TABLE OF CONTENTS
Undergraduate Guide ..... 9
College of Agricultural and Life Sciences ..... 43
Agricultural and Applied Economics ..... 51
Agricultural and Applied Economics, B.S ..... 51
Agricultural Business Management, B.S. ..... 56
Business Management for Agricultural and Life Sciences, Certificate ..... 60
Development Economics, Certificate ..... 61
Agricultural and Life Sciences - College-Wide ..... 63
College of Agricultural and Life Sciences Honors ..... 63
Individual Major, B.S. ..... 64
Agronomy ..... 66
Agronomy, B.S. ..... 67
Animal and Dairy Sciences ..... 72
Animal Sciences, B.S. ..... 73
Dairy Science, B.S. ..... 78
Bacteriology ..... 83
Biology, B.S. (CALS) ..... 84
Biology: Evolutionary Biology ..... 93
Biology: Plant Biology ..... 98
Microbiology, B.S. (CALS) ..... 102
Biochemistry ..... 108
Biochemistry, B.S. (CALS) ..... 108
Biological Systems Engineering ..... 117
Biological Systems Engineering, B.S. ..... 118
Biological Systems Engineering: Food and Bioprocess Engineering ..... 124
Biological Systems Engineering: Machinery Systems Engineering ..... 126
Biological Systems Engineering: Natural Resources and Environmental Engineering ..... 128
Community and Environmental Sociology ..... 129
Community and Environmental Sociology, B.S ..... 130
Food Systems, Certificate ..... 134
Entomology ..... 136
Entomology, B.S. ..... 136
Global Health, B.S ..... 142
Global Health, Certificate ..... 148
Food Science ..... 152
Food Science, B.S. ..... 153
Science of Fermented Food and Beverages, Certificate157
Forest and Wildlife Ecology ..... 158
Forest Science, B.S. ..... 159
Wildlife Ecology, B.S. ..... 166
Genetics ..... 171
Genetics and Genomics, B.S. ..... 172
Horticulture ..... 177
Horticulture, B.S. ..... 178
Life Sciences Communication ..... 184
Life Sciences Communication, B.S ..... 185
Science Communication, Certificate ..... 191
Nutritional Sciences ..... 193
Nutritional Sciences, B.S. ..... 193
Nutritional Sciences, B.S. Nutrition and Dietetics ..... 199
Plant Pathology ..... 204
Organic Agriculture, Certificate ..... 205
Plant Pathology, B.S. ..... 207
Soil Science ..... 213
Environmental Sciences, B.S. (CALS) ..... 214
Soil Science, B.S ..... 223
College of Engineering ..... 230
Biomedical Engineering ..... 241
Biology in Engineering for Engineering Majors, Certificate ..... 242
Biomedical Engineering, B.S. ..... 244
Chemical and Biological Engineering ..... 251
Chemical Engineering, B.S. ..... 252
Civil and Environmental Engineering ..... 258
Architecture, Certificate ..... 259
Civil Engineering, B.S. ..... 260
Civil Engineering: Construction Engineering and Management ..... 266
Civil Engineering: Environmental Engineering ..... 268
Environmental Engineering, B.S ..... 270
Geological Engineering, B.S. ..... 275
Electrical and Computer Engineering ..... 282
Computer Engineering, B.S. ..... 283
Computer Engineering: Machine Learning and Data Science, B.S. ..... 288
Electrical Engineering, B.S. ..... 289
Electrical Engineering: Machine Learning and Data Science, B.S. ..... 295
Engineering - College-wide ..... 297
College of Engineering Honors in the Liberal Arts ..... 297
International Engineering, Certificate ..... 297
Naval Science, BNS ..... 298
Technical Communication, Certificate ..... 300
Industrial and Systems Engineering ..... 303
Engineering Data Analytics, Certificate ..... 304
Industrial Engineering, B.S. ..... 305
Materials Science and Engineering ..... 311
Materials Science and Engineering, B.S. ..... 31
Mechanical Engineering ..... 315
Engineering Mechanics, B.S. ..... 317
Engineering Mechanics: Aerospace Engineering ..... 322
Engineering Mechanics: Astronautics ..... 325
Engineering Thermal Energy Systems, Certificate ..... 327
Manufacturing Engineering, Certificate ..... 328
Mechanical Engineering, B.S. ..... 330
Nuclear Engineering and Engineering Physics ..... 335
Engineering for Energy Sustainability, Certificate ..... 336
Engineering Physics, B.S ..... 338
Nuclear Engineering Materials, Certificate ..... 344
Nuclear Engineering, B.S. ..... 344
Nuclear Engineering: Radiation Sciences ..... 350
College of Letters \& Science ..... 353
African American Studies ..... 375
African American Studies, B.A. ..... 375
African American Studies, B.S ..... 379
African American Studies, Certificate ..... 384
African Cultural Studies ..... 385
African Cultural Studies, B.A. ..... 386
African Cultural Studies, B.S ..... 391
American Indian and Indigenous Studies Program ..... 396
American Indian and Indigenous Studies, Certificate ..... 396
Anthropology ..... 398
Anthropology, B.A. ..... 400
Anthropology, B.S. ..... 405
Archaeology, Certificate ..... 409
Art History ..... 413
Art History, B.A. ..... 413
Art History, B.S ..... 421
Art History, Certificate ..... 429
Asian American Studies Program ..... 432
Asian American Studies, Certificate ..... 432
Asian Languages and Cultures ..... 434
Asian Languages and Cultures, B.A. ..... 436
Asian Languages and Cultures: East Asian Studies ..... 443
Asian Languages and Cultures: South Asian Studies ..... 445
Asian Languages and Cultures: Southeast Asian Studies446
Asian Languages and Cultures, B.S ..... 448
Asian Languages and Cultures: East Asian Studies ..... 455
Asian Languages and Cultures: South Asian Studies ..... 457
Asian Languages and Cultures: Southeast Asian Studies458
Chinese Professional Communication, Certificate ..... 459
Chinese, B.A. ..... 463
Chinese, B.S. ..... 469
Japanese Professional Communication, Certificate ..... 476
Japanese, B.A. ..... 479
Japanese, B.S. ..... 484
Astronomy ..... 490
Astronomy-Physics, B.A. ..... 490
Astronomy-Physics, B.S. ..... 494
Atmospheric and Oceanic Sciences ..... 498
Atmospheric and Oceanic Sciences, B.A. ..... 499
Atmospheric and Oceanic Sciences, B.S. ..... 504
Environmental Sciences, B.A. (L\&S) ..... 509
Environmental Sciences, B.S. (L\&S) ..... 517
Biology Core Curriculum ..... 526
Biology Core Curriculum Honors, Certificate ..... 526
Botany ..... 528
Botany, B.A. ..... 529
Botany, B.S ..... 533
Conservation Biology, B.A. ..... 538
Conservation Biology, B.S. ..... 544
Center for Law, Society, and Justice ..... 551
Criminal Justice, Certificate ..... 551
Legal Studies, B.A. ..... 554
Legal Studies, B.S. ..... 561
Chemistry ..... 568
Chemistry, B.A. ..... 570
Chemistry, B.S. ..... 577
Chicana/o and Latina/o Studies ..... 585
Chicana/o and Latina/o Studies, B.A. ..... 585
Chicana/o and Latina/o Studies, B.S. ..... 590
Chicana/o and Latina/o Studies, Certificate ..... 594
Classical and Ancient Near Eastern Studies ..... 596
Classical Humanities, B.A. ..... 597
Classical Humanities, B.S. ..... 602
Classical Studies, Certificate ..... 608
Classics, B.A. ..... 610
Classics, B.S ..... 614
Latin, B.A. ..... 617
Latin, B.S ..... 621
Communication Arts ..... 624
Communication Arts, B.A. ..... 625
Communication Arts: Communication Science and Rhetorical Studies ..... 629
Communication Arts: Radio-Television-Film ..... 633
Communication Arts, B.S. ..... 636
Communication Arts: Communication Science and Rhetorical Studies ..... 640
Communication Arts: Radio-Television-Film ..... 644
Digital Cinema Production, Certificate ..... 648
Digital Studies, Certificate ..... 649
Communication Sciences and Disorders ..... 652
Communication Sciences and Disorders, B.A. ..... 653
Communication Sciences and Disorders, B.S. ..... 658
Computer Sciences ..... 662
Computer Sciences, B.A. ..... 662
Computer Sciences, B.S. ..... 667
Computer Sciences, Certificate ..... 672
Economics ..... 674
Economic Analytics, Certificate ..... 676
Economics, B.A ..... 678
Economics: Mathematical Emphasis ..... 685
Economics, B.S. ..... 687
Economics: Mathematical Emphasis ..... 693
English ..... 695
English, B.A. ..... 696
English: Emphasis on Creative Writing ..... 701
English: English Language and Linguistics ..... 702
English, B.S. ..... 704
English: Emphasis on Creative Writing ..... 709
English: English Language and Linguistics ..... 710
Health and the Humanities, Certificate ..... 712
Teaching English to Speakers of Other Languages, Certificate ..... 715
Environmental Studies ..... 716
Environmental Studies Major ..... 716
French and Italian ..... 724
French, B.A. ..... 725
French, B.S ..... 730
French, Certificate ..... 735
Italian, B.A. ..... 737
Italian, B.S. ..... 740
Italian, Certificate ..... 744
Gender and Women's Studies ..... 745
Gender and Women's Studies, B.A. ..... 746
Gender and Women's Studies, B.S. ..... 753
Gender and Women's Studies, Certificate ..... 761
LGBTQ+ Studies, Certificate ..... 764
Geography ..... 766
Cartography and Geographic Information Systems, B.A. ..... 767
Cartography and Geographic Information Systems, B.S.
 ..... 771
Geography, B.A. ..... 776
Geography: Human Geography ..... 780
Geography: People-Environment Geography ..... 781
Geography: Physical Geography: Earth Systems and Environmental Processes ..... 781
Geography, B.S. ..... 782
Geography: Human Geography ..... 786
Geography: People-Environment Geography ..... 787
Geography: Physical Geography: Earth Systems and Environmental Processes ..... 788
Geoscience ..... 789
Geology and Geophysics, B.A. ..... 790
Geology and Geophysics, B.S. ..... 794
German, Nordic, and Slavic ..... 799
East Central European Languages, Literatures, and Cultures, Certificate ..... 801
Folklore, Certificate ..... 803
German, B.A. ..... 805
German, B.S. ..... 810
German, Certificate ..... 815
Languages and Cultures of Northern Europe, Certificate ..... 817
Polish, B.A. ..... 819
Polish, B.S ..... 823
Russian, B.A ..... 827
Russian, B.S ..... 830

## UNDERGRADUATE GUIDE

The Guide contains information about the many academic programs that make the University of Wisconsin-Madison one of the world's foremost institutions of higher education.

