colleges, and for specific programs. Students should learn about and understand the specific requirements for their program of study.

TOTAL DEGREE CREDITS

To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit). Requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. Undergraduate Majors (p. 13).

RESIDENCE CREDIT

Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. “In residence” means on the UW–Madison campus with an undergraduate degree classification. “In residence” credit also includes UW–Madison courses offered in distance or online formats, as credits earned in UW–Madison Study Abroad/Study Away programs. Some schools and colleges may have additional requirements concerning courses taken in residence; students should refer to the specific school or college section of the *Guide* or consult with an advisor.

UNDERGRADUATE MAJOR DECLARATION

This is a summary of the Undergraduate Major Declaration policy. Click here (<https://policy.wisc.edu/library/UW-1009/>) to view the official policy in its entirety in the UW-Madison Policy Library.

Undergraduate degrees at UW–Madison presume that students are completing a program of study that consists of a degree program that combines the requirements for the degree with focused study in a discipline, or that combines school or collegewide requirements with an undergraduate major in which they pursue focused study. All undergraduates are expected to have declared or to have been admitted to their focused area of study by the end of the semester in which they have accumulated 86 credits. Students who have not met this expectation may be prevented from enrolling in future terms until they meet with their advisor. Some schools and colleges have additional requirements governing when majors may be declared; students should refer to the specific school or college section of the *Guide* and consult with an advisor about declaring their major.

ACADEMIC PROBATION

Undergraduate students must maintain the minimum academic thresholds, including the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

GENERAL EDUCATION REQUIREMENTS

This is a summary of the General Education Requirements policy. Click here (<https://policy.wisc.edu/library/UW-1059/>) to view the official policy in its entirety in the UW-Madison Policy Library.

All undergraduate students at UW–Madison must complete the university-wide General Education Requirements, which are designed to convey the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. These requirements provide for breadth across the humanities and arts, social studies, and natural sciences; competence in communication, critical thinking, and analytical skills necessary for success in college and beyond; and investigation of the issues raised by living in a culturally diverse society. This core is intended to provide students with intellectual and practical skills, basic knowledge of human cultures and the physical world, strategies for understanding these topics, and tools intended to contribute to their sense of personal and social responsibility. General Education complements the work students do in their majors and degrees. Together, these requirements help students learn what they need to know not just for making a living, but also for making a life.

Completing the General Education Requirements is an important part of achieving these competencies, and to do so, students choose from many courses in communication, ethnic studies, quantitative reasoning, and breadth of study across disciplines in the natural sciences, humanities, literature, and arts, and social and behavioral sciences.

Each school and college may choose to allow General Education courses to count toward other degree and/or major requirements. Students should always check with their advisors to discuss any additional degree requirements and determine if students are required to take specific General Education courses or to complete the requirements in a particular order. Students should review their Degree Audit (DARS) report to see how they are progressing toward fulfilling the General Education requirements. Please refer to this website (<https://gened.wisc.edu/>) for more information about the requirements.

The university-wide General Education requirements are:

BREADTH, 13–15 CREDITS, DISTRIBUTED OVER THREE AREAS

All students must complete 13–15 credits of coursework intended to provide a **breadth** of experience across the major modes of academic inquiry. This requirement encourages students to adopt a broad intellectual perspective, to examine the world through investigative, critical, and creative strategies practiced in the natural (computational, biological, and physical) sciences, social and behavioral sciences, as well as in the arts and humanities.

Learning Outcomes: Students acquire critical and creative thinking skills as well as enhance their problem-solving skills through a breadth of study across the humanities and arts, social studies, computational, biological sciences and physical sciences.

In courses satisfying the Breadth requirement, students will:

- articulate examples of significant contributions to human understanding achieved through various “ways of knowing” found in the arts and humanities; social and behavioral sciences; and computational, biological, and physical sciences.
- recognize and articulate the ways in which different disciplines approach questions that call upon different tools of inquiry, understanding, and creative enterprise.
- identify ways in which multiple tools of inquiry and understanding can be used to achieve greater insight into resolving “big” questions (e.g., climate change, poverty, global health etc.), evaluating the strengths and weaknesses of those approaches, and understanding which complementary approaches will help achieve meaningful change.
- evaluate different modes of inquiry across the humanities and arts; social studies; computational, biological, and physical sciences, and identify strengths and weaknesses of those approaches across disciplines when approaching a question.

To achieve these outcomes, students are required to complete courses in the following areas.

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research, understand, communicate about, and interpret creatively the world around us. These "ways of knowing" intersect and overlap, and the ideas presented in one area will often inform and transform what students know and how they think about the others. Students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand their own and others' experience, and to behave in socially responsible ways. (For more information about how this exposure to breadth of inquiry and expression enriches students' undergraduate experience and complements intensive study in the major, please see the General Education Requirements (<https://gened.wisc.edu/>) website.)

COMMUNICATION, 3 TO 5/6 CREDITS

The **Communication** requirement helps to ensure that all graduates of UW–Madison acquire essential communication and research-gathering skills necessary for success in university course work and beyond. Communication–A (**Comm–A**) and Communication–B (**Comm–B**) courses train students to gather and assess information from a variety of sources and to present different kinds of information, insight, and analysis to diverse audiences. These courses are essential for students' career success and their preparation for public life in a rapidly changing world. While Comm–A courses focus exclusively on essential communication skills, Comm–B courses provide content instruction in a specific discipline and teach research, writing, and communication skills in conjunction with the course content. Comm–B courses are offered by departments across campus and vary widely in topic, content, and format.

Learning Outcomes: Students develop skills that enable them to be effective communicators in and out of the classroom.

In courses satisfying the Communication requirement, students will:

- make effective use of information retrieved, organized, and synthesized from appropriate sources.
- present ideas and information clearly and logically to achieve a specific purpose.
- make effective use of communicative forms appropriate to a specific discipline, and adapted to the intended audience.
- use appropriate style and conventions associated with particular communicative forms, genres, or disciplines.

To achieve these outcomes, students must complete the following Communication requirements:

- **Part A. Literacy Proficiency.** 2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete coursework to fulfill this requirement, students may be exempted from Part A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year of undergraduate study.
- **Part B. Enhancing Literacy Proficiency.** 2–3 credits of more advanced coursework for students who have completed or been exempted from Part A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

Please note: Because English is the language of instruction at UW–Madison, Communication A and B courses are taught in English, and student work in them is also completed in English.

ETHNIC STUDIES, 3 CREDITS

The **Ethnic Studies** requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are expected to complete this requirement within the first 60 credits of undergraduate study

Learning Outcomes: Students draw connections between historical and present day circumstances, and consider perceptions and cultural assumptions when examining questions and making decisions.

In courses satisfying the Ethnic Studies requirement, students will:

- articulate some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race in the U.S.
- recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity.
- examine questions and make decisions with consideration for the cultural perspectives and worldviews of others.

The skills listed above apply to students' lives inside and outside the classroom, and by pursuing these objectives, students will further enhance their ability to participate in a multicultural society more effectively, respectfully, and meaningfully. Students complete this requirement by taking one course of at least 3 credits that is designated as an Ethnic Studies course.

QUANTITATIVE REASONING, 3 TO 6 CREDITS

Quantitative Reasoning is the process of forming conclusions, judgments or inferences from quantitative information. The Quantitative Reasoning requirement at UW–Madison has two parts: Part A and B. **Quantitative Reasoning A** courses provide students with skills in mathematics, computer science, statistics or formal logic that are needed for dealing with quantitative information. The acquired skills are broad-based in order to have a positive impact on the readiness of students to take a Quantitative Reasoning B course in a variety of disciplines. **Quantitative Reasoning B** courses allow students to enhance their Quantitative Reasoning Proficiency in a more advanced setting, where they make significant use of quantitative tools in the context of other course material.

Learning Outcomes:

Quantitative Reasoning Part A:

In an introductory course in college-level mathematics, computer science, statistics, or formal logic that is intended to prepare students for more advanced work in a disciplinary context, students will:

- solve problems;
- draw conclusions; and
- develop models and/or interpret data and/or devise algorithms.

Quantitative Reasoning Part B:

In the disciplinary or interdisciplinary context of a course designed to build on the tools of college-level mathematics, computer science, statistics, or formal logic, students will:

- manipulate quantitative information to create models, and/or devise solutions to problems using multi-step arguments, based on and supported by quantitative information;
- evaluate models and arguments using quantitative information; and
- express and interpret in context models, solutions, and/or arguments using verbal, numerical, graphical, algorithmic, computational, or symbolic techniques.

The **Quantitative Reasoning Part A** requirement can be satisfied by:

- approved college work while in high school, AP test scores, or placement testing; or
- taking a 3 credit course at UW–Madison with a Quantitative Reasoning A designation.

The **Quantitative Reasoning Part B** requirement, which enhances students' proficiency in this domain, can be satisfied by taking a designated QR-B course of at least 3 credits in a variety of fields of study. Students are encouraged to select a course in keeping with their interests or to satisfy other requirements for their major or degree program.

To ensure timely completion of the undergraduate degree, students must demonstrate minimum math proficiency before they can enroll in a Quantitative Reasoning Part A course. They should complete Part A of the Quantitative Reasoning requirement by the end of their first year, and must complete Part A before they enroll in Part B.

IDENTIFYING COURSES THAT MEET GENERAL EDUCATION REQUIREMENTS

The university offers hundreds of courses that meet the requirements described above. Students should consider their own interests and check with their advisor when deciding which courses to complete. Please note that many undergraduate programs of study have breadth requirements that go beyond these basic university-wide requirements.

The following language is used in the UW–Madison course listings to indicate how courses count toward satisfying the communication, quantitative reasoning, and ethnic studies portions of the General Education Requirements. Courses that satisfy these requirements are also tagged with a mortarboard symbol. #

- Communication Part A
- Communication Part B
- Ethnic Studies
- Quantitative Reasoning Part A
- Quantitative Reasoning Part B

Note: Some Communication Part B courses carry Communication B credit only at the lecture or section level and/or only in certain semesters; these courses will be indicated in the Schedule of Classes.

Course descriptions also include information about whether courses meet General Education Humanities, Natural Science, or Social Studies Breadth Requirements. (Click on course numbers in the *Guide* to see this information.) Students should also be aware that each school and college may, at its own discretion, designate additional courses that satisfy these requirements. For this reason, students should consult their advisors to

obtain information about how these requirements are implemented in the school or college in which they are enrolled.

GENERAL EDUCATION POLICIES

Only undergraduate-level college courses may satisfy General Education Requirements

Directed or Individualized Study may not be used to satisfy General Education Requirements.

Because these requirements assume that students are engaged in focused study within the designated area of general education, requirements cannot be met with portions of courses.

Exemption from General Education: All students are required to meet the fundamental degree requirements of the university, which include general education.

Disability-Based Waivers: The university has determined that waivers to the communication and quantitative reasoning portions of the general education component would fundamentally alter the nature of the University of Wisconsin–Madison degree. Students should not expect to obtain disability-based waivers to the communication and quantitative reasoning portions of the General Education Requirements.

Pass/Fail: Effective fall 2012, all courses taken to meet the University General Education Requirements must be taken on a graded basis. These grades are included in students' GPA calculations according to school/college GPA rules.

GRADUATING DECLARATION OF INTENT TO GRADUATE

When students expect to graduate, they must indicate their intent by completing the graduation application available in the MyUW Student Center. It is the policy of UW–Madison that all work for the degree must be completed and all degree requirements satisfied before the degree can be conferred.

CONFERRAL OF DEGREES

When students have been certified as having completed all university general education, degree, and major requirements, the degree will be awarded. When the degree is awarded, a diploma will be issued, listing the degree earned, and the transcript updated to reflect the degree, major, and any other approved academic programs completed. Students who have holds (<https://kb.wisc.edu/helpdesk/page.php?id=4139>) on their records will not receive their diplomas, or be able to order transcripts, until the holds are cleared.

COMMENCEMENT

Students who wish to attend the spring or winter commencement ceremony must indicate their intent by completing the graduation application available via Student Center in My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e4s1>) by the posted deadline (<https://commencement.wisc.edu/information-for-graduates/>). Students may participate in the commencement ceremony (<https://commencement.wisc.edu/>), in which the chancellor and deans symbolically confer the degrees, even if all degree requirements have not been completed. Neither participation in the ceremony nor listing in the program conveys degree conferral. Students will not receive the diploma or transcript notation until all degree requirements are certified as complete by their respective school or college. Should a student's graduation plans change, updates to the intended term of graduation

must be indicated via the graduation application in the MyUW Student Center.

ENROLLMENT AND RECORDS

The Office of the Registrar (<https://registrar.wisc.edu/>) is responsible for maintaining the academic records of students who attend the University of Wisconsin–Madison and for many services associated with these records, including enrollment and grading. The office is located at:

333 East Campus Mall #10101
Madison, WI 53715-1384
registrar@em.wisc.edu
608-262-3811

Many student services are available online in the Student Center on [My UW–Madison \(My UW\)](#) (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e2s1>), including viewing grades, ordering transcripts, and updating address and emergency contact information. Students are responsible for the accuracy of the addresses provided in My UW and for the courses selected when they enroll.

My UW is available to eligible students, who gain access by using their Net ID and password. Access to My UW–Madison is available from any device with Internet access. For further information about My UW–Madison, see DoIT (Division of Information Technology) (<http://it.wisc.edu/>).

ENROLLMENT

Students enroll for courses, obtain information about deadlines, view their class schedule, and more in the Course Search & Enroll (<http://public.enroll.wisc.edu>) application on [My UW](#) (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e3s1>). Information about key deadlines and course enrollment are also available at the Office of the Registrar website (<https://registrar.wisc.edu/>). Additional assistance with the course enrollment process is available by calling 608-262-3811 or emailing registrar@em.wisc.edu.

GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits taken for which grades of A through F are received. Semester grades are reported by letter only; plus and minus signs are not authorized. The highest possible GPA is 4.0, representing A grades in every course; the lowest possible is 0.0. The following is the official scale of grades at UW–Madison.

GRADES WITH ASSOCIATED GRADE POINTS PER CREDIT

Grade		Grade Points Per Credit
A	Excellent	4
AB	Intermediate Grade	3.5
B	Good	3
BC	Intermediate Grade	2.5
C	Fair	2
D	Poor	1
F	Failure	0

Excluded from the GPA calculation are:

S or U (Satisfactory or Unsatisfactory) in courses taken on the pass/fail basis.

SD/UD (Satisfactory-Disruption/University Disruption-No Credit): special grading option for students in response to the COVID-19 events.

Cr or N (Credit or No Credit) in courses offered on a credit/no credit basis.

Def (Deferred), Ex (Excused), PE (Permanently Excused), formerly used only for required Physical Education. The Physical Education requirement was discontinued effective August 30, 1976.

DR (Dropped), indicates the course was dropped.

I (IN for Cr/N Courses) (Incomplete), a temporary grade used when work is not completed during a term.

EI (Extended Incomplete), a temporary grade for an extended time limit to remove an Incomplete.

PI (Permanent Incomplete), a permanent grade replacing an Incomplete incurred in a student's last semester in residence and not removed within five years.

NR (No Report), indicates that a grade was not submitted by the instructor. Has no net effect on GPA. Effective Summer 1999.

NW (No Work)..."should be used for students who enroll in a course and then never attend. 'No Work' in this context means that the instructor has no evidence that the student ever attended, in that no course work was ever submitted. Any student who does attend for part of the semester, and then stops participating should be given a grade of 'F' unless there are grounds for assignment of a grade of 'I'(Incomplete)." Fac. Doc. 1028; effective 9/94.

P (Progress), a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.

Q (Question on Credits or Honors), a temporary grade used during grade reporting to indicate a credit problem. Should only be used when the student is enrolled for the wrong number of credits or their honors indication is incorrect. A Q grade may be represented on a grade report as "?".

R (Registered), not used after the Summer 1974.

W (Withdraw), indicates the student withdrew from the University while enrolled in the course.

Audited courses, denoted as such by 'AU' in place of a number of credits, are graded either S (Satisfactory) or NR (No Report).

CREDIT/NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

PASS/FAIL

POLICY ON USE OF PASS/FAIL GRADING OPTION FOR UNDERGRADUATES

This policy concerns the use of the pass/fail grading option for degree-seeking undergraduate students. According to the UW–Madison grading scale, grades of S (satisfactory) and U (unsatisfactory) are the transcripted grades that are used for what is commonly known as pass/fail. It applies only to courses that use the default A–F grading scale and that also allow students to choose to take a course on a pass/fail (PF) basis.¹

The instructor enters the letter grade earned by students on the grade roster, and those letter grades are subsequently recorded as a pass (S) or fail (U) on the student record. A pass (S) will be recorded when a letter grade of A through C is earned. A fail (U) will be recorded when a letter grade of D or F is earned. In addition to the S or U notation, the student transcript includes the symbol # for courses that were taken on a pass/fail basis. Neither the S nor the U is used in computing the grade point average. Instructors are not informed that a student has elected to take the course pass/fail.

STUDENT ELIGIBILITY

Students must be in good academic standing according to their school/college in order to be eligible to request the pass/fail grading option.

Undergraduates may carry one course on a pass/fail basis per term and a maximum of 16 credits during their undergrad career. The summer sessions collectively count as a single term.

Required courses cannot be taken on a pass/fail basis. The student's school or college may review the request to take a course pass/fail and reject requests for nonelective work. It may be difficult for the school or college official to determine whether a course is an elective or being used to fulfill a requirement since a student's enrollment or the way a course is being used in the specific program of study may change. Ultimately it is the student's responsibility to be sure that the requested course is an elective. Students are strongly advised to consult with an academic advisor before taking a course pass/fail. Courses taken on a pass/fail basis will not count for nonelective requirements even if they would normally count toward such requirements.

Each school or college is responsible for clearly communicating to its students what the definition of "good academic standing" is and what a free elective is.

In each school or college, the office responsible for academic policy exceptions is authorized to make exceptions to the pass/fail policy.

PROCESS FOR REQUESTING THE PASS/FAIL GRADING OPTION

Students indicate that they would like to have a course they are enrolled in graded on a pass/fail basis by completing a course change request via their Student Center (see Course (<https://kb.wisc.edu/registrar/7700/>)Change Request for detailed information). Students may submit pass/fail requests via their Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed).

The deadline for requesting the pass/fail grading option is posted on the Office of the Registrar website (<https://registrar.wisc.edu/dates/>). These deadlines are based on the idea that the pass/fail option is intended to encourage students to explore educational opportunities that they might otherwise not be willing to attempt. Pass/fail is not intended as a way for students to avoid academic consequences.

Once the student has submitted the request to take a course on a pass/fail basis the request is routed via SIS workflow to an academic dean in the school or college for approval or further communication with the student. The school/college official must approve the request before the grading option is changed to pass/fail by the Office of the Registrar.

Students can see whether a course is being graded on a pass/fail basis in their Student Center.

¹ For study abroad programs operated by the College of Engineering, courses taken abroad toward an engineering major will be posted as pass/fail. This occurs automatically and is not a student option; this practice is not covered or affected by this policy.

FAILURES

Every course grade of F counts as 0 grade points and remains permanently on the transcript. If the course is repeated, the original F will remain on the transcript and will be included in computing the GPA.

INCOMPLETES

An Incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester. If a student is unable to take or complete the final examination because of illness or other circumstances beyond his or her control, the student may be granted an Incomplete. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of such proof the grade shall be F; even with such proof, if the instructor is convinced that the student cannot pass, the grade shall be F.

Undergraduate students enrolled in the College of Letters & Science must complete the course work for which they received the Incomplete by the end of the fourth week of classes of their next term of enrollment at UW–Madison (exclusive of summer sessions). Failure to do so will result in a lapse into a grade of F, unless the time limit has been formally extended. Letters & Science students should see the L&S section on Incompletes (p.) for important details.

Undergraduates enrolled in schools or colleges other than Letters & Science must complete the course work for which they received the Incomplete by the end of their next term of enrollment (exclusive of summer sessions). Incompletes incurred in the last term of enrollment may not be removed after five years of absence from the university without special advance permission of the student's associate or assistant dean. Such Incompletes remain on the record permanently but do not lapse into a grade of F.

AUDIT

Students may audit eligible courses with instructor and academic dean consent, and if no laboratory or performance skills are involved. Auditors may not recite or take examinations but are expected to attend classes regularly and do some assigned work. Although courses for which students enroll as an auditor are factored into tuition, such courses do not earn academic credit and do not count in determining full-time/part-time load for enrollment certification in an academic term. Students initiate a request to audit by completing a course change request via

their Student Center (see Course Change Request (<https://kb.wisc.edu/registrar/7700/>) for detailed information). The deadline to change a course from credit to audit is the end of the fourth week of classes. School and college policies may vary from this description. Students are advised to consult with the instructor concerning specific course requirements that must be satisfied.

CLASS STANDING

Students are classified by year according to the number of credits and grade points they have earned:

Freshman: less than 24 credits
 Sophomore: at least 24 credits
 Junior: at least 54 credits
 Senior: at least 86 credits

TUITION AND FEES

The UW System Board of Regents sets tuition and fee rates annually. Rates are subject to change without notice.

The tuition and fee schedule is available on the Bursar's Office website (<https://bursar.wisc.edu/tuition-and-fees/>). Students who enroll after the first Friday of the official first week of classes are assessed a late initial enrollment fee. Exception: Special and Guest students have until the Friday of the second week of classes to enroll.

Enrolled students can view account charges/payments, financial aid (loans, grants, scholarships) received, and refunds on their My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e5s1>) Student Center, Financial Account. Students can also access links to view and pay student account eBills, set up Authorized Payers for account access, and enroll for eRefund.

The Bursar's Office provides the student account bill electronically (eBill). The eBill is published on the My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e5s1>) Student Center payment portal. Students and their Authorized Payers receive an email when the eBill is available to view.

For questions about tuition rates, student account activity and billing questions, contact the Bursar's Office.

tuition@bussvc.wisc.edu (include student ID and name)
 608-262-3611
 333 East Campus Mall #10501
 Madison, WI 53715-1383

MAKING PAYMENTS

Student Account payment options include making an online ePayment, mailing a check to the Bursar's Office, or placing a check in the first-floor lobby dropbox. For detailed payment information, see Payment Methods (<https://bursar.wisc.edu/student-tuition-account/payment-methods/>) on the Bursar's Office website.

If the balance is not paid by the due date, a late fee is assessed and a hold is placed to prevent future enrollment and release of official transcripts and diplomas, until the account is paid.

RESIDENCE FOR TUITION PURPOSES

Wisconsin Statutes, Section 36.27(2), governs resident status for tuition purposes at all University of Wisconsin System institutions. All individuals are considered nonresidents unless they meet one of the exemptions from nonresident tuition specified in that law. In determining

resident status for tuition purposes, standards are different from those used for voting, paying taxes, applying for various licenses, or other forms of residency. In general, eligibility for resident status requires that an independent student (or the student's parent, if the student is a dependent) must be a bona fide resident of Wisconsin for at least 12 months immediately prior to enrollment for any term. However, if a student comes to Wisconsin primarily for educational purposes, the student will not qualify after living in Wisconsin for a year, even if the student meets some or all of the remaining eligibility criteria. State law dictates that students who reside in Wisconsin to obtain an education are presumed to be nonresidents of Wisconsin.

There are rare exemptions to the requirement of establishing bona fide residency over a twelve month period. Those exemptions relate to individuals who have recently moved to Wisconsin for full-time, permanent employment (under certain conditions), individuals with certain military or veteran statuses, and refugees residing in Wisconsin under specific circumstances. If you believe you may be eligible for one of these exemptions, you may wish to inquire with a residence counselor, as not all individuals moving to Wisconsin for employment or as refugees or veterans will qualify as Wisconsin residents.

For more information and the full text of Wisconsin Statutes, Section 36.27(2), see the Office of the Registrar website (<https://registrar.wisc.edu/residence/>) or contact a residence counselor at 608-262-1355 or residencefortuition@registrar.wisc.edu.

In some cases, military-affiliated individuals may be eligible for resident tuition even though they are not eligible for the formal status of Resident for Tuition Purposes (this includes non-resident students receiving resident tuition through the Post-9/11 GI Bill.) If you believe you may be eligible for remission of nonresident tuition based on your or a parent's military service, you may wish to inquire with University Veterans Services at 608-265-4628 or veterans@wisc.edu.

MINNESOTA RECIPROCITY FOR TUITION RATES

Minnesota residents who are certified by the Minnesota Office of Higher Education for the appropriate term to attend UW–Madison under the Minnesota–Wisconsin Tuition Reciprocity Agreement will be assessed the approved reciprocity tuition rate, plus the segregated fees assessed all UW–Madison students. Students under this program will be classified as nonresidents of Wisconsin. Minnesota residents must apply to the Minnesota Office of Higher Education for verification of their eligibility for reciprocity.

It is the student's responsibility to inquire about application procedures, deadline dates, and reapplication procedures. Students may apply online on the Minnesota Office of Higher Education website (<http://www.ohe.state.mn.us/>). Questions may be directed to the Minnesota

Office of Higher Education:
 1450 Energy Park Drive, Suite 350
 St. Paul, MN 55108-5227
 651-642-0567 or 1-800-657-3866

They may also be directed to the UW–Madison Office of the Registrar (<https://registrar.wisc.edu/>):
 333 East Campus Mall #10101
 Madison, WI 53715-1384
registrar@em.wisc.edu
 608-262-3811

RULES, RIGHTS, AND RESPONSIBILITIES

STUDENT PRIVACY RIGHTS (FERPA)

Students have the right to inspect and review most education records maintained about them by the University of Wisconsin–Madison and, in many cases, decide if a third person can obtain information from them. Students may challenge information in their records which they believe to be inaccurate, misleading, or inappropriate.

The university has adopted a policy statement implementing all provisions of the Family Educational Rights and Privacy Act (FERPA). A copy of this statement may be obtained at the Office of the Registrar (<https://registrar.wisc.edu/>), 333 East Campus Mall #10101. The university, in accordance with the act, has designated the following as "directory information," which is publicly available unless a student asks to have any or all of it withheld: name; postal address; telephone numbers; e-mail addresses; date of birth; major field(s) of study and number of academic credits earned toward degree; attendance status (including current year, credit load, and full-or part-time status); dates of attendance (matriculation and withdrawal dates); degrees and awards received (type of degree and date granted); previously attended educational agencies or institutions; participation in officially recognized activities; and participation in athletics and weight and height of athletes.

Students wishing to keep some or all of their "directory information" confidential should restrict their information in the Student Center in My UW (<https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e6s1>). Students with questions about the provisions of the act or who believe the university is not complying with the act may obtain assistance from the Office of the Registrar:
333 East Campus Mall #10101
Madison, WI 53715-1384
reginfo@em.wisc.edu
608-262-3811

Students have the right to file complaints alleging university noncompliance with the act with the federal agency that enforces the act. The address is: The Family Educational Rights and Privacy Act (<http://www2.ed.gov/policy/gen/guid/fpco/ferpa/>) Office, Department of Education, 330 Independence Avenue SW, Washington, DC 20201.

Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at: Office of the Registrar (<https://registrar.wisc.edu/>)
333 East Campus Mall #10101
Madison, WI 53715-1384

AVAILABILITY OF ACADEMIC RECORD INFORMATION TO PARENTS OR GUARDIANS OR OTHERS

A student may authorize a third party (e.g., a parent, guardian, spouse, potential employer, etc.) access to academic record information. An authorization form is available at the Office of the Registrar's website, or by visiting the Office of the Registrar (<https://registrar.wisc.edu/>), 333 East Campus Mall #10101. The authorization form permits release of specified information on a one-time basis to the specified third party. If no authorization is on file, it will be assumed that the student does not wish to give a third party access to academic record information. This policy

is designed to give students specific control over the parties to whom academic record information may be released.

Grade reports will not be sent by the university to parents or guardians. Students are urged to keep their parents informed of their academic progress.

ACADEMIC INTEGRITY

UW–Madison students have the obligation to conduct their academic work in a manner consistent with high standards of academic integrity. They also have the right to expect they and other students will be graded fairly. Students have due process rights should they be accused of academic misconduct. Therefore, it is important students:

- become familiar with the rules of academic misconduct (UWS Ch. 14);
- ask their instructors if they are unsure (for example, how to use sources in a paper or whether to work with another student on an assignment);
- let instructors know if they think they see misconduct;
- be aware helping someone else cheat is a violation of the rules

For complete discussion of the rules regarding academic integrity, review the complete text of UWS Chapter 17 (https://docs.legis.wisconsin.gov/code/admin_code/uws/14/). Find additional information, on the Office of Student Conduct and Community Standards website (<https://conduct.students.wisc.edu/academic-integrity/>) or contact the office via phone at 608-263-5700 or room 70 Bascom Hall.

STUDENT RIGHTS AND RESPONSIBILITIES

Every member of the University of Wisconsin–Madison community has the right to expect to conduct their academic and social life in an environment free from threats, danger, or harassment. Students also have the responsibility to conduct themselves in a manner compatible with membership in the university and local communities.

UWS Chapters 17 and 18 of the Wisconsin Administrative Code list the university policies students are expected to follow and describes the procedures used when students are accused of misconduct. Chapter 17 also lists the possible responses the university may apply when a student is found responsible for violating a policy. The process used to determine any violations and disciplinary actions are important parts of UWS 17. Review the complete text of UWS Chapter 17 (https://docs.legis.wisconsin.gov/code/admin_code/uws/14/), and for additional information, review the Office of Student Conduct and Community Standards website (<https://conduct.students.wisc.edu/academic-integrity/>), or contact the office via phone at 608-263-5700 or room 70 Bascom Hall.

STUDENT GRIEVANCE PROCEDURE

Any student at UW–Madison who feels that they have been treated unfairly has the right to voice a complaint and receive a prompt hearing of the grievance. The basis for a grievance can range from something as subtle as miscommunication to the extreme of harassment.

Each school or college has a procedure to hear grievances. Generally the process involves an informal attempt to solve the problem, if appropriate. If not, more formal proceedings can be undertaken until a resolution is reached. Advisors and school or college offices have detailed information. For assistance in determining options, students can

contact the drop-in staff member within the Dean of Students Office at 608-263-5700, within Bascom Hall, Room 70, Monday–Friday, 8:30 a.m.–4 p.m.

SEEKING ASSISTANCE

The Dean of Students Office (<https://doso.students.wisc.edu/who-we-are/>) is a primary resource for connecting students who are navigating personal, academic, or health issues, to supportive campus and community resources. The Dean of Students Office also serves as a central location for reporting issues of hate and bias, sexual assault, and hazing.

A student can seek help at many places on campus, for both personal and academic problems. For answers to general questions on many topics, a good place to start is Ask Bucky (<https://info.wisc.edu/ask-bucky/>), which is an excellent general referral service.

For personal problems, Counseling Services, a unit of University Health Services (<http://www.uhs.wisc.edu/>), offers a variety of individual, group and couple counseling services. Experienced counselors, psychologists, and psychiatrists are available to assist students in overcoming depression and managing anxiety, and in developing self-awareness and understanding, independence, and self-direction. The counseling staff is experienced and sensitive to students of diverse cultural and ethnic backgrounds. Counseling Services is located at 333 East Campus Mall; 608-265-5600. In addition, an on-call dean in Student Assistance and Judicial Affairs is usually available by telephone (608-263-5700) or on a walk-in basis (75 Bascom Hall) Monday–Friday, 8:30 a.m.–4:30 p.m.

For academic problems, many places can offer help. The student should first discuss the problem with the professor or TA. If the problem is not resolved at that time, the student can speak with an academic advisor or the chair of the department. If further assistance is needed, the student should contact one of the academic deans in the school or college.

ALCOHOLEDU ([HTTPS://WWW.UHS.WISC.EDU/PREVENTION/SUBSTANCE-ABUSE/ALCOHOLEDU/](https://www.uhs.wisc.edu/prevention/substance-abuse/alcooledu/))

AlcoholEdu is an online course overseen by University Health Services that educates students about the impacts of alcohol and provides them with the information to make healthy decisions. All incoming degree seeking undergraduate students—including first-year and transfer students—must complete *AlcoholEdu*. The program consists of two parts, both of which must be completed.

STUDENT AFFAIRS

Student Affairs at UW–Madison (<https://students.wisc.edu>) serves students in areas including health and well-being, identity and inclusion, leadership and engagement, and student advocacy. Its multiple departments collaborate broadly across the many programs and campus units that serve students, such as the Division of Diversity, Equity and Educational Achievement (<https://diversity.wisc.edu/>) and University Housing (<http://housing.wisc.edu/>), to enhance UW–Madison as a welcoming and inclusive community for all students.

ASSOCIATED STUDENTS OF MADISON (ASM)

4301 Student Activity Center

333 East Campus Mall
608-265-4276 (265-4ASM)
Web: asm.wisc.edu (<http://asm.wisc.edu>)
Facebook: Associated Students of Madison (<https://www.facebook.com/ASMStudentGov/>)
Twitter: @ASMstudentgovt (<https://twitter.com/search/?q=%40ASMstudentgovt&src=typd>)

- Promotes student voice as it pertains to legislative, diversity, and university affairs
- Distributes funding for student activities, organizations, and events to maximize student involvement in shaping campus life
- Supports elected student representatives
- The Open Seat Food Pantry strives to alleviate the stresses of food insecurity for those who need support.
- Oversees the Student Activity Center, which offers office and meetings space to student organizations
- Distributes the student bus pass every semester, which allows students to take unlimited rides on any Madison Metro bus route, in addition to the free campus bus routes

CENTER FOR THE FIRST-YEAR EXPERIENCE

155 Middleton Building
1305 Linden Drive
608-263-0367
Email: newstudent@studentlife.wisc.edu
Web: newstudent.wisc.edu (<http://newstudent.wisc.edu>)
Facebook: UW First-Year Experience (<https://www.facebook.com/UWNewStudent/>)
Twitter: @UWNewStudent (<https://twitter.com/search/?q=%40UWNewStudent&src=typd>)

- Collaborates with campus partners to plan and implement Student Orientation, Advising, and Registration (SOAR) for incoming undergraduates and their families
- Oversees the Transfer Transition Program, which provides pre-advising services to prospective students and support services to new transfer students on campus
- Assists incoming students with the academic and social transitions to the university through direct and indirect programming
- Offers seminar courses on the Wisconsin Experience and provides consultation and support to faculty and graduate students who work with first-year students

CENTER FOR LEADERSHIP & INVOLVEMENT

Third Floor, Red Gym
716 Langdon Street
608-263-0365
Email: cfl@studentlife.wisc.edu
Web: cfl.wisc.edu (<http://cfl.wisc.edu>)
Facebook: UWCfLI (<https://ourwisconsin.students.wisc.edu>)
Twitter: @UWCfLI (<https://twitter.com/search/?q=%40UWCfLI&src=typd>)

- Facilitates the registration and advising for more than 1,000 student organizations
- Hosts student organization fairs in fall and spring

- Supports the Adventure Learning Programs (ALPs), Student Leadership Program, and the Willis L. Jones Leadership Center
- Administers and confers UW–Madison Leadership Certificate

DEAN OF STUDENTS OFFICE

70 Bascom Hall
 500 Lincoln Drive
 608-263-5700
 Email: dean@studentlife.wisc.edu
 Web: www.doso.students.wisc.edu (<http://www.doso.students.wisc.edu>)

- Creates a culture of care so students know the Dean of Students Office is the place to go when you need support
- Connects students who are navigating personal, academic, financial, or health issues, to supportive campus and community resources
- Provides walk-in, email, virtual, and call-in assistance meetings to discuss concerns that students have without judgement
- Supports students who have concerns about their friends and classmates
- Responds to incidents of hate and bias by providing support and resources to those impacted

GENDER & SEXUALITY CAMPUS CENTER

123 Red Gym
 716 Langdon Street
 Phone: 608-265-3344
 Email: lgbt@studentlife.wisc.edu
 Web: lgbt.wisc.edu (<http://lgbt.wisc.edu>)
 Facebook: Gender and Sexuality Campus Center (<https://www.facebook.com/uwgsc/>)
 Twitter: [@UWGSCC](https://twitter.com/UWGSCC/) (<https://twitter.com/UWGSCC/>)

- Provides support to LGBTQ+ and ally communities through trainings, workshops, a Discord server, the website, newsletter, and resource library
- Advocates for LGBTQ+ students through policies and procedures including bias reporting, restroom policy, name and pronoun display, RecWell inclusion, and trans health care
- Organizes health and identity courses, a peer mentor program, and the Gender Explorers discussion group
- Coordinates identity-based and community-building events, including Trans Monologues, Rainbow Graduation, and dozens of recurring programs per semester

INTERNATIONAL STUDENT SERVICES

217 Red Gym
 716 Langdon Street
 608-262-2044
 Email: iss@studentlife.wisc.edu
 Web: iss.wisc.edu (<http://iss.wisc.edu>)
 Facebook: International Student Services at UW–Madison (<https://www.facebook.com/ISSatUW/>)

- Provides non-immigrant F-1 and J-1 student advising, including educational workshops to help students understand how to maintain status

- Offers transitional support for new Global Badgers, beginning with required International Student Orientation (ISO), and ISS Check-in through the Terra Dotta portal
- Hosts engagement programs to enrich student’s Wisconsin Experience and celebrate identities, such as the International Reach Cross-cultural Speakers Program and the BRIDGE Peer Mentorship Program
- Provides advocacy for student needs through our assessment initiatives, work with campus partners, and collaboration with our International Student Advisory Board, also known as ISAB
- Connects students with resources and recommendations to support academic and career success, mental health and wellness, and life after finishing an academic program

MCBURNERY DISABILITY RESOURCE CENTER

702 West Johnson Street, Suite 2104
 608-263-2741
 Email: mcburney@studentlife.wisc.edu
 Web: mcburney.wisc.edu (<http://mcburney.wisc.edu>)
 Facebook: McBurney Disability Resource Center (<https://www.facebook.com/McBurney-Disability-Resource-Center-1408271469436889/>)
 Text: (608) 225-7956

- Promotes accessible, open, and welcoming campus community for students with disabilities
- Works with students with a variety of disabilities such as psychological/mental health, learning, chronic health, ADHD, vision, hearing, mobility, etc
- Develops individualized accommodation plans for students with disabilities and provides classroom accommodations to students with disabilities taking undergraduate, graduate, and professional school courses
- Provides information and referral services on disability issues for students, faculty, staff, and campus visitors
- Offers peer education and campus programming around disability issues and inclusive practices

MULTICULTURAL STUDENT CENTER

716 Langdon Street
 608-262-4503
 Web: msc.wisc.edu (<http://msc.wisc.edu/>)
 Facebook: UW–Madison Multicultural Student Center (<https://www.facebook.com/UWMulticultural/>)
 Instagram: [@UWMulticultural](https://twitter.com/@UWMulticultural/) (<https://twitter.com/@UWMulticultural/>)

- Provides spaces, services, and events for students of color to find community and belonging
- Celebrates and honors heritage and history through monthly recognitions including Latinx Heritage Month, Native November, Black History Month, and APIDA Heritage month
- Organizes “The Meet Up” a welcome week event with cultural performances and student organization fair
- Develops leadership development opportunities for student leaders through the Multicultural Leadership Summit, and student organization affiliation program in which more than 65 multicultural organizations are recognized

- Provides opportunities for students of all backgrounds to engage in conversations and dialogue around racial justice and intersectional communities and issues
- The Multicultural Student Center houses the Black Cultural Center, Latinx Cultural Center, and the Asian Pacific Islander Desi American (APIA) Cultural Center which are all currently located within the Red Gym, and each center has a program coordinator

OFFICE OF INCLUSION EDUCATION

Office of Inclusion Education
716 Langdon Street
Email: inclusioneducation@studentaffairs.wisc.edu
Web: inclusioneducation.wisc.edu (<http://guide.wisc.edu/undergraduate/inclusioneducation.wisc.edu>)

- The Office of Inclusion Education elevates and prioritizes diversity, equity, and inclusion for all students at UW-Madison
- Social Justice Education Programs provides educational opportunities that support exploration and engagement in topics related to diversity, equity, and inclusion through requested workshops
- Our Wisconsin raises awareness of diversity on campus providing education on inclusion and social justice, through the lens of community building at UW-Madison
- The Social Justice Hub supports students working on social justice issues through action teams, creating educational events, and being engaged in community opportunities

OFFICE OF STUDENT CONDUCT AND COMMUNITY STANDARDS

500 Lincoln Drive
608-263-5700
Email: dean@studentlife.wisc.edu
Web: conduct.students.wisc.edu (<https://conduct.students.wisc.edu>)

- Upholds every student's right to learn in a community that is safe
- Fosters integrity and accountability
- Provides leadership in reducing high-risk student drinking
- Partners with instructors to resolve academic misconduct incidents

UNIVERSITY VETERAN SERVICES

333 East Campus Mall, Room 10320
608-265-4628
Web: www.veterans.wisc.edu (<http://guide.wisc.edu/undergraduate/www.veterans.wisc.edu>)
Social: www.facebook.com/uwveterans (<http://guide.wisc.edu/undergraduate/www.facebook.com/uwveterans/>)

- Certifies both state and federal military/veteran education benefits, advises students on the use of education benefits, and assists with applying for new benefits
- Develops programming to build community among our military-connected students and campus as a whole
- Educates the greater campus community and act as a resource for faculty/staf

ACADEMIC CALENDAR

ACADEMIC CALENDAR

Establishment of the academic calendar (<https://www.secfac.wisc.edu/academic-calendar.htm>) for the University of Wisconsin–Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty Senate and State of Wisconsin legislation. Approximately every five years, the Faculty Senate approves a new academic calendar which spans a future five-year period.

The current calendar was adopted by the Faculty Senate in September 2016.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

Students curious to discover how our living world works and how they can improve it—from the smallest microbe to ecosystem-wide weather patterns—will find a home in the College of Agricultural and Life Sciences. We explore global questions in these areas:

- Health and nutrition
- Food and agriculture
- Biological sciences
- Sustainability, natural resources, and the environment
- Business, communication, and society

Our students are passionate about using science to improve the world, and our programs encourage students to pursue their passions in the classroom and beyond. We bring together students, faculty, and staff from diverse backgrounds to create an enriching and welcoming culture that produces socially aware graduates who will make an impact locally and globally. We promote working across disciplines; half of our students double-major or complete at least one certificate in an average of four years.

Our signature undergraduate experiences encourage students to build community through a first-year seminar; gain global experience through study abroad, internships, and courses; and apply what they learn through a senior-level capstone course. With more than 20 student organizations, CALS students can build their professional networks early.

The critical thinking, research, and communication skills our students gain lead them to careers in a wide variety of industries and public service—including biotechnology, healthcare, food, and agriculture—and prepare them well for graduate and professional studies at top-ranked institutions.

Our faculty are involved in all aspects of student education, including teaching in classrooms, hosting research opportunities in labs, leading study abroad experiences, and providing professional mentorship.

To enhance our bachelor of science degrees for top students, CALS offers honors programs in research and in many of our majors.

As evidence of our strong community, we award over \$1,000,000 in scholarships supported by alumni and friends eager to give new students the same positive experiences they enjoyed.

We are growing the future through a better understanding of living things. Explore our majors to learn more.

DEGREES/MAJORS/CERTIFICATES

The College of Agricultural and Life Sciences provides opportunities for study in a wide variety of department majors and interdisciplinary programs or specializations. In some instances, majors and degrees are offered cooperatively with other schools and colleges at UW–Madison. **Students are responsible for knowing academic requirements for graduation** and should consult with an advisor regularly.

Freshmen are encouraged to declare a degree and major so that an advisor can be assigned in their area of interest, but students are encouraged to change majors if academic or professional goals change. However, incoming first-year students unsure about which CALS major to declare may opt to remain undeclared while exploring their options. Interested students should contact CALS Transitional Advising and Outreach Services (<https://cals.wisc.edu/academics/undergraduate-students/advising/>) for more information. In addition to their major, students may also elect to complete one or more certificate programs. See the Certificate Programs Offered—Official List (http://registrar.wisc.edu/documents/85_Official_Certificates.pdf) for a complete list. Some of the certificate programs offered in CALS are available to students across campus, regardless of their major.

- Agricultural and Applied Economics, B.S. (p. 42)
- Agricultural Business Management, B.S. (p. 46)
- Agronomy, B.S. (p. 56)
- Animal Sciences, B.S. (p. 62)
- Biochemistry, B.S. (CALS) (p. 95)
- Biological Systems Engineering, B.S. (p. 104)
- Biology, B.S. (CALS) (p. 71)
- Business Management for Agricultural and Life Sciences, Certificate (p. 49)
- Community and Environmental Sociology, B.S. (p. 115)
- Dairy Science, B.S. (p. 67)
- Development Economics, Certificate (p. 51)
- Entomology, B.S. (p. 121)
- Environmental Sciences, B.S. (CALS) (p. 192)
- Food Science, B.S. (p. 132)
- Food Systems, Certificate (p. 119)
- Forest Science, B.S. (p. 138)
- Genetics and Genomics, B.S. (p. 151)
- Global Health, B.S. (p. 126)
- Global Health, Certificate (p. 168)
- Horticulture, B.S. (p. 157)
- Individual Major, B.S. (p. 53)
- Life Sciences Communication, B.S. (p. 164)
- Microbiology, B.S. (CALS) (p. 89)
- Nutritional Sciences, B.S. (p. 172)
- Nutritional Sciences, B.S. Nutrition and Dietetics (p. 178)
- Organic Agriculture, Certificate (p. 184)

- Plant Pathology, B.S. (p. 186)
- Science of Fermented Food and Beverages, Certificate (p. 136)
- Soil Science, B.S. (p. 200)
- Wildlife Ecology, B.S. (p. 145)

PEOPLE

ACADEMIC AND CAREER ADVISING

Regardless of your major, CALS has professionals to help students navigate their UW–Madison educational experience. The Office of Academic Affairs links students to the resources they need, and assists students who are exploring major and career options. All students have assigned academic advisors in their major, who, along with faculty mentors in those majors, provide CALS students more specialized academic, and pre-professional advising.

As the academic dean's office for CALS, the Office of Academic Affairs assists students with university and college policies and procedures such as changing a major, transferring into CALS, awarding dean's list, interpreting degree audit for graduation, student appeals, and more.

CALS Office of Academic Affairs
116 Agricultural Hall
1450 Linden Drive
Madison, WI 53706
academicaffairs@cals.wisc.edu
608-262-3003

DEAN ON CALL

The Dean on Call assists all CALS students with urgent issues and questions about academic policies and procedures. This service is available on a drop-in basis in 116 Agricultural Hall or through email (deanoncall@cals.wisc.edu) from noon–3:30 p.m., Monday through Friday during the academic year and several days a week during the summer. See the CALS website (<https://cals.wisc.edu/academics/undergraduate-students/>) for more information.

CAREER SERVICES

CALS Career Services provides resources and advising for students to explore career interests and develop skills as they seek employment, internships, or admission to graduate or professional programs. Advising appointment and programming information can be found on the Career Services website (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>). Academic advisors and faculty in every CALS major provide specialized career and pre-professional advising.

ENTERING THE COLLEGE

ADMISSION

CALS offers 24 majors in a broad area of topics encompassed within the life sciences and agriculture. Options include “undecided” for those students who know they are interested in these areas but are uncertain about which specific major to choose.

Admissions for incoming first-year and transfer students is handled centrally through the UW-Madison Office of Admissions and Recruitment (<http://www.admissions.wisc.edu/>). However, through this process you will be directly admitted into CALS if you choose a CALS major, including

the CALS undecided option. CALS majors do not have enrollment caps, and most do not have special admissions criteria.

All students, including incoming first-year and transfer students, with questions about study in the College of Agricultural and Life Sciences are encouraged to contact the CALS Offices of Academic Affairs at 608-262-3003 or academicaffairs@cals.wisc.edu. Students are also encouraged to visit us (<https://cals.wisc.edu/academics/prospective-students/visit-us/>).

For students transferring from another university or college, transfer credits are evaluated by the UW-Madison Registrar's Office (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) after acceptance. Transfer students must complete all CALS degree requirements, including completing at least 30 credits at UW-Madison.

Students may also transfer to the College of Agricultural and Life Sciences from other schools and colleges at UW-Madison. For more information, contact the academic advisor in the major to which you are interested in transferring or the CALS Office of Academic Affairs (academicaffairs@cals.wisc.edu). Additional details are found here (<https://cals.wisc.edu/academics/undergraduate-students/academic-policies-forms/transfer-info-on-cals/#transferringcals>).

WISCONSIN EXPERIENCE

Opportunities to apply learning in the classroom to real-world settings is at the core of a CALS education. We offer a variety of CALS Signature Experiences for students in all majors to live the Wisconsin idea.

These opportunities fall into five major categories:

We want our students to make a strong start and every CALS first-year student can achieve that through a First-Year seminar to explore different areas of study and build a peer group. There are several seminars to choose from, including QuickStart (<https://cals.wisc.edu/academics/prospective-students/quickstart/>), which allows students to begin their college career the summer before they arrive on campus.

CALS students learn through hands-on, real world experiences. A majority of CALS students earn credit for internships and research experiences in labs.

Through peer advising and mentoring, student organizations and residential learning communities, students build their community and networks.

Students gain a global perspective by taking a course with an international focus and many students study abroad. In addition to general UW-Madison programs, CALS offers more than 34 study abroad programs led by our faculty.

Finally, many CALS students take advantage of the ability to customize their path of study by participating in an honors program, pursuing certificates or second majors, and choosing elective courses that match their interests and meet their goals.

POLICIES AND REGULATIONS

Policies may be found on the Office of Academic Affairs KnowledgeBase (<https://kb.wisc.edu/cals/academicaffairs/>).

REQUIREMENTS

All undergraduate students in CALS must satisfy a set of college and university requirements:

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and

major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

Students are advised to complete introductory and basic course requirements (i.e., biological and physical sciences, chemistry, mathematics, communications, etc.) early in their academic programs.

Students must also satisfy a minimum of 15 credits in the selected major (these 15 credits may not be double counted with CALS or General Education requirements) and a Capstone course that meets the stated criteria (and may be included in the 15 credits toward the major).

CALS FIRST-YEAR SEMINAR REQUIREMENT

Courses meeting the CALS first-year seminar requirement must meet most of the following criteria:

- The course is designed specifically for first-year undergraduate students, to support their academic and personal transition to UW–Madison. For example, the course may acquaint students with academic, campus and community resources to assist in their transition through presentations, discussion, projects, or papers. Because students took this course, their transition to UW–Madison is more rapid and well supported.
- Course enrolls fewer than 25 students or a significant portion of the course meets in groups of fewer than 25 students. A larger lecture course will be considered if students interact regularly in sustained and substantive small groups with a faculty member or well-prepared graduate student or peer. This interaction must go beyond review of material and question and answer and be an ongoing relationship.

- Students receive frequent feedback from the instructor(s) on their academic performance and receive a grade in the course.
- Students are put in circumstances that essentially demand they interact with faculty and peers about substantive matters. As a result of taking this course, students have gotten to know their instructor(s) and peers through meaningful course-related dialogue.
- Students will experience diversity through meaningful dialogue with people who are different from themselves and/or engage with diversity through course content which addresses inclusivity, diversity and identity.
- Students experience an integration of experiential and classroom learning. For example, students might be asked to attend a student organization meeting, meet with a faculty or staff member, or participate in research or service.
- Students have opportunities to integrate, synthesize and apply knowledge while exploring big questions and big ideas.
- The learning objectives for the course are aligned with the UW–Madison Essential Learning Outcomes (<https://assessment.provost.wisc.edu/uw-madison-essential-learning-outcomes/>).

APPROVED FIRST-YEAR SEMINAR COURSES

Code	Title	Credits
AFROAMER 271	Selected Topics in African American Culture ¹	3
BIOCHEM 100	Biochemistry Freshman Seminar	1
BSE 170	Product Design Practicum	2
COUN PSY 115	Human Resources Development: Educational Effectiveness ²	1
COUN PSY 125	The Wisconsin Experience Seminar	1
DY SCI 272	Pre-Capstone Seminar	1
ENVIR ST 117	GreenHouse Roots Seminar	1
F&W ECOL 101	Orientation to Wildlife Ecology	1
GENETICS 155	Freshman Seminar in Genetics	1
INTEGSCI 100	Exploring Biology	2
INTEGSCI 110	BioHouse Seminar: Biology for the 21st Century	1
INTEGSCI 140	Exploring Service in STEM	1
INTER-AG 140	CALS QuickStart: Foundations	1
INTER-AG 155	Issues in Agriculture, Environment, and Life Sciences	1
INTER-AG 165	Introduction to International Issues in Agricultural & Life Sciences	1
INTER-AG 175	WISE Seminar	1
INTEREGR 170	Design Practicum	3
INTER-HE 201	Belonging, Purpose and the Ecology of Human Happiness: EcoYou	3
ILS 138	CRC First-Year Seminar: Foundations of a Liberal Arts Education	1
LSC 155	First-Year Seminar in Science Communication	1
First Year Interest Groups (All) ³		

¹ Approved topic: Multiculturalism & Social Justice (Seminar for Multicultural Learning Community)

² Approved topics: First-Year Transition Active Student and PEOPLE First Year Experience Seminar

³ For more information, see <http://figs.wisc.edu/>

CALS INTERNATIONAL STUDIES REQUIREMENT

Required of all CALS majors, the intent of the International Studies requirement is to deepen student knowledge and understanding of international issues related to scientific and sociological themes in CALS; develop openness, awareness and respect with regard to other cultures; and prepare students to address global challenges as engaged employees and active citizens.

The following learning outcomes must be satisfied for courses to fulfill the international studies requirement:

- Identify and explain, to diverse audiences, global issues pertaining to one or more CALS Priority Themes (<https://cals.wisc.edu/about-cals/initiatives/strategic-plan/priority-themes/>)
- Demonstrate critical thinking and comparative perspectives with respect to experiences or cultural approaches to international challenges

Courses that satisfy the 3-credit CALS International Studies requirement must meet all of the following criteria:

- Be connected to one or more of the CALS Priority Themes
- Include substantial international comparative content
- Include substantial non-U.S. content (typically >50% of the content or assignments or grade in the course)
- Facilitate active student engagement consistent with the learning outcomes and university assessment criteria
- Fulfill 3 credits (either by a single course or a pair of courses)

APPROVED INTERNATIONAL STUDIES COURSES (EFFECTIVE FALL 2019 UNLESS OTHERWISE NOTED)

Code	Title	Credits
A A E/ENVIR ST 244	The Environment and the Global Economy	4
A A E 319	The International Agricultural Economy	3
A A E/AGRONOMY/ INTER-AG/ NUTR SCI 350	World Hunger and Malnutrition	3
A A E 352	Global Health: Economics, Natural Systems, and Policy ²	4
A A E/INTL ST 373	Globalization, Poverty and Development	3

HORT 370	World Vegetable Crops	3
LSC 251	Science, Media and Society ¹	3
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	3
PL PATH/ BOTANY 123	Plants, Parasites, and People	3
PL PATH 311	Global Food Security	3
HORT/ AGRONOMY 376 & HORT 378	Tropical Horticultural Systems and Tropical Horticultural Systems International Field Study	3
DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 472 & DY SCI/AN SCI/ FOOD SCI/ SOIL SCI 473	Animal Agriculture and Global Sustainable Development and International Field Study in Animal Agriculture and Sustainable Development	3

The following study abroad courses fulfill the international studies requirement, but will require manual modification of a student's degree audit through completion of a simple DARS Update Form. See <https://cals.wisc.edu/academics/undergraduate-students/cals-international-studies-requirement> (<https://cals.wisc.edu/academics/undergraduate-students/cals-international-studies-requirement/>). Only the specific course numbers and titles listed are approved to meet the CALS International Studies requirement.

BIOCHEM 699	Special Problems (UW SCORE Cambridge International Research Program (England))	3
BIOCHEM 699	Special Problems (UW SCORE Oxford International Research Program (England))	3
BIOCHEM 699	Special Problems (UW SUPERG International Research Program (Germany))	3
NUTR SCI/INTER-AG 421	Global Health Field Experience (UW Mobile Clinics and Health Care in Uganda)	3
NUTR SCI 375 & NUTR SCI/INTER-AG 421	Special Topics and Global Health Field Experience (Sri Lanka Pre-departure Seminar and Community Health and Asset-Based Community Development in Sri Lanka)	3
NUTR SCI/INTER-AG 421	Global Health Field Experience (UW Ghanaian Health and Food Systems: Human, Agricultural & Environmental Health)	3
NUTR SCI 375 & NUTR SCI/INTER-AG 421	Special Topics and Global Health Field Experience (Uganda Pre-departure Seminar and UW Agriculture, Health and Nutrition in Uganda)	3
NUTR SCI/INTER-AG 421	Global Health Field Experience (UW Health, Education and Tanzanian Culture)	3
MICROBIO 375 & NUTR SCI/INTER-AG 421	Special Topics and Global Health Field Experience (Microbiology of Northern Thailand and Global Health Field Experience, Thailand)	3
MICROBIO 399	Coordinative Internship/Cooperative Education (UW Microbiology International Internships (Thailand))	3

¹ Approved for enrollments Summer 2020 and later.

² Approved for enrollments Summer 2021 and later.

Students: See <https://cals.wisc.edu/academics/undergraduate-students/cals-international-studies-requirement/> for circumstances under which exceptions will be considered and the appeal process. Appeals will only be considered under special circumstances and if the course meets all the criteria above.

CALS CAPSTONE LEARNING EXPERIENCE REQUIREMENT

A CALS Capstone is a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance with the intent of facilitating the transition to post-baccalaureate life. Capstone courses are approved by the college for each major.

A Capstone Experience should:

- Develop problem solving skills
- Expose the student to multidisciplinary approach
- Develop teamwork and interpersonal skills, including the ability to communicate effectively to multiple audiences
- Develop skills in accessing and using information resources (e.g., electronic databases, library resources, national repositories)
- Address societal, economic, ethical, scientific, and professional issues
- Communicate and extend the capstone experience via written, oral, and/or multimedia reports by each student

The Capstone Experience will normally be completed during the student's final 2 or 3 semesters. The intent is to have the student utilize and integrate their undergraduate learning into a culminating, or capstone, experience. Students should consult with their departmental faculty advisors for specific information regarding this requirement. Where appropriate, students should submit a copy of the final project materials to the campus library (via Minds@UW (<http://uwdcc.library.wisc.edu/minds/index.shtml/>) or similar).

DEGREES OFFERED

The College of Agricultural and Life Sciences offers five bachelor of science (B.S.) degree programs:

B.S. DEGREE

B.S.–AGRICULTURAL BUSINESS MANAGEMENT (P. 46)

B.S.–BIOLOGICAL SYSTEMS ENGINEERING (P. 104)

B.S.– NUTRITION AND DIETETICS (P. 178)

B.S.–LANDSCAPE ARCHITECTURE ([HTTP://GUIDE.WISC.EDU/UNDERGRADUATE/AGRICULTURAL-LIFE-SCIENCES/COLLEGE-WIDE/LANDSCAPE-ARCHITECTURE-BSLA/](http://GUIDE.WISC.EDU/UNDERGRADUATE/AGRICULTURAL-LIFE-SCIENCES/COLLEGE-WIDE/LANDSCAPE-ARCHITECTURE-BSLA/))

Four of the college's majors have specialized B.S. degree programs, as listed above. The general B.S. degree program provides a broad and general foundation for the other majors in the college.

MULTIPLE DEGREES OR MAJORS

Under certain circumstances it may be possible for a student to earn more than one undergraduate major or degree. It is expected that the programs be significantly different from each other and that approval for simultaneous majors or degrees be received prior to the student having earned 86 credits. More information is available below and via the Office of Academic Affairs (<https://cals.wisc.edu/academics/>).

SECOND BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Those with a bachelor of science (B.S.) or bachelor of arts (B.A.) degree from the University of Wisconsin–Madison or other accredited institution may, if eligible, pursue a second bachelor's degree from the College of Agricultural and Life Sciences.

Those who have been out of school for one semester or more must apply for admission (or readmission) with the regular undergraduate application. Continuing UW–Madison students do not need to submit this form. All candidates need an academic dean's permission from the Office of Academic Affairs to work toward a second bachelor's degree. A minimum of a 2.0 GPA is required. Several college majors require a higher GPA.

The following requirements for the second bachelor's degree must be met:

- Students must complete a minimum of **30 credits in residence**, of which 15 or more must be in the major field as specified by the major department. These credits are in **addition** to credits earned for the first degree.
- Candidates must **complete all university, college, major, and curricular degree program requirements**. Credits earned for the first degree will apply toward appropriate requirements for the second. However, students must take at least 30 additional credits, as noted above. Students with their first B.S. degree from the college must select a new major or degree program.

All second-degree candidates must be accepted by the department offering their program of interest and have their program approved by the college before beginning the program.

EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

A student who wishes to earn **two undergraduate degrees simultaneously** (in contrast to earning two undergraduate **majors** simultaneously) should consult with the Office of Academic Affairs as early as possible in their academic career regarding feasibility.

If the two degrees to be earned are within the College of Agricultural and Life Sciences, at least 30 additional credits and all course and grade point requirements must be completed. Thus, a minimum of 150 credits (for most majors) would be required. Some courses may satisfy requirements for both degrees; however, students must complete 15 unique credits in each major. **A student must have an advisor in both major fields.** To work on two degrees simultaneously within the college, a student should seek permission as early as possible to ensure that it is feasible to complete both degrees.

If the two degrees to be earned are from two different colleges (one degree in Agricultural and Life Sciences and one degree in another school or college on this campus), the academic dean in both colleges must approve the student's plan. Note that not all colleges will allow dual degrees. Where allowed, the following academic policies shall be followed (additional policies may exist):

1. Admission into the other college or school shall be based on that particular college or school admission criteria.
2. A student may seek two baccalaureate degrees simultaneously (in contrast to two majors), each from a different college, provided that the two degree programs differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits and that the student's program is **approved by both colleges before the student has earned 86 credits**. The degrees from each college will be awarded simultaneously.

Special applications and additional information pertaining to the earning of two undergraduate degrees simultaneously are on the CALS website (<https://cals.wisc.edu/academics/undergraduate-students/academic-policies-forms/>) and available from the Office of Academic Affairs, 116 Agricultural Hall.

EARNING TWO UNDERGRADUATE MAJORS SIMULTANEOUSLY

CALS permits undergraduates to pursue two CALS majors simultaneously. Both majors must be in the same degree program; two

degrees must follow the policy outlined above. The following policies and procedures have been established for this program:

- a. The student must complete an application form and have approval in advance from their CALS major advisor, the advisor of their desired second major, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
- b. The student must satisfy all requirements of both majors. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.

The diploma awarded will be based on the certification of completion of the degree. The transcript will note the completion of requirements for two or more majors.

EARNING A NON-CALS MAJOR WHILE COMPLETING A DEGREE PROGRAM IN THE COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Letters & Science (L&S) and the School of Education permit undergraduates currently enrolled in the College of Agricultural and Life Sciences to complete certain additional undergraduate majors offered by L&S or the School of Education and have this noted on the transcript.

The following policies and procedures have been established for this program:

1. The student must have advance approval from their CALS major advisor, their non-CALS major advisor, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The non-CALS major is not to substitute for any major in CALS.
3. The student must satisfy all requirements of the non-CALS major, both the requirements established by the department (i.e., major courses) and those established by the other school/college (e.g. for L&S, 15 credits of advanced work in the major in residence at UW–Madison), but is not required to complete the other school/college's degree requirements. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements for the CALS major.
4. Requests for substitutions or other modifications of the requirements of a given non-CALS major must be acted on by an academic dean of that school/college, in consultation with the Associate Dean for Academic Affairs in CALS, before enrollment in the course.

EARNING A GLOBAL HEALTH ADDITIONAL MAJOR WHILE COMPLETING A DEGREE PROGRAM IN ANOTHER SCHOOL/COLLEGE AT UW-MADISON

Students in another school/college at UW-Madison are eligible to declare a Global Health major if they have fewer than 86 credits toward graduation, receive permission from their home school/college, and maintain a primary major in the home school/college. The process for obtaining special permission to declare a Global Health major is dependent on the student's home school/college. Students must also contact the Global Health major advising unit about the steps required to declare an additional major and fulfill all the Global Health major requirements.

RESOURCES

STUDENT SERVICES

The Office of Academic Affairs provides a variety of services for all CALS and CALS-interested students. The office welcomes student questions and concerns around academics, careers, scholarships, study abroad opportunities, or other areas of student need. Additionally, there are services and advising available for students who have unusual circumstances or needs, and to address the needs of those from under-served and under-represented student populations.

ACADEMIC ADVISING

Every student has an assigned advisor, and students are encouraged to consult their advisors regularly. In CALS, all students are assigned an advisor in their major field of study, or for undecided students in the Office of Academic Affairs. These advisors assist students with choosing courses to match their interests and fulfill all requirements for graduation. They also talk with students about their educational objectives, how to engage in the full Wisconsin experience, and planning for their future.

Students are encouraged to seek advice from university faculty and staff, in addition to their assigned advisor. There are many people on campus who are willing and able to help students; however, it is the student's responsibility to seek advice.

CAREER SERVICES

The College of Agricultural and Life Sciences provides resources and advising for students to explore career interests and develop skills as they seek employment, internships, or admission to graduate or professional programs. Advising appointment and programming information can be found on the Career Services website (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>). Academic advisors and faculty in every CALS major provide specialized career and pre-professional advising.

Many CALS students are interested in exploring professional careers in medicine, including veterinary medicine. For more information about preparing for health careers, visit the Center for Pre-Health Advising (<http://www.prehealth.wisc.edu/>).

SCHOLARSHIPS AND FINANCIAL RESOURCES

CALS has an extensive scholarship program available to CALS students in addition to university scholarships, grants, loans, and employment available at the Office of Student Financial Aid (<https://financialaid.wisc.edu/>). One yearly application allows students to be considered for any scholarships administered by the college. Scholarship applications are available through the Wisconsin Scholarship Hub (WiSH (<https://wisc.academicworks.com/>)), which can be found through the Student Services tab in MyUW or through the Finances section of Student Center. Scholarships with a financial need component require a current Free Application for Federal Student Aid (FAFSA (<http://www.fafsa.ed.gov/>)) on file with the university.

In addition to scholarships, several short-term loan funds have been established for students in the college. Applications for these short-term loans are available in the CALS Office of Academic Affairs.

STUDY ABROAD

Today's college graduates must be prepared for the international community in which they will live and work. Study and research abroad programs offer students unique opportunities to enrich their education by experiencing other cultures and broadening their understanding of agricultural and life sciences outside the United States. The College of Agricultural and Life Sciences offers 34 short- and long-term programs in more than 20 countries. All programs carry UW-Madison academic credit, and many fulfill academic requirements. CALS offers scholarships (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/cals-study-abroad-scholarships/>) specifically for CALS study abroad students to reduce financial barriers to participation. For more information about study abroad opportunities, contact the CALS Study Abroad office (studyabroad@cals.wisc.edu).

STUDENT ORGANIZATIONS

CALS students will find many organizations and clubs to meet their professional and personal interests. Student organizations provide a vehicle for students to gain leadership experience and develop professional skills. For more information see the Registered Student Organization (RSO) Directory (<https://win.wisc.edu/organizations/>) in the Wisconsin Involvement Network (WIN) and CALS Student Organizations and Clubs (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/student-organization/>).

HONORS

HONORS PROGRAM

The CALS Honors Program allows highly motivated students to continue challenging themselves through research and coursework. The objective of the Honors Program is to help students develop critical thinking and problem solving abilities through specialized courses and to provide students the challenge of designing, conducting, and reporting research in collaboration with faculty from one of the world's leading research institutions.

HONORS

CALS has two different avenues to earn an Honors degree designation. Students may complete either based on their interests and goals. Students are not allowed to complete both types of honors. In either option, a student must successfully complete a Senior Honors Thesis approved by the research mentor or committee.

Honors in Research (p. 53)

Students engage in the university's great research tradition through the completion of two research projects: an introductory project and a senior thesis project. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to the hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery. Students who successfully complete Honors in Research (p. 53) will receive an Honors designation on their diploma.

Honors in the Major (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-the-major/>)

Students complete a specified number of Honors credits in a designated set of courses to gain advanced knowledge and inquiry within their major field of interest. A limited number of CALS majors offer this program

option; more information is located on the Requirements tab for the major. Students who successfully complete Honors in the Major will receive an Honors designation on their transcript.

For complete information contact the Office of Academic Affairs, 116 Agricultural Hall, 608-262-3003.

DEAN'S LIST

Students who achieve at a high level academically are recognized by the dean. Selections to the Dean's List are announced at the close of each semester. The student's achievement for only the single semester is considered and is noted on the transcript. To be placed on the Dean's List, a student must have achieved at least a 3.5 GPA or above for *the semester's study load of not less than 12 credits, on a regular grade basis* (A, AB, B, BC, C, D, F), regardless of overall grade point average, and must not have received a grade of F or an Incomplete for any course, or a U (for a pass/fail course) or an N (for Credit/No Credit graded course that was not passed).

CRITERIA FOR "GRADUATED WITH DISTINCTION" AND "GRADUATED WITH HIGHEST DISTINCTION"

Students who have a cumulative GPA that places them in the top 20 percent of the graduating class in the college will graduate with "Distinction"; those in the upper 5 percent, with "Highest Distinction." These students must have at least 60 credits on the UW–Madison campus. The notations on the student's transcript will read "Graduated with Distinction" or "Graduated with Highest Distinction." The registrar determines which students meet these criteria.

DISTINCTIVE SCHOLASTIC ACHIEVEMENT

A *preliminary* list of those degree candidates who may be eligible for Graduation with Distinction is prepared by the registrar prior to commencement. These students are eligible to wear a cardinal stole with their caps and gowns at commencement. Inclusion on the Distinctive Scholastic Achievement list does not guarantee Graduation with Distinction, which is determined after final grades are awarded.

AGRICULTURAL AND APPLIED ECONOMICS

The Department of Agricultural and Applied Economics (AAE) at the University of Wisconsin–Madison was founded in 1909 and was the first department of agricultural economics in the United States. The department offers two undergraduate programs—Agricultural and Applied Economics (p. 42) and Agricultural Business Management (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/agricultural-applied-economics/business-management-abm/>). Both majors will give students a strong base in economics and how it is applied to real-world situations. The teaching and research in AAE focuses on the areas of development economics, environmental economics, and managerial economics.

The department also offers two certificates to undergraduate students enrolled at the University of Wisconsin–Madison: the Certificate in Business Management for Agricultural and Life Sciences (p. 49) and the Certificate in Development Economics (p. 51).

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to students declared in both of our majors, Agricultural

& Applied Economics (p. 42) and Agricultural Business Management (p. 46). All of our students are encouraged to apply each year for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). Students in either of our majors or who have declared the Certificate in Business Management for Agricultural & Life Sciences (p. 49) are also eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

RESOURCES

There are a number of student organizations of interest to students in our majors. For more information, please visit the CALS Student Organization (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/student-organizations/#association-of-women-in-agriculture>) website.

AGRICULTURAL AND APPLIED ECONOMICS, B.S.

The Agricultural and Applied Economics (AAE) major provides students with a strong base in economics and how it is applied to real-world situations. Students develop and use economic data and models to analyze and understand a wide range of issues—including environmental problems, world hunger, energy and climate change, business economics and finance, economic development, globalization and trade, biotechnology, land-use management, and community development. Course subjects include economics, environmental economics, managerial economics, financial management, commodities and futures markets, the global economy, development in Latin America, Africa, and Asia, cooperatives, international trade, pollution, and regulation. Students acquire the necessary skills to pursue a rewarding career in consulting, government, business, or international organizations, or a graduate degree in economics, public policy, business or law.

Students completing the Agricultural and Applied Economics major are awarded the bachelor of science degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103 or CHEM 108	General Chemistry I Chemistry in Our World	

or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.		
Select one of the following:		5
MATH 211	Calculus	
MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry I	
Select one of the following:		3-6
ECON 310	Statistics: Measurement in Economics	
STAT 301	Introduction to Statistical Methods	
STAT 324	Introductory Applied Statistics for Engineers	
STAT 371	Introductory Applied Statistics for the Life Sciences

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Use economic concepts to think critically about real-world problems and public policy debates.
2. Use appropriate quantitative techniques to analyze economic problems.
3. Communicate results effectively orally and in writing.

FOUR-YEAR PLAN

¹ Students must complete MATH 211 or MATH 217 or MATH 221. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand, this level of competence may require as many as three semesters of coursework in mathematics.

ADVISING AND CAREERS

For more information or to declare a major in agricultural and applied economics, contact:

Linda Davis
 Department of Agricultural and Applied Economics
 424 Taylor Hall
 608-262-9488
 linda.davis@wisc.edu

Schedule an appointment with me using Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10575/schedule>).

CAREERS

Students with a degree in agricultural and applied economics may specialize in international development, environmental policy, or managerial economics. They often find careers in policy analysis, environmental management, business analysis, trade or consulting. They can find employment with a variety of employers such as nonprofit organizations, government agencies, co-operatives, multinational firms, agribusiness companies, financial institutions, and the food or retailing industry. Many students pursue graduate degrees in economics, business, public policy, law or other areas.

Students can use the services provided by the CALS Career Services Office (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake (<https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake/>), an online job/internship posting tool that provides students with hundreds of job and internship listings.

WISCONSIN EXPERIENCE

CAPSTONE

Students with a major in agricultural and applied economics (AAE) must all complete the senior capstone requirement. For our majors, the capstone is a specific class which offers students the opportunity to work in a group with other students in their area of interest to produce a final project and present it to their fellow students and AAE faculty. Students will have the opportunity to demonstrate how the concepts they have learned in their AAE classes are applied to real-world situations.

STUDY ABROAD

Many students with a major in agricultural and applied economics choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare students to participate in today's global economy. International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) serves as the primary study abroad office on campus, offering over 200 programs in over 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

RENK SCHOLARSHIP PROGRAM

Agricultural and applied economics majors are eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

INDEPENDENT STUDY

Students in the agricultural and applied economics major may have the opportunity to work with an AAE faculty member on an independent study project. They will work with one of our faculty and engage in independent reading and research for credit. Students will have the opportunity to experience the excitement and frustrations of doing research, while learning techniques that might prove useful in future projects.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to our majors. All AAE students are encouraged to apply each year for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). AAE majors are also eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

AGRICULTURAL BUSINESS MANAGEMENT, B.S.

Today's businesses and industries in the agricultural and food sectors of the economy are growing rapidly. Agribusiness industries, such as those that supply farm inputs or process and market agricultural products, need staff who are educated in both business and agriculture. Students in agricultural business management also find employment in companies specializing in biological systems engineering, landscape architecture, biotechnology, food technology, food science, food marketing, and large-scale farm enterprises.

The Bachelor of Science in Agricultural Business Management degree program (ABM) enables students to obtain a strong foundation in economics to learn how businesses make decisions and minimize risk and how to use applied mathematics and statistics to analyze prices and markets. Agricultural and Applied Economics (AAE) courses constitute a substantial segment of the curriculum for the B.S. in Agricultural Business Management degree. In addition to general college requirements, a major in ABM includes courses in economics, math, and statistics. ABM students will also take credits from the School of Business. (See Requirements tab for more information.)

Agricultural Business Management emphasizes coursework in the functional areas of the business school: accounting, finance, marketing, management, and human resources.

Code	Title	Credits
Students will learn:		
	Skills for running a business	
	Finance and economic decision analysis	
	Analytical and managerial tools	
	Organization of the food system	
	Commodity markets	
	Senior capstone project integrates learning from major coursework	

A degree in Agricultural Business Management prepares students for a career in agribusiness or other fields of business. The Department of Agricultural and Applied Economics may be consulted for specific career information for the major.

Students completing the Agricultural Business Management major are awarded the Bachelor of Science–Agricultural Business Management degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

Students in the Agricultural Business Management BS degree program may not declare the Certificate in Business Management for Agricultural and Life Sciences.

¹ ACCT I S 100 is a prerequisite for ACCT I S 211.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Use economic concepts to think critically about real-world problems and business management issues.

- Use appropriate quantitative techniques to analyze business management issues.
- Communicate results effectively orally and in writing.

¹ Students must complete MATH 211 Calculus or MATH 217 or MATH 221. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand,

this level of competence may require as many as three semesters of coursework in mathematics.

- ² ABM students are required to take 9 credits from FINANCE/ECON 300, GEN BUS 301, GEN BUS 310, GEN BUS 311, MARKETNG 300, M H R 300 (Organizational Behavior), M H R 305 (Human Resources), and ACCT I S 211.

ADVISING AND CAREERS

For more information or to declare a major in agricultural business management, contact:

Linda Davis
Department of Agricultural and Applied Economics
424 Taylor Hall
608-262-9488
linda.davis@wisc.edu
Schedule an appointment using Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10575/schedule>).

CAREERS

Students with a degree in agricultural business management often find careers in areas such as banking and finance, business analysis, marketing, management, commodities trading, sales or consulting.

Types of employers:

- Agribusiness firms
- Financial institutions, banks or investment firms
- Local, state or federal government agencies
- Co-operatives
- Retail food companies
- Tech companies

Students can use the services provided by the CALS Career Services Office (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake (<https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake/>), an online job/internship posting tool that provides students with hundreds of job and internship listings.

WISCONSIN EXPERIENCE

CAPSTONE

Students in the Agricultural Business Management (ABM) degree program must complete the senior capstone requirement. For our majors, the capstone is a specific class which offers students the opportunity to work in a group with other students in their area of interest to produce a final project and present it to their fellow students and Agricultural and Applied Economics faculty. Students will have the opportunity to demonstrate how the concepts they have learned in their ABM classes are applied to real-world situations.

INTERNSHIP

Internships allow students to gain professional experience and skills that future employers value. Agricultural Business Management students are encouraged to complete an internship during their undergraduate years and some of them choose to receive academic credit for their internship. An internship lets you experience a career to see if it's the right one for you, allows you to gain useful skills, and provides an opportunity to make connections with professionals in the industry. Students usually complete an internship during the summer after their sophomore or junior year.

RENK SCHOLARSHIP PROGRAM

Agricultural Business Management majors are eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

STUDY ABROAD

Students in the Agricultural Business Management degree program may choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare students to participate in today's global economy. International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) serves as the primary study abroad office on campus, offering over 200 programs in over 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service-learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to our majors. All students in the Agricultural Business Management degree program are encouraged to apply each year for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). Students in the Agricultural Business Management degree program are also eligible to apply for the Renk Scholarship Program (<https://renk.aae.wisc.edu/renk-scholarship/>), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (<https://renk.aae.wisc.edu/>) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

BUSINESS MANAGEMENT FOR AGRICULTURAL AND LIFE SCIENCES, CERTIFICATE

Basic business literacy can benefit all graduates, no matter what their field or intended career. When entering the professional world, CALS students increasingly encounter situations that require an understanding of basic business and management concepts. The Certificate in Business Management for Agricultural and Life Sciences can provide students with the business skills that employers value.

The certificate offers students in the College of Agricultural and Life Sciences (CALS) the opportunity to gain business knowledge and have it recorded on their transcript. The certificate is designed specifically for students intending to pursue careers in agriculture and life sciences, and enrollment is open only to undergraduates currently enrolled in CALS. This professional credential is offered by the Department of Agricultural and Applied Economics, the Department of Life Sciences Communication, and the Renk Agribusiness Institute, with the collaboration of the School of Business.

HOW TO GET IN

To declare this certificate, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34). Contact the advisor listed under the *Advising and Careers* tab for more information or to declare the certificate.

Students may not earn this certificate in conjunction with a BS in Agricultural Business Management.

REQUIREMENTS

Code	Title	Credits
Completion of the certificate requires a total of six courses.		
<i>The following four courses are required:</i>		
A A E 215	Introduction to Agricultural and Applied Economics	4
LSC 270	Marketing Communication for the Sciences	3
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	3
GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	3
<i>Select two courses from the following:</i>		5-6
A A E 319	The International Agricultural Economy	
A A E 320	Farming Systems Management	
A A E 322	Commodity Markets	
A A E 323	Cooperatives and Alternative Forms of Enterprise Ownership	
A A E 335	Introduction to Data Analysis using Spreadsheets	
A A E 419	Agricultural Finance	
A A E/ECON 421	Economic Decision Analysis	
A A E/ECON 526	Quantitative Methods in Agricultural and Applied Economics	
A A E/M H R 540	Intellectual Property Rights, Innovation and Technology	
DY SCI 233	Dairy Herd Management I	
DY SCI 234	Dairy Herd Management II	
DY SCI 535	Dairy Farm Management Practicum	
LSC 250	Research Methods in the Communication Industry	
LSC 251	Science, Media and Society	
LSC 432	Social Media for the Life Sciences	
LSC 435	Theory and Practice of Integrated Marketing Communication	
Total Credits		18-19

- No substitutions are allowed for the core courses.
- Students may count no more than two courses toward both their major requirements and these certificate requirements.

- Minimum average 2.000 GPA in all certificate courses.
- 12 credits in the certificate must be taken in residence.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand general business concepts.
2. Understand business management fundamentals in an agricultural and life sciences context.
3. Understand economics, marketing and communication as they relate to business management in agricultural and life science industries.

ADVISING AND CAREERS

For more information or to declare the Certificate in Business Management for Agricultural and Life Sciences, contact:

Linda Davis
 Department of Agricultural and Applied Economics
 424 Taylor Hall
 608-262-9488
linda.davis@wisc.edu
 Schedule an appointment using Starfish (<https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/serviceCatalog.html?bookmark=connection/10575/schedule>).

CAREERS

Students pursuing the Certificate in Business Management for Agricultural and Life Sciences are often interested in careers such as running a research lab, managing the books on their family farm, banking, business analysis, marketing, or management and sales, depending on their major. When combined with their major, the certificate can provide a basic background in business management that many employers find valuable.

Students can use the services provided by the CALs Career Services Office (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>), which include help with creating a resume or cover letter and mock interviews. CALs students also have access to Handshake (<https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake/>), an online job/internship posting tool that provides students with hundreds of job and internship listings.

DEVELOPMENT ECONOMICS, CERTIFICATE

The certificate in development economics gives students a solid foundation of analytical skills that will enable them to better understand the challenges created by world poverty. They will learn how economics can be used to address the problems of poverty and the impact of globalization on growth and development. Students will focus on such issues as: the relationship between population growth and economic growth, the major debates about food self-sufficiency and food security, how child labor and gender discrimination limit economic development, and what environmental problems are posed by economic development.

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison.

HOW TO GET IN

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin–Madison. In order to declare the certificate, the student must have successfully completed A A E 215, ECON 101 or ECON 111. Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

REQUIREMENTS

Code	Title	Credits
In order to declare the certificate, the student must have successfully completed one of the following:		
A A E 215	Introduction to Agricultural and Applied Economics	
ECON 101	Principles of Microeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	

Code	Title	Credits
The certificate requires five courses.		
<i>Complete two core courses:</i>		
A A E/ECON 474	Economic Problems of Developing Areas	3
A A E/INTL ST 373	Globalization, Poverty and Development	3
or A A E/INTL ST 374	The Growth and Development of Nations in the Global Economy	

<i>Select one course from the following:</i>		
A A E 319	The International Agricultural Economy	
A A E/AGRONOMY/INTER-AG/NUTR SCI 350	World Hunger and Malnutrition	
A A E/INTL ST 373	Globalization, Poverty and Development	
A A E/INTL ST 374	The Growth and Development of Nations in the Global Economy	
A A E/ECON/INTL BUS 462	Latin American Economic Development	
A A E/ECON 473	Economic Growth and Development in Southeast Asia	
A A E/ECON 477	Agricultural and Economic Development in Africa	

<i>Select one course from the following:</i>		
C&E SOC/POP HLTH/SOC 380	Contemporary Population Problems for Honors	
C&E SOC/ENVIR ST/SOC 540	Sociology of International Development, Environment, and Sustainability	
C&E SOC/SOC 630	Sociology of Developing Societies/Third World	

ECON 364	Survey of International Economics	
ECON 464	International Trade	
ECON 467	International Industrial Organizations	
ECON 475	Economics of Growth	
GEOG/ ENVIR ST 339	Environmental Conservation	
INTL BUS 200	International Business	
INTL BUS/ FINANCE 445	Multinational Business Finance	
INTL ST 402	Topics in Politics and Policy in the Global Economy	
POLI SCI 330	Political Economy of Development	
POLI SCI 348	Analysis of International Relations	
POLI SCI 350	International Political Economy	
POLI SCI 351	Politics of the World Economy	
<i>Select one additional course from any of the courses listed above</i>		3
Total Credits		15

- A student may combine this certificate with any other certificate and/or major. However, students with a major in Agricultural and Applied Economics, a major in Economics, or a major in the Politics and Policy in the Global Economy option in International Studies may count no more than 2 courses toward both their major requirements and the requirements for the certificate in development economics.
- 50% of certificate coursework must be completed in residence.
- Minimum average 2.000 GPA in all certificate courses.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand the impacts of global economic processes, such as trade, foreign investment, and migration, on growth and development.
2. Understand the contributions of private and public investments in areas such as agriculture, education, environmental resources, health care, industrialization, and technology adoption to growth and development, and the methods for measuring those effects.

ADVISING AND CAREERS

STUDY ABROAD

Many students declared in the certificate in development economics choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare them to participate in today's global economy. International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) serves as the primary study abroad office on campus, offering more than 200 programs in more than 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

AGRICULTURAL AND LIFE SCIENCES - COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

- College of Agricultural and Life Sciences Honors (p. 53)
- Individual Major, B.S. (p. 53)

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES HONORS

The CALS Honors Program allows highly motivated students to continue challenging themselves in the classroom and beyond. CALS has two different avenues to earn an Honors degree designation: Honors in Research or Honors in Major. Information about Honors in Major is located in the "Requirements" tab for each major.

HONORS IN RESEARCH

Students completing the CALS Honors in Research track engage in the university's great research tradition through the completion of two research projects: an introductory project and a senior thesis project. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to this hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery. Students who successfully complete Honors in Research will receive an Honors designation on their diploma.

HOW TO GET IN

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

The Honors in Research track requires students to complete two research projects, an introductory project and a senior thesis project. Students work under the guidance of a faculty mentor for both projects.

In the course of this program, it is expected that the student will: (i) learn the background and methods of the discipline; (ii) identify an interesting and tractable problem or question for study; (iii) learn to draft a proposal defending the relevance and appropriateness of specific research efforts; (iv) demonstrate appropriate skills in working on that problem in a

manner appropriate to a professional in the discipline; (v) analyze and interpret the results of their efforts; and (vi) present these results as a thesis and in an approved public forum.

To earn Honors in Research, students must first be admitted to the college's Honors Program. Students must then make satisfactory progress toward the program requirements listed below and maintain a 3.25 GPA. Failure to maintain this progress will result in removal of the student from the Honors Program.

Program requirements:

- Identify a research mentor
- Complete introductory (one-semester) research project and presentation
- Complete three seminar courses (one credit each)
 - INTER-AG 288 (spring of freshman year)
 - INTER-AG 388 (spring of sophomore year)
 - INTER-AG 488 (spring of junior year)
- Enroll in Senior Honors Thesis credits (681 and 682; or 699 in the mentor's department) for two semesters at a minimum of two credits each semester
- Complete a Senior Honors Thesis research project and presentation
- Submit the Senior Honors Thesis and related documentation to CALS Academic Affairs
- Maintain a cumulative grade point average of 3.25

Additional information can be found on the Honors website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-research/>).

ADVISING AND CAREERS

Find additional information on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Questions may be directed to the CALS Honors Program Manager at academicaffairs@cals.wisc.edu or 608-262-3003.

INDIVIDUAL MAJOR, B.S.

The individual major is a flexible program for undergraduates in the College of Agricultural and Life Sciences who want to attain a specific academic goal that is not easily attained through a major in one or more departments. The major must involve courses from several departments, must be at least as rigorous as a regular departmental major, and must be targeted at a special intellectual problem or academic need identified by the student. The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Approval is not guaranteed, so students should be prepared to pursue alternative options and are encouraged to discuss these with their advisor.

The individual major is available in the bachelor of science degree program. The transcript will indicate "Individual Major" until the degree is awarded. It will then show the exact name of the approved "individual major."

Students are strongly encouraged to consult with an assistant dean in the CALS Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

HOW TO GET IN

The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. The process to request to pursue an individual major is outlined below.

The student selects a three-person faculty committee from departments offering courses in the proposed major. The major advisor is from a CALS department that offers many of the courses in the proposed individual major. No more than two members of the committee can be from a single department. The student must submit a proposed plan of study to the committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The plan should include: the title of the proposed major; the rationale for the major; learning outcomes for the major and a brief assessment plan; the list of courses and the reasons for including each course in the major; and a semester plan for degree completion. The student is required to earn at least 30 credits after the term in which the proposal is approved. Thus, early planning is essential.

If the faculty committee approves the plan, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the Curriculum Committee to present the proposal. The Curriculum Committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the Curriculum Committee is final. Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the Curriculum Committee.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

INDIVIDUAL MAJOR REQUIREMENTS

DEVELOPMENT OF THE INDIVIDUAL MAJOR

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. Development of the individual major is the responsibility of the student. The student should identify a faculty major advisor from the CALS department that offers many of the courses in the proposed individual major. In addition,

the student should select two additional faculty from departments offering the courses in the proposed major to serve on the faculty committee. The student should consult with the faculty members and an assistant dean in Academic Affairs as a plan of study is developed. The plan of study must include the following:

- title of proposed major
- rationale for the major (what specific goal does the major achieve that cannot be achieved through one or more existing majors? what is the targeted intellectual problem? why is the major necessary for achieving the student's academic and career goals?)
- 3-5 learning outcomes for the major with a brief explanation of how learning will be assessed
- list of courses, including the reason for including each course in the major (how does each course contribute to the major learning outcomes?)
- semester plan for degree completion and estimated graduation term (if graduation exceeds four total years, include a justification for the extended time-to-degree; note that the student must earn at least 30 credits after the term in which the proposal is approved)

APPROVAL OF THE INDIVIDUAL MAJOR

Once the plan of study is developed, the student submits the plan to the faculty committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The faculty committee may require revisions prior to approval. Once approved, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the curriculum committee to present the proposal. The curriculum committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the curriculum committee is final. Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the curriculum committee.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

Students will develop learning outcomes as part of the individual major proposal process in consultation with their faculty mentors and an assistant dean. Review the Provost's website (<https://assessment.provost.wisc.edu/student-learning-outcomes/writing-student-learning-outcomes/>) for guidelines on developing learning outcomes.

FOUR-YEAR PLAN

Students will develop a semester-by-semester plan as part of the proposal process for the individual major, in consultation with their faculty mentors and an assistant dean. Review the Four-Year Plans available for similar or related majors in the *Guide* to begin planning. Students should submit the proposal early in their academic career but no later than achieving senior standing (86 credits) to ensure timely progress to degree completion.

ADVISING AND CAREERS

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

Students are required to identify a faculty advisor as part of the process for requesting approval to pursue an individual major. The faculty advisor serves as the student's academic advisor along with support from the other members of the student's faculty committee. Additionally, students must work closely with an assistant dean in Academic Affairs throughout development and completion of the major.

WISCONSIN EXPERIENCE

Opportunities to apply learning in the classroom to real-world settings is at the core of a CALS education. We offer a variety of CALS Signature Experiences for students in all majors to live the Wisconsin idea.

These opportunities fall into five major categories:

We want our students to make a strong start and every CALS first-year student can achieve that through a First-Year seminar to explore different areas of study and build a peer group. There are several seminars to choose from, including QuickStart (<https://cals.wisc.edu/academics/prospective-students/quickstart/>), which allows students to begin their college career the summer before they arrive on campus.

CALS students learn through hands-on, real world experiences. A majority of CALS students earn credit for internships and research experiences in labs.

Through peer advising and mentoring, student organizations and residential learning communities, students build their community and networks.

Students gain a global perspective by taking a course with an international focus and many students study abroad. In addition to general UW–Madison programs, CALS offers more than 34 study abroad programs led by our faculty.

Finally, many CALS students take advantage of the ability to customize their path of study by participating in an honors program, pursuing certificates or second majors, and choosing elective courses that match their interests and meet their goals.

AGRONOMY

Agronomy is plant biology striving to meet the world's expanding need for food, fiber, and fuel in an efficient, environmentally sound, and sustainable manner.

An undergraduate student majoring in Agronomy earns a bachelor of science degree. The Agronomy curriculum offers undergraduate and graduate studies in plant biotechnology, breeding, genetics, physiology, crop management and protection strategies, agroecology, and sustainable agriculture. Agronomy undergraduate students concentrate on plant science courses but also select related courses in soil science, genetics, economics, business, engineering, entomology, and the animal sciences, depending upon their interests.

The current demand for Agronomy graduates exceeds supply, and we expect the demand to increase. Career possibilities include biotechnology, research, agri-business, resource conservation, and crop production and management. In addition to classroom learning, students gain practical experience in their area of interest and earn degree credit at the same time through internships and independent study. The Agronomy major also serves as an excellent foundation for students interested in pursuing advanced studies in plant biotechnology, breeding, genetics, physiology, crop management, agroecology, or sustainable agriculture. Graduate programs are described in the *Graduate Guide*.

RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

In addition, the department awards money each year to students who wish to study abroad.

AGRONOMY, B.S.

CREATING A HEALTHIER, MORE PRODUCTIVE, MORE RESILIENT AGRICULTURE FOR WISCONSIN AND THE WORLD.

That is the challenge taken up by the faculty, staff, and students of the Department of Agronomy.

We generate and apply knowledge about the plants that feed and benefit humankind. Agronomic crops are typically grown for grain to feed people and livestock, or are processed into products. Feed crops are grown specifically to meet the nutritional needs of livestock. Forage crops are grown for their stems, leaves, and other edible plant parts.

We find and implement solutions to problems and opportunities concerning efficiency and sustainability of crop production and in safe and environmentally sound ways.

We generate knowledge on the genetics, genomics, biochemistry, and physiology of plants.

We study the interactions among cropping systems, climate, and the environment. We emphasize sustainable agriculture, whether precision, traditional or organic, in order to reduce the impact on the environment and the inhabitants of our planet.

We work to ensure that agricultural systems and products in Wisconsin and the world are able to meet rapidly-changing needs and those of future generations.

Undergraduates in the Department of Agronomy earn a bachelor of science degree to prepare them for everything from pursuit of a graduate degree to careers in science, education, agriculture, agribusiness, and environment and conservation.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they

have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Articulate the role of biological processes, management systems, environmental influences, and economic and social factors on world food, feed, and fiber production. Specific topics that all students should have knowledge of include: photosynthesis, nutrient cycling, genetic inheritance, and management and uses of primary U.S. crop species.
2. Develop a global perspective and appreciate the interdependencies among individuals and their workplaces, communities, environments, and the planet; and an understanding of the role of science in society.
3. Communicate effectively through writing and speaking, and will be able to identify and critically evaluate available sources of information.
4. Demonstrate the ability to critically and creatively analyze problems and evaluate systems.

ADVISING AND CAREERS

ADVISING

The Department of Agronomy is faculty-advised, meaning that faculty members take on the responsibility of guiding and advising undergraduates through graduation. Students and faculty are matched as closely as possible by interest. All new freshmen and transfer students are temporarily advised by the student services coordinator until the advising relationship between professor and student is established. If you would like to have a conversation about joining the Department of Agronomy, please contact agronomy@wisc.edu.

CAREERS

An Agronomy degree is an open door to careers in many related fields such as biotechnology, plant genetics, crop management, agricultural financial management, farming, seed sales, crop consulting, Certified Crop Advising, Certified Professional Agronomy, agribusiness, extension agronomy, agricultural education, government work, and international agronomy.

GENETICS

The fastest growing sector of agriculture is plant breeding, genetics, and genomics. Plant scientists are working at the field, plant, cellular, and molecular level to create cultivars that are hardier, disease resistant, nutritious, and affordable. The industry's growth is currently outstripping the rate of graduation; graduates can take their pick of interesting, fulfilling careers in the public and private sectors.