The Guide is published online only. It is not available in printed format.
The information in the Guide applies to all undergraduate students at the university regardless of their classification (school/college affiliation). Information in the individual school/college sections applies specifically to students who intend to graduate from one of those schools or colleges.

It is important for students to be familiar with all the information that applies to them. Students are strongly encouraged to consult their advisors at least once each semester to be certain they are completing requirements that apply to their degree and major programs.

The Guide is intended to complement other university information including specific materials supplied by schools, colleges, departments, and programs.

For more information about admission expectations, academic preparation, the application process, and important dates and deadlines, contact:

Office of Admission and Recruitment (https://www.admissions.wisc.edu/) 702 West Johnson Street, Suite 1101
Madison, WI 53715-1007
onwisconsin@admissions.wisc.edu
608-262-3961
Schedule a campus tour at VisitBucky (https://www.admissions.wisc.edu/ visitbucky/) or call 608-262-3961.

UW-Madison summer brochures and program information are available from the Division of Continuing Studies (http:// continuingstudies.wisc.edu/).

All entering students, to protect their interests, should become well acquainted with the regulations regarding student academic and nonacademic misconduct. Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at:

Office of the Registrar (https://registrar.wisc.edu/)
333 East Campus Mall \#11101
Madison, WI 53715-1384

## ACCREDITATION

The University of Wisconsin-Madison is accredited by the Higher Learning Commission (http://www.hlcommission.org/).

230 South Lasalle Street, Suite 7-500
Chicago, IL 60604
Telephone 1-800-621-7440
www.hlcommission.org (http://www.hlcommission.org)
UW-Madison, which was first accredited in 1913, was last accredited in 2019, and will go through a reaccreditation process again in 2028-29.

Student achievement data (https://data.wisc.edu/student-achievementdata/)

## SAFE LEARNING AND WORK ENVIRONMENT

Guide to creating and maintaining a Safe Learning and Work Environment at UW-Madison: Responsibilities, Resources, and Reporting Requirements. (https://compliance.wisc.edu/safe-learning-work-guide/)

## CONSUMER INFORMATION

UW-Madison is required by law to make available to enrolled and prospective students and their parents' certain information about its operations. Such information pertains to:

1. general institutional operation
2. financial aid
3. retention and graduation rates
4. annual security \& fire report, and
5. athletic program participation rates, financial support, and graduation rates

To meet the requirement, information for the University of WisconsinMadison is provided on the Consumer Information webpage (https:// financialaid.wisc.edu/consumer-info/).

## DISTANCE EDUCATION AUTHORIZATION AND DISCLOSURES

UW-Madison complies with the requirements and standards set by the National Council for State Authorization Reciprocity Agreements (NCSARA) (https://nc-sara.org/).

Disclosures and information related to distance education at UWMadison is available on the Distance Education, State Authorization, and Disclosures webpage (https://apir.wisc.edu/institution/distanceeducation/).

## REGISTRATION WITH MINNESOTA OFFICE OF HIGHER EDUCATION

The University of Wisconsin-Madison is a public institution registered as a "Private Institution" with the Minnesota Office of Higher Education pursuant to sections 136A. 61 to 136A.71. Registration is not an endorsement of the institution. Credits earned at the institution may not transfer to all other institutions.

## EQUAL OPPORTUNITY, EQUAL ACCESS, AND NONDISCRIMINATION

The University of Wisconsin - Madison is committed to providing equal opportunity and equal access in compliance with all applicable federal and state laws and regulations and University of Wisconsin System and university non-discrimination policies and procedures.

## POLICIES \& PROCEDURES

The Office of Compliance promotes ethical conduct and compliance with all applicable laws, regulations and UW-Madison policies. UW-Madison's
non-discrimination statement, contact information for the university's Equal Opportunity Investigations Administrator, Title IX Coordinator, ADA Coordinator as well as information regarding UW-Madison's Equal Opportunity Complaint process is available on the Office of Compliance's website (https://compliance.wisc.edu/eo-complaint/).

## DISABILITY RESOURCES

The McBurney Disability Resource Center is an office within the Division of Student Affairs that views disability as an important aspect of the diversity of UW-Madison. We are committed to creating an accessible and inclusive educational experience for students. We do this by partnering with students, faculty, and staff to design accessible environments and to provide academic accommodations so that students can engage, explore and participate in the Wisconsin Idea.

We work with UW-Madison students with physical, learning, hearing, vision, psychological, health and other disabilities substantially affecting a major life activity (e.g., walking, communicating, learning, seeing, breathing, reading, etc.). Many students have non-apparent disabilities such as depression, anxiety, autism spectrum, learning disabilities, AD/HD and health conditions such as Crohn's disease or fibromyalgia.

Common accommodations include extended time and/or small group environment for exams, notetaking support, sign language interpreting, real time and media captioning, and conversion of printed materials to accessible formats. McBurney Center staff members also collaborate with students and faculty to determine reasonable flexibility with regard to attendance, participation, and deadlines for conditions that fluctuate in severity over the course of enrollment. The Center makes referrals to other campus offices or community resources for non-classroom accommodations related to housing, transportation, personal care needs, and so on. Students should contact the Center upon admission to begin the eligibility for services process. Early notice is essential in order to have accommodations in place prior to the start of the semester. For detailed information, see How to apply for accommodations (https:// mcburney.wisc.edu/apply-for-accommodations/).

The information, policies, and rules contained herein are subject to change. The information in this catalog is current as of June 1, 2023. Later revisions are announced through department or program offices. Students are responsible for knowing current university regulations. University offices can provide current information about possible changes.

## ADMISSION

## OFFICE OF ADMISSIONS AND RECRUITMENT

Students seeking to earn a bachelor's degree from the University of Wisconsin-Madison will apply for admission through the Office of Admissions and Recruitment (https://www.admissions.wisc.edu/). Undergraduate admission is competitive and selective; professional
admissions counselors review applications using a holistic process. We focus on academic excellence, reviewing high school and college coursework (when applicable), the courses students have chosen to take, the rigor and breadth of the curriculum, and how the student has performed in their coursework. We also consider written essays, letters of recommendation, extracurricular involvement, and optional test scores.

Our review process is designed to help us identify students who are not only academically stellar but also have qualities such as leadership, concern for humanity, and achievement in the arts, athletics, and other areas. We also seek diversity in personal background and experience for potential contribution to the University of Wisconsin-Madison community.

We invite and encourage all students considering the University of Wisconsin-Madison to join us on campus for a visit (https:// apps.admissions.wisc.edu/visitbucky/). There are many options to explore and discover what UW-Madison has in store.

## APPLY (HTTPS://ADMISSIONS.WISC.EDU/HOW-DO-I-APPLY-TO-UW-MADISON/)

To submit an application for admission, review the application dates and deadlines, as well as the required application materials listed on our website.

Deadlines (https://admissions.wisc.edu/deadlines/)
First-Year Applicants (https://admissions.wisc.edu/apply-as-a-freshman/)
Transfer Applicants (https://admissions.wisc.edu/apply-as-a-transfer/)
Reentry Applicants (https://admissions.wisc.edu/apply-as-a-reentrystudent/)
Second Degree Applicants (https://admissions.wisc.edu/apply-as-a-second-degree-student/)

## FIRST-YEAR STUDENTS

Competitive first-year applicants have taken advantage of the rigor offered at their high schools and have performed well in challenging courses. Beyond academic excellence, we are looking for students who demonstrate leadership, community engagement, and passion.

Students are considered first-year applicants if they have not yet completed high school (secondary-level education); have not earned a GED/HSED (but will by the time they enroll at UW-Madison); or have not enrolled in a college or university in a degree-granting program since graduating high school or earning a GED/HSED. For more information about admission requirements and expectations of first-year applicants, please see our website (https://admissions.wisc.edu/apply-as-afreshman/).

## TRANSFER STUDENTS

Successful transfer applicants will have a consistently high or upward grade trend; a strong cumulative grade point average; and rigorous coursework in English composition, college-level math, science, social science, humanities, literature, and foreign language. Admission to the university does not guarantee acceptance to an intended major, which is a separate process from undergraduate admission.

Students are considered transfer applicants if they have enrolled in an accredited college or university in a degree-granting program after graduating from high school or earning a GED/HSED. Students must have 24 transferable credits earned at a college or university after high school graduation to be eligible for admission as a transfer applicant. For more information about admission requirements and expectations of transfer
applicants, please see our website (https://admissions.wisc.edu/apply-as-a-transfer/).