BIOFUELS

The biofuel industry is also experiencing rapid growth, with research and development being focused on sugar-based biofuels, cellulosic biofuels, and biodiesels, made from plants as varied as switchgrass, sugar cane, corn, and wood pulp. These energy crops are harvested and processed into alternatives to fossil fuels.

AGRIBUSINESS

In agribusiness, agronomists take data and translate it into real world applications. They sell tools for crop production, provide agricultural loans, consult on crops, manage businesses, and much more. They are often responsible for translating technical research data into

applications. Numerous agronomy graduates are also involved in the sale of agricultural products, which are vital to today's economy. Other successful agronomists serve as crop advisers, farm managers, consultants, bank loan specialists, managers, and much more.

RESEARCH/EDUCATION AND EXTENSION

Agronomic educators specialize in teaching and working with high school and college students. They also teach and advise students who chose advanced studies for a master's degree and/or Ph.D. They are extensively involved in research, publishing findings on a regular basis and making scientific advances.

Extension agronomists usually work for a state, local, or national government; they consult with farmers and others to help find answers to their specific problems and help farmers translate research results into usable management practices. Government-employed agronomists also work with farmers and ranchers to plan for soil and water conservation so crops and land can be managed efficiently and with minimal impact to the environment.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in agronomy, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Badger Crops Club (<https://www.facebook.com/badgercropsclub/>), a professional, social, and educational group for agronomy students and students in related fields interested in any aspect of crop production.
- Collegiate FFA (<http://collegiateffamadison.weebly.com/>), an official collegiate chapter of the National FFA organization.

- AWA (<http://awamadison.org/>)—the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (<http://wiseli.engr.wisc.edu/>)—Women in Science and Engineering Leadership Institute, a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Study Abroad: Agronomy majors have the opportunity to go on experiential study abroad programs, where students can immerse themselves in research or global agronomy field experiences. Students can review the International Academic Programs website (<https://studyabroad.wisc.edu/>) and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the agronomy department or through other plant-, soil-, or ecology-related departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with faculty members.

RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

In addition, the department awards funds every year to students who wish to study abroad.

ANIMAL AND DAIRY SCIENCES

The Department of Animal and Dairy Sciences is the home of undergraduate and graduate programs in animal sciences and dairy science. It has a long and proud history of groundbreaking discoveries in animal nutrition, physiology, genetics, management, and muscle biology, which are coupled with excellence in the emerging fields of animal welfare, digital agriculture, and animal biologics to generate new knowledge and solve practical problems. The department is interdisciplinary, and the interests and skillsets of our faculty and graduate students range from molecular biology to animal care and management. Virtually all of our work happens in a biological context, with an eye toward advancing our understanding of animal biology, improving the lives of domestic animals, enhancing the sustainability of animal agriculture, and improving human health and nutrition.

The department was formed as a merger of the Department of Animal Sciences and the Department of Dairy Science in 2020, as a culmination of a long-stranding, interdependent relationship that includes sharing the Animal Sciences Building at 1675 Observatory Drive, cross-listing and co-teaching many core courses, and collaborating on countless research projects and outreach programs.

ANIMAL SCIENCES, B.S.

Animal Sciences students focus on the biology of domesticated animals, including cattle, swine, sheep, horses, poultry, and goats, as well as discoveries in animal biologics and meat derived from the traditional meat animal species. Some attention is directed toward the companion animal species, including dogs and cats. The major emphasizes integration of biological principles from the gene to the organ to the herd or flock. Core courses in the major include animal breeding, veterinary genetics, animal physiology, reproductive physiology, comparative animal nutrition, animal health, and meat science. Additional courses include career orientation, animal handling, assessing animal welfare, biology of companion animals, composition of meat animals, human/animal symbiosis, ruminant nutrition, monogastric nutrition, beef cattle production, swine production, animal growth and development, and livestock production in agricultural development.

The major offers a science track which includes biochemistry, math, physics, and organic chemistry for students with interests in postgraduate work in veterinary medicine, animal science, medicine, or other graduate programs. The major also offers a business emphasis which includes economics, accounting, marketing, farm management, commodity markets, agricultural finance, and other courses from the School of Business.

A student majoring in Animal Sciences is placed in the Bachelor of Science degree program. Completion of the degree program in four years is the norm.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Knowledge and comprehension) Develop the working vocabulary of an animal scientist, a working knowledge of the basic anatomy, biochemistry, physiology, and genetics of animal and meat biology, and the applied nutrition, breeding, product harvest and processing skills, necessary to manage animal production systems. Demonstrate

knowledge through rigorous examination and demonstration through hands-on instructional laboratory activities.

2. (Analytical processing) Develop the ability to reduce complex datasets and scientific information into meaningful relationships and correlations, and using the scientific literature, develop hypotheses to test the cause of predicted relationships using the scientific method. Demonstrate skills through a senior capstone experience and through individualized research opportunities and instructional activities.
3. (Integration for application) Apply knowledge to develop solutions to real world problems. Identify problems yet to be investigated and in need of advanced study. Ability to integrate and apply knowledge is demonstrated through our internship programs, animal related job experiences, club activities, and problems sets that students solve in exams and laboratory settings.
4. (Critical thinking) Find their sources of information using peer reviewed research articles. Learn not only to question popular press, but understand that even in the scientific literature there are contradictory findings. Capacity to synthesize scientific literature such that they can communicate a position backed with strong scientific support. Skills are demonstrated through the reading, writing and discussion of science-based papers in key courses during their educational process and through an oral presentation in their capstone course.
5. (Effective communication) Communicate, both in writing and orally, the science behind the biology and management of domestically farmed animals. Communications provide new insights into animal production, and are explained in a manner fitting with the audience. Ability to communicate is measured by their effectiveness in presenting research posters and presentations, their analysis of the literature in papers and presentations in class and during their senior capstone course.

ADVISING AND CAREERS

All students receive individualized advising from their academic advisor. Students are assigned an academic advisor upon declaration of the major and are expected to meet with their advisor each semester before registering for courses in the upcoming semester. Academic advisors will assist students in developing an individualized, four-year curricular plan. Internships and research experience are encouraged. Numerous graduates have completed double majors with Life Sciences Communication, Genetics and Genomics, and departments outside of CALS such as Spanish, according to the interests and aspirations of the student. Interested students should contact J. Liv Sandberg (jsandberg@wisc.edu) (608-263-4303) with questions.

Career opportunities exist in the meat, reproductive technology, feed, agribusiness, agri-marketing, and biotechnology industries. Occasionally, students have found positions within zoos. Many students pursue graduate education in veterinary medicine, animal science, medicine, or other programs.

WISCONSIN EXPERIENCE

Undergraduates majoring in Animal Sciences at UW–Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students' specific academic and career goals. There are numerous opportunities to conduct research with faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the university to stakeholders in Wisconsin and beyond for the betterment of society.

Students majoring in Animal Sciences are involved in a wide variety of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as clubs, research, volunteering, internships, and study abroad.

By joining one of the several clubs listed below, majors get to know their fellow students outside the classroom. The following opportunities can help students connect with other students interested in Animal Sciences and other biological science majors, build relationships with faculty and staff, and contribute to out-of-classroom learning.

- Pre Vet Club (<https://prevetassociation.weebly.com/>)
- Poultry Club (<https://www.facebook.com/PoultryClubUWMadison/>)
- Badger Meat Science Club (<https://win.wisc.edu/organization/badgermeatscienceclub/>)
- Saddle and Sirloin Club (<https://win.wisc.edu/organization/saddleandsirloin/>)

- Hooper Riding Club (<https://www.hooferriding.org>)
- Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>)
- Collegiate FFA (<http://collegiateffamadison.weebly.com/>)
- Association of Women in Agriculture (<http://awamadison.org/>)
- Meat Lab/Bucky's Butchery: Interested in meat science? The meat-processing facilities within the department apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.
- Study Abroad: Animal Sciences majors have the opportunity to participate in experiential study abroad programs, where they can immerse themselves in research or global animal field experiences. Students can review the International Academic Programs website and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Research/Lab Experience: Students are encouraged to get involved in research with Animal Sciences faculty or through other biology-related departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be found primarily by contacting faculty members. For more information for undergraduate opportunities, see this link (<https://andysci.wisc.edu/students/undergraduate/>).

Students are also involved in pre-health organizations, volunteer and shadowing opportunities, publishing in an undergraduate science journal, biotechnology and agricultural internships, and other related experiences on and off campus.

DAIRY SCIENCE, B.S.

Undergraduates in Dairy Science prepare for a variety of career opportunities that require a strong background in applied animal biology. Careers include: agribusiness, dairy farm management, technical service and consulting, research, and teaching. Students also enroll in the major to prepare for veterinary school, medical school, or graduate school. Coursework in the major includes animal genetics, lactation, reproduction, nutrition and management. The department may be consulted for additional details and for specific career information.

The Dairy Science major can be earned under the bachelor of science degree program. The Dairy Science major may be combined with other majors such as Agricultural and Applied Economics, Biological Systems Engineering, Genetics and Genomics, Life Sciences Communication, and Agronomy. Multiple out-of-classroom learning opportunities are included in the curriculum and internships on farms or with agribusiness are required to provide the practical training needed for success in any 21st-century careers. Many students gain valuable experience through part-time employment in research labs or in the student-operated dairy cattle instruction and research center.

Discoveries from the research laboratories reach the classroom long before they appear in textbooks. Students benefit from integration of the instructional and research programs of the department. The co-curricular Badger Dairy Club (<https://badgerdairyclub.org/>) involves students in dairy industry events that provide leadership and networking opportunities in a vibrant industry.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Gain knowledge of current and emerging research based information in animal biology and management sciences to support dairy production.
2. Gain intellectual, practical and attitudinal skills needed to identify and solve problems and challenges facing dairy producers and allied industries.
3. Gain in life-long learning skills to enable graduates to adapt to changing technological, economic and social circumstances throughout their professional career.

Students majoring in Dairy Science are involved in a wide variety of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences

such as clubs, research, volunteering, internships, Dairy Cattle Center opportunities, and study abroad.

The following opportunities can help students connect with other students interested in Dairy Science and other related majors, build relationships with faculty and staff, and contribute to out-of-classroom learning.

- Badger Dairy Club (<https://win.wisc.edu/organization/badgerdairyclub/>)
- Collegiate FFA (<http://collegiateffamadison.weebly.com/>)
- Association of Women in Agriculture (<http://awamadison.org/>)
- Babcock House (<https://win.wisc.edu/organization/babcockhouse/>)
- Alpha Gamma Rho (<https://win.wisc.edu/organization/agr/>)
- Study Abroad: Dairy science majors have the opportunity to go on experiential study abroad programs, where they can immerse themselves in research or global animal field experiences. Students can review the International Academic Programs website (<https://www.studyabroad.wisc.edu>) and the CALS study abroad advising page (<https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/>) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Research/Lab Experience: Students are encouraged to get involved in research with Dairy Science faculty or through other related departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be found primarily by contacting faculty members.
- Intercollegiate Dairy Judging competitions

See "Getting Involved in Dairy Science," as well as a link to scholarships, on this web page (<https://dysci.wisc.edu/prospective-students/undergraduate/>).

BACTERIOLOGY

See Microbiology Major in Guide for information on exploring, declaring, advising, and careers within microbiology.

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The **microbiology major**, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques—

gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms, and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process, as well as training in microbiology, allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

The department also serves as the administrative home for the biology major in the College of Agricultural and Life Sciences.

ASSISTANT PROFESSORS

Karthik Anantharaman, Kerri Coon, David Hershey, Erica Lois-Wunderlich Majumder

BIOLOGY, B.S. (CALS)

The biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:

1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain pre-professional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists, and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Agricultural and Life Sciences and the College of Letters & Science.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

Students who intend to major in Biology in either the College of Letters and Science (L&S) or the College of Agricultural and Life Sciences (CALs) may not combine this major ("double major") with the Molecular and Cell Biology Major or the Neurobiology Major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly,

courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I	
	or CHEM 108 Chemistry in Our World	
	or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALs Capstone Learning Experience: included in the requirements for each CALs major (see "Major Requirements") (p. 35)		

REQUIREMENTS FOR THE MAJOR

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses as detailed below. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

In addition to the standard Biology major, there are two Named Options: Biology with a Named Option in Evolutionary Biology and Biology with a Named Option in Plant Biology. Admissions to the Named Option in Plant Biology is suspended as of Fall 2021.

Students may complete only one Biology major/named option and must declare the option they are pursuing.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		5-10
MATH 221	Calculus and Analytic Geometry 1	
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
Complete one of the following:		3-4
MATH 222	Calculus and Analytic Geometry 2	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	

Total Credits **8-14**

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Total Credits		13-18

Physics

Code	Title	Credits
First semester Physics (complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

For AP Biology policy, as it applies to introductory biology in the biology major, see this link (<https://biology.wisc.edu/resources/ap-ib-biology-policy/>).

Code	Title	Credits
Select one of the following options:		10-13
Option A:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	

Code	Title	Credits
BOTANY/ BIOLOGY 130	General Botany	
Total Credits		10-13

Foundation Courses (complete one of the following):

Students may use BIOCORE 381 and BIOCORE 383 toward *both* Introductory Biology *and* Foundation.

Code	Title	Credits
AGRONOMY/ HORT 338	Plant Breeding and Biotechnology	3
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 508	General Biochemistry II	3-4
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	6
GENETICS 466	Principles of Genetics	3
GENETICS 468	General Genetics 2	3
MICROBIO 470	Microbial Genetics & Molecular Machines	3

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course**. Approved lab courses are indicated by footnote. A course taken to meet the Foundation requirement may not also count as an Intermediate/Advanced course.

- Complete at least two credits from either category A or B.
- Complete at least two credits from either category C or D.
- Complete at least two credits from an unused category (A, B, C, D, or E).

A. Cellular and Subcellular Biology

BIOLOGY NAMED OPTIONS

Instead of completing the requirements above, students may choose to select one of the options below.

View as list View as grid

- BIOLOGY: EVOLUTIONARY BIOLOGY (P. 80)
- BIOLOGY: PLANT BIOLOGY (P. 86)

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

HONORS IN THE MAJOR IN BIOLOGY: REQUIREMENTS

To earn Honors in the Major in Biology, students must satisfy the requirements for the major (above) as well as the following requirements:

- Earn a 3.300 overall university GPA
- Complete a two-semester Senior Honors Thesis for 6 credits total and present research in a public forum
- Complete at least 20 credits of Honors coursework from the following sections of the Biology curriculum:
 - Introductory Biology
 - Foundation Courses
 - Intermediate/Advanced Courses
- At least 6 of the 20 credits of Honors coursework must be from the Intermediate/Advanced Courses requirement

FOOTNOTES

¹ Course also approved for lab credit

² To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Know and understand core concepts that unify the breadth of biological sciences including: evolution; structure and function; information flow, exchange, and storage; pathways for transformations of energy and matter; and systems.
2. Demonstrate practical skills of a professional biologist including: problem-solving by engaging the process of science; written and verbal proficiency; laboratory skills; quantitative analysis skills; and teamwork skills.
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

FOUR-YEAR PLAN

Four-year road maps for the biology major are designed to support biological science major exploration. The road map is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search & Enroll. Your specific program of study could, and probably will, look different. You should customize the road map to fit your unique path at UW–Madison. Consult with your advisor about the best path for you.

ADVISING AND CAREERS

ADVISING

Your advisor is here to guide you through the biology major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising appointment, visit UW Undergraduate Advising (<https://advising.wisc.edu/soar/advising-101/>).

In the biology major, students are assigned to an advisor according to last name. Please schedule an advising appointment here (<http://biologymajor.wisc.edu/advising/>).

CAREERS

The biology major encourages students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the CALS Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

College of Agricultural and Life Sciences graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

- Schedule a Career Advising appointment (<https://cals.wisc.edu/academics/undergraduate-students/career-services/students/>)
- Explore CALS Career Services for Students (<https://cals.wisc.edu/academics/undergraduate-students/career-services/resources/>)

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biology, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Beta Beta Beta Biological Honor Society (<https://win.wisc.edu/organization/tribeta/>) is an honor and professional organization for undergraduate students in the biological sciences. Its activities are designed to stimulate interest, scholarly attainment, and investigation

in the biological sciences, and to promote the dissemination of information and new interpretations among students in life sciences. The society offers its members the unique opportunity to publish their undergraduate work in the pages of its journal, BIOS.

- Biology majors have the opportunity to go on experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biology Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biology/>) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when incorporating study abroad into an academic plan.
- Students are encouraged to get involved in research in any life science department. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be identified by inquiring directly (<https://biology.wisc.edu/finding-mentor/>) with faculty members, reading the Biology Major Newsletter (<https://biologymajor.wisc.edu/newsletters/>), or announcement on the Student Job Center (<https://jobcenter.wisc.edu/>).

BIOLOGY: EVOLUTIONARY BIOLOGY

The **Evolutionary Biology Named Option** allows biology majors to concentrate their studies in evolution and to have this reflected on their transcript. Since there is no evolutionary biology major available at UW–Madison, this is the only mechanism to indicate specialization in this rapidly growing and popular field. In taking this named option, students will be able to fulfill their intermediate/advanced biology requirement with courses that emphasize evolutionary biology, ranging from required courses in fundamental evolutionary biology to more advanced optional courses that cover a wide range of evolutionary biology topics. They will also take a seminar course in evolutionary biology.

Who should enroll in this option? Students with broad interest in the biological sciences who want to:

- Prepare for graduate study in evolutionary biology or related fields
- Prepare for professional studies (e.g. medical school, veterinary school, dentistry)
- Concentrate their biological studies in evolutionary biology

REQUIREMENTS

REQUIREMENTS FOR THE NAMED OPTION

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses as detailed below. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

CORE REQUIREMENTS**Mathematics and Statistics**

Code	Title	Credits
Complete one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry I	
Complete one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	

Total Credits 8-13

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	

Organic Chemistry

CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3

Total Credits 13-18

Physics

Code	Title	Credits
First semester Physics (Complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	

Total Credits 8-10

Introductory Biology

For AP Biology policy, as it applies to introductory biology in the biology major, see this link.

Code	Title	Credits
Select one of the following options:		10-13
Option A:		10
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		13

BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		10
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	

Foundation Course (complete one of the following):

Students may use BIOCORE 381 and BIOCORE 383 toward *both* Introductory Biology *and* Foundation.

Code	Title	Credits
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	6
GENETICS 466	Principles of Genetics	3
GENETICS 468	General Genetics 2	3

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required as follows and must include **one approved lab course**. (Approved lab courses are indicated by footnote.) A course taken to meet the Foundation requirement may not also count as an Intermediate/Advanced course.

- Complete the Evolutionary Biology course listed below.
- Complete at least two credits from category A or B.
- Complete at least two credits from category C.
- Complete at least two credits from category D.
- Additional courses needed to reach 13 Intermediate/Advanced credits may be taken from any category (A, B, C, D, E).

EVOLUTIONARY BIOLOGY SEMINAR

Code	Title	Credits
BIOLOGY/ GENETICS 522	Communicating Evolutionary Biology	2-3

CAPSTONE REQUIREMENT

Code	Title	Credits
------	-------	---------

Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.

ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 486	Principles of Physiology Laboratory ²	2
BMOLCHEM 504	Human Biochemistry Laboratory	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4
BOTANY/ LAND ARC 670	Adaptive Restoration Lab	2
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
MICROBIO 551	Capstone Research Project in Microbiology	2
PL PATH 315	Plant Microbiomes	4
ZOOLOGY 316	Laboratory for Limnology-Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3
ZOOLOGY 612	Comparative Physiology Laboratory	2

FOOTNOTES

- ¹ Course also approved for lab credit
- ² To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

- ¹ Math determined by placement scores. Students in the Evolutionary Biology Named Option must complete MATH 171/MATH 217 or MATH 221 plus STAT 301 or STAT 371.
- ² See CALS requirements (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#requirementstext>) for a list of approved First-Year Seminar courses.
- ³ Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/BOTANY/ZOOLOGY 152 & a foundational course or BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/BOTANY 130

& a foundational course or BIOCORE (three lectures and two labs required).

⁴ See Requirements tab for intermediate/advanced biology course lists.

BIOLOGY: PLANT BIOLOGY

Admissions to the Biology: Plant Biology, B.S. named option have been suspended as of fall 2021 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

The **Plant Biology Named Option** allows biology majors to focus their studies on plant science and to have this reflected on their transcript. There are a number of departments at UW–Madison who host plant science-based majors, including agronomy, botany, horticulture, plant pathology, and forest and wildlife ecology. While those specialized majors offer in-depth programs in their disciplines, the Plant Biology Named Option allows students to pursue a course of study within the biology major and explore plant biology at the same time. Students in this option can fulfill their requirements with courses that emphasize various aspects of plant science, including anatomy, physiology, genetics, crop production, disease resistance, and molecular techniques in plant improvement. Students also participate in a one-credit seminar called *Frontiers in Plant Science* taught by two faculty from plant science departments.

Who should enroll in this option? Students with broad interest in biological sciences who also want to:

- Prepare for graduate work in a plant science field
- Prepare for advanced study or graduate work in a natural or environmental science field
- Concentrate their studies on the biology of plants

REQUIREMENTS

REQUIREMENTS FOR THE NAMED OPTION

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses as detailed below. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

CORE REQUIREMENTS

Mathematics and Statistics

Code	Title	Credits
Complete one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
Complete one of the following:		3-4
MATH 222	Calculus and Analytic Geometry 2	
STAT 301	Introduction to Statistical Methods	

STAT 371 Introductory Applied Statistics for the Life Sciences

Total Credits 8-14

Chemistry

Code	Title	Credits
General Chemistry (Complete one of the following):		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II	
Organic Chemistry		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Total Credits		13-18

Physics

Code	Title	Credits
First Semester Physics (complete one of the following):		4-5
PHYSICS 103	General Physics	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	
Second Semester Physics (complete one of the following):		4-5
PHYSICS 104	General Physics	
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
Total Credits		8-10

Introductory Biology

For AP Biology policy, as it applies to introductory biology in the biology major, see this link (<https://biologymajor.wisc.edu/resources/ap-ib-biology-policy/>).

Code	Title	Credits
Select one of the following options:		10-13
Option A:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option B:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 485	Principles of Physiology	
Option C:		
ZOOLOGY/ BIOLOGY 101	Animal Biology	

ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
BOTANY/ BIOLOGY 130	General Botany	
Total Credits		10-13

Foundation Course (complete one of the following):

Students may use BIOCORE 381 and BIOCORE 383 toward *both* Introductory Biology *and* Foundation.

Code	Title	Credits
AGRONOMY/ HORT 338	Plant Breeding and Biotechnology	3
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 508	General Biochemistry II	3-4
BIOCORE 381 & BIOCORE 383	Evolution, Ecology, and Genetics and Cellular Biology	6
GENETICS 466	Principles of Genetics	3
GENETICS 468	General Genetics 2	3

INTERMEDIATE/ADVANCED COURSES

Minimum of 13 credits required and must include **one approved lab course**. Approved lab courses are indicated by footnote. A course taken to meet the Foundation requirement may not also count as an Intermediate/Advanced course.

- Complete at least two credits from either category A or B.
- Complete at least two credits from either category C or D.
- Complete at least two credits from category E.

A. Cellular and Subcellular Biology

Code	Title	Credits
AGRONOMY/ HORT 338	Plant Breeding and Biotechnology	3

PLANT SCIENCE SEMINAR

Code	Title	Credits
Complete one of the following:		
AGRONOMY 375	Special Topics (Biochemistry and Molecular Biology of Plants Seminar)	1-4
BIOCHEM 375	Special Topics (Biochemistry and Molecular Biology of Plants Seminar)	1-4

PL PATH 375	Special Topics (Frontiers in Plant Biology)	1-4
-------------	--	-----

CAPSTONE REQUIREMENT

Code	Title	Credits
Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.		
ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 486	Principles of Physiology Laboratory 2	2
BMOLCHEM 504	Human Biochemistry Laboratory	3
BOTANY/ F&W ECOL 455	The Vegetation of Wisconsin	4
BOTANY/F&W ECOL/ ZOOLOGY 460	General Ecology	4
BOTANY/ LAND ARC 670	Adaptive Restoration Lab	2
ENVIR ST/ ZOOLOGY 511	Ecology of Fishes Lab	2
F&W ECOL 599	Wildlife Research Capstone (limited access)	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
MICROBIO 551	Capstone Research Project in Microbiology	2
PL PATH 315	Plant Microbiomes	4
ZOOLOGY 316	Laboratory for Limnology- Conservation of Aquatic Resources	2-3
ZOOLOGY 555	Laboratory in Developmental Biology	3
ZOOLOGY 612	Comparative Physiology Laboratory	2

FOOTNOTES

¹ Course also approved for lab credit

² To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

MICROBIOLOGY, B.S. (CAL S)

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The **microbiology major**, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques—gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

HOW TO GET IN

Incoming or current students in good academic standing may declare the microbiology major at any time.

Schedule an appointment with a microbiology major advisor to discuss how to declare the major, appropriate coursework to take, and much more. Please see the Advising and Careers tab for information on how to schedule an appointment with a microbiology major advisor.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	

or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALs Capstone Learning Experience: included in the requirements for each CALs major (see "Major Requirements") (p. 35)		

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
Mathematics		
Complete one of the following:		5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry 1	
Statistics		
Complete one of the following:		3
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
General Chemistry		
Complete one of the following:		5-10
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II

Total Credits 64-88

¹ (BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/
ZOOLOGY 152) or (BIOCORE 381 / BIOCORE 382 / BIOCORE 383 /
BIOCORE 384 / BIOCORE 485) are recommended.

² (PHYSICS 103 / PHYSICS 104) or (PHYSICS 207 / PHYSICS 208) are
recommended.

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

HONORS IN THE MAJOR IN MICROBIOLOGY: REQUIREMENTS

To earn Honors in the Major in Microbiology, students must satisfy the Requirements for the Major (above) as well as the following requirements. All courses used for Honors in the Major requirements must receive "B" or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA.
- Earn a 3.300 GPA for all MICROBIO courses, and all courses accepted in the major.
- Complete a two-semester Senior Honors Thesis (MICROBIO 681 and MICROBIO 682) for 6 credits total and present research in a public forum. Students completing their senior honors theses in laboratories or departments outside of Microbiology may be able to count that thesis toward Honors in the Major.
- Complete at least 20 credits of any combination of the following coursework:
 - Honors courses that fulfill Requirements for the Major (see above); independent study and thesis credits do not count here.
 - Non-honors coursework credits from this list: CHEM 115, CHEM 311, CHEM 327, GENETICS 466, MATH 222, MATH 234. These courses do not need to be taken for honors to count.
- At least 10 of the 20 credits of coursework above must come from courses taken for honors off this Microbiology course list: MICROBIO 303, MICROBIO 304, MICROBIO/FOOD SCI 325, MICROBIO 330, MICROBIO/AN SCI/BOTANY 335, MICROBIO 345, MICROBIO/SOIL SCI 425, MICROBIO 450, MICROBIO 470, MICROBIO 526, MICROBIO 607, MICROBIO/BIOCHEM/GENETICS 612, MICROBIO 657, MICROBIO/BMOLCHEM 668.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology
2. Apply the scientific method to questions. Formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving
4. Access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Learn about and demonstrate personal and professional ethics.

MICROBIO 526		3 MICROBIO 450	3
MICROBIO 527		2 MICROBIO 551	2
Research ⁶		1-4 Research ⁶	1-4
Electives (for major or other) ³		6-9 Electives (for major or other) ³	7-10
12-18		13-19	

Total Credits 105-138

* Students planning to pursue graduate studies in a biological science are encouraged to take MATH 222, PHYSICS 201/ PHYSICS 202 or PHYSICS 207/PHYSICS 208, and BIOCHEM 507/BIOCHEM 508 (see Note 7). Also recommended: CHEM 565 Biophysical Chemistry and MICROBIO/BIOCHEM/GENETICS 612 Prokaryotic Molecular Biology.

¹ Choose 1 of 3 sequences:(CHEM 103/CHEM 104) or CHEM 109 or (CHEM 115/CHEM 116). Students who take CHEM 109 and plan to attend medical or other professional schools are advised to take one additional inorganic course (CHEM 311 or CHEM 327).

² Math course determined by placement scores. Microbiology majors must complete math through calculus (choose from MATH 171/MATH 217 or MATH 221), and statistics (choose from STAT 301 or STAT 371).

³ Electives can be scheduled according to the student's preference. Consult your advisor and the Requirements tab.

⁴ The three choices are 1) ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152; 2) ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY 102 and BOTANY/BIOLOGY 130; or 3) Biocore. Biocore is a 3 to 4 semester sequence. Students must complete the first three lectures and the first two labs. The Biocore courses are BIOCORE 381, BIOCORE 382, BIOCORE 383, BIOCORE 384, BIOCORE 485, BIOCORE 486, BIOCORE 587.

⁵ Physics may be taken in year 1, 2, 3, or 4 depending on the student's schedule.

⁶ Undergraduate research courses include 299, 699, 681#682 (Honors Thesis), 691#692 (Thesis). Both semesters are required for thesis credit. Students are encouraged to take several semesters of research (internship opportunities, 399, are also encouraged).

⁷ If BIOCHEM 507 General Biochemistry I and BIOCHEM 508 General Biochemistry II are taken, both semesters must be completed (with

the recommendation of BIOCHEM 507 in fall semester of year 3 and BIOCHEM 508 in spring semester of year 3).

THREE-YEAR PLAN

This sample three-year plan is a tool to assist students and their advisor(s). Students should use it —along with their DARS report, the Degree Planner, and Course Search & Enroll tools — to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an academic advisor early and often to discuss feasibility, appropriate course sequencing, post-graduation plans (careers, graduate school, etc.), and considerations they might make in pursuit of a three-year graduation plan.

While there are many advantages to attending four years of college, including making the most of research and study abroad opportunities, exploring alternative majors, completing additional majors and certificates, developing skills and interests through student groups, and personal growth, students may have reasons for wishing to graduate in fewer than four years.

The example plan assumes that students will:

- enter their freshman year with 20 advanced standing credits, including equivalency credit for MATH 221
- declare their major freshman year
- take two summer terms
- enroll in at least 15-16 credits in the fall/spring semesters

Code	Title	Credits

Elective ²	3 Elective ²	3
15-16		15-16

Total Credits 98-100

Students must earn **120 total credits** to graduate, including accepted advanced standing or transfer credits. The above charts reflect 100-102 total credits from six fall/spring semesters and two summer terms, including courses taken in the summer before the first year.

- ¹ The Microbiology major recommends QuickStart (INTER-AG 140 and INTER-AG 141) for the First-Year Seminar requirement. However, this requirement can be fulfilled through courses offered in Fall and Spring semester of the first year.
- ² The Microbiology major encourages students with an interest in research to work with faculty through Independent Research courses as electives.

ADVISING AND CAREERS

Current UW–Madison students should use Starfish to schedule an appointment with an advisor in the Biochemistry & Microbiology Undergraduate Advising Hub (<https://biochemmicrobio.wisc.edu/>).

Prospective/future UW–Madison students should send an email to the Biochemistry & Microbiology Undergraduate Advising Hub (biochemmicrobio-advisor@wisc.edu) to set up an appointment, which can be conducted in person or via phone call.

Read about and explore possible microbiology careers at the American Society for Microbiology (<https://www.asm.org/Careers/Career-Planning/>) website.

Learn more about health-related careers through ExploreHealthCareers.org (<https://explorehealthcareers.org/>).

BIOCHEMISTRY

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

BIOCHEMISTRY, B.S. (CAL S)

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population-level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

HOW TO GET IN

Students may declare the major via an appointment with the undergraduate advisor at any time. Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences (CAL S) have the option to declare biochemistry at SOAR. Students may otherwise declare after they have begun their undergraduate studies. The Biochemistry major is offered through either CAL S or the College of Letters & Science (L&S). Students

interested in the differences or transferring between CAL S and L&S should meet with the advisor to discuss this in more detail.

Students who intend to major in Biochemistry may not combine this major ("double major") with the Molecular and Cell Biology major.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CAL S must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CAL S B.S. DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	
	Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.	
	First Year Seminar (p. 35)	1

International Studies (p. 35)	3
Physical Science Fundamentals	4-5
CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
Biological Science	5
Additional Science (Biological, Physical, or Natural)	3
Science Breadth (Biological, Physical, Natural, or Social)	3
CALs Capstone Learning Experience: included in the requirements for each CALs major (see "Major Requirements") (p. 35)	

REQUIREMENTS FOR THE MAJOR

MATHEMATICS

Mathematics Requirements

Code	Title	Credits
Select one of the following options:		
MATH 221 & MATH 222	Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2	9
MATH 171 & MATH 217 & MATH 222	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II and Calculus and Analytic Geometry 2	14
MATH 275 & MATH 276	Topics in Calculus I and Topics in Calculus II	10

CHEMISTRY

General Chemistry

Code	Title	Credits
Select one of the following options:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	9
CHEM 109	Advanced General Chemistry	5
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Organic Chemistry

Code	Title	Credits
Select ALL of the following courses:		
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2

Analytical Chemistry

Code	Title	Credits
Select one of the following options:		
CHEM 327	Fundamentals of Analytical Science	4

CHEM 329	Fundamentals of Analytical Science	4
CHEM 115 & CHEM 116	Chemical Principles I and Chemical Principles II (satisfies both general and analytical chemistry requirements)	10

Physical Chemistry

Code	Title	Credits
Must complete 4 credits of physical chemistry. Select one of the following options:		
CHEM 565	Biophysical Chemistry (recommended)	4
CHEM 561 & CHEM 563	Physical Chemistry and Physical Chemistry Laboratory	4-5

BIOLOGY

Students must complete either Option A (introductory + upper-level biology), or Option B (Biocore), for 16 total credits of biological science coursework.

Option A (Introductory + Upper-Level Biology)

Option A Introductory Biology

Code	Title	Credits
Select one of the following introductory biology options:		
BIOLOGY/BOTANY/ZOOLOGY 151 & BIOLOGY/BOTANY/ZOOLOGY 152	Introductory Biology and Introductory Biology (recommended)	10
BIOLOGY/ZOOLOGY 101 & BIOLOGY/ZOOLOGY 102 & BOTANY/BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	10

AND Option A Upper-Level Biology

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits—more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the course list below. To see courses offered in specific upcoming semesters, please see the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/advanced-biology-courses-undergraduate-program/).

Important: Biochemistry courses on this list can count only for "upper-level biology" if they are above-and-beyond what is needed to fulfill the "biochemistry" portion of the major. For example, if students have taken BIOCHEM 501, they will need one advanced biochemistry elective to fulfill the biochemistry requirement, and then any additional biochemistry courses taken can count for upper-level biology. A course may not double count in both the "upper-level biology" and the "biochemistry" requirements for the major.

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

HONORS IN THE MAJOR IN BIOCHEMISTRY: REQUIREMENTS

To earn Honors in the Major in Biochemistry, students must satisfy the requirements for the major (above) as well as the following requirements. All courses used for Honors in the Major requirements must receive "B" or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all BIOCHEM courses, and all courses accepted in the major
- Complete BIOCHEM 507 and BIOCHEM 508 for Honors
- Complete a two-semester Senior Honors Thesis for 6 credits total and present research in a public forum
- Complete at least 14 credits of any combination of the following coursework:
 - Honors courses that would fulfill the biological science requirement in the major (see above)

- Statistics coursework (does not need to be taken for Honors): STAT 301, STAT 371, or STAT/B M I 541
- Biochemistry elective coursework (does not need to be taken for Honors): NUTR SCI/BIOCHEM 510, BIOCHEM 550, BIOCHEM 570, M M & I/BIOCHEM 575, BIOCHEM 601, MATH/B M I/BIOCHEM/BMOLCHEM 606, MATH/B M I/BIOCHEM/BMOLCHEM 609, MICROBIO/BIOCHEM/GENETICS 612, MD GENET/BIOCHEM/GENETICS 620, BOTANY/BIOCHEM 621, BIOCHEM 625, BIOCHEM/PHMCOL-M/ZOOLOGY 630, BIOCHEM/NUTR SCI 645
- Coursework in MATH, CHEM, or PHYSICS from the list below:

Math

Code	Title	Credits
MATH 275	Topics in Calculus I	5
MATH 276	Topics in Calculus II	5
MATH 341	Linear Algebra	3
MATH 375	Topics in Multi-Variable Calculus and Linear Algebra	5
MATH 376	Topics in Multi-Variable Calculus and Differential Equations	5
MATH 521	Analysis I	3
MATH 522	Analysis II	3
MATH 541	Modern Algebra	3
MATH 542	Modern Algebra	3

Chemistry

Code	Title	Credits
CHEM 109	Advanced General Chemistry	5
CHEM 115	Chemical Principles I	5
CHEM 116	Chemical Principles II	5
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 329	Fundamentals of Analytical Science	4
CHEM 547	Advanced Organic Chemistry	3
CHEM 561	Physical Chemistry	3
CHEM 565	Biophysical Chemistry	4
CHEM 563	Physical Chemistry Laboratory	1-2
CHEM 562	Physical Chemistry	3
CHEM 564	Physical Chemistry Laboratory	1

Physics

Code	Title	Credits
PHYSICS 201	General Physics	5
PHYSICS 202	General Physics	5
PHYSICS 207	General Physics	5
PHYSICS 208	General Physics	5
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 247	A Modern Introduction to Physics	5
PHYSICS 248	A Modern Introduction to Physics	5
PHYSICS 249	A Modern Introduction to Physics	4

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

Humanities Course	3 ZOOLOGY/BIOLOGY/ BOTANY 152 (or BIOCORE 383 & BIOCORE 384)	5
Social Science Course	3 Ethnic Studies Course	3
	14	13

Total Credits 27

Fall	Credits	Spring	Credits
CHEM 565 or BIOCHEM 551		4 BIOCHEM 551 or CHEM 565	4
BIOCHEM 691 or 681 ⁴		2-3 BIOCHEM 692 or 682	2-3
Electives or Remaining Requirements	6-10	Electives or Remaining Requirements	6-10
	12-17		12-17

Total Credits 24-34

- First-year students interested in exploring the major can enroll in INTER-AG 155 or BIOCHEM 100.
- BIOCORE sequence requires four lecture courses plus two lab courses. Student may also take ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152 plus 6 credits of upper-level Biology instead of BIOCORE.
- Students must take either: (1) both BIOCHEM 507 and BIOCHEM 508 or (2) BIOCHEM 501 and one additional course in Biochemistry from the 500/600-level electives.
- Senior Thesis, independent study or work experience in laboratory are strongly recommended, but are not required. However, a Senior Honors Thesis is required to earn Honors in the Major.

ADVISING AND CAREERS

HOW TO SEEK ADVISING

- To schedule an appointment with the advisor, use Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).
- Send an email with brief questions to biochemmicrobio-advisor@wisc.edu.
- Drop-in advising hours for quick (10–15 minute) questions, on a first-come, first-serve basis, are posted on the Biochemistry / Microbiology Undergraduate Advising Hub website (<https://biochemmicrobio.wisc.edu/>) each semester.

LEARNING OUTCOMES

- Identify the fundamental biochemical principles that underlie all biological processes.
- Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
- Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
- Demonstrate professional and ethical responsibility in scientific research.
- Design and conduct quantitative experiments and/or interpret data to address a scientific question.

FOUR-YEAR PLAN

CAREER EXAMPLES

- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

Weeks, Amy

ASSOCIATE FACULTY ASSOCIATES

Prost, Lynne

Pennella, Mario

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- The American Society for Biochemistry and Molecular Biology (ASBMB) UW–Madison Student Chapter (<https://win.wisc.edu/organization/ASBMB/>) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
- Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biochemistry/>) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistry-related departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (https://biochem.wisc.edu/undergraduate_program/research-opportunities-undergraduate-program/) and the advisors can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

BIOLOGICAL SYSTEMS ENGINEERING

The biological systems engineering program is a professional program leading to the degree of Bachelor of Science–Biological Systems Engineering jointly granted by the College of Engineering and the College of Agricultural and Life Sciences. A student may study in the General program, or specialize in food and bioprocess engineering, natural resources and environmental engineering, or machinery systems engineering. It is intended for students interested in engineering as applied to all aspects of food and fiber production and biologically related engineering applications. All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET (<http://www.abet.org>) (Accreditation Board for Engineering and Technology).

BIOLOGICAL SYSTEMS ENGINEERING, B.S.

Biological systems engineering (BSE) is the application of engineering principles to biological and agricultural systems which greatly impact our food, fiber, and renewable energy resources. Since biological systems engineering programs focus heavily on the protection and conservation of natural resources, it is not uncommon for them to be described as sustainable engineering programs.

Within the BSE program a student must enroll in either the *General Program* area or in one of the following three specialization areas: *Machinery Systems Engineering*, *Natural Resources and Environmental Engineering*, or *Food and Bioprocess Engineering*. The specialization in Food and Bioprocess Engineering is split into a Food Engineering track and a Bioprocess Engineering track.

Students who complete all degree requirements are awarded a *Bachelor of Science—Biological Systems Engineering* degree. A student who completes one of the three program specializations will have the area of specialization identified on the official transcript. The BSE program, like all undergraduate engineering programs on the UW–Madison campus, is accredited by ABET (<http://www.abet.org>). Accreditation by ABET is an indication of program quality and has major benefits for individuals seeking registration as a licensed professional engineer. A UW–Madison BSE graduate may apply for licensure as a registered professional engineer once they have passed the Fundamentals of Engineering (FE) exam, obtained four years of qualifying engineering work experience, and have passed the Professional Engineering (PE) exam. To obtain a BSE degree from UW–Madison, a student must have taken (but is not required to have passed) the FE exam as part of their Senior Design sequence. Information about the FE exam can be found at Fundamentals of Engineering Exam (<http://ncees.org/exams/fe-exam/>).

Graduates work in career fields associated with the growth, harvest, transportation, processing and storage of food, feedstuffs, biomass for energy production and forestry products. This includes, but is not limited to, jobs involving the design, construction and management of: bio-energy production facilities, greenhouses, food processing plants, soil management systems and erosion control structures, irrigation and drainage systems, wastewater and solid waste treatment/recycling operations, animal housing facilities, aquaculture enterprises, systems

for improved air quality, and equipment for agricultural production, material handling, processing, and packaging. Job opportunities for BSE graduates remain plentiful and show no signs of decreasing given (1) the increase in world population and corresponding increasing need for food, fiber and renewable energy, (2) the measurable shortage of highly trained technical personnel in the United States, and (3) the constantly expanding emphasis on protection and conservation of natural resources.

The UW–Madison BSE program is traditionally known for its emphasis on undergraduate education which is reflected in outstanding one-on-one advising and smaller class sizes.

The BSE program requires completion of a minimum of 125 credits to be eligible for graduation. Note that this is higher than the minimum for other CALS programs.

HOW TO GET IN

Entry to this professional program requires students to meet the five admission requirements detailed below. Students are admitted to the department as pre-Biological Systems Engineering until they meet the admission criteria. **Admission eligibility must be confirmed by the department.**

1. Must complete a minimum of 24 degree credits.
2. Must have completed a minimum of 17 graded credits of calculus, statistics, chemistry, computer science, statics, biology, and physics courses required for a BSE degree.
3. Must have a math and science grade point average (M&SGPA) of at least 2.65 with a minimum grade of C in every course used to calculate the M&SGPA. The M&SGPA is based on: math courses numbered 217 and above (MATH 228 is excluded); statistics courses numbered 224 and above; all chemistry courses (courses with biological science breadth; maximum three courses, any required course must be included if taken); computer sciences courses numbered 302 and above (COMP SCI 402 is excluded); E M A 201 Statics; and physics courses numbered 201 and above. For any course that a student repeats, only the most recent grade will be used in the calculation. Any transfer course from another university that is included in the previous list must be included in the GPA calculation.
4. Must be in good academic standing—i.e., not on academic probation or dropped status.
5. Must successfully complete introductory chemistry (CHEM 103 General Chemistry I & CHEM 104 General Chemistry II, or CHEM 109 Advanced General Chemistry, or equivalent) and math through MATH 222 Calculus and Analytic Geometry 2.

Revisions to #3 effective for students joining the department in 2019: Grades in courses Math 228 and Computer Science 402 are excluded from calculation. A maximum of three courses with biological science breadth may be used. If BSE 349 has been completed, it must be included in the calculation.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	

or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

NAMED OPTIONS WITHIN THE MAJOR

Students may complete the Biological Systems Engineering General Program or select a Named Option. The course requirements on this page represent the general program. Students are encouraged to consider one of the Named Options (Food and Bioprocess Engineering; Machinery Systems Engineering; or Natural Resources and Environmental Engineering). Links to learn more about these options, including the course requirements, are included below.

View as listView as grid

BSE 365	Measurements and Instrumentation for Biological Systems	3
BSE 308	Career Management for Engineers	1
Total Credits		53-60

¹ Taking the combination of CHEM 103 and CHEM 104 instead of CHEM 109 may increase the total minimum number of credits required to complete the program.

² Any biological science course of 2 or more credits is accepted. Additional courses taken may be counted as Technical Electives.

³ MICROBIO 101 or MICROBIO 303 required for Food & Bioprocess Engineering specialization.

⁴ E M A 201 Statics is an acceptable prerequisite for PHYSICS 202 General Physics.

⁵ Students selecting the Food & Bioprocess Engineering option who plan to enroll in CBE 310 Chemical Process Thermodynamics and CBE 320 Introductory Transport Phenomena must take CBE 250 here as a prerequisite. Students selecting the Food & Bioprocess Engineering option who plan to enroll in M E 361 Thermodynamics and M E 363 Fluid Dynamics are recommended to take BSE 249 here.

GENERAL PROGRAM REQUIREMENTS

Code	Title	Credits
M E 361 or CBE 310	Thermodynamics ¹ Chemical Process Thermodynamics	3
Select one of the following: ¹		3-4
M E 363	Fluid Dynamics	
CIV ENGR 310	Fluid Mechanics	
CBE 320	Introductory Transport Phenomena	
BSE 464	Heat and Mass Transfer in Biological Systems	3
E M A 303 or M E 306	Mechanics of Materials Mechanics of Materials	3
Select a minimum of three of the following:		6-9
BSE 201	Land Surveying Fundamentals	
BSE/ ENVIR ST 367	Renewable Energy Systems	
BSE/CIV ENGR/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	
BSE/FOOD SCI/ M E 441	Rheology of Foods and Biomaterials	
BSE 460	Biorefining: Energy and Products from Renewable Resources	
BSE 461	Food and Bioprocessing Operations	
BSE 472	Sediment and Bio-Nutrient Engineering and Management	
BSE 473	Water Management Systems	
BSE/M E 475	Engineering Principles of Agricultural Machinery	
BSE/M E 476	Engineering Principles of Off-Road Vehicles	
BSE 571	Small Watershed Engineering	
BSE/ FOOD SCI 642	Food and Pharmaceutical Separations	
Select a minimum of 9 credits of 300 level or above non- BSE engineering courses		9
Total Credits		27-31

¹ Take BSE 249 and M E 361 and M E 363, or take CBE 250 and CBE 310 and CBE 320.

TECHNICAL ELECTIVES

Select courses from one or more of the following four technical elective categories to bring the total number of credits in the General Program Area or in the selected specialization area to 43. See the BSE Undergraduate Student Handbook for a list of recommended technical electives for various areas of specialization.

A. INTRODUCTION TO ENGINEERING COURSES (FRESHMEN ONLY)

Code	Title	Credits
INTEREGR 170	Design Practicum	3
BSE 170	Product Design Practicum	2

B. INDEPENDENT STUDY/INSTRUCTION COURSES

CALS or CoE courses with a 001, 299, 399, or 699 course number. No more than 3 credits of coursework in this category can be used to meet technical elective requirements.

C. UPPER-LEVEL COURSES

Part 1. Upper-Level Engineering Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Any Engineering course numbered 300 or above		
E M A 202 or M E 240	Dynamics	3

Part 2. Upper-Level Science Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/instruction courses.

Code	Title	Credits
Advanced biological, natural, and physical science courses (i.e., courses with a B, N, or P designation)		
CHEM 341	Elementary Organic Chemistry	3
CHEM 342	Elementary Organic Chemistry Laboratory	1
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
CHEM/M S & E 421	Polymeric Materials	3
AGRONOMY/ATM OCN/SOIL SCI 532	Environmental Biophysics	3

D. LOWER-LEVEL SCIENCE AND ENGINEERING COURSES, BREADTH COURSES

Elementary and intermediate biological, natural and physical science courses except elementary and intermediate math courses; College of Engineering courses with a 100 or 200 level designation; College of Agricultural and Life Sciences courses, Institute of Environmental Studies courses, and/or School of Business courses. Independent study/instruction courses cannot be counted in this category. No more than 12 credits of coursework in this category can be used to meet technical elective requirements.

CAPSTONE

Code	Title	Credits
BSE 508	Biological Systems Engineering Design Practicum I	2
BSE 509	Biological Systems Engineering Design Practicum II ¹	3
Fundamentals of Engineering Exam ¹		

¹ Grades for BSE 509 will not be posted until proof of examination is presented.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. The ability to analyze systems, components and processes. This includes: the ability to apply knowledge of mathematics, science, and engineering fundamentals; the ability to use the techniques and tools of modern engineering practice; the ability to identify, formulate, and solve engineering problems.
2. The ability to create a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.
3. The ability to formulate and conduct basic investigations such as laboratory experiments, prototype tests, field trials, computer simulations and market analyses.
4. The ability to identify important resources, and to retrieve, interpret, analyze and critique information for use in solving engineering problems and conducting basic investigations.
5. The ability to communicate effectively. This includes: the ability to effectively orally communicate; the ability to write in a clear, concise, grammatically correct and organized manner; the ability to document work activities and properly archive information; the ability to develop appropriate illustrations including hand sketches, computer generated drawings/graphs and pictures.
6. An understanding of professional and ethical responsibility.
7. The ability to function on multidisciplinary teams.
8. The broad education necessary to understand and assess the impact of engineering solutions in a global, economic, environmental, and societal context.
9. Recognition of the need, and the ability to engage in lifelong learning.
10. Knowledge of contemporary issues.

¹ If CHEM 103 & CHEM 104 are taken in place of CHEM 109, it is suggested to take CHEM 103 in the fall semester and CHEM 104 in the spring semester of year 1, and move BSE 310 to the fall semester of year 2.

- Need 125 credits to complete degree.

ADVISING AND CAREERS

ADVISING

All students are assigned an advisor when they join the department. Freshmen and other pre-biological systems engineering students work with a professional staff advisor. Once full admission requirements are met, students transition to a faculty advisor in their specialization area. All students are encouraged to outline a degree plan soon after declaring the major. Curriculum checklists for each track have been developed to assist students in this process. Many BSE courses are offered only once each year, which must be considered as part of the planning process. Student plans may vary based on previous coursework, plans for study abroad or certificate interest, co-op semesters, and individual interests. Prospective students should contact the department at bse@wisc.edu or 608-262-3310 for more information.

CAREERS

Solve. Create. Invent. Sustain.

Biological Systems engineers combine their knowledge of life sciences, agriculture, and technology, with engineering problem-solving skills to address many of the most pressing problems facing the world today: providing safe and nutritious food, generating renewable energy, and preserving the natural environment.

If you like hands-on problem solving, you should consider Biological Systems Engineering (BSE) as your major.

Graduates can expect to find biological and agricultural engineering careers in a wide range of agencies and industries solving problems in many different areas. Graduates work in career fields associated with the growth, harvest, transportation, processing and storage of food, feedstuffs, biomass for energy production and forestry products. This includes, but is not limited to, jobs:

- designing and managing bio-energy systems, greenhouses, and food processing plants
- designing animal housing and environmental control systems
- developing irrigation and drainage systems
- protecting soils, and air and water quality
- designing and running wastewater treatment and waste management operations
- designing off-road equipment for agricultural production and material handling.

Job opportunities for BSE graduates remain plentiful and show no signs of decreasing given (1) the increase in world population and corresponding increasing need for food, fiber and renewable energy, (2)

the measurable shortage of highly trained technical personnel in the United States, and (3) the constantly expanding emphasis on protection and conservation of natural resources.

Or, you may take the skills you learn through your experiences at BSE and apply them to a brand new challenge. We are excited to see what you will do.

WISCONSIN EXPERIENCE

Through our curriculum, BSE students have opportunities for many high-impact learning experiences including hands-on lab courses, involvement in student organizations, and BSE's capstone design classes. Introductory engineering courses and career management courses are built into the curriculum to make sure you have a community to succeed both at UW–Madison and after you graduate.

Beyond traditional classes, our students work or perform independent study with professors not only in BSE but throughout the campus. Many campus labs and shops need students who know how to design and build systems, skills at which you will excel through your experiences in BSE. Outside the university, BSE students can take advantage of internships and co-ops, but are also in high demand for programs such as Peace Corps and Engineers without Borders. BSE has an active student organization ASABE (<http://asabe.bse.wisc.edu/>), where students network with professionals and provide service projects to the community.

As a BSE student, you will be proud that you are contributing to the social and economic well-being of Wisconsin and beyond by designing solutions to feed and fuel the world in a sustainable manner. Many of our students go on to work in the following areas:

- Machinery systems that support the agricultural production sector including precision agriculture, cultural and processing technology, and logistics for crop and animal production with a focus on dairy facilities and milking technology.
- Natural resource systems that support both agricultural producers and environmental agencies in the areas of air and water quality, and waste mitigation and utilization.
- Food production systems that support the food industry striving for improvements in food processing, safety, and security.
- Bioprocessing systems that support bioenergy and bioproducts industries including biomass production and logistics systems, biomass conversion technologies, and forest products.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

All BSE students are encouraged to apply annually for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). Each year the BSE department selects more than two dozen outstanding students to receive financial support through scholarships.

THE BSE SHOP

The Biological Systems Engineering Shop is dedicated to providing BSE students a hands-on experience with machining equipment found throughout the production sector of industry. The shop, located at 540 Elm Drive, is open to all BSE students who have completed the *shop safety form* (renewed annually) and have read and understood the *Shop Rules and Regulations*. In addition, a yearly refresher is required which consists of watching the shop safety presentation and completing a short, yearly safety quiz. Whether you have never worked in a shop before, or already feel at home working with this type of machinery, we welcome you to the BSE Shop and want to make you feel comfortable in this learning environment.

BSE students are welcome to learn various machining and metal fabrication techniques as well as woodworking skills. These skills are aimed at improving students' understanding of the design, fabrication, and assembly processes through one-on-one training and hands-on operation of the machines—before they enter the workforce. To operate any of the shop machines, students must first be authorized by completing the online *Canvas course* and provide a one-on-one, hands-on operation with the shop supervisor to demonstrate understanding of the machine's controls and capabilities. To maintain a safe work environment, the shop is under 24-hour video surveillance. For additional details, please see Shop Info for Students (<https://bse.wisc.edu/bse-shop-home/shop-info-for-students/>).

CAE COMPUTER LAB

A dedicated student computer lab in room 217 of the Agricultural Engineering Building offers 10 computer workstations and space for group work. These machines have the same software packages as those found in Computer Aided Engineering labs on the Engineering campus. A CAE printer is also provided.

THE B1 LOUNGE

In the basement of the Agricultural Engineering Building is a large room with multiple tables and chairs that can be used for group study or individual work. Department-wide social events are also held here. A microwave oven and vending machines are available for student use.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website.

(In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING

Food and bioprocess engineers develop and manage equipment and systems that process and distribute food and other biologically based materials. They are required by the food industry to help develop processes that add value to food products. These processing technologies are designed to improve the storage life and marketability of food products, reduce their transportation costs, handle processing wastes, and develop alternative uses for biological materials. (For example, newspaper and soy flour are used to make the construction material, EnvironTM, and corn stalks can be used to make chemical absorbent pads.)

The food industry makes up one of the largest segments of our nation's economy and continues to enjoy steady growth due to the ever-changing needs of consumers and increased awareness of nutritional and environmental issues. Food and bioprocess engineers play a vital role in meeting this need. From potato chips to microwavable entrees, food and bioprocess engineers continue to develop processes to convert raw materials from the farm to food products for the dining room table.

BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING

Machinery systems engineering is what many students initially perceive biological systems engineering to be. These engineers are trained to design machines for production agriculture and construction. Concepts covered in this field include power transmission, traction, hydraulic power, and crop handling, such as planting and harvesting.

Over the past 50 years, machines have improved production efficiency in all aspects of life. Machinery systems engineers have played a key role in moving society from the highly manual culture of the early 20th century to the highly technical culture of the late 20th century. Even with these advances, the job of the machinery systems engineer is not complete. Concern for our natural environment and worker safety, and the constant desire to reduce costs and energy consumption while improving production efficiency, will continue to challenge machinery systems engineers.

BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING

Natural resources and environmental engineers work with all kinds of natural resources, like water, soil, plants, and air. For example, they could be responsible for the design of livestock or wildlife watering stations in a natural forest or the design of a recycling waste management system on a dairy farm. Graduates find challenging and rewarding work with engineering and environmental consultants, with government agencies like the Forest Service, and with companies such as Valmont Irrigation and Creative Habitat.

Conserving soil and water resources is critical to our future. Expanding populations and increasing needs for food, goods, and services are placing an ever growing demand upon our precious soil and water resources. Natural resources and environmental engineers are finding ways to manage and conserve our resources today so that we can meet the demands of the future.

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

Sociologists study human social behavior and how societies are organized. The Department of Community and Environmental Sociology's focus is on the relationship between people and their natural environment and with the communities in which people live, work, and play.

A major in Community and Environmental Sociology is good preparation for jobs that involve an understanding of social issues, require knowledge of the functioning and organization of communities and the relationship between people and the natural environment, and involve data collection

or data analysis. Community and Environmental Sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and cooperative or agribusiness enterprises. A major in Community and Environmental Sociology also provides excellent preparation for careers in international development, law, and further academic work in sociology or other social sciences.

The Department of Community and Environmental Sociology offers a wide range of courses for both beginning and advanced students. The department's introductory course, C&E SOC/SOC 140 Introduction to Community and Environmental Sociology, is designed to explore the changing nature of rural development in the global economy.

UW–Madison Community and Environmental Sociologists teach about a wide range of issues that are of critical importance to people and communities from Wisconsin to the low-income countries of the developing world. For example, students can study such matters as the growing controversies around energy, the implementation of environmental laws, sustainability, and the special problems and unique concerns of people in resource-dependent communities. Students can also focus on issues such as the effect of new agricultural technologies on family farms, the ways gender and race affect educational and occupational opportunities, and how community leaders and citizens address problems such as urban sprawl or rural poverty. In addition, students can examine issues such as population growth, the causes of world hunger, tropical rainforest destruction, and the prospects for achieving sustainable development in poor countries.

Many Community and Environmental (C&E) Sociology students build on their major by selecting one of the certificate programs available from the College of Agricultural and Life Sciences or from other UW–Madison schools or colleges. Certificate programs enable students to expand their skills and study particular topics or issues in more depth. C&E Sociology majors often choose certificate programs in the concentration in analysis and research, global health, food systems, criminology, and environmental studies. Many students choose to pursue a double major, combining C&E Sociology with fields such as Spanish, environmental studies, nutritional sciences, agronomy, biology, wildlife ecology, or environmental science. Students have also combined their undergraduate major in C&E Sociology with graduate work in public policy through the La Follette School of Public Affairs accelerated master's of public affairs program.

COMMUNITY AND ENVIRONMENTAL SOCIOLOGY, B.S.

Sociologists study human social behavior and how societies are organized. The Department of Community and Environmental Sociology's focus is on the relationship between people and their natural environment and with the communities in which people live, work, and play.

A major in Community and Environmental Sociology is good preparation for jobs that involve an understanding of social issues, require knowledge of the functioning and organization of communities and the relationship between people and the natural environment, and involve data collection or data analysis. Community and Environmental Sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and cooperative or agribusiness enterprises. A major in Community and Environmental Sociology also provides excellent preparation for careers in international development, law, and further academic work in sociology or other social sciences.

The Department of Community and Environmental Sociology offers a wide range of courses for both beginning and advanced students. The department's introductory course, C&E SOC/SOC 140 Introduction to Community and Environmental Sociology, is designed to explore the changing nature of rural development in the global economy.

UW–Madison Community and Environmental Sociologists teach about a wide range of issues that are of critical importance to people and communities from Wisconsin to the low-income countries of the developing world. For example, students can study such matters as the growing controversies around energy, the implementation of environmental laws, sustainability, and the special problems and unique concerns of people in resource-dependent communities. Students can also focus on issues such as the effect of new agricultural technologies on family farms, the ways gender and race affect educational and occupational opportunities, and how community leaders and citizens address problems such as urban sprawl or rural poverty. In addition, students can examine issues such as population growth, the causes of world hunger, tropical rainforest destruction, and the prospects for achieving sustainable development in poor countries.

Many Community and Environmental Sociology students build on their major by selecting one of the certificate programs available from the College of Agricultural and Life Sciences or from other UW–Madison schools or colleges. Certificate programs enable students to expand their skills and study particular topics or issues in more depth. Community and Environmental (C&E) Sociology majors often choose certificate programs in the concentration in analysis and research, global health, food systems, criminology, and environmental studies. Many students choose to pursue a double major, combining C&E Sociology with fields

such as Spanish, environmental studies, nutritional sciences, agronomy, biology, wildlife ecology, or environmental science. Students have also combined their undergraduate major in C&E Sociology with graduate work in public policy through the La Follette School of Public Affairs accelerated master's of public affairs program.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly,

courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
First Year Seminar (p. 35)		1
International Studies (p. 35)		3
Physical Science Fundamentals		4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CALs Capstone Learning Experience: included in the requirements for each CALs major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Code	Title	Credits
Core		
C&E SOC/SOC 140	Introduction to Community and Environmental Sociology	4
C&E SOC/SOC 475	Classical Sociological Theory	3
C&E SOC/SOC 357	Methods of Sociological Inquiry	3-4
C&E SOC/SOC 360	Statistics for Sociologists I ¹	4
Electives within the Major ²		15
Select 6-9 credits from the Community course set ³		
Select 6-9 credits from the Environment course set ³		
Capstone		
C&E SOC 500	Capstone Experience	3
Total Credits		32-33

¹ We strongly encourage our majors to take C&E SOC/SOC 360 Statistics for Sociologists I, if they have not already taken a statistics course at time of major declaration. Acceptable statistics courses other than C&E SOC/SOC 360 Statistics for Sociologists I are: STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences, ECON 310 Statistics: Measurement in Economics, PSYCH 210 Basic Statistics for Psychology, GEOG 360 Quantitative Methods in Geographical Analysis, and MATH/STAT 310 Introduction to Probability and Mathematical Statistics II. Please note that statistics courses taken outside the major do not count toward the credit requirement in the major.

² Must complete a total of 15 credits of Community and Environment electives. No more than 6 credits may be 100- or 200-level courses. At least 6 credits must be taken in each course set.

³ Consult advisor to request permission to use C&E SOC 299 Independent Study, C&E SOC 399 Coordinative Internship/Cooperative Education, or C&E SOC 699 Special Problems toward the Community or Environmental course sets. No more than 4 such credits may be counted toward the major.

ELECTIVE COURSES WITHIN THE MAJOR COMMUNITY COURSE SET

Code	Title	Credits
C&E SOC/SOC 210	Survey of Sociology	3-4
C&E SOC/SOC 211	The Sociological Enterprise	3
C&E SOC/GEN&WS/SOC 215	Gender and Work in Rural America	3
C&E SOC/SOC 245	Technology and Society	3
C&E SOC/AFROAMER/ANTHRO/GEOG/HISTORY/LACIS/POLI SCI/SOC/SPANISH 260	Latin America: An Introduction	3-4
C&E SOC/SOC 341	Labor in Global Food Systems	3
C&E SOC/SOC 365	Data Management for Social Science Research	3-4
C&E SOC 375	Special Topics	1-4
C&E SOC/POP HLTH/SOC 380	Contemporary Population Problems for Honors	3
C&E SOC/CURRIC/ENVIR ST 405	Education for Sustainable Communities	3
C&E SOC/SOC 532	Health Care Issues for Individuals, Families and Society	3

C&E SOC/SOC 650	Sociology of Agriculture	3
C&E SOC/SOC 693	Practicum in Analysis and Research	3

CREDIT REQUIREMENT

Must complete a total of 30 credits of C&E SOC courses. Students may count up to 4 credits of Independent Study (C&E SOC 299 Independent Study, C&E SOC 699 Special Problems), Internship (C&E SOC 399 Coordinative Internship/Cooperative Education), or Thesis (C&E SOC 681 Senior Honors Thesis/C&E SOC 682 Senior Honors Thesis/C&E SOC 691 Senior Thesis/C&E SOC 692 Senior Thesis) here, with permission of their advisor.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Understand how social science arguments are constructed and evaluated.
2. Develop ability to assess data quality and understand whether particular data is appropriate to answer specific questions.
3. Learn general theories on basic social processes, especially those related to the relationships between society and the environment and the social organization of communities.
4. Learn communication skills in the social sciences.

Total Credits 30

- ¹ Electives should be chosen in order to satisfy university and CALS requirements. See Requirements tab for details.
 - ² C&E SOC electives include the Community course set and the Environmental course set. See Requirements tab for details.
 - ³ Students may take the capstone course either semester of their senior year. The fall semester and spring semester courses may have different content.
- The above plan assumes that a student enters with standard high school preparation (algebra, geometry, third-year math, two years' foreign language).

ADVISING AND CAREERS

Students have access to two advisors once they declare the major. Megan Banaszak advises students on the technical aspects of the major. She helps students plan their class schedule, makes sure they're on schedule to graduate, and discuss general questions about the major. Students will also be assigned a faculty mentor. Faculty mentors can help students find internship opportunities and discuss career aspirations. Prospective students are welcome to contact Megan Banaszak (mbanaszak ([@http://guide.wisc.edu/undergraduate/agricultural-life-sciences/community-environmental-sociology/community-environmental-sociology-bs/mbanaszak@wisc.edu](http://guide.wisc.edu/undergraduate/agricultural-life-sciences/community-environmental-sociology/community-environmental-sociology-bs/mbanaszak@wisc.edu)))@wisc.edu (lmtigges@wisc.edu)) or Professor Randy Stoecker (rstoecker@wisc.edu) for more information.

Community and Environmental Sociology graduates may be employed in nongovernmental organizations (NGOs) that focus on a number of issues surrounding community development, environment, and advocacy, governmental planning or social service agencies, agricultural or environmental organizations, and public health. A major in Community and Environmental Sociology also provides excellent preparation for graduate school and careers in international development, law, public policy and nursing, and further academic work in sociology and other social sciences. In addition, recent graduates have been employed by state and local governments and not-for-profit environmental organizations. Many have gone on to serve communities through Peace Corps, Teach for America, and AmeriCorps, and some have established their own business in food and health-related industries.

WISCONSIN EXPERIENCE

The program excels in offering our majors high-impact experiences that characterize the Wisconsin Experience, from rich capstone courses to varied internships and study abroad experiences.

- Many of our students spend a summer or a semester studying abroad. Some students attend universities in Europe, Latin America, and Asia, while other students participate in a variety of alternative learning experiences. Study abroad programs offer the opportunity to earn credits toward your degree while learning about new cultures, communities, and environments.
- Students also gain experiences outside of the classroom through internships and community-based service learning courses, including certain sections of our capstone course.
- The variety of internships undertaken by our majors is vast but all offer students the opportunity to apply their knowledge to "real world" settings. A list of some of the internship opportunities is provided on our website (<http://dces.wisc.edu/programs/opportunities/possible-internships/>).
- Our majors have opportunities to enhance their research skills by working on a faculty member's research or undertaking a senior thesis project.
- The department offers scholarships for students to conduct research, and to present their results at conferences. Information about scholarships available to undergrads is on the Scholarships (<https://dces.wisc.edu/programs/scholarships/>) page on our website.

FOOD SYSTEMS, CERTIFICATE

The certificate in food systems is an option open to all undergraduate students. It assembles an interdisciplinary curriculum, integrating different paradigms across all aspects of food production, distribution, and consumption, along with the context and values inherent to the systems.

For students in food or agriculture-related majors, the certificate in food systems will provide a broader context to their disciplinary studies. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies.

For students of any discipline, the certificate will help students be more informed consumers and citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental outcomes of different patterns of production, processing, distribution, and consumption.

HOW TO GET IN

Undergraduate students of any major are welcome to pursue the certificate in food systems.

Students are eligible to declare the certificate once they complete one of the three core courses (AGROECOL/AGRONOMY/C&E SOC/ENTOM/ ENVIR ST 103 Agroecology: An Introduction to the Ecology of Food and Agriculture, C&E SOC/A A E/SOC 340 Issues in Food Systems, and DY SCI/AGRONOMY/INTER-AG 471 Food Production Systems and Sustainability) with a grade of B or better. While there are different pathways to complete the certificate, students who declare and plan their coursework earlier in their careers will be in a better position to complete the required coursework.

Students who meet the eligibility criteria should fill out this short questionnaire (https://uwmadison.co1.qualtrics.com/jfe/form/SV_0JPABackGujKA2p/) and then contact Megan Banaszak (mbanaszak@wisc.edu) to declare the certificate.

REQUIREMENTS

The certificate in food systems requires that students take two highly interdisciplinary core courses (6 total credits), and at least one course in each of three thematic elective categories (for 9 total credits across electives), plus a one credit culminating activity such as an internship, independent study, or appropriate capstone. The course list below provides a complete list of courses that satisfy each requirement.

MINIMUM REQUIREMENTS:

- 2.0 GPA in certificate courses
- At least 50% of certificate courses taken in-residence (i.e. at UW-Madison or through a UW-Madison sponsored study abroad program)
- Minimum of 16 credits total

Code	Title	Credits
Core Courses		
Select two of the following:		6-7
AGROECOL/ AGRONOMY/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	
C&E SOC/A A E/ SOC 340	Issues in Food Systems	
DY SCI/ AGRONOMY/ INTER-AG 471	Food Production Systems and Sustainability	
Elective Courses		
Select at least one course from each list: Provisioning, Context, and Values for a total of 9 credits		9
<i>Provisioning (production, processing, distribution)</i>		
AGRONOMY 100	Principles and Practices in Crop Production

Food Systems Culmination Activity ¹	
Select one of the following: 1	
<i>Independent Study</i>	
C&E SOC 299	Independent Study
C&E SOC 699	Special Problems
<i>Food Systems Internship</i>	
C&E SOC 399	Coordinative Internship/Cooperative Education

Total Credits 16-17

¹ Culminating activities must be formally pre-approved and incorporated into an independent study (299) or internship (399) within the Department of Community and Environmental Sociology. Click [HERE](https://uwmadison.co1.qualtrics.com/jfe/form/SV_eaks3WTTYEKj7Xn/) (https://uwmadison.co1.qualtrics.com/jfe/form/SV_eaks3WTTYEKj7Xn/) for more information and a form to request approval of a culminating activity.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Evaluate critically the key elements of a food system.
2. Evaluate critically how political, social, economic, and environmental forces interact to shape food systems.
3. Evaluate critically the biophysical processes inherent in various agricultural production systems.
4. Evaluate critically how individuals from different backgrounds interact with local and global food systems as humans, consumers, producers, and citizens.
5. Evaluate critically the social, economic, and environmental outcomes of different food systems.

ADVISING AND CAREERS

ADVISING

Questions about the certificate may be directed to the advisor, Megan Banaszak (mbanaszak@wisc.edu), or to the Faculty Chair, Michael Bell (michaelbell@wisc.edu).

CAREERS

For students in food or agriculture related majors, the certificate in food systems will provide a broader context to their disciplinary studies. As they seek careers, they will be able to provide evidence of enhancing their disciplinary learning and skills with a broader framework of food system concepts, including ideas for enhancing food system sustainability. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students in any discipline, the certificate in food systems will help them be more informed consumers and better informed citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental consequences of production, processing, distribution, and consumption.

PEOPLE

Faculty across campus teach courses in the certificate. Please use the Guide to seek out information on individual courses.

For general certificate inquiries or questions about the culminating experience, please contact the Faculty Chair, Michael Bell (michaelbell@wisc.edu, 608-265-9930).

For direct advising on curricular requirements, or to declare the certificate, contact Megan Banaszak (mbanaszak@wisc.edu).

WISCONSIN EXPERIENCE

- Integrated, interdisciplinary course work
- Professional development opportunities, including options to intern off campus
- Hands-on culminating experience

ENTOMOLOGY

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insects species—with estimates ranging from 3 to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded humans—sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to

medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, research and extension work, state and federal government service, industry, and research institutes.

Students can complete an undergraduate major in entomology or global health in the Entomology department.

Students interested in graduate work should consult the Graduate Guide (<http://guide.wisc.edu/graduate/>).

ENTOMOLOGY, B.S.

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insects species—with estimates ranging from 3 to 30 million

unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded humans—sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, research and extension work, state and federal government service, industry, and research institutes. Undergraduate students interested in continuing their study of insects through an advanced degree should consult the Graduate Guide (<http://guide.wisc.edu/graduate/>).

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CAL S). For information about becoming a CAL S first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CAL S must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CAL S B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3

MATH 217	Calculus with Algebra and Trigonometry II	
MATH 221	Calculus and Analytic Geometry I	
STAT 371	Introductory Applied Statistics for the Life Sciences	

Chemistry

Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	

Biology

Option 1:

BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
--	---	--

Option 2:

ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102 & BOTANY/ BIOLOGY 130	Animal Biology and Animal Biology Laboratory and General Botany	
--	---	--

Option 3:

BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
--	---	--

Select 12 additional credits from any biological or physical science course (at least 8 credits must be 300-level or 200-level courses with the intermediate-level designation).²

Physics

Select one of the following:		3-5
PHYSICS 103	General Physics	
PHYSICS 107	The Ideas of Modern Physics	
PHYSICS 109	Physics in the Arts	
PHYSICS 115	Energy	
PHYSICS 201	General Physics	
PHYSICS 207	General Physics	

Entomology Core

ENTOM/ZOOLOGY 302	Introduction to Entomology	4
-------------------	----------------------------	---

Select 11 credits as follows: 11

Must select at least 3 credits from at least two subsets (organismal, suborganismal, or applied)

May select up to 3 credits from subset called "other"

Capstone

ENTOM 468	Studies in Field Entomology ³	3
Total Credits		36-43

¹ If MATH 171 is taken, student must take MATH 217.

² Suggested courses/subjects include GENETICS 466, CHEM 341, CHEM 342 CHEM 343, CHEM 344, CHEM 345, PHYSICS 104, PHYSICS 202, PHYSICS 208, ENTOM not used elsewhere, BOTANY, ZOOLOGY, F&W ECOL, MICRO, PL PATH.

³ ENTOM 468, taken after the junior year, is the recommended capstone course (can double count in Core Courses). ENTOM 681 Senior Honors Thesis, ENTOM 682 Senior Honors Thesis, ENTOM 691 Senior Thesis, ENTOM 699 Special Problems can be substituted in special circumstances (and can double count up to 3 credits in Core Category); see advisor.

SUBSET COURSES**ORGANISMAL**

Code	Title	Credits
ENTOM 331	Taxonomy of Mature Insects	4
ENTOM 432	Taxonomy and Bionomics of Immature Insects	4
ENTOM 450	Basic and Applied Insect Ecology ¹	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory (requires enrollment in ENTOM 450) ¹	1
ENTOM 468	Studies in Field Entomology	3
ENTOM/BOTANY/ ZOOLOGY 473	Plant-Insect Interactions	3

The following three courses: 3

ENTOM/ AGRONOMY/ F&W ECOL/ M&ENVTOX 632	Ecotoxicology: The Chemical Players	
ENTOM/ AGRONOMY/ F&W ECOL/ M&ENVTOX 633	Ecotoxicology: Impacts on Individuals	
ENTOM/ AGRONOMY/ F&W ECOL/ M&ENVTOX 634	Ecotoxicology: Impacts on Populations, Communities and Ecosystems	
ENTOM 701	Advanced Taxonomy	3

¹ ENTOM 450 Basic and Applied Insect Ecology and ENTOM 451 Basic and Applied Insect Ecology Laboratory can count toward either the organismal or applied categories, not both

SUBORGANISMAL

Code	Title	Credits
ENTOM 321	Physiology of Insects	3
ENTOM/BOTANY/ PL PATH 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	3

ENTOM 450	Basic and Applied Insect Ecology ¹	3
ENTOM 451	Basic and Applied Insect Ecology Laboratory ¹	1
ENTOM/ F&W ECOL 500	Insects in Forest Ecosystem Function and Management	2

¹ ENTOM 450 Basic and Applied Insect Ecology and ENTOM 451 Basic and Applied Insect Ecology Laboratory can count toward either the organismal or applied categories, not both

OTHER

Code	Title	Credits
ENTOM 375	Special Topics	1-4
ENTOM 399	Coordinative Internship/Cooperative Education	1-8
ENTOM 681	Senior Honors Thesis	2-4
ENTOM 682	Senior Honors Thesis	2-4
ENTOM 691	Senior Thesis	2
ENTOM 699	Special Problems	1-4

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences focusing on insects.
2. Knowledge of laboratory and/or field methodology.
3. Explain and apply scientific methods including designing and conducting experiments and testing hypotheses.

4. Recognize relationships between structure and function at all levels including molecular, cellular, organismal and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physics, and technology to answer biological questions using the scientific method.

FOUR-YEAR PLAN**FOUR-YEAR PLAN****SAMPLE ENTOMOLOGY FOUR-YEAR PLAN****Freshman**

Fall	Credits	Spring	Credits

Breadth Course(s) in Core		3-6 Breadth Course in Core	3
Electives (to reach ~15 credits)		6-9 Electives	6
12-18			15

Total Credits 27-33

- ¹ When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)
- For additional Biological or Physical Science courses students may want to choose from the following depending on interest
- * Health/graduate school: CHEM 343/CHEM 344/CHEM 345, PHYSICS 104 or PHYSICS 207, GENETICS 466, MICROBIO 303/MICROBIO 304, BIOCHEM 501
 - * Ecology: F&W ECOL/ENVIR ST/ZOOLOGY 360, BOTANY/F&W ECOL/ZOOLOGY 460, F&W ECOL 550, ZOOLOGY/ANTHRO/BOTANY 410, BOTANY 400 or BOTANY 401.
 - * Agriculture: PL PATH 300, AGRONOMY 300, SOIL SCI 301

Students may reduce the number of required courses via:

- Testing out of Comm-A
- Using ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology to satisfy Comm-B
- Testing out of Quantitative Reasoning, Part A
- Earning AP/IB credits
- Using ENTOM/ZOOLOGY 371 Medical Entomology for International Course

opportunities and services available to Entomology B.S. students, please visit the CALS Career Services (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) page. Students in the major are welcome to make an individual appointment with their advisor to discuss a number of career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

While entomology clearly is “big science,” our department prides itself on a “small campus” feel in which we get to know our undergraduate students during their time with us.

In the classroom, we strive to maintain labs at not more than 15-20 students to maximize individualized and participatory learning. Students are given additional opportunities for deep and engaged learning experiences through honors options that are generally available for most courses and field and/or lab experiences in many of the upper-level courses.

Very nearly all our majors have opportunities to work alongside our faculty and graduate students in research labs and in the field. Our major accommodates 1–3 credits (of the 15 entomology credits required to major) in the area of directed/independent study and internships to promote extracurricular and outside the traditional classroom learning.

Many of our undergraduate majors are also involved in service learning and teaching through our departmental “Insect Ambassadors (<https://insectambassadors.wiscweb.wisc.edu/>)” outreach program to K–12, various clubs, and organizations. We are committed (<http://labs.russell.wisc.edu/ento/outreach/>) to the UW System goal to provide Wisconsin’s citizens with opportunities to benefit from, and contribute

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN ENTOMOLOGY

Undergraduate students are assigned to the Entomology undergraduate faculty advisor Dr. Dan Young and Allee Hochmuth, the Student Services Coordinator. However, since the vast majority of Entomology B.S. students do independent research during their undergraduate career, it is important to meet with other entomology faculty members (<http://labs.russell.wisc.edu/ento/people/faculty/>) to learn about all of the research possibilities.

Undergraduates in Entomology are strongly urged to meet with their advisor before they enroll for the upcoming term. If you have questions about advising or declaring the major, please contact Allee Hochmuth at abhochmuth@wisc.edu.

For more information about the Entomology B.S. or the department in general, please contact Dr. Dan Young (dkyoung@wisc.edu).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to Entomology students, please visit our Internship & Job Resources (<http://labs.russell.wisc.edu/ento/graduate-study/internships-and-job-resources/>) page. For more information on other academic, co-curricular, financial aid, and career

to, the state's growing "knowledge economy" through the land-grant university three-fold mission of teaching, research, and public service. We also have an active Undergraduate Entomology Society for majors—or any UW–Madison students interested in entomology. Research and internship opportunities are also available in the UW Insect Research Collection (WIRC) (<http://labs.russell.wisc.edu/wirc/>) as well as possible participation in WIRC sponsored collecting expeditions in Wisconsin and around the United States.

GLOBAL HEALTH, B.S.

The Global Health major is a bioscience and public health program in the College of Agriculture and Life Sciences (CALs) at UW–Madison.

Students in the major will study human health and well-being through population-level and planetary health perspectives. The major provides students with a foundation in disease biology and epidemiology, food systems, environmental health, and public health and policy, and also allows students to focus further within their area of interest. The curriculum features introductory coursework in biosciences and social sciences, a set of core courses, a variety of depth courses, and a culminating capstone course. Students are encouraged to complete a global health field experience as part of their major.

Global health is about improving health equitably for all people worldwide. The "global" in global health does not necessarily mean "international," but rather refers to the scope of the issues addressed, spanning geographic and socioeconomic boundaries. A key facet of global health is a focus on disease and illness prevention and addressing root causes of health challenges around the world. Examples of global health issues include infectious disease, inadequate water and sanitation systems, climate change, food insecurity, maternal and child health, and racism in the medical system, to name a few.

The Global Health major fits well with a range of career interests and will benefit students interested in healthcare professions as well as those interested in research or policy careers related to the biological or social science facets of public health.

HOW TO GET IN

PRIMARY MAJOR IN GLOBAL HEALTH

To declare this as the primary major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after beginning their undergraduate studies at UW–Madison (see *Entering the College* (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/#enteringthecollegertext>)). For more information, contact the advisor listed on the Advising and Careers tab.

ADDITIONAL MAJOR IN GLOBAL HEALTH

Current UW–Madison students in other schools and colleges interested in completing an additional ("double") major in Global Health should consult with a global health advisor. Advisor contact information is found on the Advising and Careers tab.

Students cannot earn both the Global Health certificate and the Global Health major. Additionally, students declared in the Global Health major cannot earn the Health and the Humanities certificate.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	
	Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.	
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Describe the current status of health, well-being and sustainability for humans and all life, the environment, and the planet.
2. Compare and contrast health and environmental conditions in the context of local settings and our state with national, international and global settings.
3. Quantify health challenges in terms of the global burden of disease, the human development index, and the metrics associated with the sustainable development goals and the planetary health boundaries.
4. Evaluate the strengths and weaknesses of contemporary initiatives and programs to improve global public health and sustainable systems.
5. Use socioeconomic and political frameworks to characterize health challenges and demonstrate social awareness.
6. Demonstrate interpersonal and communication skills necessary for teamwork and leadership, ethical conduct, cross-cultural collaboration and civic engagement.
7. Use a systems approach to analyze complex relationships related to creating conditions for healthy life, sustainability and survival and describe the challenges and opportunities related to sustainable systems and survival.

ADVISING AND CAREERS

ADVISING

Advising is an essential resource for students in the Global Health Major, and helps students shape their unique Wisconsin Experience and career path by making the most of their time at UW-Madison. Advisors can help students make well-informed decisions about coursework and academics, share strategies for success, support them as they encounter challenges, connect them to resources, and provide information about campus policies and procedures. Students are encouraged to regularly meet with their assigned advisor in the major, which helps ensure that they are aware of opportunities and progressing in their academic and career goals.

Advising is typically done through individual in-person appointments, but advisors in the major are also able to meet with students over the phone or through video conferencing if needed. Quick questions can be answered via email, but an appointment should be scheduled if a conversation is needed. Both declared and undeclared UW students can schedule appointments through the Starfish application in their MyUW page.

CAREERS

The knowledge and skills developed through the Global Health major prepare students for success in a range of career paths. Some graduates may use their global health education to go into a healthcare profession, while others may choose careers as researchers, policy-makers, administrators, non-profit workers, educators, data analysts, and communicators in fields related to public health, epidemiology, environmental health, or international development. The major supports students who intend to go directly into the workforce after graduation, as well as those who intend to further their education through graduate or professional programs.

Because an interest in global health can lead to many different careers, students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and career resources on campus. These resources can help students reflect on their values and goals, identify career paths, and outline strategies for pursuing their goals. UW-Madison has a number of dedicated career resources for undergraduate students, including CALS Career Services, the Career Exploration Center, L&S SuccessWorks, and the Center for Pre-Health Advising.

WISCONSIN EXPERIENCE

Students majoring in Global Health are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research, volunteering (<https://morgridge.wisc.edu/>) and study abroad (<https://www.studyabroad.wisc.edu/>).

The following opportunities can help students connect with other students interested in global health, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- CALS Study Abroad (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>)
- Badger Volunteers (<https://morgridge.wisc.edu/students/badger-volunteers/>)

- CALS Health and Research Society (<https://win.wisc.edu/organization/CHARS> (<https://win.wisc.edu/organization/CHARS/>))
- WISELI (<http://wiseli.engr.wisc.edu/>), Women in Science and Engineering Leadership Institute—a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.

Research/Lab experience: Students are encouraged to get involved in research. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with advisors, instructors, and faculty members.

FOOD SCIENCE

Food science is the application of science and engineering to the production, processing, distribution, preparation, and evaluation of food.

The Department of Food Science at the University of Wisconsin–Madison has been a part of the College of Agricultural and Life Sciences for more than 100 years instructing generations of food science and industry leaders. Housed in the recently remodeled Babcock Hall, the Department of Food Science offers students a truly unique undergraduate and graduate experience. Known for our distinguished and dedicated faculty and staff, students find the Department of Food Science a stimulating and encouraging environment to study and conduct research.

The Department of Food Science’s undergraduate program offers students valuable real-world experience and leadership skills by providing an innovative curriculum; varied club and extracurricular activities; research lab opportunities; access to a fully functional and award winning dairy plant; professional and industry contacts and experience; numerous internships and scholarships, and nearly 100% job placement.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	
	Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.	
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
	CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)	

MAJOR REQUIREMENTS

NUTR SCI/A A E/AGRONOMY/INTER-AG 350 World Hunger and Malnutrition is recommended to fulfill the CALS International Studies requirement.

Code	Title	Credits
Mathematics and Statistics		
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.		
Select one of the following:		5
MATH 217	Calculus with Algebra and Trigonometry II ¹

Biochem/Botany/Microbio/Zoology (Path 1)		
Biocore (Path 2)		
Foundation		
<i>Econ or Ag & Applied Econ</i>		
Select one of the following:		3
A A E 215	Introduction to Agricultural and Applied Economics	
A A E 323	Cooperatives and Alternative Forms of Enterprise Ownership	
ECON 101	Principles of Microeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
Nutritional Science		
NUTR SCI/ BIOCHEM 510	Nutritional Biochemistry and Metabolism	3
or NUTR SCI 332	Human Nutritional Needs	
Core		
FOOD SCI 301	Introduction to the Science and Technology of Food	3
AN SCI/FOOD SCI 321	Food Laws and Regulations	1
FOOD SCI/MICROBIO 324	Food Microbiology Laboratory	2
FOOD SCI/MICROBIO 325	Food Microbiology	3
FOOD SCI 410	Food Chemistry	3
FOOD SCI 412	Food Analysis	4

FOOD SCI 432	Principles of Food Preservation	3
FOOD SCI 440	Principles of Food Engineering	3
FOOD SCI 514	Integrated Food Functionality	4
FOOD SCI 532	Integrated Food Manufacturing	4

Integrated Food Product Elective

Select one of the following (2 credits minimum): 2

FOOD SCI 511	Chemistry and Technology of Dairy Products	
FOOD SCI/ AN SCI 515	Commercial Meat Processing	
FOOD SCI 535	Confectionery Science and Technology	
FOOD SCI 550 & FOOD SCI 551	Fermented Foods and Beverages and Food Fermentation Laboratory	
FOOD SCI 550 & FOOD SCI 552	Fermented Foods and Beverages and Food Fermentation Laboratory: The Science of Wine	

Science Elective

Any 400-level or above course with Physical Science designation 3

Capstone

FOOD SCI 602	Senior Project	2
FOOD SCI 603	Senior Seminar	1

Total Credits 85-92

¹ MATH 217 Calculus with Algebra and Trigonometry II requires MATH 171 Calculus with Algebra and Trigonometry I as a prerequisite.

BIOLOGY PATHS**BIOCHEM/BOTANY/MICROBIO/ZOOLOGY (PATH 1)**

Code	Title	Credits
BIOLOGY/BOTANY/ ZOOLOGY 151	Introductory Biology	5

Select one of the following: 3-5

Any 400-level or above course with Biological Science designation

BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
MICROBIO 101 or MICROBIO 303	General Microbiology Biology of Microorganisms	3
MICROBIO 102 or MICROBIO 304	General Microbiology Laboratory Biology of Microorganisms Laboratory	2
BIOCHEM 501	Introduction to Biochemistry	3

Total Credits 16-18**BIOCORE (PATH 2)**

Code	Title	Credits
BIOCORE 381	Evolution, Ecology, and Genetics	3
BIOCORE 383	Cellular Biology	3
BIOCORE 485	Principles of Physiology	3
BIOCORE 587	Biological Interactions	3

Select two of the following: 4

BIOCORE 382	Evolution, Ecology, and Genetics Laboratory
BIOCORE 384	Cellular Biology Laboratory
BIOCORE 486	Principles of Physiology Laboratory

Total Credits 16**HONORS IN THE MAJOR**

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take FOOD SCI 681 Senior Honors Thesis and FOOD SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Clearly and effectively communicate, both verbally and written, to a diverse range of audiences including technical experts and a lay audience.
2. Apply quantitative problem solving and critical thinking skills in all aspects of food science.
3. Rigorously apply scientific principles and quantitative reasoning to solve food science problems (technical competence).
4. Demonstrate the ability to work both independently and in groups across a wide range of situations.

Total Credits 17-35

- ¹ Students taking CHEM 109 do not take CHEM 104.
- ² MATH 221 will satisfy the Quantitative Reasoning B requirement.
- ³ Electives can be found on the Requirements tab.
- ⁴ Students must select at least one course from FOOD SCI 511 Chemistry and Technology of Dairy Products (spring semester), FOOD SCI/AN SCI 515 Commercial Meat Processing (fall semester), FOOD SCI 535 Confectionery Science and Technology (fall semester), or FOOD SCI 550 Fermented Foods and Beverages (spring semester) and either FOOD SCI 551 Food Fermentation Laboratory (spring semester) or FOOD SCI 552 Food Fermentation Laboratory: The Science of Wine (fall semester).
- ⁵ Students must complete two science elective courses: (1) at least 3 credits of any 400-level or above biological science course or BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology (2) at least 3 credits of any 400-level or above physical science course.
- ⁶ Combination of FOOD SCI 602 Senior Project and FOOD SCI 603 Senior Seminar satisfy Comm B requirement.

Note: Students must complete a minimum of 120 credits. This may require taking 16 credits per semester for at least four semesters.

ADVISING AND CAREERS

Students are assigned a faculty or staff advisor once they declare the major. Advisors are prepared to help with curricular planning and course access; major and degree questions; discussion of independent study and lab research experience; and navigating internship and scholarship opportunities. Declared food science majors must meet with their assigned advisor prior to registration. Additional information

can be found on the department's website (<https://foodsci.wisc.edu/advising.php>).

Prospective food science majors should contact the Department of Food Science at foodsci@wisc.edu or 608-262-3046 for more information.

WISCONSIN EXPERIENCE

Food science students are strongly encouraged to develop leadership skills through a variety of extracurricular experiences.

FOOD SCIENCE CLUB

The highly-acclaimed Food Science Club provides a wide array of activities to its members each year. These activities provide opportunities to develop leadership skills and network with industry professionals and other students.

- **Product Development teams.** Join teams of students who develop new products, from idea conception to manufacture, for submission to national competitions. Our student teams place highly every year, in part because of the extremely supportive culture within the program.
- **Outreach.** Each semester, club members participate in outreach activities (WI Science Festival, Science Expeditions, local school activities, etc.) that promote food science to grade school and high school students. Outreach activities, such as cheese making, Peeps Jousting, gummy bear production, chocolate rheology, flavor and sensory science, and many others, help demonstrate various science principles and generate interest in science among younger students.
- **Fundraising activities.** In order to sponsor club activities, fundraising activities (i.e., selling Babcock ice cream at Taste of Madison, silent auctions at professional meetings, and merchandise sales) are a great way to get involved and develop leadership skills.
- **Food and Health Initiative.** Are you interested in developing healthy food alternatives? This program is for you then. Hear from a variety of experts on various topics of interest, including gluten-free pasta, sugar and health, GMO foods, and many others.
- **Food Systems Initiative.** Food science focuses on converting raw materials into edible food products. But there is so much more to the broader food landscape. This initiative focuses on the wider scope of food systems, investigating how food scientists can interact with food production and social issues related to food.
- **Social activities.** Each month, a fun social activity allows students to mingle in a friendly environment. For example, you can make (and eat) Thanksgiving dinner in November and enjoy chocolate-covered anything at the February social.
- **College Bowl.** Which state has the largest production of ginseng? Questions like this serve as the focal point of College Bowl, a food science trivia competition for both undergraduate and graduate

students. The team competes first in the regional competition, and if successful then moves on to the national competition. Yes, Wisconsin is the largest producer of ginseng in the United States.

- **Company info sessions.** Each club meeting is sponsored by a food company that also gives a brief presentation about itself. Additional info sessions are sponsored on an individual basis. These info sessions provide an opportunity to learn about the range of companies that hire our graduates and are a great opportunity for networking.

SUMMER INTERNSHIPS

Spending a summer working and gaining experience at a food company is a great way to apply classroom learning to the real world. With over 40 companies visiting the program each year, numerous opportunities are available for any student interested in a summer internship. Students spend their summers at companies that include General Mills, Pepsico, Kraft-Heinz, Organic Valley, Dannon, Agropur, Schreiber Cheese, Lindt Chocolate, and many more. These internships are generally paid and many have lodging subsidies.

RESEARCH/WORK EXPERIENCE

Another way to gain practical experience is to work in the building or on campus.

- **Research labs.** Food science faculty welcome undergraduates to gain experience conducting meaningful research in their labs.
- **Babcock Dairy Plant.** Want practical experience in a fully operational dairy plant? Consider signing up for part-time work in the Babcock Dairy Plant gaining experience in a wide range of practical jobs, from quality control to production.
- **Center for Dairy Research (CDR).** Also within Babcock Hall is the internationally-renowned Center for Dairy Research. Students can conduct research, work in the analytical labs or participate on the CDR Sensory Panel to gain invaluable practical experience.
- **Food Research Institute (FRI).** Housed in the Microbial Sciences Building, FRI conducts industry oriented research on a wide range of food safety topics.
- **Meat Lab/Bucky's Butchery.** Interested in meat science? The meat processing facilities within the Animal Sciences Department actually apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.

SCIENCE OF FERMENTED FOOD AND BEVERAGES, CERTIFICATE

The purpose of this certificate program is to provide undergraduates at UW–Madison with an opportunity to gain unique knowledge and skill sets specific to the fermented food and beverage industries. Students that successfully complete this program will graduate with a competitive edge and leadership potential specific to career opportunities in this unique and growing field.

HOW TO GET IN

This certificate is open to all degree-seeking undergraduate students. Students must be over the age of 21 by the time they take the lab requirements (FOOD SCI 551 Food Fermentation Laboratory or

FOOD SCI 552 Food Fermentation Laboratory: The Science of Wine). For more information, or to declare the certificate, contact Monica Theis (mltheis@wisc.edu (<http://guide.wisc.edu/email:mltheis@wisc.edu>)). Students are strongly encouraged to declare the certificate early in their academic career to ensure timely completion of certificate requirements.

REQUIREMENTS

Code	Title	Credits
FOOD SCI 410	Food Chemistry	3
FOOD SCI 550	Fermented Foods and Beverages	2
FOOD SCI 551 or FOOD SCI 552	Food Fermentation Laboratory Food Fermentation Laboratory: The Science of Wine	1
MICROBIO/ FOOD SCI 325	Food Microbiology	3
MICROBIO 450	Diversity, Ecology and Evolution of Microorganisms	3
MICROBIO 526	Physiology of Microorganisms	3
MARKETNG 300	Marketing Management	3
Total Credits		18

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Identify and describe how microbial and chemical features of ingredients and raw materials influence the quality and functionality of fermented foods and beverages.
2. Explain the compositional features of ingredients and raw materials specific to various fermented foods and beverages.
3. Identify and describe the operational units and transformational processes unique to the production of fermented foods and beverages.
4. Design and produce fermented foods and/or beverages that meet specified standards for styles or varieties.
5. Measure and interpret analytics to assess quality and correct defects.
6. Describe the concept of branding and its impact on marketing fermented foods and beverages.

ADVISING AND CAREERS

Babcock Hall Room 127A
1605 Linden Dr, Madison, WI 53706

PEOPLE

Monica Theis, senior lecturer, Food Science
Nick Smith, ecologist and instructor

Victor Ujor, Assistant Professor, Food Science

WISCONSIN EXPERIENCE

The experiences offered through this certificate provide students with a number of opportunities to fulfill the Wisconsin Experience. In addition to 18 credits of rigorous course work with a focus on the science of fermentation, students work directly with local brewers, winemakers and bakers where they can explore innovations in product development, apply their knowledge and help local industries solve problems specific to their craft. Engagement allows for intellectual growth as well as an appreciation for the influence of local culture and values on what makes for "good" food and beverages.

Our industry and campus partners celebrate curiosity and exploration by allowing students to experiment with novel ingredients such as wild yeast, winter hardy grapes and local hops. Most exciting of all, students find that they can make a direct contribution to food and beverage products that are launched into the Wisconsin marketplace.

FOREST AND WILDLIFE ECOLOGY

The Department of Forest and Wildlife Ecology provides science-based teaching that prepares future natural resource professionals to sustainably manage and conserve forests and wildlife. Building on the rich traditions of Aldo Leopold (the department's first chair), we offer students an interdisciplinary environment to learn about the natural world, apply science to management toward sustainable ecological systems, and understand complex human-environment relationships. We offer two undergraduate majors—Forest Science and Wildlife Ecology—that provide opportunities for employment in the public, private, and non-governmental sectors. Students can also gain a strong foundation for graduate training in forestry, wildlife, ecology, and related fields. The Forest Science program is accredited by the Society of American Foresters. The Wildlife Ecology major provides a path to becoming a certified wildlife biologist. Both degrees provide a mix of field, lab, and classroom experiences.

The department also offers graduate programs at the M.S. and Ph.D. levels. See the Graduate Guide (<http://guide.wisc.edu/graduate/>) for additional information.

FOREST SCIENCE, B.S.

Forest ecosystems cover one third of the world's land area and nearly half of Wisconsin. They provide a range of benefits to society including wood and fiber, wildlife habitat, biological diversity, clean water, carbon storage, recreation, beauty, and cultural values. The Department of Forest and Wildlife Ecology trains foresters to sustainably manage forests toward sustainable ecological, social, and economic outcomes. Forest science students also learn how to respond to forest disturbances from insects, diseases, fire, and other changes. Beyond a core of basic science and forestry coursework, students have flexibility to customize their learning experience within one of three tracks: forest conservation, forests and the environment, and forest management. All three tracks meet accreditation standards of the Society of American Foresters, a key credential that employers seek. Students are also well positioned to pursue graduate training in forestry, ecology, remote-sensing, natural resource policy, and related fields.

Students learn through a mix of classroom, laboratory, and field instruction that emphasizes independent thinking and problem-solving. Students make frequent visits to forests to develop and hone their skills, essential for future job opportunities. Students also engage professional and student-led trainings and networking that further build skills. Graduates go on to jobs in private, public, and non-governmental sectors or pursue graduate degrees.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option

to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5

CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
Biological Science		5
Additional Science (Biological, Physical, or Natural)		3
Science Breadth (Biological, Physical, Natural, or Social)		3
CAL S Capstone Learning Experience: included in the requirements for each CAL S major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Code	Title	Credits
Select one of the following (or may be satisfied by placement exam):		5-6

MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	

Select one of the following: 3

STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	

Chemistry

Select one of the following: 4-5

CHEM 103	General Chemistry I	
CHEM 108	Chemistry in Our World	
CHEM 109	Advanced General Chemistry	

Biology

Select one of the following options: 10

Option 1 (recommended introduction to biology sequence):

BOTANY/ BIOLOGY 130 & ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	General Botany and Animal Biology and Animal Biology Laboratory	
---	---	--

Option 2:

BIOLOGY/ BOTANY/ ZOOLOGY 151 & BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology and Introductory Biology	
---	---	--

Option 3:

BIOCORE 381 & BIOCORE 382 & BIOCORE 383 & BIOCORE 384	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory and Cellular Biology and Cellular Biology Laboratory	
---	---	--

Economics

A A E 215	Introduction to Agricultural and Applied Economics ¹	4
or ECON 101	Principles of Microeconomics	

Conservation

Select one of the following:² 2-4

ENVIR ST/ LAND ARC 361	Wetlands Ecology	
F&W ECOL/ ENVIR ST/ ZOOLOGY 360	Extinction of Species (recommended) ³	
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	
F&W ECOL/ BOTANY/ ENVIR ST/ ZOOLOGY 651	Conservation Biology (recommended)	
GEOG/ ENVIR ST 339	Environmental Conservation	

Core

Grade of C or better required in each core course

SOIL SCI 301	General Soil Science	4
F&W ECOL 300	Forest Biometry	4
GEOG/CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems	3-4
or F&W ECOL/ ENVIR ST/G L E/ GEOG/GEOSCI/ LAND ARC 371	Introduction to Environmental Remote Sensing	

F&W ECOL/ HORT/LAND ARC/ PL PATH 309	Diseases of Trees and Shrubs	3
F&W ECOL 399	Coordinative Internship/Cooperative Education	1-8

BOTANY/F&W ECOL 402	Dendrology	2
---------------------	------------	---

F&W ECOL 410 & F&W ECOL 411	Principles of Silviculture and Practices of Silviculture	4
-----------------------------	--	---

F&W ECOL 415	Tree Physiology	3
--------------	-----------------	---

F&W ECOL/ ENTOM 500	Insects in Forest Ecosystem Function and Management	2
---------------------	---	---

F&W ECOL 501	Forest Fire Behavior and Management	1
--------------	-------------------------------------	---

ENVIR ST/F&W ECOL 515	Natural Resources Policy	3
-----------------------	--------------------------	---

F&W ECOL 550 & F&W ECOL 551	Forest Ecology and Forest Ecology Lab	4
-----------------------------	---------------------------------------	---

A A E/ENVIR ST/F&W ECOL 652	Decision Methods for Natural Resource Managers	4
-----------------------------	--	---

F&W ECOL 658	Forest Resources Practicum	3
--------------	----------------------------	---

Electives

Select one of the following tracks: 12

Forest Management Track

Forest Conservation Track

Forests & Environment Track

Capstone

Grade of C or better required in Capstone

F&W ECOL 590	Integrated Resource Management	3
--------------	--------------------------------	---

Total Credits 84-96

- ¹ A A E 215 only carries QR-B credit if taken fall 2011 or later.
² These courses may double count as track electives.
³ F&W ECOL/ENVIR ST/ZOOLOGY 360 Extinction of Species may also fulfill CALS International Studies requirement.

MINIMUM GRADE REQUIREMENT

Students who declare the major in fall 2012 or later will be required to receive a grade of C or higher on all of the Forest Science Core courses and the Capstone. Students who receive a grade of D or below will be required to retake the course for graduation.

TRACKS

FOREST MANAGEMENT TRACK

Code	Title	Credits
Select 12 credits from any of the following courses:		12

Soils and Landscapes:

F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology	
GEOG 329	Landforms and Landscapes of North America	
SOIL SCI 325	Soils and Landscapes	
SOIL SCI/ F&W ECOL 451	Environmental Biogeochemistry	

Economics and Business:

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take F&W ECOL 681 Senior Honors Thesis and F&W ECOL 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

14. (Forest Resources Measurement and Management) Understanding of the administration, ownership, and organization of forest management enterprises.
15. (Forest Resource Policy, Economics, and Administration) Understanding of forest policy and the processes by which it is developed.
16. (Forest Resource Policy, Economics, and Administration) Understanding of how federal, state, and local laws and regulations govern the practice of forestry.
17. (Forest Resource Policy, Economics, and Administration) Ability to understand the integration of technical, financial, human resources, and legal aspects of public and private enterprises.

LEARNING OUTCOMES

1. (Ecology) Understanding of taxonomy and ability to identify forest and other tree species, their distribution, and associated vegetation and wildlife.
2. (Ecology) Understanding of soil properties and processes, hydrology, water quality, and watershed functions.
3. (Ecology) Understanding of ecological concepts and principles including the structure and function of ecosystems, plant and animal communities, competition, diversity, population dynamics, succession, disturbance, and nutrient cycling.
4. (Ecology) Ability to make ecosystem, forest, and stand assessments.
5. (Ecology) Understanding of tree physiology and the effects of climate, fire, pollutants, moisture, nutrients, genetics, insects and diseases on tree and forest health and productivity.
6. (Forest Resources Measurement and Management) Ability to identify and measure land areas and conduct spatial analysis.
7. (Forest Resources Measurement and Management) Ability to design and implement comprehensive inventories that meet specific objectives using appropriate sampling methods and units of measurement.
8. (Forest Resources Measurement and Management) Ability to analyze inventory data and project future forest, stand, and tree conditions.
9. (Forest Resources Measurement and Management) Ability to develop and apply silvicultural prescriptions appropriate to management objectives, including methods of establishing and influencing the composition, growth, and quality of forests, and understand the impacts of those prescriptions.
10. (Forest Resources Measurement and Management) Ability to analyze the economic, environmental, and social consequences of forest resource management strategies and decisions.
11. (Forest Resources Measurement and Management) Ability to develop management plans with specific multiple objectives and constraints.
12. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market forces, processing systems, transportation and harvesting activities that translate human demands for timber-based and other consumable forest products into the availability of those products.
13. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market, and non-market forces that avail humans the opportunities to enjoy non-consumptive products and services of forests.

	14-16		16

Total Credits 30-32

- ¹ When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)
- ² BOTANY/BIOLOGY 130 + ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102 are strongly recommended to satisfy the introductory biology requirement for forest science, but students may use ZOOLOGY/BIOLOGY 101 & ZOOLOGY/BIOLOGY 102.
- ³ F&W ECOL/ENVIR ST/G L E/GEORG/GEOSCI/LAND ARC 371 is available in fall semesters only.
- ⁴ Summer (following second or third year): F&W ECOL 658 (3 cr., even-numbered summers) and F&W ECOL 399 (1 cr.)—4 cr. total. Students may reduce the number of required courses via: testing out of Comm-A; using ZOOLOGY/BIOLOGY/BOTANY 152 to satisfy Comm-B; testing out of Quantitative Reasoning, Part A; earning AP/IB credits; and/or using F&W ECOL/ENVIR ST/ZOOLOGY 360 to satisfy International Studies requirement.

ADVISING AND CAREERS**UNDERGRADUATE ADVISING IN FOREST SCIENCE**

All undergraduate students in forest science are assigned to an advisor when they declare the major. Students in the forest science major are required to meet with their advisor before they can enroll for the upcoming term. Undergraduate students are assigned to a faculty advisor and Allee Hochmuth, the Student Services Coordinator. If you have questions about advising or declaring the major, please contact Allee Hochmuth at abhochmuth@wisc.edu.

For more information about the forest science B.S. or the department in general, please contact Dr. Adena Rissman (adena.rissman@wisc.edu).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to forest science and wildlife ecology students, please visit our Internship & Job Resources page (<https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources/>). For more information on other academic, co-curricular, financial aid, and career opportunities and services available to forest science B.S. students, please visit the CALS Career Services page (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>). Students in the major are welcome to make an individual appointment with their advisor to discuss a number of career-related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

The federal Bureau of Labor Statistics updated its Career Outlook: Careers in Forestry (<http://www.bls.gov/careeroutlook/2016/article/forestry-careers.htm>) page in August 2016 and it gives a great overview of the types of jobs related to forestry. This website is an excellent way to learn more about careers in forestry, upcoming trends, and related careers.

WISCONSIN EXPERIENCE

FORESTRY FIELD CAMP AT THE KEMP NATURAL RESOURCES STATION

F&W ECOL 658 Forest Resources Practicum is an intensive, three-week field course conducted in even-numbered years at the Kemp Natural Resources Station (<http://www.kemp.wisc.edu/>) in Woodruff, Wisconsin. Affectionately known as Forestry Camp, F&W ECOL 658 Forest Resources Practicum introduces students to the complexities of forest ecosystems. Through a series of integrated exercises, students learn firsthand about forest ecosystem structure, function, processes, and services. Along the way students develop the knowledge necessary to conduct a comprehensive forest resource assessment. Subject areas include: basic field skills, plant identification, GPS & GIS, timber cruising, forest soils, wildlife identification and survey methods, forest ecology, and forest habitat classification. Forestry Camp also provides students with opportunities to work closely with faculty and “real world” natural resource professionals in a beautiful north woods setting.

INTERNSHIPS

All forest science students are required to complete either an internship or professional work experience for their degree. Students are encouraged to talk to their advisor about internship possibilities and departmental internship policies. In order to receive credit for an internship for the forest science major, students must find an internship and have it approved by their advisor. Students who have questions about the internship can also talk to Allee Hochmuth, the student services coordinator.

FORESTRY CLUB

Forest science undergraduates have an active student organization called the Forestry Club. For more information on the club and their activities, please see their Facebook Page (<http://go.wisc.edu/pq634x/>).

ACCREDITATION

Accreditation

Society of American Foresters (<https://www.eforester.org/>)

Accreditation status: Accredited. Next accreditation review: 2027.

WILDLIFE ECOLOGY, B.S.

Wildlife ecologists apply science to manage and conserve wildlife populations and their habitats. The Department of Forest and Wildlife Ecology trains wildlife ecologists and managers to meet the complex needs of wildlife in a human-dominated world. Students receive training in species ecology, physiology and habitat management, techniques of monitoring species, and conservation, through a curriculum solidly grounded in the natural sciences. Beyond a core of basic science and wildlife coursework, students have flexibility to customize their learning experience within one of two tracks: natural sciences and natural resources. The natural sciences track includes coursework that will qualify a student for certification as a wildlife biologist by The Wildlife Society.

Students learn through a mix of classroom, laboratory, and field instruction that emphasize independent thinking and problem-solving.

Students make frequent visits to the field to develop and hone their skills, essential for future jobs or graduate work. There is intense competition for career openings in the wildlife field. Most opportunities are with state and federal agencies, but options also exist with private conservation groups and educational institutions. To be most competitive for limited job opportunities, students should pursue a master's degree.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly,

courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain basic principles in biological sciences and major concepts in wildlife ecology including, population ecology, organismal biology, plant ecology/taxonomy, and genetics/evolution.
2. Explain and discuss principles of wildlife management including natural resource legislation, policy, and applications.
3. Explain and apply the scientific methods including designing and conducting experiments and testing hypotheses.
4. Explain and demonstrate techniques for collection of data in laboratory and field settings, keep accurate records, and analyze data to address hypotheses.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form. Provide opportunity to develop these communication skills.

ADVISING AND CAREERS

UNDERGRADUATE ADVISING IN WILDLIFE ECOLOGY

All undergraduate students are assigned to an advisor when they declare the major. Students in the wildlife ecology major are required to meet with their advisor before they can enroll for the upcoming term. Undergraduate students are assigned to a faculty advisor and Allee Hochmuth, the Student Services Coordinator. If you have questions about advising or declaring the major, please contact Allee Hochmuth at abhochmuth@wisc.edu.

For more information about the wildlife ecology B.S. or the department in general, please contact Dr. Anna Pidgeon (apidgeon@wisc.edu).

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to forest and wildlife ecology students please visit our Internship & Job Resources (<https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources/>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to forest and wildlife ecology students, please visit the CALS Career Services page (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>). Students in the major are welcome to make an individual appointment with their advisor to discuss a number of career-related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

WILDLIFE ECOLOGY SUMMER FIELD CAMP AT KEMP NATURAL RESOURCES STATION

Every other summer, wildlife ecology students have the option of participating in the Wildlife Ecology Summer Field Camp at Kemp Natural Resources Station (<http://www.kemp.wisc.edu/>) in northern Wisconsin as F&W ECOL 424 Wildlife Ecology Summer Field Practicum. The two-week field class emphasizes research and habitat management techniques through individual and group field work, tours, demonstrations, and lectures. Transportation and lodging are provided to the participants.

INDEPENDENT STUDY CAPSTONE

The majority of wildlife ecology majors complete one of the two capstone courses (F&W ECOL 577 Complexity and Conservation of White-tailed Deer or F&W ECOL 599 Wildlife Research Capstone), but students also have the option of completing an independent study capstone, typically F&W ECOL 699 Special Problems.

INTERNSHIPS

Even though it is not required for graduation, wildlife ecology students often elect to do a summer internship to gain additional skills. Students are encouraged to talk to their advisor about internship possibilities and departmental internship policies.

THE WILDLIFE SOCIETY

There is a UW–Madison chapter of the Wildlife Society. For more information on the society please visit the Wildlife Society University of Wisconsin–Madison Student Chapter website or its Facebook Page (<http://go.wisc.edu/toat54/>).

GENETICS

This department offers an undergraduate major under the bachelor of science degree program. Genetics and genomics is a bachelor's program for students seeking to understand how genes shape life, from fundamental cellular functions to population dynamics, and for students preparing to apply genetic and genomic concepts in such areas as medicine, biotechnology, biomedical research, agriculture, journalism, and public policy.

Advances in genome sequencing, bioinformatics, and our ability to manipulate the DNA of many organisms, including humans, have brought genetics to the forefront of many issues facing our society. These advances drive the growing need for health care providers, scientists and other professionals with a strong foundation in genetic and genomic analysis. Through coursework and diverse research opportunities, genetics and genomics majors gain broad insight into inheritance, gene function, genome organization, evolution, cutting-edge genetic technologies and therapies, and more.

A B.S. degree with a major in genetics and genomics positions students for many jobs in the biotechnology industry. Genetics and genomics majors are well prepared to pursue research-focused Ph.D. programs that provide further training for careers in biomedical and agricultural research. Genetics and genomics majors are highly competitive for admission to top medical schools, where there is a growing focus on personalized medicine, and genetic counseling programs.

GENETICS AND GENOMICS, B.S.

Genetics and genomics is a bachelor's program for students seeking to understand how genes shape life, from fundamental cellular functions to population dynamics, and for students preparing to apply genetic and

genomic concepts in such areas as medicine, biotechnology, biomedical research, agriculture, journalism, and public policy.

Advances in genome sequencing, bioinformatics, and our ability to manipulate the DNA of many organisms, including humans, have brought genetics to the forefront of many issues facing our society. These advances drive the growing need for health care providers, scientists and other professionals with a strong foundation in genetic and genomic analysis. Through coursework and diverse research opportunities, genetics and genomics majors gain broad insight into inheritance, gene function, genome organization, evolution, cutting-edge genetic technologies and therapies, and more.

A B.S. degree with a major in genetics and genomics positions students for many jobs in the biotechnology industry. Genetics and genomics majors are well prepared to pursue research-focused Ph.D. programs that provide further training for careers in biomedical and agricultural research. Genetics and genomics majors are highly competitive for admission to top medical schools, where there is a growing focus on personalized medicine, and genetic counseling programs.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

See course list below

Capstone

Select one of the following: 3-9

Option 1:

GENETICS/ BIOLOGY 522	Communicating Evolutionary Biology (Three-credit version only) ⁴
-----------------------	---

Option 2:

GENETICS 527	Developmental Genetics for Conservation and Regeneration (offered in fall semester) ⁴
--------------	--

Option 3:

GENETICS 566	Advanced Genetics (offered in spring semester)
--------------	--

Option 4:

GENETICS 564	Genomics and Proteomics (offered in spring semester) ⁴
--------------	---

Option 5 (must be taken concurrently):

GENETICS 699	Special Problems (offered in fall semester)
GENETICS 567	Companion Research Seminar (offered in fall semester)

Option 6 (must be taken concurrently):

GENETICS 681	Senior Honors Thesis
GENETICS 682	Senior Honors Thesis
GENETICS 567	Companion Research Seminar (offered in fall semester)

Total Credits 65-83

¹ If BIOCHEM 507 is taken, it must be taken as a part of BIOCHEM 507 General Biochemistry I & BIOCHEM 508 General Biochemistry II, which counts as Genetics Breadth requirement.

² Additional Depth course will not count toward the 9-credit Genetics Depth requirement.

³ Consult with your advisor if genetics-related research will be performed in a department other than Genetics.

⁴ May count for Genetics Depth or Capstone, but not both.

GENETICS DEPTH & BREADTH COURSES

DEPTH

Code	Title	Credits
GENETICS 520	Neurogenetics	3
GENETICS/ BIOLOGY 522	Communicating Evolutionary Biology	2-3
GENETICS 525	Epigenetics	3
GENETICS 527	Developmental Genetics for Conservation and Regeneration	3
GENETICS 528	Banking Animal Biodiversity. International Field Study in Costa Rica	1
GENETICS 548	The Genomic Revolution	3
GENETICS/HORT 550	Molecular Approaches for Potential Crop Improvement	3
GENETICS/ MD GENET/ ZOOLOGY 562	Human Cytogenetics	2

AN SCI/DY SCI 363	Principles of Animal Breeding	2
HORT/PATH-BIO 500	Molecular Biology Techniques	3
PL PATH/BOTANY/ ENTOM 505	Plant-Microbe Interactions: Molecular and Ecological Aspects	3
Computational Biology:		
B M I/COMP SCI 576	Introduction to Bioinformatics	3

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Analyze the transmission of genes and chromosomes between cells during cell division and within pedigrees over generations.
2. Demonstrate a deep understanding of how information encoded in DNA can be mutated, epigenetically modified, transcribed into RNA, and translated for protein production, enabling this information to orchestrate the activities of cells singly or collectively throughout development in multicellular organisms.
3. Predict the impact of the forces of mutation, natural selection, chance, and genetic recombination on the amount of genetic variation in populations at the DNA and phenotypic levels using quantitative models.
4. Formulate research questions about the genetic control of biological processes and design experiments to answer these questions using appropriate genetic tools including model organisms.
5. Demonstrate team-work, interpersonal and problem-solving skills to address societal, ethical and scientific issues related to genetics, and communicate their findings through written, oral and multi-media reports.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE GENETICS AND GENOMICS FOUR YEAR PLAN

Freshman

Fall	Credits	Spring	Credits
CHEM 103 or 109		4-5 CHEM 104 (or elective course)	5
MATH 221 (or math placement)		5 International Studies	3
GENETICS 155 (Freshman Seminar)		1 COMM A Course (if needed)	3

Electives (Humanities, Social Science, Ethnic Studies)	3 Electives (Humanities, Social Science, Ethnic Studies)	3
13-14		14

Total Credits 27-28**Sophomore**

Fall	Credits	Spring	Credits
CHEM 343 or 341		3 CHEM 345 (if CHEM 343 completed)	3
ZOOLOGY/BIOLOGY/BOTANY 151 ¹		5 ZOOLOGY/BIOLOGY/BOTANY 152 ²	5
STAT 371 or 301		3 Electives (Humanities, Social Science, Ethnic Studies)	5
Electives (Humanities, Social Science, Ethnic Studies)		3 GENETICS 299 (Independent Research)	2
14		15	

Total Credits 29**Junior**

Fall	Credits	Spring	Credits
PHYSICS 103, 207, or 201 ³		4-5 PHYSICS 104, 208, or 202 ³	4-5
GENETICS 467 or 466 (& BIOCORE 485 if applicable)		3 GENETICS 468 (or Genetics Depth elective & BIOCORE 587 if applicable)	3
BIOCHEM 501 or 507		3 BIOCHEM 508 (or elective)	3
Electives		5 Genetics Breadth/Depth	6
15-16		16-17	

Total Credits 31-33**Senior**

Fall	Credits	Spring	Credits
Genetics Breadth/Depth		6 Genetics Breadth/Depth	3
Senior Thesis (681-Research) ⁴		2-3 Senior Thesis (682-Research) ⁴	2-3
Electives (Humanities, Social Sciences)		3 Genetics Capstone	3
Electives		6 Electives	6
17-18		14-15	

Total Credits 31-33

¹ Instead of BIOLOGY/BOTANY/ZOOLOGY 151 Introductory Biology, students can take either (BIOCORE 381 Evolution, Ecology, and Genetics & BIOCORE 382 Evolution, Ecology, and Genetics Laboratory) or (ZOOLOGY/BIOLOGY 101 Animal Biology & ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory).

² Instead of BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology, students can take either (BIOCORE 383 Cellular Biology & BIOCORE 384 Cellular Biology Laboratory) or BOTANY/BIOLOGY 130 General Botany.

³ Physics could be taken in Sophomore year (consult your advisor).

⁴ If in CALS Honors in Research.

Notes:

- 120 total credits required for bachelor's degree—aim for 15 credits per semester.
- Students who have not maintained a GPA of at least 2.5 by the end of their first two years, or transfer students by the end of their first year in residence, need to evaluate their major and career options with an advisor.
- Freshmen are recommended to take GENETICS 155 Freshman Seminar in Genetics, 1-credit freshman seminar course offered in the fall to fulfill the first year seminar requirement.
- Study Abroad is an enriching experience. Check with your advisor on how you can fulfill your curriculum and study abroad.
- UGA (Undergraduate Genetics Association): check out the club's website: [facebook.com/groups/UGA.UWMadison](https://www.facebook.com/groups/UGA.UWMadison/) (<https://www.facebook.com/groups/UGA.UWMadison/>)

ADVISING AND CAREERS**UNDERGRADUATE ADVISORS**

Tilman, Kit; Vermillion Kalmon, Katie; Loewen, Carin; Foley, Lauren

Students should make advising appointments through the Starfish App on MyUW.

CAREERS

The biotechnology industry has exploded within the last decade, providing many diverse career opportunities for our graduates. A strong background in genetics will prepare you for careers in research technical support, technical writing, quality control, assay development, technical services, and sales or marketing. Entry level job titles: Research Laboratory Technician, Assistant Scientist, Clinical Research Associate, Agricultural Consultant, Science Writer

Many of our graduates continue their education by pursuing an advanced degree. Our students are competitive for admission to medical schools, veterinary schools, and graduate schools throughout the country. Students may elect a Ph.D. in genetics to prepare them for careers in research, academia, and industry. Others may elect an M.S. program for a career in genetics counseling.

PEOPLE**PROFESSORS**

Pelegri, Francisco (chair); Gasch, Audrey; Ikeda, Aki; Doebly, John; Masson, Patrick; Payseur, Bret; Perna, Nicole; Prolla, Tom; Schwartz, David; Skop, Ahna; Wassarman, David; Yin, Jerry

ASSOCIATE PROFESSORS

Chang, Qiang; Hittinger, Chris; Pool, John

ASSISTANT PROFESSORS

Brunkard, Jake; Richardson, Claire; Schroedi, Steven; Sharp, Nathaniel; Werling, Donna; Zhong, Xuehua

FACULTY ASSOCIATES;

Tilman, Kit; Vermillion Kalmon, Katie; Loewen, Carin

UNDERGRADUATE ADVISORS

Tilman, Kit; Vermillion Kalmon, Katie; Loewen, Carin; Foley, Lauren

WISCONSIN EXPERIENCE

Students are highly encouraged to apply what they are learning in the classroom to out-of-classroom experiences, connect with other students in genetics and other biological science majors, and to build relationships with faculty and staff.

- A minimum of one semester of mentored research is required, and most students elect to participate in more. The Genetics website (<https://genetics.wisc.edu/>) and undergraduate advisors can help students find these experiences. Students conduct research experiences for course credit or pay, depending on the lab. Many students present their work during lab meetings, professional conferences, and campus events.
- The Undergraduate Genetics Association (UGA) (<https://www.facebook.com/groups/UGA.UWMadison/>) is the pre-professional student organization for majors in genetics or students interested in genetics. They provide professional development opportunities, networking, information about current genetic research, how to get involved in research or internships, and career and job information.
- Students are also involved in pre-health organizations, volunteer and shadowing opportunities, publishing in an undergraduate science journal, biotechnology and agricultural internships, and other related experiences on and off campus.

HORTICULTURE

The Department of Horticulture at the University of Wisconsin–Madison is one of the four original departments of the College of Agricultural and Life Sciences and was founded in 1889. The department provides programs that are focused on fundamental studies of plant biology, crop production, and utilization of horticultural crops. It also seeks to provide educational opportunities for the pursuit of careers in horticulture, strengthen the competitive position of Wisconsin's horticulture industry, and increase the use of plants for environmental improvement and as a source of personal enrichment. The work of department faculty, staff, and students has made substantial impacts in the state and nation for over 125 years and continues to do so.

The department prides itself on cutting-edge research focusing on horticultural plants, solving problems for our horticultural industry partners and farmers, helping students gain key experiences in research and outreach during their degree programs, and serving both the State of Wisconsin and the broader scientific community through the generation of new knowledge, techniques, and discoveries that can benefit society.

The department maintains a vibrant undergraduate major. Innovative ideas have been generated from among our undergraduates, including the Campus Food Shed (<https://campusfoodshed.wordpress.com/>), a program to redistribute unused produce from nearby farms to the campus community free of charge. Instruction is offered in all of the primary areas of horticulture and additional coursework is available in a number of subjects including molecular biology and bioinformatics. Approximately \$25,000 in scholarship funds are available annually to undergraduate students in the department each year. The department's graduate program offers both M.S. and Ph.D. degrees in a variety of specialties. Many graduate students advised by horticulture faculty also pursue graduate degrees in programs such as plant breeding and plant genetics, cell and molecular biology, and agroecology. The department

has also recently created a new M.S. program that has an emphasis in organic and sustainable production. The department offers some unique international opportunities in Costa Rica and other Central American countries that focus on tropical horticulture.

The Department of Horticulture is home to a number of successful outreach programs that serve the citizens, public sector, and businesses of the State of Wisconsin. These include the Nutrient and Pest Management Program, the Integrated Pest and Crop Management Program, the Crop Diagnostic Training program, the IR-4 program, the Master Gardener Program, and the Allen Centennial Gardens. In addition to these activities, faculty and staff are active in field days, Extension programs, courses, seminars, and webinars, and author newsletters and other media that are distributed statewide.

RESOURCES AND SCHOLARSHIPS

SCHOLARSHIPS

The Department of Horticulture offers several departmental scholarships (<https://horticulture.wisc.edu/academics/undergraduate-program/scholarships-and-awards/>) that students can apply for through the CALS Scholarship Application (<https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/>). The application opens at the beginning of November and remains open until the beginning of February each academic year. Students only need to fill out one single application to be considered for all CALS scholarships.

FACILITIES

Several important supporting facilities are associated with the Department of Horticulture, including:

- Allen Centennial Garden (<https://allencentennialgarden.org/>)
- D.C. Smith Greenhouse (<http://dcsmithgreenhouse.cals.wisc.edu/>)
- Arlington Horticulture Farms (<http://arlington.ars.wisc.edu/>)
- U.S. Potato Genebank (<https://www.ars-grin.gov/nr6/>)
- O.J. Noer Turfgrass Center (<http://ojnoer.ars.wisc.edu/>)
- Longenecker Gardens (<https://arboretum.wisc.edu/>)

HORTICULTURE, B.S.

Horticulturists work to enrich our lives by integrating and applying plant science, environmental science, molecular biology, biotechnology, genetics, physiology, and management. Specifically, horticultural science deals with the development, production, growth, distribution, and use of fruits, vegetables, greenhouse crops, ornamentals, turf, and specialty plant crops (used for flavoring and medicine). Horticultural science is one of the most diverse biological sciences one can study at a university. Not only are the biology and genetics of crop plants interesting, but the application of this knowledge is equally important in a myriad of situations. Undergraduate horticulture majors will obtain specialized training in greenhouse/field management and the production and use of fruits, vegetables, nuts, and herbaceous/woody ornamentals through the bachelor of science degree program.

In addition to obtaining a job with an undergraduate degree in horticulture, the major provides an excellent background for graduate study in the field of plant sciences. Areas of graduate study include plant breeding and plant genetics, horticulture, agronomy, plant pathology, or other related fields such as biology, environmental science, natural resource management, agroecology, and genetics.

Students with either undergraduate or graduate degrees in horticulture have a variety of career opportunities. Recent studies show that there are more jobs in agriculture in the US than there are students graduating with agricultural bachelor of science degrees to fill them. Estimates in 2015 showed that there were 57,900 job openings in agriculture and related fields and only 35,400 students graduating annually in those areas. As our world grapples with the need to contribute science-based solutions to feeding 9 billion people by 2050, students trained in the agricultural and horticultural sciences will be called on to contribute.

Horticulture graduates may find opportunities in working on developing higher yielding crops or crops that can withstand more stressful growing conditions. Others may find opportunities working on improving qualities such as flavor, appearance, texture, and postharvest shelf life for a wide range of horticultural commodities from fruits to vegetables to flowers. Sustainable production is a particular area of growth where horticultural expertise can make a contribution. Students may wish to read a recent report from the United States Department of Agriculture and Purdue University (<https://www.purdue.edu/usda/employment/wp-content/uploads/2015/04/2-Page-USDA-Employ.pdf>) on the subject of employment opportunities in this area.

The horticulture degree serves as excellent preparation for careers in food production, plant nurseries, community supported agriculture (CSA), public gardens, landscaping, greenhouse production, teaching, public parks, vegetable fields, golf courses, urban agriculture, extension- and community-based educational work, work in research labs, and the health sciences. In addition, many horticultural science majors go on to work in public sector jobs including city and state positions with the Department of Natural Resources, the Wisconsin Department of Agriculture, and University of Wisconsin Division of Extension. Students with degrees in horticulture also work in hospitals (horticultural therapy), aerospace (food and recycling in space labs), and zoos (managing environments for animals and visitors). Although the career opportunities are numerous, horticulture students have a common desire to work intensively with plants to improve our environment and our health.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		5-6
	MATH 112 Algebra & MATH 113 and Trigonometry	
	MATH 114 Algebra and Trigonometry	
	MATH 171 Calculus with Algebra and Trigonometry I ¹	
Select one of the following:		3-5
	MATH 211 Calculus	
	MATH 217 Calculus with Algebra and Trigonometry II ¹	
	MATH 221 Calculus and Analytic Geometry 1	
	MATH 222 Calculus and Analytic Geometry 2	
	STAT 301 Introduction to Statistical Methods	
	STAT 371 Introductory Applied Statistics for the Life Sciences	
	COMP SCI 300 Programming II	
Chemistry		
Select one of the following:		5-9
	CHEM 103 General Chemistry I & CHEM 104 and General Chemistry II	
	CHEM 109 Advanced General Chemistry	
Biology		
Select one of the following options:		10-12

Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 383	Cellular Biology	
And select two of the following:		
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 384	Cellular Biology Laboratory	
BIOCORE 486	Principles of Physiology Laboratory	
Agricultural Breadth		
ENTOM/ ZOOLOGY 302	Introduction to Entomology	3-4
	or ENTOM 351 Principles of Economic Entomology	
GENETICS 466	Principles of Genetics	3
Select one of the following:		3-4
BOTANY 300	Plant Anatomy	
BOTANY 305	Plant Morphology and Evolution	
BOTANY 500	Plant Physiology	
PL PATH 300	Introduction to Plant Pathology	3-4
	or PL PATH/ F&W ECOL/HORT/ LAND ARC 309 Diseases of Trees and Shrubs	
SOIL SCI 301	General Soil Science	4
Horticultural Core		
HORT 120	Survey of Horticulture	3
HORT 121	Horticulture Colloquium	1
HORT 227	Propagation of Horticultural Plants	3
HORT 320	Environment of Horticultural Plants	3
HORT/AGRONOMY/ SOIL SCI 326	Plant Nutrition Management	3
Select one of the following:		3
HORT 334 & HORT 335	Greenhouse Cultivation and Greenhouse Cultivation Lab	
HORT 375	Special Topics (Organic Vegetable Production) ²	
Select three of the following:		9
HORT 234	Ornamental Plants	
HORT/ PL PATH 261 & HORT/ PL PATH 262	Sustainable Turfgrass Use and Management and Turfgrass Management Laboratory	

HORT 375	Special Topics (Arboriculture and Landscape Maintenance)	
or HORT/ LAND ARC 263	Landscape Plants I	
HORT 345	Fruit Crop Production (alternate years) ²	
HORT 370	World Vegetable Crops	
Electives		
Select 5 elective credits (see list below)		5
Capstone		
Select one of the following:		1-3
A course as approved by advisor and chair of the curriculum committee, usually taken as the following: ³		
HORT/ AGRONOMY 376 & HORT 378	Tropical Horticultural Systems and Tropical Horticultural Systems International Field Study	
HORT 399	Coordinative Internship/Cooperative Education	
HORT 699	Special Problems	
Total Credits		70-84

¹ If MATH 171 is taken, MATH 217 must also be taken.

² Alternate years.

³ Example activities include broad-based internships or broad-based international study.

ELECTIVE COURSES

Students may not double count courses within the major requirements (Agricultural Breadth, Horticultural Core, Electives, Capstone)

Code	Title	Credits
Business and Economics		
A A E 215	Introduction to Agricultural and Applied Economics	4

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take HORT 289 Honors Independent Study, HORT 681 Senior Honors Thesis and HORT 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist for Horticulture (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information. The Department of Horticulture also works collaboratively to strongly support students through the Honors in Research program.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire, integrate and apply knowledge of plant science to horticultural systems.
2. Demonstrate interdisciplinary knowledge and competency in managing horticultural systems.
3. Synthesize knowledge and use insight and creativity to better understand and improve horticultural systems.
4. Appreciate and communicate the diverse impacts of horticulture on people.
5. Demonstrate professionalism and proficiency in skills that relate to horticulture.

ADVISING AND CAREERS**ADVISING**

Students interested in learning more about the Horticulture major should meet with Kathryn Jones, kjones26@wisc.edu, or schedule an advising appointment via Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).

FACULTY MENTORS

The Horticulture Department maintains a list of faculty mentors (<https://horticulture.wisc.edu/academics/undergraduate-program/advising-2/>) that are available to help current students with internships and careers, graduate school preparation, research opportunities, etc.

CAREERS

A degree in horticulture prepares students for numerous career paths, including plant breeding and genetics, applied plant science, food crop production, greenhouse production, urban agriculture, community-supported agriculture (CSA), gardening and landscaping, horticulture education, extension- and community-based education, horticultural therapy, and the health sciences. For sample career profiles in horticulture, see Career Opportunities (<https://horticulture.wisc.edu/academics/undergraduate-program/research-career-opportunities-3/>) on the department website.

WISCONSIN EXPERIENCE

INTERNSHIPS

Internships are a great way for Horticulture students to get hands-on horticultural experience. Many of our students intern at locations that vary from seed companies to wineries to public gardens. Horticulture students also have many opportunities to intern during the year on or near campus at facilities such as the Allen Centennial Garden (<https://allencentennialgarden.org/>), the UW Arboretum (<https://arboretum.wisc.edu/>), and the Agricultural Research Stations (<https://ars.wisc.edu/>).

RESEARCH

Horticulture students have many opportunities to get involved with research in the department. Students primarily find research opportunities by directly contacting faculty. Faculty can be found on the department's website by the directory list (<https://horticulture.wisc.edu/faculty-and-staff-2/faculty-and-staff/>), by crops studied (<https://horticulture.wisc.edu/research-and-outreach-2/crops-studied/>), or by program area (<https://horticulture.wisc.edu/research-and-outreach-2/faculty-by-program-area/>). Occasionally, research positions are posted on the Student Job Center.

STUDY ABROAD

Horticulture students have unique opportunities to contextualize the learning acquired in traditional face-to-face courses on campus by participating in short-term field experiences abroad led by program leaders from the Department of Horticulture.

Some of these programs are:

UW Tropical Horticulture in Costa Rica – students enroll in AGRONOMY/HORT 376 Tropical Horticultural Systems in the fall then participate in a two-week intensive field experience in Costa Rica during winter break. Students have the opportunity to visit tropical crop plantations (for example—banana, pineapple, cacao, coffee, palm oil) and contrast different agricultural practices (small and large scale, organic, conventional).

UW Food Systems and the Environment in Northern Japan – this two-week field study takes place in mid-August. In this program, students from UW–Madison are partnered with students from Obihiro University of Agriculture and Veterinary Medicine, and through a combination of lectures and site visits, they will compare and contrast the landscape and ecology of Japan and Wisconsin.

HORTICULTURE SOCIETY

Connect with other Hort majors and those interested in horticulture by joining the Horticulture Society (<https://win.wisc.edu/organization/hortsociety/>). The Horticulture Society is a professional, social, and educational group which provides a common ground for all students interested in horticulture to meet other students with the same interests.

LIFE SCIENCES COMMUNICATION

The Department of Life Sciences Communication (LSC) is a global leader in the research and practice of communicating emerging science. Our faculty work at the intersection of science, media, and society. The LSC major teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs that we often know little about. Our students graduate with a strong theoretical background in science communication and practical experience which allows them to more effectively communicate about controversial science in areas such as gene editing, the environment, health, agriculture, and artificial intelligence.

An LSC degree allows students to pursue an individualized curriculum focusing on strategic communication, (computational) communication research, writing, marketing, visual communication, or digital media, with an emphasis on emerging science and technology. Close to half of our students choose to double major or pursue a certificate (<http://app.explore.wisc.edu/e/er/?s=1427524768&lid=2566&elqTrackId=c2f12d83377d4a88abac70be792ecb3c&elq=5>) areas such as genetics and genomics, dairy science, environmental sciences, physics, legal studies, global health and many other fields.

The interdisciplinary education that LSC graduates receive make them highly sought after by employers across both scientific and communication industries. Many go on to careers in public health, science writing, digital media and marketing, environmental advocacy, and research or consulting in industry, non-profits and the government. Others go on to graduate and professional schools in the health, biological, social and physical sciences. For more information on what LSC alumni are up to, check out our alumni page (<http://app.explore.wisc.edu/e/er/?s=1427524768&lid=2565&elqTrackId=4d028d92f19744d19478cff217152f3a&elq=5>) our website.

LIFE SCIENCES COMMUNICATION, B.S.

The Department of Life Sciences Communication (LSC) is a global leader in the research and practice of communicating emerging science. Our faculty work at the intersection of science, media, and society. The LSC major teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs that we often know little about. Our students graduate with a strong theoretical background in science communication and practical experience which allows them to more effectively communicate about controversial science in areas such as gene editing, the environment, health, agriculture, and artificial intelligence.

An LSC degree allows students to pursue an individualized curriculum focusing on strategic communication, (computational) communication research, writing, marketing, visual communication, or digital media, with an emphasis on emerging science and technology. Close to half of our students choose to double major or pursue a certificate (<http://app.explore.wisc.edu/e/er/?s=1427524768&lid=2566&elqTrackId=c2f12d83377d4a88abac70be792ecb3d3&elq=52152191319a3884a4083e44cd1d317499f7&elqat=11928e&elqat=1>) in areas such as genetics and genomics, dairy science, environmental sciences, physics, legal studies, global health and many other fields.

The interdisciplinary education that LSC graduates receive make them highly sought after by employers across both scientific and communication industries. Many go on to careers in public health, science writing, digital media and marketing, environmental advocacy, and research or consulting in industry, non-profits and the government. Others go on to graduate and professional schools in the health, biological, social and physical sciences. For more information on what LSC alumni are up to, check out our alumni page (<http://app.explore.wisc.edu/e/er/?s=1427524768&lid=2565&elqTrackId=4d028d92f19744d19478cff217152f3a&elq=52132330a88a4a0883c44d9cb3f749bf&elqaid=4132&elqat=1>) on our website.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. Students must have a minimum of 15 credits within the LSC major that do not double count with CALS or university "general education" requirements.

MATH AND STATISTICS FOUNDATION

LSC strongly recommends that all students complete MATH 112 Algebra or MATH 114 Algebra and Trigonometry to complete the university Quantitative Reasoning A requirement and either STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences or SOC/C&E SOC 360 Statistics for Sociologists I which would complete the university Quantitative Reasoning B requirement.

REQUIRED COURSES

Code	Title	Credits
Foundation Course		
	LSC 111 Science and Technology Newswriting or LSC 212 Introduction to Scientific Communication	3
Core		
	LSC 250 Research Methods in the Communication Industry	3
	LSC 251 Science, Media and Society	3
Select two of the following: 6		
	LSC 270 Marketing Communication for the Sciences	
	LSC 314 Introduction to Digital Video Production	
	LSC 320 Feature Writing	
	LSC 332 Print and Electronic Media Design	

LSC 350	Visualizing Science and Technology	
LSC 360	Information Radio	
Concentration within the Major		
Select 6 credits from one of the following concentrations:		6
Communication Strategy		
Communication Skills and Technologies		
Capstone		
LSC 515	Social Marketing Campaigns in Science, Health and the Environment	3
or LSC 640	Case Studies in the Communication of Science and Technology	
Total Credits		24

CONCENTRATIONS WITHIN THE MAJOR COMMUNICATION STRATEGY

This concentration focuses on the skills and theory necessary to effectively communicate with audiences in the life sciences context, while satisfying the long terms strategic goals of an organization. The concentration includes courses in marketing, strategic and risk communication, and data analysis.

Code	Title	Credits
Select two of the following: 6		
LSC 432	Social Media for the Life Sciences	
LSC 435	Theory and Practice of Integrated Marketing Communication	
LSC 440	Contemporary Communication Technologies and Their Social Effects	
LSC/ AMER IND 444	Native American Environmental Issues and the Media	
LSC/COM ARTS/ JOURN 617	Health Communication in the Information Age	
LSC 625	Risk Communication	
LSC 660	Data Analysis in Communications Research	

COMMUNICATION SKILLS AND TECHNOLOGIES

This concentration focuses on the skills required to translate organized information into informative and persuasive messages for a variety of media, such as writing, documentary photography, social media, web design and video production.

Code	Title	Credits
Select two of the following: 6		
LSC 430	Communicating Science with Narrative	
LSC 432	Social Media for the Life Sciences	
LSC 450	Documentary Photography for the Sciences	
LSC 532	Web Design for the Sciences	
LSC 614	Advanced Video Production	

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

HONORS IN THE MAJOR IN LIFE SCIENCES COMMUNICATION: REQUIREMENTS

Students may apply for admission to Honors in the Major in Life Sciences Communication (LSC) at any time but are strongly advised to apply before their junior year. Interested students are encouraged to meet with the LSC advisor with any questions about Honors in the Major in LSC.

- 24-28 credits of coursework, as outlined in the chart below.
- For the 15 credits of LSC coursework taken for honors credit:
 - Students must earn at least a 3.5 cumulative GPA in this coursework.
 - It is the student's responsibility to enroll in honors sections or to select honors optional in order for courses to count toward Honors in the Major.
 - Thesis and Independent Study credits do not count toward the required 15 credits of LSC honors coursework.
- Complete a senior honors thesis and present the thesis at the CALS Undergraduate Research Symposium or another public venue.

Code	Title	Credits
Required Coursework		
STAT 301 or STAT 371	Introduction to Statistical Methods Introductory Applied Statistics for the Life Sciences	3

or C&E SOC/ SOC 360	Statistics for Sociologists I	
LSC 289 or LSC 299 or LSC 699	Honors Independent Study Independent Study Special Problems	2
LSC 681 & LSC 682	Senior Honors Thesis and Senior Honors Thesis	4-8
15 credits of LSC coursework taken for Honors credit		15
Total Credits		24-28

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Specialized knowledge in theoretical and applied communication of science and technology, along with an education broad enough to meet the challenges of changing careers and opportunities.
2. The ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving.
3. The ability to communicate effectively across media and a broad range of audiences.
4. A global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
5. The ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy.
6. A respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

		15	15

Total Credits 121-123

- ¹ LSC 100 Science and Storytelling is not required for the major but is strongly encouraged for students who need to take a Comm A course.
- ² LSC recommends MATH 112 Algebra or MATH 114 Algebra and Trigonometry for students who need to complete the university Quantitative Reasoning A requirement.
- ³ Many LSC students choose to use elective spaces throughout their career to complete an additional major or certificate. Other students choose to take more LSC courses than the minimum required. Students should consult the advisor for more information and to create a personalized four-year plan based on their background, interests, and career goals.
- ⁴ LSC strongly recommends STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life

Sciences or C&E SOC/SOC 360 Statistics for Sociologists I to fulfill the university Quantitative Reasoning B requirement.

THREE-YEAR PLAN

ADVISING AND CAREERS

ADVISING

Current and prospective students should contact the advisor, Tera Holtz Wagner (tholtz@wisc.edu), with questions. Declared majors are required to meet with the advisor at least once per semester prior to registration.

CAREERS

The interdisciplinary education that LSC graduates receive make them highly sought after by employers across both scientific and communication industries. Many go on to careers in science writing, digital media and marketing, public health, environmental advocacy, and research in industry, non-profits and the government. Others go on to graduate and professional schools in the health, biological, social and physical sciences.

We encourage you to check out our website (<http://lsc.wisc.edu>) to view recent alumni features.

WISCONSIN EXPERIENCE

STUDYING ABROAD

LSC majors can find study abroad and internship abroad opportunities on the International Academic Programs (<https://www.studyabroad.wisc.edu/>) and International Internship Program (<http://internships.international.wisc.edu/>) websites. Travel opportunities range from one to two weeks to an entire academic year, and many students pursue volunteer, research or internship opportunities while abroad. Check out our Major Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/life-sciences-communication/>) for more information for LSC students considering study abroad opportunities.

INTERNSHIPS

LSC notifies majors of abundant opportunities to apply for summer and academic year internships related to science communication. Students intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies. The Wisconsin Technology Council and Farm Journal, Inc. actively offer internship opportunities to LSC students.

SERVICE LEARNING

LSC seniors can select a service learning course for their final capstone. LSC 515 Social Marketing Campaigns in Science, Health and the Environment partners with a real-life client to create a strategic marketing campaign for issues of social significance, such as environmental conservation.

NUTRITIONAL SCIENCES

Nutritional sciences is an independent discipline rooted in biology and biochemistry. The major integrates the study of nutrition with studies of the role of diet in health and disease, and with studies of the biological, genetic, social, and economic factors influencing the diet and nutritional status of humans. Nutritional sciences combines the basic and applied sciences that address issues relevant to agriculture and medicine. The Department of Nutritional Sciences offers two areas of study, both of which require a core of courses that emphasize the chemistry and physiology of nutrition. Additional courses focus on the biochemical, clinical, business, or public health aspects of nutrition. Students who complete the nutritional sciences major in the dietetics degree program receive the bachelor of science–dietetics degree, and students who complete the nutritional sciences major in the bachelor of science degree program receive the bachelor of science degree.

Students who wish to gain practical experience are encouraged to participate in independent studies and coordinative internships, as well as laboratory and clinical research projects offered through the department, the Waisman Center and Interdepartmental Graduate Program in Nutritional Sciences. In addition to the financial support offered by these opportunities, the department annually awards a number of scholarships. All students are also encouraged to apply for scholarships awarded by the College of Agricultural and Life Sciences and UW–Madison.

The department also serves as the administrative home for the popular undergraduate certificate in global health. The certificate is open to all undergraduate UW–Madison students and complements a variety of majors.

GLOBAL HEALTH, CERTIFICATE

The Undergraduate Certificate in Global Health is a 15-credit program open to all undergraduate students at the University of Wisconsin–Madison. The curriculum features a set of core courses, a diverse pool of elective options, and a credit-bearing field experience requirement.

Global health is about improving health equitably for all people worldwide. It encompasses social justice, ethics, and planetary health. The “global” in global health does not necessarily mean “international,” but rather refers to the scope of the issues addressed, spanning geographic and socioeconomic boundaries. A key facet of global health is a focus on disease and illness prevention and addressing root causes of health challenges around the world. Through the certificate students will examine global health issues in Wisconsin, the U.S., and abroad, exploring the connections among human, animal, plant, and environmental health.

Examples of global health issues include maternal and child health, inadequate water and sanitation systems, food insecurity, infectious diseases, racism in the medical system, and climate change, to name a few. Solutions to these problems require expertise from many disciplines, and the certificate welcomes not only pre-health students but all students who are passionate about improving the health of populations and addressing health inequities.

The certificate is administered by the College of Agricultural and Life Sciences (CALS) in partnership with faculty and staff across

campus. Learn more about the program on its website (<https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/>).

HOW TO GET IN

Undergraduate students from across campus are encouraged to consider completing the Certificate in Global Health. There are no prerequisites for declaring, and students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests and plan their field experience.

Students can declare the program by scheduling an appointment with their assigned Global Health advisor, or by filling out the online declaration form on the program's website (<https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/>).

Students declared in the certificate should plan to complete the program before or alongside their degree and major requirements, as they are not able to extend their time on campus to complete a certificate. Students declared in the Global Health major are not eligible to declare the certificate. Students may not declare both the Certificate in Global Health and the Health and the Humanities Certificate.

REQUIREMENTS

MINIMUM REQUIREMENTS

- Minimum grade of C in all certificate coursework
- At least 50% of certificate coursework taken in residence

Code	Title	Credits
Core Courses		
NUTR SCI/ AGRONOMY/ ENTOM 203	Introduction to Global Health	3
MED HIST/ ENVIR ST 213 or POP HLTH 370	Global Environmental Health: An Interdisciplinary Introduction ¹ Introduction to Public Health: Local to Global Perspectives	3
Field Experience		1-4
Field experiences are a central component of the certificate program, and range in length from one week to an entire semester.		
NUTR SCI/INTER- AG 421	Global Health Field Experience	
NURSING 436	Health and Illness Concepts with Individuals, Families, and Communities: Experiential Learning	
CSCS 500	Global Health and Communities: From Research to Praxis	
LAND ARC 360	Earth Partnership Restoration Education: Indigenous Arts & Sciences	
LAND ARC 363	Earth Partnership: Restoration Education for Equity and Resilience	
Electives		5-8

Select from electives list (see below) to reach a minimum of 15 credits total for the certificate.

Total Credits **15**

¹ Completing both of these courses is encouraged but not required, and students who do so can count one as an elective. Both MED HIST/ENVIR ST 213 and POP HLTH 370 are generally only offered in the spring.

GLOBAL HEALTH ELECTIVES GROUPED BY FUNCTIONAL AREA

Code	Title	Credits
<i>Agronomy/Horticulture/Plant Breeding</i>		
AGRONOMY 377	Global Food Production and Health	3
BOTANY/ PL PATH 123	Plants, Parasites, and People	3
BOTANY 240	Plants and Humans	3
BOTANY/AMER IND/ ANTHRO 474	Ethnobotany	3-4
HORT 350	Plants and Human Wellbeing	2
HORT 370	World Vegetable Crops	3
HORT/ AGRONOMY 376	Tropical Horticultural Systems	1
HORT 380	Indigenous Foodways: Food and Seed Sovereignty	2

CAREERS

The knowledge and skills developed through the Certificate in Global Health prepare students for success in a range of career paths. Some graduates may use their global health education to go into a healthcare profession, while others may choose careers as researchers, policy-makers, administrators, non-profit workers, educators, data analysts, and communicators in fields related to public health, epidemiology, environmental health, or international development. The certificate supports students who intend to go directly into the workforce after graduation, as well as those who intend to further their education through graduate or professional programs.

Because an interest in global health can lead to many different careers, students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and career resources on campus. These resources can help students reflect on their values and goals, identify career paths, and outline strategies for pursuing their goals. UW-Madison has a number of dedicated career resources for undergraduate students, including CALS Career Services, the Career Exploration Center, L&S SuccessWorks, and the Center for Pre-Health Advising.

PEOPLE

Please see the Certificate in Global Health website (<https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/undergraduate-program-people/>) for a list of certificate staff and ways to contact them.

WISCONSIN EXPERIENCE

A unique aspect of the certificate is the requirement of a field experience, which can take the form of a study abroad field course, an internship, or site visits right here in Wisconsin. You will have the opportunity to get out of the classroom and see the connections between human, animal, and environmental health while deepening your understanding of the social and cultural contexts that influence health and wellness. The experience also increases your comfort in working with a diversity of people and introduces you to many types of careers in global health.

Click here (<https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/curriculum/undergraduate-field-experiences/>) to learn more about our field experiences or set up an appointment to talk with an advisor.

NUTRITIONAL SCIENCES, B.S.

The bachelor of science with a major in Nutritional Sciences builds on a core set of nutrition courses with additional courses emphasizing the chemistry and biology of nutrients from the molecular to the systemic level. Students in this program often pursue graduate study in medicine, nutritional sciences, and other biological sciences. Graduates also find employment in agribusiness, the food industry, government agencies, health fields, and human services. Others may pursue advanced degrees in nutrition, the health and social sciences, and international studies. Students concerned with food and nutrition problems of developing countries can also enroll in courses that treat the agricultural, environmental, economic, and social context of such problems with the nutrition core.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as

needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
	Select one of the following (or may be satisfied by placement exam):	5-6

MATH 112 & MATH 113	Algebra and Trigonometry	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I ¹	
Select one of the following:		3-5
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Chemistry		
Select one of the following:		5-9
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
Organic Chemistry		
CHEM 343	Introductory Organic Chemistry	3
CHEM 344	Introductory Organic Chemistry Laboratory	2
CHEM 345	Intermediate Organic Chemistry	3
Introductory Biology		
Select one of the following options:		10
Option 1:		
BOTANY/ BIOLOGY 130	General Botany	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
Nutritional Sciences Biology		
Select one of the following options:		8-13
Option 1:		
ANAT&PHY 335	Physiology	
GENETICS 466	Principles of Genetics	
And select one of the following: ²		
MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory	
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	
Option 2: ³		
BIOCORE 485	Principles of Physiology	

BIOCORE 486	Principles of Physiology Laboratory	
BIOCORE 587	Biological Interactions	
Physics		
Select one of the following:		8-10
PHYSICS 103 & PHYSICS 104	General Physics and General Physics	
PHYSICS 201 & PHYSICS 202	General Physics and General Physics	
PHYSICS 207 & PHYSICS 208	General Physics and General Physics	
Core		
NUTR SCI/AN SCI/DY SCI 311	Comparative Animal Nutrition	3
or NUTR SCI 332	Human Nutritional Needs	
NUTR SCI 431	Nutrition in the Life Span	3
BIOCHEM/NUTR SCI 510	Nutritional Biochemistry and Metabolism	3
Select one of the following:		3-7
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507 & BIOCHEM 508	General Biochemistry I and General Biochemistry II	
BMOLCHEM 503	Human Biochemistry	
Electives within the Major		
Select 6 credits from the following:		6
A A E/AGRONOMY/INTER-AG/NUTR SCI 350	World Hunger and Malnutrition	
ANAT&PHY 337	Human Anatomy	
ANAT&PHY 338	Human Anatomy Laboratory	
ANTHRO 365	Medical Anthropology	
BIOCHEM 550	Principles of Human Disease and Biotechnology	
BIOCHEM/M M & I 575	Biology of Viruses ⁴	
BIOCHEM/NUTR SCI 645	Molecular Control of Metabolism and Metabolic Disease ⁵	
BMOLCHEM 504	Human Biochemistry Laboratory

POP HLTH 370	Introduction to Public Health: Local to Global Perspectives	
ZOOLOGY 470	Introduction to Animal Development	
ZOOLOGY 570	Cell Biology	
Capstone		
Select one of the following:		1-8
NUTR SCI 500	Undergraduate Capstone Seminar Laboratory	
NUTR SCI 681 & NUTR SCI 682	Senior Honors Thesis and Senior Honors Thesis	
NUTR SCI 691 & NUTR SCI 692	Senior Thesis-Nutrition and Senior Thesis	
NUTR SCI 699	Special Problems ⁷	
Total Credits		66-91

- ¹ If MATH 171 Calculus with Algebra and Trigonometry I is taken, students must take MATH 217 Calculus with Algebra and Trigonometry II.
- ² Consult advisor about combining MICROBIO 303 with MICROBIO 102.
- ³ If the Biocore sequence is taken to fulfill the first biology requirement, it must be taken to fulfill the second biology requirement.
- ⁴ These courses are taught primarily to graduate students. Permission to enroll from instructor may be required.
- ⁵ Note that for NUTR SCI 681/NUTR SCI 682 (Senior Honors Thesis) and NUTR SCI 691/NUTR SCI 692 (Senior Thesis), both courses in the sequence must be completed in order to earn a grade.
- ⁶ May count up to 6 credits of NUTR SCI 699 Special Problems towards the electives requirement.
- ⁷ Consult advisor regarding the possibility of completing NUTR SCI 699 Special Problems for capstone.

RECOMMENDED NUTRITIONAL SCIENCE ELECTIVES

Code	Title	Credits
ANTHRO 365	Medical Anthropology	3
BIOCHEM 550	Principles of Human Disease and Biotechnology	2
BIOCHEM/ M M & I 575	Biology of Viruses	2

ZOOLOGY 570	Cell Biology	3

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take NUTR SCI 681 Senior Honors Thesis and NUTR SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
2. Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
3. Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
4. Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
5. Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
6. Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
7. Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
8. Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

FOUR-YEAR PLAN

FOUR-YEAR PLAN

SAMPLE NUTRITIONAL SCIENCES FOUR-YEAR PLAN

Freshman

PHYSICS 103		4 Nutritional Sciences Electives ⁵	3-6
Electives		2-3 Electives	4-6
	12-13		12-17

Total Credits 24-30

¹ In order to take CHEM 103/CHEM 104 or CHEM 109, students must have a suitable math placement score or completion of MATH 112, MATH 114, MATH 171, or equivalent.

² MATH course dependent on placement score and transfer credit evaluation

³ The Department of Nutritional Sciences recommends students complete the ZOOLOGY/BIOLOGY/BOTANY 151 & ZOOLOGY/BIOLOGY/BOTANY 152 sequence for Introductory Biology. This sequence fulfills the COMM B requirement. Students do have the option of completing the ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY 102, and BOTANY/BIOLOGY 130 sequence. This sequence does not fulfill the COMM B requirement.

⁴ BIOCORE 381/BIOCORE 382, BIOCORE 383/BIOCORE 384, BIOCORE 485/BIOCORE 486, BIOCORE 587 also accepted.

- ⁵ Select 6 credits from major elective options.
Need 120 total credits to graduate.

ADVISING AND CAREERS

ADVISING

All students, including prospective and declared students, should work with Sarah Golla MSW, GCDF.

Prospective Students:

Prospective and declared students should contact Sarah Golla, MSW, GCDF, at sarah.seibold@wisc.edu for questions.

New, transfer, and current students at UW Madison:

For any questions or to discuss the major, please schedule an appointment with Sarah Golla, MSW, GCDF, through the STARFISH (<https://my.wisc.edu/>) app in MyUW (https://www.google.com/url?client=internal-element-cse&cx=001601028090761970182:uu2tbvfp4za&q=https://my.wisc.edu/&sa=U&ved=2ahUKEwjpv-nCwJHtAhXBW80KHeBSBIYQFjAAegQIABAB&usg=AOvVaw2NN7HzroML_oxhWA_InOgeF).

CAREERS

The Department of Nutritional Sciences encourages majors to begin career exploration shortly after arriving on campus. As with many biosciences, the nutritional sciences provides preparation to work in a number of fields and positions. It will take self-reflection work in conjunction with your advisor, faculty, campus resources. We are here to help guide you!

Join Dietetics and Nutrition Club (<https://win.wisc.edu/organization/dnc/>) for a plethora of different career and professional development opportunities.

CALS Career Resources

- CALS Career Services: (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) Provide expertise to support students and alumni of the college as they explore, experience and achieve their career goals.
 - **Phone:** 608.262.3003
 - **Email:** career@cals.wisc.edu
- CALS Resume Review Walk-Ins (<https://cals.wisc.edu/academics/undergraduate-students/career-services/students/>)
- CALS International Education and Study Abroad Office

Campus Career Resources

- Badger Bridge (<https://badgerbridge.com/>): Connect to established UW alumni for professional advice, support, and opportunities.
- Career Exploration Center (<https://cec.ccas.wisc.edu/>): The Career Exploration Center (CEC) supports undecided and exploring students to make decisions about their futures based on their interests, values, and skills through individual advising appointments, workshops, events, a career library, and campus & community outreach.
- Center for Pre-Health Advising (<http://prehealth.wisc.edu/>): We are a resource for UW-Madison students and alumni who are exploring, preparing, and applying to health professional programs. We are here

to support you – wherever you are on your path to serving others in health care.

- Center for Pre-Law Advising (<https://prelaw.wisc.edu/>): The Center for Pre-Law Advising provides advising and other resources to UW-Madison students and alumni in the process of considering, preparing for, or applying to law school.
- Handshake: (<https://careers.wisc.edu/handshake/>) Handshake makes it easy for every UW-Madison student to explore career events, connect to jobs and internships, and even schedule on-campus interviews.
- International Internship Program (<http://internships.international.wisc.edu/>): The International Internship Program (IIP)—an office within The International Division (<http://international.wisc.edu/>)—identifies and promotes high-quality internship opportunities that, advance the professional training of UW-Madison undergraduate students, foster global competency, and reinforce academic learning through practical application.
- Morgridge Center for Public Services (<https://morgridge.wisc.edu/>): The Morgridge Center for Public Service connects UW-Madison students, staff and faculty to local and global communities to build partnerships and solve critical issues through service and learning.
- Student Job Center (<https://studentjobs.wisc.edu/>): Student Jobs provides students access to thousands of part-time employment opportunities both through UW-Madison as well as businesses & families within the local community.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in dietetics and nutrition, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Dietetics and Nutrition Club (DNC) (<https://win.wisc.edu/organization/dnc/>), a student organization open to anyone interested in meeting others pursuing dietetics and nutrition. Involvement in the DNC is a great way to find out about events and opportunities to network within the field of nutrition and dietetics. See the DNC Facebook page here (<https://www.facebook.com/groups/DNC.UWMadison/?ref=ts&fref=ts>).
- AWA (<http://awamadison.org/>), the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (<http://wiseli.engr.wisc.edu/>), Women in Science and Engineering Leadership Institute—a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the Department of Nutritional Sciences, or through other departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with advisors, instructors, and faculty members. Learn more about faculty research here (<https://nutrisci.wisc.edu/people/faculty-staff/>).

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Bursar's Office (<http://www.bussvc.wisc.edu/bursar/bursar.html>) website lists the average tuition and fee expenses for full-time resident and nonresident undergraduates.

Students seeking a degree are eligible to obtain federal financial aid. For further information about receiving financial aid at the University of Wisconsin–Madison, visit the university's Financial Aid (<https://financialaid.wisc.edu/>) website.

Each year the Department of Nutritional Sciences (DNS) awards \$40,000–\$50,000 in scholarships to Nutritional Sciences majors. In order to be considered for a DNS Scholarship, students must have a current FAFSA filed and must have submitted a scholarship application.

A list of scholarships for Nutritional Sciences students is available on the department's website (<https://nutrisci.wisc.edu/undergraduate/scholarships/>).

NUTRITIONAL SCIENCES, B.S. NUTRITION AND DIETETICS

The popular dietetics degree program combines clinical and managerial courses with the nutrition core to prepare students to become registered dietitian nutritionists (RDN). RDNs work in hospitals, outpatient clinics, schools, colleges, wellness programs and nursing homes as well as in public health agencies, the food industry, and research labs. Students meet the following criteria as a pathway for becoming an RDN:

1. Fulfill all academic course requirements of the Didactic Program in Dietetics (DPD) according to the Accreditation Council for Education in Nutrition and Dietetics (ACEND) 2017 Standards of Education
2. Receive a Nutritional Sciences, B.S. Nutrition and Dietetics
3. Complete an ACEND-accredited Dietetic Internship Program
4. Pass a national exam administered by the Commission on Dietetic Registration (CDR). Effective January 1, 2024, the CDR will require a minimum of a master's degree to be eligible to take the registration examination to become an RDN. Students who complete the nutritional sciences major in the dietetics degree program receive the Bachelor of Science–Nutrition and Dietetics degree.

HOW TO GET IN

ADMISSION TO NUTRITION AND DIETETICS DEGREE PROGRAM

Students will have Pre-Dietetics classification until admission to the nutrition and dietetics degree program (Dietetics classification) as defined by completion of prerequisite courses with a cumulative GPA of ≥ 2.800 , as well as, an overall GPA of ≥ 2.800 . Students must apply for and be admitted to the program no later than the end of the semester in which the student accumulates 86 credits, which is senior standing. Department approval is required for admission. Students who are not admitted to the program by the time they accumulate 86 credits will not be allowed to continue in the Pre-Dietetics classification.¹

To be admitted to the B.S. nutrition and dietetics program, the following requirements must be met effective fall 2019:

1. A minimum overall cumulative GPA of 2.800. Cumulative GPA will be based on UW–Madison courses only.
2. Students **must** have completed one semester at UW–Madison before applying.
3. A minimum mean GPA of 2.800 in the following required² prerequisite courses:

Code	Title	Credits
Select one of the following:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	5-9
CHEM 109	Advanced General Chemistry	
Select one of the following:		
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	5

ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ANAT&PHY 335	Physiology	5
NUTR SCI 332	Human Nutritional Needs	3
Select one of the following:		3-4
PSYCH 202	Introduction to Psychology	
MICROBIO 101	General Microbiology	
PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	
GEN BUS 360	Workplace Writing and Communication	

¹ This policy is applicable to undergraduate students entering or transferring into Pre-Dietetics classification fall 2018 and beyond. Students who have already completed a college degree (B.S. or B.A.) may choose to pursue the nutrition and dietetics program as either a second degree candidate, or as a Didactic Program in Dietetics (DPD) completer. Because they have already completed a bachelor's degree, second-degree candidates and DPD completers are not required to follow this progression policy. Progression for these students will be closely monitored by the program coordinator.

² Any transfer course from another university that will be used to meet the above required courses **cannot** be included in the GPA calculation. If the same course is taken more than once, only the grade from the last time the course was taken will be used in the GPA calculation.

Note: Admission to the DPD program is competitive, as enrollment is limited by accreditation standards; students meeting the minimum criteria are not guaranteed admission.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Code	Title	Credits
Mathematics and Statistics		
Select one of the following (or may be satisfied by placement exam):		3-5
MATH 112	Algebra	
MATH 114	Algebra and Trigonometry ¹	
Select one of the following:		3-4

PSYCH 210	Basic Statistics for Psychology	
SOC/ C&E SOC 360	Statistics for Sociologists I	
STAT 301	Introduction to Statistical Methods	
STAT 371	Introductory Applied Statistics for the Life Sciences	

Chemistry

Select one of the following: 5-9

CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
CHEM 341 or CHEM 343	Elementary Organic Chemistry Introductory Organic Chemistry	3

Select one of the following: 3

BIOCHEM 301	Survey of Biochemistry	
BIOCHEM 501	Introduction to Biochemistry	
BMOLCHEM 503	Human Biochemistry	

Biology

² Offered only spring and summer semesters

³ Offered only spring semester

- See Advising and Careers tab for recommended supporting courses
- Students interested in pursuing the nutrition and dietetics program must first complete specific prerequisite courses, hold pre-dietetics classification, and must achieve the necessary grade point average criteria. Consult <http://www.nutrisci.wisc.edu> for specific information on admission requirements and application procedure.

ADVISING AND CAREERS

ADVISING

Prospective and declared students should contact the student services coordinator with questions.

CAREERS

Registered dietitian nutritionists (RDN) work in hospitals, outpatient clinics, schools, colleges, wellness programs and nursing homes as well as in public health agencies, the food industry, and research labs. Students who fulfill the requirements of the Didactic Program in Dietetics and receive a Nutritional Sciences B.S. in Dietetics are qualified to complete a post-graduate Dietetic Internship. Upon completing the Dietetic Internship, a graduate is eligible to take the examination administered by the Commission on Dietetic Registration leading to certification as a RDN.

WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in dietetics and nutrition, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Dietetics and Nutrition Club (DNC) (<https://win.wisc.edu/organization/dnc/>), a student organization open to anyone interested in meeting others pursuing dietetics and nutrition. Involvement in the DNC is a great way to find out about events and opportunities to network within the field of nutrition and dietetics. See the DNC Facebook page here (<https://www.facebook.com/groups/DNC.UWMadison/?ref=ts&fref=ts>).
- Academy of Nutrition and Dietetics (AND) (<http://www.eatrightpro.org/>), the world's largest organization of food and nutrition professionals. AND provides public information on advocacy, leadership, career development, dietetics resources, position and practice papers; student membership rates and privileges can be found here (<http://www.eatrightpro.org/resources/membership/membership-types-and-criteria/student-member/>).
- Wisconsin Academy of Nutrition and Dietetics (WAND) (<http://www.eatrightwisc.org/default.asp>), Wisconsin's chapter of AND.
- Collegiate FFA (<http://collegiateffamadison.weebly.com/>), an official collegiate chapter of the National FFA organization.
- AWA (<http://awamadison.org/>), the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (<http://wiseli.engr.wisc.edu/>), Women in Science and Engineering Leadership Institute—a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW–Madison.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the Department of Nutritional Sciences, or through other departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with advisors, instructors, and faculty members. Learn more about faculty research here (<https://nutrisci.wisc.edu/people/faculty-staff/>).

CERTIFICATION/LICENSURE

ELEVATED EDUCATION REQUIREMENTS FOR THE FUTURE REGISTERED DIETITIAN NUTRITIONIST (RDN)

The registration examination for RDNs is designed to evaluate a candidate's ability to perform at the entry-level, and currently, candidates must hold the minimum of a baccalaureate degree to take the exam. In 2013, Commission on Dietetics Registration (CDR) moved to change the entry-level registration eligibility requirements for RDNs; instead of requiring a Baccalaureate degree, the educational preparation for the future entry-level RDN is now the minimum of a master's degree. **CDR's mandate goes into effect January 1, 2024.**

CURRENT STUDENTS

Students completing dietetics coursework and a dietetic internship by January 1, 2024 will still be eligible to take the RDN exam with a baccalaureate degree.

PROSPECTIVE STUDENTS

Freshmen declaring Pre-Dietetics in 2020 and beyond will be held to the new 2024 mandate, which will require students to hold the minimum of a master's degree in order to be eligible to take the RDN exam.

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

The requirements of this program meet Certification/Licensure in the following states:

Wisconsin

The requirements of this program do not meet Certification/Licensure in the following states:

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

The Bursar's Office (<https://bursar.wisc.edu/tuition-and-fees/>) lists the tuition and fee expenses for full-time resident and nonresident undergraduates.

Students seeking a degree are eligible to obtain federal financial aid. For further information about receiving financial aid at the University of Wisconsin-Madison, visit the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) website.

Each year the Department of Nutritional Sciences awards \$40,000–\$50,000 in scholarships to nutritional sciences majors. In order to be considered for a DNS Scholarship, students must have a current FAFSA filed and a completed scholarship application submitted. A list of available DNS scholarships may be accessed on our Scholarships (<https://nutrisci.wisc.edu/undergraduate/scholarships/>) page.

ACCREDITATION

ACCREDITATION

Accreditation Council for Education in Nutrition and Dietetics (<https://www.eatrightpro.org/acend/>)

Accreditation status: Accredited. Next accreditation review: 2026.

PLANT PATHOLOGY

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology, and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

For those interested in graduate studies, the Department of Plant Pathology offers a broad program leading to M.S. and Ph.D. degrees, which is described in the Graduate Guide (<http://guide.wisc.edu/graduate/>).

ORGANIC AGRICULTURE, CERTIFICATE

As consumer, industry, and society engagement with organic agriculture expands, the Certificate in Organic Agriculture provides undergraduate students excellent opportunities for learning on a variety of levels, including hands-on experiences. While the certificate focuses on the production and processing approaches that define organic agriculture, students can also explore other dimensions including economic, environmental, health, food systems, and policy. This interdisciplinary certificate can help UW students from various majors to develop employment opportunities in organic agriculture businesses (farm to fork), policy, public and non-governmental agency work, individual wellness and health initiatives, and sustainable development efforts.

HOW TO GET IN

University of Wisconsin - Madison undergraduate students of any major are welcome to pursue the Certificate in Organic Agriculture.

Students are eligible to declare the certificate once they complete AGROECOL/AGRONOMY/C&E SOC/ENTOM/ENVIR ST 103 Agroecology: An Introduction to the Ecology of Food and Agriculture with a grade of B or better.

Students who meet the eligibility criteria must contact the Certificate Advisor to declare the certificate and be assigned an adviser. Students are encouraged to meet with the Certificate Advisor at any stage of their interest in the certificate.

Students cannot declare the Certificate in Environmental Studies or Certificate in Food Systems and the Certificate in Organic Agriculture.

REQUIREMENTS

- Minimum of 15 credits and successful completion of all course requirements
- A minimum cumulative GPA of 2.5 in certificate coursework is required

- Courses in which a student elects the pass/fail option will not count toward completion of requirements.

Code	Title	Credits
Core Courses		
AGROECOL/ AGRONOMY/ C&E SOC/ENTOM/ ENVIR ST 103	Agroecology: An Introduction to the Ecology of Food and Agriculture	3
PL PATH/A A E/ AGRONOMY/ HORT 367	Introduction to Organic Agriculture: Production, Markets, and Policy	3
HORT 372	Colloquium in Organic Agriculture	1
PL PATH 499	Independent Study in Organic Agriculture	2
Electives (complete 6 credits from the following list - courses can be chosen from any topic area)		6
<i>Public Policy & Administration</i>		
A A E/ ENVIR ST 244	The Environment and the Global Economy	
A A E 319	The International Agricultural Economy	
FOOD SCI/ AN SCI 321	Food Laws and Regulations	
HORT/ AGRONOMY 360	Genetically Modified Crops: Science, Regulation & Controversy	
PUB AFFR 240	Evidence-Based Policy Making	
PUB AFFR 380	Analytic Tools for Public Policy	
<i>Business/Entrepreneurship</i>		
A A E 215	Introduction to Agricultural and Applied Economics	
A A E 320	Farming Systems Management	
A A E 323	Cooperatives and Alternative Forms of Enterprise Ownership	
GEN BUS 310	Fundamentals of Accounting and Finance for Non-Business Majors	
or GEN BUS 311	Fundamentals of Management and Marketing for Non-Business Majors	
OTM/ MARKETNG 421	Fundamentals of Supply Chain Management	
ENVIR ST/ M H R 310	Challenges & Solutions in Business Sustainability	
ENVIR ST/A A E/ ECON 343	Environmental Economics

PL PATH 300	Introduction to Plant Pathology
PL PATH 315	Plant Microbiomes
PL PATH/ SOIL SCI 323	Soil Biology
PL PATH/ AGRONOMY/ ENTOM/HORT/ SOIL SCI 354	Diagnosing and Monitoring Pest and Nutrient Status of Field Crops
SOIL SCI 322	Physical Principles of Soil and Water Management
SOIL SCI/ AGRONOMY/ HORT 326	Plant Nutrition Management
<i>Social Dimension</i>	
C&E SOC/ SOC 222	Food, Culture, and Society
C&E SOC/A A E/ SOC 340	Issues in Food Systems
C&E SOC/ SOC 341	Labor in Global Food Systems
ENVIR ST/ GEOG 339	Environmental Conservation
GEOG/ ENVIR ST 139	Global Environmental Issues
GEOG/ ENVIR ST 309	People, Land and Food: Comparative Study of Agriculture Systems
HORT 380	Indigenous Foodways: Food and Seed Sovereignty

Total Credits**15**

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.
2. Explore the biological, ecological, and agricultural underpinnings of organic production systems

3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.
4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives
5. Apply knowledge of organic production through experiential opportunities within local, national and/or international communities.

ADVISING AND CAREERS

ADVISING

Advising is an essential resource for students in the Certificate for Organic Agriculture and helps students shape their unique Wisconsin Experience and career path by making the most of their time at UW-Madison. Advisors can help students make well-informed decisions about coursework and academics, share strategies for success, support them as they encounter challenges, connect them to resources, and provide information about campus policies and procedures. Students are encouraged to regularly meet with their advisor to help ensure that they are aware of opportunities and progressing in their academic and career goals.

Advising is typically done through individual in-person appointments, but advisors are also able to meet with students over the phone or through video conferencing if needed. Quick questions can be answered via email, but an appointment should be scheduled if a conversation is needed.

Certificate Advisor:

Katie Peterman at peterman2@wisc.edu

CAREERS:

The knowledge and skills developed through the Certificate in Organic Agriculture equips students for success in a range of career paths.

Some certificate graduates may use this background to go into organic production, while others may choose a career path in relation to economics, policy, environmental stewardship, health, food systems, and beyond. This certificate has the potential to positively impact the employability of UW students across a variety of disciplines that intersect with organic agricultural production, policy, marketing, business, management, wellness, and community development.

Because an interest in organic agriculture can lead to many different careers, students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and career resources on campus. These resources can help students reflect on their values and goals, identify career paths, and outline strategies for pursuing their goals.

PEOPLE

Professors:

Brad Barham (Professor, Agricultural and Applied Economics)
 Julie Dawson (Associate Professor, Horticulture)
 Shelby Ellison (Assistant Professor, Horticulture)
 Alfonso Morales (Professor, Urban and Regional Planning)
 Erin Silva (Associate Professor, Plant Pathology)

Shawn Steffan (Associate Professor, Entomology)
 Bill Tracy (Professor, Agronomy)
 Steve Ventura (Professor emeritus, Soil Science)
 Michel Wattiaux (Professor, Animal and Dairy Sciences)

Advisor:

Katie Peterman (Program Manager, Organic Certificate, Plant Pathology)

WISCONSIN EXPERIENCE

Students who are engaged in the Certificate in Organic Agriculture can be involved in an array of opportunities across campus. In addition to the hands-on experiences in the Certificate program, students are highly encouraged to complement their coursework with out-of-classroom experiences such as research, volunteering, and study abroad.

The following opportunities can help students connect with other students interested in organic agriculture, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Association of Women in Agriculture (<https://awamadison.org/>)
- GreenHouse Learning Community (<https://www.housing.wisc.edu/residence-halls/learning-communities/greenhouse/>)
- Women in Science and Engineering Learning Community (<https://www.housing.wisc.edu/residence-halls/learning-communities/wise/>)
- F.H. King Students for Sustainable Agriculture (<https://www.fhking.org/>)
- Slow Food UW (<https://slowfood-uw.org/>)
- Minorities in Agriculture, Natural Resources and Related Sciences - MANRRS (<https://www.manrrs.org/>)
- UW Horticulture Society (<https://horticulture.wisc.edu/academics/undergraduate-program/uw-horticulture-society/>)
- Collegiate Future Farmers of America - FFA, UW chapter (<https://biology.wisc.edu/program/collegiate-ffa-uw-madison-chapter-cffa/>)
- CALS Study Abroad (<https://cals.wisc.edu/academics/undergraduate-students/studyabroad/>)
- Badger Volunteers (<https://morgridge.wisc.edu/students/badger-volunteers/>)

PLANT PATHOLOGY, B.S.

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin–Madison where the proximity and complementarity of basic

sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant–microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/management and upper-level courses in plant pathology, entomology, and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
	CHEM 103 General Chemistry I or CHEM 108 Chemistry in Our World or CHEM 109 Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits

Total Credits	36-37

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences including Plant Pathology.
2. Appropriately use biological instrumentation and laboratory techniques.
3. Explain and apply the scientific method including designing and conducting experiments and testing hypotheses.
4. Recognize the relationship between structure and function at all levels: molecular, cellular, organismal, and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physical sciences, and technology to answer biological questions using the scientific method.

¹ Gen-Ed requirements include communications, ethnic studies, humanities, social science, or international studies. See Requirements tab for more details.

Note: Possible places where students may cut down on courses: COMM-A placement test, COMM-B taken as ZOOLOGY/BIOLOGY/BOTANY 152, QR-A placement test, AP/IB credits (biology, social sciences, humanities, language, chemistry, physics, math, statistics)

ADVISING AND CAREERS**UNDERGRADUATE ADVISING IN PLANT PATHOLOGY**

Students in plant pathology are assigned to the Student Services Coordinator (Allee Hochmuth) and one of our faculty advisors. Current faculty advisors include:

Caitilyn Allen
Jeri Barak (lead faculty advisor)
Amanda Gevens
Mehdi Kabbage
Paul Koch
Richard Lankau

Undergraduates in plant pathology are required to meet with their advisor before they can enroll for the upcoming term. A hold will be placed on student records until they meet with their advisor.

For more information about the Plant Pathology major or the department in general, please contact either the lead undergraduate advisor, Professor Jeri Barak (jeri.barak@wisc.edu) or Allee Hochmuth (abhochmuth@wisc.edu). Students with questions regarding lab positions (both paid and unpaid) in plant pathology should contact Professor Jeri Barak.

CAREERS AND PROFESSIONAL DEVELOPMENT

For more information on careers available to plant pathology students please visit our Internship & Job Resources (<https://plantpath.wisc.edu/student-internship-job-resources-2/>) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to plant pathology students, please visit the CALS Career Services (<https://cals.wisc.edu/academics/undergraduate-students/career-services/>) page. Students in the major are welcome to make an individual appointment with their advisor to discuss career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

WISCONSIN EXPERIENCE

WISCONSIN EXPERIENCE

Undergraduates majoring in plant pathology at UW–Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students' specific academic and career goals. There are numerous opportunities to conduct research with internationally prominent faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the university to stakeholders in Wisconsin and beyond for the betterment of society.

Plant pathology offers paid research internships during summer term, as well as paid or credit-earning research opportunities year-round. Undergraduates get a firsthand view of how research is conducted and what it means to be a professional scientist.

By joining the Plant Pathology Undergraduate Club, majors get to know their fellow students outside the classroom. The department provides resources for students to meet experts who lead discussions on a range of topics including cutting-edge research and technology, career options, and how to apply and compete for jobs.

SOIL SCIENCE

The Department of Soil Science provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion management; soil fertility and plant nutrition; soil physical and chemical characterization; biogeochemistry; urban soils; soil carbon; soil health; soil contaminants; waste management; pedology; and land-use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil Science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in Soil Science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

The department also serves as the administrative home for the Environmental Sciences major in the College of Agricultural and Life Sciences.

DEGREES/MAJORS/CERTIFICATES

- Environmental Sciences, B.S. (CALs) (p. 192)
- Soil Science, B.S. (p. 200)

PEOPLE

FACULTY

Associate Professor Francisco Arriaga

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and non-inversion tillage for traditional cropping systems.

Professor Nicholas Balster

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

Professor Phillip Barak

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

Professor William Bleam

Surface and Colloid Chemistry: Physical chemistry of soil colloids and sorption processes, chemistry of humic substances, factors controlling biological availability of contaminants to microorganisms, magnetic resonance and synchrotron studies of adsorption and precipitation.

Assistant Professor Zachary Freedman

Soil microbiology, ecology and sustainability: Effects of environmental change on biogeochemical cycles; community ecology and trophic dynamics; forest soil ecology; soil organic matter dynamics; sustainable agroecosystems; bio-based product crop production on marginal lands.

Professor Alfred Hartemink

Pedology and Digital Soil Mapping: Pedology, soil carbon; digital soil mapping; tropical soils; history and philosophy of soil science.

Assistant Professor Jingyi Huang

Soil Physics, Proximal and Remote Sensing, Soil Monitoring and Management, Digital Soil Mapping: Application of proximal and remote sensing technologies for understanding the movement of water, heat, gas, and solutes in soils across different spatial and temporal scales; application of physical and empirical models for monitoring, mapping, and managing soil changes due to natural processes and human activities.

Professor Carrie Laboski

Soil Fertility and Nutrient Management: Sustaining agricultural production and environmental quality; elucidate the biogeochemistry and subsequent best management practices for N, P, and K fertilizers and animal manures; soil fertility related to lime, secondary, and micronutrients; evaluation of soil and plant diagnostic tests; development of tools to assist producers, ag. professionals, and regulatory agencies to sustain economically sound production of grain and forage crops.

Professor Joel Pedersen

Environmental Chemistry/Biochemistry: Behavior of organic contaminants, macromolecules, and engineered nanoparticles in natural and engineered environments.

Professor Matthew Ruark

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

Professor Douglas Soldat

Turfgrass and Urban Soils: Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

Assistant Professor Thea Whitman

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

RESOURCES AND SCHOLARSHIPS

Financial support—in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs—is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph.D. degrees (see the *Graduate Guide*).

ENVIRONMENTAL SCIENCES, B.S. (CALS)

The Environmental Sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in

service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in Environmental Sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences and the College of Letters & Science.

The Environmental Sciences major can be earned in either the College of Agricultural and Life Sciences (CALS) or the College of Letters & Science (L&S) under the bachelor of science (B.S.) or bachelor of arts (B.A.) degree program. An undergraduate B.S. degree is offered through both colleges. A B.A. option is offered through L&S only. Students are encouraged to review the degree requirements for both L&S and CALS and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CALS, the major is housed in the Department of Soil Science.
- In L&S, the major is housed in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus including Life Sciences Communication, Biology, Community & Environmental Sociology, Soil Science, foreign language/culture, and a number of other disciplines.

HOW TO GET IN

Students wishing to declare the Environmental Sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosoci.wisc.edu/advising/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
	Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.	
	Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.	
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103 or CHEM 108 or CHEM 109	General Chemistry I Chemistry in Our World Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
	CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 35)	

REQUIREMENTS FOR THE MAJOR

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of **15 credits** must be completed in the major that are not used elsewhere.

MATHEMATICS AND STATISTICS

This major requires calculus. Prerequisites may need to be taken before enrollment in calculus. Refer to the Course Guide for information about calculus prerequisites.

Code	Title	Credits
Select one of the following:		
MATH 221	Calculus and Analytic Geometry 1 (Recommended)	5-10
MATH 171 & MATH 217	Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II	
MATH 211	Calculus	
Select one of the following:		
STAT 302	Accelerated Introduction to Statistical Methods	3
STAT/MATH 309	Introduction to Probability and Mathematical Statistics I	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT 371	Introductory Applied Statistics for the Life Sciences	
Total Credits		8-13

CHEMISTRY

Code	Title	Credits
CHEM 103 & CHEM 104 or CHEM 109	General Chemistry I and General Chemistry II Advanced General Chemistry	5-9
Select one of the following:		
CHEM 341	Elementary Organic Chemistry	3
CHEM 343	Introductory Organic Chemistry	
CHEM 561	Physical Chemistry	
Total Credits		8-12

BIOLOGY

¹ Students may consult their environmental sciences advisor regarding alternate ways to complete the major electives requirement.

CAPSTONE ¹

Code	Title	Credits
AGRONOMY 500	Senior Capstone Experience	2
BOTANY/ENVIR ST/ F&W ECOL/ ZOOLOGY 651	Conservation Biology	3
CIV ENGR 515	Hydroclimatology for Water Resources Management	3
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	3
F&W ECOL 577	Complexity and Conservation of White-tailed Deer	3
F&W ECOL 590	Integrated Resource Management	3
F&W ECOL 599	Wildlife Research Capstone	3
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	3-4
LAND ARC 611	Senior Capstone in Landscape Architecture	4
LAND ARC 668	Restoration Ecology	3
PL PATH 315	Plant Microbiomes	4
SOIL SCI 499	Soil Management	3

¹ Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise, greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.
4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.
6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

Total Credits 23-36

¹ Completion of BIOLOGY/BOTANY/ZOOLOGY 152 fulfills the Communication Part B university requirement.

ADVISING AND CAREERS

ADVISING

Students wishing to declare the Environmental Sciences major should meet with an academic advisor. Contact information for advisors can be found here (<http://envirosoci.wisc.edu/advising/>).

CALS undergraduate students interested in pursuing the Environmental Sciences major in the College of Agricultural and Life Sciences should contact Kathryn Jones, kjones26@wisc.edu or 608-807-7391.

L&S undergraduate students interested in pursuing the Environmental Sciences major in the College of Letters & Science should contact Eric Schueffner, elschueffner@wisc.edu or 608-890-3231.

CAREERS

A major in Environmental Sciences serves as excellent preparation for careers of great diversity, including environmental modeling, agricultural scientist, botanist, ecologist, park ranger, agricultural technician, air and water quality manager, environmental analyst, air pollution analyst, environmental consultant, environmental educator, GIS analyst, project manager, hazardous waste manager, hydrologist, environmental lawyer, soil conservation technician, and natural resource specialist. For more info about careers, please visit our website (<http://envirosoci.wisc.edu/careers-internships/>).

PEOPLE

PROGRAM COMMITTEE

Nick Balster, Professor, Department of Soil Science (Co-Chair)
Ken Ferrier, Assistant Professor, Department of Geoscience
Hazel M. Holden, Professor, Department of Biochemistry
Jonathan Martin, Professor, Department of Atmospheric and Oceanic Sciences (Co-Chair)
Joel Pedersen, Professor, Department of Soil Science
Erin Silva, Associate Professor, Department of Plant Pathology

Staff Advisors

Kathryn Jones, Student Services Coordinator (CALS)
Eric Schueffner, Student Services Coordinator (L&S)

WISCONSIN EXPERIENCE

As an interdisciplinary cross-college major, students majoring in Environmental Sciences are involved in a wide array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (<https://research.wisc.edu/information-for-undergraduate-students/>), volunteering (<https://morgridge.wisc.edu/>), internships (<https://envirosoci.wisc.edu/careers-internships/>), and study abroad (<https://www.studyabroad.wisc.edu/>).

Many students are also involved in the Environmental Sciences Organization (ESO) at UW–Madison (<https://win.wisc.edu/organization/ESO/>), a student organization designed primarily for students in the Environmental Sciences major (both CALS and L&S) but open to students with a strong interest in the field.

SOIL SCIENCE, B.S.