Prospective transfer students can begin satisfying UW-Madison general education and degree requirements before transferring. Transfer credit is generally given for college-level courses taken at a degree-granting institution accredited by a CHEA-recognized organization (http:// chea.org/). Courses must be similar in nature, level, and content to UWMadison undergraduate courses and apply to a UW-Madison academic program. Students may wish to consult the UW-Madison Transfer Credit Policy (https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/) for more details.

## TRANSFER ARTICULATION AGREEMENTS

A transfer articulation agreement defines accepted transfer courses/ credits between two institutions, promoting the successful transfer of completed coursework into UW-Madison required coursework.

UW-Madison currently participates in two transfer articulation agreements with the Wisconsin Technical College System.

1. Universal Undergraduate Credit Transfer Agreement (https://uwmadison.box.com/s/ zdd9spifr8mm92zOahby23n9y5ec14e1/);
2. University of Wisconsin System Collaborative Nursing Program/BSN@Home Agreement (https://uwmadison.box.com/s/ pic9oizdacb6n85xrOl6qgyyfphtney2/).

## REENTERING STUDENTS

Students previously registered at UW-Madison in an undergraduate degree program who wish to resume undergraduate study after an absence of a semester or more are considered reentry students. Reentry students must file an application for readmission but are not subject to the application fee.

To guarantee an early enrollment appointment time, reentry students should submit the complete application by March 1 for the summer or fall term or by November 1 for the spring term. In addition to submitting an application (https://admissions.wisc.edu/apply-as-a-reentry-student/), reentry applicants must submit official transcripts for any work completed elsewhere since last enrolled at UW-Madison, a list of courses in progress (if applicable), and an academic action from the dean's office if they are in "dropped" or "must obtain permission to continue" status.

## SECOND DEGREE STUDENTS

Students who previously completed a bachelor's degree at the University of Wisconsin-Madison or another institution and are interested in pursuing a second bachelor's degree are considered a second degree student.

Not all programs are able to accept second degree students. Please be sure to review the school and college-specific requirements (https:// admissions.wisc.edu/apply-as-a-second-degree-student/) to determine if the program you are interested in accepts second degree applicants.

All second degree applicants will receive an initial eligibility review to determine if they are considered a second degree-seeking student based on official college transcripts or academic record (for UW-Madison students).

For more information about admission requirements and expectations of second degree applicants, please see our website (https:// admissions.wisc.edu/apply-as-a-second-degree-student/).

# NONDEGREE UNIVERSITY SPECIAL AND GUEST STUDENTS 

Undergraduate students visiting from other universities or recent UW-Madison graduates may desire to enroll at UW-Madison as nondegree University Special and Guest students. Contact the Division of Continuing Studies, Adult Career and Special Student Services (http:// www.continuingstudies.wisc.edu/advising/).
21 North Park Street
Madison, WI 53715

## PLACEMENT AND CREDIT BY EXAM

## PLACEMENT TESTS

Each student comes to UW-Madison with a unique set of skills and academic preparation. To asses where each student stands in beginning to meet their General Education Requirements (p. 32), placement tests provide academic advisors with the tools to help determine in which courses students should enroll. Placement tests are required of all incoming freshmen and some transfer students depending on college course work. Other exams such as ACT, SAT, SAT II, TOEFL, Advanced Placement (AP), International Baccalaureate (IB), etc. do not satisfy the requirement of placement tests, however, scores on these exams may assist in appropriate course enrollment advising.

UW Placement tests are developed by faculty and instructional staff from various UW System campuses and led by Testing and Evaluation Services (https://testing.wisc.edu/) (T\&E). T\&E conducts studies to support the development of these tests and effectively uses the results to place incoming students into appropriate levels of English, math, and foreign language.

Outlined below are the situations typical for requiring placement tests. The Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/) determines which placement tests are required. After students are admitted to the University of WisconsinMadison, they will receive an email from the Office of Admissions and Recruitment indicating which placement tests are required.

## LANGUAGE PLACEMENT EXAMS

Freshmen who have previous experience in Spanish, French, or German and who plan to take coursework in this language at UWMadison must take a placement test in that language to qualify and enroll in classes beyond the entry level language course. Previous experience may include native speakers and those who have previous coursework in the language. If you are interested in taking a course in another world language, see the available Departmental Placement Exams below (p. 13). Many programs have a world language requirement. Be sure to review the Guide to determine your degree requirements for world language and consult with your advisor at SOAR. UW-Madison offers language instruction in more than 30 languages.

## FRENCH

| Score | Placement Into |
| :--- | :--- |
| O-149 | Consult with French Advisor |
| $150-385$ | FRENCH 101 (First Semester French) |
| $386-475$ | FRENCH 102 (Second Semester French) |
| $476-560$ | FRENCH 203 (Third Semester French) |
| $561-715$ | FRENCH 204 (Fourth Semester French) |
| $716-800$ | FRENCH 228 (Intermediate Language and Culture) |
| $801-850$ | Consult with French Advisor |

## GERMAN

| Score | Placement Into |
| :---: | :---: |
| 150-406 | GERMAN 101 (First Semester German) |
| 407-466 | GERMAN 102 (Second Semester German) |
| 467-536 | GERMAN 203 (Third Semester German) |
| 537-616 | GERMAN 204 (Fourth Semester German) |
| 617-850 | GERMAN 249 (Intermediate German - Speaking and Listening), GERMAN 258 (Intermediate GermanReading), GERMAN 262 (Intermediate German-Writing), or GERMAN 285 (Intermediate Intensive (Honors) German: Language, Culture, Texts) |

Note: If your score is between 0-149 or 851-999, please consult the German advisor. These scores are not valid and something was entered incorrectly on your record.

## SPANISH

| Score | Placement Into |
| :--- | :--- |
| $150-420$ | SPANISH 101 (First Semester Spanish) |
| $421-540$ | SPANISH 102 (Second Semester Spanish) |
| $541-639$ | SPANISH 203 (Third Semester Spanish) |
| $640-742$ | SPANISH 204 (Fourth Semester Spanish) |
| $743-849$ | SPANISH 226 (Lying, Swearing, and Breaking the Rules: An <br> Introduction to the Linguistic Study of Spanish) |
| 850 | SPANISH 226 (Intermediate Language Practice with <br> Emphasis on Writing and Grammar), or SPANISH 311 <br> (Advanced Language Practice) |

Note: If your score is between 0-149 or 851-999, please consult the Spanish advisor. These scores are not valid and something was entered incorrectly on your record.

## MATH PLACEMENT EXAMS

This examination is required for students admitted to undergraduate degree granting programs who:

1. Are admitted as first-year students
2. Are admitted as transfer students and (one of the following):
a. Have not previously completed the UW System math placement exam.
b. Do not have credit for the UW-Madison direct equivalent of MATH 96, MATH 112, MATH 114 , MATH 171 MATH 211 , MATH 217 MATH 221, MATH 222 or MATH 234.
i. For students who have one of the direct equivalent MATH courses in progress at the time of admission, it is assumed they will complete the course, and they are not asked to take the placement test; if they do not complete or pass the
course, they may be required to take the placement test to demonstrate minimum math proficiency.

## NOTES:

- Students must demonstrate minimum math proficiency before they enroll in a Quantitative Reasoning Part A (p. 34) course. Satisfaction of Quantitative Reasoning Part A from a math course that is transferred in does not automatically exempt students from the UW math placement test.
- MATH 101 equivalents will be converted to MATH 96 , and/or will be reviewed by the math department for possible MATH 96 .

## MATH PLACEMENT EXAM MATRIX

For more detailed information on math course sequencing and placement, please see the information available on the Math Department website (https://math.wisc.edu/undergraduate/placement/new-student/). Students should discuss course selection based on math placement test scores with an advisor if they have any questions.

| MFUND | AALG | TAG | Math Course Options | General Education |
| :---: | :---: | :---: | :---: | :---: |
| 150-355 | 150-850 | 150-850 | - MATH 96 |  |
| 356-465 | 150-850 | 150-850 | - MATH 96 <br> - MATH 141 |  |
| 466-850 | 150-485 | 150-555 | - MATH 112 |  |
| 466-850 | 150-485 | 556-850 | - MATH 112 <br> - MATH 114 <br> - MATH 171 |  |
| 466-850 | 486-535 | 150-555 | - MATH 114 <br> - MATH 112 <br> - MATH 171 | Quantitative <br> Reasoning A satisfied |
| 466-850 | 486-535 | 556-850 | - MATH 112 <br> - MATH 114 <br> - MATH 171 | Quantitative <br> Reasoning A satisfied |
| 466-850 | 536-850 | 150-155 | - MATH 113 <br> - MATH 211 <br> - MATH 114 <br> - MATH 171 | Quantitative Reasoning A satisfied |
| 466-850 | 536-850 | 556-820 | - MATH 211 <br> - MATH 221 | Quantitative <br> Reasoning A satisfied |

## ENGLISH PLACEMENT EXAMS

There are two exams used to determine the placement of students into courses focused on development of skills needed for success in collegelevel communication tasks:

1. UW English Placement Test (UWEPT)
2. UW-Madison English as a Second Language Assessment Test (MSNESLAT)

## UW ENGLISH PLACEMENT TEST (UWEPT)

The UWEPT is taken by students admitted to undergraduate degreegranting programs who (one of the following):

1. Are admitted as first-year students and are not required to take the MSNESLAT (see next section)
2. Are admitted as transfer students and are not required to take the MSNESLAT (see next section) and
a. Have not previously completed the UW System English Placement Exam
b. Do not have credit for the UW-Madison equivalent of a Communication Part A (p. 33) course.

| English |  |
| :--- | :--- |
| Score | Placement Into |
| 001-604 | Must take Communcations A Course |
| $605-850$ | Communcations A requirement satisfied |

Note: If your score is 0 or between 851-999, please consult your advisor. These scores are not valid and something was entered incorrectly on your record.