The Department of Soil Science provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion management; soil fertility and plant nutrition; soil physical and chemical characterization; biogeochemistry; urban soils; soil carbon; soil health; soil contaminants; waste management; pedology; and land use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

HOW TO GET IN

To declare this major, students must be admitted to UW–Madison and the College of Agricultural and Life Sciences (CALs). For information about becoming a CALs first-year or transfer student, see *Entering the College* (p. 34).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed under the Advising and Careers tab.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALs must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code	Title	Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.		
Residency: Students must complete 30 degree credits in residence at UW–Madison after earning 86 credits toward their undergraduate degree.		
	First Year Seminar (p. 35)	1
	International Studies (p. 35)	3
	Physical Science Fundamentals	4-5
CHEM 103	General Chemistry I	
or CHEM 108	Chemistry in Our World	
or CHEM 109	Advanced General Chemistry	
	Biological Science	5
	Additional Science (Biological, Physical, or Natural)	3
	Science Breadth (Biological, Physical, Natural, or Social)	3
CALs Capstone Learning Experience: included in the requirements for each CALs major (see "Major Requirements") (p. 35)		

MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

Code	Title	Credits
Mathematics and Statistics		
Select one of the following courses:		3-5
MATH 112	Algebra	
MATH 114	Algebra and Trigonometry	
MATH 171	Calculus with Algebra and Trigonometry I ¹	
Select one of the following courses:		3-4
STAT 371	Introductory Applied Statistics for the Life Sciences (recommended)	
STAT/F&W ECOL/ HORT 571	Statistical Methods for Bioscience I	
Chemistry		
Select one of the following options:		5-9
Option 1:		
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
Option 2:		
CHEM 109	Advanced General Chemistry	
Biology		
Select one of the following options:		10
Option 1 (recommended):		
BOTANY/ BIOLOGY 130	General Botany ²	
ZOOLOGY/ BIOLOGY 101	Animal Biology	
ZOOLOGY/ BIOLOGY 102	Animal Biology Laboratory	
Option 2:		
BIOLOGY/ BOTANY/ ZOOLOGY 151	Introductory Biology	
BIOLOGY/ BOTANY/ ZOOLOGY 152	Introductory Biology	
Option 3:		
BIOCORE 381	Evolution, Ecology, and Genetics	
BIOCORE 382	Evolution, Ecology, and Genetics Laboratory	
BIOCORE 383	Cellular Biology	
BIOCORE 384	Cellular Biology Laboratory	
Core		
SOIL SCI 301	General Soil Science	4
SOIL SCI 325	Soils and Landscapes	3
Select one of the following courses:		3
SOIL SCI 321	Soils and Environmental Chemistry	
SOIL SCI 621	Soil Chemistry	
SOIL SCI/ AGRONOMY/ HORT 326	Plant Nutrition Management	
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants	
Select one of the following courses:		3

SOIL SCI 322	Physical Principles of Soil and Water Management	
SOIL SCI 622	Soil Physics	
Select one of the following courses:		3
SOIL SCI/ PL PATH 323	Soil Biology	
SOIL SCI/ MICROBIO 425	Environmental Microbiology	
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry	
Specialization		
Students must complete 1 of 3 specializations: 1.		28-51
Environmental Soil Science 2. Soil and Food Systems 3.		
Turf and Grounds (see below)		
Capstone³		
Select one of the following courses:		3-4
SOIL SCI 499	Soil Management ⁴	
ENVIR ST/ SOIL SCI 575	Assessment of Environmental Impact	
F&W ECOL/A A E/ ENVIR ST 652	Decision Methods for Natural Resource Managers	

Total Credits **68-99**

- Note that MATH 171 & MATH 217 must be taken as a sequence.
- BOTANY/BIOLOGY 130 is required by the Turf and Grounds Track.
- Consult advisor to request permission to substitute another course for the Capstone requirement. Course must meet CALS Capstone Characteristics described in the Undergraduate Catalog and be approved by advisor and 116 Ag Hall.
- SOIL SCI 499 capstone required for Turf and Grounds Track.

SPECIALIZATIONS WITHIN THE MAJOR ENVIRONMENTAL SOIL SCIENCE

Code	Title	Credits
Mathematics		
Select one of the following courses:		5
MATH 211	Calculus	
MATH 221	Calculus and Analytic Geometry 1	
MATH 217	Calculus with Algebra and Trigonometry II	
Physics		
Select one of the following courses:		4-5
PHYSICS 103	General Physics (recommended)	
PHYSICS 104	General Physics	
PHYSICS 207	General Physics	
PHYSICS 208	General Physics	
Chemistry		
Select one of the following options:		4-8
Option 1:		
CHEM 311	Chemistry Across the Periodic Table	
CHEM 327 or CHEM 329	Fundamentals of Analytical Science	
Option 2:		

CHEM 341 & CHEM 342	Elementary Organic Chemistry and Elementary Organic Chemistry Laboratory
------------------------	--

Option 3:

CHEM 343 & CHEM 344 & CHEM 345	Introductory Organic Chemistry and Introductory Organic Chemistry Laboratory and Intermediate Organic Chemistry
--------------------------------------	--

Physical Environment 6-8

Select one course from the following:

ATM OCN 100	Weather and Climate
ATM OCN 101	Weather and Climate
ATM OCN/ SOIL SCI 132	Earth's Water: Natural Science and Human Use
GEOG/ ENVIR ST 120	Introduction to the Earth System
GEOG/ ENVIR ST 127	Physical Systems of the Environment
GEOSCI/ ENVIR ST 106	Environmental Geology
GEOSCI 202	Introduction to Geologic Structures
SOIL SCI 131	Earth's Soil: Natural Science and Human Use
SOIL SCI 321	Soils and Environmental Chemistry
SOIL SCI/ AGRONOMY/ HORT 326	Plant Nutrition Management

Select at least one course from the following:

GEOG/CIV ENGR 320	Geomorphology
ATM OCN/ GEOG 323	Science of Climate Change
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality
SOIL SCI/ F&W ECOL/ HORT 524	Urban Soil and Environment
SOIL SCI 621	Soil Chemistry
SOIL SCI 622	Soil Physics
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants
AGRONOMY/ATM OCN/SOIL SCI 532	Environmental Biophysics
F&W ECOL/ LAND ARC/ ZOOLOGY 565	Principles of Landscape Ecology
GEOG 578	GIS Applications

Living Environment 9-14

Select one course from the following:

AGRONOMY 100	Principles and Practices in Crop Production
AGRONOMY 300	Cropping Systems
GEOG/ ENVIR ST 309	People, Land and Food: Comparative Study of Agriculture Systems

ZOOLOGY/ ENVIR ST 315	Limnology-Conservation of Aquatic Resources
HORT 345	Fruit Crop Production
HORT 370	World Vegetable Crops
AGROECOL 400	Study Abroad in Agroecology
SOIL SCI/ AGRONOMY/ BOTANY 370	Grassland Ecology
SOIL SCI/ MICROBIO 425	Environmental Microbiology
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry

Select one course from the following:

BOTANY/F&W ECOL/ZOOLOGY 460	General Ecology
F&W ECOL 550 & F&W ECOL 551	Forest Ecology and Forest Ecology Lab
GENETICS 466	Principles of Genetics
BOTANY 500	Plant Physiology
SOIL SCI/ MICROBIO 523	Soil Microbiology and Biochemistry
GENETICS 545	Genetics Laboratory
BOTANY 563	Phylogenetic Analysis of Molecular Data
SOIL SCI/ BOTANY/ HORT 626	Mineral Nutrition of Plants
SOIL SCI/ CIV ENGR/ M&ENVTOX 631	Toxicants in the Environment: Sources, Distribution, Fate, & Effects

Select one of the following options:

Option 1:

MICROBIO 101 & MICROBIO 102	General Microbiology and General Microbiology Laboratory
--------------------------------	--

Option 2:

MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory
--------------------------------	--

Option 3:

BOTANY 330 & BOTANY/ PL PATH 332	Algae and Fungi
--	--------------------

Environmental Policy, Management, and Analysis 9-12

Select one of the following courses:

SOIL SCI/ENVIR ST 101	Forum on the Environment
ENVIR ST 112	Environmental Studies: Social Science Perspectives
ENVIR ST 113	Environmental Studies: Environmental Humanities
ENVIR ST/ILS 126	Principles of Environmental Science
ENVIR ST/GEOG 127	Physical Systems of the Environment

A A E/F&W ECOL 652	Decision Methods for Natural Resource Managers
SOIL SCI/ENVIR ST 575	Assessment of Environmental Impact
GEOG/ SOIL SCI 526	Human Transformations of Earth Surface Processes
Select one of the following courses:	
ECON 101	Principles of Microeconomics
ECON 111	Principles of Economics-Accelerated Treatment
A A E 215	Introduction to Agricultural and Applied Economics
A A E/ ENVIR ST 244	The Environment and the Global Economy
A A E 319	The International Agricultural Economy
ENVIR ST/ PL PATH 368	Environmental Law, Toxic Substances, and Conservation
Select one of the following courses:	
ENVIR ST/ F&W ECOL/G L E/ GEOG/GEOSCI/ LAND ARC 371	Introduction to Environmental Remote Sensing
ENVIR ST/ F&W ECOL/G L E/ GEOG/GEOSCI/ LAND ARC 372	Intermediate Environmental Remote Sensing
ENVIR ST/LAND ARC/SOIL SCI 695	Applications of Geographic Information Systems in Natural Resources

Total Credits **37-52**

HORT/ PL PATH 262	Turfgrass Management Laboratory	

¹ Counts toward Soil Science Major Biology requirements, above.

HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

HOW TO APPLY

The application is available on the CALS Honors Program website (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/>). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take SOIL SCI 681 Senior Honors Thesis and SOIL SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (<http://www.cals.wisc.edu/academics/undergraduate-programs/get-involved/honors-program/honors-in-the-major/>) for more information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. To instill in our undergraduate majors the knowledge base required for them to intelligently discuss, debate and communicate those aspects of soil science pertinent to their degree, specialization and career goals.
2. To provide our undergraduates with the skills and experience needed to identify and solve problems and issues of the types they may encounter in their professions.

3. To ensure that our undergraduates possess an awareness of and an appreciation for the potential impacts of soil, water, crop and waste management practices, and land use on the quality of the environment.

FOUR-YEAR PLAN

ADVISING AND CAREERS

ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students should contact the undergraduate coordinator, Julie Garvin (jgarvin2@wisc.edu, 608-262-2239), with questions.

Most of our graduates find employment in a diversity of private and commercial enterprises and governmental agencies. Recent examples of employment include laboratory technician, turf and grounds manager, agrichemical sales representative, environmental scientist, land use planner, land zoning administrator, project manager, wetlands delineator,

and hydrogeologist. Approximately 12% of our undergraduates pursue advanced degrees.

PEOPLE

FACULTY

Associate Professor Francisco Arriaga

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and non-inversion tillage for traditional cropping systems.

Professor Nicholas Balster

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

Professor Phillip Barak

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

Professor William Bleam

Surface and Colloid Chemistry: Physical chemistry of soil colloids and sorption processes, chemistry of humic substances, factors controlling biological availability of contaminants to microorganisms, magnetic resonance and synchrotron studies of adsorption and precipitation.

Assistant Professor Zachary Freedman

Soil microbiology, ecology and sustainability: Effects of environmental change on biogeochemical cycles; community ecology and trophic dynamics; forest soil ecology; soil organic matter dynamics; sustainable agroecosystems; bio-based product crop production on marginal lands.

Professor Alfred Hartemink

Pedology, Digital Soil Mapping: Pedology; soil carbon; digital soil mapping; tropical soils; history and philosophy of soil science.

Assistant Professor Jingyi Huang

Soil Physics, Proximal and Remote Sensing, Soil Monitoring and Management, Digital Soil Mapping: Application of proximal and remote sensing technologies for understanding the movement of water, heat, gas, and solutes in soils across different spatial and temporal scales; application of physical and empirical models for monitoring, mapping, and managing soil changes due to natural processes and human activities.

Professor Carrie Laboski

Soil Fertility and Nutrient Management: Sustaining agricultural production and environmental quality; elucidate the biogeochemistry and subsequent best management practices for N, P, and K fertilizers and animal manures; soil fertility related to lime, secondary, and micronutrients; evaluation of soil and plant diagnostic tests; development of tools to assist producers, ag. professionals, and regulatory agencies to sustain economically sound production of grain and forage crops.

Professor Joel Pedersen

Environmental Chemistry/Biochemistry: Behavior of organic contaminants, macromolecules, and engineered nanoparticles in natural and engineered environments.

Professor Matthew Ruark

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

Professor Douglas Soldat

Turfgrass and Urban Soils: Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

Assistant Professor Thea Whitman

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

WISCONSIN EXPERIENCE

Students majoring in soil science are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (<https://soils.wisc.edu/research-programs/>), volunteering (<https://morgridge.wisc.edu/>), internships (<https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/internships/>), and study abroad (<https://www.studyabroad.wisc.edu/>).

The department also has a UW–Madison Soils Club (http://www.soils.wisc.edu/soils_club/), a student organization designed primarily for students in the soil science major but open to students with a strong interest in the field.

RESOURCES AND SCHOLARSHIPS

RESOURCES AND SCHOLARSHIPS

Financial support—in the form of approximately 15 scholarships, part-time employment, paid internships, and work-study programs—is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph. D. degrees—see the Graduate Guide (<http://guide.wisc.edu/graduate/>).

COLLEGE OF ENGINEERING

Engineers design products and develop solutions to society's national and global challenges. The variety of engineering projects requires engineers to have an understanding of people and their values. Engineers blend their knowledge and practical experience with their communication and teamwork skills to work as members of diverse, multidisciplinary teams. Engineers frequently make decisions affecting the development of society and the direction it will take.

The University of Wisconsin–Madison College of Engineering is one of the best places in the world for an engineering education. The outstanding curriculum and the world-class faculty focus on providing students with the technological tools, resources, and knowledge to develop solutions to problems in fields ranging from medicine to energy to manufacturing—and many more.

In the classroom and in the lab, students study and grow their skills, yet they also enrich their academic experience outside of the classroom through opportunities such as international study, field research, internships, laboratory experience, and entrepreneurial opportunities.

Learning isn't confined to the classroom. It can happen anywhere—in the Engineering Hall study lounge, in the state-of-the-art makerspace, or in casual conversation on Engineering Mall. As Badger engineers, students are surrounded by some of the smartest, most innovative people in the world. The faculty do more than teach. They immerse students in interdisciplinary activities and offer real design challenges—and students can actually design and build products that solve those challenges.

In a college internationally renowned for its research, there also are many opportunities for undergraduate students to work directly with faculty members to propose and conduct research, and to publish and patent their results.

The Wisconsin Experience is not limited to academics. Across the university, there are a host of ways to get involved in the campus community. From the UW Marching Band to student government, students can find a home at UW.

A College of Engineering education will not only offer students the time of their lives, it will also prepare them to change life as we know it.

DEGREES/MAJORS/CERTIFICATES

- Biology in Engineering for Engineering Majors, Certificate (p. 218)
- Biomedical Engineering, B.S. (p. 221)
- Chemical Engineering, B.S. (p. 229)
- Civil Engineering, B.S. (p. 235)
- Computer Engineering, B.S. (p. 257)
- Electrical Engineering, B.S. (p. 263)
- Engineering for Energy Sustainability, Certificate (p. 276)
- Engineering Mechanics, B.S. (p. 278)
- Engineering Physics, B.S. (p. 288)
- Engineering Thermal Energy Systems, Certificate (p. 314)
- Environmental Engineering, B.S. (p. 244)
- Geological Engineering, B.S. (p. 250)
- Industrial Engineering, B.S. (p. 303)
- International Engineering, Certificate (p. 270)

- Manufacturing Engineering, Certificate (p. 315)
- Materials Science and Engineering, B.S. (p. 309)
- Mechanical Engineering, B.S. (p. 317)
- Naval Science, BNS (p. 271)
- Nuclear Engineering Materials, Certificate (p. 293)
- Nuclear Engineering, B.S. (p. 294)
- Technical Communication, Certificate (p. 273)

PEOPLE

"If you think of the challenges that we face—energy, transportation, clean air and water, building the next generation of computing and communications technologies as we use up our raw materials—those are problems engineers must address. I'd like our students and faculty to take the leadership role in solving those problems in their classrooms and research."

—Dean Ian Robertson

COLLEGE OF ENGINEERING LEADERSHIP ([HTTPS://WWW.ENGR.WISC.EDU/ABOUT/LEADERSHIP/](https://www.engr.wisc.edu/about/leadership/))

Dean: Ian M. Robertson
 Executive Associate Dean: David A. Noyce
 Associate Dean for Research and Graduate Affairs: Oliver Schmitz
 Associate Dean and Chief Financial Officer: Adam Whitehorse
 Associate Dean for Undergraduate Affairs: Manuela Romero
 Associate Dean for Advancement: Cathleen Walters
 Associate Dean for Engineering Professional Development: Edward G. Borbely
 Interim Associate Dean for Inclusion, Equity and Diversity: Jenn Sheridan
 Director of Faculty Development: Douglass Henderson

ENTERING THE COLLEGE

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering

offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

POLICIES AND REGULATIONS

REGULATIONS

Official regulations regarding enrollment, scholarship, and graduation for undergraduates in the College of Engineering.

A printer-friendly PDF can be found on the College of Engineering Regulations page (<https://ugregulations.engr.wisc.edu>).

ADMISSIONS

1. Direct Admission

New students are admitted directly to the degree program (major) of their choice or to the College of Engineering as Engineering Undecided. Progression requirements must then be satisfied as described in Regulations 3–7.

2. Degree Programs (Majors)

Biomedical Engineering (BME)
 Chemical Engineering (CHE)
 Civil Engineering (CEE)
 Computer Engineering (CMPE)
 Electrical Engineering (EE)

Engineering Mechanics (EM)
 Engineering Physics (EP)
 Environmental Engineering (EnvE)
 Geological Engineering (GLE)
 Industrial Engineering (IE)
 Materials Science and Engineering (MSE)
 Mechanical Engineering (ME)
 Nuclear Engineering (NE)

- i. One course must be CHEM 104 General Chemistry II or higher
- ii. One course must be PHYSICS 201 General Physics/E M A 201 Statics or higher

If above two requirements are completed, select from additional science courses below.

PROGRESSION

3. First Year Progression Requirements

To automatically progress in a College of Engineering (CoE) degree program (major) after direct admission or to switch between engineering degree programs, students must complete the following requirements after their first two semesters of residency at UW–Madison:

- A. 24 credits completed at UW–Madison. Special topics, independent study, seminar, pass/fail, and credit/no credit courses will not be included in the 24 credits except for required English as a Second Language courses.
- B. General Education Communications Part A (Comm A) requirement. If Comm A is not completed as a graded course at UW–Madison (i.e., completed through placement test, AP/IB, or transfer credit), then a liberal studies course of at least 3 credits with a breadth designation of Humanities, Literature, or Social Sciences must be taken on a graded basis at UW–Madison.
- C. Introduction to Engineering: course specified by degree program or INTEREGR 170 Design Practicum for Engineering Undecided students.
- D. Math course sequence through MATH 222 Calculus and Analytic Geometry 2 or MATH 276 Topics in Calculus II
- E. Four core courses, required for engineering degree programs (majors), completed at UW–Madison, as defined below:

1. **Math:** A minimum of two math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above; or one math course 300 level or above. If the math requirement for the degree program (major) is complete or the student has completed the calculus sequence through MATH 234 Calculus–Functions of Several Variables, then additional math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above or additional courses from the science requirement in Regulation 3.E.2. can be taken to complete the four core course requirement. Excludes MATH 228 WES Calculus Supplement, MATH/HIST SCI 473 History of Mathematics, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

2. **Science:** A minimum of two science courses required for engineering degree programs (majors) as defined below. If the math and science requirements for the degree program are complete, then departmental engineering courses 200 level and above can be taken to complete the four core course requirement. Excludes EPD, InterEGR, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

- For Chemical Engineering majors, the following science requirements apply:

- For majors in Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Engineering Physics, Environmental Engineering, Geological Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, and Nuclear Engineering, the following science requirements apply:

- i. One course must be either CHEM 104 General Chemistry II or higher OR PHYSICS 201 General Physics/E M A 201 Statics or higher
- ii. One other science course, from the following:

- Chemistry, all classes
- E M A 201 Statics, E M A 202 Dynamics, M E 240 Dynamics
- PHYSICS 201 General Physics and above
- Statistics, calculus-based
- E P 271 Engineering Problem Solving I
- COMP SCI 200 Programming I, COMP SCI 220 Data Science Programming I, or COMP SCI 300 Programming II or above, excluding COMP SCI 304 WES-CS Group Meeting
- Excludes special topics, independent study, seminar, pass/fail, and credit/no credit courses

- F. Core and Overall GPA requirements must be satisfied as defined by CoE departments for each engineering degree program (major) (<http://progression.engr.wisc.edu>). All graded UW–Madison courses referenced in E.1. and E.2. above and any departmental engineering courses level 200 or above will be counted in the Core GPA (excludes EPD, InterEGR, special topics, independent study, and seminar courses). All graded UW–Madison courses are counted in the Overall GPA. For one and only one of these core courses that a student has repeated, the more recent of the two grades will be used in the calculation of Core and Overall GPAs. Students may not be on academic probation for GPA reasons for automatic completion of first year progression requirements.

Students who do not meet the first year progression requirements to automatically progress in a degree program (major) can be considered for non-automatic progression (Regulation 4) or extension (Regulation 5).

4. Consideration for Non-Automatic Progression

Students who do not meet progression GPAs but meet all other progression requirements will be considered for progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends.

5. Extension for First Year Progression Requirements

- A. Students who will not meet progression requirements due to University of Wisconsin placement and/or assessment tests (math and ESL) will be granted a one semester extension up to their fourth semester if they are making satisfactory progress in a degree program (major).
- B. Students who do not meet the requirements in Regulation 3 may apply for a one semester extension but not beyond their fourth semester. Students granted extensions will be considered for non-automatic progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends. Extensions will be evaluated only in cases where it is mathematically possible during the one semester extension to meet progression GPAs for intended program.

6. Diversity of Student Body

When the number of non-automatic considerations and/or applications for admission to a degree program (major) exceed the capacity of that program, progression and admission will be limited to capacity. In order to implement the University's goals of achieving a heterogeneous and diverse student body, selection of students under consideration or admission to a program operating at capacity will be based on demographic background, written statement, rigor of completed courses, and grade trends.

7. Progression Requirement Completion and Extension Application

Students are required to submit to the dean's office an application for progression for a degree program (major) or an application for an extension by the deadline. Deadlines will be posted on the College of Engineering website at Progression Requirements (<http://progression.engr.wisc.edu/>) and emailed to students in the College of Engineering.

REGISTRATION

8. Definitions

- A. Full-time student: One carrying a minimum credit load of 12 credits. All students are expected to be full-time unless they have the permission of the dean to be part-time. A student carrying less than the minimum credit load without the dean's permission will be placed on part-time warning at the end of the semester.
- B. Part-time student: One who has the dean's permission to carry less than the minimum credit load (Regulation 9.F).
- C. Semester: A term of 15 weeks minimum duration.
- D. Session: A term of less than 15 weeks duration (e.g., summer session or intersession).
- E. Modular Course: A course that is offered during a semester, but which lasts fewer than 15 weeks.

9. Credit Load Constraints

- A. Maximum credit load: 20 enrolled credits per semester.
- B. Minimum credit load: 12 enrolled credits per semester or enrolled for one cooperative education program credit as an engineering co-op student during a co-op work period.
- C. For sessions there is no minimum credit load; the maximum credit load equals the number of weeks in the session.
- D. A student not on academic probation may freely choose to carry any number of credits between a minimum credit load and a maximum credit load.

- E. A student may carry more than a maximum credit load only with the recommendation of an advisor and with written approval of the dean.
- F. Part-time student: A student who wishes to carry less than a minimum credit load in a specific semester for definitive reasons—e.g., a verifiable disability, or a necessity of employment or other outside obligations exceeding 15 hours per week—must request permission from the dean to become a part-time student. Part-time permissions must be renewed during the first two weeks of each semester part-time permission is requested. Part-time students must satisfy all regulations other than the minimum credit load.
- G. A student on academic probation is advised to carry not more than 14 credits per semester unless repeating a course. For every three credits being repeated, the student is advised to carry not more than one additional credit beyond 14, up to a maximum of 16 credits.

10. Student Responsibility for Scheduling

Each student is responsible for arranging a course list that will permit satisfactory progress towards degree requirements and a class schedule that (a) avoids class and final exam scheduling conflicts, (b) avoids an excessively demanding final exam schedule, and (c) verifies registration in chosen classes.

11. Access to Courses

Departments may specify courses as not open to students who need to complete progression requirements, or as open only to students in a specific degree program (major).

12. Transfer of Degree Applicable Credits

A course taken anywhere other than UW–Madison, or by independent study or resident extension, is transferable to the College of Engineering, in credits only, if it is transferable to the UW–Madison. The course counts toward graduation only if it satisfies a graduation requirement of the curriculum to which it is to be applied and only if it was passed with a grade of C (2.0 on a 4.0 scale) or better.

13. Transfer of Grades

Grades for courses taken anywhere other than UW–Madison are not transferable, even if the credits for those courses are transferable.

14. Adding Courses

Within other limits of these regulations a student may add full-semester courses only during the first two weeks of classes. (Regulation 19).

15. Dropping Courses

Within other limits of these regulations, a student may drop full-semester courses only during the first nine weeks of classes. Courses dropped after two days before the last day to add courses are noted on the transcript as DR. (Regulations 14, 19 and 22.G.).

16. Course Substitutions

A student may substitute courses that deviate from the requirements of a published curriculum of the College of Engineering upon the recommendation of the student's degree-granting department and with the approval of the college governance committee.

17. Pass/Fail and Credit/No Credit Courses

Pass/fail is a student-option alternative way of being graded in a regularly graded course. Credit/no credit describes courses approved for two-level grading and is not a student option.

A student may change the grading option of a full-semester course to or from pass/fail only during the first four weeks of classes. (Regulation 19). These courses must be free electives. Only students in good standing may elect the pass/fail privilege.

The pass/fail agreement is between the student and the Registrar, and is not revealed to the person teaching the course. The person teaching the course submits the appropriate letter grade to the Registrar, who converts C or higher grades to S (Satisfactory), D and F grades to U (Unsatisfactory).

Courses designated as credit/no credit will not be counted in determining the number of pass/fail courses the student may elect.

18. Audited Courses

A student may audit a course only if the instructor consents. Auditors are expected to attend with a reasonable regularity and to participate in the class, as determined by the instructor. Audited courses carry no degree credit, do not count in determining the minimum number of credits permitted in each term, and are not included in the calculation of the GPA. The only valid grade for audited courses is a grade of S (Satisfactory) or NR (No Report). A student may change to or from credit to audit only during the first four weeks of classes (Regulation 19).

19. Courses Scheduled for Fewer Than 15 Weeks

Deadlines for sessions and modular courses are listed on the Office of the Registrar's website.

PERFORMANCE AND EVALUATION

20. Attendance

Each student is expected to attend all assigned classes during the regular meeting times, and take all of the examinations for those courses at the regularly scheduled times. In the case of course or examination absences excused for a reason acceptable to the course instructor, the student is expected to make up the work within a reasonable time, and may do so without a grade penalty.

21. Grading System

Course grades are reported by letter only; plus and minus grades are not authorized. The following grades are included in computing grade point average (GPA) and point-credit ratio (PCR).

Grade: A (Excellent)

Grade Points Per Credit: 4.0

Grade: AB (Intermediate)

Grade Points Per Credit: 3.5

Grade: B (Good)

Grade Points Per Credit: 3.0

Grade: BC (Intermediate)

Grade Points Per Credit: 2.5

Grade: C (Fair)

Grade Points Per Credit: 2.0

Grade: D (Poor)

Grade Points Per Credit: 1.0

Grade: F (Failure)

Grade Points Per Credit: 0.0

22. Special-Purpose Grades

The following ways of reporting course grades are also used and, except for NR, do not affect GPA or PCR

- A. S (Satisfactory) or U (Unsatisfactory) – used to report pass/fail courses (Regulation 17). S is also used in audited courses (Regulation 18).
- B. CR (Credit) or N (No Credit) – used to report credit/no credit courses (Regulation 17).
- C. NR (No Report) – signifying that no grade has been reported to the Registrar's Office – a temporary grade that must be replaced by an A-F grade; also used for a permanent grade in audited courses (Regulation 18).
- D. NW (No Work) – student enrolls in a course and then never attends. This means that instructor has no evidence that student ever attended.
- E. I (Incomplete) – a temporary grade (Regulation 27); EI is used for an extended incomplete (requires a dean's action); IN is used to indicate an incomplete in a credit/no credit course; PI is used for a permanent incomplete (Regulation 28).
- F. P (Progress) – a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.
- G. DR (Dropped) – indicates the course was dropped after the initial drop deadline noted on the Office of the Registrar's website.
- H. W (Withdrew) – indicates the student withdrew from the university after the initial drop deadline noted on the Office of the Registrar's website.

23. Course Grade Changes

The final course grade may be changed only by the professor in charge of the course section, and then only to correct a clerical error in the computation or reporting of the original grade.

24. Grade Point Average (GPA) and Point-Credit Ratio (PCR)

Grade point average (GPA) is computed by dividing the total number of grade points earned at UW–Madison by the total number of credits attempted (excluding pass/fail or credit/no credit courses) at UW–Madison. The point-credit ratio (PCR) differs from the grade point average in that it involves only those credits that count toward graduation and the related grade points. When a course is repeated, the credits and grade points earned only for the final attempt are included in the point-credit ratio.

25. Dean's Honor List

At the end of each semester the names of all full-time students in good standing with a 3.5 or higher semester GPA and cumulative GPA of at least 3.0 will be included on the Dean's Honor List. Students must have received no incompletes and no unreported

grades. A notation of "Dean's Honor List" and date will be entered on the student's transcript.

26. Repeating Courses

Any course may be repeated at the student's option. In the case of a required course in which the student earned a grade of D and which is a prerequisite to another required course, the student is encouraged (or may be required by departmental regulation) to repeat the course. For courses taken more than once, all grades count in the grade point computations, but only the last grade for the course is applied to the student's point-credit ratio.

27. Incomplete

An incomplete may be reported for a student who has carried a subject with a passing grade, but because of illness or other unusual and substantiated cause beyond the student's control has been unable to complete the final examination or some limited amount of term work. A student who stays away from a final examination without proof of being prevented from attending as indicated above will receive a grade of F, N, or U (whichever is appropriate). Even with such proof, if the term work has convinced the instructor that the student cannot pass, the grade shall be F, N, or U (whichever is appropriate).

28. Resolution of an Incomplete

At the instructor's option, a course marked incomplete may be completed at any time no later than last day of class of the student's next semester of attendance at UW–Madison, or it will lapse into a fail. An incomplete may not be removed after five years of absence from UW–Madison without special permission of the dean. Such an incomplete remains on the record with a grade of PI and does not lapse into an F, N, or U.

29. Final Exam Rescheduling

A student may be permitted to take an examination at other than the regularly scheduled time only with permission of the instructor. Permission will be granted only for illness or other unusual and substantiated cause beyond the student's control. (Regulation 10).

30. Withdrawal

In order to withdraw from the University a student should consult an advisor and must obtain the dean's signature for the official withdrawal. Grades of W will be recorded for courses in progress if the student withdraws after 2 days before the last day to add classes (Regulations 14, 19 and 22.H.).

- A. After eight weeks of classes but prior to the last three weeks of scheduled classes, such withdrawal will be approved by the dean only for non-academic reasons or to transfer out of the College of Engineering.
- B. No official withdrawal will be granted in the last three weeks of scheduled classes. Grades of Incomplete, if justified (Regulation 27), or F, N, or U (instead of W) will be recorded for students who leave the University during this time.

31. Year Classification

The year classification of a student is determined by the number of credits passed and the number of grade points earned, applicable to the student's degree, as indicated by the following tabulation:

Freshman

Numerical Classification of Year: 1
Minimum Credits Passed: 0

Minimum Grade Points Earned: 0

Sophomore

Numerical Classification of Year: 2
Minimum Credits Passed: 24
Minimum Grade Points Earned: 48

Junior

Numerical Classification of Year: 3
Minimum Credits Passed: 54
Minimum Grade Points Earned: 108

Senior

Numerical Classification of Year: 4
Minimum Credits Passed: 86
Minimum Grade Points Earned: 172

For the purpose of year classification only, pass/fail and credit/no credit courses and courses transferred from another campus are assumed to have earned 2.0 grade points per credit.

32. Good Standing

A student is in good academic standing unless on academic probation or dropped.

33. Part-time Warning

A student is placed on part-time warning when that student has, in the semester just completed, passed fewer than 12 credits without permission from the Dean.

34. Probation

A student is placed on academic probation when that student has, in the semester just completed, attained less than a 2.0 GPA. Once on probation, the student is continued on probation until either removed from probation or dropped (Regulations 35, 36).

35. Removal From Probation

The following requirements must be satisfied for the removal of a student from academic probation (Regulation 34):

- A. A cumulative GPA of at least 2.0;
- B. A GPA of at least 2.0 for the semester just completed.

36. Drop

- A. A student on academic probation will be dropped at the end of any semester for which that student has attained a GPA of less than 2.0 or passed fewer than half of the credits attempted (Regulation 34).
- B. A student not on academic probation will be dropped at the end of any semester for which that student has passed fewer than half of the credits attempted.

37. Readmission

A student who has been dropped for academic reasons may be readmitted by the dean only after the student has been out of the College of Engineering for at least one semester.

38. Session Actions

No academic actions (part-time warning, probation, drop, removed from probation) will be taken at the end of sessions (Regulation 8.D.).

39. Graduation

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly

consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all the following graduation requirements have been met:

- A. Have fulfilled the published graduation requirements of that curriculum, with all substitutions formally approved, and have achieved a minimum 2.0 GPA overall.
- B. Have a PCR (Regulation 24) of at least 2.0 for those semesters and sessions containing the last 60 credits taken at UW–Madison or for all credits taken at UW–Madison if fewer than 60.
- C. Have a departmental PCR of at least 2.0 for all courses taken in the degree-granting department that count toward graduation.
- D. Have completed at least 30 credits in residence in the College of Engineering, including 15 credits of work in the degree-granting department.
- E. Have completed the last two semesters in residence in the College of Engineering. Cannot be on co-op or study abroad in the last semester. Students may seek permission from the Dean to be on co-op or study abroad in their second to last-semester.
- F. Have completed the last semester in the College of Engineering enrolled in courses required for their engineering degree.
- G. Have a GPA of at least 2.0, both for the last semester and also for the combined last two semesters.

40. Graduation with Distinction and Highest Distinction

Students who have earned at least 60 credits on the University of Wisconsin–Madison campus and whose total cumulative GPA is in the top 5 percent of the College graduating class will receive the designation “Graduated With Highest Distinction,” or if in the next 15 percent, “Graduated with Distinction.” The appropriate designation is entered as a permanent record on the student’s transcript.

APPEAL

41. Appeal

The Dean of the College of Engineering has the authority to suspend or modify the operation of these regulations if their enforcement is judged to work an injustice to the student.

POLICIES

ACCREDITATION

The following engineering undergraduate degree programs described in this catalog are accredited by the Engineering Accreditation Commission of ABET, www.abet.org (<http://www.abet.org/>):

Biological Systems Engineering (with College of Agricultural and Life Sciences)
 Biomedical Engineering
 Chemical Engineering
 Civil Engineering
 Computer Engineering
 Electrical Engineering
 Engineering Mechanics
 Geological Engineering
 Industrial Engineering

Materials Science and Engineering
 Mechanical Engineering
 Nuclear Engineering

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

ADDITIONAL MAJOR

Engineering students may earn an additional major and have the additional major noted on their transcript at the time of graduation. This includes most majors in the College of Letters & Science as well as Health Promotion and Health Equity (HPHE), Education Studies, and Theatre & Drama in the School of Education; and Global Health in the College of Agricultural and Life Sciences. To qualify, the student must have approval in advance from both the department offering the major and the academic dean of the College of Engineering. Students must satisfy all requirements for their declared additional major prior to or concurrently with the engineering degree. For further details, contact the College of Engineering Dean’s Office, 2620 Engineering Hall.

Adding additional majors from colleges other than Letters & Science and majors not approved in the School of Education is not accepted. For example, majors such as art (School of Education) and forestry (College of Agricultural and Life Sciences) cannot be completed in conjunction with an engineering degree. Likewise, students cannot pursue more than one undergraduate engineering degree concurrently.

STUDENT GRIEVANCES

In compliance with Title IX regulations, the College of Engineering has a grievance procedure to handle student complaints. Students should follow these steps until a resolution is achieved:

1. Attempt to resolve the grievance directly with the individual involved.
2. If that approach seems unsatisfactory, and the grievance involves a teaching assistant (TA), consult the professor in charge of the course.
3. If necessary, discuss the grievance with the appropriate department chair.
4. The next level involves the academic dean. Students should contact Manuela Romero in 2620 Engineering Hall or at mromero@wisc.edu.
5. All students have the right to appeal to the dean of the college, Ian Robertson, 608-262-3482, if they feel their case has not been justly handled by another dean.
6. Only a few grievances are really serious and difficult to resolve. In these instances, the dean seeks a solution that, as best as can be determined, is appropriate, just, legal and in the best interests of all concerned.

AUTHORITY LIMITS ON GRADES

There are areas in which the dean does not have authority to override an instructor, such as determination of a student's grade. However, it has happened that the department chair has intervened, for example, by having a grade determined by committee rather than by the course instructor.

It has also occurred, by agreement between deans, department chairs and faculty, that a misgraded course was dropped from the student's record and credit given for the controversial course by having the student pass the next higher course.

GRIEVANCE EXAMPLES

The following is a list of student grievances (in no particular order of frequency or importance) that have occurred:

- Discrimination based on sex, religion or political views
- Course or exam grade disputes
- Required class or examination attendance at other than regularly scheduled (timetable) times
- Changes in course content contrary to catalog description or division approval
- Difficulty in obtaining space in a critical course
- Personality conflicts between student and instructor
- Difficulty obtaining an appointment with instructor
- Unwillingness of instructor to estimate a grade before the course drop deadline date
- Teaching above the level of the class, which includes the assumption of an unlisted course prerequisite
- Intelligibility of instructors, especially those for whom English is a second language
- Excessive instructor class absences
- Rescheduled final exams by majority approval or apparent unanimity, to possible disadvantage of the minority
- Sexual harassment (Contact Manuela Romero, 608-262-3484; Jason Jankoski, 608-890-0921; or the Division of Student Life, 75 Bascom Hall, 608-263-5700)

General
Education

- Breadth—Humanities/Literature/Arts: 6 credits
- Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth—Social Studies: 3 credits
- Communication Part A & Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING CURRICULA

The graduation requirements for each of the engineering degrees are presented in the form of four-year programs of study. These four-year schedules are available, but rarely followed without deviation. Some students can proceed more rapidly; many must proceed more slowly and take nine or more semesters to complete the degree. Flexibility in course selection is also present though elective categories within curricula.

All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET, www.abet.org (<http://www.abet.org/>). Among other criteria, ABET requires that students complete:

- A minimum of 30 semester credit hours (or equivalent) of a combination of college-level mathematics and basic sciences with experimental experience appropriate to the program.
- A minimum of 45 semester credit hours (or equivalent) of engineering topics appropriate to the program, consisting of engineering and computer sciences and engineering design, and utilizing modern engineering tools.
- A broad education component that complements the technical content of the curriculum and is consistent with the program educational objectives.
- A culminating major engineering design experience that 1) incorporates appropriate engineering standards and multiple constraints, and 2) is based on the knowledge and skills acquired in earlier course work.

Engineering curricula continuously evolve. The requirements that apply to a particular student are determined by the date (catalog year) that a student enters a degree-granting program. At that point, the curriculum becomes fixed throughout the period it takes for a student to complete the degree, although new changes that benefit a student can be adopted by a particular student if he or she so chooses.

The curricular descriptions below do not address how these requirements are satisfied; students seldom need to be concerned with these details. However, if deviations from a curriculum are requested, they must not violate any of the accreditation requirements.

DEVIATION FROM PRESCRIBED CURRICULA

Circumstances deemed acceptable for deviating from the outlined engineering curricula are included in each departmental description. The choice of courses to fulfill elective credit requirements provides students with considerable flexibility in their programs. In addition, some departments permit the substitution of elective courses for required ones

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

and also offer outstanding undergraduate students the opportunity to enroll in graduate courses. These options aid the student in tailoring a course of study to meet personal goals more closely.

DEFINITION OF ELECTIVES

There are general types of elective courses including technical electives, liberal studies and free electives.

Technical electives are limited to courses in engineering and closely related fields.

Liberal studies electives are those courses that are classified as either humanities, literature, social studies or as foreign language.

Free electives are courses completely free of any restrictions or requirements other than the course prerequisites.

Other specific elective requirements are established and described in department curricula.

To assist the student in gaining a better understanding of individuals and societies, and to reduce problems of transferring from one curriculum to another, engineering curricula require adherence to the Liberal Studies Guidelines (see below). Some require slight variations from those guidelines.

INDEPENDENT STUDY

Students who have high grade point averages may satisfy some elective credits by independent study of subjects or problems suitable for analytical investigative work. The student must identify a professor who is willing to supervise study of interest to the student. Together they must agree upon the work to be done, the credits earned (usually 1-3), and the course number (199, 299, 399, 499, 599, or 699) for which the student is to enroll before the beginning of a semester. Weekly meetings with the professor to discuss questions and report progress are customary.

LIBERAL STUDIES GUIDELINES

The College of Engineering requires one semester's worth of liberal elective courses in humanities, literature and social science for graduation. The college specifies that students should obtain both **breadth** (i.e., both social science *and* literature or humanities), and **depth** (i.e., more than one course in the same department).

The college has established general liberal elective guidelines that have been adopted by all departments, some of which have additional stipulations (see below).

FOR ALL ENGINEERING STUDENTS

As a graduation requirement, and to fulfill campus general education guidelines, all engineering undergraduate students must take 15 or 16 credits of liberal electives. These credits must fulfill the following subrequirements.

1. A minimum of two courses from the same subject area (<https://registrar.wisc.edu/subjectarea/>) (the description before the course number). At least one of these two courses must be above the elementary level (i.e., must have I, A, or D level designator), as indicated in Guide (<https://guide.wisc.edu/courses/>).
2. A minimum of 6 credits designated as humanities or literature, and an additional minimum of 3 credits designated as social

science. Foreign language courses count as humanities credits.¹

3. At least one course of at least 3 credits designated as ethnic studies (lower case "e" in the Course Guide). These credits may help satisfy subrequirements 1 or 2 as well, but they count only once toward the total required credits.

¹ **Exception:** "Retrocredits," which are credits awarded by foreign language departments for successful completion of a higher level course, do not count toward this subrequirement, nor toward the total credits required (15 or 16). They are still helpful: If a student completes one foreign language course at the intermediate level and is awarded retrocredits, then subrequirement 1 above is satisfied because the student is judged to have achieved "depth" in liberal studies.

ADDITIONAL RESTRICTIONS/SUBREQUIREMENTS FOR SPECIFIC DEPARTMENTS

Civil and Environmental Engineering: An economics course (from an approved list) and an environmental studies course (with approved characteristics) are required.

Industrial Engineering: ECON 101 Principles of Microeconomics or ECON 111 Principles of Economics-Accelerated Treatment is required.

RESOURCES

The solutions to challenges great and small lie not in the hands of one person, but emerge from the diverse ideas, perspectives and backgrounds of many people working together. Whether a prospective or current faculty member, staff member, or student, members of the College of Engineering create a welcoming community where they can be themselves and strive to become whatever they want to be. Here are some of the services and organizations that students can utilize along the way.

ENGINEERING SCHOLARSHIPS

The College of Engineering awards over two million dollars in scholarships each year to its students.

Incoming Freshman Awards: Beginning in 2021-2022, there will no longer be a separate scholarship application for incoming freshmen. The admissions applications of admitted students will be reviewed and selection will be based on students' academic record, extracurricular activities, application essays, and letters of recommendation. This new process pertains to both scholarships that are based on need and those which are not based on need. Learn more about College of Engineering scholarships for incoming first-year students here: <https://www.engr.wisc.edu/admissions/scholarships-aid/>.

Scholarship award considerations are based on a holistic approach that encourages diversity in the programs while considering course rigor and compatibility and potential for success in the program. Financial need can be a factor for some scholarships based on their Free Application for Federal Student Aid (FAFSA®). Students must submit a FAFSA to UW-Madison in order to be considered for need-based scholarships. For more information on the FAFSA, please refer to the Office of Student Financial Aid website: <https://financialaid.wisc.edu/applying/>.

Continuing Student Awards: Each spring, continuing undergraduate students in the College of Engineering are eligible to apply for college-

wide and departmental scholarships. The application period is March 1–May 1 and students must have progressed in their department to be considered for awards for the following academic year. Students can apply by visiting the Wisconsin Scholarship Hub (WiSH) (<https://wisc.academicworks.com/>).

Off-campus Transfer Students: Off-campus transfer students who accept their offer of direct admission to programs within the College of Engineering are invited to apply for the Transfer Student Scholarship. Each semester, several scholarships of \$1000 each are awarded to recognize the outstanding achievements of incoming transfer student scholars who join the College of Engineering from other colleges and universities.

For LEED scholarships (Leaders in Engineering Excellence and Diversity), please check the tab below for the Diversity Affairs Office (DAO).

ACADEMIC ADVISING

Each College of Engineering program has academic advisors (<https://www.engr.wisc.edu/academics/student-services/academic-advising/>) dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor in their student center.

UNDERGRADUATE LEARNING CENTER

The Undergraduate Learning Center (<https://www.engr.wisc.edu/academics/student-services/ulc/>) (ULC) in the College of Engineering provides tutoring and academic support programs for engineering undergraduates wanting to excel in their courses. The ULC is a place where students study, form study groups, and discuss engineering concepts and problem-solving strategies with their peers and with the tutors and facilitators.

Drop-In-Tutoring Sessions

Sessions are offered for over 60 courses in mathematics, chemistry, physics, statistics, computer sciences, and engineering. The sessions provide help with homework problems, concept review, and exam preparation. Drop-in tutoring sessions are offered each evening from Sunday to Thursday, resulting in approximately 15,000 student visits in a typical year.

PrEPS (Practicing Engineering Problem Solving) Labs

Labs were developed to help students succeed in core courses that have traditionally proved challenging for students. The courses targeted are early in the engineering curricula and contain dense material content delivered at a fast pace. The labs reinforce concepts through practicing problem solving skills. Students commit to meeting twice every week for 75 minutes per meeting.

PrEPS Study Tables

Study tables support the same courses as the PrEPS Labs but with a less structured approach. PrEPS Study Tables allow small groups of students who are interested in extra study time to meet regularly to discuss homework and concepts from the course. Availability varies by semester.

Tutoring by Request

Based on the Tutorial Services Room model developed at MIT, the College of Engineering offers Tutoring by Request (TBR) for students in critical need. Assistance is offered in a variety of

courses, ranging from gateway courses such as chemistry, math, physics courses, to intermediate-level engineering courses.

Special Courses and Workshops

Special courses are targeted toward helping students learn topics that span multiple courses such as math concepts common to a variety of introductory engineering courses. Self-guided online tutorials are available for several early math courses. Workshops are offered in topics such as MATLAB, R, and vector review to help students be successful in their engineering courses.

STUDY ABROAD

In today's global marketplace, there is an increasing need for broadly educated engineering graduates with cross-cultural skills, international understanding and proficiency in more than one language. International Academic Programs, in collaboration with the College of Engineering, is committed to providing and expanding international opportunities that will assist engineering students in obtaining these important skills.

International Academic Programs (IAP) offers semester, year-long and summer study abroad programs for engineering students (<https://www.engr.wisc.edu/academics/student-experience/study-abroad/>) at institutions in many countries around the world. These programs offer engineering students the opportunity to continue to make progress toward degree requirements and have a meaningful experience abroad.

The College of Engineering also offers a Certificate in International Engineering. Courses in language and culture taken abroad and in Madison can count toward this certificate, which demonstrates the student's knowledge of a specific country or region. This credential appears on the student's transcript, strengthens their resume, and testifies to their preparation for an international career.

For more information regarding international programs, visit <https://studyabroad.wisc.edu/>.

ENGINEERING CAREER SERVICES WITH COOPERATIVE EDUCATION

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website (<https://ecs.wisc.edu>) or call 608-262-3471.

DIVERSITY AFFAIRS OFFICE

The Diversity Affairs Office (DAO) (<https://www.engr.wisc.edu/academics/student-services/diversity-programs/>) works to broaden participation in engineering by attracting and supporting high-achieving students from historically underrepresented groups in the field of engineering, including women, students of color, LGBTQ+, first generation, and socioeconomically disadvantaged student populations. Each program offered by the DAO is centered on the core values of community, inclusion and social justice. In the DAO suite, every student in the College of Engineering can find a comfortable study space with access to

computers and printers, and a place to be their genuine and authentic selves.

Undergraduate Programs

The Leaders in Engineering Excellence and Diversity (LEED) Scholars is a community and continuing scholarship program providing students with monthly student development meetings, leadership opportunities, academic enhancement, adjunct advising, peer mentoring and networking, personal and career development, engagement in social justice, and community outreach. LEED Scholars events are open to any student interested in engaging in a diverse learning community.

The DAO has an advisor relationship and provides meeting space to the American Indian Science and Engineering Society, National Society of Black Engineers (NSBE-WBESS), Society of Hispanic Professional Engineers (SHPE), and Society of Women Engineers (SWE), and Queer and Trans Engineers (QTE).

High School Programs and Outreach

The DAO, with the help of undergraduate student leaders, offers engineering outreach visits at the college and at Wisconsin high schools. In the summer we offer residential programs for talented high school students underrepresented in engineering, including the Engineering Summer Program and Engineering Tomorrow's Careers (Society of Women Engineers).

Other Programs

The DAO develops programs and provides services designed to promote a welcoming climate that celebrates diversity for everyone in the College of Engineering. The variety of events and projects include: Women in Engineering events, a regular college climate survey, Diversity Discussions, and Welcoming Classroom training for new Teaching Assistants.

COMPUTER-AIDED ENGINEERING CENTER

The Computer-Aided Engineering Center (CAE) (<http://www.cae.wisc.edu>) provides computing resources, facilities and services for students, faculty, and staff in the college. The broad range of services and resources include:

- Windows and Linux computer classrooms;
- open labs which have Windows and Linux workstations;
- industry-standard engineering software;
- software and services available on students' personal computers;
- reliable file storage for coursework;
- customer consulting and help-desk services.

The CAE walk-in help desk is located at 1410 Engineering Drive; 608-262-5349; submit contact form: <https://www.cae.wisc.edu/contact/>. For more information, see the CAE website (<http://www.cae.wisc.edu>).

WELLNESS SERVICES

University Health Service's mental health (<https://www.uhs.wisc.edu/mental-health/>) providers understand the complexities of student life and offer an open, safe, and confidential environment to help students through issues that may interfere with their development, well-being, and academic productivity.

UHS's no-cost mental health services include individual, couple/partner, group counseling, outreach programming, and stress management. They

also offer 24/7 crisis services. Psychiatry services are also available for medication management.

University Health Services/Mental Health Services
333 East Campus Mall
Madison, WI 53715-1384
608-265-5600

REGISTERED STUDENT ORGANIZATIONS

The College of Engineering has just as many opportunities outside the classroom as it does inside! CoE students have access to a wide variety of groups, organizations, and services that will help make their time on campus memorable and unique. There are more than 50 engineering affiliated student organizations (<https://www.engr.wisc.edu/academics/student-experience/student-organizations/>) on campus. Students can get involved in organizations that range from competitive, such as teams that build and race vehicles or concrete canoes, to service-oriented, honors societies, and student government. The College of Engineering also offers many discipline-related student chapters of professional organizations that will connect students with their peers and also help them make professional contacts.

EMERGING LEADERS IN ENGINEERING

The Emerging Leaders in Engineering (ELE) program is the College of Engineering's undergraduate leadership program.

ELE is a one-year cohort-based program created by engineering students, for engineering students. Students who graduate from the ELE program are awarded a formal leadership certificate by the UW-Madison Center for Leadership and Involvement.

Those who are admitted into the program receive individual leadership coaching, join our young alumni mentorship program, create a personal/professional development plan, work on local technical issues in our community, and receive course credit for their experience. Any student going into their sophomore year is encouraged to apply.

For more information please contact Paige LaPoint (plapoint@wisc.edu), or visit our website (<https://www.engr.wisc.edu/academics/student-experience/emerging-leaders-in-engineering/>).

HONORS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates—not just a few—excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

ENGINEERING HONORS IN RESEARCH

Select students in degree-granting departments may pursue the Honors in Research distinction in certain departments. It requires completion of a certain number of semesters of faculty-guided independent study work and completion of a written thesis. Honors in Research programs have been developed for majors in biomedical engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, engineering mechanics, geological engineering, industrial engineering, materials science and engineering, mechanical engineering,

and nuclear engineering. Interested students should contact their department for more information.

ENGINEERING HONORS IN THE LIBERAL ARTS (EHLA)

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (<https://www.engr.wisc.edu/academics/undergraduate-academics/honors/>) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "!" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

BIOMEDICAL ENGINEERING

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

BIOLOGY IN ENGINEERING FOR ENGINEERING MAJORS, CERTIFICATE

The biology in engineering certificate (BEC) is designed for engineering students who want to strengthen their biology backgrounds. It is offered especially to encourage engineering students in traditional disciplines to prepare themselves to understand the special engineering problems in biology and medicine. A student successfully fulfilling the requirements will have the notation "Biology in Engineering Certificate" added to the transcript.

HOW TO GET IN

The Biology in Engineering Certificate was designed and is administered by a Biology in Engineering Certificate Committee composed of faculty from multiple engineering disciplines. Students normally should begin the program during their sophomore or junior year, but seniors may also apply.

Prerequisites to enter the certificate program:

- Prior admission to an engineering B.S. degree program (<http://guide.wisc.edu/undergraduate/engineering/#degreesmajorscertificatetext>) or Biological Systems Engineering (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/biological-systems-engineering/biological-systems-engineering-bs/>) through the College of Agricultural and Life Sciences (<http://guide.wisc.edu/undergraduate/agricultural-life-sciences/>) at the UW-Madison.
- Students pursuing an undergraduate degree at UW-Madison need to have completed at least one intermediate-level (minimum 200-level) engineering course.

Click here (<https://www.engr.wisc.edu/academics/undergraduate-academics/biology-in-engineering-certificate/>) for certificate application.

REQUIREMENTS

The certificate requires a minimum of 15 credits:

GENERAL BIOLOGY: 5 CREDITS

Code	Title	Credits
Choose one combination:		
BIOCORE 381 & BIOCORE 382	Evolution, Ecology, and Genetics and Evolution, Ecology, and Genetics Laboratory	5
BIOCORE 383 & BIOCORE 384	Cellular Biology and Cellular Biology Laboratory	5
ZOOLOGY/ BIOLOGY 101 & ZOOLOGY/ BIOLOGY 102	Animal Biology and Animal Biology Laboratory	5
ZOOLOGY/BIOLOGY/ BOTANY 151	Introductory Biology	5
ZOOLOGY/BIOLOGY/ BOTANY 152	Introductory Biology	5
ZOOLOGY 153	Introductory Biology (and)	3
BIOLOGY/ ZOOLOGY 102	Animal Biology Laboratory (or)	
choose 2 more credits from list below		

ADVANCED BIOLOGY: 5-CREDIT MINIMUM

Code	Title	Credits
Advanced Biology (5 cr. minimum): Recommended to choose a lecture/lab combination as outlined below, but any combination of courses is acceptable		
ANAT&PHY 335	Physiology	5

ANAT&PHY 435	Fundamentals of Human Physiology	5
BIOCORE 485 & BIOCORE 486	Principles of Physiology and Principles of Physiology Laboratory	5
BIOCORE 587	Biological Interactions	3
BIOCHEM 501	Introduction to Biochemistry	3
BIOCHEM 507	General Biochemistry I	3
BIOCHEM 508	General Biochemistry II	3-4
BMOLCHEM 314	Introduction to Human Biochemistry	3
GENETICS 466 & GENETICS 545	Principles of Genetics and Genetics Laboratory	5
MICROBIO 303 & MICROBIO 304	Biology of Microorganisms and Biology of Microorganisms Laboratory	5
MICROBIO/ FOOD SCI 324 & MICROBIO/ FOOD SCI 325	Food Microbiology Laboratory and Food Microbiology	5
MICROBIO 330	Host-Parasite Interactions	3
M M & I 301 & M M & I 302	Pathogenic Bacteriology and Medical Microbiology Laboratory	5
M M & I 341	Immunology	3
M M & I/PATH-BIO 528	Immunology	3
M M & I/ BIOCHEM 575	Biology of Viruses	2
ZOOLOGY/ ENVIR ST 315 & ZOOLOGY 316	Limnology-Conservation of Aquatic Resources and Laboratory for Limnology-Conservation of Aquatic Resources	4-5
ZOOLOGY/ENTOM/ M M & I/PATH-BIO 350	Parasitology	3
ZOOLOGY/ANTHRO/ BOTANY 410	Evolutionary Biology	3
ZOOLOGY 430	Comparative Anatomy of Vertebrates	5
ZOOLOGY 470 & ZOOLOGY 555	Introduction to Animal Development and Laboratory in Developmental Biology	6
ZOOLOGY 504	Modeling Animal Landscapes	3-5
ZOOLOGY/ ENVIR ST 510 & ZOOLOGY/ ENVIR ST 511	Ecology of Fishes and Ecology of Fishes Lab	5
ZOOLOGY/ PSYCH 523	Neurobiology	3
ZOOLOGY 525	Tropical Herpetology	1
ZOOLOGY 570	Cell Biology	3
ZOOLOGY 611 & ZOOLOGY 612	Comparative and Evolutionary Physiology and Comparative Physiology Laboratory	5

BIOLOGY IN ENGINEERING: 3-CREDIT MINIMUM

Code	Title	Credits
Biology in Engineering (3 cr. minimum): Choose one		3
B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/PHM SCI 430	Biological Interactions with Materials	3

I SY E/B M E 564	Occupational Ergonomics and Biomechanics	3
INTEREGR 301	Engineering and Biology: Technological Symbiosis	1-4
M S & E 553	Nanomaterials & Nanotechnology	3

SEMINAR: 1 CREDIT

Code	Title	Credits
B M E/BSE/CBE 517	Biology in Engineering Seminar	1
Total Credits		1

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Develop an understanding of basic biology and a selected area of advanced biology.
2. Develop an understanding of the challenges in biology, medicine, public health, and environmental health that are currently being addressed by engineering research and development.
3. Demonstrate proficiency in the application of engineering principles to solve problems in the field based on biological principles.

BIOMEDICAL ENGINEERING, B.S.

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

To prepare students for such careers, the 128-credit, four-year BME undergraduate degree emphasizes engineering design; access to cooperatives/internships at local or national medical device manufacturers, hospitals, or laboratories; continuous advising; flexibility in engineering specialization areas; participation in program evaluation and improvement; study-abroad opportunities; and an option to complete a one-year M.S degree following the undergraduate program.

The cornerstone of the BME program is its **unique, seven-semester design curriculum**. Students take an advising/design project course the freshman year and every semester during the sophomore through senior years. A faculty member advises small teams of students, serving as advisor/consultant/mentor, to guide them through real-world design projects solicited from clients throughout the university, medical profession, industry, and the community. These clients serve as resources for students in their project, conduct discussions, and expose the students to various aspects of the BME field. Over the course of

each semester, teams design, fabricate, and ultimately present a product that meets the needs of the client. This novel approach gives students an exceptionally balanced education by incorporating clinical and biomedical industry experience, thus expanding their network. Overall, the design experiences highlight the very multidisciplinary nature of BME.

Within the program, BME students choose a course of study that emphasizes one of the following four specializations within the field:

1. **Bioinstrumentation and medical devices** is the application of electronics, measurement principles, and techniques to develop devices used in diagnosis and treatment of disease. Examples include the electrocardiogram, brain-computer interface, implantable electrodes, sensors, tumor ablation, and other medical devices. Neuroengineering, a subfield, involves using engineering technology to study the function of neural systems and the development of implantable technology for neuroprosthetic and rehabilitation applications.
2. **Biomedical imaging and optics** involves the design and enhancement of systems for noninvasive anatomical, cellular, and molecular imaging. In addition to common imaging techniques such as magnetic resonance imaging (MRI), computed tomography (CT), and positron emission tomography (PET), biomedical imaging includes topics such as biophotonics, optics, and multimode imaging, and is now expanding to serve functional and therapeutic purposes as well. Advanced capabilities result when fundamentals of engineering, physics, and computer science are applied in conjunction with the expertise of clinical collaborators.
3. **Biomechanics** applies engineering mechanics for understanding biological processes and for solving medical problems at systemic, organ, tissue, cellular, and molecular levels. This includes the mechanics of connective tissues (ligament tendon, cartilage and bone) as well as orthopedic devices (fracture fixation hardware and joint prostheses), vascular remodeling (pulmonary hypertension), muscle mechanics with injury and healing, human motor control, neuromuscular adaptation (with age, injury, and disease), microfluidics for cellular applications, cellular motility and adhesion, and rehabilitation engineering (quantifying, adapting and restoring function for those who lost abilities).
4. **Biomaterials, cellular and tissue engineering** involves the characterization and use of structural materials, derived from synthetic or natural sources, to design medical products that safely interact with tissues for therapeutic or diagnostic purposes such as artificial blood vessels, heart valves, orthopedic joints, and drug delivery vehicles. Tissue engineers understand structure-function relationships in normal and pathological tissues to engineer living tissues and/or biological substitutes to restore, maintain, or improve function. At the cellular and molecular level this includes the study or manipulation of biological processes such as the cell's differentiation, proliferation, growth, migration, and apoptosis.

Although the various disciplines within BME can be separately defined, solving a biomedical program requires an overall understanding of the field. For example, the design of an artificial hip requires an understanding of the forces and **biomechanics** of human movement as well as the mechanical and material properties of the prosthetic device. The **material** choice and topography play a critical role in cellular and tissue integration, which ultimately leads to long-term stability of the implant. In addition, **biomedical imaging** techniques are required to characterize the morphology of the diseased hip and the success of the

procedure. Finally, **instrumentation** devices are utilized during the hip replacement surgery.

Students choose the biomedical engineering field to be of service to people; for the excitement of working with living systems; and to apply advanced technology to the complex problems of medical care. Students in the BME program can expect to develop skills in innovative thinking, critical analysis of ethics, project management, and technical writing, all in an environment that cultivates creativity, teamwork, and curiosity. With many possible focuses within the major, BME students have the opportunity to explore and cultivate their interests in specific topics while applying the concepts of engineering to medical applications, hands-on projects, and cutting-edge research.

Students successfully completing the B.S. degree in BME with an overall GPA of 3.0 or a GPA of 3.25 for the last 60 credits of the B.S. program are eligible to apply for the one-year M.S. degree.

BIOMEDICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path graduates choose, be it a job, postgraduate education, or volunteer service, be it in engineering or another field, we have for our graduates the following objectives; that they will:

1. exhibit strong skills in problem solving, leadership, teamwork, and communication;
2. use these skills to contribute to their communities;
3. make thoughtful, well-informed career choices; and
4. demonstrate a continuing commitment to and interest in their own and others' education.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising ([https://](https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/)

www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
<i>Mathematics</i>		19
<i>Science</i>		37
<i>General Education</i>		21
<i>Engineering Courses:</i>		
Introduction to Engineering		3
Engineering Mechanics Core Courses		6
Biomedical Engineering Core Courses		18

<i>Engineering area technical electives (see below)</i> 15		
<i>One advanced B M E technical elective from any area</i> 3		
<i>Engineering technical elective: Any engineering course(s) from a degree-granting engineering program</i> ¹ 3		
Total Credits 48		

- ¹
- The number of credits in this area can range from 0 to 11 credits. This number of credits depends on how students decide to fulfill various requirements, when they enter or progress into program, and if they study abroad. Examples include (and are not limited to): Taking PHYSICS 201 General Physics/General Physics instead of E M A 201 Statics adds 3 credits to this area. Taking B M E 325 Applied Statistics for Biomedical Engineers instead of STAT 324 Introductory Applied Statistics for Engineers removes 3 credits from this area. Transfer students are not required to take INTEREGR 170 Design Practicum and this adds 3 credits to this area. Students who study abroad may miss a 1-credit design course and this adds 1 credit to this area. Regardless of the choices made, all students must have at minimum 48 credits of engineering courses from degree-granting programs.
 - EPD courses are not included in this category.
 - InterEGR courses are not included in this category except INTEREGR 170 Design Practicum and INTEREGR 301 Engineering and Biology: Technological Symbiosis
 - Only 3 credits of an engineering independent study may count (e.g., B M E 399 Independent Study, B M E 489 Honors in Research, CBE 699 Advanced Independent Studies, etc.).
 - Special topics courses must have prior approval of the B M E Curriculum Committee.
 - B M E 325 Applied Statistics for Biomedical Engineers counts for engineering credits.

BIOMEDICAL ENGINEERING AREA TECHNICAL ELECTIVE REQUIREMENTS

Choose 15 credits of area technical electives in one of the following tracks and at least one advanced B M E elective from any area:

Bioinstrumentation and Medical Devices:

Code	Title	Credits
Required Area Elective		
E C E 230	Circuit Analysis	4
Area Electives in Bioinstrumentation 11		
Choose from any ECE course, the courses below, and from the advanced BME electives in this area		
M E 445	Mechatronics in Control & Product Realization	3
Advanced BME Area Technical Electives in Bioinstrumentation and Medical Devices		
B M E/E C E 462	Medical Instrumentation	3
B M E/E C E 463	Computers in Medicine	3
B M E/ MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3

Biomedical Imaging and Optics:

Code	Title	Credits
Required Area Elective		
E C E 330	Signals and Systems	3
Area Electives in Biomedical Imaging 12		
Choose from the following and from the advanced BME electives in this area		
E C E 203	Signals, Information, and Computation	3
E C E 331	Introduction to Random Signal Analysis and Statistics	3
E C E 431	Digital Signal Processing	3
E C E/COMP SCI 533	Image Processing	3
B M E/H ONCOL/ MED PHYS/ PHYSICS 501	Radiation Physics and Dosimetry	3
B M E/ MED PHYS 566	Physics of Radiotherapy	3
B M E/ MED PHYS 573	Medical Image Science: Mathematical and Conceptual Foundations	3
B M E/ MED PHYS 574	Imaging in Medicine: Applications	3
B M E/ MED PHYS 580	The Physics of Medical Imaging with Ionizing Radiation	4
N E 305	Fundamentals of Nuclear Engineering	3
N E 408	Ionizing Radiation	3
N E 427	Nuclear Instrumentation Laboratory	2

Advanced BME Area Technical Electives in Biomedical Imaging

B M E/ MED PHYS 530	Medical Imaging Systems	3
B M E/ MED PHYS 535	Introduction to Energy-Tissue Interactions	3
B M E/ MED PHYS 578	Non-Ionizing Diagnostic Imaging	4
B M E/MED PHYS/ PHMCOL-M/ PHYSICS/ RADIOL 619	Microscopy of Life	3

Biomechanics:

Code	Title	Credits
Required Area Elective		
E M A 202 or M E 240	Dynamics	3

Area Electives in Biomechanics 12

Choose from any E M A or M E course, the courses below, and from the advanced B M E electives in this area

M S & E 350 or M S & E 351	Introduction to Materials Science Materials Science-Structure and Property Relations in Solids	3
M S & E/CHEM 421	Polymeric Materials	3
CBE 320 or B M E/CBE 330	Introductory Transport Phenomena Engineering Principles of Molecules, Cells, and Tissues	4
CBE 324	Transport Phenomena Lab	3
CBE/M E 525	Macromolecular Hydrodynamics	3

Advanced B M E Area Technical Electives in Biomechanics

B M E/M E 414	Orthopaedic Biomechanics - Design of Orthopaedic Implants	3
B M E/M E 415	Biomechanics of Human Movement	3
B M E/M E 505	Biofluidics	3
B M E/I SY E 564	Occupational Ergonomics and Biomechanics	3
B M E/M E 603	Topics in Bio-Medical Engineering	1-3
B M E/M E 615	Tissue Mechanics	3
B M E/I SY E 662	Design and Human Disability and Aging	3

Biomaterials, Cellular and Tissue Engineering:

Code	Title	Credits
Required Area Elective		
B M E/CBE 330 or CBE 320	Engineering Principles of Molecules, Cells, and Tissues Introductory Transport Phenomena	4

Area Electives in Biomaterials, Cellular and Tissue Engineering 12

Choose from any CBE or M S & E course, the courses below, and from the advanced B M E electives in this area

M E 417	Transport Phenomena in Polymer Processing	3
M E 418	Engineering Design with Polymers	3
M E/STAT 424	Statistical Experimental Design	3
M E/BSE/ FOOD SCI 441	Rheology of Foods and Biomaterials	3

B M E 511	Tissue Engineering Laboratory	1
Advanced BME Area Technical Electives in Biomaterials, Cellular and Tissue Engineering		
B M E/CBE 510	Introduction to Tissue Engineering	3
B M E/CBE 520	Stem Cell Bioengineering	3
B M E 545	Engineering Extracellular Matrices	3
B M E 550	Introduction to Biological and Medical Microsystems	3
B M E 556	Systems Biology: Mammalian Signaling Networks	3
B M E/CBE 560	Biochemical Engineering	3
B M E/M E 615	Tissue Mechanics	3
B M E 630	Nanomaterials for Biomedical Applications	3

TOTAL DEGREE CREDITS: AT LEAST 128**UNIVERSITY DEGREE REQUIREMENTS**

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

ZOOLOGY 570			
ZOOLOGY 611			
BIOCORE 587			
Area-Engineering Technical Elective		3	
Area-Engineering Technical Elective		3	
		16	16

Total Credits 128-129

FOOTNOTES

Med—These courses are identified as requirements for most medical schools and are included within the 128 degree credits. Students not wishing to attend medical school may choose any of the listed options. Choosing other options (such as CHEM 103/CHEM 104 vs. CHEM 109 or INTEREGR 397 vs. ZOOLOGY/BIOLOGY/BOTANY 152) will affect the total number of credits.

Medical schools have varying requirements. Liberal electives, free electives, and zoology electives can often be used to satisfy these. **Check requirements early.** For example, to prepare for the MCAT it is recommended that students take psychology and sociology. In addition, UW—Madison and others require an intermediate humanities or social science with an intensive writing component (Comm B). All these can be fulfilled within the liberal studies requirements and thus early planning starting freshman year is important. A good resource is: <http://prehealth.wisc.edu/>.

¹ CHEM 103 General Chemistry I & CHEM 104 General Chemistry II may be substituted for CHEM 109 Advanced General Chemistry. For this choice, the excess 4 credits are counted as free electives. Most medical schools require one year of basic chemistry. UW–Madison’s medical school (and others) accepts CHEM 109 as a full-year equivalent.

² INTEREGR 170 Design Practicum is required only for students directly admitted to B M E as freshmen and counts toward the 48 engineering credits.

³ It is highly recommended that students take E M A 201 Statics instead of PHYSICS 201 General Physics. If PHYSICS 201 is chosen instead of E M A 201, another engineering course from a degree-granting engineering program must be substituted for E M A 201. The excess 5 credits from PHYSICS 201 are counted as free elective credits. PHYSICS 207 General Physics & PHYSICS 208 General Physics may be used to substitute for PHYSICS 201 General Physics & PHYSICS 202 General Physics.

⁴ CHEM 341 Elementary Organic Chemistry may be substituted by those students who are not interested in satisfying premed requirements and who expect to take only one semester of organic chemistry (CHEM 341 is not permitted as a prerequisite for CHEM 344 Introductory Organic Chemistry Laboratory/CHEM 345 Intermediate Organic Chemistry).

Either CHEM 344/ CHEM 345 or CHEM 327 Fundamentals of Analytical Science (or CHEM 329 Fundamentals of Analytical Science) is required.

Premeds or students interested in biomaterials, cellular and tissue engineering should choose to take CHEM 343 Introductory Organic Chemistry, CHEM 344, and CHEM 345.

⁵ It is recommended that students take statistics and/or computer science in the freshman year for those needing additional core course options.

⁶ Students who are admitted late to the program and/or students who take part in another experience (such as co-op and/or study abroad) missing B M E 200 Biomedical Engineering Design, B M E 300 Biomedical Engineering Design, or B M E 301 Biomedical Engineering Design may substitute for up to two of these courses for the semester they are not in the program or at UW-Madison.

Approved substitutions include: B M E 1 Cooperative Education Program 1 cr, engineering research credit, or any 200-level or above additional engineering technical elective lab experience.

For more information on the unique design sequence see: <http://bmedesign.engr.wisc.edu/about/>.

⁷ Students very serious about medical school and learning about biology may select to apply for BIOCORE, a rigorous biology honors program:

- BIOCORE 381 Evolution, Ecology, and Genetics
- BIOCORE 382 Evolution, Ecology, and Genetics Laboratory
- BIOCORE 383 Cellular Biology
- BIOCORE 384 Cellular Biology Laboratory
- BIOCORE 485 Principles of Physiology
- BIOCORE 486 Principles of Physiology Laboratory

The BIOCORE courses have limited enrollment and students must be accepted into this program (applying as freshman). It is generally advisable to complete the entire sequence once it is started.

Only BIOCORE 382 Evolution, Ecology, and Genetics Laboratory is not required and is not necessary to fulfill premed requirements; however, it is recommended as it has been helpful in understanding the BIOCORE lab process. If all the other BIOCORE courses are taken (a total of 16 cr), this will replace the ZOOLOGY/BIOLOGY 101 Animal

Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory, the Advanced Life Science Elective, ANAT&PHY 335 Physiology, and INTEREGR 397 Engineering Communication.

⁸ The three core courses are all required: B M E 310 Bioinstrumentation, B M E 315 Biomechanics, B M E/PHM SCI 430 Biological Interactions with Materials, but they can be taken in any order. It is recommended that students take the one in their track of interest first, or as early as possible.

⁹ ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology, which satisfies Communication Part B, may be substituted for INTEREGR 397 Engineering Communication. For the Biocore program, BIOCORE 384 Cellular Biology Laboratory substitutes for INTEREGR 397 Engineering Communication.

Students interested in going to medical school should use this space/credits for BIOCHEM 501 Introduction to Biochemistry which is required for the MCAT.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

CHEMICAL AND BIOLOGICAL ENGINEERING

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis

on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

CHEMICAL ENGINEERING, B.S.

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems.

Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

CHEMICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The department recognizes that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths.

Whatever path graduates choose, be it a job, graduate school, or volunteer service, be it in engineering or another field, within the next 5 years and beyond, we have for our graduates the following objectives:

1. That they will exhibit strong skills in problem-solving, leadership, teamwork, and communication;
2. That they will use these skills to contribute to their communities;
3. That they will make thoughtful, well-informed career choices; and
4. That they will demonstrate a continuing commitment to and interest in education (their own and others').

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying

to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the chemical engineering degree program.

Code	Title	Credits
	Mathematics	19
	Physics	10
	Chemistry	20
	Life Science	6
	Core Engineering Requirement	49
	Professional Breadth	6
	Communication Skills	6
	Liberal Studies Requirement	16
Total Credits		132

MATHEMATICS REQUIREMENT

Transfer students must have equivalent math courses to meet the calculus requirement with a minimum of 12 credits to cover the three-course basic math sequence. Any deficiency in total math credits must be made up with electives in science or engineering.

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
or MATH 319	Techniques in Ordinary Differential Equations	
STAT 324	Introductory Applied Statistics for Engineers	3
Total Credits		19

PHYSICS REQUIREMENT

Transfer students who receive fewer than 6 credits for the required courses must make up the credit shortage with another physics course.

Code	Title	Credits
PHYSICS 201	General Physics	5
or PHYSICS 207	General Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
Total Credits		10

CHEMISTRY REQUIREMENT

Credit shortages caused by transfer of freshman chemistry courses at fewer than 9 credits must be made up with chemistry, biochemistry, or chemical engineering courses.

Code	Title	Credits
<i>General Chemistry (choose one)</i>		5
CHEM 109	Advanced General Chemistry ((preferred))	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 329	Fundamentals of Analytical Science	4
CHEM 343 & CHEM 345 & CHEM 344	Introductory Organic Chemistry and Intermediate Organic Chemistry and Introductory Organic Chemistry Laboratory	8
CHEM 562	Physical Chemistry	3
Total Credits		20

LIFE SCIENCE

Students who meet the Introductory Biology requirement with an AP exam are encouraged to take two advanced biology electives.¹

Code	Title	Credits
<i>Introductory Biology requirement (choose one)</i>		3
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
<i>Advanced Biology requirement (choose one)</i>		3
BIOCHEM 501	Introduction to Biochemistry	
BIOCHEM 507	General Biochemistry I	
ZOOLOGY 570	Cell Biology	
GENETICS 466	Principles of Genetics	
MICROBIO 303	Biology of Microorganisms	
Total Credits		6

¹ BIOCORE 381 Evolution, Ecology, and Genetics and BIOCORE 383 Cellular Biology may be used to satisfy the Life Sciences Requirements.

CORE ENGINEERING REQUIREMENT

Code	Title	Credits
CBE 150	Introduction to Chemical Engineering	1
CBE 250	Process Synthesis (with a grade of C or better)	3
CBE 255	Introduction to Chemical Process Modeling	3
CBE 310	Chemical Process Thermodynamics	3
CBE 311	Thermodynamics of Mixtures	3
CBE 320	Introductory Transport Phenomena (with a grade of C or better)	4
CBE 324	Transport Phenomena Lab	3
CBE 326	Momentum and Heat Transfer Operations	3
CBE 424	Operations and Process Laboratory	5
CBE 426	Mass Transfer Operations	3
CBE 430	Chemical Kinetics and Reactor Design	3
<i>Select one of the following:</i>		3

CBE 440	Chemical Engineering Materials	
CBE 540	Polymer Science and Technology	
CBE 547	Introduction to Colloid and Interface Science	
CBE 450	Process Design	3
CBE 470	Process Dynamics and Control	3
CBE Electives ²		6
Total Credits		49

² Chemical Engineering electives may be chosen from any of the CBE courses that are not required, numbered 300 or above (excluding seminar courses). A maximum of two credits of co-op work (CBE 1 Cooperative Education Program) may be used to meet the CBE elective requirement. BSE/FOOD SCI 642 Food and Pharmaceutical Separations can be taken as a CBE elective. Qualified undergraduates may take graduate-level (600 or 700) courses to fulfill this requirement.

PROFESSIONAL BREADTH

Select 6 credits

Code	Title	Credits
Professional Breadth Credits³		6

Courses 300+ from the following College of Engineering departments and programs may be used:

Biomedical Engineering
Civil and Environmental Engineering
Electrical and Computer Engineering
Engineering Mechanics and Astronautics
Engineering Professional Development
Geological Engineering
Industrial Engineering
Interdisciplinary Courses (Engineering)
Materials Science and Engineering ⁴
Mechanical Engineering
Nuclear Engineering
Engineering Physics

Courses 300+ from the following departments in the College of Letters and Sciences may be used:

Chemistry
Computer Sciences
Math
Physics

The following courses may also be used:

ACCT I S 300	Accounting Principles
MICROBIO 303	Biology of Microorganisms
BIOCHEM 501	Introduction to Biochemistry
BIOCHEM 507	General Biochemistry I
BIOCORE 381	Evolution, Ecology, and Genetics
BIOCORE 383	Cellular Biology
BSE/ FOOD SCI 642	Food and Pharmaceutical Separations
ECON/A A E/ ENVIR ST 343	Environmental Economics

ENVIR ST/ PHILOS 441	Environmental Ethics	
FINANCE/ ECON 300	Introduction to Finance	
GENETICS 466	Principles of Genetics	
HIST SCI 337	History of Technology	
STAT/M E 424	Statistical Experimental Design	
ZOOLOGY 570	Cell Biology	
Total Credits		6

Students may petition the department to allow other courses related to engineering professional practice. To request that a course not listed above be used, the student should fill out the Professional Breadth Requirement Course Request form available online and submit it to the advisor. The department will then determine if the course can be counted toward the Professional Breadth Requirement. Petitions must be submitted before the beginning of the semester in which the course is to be taken.

³ The objective of this requirement is to provide students with skills to interact with professionals from other disciplines. Suitable courses for this requirement include courses in engineering (excluding CBE) and science, as well as a variety of other disciplines.

⁴ Full degree credit is not allowed if a student takes both CBE 440 Chemical Engineering Materials and M S & E 350 Introduction to Materials Science. In this case M S & E 350 Introduction to Materials Science will be awarded only 1 degree credit.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition 5	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	3

⁵ For Part A of the General Education Communication Requirement (3 cr) students must select one course with an "a" designation in "g" of the "geBLC" information in the Course Guide. Some students will be exempt from this requirement based on their placement test scores or advanced placement in English. CBE 424 Operations and Process Laboratory satisfies Part B of the General Education Communication Skills Requirement.

LIBERAL STUDIES ELECTIVES

Students must complete 16 credits of liberal studies according to the College of Engineering requirements⁶.

- ⁶
1. Liberal studies elective courses must be classified as either Humanities, Social Studies, or Literature courses (identified by the letters H, S, L, or Z in "B" of the "geBLC" information in the Guide). At least six credits must have a breadth designation of Humanities (H, L, or Z), and at least three credits must have a designation of Social Studies (S or Z). Foreign language courses count as H credits.
 2. A three-credit ethnic studies course must be selected from the College of Letters & Science. Acceptable courses are identified by the

letter "e" in Guide. If appropriate, the ethnic studies course may be among those used to satisfy the concentration requirement.

3. A minimum of two liberal studies courses must be taken from the same department or program. At least one of these two courses must be at an intermediate or advanced level (designated in Guide).

4. Retroactive credits may be awarded for foreign-language work done in high school. The following conditions apply:

- A university-level foreign language course must be taken before the student has earned 30 college credits in residence.
- Retroactive Language Credit Request Form must be completed and submitted to the language instructor during the first two weeks of class.
- The student must earn a B or better in this course.
- Such credits do not count toward the 16 liberal-studies credits required. They may, however, be used to satisfy the concentration and depth requirements as stated in number three above and count as degree credits.

5. English composition courses, English as a Second Language courses, and basic communications arts courses are not accepted as liberal studies electives.

FREE ELECTIVES

Students fulfilling their course requirements with fewer than 132 credits must take additional free-elective credits to comply with the 132-credit minimum graduation requirement.

COURSE SUBSTITUTION REGULATIONS

1. Any student may, with advisor approval, replace up to 12 credits of required courses in the curriculum, except CBE 424 Operations and Process Laboratory, by an equal number of credits of other courses within the limitations listed under (3) below.
2. Any student who wishes to amend the curriculum by more than 12 credits or wishes to appeal the advisor's decision in (1) or to request exception to (3) below must submit a written request to the chair of the department, who will bring it to the department faculty for consideration.
3. Restrictions on course substitutions are as follows:
 - a. Physics courses may be replaced by science or engineering courses.
 - b. Chemistry/life science courses must be replaced by courses with significant chemistry/life science content.
 - c. Engineering courses must be replaced by engineering courses.
 - d. Lab courses must be replaced by courses with an equal number of hours of lab courses.
 - e. English as a Second Language courses, and MATH 112 Algebra, MATH 113 Trigonometry, and MATH 114 Algebra and Trigonometry may not be used for course substitutions.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. ability with engineering application of the basic sciences to the design, analysis, and control of chemical, physical, and biological processes, including the hazards associated with these processes.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits Spring	Credits
CHEM 109	5 CHEM 329	4
MATH 221	5 MATH 222	4
CBE 150	1 PHYSICS 201	5
Communications A	3 Liberal Studies Elective	3
Liberal Studies Elective	3	
	17	16

Total Credits 132

¹ CBE 250 Process Synthesis and CBE 320 Introductory Transport Phenomena both require a grade of C or better.

² CHEM 343 Introductory Organic Chemistry requires a grade of C or better.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

CIVIL AND ENVIRONMENTAL ENGINEERING

Civil and environmental engineers are responsible for the sustainable design of facilities that protect the health and welfare of communities and the environment, while also ensuring society's financial health. More specifically, they are responsible for the conception, design, and construction of public works such as:

- the highways, streets, and bridges that we walk, bike, and drive on
- the water systems and earthworks that treat the water we drink, manage the water we swim in and boat on, and protect us and our property from floodwaters

- the homes, schools, factories, theaters, and stadiums in which we live, learn, work, and play
- the airports, railways, waterways, and harbors that provide additional mobility for people and the materials they produce and consume
- the treatment and emission systems that ensure the safety of the air we breathe
- the recycling, reuse, and disposal systems used to minimize the production of and also provide for the containment of the solid and hazardous wastes we produce
- the production and transmission facilities for the electricity we use, including generation facilities for both conventional and renewable energy sources

Civil and environmental engineers are also responsible for the operation of these facilities, an aspect of the field that is being rapidly integrated into the Internet of Things with real-time "big data" collection systems for automated control. This makes it possible for society to rely on:

- autonomous cars, trucks, and mass transport systems, providing safer travel with reduced traffic congestion, improved roadway capacity, reduced energy consumption and air emissions
- smart water infrastructure, including systems that will reduce water consumption, save energy, and improve community resiliency in the wake of natural and human-caused disasters
- intelligent buildings, including systems that reduce energy consumption, improve employee and student comfort, and allow for adaptation of structural systems to changing wind and seismic loads

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in the different civil and environmental engineering disciplines. These disciplines include construction engineering and management, environmental engineering, geological and geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Civil and environmental engineers perform their work in an interdisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF CIVIL AND ENVIRONMENTAL ENGINEERING PROGRAMS

Create, integrate, and transfer civil and environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

CIVIL AND ENVIRONMENTAL ENGINEERING PROGRAMS EDUCATIONAL OBJECTIVES

Prepare graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge;

modern tools; design principles; ethical practice; and communication, leadership, and team skills.

- Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
- Understand and incorporate economic, environmental, political, social, safety, and global considerations in design, investigation, and construction of natural and built systems.
- Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies, and tools for engineering analysis, design, and decision making.
- Serve others through participation in professional and/or civic activities and responsibilities.

RESOURCES AND SCHOLARSHIPS

FACILITIES

Facilities available include modern and fully equipped laboratories for instruction and research in the following areas:

Environmental Engineering
 Fluid Mechanics
 Geoengineering
 Hydraulics
 Data Acquisition and Analysis
 Structures and Materials Testing
 Transportation Engineering
 Environmental Chemistry and Technology

CIVIL ENGINEERING, B.S.

Civil and environmental engineers are responsible for the sustainable design of facilities that protect the health and welfare of communities and the environment, while also ensuring society's financial health. More specifically, they are responsible for the conception, design, and construction of public works such as:

- the highways, streets, and bridges that we walk, bike, and drive on
- the water systems and earthworks that treat the water we drink, manage the water we swim in and boat on, and protect us and our property from floodwaters
- the homes, schools, factories, theaters, and stadiums in which we live, learn, work, and play
- the airports, railways, waterways, and harbors that provide additional mobility for people and the materials they produce and consume
- the treatment and emission systems that ensure the safety of the air we breathe
- the recycling, reuse, and disposal systems used to minimize the production of and also provide for the containment of the solid and hazardous wastes we produce
- the production and transmission facilities for the electricity we use, including generation facilities for both conventional and renewable energy sources

Civil and environmental engineers are also responsible for the operation of these facilities, an aspect of the field that is being rapidly integrated into the Internet of Things with real-time "big data" collection systems for automated control. This makes it possible for society to rely on:

- autonomous cars, trucks, and mass transport systems, providing safer travel with reduced traffic congestion, improved roadway capacity, reduced energy consumption and air emissions
- smart water infrastructure, including systems that will reduce water consumption, save energy, and improve community resiliency in the wake of natural and human-caused disasters

- intelligent buildings, including systems that reduce energy consumption, improve employee and student comfort, and allow for adaptation of structural systems to changing wind and seismic loads

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in the different civil and environmental engineering disciplines. These disciplines include construction engineering and management, environmental engineering, geological and geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Civil and environmental engineers perform their work in an interdisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF BACHELOR OF SCIENCE IN CIVIL ENGINEERING (BSCE) PROGRAM

Create, integrate, and transfer civil and environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

CIVIL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Prepare BSCE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the civil engineering degree program (classification changed to CEE) in fall 2016 or later.

Code	Title	Credits
	Introduction to Engineering	3
	Mathematics and Statistics	19
	Basic Science	16
	Engineering Mechanics	10
	Civil Engineering Mechanics	6
	Civil Engineering Tools	6
	Civil Engineering Breadth	21
	Civil Engineering Design	10
	Engineering Electives	13
	Communications	8
	Liberal Studies	16
	Total Credits	128

INTRODUCTION TO ENGINEERING

Code	Title	Credits
INTEREGR 170	Design Practicum	3
	Total Credits	3

MATHEMATICS AND STATISTICS REQUIREMENT

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables	4
<i>One of the following courses:</i>		3
STAT 324	Introductory Applied Statistics for Engineers	
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
<i>One of the following advanced mathematics courses:</i>		3
MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations	
Total Credits		19

BASIC SCIENCE REQUIREMENT

Code	Title	Credits
<i>One of the following:</i>		5
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
CHEM 109	Advanced General Chemistry	
<i>One of the following:</i>		5
PHYSICS 202	General Physics	
PHYSICS 208	General Physics	
<i>One of the following:</i>		3
GEOSCI 100	Introductory Geology: How the Earth Works	
GEOSCI/ ENVIR ST 106	Environmental Geology	
<i>One of the following:</i>		3
ZOOLOGY/ BIOLOGY/ BOTANY 151	Introductory Biology	
ZOOLOGY 153	Introductory Biology	
ZOOLOGY/ BOTANY/ ENVIR ST 260	Introductory Ecology	
MICROBIO 101	General Microbiology	
Total Credits		16

ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
E M A 201	Statics (with a grade of C or better)	3
E M A 202	Dynamics	3
or M E 240	Dynamics	
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	

E M A/M E 307	Mechanics of Materials Lab	1
Total Credits		10

CIVIL ENGINEERING MECHANICS REQUIREMENT

Code	Title	Credits
CIV ENGR 310	Fluid Mechanics	3
CIV ENGR/E M A 395	Materials for Constructed Facilities	3
Total Credits		6

CIVIL ENGINEERING TOOLS REQUIREMENT

Code	Title	Credits
M E 170	Civil Engineering Graphics	2-3
or M E 231	Geometric Modeling for Design and Manufacturing	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	4
Total Credits		6-7

CIVIL ENGINEERING BREADTH REQUIREMENT

Code	Title	Credits
CIV ENGR 311	Hydroscience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 330	Soil Mechanics	3
CIV ENGR 340	Structural Analysis I	3
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 494	Civil and Environmental Engineering Decision Making	3
CIV ENGR 498	Construction Project Management	3
Total Credits		21

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4
Every student must take at least one class in at least two of the following CEE disciplines, for a total of 6 credits. One of the two classes MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.		6

Water Resources

CIV ENGR 414	Hydrologic Design	
--------------	-------------------	--

Environmental

CIV ENGR 426	Design of Wastewater Treatment Plants	
CIV ENGR 427	Solid and Hazardous Wastes Engineering	
CIV ENGR 428	Water Treatment Plant Design	
CIV ENGR 522	Hazardous Waste Management	

Structural

CIV ENGR 442	Wood Structures I	
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
CIV ENGR 641	Highway Bridges	

Geological

CIV ENGR/ G L E 530	Seepage and Slopes	
------------------------	--------------------	--

CIV ENGR/ G L E 532	Foundations	
------------------------	-------------	--

Transportation

CIV ENGR 573	Geometric Design of Transport Facilities	
CIV ENGR 574	Traffic Control	
CIV ENGR 576	Advanced Pavement Design	

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other classes will count towards the electives requirement (see section below).

Total Credits **10**

ENGINEERING ELECTIVES REQUIREMENT

- Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the Bachelor of Science in Civil Engineering program. INTEREGR and E P D courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CIV ENGR) do not qualify for meeting this requirement.
- Students must take at least 3 credits of CEE coursework in addition to the civil engineering design requirement. **Note:** Students in the Construction Engineering Management or Environmental Engineering option programs must select from a set of CIV ENGR courses approved for those options.^{1,2,3}
- Students must take at least 7 credits of coursework that meets at least one of the following^{1,2,3}.
 - Any course offered by an engineering department, including but not limited to CIV ENGR.
 - Any Intermediate or Advanced level course with a breadth designation of Biological Sciences, Physical Sciences and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities or Literature.
 - Any of the following business courses: ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process

Total Credits: 13

- Up to three credits of CIV ENGR 1 Cooperative Education Program may be used towards Item 2 or 3.
- Up to six credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used towards Item 2 or 3.
- CIV ENGR 150 Introduction to Architectural Theory, CIV ENGR 151 Architectural Making I, CIV ENGR 152 Architectural Making II, CIV ENGR 155 Architectural Thinking, and CIV ENGR 250 Architectural Visualization cannot be used in Items 2 or 3 above.

COMMUNICATIONS

Code	Title	Credits
<i>Communications A (choose one)</i>		3
ENGL 100	Introduction to College Composition	
LSC 100	Science and Storytelling	
COM ARTS 100	Introduction to Speech Composition	
ESL 118	Academic Writing II	

<i>Speech-Related Course (choose one)</i>		2
EPD 275	Technical Presentations ¹	
COM ARTS 105	Public Speaking	
COM ARTS 181	Elements of Speech-Honors Course	
COM ARTS 262	Theory and Practice of Argumentation and Debate	
COM ARTS 266	Theory and Practice of Group Discussion	
<i>Writing-Related Courses (choose one)</i>		3
INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	
ENGL 201	Intermediate Composition	
Total Credits		8

¹ EPD 275 Technical Presentations and INTEREGR 397 Engineering Communication (was EPD 397 before Fall 2020) strongly recommended to satisfy these requirements.

LIBERAL STUDIES REQUIREMENTS

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 214) ¹		16
Requirements specific to Civil Engineering:		
<i>An economics course must be selected from the following list:</i>		
ECON 101	Principles of Microeconomics	
ECON 102	Principles of Macroeconomics	
ECON 111	Principles of Economics-Accelerated Treatment	
<i>A minimum of three credits of environmental studies course that meets the breadth designations of humanities, literature, and/or social science. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.</i>		
Total Credits		16

¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.

Note: See a CEE advisor for additional information.

NAMED OPTIONS

Note: Beginning Fall 2022, admission to the Environmental Engineering named option for the Civil Engineering, B.S. will be suspended. Students interested in Environmental Engineering and planning to graduate in 2023-24 or later may apply for the Environmental Engineering, B.S. (p. 244) program beginning Fall 2021. Please consult your academic advisor.

- **CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING (P. 242)**

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. an ability to explain basic concepts in management, business, and public policy
9. an ability to explain the importance of professional licensure
10. an ability to understand common failure mechanisms of a component, process, or system and their causes and prevention

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

CERTIFICATION/LICENSURE

Licensure as a Professional Engineer is expected of civil engineers. Information on steps needed to obtain licensure is available from the National Council for the Examination of Engineers and Surveyors (NCEES) at <https://ncees.org/engineering/>.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

CIVIL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT

The Department of Civil and Environmental Engineering offers an undergraduate option in construction engineering and management (CEM). Students taking the CEM option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science–Civil Engineering with option: Construction Engineering and Management.

Students must complete the following BS Civil Engineering requirements: Introduction to Engineering, Mathematics and Statistics, Basic Science, Mechanics, Tools, Breadth, Communications, and Liberal Studies. CEM requirements for Civil Engineering Design and Engineering Electives are listed here (p. 241), along with additional requirements for the CEM option. The total number of credits required for the CEM option is 132 instead of 128.

REQUIREMENTS

CIVIL ENGINEERING DESIGN REQUIREMENT FOR CEM OPTION

Code	Title	Credits
Choose one:		3
CIV ENGR 445	Steel Structures I	
CIV ENGR 447	Concrete Structures I	
Must take:		
CIV ENGR 578	Senior Capstone Design ¹	4
Select one of the following:		3
CIV ENGR 392	Building Information Modeling (BIM) ²	
CIV ENGR 414	Hydrologic Design	
CIV ENGR 426	Design of Wastewater Treatment Plants	

CIV ENGR 427	Solid and Hazardous Wastes Engineering
CIV ENGR 428	Water Treatment Plant Design
CIV ENGR 522	Hazardous Waste Management
CIV ENGR/ G L E 530	Seepage and Slopes
CIV ENGR/ G L E 532	Foundations
CIV ENGR 573	Geometric Design of Transport Facilities
CIV ENGR 574	Traffic Control
CIV ENGR 576	Advanced Pavement Design

Total Credits 10

- ¹ Must complete either CIV ENGR 445 Steel Structures I or CIV ENGR 447 Concrete Structures I before taking.
- ² This course is only available as a design course for CEM option students.

CONSTRUCTION ENGINEERING AND MANAGEMENT DEPTH REQUIREMENT

Code	Title	Credits
CIV ENGR/BSE 491	Legal Aspects of Engineering	3
CIV ENGR 492	Integrated Project Estimating and Scheduling	3
CIV ENGR 1	Cooperative Education Program ¹	1
Total Credits		8

- ¹ Students must take two credits of CIV ENGR 1 Cooperative Education Program total. A summer internship equals 1 credit; a co-op equals 1 credit.

ENGINEERING ELECTIVES REQUIREMENT FOR CEM OPTION

Code	Title	Credits
Select one of the following:		3
CIV ENGR 496	Electrical Systems for Construction	
CIV ENGR 497	Mechanical Systems for Construction	
Select two of the following:		6

16

Total Credits 132

- 1 Taking CHEM 103 General Chemistry I/CHEM 104 General Chemistry II instead of CHEM 109 Advanced General Chemistry adds 4 additional credits to degree requirements.
- 2 Liberal studies coursework should add up to 16 credits, including economics elective, environmental studies elective, and ethnic studies.
- 3 After completing E M A 201 Statics, students may take E M A 202 Dynamics and then E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab, or take E M A 303/E M A/M E 307 and then E M A 202.
- 4 One design course must be CIV ENGR 445 Steel Structures I or CIV ENGR 447 Concrete Structures I, which must be taken before CIV ENGR 578 Senior Capstone Design. CIV ENGR 445 is offered every Fall; CIV ENGR 447 is offered every Spring.
- 5 CIV ENGR/BSE 491 Legal Aspects of Engineering is offered every Fall; CIV ENGR 492 Integrated Project Estimating and Scheduling is offered every Spring.

CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING

Admissions to the Environmental Engineering named option will be suspended as of fall 2022 and will be discontinued as of fall 2026. If you have any questions, please contact the department.

The Department of Civil and Environmental Engineering offers an undergraduate option in environmental engineering. Students taking the environmental engineering option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science—Civil Engineering with option: Environmental Engineering.

Students must complete the following BS Civil Engineering requirements: Introduction to Engineering, Mathematics and Statistics, Basic Science, Mechanics, Tools, Breadth, Communications, and Liberal Studies. EV requirements for Civil Engineering Design and Engineering Electives are listed here (p. 242). Students must also meet the Environmental Engineering Breadth Requirement, also listed here (p. 242).

REQUIREMENTS

Note: Beginning Fall 2022, admission to the Environmental Engineering named option for the Civil Engineering, B.S. will be suspended. Students interested in Environmental Engineering and planning to graduate in 2023-24 or later may apply for the Environmental Engineering, B.S. (p. 244) program beginning Fall 2021. Please consult your academic advisor.

CIVIL ENGINEERING DESIGN REQUIREMENT

Code	Title	Credits
CIV ENGR 578	Senior Capstone Design	4

Every student must take at least one course in the environmental or water resources discipline and another course in a different discipline, for a total of 6 credits. One of the two courses MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.

Water Resources

CIV ENGR 414	Hydrologic Design	
--------------	-------------------	--

Environmental

CIV ENGR 426	Design of Wastewater Treatment Plants	
--------------	---------------------------------------	--

CIV ENGR 427	Solid and Hazardous Wastes Engineering	
--------------	--	--

CIV ENGR 428	Water Treatment Plant Design	
--------------	------------------------------	--

CIV ENGR 522	Hazardous Waste Management	
--------------	----------------------------	--

Structural

CIV ENGR 442	Wood Structures I	
--------------	-------------------	--

CIV ENGR 445	Steel Structures I	
--------------	--------------------	--

CIV ENGR 447	Concrete Structures I	
--------------	-----------------------	--

CIV ENGR 641	Highway Bridges	
--------------	-----------------	--

Geological

CIV ENGR/ G L E 530	Seepage and Slopes	
------------------------	--------------------	--

CIV ENGR/ G L E 532	Foundations	
------------------------	-------------	--

Transportation

CIV ENGR 573	Geometric Design of Transport Facilities	
--------------	--	--

CIV ENGR 574	Traffic Control	
--------------	-----------------	--

CIV ENGR 576	Advanced Pavement Design	
--------------	--------------------------	--

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other courses will count toward the electives requirement (see section below).

Total Credits 10

ENGINEERING ELECTIVES REQUIREMENT

- Students must take at least 3 credits of coursework from an ABET-accredited degree-granting program outside of the bachelor of science in civil engineering program. InterEGR and EPD courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CEE) do not qualify for meeting this requirement.
- Select at least one of the following: CIV ENGR 322 Environmental Engineering Processes or CIV ENGR 410 Hydraulic Engineering.
- Students must take at least 7 credits of coursework that meets at least one of the following^{1, 2, 3, 4}:
 - Any course offered by an engineering department, including but not limited to CEE.
 - Any intermediate- or advanced-level course with a breadth designation of Biological Sciences, Physical Sciences, and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities, or Literature.

- Any of the following business courses: ACCT I S 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process.

Total Credits: 13

- Up to 3 credits of CIV ENGR 1 Cooperative Education Program may be used toward Item 3.
- Up to 6 credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used toward Item 3.
- Depending on their choice of courses, students may need to take some of these 7 credits to satisfy the breadth requirement below.
- CIV ENGR 150 Introduction to Architectural Theory, CIV ENGR 151 Architectural Making I, CIV ENGR 152 Architectural Making II, CIV ENGR 155 Architectural Thinking and CIV ENGR 250 Architectural Visualization cannot be used in Item 3.

ENVIRONMENTAL ENGINEERING BREADTH REQUIREMENT

Courses selected to meet the design and electives requirement above must also be selected in a manner that meets this requirement. At least one CEE course must be selected from at least three of the specialty groups in the table below.

Code	Title	Credits
<i>Water Resources</i>		
CIV ENGR 410	Hydraulic Engineering	3
CIV ENGR 412	Groundwater Hydraulics	3
CIV ENGR 414	Hydrologic Design	3
CIV ENGR 415	Hydrology	3
CIV ENGR 416	Water Resources Systems Analysis	3
CIV ENGR 619	Special Topics in Hydrology	1-3
<i>Environmental Fluid Mechanics</i>		
CIV ENGR 411	Open Channel Hydraulics	3
CIV ENGR 514	Coastal Engineering	2-3
CIV ENGR 618	Special Topics in Hydraulics and Fluid Mechanics	1-3
<i>Environmental Chemistry & Biotechnology</i>		
CIV ENGR 500	Water Chemistry	3
CIV ENGR 501	Water Analysis-Intermediate	3
CIV ENGR/ SOIL SCI 623	Microbiology of Waterborne Pathogens and Indicator Organisms	3
CIV ENGR 629	Special Topics in Environmental Engineering (Topic: Environmental Microbial Biotechnology)	1-3
<i>Water & Wastewater Treatment</i>		
CIV ENGR 322	Environmental Engineering Processes	3
CIV ENGR/BSE/ SOIL SCI 372	On-Site Waste Water Treatment and Dispersal	2

ENVIRONMENTAL ENGINEERING, B.S.

The Department of Civil and Environmental Engineering offers a B.S. Environmental Engineering (BSEnvE) degree program, an excellent degree choice for students who are interested in the sustainable design, construction, and operation of systems and facilities that:

- Treat and distribute safe and reliable drinking water
- Recover material, nutrient, and energy resources from wastewater and solid waste
- Protect and restore wetlands, streams, lakes, and groundwater
- Allocate water resources for urban, rural, and recreational use
- Protect and develop coastal shorelines and stream banks
- Manage stormwater and minimize risk of flood events
- Reduce, reuse, and recycle solid wastes
- Minimize the production of and provide treatment of industrial and agricultural wastes
- Minimize the production of and provide treatment of industrial air emissions
- Prepare society for the impacts of climate change
- Slow down or reverse climate change via
 - Alternative sources of energy such as solar, wind, geothermal and biofuels
 - Recovery of carbon and other greenhouse gases from industrial air emissions

The operation of these facilities is being rapidly integrated into the Internet of Things with real-time “big data” collection systems for automated control. This makes it possible for society to rely on smart infrastructure, including systems that will reduce water consumption,

save energy, and improve community resiliency in the wake of natural and human-caused disasters.

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in different environmental engineering disciplines. Environmental engineers perform their work in a multidisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure. Their daily work also requires a commitment to sustainability – the need to meet today's needs while also allowing future generations to meet their environmental health, public health, and society's economic health needs.

To meet accreditation policies, eligibility for the program is limited to those students who

- matriculated into UW-Madison's College of Engineering in the Fall 2020 semester or later, and
- expect to graduate no sooner than December 2023.

Students not meeting the above criteria are encouraged to consider the Environmental Engineering Option of the BS Civil Engineering degree program. Additional options for these students include the BS Geological Engineering degree program and the Natural Resources and Environmental Engineering Option of the BS Biological Systems Engineering degree program.

VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

MISSION OF BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING (BSEnvE) PROGRAM

Create, integrate, and transfer environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

ENVIRONMENTAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Prepare BSEnvE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://>

www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the environmental engineering degree program (classification changed to BSEnvE) in Fall 2021 or later.

Code	Title	Credits
	Introduction to Engineering	3
	Mathematics and Statistics	19
	Basic Science	16
	Engineering Mechanics	9
	Engineering Tools	6
	Fundamental Principles	18
	Advanced Principles and Practices	33
	Communications	8
	Liberal Studies	16
Total Credits		128

INTRODUCTION TO ENGINEERING

Code	Title	Credits
INTEREGR 170	Design Practicum	3
Total Credits		3

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I

<i>Energy and Environment</i>	
BSE/ ENVIR ST 367	Renewable Energy Systems
CBE 512	Energy Technologies and Sustainability
CIV ENGR/ G L E 421	Environmental Sustainability Engineering
GEOSCI/ ENVIR ST 411	Energy Resources
Total Credits	12

Professional Electives

Note: Courses taken to meet this requirement may not be used to meet the environmental engineering breadth requirement.

Select 14 credits of coursework that meets at least one of the following criteria:

- Any engineering course numbered 300 or higher. Up to six credits of independent study (e.g. CIV ENGR 699 Independent Study and others) may be counted
- Any intermediate or advanced-level course¹ from atmospheric and oceanic sciences, botany, chemistry, geography, geoscience, mathematics², microbiology, molecular and environmental toxicology, physics, population health sciences, soil science, statistics², or zoology

- Up to three credits of any intermediate or advanced-level course from agricultural and applied economics, economics, general business, or management and human resources
- Up to three credits of CIV ENGR 1 Cooperative Education Program

¹ Courses with social science, humanities, or literature breadth (H, L, S, W, X, Y, Z) cannot be used
² Transfer/test math elective credits for calculus or STAT 301 Introduction to Statistical Methods may not be used to fulfill Professional Electives

COMMUNICATIONS

Code	Title	Credits
<i>Communications A (choose one)</i>		3
ENGL 100	Introduction to College Composition	
LSC 100	Science and Storytelling	
COM ARTS 100	Introduction to Speech Composition	
ESL 118	Academic Writing II	
<i>Speech-Related Course (choose one)</i>		2
E P D 275	Technical Presentations ¹	
COM ARTS 105	Public Speaking	
COM ARTS 181	Elements of Speech-Honors Course	
COM ARTS 262	Theory and Practice of Argumentation and Debate	
COM ARTS 266	Theory and Practice of Group Discussion	
<i>Writing-Related Course (choose one)</i>		3
INTEREGR 397	Engineering Communication ¹	
ENGL 201	Intermediate Composition	
Total Credits		8

¹ E P D 275 Technical Presentations and INTEREGR 397 Engineering Communication (was EPD 397 before Fall 2020) are strongly recommended to satisfy these requirements.

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		16
Complete Requirements (p. 214) ¹		

Requirements specific to Environmental Engineering:

An economics course must be selected from the following list:

ECON 101	Principles of Microeconomics
ECON 102	Principles of Macroeconomics
ECON 111	Principles of Economics-Accelerated Treatment

A minimum of three credits of environmental studies course that meets the breadth designations of Humanities, Literature, and/or Social Studies. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.

Total Credits	16
----------------------	-----------

¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are

considered humanities. An economics elective and an environmental studies elective are required.

Note: See a civil engineering advisor for additional information.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

CERTIFICATION/LICENSURE

Licensure as a Professional Engineer is expected of environmental engineers. Information on steps needed to obtain licensure is available from the National Council for the Examination of Engineers and Surveyors (NCEES) at <https://ncees.org/engineering/>.

ACCREDITATION

This new program will seek accreditation from the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). Application for accreditation will be made at the earliest opportunity, in 2024, with an ABET decision in 2025. If accreditation is awarded, it may be retroactively applied to those who graduated in Academic Year 2023-24.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

GEOLOGICAL ENGINEERING, B.S.

Geological engineering integrates two disciplines—geology and engineering. Geologists study the earth—its origins, its composition, and its evolution. Engineers apply scientific principles to practical ends, such as the design and construction of facilities for practical use by society. Geological engineering is interdisciplinary, with faculty from the College of Engineering and the College of Letters & Science.

Geological engineers find the best way to use the earth's resources to solve technical problems while protecting the environment. They solve a variety of practical problems associated with rock and soils using principles of sustainable engineering. They design and construct structures, transportation facilities, dams, tunnels, and power plants. They mitigate naturally occurring phenomena such as floods, landslides, and earthquakes, and develop safe and environmentally sound sources of energy and minerals. Geological engineers also manage groundwater and surface water resources to ensure the public has access to safe drinking water. They also design and construct subsurface repositories for waste disposal and remediate contaminated sites.

Students pursuing the B.S. degree are encouraged to obtain an additional major in geoscience. The B.S. program is set up so that students can obtain a degree in geological engineering and an additional major in geoscience in a single 126-credit program. No extra credits are required to obtain the additional major in geoscience. The B.S. degree in geological engineering is accredited by the Accreditation Board of Engineering and Technology (ABET), which is required to obtain a professional engineering license.

GEOLOGICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Graduates will be prepared to assume positions as geological engineers upon graduation. After proper training and exposure to a comprehensive education in our program, our graduates will demonstrate during the five years after graduation their ability to:

1. apply geological engineering principles, analyses, and synthesis to design and implement projects in the natural and built environment;
2. incorporate economic, environmental, political, ethical, social, safety, and global considerations to generate sustainable solutions in the natural and built environment;
3. exhibit strong communication, leadership, and teamwork skills;
4. serve others through professional responsibility and participation in professional and public activities and good citizenship; and
5. demonstrate a continuing commitment to and interest in their own and others' education.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/>)

(<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education

requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Students must complete the College of Engineering Liberal Studies Requirements (<http://guide.wisc.edu/undergraduate/engineering/#requirementstext>).

Students are encouraged to download a GLE Undergraduate Handbook from the Current Students/Undergraduate page on the department website (<http://www.engr.wisc.edu/geological-engineering/>). The handbook has detailed curriculum information as well as other practical information for undergraduate students to supplement the information provided here.

Students completing the geological engineering degree are also eligible to earn an additional major in geoscience with no additional coursework. Students are encouraged to declare an additional major in geoscience. Students must contact an advisor to complete the necessary paperwork to declare an additional major in geoscience.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics	13
	Engineering Principles and Professional Issues	11-14
	Physical Science, Engineering Science, and Geoscience	44
	Required Geological Engineering Courses	19
	Technical Electives	15
	Geological Engineering Design	
	Communication Skills	8-9
	Liberal Studies Electives	16
	Fundamentals of Engineering Exam	
Total Credits		126-130

MATHEMATICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	

MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables	4
Total Credits		13

ENGINEERING PRINCIPLES AND PROFESSIONAL ISSUES

Code	Title	Credits
STAT 324	Introductory Applied Statistics for Engineers	3
or STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
CIV ENGR/G L E 291	Problem Solving Using Computer Tools	4
I SY E 313	Engineering Economic Analysis	3
Select one:		1-4
E P D 690	Special Topics in Engineering Professional Development (Topic: Core Competence in Sustainability)	
ENVR ST 250	Introduction to Sustainability Science	
ENVR ST/ GEOG 339	Environmental Conservation	
ENVR ST/ PHILOS 441	Environmental Ethics	
G L E 401	Special Topics in Geological Engineering (Topic: Ethics & Professionalism - GLE)	
INTEREGR 303	Applied Leadership Competencies in Engineering	
Total Credits		11-14

PHYSICAL SCIENCE, ENGINEERING SCIENCE AND GEOSCIENCE

Code	Title	Credits
Select one of the following:		5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
E M A 201	Statics	3
E M A 202	Dynamics	3
or M E 240	Dynamics	
E M A 303	Mechanics of Materials	3
or M E 306	Mechanics of Materials	
CIV ENGR 310	Fluid Mechanics	3
GEOSCI 100	Introductory Geology: How the Earth Works	3
or GEOSCI/ ENVR ST 106	Environmental Geology	
GEOSCI 202	Introduction to Geologic Structures	4
GEOSCI 204	Geologic Evolution of the Earth	4
GEOSCI/G L E 360	Principles of Mineralogy	3

GEOSCI/G L E 370	Elementary Petrology	3
GEOSCI/G L E 431	Sedimentary & Stratigraphy Lab	1
GEOSCI/G L E 455	Structural Geology	4
Total Credits		44-48

REQUIRED GEOLOGICAL ENGINEERING COURSES

Code	Title	Credits
G L E 171	Introduction to Geological Engineering	1
G L E/CIV ENGR 330	Soil Mechanics	3
G L E/CIV ENGR/GEOSCI/M S & E 474	Rock Mechanics	3
G L E 479	Geological Engineering Design	4
G L E/GEOSCI 594	Introduction to Applied Geophysics	3
G L E/GEOSCI 595	Field Methods in Applied and Engineering Geophysics	1
G L E/GEOSCI 627	Hydrogeology	4
Total Credits		19

TECHNICAL ELECTIVES (15 CREDITS)

Students must take at least 15 credits in the Technical Electives category, of which 5-6 credits must be design-focused (noted as 'D' in the tracks below), including at least one design-focused course taken prior to G L E 479 Geological Engineering Design. If students take G L E/CIV ENGR 430 Introduction to Slope Stability and Earth Retention, G L E/CIV ENGR 432 Introduction to Shallow and Deep Foundation Systems and G L E/CIV ENGR 434 Introduction to Underground Openings Engineering, these combine to count as one design course. Additionally, if students take G L E/CIV ENGR 530 Seepage and Slopes, they can use G L E/CIV ENGR 432 and G L E/CIV ENGR 434 to count as one design credit; or, if students take G L E/CIV ENGR 532 Foundations, they can use G L E/CIV ENGR 430 and G L E/CIV ENGR 434 to count as one design credit. Students may take up to 6 credits of directed research credits as technical electives.

The technical electives are organized into five tracks, described below. Students may select courses within these tracks to focus coursework in a particular area. However, students may complete the technical electives requirement using courses listed in multiple tracks. Suggested technical electives and associated design-focused credits (noted as 'D' in the tracks below) for each track are included below. One credit of G L E 1 Cooperative Education Program can be used as a technical elective.

Energy, Minerals & Mining

Geological engineers possess knowledge and a skill set that serve society's need to manage extraction of traditional energy and mineral resources in more sustainable and efficient ways, develop renewable energy systems such as solar and wind energy sites, and to lead in new technologies to limit carbon emissions through geological sequestration or to develop geothermal exchange fields and reservoirs.

Within this track, the 16 credits of liberal studies can be framed to match those of the Energy Institute certificate in Energy Sustainability (p. 276).

Code	Title	Credits
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 562	Special Topics in Chemical Engineering (Topic: Energy & Sustainability)	1-3
CIV ENGR/ENVIR ST/GEOSCI 377	An Introduction to Geographic Information Systems	4
E M A 405	Practicum in Finite Elements	3
GEOSCI/ENVIR ST 411	Energy Resources	3
GEOSCI 457	Conducted Field Trip	2
GEOSCI 459	Field Geology	6
GEOSCI 515	Principles of Economic Geology	4
G L E 401	Special Topics in Geological Engineering (D) ¹	1-3
G L E/CIV ENGR 430	Introduction to Slope Stability and Earth Retention (D)	1
G L E/CIV ENGR 434	Introduction to Underground Openings Engineering (D)	1
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 535	Wind Energy Balance-of-Plant Design (D)	3
G L E 801	Special Topics in Geological Engineering (Topic: Geomechanics)	1-3

¹ Only certain G L E 401 topics count as design courses.

Sustainability & Environment

Methods for quantifying the long-term effects of development, natural resource extraction, and environmental damage are often neglected or misapplied in cost-benefit life cycle analysis. This track intends to produce professionals capable of leading the field in sustainable design and construction. The Sustainability & Environment track focuses on quantification, design, and optimization in relation to the use of natural resources and construction materials/methods as well as minimizing the long-term impacts of these activities.

Code	Title	Credits
BSE/DS/LAND ARC 356	Sustainable Residential Construction	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 562	Special Topics in Chemical Engineering (Topic: Energy & Sustainability)	1-3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 421	Environmental Sustainability Engineering	3
CIV ENGR 427	Solid and Hazardous Wastes Engineering (D)	3
CIV ENGR 619	Special Topics in Hydrology	1-3
CIV ENGR 649	Special Topics in Structural Engineering (Topic: Sustainable Construction)	1-3
GEOSCI/ENVIR ST 411	Energy Resources	3
GEOSCI/G L E 629	Contaminant Hydrogeology (D)	3

G L E 401	Special Topics in Geological Engineering (D) ¹	1-3
G L E/CIV ENGR 635	Remediation Geotechnics (D)	3
G L E/CIV ENGR 732	Unsaturated Soil Geoengineering	3
SOIL SCI 321	Soils and Environmental Chemistry	3
SOIL SCI/ ENVIR ST 324	Soils and Environmental Quality	3

¹ Only certain G L E 401 Special Topics in Geological Engineering topics count as design courses.

Geohazards

The number of fatalities and amount of economic loss due to geohazards increase every year. These losses may result from various geohazards, such as volcanic eruptions, earthquakes, landslides, flooding and tsunamis. The Geohazards track aims to provide students with the necessary skills to perform analyses that minimize loss of life and economic costs associated with geohazards.

Code	Title	Credits
CIV ENGR/ENVIR ST/ GEOG 377	An Introduction to Geographic Information Systems	4
CIV ENGR 514	Coastal Engineering (D)	2-3
E M A 405	Practicum in Finite Elements	3
GEOSCI/GEOG 320	Geomorphology	3
GEOSCI/GEOG 326	Landforms-Topics and Regions	3
GEOSCI/G L E 350	Introduction to Geophysics: The Dynamic Earth	3
GEOSCI 459	Field Geology	6
G L E/CIV ENGR 430	Introduction to Slope Stability and Earth Retention (D)	1
G L E/CIV ENGR/ ENVIR ST/ GEOG 444	Practical Applications of GPS Surveying	2
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 735	Soil Dynamics (D)	3

Water

Water is an essential resource for humans and ecosystems. Water is also linked to mineral and energy resource production, waste management, and land reclamation. Population growth and climate change are creating increasing challenges to this resource. Development and sustainable management of groundwater and surface water, including prevention and mitigation of water quality problems, require combined expertise in geoscience, hydrology, and water resources engineering offered through the Water track.

Code	Title	Credits
CIV ENGR 311	Hydroscience	3
CIV ENGR 412	Groundwater Hydraulics	3
CIV ENGR 414	Hydrologic Design (D)	3
CIV ENGR 415	Hydrology	3
CIV ENGR 500	Water Chemistry	3
CIV ENGR 618	Special Topics in Hydraulics and Fluid Mechanics (D) ¹	1-3
CIV ENGR 619	Special Topics in Hydrology	1-3
GEOSCI/GEOG 320	Geomorphology	3
GEOSCI/GEOG 326	Landforms-Topics and Regions	3

GEOSCI/GEOG 420	Glacial and Pleistocene Geology	3
GEOSCI 430	Sedimentology and Stratigraphy	3
GEOSCI/G L E 629	Contaminant Hydrogeology (D)	3
G L E/CIV ENGR 430	Introduction to Slope Stability and Earth Retention (D)	1
G L E/CIV ENGR 530	Seepage and Slopes (D)	3
G L E/CIV ENGR 732	Unsaturated Soil Geoengineering	3

¹ Must take one of these topics: "Waterfront & Coastal Planning" or "Lake & River Rehabilitation."

Infrastructure

There are many challenges that need to be overcome to address the aging infrastructure of this country as well as to develop cost effective solutions for new infrastructure in developing nations. The Infrastructure track is developed to provide students a background that enables them to perform engineering calculations to design, construct, assess the current condition (level of safety), and develop repair and retrofit solutions for civil engineering structures resting on, or constructed in, soil or rock.

Code	Title	Credits
CIV ENGR 649	Special Topics in Structural Engineering (Topic: Sustainable Construction)	1-3

INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	3
Total Credits		8-9

LIBERAL STUDIES (16 CREDITS)

Students must complete the **16 credits** of College of Engineering Liberal Studies Requirements (<http://guide.wisc.edu/undergraduate/engineering/#requirements>).

FUNDAMENTALS OF ENGINEERING EXAM

All students must take the Fundamentals of Engineering exam.

HONORS IN RESEARCH

Students in geological engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of **at least 3.5** may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in G L E 489 Honors in Research.

A senior thesis worth 3 credits of G L E 489 Honors in Research is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the geological engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Geological Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in G L E 489 Honors in Research.
4. Completion of a senior honors thesis with a final grade of B or better.

Students interested in the Honors in Research program should contact their advisor or the G L E chair for more information. Applications to the program are to be submitted to the G L E chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the G L E chair.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

RESOURCES AND SCHOLARSHIPS**FACILITIES**

The geological engineering program utilizes laboratories that are shared with other departments. They include:

Land Information and Surveying Laboratories
Fluid Mechanics Laboratory
Materials Testing Laboratory
Geology and Hydrogeology Laboratories
Rock Mechanics Laboratory
Geotechnical and Geoenvironmental Laboratories
The Halliburton Geoscience Visualization Center

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ELECTRICAL AND COMPUTER ENGINEERING

The Department of Electrical and Computer Engineering offers the B.S., M.S., and Ph.D. degrees in electrical engineering and the B.S. degree in computer engineering.

Electrical engineers (EE) design and develop anything and everything that uses electricity. From the power systems that bring electricity to our homes and communications systems that allow us to keep in touch with family and friends, to the electronic devices, electrical appliances,

computers, sensors, and medical equipment that shape our everyday lives. Typical careers may find an EE collaborating with medical doctors or astronauts in the space program, designing advanced automotive and transportation systems, and interacting with other engineers and professionals. Many EEs work as scientists, inventing new kinds of electronic technology, instrumentation, and devices to help people.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for the current revolution in computers and communications. This focus on software and digital hardware distinguishes the computer engineer from the electrical engineer.

The curricula in the Department of Electrical and Computer Engineering require a strong background in mathematics, physics, and computer science. In addition to basic course requirements in these areas, elective credits in the curriculum permit the student to pursue more advanced courses in these areas or in other fields, such as chemistry, biology, and mechanics. Additional electives in liberal studies broaden the programs to include such areas as economics, sociology, psychology, and history.

The electrical engineering and computer engineering programs share many courses in the first few semesters, including digital systems, electrical circuits, and electromagnetic fields. Computer engineering students take additional courses in computer science to provide the software part of their background. In the junior year, the electrical engineering program focuses on areas such as electromagnetic fields and analog electronics whereas computer engineering deals with computer hardware design and combined hardware/software design concepts. Technical elective freedom in both curricula makes it possible for students to choose from approximately 50 more specialized courses at the junior and senior levels in electrical and computer engineering, as well as courses from other departments. In both curricula, a student can choose a broad program covering an introductory treatment of a variety of areas or focus in one or two specialized areas. An advising program, beginning in the freshman year, helps students plan their program.

To provide students with hands-on experience in electrical and computer engineering, specialized lab courses are offered at the senior level. For example, one involves the design and fabrication of integrated circuits and the other design and prototyping of a computer. Both classroom instruction and lab work are offered in signal processing and in embedded systems, with microprocessors and personal computers incorporated into larger systems. Independent study and design projects

are encouraged at the senior level and an honors research program is available which spans multiple years of the undergraduate program.

Although the B.S. in electrical engineering and B.S. in computer engineering programs are intended to prepare students for immediate entry into the profession of engineering, increasingly, students find an additional year or more of study leading to the M.S. degree very desirable. The Ph.D. degree is the most advanced degree and emphasizes training in research.

COMPUTER ENGINEERING, B.S.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for

the current revolution in computers and communications. This focus on software and digital hardware distinguishes the computer engineer from the electrical engineer.

ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or non-profit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at

the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the computer engineering degree program (classification changed to CMPE) in fall 2017 or later.

Code	Title	Credits
Mathematics		19
Science		20-21
Computer Engineering Core		34
Computer Engineering Advanced Electives		16
Professional Electives		9
Communication Skills		6
Liberal Studies		15
Free Elective		1
Total Credits		120-121

MATHEMATICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables ¹	4
MATH/ COMP SCI 240	Introduction to Discrete Mathematics	3
or MATH/ COMP SCI/ STAT 475	Introduction to Combinatorics	
<i>Probability/Statistics Elective (select one)</i>		3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
MATH/STAT 431	Introduction to the Theory of Probability	
E C E 331	Introduction to Random Signal Analysis and Statistics	
Total Credits		19

¹ MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234.

SCIENCE

Code	Title	Credits
COMP SCI 300	Programming II	3
COMP SCI 400	Programming III	3
PHYSICS 201	General Physics ¹	5
or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Select one of the following:		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
Total Credits		20-21

¹ Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics or E M A 201 Statics and M E 240 Dynamics.

COMPUTER ENGINEERING CORE

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 210	Introductory Experience in Electrical Engineering	2
E C E 219	Analytical Methods for Electromagnetics Engineering	2
E C E 220	Electrodynamics I	3
E C E 230	Circuit Analysis	4
E C E/COMP SCI 252	Introduction to Computer Engineering	3
E C E 270	Circuits Laboratory I	1
E C E 315	Introductory Microprocessor Laboratory	1
E C E 340	Electronic Circuits I	3
E C E/COMP SCI 352	Digital System Fundamentals	3
E C E 353	Introduction to Microprocessor Systems	3
E C E/COMP SCI 354	Machine Organization and Programming	3
E C E 551	Digital System Design and Synthesis	3
Total Credits		34

COMPUTER ENGINEERING ADVANCED ELECTIVES

Code	Title	Credits
<i>Electronic Circuits Elective</i>		3
E C E 342	Electronic Circuits II	
E C E 447	Applied Communications Systems	
E C E 541	Analog MOS Integrated Circuit Design	
E C E 542	Introduction to Microelectromechanical Systems	
E C E 548	Integrated Circuit Design	
E C E 555	Digital Circuits and Components	
<i>Systems Software Elective</i>		3-4
E C E/COMP SCI 506	Software Engineering	
COMP SCI 536	Introduction to Programming Languages and Compilers	
COMP SCI 537	Introduction to Operating Systems	
COMP SCI 564	Database Management Systems: Design and Implementation	
<i>Capstone Design</i>		4
E C E 453	Embedded Microprocessor System Design	
E C E 454	Mobile Computing Laboratory ¹	
E C E 554	Digital Engineering Laboratory	
<i>CMPE Elective I</i>		3
E C E 537	Communication Networks	

E C E/COMP SCI 552	Introduction to Computer Architecture	
E C E 553	Testing and Testable Design of Digital Systems	
E C E 556	Design Automation of Digital Systems	
<i>CMPE Elective II</i>		3
Select from E C E 399 - E C E 699		
Select from COMP SCI 400 - COMP SCI 699 ¹		
Total Credits		16-17

¹ E C E 454 Mobile Computing Laboratory and COMP SCI 407 Foundations of Mobile Systems and Applications cannot both be taken for degree credit.

PROFESSIONAL ELECTIVES

Code	Title	Credits
Professional Electives		9
<i>Courses to be taken in an area of professional interest.</i>		
<i>The following courses are acceptable as professional electives if the courses are not used to meet any other degree requirements.</i>		
E C E 1	Cooperative Education Program (One co-op credit can count towards professional electives.)	
E C E 204	Data Science & Engineering	
E C E/PHYSICS 235	Introduction to Solid State Electronics	
E C E 320	Electrodynamics II	
E C E 330	Signals and Systems	
E C E 331	Introduction to Random Signal Analysis and Statistics	
E C E 332	Feedback Control Systems	
E C E 334	State Space Systems Analysis	
E C E 335	Microelectronic Devices	
E C E 342	Electronic Circuits II (may be used if not already used as an Electronic Circuits Advanced Elective)	
E C E 355	Electromechanical Energy Conversion	
E C E 356	Electric Power Processing for Alternative Energy Systems	
E C E courses numbered 399 and higher		
COMP SCI courses numbered 400 and higher		
MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations ¹	
MATH 321	Applied Mathematical Analysis	
MATH 322	Applied Mathematical Analysis	
MATH 340	Elementary Matrix and Linear Algebra ¹	
MATH 341	Linear Algebra	
MATH courses numbered 400 and higher		
STATS courses numbered 400 and higher		

Any biological sciences course that is designated as intermediate or advanced level

Any physical science course that is designated as intermediate or advanced level

Any natural science course that is designated as advanced level, except that math, computer sciences, and statistics courses must follow the above criteria

Engineering courses numbered 300 and higher that are not E C E or cross-listed with E C E

Up to six credits of Professional Electives can be taken from School of Business classes numbered 300 and higher.

DS 501	Special Topics (Wearable Technologies)
DANCE 560	Current Topics in Dance: Workshop (Making Digital Lighting Controls)

- ¹ Students may only earn degree credit for MATH 320 Linear Algebra and Differential Equations or MATH 340 Elementary Matrix and Linear Algebra, not both.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100 or LSC 100 or COM ARTS 100 or COM ARTS 181 or ESL 118	Introduction to College Composition Science and Storytelling Introduction to Speech Composition Elements of Speech-Honors Course Academic Writing II	3
INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	3
Total Credits		6

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete requirements (p. 214) ¹		15
Total Credits		15

- ¹ All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. **Note:** See an E C E advisor and/or the EE Curriculum Guide (<https://www.engr.wisc.edu/department/electrical-computer-engineering/academics/bachelor-of-science-computer-engineering/>) for additional information.

NAMED OPTION

View as listView as grid

• COMPUTER ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S. (P. 262)

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

 Joe Krachey
 Srdjan Milicic
 Pia Strampp (associate lecturer)

*For scholarship information, please contact Professor Lesieutre.

See also Electrical and Computer Engineering Faculty Directory (<https://directory.engr.wisc.edu/ece/faculty/>).

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

COMPUTER ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S.

The Machine Learning and Data Science option in Computer Engineering prepares students for a career in computer engineering with an emphasis on machine learning and data science. The purpose of this option is to provide guidance and recognition for students pursuing this career path. The option uses 18 of the elective credits within the 120-credit Computer Engineering B.S. degree program to focus on the mathematics, tools, and practices associated with machine learning and data science in engineering. Students selecting this option must submit an option declaration form to the dean's office in Engineering Hall.

ELECTRICAL ENGINEERING, B.S.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or nonprofit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://>

www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the electrical engineering degree program (classification changed to EE) in Fall 2017 or later.

Code	Title	Credits
Mathematics		16
Science		17-18
Electrical Engineering Core		33
Electrical Engineering Advanced Electives		24
Professional Electives		9
Communication Skills		6
Liberal Studies		15
Total Credits		120-121

MATHEMATICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 276	Topics in Calculus II	

MATH 234	Calculus—Functions of Several Variables ¹	4
Probability and Statistics Elective		3
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	
STAT/M E 424	Statistical Experimental Design	
MATH/STAT 431	Introduction to the Theory of Probability	
E C E 331	Introduction to Random Signal Analysis and Statistics	
Total Credits		16

¹ MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234.

SCIENCE

Code	Title	Credits
COMP SCI 300	Programming II	3
PHYSICS 201	General Physics ¹	5
or PHYSICS 207	General Physics	
or PHYSICS 247	A Modern Introduction to Physics	
PHYSICS 202	General Physics	5
or PHYSICS 208	General Physics	
or PHYSICS 248	A Modern Introduction to Physics	
Select one of the following:		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
CHEM 104	General Chemistry II	
Total Credits		17-18

¹ Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics or E M A 201 Statics and M E 240 Dynamics.

ELECTRICAL ENGINEERING CORE

Code	Title	Credits
E C E 203	Signals, Information, and Computation	3
E C E 210	Introductory Experience in Electrical Engineering	2
E C E 219	Analytical Methods for Electromagnetics Engineering	2
E C E 220	Electrodynamics I	3
E C E 230	Circuit Analysis	4
E C E/PHYSICS 235	Introduction to Solid State Electronics	3
E C E/COMP SCI 252	Introduction to Computer Engineering	3
E C E 270	Circuits Laboratory I	1
E C E 271	Circuits Laboratory II	1
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E/COMP SCI 352	Digital System Fundamentals	3

E C E 370	Advanced Laboratory	2
Total Credits		33

ELECTRICAL ENGINEERING ADVANCED ELECTIVES

Students must take 22 credits in at least three of six areas and at least 2 credits in two laboratory courses.

- At least 9 credits must be in courses numbered 400 and above.
- At least one course must be a capstone design course.
- Students can count 1 credit of E C E 1 Cooperative Education Program toward advanced electives.
- Students can count up to 6 credits of E C E 399 Independent Study, E C E 489 Honors in Research or E C E 699 Advanced Independent Study towards advanced electives.
- Students can take E C E 379 Special Topics in Electrical and Computer Engineering and E C E 601 Special Topics in Electrical and Computer Engineering as advanced electives.

Laboratory		
Code	Title	Credits
<i>Select at least one course from E C E 301 to E C E 317</i>		
<i>An additional laboratory course must be taken from the following list:</i>		
E C E 303	Introduction to Real-Time Digital Signal Processing	
E C E 304	Electric Machines Laboratory	
E C E 305	Semiconductor Properties Laboratory	
E C E 306	Linear Active Circuits Laboratory	
E C E 308	Nonlinear Electronic Circuits Laboratory	
E C E 313	Optoelectronics Lab	
E C E 315	Introductory Microprocessor Laboratory	
E C E 317	Sensors Laboratory	
E C E 432	Digital Signal Processing Laboratory	
E C E 453	Embedded Microprocessor System Design	
E C E/B M E 462	Medical Instrumentation ¹	
E C E 504	Electric Machine & Drive System Laboratory	
E C E 512	Power Electronics Laboratory	
E C E 545	Advanced Microwave Measurements for Communications	
E C E 549	Integrated Circuit Fabrication Laboratory	
E C E 554	Digital Engineering Laboratory	
E C E/M E 577	Automatic Controls Laboratory	

Fields & Waves		
Code	Title	Credits
E C E 320	Electrodynamics II	3
E C E 420	Electromagnetic Wave Transmission	3
E C E 434	Photonics	3

E C E/N E/ PHYSICS 525	Introduction to Plasmas	3
E C E/N E/ PHYSICS 527	Plasma Confinement and Heating	3
E C E/N E 528	Plasma Processing and Technology	3
E C E 536	Integrated Optics and Optoelectronics	3
E C E/PHYSICS 546	Lasers	2-3
E C E 547	Advanced Communications Circuit Design ¹	3

Systems & Control

Code	Title	Credits
E C E 332	Feedback Control Systems	3
E C E 334	State Space Systems Analysis	3
E C E/M E 439	Introduction to Robotics ¹	3
E C E/M E 577	Automatic Controls Laboratory ¹	4

Power & Machines

Code	Title	Credits
E C E 355	Electromechanical Energy Conversion	3
E C E 356	Electric Power Processing for Alternative Energy Systems	3
E C E 411	Introduction to Electric Drive Systems	3
E C E 412	Power Electronic Circuits ¹	3
E C E 427	Electric Power Systems	3
E C E 504	Electric Machine & Drive System Laboratory	2-3
E C E 511	Theory and Control of Synchronous Machines	3
E C E 512	Power Electronics Laboratory ¹	3

Communications & Signal Processing

Code	Title	Credits
E C E 331	Introduction to Random Signal Analysis and Statistics	3
E C E 401	Electro-Acoustical Engineering	3
E C E 431	Digital Signal Processing ¹	3
E C E 432	Digital Signal Processing Laboratory ¹	3
E C E/COMP SCI/ MATH 435	Introduction to Cryptography	3
E C E 436	Communication Systems I ¹	3
E C E 437	Communication Systems II ¹	3
E C E 447	Applied Communications Systems ¹	3
E C E/COMP SCI/ M E 532	Matrix Methods in Machine Learning ¹	3
E C E/COMP SCI 533	Image Processing ¹	3
E C E 537	Communication Networks ¹	3
E C E/COMP SCI/ M E 539	Introduction to Artificial Neural Networks ¹	3
E C E/MATH 641	Introduction to Error-Correcting Codes	3

Circuits & Devices

Code	Title	Credits
E C E 335	Microelectronic Devices	3
E C E 342	Electronic Circuits II	3
E C E 445	Semiconductor Physics and Devices	3
E C E/B M E 462	Medical Instrumentation ¹	3
E C E 466	Electronics of Solids	3
E C E 541	Analog MOS Integrated Circuit Design ¹	3
E C E 542	Introduction to Microelectromechanical Systems ¹	3
E C E 545	Advanced Microwave Measurements for Communications ¹	3
E C E 548	Integrated Circuit Design ¹	3
E C E 549	Integrated Circuit Fabrication Laboratory ¹	3
E C E 555	Digital Circuits and Components ¹	3

Computers & Computing

Code	Title	Credits
E C E 353	Introduction to Microprocessor Systems	3
E C E 453	Embedded Microprocessor System Design ¹	4
E C E 454	Mobile Computing Laboratory ¹	4
E C E/B M E 463	Computers in Medicine	3
E C E 551	Digital System Design and Synthesis ¹	3
E C E/COMP SCI 552	Introduction to Computer Architecture	3
E C E 553	Testing and Testable Design of Digital Systems ¹	3
E C E 554	Digital Engineering Laboratory ¹	4
E C E 556	Design Automation of Digital Systems ¹	3

¹ Designated as a capstone course. Students can also take E C E 491 Senior Design Project for capstone credit.

PROFESSIONAL ELECTIVES

Code	Title	Credits
		9

Classes to be taken in an area of professional interest.

The following courses are acceptable as professional electives if the courses are not used to meet any other degree requirements.

MATH/COMP SCI 240	Introduction to Discrete Mathematics	
E C E 204	Data Science & Engineering	
E C E 320	Electrodynamics II	
E C E 331	Introduction to Random Signal Analysis and Statistics	
E C E 332	Feedback Control Systems	
E C E 334	State Space Systems Analysis	
E C E 335	Microelectronic Devices	

E C E 342	Electronic Circuits II	
E C E 353	Introduction to Microprocessor Systems	
E C E/COMP SCI 354	Machine Organization and Programming	
E C E 355	Electromechanical Energy Conversion	
E C E 356	Electric Power Processing for Alternative Energy Systems	
E C E courses numbered 399 and higher		
COMP SCI courses numbered 400 and higher		
MATH 319	Techniques in Ordinary Differential Equations	
MATH 320	Linear Algebra and Differential Equations ¹	
MATH 321	Applied Mathematical Analysis	
MATH 322	Applied Mathematical Analysis	
MATH 340	Elementary Matrix and Linear Algebra ¹	
MATH 341	Linear Algebra	
MATH courses numbered 400 and higher		
STATS courses numbered 400 and higher		
Any biological science course that is designated as intermediate or advanced		
Any physical science course that is designated as intermediate or advanced (except PHYSICS 241)		
Any natural science course that is designated as advanced except that Math, Computer Sciences, and Statistics courses must follow the above criteria		
Engineering courses numbered 300 and higher that are not E C E or cross-listed with E C E		
Up to six credits of Professional Electives can be taken from School of Business classes numbered 300 and higher.		
DS 501	Special Topics (Wearable Technologies)	
DANCE 560	Current Topics in Dance: Workshop (Making Digital Lighting Controls)	

¹ Students may only earn degree credit for MATH 320 Linear Algebra and Differential Equations or MATH 340 Elementary Matrix and Linear Algebra, not both.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or COM ARTS 181	Elements of Speech-Honors Course	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	3

Total Credits **6**

- **ELECTRICAL ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S. (P. 268)**

TOTAL DEGREE CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of

Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ELECTRICAL ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S.

The Machine Learning and Data Science option in Electrical Engineering prepares students for a career in electrical engineering with an emphasis on machine learning and data science. The purpose of this option is to provide guidance and recognition for students pursuing this career path. The option uses 18 of the elective credits within the 120-credit Electrical Engineering B.S. degree program to focus on the mathematics, tools, and practices associated with machine learning and data science in engineering. Students selecting this option must submit an option declaration form to the dean's office in Engineering Hall.

ENGINEERING - COLLEGE-WIDE

DEGREES/MAJORS/CERTIFICATES

- College of Engineering Honors in the Liberal Arts (p. 270)
- International Engineering, Certificate (p. 270)
- Naval Science, BNS (p. 271)
- Technical Communication, Certificate (p. 273)

COLLEGE OF ENGINEERING HONORS IN THE LIBERAL ARTS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates—not just a few—excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

HOW TO GET IN

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters & Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (<https://www.engr.wisc.edu/academics/undergraduate-academics/honors/>) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

REQUIREMENTS

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "!" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters & Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

INTERNATIONAL ENGINEERING, CERTIFICATE

The certificate in international engineering provides recognition for a student's efforts to prepare for an international career by learning about one or more countries outside the United States. An undergraduate student in the College of Engineering or the Department of Biological Systems Engineering can earn the certificate by completing at least 16 credits in courses with a primary focus on the language, culture, history, geography, society, or institutions of a particular country or region of the world.

HOW TO GET IN

The application process is outlined on the Certificate in International Engineering website (<https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-in-international-engineering/>). Students must have a cumulative GPA of at least 2.75 and have met progression requirements to apply.

REQUIREMENTS

CERTIFICATE COURSE REQUIREMENTS

A minimum of 16 credits is required.

LANGUAGE COURSES (0-9 CREDITS)

Although not required, a maximum of 9 credits may be devoted to courses in a foreign language. Only foreign language courses beyond the initial 8 credits in that particular language may be used to satisfy this requirement. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

AREA STUDIES COURSES (6-15 CREDITS)

A minimum of 6 credits must be devoted to courses with a major emphasis on the culture, history, geography, society, or institutions of one country or the countries in a geographically identifiable region of the world. These courses must be selected from at least two departments. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

INTERNATIONAL EXPERIENCE

A documented stay of five weeks or longer for study or engineering-related volunteer or work (including internship and co-op) in the designated country or region is required.

INTERNATIONAL ENGINEERING COURSE

After one's international experience, successful completion of the 1-credit course INTEREGR 413 Current Issues in International Engineering is required. **This course is offered during the fall semester only.**

Students may not elect the pass/fail option for any course that is used to satisfy the requirements for the certificate, with the exception of courses taken on a study abroad program through International Academic Programs (<https://studyabroad.wisc.edu/>) in collaboration with the College of Engineering. Successful completion of certificate requirements will be noted on the student's official transcript. For additional information, contact international@engr.wisc.edu.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Study the language and/or culture of a specific area of the world.
2. Obtain a significant international experience in that same area of the world (meaning spending 5 weeks or more in the area).
3. Understand and be able to articulate specific insights about the international dimension of engineering as a profession.

NAVAL SCIENCE, BNS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree.

Earning both the BNS degree and the B.S. degree in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

For additional information see the Officer Education (p. 19) section of the *Guide*.

HOW TO GET IN

The Naval Science BNS is not a stand-alone degree. Students interested in pursuing this degree should consult with the Navy ROTC: 1610 University Ave, Madison, WI 53726 | 608-262-3794 | nrotc@aviation.wisc.edu (nrotc@aviation.wisc.edu)

REQUIREMENTS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree. Requirements for the degree are:

1. A total of 136 credits including no fewer than 100 credits of elected and required courses in one of the engineering curricula.
2. Completion of these additional requirements as approved by the Department of Naval Science: English, two semesters; American Military Affairs/National Security Policy, one semester (see below).

Earning both the BNS degree and the B.S. in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

REQUIRED COURSES:

Code	Title	Credits
Naval Laboratory (1 cr each):		8-10
NAV SCI 175	Introductory Naval Laboratory I	
NAV SCI 176	Introductory Naval Laboratory II	
NAV SCI 275	Elementary Naval Laboratory I	
NAV SCI 276	Elementary Naval Laboratory II	
NAV SCI 375	Intermediate Naval Laboratory I	
NAV SCI 376	Intermediate Naval Laboratory II	
NAV SCI 475	Advanced Naval Laboratory I	
NAV SCI 476	Advanced Naval Laboratory II	
NAV SCI 575	Professional Naval Laboratory I ¹	
NAV SCI 576	Professional Naval Laboratory II ¹	
NAV SCI 101	Introduction to Naval Science	2
NAV SCI 102	Seapower-Maritime Affairs ²	3
NAV SCI 201	Naval Leadership and Management	3
NAV SCI 402	Naval Leadership and Ethics	3
Six credits of English. Must be writing-intensive and focus on areas of grammar and composition. Accepted courses include those designated COM A or COM B		6
Three credits of American Military History or National Security Policy. Accepted courses include:		3
POLI SCI 104	Introduction to American Politics and Government	
POLI SCI 140	Introduction to International Relations	
POLI SCI 160	Introduction to Political Theory	
POLI SCI/LEGAL ST 217	Law, Politics and Society	
POLI SCI 347	Terrorism	
POLI SCI 348	Analysis of International Relations	
POLI SCI 356	Principles of International Law	
POLI SCI 377	Nuclear Weapons and World Politics	
HISTORY 427	The American Military Experience to 1902	
HISTORY 428	The American Military Experience Since 1899	
MIL SCI 491	American Military History	
Completion of one of the following tracks:		
Navy-Option Track:		
NAV SCI 202	Navigation	
NAV SCI 301	Naval Engineering	
NAV SCI 302	Naval Weapons	
NAV SCI 401	Naval Operations	
Six credits of calculus to include a first- and second-semester course ³		
Six credits of calculus-based physics to include a first- and second-semester course ³		

Three credits of World Culture and Regional Studies. Must have an emphasis on regions encompassed by Sub-Sahara Africa, North Africa, Central Asia, East Asia, South Asia, Southwest Asia, Southeast Asia, Central America, Middle East, or Russia/Eastern Europe

Marine Corps-Option Track:	
NAV SCI 350	Fundamentals of Maneuver Warfare
NAV SCI 351	Land Campaigns

- ¹ Add NAV SCI 575 Professional Naval Laboratory I if taking a 9th semester, NAV SCI 576 Professional Naval Laboratory II if taking a 10th semester.
- ² May substitute HISTORY 428 The American Military Experience Since 1899.
- ³ AP/IB/Transfer credits accepted only for first-semester course.

Also, to be conferred a BNS degree, the candidate must satisfy the degree requirements for *any* Engineering major, and the above-stated Naval Science requirements.

LEARNING OUTCOMES

1. Understand and apply the fundamentals and principles of Naval Science.
2. Understand and apply Naval Science professional knowledge and core competencies.
3. Be prepared to perform successfully in the technical and critical reasoning requirements of their careers and pursue continuing education in a field of application within the Naval Service.
4. Understand and demonstrate a strong sense of personal integrity, honor, and individual responsibility and associated ethical leadership required of military officers.

FOUR-YEAR PLAN

SAMPLE FOUR YEAR PLANS

The Bachelor of Naval Science degree is not a stand-alone degree. The plans below must be integrated with a student's undergraduate College of Engineering major plan. See your engineering advisor and Naval ROTC program staff with questions.

NAVY SCHOLARSHIP/COLLEGE PROGRAMMER

First Year			
Fall	Credits	Spring	Credits
NAV SCI 175		1 NAV SCI 176	1
Calculus 1/Math 1	3-5	Calculus 2/Math 2	3-5
English 1		3 English 2	3-5
NAV SCI 101		2 HISTORY 428 (in place of NAV SCI 102)	3-4
9-11		10-15	

Second Year

Total Credits 34-35

ADVISING AND CAREERS

Naval Science BNS students should meet with the Navy ROTC for advising:
 1610 University Avenue Madison, WI 53726;
 608-262-3794; nrotc.aviation@wisc.edu

PEOPLE

Naval Science—Professor, CAPT Zacharski; Associate Professor CDR Choquette; Assistant Professors LT Cero, LT Heimke, and Marine Capt.

Matulionis. The assistant professors act as undergraduate advisors and may be contacted through the department office.

TECHNICAL COMMUNICATION, CERTIFICATE

The Technical Communication Certificate (TCC) has established itself as a program that meets industry and government agencies' demands for students with skills as communicators and for communication specialists. Because employers value well-developed communication skills, TCC courses will enhance success in co-op/intern positions and post-graduation careers. TCC graduates overwhelmingly confirm not only that the certificate gave them an edge over other candidates during the recruitment process, but also that the communication knowledge, skills, and attitudes they acquired while in the program helped them succeed in their jobs and helped prepare them for the diverse communication and management tasks in today's multifunctional team environments.

The Technical Communication Certificate, housed in the College of Engineering, complements all undergraduate degrees, but is especially designed to fit in well with an engineering degree. TCC students gain experience in career-applicable skills by

- Receiving education in principles and processes for communicating about technical subjects (including problem solving methods, audience analysis, rhetorical analysis, conventions of format, and usability testing).
- Gaining education in the fundamentals of written, oral, and visual communication (including organization, structure, style, mechanics, format, and delivery).
- Learning effective interpersonal communication and management skills (including teamwork, interviewing, leading and facilitating groups, project management, and international communication).
- Gaining opportunities to research and think analytically about contemporary issues and to consider ethical issues.
- Using current technology to encourage effective communication in a variety of environments (including use of the web, distance communication, electronic publishing, group software, and layout and presentation software).

While the certificate is designed especially for engineering students, students from other fields sometimes seek out the program to enhance their career options. Students who complete the certificate will have the notation "Technical Communication Certificate" added to their transcripts.

Aside from the relevant courses offered in the TCC, students especially value the close contact with faculty through advising and development of a TC Certificate Portfolio. Students in the program often take on leadership roles in other college or campus student organizations and projects, further developing their communication, team, and management skills.

HOW TO GET IN

Undergraduates who would like to enroll in the Technical Communication Certificate may download the TCC Application form (PDF) (<https://tc.engr.wisc.edu/certificate/applying-to-the-technical-communication-certificate/>). Email the completed TCC Application along with a PDF of your current DARS report to Laura Grossenbacher, Director of the Tech

Comm Program, at lgrossenbac@wisc.edu. Graduate students and non-degree-seeking students cannot enroll in the TCC.

PREREQUISITES FOR ADMISSION TO THE TCC PROGRAM

- A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 out of 5).
- Four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course.
- Three courses (9-credit minimum) in humanities, social sciences, and/or foreign language.
- Overall GPA of at least 2.5.

Applications are accepted throughout the semester, though students are encouraged to submit applications as early as possible so they have ample time to plan their coursework. The program will notify all new admissions via email.

REQUIREMENTS

To graduate with the certificate in technical communication, students must complete at least 21 credits, with a minimum of 6 credits in technical proficiency courses and a minimum of 15 credits in both technical and non-technical communication courses.

In addition to course requirements, students must achieve at least a B in the required Engineering Communication (INTEREGR 397) (was EPD 397 before Fall 2020) and the Technical Communications Internship (E P D 398). All students must complete the program within five years from their application date. Students must meet regularly with their assigned certificate advisor and must compile and submit a portfolio of their work for the internship course. Students cannot count courses completed on a pass/fail basis toward the certificate.

Substitution of courses substantively equivalent to those listed will be considered by the Technical Communication Curriculum Committee. Students must submit requests for substitution with supporting material before beginning the course.

PREREQUISITES

Code	Title	Credits
	A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 or 5)	
	Select four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course	
	Select three courses (9-credit minimum) in liberal studies including a foreign language	
	Overall GPA of at least 2.5

M S & E 470	Capstone Project I
M S & E 471	Capstone Project II
N E 412	Nuclear Reactor Design
N E 571	Economic and Environmental Aspects of Nuclear Energy

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand and apply principles and processes for communicating about technical subjects to diverse audiences.
2. Understand and apply fundamentals of written, oral, and visual communication.
3. Apply improved skills in interpersonal communication, teamwork, and management.
4. Research, identify, and think analytically about social, global, economic, political, environmental, and ethical issues as they impact technical projects or engineering work.
5. Use current technology to communicate effectively in a variety of formats and environments.
6. Engage in real world experiences through communication internships and guest lectures.

ENGINEERING PHYSICS

The Department of Engineering Physics (EP) within the University of Wisconsin–Madison College of Engineering is the home of three undergraduate degree programs (nuclear engineering; engineering mechanics, including an option in aerospace engineering formerly named astronautics; and engineering physics) and two graduate degree programs (nuclear engineering and engineering physics; and

engineering mechanics). The department's faculty conducts research in the areas of nuclear systems, plasma physics and fusion energy science, and experimental and theoretical mechanics. This combination of topics fosters synergies with respect to neutronics, nuclear materials, mechanics of novel materials, fluid dynamics, and computation. The graduate nuclear engineering program has been ranked in the top four, nationally, by *U.S. News and World Report* in each of the past ten years.

DEGREES/MAJORS/CERTIFICATES

- Engineering for Energy Sustainability, Certificate (p. 276)
- Engineering Mechanics, B.S. (p. 278)
- Engineering Physics, B.S. (p. 288)
- Nuclear Engineering Materials, Certificate (p. 293)
- Nuclear Engineering, B.S. (p. 294)

RESOURCES AND SCHOLARSHIPS

FACILITIES

Facilities available for instruction and research include:

Fluid Mechanics and Heat Transfer Laboratories
 Instructional Computing Labs (in Computer Aided Engineering)
 Nanomechanics Laboratory
 Nuclear Instrumentation Laboratory
 Plasma Physics Laboratories
 Superconductivity and Cryogenics Laboratories

SCHOLARSHIPS

Most financial assistance is awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060). Some financial assistance is also available from the College of Engineering. Please see your academic advisor or Student Services Center, 1410 Engineering Drive, for more information. The Department has a limited amount of scholarship funds that are awarded on a merit basis, usually at the beginning of the fall semester. An application for departmental scholarships is not necessary; all students are automatically considered in the competition for departmental scholarships.

ENGINEERING FOR ENERGY SUSTAINABILITY, CERTIFICATE

Equity and sustainability of energy resources in the face of increasing global population and economic development are key issues at the center of the public discourse today. The objective of this certificate program is to offer undergraduate students a suite of courses addressing energy sustainability. The courses span across the engineering curriculum, with firm roots in real-world design and engineering practices.

Students enrolled as degree-seeking undergraduates with a plan of study to fulfill the certificate requirements may enroll in the program. Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program; however, students may take courses that fulfill certificate requirements before submitting an application.

HOW TO GET IN

DECLARING THE CERTIFICATE

A student who is interested in declaring the certificate must complete an online application form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_e3cK4U4xkli9oLX/). The application form requires students to fill out a tentative study plan for completing the certificate requirements.

- Certificate Application Form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_e3cK4U4xkli9oLX/)

Prior to completing the application form, students should either schedule a meeting with the certificate advisor/coordinator or complete an online orientation (https://uwmadison.co1.qualtrics.com/jfe/form/SV_0VAuEcR28ZNnTyB/) involving a short series of videos and accompanying questions.

Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program.

REQUIREMENTS

REQUIREMENTS

Minimum of 16 credits

- Minimum of 6 credits required in Liberal Studies and Science category (including one foundational course option)

- Minimum of 6 credits required in Engineering category (including one foundational course option)
- Additional 3 credits from either category above, or students may substitute an applied course such as senior capstone or independent study (with approval). See note under the Capstone heading below.
- 1 credit required in Seminar category
- Grade point average of 2.5 or above for all coursework that counts for the certificate

Liberal Studies and Science (Minimum of 6 credits)

Code	Title	Credits
Liberal Studies and Science Foundational Courses		3
A A E 246	Climate Change Economics and Policy

CBE 555	Seminar-Chemical Engineering Connections	1

Capstone (optional 3 credits)

Students may request to count no more than 3 credits of applied coursework toward the 16-credit total through an optional Capstone course. This course must be approved by the certificate's faculty chair in consultation with the certificate's oversight committee. Students must submit a description of their course project, demonstrating application of at least one of the certificate's learning outcomes. Details of the project will be verified with the course instructor. Courses that may qualify include:

- Senior Design Project or Capstone
- Independent Study
- Honors Thesis

To submit a Capstone course request, complete this online course substitution form (https://uwmadison.co1.qualtrics.com/jfe/form/SV_9tYyECXdgTWBAs5/). Course substitution requests may be submitted any time, but should be submitted as early as possible once there are sufficient details (such as a course syllabus or a project description) that demonstrate how the course or project aligns with the certificate's learning outcomes.

- **COURSE SUBSTITUTION FORM ([HTTPS://UWMADISON.CO1.QUALTRICS.COM/JFE/FORM/SV_9tYyECXdgTWBAs5/](https://uwmadison.co1.qualtrics.com/jfe/form/SV_9tYyECXdgTWBAs5/))**

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Understand the physical properties and processes related to energy resources and the conversion technologies involved.
2. Understand how energy decisions are impacted by environmental, social, economic or political factors.
3. Synthesize knowledge of the technical/physical aspects of energy with the social/environmental factors to analyze how energy choices impact the sustainability of energy systems.
4. Apply interdisciplinary energy knowledge to analyze, design or solve a matter of real world significance related to sustainability of energy use.

ENGINEERING MECHANICS, B.S.

The Department of Engineering Physics administers the B.S., M.S., and Ph.D. degrees in engineering mechanics. The B.S. degree in engineering mechanics may be accompanied by an option in aerospace engineering (p. 283) (formerly named astronautics).

Engineering mechanics is the scholarly term for the study of forces and the resulting deformations, accelerations, motions, vibrations and other action that they cause. As such, engineering mechanics forms the foundation of a degree in aerospace, mechanical or civil engineering, and it is fundamental to important parts of biomedical engineering, chemical engineering, materials science, and other engineering disciplines. Hence, a degree in engineering mechanics provides a broad scientific background which enables its graduates to tackle challenging problems in most fields of engineering. The curriculum emphasizes the basic sciences—mathematics, computer science, physics and the engineering sciences—fluid dynamics, thermodynamics, mechanics, materials science, and electrical engineering. Although the degree program is entitled engineering mechanics at UW–Madison, the program is most comparable to aerospace engineering and mechanical engineering

programs at various universities across the United States. However, internationally, this field is more commonly known as “mechanics” rather than “mechanical engineering” or “aerospace engineering.” A few select universities in the United States offer programs that are similar to UW–Madison’s engineering mechanics program under titles such as “engineering science” or “theoretical and applied mechanics.”

The objective of the program is to provide the student with a broad background in the fundamental physical sciences and applied mathematics, coordinated with both theoretical and applied engineering methods and experimental techniques. This type of educational background will give the student the degree of versatility necessary for dealing with the variety and complexity of modern technological problems as well as the ability to adapt to the rapidly changing needs and interests of industry, government, and society.

An education in engineering mechanics provides many advantages. First, the foundation offered by a degree in mechanics allows our graduates to more easily interact with co-workers on interdisciplinary teams including chemists, physicists, and mathematicians. Second, many industrial organizations prefer engineers that have a broad, fundamental scientific background rather than a narrow view of just one discipline. Third, and probably most important, great changes have taken place in science and engineering during recent years. Among the most important of these have been the rapid diffusion of scientific knowledge and disciplines into engineering, the increasing use of analytical and computer methods for the solution of practical problems, the need for a better understanding of the properties and behavior of materials, and the increasing need for engineers who can adapt known methods to new situations and develop new experimental and analytical methods. By focusing on core competency in physics and applied mathematics, the engineering mechanics degree prepares students for these challenges.

The required courses taken early in the curriculum are intended to give students a fundamental background in mathematics, science, and engineering. In addition to developing versatility through exposure to important concepts in various scientific fields, the required courses allow students to identify areas of interest. With the relatively large number of elective credits available in the latter part of the program, students may either continue to follow a general program or may prefer to concentrate elective courses in such areas as stress analysis and structural mechanics, dynamics and vibrations, aerodynamics and flight mechanics, experimental mechanics, applied mathematics, materials science, geological engineering, biomechanics, aerospace mechanics, mechanical systems analysis, etc.

Engineering mechanics graduates are sought by most industries and governmental agencies including in particular those participating in the newly developing areas of engineering such as space technology, performance of new structural materials, and so on. Their work often involves participation in design, research and development projects where the problems are sufficiently complex or unusual that their solutions require engineers with (1) a thorough understanding of the fundamentals of engineering, (2) advanced education in the established experimental and analytical methods, and (3) the ability to develop new experimental and analytical methods to attack problems for which standard methods, formulas, and materials have not yet been developed. The program also provides excellent preparation for graduate study in a variety of related disciplines.

ENGINEERING MECHANICS AND NUCLEAR ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The faculty recognize that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths. Regarding the Engineering Mechanics program, we initially expect graduates will begin their careers in fields that utilize their knowledge, education and training in solid mechanics, fluid mechanics and dynamics/vibration in a variety of jobs in mechanical, aerospace, manufacturing and other engineering fields. Similarly, regarding the Nuclear Engineering program, we initially expect graduates will begin their careers in fields that utilize their knowledge, education and training in the interaction of radiation with matter as it applies to power generation, health and medical physics, security and safeguards and other engineering fields.

Whatever path our graduates choose to pursue, our educational objectives for the nuclear engineering and engineering mechanics programs are to allow them to:

1. Exhibit strong performance and continuous development in problem-solving, leadership, teamwork, and communication, initially applied to nuclear engineering or engineering mechanics, and demonstrating an unwavering commitment to excellence.
2. Demonstrate continuing commitment to, and interest in, his or her training and education, as well as those of others.
3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
4. Contribute to their communities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/>

[cross-campus-students/](https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/)) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

ENGINEERING MECHANICS CURRICULUM

The following curriculum applies to students who entered the College of Engineering in fall 2018 or later.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics	22
	Science	10
	Engineering Science	27
	Engineering Mechanics Core	31
	EMA Electives	9
	Technical Electives	5
	Communication Skills	8
	Liberal Studies	16
	Total Credits	128

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
	or MATH 217 Calculus with Algebra and Trigonometry II	
	or MATH 275 Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4-5
	or MATH 276 Topics in Calculus II	
MATH 234	Calculus—Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
MATH 321	Applied Mathematical Analysis	3
STAT 324	Introductory Applied Statistics for Engineers	3
	Total Credits	22-23

SCIENCE

Code	Title	Credits
	Select one of the following:	5-9
CHEM 109	Advanced General Chemistry	
CHEM 103 & CHEM 104	General Chemistry I and General Chemistry II	
PHYSICS 202	General Physics	5
	Total Credits	10-14

ENGINEERING SCIENCE

Code	Title	Credits
INTEREGR 170	Design Practicum	3
M E 231	Geometric Modeling for Design and Manufacturing	3
E P 271	Engineering Problem Solving I	3
	or COMP SCI 310 Problem Solving Using Computers	
M S & E 350	Introduction to Materials Science	3
M E 361	Thermodynamics	3
M E 363	Fluid Dynamics	3
	or CIV ENGR 310 Fluid Mechanics	
M E 364	Elementary Heat Transfer	3
E C E 376	Electrical and Electronic Circuits	3
	or PHYSICS 321 Electric Circuits and Electronics	
	Computing Elective (Select One)	3
	COMP SCI 300 Programming II	
	COMP SCI 412 Introduction to Numerical Methods	
E M A/E P 471	Intermediate Problem Solving for Engineers	
E M A/E P 476	Introduction to Scientific Computing for Engineering Physics	
	Total Credits	27

ENGINEERING MECHANICS CORE

INTEREGR 397	Engineering Communication (was EPD 397 prior to Fall 2020)	3
Total Credits		8

LIBERAL STUDIES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 214) ¹		16
Total Credits		16

¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

- A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
- A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
- At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 128

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

NAMED OPTIONS IN ENGINEERING MECHANICS

Students may elect to declare a named option under the Engineering Mechanics BS. The named option in Aerospace Engineering can be declared as of Fall 2020. The named option in Astronautics is suspended as of Summer 2020; the last term to earn the named option is Summer 2026.

View as listView as grid

- **ENGINEERING MECHANICS: ASTRONAUTICS (P. 285)**

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn a Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- an ability to communicate effectively with a range of audiences
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Total Credits 128-129

¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

² Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

³ Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

⁴ After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.

⁵ Students electing E M A 545 Mechanical Vibrations instead of E M A 542 Advanced Dynamics should note that E M A 545 Mechanical Vibrations is offered in the spring semester only.

⁶ E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 and E M A/M E 570 are typically offered in the fall. E M A 611 and E M A 522 are typically offered in the spring.

⁷ M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 is offered in the spring semester only.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned an Engineering Mechanics faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

RESOURCES AND SCHOLARSHIPS

FACILITIES

Facilities available for instruction and research include:

Mechanics Holographic Lab
 Viscoelasticity and Composites Lab
 Wisconsin Laboratory for Structures and Materials Testing: Materials Testing Lab
 Wind Tunnel Laboratory
 Structural Mechanics Lab
 Structural Dynamics and Vibrations Lab
 Fatigue/Fracture Lab
 Instructional Computing Lab (in Computer Aided Engineering)
 Research Computing Lab

SCHOLARSHIPS

Most financial assistance is awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060). Some financial assistance is also available from the College of Engineering. Please see your academic advisor or Student Services Center, 1410 Engineering Drive, for more information. The Department has a limited amount of scholarship funds that are awarded on a merit basis, usually at the beginning of the fall semester. An application for departmental scholarships is not necessary; all students are automatically considered in the competition for departmental scholarships.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

ENGINEERING MECHANICS: AEROSPACE ENGINEERING

The aerospace engineering option in engineering mechanics prepares students for design, development, and research, with an emphasis on applied mathematics and aerospace engineering. Its purpose is to improve and expand the educational opportunities of students at the university who wish to pursue careers in aerospace engineering and related areas. This is accomplished by providing in-depth exposure to course sequences in flight dynamics, dynamics of aerospace structures and orbital mechanics, as well as a core curriculum of structural and material analysis, advanced dynamics, and vibrations. The program requires a minimum of 128 credits; students selecting this option must submit an option declaration form to the dean's office in room 2620 Engineering Hall.

REQUIREMENTS

The following curriculum applies to students who entered the College of Engineering beginning in Fall 2020.

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. *Note:* Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

Total Credits 128

- ¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.
- ² Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.
- ³ Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
- ⁴ After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.
- ⁵ E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 Experimental Vibration and Dynamic System Analysis and E M A/M E 570 Experimental Mechanics are typically offered in the fall. E M A 611 Advanced Mechanical Testing of Materials and E M A 522 Aerodynamics Lab are typically offered in the spring.
- ⁶ M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 Intermediate Fluid Dynamics is offered in the spring semester only.
- ⁷ E M A 523 Flight Dynamics and Control is offered in the Spring semester only. E M A 524 Rocket Propulsion is offered in the Fall semester only.

ENGINEERING MECHANICS: ASTRONAUTICS

Admissions to the Engineering Mechanics: Astronautics Named Option have been suspended as of fall 2020 and will be discontinued as of fall 2026. If you have any questions, please contact the department (<https://www.engr.wisc.edu/department/engineering-physics/>).

The astronautics option in engineering mechanics prepares students for design, development, and research, with an emphasis on applied mathematics and astronautics. Its purpose is to improve and expand the educational opportunities of students at the university who wish to pursue careers in astronautics and space-related areas. This is accomplished by providing in depth exposure to course sequences in astrodynamics, orbital mechanics, and flight dynamics, as well as a core curriculum of structural and material analysis, advanced dynamics, and vibrations. The program requires a minimum of 128 credits; students selecting this option must submit an option declaration form to the dean's office in room 2620 Engineering Hall.

REQUIREMENTS

The following curriculum applies to students who entered the College of Engineering after fall 2018.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics	22
	Science	10
	Engineering Science	27
	Engineering Mechanics/Astronautics Core	40
	Technical Electives	5
	Communication Skills	8
	Liberal Studies	16
Total Credits		128

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I

Total Credits 128

¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General

Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

- 2 Students who were not able to take INTEREGR 170 (<https://guide.wisc.edu/search/?P=INTEREGR%20170>) Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.
- 3 Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
- 4 After completing E M A 201 Statics, students may take E M A 202 Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.
- 5 E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540 Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 and E M A/M E 570 are typically offered in the fall. E M A 611 and E M A 522 are typically offered in the spring.
- 6 M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 is offered in the spring semester only.
- 7 Before Fall 2020, E M A 524 Rocket Propulsion was offered as E M A 601 Special Topics in Engineering Mechanics with the topic of Rocket Propulsion. It is offered in the fall semester only. E M A 523 Flight Dynamics and Control is offered in the Spring semester only.

ENGINEERING PHYSICS, B.S.

The Department of Engineering Physics offers the B.S. degree in engineering physics. The degree is designed to provide graduates with skills in emerging technological areas. They are well prepared for pursuing advanced graduate degrees and for employment in high-tech startup companies and traditional engineering firms, as well as positions in academia, government, and national laboratories.

Students specialize in one of three technological focus areas: nanoengineering, plasma science and engineering, and scientific computing.

Distinguishing features of the engineering physics degree include a strong emphasis on math, physics, and engineering fundamentals; choice of a technical focus area; and emphasis on research as part of a campus research group or through individually mentored research with a faculty member, culminating in a senior thesis.

THE OBJECTIVES OF THE ENGINEERING PHYSICS PROGRAM ARE TO:

- Educate students to think and participate deeply, creatively, and analytically in emerging areas of engineering technology.
- Educate students in the basics of instrumentation, design of laboratory techniques, measurement, data acquisition, interpretation, and analysis.
- Educate students in the methodology of research.
- Provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum.
- Foster the development of effective oral and written communication skills.
- Expose students to environmental, ethical and contemporary issues.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://>

www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

FOCUS AREA

Research and Development/Senior Thesis Expectations for Research Projects

Completion of the engineering physics degree program requires satisfactory completion of the E P 468 Introduction to Engineering Research, E P 469 Research Proposal in Engineering Physics, E P 568 Research Practicum in Engineering Physics I, and E P 569 Research Practicum in Engineering Physics II coursework sequence, which culminates in a senior research thesis. The research topic chosen by the student and agreed upon by the advisor should be on a topic connected to the chosen Focus Area. The research conducted should be such that the student participates in the creation of new knowledge, experiences the excitement of the research process, and makes a contribution so that it would be appropriate to include the student's name on a scholarly publication if one results from the research.

Senior Thesis

A senior thesis, completed during enrollment in E P 569 Research Practicum in Engineering Physics II is required. The senior thesis is a written document reporting on a substantial piece of work. It should be written in the style of a graduate thesis. The faculty advisor, in consultation with a research mentor, determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the engineering physics department office.

On or before the Friday of finals week of the semester in which E P 569 Research Practicum in Engineering Physics II is taken, the senior thesis must be presented orally by the student to a committee of three professors in a publicly announced seminar. Interested faculty and students will be invited to attend.

LIBERAL STUDIES

Code	Title	Credits
Complete Requirements (p. 214) ¹		

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

TOTAL CREDITS: 130–132

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering research practices to produce results that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to apply experimental, theoretical, and computational methods to address scientific and engineering objectives
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
CHEM 109 ¹		5 E M A 201	3

		Liberal Studies Elective	3
	16		17

Total Credits 130-132

- ¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.
- ² Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.
- ³ Students are encouraged to take E P 468 Introduction to Engineering Research during their second year to allow for more flexibility in the research sequence.
- ⁴ Topics from MATH 321 Applied Mathematical Analysis are applied in PHYSICS 322 Electromagnetic Fields, and some students may find it helpful to take PHYSICS 322 Electromagnetic Fields after MATH 321 Applied Mathematical Analysis if PHYSICS 322 Electromagnetic Fields is not required for focus area courses.
- ⁵ Students in the nanoengineering focus area should take PHYSICS 531 Introduction to Quantum Mechanics.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned an Engineering Physics faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

PEOPLE

PROFESSORS

RESOURCES AND SCHOLARSHIPS

FACILITIES

Facilities available for instruction and research include:

Fluid Mechanics and Heat Transfer Laboratories
 Instructional Computing Labs (in Computer Aided Engineering)
 Nanomechanics Laboratory
 Nuclear Instrumentation Laboratory
 Plasma Physics Laboratories
 Superconductivity and Cryogenics Laboratories

SCHOLARSHIPS

Most financial assistance is awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060). Some financial assistance is also available from the College of Engineering. Please see your academic advisor or Student Services Center, 1410 Engineering Drive, for more information. The Department has a limited amount of scholarship funds that are awarded on a merit basis, usually at the beginning of the fall semester. An application for departmental scholarships is not necessary; all students are automatically considered in the competition for departmental scholarships.

NUCLEAR ENGINEERING MATERIALS, CERTIFICATE

The goal of this certificate is to combine a comprehensive set of course curricula that will provide students with an understanding of the challenges and remedial measures associated with materials in nuclear energy systems. It includes courses in radiation damage, nuclear fuel performance, corrosion, and joining/welding. A laboratory course will provide hands-on experimental analysis in the areas of corrosion, welding, radiation damage, and non-destructive evaluation.

Students learn the challenges and remedial measures associated with materials in nuclear energy system and conduct experimental analysis in corrosion, welding, radiation damage, and nondestructive evaluation.

HOW TO GET IN

Students must complete the Certificate Declaration Form (<https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-in-nuclear-engineering-materials/>). Contact Professor Douglass Henderson (http://directory.engr.wisc.edu/ep/Faculty/Henderson_Douglass/), Department of Engineering Physics, 151 Engineering Research Building, for further information.

REQUIREMENTS

Code	Title	Credits
Required courses (7 credits - must be taken for a letter grade)		
N E/M S & E 423	Nuclear Engineering Materials ¹	3
N E 424	Nuclear Materials Laboratory	1

M S & E/M E 462	Welding Metallurgy	3
Elective courses (minimum 9 credits - must be taken for a letter grade)		
CIV ENGR 445	Steel Structures I	3
CIV ENGR 447	Concrete Structures I	3
E M A 303	Mechanics of Materials	3
M S & E 330	Thermodynamics of Materials	4
M S & E 352	Materials Science-Transformation of Solids	3
M S & E/N E 433	Principles of Corrosion	3
M S & E 460	Introduction to Computational Materials Science and Engineering	3
M S & E 463	Materials for Elevated Temperature Service	3
M S & E 570	Properties of Solid Surfaces	3
N E 541	Radiation Damage in Metals	3
N E 545	Materials Degradation in Advanced Nuclear Reactor Environments	3

¹ Because M S & E 350 Introduction to Materials Science or M S & E 351 Materials Science-Structure and Property Relations in Solids are prerequisites for N E/M S & E 423 Nuclear Engineering Materials, students are expected to take one of the two of these courses as prerequisites for the certificate.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Identify the challenges and remedial measures associated with materials in nuclear energy systems by integrating the contents within each class into a complete understanding.
2. Describe and apply basic radiation damage, nuclear fuel performance, corrosion, and joining/welding concepts.
3. Design and conduct basic hands-on experiments in the areas of nuclear materials characterization.
4. Discuss scientifically and confidently about nuclear materials degradation issues with experts.

NUCLEAR ENGINEERING, B.S.

The Department of Engineering Physics offers the B.S. degree in nuclear engineering and M.S. and Ph.D. degrees in nuclear engineering and engineering physics.

Nuclear engineering is defined as the application of nuclear and radiation processes in technology. An important application is the generation of electricity using nuclear reactors. Another important application is in medicine, where radiation and radioisotopes are used to diagnose and treat illness. Nuclear engineering offers students an important opportunity to help meet the energy needs of our society and to contribute to the improvement of health through medical applications.

Further, because the nuclear engineering curriculum is very rich in engineering physics, graduates are prepared to work in a number of technical activities outside the nuclear engineering field.

Nuclear energy, both from fission and fusion, offers a promising approach to meeting the nation's energy needs—an approach that may preserve jobs, raise the standard of living of Americans, and alleviate the depletion of natural resources including natural gas, petroleum, and coal. Even more important, nuclear energy offers the only practical, environmentally benign approach to generating electricity on a large scale because it releases no harmful SO₂, NO_x, CO₂, or particulate matter into the atmosphere. Nuclear energy has played, and continues to play, an important role in space exploration. Nuclear engineering has enabled the use of isotopic power supplies in deep space probes like the Cassini mission, and may eventually be used to design fission or fusion-based systems for more demanding missions

Since the discovery of fission many years ago, electricity is being produced commercially in a several hundred billion-dollar industry. Applications of radioactive tracers have been made in medicine, science, and industry. Radiation from particle accelerators and materials made radioactive in nuclear reactors are used worldwide to treat cancer and other diseases, to provide power for satellite instrumentation, to preserve food, to sterilize medical supplies, to search for faults in welds and piping, and to polymerize chemicals. Low energy plasmas are used in the manufacture of microelectronics components and to improve the surface characteristics of materials. High energy plasmas offer the possibility of a new energy source using thermonuclear fusion.

Because the breadth and rate of change in this field requires that the nuclear engineer have a broad educational background, the curriculum consists of physics, math, materials science, electronics, thermodynamics, heat transfer, computers, courses in the humanities and social science areas, and numerous elective courses. Courses of a specific nuclear engineering content come primarily in the third and fourth years.

The curriculum prepares students for careers in the nuclear industry and government—with electric utility companies, in regulatory positions with the federal or state governments, or for major contractors on the design and testing of improved reactors for central station power generation or for propulsion of naval vessels.

The curriculum also prepares the graduate for work in many areas where a broad technical background is more important than specialization in a specific field. Thus, the graduate is also prepared to work in any area where a broad engineering background is helpful, such as management, technical sales, or law. The curriculum gives students excellent preparation for graduate study in the fission and fusion areas, medical and health physics, applied superconductivity, particle accelerator technology, and other areas of engineering science in addition to study in areas such as materials science, physics, mathematics, and medicine.

OBJECTIVES OF THE NUCLEAR ENGINEERING PROGRAM

- educate students in the fundamental subjects necessary for a career in nuclear engineering, and prepare students for advanced education in it and related fields;
- educate students in the basics of instrumentation, design of laboratory techniques, measurement, and data acquisition, interpretation and analysis;
- educate students in the methodology of design;

- provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum;
- foster the development of effective oral and written communication skills;
- expose students to environmental, ethical and contemporary issues.

ENGINEERING MECHANICS AND NUCLEAR ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The faculty recognize that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths. Regarding the Engineering Mechanics program, we initially expect graduates will begin their careers in fields that utilize their knowledge, education and training in solid mechanics, fluid mechanics and dynamics/vibration in a variety of jobs in mechanical, aerospace, manufacturing and other engineering fields. Similarly, regarding the Nuclear Engineering program, we initially expect graduates will begin their careers in fields that utilize their knowledge, education and training in the interaction of radiation with matter as it applies to power generation, health and medical physics, security and safeguards and other engineering fields.

Whatever path our graduates choose to pursue, our educational objectives for the nuclear engineering and engineering mechanics programs are to allow them to:

1. Exhibit strong performance and continuous development in problem-solving, leadership, teamwork, and communication, initially applied to nuclear engineering or engineering mechanics, and demonstrating an unwavering commitment to excellence.
2. Demonstrate continuing commitment to, and interest in, his or her training and education, as well as those of others.
3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
4. Contribute to their communities.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their

intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

NUCLEAR ENGINEERING CURRICULUM

The nuclear engineering curriculum is divided into two focus areas, one emphasizing nuclear power and one emphasizing medical and other non-power applications of radiation sciences. The power focus area is more appropriate for students seeking careers in the nuclear power industry, while the radiation sciences focus area is better suited for students interested in medical and non-power applications.

POWER FOCUS AREA CURRICULUM

The following curriculum applies to students who entered the program starting in Fall 2020.

SUMMARY OF REQUIREMENTS

Code	Title	Credits
	Mathematics and Statistics	22
	Science	13
	Engineering Science	31
	Nuclear Engineering Core	28
	Nuclear Engineering Electives	8

College of Engineering Liberal Studies Requirements

Complete Requirements (p. 214) ¹	16
---	----

Total Credits 16

- ¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

RADIATION SCIENCES FOCUS AREA CURRICULUM

The following curriculum applies to students who entered the program starting in Fall 2020. Students wishing to select the Radiation Sciences focus area must have a 3.0 GPA and should send an email to the department Chair, Paul Wilson, chair@ep.wisc.edu including a copy of their transcript to show that they meet the GPA requirement and stating that they desire to declare the Radiation Sciences focus area; they should copy their academic advisor. Until this is done, the Power focus area is assumed.

LIBERAL STUDIES ELECTIVES

Code	Title	Credits
College of Engineering Liberal Studies Requirements		
Complete Requirements (p. 214) ¹		16
Total Credits		16

¹ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D) in the course listing.
2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. *Note:* Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences

- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

- ¹ It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits. Three credits of CHEM 103/CHEM 104 may be counted as Technical Electives credits.
- ² Students who were not able to take INTEREGR 170 Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the Departments of Chemistry, Computer Science, Mathematics, and Physics.
- ³ Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
- ⁴ After completing E M A 201 Statics, students may complete E M A 202 Dynamics and E M A 303 Mechanics of Materials in either order or concurrently.
- ⁵ STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/M E 424 Statistical Experimental Design are acceptable substitutes.
- ⁶ PHYSICS 623 Electronic Aids to Measurement is recommended for students in the Radiation Sciences focus area.

ADVISING AND CAREERS**ADVISING**

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned a Nuclear Engineering faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

PEOPLE**PROFESSORS**

RESOURCES AND SCHOLARSHIPS**FACILITIES**

Facilities available for instruction and research include:

Nuclear Reactor Laboratory
Nuclear Instrumentation Laboratory
Fluid Mechanics and Heat Transfer Laboratories
Plasma Physics Laboratories
Superconductivity and Cryogenics Laboratories
Instructional Computing Labs (in Computer Aided Engineering)

SCHOLARSHIPS

Most financial assistance is awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060). Some financial

assistance is also available from the College of Engineering. Please see your academic advisor or Student Services Center, 1410 Engineering Drive, for more information. The Department has a limited amount of scholarship funds that are awarded on a merit basis, usually at the beginning of the fall semester. An application for departmental scholarships is not necessary; all students are automatically considered in the competition for departmental scholarships.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

INDUSTRIAL AND SYSTEMS ENGINEERING

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best—the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in four main areas:

- Engineering Analytics and Operations Research
- Healthcare Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Supply Chain Management

Although there is no sub major within IE, it is possible to achieve a degree of specialization through choice of a focus area. Courses focusing on teams and design projects prepare students to succeed in the workplace.

INDUSTRIAL ENGINEERING, B.S.

The first bachelor of science in industrial engineering at the University of Wisconsin–Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best—the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW–Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in four main areas:

- Engineering Analytics and Operations Research
- Healthcare Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Supply Chain Management

Although there is no sub major within IE, it is possible to achieve a degree of specialization through choice of a focus area. Courses focusing on teams and design projects prepare students to succeed in the workplace.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://>

www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- General Education
- Breadth—Humanities/Literature/Arts: 6 credits
 - Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
 - Breadth—Social Studies: 3 credits
 - Communication Part A & Part B *
 - Ethnic Studies *
 - Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the Industrial Engineering, BS, degree program beginning in Fall 2020 or later. Required courses and electives satisfying the Mathematics and Basic Science, Computer Sciences, IE Focus Area, and General Education Communication requirements are indicated. For Liberal Studies Electives refer to the College of Engineering Liberal Studies Guidelines.

Code	Title	Credits
	Mathematics and Basic Science	30-31
	Probability and Statistics	6
	Computer Sciences	7-8
	Required I SY E Courses	28

MINIMUM REQUIRED CREDITS: 120

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies
8. Recognize, describe, predict and analyze systems behavior
9. Understand physiological, cognitive, and sociotechnical aspects of humans as components in complex systems design
10. Apply the techniques, skills, and modern engineering tools necessary for engineering practice, such as quality engineering, optimization, simulation, and project management

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

MATERIALS SCIENCE AND ENGINEERING

The Department of Materials Science and Engineering offers B.S., M.S., and Ph.D. degrees in Materials Science and Engineering and an M.S. degree in Nanomaterials and Nanoengineering. The Nanomaterials and Nanoengineering degree is offered as a one-year named option (within the Materials Science and Engineering M.S. degree program).

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society. Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

MATERIALS SCIENCE AND ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Objective 1: Skills and Tools. Graduates will be applying the tools and skills acquired during their undergraduate experience either in post-graduate educational programs or as employees in materials-related industries.

Objective 2: Early Career Growth. Graduates will have experienced professional growth in their chosen post-baccalaureate pursuits, for example, through acquisition of advanced degrees or advancement in employment rank.

Objective 3: Professional Citizenship. Graduates will have demonstrated awareness of contemporary issues in technology and society and ethical responsibility.

Objective 4: Life-Long Learning: Graduates will have demonstrated a continuing commitment to learning.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer

Coordinator in the College of Engineering: ugtransfer@enr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.enr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the materials science and engineering degree program (MS&E) in or after fall semester of 2019.

Code	Title	Credits
	Mathematics and Statistics	19
	General Science and Engineering Foundations	25-26
	MS&E Required Courses	43
	Materials Emphasis Elective Requirements	12
	Communication Skills	6
	Liberal Studies	16
	Free Electives	6-7
	Total Credits	At least 128

MATHEMATICS AND STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
or MATH 217	Calculus with Algebra and Trigonometry II	
or MATH 275	Topics in Calculus I	
MATH 222	Calculus and Analytic Geometry 2	4
or MATH 275	Topics in Calculus I

MATERIALS SCIENCE AND ENGINEERING EMPHASIS ELECTIVES

Code	Title	Credits
Select 6 credits from: M S & E courses numbered 400 or above, B M E/PHM SCI 430, M E 417, M E 418, or M E 419 ¹		6
Select 6 credits of select engineering, science and math/statistics coursework in consultation with an M S & E faculty advisor ²		6
Total Credits		12

¹ M S & E 699 Independent Study cannot be used to fulfill this requirement.

² Select 6 credits of coursework from M S & E courses numbered 400 or above, other engineering, Biochemistry, Chemistry, Computer Sciences, Math, Physics, Statistics, or Zoology courses numbered 300 or above, or up to 3 credits of combined M S & E 1 Cooperative Education Program and/or M S & E 699 Independent Study research credit (or from another engineering department). M S & E advisor approval of the set of selections is required. Course sets may be

broad-based or concentrated in a subfield of materials science and engineering.

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or COM ARTS 100	Introduction to Speech Composition	
or LSC 100	Science and Storytelling	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	3
Total Credits		6

LIBERAL STUDIES

Complete 16 credits of liberal studies requirements (p. 214).³

- ³ Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:
1. A minimum of two courses from the same department or program. At least one of these two courses must be designated as above the elementary level (I, A, or D).
 2. A minimum of 6 credits designated as humanities (H, L, or Z in the course listing), and an additional minimum of 3 credits designated as social science (S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
 3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

FREE ELECTIVES

Select 6-7 elective credits.⁴

- ⁴ The above subject requirements can be met with 121 credits of UW courses. Students must complete 128 credits of coursework to earn the B.S. in materials science and engineering. The 6-7 elective credits may be earned by choosing elective courses that carry more credits than the requirement's minimum credit load or by taking any additional coursework of the student's choice.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

MECHANICAL ENGINEERING

Mechanical engineers are problem-solvers who make things work better, more efficiently, and more economically. They are innovators, coming up with original ideas to apply scientific knowledge in new ways. Mechanical engineers are builders, designing and developing machines and systems that make life easier. Mechanical engineers have strong science, mathematics, and technology backgrounds.

Manufacturing processes, design of mechanical equipment and systems, and energy generation and utilization are traditional mechanical engineering fields. Students receive basic preparation in all of these areas. Through choice of elective courses they may further specialize in areas such as automatic control systems, renewable energy systems, robotics, product design, biomedical engineering, computational mechanics, manufacturing systems engineering, etc. Mechanical engineering prepares students for entrance into industry, for independent business (e.g., consulting, contracting, or manufacturing), or for work in government agencies. A degree in mechanical engineering may be used as a background for medicine, law, or business, as well as for graduate work in engineering.

Work in these areas requires a solid background in mathematics, statistics, mechanics, physics, machine design, thermal sciences, materials, the use of computers, and manufacturing processes. Mechanical engineers must also possess good communication skills and be able to work in teams. Mechanical engineers should be aware of social and environmental consequences of their work.

With these skills, broad training, and an emphasis on systems design, mechanical engineers are in demand in practically every type of manufacturing, consulting, sales, and research organization. Mechanical engineers may work in automotive, materials processing, heavy equipment, paper, plastics, power, aerospace, chemical, electronics, or

many other large and small industries. Their work may involve research and development of new products, design of equipment or systems, supervision of production, plant engineering, administration, sales engineering, or testing of individual components or complete assemblies.

Although many special areas exist in the profession, mechanical engineering can be subdivided into energy systems and mechanical systems.

The energy systems field has taken on special significance with the current awareness of the limited energy sources and the effects of energy use on the environment. In this field, mechanical engineers carry out work on the behavior of liquids, gases, and solids as they are used in all types of energy-conversion systems. Automotive engines, gas turbines, steam power plants, refrigeration systems, air pollution control, cryogenics and energy utilization require this type of background. To be proficient in this the engineer must have a knowledge of thermodynamics, fluid dynamics, heat transfer, and related subjects.

The mechanical systems field covers the design and manufacturing of products and equipment. Mechanical engineers who focus on design conceive of new devices and machines and also refine and improve existing designs. The design engineer must be proficient in kinematics, machine elements, mechanics, strength and properties of materials, dynamics, vibrations, etc. Mechanical engineers who focus on manufacturing are involved with planning and selecting manufacturing methods, with designing and developing manufacturing equipment, and with increasing the efficiency and productivity of current manufacturing technologies for polymer, metal, and ceramic products. The manufacturing engineer uses chemistry, materials science, mechanics of materials, materials processing principles and practices, principles of computer control, engineering statistics, and other physical and thermal sciences to improve manufacturing operations and systems, and the products they produce. Increasingly, the systems that mechanical engineers work with incorporate biological and information technology components.

ENGINEERING THERMAL ENERGY SYSTEMS, CERTIFICATE

Efficient use of thermal energy is an increasingly popular area of interest for UW–Madison engineering students and employers. The objective of the certificate in engineering thermal energy systems program is to provide students in the College of Engineering with an organized set of courses that will improve their capacity to analyze and design innovative thermal energy systems. These systems include, but are not limited to, energy conversion systems and their fuels, refrigeration, combustion,

and solar energy. Thermal energy systems either employ thermal energy directly or convert thermal energy to other energy forms.

HOW TO GET IN

Students who wish to apply for admission into this certificate program will need to complete a major/certificate declaration form obtained from the student services office. Once approved by the student services office and the student's faculty advisor, the form will be forwarded to the Dean's Office to be added to the student record. The student services office will, in conjunction with the student's advisor and curriculum committee chair, assist the student in selecting appropriate courses that fulfill certificate requirements. If a Special student does not have a home department in the College of Engineering, the Department of Mechanical Engineering will advise and sponsor the student in this program. To receive the certificate, the applicant must achieve a GPA of 3.0 or higher in the proposed courses listed on the completed form.