## UW-MADISON ENGLISH AS A SECOND LANGUAGE ASSESSMENT TEST (MSNESLAT)

The MSNESLAT is taken by all students who are required to submit a TOEFL or IELTS score for admission to UW-Madison.

The MSNESLAT is designed to evaluate English language proficiency, and to place students into English as a Second Language courses that help students improve skills in the written and spoken English used in academic contexts. Students who take the MSNESLAT and obtain a score that does not exempt them from ESL 118 must satisfy the university's expectation of college-level English language proficiency. This can be done by taking ESL 118 or by achieving a score of exempt on the MSNESLAT.

| English as a Second Language (ESL) <br> Score |  |
| :--- | :--- |
| Placement Into |  |
| 99 | Exempt from ESL 118 and Communication A Requirement <br> satisfied |
| 110 | ESL 110 (Intensive English as a Second Language) |
| 114 | ESL 114 (Intermediate English Language Skills) |
| 115 | ESL 115 (Grammar for Academic Use) |
| 116 | ESL 116 (Academic Reading and Vocabulary Skills) |
| 117 | ESL 117 (Academic Writing I) |
| 118 | ESL 118 (Academic Writing II) |

Note: If your score is between 1-98 or 119-999, please consult your advisor. These scores are not valid and something was entered incorrectly on your record.

## DEPARTMENTAL PLACEMENT EXAM

This is a summary of the Departmental Placement Exam policy. Click here (https://policy.wisc.edu/library/UW-1014/) to view the official policy in its entirety in the UW-Madison Policy Library.

In cases where a student has acquired knowledge, skills or competencies through experiences that are academic in nature and where there is an equivalent UW-Madison course, a department may offer credit by departmental exam which can then be used to meet course requisites and fulfill degree requirements. However, a student may not need the equivalent course for credit and simply wish to demonstrate competency to take course(s) at a higher level which require that competency. The departmental placement exam is a systematic, documented way that
will allow a student to demonstrate the academic knowledge, skills or experience required at a level that replaces the taking of a requisite forcredit course.

Departments must propose and have approved the placement exams they offer. Listed below are approved departmental placement exams.

## CHINESE

| Score | Placement Into |

| 90 | ASIALANG 422 (Eighth Semester Asian Language) |

## RETROACTIVE LANGUAGE CREDIT

In some schools and colleges at UW-Madison, it is possible to earn retro credits for prior work completed in a foreign language. To earn these credits, students must take a course above the first-semester level on the UW-Madison campus in French, German, Hebrew, Italian, Latin, Portuguese, Spanish, or any other language in which they have some proficiency and the course is also offered on the UW-Madison campus. The course must be designated with the Foreign Language attribute of $2 \mathrm{nd}, 3 \mathrm{rd}, 4 \mathrm{th}$, or 5 th semester language course and must be the first foreign language course taken by the student after enrolling in the university. Students who take a college-level language course while still in high school may still pursue retro credits at the university.

Students interested in earning retro credits should plan to take the foreign language placement test and consult with the foreign language advisor at SOAR (http://soar.wisc.edu/). Students must enroll in the language course prior to earning 30 degree credits (including credits transferred from other colleges but not including AP, CLEP, IB or retro credits in another language) and earn a grade of B or better. UW-Madison honors retro credits earned at previous UW institutions as long as the student enrolled in the course prior to earning 30 credits and earned a grade of B or better. Native speakers of a language are not eligible to earn retro credits in that language. For more information, see Retroactive Credits (p. 356) in the College of Letters \& Science section of the Guide.

## ADVANCED PLACEMENT (AP) AND INTERNATIONAL BACCALAUREATE (IB)

Both Advanced Placement (https://apcentral.collegeboard.org/courses/) and International Baccalaureate Higher Level (https://www.ibo.org/ programmes/diploma-programme/) examinations offer the possibility of receiving credits at UW-Madison. Many high schools offer courses through the College Board's Advanced Placement (AP) program or the International Baccalaureate (IB) program. UW-Madison offers degree credit based on a student's performance on the AP and IB exams administered in high schools. (AP and IB exams must be taken before entering UW-Madison.) Students who receive credit for a particular course through AP or IB and take the same course at UW-Madison will not receive degree credit twice; however, the grade in the UW-Madison course will be included in the overall grade point average.

## ADVANCED PLACEMENT (AP) CREDIT TABLES

| Exam/ <br> Subject | Score | Course | Credits | General Education | L\&S <br> Breadth | L\&S Level |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

In many cases, students may receive advanced-standing credit for some A-level exams. After a student has been admitted, the Office of Admissions and Recruitment (https://www.admissions.wisc.edu/) will perform an official evaluation of credit for A-Level exam results. In order to grant the credit, we require an official copy of the A-Level exam certificate from the examination board. Credits will not be posted from Results Slips or internal school transcripts. Examinations not listed in the A-Level table will be evaluated by the Office of Admissions and Recruitment for appropriate advanced standing credit.

## COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP)

The College-Level Examination Program (CLEP) (https:// clep.collegeboard.org/) allows students who have gained college-level knowledge outside the classroom to take examinations for possible college credit. Each exam is 90 minutes long and is made up primarily of multiplechoice questions. Some exams include an essay; however, UW-Madison does not require the essay for any CLEP exam. Credit will be granted only to those students who have completed fewer than 16 semester hours of college credit when the examinations are taken. Students must earn a minimum score of 65 to receive credit. The scores for awarding credit at the University of Wisconsin-Madison do not necessarily match those recommended by the American Council on Education.

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP CREDIT TABLE)

| Exam/ Score | Course | Credits General <br> Education | L\&S <br> Subject |  | 3 |

## This is a summary of the Departmental Credit by Exam policy. Click here (https://policy.wisc.edu/library/UW-1005/) to view the official policy in its entirety in the UW-Madison Policy Library.

Students may acquire knowledge, skills, and competencies through experiences that are academic in nature but may not necessarily correspond to a setting in which UW-Madison awards traditional credit. Credit by department examination is one opportunity for undergraduate students to demonstrate mastery of material that is equivalent to what would be learned in a specific UW-Madison course. The course credits granted through departmental examination are based on a student's demonstration that they have mastered the learning outcomes equivalent to those for the specified course. Examples of circumstances that will lead students to seek credit by examination may be: they completed preparation for advanced placement exams in high school but were unable to take the AP test; they have placement test scores that place them in a course lower than what they think they are prepared for; they did not get transfer equivalency for a course but they judge that they have completed the material in a course at another university.

Departments must propose and have approved the exams they offer. Listed below are the courses that have been approved for credit by exam.

## ANIMAL AND DAIRY SCIENCE

## Code

AN SCI/DY SCI 101 Introduction to Animal Sciences
Credits

For more information on how to earn credit by exam for this course, see the exam information (https://andysci.wisc.edu/animal-science-dairy-science-101-credit-by-exam/).

## CHEMISTRY

| Code | Title | Credits |
| :--- | :--- | ---: |
| CHEM 105 | General Chemistry I | 3 |
| CHEM 106 | General Chemistry II $^{2}$ | 4 |

For more information on how to earn credit by exam for these courses, see the exam information (https://chem.wisc.edu/chemistry-credit-byexamination/).

1
CHEM 101 General Chemistry I Laboratory + CHEM 105 General Chemistry I = CHEM 103 General Chemistry I
2
CHEM 102 General Chemistry II Laboratory + CHEM 106 General Chemistry II = CHEM 104 General Chemistry II

| Code | Title | Credits |
| MATH 221 | Calculus and Analytic Geometry 1 | 5 |
| MATH 222 | Calculus and Analytic Geometry 2 | 4 |
| MATH 234 | Calculus--Functions of Several | 4 |
|  | Variables |  |

For more information on how to earn credit by exam for these courses, see the exam information (https://www.math.wisc.edu/undergraduate/ calculusexam/).

## MAJORS AND CERTIFICATES

Explore UW-Madison Undergraduate Opportunities (http:// guide.wisc.edu/explore-majors/)