Submit the completed Declaration of Intent Form (<https://www.engr.wisc.edu/app/uploads/2016/02/certificate-in-engineering-thermal-energy-systems-declaration-of-intent.pdf>) to student services.

REQUIREMENTS

The certificate, geared toward UW–Madison undergraduate students, requires a total of 18 completed credits. Up to 9 of the credits can be thermal-energy-related courses that are required in the student's undergraduate major. The additional 9 credits must be selected from an assortment of approved elective courses in the College of Engineering.

COURSES

Courses not on this list must be specifically approved by the certificate curriculum committee.

Code	Title	Credits
Mechanical Engineering		
M E 460	Applied Thermal / Structural Finite Element Analysis	3
M E 461	Thermal Systems Modeling	3

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Follow a directed sequence of technical elective courses specializing in thermal energy systems.
2. Synthesize knowledge gained from a curriculum that focuses on applying fundamentals of engineering to the analysis of thermal energy systems.
3. Be prepared for the job market with a solid background in the energy field.

MANUFACTURING ENGINEERING, CERTIFICATE

OVERVIEW

Are you a student interested in manufacturing? Do you like drawing on a variety of skills and knowledge to solve complex problems? If so, you may wish to consider this certificate.

Because manufacturing itself is complex and broad, manufacturing engineers apply many engineering principles and work in a multidisciplinary world. This certificate allows students to emphasize either manufacturing systems or manufacturing processes—or, they can

choose to spread courses evenly across both. Through this certificate, students will gain an understanding of these two areas of manufacturing. Undergraduates in industrial and systems engineering or mechanical engineering can pursue this certificate without adding time to the degree.

For more information about the program, please see <https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-manufacturing-engineering/>.

HOW TO GET IN

ENROLLMENT

This undergraduate certificate is open to all undergraduate students at the University of Wisconsin–Madison. Mechanical engineering and Industrial and Systems Engineering students can complete this certificate without adding time to degree.

ADMISSION

Admission into the undergraduate Certificate in Manufacturing Engineering requires:

- Undergraduate standing at UW–Madison
- Cumulative GPA (at UW–Madison) greater than or equal to 3.0
- Green Shop Pass with CNC 1 upgrade (College of Engineering TEAM Lab, formerly known as the Student Shop)
- Completion of the admissions form (found on the program website (<https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-manufacturing-engineering/>) under the "Curriculum, Admission and Completion" section under the "Admission" expanding header)
- Meeting with a faculty advisor

Students must complete an admissions form (<https://www.engr.wisc.edu/academics/undergraduate-academics/certificate-manufacturing-engineering/>), obtain the required signatures, and bring the form to one of the student services coordinators for the Department of Mechanical Engineering. The form will be used to ensure that students have completed the Green Shop Pass and CNC 1 upgrade in the College of Engineering TEAM Lab, meet the GPA requirement for admission, meet the course grade requirement for courses already completed, and list courses that are planned in order to satisfy the certificate program. The form will contain fields for the following information:

- Study plan (courses that have been taken, are being taken, and plan to take)
 - Core courses
 - Elective courses
 - Grades for any courses that have already been taken
 - When future courses will be taken
- Cumulative GPA at time of admission
- Expected graduation date
- Major
- Signature from a key program faculty member indicating that the student meets the admission requirements and has discussed the study plan with the faculty member

COMPLETION

In order to successfully complete the undergraduate certificate in manufacturing engineering, students must:

- Have been admitted to the certificate
- Maintain a cumulative GPA of 3.0 or greater for the courses taken for the certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.
- Have received a grade of BC or higher in all courses taken for the certificate. If a course is repeated, the highest grade received in the course is used for this criteria.

REQUIREMENTS

The core courses were chosen to include three manufacturing process-focused courses as well as two manufacturing systems-focused courses. A manufacturing engineer must be multidisciplinary because of the complex and broad nature of manufacturing as an application of many engineering principles. The objective of the core course requirements is to provide students with basic understanding of manufacturing systems and basic understanding of manufacturing processes.

The certificate requires a total of 18 credits.

Code	Title	Credits
Three courses must be from the following Core Courses with a grade of BC or better:		9
M S & E 332	Macroprocessing of Materials	
M E 313	Manufacturing Processes	
M E 314	Manufacturing Fundamentals ¹	
I SY E 315	Production Planning and Control	
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis ¹	
An additional three courses must be from any of the following Elective Courses with a grade of BC or better, with at least one course from each of the two categories:		9
1. Mechanical and Materials Engineering Electives		
M E 314	Manufacturing Fundamentals ¹	
M E 417	Transport Phenomena in Polymer Processing	
M E 418	Engineering Design with Polymers	
M E 419	Fundamentals of Injection Molding	
M E 420	Introduction to Polymer Composites Processing	
M E 429	Metal Cutting	
M E 437	Advanced Materials Selection	
M E/E C E 439	Introduction to Robotics	
M E 447	Computer Control of Machines and Processes	
M E 449	Redesign and Prototype Fabrication	
M E 514	Additive Manufacturing	
M S & E 333	Microprocessing of Materials	
M E 531	Digital Design and Manufacturing	
M S & E 461	Advanced Metal Casting	
M S & E/M E 462	Welding Metallurgy	
2. Industrial & Systems Engineering Electives		
I SY E 412	Fundamentals of Industrial Data Analytics	
I SY E 415	Introduction to Manufacturing Systems, Design and Analysis ¹	

I SY E/M E 510	Facilities Planning
I SY E/M E 512	Inspection, Quality Control and Reliability
I SY E/B M E 564	Occupational Ergonomics and Biomechanics
I SY E 575 or M E/ STAT 424	Introduction to Quality Engineering Statistical Experimental Design
I SY E 605	Computer Integrated Manufacturing
I SY E 615	Production Systems Control
I SY E/M E 641	Design and Analysis of Manufacturing Systems
I SY E/M E 643	Performance Analysis of Manufacturing Systems

Total Credits **18**

¹ If M E 314 Manufacturing Fundamentals and/or I SY E 415 Introduction to Manufacturing Systems, Design and Analysis are taken as part of the Core Course Requirement, then they cannot also count as an elective.

No exceptions or substitutions to the core courses are allowed.

Elective courses not listed must be specifically approved by the curriculum committee of the department teaching the course. The request must include the course number, course name, name and contact information for the professor currently teaching or planning to teach the course; syllabus; and which category it should be listed under. Courses that are approved by the curriculum committee of the department teaching the course must be sent to the certificate program director. Only formal courses will be considered.

Only courses taken for a letter grade count toward this certificate. Only courses in which a grade of BC or better is received count toward this certificate. Courses taken at other institutions may be counted toward this certificate if they have been identified as equivalent through the existing process. At least 50% of the courses (i.e., three courses) for this certificate must be earned in residence on the UW–Madison campus.

Students must maintain a cumulative GPA of 3.0 or better for the courses taken for this certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Demonstrate knowledge of the fundamental concepts of manufacturing discrete parts.
2. Utilize skills related to manufacturing engineering.
3. Communicate effectively in the methods related to manufacturing engineering.
4. Generate solutions to problems that may arise in manufacturing engineering.

Sindo Kou, Professor

MECHANICAL ENGINEERING, B.S.

Mechanical engineers are problem-solvers who make things work better, more efficiently, and more economically. They are innovators, coming up with original ideas to apply scientific knowledge in new ways. Mechanical engineers are builders, designing and developing machines and systems that make life easier. Mechanical engineers have strong science, mathematics, and technology backgrounds.

Manufacturing processes, design of mechanical equipment and systems, and energy generation and utilization are traditional mechanical engineering fields. Students receive basic preparation in all of these areas. Through choice of elective courses they may further specialize in areas such as automatic control systems, renewable energy systems, robotics, product design, biomedical engineering, computational mechanics, manufacturing systems engineering, etc. Mechanical engineering prepares students for entrance into industry, for independent business (e.g., consulting, contracting, or manufacturing), or for work in government agencies. A degree in mechanical engineering may be used as a background for medicine, law, or business, as well as for graduate work in engineering.

Work in these areas requires a solid background in mathematics, statistics, mechanics, physics, machine design, thermal sciences, materials, the use of computers, and manufacturing processes. Mechanical engineers must also possess good communication skills and be able to work in teams. Mechanical engineers should be aware of social and environmental consequences of their work.

With these skills, broad training, and an emphasis on systems design, mechanical engineers are in demand in practically every type of manufacturing, consulting, sales, and research organization. Mechanical engineers may work in automotive, materials processing, heavy equipment, paper, plastics, power, aerospace, chemical, electronics, or many other large and small industries. Their work may involve research and development of new products, design of equipment or systems,

supervision of production, plant engineering, administration, sales engineering, or testing of individual components or complete assemblies.

Although many special areas exist in the profession, mechanical engineering can be subdivided into energy systems and mechanical systems.

The energy systems field has taken on special significance with the current awareness of the limited energy sources and the effects of energy use on the environment. In this field, mechanical engineers carry out work on the behavior of liquids, gases, and solids as they are used in all types of energy-conversion systems. Automotive engines, gas turbines, steam power plants, refrigeration systems, air pollution control, cryogenics and energy utilization require this type of background. To be proficient in this the engineer must have a knowledge of thermodynamics, fluid dynamics, heat transfer, and related subjects.

The mechanical systems field covers the design and manufacturing of products and equipment. Mechanical engineers who focus on design conceive of new devices and machines and also refine and improve existing designs. The design engineer must be proficient in kinematics, machine elements, mechanics, strength and properties of materials, dynamics, vibrations, etc. Mechanical engineers who focus on manufacturing are involved with planning and selecting manufacturing methods, with designing and developing manufacturing equipment, and with increasing the efficiency and productivity of current manufacturing technologies for polymer, metal, and ceramic products. The manufacturing engineer uses chemistry, materials science, mechanics of materials, materials processing principles and practices, principles of computer control, engineering statistics, and other physical and thermal sciences to improve manufacturing operations and systems, and the products they produce. Increasingly, the systems that mechanical engineers work with incorporate biological and information technology components.

MECHANICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Graduates from the undergraduate program in mechanical engineering will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals. We encourage this diversity of paths.

Independent of whether our graduates choose to pursue a professional career, postgraduate education, or volunteer service in engineering or a different field; we expect that our graduates will achieve the following objectives within three to five years after graduation:

1. They will exhibit a fundamental understanding of broader engineering disciplines with strong skills in mechanical engineering, problem solving, leadership, teamwork, and communication.
2. They will use these skills to contribute to their organizations and communities.
3. They will make thoughtful, well-informed decisions in their career and life.
4. They will demonstrate a continuing commitment to and interest in their own and other's education.

HOW TO GET IN

ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW–Madison (<https://www.admissions.wisc.edu/apply/>) need to indicate an engineering major (<https://www.engr.wisc.edu/academics/undergraduate-academics/choosing-a-major/>) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/first-year-undergraduate-students/progression-requirements/>) at the end of the first year to guarantee advancement in that program.

CROSS-CAMPUS TRANSFER TO ENGINEERING

UW–Madison students in other schools and colleges on campus must meet the course and credit requirements for admission to engineering degree granting classifications specified in the general college requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>). The requirements are the minimum for admission consideration. Cross-campus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW–Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (<https://www.engr.wisc.edu/academics/student-services/academic-advising/cross-campus-students/>) for students to learn about the cross-campus transfer process.

OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW–Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (<https://www.engr.wisc.edu/academics/student-services/academic-advising/transfer-students/>) at the point of transfer or within their first two semesters at UW–Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have earned more than 80 transferable semester credits at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select four-year UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (<https://www.engr.wisc.edu/admissions/undergraduate-admissions/returning-adults-second-degree-students/>) might explore the Biological Systems Engineering program at UW–Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	• Breadth—Humanities/Literature/Arts: 6 credits
	• Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
	• Breadth—Social Studies: 3 credits
	• Communication Part A & Part B *
	• Ethnic Studies *
	• Quantitative Reasoning Part A & Part B *

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

SUMMARY OF REQUIREMENTS

The following curriculum applies to undergraduate students admitted to the Mechanical Engineering degree program in Fall 2021 or later. Check with the department for any recent changes. Students admitted before Fall 2021 can locate their curriculum at this link (<https://www.engr.wisc.edu/department/mechanical-engineering/academics/bachelor-of-science-in-mechanical-engineering/>).

Code	Title	Credits
	Mathematics and Statistics	19
	Basic Science	14
	Non–Mechanical Engineering	12
	Mechanical Engineering Core	50
	Technical Electives	9
	Math/Science Electives	3
	Communication Skills	6
	Liberal Studies	15
Total Credits		128

MATHEMATICS/STATISTICS

Code	Title	Credits
MATH 221	Calculus and Analytic Geometry 1	5
MATH 222	Calculus and Analytic Geometry 2	4
MATH 234	Calculus--Functions of Several Variables	4
MATH 320	Linear Algebra and Differential Equations	3
STAT 324	Introductory Applied Statistics for Engineers	3
Total Credits		19

All transfer students must have the equivalent of the above courses. If the above requirement is fulfilled with fewer than 19 credits, the balance becomes free elective credits.

Transfer students may fulfill the statistics requirement with other statistics courses having a calculus prerequisite and the approval of the mechanical engineering department via a Course Substitution Form.

BASIC SCIENCE

Code	Title	Credits
Select one of the following:		4-5
CHEM 109	Advanced General Chemistry	
CHEM 103	General Chemistry I	
COMP SCI 220	Data Science Programming I	4
PHYSICS 202	General Physics ¹	5
Total Credits		13-14

¹ Students following the normal M E course sequence need not take PHYSICS 201 General Physics to satisfy the prerequisites for PHYSICS 202 General Physics.

NON-MECHANICAL ENGINEERING

Code	Title	Credits
E M A 201	Statics (with a grade of C or better)	3
M S & E 350	Introduction to Materials Science	3
E C E 376	Electrical and Electronic Circuits	3
E C E 377	Fundamentals of Electrical and Electro-mechanical Power Conversion	3
or M E 346	Introduction to Feedback Control for Mechanical Engineers	
Total Credits		12

MECHANICAL ENGINEERING CORE

Code	Title	Credits
M E 201	Introduction to Mechanical Engineering	3
M E 231	Geometric Modeling for Design and Manufacturing	3
M E 240	Dynamics (with a grade of C or better)	3
M E 306	Mechanics of Materials (with a grade of C or better)	3
M E/E M A 307	Mechanics of Materials Lab	1

M E 313	Manufacturing Processes	3
M E 314	Manufacturing Fundamentals	3
M E 331	Computer-Aided Engineering	3
M E 340	Dynamic Systems	3
M E 342	Design of Machine Elements	3
M E 351	Interdisciplinary Experiential Design Projects I	6
& M E 352	and Interdisciplinary Experiential Design Projects II	
M E 361	Thermodynamics (with a grade of C or better)	3
M E 363	Fluid Dynamics	3
M E 364	Elementary Heat Transfer	3
M E 368	Engineering Measurements and Instrumentation	4
M E 370	Energy Systems Laboratory	3
Total Credits		50

TECHNICAL ELECTIVES

Code	Title	Credits
The mechanical engineering curriculum requires a total of 9 credits of technical electives. A minimum of 3 of those 9 credits must be from formal M E courses numbered 400 and higher. A formal course is defined as a class that meets regularly in a lecture format to study a selected topic. The educational mission is assisted with homework and exams. Formal courses include online courses but do not include seminar, survey, independent study, research, topics, or similar courses.		9

Technical electives include formal courses in engineering, mathematics, physics, chemistry, statistics, and computer science courses numbered 400 and higher. INTEREGR and E P D courses are limited to those listed below. The following courses are also accepted as technical electives:

ANAT&PHY 335	Physiology	5
BMOLCHEM 314	Introduction to Human Biochemistry	3
BSE 351	Structural Design for Agricultural Facilities	3
BSE 364	Engineering Properties of Food and Biological Materials	3
BSE/ENVIR ST 367	Renewable Energy Systems	3
CBE 320	Introductory Transport Phenomena	4
CBE 326	Momentum and Heat Transfer Operations	3
CHEM 341	Elementary Organic Chemistry	3
CHEM 343	Introductory Organic Chemistry	3
CHEM 345	Intermediate Organic Chemistry	3
CIV ENGR 311	Hydroscience	3
CIV ENGR 320	Environmental Engineering	3
CIV ENGR/G L E 330	Soil Mechanics	3
CIV ENGR 340	Structural Analysis I	3
CIV ENGR 370	Transportation Engineering	3
CIV ENGR 392	Building Information Modeling (BIM)	3

CIV ENGR 415	Hydrology	3
COMP SCI 300	Programming II	3
COMP SCI 320	Data Science Programming II	4
COMP SCI/E C E 354	Machine Organization and Programming	3
E C E 320	Electrodynamics II	3
E C E 330	Signals and Systems	3
E C E 340	Electronic Circuits I	3
E C E 342	Electronic Circuits II	3
E C E/COMP SCI 352	Digital System Fundamentals	3
E C E 353	Introduction to Microprocessor Systems	3
E C E/COMP SCI 354	Machine Organization and Programming	3
E C E 355	Electromechanical Energy Conversion	3
E C E 356	Electric Power Processing for Alternative Energy Systems	3
E P 272	Engineering Problem Solving Using Maple	1
E P D 374	Intermediate Technical Japanese I	3
E P D 375	Intermediate Technical Japanese II	3
E P D 660	Core Competencies of Sustainability	3
INTEREGR 301	Engineering and Biology: Technological Symbiosis	1-4
I SY E 315	Production Planning and Control	3
I SY E 323	Operations Research-Deterministic Modeling	3
I SY E/PSYCH 349	Introduction to Human Factors	3
INFO SYS 371	Technology of Computer-Based Business Systems	3
MATH 321	Applied Mathematical Analysis	3
MATH 322	Applied Mathematical Analysis	3
M E 273	Engineering Problem Solving with EES	1
M S & E 330	Thermodynamics of Materials	4
M S & E 332	Macroprocessing of Materials	3
M S & E 352	Materials Science-Transformation of Solids	3
N E 305	Fundamentals of Nuclear Engineering	3
PHYSICS 205	Modern Physics for Engineers	3
PHYSICS 241	Introduction to Modern Physics	3
PHYSICS 311	Mechanics	3
PHYSICS 321	Electric Circuits and Electronics	4
PHYSICS 322	Electromagnetic Fields	3
PHYSICS 325	Optics	4
STAT 311	Introduction to Theory and Methods of Mathematical Statistics I	3
STAT 312	Introduction to Theory and Methods of Mathematical Statistics II	3
STAT 333	Applied Regression Analysis	3
STAT 349	Introduction to Time Series	3

STAT 351	Introductory Nonparametric Statistics	3
----------	---------------------------------------	---

Up to 3 technical elective credits may be obtained for non-formal courses such as independent study courses (M E 489, M E 491, M E 492, and other engineering independent study courses numbered 399 and higher); Cooperative Education (M E 1); and E P D 690, "Wisconsin Engineer Magazine."

MATH/SCIENCE ELECTIVES

Code	Title	Credits
	The mechanical engineering curriculum requires 3 credits of math/science electives. CHEM 104 and any formal course listed as a biological science and numbered 100 or higher will satisfy this requirement. In addition, any formal course offered by an engineering department, or listed as a physical or natural science, and numbered 200 or higher, will also satisfy this requirement. INTEREGR and E P D courses will not satisfy the math/science elective requirement.	3
Total Credits		3

COMMUNICATION SKILLS

Code	Title	Credits
ENGL 100	Introduction to College Composition	3
or LSC 100	Science and Storytelling	
or COM ARTS 100	Introduction to Speech Composition	
or ESL 118	Academic Writing II	
INTEREGR 397	Engineering Communication (was EPD 397 before Fall 2020)	3
Total Credits		6

LIBERAL ELECTIVES

Code	Title	Credits
	The Mechanical Engineering curriculum requires 15 credits of liberal elective courses. See College of Engineering Liberal Studies Requirements for details.	
Complete Requirements (p. 214)		15
Total Credits		15

ADDITIONAL INFORMATION

Students fulfilling all course requirements with fewer than 128 credits must comply with the credit minimum by taking additional free elective credits. Students in good standing may take free elective courses pass/fail (see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>) for details). Pass/fail courses do not count toward specific degree requirements.

Independent Studies and projects courses:

Code	Title	Credits
M E 291	Undergraduate Mechanical Engineering Projects	1-3
M E 299	Independent Study	1-3
M E 489	Honors in Research	1-3

M E 491	Mechanical Engineering Projects I	1-3
M E 492	Mechanical Engineering Projects II	1-3

Students must have a cumulative 2.5 GPA or a 3.0 GPA for their previous two semesters and have written permission to enroll from their research advisor.

For information on credit loads, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (<http://guide.wisc.edu/undergraduate/engineering/#policiesandregulationstext>).

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

First Year

Fall	Credits	Spring	Credits
MATH 221		5 MATH 222	4
CHEM 109 or 103 ¹		5 E M A 201 ²	3
M E 201		3 M E 231	3
Liberal Studies Elective		3 Communication A	3
		Liberal Studies Elective	3
	16		16

Second Year

Fall	Credits	Spring	Credits
MATH 234		4 MATH 320	3
M E 306 ²		3 M E 240 ²	3
COMP SCI 220		4 Math/Science Elective	3
M E/E M A 307		1 M S & E 350	3
Liberal Studies Elective		3 STAT 324	3
	15		15

Third Year

Fall	Credits	Spring	Credits
M E 331		3 M E 342	3
M E 361 ²		3 M E 363	3
M E 340		3 INTEREGR 397 (was EPD 397)	3
PHYSICS 202		5 E C E 376	3
M E 310		3 M E 311	3
		Liberal Studies Elective	3
	17		18

Fourth Year

Fall	Credits	Spring	Credits
M E 351		3 M E 352	3
M E 364		3 M E 370	3
M E 368		4 Technical Elective	3
M E 346 or E C E 377		3 Technical Elective	3
Technical Elective		3 Liberal Studies Elective	3
	16		15

Total Credits 128

¹ CHEM 109 Advanced General Chemistry may be taken in place of CHEM 103 General Chemistry I. If CHEM 103 is taken, students may need to take additional free electives to meet the minimum number of credits required for the degree.

² E M A 201 Statics, M E 240 Dynamics, M E 306 Mechanics of Materials, and M E 361 Thermodynamics each require a minimum grade of C.

ADVISING AND CAREERS

ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of

Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying pre-professional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-on-one with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

COLLEGE OF LETTERS & SCIENCE

WHY CHOOSE THE COLLEGE OF LETTERS & SCIENCE (L&S)?

What's so great about a liberal arts education from UW–Madison?

For one thing, it makes for a college experience that is rich in discovery, exploration, personal growth, and new ideas.

But while your courses may be fascinating, liberating, eye-opening and mind-blowing, a liberal arts degree from UW–Madison keeps working for you long after you have graduated.

By pursuing a degree in the liberal arts—a bachelor of arts or a bachelor of science—you are preparing for long-term satisfaction in work and in life. A liberal arts degree is a journey of self-discovery, as you explore new topics and discuss ideas with a wide range of people. You delve deeply into a broad range of subjects beyond just your major. When you graduate, you aren't narrowly prepared for one field. You've developed writing, presentation, and analytical skills. You've been exposed to the scientific method, as well as literary analysis. A chemistry major, for example, will also graduate with knowledge of a language, history, social science, the arts, and more.

WHY DOES THIS MATTER?

Because the more you know, the more curious you become. Curious people seek opportunities to enrich and expand their lives. Learning leads to conversation, dialogue, innovation, advancement. Employers value liberal arts majors because they are problem-solvers, out-of-the-box thinkers, and good communicators.

CAN A 4-YEAR DEGREE FROM L&S REALLY OPEN DOORS WITH EMPLOYERS?

Yes, it can. Based on a recent L&S alumni survey rigorously designed and administered by the university's nationally renowned survey center, our graduates' employment rates are on par with the School of Business and the College of Engineering, and out-perform the national average for university graduates. They work for an extremely wide range of fields, including technology, corporate management, education, and nonprofits.

L&S alumni also report high job satisfaction and believe that their academic preparation gave them an advantage compared to employees from other colleges and universities.

Then there's our L&S Career Initiative (<http://ls.wisc.edu/lsci/>) (LSCI)—unique among large public universities. Funded by alumni and sponsored by key employers, the LSCI is designed to help each and every one of our students—not just the extra-motivated or well-connected few—define his or her path. We start where *you* are—and go from there. From the basics of resume-building, to connecting with alumni mentors, to landing an internship, the resources are at your fingertips.

BUT WE VALUE LEARNING FOR ITS OWN SAKE, HERE.

You will never regret your liberal arts degree from UW–Madison, because it gives you the opportunity to explore subjects that fascinate you, as well as prepare you for a successful career. You will connect with wonderful faculty from 125 departments, programs, centers and institutes, whose mentoring and teaching will influence your goals and direction. And you will gain an appreciation for learning that will last a lifetime.

The University of Wisconsin–Madison is one of the great universities of the world, and the College of Letters & Science (<http://www.ls.wisc.edu/>) is at its center. Students who earn a bachelor of arts or bachelor of science degree in the College of Letters & Science (L&S) complement their broad study in the liberal arts and sciences with in-depth study of one or more particular fields, or "majors." Majors range from African cultural studies to philosophy in the humanities, from astronomy to zoology in the natural sciences, and from Afro-American studies to sociology in the social sciences.

In addition to the bachelor of arts and bachelor of science degrees available in L&S, the college also offers a limited number of special degrees. These programs often have additional admission requirements and require completion of additional requirements in the major.

Finally, a wide array of certificate programs are also available for students who have special interests in such diverse topics as integrated liberal studies; international, global, and area studies; religious, ethnic, and gender studies; and more.

DEGREES/MAJORS/CERTIFICATES

All students pursuing their undergraduate studies in the College of Letters & Science **must** fulfill the following requirements:

- General Education Requirements (p. 23)
- Letters & Science Requirements (p. 358)
- Major/Degree/Certificate Requirements (See below)

Certificates are not required for graduation from L&S. With a few exceptions, students are expected to complete all requirements for a certificate program prior to graduating.

L&S will award all declared and completed certificates upon graduation with the L&S degree. **Certificates that are not complete at the time of graduation will not be awarded.** Students who have satisfied all major and degree requirements will not be delayed from graduating if they have unmet requirements in a declared certificate program.

Although most certificates **must** be completed at the same time students have completed all of their major and degree requirements, there are a very limited number of certificates that are available to students after they graduate. Students who have completed a substantial portion (as least 12 credits) of a certificate at UW–Madison, and who may need one or two additional courses to complete the certificate, may do so immediately after completing

a bachelor's degree. This provision is not universal; it applies to a limited number of certificates only. Students seeking to complete certificates eligible under this provision should enroll in the remaining coursework as a University Special (non-degree) student. A certificate must be completed within a year of completion of the bachelor's degree. More information about L&S certificates can be found at certificate programs (p. 326) under Courses and Enrollment.

For general information about certificates and which ones can be earned/completed as a University Special, see undergraduate/special student certificates (<http://guide.wisc.edu/nondegree/undergraduate-special-student-certificates/>).

NOTE: Major requirements are the same whether a student pursues a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.) degree.

- African Cultural Studies, B.A. (p. 369)
- African Cultural Studies, B.S. (p. 375)

- Zoology, B.A. (p. 1049)
- Zoology, B.S. (p. 1055)

the Office of Admissions and Recruitment at UW–Madison. Transfer students must complete all Letters & Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS (<https://registrar.wisc.edu/dars-student/>) report which will explain how their transfer credits will apply toward L&S requirements. Students can request and review their DARS in the Student Center via My UW (<https://my.wisc.edu>). Students can also request DARS for programs, majors, or certificates that they have not declared but are interested in declaring. These reports are called “what-if” reports. (Please note that some programs may not be available in DARS. For information about requirements in a program not available in DARS, contact the advisor for the particular program.)

Please note that the DARS audit serves as the *document of record* (DOR) for students in the College of Letters & Science. The DOR is used to certify completion of degree requirements, and it is retained according to university record retention and archival policies.

Students can transfer only a limited number of credits from non-degree-granting accredited institutions and correspondence courses. See non-degree-granting accredited institutions’ transfer credit limitation (p. 326) in the *Guide* under **Credits**.

Transfer students who have more than 30 degree credits **are ineligible** to earn retroactive credits in a foreign language on the UW–Madison campus. See credit by course examination/retroactive credits (p. 326) in the *Guide* under **Credits**.

Advisors for freshman and sophomore students are in the L&S Academic Advising Services (608-262-5858) in 101 Ingraham Hall and the Cross-College Advising Service (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major. **All L&S undergraduate students are expected to declare a major by the time they have 86 degree credits.**

Transfer students should note that the L&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007 are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous catalogs under Archive (<http://guide.wisc.edu/archive/>) for more information.)

Because some requirements in force before this edition of the *Guide* differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog or *Guide* in force at the time of their first matriculation to college. (See past catalogs (<http://guide.wisc.edu/archive/>) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

ON-CAMPUS TRANSFER

Continuing UW–Madison students must have a minimum 2.000 cumulative grade point average **and** a UW–Madison grade point average of at least 2.000 in their most recent semester of work in order to transfer into the College of Letters & Science. First-semester and new transfer students without a UW–Madison grade point average may transfer into Letters & Science provided they meet university admission requirements (three units of math and two units of a single foreign language). Students admitted to the university with admission deficiencies must remove those deficiencies before they are eligible to transfer into L&S. **For more information about transferring into L&S, call 608-262-5858 or refer to request to transfer into L&S (<https://advising.ls.wisc.edu/transfer/>).**

ENTERING THE COLLEGE

ADMISSIONS

Any student interested in earning an undergraduate degree in the College of Letters & Science will need to apply for admission through the Office of Admissions and Recruitment at UW–Madison. Information on applying to the university as a freshman, transfer, or international student is available through the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/apply/>).

Prospective students with questions about study in the College of Letters & Science may contact L&S Academic Advising Services (<http://advising.ls.wisc.edu/>) at 608-262-5858 or Cross-College Advising Service (<https://ccas.wisc.edu/>) at 608-265-5460. Students should also feel free to contact the major department (p. 323) directly if they have specific questions about a particular major.

TRANSFER STUDENTS

Transfer students interested in earning an undergraduate degree in the College of Letters & Science will need to apply for admission through

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters & Science will receive no more than 18 credits per semester toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for work in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 358).)

UNIVERSITY SPECIAL STUDENTS

If you are not currently enrolled in a UW–Madison degree program but wish to take courses within the College of Letters & Science at UW–Madison for credit as a non degree-seeking candidate or as an auditor, it may be best to consider becoming a special student (<https://acsss.wisc.edu/special-student-types/>). Information about becoming a non degree-seeking student at UW–Madison can be found at Adult Career and Special Student Services (<https://acsss.wisc.edu/apply/>).

WISCONSIN EXPERIENCE

THE WISCONSIN EXPERIENCE: ESSENTIAL LEARNING IN THE COLLEGE OF LETTERS & SCIENCE

The three elements of learning described below—tools, breadth, and depth—work together to create a broad and rich education in the liberal arts and sciences, and promote attainment of core areas of essential learning: knowledge of human cultures and the natural and physical world, intellectual and practical skills, personal and social responsibility, and integrative and applied learning. These and countless other experiences comprise the Letters & Science approach to helping students obtain a distinctive *Wisconsin Experience*.

Additional information about the Wisconsin Experience (<https://students.wisc.edu/wisconsin-experience/>) can be found through the Office of Admissions and Recruitment/Why UW (https://www.admissions.wisc.edu/why/wisconsin_experience.php) link.

POLICIES AND REGULATIONS

ACADEMIC STATUS

ACADEMIC PROBATION (P.)

Every student is expected to maintain at least a C average (2.000 grade point average) on all work carried, whether passed or not, in each term (fall, spring, and summer). Failure to earn this minimum grade point average will result in a status of **probation, strict probation, or dropped**, as shown below.

Every student can determine their academic status at the end of each term (fall, spring, or summer) based on the probationary status when the term began and the grade point average earned during that term.

1. If a student is not on probation and:
 - a. earns a grade point average in the fall term, spring term, or summer term between 1.000–1.999: placed on **probation**.
 - b. earns a grade point average in the fall term, spring term, or summer term less than 1.000: placed on **strict probation**.
2. If a student is on probation and:
 - a. earns a grade point average in the fall term, spring term, or summer term between 1.500–1.999: placed on **strict probation**.
 - b. earns a grade point average in the fall term, spring term, or summer term less than 1.500: **dropped for at least one year**.
3. If a student is on strict probation and the grade point average is less than 2.000: **dropped for at least one year**.

If a student is dropped for one year, the student must stay out of school for a minimum of twelve (12) months. For more information on Academic Probation and Drop, refer to Probation (<http://saa.ls.wisc.edu/probation-overview.htm>) and L&S Academic Probation System (<https://kb.wisc.edu/lis/21180/>).

ACADEMIC SUSPENSION (P.) (DROPPED FOR ONE YEAR)

An L&S undergraduate student on academic probation will be dropped (placed on academic suspension) for at least one year at the end of any term in which the student has had at least two terms below a 2.000 grade point average (GPA). The College of Letters & Science undergraduate probation system is as follows:

- If a student is not on probation and earns a term GPA of 1.000–1.999, the student is placed on **probation**.
- If a student is not on probation and earns a term GPA of less than 1.000, the student is placed on **strict probation**.
- If a student is on probation and earns a term GPA of 1.500–1.999, the student is placed on **strict probation**.
- If a student is on probation and earns a term GPA of less than 1.500, the student is **dropped for one (1) year**.
- If a student is on strict probation and earns a term GPA below 2.000, the student is **dropped on one (1) year**.

Students have the opportunity to appeal the “dropped for one year” status from the University of Wisconsin–Madison by participating in the Appeals Process (also known as Faculty Appeals). It is important to note that appealing one’s drop status **does not** guarantee a student will be immediately readmitted to the university to continue his/her undergraduate studies. For more information about appealing, see appeal dropped status (<https://saa.ls.wisc.edu/policies-forms-2/probation/appeal-dropped-status/>) or contact L&S Undergraduate Academic Deans’ Services

(<https://saa.ls.wisc.edu/offices/academic-deans-services/>) for more assistance.

APPEALS (P.)

Exceptions for Students in Dropped Status

An L&S undergraduate student who has been placed on academic suspension or dropped for academic reasons may appeal for readmission. More detailed information can be found at appeal dropped status (faculty appeals) (<http://saa.ls.wisc.edu/probation-appeals-process.htm>).

- Students dropped at the end of fall term who wish to continue in school in the spring term **must** appeal in January for readmission the week before spring term classes begin.
- Students dropped at the end of spring term who wish to continue in school for the summer or fall term must appeal for readmission the week before the beginning of the first three-week summer term begins for students who wish to take summer classes, **or** before the eight-week summer term begins for students who do not wish to take summer courses.
- Students dropped at the end of a summer term who wish to continue in school for the fall term **must** appeal in August for readmission the week before fall term classes begin.

Additional information concerning appeals is available at Appeal Dropped Status (<https://saa.ls.wisc.edu/policies-forms-2/probation/appeal-dropped-status/>).

Exceptions to Basic Degree Requirements

A student wishing to request an exception to a basic degree requirement must first confer with an academic dean (<https://saa.ls.wisc.edu/offices/academic-deans-services-2/>). Only in extremely rare and unusual circumstances will any exception be made.

Exceptions to Major Requirements

A student wishing to request an exception to a requirement in the major must first confer with the advisor or chair of the department. If the department supports the request, a DARS exception is submitted on behalf of the student to Academic Information Management (AIM) in L&S Student Academic Affairs.

Exceptions to College Rules

A student wishing to request an exception to college rules should consult an academic dean in L&S Undergraduate Academic Deans' Services (<https://saa.ls.wisc.edu/offices/academic-deans-services-2/>). The dean will consider the request on an individual basis and make a decision to grant or to deny the request.

CLASS STANDING (P.)

Students are classified by year according to the number of degree credits they have earned:

Freshman: A student has fewer than 24 degree credits

Sophomore: A student has at least 24 degree credits

Junior: A student has at least 54 degree credits

Senior: A student has at least 86 credits

These credits must be in courses that count toward a Letters & Science degree. Advanced Placement (AP), College-Level Examination Program (CLEP), International Baccalaureate (IB) credits, credit by department examination, and retroactive credits (retrocredits) **will** count toward a student's class standing (level).

Every L&S undergraduate student is expected to maintain at least a C average (2.000 grade point average) on all work carried, whether passed or not, in each term (fall, spring, & summer). Failure to earn this minimum grade point average will result in a status of probation, strict probation or dropped. For more information, see the entries Academic Probation and Academic Suspension above.

DEAN'S LIST (P.)

The College of Letters & Science Dean's List is established at the end of each fall and spring terms. To be eligible for the Dean's List in a given term, students **must**:

- complete a minimum of 12 graded* credits in that term with a minimum GPA of 3.600 for students who are classified as freshmen (fewer than 24 credits) and sophomores (at least 24 credits), **or**
- complete a minimum of 12 graded* credits in that term with a minimum GPA of 3.850 for students who are classified as juniors (at least 54 credits) and seniors (at least 86 credits)
 - **Note:** *Advanced Placement (AP), College-Level Examination Program (CLEP), International Baccalaureate (IB) credits, credit by department examination, transfer credits, and retroactive credits (retrocredits) will count toward a student's class standing (level).*

**The grades used to determine the dean's list eligibility are: A, AB, B, BC, C, D, and F. A student must have a minimum of 12 credits from this list of grades in order to qualify for the L&S Dean's List.*

An entry, "Dean's List," appears on the student's grade report and on the transcript.

- Students who have P grades for their senior thesis (regardless of whether they have 12 other graded credits), as well as students with unresolved grades of NR, I, and Q **are not** eligible for the Dean's List until they get these outstanding temporary grades resolved.
- Once a student has resolved any outstanding grade issues and believes he/she qualifies to be on the Dean's List, the student should contact L&S Undergraduate Academic Deans' Services (<https://saa.ls.wisc.edu/offices/academic-deans-services/>) for more assistance.
- **Please note that the College of Letters & Science does not "round up" for the purpose of tabulating the GPA for the Dean's List.** For example, an L&S sophomore with a fall or spring term GPA of 3.599 is not eligible for the Dean's List since the minimum GPA for freshmen

and sophomores to qualify for the Dean's List is 3.600.

More information can be found at Dean's List (<https://registrar.wisc.edu/deanslist/>) and L&S Dean's List Qualifications (<https://kb.wisc.edu/lis/21121/>). For information about class standing, see L&S Undergraduate Classification and Class Standing (<https://kb.wisc.edu/lis/21122/>).

DISTINCTION IN THE MAJOR (P.)

This award is granted at graduation, upon the recommendation of a department to the dean, to any L&S undergraduate student **not** earning the Honors Degree (i.e., Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors) who has done superior work in the major and who has passed a comprehensive examination on that work. The comprehensive examination may be omitted for the student with a 3.500 grade point average in the major who successfully completes special work prescribed by the department. The award is noted on the student's transcript.

GOOD ACADEMIC STANDING (P.)

L&S undergraduate students are considered in good academic standing if they have a cumulative (CUM) GPA of at least a 2.000 and their most recent GPA is at least a 2.000. Students in good academic standing are not on any form of academic probation (<https://saa.ls.wisc.edu/policies-forms/probation/>) and are not at risk of being dropped from the university. For more information, see L&S Academic Probation System (<https://kb.wisc.edu/lis/21180/>).

ADMISSIONS AND TRANSFERS

ON-CAMPUS TRANSFERS (P.)

The College of Letters & Science (L&S) welcomes current UW–Madison students with an established GPA to transfer into the college if they meet certain requirements:

- Continuing students must have a 2.000 cumulative GPA at UW–Madison **and**
- A 2.000 in their most recent semester/term at UW–Madison, including summer term.
- A student dropped for academic reasons must be readmitted by the original school or college on the UW–Madison campus before initiating an L&S transfer.

Please note: Only new freshmen (first-year students) and transfer students who **do not** have an established UW–Madison GPA may request to transfer into the College of Letters & Science *during their first term on campus without having an established GPA*.

Students interested in transferring into L&S must carefully review the L&S Transfer Workshop presentation (https://isaas.wiscweb.wisc.edu/wp-content/uploads/sites/392/2018/01/Transfer-Workshop-Online-PPT_2017.pdf) and complete the online Transfer Request Form (<https://saa.ls.wisc.edu/policies-forms/lis-on-campus-transfer-request/transfer-to-lis-request-form/>). For more information on

transferring into L&S, please contact L&S Academic Advising Service at 608-262-5858.

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters & Science will receive no more than 18 credits per term (fall or spring) toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for studies in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 358).)

READMISSION (P.)

Students who have been required by the College of Letters & Science to take off time from their undergraduate studies at UW–Madison due to past academic performance (dropped/academic suspension) must apply for readmission with an academic dean in the College of Letters & Science in order to be eligible for reentry through the Office of Admissions and Recruitment. For more detailed information about apply for readmission, refer to readmission (<http://saa.ls.wisc.edu/readmission.htm>) through L&S Student Academic Affairs. More detailed information about the readmission process can be found by contacting L&S Undergraduate Academic Deans Services (<https://saa.ls.wisc.edu/offices/academic-deans-services/>) (lsdeans@saa.ls.wisc.edu or 608-262-0617).

REENTRY (P.)

Students who previously attended the University of Wisconsin–Madison but have not been enrolled in courses for at least one term/semester (not including the summer term) are considered reentry students. The primary admission consideration for a reentry student would be his/her academic record while previously enrolled at UW–Madison. For more information about this process, refer to apply as a reentry student (<https://admissions.wisc.edu/apply-as-a-reentry-student/>) via the Office of Admissions and Recruitment website.

Note: Any L&S undergraduate student who has been dropped (put on academic suspension) for at least one year due to their academic performance must also apply for readmissions through the College of Letters & Science. For more information, please refer to readmission (<http://saa.ls.wisc.edu/readmission.htm>).

TRANSFER STUDENTS (P.)

Transfer students must complete all Letters & Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS (p.) report, which will explain how their transfer credits will apply toward L&S requirements. DARS reports can be requested from the Degree Audit section of the registrar's office or accessed via My UW–Madison (<http://my.wisc.edu/>).

Students can transfer only a limited number of credits from non-degree-granting accredited institutions and correspondence courses. See non-degree-granting accredited

institutions' transfer credit limitation (p. 326) in the *Guide* under **Credits**.

Transfer students who have more than 30 degree credits are ineligible to earn retroactive credits in a foreign language on the UW–Madison campus. See credit by course examination/retroactive credits (p. 326) in the *Guide* under **Credits**.

Advisors for freshman and sophomore students are in the L&S Academic Advising Services (608-262-5858) in 101 Ingraham Hall and the Cross-College Advising Service (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major.

Transfer students should note that the L&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007, are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous Guides and Undergraduate Catalogs under Archive (<http://guide.wisc.edu/archive/>) for more information.)

Because some requirements in force before this edition of the *Guide* differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog in force at the time of their first matriculation to college. (See archived versions of the *Guide* and Undergraduate Catalog (<https://guide.wisc.edu/archive/>) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

TRANSFER STUDENTS WITH AN ASSOCIATE DEGREE FROM A UW SYSTEM INSTITUTION OR WISCONSIN TECHNICAL COLLEGE SYSTEM SCHOOL (P.)

Effective summer/fall 2012, all new transfer students with an associate's degree from either a UW System (UWS) institution or one of the Wisconsin Technical College System (WTCS) schools that award a liberal arts associate's degree (i.e., Madison College, MATC–Milwaukee, Nicolet, Chippewa Valley, Western) will have their University General Education Requirement (UGER) (p. 23) breadth requirements satisfied in all undergraduate schools/colleges on the UW–Madison campus. **L&S undergraduates should be aware that they may need to complete additional coursework to satisfy L&S breadth (p. 358) and other degree requirements.** Students should consult their DARS and speak with their undergraduate advisors if they have additional questions regarding satisfying L&S requirements.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by **both** WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical fields will not have their UGER breadth requirements satisfied.

UWS and WTCS transfer students with a qualifying liberal arts associate's degree are EXEMPT from meeting the following University General Education Breadth requirements:

- Natural Science—two (2) courses for a total of 6 credits
- Humanities/Literature/Arts—6 credits
- Social Studies—3 credits

Students will still be required to meet other University General Education Requirements (p. 23).

Please note: Students in the College of Letters & Science must meet the L&S breadth requirements (p. 358) with specific transfer courses or courses taken in residence.

COURSES AND ENROLLMENT

AUDIT (P.)

A student may enroll in a course (i.e., a lecture course) on an audit basis **only** with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. Courses with laboratory or performance skills may not be audited. Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester/term program load for purposes of determining fees and maximum credits carried. Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. **Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage.** See i (<https://kb.wisc.edu/lis/page.php?id=26734>) information on auditing courses for L&S undergraduate students (<https://kb.wisc.edu/lis/page.php?id=26734>) for more details.

L&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available at Course Change Request (<https://registrar.wisc.edu/course-change-request/>)) to Suite 110 Ingraham Hall, 1155 Observatory Drive. (**Course Change Requests can be accessed through an individual's Student Center in My UW** (<https://my.wisc.edu>) **under: Course Enrollment/Term Information/ Course Change Request.**) Students **will not** be able to submit or cancel a request to audit a course after the fourth (4th) week of the fall or spring term. Please note that the audit deadline differs for summer and modular session courses. For more details on how to request an audit for a class, please see course change request (<https://d26qj0sufsy9x2.cloudfront.net/wp-content/uploads/sites/36/2017/10/demo-coursechangerequest.swf>).

- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed. More specific information about deadlines can be found at modular courses (<https://registrar.wisc.edu/modular/>) on the Registrar's website.

- Audited courses, denoted as such by "AU" in place of a number of credits, are graded either "S" (Satisfactory) or "NR" (No Report) or "NW" (No work). **AU is not a grade.**
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits). Students should consult an advisor in the Office of Student Financial Aid (<https://financialaid.wisc.edu/>) for more detailed information.
- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the University Veteran Services (<https://veterans.wisc.edu/>).

- empathize, think critically about, and appreciate the complexities of their own culture and larger global community.

BREADTH COURSES (P.)

Natural Sciences (Breadth designations B, N, P, W, X, or Y)

Courses with the **natural sciences** (which include studies in the physical and biological sciences) designation focus on knowing the world through scientific inquiry— assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. Laboratory components give students firsthand experience in methods of scientific research. These courses help students see both the explanatory and creative processes in science that are transforming our world.

Arts & Humanities (Breadth designations H, L, X, or Z)

Courses with the "arts and humanities" designation focus on exploring the human condition and appreciation for the complexities of their own and other people's perspectives. Employing analytical, critical, and interpretive methods, these courses teach a wide array of skills necessary to understand and analyze past, present, and future of the world around us. Literature courses (labeled with an "L" designation) are a subset of Humanities courses; they may be used to meet Humanities requirements or specific Literature requirements if students have them.

After completing an Arts & Humanities course, a student should be able to:

- comprehend and employ various approaches to interpreting and creating cultural artifacts such as works of art, literature, music, architecture, philosophy, film, etc.
- demonstrate knowledge of major movements, trends, or events in the development of world cultures
- demonstrate an appreciation of the complexities of the interpretative process within historical and cultural contexts
- apply critical approaches to the works and alternative ways of considering them

Literature (Breadth designation L)

Courses with "literature" designation focus on the reading and interpretation of texts in multiple genres, including fictional and nonfictional prose, poetry, and drama, as well as digital media, from a range of cultures, in translation or in their original languages. They teach skills of literary analysis while examining the relation between the texts and the cultures, historical periods, and ideas that produced them. These courses are a subset of Humanities and may be used to meet either Humanities requirements or specific Literature requirements if students have them.

Social Sciences (Breadth designations S, W, Y, Z)

In the **social sciences**, students learn other ways to understand humanity. Courses in this area are found in a wide range of fields that share a common focus on the systematic study of personal interactions, and the interactions of society and institutions. These fields use quantitative and qualitative research strategies to look at the variety and scale of these interactions, and in these courses, students learn how to formulate research questions and determine what techniques are best used to answer those questions.

These "ways of knowing" the world around us intersect and overlap, and the ideas presented in one area will often inform and transform what we know or think about what we know about the others. Taken as a whole, the breadth requirement is intended to help UW–Madison graduates appreciate the many and complex ways to understand the world around us. By these means, students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand humanity, and to behave in socially responsible ways

Note that graduate courses do not count toward the L&S undergraduate intermediate/advanced level or breadth requirement and will not be approved to count for L&S breadth/level based on a student's academic interests or graduation needs if a student is approved to take a graduate-level course.

CERTIFICATE PROGRAMS (P.)

Students who intend to complete a certificate program in Letters & Science are encouraged to meet with the certificate advisor as soon as possible to determine eligibility requirements that may apply. Admission to a certificate program (<http://guide.wisc.edu/explore-majors/>) requires meeting with the advisor to declare the specific certificate program. Students should use a degree audit (DARS (<https://registrar.wisc.edu/dars-student/>)) to monitor their progress in completing their certificate(s) since DARS is the official document used to certify completion of certificate programs. Students who decide not to complete the program after being admitted **must cancel** the certificate declaration with the

certificate advisor. See DARS (https://registrar.wisc.edu/dars_student.htm) for more information.

Although **most** L&S certificates must be completed **before** students earn their undergraduate degrees, there are a few certificates that are available to L&S undergraduate students after they graduate. For students who have substantially completed a certificate at UW–Madison (at least 12 credits) and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student (<https://acs.wisc.edu/apply/>).

The following certificates may be awarded only to students who were declared in the certificate program at the time of graduation from UW–Madison and who completed a substantial amount of the work in the program (at least 12 credits) while enrolled as an undergraduate here. **Students must complete the requirements for the following certificates within 12 months of graduation.**

- Archaeology (p. 404)
- East Asian Studies (p. 863)
- Mathematics (p. 1149)
- Criminal Justice (p. 552)
- Religious Studies (p. 1293)

For the following certificates students must hold a baccalaureate degree (other conditions may apply as noted above) if they wish to earn these certificates after graduation:

- American Indian Studies (p. 391)
- Computer Sciences (p. 665) (may not have a major in computer sciences or a degree in electrical and computer engineering)
- German (p. 802)
- Gender and Women's Studies (p. 752)
- Teaching English to Speakers of Other Languages (p. 707)

Students are advised of the following details regarding certificate programs:

- **Some certificate programs may require or encourage students to take courses that are not designated as Liberal Arts and Science courses.** These courses **do not** count toward satisfaction of the requirement that students complete 108 credits in Liberal Arts and Sciences (LAS). **(Non-LAS courses do not carry L&S level or breadth so will not count toward fulfilling any breadth or I/A level requirements for L&S undergraduate students.)**
- Students may elect to count these credits among the allowed 12 free elective credits in the degree but should also be mindful of the fact that these courses **will not** count toward fulfilling breadth or level within L&S.
- An exception **will not** be made to count non Liberal Arts and Science courses for breadth and level if a student is using these credits to fulfill a certificate program and/or trying to fulfill other major/degree requirements.

- Completion of some certificate programs may require students to take more than 12 non–Liberal Arts and Sciences credits. **Students may not count more than 12 non–Liberal Arts and Sciences credits toward their L&S degree under any circumstances.**
- **Certificate programs are optional and are not required for graduation.** Because failure to complete a certificate program will not affect eligibility to graduate, students should understand that, *unless the certificate program is allowed to grant awards to University Special students*, they **must** complete all certificate requirements before graduation or they will not be able to complete the certificate program at a later date.
- **Course work being taken to satisfy certificate requirements should not be taken on a pass/fail basis.** Students should consult the advisor for the particular certificate program for more information about taking classes to satisfy certificate requirements.

CLASS ATTENDANCE POLICY (P.)

It is expected that every student will be present at all classes. Students are required to be present at the opening of the term and to remain until the work of the term (which includes the final examination period) is completed. **Note that any excused or unexcused absences may have a negative impact on a student's final grade in a course.** See the faculty senate approved class attendance policy (<https://secfac.wisc.edu/governance/faculty-legislation/ii-108-class-attendance-policy/>) and class attendance policy for students at UW–Madison (<https://kb.wisc.edu/lis/24628/>) for more details. Additional information can be found at UW–Madison Religious Observances & Accommodations Policy (<https://kb.wisc.edu/page.php?id=21698>).

It is against university policy for a student to attend classes without being enrolled. Student should be aware that instructors may require enrolled students to attend scheduled meetings of a class and/or to participate in other course-related activities, including online learning. Students are responsible for materials present in such meetings or activities. Because courses are designed and conducted in diverse ways, instructors are expected to inform students in writing at the beginning of each course if there are specific expectations for attendance/participation. This includes whether any component of the grade for the class is based on such attendance/participation.

CONCURRENT REGISTRATION AND ENROLLMENT AT UW–MADISON AND ANOTHER INSTITUTION (P.)

The College of Letters & Science recognizes that in some circumstances, courses offered by other institutions of higher learning (e.g., Madison Area Technical College [Madison College], Edgewood College, etc.) can complement the course of study offered by the residence program at UW–Madison. Permission is required to be enrolled at UW–Madison while also taking a class at another institution. This permission

must be obtained before enrolling in the course at the other institution.

Any student interested in being concurrently enrolled for the fall or spring semester must demonstrate that special circumstances are involved. Please note that simple preference or convenience is not considered a strong reason for getting permission to be concurrently enrolled. It is strongly recommended that students not use concurrent enrollment as a means by which particular degree or major requirements are taken entirely out of residence. Students who are granted permission to be concurrently enrolled are bound by the L&S regulation that students cannot take more than 18 credits in either the fall or spring term (the maximum credit load for the summer session is 12).

To obtain special permission to be concurrently enrolled, refer to concurrent enrollment request form (<https://saa.ls.wisc.edu/policies-forms/concurrent-enrollment/concurrent-enrollment-request-form/>).

- An L&S undergraduate student requesting concurrent enrollment should be beyond the first year of college and have a UW–Madison cumulative GPA of at least 2.500
- Permission for concurrent enrollment should be obtained before enrolling in the outside institution's course and prior to the 3rd week of classes (fall or spring term).
 - For the fall term, the deadline to request to be concurrently enrolled is Friday of the second week of the term.
 - For the spring term, the deadline to request to be concurrently enrolled is Friday of the second week of the term.
- Students requesting permission to be concurrently enrolled should demonstrate that special circumstances are involved. Simple preference or convenience is not a valid reason for granting permission to take an outside course concurrently with a residence program at UW–Madison.
- Students who are given permission to be concurrently enrolled are bound by the College of Letters & Science enrollment regulation of 18 credits maximum (which includes the total number of credits taken at both UW–Madison and the non-residence institution). If a student will exceed 18 credits in either the fall or spring term, the student must fill out the credit overload form (<https://saa.ls.wisc.edu/policies-forms/credit-overload/credit-overload-form/>).
- Students may never receive credit for more than 20 credits in either the fall or spring term. In addition, a student may never receive more than 12 (13 with dean's permission) during the summer term.
- Courses taken through the UW Extension/UW Independent Learning program are considered concurrently enrolled when students enroll in one of these classes while also taking classes at UW–Madison. When permission to take a course through Independent Learning is granted, the course(s) must

be completed during the UW semester/term in which the course was authorized to be taken.

- For example, a student who receives permission in fall 2019 to take a course through Independent Learning while also enrolled at UW–Madison must complete this course by the end of the fall 2019 term.
- It might be possible to get a UW–Madison Division of Extension Independent Learning Tuition Waiver (<https://lssaa.wiscweb.wisc.edu/wp-content/uploads/sites/144/2017/04/UW-Extension-Independent-Learning-Form.pdf>) for a course taken through Independent Learning during the fall or spring term. Please refer to concurrent enrollment and guidelines for a tuition waiver (<https://registrar.wisc.edu/guidelines-for-tuition-waivers/#guide>) for more information about the criteria to qualify for a tuition waiver for UW–Madison Division of Extension courses and the tuition waiver form.
- **If the Independent Learning course being taken puts a student above 18 credits during the fall or spring term, the student will need to pay for the extra credits not covered by the tuition waiver.**
- **All students must pay an administrative fee to take an Independent Learning course, even if the student receives a tuition waiver.** More information about fees and the tuition waiver can be found at il.wisconsin.edu or by calling 1-877-UW-LEARN (895-3276)
- General questions about taking courses through Independent Learning can be directed to il@uwex.edu.

To request permission to be concurrently enrolled, a student must fill out the following concurrent enrollment request form (<https://saa.ls.wisc.edu/policies-forms/concurrent-enrollment/concurrent-enrollment-request-form/>).

COURSE LEVEL (P.)

Each L&S course and each approved non-L&S course that satisfies the L&S liberal arts and science (LAS) requirement have been evaluated for level. Course levels are indicated with each course listed in this. **Only courses that indicate level after the course designation category for a course will count toward level in L&S for students. Note that graduate courses do not count toward the L&S undergraduate intermediate/advanced level requirement and will not be approved to count for L&S breadth/level based on a student's academic interests or graduation needs if a student is approved to take a graduate-level course.**

Elementary

Elementary-level courses are usually designed with first-year students (freshmen) and second-year students (sophomores) in mind with either very little or no prior knowledge of the discipline. However, these courses may also be suitable for third-year students (juniors) and fourth-year students (seniors) with limited background in the discipline. Elementary-level courses may act as a stepping stone for more advanced-level work or may, or may also be an ends in themselves by providing

breadth, enrichment, or general knowledge. Elementary-level courses typically have one or more of the following characteristics:

- **Breadth:** Students gain some basic understanding of the extent of a field or discipline. Students may also have the opportunity to learn how one field fits into or relates to other fields.
- **Foundation:** Students become acquainted with principles, terms, methods, and perspectives of a discipline or professional field, as a basis for more advanced or specialized study.

Intermediate

Intermediate-level courses may be best defined in relation to elementary and advanced-level work. They are a step beyond elementary-level courses that prepare students for more advanced work. Courses at this level are typically taken by second year students (sophomores) with some familiarity and knowledge of the discipline. Expectations of student performance may include making connections between basic terms and concepts within the discipline, and developing written and oral communication skills specific to the discipline.

- These courses typically require more preparation than elementary-level courses and less preparation than advanced-level coursework (and should have defined prerequisites).
- Intermediate-level courses are beyond the introduction of the discipline and the entry level of more general liberal arts skills, but are not yet as highly specialized or in-depth as advanced-level work.

Advanced

Advanced-level courses are usually designed with juniors or seniors in mind, although these courses may also be appropriate for advanced-level students with lower class standing (i.e., freshmen and sophomores). They typically have one or more of the following characteristics:

- **Depth/Focus:** Students engage with in-depth study of a discipline's theories and methods, developing an understanding of the applications and limitations of them. Courses typically require significant independent thinking on the part of the student or may offer opportunities for research.
- **Specialization:** Students develop specific intellectual and professional abilities that will enable them to be successful in a field or professional practice.
- **Refinement of Liberal Arts Skills:** Students build upon "entry study Liberal Arts skills" noted above, applying these skills more discerningly or in more challenging contexts.

- **Integration:** Students integrate knowledge gained from earlier studies such as a capstone experience.

CREDIT AND NO CREDIT COURSES (P.)

A limited number of courses are designated as being offered on a Credit/No Credit (<https://registrar.wisc.edu/credit-no-credit-courses/>) basis. Credit/No Credit courses are designated in the Guide under Courses. (Please note that Credit/No Credit **is not** the same as Pass/Fail.) The transcript for a Credit/No Credit course will indicate either CR (meaning the student earned credits for the course) or N (meaning the student did not earn any credit for the class). Students may not take such courses on any other basis. A grade of CR will give a student credit towards a degree but will not have any grade points associated with it to be figured into a student average GPA calculation.

CROSS-LISTED COURSES (P.)

Cross-listed courses are courses offered under more than one department heading. **Cross-listed courses (i.e., courses offered by more than one department) will be assigned the same number in each department in which it is offered (e.g., African 277, which is cross-listed with approximately five majors/departments (AFROAMER, ANTHRO GEOG, HISTORY, POLI SCI, SOC)).** The courses will carry identical L&S course attributes (breadth and level), will have the identical Guide descriptions in each listing, and will have identical course prerequisites. All cross-listed courses:

1. Must be approved by the University Curriculum Committee (**all** departments must submit a letter of support)
2. Must have the same Course Guide number (e.g., Biology 151, Botany 151, and Zoology 151)

Students completing two majors may count cross-listed courses (i.e., courses listed in both major departments) in partial satisfaction of the requirements for both majors. For more information, see cross-listed and "meets with" course information (<https://kb.wisc.edu/lis/page.php?id=21663>).

DEADLINES (P.)

If an L&S student wishes to drop a course (or courses), this means that the student will drop one or more classes from a specific semester or term while still staying enrolled in at least one course. For more information about dropping a course, see dropping a course at UW-Madison (<https://kb.wisc.edu/lis/page.php?id=21705>). Students should always consult the drop deadline for each term.

- Information about the drop and withdrawal deadlines for the fall and spring terms is located at Dates & Deadlines (<https://registrar.wisc.edu/dates/>) on the Registrar's website.
- Modular course deadlines are different from the regular drop deadlines in the fall or spring term. Information about these deadlines are located at modular courses (<https://registrar.wisc.edu/modular/>).

- For summer drop deadlines, students should consult the Key Deadlines information on the Registrar's homepage under Dates & Deadlines (<https://registrar.wisc.edu/dates/>) and Guidelines for Summer Enrollment Actions (<https://summer.wisc.edu/wp-content/uploads/2015/02/key-deadlines.pdf>).

Students on F-1 or J-1 student visas are required by regulations governing their status to enroll in a minimum of 12 credits during the fall and spring terms. If an L&S undergraduate student on an F-1 (or J-1) visa wishes to drop below full-time status (fewer than 12 credits), the student must obtain permission from International Student Services (ISS). For more information about full-time enrollment for international students, see important immigration reminders from ISS (<https://iss.wisc.edu/important-immigration-reminders-from-iss/>), full time enrollment (<https://iss.wisc.edu/students/current-students/f1-information/full-time-enrollment/>), and reduced course load (<https://iss.wisc.edu/students/current-students/reduced-course-load/>). More information can also be found at academic resources - enrollment requirements (<https://iss.wisc.edu/resources/academic-resources/academic-resources-enrollment-requirements/>).

L&S students who are athletes and need to drop below 12 credits must speak with their athletic advisor at the Fetzer Center (https://uwbadgers.com/sports/2015/08/21/GEN_20140101255.aspx) to drop below full-time status during the academic year. National Collegiate Athletic Association (NCAA) regulations require student athletes maintain full-time status (a minimum of 12 credits) during the fall and spring terms.

If a student wishes to drop all of his/her classes and not stay enrolled in any classes for a specific semester or term, the student will need to formally withdraw from the semester. For more information about withdrawing, see withdrawing from UW-Madison (<https://kb.wisc.edu/lis/page.php?id=21703>).

DIRECTED OR INDEPENDENT STUDY (P.)

Directed/Independent Study offers the student an opportunity to work with a faculty member on an individual study program. A student who is stimulated by a particular concept or problem encountered in a course can pursue and develop that interest in depth through a Directed Study project. Such individualized study can make a valuable contribution to a student's educational experience.

- Directed/Independent Study courses **cannot** be used to fulfill any UW–Madison General Education Requirements (GER) (<http://www.lis.wisc.edu/gened/>) or L&S breadth requirements (p. 358) under any circumstances.
- **Directed/Independent Study courses may not be taken on a pass/fail or audit basis.**
- **L&S undergraduates are not permitted to take graduate level directed study (courses numbered 799, 899, and 999) under any circumstance.**

Directed Study courses are made available by departments on the basis of a student's preparation and motivation and a

faculty member's willingness to accept the student in such an endeavor. See L&S Undergraduate Directed/Independent Study Course Guidelines (<https://kb.wisc.edu/lis/page.php?id=20133>) for more detailed information.

Departments may offer Directed Study at the elementary, intermediate, or advanced level under the following course numbers:

- **198 or 199.** Directed Study courses numbered 198 or 199 have a credit range of 1 to 3 credits, are considered elementary level, and are intended for freshmen and sophomores, though, in exceptional cases, juniors and seniors may be appropriately admitted if the nature of the course so allows.
- **298 or 299.** Directed Study courses numbered 298 or 299, including supervised reading in foreign languages and in subjects related to students' major fields, have a credit range of 1 to 3 credits and are considered intermediate level.
- **698 or 699.** Directed Study courses numbered 698 or 699 (and other courses with numbers ending in 98/99, between 398 and 699) have a credit range of 1 to 6 credits, are considered advanced level, and are offered primarily for juniors and seniors. However, in unusual cases, freshmen and sophomores with exceptional preparation and motivation may be admitted. At this level, it is a prerequisite to have had previous or concurrent exposure to the subject on an intermediate level.

Directed Study courses with a number ending in 98 (e.g., 198, 698) are carried on a Credit/No Credit (Cr/N) basis. No grades are awarded for these courses. The student earns credit for the course if the instructor is satisfied with the work the student has performed. If not, there is no Failure; the student simply is not awarded any credit for the course. Not all departments offer Directed Study courses on a Cr/N basis. Courses ending in 99 are graded. (See Grades and GPA (https://registrar.wisc.edu/grades_and_gpa.htm) for more information)

Prior to registration and before the end of the second week of classes, students are responsible for making all arrangements with the faculty member who agrees to direct their work. The student and faculty member should prepare a study plan, determine the time and place for regular meetings, the number of credits to be earned, and how to enroll in the course.

Notes:

- Directed Study courses **do not** satisfy basic or breadth requirements. Thus, Directed Study courses **cannot** be used to fulfill any degree requirements such as B.A./B.S. Foreign Language, General Education Requirements (Comm A, Comm B, QR A, QR B, Ethnic Studies), or L&S Breadth (Humanities, Natural Science, Social Science).
- Directed Study courses may generally be repeated for credit if course content is not duplicated.
- **Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent**

Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).

- All Directed Study courses (graded or not) count toward the maximum number of credits that may be counted in the major if taken in the major department.
- Many majors strictly limit the number of Directed Study credits that can be earned in the major.
- Directed Study courses are not intended as placeholder credits for registration purposes, and students with special rules for full-time status should consult the undergraduate deans before enrolling in Directed Study courses after the enrollment period.

Directed Study courses taken in non-L&S departments may be counted as Liberal Arts and Science (C) courses provided that they are offered at the 300-or-above level. Because these experiences are intended to provide intensive, one-on-one experiences with faculty, departments are not allowed to use Directed Study courses to teach group instruction courses.

DROP NOTATION (P.)

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see Deadlines at a Glance (http://www.registrar.wisc.edu/spring_deadlines_at_a_glance.htm) on the Office of the Registrar website. Please note that L&S **does not** backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

The drop notation will only show that a student has dropped a course(s) before the official drop deadline. A "DR" on a student's academic record does not have any negative implications for students when they are applying to graduate schools or seeking employment. The "DR" was instituted as a means to document when a course was dropped after the first eight days in the fall and spring semesters (or the appropriate period during the summer session or module courses).

FOREIGN LANGUAGE (P.)

The study of a foreign language (i.e., world language) contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be

required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement in order to graduate. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the College Disabilities Curricular Accommodations Committee. (See foreign language substitution package (<https://saa.ls.wisc.edu/foreign-language-substitution-package/>)). For more information, contact L&S Undergraduate Academic Deans' Services, 608-262-0617, or the McBurney Disability Resource Center, 608-263-2741, TEXT: 608-225-7956.)

In meeting the foreign language requirement, students may combine high school and college work as appropriate. This will allow a student to make full use of high school work in more than one foreign language, or will facilitate the study of a second foreign language that may not have been available in high school. Students who have learned a foreign language in a nonacademic setting may meet the foreign language requirement by successfully completing the appropriate level language course at the university or by successfully completing an appropriate attainment examination if authorized by the appropriate language department. **Students do not fulfill the L&S foreign language BA or BS requirement by simply taking a placement test and attaining a certain placement in a course.**

Foreign language requirements for the B.A. and B.S. degrees differ.

For the **B.S. degree**, the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd semester of one college-level language (e.g., ASIALANG 126, ASIALANG 203, GERMAN 203, GREEK 305, etc.)

For the **B.A. degree**, the foreign language requirement may be met in one of two ways: (1) completion of the fourth level (unit) in one language, **or** (2) completion of the third level (unit) in one language **and** completion of the second level (unit) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **or**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd semester/level of a second foreign language (e.g., ASIALANG 203, HEBR-MOD 201, etc.) at the college level, **or**
- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd semester/level of a second foreign language

(e.g., ASIALANG 128, GERMAN 112, LATIN 104, etc.) at the college level

Students who intend to enroll in a foreign language in which they have had previous non-college instruction must take the UW System placement test in that language.

Notes:

- Students proficient in an American Indian language may be able to use this language to satisfy the foreign language requirement. The American Indian Language Committee will make arrangements to test and/or certify a student's level of proficiency. Students should contact an L&S academic dean for further information.
- Students may take an examination to meet all, or part of, the college foreign language requirement in languages not taught on this campus only if there is a current UW–Madison faculty member qualified to administer and evaluate an examination to determine a student's competence in the language and level of proficiency. **(The UW–Madison faculty member's department must also support and endorse the administering of this special examination.)** No degree credits are earned for this examination, but level of proficiency established will be accepted toward the foreign language requirement.
- Some languages (e.g., American Sign Language) are taught only through the second semester at UW–Madison. Students may, however, count UW–Madison approved transfer courses beyond this level toward the foreign language requirement and/or satisfy the foreign language requirement by examination in these languages. Substitutions to the foreign language requirement are available for L&S students with certain disabilities that make a course substitution appropriate. ***Extensive and very specific documentation is required from students and disability specialists if individuals wish to be considered for an L&S foreign language substitution package.***

GRADUATE COURSES (P.)

All courses numbered 700 and above are graduate courses and considered advanced (A). **Enrollment in these courses is strictly limited to *only* graduate-level students. L&S undergraduates who, on the rare occasion, are permitted to enroll in graduate level courses and receive passing grades in these classes will be awarded undergraduate degree credit. *L&S undergraduate students SHOULD NOT enroll (or be permitted to enroll) in graduate courses if they are not making satisfactory progress toward their undergraduate degree or if taking graduate-level courses would delay their time to graduation.***

- L&S students who receive permission to enroll in L&S graduate courses may count those credits toward completion of their Liberal Arts and Sciences credit requirement. These credits may be used to satisfy the requirements related to mastery of intermediate/advanced level work, but since these

courses do not carry breadth designations, they **do not** satisfy breadth requirements.

- Graduate-level courses **cannot** be used as required coursework for a student's undergraduate major or degree requirements.
- L&S students who enroll in **non-L&S** graduate courses may count those credits as part of their free electives in the degree. **These credits may not be used to satisfy breadth or level requirements.**
- Grades earned by undergraduates who complete graduate courses will be included in all relevant grade point average calculations (see Quality of Work Requirements (p.) for the list of areas in which these averages are calculated). Most graduate courses restrict enrollment to students who have graduate standing, or who have received the instructor's consent to enroll.
- Students can count up to seven (7) credits of graduate-level coursework earned as an undergraduate toward future graduate studies.
- **Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).**

Provided that an instructor wishes to allow undergraduates to enroll in a graduate course, students who wish to enroll in the courses should meet with the instructor, who can evaluate whether or not the student should be allowed to register. This decision is made at the instructor's discretion, based on such considerations as whether or not the student has met course prerequisites, is prepared to perform graduate-level work in the course, and is likely to successfully complete the course. Instructors are not obligated to accommodate undergraduate student requests to enroll in graduate-level courses. Furthermore, it should be noted that all students in graduate-level courses are expected to be held to a similar performance standard with respect to quality, quantity, and type of work performed.

HISTORICAL COURSE DESIGNATIONS AND BREADTH REQUIREMENTS (P.)

All L&S undergraduate students are required to fulfill the L&S Breadth of Exploration in the Liberal Arts and Sciences. The L&S Breadth includes:

- Humanities: 12 credits (of which 6 credits **must** be Literature credit)
- Social Science: 12 credits
- Natural Science: 12 credits

NOTE: Although all L&S undergraduates must complete a minimum of 12 natural science credits in order to graduate, there are differences between the B.A. and B.S. natural science breadth requirement.

Bachelor of Arts (B.A.) candidates must complete a minimum of **one (1)** 3-credit Biological Science course **and one (1)** 3-credit Physical Science course. The additional 6 credits can be any

combination of natural, biological or physical science credits to bring the total to 12 credits.

Bachelor of Science (B.S.) candidates must complete a minimum of 6 credits of Physical Science **and** 6 credits of Biological Science.

Only those courses that have **both** a specific Breadth designation and "C" (Counts as LAS credit) in the "L&S Credit Type" section of the Course Search & Enroll app (<https://registrar.wisc.edu/course-search-enroll/>) or in the current Guide (<http://guide.wisc.edu/courses/>) with breadth in the course designation section count toward the breadth requirement. The following types of courses **do not** count toward the breadth requirement:

- elementary-level courses in mathematics
- elementary- and intermediate-level courses in foreign language or courses in conversation and composition in a foreign language
- English composition
- directed study/independent study courses
- practical and skill courses such as elementary-level courses in journalism, public speaking, acting, and theater production; courses in art; and courses in music performance
- **free elective coursework**

The following types of courses are inappropriate for satisfying the breadth requirement, and so lack breadth designation:

- courses that are highly specialized or narrowly pre-professional in nature; and
- internships, practicums, directed study, tutorials, senior theses, and other courses whose content is negotiated between students and faculty on an individual basis.

Courses designated as Natural Science (N) partially satisfy the natural science requirement but not the specific physical or biological sciences course requirements. **If a course can meet more than one breadth designation, students may select the division in which they want that course to count for purposes of the breadth requirement; however, the course may be counted only once and in only one division.**

The following is a list of symbols located in the "geBLC" column of the former *Timetable*, the UW–Madison Transfer Equivalency Database (TED) (<http://www.admissions.wisc.edu/transfer/ted/>), and the Credit Transfer Wizards (<https://www.wisconsin.edu/transfer/wizards/>). These symbols are still used to designate course attributes in L&S. The symbols are as follows:

Letters in the "g" column (or the Gen Ed designation in the "Gen-Ed" section of the *Course Guide* under **Additional Info**) identify a course which counts toward either the Communication requirement or the Quantitative Reasoning requirement for general education as follows:

a—course counts toward the Communication Part A requirement.

b—course counts toward the Communication Part B requirement.

q—course counts toward the Quantitative Reasoning Part A requirement.

r—course counts toward the Quantitative Reasoning Part B requirement.

The symbol "e" in the "e" column (or "yes" in the "Ethnic" section of the *Course Guide* under **Additional Info**) identifies a course that counts toward the L&S Ethnic Studies requirement.

Symbols in the "B" column (or the breadth designation in the "Breadth" section of the *Course Guide* under **Additional Info**) show how courses count in meeting the breadth requirement for the L&S B.A./B.S. degrees.

B—Biological Science. Counts toward the Natural Science requirement.

H—Humanities

I—Interdivisional. Does not satisfy any breadth requirement

L—Literature. Counts toward the Humanities requirement

N—Natural Science. Satisfies the Natural Science requirement but not the Biological or Physical Science requirements

P—Physical Science. Counts toward the Natural Science requirement

S—Social Science

W—Either Social Science or Natural Science

X—Either Humanities or Natural Science

Y—Either Biological Sciences or Social Science

Z—Either Humanities or Social Science

Symbols in the "L" column (or the level designation in the "Level" section of the *Course Guide* under **Additional Info**) show course level. Sixty credits of advanced and intermediate level courses are required for the L&S B.A./B.S. degrees.

E—Elementary

I—Intermediate

A—Advanced

D—Intermediate or Advanced

Symbols in the "C" column are:

C—courses which count for degree credit in L&S and which count as part of the 100 credits in L&S for students under the 1971 degree requirements or for the 108 Liberal Arts and Science (LAS) credits for students under BABS07.

Course Level

Each L&S course and each approved non-L&S course have been evaluated for level:

- Elementary (E),
- Intermediate (I),
- Advanced (A), or
- Intermediate/Advanced (D).

Course levels are indicated with each course listed in the Guide (<http://guide.wisc.edu/courses/>) that also count for L&S Liberal Arts and Science credit. **Only courses that are**

designated as counting as Liberal Arts and Science credit in the Guide are able to count toward level in L&S for students.

INTERNATIONAL STUDENTS AND NON-NATIVE SPEAKERS OF ENGLISH TAKING ENGLISH AS A SECOND LANGUAGE COURSES (P.) (ESL)

English as a Second Language

Students for whom English is a second language must have a facility in English adequate for university work. Results of the UW–Madison ESL assessment test (MSN-ESLAT) may require students to take one or more English as a Second Language courses. Transfer students from non English-speaking countries **must** submit a Test of English as a Foreign Language (<https://www.ets.org/toefl/>) (TOEFL) or International English Language Testing System (<https://www.ielts.org/>) (IELTS) score unless they have completed and received a passing grade in a college-level English composition course at a US college or university.

English language proficiency is met by completing ESL 118. Students who are placed into ESL courses and who also need to take a course in residence to complete the General Education Communication Part A requirement may only take ESL 118 to meet that requirement. An exempt score on the MSN–ESLAT will satisfy both the English language proficiency requirement and the Communication A requirement. Because students who take ESL courses are frequently retested, it is possible to earn an exempt score upon completion of any of ESL 114, ESL 115, ESL 116, or ESL 117. Additional information can be found at UW-Madison Degree Credit for ESL Courses (<https://kb.wisc.edu/lis/page.php?id=85642>).

All ESL courses completed in residence, and all credit earned in those courses, will appear on students' transcripts. ESL courses numbered below 118 are not considered Liberal Arts and Science courses, but may be counted among L&S students' free electives in the degree. To learn more about the 108 Liberal Arts and Science credits L&S students are required to take, see the College of Letters & Science Requirements information (p. 358).

Degree Requirements

In general, international students must complete the same degree requirements as any other entering student. The College of Letters & Science makes some exceptions to this policy. For instance the College may waive the foreign language requirement for the B.A. and B.S. degrees for students who are native speakers of a foreign language.

For the purpose of exemption from the foreign language requirement, a "native speaker" is a student who graduates from or completes a major portion (the equivalent of at least five semesters) of a secondary school in a non-English-speaking school system. Exemption is not automatic. Students who believe they may qualify for an exemption should contact the Office of Admissions and Recruitment or an L&S academic dean to determine how their language background may be applicable toward the foreign language requirement.

Students whose native language is not English may not receive degree credit for work in their native language

through Credit by Examination except for literature credit.

Special Advisor

International students can receive advising information from their department advisors. I (<https://iss.wisc.edu/>) International Student Services (ISS) (<https://iss.wisc.edu/>) (716 Langdon Street, Room 217 Red Gym, 608-262-2044; iss@studentlife.wisc.edu) can also offer assistance and advising in non-curricular matters such as visa-related issues.

LIBERAL ARTS AND SCIENCE COURSES (P.)

Courses that have been approved as Liberal Arts and Science (LAS) classes are expected to encourage students in one or more of the three "habits of the mind" of liberal arts education, as specified by the College of Letters & Science. These include:

1. Skilled written and verbal communication, excelling in formulating and expressing a point of view, reflecting and questioning current knowledge through reading, research and consideration of the views of others.
2. The ability to draw flexibly upon and apply the modes of thought of the major areas of knowledge.
3. Knowledge of our basic cultural heritage as a multifaceted and often contested history.

For more detailed information, refer to criteria for Liberal Arts and Science Courses (<https://kb.wisc.edu/lis/page.php?id=43819>).

The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences* courses. These courses are so designated within the Guide (<http://guide.wisc.edu/courses/>) and count toward the L&S degree requirements, including requirements related to breadth and level.

PASS/FAIL (P.)

Any L&S undergraduate student in good academic standing is eligible to take **one (1)** course per term/semester on a pass/fail (S/U) basis. **For the College of Letters & Science, good academic standing means that a student does not have one of the following statuses:**

- probation
- strict probation
- continued probation
- continued strict probation
- dropped status

For information about probation, see probation rules (<https://saa.lis.wisc.edu/policies-forms/probation/probation-rules/>).

- **Undergraduates may carry only one course on a pass/fail basis per term (fall, spring, summer) and a maximum of sixteen (16) credits during their entire undergraduate career.**
- First-semester freshmen and transfer students without an established UW–Madison GPA are eligible to take **one (1)** course for pass/fail in their first term at UW–Madison.
- Summer sessions collectively count as a single term. Thus, a student can only take **one (1)** course on a pass/fail basis during the summer.

Any student who takes a pass/fail course must earn at least a C to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U will be recorded by the Registrar's Office in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see taking a UW-Madison course pass/fail (<https://kb.wisc.edu/lis/page.php?id=21102>).

Notes:

- Students must submit (or cancel) pass/fail requests via their Student Center link (<https://login.wisc.edu/?appurl=my.wisc.edu/portal>) by the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students **may not** cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.
- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to taking a UW-Madison course pass/fail (<http://kb.wisc.edu/lis/page.php?id=21102>) and Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm).
- **Students cannot cancel a pass/fail request after the deadline if they need the course to fulfill a major or degree requirement at a later date. It is the student's responsibility to determine whether or not s/he can take a course on a pass/fail basis.**
- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW (<http://my.wisc.edu/>) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to Pass/Fail Option ([\[registrar.wisc.edu/pass_fail_option.htm\]\(http://registrar.wisc.edu/pass_fail_option.htm\)\) on the Registrar's website.](http://

</div>
<div data-bbox=)

- **Only elective work may be carried on a pass/fail basis.** Thus, pass/fail **cannot** be declared or used to fulfill the following requirements:
 - Breadth (humanities, literature, social science, natural science)
 - Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
 - Math
 - Ethnic Studies
 - General Education Requirements (Comm A, Comm B, QR A, QR B)
 - Major requirements
 - Senior Thesis coursework (i.e., 681, 682, 691, 692)
- L&S undergraduates may take courses in their major or major department for pass/fail after fulfilling their major requirements. **However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements.** Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.
- Courses carried on a pass/fail basis **cannot** fulfill any other college requirements except for the 60 intermediate/advanced level credits and 108 Liberal Arts and Science (LAS) credits needed to graduate.
- **Directed Study courses may not be taken on a pass/fail basis.**
- Pass/fail work **may not** be used as part of the coursework offered in satisfaction of the individual major.
- **Students may not take foreign language courses on a pass/fail basis until the foreign language requirement for their degree program has been satisfied.**
- **Students pursuing certificate programs should check with the certificate advisor(s) about policies concerning pass/fail for certificate program courses since many certificate programs do not allow coursework to be taken for pass/fail.**

For further information, deadline dates, and instructions for registration stop by the College of Letters & Science Academic Deans' Services in Suite 101 Ingraham Hall, 1155 Observatory Drive, or call 608-262-0617 for more assistance.

PRE-PROFESSIONAL COURSES (P.)

Pre-Medicine is not a major

College of Letters & Science students who wish to prepare for a career in medicine should enroll in courses which lead to completion of degree requirements in any major and simultaneously fulfill the pre-medical requirements of the medical school of their choice. Students considering a pre-medical program should go to the Center for Pre-Health Advising where they will receive information and advice as needed. See Center for

Pre-Health Advising (<http://www.prehealth.wisc.edu>) for more information.

See coursework (<https://prehealth.wisc.edu/coursework/>) for information about courses that support the required and suggested coursework for medical school and other health professional programs. Students should keep in mind that this is a general guideline and requirements differ among medical schools.

- *UW–Madison School of Medicine and Public Health (SMPH)*, prerequisites can be found at MD Program Admissions (<http://www.med.wisc.edu/education/md/admissions/premedical-requirements/110/>).
- *For students planning to take the MCAT*, see frequently asked questions (FAQ) (<http://www.med.wisc.edu/education/md/admissions/frequently-asked-questions-faqs/108/>) at MD Program Admissions for an academic planning guide.

Pre-Law

Pre-law is **not** a major at UW–Madison. For more information for students who are considering, preparing for, or applying to law school, please refer to the Center for Pre-Law Advising (<https://prelaw.wisc.edu/>) for more information.

Pre-Veterinary Medicine

Pre-veterinary medicine is **not** a major at UW–Madison. Students interested in pursuing a career in veterinary medicine are encouraged to choose a major of interest that can be pursued simultaneously while completing the 60 credits of required coursework. Students may select an academic major in any school or college to be eligible for admission. One major does not have an advantage over another with respect to admission to veterinary school. For more information about pre-veterinary medicine and planning coursework, contact the Academic Affairs Office, School of Veterinary Medicine, Room 2268, 2015 Linden Drive, 263-2525, or the College of Agricultural and Life Sciences, Room 116 Agricultural Hall.

PREREQUISITE COURSEWORK BACKGROUND (P.)

The College of Letters & Science recognizes that some courses that meet general degree requirements (e.g., language, math, ESL) require prior knowledge in that subject. For purposes of distinguishing between necessary prerequisites and electives, coursework that is regarded as prerequisite to courses meeting general degree requirements is considered "necessary" and not purely elective.

REGISTRATION CHANGES (P.)

Students may make changes in their registration (add and/or drop courses, change sections in a course, or change the number of credits in a course) via their Student Center in My UW according to the deadlines published by the Office of the Registrar (http://www.registrar.wisc.edu/schedule_of_classes.htm) each semester and summer session. For more specific information about this process, please refer to Course Change Request ([\[registrar.wisc.edu/course_change_request.htm\]\(http://registrar.wisc.edu/course_change_request.htm\)\). **Students are strongly encouraged to check their current registration and verify they are properly enrolled in the correct courses using My UW** \(<http://my.wisc.edu>\). For general questions about this process, contact your undergraduate advisor or L&S Undergraduate Academic Deans' Services at 608-262-0617.](http://</p>
</div>
<div data-bbox=)

Students who enroll for a course must either complete the course or drop it by the deadline for dropping courses.

REPEAT OF COLLEGE COURSES NOT FOR CREDIT (RETAKING PASSED COLLEGE-LEVEL COURSES ON A REFRESHER BASIS) (P.)

Credit will not be granted for the same course twice. Students who wish to refresh their knowledge may repeat courses, but not for credit. All instances of that course will calculate in the semester GPA and in the university cumulative GPA. Repeated courses **do not** calculate in L&S requirements for quality of work (p.) (GPA minimums for Intermediate/Advanced work and GPA requirements in the major).

Credits carried on a refresher basis count toward the maximum credits permitted each term. Grades in refresher-basis courses count only in the university grade point average, which may be significant in determining a student's probationary status and eligibility to continue. **Repeating a course will not remove the prior grade(s) earned for that course from the student's record.** Please refer to retaking a course at UW-Madison (<https://kb.wisc.edu/lis/21853/>).

Transfer students must be particularly careful to avoid taking courses on the Madison campus that duplicate courses taken at another institution. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower level course in a sequence if students have already received credit for a higher level course in that sequence (e.g., a student who has received credit for Math 221 could not take Math 112 for credit). Students should carefully check the Evaluation of Transfer Credits prepared by the Office of Admissions and Recruitment and should consult an advisor or academic dean before enrolling.

First-year students (freshmen) should also be mindful of the fact that they will not receive credit again for any course(s) they have already received credit for via AP or college courses they took during high school and transferred to UW–Madison.

REPEAT OF HIGH SCHOOL OR COLLEGE COURSEWORK FOR CREDIT (P.)

Students who enter the College of Letters & Science with degree credit for academic work will not receive additional degree credit for repeating that course, for taking an equivalent course, or for taking a lower-level course in a sequence after completing a higher course in that sequence (e.g., a student who has received credit for Math 221 could not take Math 112 for credit). See retaking a course at UW-Madison (<https://kb.wisc.edu/lis/21853/>) for more information.

WITHDRAWAL (P.)

Withdrawal from school means dropping all courses currently in progress for the term in which the withdrawal is processed.

Before the first day of classes in a term, students may remove themselves from classes by dropping **all** of their courses via My UW–Madison. Detailed information about the withdrawal process for L&S undergraduates can be found at withdrawing from semester/term (<http://saa.ls.wisc.edu/policies-withdrawal.htm>).

After the first day of classes and through the withdrawal deadline published in the Deadlines at a Glance section on the registrar's website (Office of the Registrar (<http://registrar.wisc.edu/>)), L&S undergraduate students may cancel their enrollment (withdraw from the term) by going to their Student Center in My UW and accessing the Term Withdrawal tab under Course Enrollment. For more detailed information, refer to canceling your enrollment -withdrawals (https://registrar.wisc.edu/canceling_your_enrollment_withdrawal_info.htm). Additional information about the withdrawal process can be found at withdrawing from UW-Madison (<https://kb.wisc.edu/lis/page.php?id=21703>).

Students who find it necessary may withdraw at any time during the first 12 weeks of a semester without needing special permission to return for a later term. Summer deadlines for withdrawal are published in the summer by the Office of the Registrar (<http://registrar.wisc.edu/>). Students are encouraged to confer with a dean regarding the possible effects of withdrawal upon their academic work.

Students who have neglected their classes, or who have earned unsatisfactory grades, or who have a pattern of withdrawals may need permission of an academic dean to return at a later date.

Letters & Science undergraduate students wishing to withdraw **after** the deadline **must** obtain permission from an academic dean by setting up an individual appointment through L&S Undergraduate Academic Deans' Services (608-262-0617). Failure to obtain this permission results in the recording of Failures for all courses.

CREDITS

CREDIT LOAD (P.)

Full-time student status (12–18 credits). The usual study load of a student is about 15 credits per semester/term, with an ordinary range of 12 to 18 credits. *Please note that international students and athletes must be enrolled for a minimum of 12 credits in the fall and spring semesters/terms.* For more information, please contact International Student Services (<https://iss.wisc.edu/>) (608-262-2044) or the Fetzer Student Athlete Academic Center (<http://www.uwbadgers.com/facilities/fetzer-center.html>)(608-262-1787).

- For students receiving financial aid, federal regulations require any student receiving financial assistance to maintain academic progress and be working toward a degree. See satisfactory academic progress (SAP) (<http://www.finaid.wisc.edu/259.htm>) for more details.

Light load (fewer than 12 credits). A program of fewer than 12 credits may be carried **without** the specific authorization

of an academic dean. However, students are encouraged to consult their undergraduate advisor or an academic dean regarding the decision to carry a light load. A light load may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits), dependent health insurance, international student visa status, University Housing accommodations, or athletic eligibility. Several terms with a courseload of fewer than 12 credits will also have an impact on a student's graduation progress.

Heavy load (19 or 20 credits). Students who have a cumulative GPA of 3.000 or better at the University of Wisconsin–Madison may enroll for 19 or 20 credits during the fall or spring term with permission from an academic dean in L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/credit-overload.htm>). *Additional fees per credit are assessed for all credits above 18. Under no circumstances may a student carry more than 20 credits in either the fall or spring term.*

- See credit overload/heavy program (<https://kb.wisc.edu/lis/page.php?id=21177>) for more information.
- L&S students who wish to take an overload and qualify to take 19 or 20 credits should fill out the Credit Overload Request (<http://saa.ls.wisc.edu/credit-overload.htm>). For more assistance, please stop by 110 Ingraham Hall, or call 608-262-0617 during regular business hours.

Summer Sessions Credit Load (a maximum of 12 credits). In general a student may carry one (1) credit per week of instruction during the summer session. The overall limit for summer work is 12 credits (or 13 with special permission). The credit limit per summer session is the number of weeks of the session. Thus, a student can earn only 3 credits in a 3-week summer session. A student needs permission from an academic dean to carry one (1) additional credit per weeks in a session (e.g., four (4) credits in a 3-week session). An academic dean's permission usually requires a 3.000 cumulative GPA.

Students must carry courses for the number of credits assigned to the courses in the Guide (<http://guide.wisc.edu/courses/>).

For more information regarding credit load, see common credit load for L&S undergraduate students (<https://kb.wisc.edu/lis/21871/>).

CREDIT BY COURSE EXAMINATION/RETROACTIVE CREDITS (RETROCREDITS) (P.)

The College of Letters & Science will award degree credit for foreign language work successfully completed in high school under certain circumstances **and** if an additional foreign language course is taken **at UW–Madison**. In no case can a student earn retroactive credits simply by taking a placement test or other exam. **A student must take the appropriate UW–Madison language class at UW–Madison to earn retroactive credits.**

Students who qualify for retrocredits after completing the appropriate language course on the UW–Madison campus will

automatically receive retrocredits approximately two to three months after all grades have been posted for all students. This benefit is available to freshmen (first-year students), and can be exercised when the following conditions are met:

- **The course must be a student's first course at the college level in the language.** This does not include college-level coursework taken prior to graduating from high school, but does include courses transferred from another institution where a student was working towards an undergraduate degree or coursework a student completed after graduating from high school.
- **The course must be designated appropriate for earning retroactive credits.** These courses are designated with the Foreign Language Level attribute of 2nd, 3rd, 4th, and 5th semester language course in the *Guide* under *Courses* (see *course designation*). Course designed in the Guide as **Frgn Lang - 1st semester language course** are not eligible for retrocredits.
- **A student must take the course before he/she has earned 30 degree credits.** This **does not** include AP, CLEP, IB, or other college credit earned in high school, nor does it include retroactive credits earned in another language. It **does** include courses transferred from another institution where you were working toward a degree.
- **A student must earn a B or better in the class.**

If a student meets all of the conditions listed above, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester (e.g., if the language was completed in the fall term, the retroactive credits should appear on a student's record by the beginning of the spring term). If retroactive credits do not appear on a qualified student's records by the end of the **fourth** week of the following term, the student should fill out a Retroactive Language Request Form (<https://kb.wisc.edu/images/group86/23736/RETROACTIVELANGUAGECREDITREQUESTFORM-1.pdf>) and submit that form to the office of the academic dean at the student's particular school or college. For students earning an undergraduate degree in the College of Letters & Science, the form should be delivered to L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/deans-services.htm>). Non-L&S degree-seeking candidates should speak with the undergraduate academic service unit in the school or college for more guidance.

- Retroactive credits (retrocredits) **will not** automatically be posted for students who have already earned retrocredits. If a student is still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), the student will need to fill out the Retroactive Language Request Form (<https://ls-staging.doit.wisc.edu/language-institute/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf>) and deliver it to the L&S Academic Deans' Services Office in 110 Ingraham Hall if the student is an L&S undergraduate. For further

information, contact L&S Academic Deans' Services at 608-262-0617.

Please note:

- **Native speakers of a language are not eligible to earn retroactive credits in that language.**
- Students can earn retrocredits in more than one language as long as they are within the 29-credit limit and meet the other requirements listed above to earn retrocredits.
 - Retroactive credits (retrocredits) will not be posted automatically for students who have already earned retrocredits. If students are still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), they will need to fill out the Retroactive Language Credit Request Form (<http://languages.wisc.edu/sites/default/files/docs/RETROACTIVE%20LANGUAGE%20CREDIT%20REQUEST%20FORM.pdf>) and deliver it to L&S Undergraduate Academic Deans' Services in 110 Ingraham Hall to be reviewed if they are an L&S undergraduate student.
- Retrocredits can only be earned for the first four semesters/levels of a language sequence. For example, a student who tests into SPANISH 311 can earn a maximum of sixteen retrocredits (SPANISH 101, SPANISH 102, SPANISH 203, and SPANISH 204). The maximum number of credits earned will be impacted if the student already has AP credits for a particular course.
- **Effective summer 2019, the maximum number of retrocredits a student can earn in the Chinese/ Japanese language sequence is sixteen (16) credits.** For example, a student who tests into ASIALANG 301 and successfully completes this course with a grade of B or better can earn a maximum of sixteen (16) retrocredits (ASIALANG 101, ASIALANG 102, ASIALANG 201, and ASIALANG 202).
- UW–Madison will honor retroactive credits earned at another UW System institution provided that these credits were earned according to UW–Madison policy. Students will need to work with the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/apply/freshman/apib.php>) at UW–Madison to make sure the retrocredits from the other institution get posted to their official UW–Madison records.

For more information about retroactive credits, refer to L&S retrocredit requirements and information (<https://kb.wisc.edu/ls/page.php?id=23736>).

CREDIT BY DEPARTMENTAL EXAMINATION (P.)

The College of Letters & Science allows degree credit, as well as placement credit, for the mastery of some L&S coursework as demonstrated by appropriate achievement tests. The

intent of these examinations is to increase opportunities for obtaining degree credit for college-level work done in high school or elsewhere.

Credit may be earned on the basis of an examination given by a department when a student has demonstrated possession of knowledge equivalent to what would be learned in a specific course taught in that department. The credit given is for knowledge possessed by the student regardless of where they have gained that knowledge. Examinations for credit must be administered as soon as possible, but in any case before the end of the student's first semester in residence following the experience that provided the knowledge to be tested.

Any department wishing to do so may give degree credit by examination for any of its elementary- or intermediate-level courses other than Honors courses and Directed Study.

Students who wish to establish credit by department examination must take a separate examination for each course in which credit is sought.

Departments will indicate which, if any, of their courses covering work that may have been taken in high school may permit degree credit on the basis of appropriate national tests taken in high school. In addition, general degree and specific subject credit may be obtained by examination under the College Level Examination Program (CLEP). (See College-Level Examination Program (p. 9).)

In no case may students receive degree credit more than once for the same college-level work. If degree credit is obtained for a given course by taking an examination, the student may not enroll in the course for degree credit, and vice versa.

Credits earned by examination **do not** count toward the residence requirement. Students are encouraged to take departmental examinations for credit prior to earning 90 degree credits (including the semester in which the 90th credit is earned) in order to avoid complications with the residence requirement. It is possible for students to fulfill all or part of the college foreign language requirement without receiving credit.

The provision for credits by examination offers students an opportunity to complete the baccalaureate degree requirements in less than four years should they so desire. Students wishing to take examinations to earn credit should contact the department office.

ENGLISH AS A SECOND LANGUAGE (P.) (ESL)

English as a Second Language

Students for whom English is a second language must have a facility in English adequate for university work. Results of the UW–Madison ESL assessment test (MSN-ESLAT) may require students to take one or more English as a Second Language courses. Transfer students from non English-speaking countries **must** submit a Test of English as a Foreign Language (<https://www.ets.org/toefl/>) (TOEFL) or International English Language Testing System (<https://www.ielts.org/>) (IELTS) score unless they have completed and received a passing grade in a college-level English composition course at a US college or university.

English language proficiency is met by completing ESL 118. Students who are placed into ESL courses and who also need to take a course in residence to complete the General Education Communication Part A requirement may only take ESL 118 to meet that requirement. An exempt score on the MSN–ESLAT will satisfy both the English language proficiency requirement and the Communication A requirement. Because students who take ESL courses are frequently retested, it is possible to earn an exempt score upon completion of any of ESL 114, ESL 115, ESL 116, or ESL 117. Additional information can be found at [can an L&S undergraduate student earn degree credit for more than one ESL course \(https://kb.wisc.edu/lis/page.php?id=85642\)](https://kb.wisc.edu/lis/page.php?id=85642).

All ESL courses completed in residence, and all credit earned in those courses, will appear on students' transcripts. ESL courses numbered below 118 **are not** considered Liberal Arts and Science courses, but may be counted among L&S students' free electives in the degree. To learn more about the 108 Liberal Arts and Science credits L&S students are required to take, see the College of Letters & Science Requirements information (p. 358).

Degree Requirements

In general, international students must complete the same degree requirements as any other entering student. The College of Letters & Science makes some exceptions to this policy. For instance the College may waive the foreign language requirement for the B.A. and B.S. degrees for students who are native speakers of a foreign language.

For the purpose of exemption from the foreign language requirement, a "native speaker" is a student who graduates from or completes a major portion (the equivalent of at least five semesters) of a secondary school in a non-English-speaking school system. Exemption is not automatic. Students who believe they may qualify for an exemption should contact the Office of Admissions and Recruitment or an L&S academic dean to determine how their language background may be applicable toward the foreign language requirement.

Students whose native language is not English may not receive degree credit for work in their native language through Credit by Examination except for literature credit.

Special Advisor

International students can receive advising information from their department advisors. The Office of International Student Services (<http://iss.wisc.edu/>) (716 Langdon Street, Room 217 Red Gym, 608-262-2044; iss@studentlife.wisc.edu) can also offer assistance and advising in non-curricular matters such as visa-related issues.

FREE ELECTIVES (P.)

If a student so chooses, he or she may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW–Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW–Madison subject listing in the Guide (<http://>

guide.wisc.edu/courses/), and are not designated as courses in the Liberal Arts and Sciences. Thus, these courses *do not* carry breadth or level in L&S.

Credit earned in these courses apply to the degree requirements in the following ways:

- Courses taken as free electives in the degree may be carried and will appear on the transcript showing credits, grade, and grade points.
- These credits will count as part of the semester load and will count toward satisfaction of the minimum progress requirements.
- These credits and grade points will be included in calculating a student's semester and cumulative grade point average.
- **Free electives in the degree *cannot* be used to satisfy the L&S requirement that students complete a substantial portion of their degree credits in intermediate and advanced work.**
- Courses that are taught in L&S departments but not designated as Liberal Arts and Science courses (e.g., Music and Music Performance courses numbered 099 and below) may be counted for credit as free electives in the degree. (For B.A./B.S. Music majors, Music and Music Performance courses numbered 099 and below that are not required for the major may be counted as free electives.) Students with questions regarding a particular course offered by a school or college outside L&S as it relates to the requirement to complete 108 Liberal Arts and Science credits should consult an academic dean before registration.

NON-DEGREE-GRANTING ACCREDITED INSTITUTIONS' TRANSFER CREDIT LIMITATION (P.)

Of the credits required for graduation, the maximum number of transferable semester credits from a two-year college (non-degree-granting accredited institution) is 72. There is no credit limit on transferable credits from a four-year university.

However, of the last 60 credits earned before graduation, not more than 12 may be carried at these non-degree-granting accredited institutions. See transfer your credit to UW-Madison (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) for more information about UW-Madison's transfer credit policy.

NON-L&S COURSES AND L&S DEGREE CREDIT (P.)

Liberal Arts and Science Courses

The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences (LAS)* courses. These courses are designated as such in the Guide (<http://guide.wisc.edu/courses/>). LAS courses count toward the L&S degree

requirements, including requirements related to breadth and level.

Non-L&S Courses Cross-listed with L&S Departments

A course offered in the College of Letters & Science that carries the C designation and which is crosslisted with a department in another school or college is considered a Liberal Arts and Science course. Such courses are designated as counting for Liberal Arts and Science (LAS) credit in L&S within the Guide (<http://guide.wisc.edu/courses/>). As LAS courses, they may be counted as part of the major and count as part of the 108 Liberal Arts and Science credits required for an L&S degree.

Non-L&S Courses Required for L&S Majors

Courses taught in departments located in schools or colleges other than L&S, but which are required for completion of an L&S major, are considered Liberal Arts and Science courses. Such courses will *either* designated as Liberal Arts and Science courses in the Guide (<http://guide.wisc.edu/courses/>), or their Liberal Arts and Sciences status will appear in the DARS degree audit. In both cases, these courses count as part of the 108 L&S credits required for a degree.

Free Electives in the Degree

If L&S undergraduate students so choose, they may count for degree credit up to 12 credits "freely chosen" from many non-L&S, UW-Madison-approved courses. These courses are referred to as "free electives in the degree." These courses may be selected from any UW-Madison subject listing in the Guide (<http://guide.wisc.edu/courses/>), and are not designated as courses in the Liberal Arts and Sciences. Also refer to L&S certificate programs information (<https://kb.wisc.edu/lis/page.php?id=23921>).

TRANSFER CREDITS (P.)

Transfer credit can be awarded to any admitted UW-Madison student who has completed coursework at institutions accredited by a regional or national accrediting organization recognized by the Council for Higher Education Accreditation (CHEA). For more details about receiving credit for transfer work at UW-Madison, see transfer your credit to UW-Madison (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>). Credit Evaluation Services has additional information regarding transfer credit at credit resources for current UW-Madison students (<https://registrar.wisc.edu/credit-resources-for-current-uw-madison-students/>). Students who have general questions about transfer credits should refer to Credit Evaluation Services (<https://apps.admissions.wisc.edu/ces/>) on the Office of the Registrar's website (<https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/>) or contact them via email at crediteval@registrar.wisc.edu.

DEGREES

ASSOCIATE DEGREE POLICY (P.)

Effective summer/fall 2012, all new transfer students with an associate's degree from either a UW System (UWS) institution or one of the Wisconsin Technical College System (WTCS)

schools that award a liberal arts associate's degree (i.e., Madison College, MATC—Milwaukee, Nicolet, Chippewa Valley, Western) will have their University General Education (UGER) (p. 23) breadth requirements satisfied in all undergraduate schools/colleges on the UW—Madison campus. Students pursuing their undergraduate degrees in the College of Letters & Science **may** need to take additional coursework to fulfill the L&S breadth requirements (p. 358). Students should consult with their undergraduate advisor(s) if they have additional questions.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by **both** WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical fields will not have their UGER breadth requirements satisfied.

UWS and WTCS transfer students with a qualifying liberal arts associate's degree are EXEMPT from meeting the following **University General Education Breadth** requirements:

- Natural Science—two (2) courses for a total of 6 credits
- Humanities/Literature/Arts—6 credits
- Social Studies—3 credits

Students will still be required to meet other University General Education Requirements (p. 23).

Please note:

- Students in the College of Letters & Science must meet the L&S breadth requirements (p. 358) with specific transfer courses or courses taken in residence.

DEGREE AND DIPLOMA INFORMATION (P.)

The College of Letters & Science offers the following degrees:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Landscape Architecture**
- Bachelor of Music*
- Bachelor of Arts—Journalism*
- Bachelor of Science—Journalism*
- Bachelor of Social Work*
- Bachelor of Science—Applied Mathematics, Engineering and Physics*

*These specialized degree programs have requirements for completion distinct from the L&S BA/BS requirements. Students who complete these requirements are awarded these degrees in lieu of the general Bachelor of Arts or Bachelor of Science. More L&S degree information is available at Degrees/Majors/Certificate (p. 323).

- **Students pursuing the Bachelor of Landscape Architecture (BLA) special degree are able to do certificates but cannot do additional majors.**
For example, a student pursuing the BLA special degree program may do a certificate

in Environmental Studies but cannot do the Environmental Studies major. **

A UW—Madison undergraduate diploma lists only the degree title. Diplomas **do not** list major(s) or certificate(s) students complete as undergraduates. Major and certificate information can be found on a student's official UW—Madison transcript.

- If a student is completing a bachelor of science degree with majors in history and economics, the degree on the student's diploma will be **Bachelor of Science**.
- If a student is completing a bachelor of arts degree, majoring in psychology and journalism, the degree on the student's diploma will be **Bachelor of Arts—Journalism**.

****Students pursuing the Bachelor of Landscape Architecture (BLA) special degree in L&S cannot do additional majors at this time.** They can only add on certificates. For example, a student doing the BLA can add on the Environmental Studies certificate but **cannot** add on the Environmental Studies major.

Please note that all L&S undergraduate students are expected to graduate as soon as they have completed all of their major and degree requirements. Thus, students are expected to select their appropriate **expected graduation term** (EGT). L&S will graduate any undergraduate if the College discovers that a student has completed all of their major and degree requirements but has not specified a specific EGT in their Student Center. Graduation is usually based on the last term a student was enrolled and completed all of their requirements. For additional information about degree conferment, see **conferral of degrees** under graduating (<https://guide.wisc.edu/undergraduate/#requirementsforundergraduatestudytext>).

SECOND UNDERGRADUATE DEGREE (P.)

Students are not permitted to earn two undergraduate liberal arts degrees within the College of Letters & Science at UW—Madison.

Students who already have a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree in general are not allowed to earn another B.A. or B.S. since two-thirds of their coursework for the second degree will be the same. Thus, a student who has a liberal arts degree with a science major is usually not considered a likely candidate for a second degree in the College of Letters & Science if the student wants to come back to do a second liberal arts degree with another humanities, social science, or natural science major. However, students who have earned a Bachelor of Music (B.M.) degree might be able to earn a B.A. or B.S. since the requirements for this specialized L&S degree program are substantially different. (Also, students who started an additional major but did not declare it prior to graduating are not eligible to return as a second-degree student to finish up coursework for the second or additional major.)

Students interested in applying as candidate for a second undergraduate degree in the College of Letters & Science should complete the apply as a second degree student

(<https://admissions.wisc.edu/apply-as-a-second-degree-student/>) application at the UW-Madison Office of Admissions and Recruitment website. Eligibility is determined as part of the admissions process.

Before embarking on a second undergraduate degree, students should clearly identify their goal(s), research options carefully, and be sure that you need a second undergraduate degree to reach your objectives. For more detailed information about applying for a second undergraduate degree, please see L&S Second Undergraduate Degree (<https://kb.wisc.edu/lis/internal/109226/>).

Second undergraduate degree students are admitted to a specific major. To make changes to their major, second-degree students must first secure permission from L&S Undergraduate Academic Deans' Services (<https://saa.lis.wisc.edu/offices/academic-deans-services-2/>). Students who are found to have declared another major without first getting permission will be removed from that major. Students admitted as candidates for a second undergraduate degree are subject to the L&S Academic Probation and Drop system.

To earn a second undergraduate degree from UW–Madison, students must:

1. Satisfy all Letters & Science degree requirements.
2. Satisfy all Quality of Work requirements.
3. Complete at least 30 credits in Letters & Science at UW–Madison after the first degree has been awarded, regardless of whether or not the first degree was an L&S degree. **Note that the second degree must be significantly different from the first.**
4. Complete a minimum of 108 Liberal Arts and Science credits which may include courses completed during the student's first degree program.

SENIOR THESIS (P.)

Any senior who so desires may write a senior thesis. A thesis may not carry less than 4 or more than 8 credits and **must be carried over a two-semester period**. A senior thesis must represent treatment of some phase of the student's work in the major; the subject requires approval by the student's advisor and the faculty member in charge of the field of concentration (usually the department chair). Thesis students enroll for thesis course numbers 691 **and** 692 (students in the Honors Program enroll in 681 **and** 682 for a minimum of 6 credits and a maximum of 8 credits in total).

- Students **must** complete **both** 691 **and** 692 *or* 681 **and** 682 of the two-semester course sequence. A student **cannot** substitute one of the sequence courses with a directed study or other course.
- The two-semester course sequence **must** be in the same department (e.g., ANTHRO 691 **and** ANTHRO 692).
- Students **cannot** take the two-semester course sequence in one semester or term.
- Students **cannot** take the two-semester course sequence on a pass/fail basis.

Students enrolled in a 691/692 or 681/682 senior thesis sequence will receive a grade of "P" (Progress) for the first half of the senior sequence (691 or 681) until they complete both semesters. This designation of "Progress" is a temporary grade used only for courses that span more than one semester/term (typically a senior thesis). When the course is completed, a final grade replaces the P for each term. The "P" does not count in any GPA computation. In addition, the "P" grade does not count for credit until it is replaced by a final grade.

EXAMS

COLLEGE-LEVEL EXAMINATION PROGRAM (P.) (CLEP)

The College-Level Examination Program (CLEP) enables those students who have attained college-level competency outside the classroom to take examinations for college credit or placement. The General Examinations measure undergraduate achievement in five basic areas of liberal arts education:

- English composition
- Humanities
- Mathematics
- Natural Sciences
- Social Sciences/History

The Subject Examinations measure achievement in undergraduate courses. Both sets of examinations are aimed at the public-at-large, returning service personnel, and entering freshmen. Credit will be granted for the General Examination according to the criteria established **ONLY** to freshmen before they have earned more than 15 degree credits in a residence program or elsewhere. Only a limited number of departments accept CLEP Subject Examination credits. A continuing student with no more than 15 completed degree credits may register for the General or Subject Examination(s) by contacting the Office of Testing and Evaluation Services, 608-262-5863. For further information, consult L&S Undergraduate Academic Deans' Services at 608-262-0617 or the Office of Admissions and Recruitment (<https://www.admissions.wisc.edu/apply/freshman/apib.php>), 608-262-3961.

EXAMINATIONS FOR PLACEMENT (P.)

English

All students must take English placement tests to determine level of competence unless competence has been successfully demonstrated prior to enrollment through coursework (including AP and IB credits). On the basis of their test scores, most students will be required to enroll in and successfully complete a Communication Part A course. This course should be completed within a student's first 30 credits after enrollment.

Non-native speakers of English assigned to courses in English as a Second Language on the basis of their English as a Second Language (ESL) assessment test should see International Students and Non-Native Speakers of English (p.).

Foreign Language

Students at UW–Madison who plan to resume the study of a foreign language begun in high school must take the UW System placement examination in that language and consult the foreign language department advisor for appropriate course placement.

Before enrolling in a level either higher or lower than the level of placement indicated by the examination, students should consult the foreign language department advisor. Without regard to any work taken in high school, students may enroll for degree credit in any course offered for degree credit by the college, provided they meet its prerequisites and provided they have not already received college credit for this course or an equivalent course or a higher level course in the same subject by course completion or examination.

This placement procedure permits students who are not confident about their high school foreign language work to retake that work in college before proceeding to more advanced study of that language. Students who feel they are ready to work at a higher level than that indicated by the placement test may do so. In no case may students receive degree credit more than once for the same level college work.

Mathematics

Entering freshmen are required to complete the appropriate placement test in mathematics. This test determines minimum math competency and placement. Students who do not demonstrate minimum competency in math will be required to complete additional non-degree-credit math courses within the first 30 credits after enrollment.

The results of the placement test in mathematics are binding. Students continuing in mathematics must enroll in the level of mathematics course that is indicated by the examination. However, students who feel their placement examination results are not valid or appropriate may appeal the placement by conferring with the undergraduate advisor in the mathematics department. If the advisor agrees, the student may carry a course below or above the placement indicated for degree credit provided previous college credit has not been granted by course completion or examination.

FINAL EXAMINATIONS (P.) (ACADEMIC SUMMARY PERIOD)

Following the regularly scheduled instructional period each semester is an eight-day summary period. Usually the first day of the summary period is for individual study and review, and no classes or exams are to be scheduled during this designated period. The last seven days are prescheduled to include one two-hour summary block for each course of two or more credits. This two-hour block shall be used for an examination or for other instructional activities as deemed appropriate by the instructional unit offering the course. **During the two weeks preceding the summary period, examinations covering the content of the entire course cannot**

be given. Take-home examinations are due at the scheduled two-hour block.

Faculty policy prohibits giving or taking final examinations earlier than the time assigned in the Course Guide. Students may arrange a make-up examination at a later date only if the professor is willing and if there is a valid reason for missing a final examination. (See the Guide entry "incompletes (p.)" below.)

Students are required to attend all of their final exams. Leaving prior to the final examination period and not taking finals will have a negative impact on a student's final grade in a course or courses. See class attendance policy (<https://kb.wisc.edu/lis/page.php?id=24628>) for more information.

MIDTERM EXAM POLICY INFORMATION (P.)

Information about midterm evening exam policy along with fall, spring, and summer term final exam policy can be found at midterm and final exam policy information (https://registrar.wisc.edu/documents/exam_policy.pdf) on the Registrar's website. Additional information can also be located at midterm grades (https://registrar.wisc.edu/mid_term_grades.htm) and upcoming final exam periods (https://registrar.wisc.edu/midterm_and_final_exam_information_faculty.htm).

- It is implicitly understood that no exams, papers, or assignments will be required during any break period (e.g., spring break) or major holiday.

GRADES

AUDIT (P.)

A student may enroll in a course on an audit (AU) basis only with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. **Courses with laboratory or performance skills may not be audited.** (L&S undergraduate students are not allowed to audit classes required for their major or degree with the purpose of getting some background prior to formally enrolling in the courses).

Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester/term program load for purposes of determining fees and maximum credits carried.

Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. **Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage.** See information on auditing courses for L&S undergraduate students (<https://kb.wisc.edu/lis/page.php?id=26734>) for more details.

L&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available

at Course Change Request (https://registrar.wisc.edu/course_change_request.htm) to Suite 101 Ingraham Hall, 1155 Observatory Drive. (**Course Change Requests can be accessed through an individual's Student Center in My UW** (<https://my.wisc.edu>) **under: Course Enrollment/Term Information/Course Change Request.**) Students **will not** be able to submit or cancel a request to audit a course after the fourth week of the fall or spring term.

- Audited courses, noted as such by "AU" in place of a number of credits, are graded either "S" (Satisfactory) or "NR" (No Report) or "NW" (No Work). **AU is not a grade.**
- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed.
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits). Students should consult an advisor in the Office of Student Financial Aid (<http://www.finaid.wisc.edu>) for more detailed information.
- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the University Veteran Services (<https://veterans.wisc.edu/>).

CREDIT/NO-CREDIT COURSES (P.)

A limited number of courses on campus are offered on a Credit/No Credit basis. Please note that Credit/No Credit is not the same as Pass/Fail. At the completion of the course the student is given a grade of CR or N rather than a letter grade (A, AB, B, BC, C, D, F). A grade of CR will give a student degree credit but will not have any grade points associated with it to be figured into the grade-point average calculation.

A grade of N will award no degree credit. Credit/No Credit courses are identified in the Class Search—Class Details page as a Grading basis of "Credit/No Credit".

FAILURES (P.)

Students who have earned a grade of F may repeat the failed course in residence. **The original grade of F remains permanently on a student's record and is averaged into the semester and overall grade point average (GPA).** The failure will be counted as zero grade points per credit in computing the GPA. If a student repeats the failed course, the course will appear on the student's transcript twice with the original grade of F recorded and the new grade also recorded. Both grades will be counted in determining all applicable quality of work requirements. **Multiple failures in the same course all count in the GPA and will appear on a student's permanent records.** See retaking a course at UW-Madison (<https://kb.wisc.edu/lis/21853/>) for more details.

A course failed in residence at UW—Madison may be repeated for credit at any other educational institution. However, the new grade earned out of residence will not have an impact on the student's UW—Madison GPA.

GRADE CHANGE AND APPEAL (P.)

In accordance to current faculty policy and in an effort to maintain both equity and consistency, final term grades can be changed

only because of "clerical error". Students **cannot** petition to improve a course grade by offering to rewrite a paper, turn in additional work, or retake a final exam (or exams). The only exception would be if:

1. the option to improve a grade is available to **all** students in a given course, **AND**
2. this option is stated explicitly in the course syllabus

A change of grade is allowed only if there has been a clerical error. If an L&S undergraduate student believes a clerical error has been made in the awarding of the final grade for a course, the student should first meet with the instructor of the course to determine whether such an error has occurred. Requests for a change of grade must be signed by both the instructor of the course and the chair of the department. Students who believe they have been unfairly graded in a course should follow the appeal procedure established by the department in which the course grade was given.

The appeal procedure typically requires the student to first meet with the instructor of the course to discuss the issue, followed by a meeting with the department chair or department committee. If the issue is still unresolved after the department appeal procedure is completed, the student's last recourse would be to appeal to one of the Associate Deans in the College of Letters & Science based on the discipline of the course in question. Appeals of final grades must be initiated within the semester immediately following the term in which the course is taken. For more information, see process for appealing a grade in an L&S course (<https://kb.wisc.edu/lis/page.php?id=28334>).

GRADING SYSTEM (P.)

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits carried, whether passed or not. Semester/term grades are reported by letter only (A, AB, B, BC, C, D, F); plus and minus signs are not authorized. The highest possible GPA is 4.000, representing A grades in every course; the lowest possible is 0.000.

For more detailed information, see valid instructor assigned grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

For more information on the grading system, also see the section on undergraduate grades and grade point average (GPA) (http://registrar.wisc.edu/grades_and_gpa.htm) on the registrar's website.

INCOMPLETES (P.)

A grade of incomplete (I) may be reported for a student who has been enrolled in a course with a passing grade until near the end of the semester/term and then, due to illness or some other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination (or to complete some limited amount of term work). An Incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof the grade reported will be an F. Even when a student can provide

verifiable documentation, a student may still earn a grade of F if the quality of the student's work convinces the instructor that the student cannot successfully pass the course.

Any subject taken by an L&S undergraduate student marked Incomplete must be completed by the end of the fourth week of classes of the student's next semester/term in residence at the University (exclusive of summer sessions) or it will lapse into a Failure. If an instructor grants an extended incomplete (EI), a grade change will need to be filed by the instructor, approved by the chairperson of the department, and forwarded to L&S Undergraduate Academic Deans' Services in 110 Ingraham Hall. In such cases the grade of I is replaced with the grade of extended incomplete (EI).

NOTE: Extended Incompletes (EI) must be removed and replaced with the final grade by the last day of classes prior to the start of final exams or they will lapse into Failures. The last day of classes is defined as the last day of instruction for a given term prior to the start of study day and final exams.

Incompletes incurred in the last semester in residence at UW–Madison may not be removed after five years of absence from the University without special advance permission from L&S Undergraduate Academic Deans' Services. Such Incompletes must remain on the record with grades of permanent incomplete (PI) and do not lapse into failures.

If a student enrolls with an Incomplete grade from a previous semester and is dropped later in the term because the Incomplete has lapsed to an F or has been changed to a low grade, the student will be withdrawn with an effective date within the refund period closest to the time of the student's actual withdrawal if the student has not been granted permission to continue by an L&S academic dean.

For further information, see UW-Madison incomplete (I) grade information (<https://kb.wisc.edu/lis/page.php?id=21330>) on the L&S website and incompletes (<https://registrar.wisc.edu/incompletes/>) on the registrar's website.

NO WORK GRADE (P.)

Students will receive a grade of No Work (NW) on their official records if they enrolled in a course and then never attended. Instructors may award this grade only when the instructor has no evidence that the student ever attended or submitted any work. Any student who does attend for part of the semester/term and then stops participating is not eligible to receive a grade of NW. The No Work notation does not have an impact on a student's semester/term or cumulative GPA. For more information, see valid instructor assigned grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

A course failed in residence at UW–Madison may be repeated for credit at any other educational institution; however the new grade earned out of residence will not have an impact on the student's UW–Madison grade point average (GPA).

PASS/FAIL (P.)

Any L&S undergraduate student in good academic standing is eligible to take **one** course per term/semester on a pass/fail (S/U) basis. **For the College of Letters & Science, good academic**

standing means that a student does not have one of the following statuses:

- probation
- strict probation
- continued probation
- continued strict probation
- dropped status

For information about probation, see academic probation and drop (p. 27).

- Undergraduates may carry only one course on a pass/fail basis per term (fall, spring, summer) and a maximum of sixteen (16) credits during their entire undergraduate career.
- First-semester freshmen and transfer students without an established UW–Madison GPA are eligible to take **one (1)** course for pass/fail in their first term at UW–Madison.
- Summer sessions collectively count as a single term. Thus, a student can only take **one (1)** course on a pass/fail basis during the summer.

Any student who takes a pass/fail course must earn at least a C to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of S shall be recorded by the registrar in place of instructors' grades of A, AB, B, BC, or C. The grade of U will be recorded by the Registrar's Office in place of instructors' grades of D or F. Neither the S nor the U is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see taking a UW-Madison course pass/fail (<https://kb.wisc.edu/lis/page.php?id=21102>).

Notes:

- Students must submit (or cancel) pass/fail requests via their Student Center link (<https://my.wisc.edu/>) by the end of the fourth (4th) week of fall and spring terms. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students **may not** cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.
- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to Pass/Fail Option (http://registrar.wisc.edu/pass_fail_option.htm).
- **Students cannot cancel a Pass/Fail request after the deadline if they need the course(s) to fulfill a major or degree requirement at a later date. It is the**

student's responsibility to determine whether or not they can take a course on a pass/fail basis.

- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW–Madison (<http://my.wisc.edu/>) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to [pass/fail option \(https://registrar.wisc.edu/pass-fail-option/\)](https://registrar.wisc.edu/pass-fail-option/) on the Registrar's Office website.
- **Only elective work may be carried on a pass/fail basis.** Thus, pass/fail **cannot** be declared or used to fulfill the following requirements:
 - Breadth (humanities, literature, social science, natural science)
 - Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
 - Math
 - Ethnic Studies
 - General Education Requirements (Comm A, Comm B, QR A, QR B)
 - Major requirements
 - Senior Thesis coursework (i.e., 681, 682, 691, 692)
- L&S undergraduates may take courses in their major or major department for pass/fail. **However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements.** Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.
- Courses carried on a pass/fail basis **cannot** fulfill any other college requirements except for the 60 intermediate/advanced level credits and 108 Liberal Arts and Science (LAS) credits needed to graduate.
- **Directed Study courses may not be taken on a pass/fail basis.**
- Pass/fail work **may not** be used as part of the coursework offered in satisfaction of the individual major.
- **Students may not take foreign language courses on a pass/fail basis until the foreign language requirement for their degree program has been satisfied.**
- **Students pursuing certificate programs should check with the certificate advisor(s) about policies concerning pass/fail for certificate program courses since many certificate programs do not allow coursework to be taken for pass/fail.**

For further information, deadline dates, and instructions for registration stop by the College of Letters & Science Academic Deans' Services in Suite 101 Ingraham Hall, 1155 Observatory Drive, or call 608-262-0617 for more assistance.

Q GRADE (P.)

A "Q" grade is assigned by an instructor when there is a discrepancy between the work completed by a student and

the student's official registration. The Office of the Registrar (<https://registrar.wisc.edu/>) will post the temporary Q grade/mark to a student's record until the discrepancy is resolved. A student will receive a Q in one of three situations:

1. a student registers for a variable-credit course and completes the work that is appropriate for a different number of credits;
2. a student registers for Honors credit and does not complete the Honors portion of the work; and
3. a student does not register for Honors but completes the Honors work appropriate for an Honors designation.

In each of the three cases listed above, students will need to work with the instructor to correct the situation before a grade can be reported. The correct grade will need to be forwarded by the instructor to L&S Undergraduate Academic Deans' Services (<https://saa.ls.wisc.edu/offices/academic-deans-services/>). For more information, see valid instructor assigned grades (http://registrar.wisc.edu/valid_instructor_assigned_grades.htm).

GRADUATION

DIPLOMA AND DEGREE INFORMATION (P.)

A UW–Madison undergraduate diploma lists only the degree title. Diplomas **do not** list major(s) or certificate(s) students complete as undergraduates. Major and certificate information is located on a student's official UW–Madison transcript (<https://registrar.wisc.edu/transcript/>). For additional information, see graduation, commencement, and conferral date (<https://registrar.wisc.edu/graduation-commencement/>).

- If a student is completing a bachelor of science degree with majors in history and economics, the degree on the student's diploma will be **Bachelor of Science**.
- If a student is completing a bachelor of arts degree, majoring in psychology and journalism, the degree on the student's diploma will be **Bachelor of Arts–Journalism**.

The following information will appear on an L&S undergraduate student's diploma:

- Degree Title (e.g., Bachelor of Arts, Bachelor of Music, etc.)
- Degree Conferral Date (e.g., May 14, 2022 for spring 2022 graduates)
- Honors in the Liberal Arts (if a student declares and successfully completes the requirements)
- Honors in the Major (if a student declares and successfully completes the requirements)
- Comprehensive Honors (if a student declares and successfully completes the requirements)

The College of Letters & Science offers the following degrees which will appear on an L&S undergraduate student's diploma:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Landscape Architecture*
- Bachelor of Music*
- Bachelor of Arts–Journalism*
- Bachelor of Science–Journalism*
- Bachelor of Social Work*
- Bachelor of Science–Applied Mathematics, Engineering and Physics*

*These specialized degree programs have requirements for completion distinct from the L&S BA/BS requirements. Students who complete these requirements are awarded these degrees in lieu of the general Bachelor of Arts or Bachelor of Science. More L&S degree information is available at Degrees/Majors/Certificate (p. 323).

****Students pursuing the Bachelor of Landscape Architecture (BLA) special degree in L&S cannot do additional majors at this time.** They can only add on certificates. For example, a student doing the BLA can add on the Environmental Studies certificate but **cannot** add on the Environmental Studies major.

Please note that all L&S undergraduate students are expected to graduate as soon as they have completed all of their major and degree requirements. Thus, students are expected to select their appropriate **expected graduation term** (EGT). L&S will graduate any undergraduate if the College discovers that a student has completed all of their major and degree requirements but has not specified a specific EGT in their Student Center. Graduation is usually based on the last term a student was enrolled and completed all of their requirements. For additional information about degree conferment, see **conferral of degrees** under graduating (<https://guide.wisc.edu/undergraduate/#requirementsforundergraduatestudytext>).

FOREIGN LANGUAGE (P.)

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement. Students with certain disabilities may apply for a substitution to the foreign language requirement by

submitting required documentation to the L&S Disabilities Curricular Accommodations Committee (DCAC) for review.

B.A. Degree

For the **B.A. degree**, the foreign language requirement may be met in one of two ways: (1) completion of the fourth unit (level) in one language, or (2) completion of the third unit (level) in one language **and** completion of the second unit (level) in another language. For example, a student can satisfy the B.A. foreign language degree requirement if s/he:

- completed 4 units (years) of one high school language (e.g., French, German, etc.), **OR**
- completed the 4th unit of a college language course (e.g., ASIALANG 202, AFRICAN 324, GERMAN 204, SLAVIC 208, etc.), **OR**
- completed 2 units (years) of one high school language (e.g., Spanish) **and** the 3rd unit/semester of a second foreign language (e.g., ASIALANG 203, GERMAN 203, GREEK 305, etc.) at the college level, **OR**
- completed 3 units (years) of one high school language (e.g., Chinese) **and** the 2nd unit/semester of a second foreign language (e.g., ASIALANG 126, GERMAN 112, ITALIAN 102, etc.) at the college level

B.S. Degree

For the **B.S. degree**, the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work. For example, a student can satisfy the B.S. foreign language degree requirement if s/he has:

- completed 3 units (years) of one high school language (e.g., French, Spanish, etc.), **or**
- completed the 3rd unit/semester of one college-level language (e.g., AFRICAN 333, ASIALANG 201, FRENCH 203, etc.)

Foreign Language Substitution

The Foreign Language Substitution package (FLSP) is for degree-seeking candidates in the College of Letters & Science (L&S) only who are seeking to fulfill the L&S foreign language requirement and also have a documented disability in foreign language acquisition.

What is a Foreign Language Substitution?

The Foreign Language Substitution Package is designed to fulfill the College of Letters & Science faculty's intention in requiring foreign language as a part of the college curriculum. Specifically, the Foreign Language Substitution Package, like the foreign language requirement, provides students with information about language in general as well as the literature and culture of the people using a particular language. Courses used to meet the substitution must be approved by the designated academic dean in L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/deans-services.htm>) (101 Ingraham Hall ([\)](http://www.map.wisc.edu/?initObj=0056&wing=)). Classes used for the substitution package **cannot** be used to fulfill any of the following requirements:

- Major requirements
- Breadth (humanities, literature, social science, science)
- Ethnic studies
- General Education Requirements (Comm A, Comm B, QR-A, QR-B)

How do I qualify for a Foreign Language Substitution?

The Disabilities Curricular Accommodations Committee (DCAC) of the College of Letters & Science can approve a substitution to the foreign language requirement for students in Letters & Science only with certain disabilities that make a course substitution appropriate. Extensive and very specific documentation is required from students and disability specialists. Further information may be obtained from the L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/foreign-language-substitution-package.htm>) (Room 101, Ingraham Hall, at 1155 Observatory Drive; 608-262-0617) or the McBurney Disability Resource Center (<https://mcburney.wisc.edu/>) (702 West Johnson Street, Suite 2104, Madison, WI 53715-1007; **voice/Relay711** 608-263- 2741; **text** 608-225-7956).

Note that an appointment at the McBurney Center is required before submitting the application. This appointment should be made no less than one semester/term prior to applying for the substitution package. McBurney Center staff will help you determine what documentation is necessary for the application, as well as assess whether additional testing is required.

After meeting with a McBurney Center staff member, a student should fill out and complete an application for the substitution package. The deadline to submit a completed copy is at the end of the fourth week of the fall and spring terms. Applications are not accepted during the summer term. All students who submitted a completed application by the deadline should hear back

from the Disabilities Curricular Accommodations Committee (DCAC) regarding the status of their application within six to eight weeks after the deadline.

Please make sure you submit your original completed application AND also four (4) additional copies of your completed application to Suite 101 Ingraham Hall at 1155 Observatory Drive before 4:00 p.m. on Friday of the deadline. (The deadline to submit a completed application for consideration is the end of the 4th week of the fall and spring terms.) A completed application must include five (5) copies of each of the five items below:

1. High school transcript and transcripts from other post-secondary institutions you may have attended prior to UW–Madison (you will need to contact original high school or other institution of higher learning for these records if you do not have copies)
2. UW–Madison transcript
3. Copy of your most recent DARS (Please go to your My UW and access the Student Center to request a DARS.)
4. Student application form (see p. 7 of Foreign Language Substitution Package application located at Foreign Language Substitution Package (<http://saa.ls.wisc.edu/foreign-language-substitution-package.htm>))
5. Copy of McBurney Faculty Notification Letter (or confirmation letter of accommodations received) if student has one
6. Other relevant and current disability documentation assembled in consultation with McBurney Center staff

What are the requirements for a Foreign Language Substitution?

1. General Language: If approved for an L&S foreign language substitution package, both **B.A.** and **B.S.** degree candidates must complete one (1) course having to do with language in general (selected from an approved list of classes). If a student's official UW–Madison records has at least one unit (year) of a high school foreign language, this requirement is fulfilled. If a student has not taken a foreign language in high school, please select **one (1)** course from either a, b, or c listed below:

- a. LINGUIS 101 (Linguistics)
- b. CS&D 240 (Communication Sciences & Disorders)

c. ENGL 201, ENGL 207, ENGL 304, ENGL 207, ENGL 400, ENGL 407, ENGL 408, ENGL 409 (English)

2. Cultural Context:

B.A. students must complete the following:

Three (3) courses related to a country, region, or a group of countries sharing a common language in the following areas:

- a. Literature
- b. History or Culture
- c. General elective

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.A. degree. Students must then also take a Literature course and General elective in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a, b, and c above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (<http://saa.ls.wisc.edu/deans-services.htm>).

B.S. students must complete the following:

Two (2) courses related to a country, region, or a group of countries sharing a common language in the following areas:

- a. Literature
- b. History or Culture

- If a student has a second unit (year) in the same high school foreign language, it can fulfill the History or Culture (b) requirement for the B.S. degree. Students pursuing a B.S. must also take a Literature course in the same language area to complete the requirement. If a student **has not taken** a foreign language in high school, please must complete items a and b above. **All coursework taken for the foreign language substitution package must be approved by an academic dean in L&S Undergraduate Academic Deans' Services** (<http://saa.ls.wisc.edu/deans-services.htm>).

What are my responsibilities as a student to complete the Foreign Language Substitution?

Students must submit five (5) copies of all required materials to the Disabilities Curricular Accommodations Committee in L&S Academic Deans' Services (Suite 101 Ingraham Hall, 1155 Observatory Drive, 608-262-0617) by the end of the fourth (4th) week of the semester (fall or spring term) in which they would like to present their case for review. **Applications are not accepted or reviewed during the summer.**

Completed applications will be reviewed and students will hear back regarding the status of their application approximately four to six weeks after the official deadline. Students will then be notified shortly after the Disabilities Curricular Accommodations Committee meets regarding the results. Students who are approved for a foreign language substitution package must make an appointment to speak with an academic dean in L&S Undergraduate Academic Deans' Services (101 Ingraham Hall; 608-262-0617) to talk about the next steps they will need to take in order to complete their substitution package. **Students will not be able to complete their approved foreign language substitution package until they have met with an academic dean to select the appropriate courses they need to fulfill this requirement.**

Students who have not been previously diagnosed as learning-disabled or hearing-impaired should plan three to four months to schedule required testing and to receive results and interpretation of the testing.

Contact the McBurney Disability Resource Center (<http://www.mcburney.wisc.edu/>) for current information about the tests required. Results of the specified tests taken within the previous four years are acceptable; retesting is required if test results are not at least this current.

For persons with a hearing loss, certain criteria must be met to apply for a substitution to the foreign language requirement. Contact the McBurney Disability Resource Center for details.

GENERAL EDUCATION REQUIREMENTS (P.)

The University of Wisconsin–Madison General Education Requirements (GER) (<http://guide.wisc.edu/undergraduate/#requirementsforundergraduatetext>) are courses that provide for breadth across the humanities and arts, social studies, and natural sciences. All students except those who matriculated at a college or university prior to May 20, 1996, must satisfy the university-wide General Education Requirements. The requirements consist of:

Breadth (University Breadth)

All students must complete 13–15 credits of course work intended to provide a breadth of experience across the major modes of intellectual inquiry. Breadth course work is intended to give students a broad intellectual perspective on their undergraduate education and their world by encouraging them to look at and understand subjects through the various modes of inquiry used in the natural, physical and social sciences, arts, and humanities.

Students are required to complete the following breadth requirements:

- Natural Science, 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory

component; or two courses providing a total of 6 credits

- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research and explore, and ultimately understand, the world around us. These many "ways of knowing" are intended to enrich the undergraduate experience and complement intensive study in students' majors. Through these courses, many students discover subjects and ideas that will become lifetime interests, or that offer the creative stimulus to see their favorite subjects from new perspectives. **Note that the College of Letters & Science undergraduate breadth requirements exceed campus General Education requirements. Students who transfer to another UW–Madison school or college before completing the L&S breadth and ethnic studies may need to complete additional General Education requirements.** For more information, about L&S breadth, please refer to College of Letters & Science (<http://gened.wisc.edu/ReqAdditional/#LnS>).

Communication

Communication, 3 to 5/6 credits

Communication A (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/CommACriteria-2012.pdf>). Literacy Proficiency. 2–3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete course work to fulfill this requirement, students may be exempted from Communication A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year.

Communication B (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/CommB%20Fall%202016%20Criteria.pdf>). Enhancing Literacy Proficiency. 2–3 credits of more advanced course work for students who have completed or been exempted from Communication A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping with their interests or other requirements of their intended field(s) of study.

Ethnic Studies

Ethnic Studies, 3 credits

All students must take one course of at least 3 credits which is designated as an Ethnic Studies course. The ethnic studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on

campus climate, students are encouraged to complete this requirement by the end of their second year. Please note that many ethnic studies courses may also fulfill breadth and other requirements.

Information about criteria and learning outcomes for ethnic studies courses (http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/Criteria_and_Learning_Outcomes_2015.3.15.pdf) can be found on the General Education website (<http://gened.wisc.edu/CoursesNew/>).

Quantitative Reasoning

Quantitative Reasoning, 3 to 6 credits

Quantitative Reasoning A (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/QRCriteria.pdf>). Quantitative Reasoning Proficiency. Three (3) credits of mathematics or formal logic. Students may be exempted from Quantitative Reasoning A by approved college work while in high school, AP test scores, or placement testing. Some students, however, may need to complete a prerequisite before enrolling in a Quantitative Reasoning A course. To ensure timely progress to completion of the undergraduate degree, students should complete this requirement by the end of their first year.

Quantitative Reasoning B (<http://gened.wisc.edu/sites/gened.wisc.edu/files/documents/QRCriteria.pdf>). Enhancing Quantitative Reasoning Proficiency. Three (3) credits of more advanced course work for students who have completed or been exempted from Quantitative Reasoning A. (Students must satisfy Quantitative Reasoning A before they may go on to Quantitative Reasoning B.) Courses that satisfy this requirement are offered in a variety of fields of study. Students are encouraged to select a course in keeping with their interests or other requirements of their intended field(s) of study.

For more information regarding the UW–Madison General Education Requirements, see General Education Requirements (p. 23).

GRADUATION AWARDS (P.)

Graduation with Distinction

The award of "Graduation with Distinction" will be noted on the transcript of students who have earned a grade point average that places them within the top 20% of the students graduating that term in their college/school provided 60 or more credits have been earned at UW–Madison. The Office of the Registrar performs a preliminary calculation for students declaring intent to graduate and then makes a temporary posting that is included in the program for commencement. However, the final notation of Graduation with Distinction depends upon last term grades, as calculated by the registrar and relative to the performance of all students in that particular graduating class. For more detailed information, see L&S graduation with distinction (<https://kb.wisc.edu/lis/22260/>).

Note: UW–Madison (except for the Law School) **does not** use the Latin honors *cum laude*, *magna cum laude*,

or **summa cum laude** to indicate level of distinction when conferring academic degrees. Instead, L&S undergraduate students are eligible to receive one of the following distinctions (*Graduation with Distinction*, *Distinction in the Major*, or *Thesis of Distinction*) at the end of their academic career

Distinction in the Major

This award is granted at graduation, upon the recommendation of a department to the dean, to any student **not** earning the Honors Degree (i.e., Honors in the Major, Honors in the Liberal Arts, or Comprehensive Honors) who has done superior work in the major and who has passed a comprehensive examination on that work. The comprehensive examination may be omitted for the student with a 3.500 grade point average in the major who successfully completes special work prescribed by the department. The award is noted on the student's transcript.

LETTERS & SCIENCE BREADTH (P.)

All L&S undergraduate students are required to fulfill the L&S Breadth of Exploration in the Liberal Arts and Sciences. The L&S Breadth includes:

- Humanities : 12 credits (of which 6 credits **must** be Literature credit)
- Social Science: 12 credits
- Natural Science: 12 credits
 - **Bachelor of Arts** (B.A.) candidates must complete a minimum of **one (1)** 3+ credit Biological Science course **and one (1)** 3+ credit Physical Science course. The additional six (6) credits can be any combination of natural, biological or physical science credits to bring the total to twelve (12) credits.
 - **Bachelor of Science** (B.S.) candidates must complete a minimum of **six (6)** credits of Physical Science **and six (6)** credits of Biological Science.

LIBERAL ARTS AND SCIENCE CREDITS (P.)

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree (General Course) at least 108 credits must be in courses designated as Liberal Arts and Science (LAS) courses. These courses are designated in the Guide (<http://guide.wisc.edu/courses/>) as satisfying this particular requirement. Nearly every course taught in L&S is designated in this way.

QUALITY OF WORK REQUIREMENTS (P.)

A total of 120 degree credits is required for graduation, with a minimum 2.000 grade point average on all courses taken, whether or not each course is passed.

The quality of work requirements establish a minimum grade point average in four specific areas that **must be met** to receive a Letters & Science degree. In order to satisfy these requirements, the student must earn a minimum 2.000 grade

point average on all courses carried at UW–Madison, whether passed or not, in these four areas:

1. All courses in the major (or majors);
2. All upper-level courses in the major, as designated by the major department for the 15-credit residence requirement;
3. All courses designated intermediate or advanced;
4. All courses carried for a grade at UW–Madison (cumulative grade point average, as reported by the Registrar Office). Courses carried on a refresher basis (see Repeat of College Courses Not for Credit) are excluded from the grade point average as determined for categories 1, 2, and 3 above. **Repeating a failed course will not remove the failure from the student's record or from GPA calculations.** This summary of college grade point requirements does not include those for admission to certain majors and special courses within the college or to other colleges and schools within the university, or to honors courses.

RESIDENCE REQUIREMENTS (P.)

The UW–Madison Experience

In order to receive an undergraduate degree from the College of Letters & Science, a student must earn a minimum of 30 credits in the senior year (after a student has completed 86 degree credits). This requirement intends to ensure that a student's depth of study—which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research—is a uniquely UW–Madison experience. The credits do not have to be contiguous for the requirement to be met. Because the requirement begins with the 87th credit, students have the flexibility to take 4 credits out of residence in the senior year without needing to obtain special permission. Exceptions to the senior residence requirement may be granted in cases where a student is in good academic standing and has a specific need to take fewer than 30 credits in the senior year. Retroactive credits, AP credits, and credits granted by examination **are not** considered *in residence*. A course is not in residence when credit is earned via:

- a course transferred from another institution, including other University of Wisconsin System schools or University of Wisconsin Extension;
- a course taken abroad through another institution;
- credit awarded according to scores earned on AP (Advanced Placement), IB (International Baccalaureate), or other approved exams;
- credit awarded by UW–Madison departmental examination;
- retroactive foreign language credit (retrocredit).

UW–Extension and other campuses in the University of Wisconsin System are different institutions and credit earned at any of these campuses is considered transfer credit and not in residence.

Senior Residence

The 30 minimum credits a student must earn in residence should be completed in the senior year (**after a student has**

completed 86 degree credits). This requirement intends to ensure that the student's depth of study—which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research—are uniquely *UW–Madison* experiences. These credits do not have to be contiguous for the requirement to be met. Because the requirement begins with the 87th credit, students have the flexibility to take four (4) credits out of residence in the senior year without needing to obtain special permission.

Exceptions to the senior residence requirement may be granted in cases where a student is in good academic standing (<http://guide.wisc.edu/undergraduate/letters-science/#policiesandregulationstext>) and has a specific need to take fewer than 30 credits in their senior year. Consult an L&S academic dean (<https://saa.ls.wisc.edu/offices/academic-deans-services/>) for more information.

L&S undergraduate students must **also** complete at least 15 credits in upper-level courses in their major(s) **at UW–Madison**. Refer to major requirements for a specific major to get more information about major residence requirements.

TOTAL DEGREE CREDITS (P. 323)

To receive an undergraduate degree, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit) for most baccalaureate degrees granted by the College of Letters & Science. The total credits for the degree includes the University General Education Requirements, L&S Breadth, major requirements, and also elective credits not associated with any specific requirement, that allow students to explore other areas of academic interest. The requirements for some programs may exceed 120 degree credits. Students should consult with their academic/major advisor and DARS for information on specific credit requirements.

MAJOR INFORMATION

ACCEPTANCE INTO A MAJOR (P. 323)

A department, program, or school may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of particular courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school, as outlined in the degrees/majors/certificates (p. 323) section of this Guide. Students should consult the department advisor for information. Only the department can make an exception. Students not accepted in a major or special degree program must select a different major.

COMPLETING AN L&S MAJOR FOR NON-L&S UNDERGRADUATES (P. 323)

Non L&S undergraduate students in other schools/colleges on the UW–Madison campus (e.g., Business, CALS, Education, Engineering, etc.) are eligible to complete a major in L&S **without having to complete L&S degree requirements** if they receive permission from their home school/college.

The process for obtaining special permission to pursue an L&S major varies based on the student's home school/college. Non L&S undergraduate students must contact the appropriate L&S major department/unit about the steps they will need to take in order to declare an additional major

and fulfill all of the major requirements within the College of Letters & Science.

COMPLETING A MAJOR OUTSIDE L&S (P. 323)

L&S undergraduate students must complete at least **one (1)** major in the College of Letters & Science. Currently, L&S undergraduates may declare one (1) approved additional major outside of L&S. The four options for L&S undergraduates are:

- Education Studies (<https://guide.wisc.edu/undergraduate/education/educational-policy-studies/education-studies-bs/>) (Education)
- Global Health (<https://guide.wisc.edu/undergraduate/agricultural-life-sciences/entomology/global-health-bs/>) (CALS)
- Health Promotion and Health Equity (<https://guide.wisc.edu/undergraduate/education/kinesiology/health-promo-health-equity-bs/>) (Education)
- Theatre and Drama (<https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/>) (Education)

These are currently the only non-L&S majors that L&S students may declare. These additional majors are available to almost all L&S undergraduates (i.e., BA, BS, AMEP, BA/BS-Journalism, BA/BS-Social Work, and Bachelor of Music) who meet admission requirements for the additional majors.

(Students pursuing the Bachelors in Landscape Architecture special degree **are not** permitted to pursue an additional major either within L&S or within the School of Education.)

Please note that an L&S undergraduate student must first declare a major in L&S before being eligible to declare one of the approved non-L&S majors. A student earning an L&S undergraduate degree **cannot** graduate within L&S with only an approved non-L&S major.

The following policies apply to L&S students with an additional non-L&S major.

- At this time, only the three (3) School of Education majors and one (1) College of Agricultural and Life Sciences (CALS) major listed above are available for L&S undergraduates to pursue outside the College of Letters & Science. Additional majors in a school/college other than CALS, the School of Education or the College of Letters & Science may not be declared.
- **Prior to declaring one of the four approved majors, an L&S student must have already declared at least one (1) L&S major.**
- In order to graduate, an L&S undergraduate must complete at least one L&S major in addition to all other L&S degree requirements. A student cannot earn an L&S undergraduate degree if the student cancels his/her L&S major(s) after completing the requirements for the additional non-L&S major.
- L&S will not delay graduating students who have not completed the requirements for majors outside of L&S. Thus, students with these additional majors outside L&S will be graduated at the end

of the semester/term in which they complete their L&S requirements, even if the CALS or School of Education major requirements have not been completed.

- Any courses required for the non-L&S major that **are not** designated as Liberal Arts and Science (LAS) courses **will not** count toward satisfying the requirement that students complete 108 credits in Liberal Arts and Science.
- Students may elect to count these credits among the allowed 12 free elective credits in the degree but should also be mindful of the fact that these courses **will not** count toward fulfilling breadth or level within L&S.
- **An exception will not be made to count non Liberal Arts and Science (LAS) courses for breadth and level for courses required to complete a non-L&S major even if the student receives permission to pursue the additional non-L&S major.**
- An L&S student who will be graduated without completing their declared CALS or School of Education major should work with their advisor in CALS or the School of Education to determine whether options are available to them to finish up their additional major in CALS or Education.

Students interested in completing an additional major outside the College of Letters & Science other than the approved majors above must first consult the dean's office for the other school or college (e.g., Student Academic Affairs and Career Development Office (<https://sohe.wisc.edu/prospective-students/advising/>) in the School of Human Ecology, etc.). If the other school or college approves the additional major, students must consult with an L&S academic dean to see if this is possible or if they will need to transfer to the other school/college to complete their degree. **Students in other schools/colleges on the UW–Madison campus (e.g., CALS (<https://cals.wisc.edu/>), Education (<https://www.education.wisc.edu/>), Engineering (<https://www.engr.wisc.edu/>), etc.) are eligible to complete a major in L&S without having to complete L&S degree requirements if they receive permission from an academic dean in their home school/college.**

HOW TO DECLARE AND CANCEL A MAJOR (P.)

Students **must** declare a major through the department or unit administering that program. **(Please note that all L&S undergraduate students are required to declare at least one L&S major by the time they have 86 degree credits.)** Students should speak with the advisor for the major/certificate/special degree program to determine their eligibility to declare and the process for declaring the major. If a student does not plan on completing the requirements for a declared major, the student **must** return to that department or unit office to cancel the major. **Currently L&S undergraduate students may have as many majors as they wish, but they must go to the academic department/unit administering the major in order to declare each major or cancel any major they do not plan to complete.** Additional information can be found at declaring a major (<https://advising.wisc.edu/content/declaring-major/>).

MAJOR DECLARATION POLICY (P.)

All L&S undergraduate students **are required** to declare a major or be admitted into a program before or upon the completion of 86 degree credits (which includes credits from transfer, AP, test, study abroad, or retroactive credits). **Students who have not declared by the time they have reached 86 degree credits will have an enrollment hold placed on their records preventing them from registering for future terms.** Students who are having difficulty declaring a major should speak with their assigned academic advisor as soon as possible to discuss options available to them.

Major declaration has benefits that are critical to student success. Students with majors:

- Can plan for timely graduation, which uses their resources wisely. Graduating on time lowers the overall cost of education and allows students to pursue their next life goals.
- Connect to the major department, gaining access to departmental advising resources, faculty contacts, and courses limited to majors.
- Connect with other students who are pursuing similar academic interests.
- Get timely and important information about the major (advising hours and workshops, upcoming courses, social events, student groups, speakers, opportunities, etc.).
- "Lock in" major requirements, so if those requirements change, students are held to the rules in place when they declared.

Declaring a major is an essential part of a student's academic career, and is integral to timely graduation; the great majority of students *do* declare their majors by the time they earn 86 credits. This policy is intended to help undeclared students reach out to advisors so they find majors that suit their talents and interests. This policy is also intended to make the best use of both student and university resources, and to help students and their advisors create a plan for academic success and timely graduation.

RESIDENCE REQUIREMENT IN THE MAJOR (P.)

All students, especially those students who participate in UW–Madison sponsored Study Abroad programs, must complete a minimum of 15 credits, at any level, in their major/major department or program, in courses taken on the UW–Madison campus. These credits **may not include** retroactive credit (retrocredits) or credit earned by department examination.

UPPER-LEVEL WORK IN THE MAJOR (P.)

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major/major department or program. (Please see the section on Residence Requirements (<https://saa.ls.wisc.edu/policies-forms/residence-requirement-30-credit-rule/>) for additional information about credits taken "in residence.") Furthermore, students must earn a minimum 2.000 grade point average on all upper-level work taken in the major, in residence.

REQUIREMENTS

Students pursuing an undergraduate degree in Letters & Science must complete the University General Education Requirements (GER) (p. 23) and the following L&S requirements:

Code	Title	Credits
	Foreign Language	
	Mathematics	
	Breadth	
	Depth	
	Major Study	
	Requirements that apply to all majors	
	Acceptance as a major	
	Mastery of intermediate/advanced work	
	Residence requirement in the major	
	Residence requirements	
	Quality of work requirements	

FOREIGN LANGUAGE

The study of a foreign language contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a foreign language is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own native language. Students with sufficient preparation may be able to use the foreign language for study in their chosen discipline.

To be admitted to the University of Wisconsin–Madison, students must have completed the second-year level of a single foreign language (or American Sign Language) in high school. On extremely rare occasions, students may be admitted with a foreign language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

All students working for a B.A. or B.S. degree in the College of Letters & Science must fulfill the foreign language requirement. Students with certain disabilities may apply for a substitution to the foreign language requirement by submitting required documentation to the L&S Disabilities Curricular Accommodations Committee (DCAC) for review.

B.A. Degree

For the **B.A. degree**, the foreign language requirement may be met in one of two ways: (1) completion of the fourth unit (level) in one language, or (2) completion of the third unit (level) in one language **and** completion of the second unit (level) in another language.

B.S. Degree

For the **B.S. degree**, the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work.

Foreign Language Substitution

What is a Foreign Language Substitution?

The Foreign Language Substitution Package is for degree-seeking candidates in the College of Letters & Science (L&S) only who are seeking to fulfill the L&S foreign language requirements and also have a documented disability in foreign language acquisition. Specifically, the Foreign Language Substitution Package, like the foreign language requirement, provides students with information about language in general as well as the literature and culture of the people using a particular language. Courses used to meet the substitution must be approved by the designated academic dean in L&S Undergraduate Academic Deans' Services (101 Ingraham Hall (<https://saa.ls.wisc.edu/offices/academic-deans-services/>)). Classes used for the substitution package **cannot** be used to fulfill any of the following requirements:

- Major requirements
- Breadth (humanities, literature, social science, science)
- Ethnic studies
- General Education Requirements (Comm A, Comm B, QR-A, QR-B)

How do I qualify for a Foreign Language Substitution?

The Disabilities Curricular Accommodations Committee (DCAC) of the College of Letters & Science can approve a substitution to the foreign language requirement for students in Letters & Science only with certain disabilities that make a course substitution appropriate. Extensive and very specific documentation is required from students and disability specialists. Further information may be obtained from the L&S Undergraduate Academic Deans' Services (<http://saa.ls.wisc.edu/foreign-language-substitution-package.htm>) (Room 101, Ingraham Hall, at 1155 Observatory Drive; 608-262-0617) or the McBurney Disability Resource Center (<https://mcburney.wisc.edu/>) (702 West Johnson Street; 608-263-2741).

Note that an appointment at the McBurney Center is required before submitting the application. This appointment should be made no less than one semester/term prior to applying for the substitution package. McBurney Center staff will help you determine what documentation is necessary for the application, as well as assess whether additional testing is required. For more detailed information about applying for the substitution package, please see L&S foreign language substitution (<https://kb.wisc.edu/ls/84515/>).

MATHEMATICS

Mathematics is a principal tool of knowledge. Algebra and geometry provide the minimum of mathematics skills that an educated person needs in today's world, and competence in these areas is required for admission to the university. Since mathematics underlies quantitative work in all sciences, and the level of mathematical background required has been steadily increasing in most areas of science, the L&S math requirements should be viewed as minimums. Students whose placement scores

place them in MATH 96 must complete it before enrolling in any Quantitative Reasoning A course.

B.A. Degree

The B.A. requires completion of the University General Education Requirements for Quantitative Reasoning A and Quantitative Reasoning B.

B.S. Degree

The **B.S. degree** requires two courses of at least three credits (each) at the Intermediate or Advanced level in MATH (<https://guide.wisc.edu/courses/math/>), COMP SCI (https://guide.wisc.edu/courses/comp_sci/), or STAT (<https://guide.wisc.edu/courses/stat/>). Of the two courses, **only one (1) course in COMP SCI and only one (1) course in STAT may count toward the B.S. mathematics requirement.**

BREADTH

Ways of Knowing

At the heart of any degree in the liberal arts and sciences is an active understanding of the variety and breadth of the many scholarly approaches to knowing the world. Every student in the College of Letters & Science experiences significant exposure to three principal fields of knowledge: the arts and humanities, the social sciences, and the natural sciences. These broad fields of knowledge are not the same as the areas of depth that we call "majors." In fact, any particular major—or even a particular course within a major—might well involve more than one of these fields of knowledge. (For example, imagine a seminar on "people and the environment" that combines historical background, research on social patterns of energy use, and scientific understandings of climate.) Working together, each of these three fields of knowledge represents a particular "way of knowing" about the world around us.

Arts and Humanities

Courses in the **arts and humanities** involve knowing the world through the production and analysis of artistic, literary, and scholarly work. Some courses examine the fine and performing arts, or literature, presenting students with opportunities to interpret and think critically about these creative expressions of the human condition. Other courses help students to understand and compare religious and philosophical conceptions of humankind. Still other courses take on historical subjects, focusing on moments of change and periods of continuity for the peoples and regions of the world. These courses all encourage students to analyze the range of creative and cultural artifacts, expressions, and ideas of human existence—history, literature, art, culture, folklore—and to use that information to better understand humanity and to cultivate civic and social responsibility.

Social Sciences

Courses in the **social sciences** involve knowing the world through the systematic study of human society, interactions, and institutions. The social sciences explore these issues from a wide range of perspectives and research techniques, both quantitative and qualitative. Through these courses students learn how to formulate research questions and determine what techniques are best used to answer those questions—for example, exploring ideas and developing theories, conducting surveys and building models, or observing and participating in social life itself. Developing such analytical skills assists students as they approach complex

problems and seek to solve them in both the workplace and the community.

Natural Sciences

Courses in the **natural sciences** involve knowing the world through scientific inquiry—assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. The natural sciences are often divided into the **physical sciences** (dealing with matter and energy, or the study of the earth, atmosphere, and oceans) and the **biological sciences** (dealing with life and living systems, like plants, animals, and environments). These courses often contain laboratory components that allow students to gain firsthand experience in scientific research methods. By completing this requirement, science and non-science majors alike will gain an appreciation for science as a way of systematically looking at the natural world, understanding how this process can be used to inform decision-making in a wide range of political, economic, and social contexts.

Together, these broad "ways of knowing" give students a complementary set of tools for seeing, imagining, and asking questions about the world—tools that enhance creative problem solving no matter what the field. And, because twenty-first-century knowledge is not neatly compartmentalized, it is worth noting that these areas of study intersect and overlap; courses in some areas draw upon strategies used in the others. Experiences in "breadth" courses can be life-changing: we frequently hear that a course taken to fulfill a breadth requirement introduced someone to a subject that became a new major, a new way of looking at a current major, or a lifelong interest. For more information, visit the KnowledgeBase help document (<https://kb.wisc.edu/lis/page.php?id=27031>).

A liberal education involves not only the nature and kinds of knowledge but also the purpose for which knowledge should be used. These considerations are embodied in the breadth or distribution requirement and call for knowledge in several fields of learning. The purpose of this breadth requirement is to ensure that a degree candidate will obtain an understanding of approaches in the humanities, social sciences, biological sciences, and physical sciences adequate for use both as a citizen and as a specialist.

Breadth Requirements

The L&S breadth requirement is met with 36 credits in the three broad areas of knowledge: humanities, social sciences, and natural sciences. Please note that if a course can satisfy more than one breadth designation (such as a "Z" course, which can meet EITHER Humanities OR Social Science), students may select the course designation in which they want the course to count for the purpose of fulfilling a particular breadth requirement. However, this course may be counted only once and in only one area. **Credits cannot be split between two distinct breadth areas.**

Courses that carry L&S breadth credit are expected to broaden significantly a student's understanding of the world and a general disciplinary approach to problems studied, questions asked, modes of inquiry undertaken to answer those questions, analysis of research findings, communication about results, and implications for further study and/or action. Many courses in L&S carry a breadth designation; however, some types of courses may not convey breadth.

B.A. Degree

Humanities: Students are required to complete **12 credits** in the humanities, 6 of which **must** be in literature. Look in the courses (<http://guide.wisc.edu/courses/>) section of the Guide under Course Designation for course qualifications.

Social Sciences: Students are required to complete **12 credits** in social sciences. Look in the courses (<http://guide.wisc.edu/courses/>) section of the Guide under Course Designation for course qualifications.

Natural Sciences: Students are required to complete **12 credits** in natural sciences. Students **must** take at least one **3+ credit** course in **physical science AND one 3+ credit** course in **biological science**. The additional six (6) credits can be any combination of natural, biological or physical science credits to bring the total to **twelve (12)** credits. Look in the courses (<http://guide.wisc.edu/courses/>) section of the Guide under Course Designation for course qualifications.

B.S. Degree

Humanities: Students are required to complete **12 credits** in the humanities, 6 of which **must** be in literature. Look in the courses (<http://guide.wisc.edu/courses/>) section of the Guide under Course Designation for course qualifications.

Social Sciences: Students are required to complete **12 credits** in social sciences. Look in the courses (<http://guide.wisc.edu/courses/>) section of the Guide under Course Designation for course qualifications.

Natural Sciences: Students are required to complete **12 credits** in natural sciences. Students must complete **6 credits** in **physical science AND 6 credits** in **biological science**. Look in the courses (<http://guide.wisc.edu/courses/>) section of the Guide under Course Designation for course qualifications.

DEPTH: UNDERSTANDING A FIELD OF STUDY (MAJOR)

The process of declaring and completing a major—often, but not always, attached to a particular university department—provides students with an opportunity to concentrate on an in-depth investigation of at least one subject or issue, putting their tools for learning and ways of knowing to focused use. This intensive understanding of one topic helps students to appreciate the potential depth of the others. A student's work in the major reflects a continuing progression of skills, knowledge, and values, where advanced learning opportunities in upper-level coursework grow from and expand upon earlier experiences, helping students build additional depth in writing, speaking, information literacy, and critical thinking skills from the perspective of a particular discipline. In senior capstone or independent research projects, students are frequently asked to synthesize what they have learned and apply it in a variety of new situations. By the conclusion of their studies, students in the major are better able to understand themselves and their society, to develop their intellectual powers outside of a University setting, and to make productive contributions to the world around them. (See list of L&S majors (p. 323).)

MAJOR STUDY

Every candidate for an L&S baccalaureate degree **must** satisfy a depth requirement encompassing a specified and approved major field of study. Students may elect a department major, a major in a

recognized interdisciplinary program, or may develop an individual major if approved by a faculty review committee. Students in Letters & Science may not complete the depth requirement with any department or program outside the college, except for the departments of Biochemistry, Environmental Sciences, and Microbiology. These departments are the only exceptions.

All L&S undergraduate students are required to declare a major by the time they have earned 86 degree credits. Students who do not declare a major by the appropriate time will have an enrollment hold placed on their records so they cannot enroll in future terms.

¹ All L&S undergraduate students are required to declare a major or be admitted into an L&S special degree program upon the completion of 86 credits (including credits from transfer, AP, test, study abroad, or retroactive credits).

Students have three choices in meeting the depth requirement in the College of Letters & Science:

1. Single Major
2. Multiple Majors
3. Individual Major

Single Major

Students may fulfill the requirements of a single major as outlined in the descriptions of the various L&S majors (p. 323).

Multiple Majors

All students may satisfy the requirements for more than one major, either department and/or interdisciplinary major, and have this fact noted on the transcript and other university records.

Students may complete one or more established majors and one individual major if approved by a faculty review committee. **No student may earn more than one individual major.**

Individual Major (p. 1093)

REQUIREMENTS THAT APPLY TO ALL MAJORS

Major Declaration Policy

All L&S undergraduate students are required to declare a major or be admitted into a program before or upon the completion of 86 credits (including transfer credits, AP, test credits, study abroad, or retroactive credits). Any student pursuing undergraduate studies in Letters & Science **must** declare at least **one (1)** major in L&S in order to graduate.

Major declaration has benefits that are critical to student success. Students with majors:

- Can plan for timely graduation, which uses their resources wisely. Graduating on time lowers the overall cost of education and allows students to pursue their next life goals.
- Connect to the major department, gaining access to departmental advising resources, faculty contacts, and courses limited to majors.
- Connect with other students who are pursuing similar academic interests.
- Get timely and important information about the major (advising hours and workshops, upcoming

courses, social events, student groups, speakers, opportunities, etc.).

- "Lock in" major requirements, so if those requirements change, students are held to the rules in place when they declared.

Declaring a major is an essential part of a student's academic career, and is integral to timely graduation; the great majority of students *do* declare their majors by the time they earn 86 credits. This policy is intended to help undeclared students reach out to advisors so they find majors that suit their talents and interests. This policy is also intended to make the best use of both student and university resources, and to help students and their advisors create a plan for academic success and timely graduation.

How to Declare and Cancel a Major

Students must declare a major through the department administering that program. **Students may have as many majors as they wish, but must cancel any major they feel they cannot complete.**

Mastery of Upper-Level Work in the Major

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major department or program. (Please see the section on Residence Requirements below for additional information about credits taken "in residence.") Furthermore, students must earn a minimum 2.000 grade point average on all upper-level work taken in the major, in residence.

Residence Requirement in the Major (also known as the "Study Abroad Stipulation")

All students, especially those students who participate in UW–Madison sponsored Study Abroad programs, must complete a minimum of 15 credits, at any level, in their major or major department, in courses taken on the UW–Madison campus. These credits may not include retroactive credit or credit earned by department examination.

Advising

Questions about choosing a major can be discussed with department advisors and faculty, academic deans, members of L&S Undergraduate Academic Services and the L&S Honors Program office, and with the Cross-College Advising Service staff. For additional information about advising, see the description of L&S advising programs (p. 363).

Completing a Major Outside L&S

L&S students must complete at least one major in the College of Letters & Science to satisfy the depth requirement. Students interested in completing an additional major outside the College of Letters & Science must first consult the dean's office for the other school or college. If the other school or college approves the additional major, students must consult with an L&S academic dean to get permission to pursue a second major outside L&S.

Total Degree Credits: 120

A minimum of 120 degree credits is required for most baccalaureate degrees granted by the College of Letters & Science. The total credits for the degree encompass the requirements detailed above, but also include elective credits not associated with any specific requirement, that allow

students to explore other areas of academic interest. The total credit requirement for some special programs is more than 120 degree credits. The college allows degree credit, as well as placement credit, for the mastery of some L&S course work as demonstrated by successfully completing appropriate tests. (See Credit by Departmental Examination (p. 9)).

Liberal Arts and Science Credits: 108

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree at least 108 credits must be in courses designated as Liberal Arts and Science (LAS) courses. These courses appear in the Guide as L&S credit and can be identified by looking at the *course designation* section for a course in the Guide (<http://guide.wisc.edu/courses/>). Nearly every course taught in L&S is designated in this way.

Non-L&S Courses and L&S Degree Credit

Liberal Arts and Science designation (LAS) Courses. The College of Letters & Science has long recognized that courses offered by other units of the university provide valuable and appropriate learning experiences for students pursuing a degree offered by the college. The college has approved many of these courses for L&S students to take for degree credit, and after careful review, has determined that these courses are *Liberal Arts and Sciences* (LAS) courses. These courses can be identified by looking at the *course designation* section for a course in the Guide (<http://guide.wisc.edu/courses/>). Courses designated as liberal arts and science courses count toward the L&S degree requirements, including requirements related to breadth and level.

Non-L&S Courses Required for L&S Majors. Courses taught in departments located in schools or colleges other than L&S, but which are required for completion of an L&S major, are considered Liberal Arts and Science courses. Such courses will *either* carry the Liberal Arts and Sciences designation in the Guide (<http://guide.wisc.edu/courses/>), or their Liberal Arts and Sciences status will appear in the DARS degree audit. In both cases, these courses count as part of the 108 Liberal Arts and Sciences credits required for a degree.

ACCEPTANCE TO A MAJOR

A department, program, or school may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of particular courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school as outlined under the L&S majors (p. 323) section of the Guide. Students should consult the department advisor or the school or college dean's office for information. Only the department or school can make an exception. Students not accepted in a major or school must select a different major.

MASTERY OF INTERMEDIATE/ADVANCED WORK

Students must complete a minimum of 60 credits in courses with the Intermediate or Advanced level designation, with a grade point average of 2.000 on all courses carried, whether passed or not. The purpose of this requirement is to encourage students to undertake advanced work to the greatest possible extent and to ensure that they achieve greater sophistication and a deeper mastery of subject matter as they advance through the baccalaureate curriculum.

RESIDENCE REQUIREMENT IN THE MAJOR

All L&S undergraduate students must complete 15 degree credits of upper-level work in their major and in residence. Upper-level courses are classes determined by the major program/department to be in-depth within the context of that particular major. In addition, students must complete 15 credits in the major/subject "on campus." These are courses taken in residence where the instructional content is provided by a UW-Madison instructor. This excludes instruction by affiliated institutions, such as those offering UW-Madison students credit abroad.

RESIDENCE REQUIREMENT IN THE DEGREE

All L&S students must earn a minimum of 30 degree credits in residence at the University of Wisconsin-Madison. A course is considered in residence if the student enrolls for credit through UW-Madison. This would include any course that is offered:

- By UW-Madison, in any instructional mode (in-person, online, or hybrid)
- Through a UW-Madison administered program, either domestically or internationally (i.e., Study Abroad through International Academic Programs)

A course is not in residence when credit is earned via:

- A course transferred from another institution, including other UW System schools or UW Extension;
- A course taken abroad through another institution;
- Credit awarded according to scores earned on AP (Advanced Placement), IB (International Baccalaureate), or other approved exams;
- Retroactive foreign language credit.

UW-Extension and other campuses in the University of Wisconsin System are different institutions and credit earned at any of these campuses is considered transfer credit and not in residence.

Senior Residence Rule. The 30 minimum credits a student must earn in residence should be completed in the senior year (**after a student has completed 86 degree credits**). This requirement intends to ensure that the student's depth of study – which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research – are uniquely *UW-Madison* experiences. These credits do not have to be contiguous for the requirement to be met. Because the requirement begins with the 87th credits, students have the flexibility to take four (4) credits out of residence in the senior year without needing to obtain special permission. Exceptions to the senior residence requirement may be granted in cases where a student is in good academic standing (<http://guide.wisc.edu/undergraduate/letters-science/#policiesandregulationstext>) and has a specific need to take fewer than 30 credits in their senior year. Consult an L&S academic dean (<https://saa.ls.wisc.edu/offices/academic-deans-services/>) for more information.

QUALITY OF WORK REQUIREMENTS

A total of 120 degree credits is required for graduation, with a **minimum** 2.000 grade point average on all courses taken in residence, whether or not each course is passed.

The quality of work requirements establish a minimum grade point average in four specific areas that **must be met** to receive a

Letters & Science degree. In order to satisfy these requirements, the student must earn a minimum 2.000 grade point average on all courses carried at UW-Madison, whether passed or not, in these areas:

1. All courses carried for a grade at UW-Madison (cumulative grade point average, as reported by the Registrar).
2. All courses designated Intermediate (I) or Advanced (A);
3. All courses in the major (or majors) or program;
4. All upper-level courses in the major or program, as designated by the major department or program, for the 15-credit residence requirement;
5. All courses carried for a grade at UW-Madison (cumulative grade point average, as reported by the Registrar). Courses carried on a refresher basis (see Is it possible to retake a course that I have already passed or received degree credit (<https://kb.wisc.edu/lis/page.php?id=21934>)) are excluded from the grade point average as determined for categories 2, 3, and 4 above. Repeating a failed course **will not** remove the failure from the student's record or from GPA calculations. This summary of college grade point requirements does not include those for admission to certain majors and special courses within the college or to other colleges and schools within the university, or to honors courses.

FOUNDATIONS: TOOLS FOR LEARNING

For all UW-Madison undergraduates, these learning experiences begin with students satisfying the university's General Education Requirements—usually by taking courses taught within the College of Letters & Science. These common foundations cover key topics which are necessary for any undergraduate major and any prospective career: oral and written communication; mathematical and logical reasoning; and the diversity of cultures within global society.

In addition to these university-wide requirements, all L&S students must attain knowledge of a foreign language, in work that combines training in both communication and culture, so students may better understand and participate in the global community of the twenty-first century. Together, these "tools for learning" may be acquired through many different courses taught by many different departments. The key is that they are never taught in isolation, but always considered together with broad exposure to various "ways of knowing" from the arts and humanities, the natural sciences, and the social sciences. (For more on the General Education Requirements, see Requirements for Undergraduate Study (p. 23); (<http://www.ls.wisc.edu/gened/>) for more on the L&S requirements, see Letters & Science Degrees (p. 358).)

LETTERS & SCIENCE DEGREES

The College of Letters & Science offers two basic degrees for students in the General Course and five other degrees for students in special programs. Students in the General Course, regardless of major, may earn either a Bachelor of Arts or a Bachelor of Science degree. The special degrees are: Bachelor of Science—Applied Mathematics, Engineering, and Physics (AMEP); Bachelor of Arts—Journalism or Bachelor of Science—Journalism; Bachelor of Landscape Architecture; Bachelor of Music; and Bachelor of Social Work. (For details, see sections for AMEP (p. 1109), Journalism (p. 1321), Landscape Architecture (p. 1257), Music

(p. 1151), and Social Work (p. 1295) in the L&S section of this Guide.)

Students who have multiple majors in L&S earn only one undergraduate degree.

Honors degrees may be earned in all of the above (except for Landscape Architecture) upon completion of the L&S Honors Program. See L&S Honors Program (p. 366) for more information.

RESOURCES

ADVISING IN LETTERS & SCIENCE

Academic advising is an essential component of undergraduate education, and the college's commitment to providing quality advising for undergraduates is reflected in the many advising programs it offers. Students who have not yet declared a major are assigned an advisor in L&S Academic Advising Services or the Cross-College Advising Service (see below). Students who have declared a major are assigned an advisor in their department or program.

All of the advising programs share the goal of assisting students in making responsible, informed decisions as they develop educational plans compatible with their potential, their interests, and their career and life ambitions. Advisors provide much more than information about course selection and academic programs; they encourage students to ask questions about the nature and direction of their learning, and they work with students to find meaningful answers to those questions. Advising involves a process in which students learn to think critically about the variety of options available to them and develop decision-making skills that will enable them to choose wisely. As adults, students themselves, however, must assume primary responsibility for choosing their academic program and making progress toward their degree.

ACADEMIC ADVISING SERVICES (AAS)

Letters & Science Academic Advising Services provides advising to pre-declared Letters & Science (L&S) undergraduate students who intend to complete a specific L&S degree and major.

We assist and support students in exploring their educational goals, learning about academic requirements, navigating the university structure, and progressing toward degree completion.

CROSS-COLLEGE ADVISING SERVICES (CCAS)

Advisors at the Cross-College Advising Service (CCAS) provide personalized advising to help you develop a plan for choosing your major and exploring careers. We are here to help you make decisions about what to major in and also answer your general questions about academics and life on campus.

We'll meet you at SOAR, and after that help you plan your future courses, talk about your academic interests and options, and refer you to other helpful campus resources. We're also here to encourage you when things are going well, as well as support you when times are difficult.

CENTER FOR ACADEMIC EXCELLENCE (CAE)

The College of Letters & Science Center for Academic Excellence (CAE) provides an enriching, inclusive community and academic support for L&S students who have been historically underrepresented in higher education, including first-generation and low-income students, and students of color. CAE offers a variety of engagement opportunities, including high-touch advising, tutoring programs, health and wellness events, social events, graduate school preparation, and connections with High Impact Practices. CAE also assists in campus-wide efforts to fully integrate diverse voices into the university community to facilitate a welcoming, responsive, and validating campus climate for our students.

HONORS

The L&S Honors Program (<https://honors.ls.wisc.edu/>) attracts some of UW–Madison's most talented undergraduates who challenge and learn from each other while working closely with faculty members. By bringing students and professors closer together in small classes and individual research settings, the Honors Program fosters a feeling of community even as students push themselves to explore the very frontiers of knowledge. In addition to traditional course work, most Honors students pursue research projects of their own, and many find this experience so exciting that they go on to earn advanced degrees in the nation's best graduate and professional schools.

MAJOR ADVISING

Students who are eligible to declare their major should do so as soon as possible. All L&S undergraduate students are expected to declare their major(s) by the time they have earned 86 degree credits. All declared students will be advised by the advisor connected with their particular major/program. For more information about advising in the major, refer to the advising and careers tab for each major/special degree program under the L&S Degrees/Majors/Certificates (p. 323) section of the Guide.

OTHER ACADEMIC RESOURCES

L&S UNDERGRADUATE ACADEMIC DEANS' SERVICES

Academic deans provide up-to-date information on college policies, procedures, and deadlines; campus resources; and degree requirements. Academic deans also offer limited academic advising and make decisions regarding exceptions to college policy. They work closely with advising staff in L&S Academic Advising Services, department advisors, and other student service personnel on the UW–Madison campus. In an institution as diverse as the University of Wisconsin–Madison, students have a wide range of values, interests, and skills. Moreover, as they progress through an academic program, their questions and concerns often change. Therefore, students are encouraged to seek the help of several different types of academic advisors during their years on campus. The university provides a system of staff and faculty advisors to address these ongoing and changing concerns.

ADVISING IN THE MAJOR

Juniors, seniors, and any other students who are preparing for, or have declared, a major or are contemplating a major in the College of Letters & Science, are encouraged to meet with an advisor in that major department. Each department has a faculty or staff member who serves as a department advisor. This person knows about prerequisites to courses, program planning for students majoring in the department, major requirements, and in some cases, general career information related to the field. A department advisor can help students make satisfactory progress toward completing requirements in the major, and can suggest courses that address students' interests and help them achieve their goals.

Juniors and seniors are encouraged to seek advice from these department advisors as soon as possible. **Please note that the assignment of a departmental advisor and declaring a major in a particular department(s) are not automatic. Students must go to the department office to declare their major and to be assigned a departmental advisor for the major.** Students are also advised to meet with departmental advisors early in their academic career since some majors require students to fulfill prerequisite classes and earn a minimum GPA in the designated coursework before they are eligible to declare the specific major. It is very important that students contact the major department(s) as early as possible so they are aware of any prerequisites.

Transfer students often come to the campus knowing their intended major. These students may go directly to the department advisors for any help they need in pursuing/declaring the major.

Students classified in any of the special degree programs (Applied Mathematics, Engineering and Physics, Journalism, Landscape Architecture, Music, Social Work) may refer to the specific special degree

under Degree/Majors/Certificate (p. 323) tab within this Guide for names of professors associated with the various programs, then consult with the appropriate advisor.

Students pursuing Honors in the Major (HM) are encouraged to work closely with the honors coordinator in their major department regarding course and research opportunities within the department or field of interest. Special departmental advisors are available to help any students, primarily sophomores, juniors, and seniors, who have decided on their major. These advisors are located in department offices throughout the campus. Office hours vary among departments. Consult a staff telephone directory for a list of department offices and locations, or see the department descriptions in this catalog.

INTERNATIONAL INTERNSHIP PROGRAM (IIP)

The International Internship Program (IIP) (<https://internships.international.wisc.edu/>) at UW–Madison is a resource for undergraduate students from all disciplines seeking to gain hands-on international experience. IIP's mission is to identify, cultivate and promote high-quality internships that advance the professional training of UW–Madison undergraduate students; foster global competency; and reinforce academic learning through practical application.

IIP cultivates internship opportunities around the world specifically for Badgers. IIP also identifies and promotes existing international internship and research opportunities offered by other campus offices or international organizations. Both types of opportunities can be found via the IIP database and other search resources are also listed on the website. IIP offers advising for any undergraduates who are exploring internships abroad whether they are just getting started, applying to an IIP-cultivated position, or finding their own. IIP can help with the many questions that come up related to international internships including visas, agreements, academic credit, and scholarships.

The Worldwide Internship Program (WIP) (<https://internships.international.wisc.edu/students/wip/>), a partnership with International Academic Programs (IAP), is a program for students interning outside their home countries to earn academic credit through an online course via which they engage with other UW–Madison students interning around the world. WIP offers students interning abroad structure through academic reflection, insurance and emergency support and may help with eligibility for visas or scholarships. IIP works with students doing internships for credit or not and offers advising, pre-departure and re-entry programming for any student interning abroad. For information about scholarships and other funding, see IIP's need-based WIP grants (<https://wisc.academicworks.com/?orgId=710&scholId=6121>) and IIP Funding (<https://internships.international.wisc.edu/students/funding/>).

An international internship is often located outside the United States, but IIP also promotes internship opportunities to apply international skills and interests domestically. There are many variables in international internships (compensation, duration, location, fees, credit and more) that IIP can help navigate.

For more information on interning abroad visit International Internship Program (IIP) (<http://internships.international.wisc.edu/>) or call or e-mail (internships@international.wisc.edu) to discuss how IIP can support departments or students.

SCHOLARSHIPS

The College of Letters & Science welcomes incoming and continuing students to apply for scholarship opportunities created by the support of our donor friends. The undergraduate scholarships program provides support to students who intend to receive a degree from the College of Letters & Science. With over 63 majors and special degree programs which include journalism, landscape architecture, music, social work, and applied mathematics, engineering, and physics (p. 323), the College of Letters & Science (L&S) strongly supports the role of a broad and deeply educated citizenry. Letters & Science graduates use this strong foundation to flourish in their chosen careers (<http://ls.wisc.edu/about/lsci/?p=careerinitiative.html>). For more information, see overview of scholarships (<http://scholarships.ls.wisc.edu/>).

STUDY ABROAD

About 25% of undergraduates make study abroad an integral part of their UW–Madison experience.

International Academic Programs (IAP) (<https://www.studyabroad.wisc.edu/>) at UW–Madison offers over 200 study abroad options in about 60 countries on 6 continents. In addition to taking the opportunity to learn new languages, understand new cultures and see the world, UW–Madison students study abroad to complement their on-campus academic goals, strengthen their professional potential and enrich their personal lives.

Students of all academic levels and majors study abroad. While many programs include language training—from the basics to full language immersion—most IAP programs have no language requirement and include courses taught in English.

All courses taken abroad through IAP count as “in-residence” credit, just like taking courses on campus at UW–Madison, so students advance toward their degrees while abroad. And study abroad isn’t limited to classroom experience. Many students also complete internships, do research, fieldwork and service learning.

In addition to resources on health, safety, academic planning and other aspects, UW–Madison students receive the information and guidance they need to plan a study abroad experiences that fits their budgets. Many study abroad programs cost about the same or less than studying on campus, and student financial aid can be applied in most cases.

While IAP offers programs to students of all majors, including to students in the College of Agricultural and Life Sciences in collaboration with the CALS International Programs office, the College of Engineering and the School of Business also offer programs tailored specifically to the needs of their students. All of these program options are listed at Study Abroad (<https://studyabroad.wisc.edu/programs/>).

For more information on study abroad at UW–Madison, see Study Abroad (<http://studyabroad.wisc.edu>) or call 608-265-6329.

SUCCESSWORKS

SuccessWorks (<https://careers.ls.wisc.edu/>), 711 State Street, Suite 300, 608-262-3921.

At the College of Letters & Science (L&S) SuccessWorks, advisors work with students from the time they are interested in exploring career options through preparing and conducting a successful job search or graduate school application—in other words, from freshman year

through one year after graduation. Don't hesitate to get started early! We help students reflect and capitalize on their academic skills, explore and try out occupations, participate in internships, and network with professionals in the field. In addition to traditional resume and interview services, SuccessWorks offers one-on-one advising, career and internship courses, occupation-specific advising and resources, the L&S Badger Internship Program, internship scholarships, a mentoring program, and much more. Together we can develop a plan and the tools you need to achieve your goals!

UNDERGRADUATE RESEARCH SCHOLARS PROGRAM

The Undergraduate Research Scholars program (URS) is dedicated to enhancing the academic experience of UW–Madison students by providing first- and second-year undergraduates with opportunities to earn credit for participating in the research and creative work with UW–Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities. Please refer to Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>) for more information.

HONORS

L&S HONORS PROGRAM

The College of Letters & Science Honors Program seeks to provide students with a small, liberal arts college experience within this large university. The Honors Program is home to more than 1,200 motivated, curious and high-achieving students, all pursuing one of three degree tracks: Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors—the highest undergraduate degree awarded by the college. In addition to an enhanced curriculum that offers small, faculty-led courses, the program also offers academic advising services; grants, scholarships, and awards; and many professional development and co-curricular opportunities. Events, term-specific deadlines, course descriptions for the upcoming semester and much more can be found on the L&S Honors Program website (<http://honors.ls.wisc.edu/>). We welcome inquiries via phone at 608-262-2984. The L&S Honors Program is located in the historic Washburn Observatory at 1401 Observatory Drive in Madison, WI 53706.

HOW TO GET IN

Students may apply to enter the L&S Honors Program in any semester of their undergraduate careers. Any UW–Madison Honors credits earned before admission to the Honors Program may be applied toward Honors degree requirements. Eligibility criteria and admissions procedures differ for the different Honors degrees.

ADMISSION TO HONORS IN THE LIBERAL ARTS (HLA)

To become a candidate for the Honors in the Liberal Arts degree, a student must apply directly to the L&S Honors Program. Students may apply at any point in their undergraduate careers provided they meet the eligibility requirements described below.

All students admitted to the university and to the College of Letters & Science are invited to apply to be considered for admission to the Honors Program to pursue the Honors in the Liberal Arts degree. Interested students can apply via an online application form. L&S admitted students

receive an invitation message by email that contains the URL to the online application. Admission to the program is competitive, and space is limited.

Continuing and transfer students with a cumulative grade point average of 3.300 or above who are currently enrolled at UW–Madison or who are transferring to UW–Madison from another college or university may apply to the L&S Honors Program at any time. Applications are available from the Honors Program website (<http://honors.ls.wisc.edu/>) and admission decisions are usually made within three weeks of submission of the completed application and supporting materials. While continuing or transfer students having 60 or more credits at the time of application to the Honors Program are eligible to participate in the Honors in the Liberal Arts (HLA) degree track, they are encouraged to consider Honors in the Major (HM) as an option (see below), since they may find it difficult to complete the HLA degree requirements if beginning that program in the junior or senior year.

ADMISSION TO HONORS IN THE MAJOR (HM)

Students interested in pursuing an Honors in the Major degree are encouraged to consult the department listings (p. 323) in this Guide and speak with the department's academic advisors, who will be able to explain admissions procedures and requirements for the degree. After officially declaring the major and receiving authorization from the department to declare Honors in the Major, students must submit a completed Honors in the Major Declaration Form to the Honors Program office. These forms may be obtained from either the departmental advisor or the Honors Program office.

REQUIREMENTS

Honors may be earned in any L&S undergraduate degree (Bachelor of Arts; Bachelor of Science; Bachelor of Science–Applied Mathematics, Engineering, and Physics; Bachelor of Arts–Journalism or Bachelor of Science–Journalism; Bachelor of Music; and Bachelor of Social Work). For students who complete the requirements, Honors will appear on diplomas and transcripts (for example, B.A. with Honors in the Liberal Arts or B.S. with Honors in the Major).

HONORS IN THE LIBERAL ARTS (HLA)

Honors in the Liberal Arts is often the primary focus for most first- and second-year Honors students. It requires students earn Honors credits in a breadth of disciplines and is meant to enrich and enhance a student's academic experience outside of the major. Students who complete this curriculum develop strong skills in communication, critical thinking and complex problem solving, which will serve them well regardless of career path. The specific requirements for the HLA degree are:

1. completion of the L&S general degree requirements;
2. a cumulative grade point average of at least 3.300;
3. completion of at least 24 credits in Honors courses with grades of B or better;
4. of the 24 Honors credits, at least 6 must be in the humanities, 6 in the social sciences, and 6 in the natural sciences; and
5. of the 24 Honors credits, at least 15 must be "Automatic Honors" credits—that is, in courses that carry the "Honors Only" or "Accelerated Honors" designations in the Course Guide (<http://public.my.wisc.edu/>).

HONORS IN THE MAJOR (HM)

After formally declaring a major in the College of Letters & Science, students may opt to pursue Honors in that Major. Honors in the Major

requirements can be completed independently from Honors in the Liberal Arts; they may also be completed in conjunction with Honors in the Liberal Arts (which would result in a Comprehensive Honors degree). Each academic department and program in the college, with approval of the Faculty Honors Committee, establishes its own requirements for the Honors in the Major degree. Honors in the Major is intended for students who are interested in original research and who wish to graduate with the best possible undergraduate training in the discipline. Honors in the Major is especially appropriate for students who are considering graduate work, or who want a particularly rigorous training in research, reasoning, and writing skills useful to a wide range of career choices.

Although many of the specific requirements for HM vary by department, all students pursuing Honors in the Major must:

1. complete the L&S general degree requirements;
2. complete the regular major requirements;
3. obtain an overall cumulative grade point average of at least 3.300;
4. earn a grade of B or better in all courses counting towards Honors in the Major requirements; and
5. successfully complete a capstone experience during their senior year, typically a Senior Honors Thesis (see below for more information).

In addition to these collegewide requirements, Honors in the Major students may be required to complete additional upper-level, Honors coursework; participate in department research colloquia; and meet a minimum grade point average in all classes in the major (typically between 3.300 and 3.500).

As mentioned above, most departments require a Senior Honors Thesis as the culmination of their Honors in the Major curriculum. In departments for which a research thesis is not the most appropriate capstone, an alternative such as a performance, a professional practicum, or a major piece of creative writing may be required instead. The two-semester Honors thesis or capstone project is often the most challenging part of the Honors in the Major experience, and for most students it also proves to be the most rewarding. The Senior Honors Thesis is a two-semester (or summer and semester) effort; students first enroll in Senior Honors Thesis 681, followed the next term by Senior Honors Thesis 682 (some departments may use different numeric designations for Senior Honors Thesis options). These two courses may not be taken concurrently. The final grade for the entire thesis is assigned after 682 has been completed.

Students who intend to complete Honors in the Major and write a Senior Honors Thesis should consult with department advisors as early as possible. They are also strongly encouraged to begin working with a faculty advisor no later than the beginning of the junior year in order to formulate a research topic, which will enhance the student's potential for success in research grant funding cycles for their senior year. Some departments offer special courses designed to facilitate the organization, planning, and execution of Honors thesis projects. Other departments encourage (and some require) students to take a directed study or tutorial course with the thesis advisor sometime during the junior year. Students who receive funding from the L&S Honors Program for their thesis research should submit an unbound copy of their thesis to the Honors Program Office.

Students pursuing Honors in the Major in two majors may apply for Dual Thesis Authorization, which will allow them to write one interdisciplinary thesis to satisfy both major capstone requirements. Please see the

Honors Program Associate Director for Academic Services to learn more about the application process prior to enrolling in the 681 course.

Prior authorization is needed when students intend to complete either 681 or 682 while away from UW–Madison. Consult with the Associate Director for Academic Services if this is your intention.