- Accounting, Certificate (p. 1463)
- African American Studies, B.A. (p. 375)
- African American Studies, B.S. (p. 379)
- African American Studies, Certificate (p. 384)
- African Cultural Studies, B.A. (p. 386)
- African Cultural Studies, B.S. (p. 391)
- African Studies, Certificate (p. 889)
- Agricultural and Applied Economics, B.S. (p. 51)
- Agricultural Business Management, B.S. (p. 56)
- Agronomy, B.S. (p. 67)
- American Indian and Indigenous Studies, Certificate (p. 396)
- Animal Sciences, B.S. (p. 73)
- Anthropology, B.A. (p. 400)
- Anthropology, B.S. (p. 405)
- Applied Mathematics, Engineering, and Physics, B.S. AMEP (p. 1144)
- Applied Social Science, BLS (p. 1105)
- Archaeology, Certificate (p. 409)
- Architecture, Certificate (p. 259)
- Art Education, B.S. (p. 1569)
- Art History, B.A. (p. 413)
- Art History, B.S. (p. 421)
- Art History, Certificate (p. 429)
- Art Studio, Certificate (p. 1577)
- Art, B.S. (p. 1579)
- Art, BFA (p. 1589)
- Arts and Teaching, Certificate (p. 1606)
- Asian American Studies, Certificate (p. 432)
- Asian Languages and Cultures, B.A. (p. 436)
- Asian Languages and Cultures, B.S. (p. 448)
- Astronomy-Physics, B.A. (p. 490)
- Astronomy-Physics, B.S. (p. 494)
- Athletic Healthcare, Certificate (p. 1715)
- Atmospheric and Oceanic Sciences, B.A. (p. 499)
- Atmospheric and Oceanic Sciences, B.S. (p. 504)
- Biochemistry, B.A. (L\&S) (p. 1108)
- Biochemistry, B.S. (CALS) (p. 108)
- Biochemistry, B.S. (L\&S) (p. 1117)
- Biological Systems Engineering, B.S. (p. 118)
- Biology Core Curriculum Honors, Certificate (p. 526)
- Biology in Engineering for Engineering Majors, Certificate (p. 242)
- Biology, B.A. (L\&S) (p. 1018)
- Biology, B.S. (CALS) (p. 84)
- Biology, B.S. (L\&S) (p. 1037)
- Biomedical Engineering, B.S. (p. 244)
- Botany, B.A. (p. 529)
- Botany, B.S. (p. 533)
- Business Administration: Human Resources, BBA (p. 1494)
- Business Administration: Management, BBA (p. 1497)
- Business Administration: Marketing, BBA (p. 1513)
- Business Fundamentals, Summer Certificate (p. 1470)
- Business Management for Agricultural and Life Sciences, Certificate (p. 60)
- Business, Certificate (p. 1470)
- Business: Accounting, BBA (p. 1465)
- Business: Actuarial Science, BBA (p. 1530)
- Business: Finance, Investment, and Banking, BBA (p. 1474)
- Business: Information Systems, BBA (p. 1518)
- Business: International Business, BBA (p. 1477)
- Business: Management and Human Resources, BBA (p. 1499)
- Business: Marketing, BBA (p. 1515)
- Business: Operations and Technology Management, BBA (p. 1521)
- Business: Real Estate and Urban Land Economics, BBA (p. 1527)
- Business: Risk Management and Insurance, BBA (p. 1534)
- Business: Supply Chain Management, BBA (p. 1524)
- Cartography and Geographic Information Systems, B.A. (p. 767)
- Cartography and Geographic Information Systems, B.S. (p. 771)
- Chemical Engineering, B.S. (p. 252)
- Chemistry, B.A. (p. 570)
- Chemistry, B.S. (p. 577)
- Chicana/o and Latina/o Studies, B.A. (p. 585)
- Chicana/o and Latina/o Studies, B.S. (p. 590)
- Chicana/o and Latina/o Studies, Certificate (p. 594)
- Chinese Professional Communication, Certificate (p. 459)
- Chinese, B.A. (p. 463)
- Chinese, B.S. (p. 469)
- Civil Engineering, B.S. (p. 260)

- School of Human Ecology (p. 1779)
- School of Nursing (p. 1827)
- School of Pharmacy (p. 1849)

## ADVISING

## WHAT IS ADVISING?

At UW-Madison advising is a partnership between students and the network of advisors they build during their time here. Advising is one of the most essential resources available to students and can play a pivotal role in the college experience and beyond. Advisors can help students get the most out of their Wisconsin Experience by helping them make wellinformed decisions, sharing strategies for success, supporting them as they encounter challenges, connecting them to resources, and providing information about campus policies and procedures.

There are many reasons to see an advisor and advising is not limited to certain subjects or specific months of the year. Here are some of the many topics that advisors can help students with:

- Setting academic, career, and life goals
- Connecting a major to a career
- Creating a graduation timeline plan
- Selecting courses and fulfilling degree requirements
- Connecting with tutors
- Getting involved with campus organizations
- Practicing for job interviews
- Choosing a study abroad program
- Finding an internship
- Researching volunteer opportunities
- Understanding university policies and deadlines
- Talking about graduate school
- Proofreading resumes and cover letters

To find contact information for advisors, including the assigned advisor, see this link (https://advising.wisc.edu/find-an-advisor/).

## SCHOOL AND COLLEGE ACADEMIC ADVISING OFFICES

UW-Madison has eight undergraduate schools and colleges. All undergraduates are assigned to an advisor in their area of academic interest, or to a Cross-College Advising Service advisor who specializes in working with students who are deciding on an academic major.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES (CALS)

Academic Affairs Office
cals.wisc.edu/academics/undergraduate-students/advising (http:// cals.wisc.edu/academics/undergraduate-students/advising/)

## COLLEGE OF ENGINEERING (EGR)

## CROSS-COLLEGE ADVISING SERVICE (CCAS)

The Cross-College Advising Service (CCAS) (https://ccas.wisc.edu/) is a campus-wide advising office for undergraduate students who are in the process of deciding on a major and want to explore the many academic opportunities on campus. CCAS also assists students who are considering changing majors or who have not been admitted to limitedenrollment programs and are evaluating other options. CCAS advisors are knowledgeable about all the programs and majors offered by the eight undergraduate schools and colleges on campus. Each year at SOAR (Student Orientation, Advising, and Registration) (http://soar.wisc.edu/), nearly 2000 students in the entering class self-identify as "undecided/ exploring" and are assigned to CCAS advisors.

In addition to the main CCAS office in Ingraham Hall, CCAS has residence hall advising offices in Chadbourne Residential College, Witte Hall, Sellery Hall, Ogg Hall, and Dejope Hall. The Dejope office is available to all students in Lakeshore-area residence halls.
to become? Where am I going and how do I get there?" Career planning can be a multi-year process that includes self-assessment and reflection, exploring academic and career options, gaining experience in areas of interest, and ultimately conducting a job or graduate school search.

Each school or college within UW-Madison has a dedicated career services office and students are encouraged to work with a career advisor during their time at the University. Students who are exploring a variety of major and career paths can work with the Career Exploration Center. Links to each of the campus career services offices are available below and online at www.careers.wisc.edu (https://www.careers.wisc.edu).

Students can work with career services staff to engage in a wide variety of career planning activities, including: individual or group advising, educational workshops, job shadowing, informational interviewing, mock interviews, internships, career fairs, and more.

## HANDSHAKE

Students can find jobs and internships, and connect to campus career centers and events through their free UW-Madison Handshake account. Handshake is available through the MyUW dashboard, and students can activate their free Handshake account now by visiting https:// wisc.joinhandshake.com/.

## CAREER ADVISING

Students can meet with individual career advisors throughout their undergraduate experience as they explore and navigate their career plans. Career advisors can help students with a variety of areas, including:

- Career exploration and assessment
- Build skills and relevant experiences
- Internship and job search strategies
- How to network
- Connecting with alumni and employers
- Interview preparation and practice
- Job offers and negotiation
- Résumé/cover letter reviews

## CAREER EXPLORATION CENTER (CEC)

The Career Exploration Center (CEC) (https://cec.ccas.wisc.edu/) supports undergraduate students who are undecided about their career and/or academic goals. They assist students in gathering information, personal insight, and experiences that help them explore their options and provide direction in planning the next steps in their career journey.

## School of Business (BUS)

Undergraduate Program Office: https://business.wisc.edu/undergraduate/ careers/

## PRE-PROFESSIONAL STUDY

At UW-Madison, students interested in pursuing graduate-level health professions and law school have access to specialized Pre-Professional Advising resources. Pre-Professional Advising is made up of two colocated and highly collaborative career advising units: The Center for PreHealth Advising and the Center for Pre-Law Advising. The units share a joint mission of helping to increase access, equity, and diversity within the fields of health and law.

## CENTER FOR PRE-HEALTH ADVISING <br> prehealth.wisc.edu (https://prehealth.wisc.edu)

Pre-Health-e.g., Pre-Med/DO, Pre-PA, Pre-OT, Pre-Vet MDis not an undergraduate major, it is an intention. All new students should plan to enroll in our free, online, and self-paced Canvas Courses: Pre-Health 101 (https://docs.google.com/forms/d/ e/1FAlpQLSdyOgwuvVZ4kpgIKIn-1GcHxr2vxtKj1yN_aqg9yfQsFLzV6g/ viewform/). Students should major in areas of true interest, meet regularly with their academic advisor(s), and proactively utilize the resources offered by the Center for Pre-Health Advising (CPHA) if they are considering further schooling and careers in the following areas: medicine, dentistry, occupational therapy, physical therapy, physician assistant, public health, chiropractic, optometry, veterinary medicine, or other graduate-level health programs. Students interested in PharmD are strongly encouraged to access advising through the UW School of Pharmacy, due to the many unique aspects of pursuing this degree.

## CENTER FOR PRE-LAW ADVISING

prelaw.wisc.edu (https://prelaw.wisc.edu)
Pre-law is not an undergraduate major, it is an intention. Students should major in areas of true interest, meet regularly with their academic advisor(s), and proactively utilize the resources offered by the Center for Pre-Law Advising (CPLA) for support in considering, preparing for, and applying to law school.

## STUDY ABROAD ADVISING SCHOOL/COLLEGE STUDY ABROAD

Several schools and colleges have their own study abroad advising locations and offer information about study abroad programs that are directly related to certain areas of study.

- College of Agricultural and Life Sciences
- College of Engineering
- University of Wisconsin Law School
- School of Business

## NTERNATIONAL ACADEMIC PROGRAMS (IAP) <br> studyabroad.wisc.edu (http://studyabroad.wisc.edu)

International Academic Programs (IAP) offers more than 200 programs on six continents for students of all majors. Courses through IAP programs can count toward degree requirements, allowing students to stay on track for graduation. Scholarships, grants, and financial aid are available.

## INTERNATIONAL INTERNSHIPS

internships.international.wisc.edu (http:// internships.international.wisc.edu)

The International Internship Program (IIP) works with students of all majors looking to gain experience and explore careers through international internships. Students can intern with organizations around the world. Advising, academic credits, and scholarships are available.

## NON-APPROVED STUDY ABROAD

Students considering participating in a study abroad program sponsored by a university other than UW-Madison should review this page: https:// studyabroad.wisc.edu/nonapproved/ for more information.

## GRADUATING IN FOUR YEARS OR FEWER

UW-Madison encourages, supports, and expects students to work with academic advisors to create, maintain, and plan a graduation timeline. Students should consult with their assigned academic advisor(s) before each enrollment period, and more as needed. Additionally, each major in the Guide includes a four-year plan to help students map out a path to graduation, with help from advisor(s).

To ensure a timely graduation, students should discuss the following topics with their advisor:

- Exploring interests while making progress on degree requirements
- Setting and achieving academic and career goals
- Academic challenges and connecting to resources that support academic success
- Procedures and requirements for declaring a major
- Using the Degree Audit Reporting System (DARS) (https:// registrar.wisc.edu/dars/) to check progress toward the degree
- Any changes to a declared major, as well as alternative plans if applying to a competitive limited-enrollment program
- A strategic course schedule to stay on track for graduation

## DEGREE AUDIT REPORTING SYSTEM (DARS)

A Degree Audit Reporting System (DARS) (https://registrar.wisc.edu/ dars/) report is an automated summary of a student's degree progress. All schools and colleges at UW-Madison use DARS to audit the progress of most undergraduate degree programs and certificates.

DARS reports indicate which requirements are completed, which are complete with in-progress and planned courses, and which remain unsatisfied. The report may specify courses that meet unsatisfied requirements. For most undergraduate programs, DARS is the tool used to determine completion of the program and/or eligibility to graduate.

Students can request and review their DARS in the Student Center via MyUW, or through the Course Search \& Enroll app, and should contact their assigned advisor(s) for help reading and interpreting their DARS report.

## OFFICER EDUCATION

The Reserve Officers Training Corps (ROTC) prepares students to become commissioned officers in the U.S. Air Force, Army, Navy, or Marines, as well as for civilian careers. Students may be enrolled in ROTC while pursuing a degree at UW-Madison. ROTC courses are open to all undergraduates who have met the prerequisites. The number of ROTC credits that count toward a UW-Madison degree can vary by department and school or college. Prospective and registered students should contact the military program offices listed in this section of the catalog for information about regular course offerings, summer camp programs, and scholarships.

## AIR FORCE ROTC-AEROSPACE STUDIES

The Air Force ROTC (AFROTC) program is the primary path available to enter the U.S. Air Force as an officer. Students enroll in the AFROTC program while working toward the bachelor's degree in any major they choose. They attend an aerospace studies class each semester, a handson leadership laboratory, and weekly physical fitness sessions, while learning about how the Air Force works and deciding which job fields match their interests. Upon graduating, they enter active duty service as second lieutenants, in leadership and management roles in the Air Force.

Most career fields have an active-duty commitment of four years after college. If students choose to separate from the Air Force at that time, they can pursue other careers with experience and the distinction of "military officer" on their resumes.

AFROTC is designed for students with three or more years remaining until graduation. To receive an officer's commission, AFROTC cadets must complete all necessary requirements for a degree as well as courses specified by the Air Force. Courses are often taken for academic credit as part of a student's electives. The amount of credit given toward a degree for AFROTC academic work is determined by the student's school or college, and major department.
REQUIRED COURSES FOR AIR FORCE ROTC/ AEROSPACE STUDIES
General Military Course, total of 4 credit hours:

| Code | Title | Credits |
| :--- | :--- | ---: |
| A F AERO 101 | Heritage and Values I | 1 |
| A F AERO 102 | Heritage and Values II | 1 |
| A F AERO 201 | Team and Leadership Fundamentals | 1 |
| A F AERO 202 | I Team and Leadership Fundamentals <br> II (General Military Course, total of 4 <br> credit hours:) | 1 |

| Professional Officer Course, total of $\mathbf{1 2}$ credit hours: |  |  |
| :--- | :--- | ---: |
| Code | Title <br> Credits |  |
| A F AERO 301 | Leading People and Effective <br> Communication I | 3 |
| AF AERO 302 | Leading People and Effective <br> Communication II | 3 |
| A F AERO 401 | National Security Affairs | 3 |

A F AERO $402 \quad \begin{aligned} & \text { Leadership Responsibilities \& } \\ & \text { Commissioning Preparation }\end{aligned}$
Cadets must enroll in A F AERO 501 Leadership Laboratory I every Fall semester and A F AERO 502 Leadership Laboratory II every Spring semester, in addition to their lecture courses, for a total of 8 credit hours.

Scholarships are available to qualified applicants. Scholarships may provide full tuition, laboratory and incidental fees, and reimbursement for textbooks. In addition, scholarship cadets receive a nontaxable allowance ranging from $\$ 300$ to $\$ 500$ per month, depending on academic/ AFROTC year. Juniors and seniors automatically receive $\$ 450$ and $\$ 500$, respectively.

For Participating Students:
Participating students are those who are registered in AF AERO courses but do not seek a commission. Participating students are not cadets, and the following apply:

- Must create a WINGS account; however, students are not required to complete the application for AFROTC membership. Accounts can be created here: https://wings.holmcenter.com/psp/hcp/LANDING/ PORT_HCP/c/W_ROTC.W_PTL_PRESCREEN.GBL
- May enroll in AFROTC classes for academic course credit only.
- Will not be issued uniforms.
- Will not be included in Detachment Commander's Ranking.
- Are ineligible to compete in any selection program.
- Cannot compete for an Enrollment Allocation (EA), contract, or commission.

All AFROTC courses are open to all students regardless of membership in the program. Students are invited to take one of the program's courses to determine if AFROTC is right for them with no obligation to join. For more information, please contact the Recruiting Officer at 608-262-3440 or 608-265-4812; afrotc@mailplus.wisc.edu.

## MILITARY SCIENCE-ARMY ROTC

The Army Reserve Officers' Training Corps (ROTC) is the nation's largest leadership and management-development training program. It offers the opportunity to earn a commission as a Second Lieutenant for Active Duty, Army Reserve, or Army National Guard while pursuing an academic degree. It enables young men and women to prepare themselves to be leaders in the Army or the civilian career field of their choice. The traditional four-year Army ROTC Program is divided into a two-year Basic Course and a two-year Advanced Course. A non-contracted student enrolled in the Basic Course does not incur a military service obligation.

## BASIC COURSE

This instruction introduces the student to fundamental military and leadership subjects. It is normally taken over four successive semesters, but may be completed in as few as two semesters. Students should discuss available options with the Scholarship \& Enrollment Officer before registering for courses if they have fewer than four semesters to complete the Basic Course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take our class and lab with no military obligation. Students can enroll in a lecture without enrolling in the lab, but cannot enroll in a lab without the corresponding lecture. Labs are intended to provide practical leadership experience and military skills

3 training such as map reading, land navigation, field training, and rifle marksmanship. Additionally, students who start in the Aerospace Studies or Naval Science programs can switch to Military Science and continue on toward graduation with no penalty.

| Code | Title | Credits |
| :--- | :--- | ---: |
| MIL SCI 101 | Foundations of Officership | 1 |
| MIL SCI 110 | Leadership Lab 1A | 1 |
| MIL SCI 102 | Basic Leadership | 1 |
| MIL SCI 111 | Leadership Lab 1B | 1 |
| MIL SCI 201 | Individual Leadership Studies | 2 |
| MIL SCI 210 | Leadership Lab 2A | 1 |
| MIL SCI 202 | Leadership and Teamwork | 2 |
| MIL SCI 211 | Leadership Lab 2B | 1 |

## ADVANCED COURSE

Students who have completed the Basic Course or an equivalency (see Two-Year Program) and have passed all enrollment eligibility criteria continue on into the Advanced Course. This course consists of the following lectures, leadership labs, a separate military history course, physical fitness training sessions, and a four-week summer camp (Advance Camp) at Fort Knox, Ky. During labs and physical training sessions students are provided practical leadership opportunities to prepare them for Advance Camp and their future military careers. Students normally attend Advance Camp between their junior and senior years of Military Science. Students must complete all components of this course to earn a commission.

| Code | Title | Credits |
| :--- | :--- | ---: |
| MIL SCI 301 | Leadership and Problem Solving | 2 |
| MIL SCI 310 | Leadership Lab 3A | 1 |
| MIL SCI 302 | Leadership and Ethics | 2 |
| MIL SCI 311 | Leadership Lab 3B | 1 |
| MIL SCI 401 | Leadership and Management | 2 |
| MIL SCI 410 | Leadership Lab 4A | 1 |
| MIL SCI 402 | Officership | 2 |
| MIL SCI 411 | Leadership Lab 4B | 1 |
| MIL SCI 491 | American Military History | 3 |

## TWO-YEAR PROGRAM

Students who are veterans, members of the Army National Guard/ Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the Advanced Course. Students who did not complete the ROTC Basic Course (see above), to include graduate and doctoral students, but have two years of academic study remaining may be eligible to attend Basic Camp. This option compresses the Basic Course curriculum into a fourweek summer camp held at Fort Knox, KY prior to starting the Advanced Course. Students who believe they qualify for this program should consult with the Scholarship \& Enrollment Officer for more information.

## SCHOLARSHIPS

Qualified students may compete for Army ROTC scholarships ranging from two to three years in duration. High school students can apply for a four year scholarship during their senior year of high school. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition \& fees (both in and out-of-state) or room and board (capped at \$5,000/semester) but not both, $\$ 600 /$ semester for textbooks and laboratory expenses, and a
tax fee subsistence stipend of $\$ 420$ for each month of the regular school year. Interested students should consult with the Scholarship \& Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Josh Beyerl in the Department of Military Science, 1910 Linden Drive, 608-262-3411, armyrotc@mailplus.wisc.edu.

## NAVAL SCIENCE-NAVAL ROTC MISSION

The Naval ROTC Program was established to develop future officers mentally, morally and physically and to instill in them with the highest ideals of duty, and loyalty, and with the core values of honor, courage and commitment in order to commission college graduates as Naval officers who possess a basic professional background, are motivated toward careers in the Naval service, and have a potential for future development in mind and character so as to assume the highest responsibilities of command, citizenship and government.