COMPREHENSIVE HONORS

Students who complete the requirements for both Honors in the Liberal Arts and Honors in the Major in at least one department or program earn Comprehensive Honors, the highest undergraduate degree awarded by the College.

HOW TO EARN HONORS CREDIT

There are three unique Honors course designations, each described here:

- "Honors Only" courses are reserved for Honors candidates. They are generally small classes, led by a faculty member and designed for substantive engagement, or discussion sections or labs reserved for Honors students in larger non-Honors lecture courses. The enrollment system will automatically assign Honors credit to all enrolled students. These "Honors Only" courses are sometimes denoted with the symbol "H".
- "Accelerated Honors" are open to all students. Honors credit is awarded in recognition of the rigor and pace of the course. These Honors courses are often conducted at a faster pace than the non-Honors course counterparts or are upper-level capstone courses in a major that require significant engagement with the course material. As with "Honors Only" designated courses, the enrollment system will automatically assign Honors credit to all enrolled students. These "Accelerated Honors" courses are sometimes denoted with the symbol "!".
- "Honors Optional" designates courses for which Honors is available through an optional Honors component of the course curriculum. These courses are open to all students for enrollment. Opting into the Honors component of the course is done through the enrollment process. Students enrolled in an "Honors Optional" course are advised to consult with the instructor during the first weeks of the term to determine the Honors curriculum if it is not outlined on the syllabus. Instructors either have designated Honors curricula or students may be encouraged to develop a project idea of their own. These "Honors Optional" courses are sometimes denoted with the symbol "%".

When the Schedule of Classes is published for the upcoming term, students can use the Enroll App to identify which courses are being offered for Honors and with which designation. A course being offered for Honors in a past term in no way guarantees that it will be offered for Honors in a future term.

Honors candidates may also earn Honors credit through the following methods:

- Designing and successfully completing an additional Honors project for a course not carrying any of the Honors designations above in the given term. This option requires consent of the instructor and approval of the L&S Honors Program. To request permission from the Honors Program, students must submit a completed Green Sheet Agreement form and all supporting documentation to the Honors Program office no later than the sixth week of a regular semester, or the fourth week of an eight-week summer term. Green Sheets are available on the Honors Program website

(<http://honors.ls.wisc.edu/>). Supporting documentation includes a formal proposal outlining the additional Honors project in up to 500 words, and a completed Course Change Request Form. Additional information is available from Honors advisors and on the Honors Program website.

- Students who study abroad on a non-Honors study abroad program may petition to have one course (up to four credits) per semester abroad count toward Honors requirements. Upon returning from abroad, students are asked to write a petition in which they are required to reflect on the nature of the course taken abroad and explain why the course meets the desired criteria for general Honors credit, Honors breadth credit and/or Automatic Honors credit. For more details about the petition process, please consult the Honors Program website (<http://honors.ls.wisc.edu/>).
- Studying abroad in an Honors Study Abroad Program. (Currently programs are available in Ecuador and Utrecht, Netherlands.) Students may earn up to 16 Honors credits. Students receive Honors credit in these cases through the study abroad equivalency process upon their return from abroad.

In all cases, to receive Honors credit in a course, students must earn a final grade of B or higher in that course. If a grade of BC or lower is earned in an Honors course, the Honors notation remains on the student's record, but the course does not count toward Honors degree requirements. If the course is retaken for Honors, regardless of the grade earned during this second attempt, the course cannot satisfy an Honors degree requirement.

Students may not receive Honors credit in courses carried on a pass/fail basis.

ADVISING AND CAREERS

The University of Wisconsin–Madison can seem overwhelming because of its size and the complexity of its policies and procedures. Academic advisors help students get (and maintain) their bearings on campus. The L&S Honors Program has a team of specially trained academic and peer advisors who accompany and support Honors candidates as they pursue diverse educational and co-curricular experiences compatible with their long-term goals. Advising occurs through a variety of formats including small group workshops, individual appointments, drop-in hours and email. Additional information is available on the Honors Program website (<http://honors.ls.wisc.edu/>).

The L&S Honors Program encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L&S SuccessWorks office to help students leverage the academic skills learned in your major(s) and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters & Science graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, regardless of major or career goals.

PEOPLE

Please see the L&S Honors website (<https://honors.ls.wisc.edu/meet-the-honors-team-members/>) to find Honors Team Members, including the Director, Associate Directors, Program Administrators, and Academic Advisors.

POLICIES

CRITERIA FOR REMAINING IN GOOD STANDING IN HLA

Students must obtain a grade point average of 3.300 or higher to be eligible to graduate with an Honors in the Liberal Arts degree. As such, we encourage students to strive for at least this GPA each academic term. The Honors Program advising team will work with students on an improvement plan should their GPA drop below 3.300. Students must also make satisfactory progress toward degree requirements, meaning:

1. successfully complete (grade of B or higher) at least one Honors course (any designation) by the end of the third semester on campus and
2. successfully complete (grade of B or higher) at least two Automatic Honors courses by the end of the fifth semester on campus.

Students may withdraw from HLA at any time by completing an Honors in the Liberal Arts Withdrawal Form, available from the Honors Program office, and submitting it to the Honors Program.

CRITERIA FOR REMAINING IN GOOD STANDING IN HM

Because each department sets its own criteria for the HM degree program, students are encouraged to work closely with departmental advisors to stay on track towards successful completion. In addition to the criteria established by individual departments, all students must obtain a cumulative grade point average of 3.300 or higher in UW–Madison coursework to be eligible to graduate with the Honors in the Major degree. Students may withdraw from HM at any time by submitting a completed Honors in the Major Withdrawal Form, available from either the department advisor or the Honors Program office.

HONORS IN THE INDIVIDUAL MAJOR

To complete the Individual Major with Honors, the student must earn Honors credit in at least 20 of the 36 or more credits comprising the Individual Major and must complete a Senior Honors Thesis of 6–8 credits. Students wishing to complete an Honors in the Major degree with an Individual Major should append to their Individual Major proposal a specific outline of how the Honors in the Major requirements would be met, including appropriate Honors-caliber courses, upper-level seminars, and a two-semester capstone project, typically a Senior Honors Thesis. The proposal for Honors in the Individual Major will be reviewed by the Honors Program Associate Director for Academic Services. This individual is authorized to determine whether requests for exceptions to the approved HM requirements will be approved.

HONORS TRANSFER CREDIT

Honors credit earned at other institutions is not currently accepted towards L&S Honors Program degree requirements.

GRANTS AND AWARDS

The L&S Honors Program strives to support Honors students as they pursue original research, study abroad, attend academic conferences, and pursue other endeavors that complement their learning and growth. The following funding opportunities are regularly offered. Please see the L&S Honors Program website (<http://honors.ls.wisc.edu/>) for additional opportunities, specific deadlines and additional information about the applications process.

WELTON SOPHOMORE SUMMER HONORS RESEARCH APPRENTICESHIPS

These competitively awarded grants provide funding for Honors students who learn more about the research process by working as research apprentices with UW–Madison faculty. Students may not earn course credit for this work. For past students, these apprenticeships often evolved into paid research positions and/or Senior Honors Thesis projects. Applications for the Welton are submitted and considered early in the spring term.

TREWARTHA UNDERGRADUATE THESIS RESEARCH AWARD

This grant enables Honors students to undertake more demanding and extensive Honors Senior Thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients receive funds (up to \$1500) to cover travel expenses and other costs needed to complete the research. These resources may enable students to travel to archives or research sites, or to initiate other research activities that require special funding. Each year 12–16 Trewartha awards are granted. Applications for the Trewartha are submitted and considered during the fall term.

MARK MENSINK HONORS RESEARCH GRANT

The Mark Mensink Honors Research Grant is the L&S Honors Program's most prestigious grant, awarded in recognition of an exceptional thesis proposal. The purpose of the grant is to enable its recipient to undertake more demanding and extensive Honors senior thesis research than might otherwise be possible due to limited resources or time. Students do not apply specifically for the Mensink award. The Mensink is awarded to a particularly promising Trewartha applicant.

HONORS SUMMER SENIOR THESIS RESEARCH GRANT

These grants enable students to undertake more demanding and extensive senior thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients are awarded a cash stipend of up to \$3000 to cover research-related expenses. Such resources may enable students to travel to archives or research sites, arrange participant interviews or initiate other research activities that require special funding. Applications for summer research grants are submitted and considered during the spring term.

LEADERSHIP TRUST AWARD

The Leadership Trust Award supports students as they plan, develop and implement projects designed to improve UW–Madison, the community and/or the university student body. Each year, up to two (2) students receive awards equal to two (2) semesters of resident, full-time tuition plus project funds up to \$3000 as justified in the submitted project budget. Past award recipients have established mentoring programs for underrepresented students; collaborated with local organizations to improve community access to fresh, healthy and local produce; and founded an academic journal, the Madison Journal of Literary Criticism, to increase students' opportunities to see their work published. Applicants are asked to identify a UW–Madison faculty member who will serve in an advisory/resource capacity and award winners are expected to submit progress reports to the L&S Faculty Honors Committee. Applications for the Leadership Trust Award are submitted and considered during the spring term for the following academic year.

STUDY ABROAD AWARDS

Up to four \$1,500 travel awards will be awarded to eligible L&S Honors Program students who plan to study abroad. Students studying for either

a semester or a year abroad are eligible, however preference will be given to students participating in a year-long program. Applications for this funding opportunity are available in the spring term.

BROMLEY RESEARCH CONFERENCE TRAVEL GRANT

These awards are meant to support students who present at and/or attend regional or national professional conferences. Priority is given to those who plan to present. The award amount is up to \$500. The application process is competitive and students with the most promising proposals are selected.

AFRICAN CULTURAL STUDIES

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department –Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues ranging from gender and sexuality to whiteness to diasporic internet use.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW–Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu/>) and visit the Majors Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu/>).

See International Academic Programs (<http://www.studyabroad.wisc.edu/>) and visit the Majors Advising Page (<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu/>).

HOW TO GET IN

ENROLLMENT GUIDANCE

Students with prior language study or experience as a speaker of Arabic, Hausa, Swahili, Wolof, Yoruba, or Zulu should contact the Undergraduate Advisor in the African Cultural Studies department for enrollment guidance.

DECLARING THE MAJOR

Declaring the major in African Cultural Studies is as easy as meeting with the advisor. Find the African Cultural Studies advisor on Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

Foreign Language	<ul style="list-style-type: none"> • Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language.
------------------	--

L&S Breadth	<ul style="list-style-type: none"> • 12 credits of Humanities, which must include 6 credits of literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
-------------	--

Liberal Arts and Science Coursework	Complete at least 108 credits.
-------------------------------------	--------------------------------

Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
-------------------------------------	---

Major	Declare and complete at least one major.
-------	--

Total Credits	Complete at least 120 credits.
---------------	--------------------------------

UW-Madison Experience	<ul style="list-style-type: none"> • 30 credits in residence, overall; and • 30 credits in residence after the 86th credit.
-----------------------	---

Quality of Work	<ul style="list-style-type: none"> • 2.000 in all coursework at UW–Madison • 2.000 in Intermediate/Advanced level coursework at UW–Madison
-----------------	--

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the

major requirements. They do not need to complete the L&S Degree Requirements above.

Principal African languages taught by the department are Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu. The program supports the study of various other African languages through courses and/or individualized study.

REQUIREMENTS FOR THE MAJOR

30 credits and seven courses as follows:

LANGUAGE

Code	Title	Credits
4th unit of one African language		4
AFRICAN 324	Fourth Semester Arabic	
AFRICAN 334	Fourth Semester Swahili	
AFRICAN 338	Fourth Semester-A Language of Southern Africa	
AFRICAN 342	Fourth Semester Summer Arabic	
AFRICAN 374	Fourth Semester Yoruba	
AFRICAN 394	Fourth Semester-A Language of West Africa	
Total Credits		4

LITERATURE/CULTURE STUDIES

Code	Title	Credits
Core course:		3

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all AFRICAN and major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence¹
- 15 credits in AFRICAN, taken on the UW–Madison campus

HONORS IN THE MAJOR

Students may declare Honors in the African Cultural Studies Major in consultation with the African Cultural Studies undergraduate advisor.

To be admitted to the Honors Program in African Cultural Studies, students must have achieved a 3.300 university GPA and a 3.300 GPA in all AFRICAN courses as well as all courses accepted in the major.

Honors in the African Cultural Studies Major Requirements

To earn a B.A. or B.S. with Honors in the Major in African Cultural Studies students must satisfy both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN courses, and all courses accepted in the major
3. Complete a minimum of 15 credits in the major for Honors while in residence at UW–Madison from the following:
 - a. 9 credits in courses numbered 200 and above
 - b. A two-semester Senior Honors Thesis in AFRICAN 681 and AFRICAN 682, for a total of 6 credits.

FOOTNOTES

- ¹ Courses with Intermediate or Advanced level are considered upper level in this major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
3. (Content) Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
4. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.

5. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
6. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
7. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
8. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
9. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
10. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
11. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

² Fulfills Communication Part B, Literature OR Humanities requirement

ADVISING AND CAREERS

ADVISING

How does the major in African cultural studies fit into my educational goals?

While there are a wide variety of reasons to visit your major advisor, there seem to be two recurring questions:

1. Can I complete the major during the time I have left at UW?
2. Which classes will be offered in the future?

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *Global HipHop and Social Justice* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style—e.g., do you prefer multiple choice or essays? Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements
- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations

- Finding volunteer and/or internship opportunities
- Talking about your challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school
- Proofreading resumes and cover letters

Ready to meet with the ACS advisor? Make an appointment with Toni Landis using Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).

CAREERS

While many students have a difficult time believing it, a humanities major such as ours enables students who complete it to consider just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

Think about what you learn in a classroom setting as well as what you do each day to be a successful student; the skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- proper research design and methodology
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- broader knowledge of career and graduate-study options

One of the more significant skills majors develop is **language acquisition**. Your study of an African language sets you apart and demonstrates your willingness to explore and expand your understanding of history and culture. In addition, the study of these less commonly taught languages shows discipline and perseverance.

Overall, you will have a wide variety of skills and talents to start you on the path to a rewarding career!

Visit our website (<https://african.wisc.edu/undergraduate-program/career-and-skill-development/>) for more information.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

PEOPLE

Please visit the African Cultural Studies website (<https://african.wisc.edu/people/faculty-and-staff/>) for a complete list of faculty, instructional, and academic staff.

RESOURCES AND SCHOLARSHIPS

RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UW—Madison (<http://www.languages.wisc.edu/>).

Learn more about scholarships (<http://www.languages.wisc.edu/beyond/scholarships/>) and other opportunities for funded language study.

AFRICAN CULTURAL STUDIES, B.S.

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. This includes work at the graduate and undergraduate levels, and emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines.

Undergraduates study one of six languages offered by the department—Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu—and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department's undergraduate courses cover a wide range of topics, including introductory African literature and storytelling, contemporary cinema and music, and social issues ranging from gender and sexuality to whiteness to diasporic internet use.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UW—Madison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (<http://www.studyabroad.wisc.edu/>) and visit the Majors Advising Page

(<https://studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/>).

For more information, students should feel free to contact the Department of African Cultural Studies (<http://african.wisc.edu/>).

HOW TO GET IN

ENROLLMENT GUIDANCE

Students with prior language study or experience as a speaker of Arabic, Hausa, Swahili, Wolof, Yoruba, or Zulu should contact the Undergraduate Advisor in the African Cultural Studies department for enrollment guidance.

DECLARING THE MAJOR

Declaring the major in African Cultural Studies is as easy as meeting with the advisor. Find the African Cultural Studies advisor on Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin—Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics	Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign Language	Complete the third unit of a foreign language.
L&S Breadth	Complete: <ul style="list-style-type: none"> • 12 credits of Humanities, which must include at least 6 credits of Literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced Coursework	Complete at least 60 credits at the Intermediate or Advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	Complete both: <ul style="list-style-type: none"> • 30 credits in residence, overall, and • 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none"> • 2.000 in all coursework at UW–Madison • 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

Principal African languages taught by the department are Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu. The program supports the study of various other African languages through courses and/or individualized study.

REQUIREMENTS FOR THE MAJOR

30 credits and seven courses as follows:

LANGUAGE

Code	Title	Credits
4th unit of one African language		4
AFRICAN 324	Fourth Semester Arabic

ADVISING AND CAREERS

ADVISING

How does the major in African cultural studies fit into my educational goals?

While there are a wide variety of reasons to visit your major advisor, there seem to be two recurring questions:

1. Can I complete the major during the time I have left at UW?
2. Which classes will be offered in the future?

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in *Contemporary Arabic Literature and Culture* and *Global HipHop and Social Justice* before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style—e.g., do you prefer multiple choice or essays? Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements
- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations
- Finding volunteer and/or internship opportunities
- Talking about your challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school
- Proofreading resumes and cover letters

Ready to meet with the ACS advisor? Make an appointment with Toni Landis using Starfish (<https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/>).

CAREERS

While many students have a difficult time believing it, a humanities major such as ours enables students who complete it to consider just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

Think about what you learn in a classroom setting as well as what you do each day to be a successful student; the skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- proper research design and methodology
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- broader knowledge of career and graduate-study options

One of the more significant skills majors develop is **language acquisition**. Your study of an African language sets you apart and demonstrates your willingness to explore and expand your understanding of history and culture. In addition, the study of these less commonly taught languages shows discipline and perseverance.

Overall, you will have a wide variety of skills and talents to start you on the path to a rewarding career!

Visit our website (<https://african.wisc.edu/undergraduate-program/career-and-skill-development/>) for more information.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country**.

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

PEOPLE

Please visit the African Cultural Studies website (<https://african.wisc.edu/people/faculty-and-staff/>) for a complete list of faculty, instructional, and academic staff.

RESOURCES AND SCHOLARSHIPS

RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UW–Madison (<http://www.languages.wisc.edu/>).

AFRO-AMERICAN STUDIES

The Department of Afro-American Studies at the University of Wisconsin–Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct African American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the African American experience.

The department offers an undergraduate major and certificate. The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the “Bridge” programs which enable them to move directly into Ph.D. programs in English and history. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, community theater, college classes for low-income adults, and various support activities for the National Voting Rights Museum in Selma, Alabama. The department prides itself on positive working relationships with our colleagues in traditional disciplines as well as the other ethnic programs, the Department of Gender and Women’s Studies, the Department of African Cultural Studies, and the School of Education. A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to the deeper understanding of race in America and the world.

HOW TO GET IN

Students should inform the Department of Afro-American Studies Office of their intention to major and be assigned an advisor within the department.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics	Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Foreign Language	<ul style="list-style-type: none"> • Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language.
L&S Breadth	<ul style="list-style-type: none"> • 12 credits of Humanities, which must include 6 credits of literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	<ul style="list-style-type: none"> • 30 credits in residence, overall; and • 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none"> • 2.000 in all coursework at UW–Madison • 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the

major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

The major in Afro-American studies requires a **minimum of 30 credits**. 15 credits must be numbered 300 and above. Students must take 2 courses from each of the four areas listed below: 1) Literature; 2) History and Society; 3) Arts and Culture; 4) Seminars and Advanced Courses; and Electives to achieve a total of 30 credits.

RESIDENCE & QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses

2.000 GPA on at least 15 credits of upper-level work in the major, in residence²

15 credits in AFROAMER, taken on the UW–Madison campus

² Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

Distinction in the Major

Afro-American studies majors not enrolled for Honors in the Major may receive the "Distinction in the Major" notation on the transcript by earning a 3.750 grade point average in major courses and successfully completing the AFROAMER 691–AFROAMER 692 Senior Thesis project.

HONORS IN THE MAJOR

Students may declare Honors in the Afro-American Studies Major in consultation with the Afro-American Studies undergraduate advisor(s).

HONORS IN THE AFRO-AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in Afro-American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major

- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	3
AFROAMER/ ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4
AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
AFROAMER/ AFRICAN/HISTORY/ POLI SCI 297	African and African-American Linkages: An Introduction	4
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4
AFROAMER/ ASIAN AM 443	Mutual Perceptions of Racial Minorities	3

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world.
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.

4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

- ¹ Many AFROAMER courses from Arts & Culture carry Humanities breadth and will also meet the L&S Breadth requirement for Humanities (up to 6 credits).
- ² AFROAMER literature courses will satisfy the L&S Literature Breadth requirement (6 credits of Literature course work).
- ³ Nearly all AFROAMER courses carry the Ethnic Studies (ESR) designation and will apply to General Education and the major. Students should complete ESR within first 60 credits.
- ⁴ Many AFROAMER courses in History & Society will carry Social Science Breadth and also meet the L&S Breadth requirements for Social Science (12 credits) course work.
- ⁵ Students must declare a major by the time they reach 86 credits.

ADVISING AND CAREERS

ADVISING

Students are limited to a maximum of 6 credits of Directed Study courses (AFROAMER 199 or AFROAMER 699). With consent of the undergraduate adviser, students may substitute directed studies or thesis credits to satisfy requirements for the major.

The Department of Afro-American Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

RESIDENCE & QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses

2.000 GPA on at least 15 credits of upper-level work in the major, in residence²

15 credits in AFROAMER, taken on the UW–Madison campus

² Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

Distinction in the Major

Afro-American studies majors not enrolled for Honors in the Major may receive the "Distinction in the Major" notation on the transcript by earning a 3.750 grade point average in major courses and successfully completing the AFROAMER 691–AFROAMER 692 Senior Thesis project.

HONORS IN THE MAJOR

Students may declare Honors in the Afro-American Studies Major in consultation with the Afro-American Studies undergraduate advisor(s).

HONORS IN THE AFRO-AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in Afro-American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

Code	Title	Credits
AFROAMER/ ART HIST 241	Introduction to African Art and Architecture	3
AFROAMER/ ANTHRO/C&E SOC/ GEOG/HISTORY/ LACIS/POLI SCI/ SOC/SPANISH 260	Latin America: An Introduction	3-4
AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLI SCI/SOC 277	Africa: An Introductory Survey	4
AFROAMER/ AFRICAN/HISTORY/ POLI SCI 297	African and African-American Linkages: An Introduction	4
AFROAMER/ HISTORY 347	The Caribbean and its Diasporas	3
AFROAMER/ AFRICAN 413	Contemporary African and Caribbean Drama	3-4
AFROAMER/ ASIAN AM 443	Mutual Perceptions of Racial Minorities	3

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world.
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

First Year			
Fall	Credits	Spring	Credits

Total Credits 117

¹ Many AFROMAER courses from Arts & Culture carry Humanities breadth and will also meet the L&S Breadth requirement for Humanities (up to 6 credits).
² AFROMAER literature courses will satisfy the L&S Literature Breadth requirement (6 credits of Literature course work).
³ Nearly all AFROMAER courses carry the Ethnic Studies (ESR) designation and will apply to General Education and the major. Students should complete ESR within first 60 credits.

⁴ Many AFROAMER courses in History & Society will carry Social Science Breadth and also meet the L&S Breadth requirements for Social Science (12 credits) course work.

⁵ Students must declare a major by the time they reach 86 credits.

ADVISING AND CAREERS

ADVISING

Students are limited to a maximum of 6 credits of Directed Study courses (AFROAMER 199 or AFROAMER 699). With consent of the undergraduate adviser, students may substitute directed studies or thesis credits to satisfy requirements for the major.

The Department of Afro-American Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Professor Sandra Adell, Undergraduate and Certificate advisor in the major

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information,

see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)

AFRO-AMERICAN STUDIES, CERTIFICATE

The certificate in Afro-American studies introduces undergraduate students to the interdisciplinary study of African American, African diaspora and African history, society, and culture. Students may choose courses in African American history, literature, black women's studies, art history, visual culture, music history, and sociology. The certificate offers students opportunities to engage in interdisciplinary study and practice that will complement their major and enhance their intellectual and creative participation in their chosen professions and as citizens in our global society.

HOW TO GET IN

To declare a certificate in Afro-American studies, students must be enrolled as an undergraduate at the University of Wisconsin–Madison. Interested students must contact the department's undergraduate adviser to declare the certificate and be assigned a faculty adviser in their area of interest. Students may not declare both the certificate and the major in Afro-American studies.

REQUIREMENTS

CERTIFICATE REQUIREMENTS

Certificate students must plan with a faculty adviser a cohesive program consisting of 15 credits chosen from undergraduate AFROAMER courses.

- At least one 3-credit course must focus on Afro-American history (see list below).
- A minimum of 9 credits must be completed from AFROAMER courses numbered 300–699.
- At least one 3-credit course must be advanced (AFROAMER 500–697).
- A maximum of 3 credits of directed study (AFROAMER 699) may count toward the certificate.
- Students may not substitute courses from other academic programs or subject listings to fulfill the requirements for this program.

Code	Title	Credits
All certificate students must take one 3-credit course in Afro-American history:		3
AFROAMER 231	Introduction to Afro-American History	
AFROAMER 272	Race and American Politics from the New Deal to the New Right	
AFROAMER 302	Undergraduate Studies in Afro-American History	
AFROAMER/HISTORY 321	Afro-American History Since 1900	
AFROAMER/HISTORY 322	Afro-American History to 1900	
AFROAMER/GEN&WS 324	Black Women in America: Reconstruction to the Present	
AFROAMER/GEN&WS 326	Race and Gender in Post-World War II U.S. Society	
AFROAMER/HISTORY 393	Slavery, Civil War, and Reconstruction, 1848-1877	
AFROAMER/GEN&WS 624	African American Women's Activism (19th & 20th Centuries)	
AFROAMER/GEN&WS 625	Gender, Race and the Civil Rights Movement	
AFROAMER/HISTORY 628	History of the Civil Rights Movement in the United States	
AFROAMER 631	Colloquium in Afro-American History	
AFROAMER 671	Selected Topics in Afro-American History	
AFROAMER electives to meet the minimum credit requirement for the certificate		12
Total Credits		15

RESIDENCE & QUALITY OF WORK

At least 8 credits must be taken in residence. Courses taken on a UW–Madison study abroad program are considered resident credits; however, study abroad courses must qualify as Afro-American studies credit.

A minimum 2.500 GPA in all courses eligible for the certificate is required. All certificate courses must be graded; credit/no credit and pass/fail do not qualify.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. To familiarize students with the history, culture and social conditions of African Americans in the United States.
2. To introduce students to an interdisciplinary approach to the study of race, gender, and ethnicity in America.
3. To prepare students for careers in institutions that address the needs of multicultural communities.

AMERICAN INDIAN STUDIES PROGRAM

The American Indian Studies Program seeks to provide and maintain the highest levels of education, scholarship, leadership, and support to all students, staff, and faculty at the university. As an integral part of the university, the program maintains a special focus on assisting and supporting American Indians in their educational endeavors. In addition to the commitment to the university community, the program provides consultation and services to numerous local, state, and national organizations.

It is the mission of the American Indian Studies Program to provide leadership to other university departments and programs in the pursuit of American Indian course development and scholarship. In addition, the program serves as a resource center and support for individuals who are interested in American Indian culture, history, research, and contemporary life.

AMERICAN INDIAN STUDIES, CERTIFICATE

CERTIFICATE IN AMERICAN INDIAN STUDIES

A certificate in American Indian studies is a way of giving recognition to students who have made a significant effort to learn about American Indian culture and the place of American Indians in American society. Students receiving a certificate will have the achievement officially recorded via transcript notation.

WHAT CAN I DO WITH A CERTIFICATE IN AMERICAN INDIAN STUDIES?

Students of American Indian studies go on to successful careers in administration, advising, academics, advocacy, the arts, business, community outreach, consulting, education, government, health or health education, journalism, library science, literacy programming, lobbying, management, politics, publishing, school counseling, social work, research, and many more.

HOW TO GET IN

To begin the certificate declaration process, students must submit the Certificate Program Application form to the American Indian Studies office. Students should contact the AIS certificate advisor to obtain the form and to obtain more details about the program. The certificate is open to Special students and undergraduate students regardless of the college of enrollment.

REQUIREMENTS

REQUIREMENTS FOR THE CERTIFICATE

15 total credits are required, as follows:

Code	Title	Credits
Introduction to American Indian Studies:		
AMER IND 100	Introduction to American Indian Studies	3
Complete four courses from at least two of the following areas:		12
<i>History</i>		
AMER IND/ ART HIST 359	American Indian Art History: Contemporary Issues	
AMER IND/ HISTORY 490	American Indian History	
<i>Literature and Media</i>		
AMER IND/ ENGL 172	Literatures of Native America

AMER IND/ SOC WORK 658	American Indian Affairs

Total Credits **15**

RESIDENCE AND QUALITY OF WORK

- Minimum 2.000 GPA on all certificate courses.
- 6 credits may be taken as pass/fail. All other credits must be taken for a letter grade.
- At least 8 certificate credits must be completed in residence.

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

LEARNING OUTCOMES

1. Apply knowledge and methods of inquiry characteristic of this interdisciplinary field.
2. Apply knowledge of historical precedents to contemporary issues.
3. Demonstrate knowledge of the creativity and ethos contained within the diverse ways of knowing (Indigenous Knowledge Systems) among American Indian nations and communities.
4. Apply knowledge of the effects (ongoing) of oppression and racism that American Indians experience.
5. Demonstrate knowledge of the contributions of American Indian value-belief systems and practical knowledge across all fields of human endeavor.

ADVISING AND CAREERS

Students are required to declare the American Indian studies (AIS) certificate. For academic advising regarding the certificate, students should contact the AIS certificate advisor to obtain more details about the certificate program and general academic advising. Contact Denise Wiyaka at denise.wiyaka@wisc.edu or request information by sending an email to ais@letsoci.wisc.edu. Students can also visit the AIS office at 316 Ingraham Hall.

ANTHROPOLOGY

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

ANTHROPOLOGY, B.A.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

Foreign Language	<ul style="list-style-type: none"> • Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language.
L&S Breadth	<ul style="list-style-type: none"> • 12 credits of Humanities, which must include 6 credits of literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced work	Complete at least 60 credits at the intermediate or advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	<ul style="list-style-type: none"> • 30 credits in residence, overall; and • 30 credits in residence after the 86th credit.

Quality of Work	<ul style="list-style-type: none"> • 2.000 in all coursework at UW–Madison • 2.000 in Intermediate/Advanced level coursework at UW–Madison
-----------------	--

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits
ANTHRO 105	Principles of Biological Anthropology	3
ANTHRO 300	Cultural Anthropology: Theory and Ethnography	3
<i>Complete two:</i>		6
ANTHRO 212	Principles of Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 490	Undergraduate Seminar	3
ANTHRO electives		15
Total Credits		30

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ANTHRO and major courses
- 2.000 GPA in 15 upper-level major credits in residence¹
- 15 credits in ANTHRO, taken on campus

¹ ANTHRO 300 and above are upper-level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361, ANTHRO/LACIS 362, ANTHRO/LACIS 363, ANTHRO/LACIS 364, ANTHRO/LACIS 376, ANTHRO/LACIS 377).

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Anthropology major advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the Anthropology major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all ANTHRO and major courses
- Complete the following coursework:

Code	Title	Credits
<i>Biological Anthropology (complete one):</i>		3
ANTHRO 105	Principles of Biological Anthropology	
ANTHRO 302	Hominoid Evolution	
ANTHRO 303	Human Skeletal Anatomy	
ANTHRO 304	Heredity, Environment and Human Populations

UNIVERSITY DEGREE REQUIREMENTS

Total Degree	To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency	Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.
Quality of Work	Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.

- Gain an awareness of ethnographic, archaeological and bio# anthropological ethics practice and research.
- Distinguish between empirical and speculative narratives and claims about human diversity past and present.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

First Year

Fall	Credits	Spring	Credits
ANTHRO 100-200 level course		3 ANTHRO 100-200 level course	3
Science Breadth		3 Ethnic Studies course in ANTHRO	3

ADVISING AND CAREERS

ADVISING

Students interested in anthropology and declaring the major should contact the department directly by calling the general number (608-262-2866) or stopping by 5240 William H. Sewell Social Science Building for individual advising.

CAREER EXPLORATION

Anthropology encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

ANTHROPOLOGY, B.S.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin–Madison, anthropology consists of three subfields: archaeology—the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology—the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology—the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW–Madison also offers some classes in anthropological linguistics—the analysis of language and its place in social life. Comparative and empirical work—and fieldwork in particular—are the hallmarks of anthropology on this campus.

Thus, anthropology at UW–Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

Foreign Language Complete the third unit of a foreign language.

L&S Breadth Complete:

- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.

Liberal Arts and Science Coursework Complete at least 108 credits.

Depth of Intermediate/Advanced Coursework Complete at least 60 credits at the Intermediate or Advanced level.

Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.

UW-Madison Experience Complete both:

- 30 credits in residence, overall, and
- 30 credits in residence after the 86th credit.

Quality of Work

- 2.000 in all coursework at UW–Madison
- 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Code	Title	Credits

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and bio# anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

First Year

Fall	Credits	Spring	Credits
ANTHRO 100-200 level course	3	ANTHRO 100-200 level course	3
Science Breadth	3	Ethnic Studies course in ANTHRO	3
Communication A	3	Literature Breadth	3

ADVISING AND CAREERS

ADVISING

Students interested in anthropology and declaring the major should contact the department directly by calling the general number (608-262-2866) or stopping by 5240 William H. Sewell Social Science Building for individual advising.

CAREER EXPLORATION

Anthropology encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters & Science. L&S graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

ARCHAEOLOGY, CERTIFICATE

The archaeology certificate is designed to help students to develop the knowledge and practical skills needed to analyze archaeological materials and to participate in archaeological field research. Students who complete the certificate, along with a B.A. or B.S. degree from UW–Madison, improve their competitiveness in graduate school applications and are qualified for entry-level employment opportunities in archaeology. In addition to providing a strong intellectual foundation in archaeology and hands-on experience in fieldwork, the certificate provides an interdisciplinary link to courses in three or more departments, exposing students to diverse approaches to the study of our global human heritage.

Ancient history is a puzzle made up of innumerable fragments—pieces of bone, pottery, stone, and metal; remnants of architecture and monuments; residues of food; and traces of other things. Archaeology is the field of study that provides the tools to discover these fragments and piece them together to reconstruct a picture of the ancient world and to illuminate the stories of past peoples. An accurate understanding of the past is critical for developing a better present and future.

Through their participation in the archaeology certificate program, students gain an appreciation of the diversity of human societies and a fuller understanding of the cultural processes that have resulted in the way that we live today. Students explore the origins of subsistence strategies, trade, technology, belief systems, and conflict that are relevant to understanding the human condition in our modern world.

For further information about the archaeology certificate, including a list of core faculty, please see the Department of Anthropology website (<https://www.anthropology.wisc.edu>).

HOW TO GET IN

To declare an archaeology certificate, should contact or visit the Department of Anthropology.

REQUIREMENTS

7 COURSES AND 21 CREDITS⁴

Credits must be distributed in at least three SUBJECTs, and must meet these requirements:

Introductory course

Code	Title	Credits
Complete one:		3
ANTHRO 102	Archaeology and the Prehistoric World	
ANTHRO 105	Principles of Biological Anthropology	

ANTHRO 212	Principles of Archaeology	
Total Credits		3

Area courses

Code	Title	Credits
Complete 6 credits from:		6
ANTHRO 309		
ANTHRO 310	Topics in Archaeology	
ANTHRO 321	The Emergence of Human Culture	
ANTHRO 322	The Origins of Civilization	
ANTHRO 333	Prehistory of Africa	
ANTHRO/ AMER IND 354	Archaeology of Wisconsin	
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
ART HIST 600	Special Topics in Art History ¹	
CLASSICS/ JEWISH 241	Introduction to Biblical Archaeology	
CLASSICS 320	The Greeks	
CLASSICS 322	The Romans	
CLASSICS/ JEWISH 452	Biblical Archaeology	
HISTORY 303	A History of Greek Civilization	
HISTORY 307	A History of Rome	
HISTORY 313		
HISTORY 377	History of Africa, 1500 to 1870	
Total Credits		6

¹ Must be an archaeology topic.

Methods

Code	Title	Credits
Complete 6 credits from:		6
ANTHRO 302	Hominoid Evolution	
ANTHRO 303	Human Skeletal Anatomy	
ANTHRO 311	Archaeological Chemistry	
ANTHRO 352	Ancient Technology and Invention	
ANTHRO 391	Bones for the Archaeologist	
ANTHRO 696	Archaeological Methods of Curation	
BOTANY 240	Plants and Humans	
ANTHRO/ BOTANY/ ZOOLOGY 410	Evolutionary Biology	
BOTANY/ AMER IND/ ANTHRO 474	Ethnobotany	

CLASSICS 430	Topics in Classical Archaeology
ENVIR ST/ ATM OCN/GEOG/ GEOSCI 335	Climatic Environments of the Past
ENVIR ST/ CIV ENGR/ GEOG 377	An Introduction to Geographic Information Systems
ENVIR ST/ CIV ENGR/G L E/ GEOSCI 444	Practical Applications of GPS Surveying
GEOG/ GEOSCI 320	Geomorphology
GEOG 329	Landforms and Landscapes of North America
GEOG 360	Quantitative Methods in Geographical Analysis
GEOG 370	Introduction to Cartography
GEOG/CIV ENGR/ ENVIR ST 377	An Introduction to Geographic Information Systems
GEOG/ GEOSCI 420	Glacial and Pleistocene Geology
GEOG 527	
GEOG/ATM OCN/ ENVIR ST 528	Past Climates and Climatic Change
GEOSCI 202	Introduction to Geologic Structures
GEOSCI/ GEOG 320	Geomorphology
GEOSCI/ GEOG 326	Landforms-Topics and Regions
GEOSCI/ GEOG 420	Glacial and Pleistocene Geology
GEOSCI 430	Sedimentology and Stratigraphy
GEOSCI/ CIV ENGR/ ENVIR ST/ G L E 444	Practical Applications of GPS Surveying
GEOSCI/G L E 594	Introduction to Applied Geophysics
ZOOLOGY/ ANTHRO/ BOTANY 410	Evolutionary Biology

Total Credits 6

Field course

Code	Title	Credits
ANTHRO 370	Field Course in Archaeology	3-6

Total Credits 3-6

Capstone

Code	Title	Credits
Choose from:		3-4
ANTHRO 352	Ancient Technology and Invention ²	
ANTHRO 490	Undergraduate Seminar ³	

Total Credits 3-4

² ANTHRO 352 can count either for a methods course or for the capstone course, but not both.

³ ANTHRO 490 is a Topics course. In order to meet the capstone requirement, it must be on an archaeology topic.

⁴ Courses taken Pass/Fail do not count.

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA on all certificate-approved courses

- At least 11 Certificate credits, taken in Residence

UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW–Madison (at least 12 credits) and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

LEARNING OUTCOMES

1. acquire specialized training in archaeological research, which may include: obtaining basic knowledge of and skills in observational methods and recording of information for a variety of lines of archaeological evidence, putting these abilities into practice in the classroom and outside of the classroom, developing research questions and the analytical skills necessary to address them, strengthening archaeological interpretations through critical thinking and reference to empirical evidence, gaining experience in considering a problem, synthesizing information from disparate sources, and evaluating contrasting arguments, being able to distinguish between empirical research and speculation, communicating archaeological findings through written and oral expression.
2. obtain comparative global knowledge of archaeology, material culture, and the evolution of people's relationships with the physical world.
3. become aware of the ethical practice of archaeology and heritage preservation.
4. synthesize information relevant to archaeological research across multiple disciplines.
5. gain an appreciation of cultural diversity through time and space.

ADVISING AND CAREERS

Students wishing to receive advising for the archaeology certificate should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building. The telephone number for the department is 608-262-2866.

ART HISTORY

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions, in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged.

ART HISTORY, B.A.

OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non–UW study abroad programs, the Office of Admissions and Recruitment. For more information, see the Study Abroad website (<http://www.studyabroad.wisc.edu/>).

HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (<https://arthistory.wisc.edu/academics/undergrad/advising/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as

needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	<ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

Foreign Language	<ul style="list-style-type: none"> • Complete the fourth unit of a foreign language; OR • Complete the third unit of a foreign language and the second unit of an additional foreign language.
L&S Breadth	<ul style="list-style-type: none"> • 12 credits of Humanities, which must include 6 credits of literature; and • 12 credits of Social Science; and • 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts and Science Coursework Complete at least 108 credits.

Depth of Intermediate/Advanced work Complete at least 60 credits at the intermediate or advanced level.

Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.

UW-Madison Experience

- 30 credits in residence, overall; and
- 30 credits in residence after the 86th credit.

Quality of Work

- 2.000 in all coursework at UW–Madison
- 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non-L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

- Complete the fourth unit of a foreign language; *or*
- Complete the third unit of a foreign language *and* the second unit of an additional foreign language.

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

200-level ART HIST (two required)

Code	Title	Credits
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 203	Survey of Asian Art	
ART HIST 205	Global Arts	
ART HIST 210	A History of the World in 20 Buildings	
ART HIST 227	The Ends of Modernism	
ART HIST/AFROAMER 241	Introduction to African Art and Architecture	
ART HIST/ANTHRO/DS/HISTORY/LAND ARC 264	Dimensions of Material Culture	

300-level ART HIST (three required)

Code	Title	Credits
ART HIST/CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST 301	Myths, Loves, and Lives in Greek Vases	
ART HIST 302	Greek Sculpture	
ART HIST 303	Topics in Art History	
ART HIST/CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	
ART HIST 308	The Tastes of Scholars and Emperors: Chinese Art in the Later Periods	

ART HIST 310	Icons, Religion, and Empire: Early Christian and Byzantine Art, ca. 200-1453
ART HIST 318	Romanesque and Gothic Art and Architecture
ART HIST 320	Italian Renaissance Art
ART HIST 321	
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel
ART HIST 332	
ART HIST 335	Study Abroad in Ancient/Medieval Art
ART HIST 336	Study Abroad in Renaissance/Baroque/Northern Art
ART HIST 337	Study Abroad in 18th-20th Century Art
ART HIST 338	Study Abroad in African/Asian Art
ART HIST 341	Italian Baroque Art
ART HIST 346	British Art and Society from the Eighteenth Century to the Present
ART HIST 350	19th Century Painting in Europe
ART HIST 351	20th Century Art in Europe
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present
ART HIST 355	History of Photography
ART HIST 357	History of Wisconsin Architecture, 1800-present
ART HIST/ AMER IND 359	American Indian Art History: Contemporary Issues
ART HIST 360	Gore Luxury Identity Mimesis: Northern Renaissance
ART HIST/DS 363	American Decorative Arts and Interiors: 1620-1840
ART HIST 364	History of American Art: Art, Material Culture, and Constructions of Identity, 1607-present

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence²
- 15 credits in ART HIST taken on the UW–Madison campus
- AP Art History credits may count toward the nine (9) course minimum for the Art History major but not toward the 200-level requirement

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year

FOOTNOTES

¹ Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of those areas. Students with questions should consult the academic advisor for this program.

² ART HIST courses numbered 300-699 are considered upper-level in the major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such as form, color, light, proportion, viewpoint, material, and narrative structure.
2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

First Year

Fall	Credits	Spring	Credits

Total Credits 120**ADVISING AND CAREERS****ADVISING**

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options. We also work closely with SuccessWorks at the College of Letters & Science to help students best apply the knowledge and skills acquired in the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors—as well as from L&S Advising—about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters & Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

Notes about the major requirements:

- Art History AP credits with a score of 4 or higher and 100-level Art History courses count only toward the nine-course minimum but do not count toward distribution requirements.
- Courses at the 200 level count only toward the nine-course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).

- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: **1.** 300 level *AND* **2.** Chronological—either Ancient to Medieval or Early Modern *AND* **3.** Geographic—either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements, even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one area of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

Career Resources:**L&S CAREER RESOURCES**

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

Art History Department Resources

- Art History professional development webpage (<https://arthistory.wisc.edu/undergraduate-program/#professional-development>)
- Why major in Art History? (<https://arthistory.wisc.edu/undergraduate-program/#about-the-major>)
- Art History majors discuss the value of the degree (<https://arthistory.wisc.edu/undergraduate-program/#testimonials>)
- Art History's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

This directed study may serve as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print or online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3-credit internship, the student must average approximately twelve hours a week throughout the semester, including working at the host institution on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of one hour each month. Requires permission to work with faculty member to receive credit for internship project. 1–3 cr.

WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

ART HISTORY, B.S.

OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing, and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non–UW study abroad programs, the Office of Admissions and Recruitment. For more information, see the Study Abroad website (<http://www.studyabroad.wisc.edu/>).

HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the

director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (<https://arthistory.wisc.edu/academics/undergrad/advising/>).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

Foreign Language Complete the third unit of a foreign language.

L&S Breadth Complete:

- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.

Liberal Arts and Science Coursework	Complete at least 108 credits.
Depth of Intermediate/Advanced Coursework	Complete at least 60 credits at the Intermediate or Advanced level.
Major	Declare and complete at least one major.
Total Credits	Complete at least 120 credits.
UW-Madison Experience	Complete both: <ul style="list-style-type: none"> • 30 credits in residence, overall, and • 30 credits in residence after the 86th credit.
Quality of Work	<ul style="list-style-type: none"> • 2.000 in all coursework at UW–Madison • 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

- Complete the fourth unit of a foreign language; **or**
- Complete the third unit of a foreign language **and** the second unit of an additional foreign language.

LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

200-level ART HIST (two required)

Code	Title	Credits
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	
ART HIST 203	Survey of Asian Art	
ART HIST 205	Global Arts	
ART HIST 210	A History of the World in 20 Buildings	
ART HIST 227	The Ends of Modernism	
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	
ART HIST/ ANTHRO/DS/ HISTORY/ LAND ARC 264	Dimensions of Material Culture	

300-level ART HIST (three required)

Code	Title	Credits
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	
ART HIST 301	Myths, Loves, and Lives in Greek Vases	
ART HIST 302	Greek Sculpture	
ART HIST 303	Topics in Art History	
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	
ART HIST 305	History of Islamic Art and Architecture	
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	
ART HIST 308	The Tastes of Scholars and Emperors: Chinese Art in the Later Periods	
ART HIST 310	Icons, Religion, and Empire: Early Christian and Byzantine Art, ca. 200-1453	
ART HIST 318	Romanesque and Gothic Art and Architecture	
ART HIST 320	Italian Renaissance Art	
ART HIST 321		
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500	
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy	
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel	
ART HIST 332		
ART HIST 335	Study Abroad in Ancient/Medieval Art	
ART HIST 336	Study Abroad in Renaissance/Baroque/Northern Art	
ART HIST 337	Study Abroad in 18th-20th Century Art	
ART HIST 338	Study Abroad in African/Asian Art	
ART HIST 341	Italian Baroque Art	
ART HIST 346	British Art and Society from the Eighteenth Century to the Present	
ART HIST 350	19th Century Painting in Europe	
ART HIST 351	20th Century Art in Europe	
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	
ART HIST 355	History of Photography	
ART HIST 357	History of Wisconsin Architecture, 1800-present	
ART HIST/ AMER IND 359	American Indian Art History: Contemporary Issues	
ART HIST 360	Gore Luxury Identity Mimesis: Northern Renaissance	
ART HIST/DS 363	American Decorative Arts and Interiors: 1620-1840	

ART HIST 364 History of American Art: Art, Material Culture, and Constructions of Identity, 1607-present

ART HIST 365 The Concept of Contemporary Art

ART HIST 368

ART HIST 371

ART HIST 372 Arts of Japan

ART HIST/
RELIG ST 373 Great Cities of Islam

ART HIST 375 Later Japanese Painting and Woodblock Prints

ART HIST/
ASIAN 379 Cities of Asia

400-level ART HIST (two required)

Code	Title	Credits
ART HIST 403	Topics in Art History	
ART HIST 405	Cities and Sanctuaries of Ancient Greece	
ART HIST 407	Topics in Nineteenth Century Art	
ART HIST 408	Topics in Twentieth-Century Art	
ART HIST 409	Topics in Contemporary Art	
ART HIST 411	Topics in Asian Art	
ART HIST 412	Topics in African and African Diaspora Art History	
ART HIST 413	Art and Architecture in the Age of the Caliphs	
ART HIST/ MEDIEVAL 415	Topics in Medieval Art	
ART HIST 420	Topics in Italian Renaissance Art	
ART HIST 425	Race and Gender in Italian Early Modern Art	
ART HIST/ ASIAN 428	Visual Cultures of India	
ART HIST 430	Topics in Visual Culture	
ART HIST 431	Topics in Theory	
ART HIST 435	Study Abroad in Ancient/Medieval Art	
ART HIST 436	Study Abroad in Renaissance/Baroque/Northern Art	
ART HIST 437	Study Abroad in 18th-20th Century Art	
ART HIST 438	Study Abroad in African/Asian Art	
ART HIST 440	Art and Power in the Arab World	
ART HIST 449	Topics in Architectural History	
ART HIST 454	Art in Germany, 1900-1945	
ART HIST 457	History of American Vernacular Architecture and Landscapes	
ART HIST 463		
ART HIST/DS/ HISTORY 464	Dimensions of Material Culture	
ART HIST 468	Frank Lloyd Wright	
ART HIST 469	Interdisciplinary Studies in the Arts	
ART HIST 475	Japanese Ceramics and Allied Arts	

ART HIST/ RELIG ST 478	Art and Religious Practice in Medieval Japan	
ART HIST 479	Art and History in Africa	
ART HIST 601	Introduction to Museum Studies I	
ART HIST 602	Introduction to Museum Studies II	
ART HIST 603	Curatorial Studies Colloquium	

500-level ART HIST (one required)

Code	Title	Credits
ART HIST 500	Proseminar: Special Topics in Art History	
ART HIST 505	Proseminar in Ancient Art	
ART HIST 506	Curatorial Studies Exhibition Practice	
ART HIST 515	Proseminar in Medieval Art	
ART HIST 525	Proseminar in Italian Renaissance Art	
ART HIST 535	Proseminar in Northern European Painting	
ART HIST 555	Proseminar in 19th Century European Art	
ART HIST 556	Proseminar in 20th Century European Art	
ART HIST 563	Proseminar in Material Culture	
ART HIST 565

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence²
- 15 credits in ART HIST taken on the UW–Madison campus
- AP Art History credits may count toward the nine (9) course minimum for the Art History major but not toward the 200-level requirement

HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year

FOOTNOTES

¹ Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of those areas. Students with questions should consult the academic advisor for this program.

² ART HIST courses numbered 300-699 are considered upper-level in the major.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such as form, color, light, proportion, viewpoint, material, and narrative structure.
2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

First Year

Total Credits 120**ADVISING AND CAREERS****ADVISING**

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options. We also work closely with SuccessWorks at the College of Letters & Science to help students best apply the knowledge and skills acquired in the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors—as well as from L&S Advising—about career paths and internships; preparation for the job search; and applying to

graduate school. Both the department and L&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters & Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

Notes about the major requirements:

- Art History AP credits with a score of 4 or higher and 100-level Art History courses count only toward the nine-course minimum but do not count toward distribution requirements.
- Courses at the 200 level count only toward the nine-course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: **1.** 300 level *AND* **2.** Chronological—either Ancient to Medieval or Early Modern *AND* **3.** Geographic—either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements, even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one area of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

Career Resources:**L&S CAREER RESOURCES**

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

Art History Department Resources

- Art History professional development webpage (<https://arthistory.wisc.edu/undergraduate-program/#professional-development>)
- Why major in Art History? (<https://arthistory.wisc.edu/undergraduate-program/#about-the-major>)
- Art History majors discuss the value of the degree (<https://arthistory.wisc.edu/undergraduate-program/#testimonials>)
- Art History's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

This directed study may serve as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print or online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3-credit internship, the student must average approximately twelve hours a week throughout the semester, including working at the host institution on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of one hour each month. Requires

permission to work with faculty member to receive credit for internship project. 1–3 cr.

WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

ART HISTORY, CERTIFICATE

The art history certificate requires four courses and is open to any undergraduate major.

The certificate is designed to meet twenty-first century needs by promoting visual literacy in an increasingly visual world. Our classes teach critical and creative approaches to analysis, problem-solving, writing, and visual communication using a variety of artistic media, including painting, sculpture, architecture, photography, prints, ephemera, and the decorative arts.

Students earning the certificate will hone skills in visual analysis and interpretation that make them more competitive in a variety of today's fields of employment, including (but not limited to) professions in the

arts, in social sciences, and in physical sciences—all of which require the skills taught in our courses.

Important Notes:

- Students who are thinking about declaring the Art History Certificate as well as the Material Culture Certificate: Undergraduate students may request permission to complete both the Art History Certificate and the Material Culture Certificate but **only one course** may overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.
- Only one transfer course from another institution may be counted toward the Art History Certificate. (This does not include UW–Madison study abroad programs for which courses taken in these programs are considered “in residence.”)
- AP credits may count toward the “Electives” course requirement for the Art History Certificate.

HOW TO GET IN

Students are eligible to declare the certificate at any point in their studies. We encourage students to declare as early as possible in order to plan their required coursework. Students should contact the undergraduate advisor to declare the certificate.

Students thinking about declaring the Art History Certificate as well as the Material Culture Certificate: Undergraduate students may request permission to complete both the Art History Certificate and the Material Culture Certificate but **only one course** can overlap between the two certificates. Please consult with the undergraduate advisor with any questions.

Students enrolled in the Art History major may not enroll in the Certificate.

REQUIREMENTS

REQUIREMENTS FOR THE CERTIFICATE

Four courses and 12 credits are required, as follows:

INTERMEDIATE SURVEY COURSE

Code	Title	Credits
Complete one:		
ART HIST/ CLASSICS 300	The Art and Archaeology of Ancient Greece	3-4
ART HIST 301	Myths, Loves, and Lives in Greek Vases	3-4
ART HIST 302	Greek Sculpture	3-4
ART HIST 303	Topics in Art History	3
ART HIST/ CLASSICS 304	The Art and Archaeology of Ancient Rome	3-4
ART HIST 305	History of Islamic Art and Architecture	3
ART HIST 307	From Tomb to Temple: Ancient Chinese Art and Religion in Transition	3

ART HIST 308	The Tastes of Scholars and Emperors: Chinese Art in the Later Periods	3
ART HIST 310	Icons, Religion, and Empire: Early Christian and Byzantine Art, ca. 200-1453	3
ART HIST 318	Romanesque and Gothic Art and Architecture	3-4
ART HIST 320	Italian Renaissance Art	3-4
ART HIST 322	Italian Art from Donatello to Leonardo da Vinci, 1400-1500	3-4
ART HIST 323	From Michelangelo & Raphael to Titian: The Arts in 16th Century Italy	3-4
ART HIST 331	Angels, Demons, and Nudes: Early Netherlandish Painting from Bosch to Bruegel	3-4
ART HIST 335	Study Abroad in Ancient/Medieval Art	1-6
ART HIST 336	Study Abroad in Renaissance/Baroque/Northern Art	1-6
ART HIST 337	Study Abroad in 18th-20th Century Art	1-6
ART HIST 338	Study Abroad in African/Asian Art	1-6
ART HIST 341	Italian Baroque Art	3-4
ART HIST 346	British Art and Society from the Eighteenth Century to the Present	3-4
ART HIST 350	19th Century Painting in Europe	3-4
ART HIST 351	20th Century Art in Europe	3-4
ART HIST 354	Cross-Cultural Arts Around the Atlantic Rim: 1800 to the Present	3-4
ART HIST 355	History of Photography	3
ART HIST 357	History of Wisconsin Architecture, 1800-present	3
ART HIST/ AMER IND 359	American Indian Art History: Contemporary Issues	3
ART HIST 360	Gore Luxury Identity Mimesis: Northern Renaissance	3
ART HIST/DS 363	American Decorative Arts and Interiors: 1620-1840	3-4
ART HIST 364	History of American Art: Art, Material Culture, and Constructions of Identity, 1607-present	3-4
ART HIST 365	The Concept of Contemporary Art	3-4
ART HIST 372	Arts of Japan	3-4
ART HIST/ RELIG ST 373	Great Cities of Islam	3
ART HIST 375	Later Japanese Painting and Woodblock Prints	3-4
ART HIST/ ASIAN 379	Cities of Asia	3

AREA FOCUS

Code	Title	Credits
Complete one:		
ART HIST 403	Topics in Art History	3

ART HIST 405	Cities and Sanctuaries of Ancient Greece	3	ART HIST 505	Proseminar in Ancient Art	3
ART HIST 407	Topics in Nineteenth Century Art	3-4	ART HIST 506	Curatorial Studies Exhibition Practice	3
ART HIST 408	Topics in Twentieth-Century Art	3-4	ART HIST 515	Proseminar in Medieval Art	3
ART HIST 409	Topics in Contemporary Art	3	ART HIST 525	Proseminar in Italian Renaissance Art	3
ART HIST 411	Topics in Asian Art	3-4	ART HIST 535	Proseminar in Northern European Painting	3
ART HIST 412	Topics in African and African Diaspora Art History	3-4	ART HIST 555	Proseminar in 19th Century European Art	3
ART HIST 413	Art and Architecture in the Age of the Caliphs	3	ART HIST 556	Proseminar in 20th Century European Art	3

ART HIST 575	Proseminar in Japanese Art	3
ART HIST 576	Proseminar in Chinese Art	3
ART HIST 579	Proseminar in African Art	3

ELECTIVES

To attain the minimum 4 courses and 12 credits, complete any course listed above not needed for the area requirements, or any of the courses in the list below. AP credits may count toward the "Electives" course requirement for the Art History Certificate.

Code	Title	Credits
ART HIST 103	Topics in Art History	3-4
ART HIST 104	The Art of Diversity: Race and Representation in the Art and Visual Culture of the United States	3-4
ART HIST 105	Introductory Topics in Art History	3
ART HIST 201	History of Western Art I: From Pyramids to Cathedrals	4
ART HIST 202	History of Western Art II: From Renaissance to Contemporary	4
ART HIST 203	Survey of Asian Art	3-4
ART HIST 205	Global Arts	4
ART HIST 206	Survey of Photography: 1839 to 1989	3-4
ART HIST 210	A History of the World in 20 Buildings	3
ART HIST 227	The Ends of Modernism	4
ART HIST/ AFROAMER 241	Introduction to African Art and Architecture	3
ART HIST/ AFROAMER 242	Introduction to Afro-American Art	3
ART HIST 681	Senior Honors Thesis	3
ART HIST 682	Senior Honors Thesis	3
ART HIST 691	Senior Thesis	3-6
ART HIST 692	Senior Thesis	3-6
ART HIST 697	Undergraduate Curatorial Studies Internship (Directed Study)	1-3
ART HIST 698	Directed Study	2-3
ART HIST 699	Directed Study	1-3

RESIDENCE AND QUALITY OF WORK

- At least 6 Certificate credits must be earned in residence
- A 2.000 GPA is required in all courses approved for the certificate

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Describe objects and images accurately; identify different stylistic characteristics and media; recall artists and art movements; analyze images.
2. Interpret art in context of deeper historical knowledge of specific cultures, acquire critical reading skills, integrate research.
3. Apply critical reading and writing skills, produce original interpretations, make plausible arguments based on visual and historical evidence, acquire sophisticated research abilities; formal oral presentation skills.

ADVISING AND CAREERS

Advising questions may be directed to the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), or the director of undergraduate studies in the department.

Each fall, the department hosts an Art History Majors and Career Fair for majors and certificate students as well as anyone interested in the field. We discuss course opportunities and internships on campus and in the community. We also invite alumni to speak about their career paths. Our director of undergraduate studies also hosts a workshop on "How to Apply to Graduate School" each fall. We also work with SuccessWorks (<https://careers.ls.wisc.edu/>) to organize events for our students.

PEOPLE

PEOPLE

Professors Andrzejewski, Cahill, Casid, Chopra, Dale, Marshall, Martin, Rosenblum (chair)

Associate Professors Li, Phillips-Court, Pruitt

Assistant Professors Nelson, Spaulding

Affiliate Professors Aylward, Clark, Kern, Moskowitz, Nadler, Wolf

Affiliate Associate Professor Abdu'Allah

Affiliate Assistant Professors Campbell, Carter

MATERIAL CULTURE STUDIES, CERTIFICATE

The certificate in material culture studies has two interrelated goals. First, students will become acquainted with the field of material culture studies and its methodologies. They will learn what kinds of objects are considered in the study of material culture (from small, intimate

artifacts of daily life to large cultural landscapes) and how scholars and professionals from different fields and in different contexts enlist material culture in their research and activities. They will gain an appreciation for the information artifacts can provide. They will learn the kinds of questions that can be asked of objects and the kind of information that artifacts can show us. They will become familiar with (and able to distinguish between) descriptive and interpretive components of material culture study, and gain an awareness of the variety of methods. Second, students will gain an appreciation for the ways that "things" help us to connect to the world and see it in a new way, and the ways "things" give meaning to our lives and the lives of those around us.

Note for students who are thinking about declaring the material culture certificate as well as the art history certificate: Undergraduate students may request permission to complete both the material culture certificate and the art history certificate but **only one course** can overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.

HOW TO GET IN

Students are required to declare the material culture studies certificate with the program's certificate faculty director, Professor Ann Smart Martin, or the undergraduate program advisor in the Department of Art History, Teddy Kaul. Students are strongly urged to meet with the faculty director, or the undergraduate advisor, at their earliest convenience to declare the certificate.

Professor Smart Martin can be reached at asmartin@wisc.edu or by phone at 608-263-5684 to set up an appointment. Teddy Kaul is located in the Conrad A. Elvehjem Building in room 222; he can be reached at ejkaul@wisc.edu, or by phone at 608-263-2373, to set up an appointment.

*Note for students who are thinking about declaring the Material Culture Certificate as well as the Art History Certificate: Undergraduate students may request permission to complete both the Material Culture certificate and the Art History certificate but **only one course** can overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.

REQUIREMENTS

CERTIFICATE REQUIREMENTS

The Material Culture Studies Certificate Program requires that students complete **13 credits**, which includes the two core courses and two elective courses from the list below. An internship/practicum experience is recommended, but not required.

GOAL OF CERTIFICATE REQUIREMENTS

The goal of the certificate requirements is to provide students with a set of interdisciplinary skills, including the development of visual literacy, and an understanding of specific methods and theories of material culture analysis as they are most often practiced. A student might select electives to specialize in a particular geographic area of study or type of object, or to provide maximum depth in a certain period of time.

QUALITY OF WORK AND RESIDENCY REQUIREMENTS

A cumulative 2.000 GPA required for all certificate coursework.
7 credits, counting for the certificate, taken in residence at UW–Madison.

Code	Title	Credits			
Core Courses (select two):			ART HIST 602	Introduction to Museum Studies II (Must complete both 601 & 602)	3
ART HIST/ANTHRO/ DS/HISTORY/ LAND ARC 264	Dimensions of Material Culture ¹	4	ART HIST/HISTORY/ JOURN/L I S 650	History of Books and Print Culture in Europe and North America	3

ART HIST 506	Curatorial Studies Exhibition Practice (Both 601 & 602)	3	THEATRE 327	History of Costume for the Stage	3
ART HIST 601	Introduction to Museum Studies I (Must complete both 601 & 602)	3			

¹ Prerequisite: no prerequisites. Course is rotated among teams of two faculty members from the core material culture staff. The course explores the field of material culture, introducing the range of approaches and topics within it. Faculty, staff, and professionals from different disciplines and fields are invited to discuss their work and perspective, and discuss current literature.

² The intent of this requirement is to have an intensive small-size seminar to teach the methods used by material culture scholars, a

set of tools for analysis, hands-on training and more familiarity with material culture theories, themes and objects.

- 3 Choices should be clustered around a focus. For example, one strategy is to take a range of courses related to a specific geographic area, specialization, or time period. Other students may choose to pursue a cluster of courses that emphasizes nationally emerging specializations within the field of material culture including courses related to museums/exhibitions, historic preservation, archival technology, or product design. Students should work with a material culture faculty member to develop this focus. Other courses can be selected as electives from traditional disciplinary approaches and content, but must be approved by the chair of the Material Culture Advisory Committee. Students must work closely with both their advisor within their home major and an advisor among material culture advisors to assure that both major and certificate requirements are fulfilled.

CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

LEARNING OUTCOMES

1. Acquisition of skills to describe and analyze objects of multiple types, scales and media that constitute the material world across time and space.
2. Understanding of the complex and multiple ways that objects and people relate in both the past and in the present using trans-disciplinary perspectives.
3. Ability to interpret and otherwise make meaning from objects using methods and theories from multiple disciplines including but not limited to art history, archaeology, anthropology, design, folklore/folklife studies, geography, history, literary studies, landscape history, and science studies.
4. Discernment of the importance of materiality and making in the production and shaping of culture.
5. Fluency in using research resources and tools appropriate for specific kinds of objects.
6. Demonstration of particular skills for object-based research projects, as well as online and in-person exhibitions, using objects and collections to prepare students for careers that include positions in museums, archives, and other professional contexts.
7. Coherent presentation of ideas in multiple media (oral, visual, digital, and written).

ADVISING AND CAREERS

ADVISING

All students should contact the certificate's faculty director (Professor Ann Smart Martin, 205 Conrad A. Elvehjem Building; asmartin@wisc.edu (asmartin@wisc.edu) 608-263-5684) at or near the beginning of work on the certificate. Students should work with the director to outline their course of study and discuss their interests. After a plan is in place, students are encouraged to stay in regular contact with the undergraduate program advisor (Teddy Kaul, 222 Conrad A. Elvehjem

Building; ejkaul@wisc.edu; 608-263-2373) as they continue through the program. Each term the program's director or advisor will contact all certificate students, asking those nearing completion of their certificate coursework to send a notification that includes an estimate of when they will be completing the certificate requirements. For more information about the certificate and contact information for the advisor, see the program website (<http://materialculture.wisc.edu>).

CAREERS: WHAT CAN MATERIAL CULTURE DO FOR YOU? LIFE-PRACTICE AND CAREERS

Interdisciplinary practice is central to material culture analysis. Significant engagement with material culture can have a noteworthy positive effect on students from a wide range of majors in their preparation for future careers. Understanding principles of design, analyzing the cultural meaning of physical objects, and gaining knowledge of varied systems of making, distributing, and using artifacts and consumer goods throughout history are all broadly applicable learning outcomes. The curricula of the 21st century often place extra value on science and technology, to the detriment of the study of the arts and humanities. The Material Culture Program helps integrate these and other disparate spheres into a university education. One undergraduate student summed it thus:

I ended up being able to use what I learned in material culture for my research in human computer interaction and design. I think having a background in material culture strengthened my skills as a user experience designer (which is what I will be doing at Intel after graduation).

Erica Lewis, 2016
Undergraduate certificate student
Engineering/Materials Design

Other material culture certificate holders have gone on to careers in museums, galleries, historic sites, historic preservation, digital media, design practice, universities, and business. Another former student comments:

Having worked in museums large and small, in education, exhibition design and development, collections, and interpretation—I draw on my background in Material Culture on a daily basis. As a historian, the practice of reading and contextualizing objects as primary sources is essential. But even more than an academic approach, the empathy one develops when learning to understand the world through the stuff of daily life is invaluable to the interdisciplinary collaboration of today's workplace.

Anna Altschwager, 2004
Assistant Director, Guest Experience
Old World Wisconsin

ASIAN AMERICAN STUDIES PROGRAM

The Asian American Studies Program is an interdisciplinary program that focuses on the scholarship and experiences of Americans, Pacific Islanders, and immigrants to the United States from Asian heritage groups. The program sheds light on Asian American experiences and

concerns, both historically and in contemporary society. The certificate in Asian American studies provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, communities, and culture. The program also serves as a teaching and resource center not only for Asian Americans but for the University and Madison community as a whole.

Courses offered by the program and through other departments incorporate the perspective of a variety of disciplines: anthropology, communication arts, cultural studies, dance, education, English, ethnic studies, film, history, human development and family studies, journalism, literature, media, political science, popular culture, psychology, sociology, theatre, and visual arts. New course topics are introduced each year. Examples of past topics include: Asian American History, Asian American Literature, Asian American Women Writers, Asian Americans in the Midwest, Hmong American Studies, Contemporary Legal Issues in Asian American Communities, Mixed Race Asian Americans, Asian American Cultural Politics, Southeast Asian Americans in US Schools, Asian American Dance, Asian Americans & Media, Afro-Asian Improvisational Dance, Psychology of Hmong Americans, and community-based research and service-learning courses.

All program courses fulfill the ethnic studies requirement and breadth requirements in the appropriate divisions.

ASIAN AMERICAN STUDIES, CERTIFICATE

The Asian American Studies Certificate Program provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, history, literature, culture, and social concerns. Interdisciplinary in nature, the certificate can be obtained by completing 12 credits of coursework.

HOW TO GET IN

For more information or to declare a certificate, please contact the Asian American Studies Program asianamerican@letscli.wisc.edu.

REQUIREMENTS

REQUIREMENTS FOR THE CERTIFICATE

The Asian American Studies Certificate Program provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, history, literature, culture, and social concerns. Interdisciplinary in nature, the certificate can be obtained by completing 12 credits of coursework.

12 CREDITS ARE REQUIRED, TO INCLUDE:

Code	Title	Credits
ASIAN AM 101	Introduction to Asian American Studies	3
ASIAN AM/ AFROAMER/ AMER IND/CHICLA/ FOLKLORE 102	Introduction to Comparative US Ethnic and American Indian Studies	3

ASIAN LANGUAGES AND CULTURES

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades, Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures (ALC) offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

STARTING COURSEWORK TOWARD THE MAJOR

Students may declare the Asian Languages and Cultures major at any time. Before declaring the major, students may begin coursework to explore the language and fields of interest. Those students who have studied an Asian language prior to coming to UW–Madison will have to take a placement test (<https://alc.wisc.edu/languages/placement-tests/>) for a language offered during the academic year to determine the best class to enroll in on campus.

Code	Title	Credits
The courses noted below are open to freshman and have no prerequisites:		
ASIAN 100	Gateway to Asia: Special Topics	3-4

STUDY ABROAD

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all US institutions, and #16 among all US universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (<https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/>).

Currently there are 60 study abroad programs across Asia. Students who participate in approved programs will receive residence credit for study abroad. More information about study abroad, application process, and costs is available through International Academic Programs (<https://www.studyabroad.wisc.edu/>). With pre-planning, students may fulfill major requirements during study abroad. It is important to meet with the undergraduate advisor to create a study plan.

Students can also gain professional experience through various internship opportunities abroad. More information about internship opportunities is available through International Internship Programs (<http://internships.international.wisc.edu/>).

PEOPLE

FACULTY

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialties cover a wide range of subject areas, including: medical humanities in India; the Hindu roots of yoga; inflecting contemporary mindfulness practice with insights from Tibetan Buddhism; human rights in Thailand; Chinese ghost stories, traditional Sinology, and mathematically inflected Chinese philology; sociolinguistics, discourse analysis, and pragmatics in Mandarin, Japanese, Korean, and Indonesian; critical reading of late-Heian tale fiction, early modern Japanese comedic narratives, and haiku; and manga, anime, and Japanese counterculture.

EAST ASIA

Jaerin Ahn (<https://alc.wisc.edu/staff/ahn-jaerin/>) (Faculty Associate). Area: Korean Language

Charo D'Etcheverry (<http://alc.wisc.edu/about/faculty/charo-detcheverry/>) (Professor). Area: Classical Japanese Literature

Anatoly Detwyler (<https://alc.wisc.edu/staff/anatoly-detwyler/>) (Assistant Professor). Area: Modern Chinese Literature and History, Comparative New Media, Information Studies

Naomi Geyer (<http://alc.wisc.edu/about/faculty/naomi-geyer/>) (Associate Professor). Area: Japanese Language

Rania Huntington (<http://alc.wisc.edu/about/faculty/rania-huntington/>) (Professor). Area: Ming and Qing Narrative and Drama, Chinese Literature of the weird and supernatural

Adam L. Kern (<http://alc.wisc.edu/about/faculty/adam-l-kern/>) (Professor). Area: Popular Literature, Culture, Poetry, Theater, and Visual Culture of early modern-modern Japan

Hieyoon Kim (<https://alc.wisc.edu/staff/hieyoon-kim/>) (Assistant Professor). Area: dissident culture; postcolonial archive and historiography; Korean and East Asian cinema and popular culture

Byung-jin Lim (<http://alc.wisc.edu/about/faculty/byung-jin-lim/>) (Associate Professor). Area: Korean Language and Linguistics, Second / Foreign Language Acquisition, Korean Language Textbook Development

Junko Mori (<http://alc.wisc.edu/about/faculty/steve-ridgely/>) (Professor). Area: Japanese Linguistics, Applied Linguistics, Sociolinguistics

Takako Nakakubo (<http://alc.wisc.edu/about/faculty/takako-nakakubo/>) (Faculty Associate). Area: Second Language Acquisition of Japanese, Japanese Pedagogy

Steve Ridgely (<http://alc.wisc.edu/about/faculty/steve-ridgely/>) (Associate Professor). Area: Modern Japanese Literature, Pop culture, TransAsian studies

Hongming Zhang (<http://alc.wisc.edu/about/faculty/hongming-zhang/>) (Professor). Area: Chinese Linguistics; History of Chinese Language; Teaching Chinese as a Second Language

Tianlu Zhang (<https://alc.wisc.edu/staff/zhang-tianlu/>) (Faculty Associate). Area: Chinese Language

Weihua Zhu (<http://alc.wisc.edu/about/faculty/weihua-zhu/>) (Associate Professor). Area: Chinese Language, Pedagogy and Second Language Acquisition

SOUTH ASIA

Gudrun Bühnemann (<http://alc.wisc.edu/about/faculty/gudrun-b%C3%BChnemann/>) (Professor). Area: Sanskrit Language and Literature; Buddhism in India and Nepal; Hinduism; Tantrism; Yoga Studies

Anthony Cerulli (<http://alc.wisc.edu/about/faculty/anthony-cerulli/>) (Associate Professor). Area: Theory and Method in the Study of Religion in South Asia; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture; Malayalam Language

John D. Dunne (<http://alc.wisc.edu/about/faculty/john-d-dunne/>) (Professor). Area: Buddhist Philosophy and Contemplative Practice; Religious Studies; Cognitive Science of Religion

Jamal Jones (<https://alc.wisc.edu/staff/jones-jamal/>) (Assistant Professor). Area: Sanskrit and Telugu Literature in pre Modern south India.

SOUTHEAST ASIA

Erlin Barnard (<http://alc.wisc.edu/about/faculty/erlin-barnard/>) (Faculty Associate). Area: Indonesian Language, Language Pedagogy; Materials Development; Second Language Acquisition

Tyrell Haberkorn (<https://alc.wisc.edu/staff/tyrell-haberkorn-2/>) (Professor). Area: Violence, Human Rights, Sovereignty, Arbitrary Detention, Land Rights, Agrarian Struggle, Historiographies of Repression, Gender Studies, Socialism, Dissident Literature, Southeast Asia (Thailand)

LANGUAGE INSTRUCTORS

Language instructors (<http://alc.wisc.edu/about/language-instructors/>) are an integral part of our department, teaching more than 14 languages during the academic year from East (Chinese, Japanese, Korean), South (Hindi, Persian, Sanskrit, Tibetan, Urdu), and Southeast (Burmese, Filipino, Hmong, Indonesian, Thai, Vietnamese) Asian Languages.

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (<https://flas.wisc.edu/>)

FLAS fellowships are funded by the US Department of Education and administered by UW–Madison’s National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (<https://flas.wisc.edu/Languages.html>) and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (<https://flas.wisc.edu/Languages.html>) of your chosen language.

Applicants must be US citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Scholarships@UW–Madison (<https://scholarships.wisc.edu/Scholarships/>)

This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>)

We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (<https://awards.advising.wisc.edu/scholarships/nationally-competitive/>) and campus-wide awards (<https://awards.advising.wisc.edu/scholarships/campus-wide/>) for research, service, and leadership—activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (<https://awards.advising.wisc.edu/schedule-an-appointment/>) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (<http://borenawards.org/>)
Campus Representative: Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director, International Academic Programs

These scholarships provide up to \$20,000 to US undergraduate students to study abroad in areas of the world that are critical to US interests and underrepresented in study abroad, including Africa, Asia, Central & Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (http://borenawards.org/boren_scholarship/preferences.html)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (http://borenawards.org/boren_scholarship/preferences.html)).

Critical Language Scholarship Program (<http://www.clscholarship.org/>)
Campus Representative: Mark Lilleleht (awards@iris.wisc.edu), Assistant Director, IRIS

The Critical Language Scholarship (CLS) Program is part of the US Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

Gilman Scholarship Program

Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for US citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

DEPARTMENT SCHOLARSHIPS

The Department of Asian Languages and Cultures has various scholarships to support meritorious students in our Chinese and Japanese programs.

CAMERON G. KEITH MEMORIAL SCHOLARSHIP

This award is given annually to two undergraduate students studying Japanese. This award is announced during the fall semester, and eligible students may apply. The criteria are: Japanese major, junior or senior standing, cumulative GPA of 3.5 or above, currently taking Japanese, and plan to go into a Japanese related profession.

Cameron G. Keith was an East Asian Studies and Economics studies major at UW–Madison who studied abroad in Japan, and later in Nepal. In his memory, the Keith family established these funds in honor of his interest in the region.

CHOU KUO-P'ING BOOK AWARD

Several awards will be given each year to undergraduate students who are studying and will continue to study Chinese during the following semester. This award is made possible through a donation by Professor Emerita Chou Kuo-p'ing, the founder of the Chinese program here at UW–Madison. Professor Chou, a dedicated teacher, devoted her entire career to teaching, promoting, and developing Chinese studies in Wisconsin.

Professor Chou was very active during her teaching career, and often helped financially disadvantaged students, especially those who excelled in their academic careers despite economic difficulties. Although this award is based mainly on the applicant's academic performance, special consideration is given to those who are financially disadvantaged in order to carry on this tradition.

ELLEN AND WILLIAM E. FISHER SCHOLARSHIP

Ellen and William E. Fisher have provided funding for an annual scholarship to be awarded to an undergraduate student at UW–Madison who is studying the Chinese language. According to the terms of the gift agreement, the award is based on merit, therefore there is no application, but faculty will make a determination based on students progressing in the program. Mr. Fisher stipulated that the award must be made in the Fall semester, so that the recipient can use it in the Spring semester.

GWANG-TSAI CHEN AWARD

Professor Sabina Knight established this scholarship in honor of Gwang-Tsai (Arthur) Chen, Emeritus Professor of East Asian Languages and Literature at UW–Madison. The scholarship recognizes a rising undergraduate Chinese major. Student eligibility: must be a non-heritage language learner, freshman or sophomore standing, with a GPA above 3.5.

LAWRENCE LOUEY MERIT SCHOLARSHIP

The Lawrence Louey Merit Scholarship is an annual competition recognizing an undergraduate Chinese major in the Department of Asian Languages and Cultures. Eligibility: You must be a graduating senior with a GPA above 3.5 and have taken at least three years of Chinese. An

application is required for consideration, including a brief career plan, as well as a research paper from one of your major field courses.

ASIAN LANGUAGES AND CULTURES, B.A.

The 21st century has been called the “Asian Century”: indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

East Asia

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

South Asia

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

Southeast Asia

The Southeast Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos,

Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; Human rights in Thailand; literature of the region; and history and politics in Southeast Asia.

HOW TO GET IN

DECLARATION

Students who have prior experience in a language that is offered during the academic year must take a placement test before enrolling in a language course beyond the first-semester level. For information about the placement test and test dates, please visit the department website (<http://alc.wisc.edu/languages/placement-tests/>).

To declare the major, students must meet with the undergraduate advisor to review the requirements and discuss course options. Students may declare the major prior to completing the requisite language courses (1st and 2nd semester).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

General Education	<ul style="list-style-type: none"> Breadth—Humanities/Literature/Arts: 6 credits Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits Breadth—Social Studies: 3 credits Communication Part A & Part B * Ethnic Studies * Quantitative Reasoning Part A & Part B *
-------------------	--

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters & Science must complete all of the requirements below. The College of

Letters & Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

Foreign Language

- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L&S Breadth

- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts and Science Coursework Complete at least 108 credits.

Depth of Intermediate/Advanced work Complete at least 60 credits at the intermediate or advanced level.

Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.

UW-Madison Experience

- 30 credits in residence, overall; and
- 30 credits in residence after the 86th credit.

Quality of Work

- 2.000 in all coursework at UW–Madison
- 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON-L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Students must take 32 credits as follows:¹

INTRODUCTORY COURSE

Code	Title	Credits
ASIAN 100	Gateway to Asia: Special Topics	3-4

NAMED OPTIONS

View as listView as grid

- ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES (P. 442)
- ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES (P. 444)
- ASIAN LANGUAGES AND CULTURES: SOUTHEAST ASIAN STUDIES (P. 445)

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ASIAN, ASIALANG, and approved courses for the major
- 2.000 GPA in 15 upper-level major credits, taken in residence²
- 15 credits in the major, taken in residence

HONORS IN THE MAJOR

Honors in the Major is not currently available for this major.

FOOTNOTES

- ¹ Students who test above 4th semester language must still complete a minimum of 32 credits in the major. These students may complete another language sequence or other coursework as approved by the advisor.
- ² Intermediate and Advanced level major courses are upper-level.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the social and cultural ties within Asia as well as between Asia and the rest of the globe.
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study a new language and culture and how to advance their proficiency as life-long learners.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss

1244 Van Hise Hall

608-890-0138

rweiss@wisc.edu

Schedule an advising appointment in Starfish. You can access Starfish from you MyUW dashboard.

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options, prepare for study abroad or advance through their four-year plans.

INTERNATIONAL DIRECTIONS ADVISING LANGUAGE INSTITUTE

The Language Institute (<https://languages.wisc.edu>) provides academic and career advising to undergraduate students interested in languages and international area studies. The International Directions advisor provides academic and career advising to undergraduate students who are interested in languages and international area studies. Learn more (<https://languages.wisc.edu/advising/>).

L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (<https://careers.ls.wisc.edu/handshake/>)
- Learn how we're transforming career preparation: L&S Career Initiative (<http://ls.wisc.edu/lsci/>)

PEOPLE

FACULTY

Asian Languages and Cultures is home to nearly twenty faculty whose research and teaching specialties cover a wide range of topics, including traditional medicine in India; the Hindu roots of yoga; diversifying contemporary mindfulness practice with insights from Tibetan Buddhism; human rights in Thailand; Chinese ghost stories, traditional poetics and philology; sociolinguistics and discourse analysis of the Mandarin, Japanese, Korean, Indonesian languages; analysis of classical Japanese tale fiction, early modern comedic narratives, manga, anime, and Japanese counterculture. Visit our [faculty pages \(https://alc.wisc.edu/about/faculty/\)](https://alc.wisc.edu/about/faculty/) for more information on areas of expertise, current research, teaching, and publications.

Gudrun Bühnemann gbuhnema@wisc.edu

Professor

Fields of Study: Sanskrit language and literature; Buddhism in India and Nepal; Hinduism; Tantrism and Yoga Studies

Anthony Cerulli acerulli@wisc.edu

Associate Professor

Fields of Study: Hinduism; Religion in South Asia; Medical Humanities; History of Medicine in India; Sanskrit Language and Literature; Kerala History and Culture

Charo D'Etcheverry cdetcheverry@wisc.edu

Professor

Fields of Study: Classical Japanese literature (especially court fiction & its reception and early kabuki)

Anatoly Detwyler detwyler@wisc.edu

Assistant Professor

Fields of Study: Modern Chinese literature and history, comparative new media, information studies

John D. Dunne jdunne@wisc.edu

Professor

Fields of Study: Buddhist philosophy and contemplative practice; Religious Studies; Cognitive Science of Religion; Contemplative Science

Naomi Geyer nfgeyer@wisc.edu

Associate Professor

Fields of Study: Japanese Language, Language Pedagogy, Pragmatics

Tyrell Haberkorn tyrell.haberkorn@wisc.edu

Professor

Fields of Study: Violence, Human Rights, Sovereignty, Arbitrary Detention, Land Rights, Agrarian Struggle, Historiographies of Repression, Gender Studies, Socialism, Dissident Literature, Southeast Asia (Thailand)

Rania Huntington huntington@wisc.edu

Professor

Fields of Study: Ming and Qing narrative and drama, literature of the weird and supernatural, memory in literature, depiction of women in literature

Jamal Jones jones23@wisc.edu

Assistant Professor

Fields of Study: Classical Sanskrit and Telugu literature and the broader history of religion and culture in premodern south India.

Adam L. Kern alkern@wisc.edu

Professor

Fields of Study: The popular literature, culture, poetry, theater, and visual culture of early modern unto modern Japan (1600-1900). Transcultural comics in Japan (manga, kibyōshi, etc) and beyond.

Hiyeon Kim Hiyeon.kim@wisc.edu

Assistant Professor

Fields of Study: Dissident Culture; Postcolonial Archive and Historiography; Korean and East Asian Cinema

Byung-jin Lim byungjin.lim@wisc.edu

Associate Professor

Fields of Study: Korean Language and Linguistics, Second/Foreign Language Acquisition, Computer-Mediated Communication, Korean Language Textbook Development

Junko Mori jmori@wisc.edu

Professor

Fields of Study: Japanese Linguistics, Applied Linguistics, Conversation Analysis, Sociolinguistics

Eunsil Oh eoh26@wisc.edu

Assistant Professor

Fields of Study: Gender; Work and Family; Feminism; and East Asia.

Steve Ridgely steve.ridgely@wisc.edu

Associate Professor

Fields of Study: Modern Japanese literature, Cultural Theory, Transasian Studies

Hongming Zhang hzhang6@wisc.edu

Professor

Fields of Study: Chinese linguistics; syntax-phonology interface; prosodic phonology; poetic prosody; history of Chinese language; teaching Chinese as a second language

Weihua Zhu wzhu34@wisc.edu (%20wzhu34@wisc.edu)

Associate Professor

Fields of Study: Discourse Analysis, Pragmatics, Pedagogy and Second Language Acquisition

WISCONSIN EXPERIENCE

UNDERGRADUATE RESEARCH

Students in the ALC department academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (<https://teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduate-research/>) that provide research opportunities for undergraduates at UW–Madison including:

- Hilldale Undergraduate/Faculty Research Fellowships (<https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/>)
- McNair Scholars (<http://grad.wisc.edu/mcnair/>)
- Summer Research Programs (<https://grad.wisc.edu/diversity/srop/>)
- Undergraduate Research Scholars (<https://urs.ls.wisc.edu/>)
- The Wisconsin Idea Undergraduate Fellowship Program (<https://morgridge.wisc.edu/students/wisconsin-idea-fellowships/>)

WISCONSIN SUMMER LANGUAGE INSTITUTES

Each summer around 200 undergraduate students, graduate students, professionals, and others come to UW–Madison to study a language at the Wisconsin Intensive Summer Language Institutes (WISLI) (<https://wisli.wisc.edu/>). WISLI is host to five summer language institutes which offer high-quality courses in 30 less commonly taught languages:

Arabic, Persian, and Turkish Language Immersion Institute (APTII) (<https://aptlii.wisc.edu/>)

Central Eurasian Studies Summer Institute (CESSI) (<https://cessi.wisc.edu/>)

South Asia Summer Language Institute (SASLI) (<https://sasli.wisc.edu/>)

Southeast Asian Studies Summer Institute (SEASSI) (<https://seassi.wisc.edu/>)

STUDY ABROAD

The University of Wisconsin–Madison is ranked #2 for semester-long study abroad participation among all US institutions, and #16 among all US universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (<https://www.iie.org/en/Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/>). There are nearly 60 study abroad opportunities across Asia. Approved UW–Madison programs will allow students to receive residents credit while abroad. With pre-planning, students may also fulfill major requirements on academic programs abroad, however careful planning and discussion with your advisor are key. For more information about programs, application process, and fees, visit: International Academic Programs (<https://www.studyabroad.wisc.edu/>).

Students may also gain career and professional experience through various internship opportunities abroad. To review opportunities, application process, and fees, visit: International Internship Programs (<http://internships.international.wisc.edu/>).

RESOURCES AND SCHOLARSHIPS

CAMPUS RESOURCES

Foreign Language & Area Studies (FLAS) Fellowships (<https://flas.wisc.edu/>)

FLAS fellowships are funded by the US Department of Education and administered by UW–Madison's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (<https://flas.wisc.edu/Languages.html>), and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (<https://flas.wisc.edu/Languages.html>) of your chosen language.

Applicants must be US citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are **two separate competitions** requiring **two separate and complete applications**.

Scholarships@UW–Madison (<https://scholarships.wisc.edu/Scholarships/>)

This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (<https://awards.advising.wisc.edu/>)

We help UW–Madison undergraduates and recent graduates pursue nationally competitive scholarships (<https://awards.advising.wisc.edu/scholarships/nationally-competitive/>) and campus-wide awards (<https://awards.advising.wisc.edu/scholarships/campus-wide/>) for research,

service, and leadership—activities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (<https://awards.advising.wisc.edu/schedule-an-appointment/>) to schedule an appointment to discuss which opportunities are right for you.

NATIONAL SCHOLARSHIPS

Boren Scholarships (<http://borenawards.org/>)

Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to \$20,000 to US undergraduate students to study abroad in areas of the world that are critical to US interests and underrepresented in study abroad, including Africa, Asia, Central and Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (<https://borenawards.org/eligible-programs/#countries>)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (<https://borenawards.org/eligible-programs/#languages>)). Undergraduates with questions about the Boren Scholarship (<https://www.borenawards.org/scholarships/program-basics/boren-scholarship-basics/>) should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs.

Critical Language Scholarship Program (<http://www.clscholarship.org/>)
Campus Representative: Mark Lilleleht, Assistant Director for Awards, at awards@iris.wisc.edu

The Critical Language Scholarship (CLS) Program is part of the US Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

Gilman Scholarship Program

Campus Representative: Andy Quackenbush (quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for US citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES

East Asia

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, B. Nienhauser, S. Ridgely, H. Zhang, W. Zhu.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (<https://eastasia.wisc.edu/>); Center for South Asia (<https://southasia.wisc.edu/>); and Center for Southeast Asian Studies (<https://seasia.wisc.edu/>).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE EAST ASIAN OPTION

32 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the East Asian Option:

EAST ASIAN INTERMEDIATE LANGUAGE

Code	Title	Credits

FOUR-YEAR PLAN

See Four Year Plan for the Asian Languages and Cultures Major; course choices for the East Asian Studies Named Option will focus on that region.

ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES

South Asia

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories,

political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (<https://eastasia.wisc.edu/>); Center for South Asia (<https://southasia.wisc.edu/>); and Center for Southeast Asian Studies (<https://seasia.wisc.edu/>).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

REQUIREMENTS

REQUIREMENTS FOR THE SOUTH ASIAN STUDIES OPTION

32 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the South Asian Option:

ASIAN LANGUAGES AND CULTURES, B.S.

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclear-weapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the

Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

East Asia

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

South Asia

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

Southeast Asia

The Southeast Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; Human rights in Thailand; literature of the region; and history and politics in Southeast Asia.

HOW TO GET IN

DECLARATION

Students who have prior experience in a language that is offered during the academic year must take a placement test before enrolling in a language course beyond the first-semester level. For information about the placement test and test dates, please visit the department website (<http://alc.wisc.edu/languages/placement-tests/>).

To declare the major, students must meet with the undergraduate advisor to review the requirements and discuss course options. Students may declare the major prior to completing the requisite language courses (1st and 2nd semester).

REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin–Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for

living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 23) section of the *Guide*.

- | | |
|-------------------|--|
| General Education | <ul style="list-style-type: none"> • Breadth—Humanities/Literature/Arts: 6 credits • Breadth—Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits • Breadth—Social Studies: 3 credits • Communication Part A & Part B * • Ethnic Studies * • Quantitative Reasoning Part A & Part B * |
|-------------------|--|

* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS & SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a Bachelor of Science degree in the College of Letters & Science must complete all of the requirements below. The College of Letters & Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

Foreign Language Complete the third unit of a foreign language.

L&S Breadth Complete:

- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.

Liberal Arts and Science Coursework Complete at least 108 credits.

Depth of Intermediate/Advanced level. Complete at least 60 credits at the Intermediate or Advanced level.

Advanced Coursework

Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.

UW-Madison Experience Complete both:

- 30 credits in residence, overall, and
- 30 credits in residence after the 86th credit.

Quality of Work • 2.000 in all coursework at UW–Madison
 • 2.000 in Intermediate/Advanced level coursework at UW–Madison

NON–L&S STUDENTS PURSUING AN L&S MAJOR

Non–L&S students who have permission from their school/college to pursue an additional major within L&S only need to fulfill the major requirements. They do not need to complete the L&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR

Students must take 32 credits as follows:¹

ASIAN 632	Studies in Chinese Linguistics	3
ASIAN 641	History of Chinese Literature	3

NAMED OPTIONS

View as listView as grid

- ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES (P. 442)
- ASIAN LANGUAGES AND CULTURES: SOUTH ASIAN STUDIES (P. 444)
- ASIAN LANGUAGES AND CULTURES: SOUTHEAST ASIAN STUDIES (P. 445)

RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ASIAN, ASIALANG, and approved courses for the major
- 2.000 GPA in 15 upper-level major credits, taken in residence²
- 15 credits in the major, taken in residence

HONORS IN THE MAJOR

Honors in the Major is not currently available for this major.

FOOTNOTES

¹ Students who test above 4th semester language must still complete a minimum of 32 credits in the major. These students may complete

another language sequence or other coursework as approved by the advisor.

- ² Intermediate and Advanced level major courses are upper-level.

UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW–Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW–Madison. "In residence" means on the UW–Madison campus with an undergraduate degree classification. "In residence" credit also includes UW–Madison courses offered in distance or online formats and credits earned in UW–Madison Study Abroad/Study Away programs.

Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the social and cultural ties within Asia as well as between Asia and the rest of the globe.
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study a new language and culture and how to advance their proficiency as life-long learners.

FOUR-YEAR PLAN

SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it—along with their DARS report, the Degree Planner, and Course Search & Enroll tools—to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students

become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own four-year plan several times during college.

First Year

Fall	Credits	Spring	Credits
Communication A	3	Quantitative Reasoning A	3-4
Foreign Language	4	Biological Science Breadth	3
ASIAN 100 (Required Introductory Course)	3-4	Ethnic Studies	4
Major Breadth: Humanities	3-4	Foreign Language Course	4
14-15			15

Second Year

Fall	Credits	Spring	Credits

Electives	8	Electives	9
15			15

Total Credits 119-120

ADVISING AND CAREERS

UNDERGRADUATE ADVISOR

Rachel Weiss
1244 Van Hise Hall
608-890-0138
rweiss@wisc.edu

Schedule an advising appointment in Starfish. You can access Starfish from your MyUW dashboard.

Rachel is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options, prepare for study abroad or advance through their four-year plans.

INTERNATIONAL DIRECTIONS ADVISING LANGUAGE INSTITUTE

The Language Institute (<https://languages.wisc.edu>) provides academic and career advising to undergraduate students interested in languages and international area studies. The International Directions advisor provides academic and career advising to undergraduate students who are interested in languages and international area studies. L&S CAREER RESOURCES

SuccessWorks at the College of Letters & Science helps students leverage the academic skills learned in their major, certificates, and liberal arts degree; explore and try out different career paths; participate in internships; prepare for the job search and/or graduate school applications; and network with professionals in the field (alumni and employers). In short, SuccessWorks helps students in the College of Letters & Science discover themselves, find opportunities, and develop the skills they need for success after graduation.

SuccessWorks can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as course offerings for undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (<https://careers.ls.wisc.edu/handshake/>) to take care of everything they need to explore career events, manage their campus interviews, and **apply to jobs and internships from 200,000+ employers around the country.**

- SuccessWorks (<https://careers.ls.wisc.edu/>)
- Set up a career advising appointment (<https://careers.ls.wisc.edu/make-an-appointment/>)
- INTER-LS 210 L&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)—for more information, see Inter-LS 210: Career Development, Taking Initiative (<https://careers.ls.wisc.edu/inter-ls-210-career-development-taking-initiative/>)