## PROGRAM DESCRIPTION

The purpose of the Naval ROTC Program is to educate and train qualified young men and women for service as commissioned officers in the Navy's unrestricted line, and the Marine Corps. As the largest single source of Navy and Marine Corps officers, the Naval ROTC Scholarship Program plays an important role in preparing mature young men and women for leadership and management positions in an increasingly technical Navy and Marine Corps.

Selected applicants for the four-year Naval ROTC Scholarship Program are awarded scholarships through a highly competitive national selection process, and receive full tuition, books stipend, educational fees and other financial benefits. Upon graduation, midshipmen are commissioned as active duty officers in the Navy's unrestricted line or the Marine Corps.

The four-year Naval ROTC Scholarship Program is available to qualified students who graduate from high school before August 1 of the year they intend to start college, and have earned less than 30 credit hours of college-level courses.

Students may affiliate with the Naval ROTC program, with the approval of the Professor of Naval Science, as College Program midshipmen, but receive none of the monetary benefits of scholarship students. College program midshipmen may apply and compete for 3-, 2-, or 1-year NROTC scholarships in each of their freshman, sophomore and junior academic years.

Students selected for the Navy ROTC Scholarship Program make their own arrangements for college enrollment and room and board, and take the normal course load required by the college or university for degree completion.

Upon graduation, midshipmen who complete all academic requirements in the Navy ROTC program are commissioned as an Ensign in the Navy or a $2^{\text {nd }}$ Lieutenant in the Marine Corps and will be required to serve a minimum of five years of active military service. (Additional service requirements may apply for specific service assignments; e.g., pilot, nuclear power officer.)

## PROGRAM REQUIREMENTS

- Complete all requirements for a bachelor's degree.
- Complete specified Naval Science courses:

## Navy Option

| Code | Title | Credits |
| :--- | :--- | ---: |
| NAV SCI 101 | Introduction to Naval Science | 2 |
| NAV SCI 102 | Seapower-Maritime Affairs | 3 |
| NAV SCI 201 | Naval Leadership and Management | 3 |
| NAV SCI 202 | Navigation | 3 |
| NAV SCI 301 | Naval Engineering | 3 |
| NAV SCI 302 | Naval Weapons | 3 |
| NAV SCI 401 | Naval Operations | 3 |
| NAV SCI 402 | Naval Leadership and Ethics | 3 |

## Marine Option

| Code | Title | Credits |
| :--- | :--- | ---: |
| NAV SCl 101 | Introduction to Naval Science | 2 |
| NAV SCl 102 | Seapower-Maritime Affairs | 3 |
| NAV SCl 201 | Naval Leadership and Management | 3 |
| NAV SCl 350 | Fundamentals of Maneuver Warfare | 3 |
| NAV SCl 351 | Land Campaigns | 3 |
| NAV SCl 402 | Naval Leadership and Ethics | 3 |

- In addition (or concurrent) to prescribed undergraduate degree and Naval Science course load, midshipmen must also satisfy these academic requirements:
- Calculus (two semesters, by end of sophomore year). Not required for Marine option students.
- Physics (two-semesters of calculus-based physics, by end of junior year). Not required for Marine option students.
- English grammar and composition (two-semesters).
- National Security Policy/American Military Affairs (one-semester).
- World Culture/Regional Studies (one-semester; certain countries or cultures do not satisfy). Not required for Marine option students.
- Maintain a minimum, cumulative 2.5 GPA.
- Register for, and attend a one credit Naval Science leadership lab each semester (NAV SCI 175 Introductory Naval Laboratory I, NAV SCI 176 Introductory Naval Laboratory II, NAV SCI 275 Elementary Naval Laboratory I, NAV SCI 276 Elementary Naval Laboratory II, NAV SCI 375 Intermediate Naval Laboratory I, NAV SCI 376 Intermediate Naval Laboratory II, NAV SCI 475 Advanced Naval Laboratory I, NAV SCI 476 Advanced Naval Laboratory II)
- Participate in a 4-6-week training period each summer

## SUMMER TRAINING REQUIREMENTS

A significant portion of a midshipman's professional training during their four-year curriculum is received during summer training.

Navy option midshipmen attend summer training, to include Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors and seniors.

Marine Corps option summer training includes Career Orientation and Training for Midshipmen (CORTRAMID) for rising sophomores, and Fleet Exposure Cruises for rising juniors. All rising senior Marine option midshipmen attend the 6-week Marine Corps Officer Candidates School in Quantico, VA.

Midshipmen must ultimately make decisions as to which warfare area they will request to be commissioned into; CORTRAMID and the various summer training programs are designed to instill awareness of these areas and provide midshipmen with the background necessary to make informed decisions regarding their career choice. Midshipmen select their order of preference of available warfare communities and are ultimately assigned based on their class rank and the needs of the Navy and Marine Corps.

## POSSIBLE SUMMER TRAINING ASSIGNMENTS

- CORTRAMID: Midshipmen assigned to this training will travel to a Fleet concentration area on either the East or West coast and spend a week with each of the following warfare communities: surface ship, submarine, aviation, and Marine Corps.
- Nuclear Power: Midshipmen can be assigned to a nuclear submarine or aircraft carrier.
- Ashore Aviation Option: Selected, qualified midshipmen train with a shore-based Navy aviation squadron, including flight time if feasible.
- Surface Warfare: Midshipmen can be assigned to a Navy ship in the United States or in overseas ports.

## PEOPLE

Air Force ROTC-Aerospace Studies: Air Force ROTC-Aerospace Studies: Lieutenant Colonel Eric Visger, Professor of Aerospace Studies/ Detachment Commander; Major Angela Ferreira, Assistant Professor of Aerospace Studies/Operations Flight Commander; Captain Kaitlynn Williams, Assistant Professor of Aerospace Studies/Recruiting Officer; Major Jeremy Ware, Assistant Professor of Aerospace Studies/Education Officer.

Military Science-Army ROTC: Professor Lieutenant Colonel Cheney; Assistant Professor Captain Schwartz, Assistant Professor; Assistant Professor Captain Ali; Assistant Professor Captain Schultz; Enrollment Officer: Josh Beyerl

Naval Science-Professor, CAPT Barnett; Associate Professor, CDR Choquette; Assistant Professors LT Hippe, LT Fox, and Marine Capt. Hoffman. The assistant professors act as undergraduate advisors and may be contacted through the department office.

## WISCONSIN EXPERIENCE

## WISCONSIN EXPERIENCE

The Wisconsin (https://wisconsinexperience.wisc.edu)Experience is UWMadison's vision for the total student experience, which combines learning in and out of the classroom. Tied to the Wisconsin Idea and steeped in our long-standing institutional values-the commitment to the truth, shared participation in decision-making, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

Through the Wisconsin Experience, our students will engage in the following areas of intellectual and personal growth.

## Empathy and Humility

- Develop and demonstrate cultural understanding of self and others
- Engage locally, nationally, and globally in a respectful and civil manner
- Appreciate and celebrate one another's abilities, views, and accomplishments

## Relentless Curiosity

- Actively learn with expert instructors, scholars, and peers
- Engage in creative inquiry, scholarship, and research
- Develop resilience, and foster courage in life and learning

## Intellectual Confidence

- Develop competence, depth, and expertise in a field of study
- Integrate ideas and synthesize knowledge across multiple contexts
- Exercise critical thinking and effective communication

## Purposeful Action

- Apply knowledge and skills to solve problems
- Engage in public service, partner with others, and contribute to community
- Lead for positive change

## STUDENT LEARNING AT UW-MADISON

Student engagement and activism are deeply rooted in UW-Madison's rich history of academic and research excellence. Occasionally, students are expected to help the university better understand and improve student learning by participating in evaluative activities, which include surveys, focus groups, and questionnaires, and by providing examples of their work through presentations, posters, demonstrations, and writing samples. We rely on the student perspective when assessing the effectiveness of academic and co-curricular programs. By participating, students help improve their own educational and related experiences and contribute to better educational experiences for future students.

## ACADEMIC ENRICHMENT AND HONORS PROGRAMS

UW-Madison offers students many ways to enrich their academic program, regardless of the major field of study they choose to pursue. Engaging in research, studying abroad, being part of learning communities, participating in university honors, becoming a student leader, engaging in service learning-these are all vital components that enhance and strengthen classroom learning. This partnership between in- and out-
of-classroom learning form the foundation of the Wisconsin Experience. The university encourages students to take advantage of opportunities to integrate their learning experiences.

## Honors Programs

Honors programs, which vary slightly among the schools and colleges, are designed for students who wish to undertake work that is more intensive than regular coursework. High grade point averages are required to maintain honors student standing. Students should refer to Honors Programs (https://teachlearn.provost.wisc.edu/honors-programs/) for more information including specific school or college programs or to contact an honors advisor.

## Undergraduate Research Opportunities

One of the most exciting things in life is to discover something new. UW-Madison provides unique opportunities to learn from and work with some of the world's leading researchers and scholars. Options range from assisting with professors' ongoing research to designing and directing one's own projects. For many examples, see Undergraduate Research Opportunities (https://teachlearn.provost.wisc.edu/undergraduateresearch/). The Undergraduate Research Scholars Program (http:// urs.Is.wisc.edu/) is one opportunity available in the first or second year of study. Students may cap off their undergraduate degree with a senior thesis or senior honors thesis and are encouraged to present their work at the Undergraduate Symposium. For program descriptions, see Undergraduate Symposium (https://ugradsymposium.wisc.edu/). For a sampling of the many grants and awards available to support and honor this work, visit the Undergraduate Academic Awards Office (https:// awards.advising.wisc.edu/).

## Community-Based Learning

Undergraduates have access to more than 100 community-based learning courses each year. These courses emphasize hands-on experiences that address real-world issues as a venue for educational growth. More information on community-based learning is available at the Morgridge Center for Public Service (http://morgridge.wisc.edu/).

## Learning Communities

UW-Madison's rich tradition of supporting learning communities (https:// www.housing.wisc.edu/residence-halls/learning-communities/) means that the traditional classroom is not the only place where students learn. Students may choose to participate in any of the many residential and nonresidential learning communities, where students, faculty, and staff work together as both learners and teachers to pursue their academic interests. For more information about residential options, refer to University Housing's learning communities (https://www.housing.wisc.edu/ residence-halls/learning-communities/).

## STUDY ABROAD PROGRAMS

Studying abroad extends the boundaries of the classroom to the world. It is an exciting way for students to complement and enhance their oncampus learning while earning meaningful credit toward the major and degree. Each year UW-Madison sends more than 2,000 students on study abroad programs around the globe, including domestic study away options within the United States.

International Academic Programs (IAP) (https://
www.studyabroad.wisc.edu/) serves as the central study abroad office on campus, offering more than 200 programs in over 60 countries around the world. IAP program offerings, available to all majors for students at all levels, range from short-term faculty-led opportunities to intensive language study, internships, a semester or a year at a university abroad, service-learning, and programs with special themes. Students can visit the

Study Abroad Resource Center, 301 Red Gym, to meet with advisors who can help students prepare and research study abroad options.

Additionally, in partnership with IAP, the College of Agricultural and Life Sciences, the College of Engineering, and the Wisconsin School of Business offer programs geared specifically for their academic disciplines. All approved UW-Madison programs share policies, procedures, and best practices, and are featured on the UW Study Abroad Program Search (https://studyabroad.wisc.edu/programs/).

## The Value of Study Abroad

Employers are increasingly looking for workers who not only have technical knowledge, but also "soft skills" such as critical thinking, problem solving, time management, and communication skills deemed necessary for success in a global workforce. Study abroad is one of the best ways students can acquire global skills and stand out to potential employers. Study abroad alumni have better job prospects. Based on a survey conducted by IES Abroad (http://thepienews.com/news/us-study-abroad-alumni-have-better-job-prospects/), 90 percent of study abroad alumni found their first job within six months of graduation. In addition to being able to experience new customs, cultures, interests, and food, alumni have reported that study abroad increased their confidence and had a lasting impact on their worldview (https://www.iesabroad.org/study-abroad/benefits/alumni-survey-results/).

Regardless of major, students will find that study abroad has much to offer. The variety of program sites and durations (semester, spring break, summer, winter, year) allow students to select programs based on individual academic interests and personal goals and objectives.

## Access and Meaningful Credit for All Majors

In general, credits earned abroad can count toward fulfilling (https:// studyabroad.wisc.edu/academics/) college and major requirements in any UW-Madison school or college. Seniors in most schools and colleges who complete their major and degree requirements while abroad on a UWMadison program can graduate at the end of their study abroad program.

Each study program has its own eligibility requirements. Students are encouraged to talk with their academic advisors early in their academic careers about how study abroad can fit into their academic plans and future career goals. We are also working with departments to create Major Advising Pages (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/) to highlight programs that work best for students' degree plans.

## Costs and Funding

Students who are thinking about studying abroad or have already decided to do so may be concerned about how they will fund the experience. We frequently hear from students that the program cost is a primary factor in deciding whether they are able to pursue studying abroad. Instead of tuition, students pay a program fee to cover the actual costs of the experience, which is unique to each program. Programs vary widely in cost, so it is likely that we have a program for every budget. Sometimes studying abroad is no more expensive than studying on campus, and other times the cost can be higher. We work with students to create funding (https:// studyabroad.wisc.edu/funding/) plans for their time abroad.

Students who study abroad in UW-Madison-sponsored programs may be eligible to use federal financial aid toward the costs of the program. Students should meet with the UW-Madison Office of Student Financial Aid to discuss eligibility requirements. In addition, students can apply for scholarships (https://www.studyabroad.wisc.edu/scholarships.html) specifically designated for use with study abroad programs. These include UW-Madison, national, and international scholarship opportunities.

Students can also use most campus and academic department scholarships for UW-Madison-sponsored study abroad programs.

## Diversity and Inclusion

Study Abroad staff are committed to providing quality study abroad and domestic study away programs for every UW-Madison student. We work strategically to identify, address, and remove barriers that may prevent participation and to provide a welcoming and inclusive environment for students. Our team actively engages with students, faculty, and staff from diverse backgrounds and prioritizes the continuous development of our knowledge and cultural competence. We also recognize the importance of increasing access to study abroad for historically underrepresented student populations. We are committed to diversity and inclusion so that every student can engage with and understand their identity through a new lens and continue to develop and make progress on their personal, professional, and academic goals.

## REQUIREMENTS FOR <br> UNDERGRADUATE DEGREES

## REQUIREMENTS FOR UNDERGRADUATE DEGREES

This is a summary of the Requirements for Undergraduate Degrees policy. Click here (https://policy.wisc.edu/library/UW-1060/) to view the official policy in its entirety in the UW-Madison Policy Library.

The University of Wisconsin-Madison sets minimum standards that must be met by all students pursuing an undergraduate degree. The information in the following paragraphs provides general information about study at UW-Madison. Requirements may vary among the schools and colleges, and for specific programs. Students should learn about and understand the specific requirements for their program of study.

## TOTAL DEGREE CREDITS

To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits (which includes AP, IB and other test credit, transfer credit, and retroactive credit). Requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. Undergraduate Majors (p. 21).

## RESIDENCE CREDIT

Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats, as credits earned in UW-Madison Study Abroad/Study Away programs.
Some schools and colleges may have additional requirements concerning courses taken in residence; students should refer to the specific school or college section of the Guide or consult with an advisor.

## UNDERGRADUATE MAJOR DECLARATION

This is a summary of the Undergraduate Major Declaration policy. Click here (https://policy.wisc.edu/library/UW-1009/) to view the official policy in its entirety in the UW-Madison Policy Library.

#### Abstract

Undergraduate degrees at UW-Madison presume that students are completing a program of study that consists of a degree program that combines the requirements for the degree with focused study in a discipline, or that combines school or collegewide requirements with an undergraduate major in which they pursue focused study. All undergraduates are expected to have declared or to have been admitted to their focused area of study by the end of the semester in which they have accumulated 86 credits. Students who have not met this expectation may be prevented from enrolling in future terms until they meet with their advisor. Some schools and colleges have additional requirements governing when majors may be declared; students should refer to the specific school or college section of the Guide and consult with an advisor about declaring their major.

## ACADEMIC PROBATION

Undergraduate students must maintain the minimum academic thresholds, including the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## GENERAL EDUCATION REQUIREMENTS

This is a summary of the General Education Requirements policy. Click here (https://policy.wisc.edu/library/UW-1059/) to view the official policy in its entirety in the UW-Madison Policy Library.

All undergraduate students at UW-Madison must complete the universitywide General Education Requirements, which are designed to convey the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. These requirements provide for breadth across the humanities and arts, social studies, and natural sciences; competence in communication, critical thinking, and analytical skills necessary for success in college and beyond; and investigation of the issues raised by living in a culturally diverse society. This core is intended to provide students with intellectual and practical skills, basic knowledge of human cultures and the physical world, strategies for understanding these topics, and tools intended to contribute to their sense of personal and social responsibility. General Education complements the work students do in their majors and degrees. Together, these requirements help students learn what they need to know not just for making a living, but also for making a life.

Completing the General Education Requirements is an important part of achieving these competencies, and to do so, students choose from many courses in communication, ethnic studies, quantitative reasoning, and breadth of study across disciplines in the natural sciences, humanities, literature, and arts, and social and behavioral sciences.

Each school and college may choose to allow General Education courses to count toward other degree and/or major requirements. Students should always check with their advisors to discuss any additional degree requirements and determine if students are required to take specific General Education courses or to complete the requirements in a particular order. Students should review their Degree Audit (DARS) report to see how they are progressing toward fulfilling the General Education requirements. Please refer to this website (https://gened.wisc.edu/) for more information about the requirements.

The university-wide General Education requirements are

## BREADTH, 13-15 CREDITS, DISTRIBUTED OVER THREE AREAS

All students must complete 13-15 credits of coursework intended to provide a breadth of experience across the major modes of academic inquiry. This requirement encourages students to adopt a broad intellectual perspective, to examine the world through investigative, critical, and creative strategies practiced in the natural (computational, biological, and physical) sciences, social and behavioral sciences, as well as in the arts and humanities.

## Learning Outcomes

Students acquire critical and creative thinking skills as well as enhance their problem-solving skills through a breadth of study across the humanities and arts, social studies, computational, biological sciences and physical sciences. In courses satisfying the Breadth requirement, students will:

- Articulate examples of significant contributions to human understanding achieved through various "ways of knowing" found in the arts and humanities; social and behavioral sciences; and computational, biological, and physical sciences
- Recognize and articulate the ways in which different disciplines approach questions that call upon different tools of inquiry, understanding, and creative enterprise
- Identify ways in which multiple tools of inquiry and understanding can be used to achieve greater insight into resolving "big" questions (e.g., climate change, poverty, global health etc.), evaluating the strengths and weaknesses of those approaches, and understanding which complementary approaches will help achieve meaningful change
- Evaluate different modes of inquiry across the humanities and arts; social studies; computational, biological, and physical sciences, and identify strengths and weaknesses of those approaches across disciplines when approaching a question

To achieve these outcomes, students are required to complete courses in the following areas.

- Natural Science, 4 to 6 credits, consisting of one 4- or 5credit course with a laboratory component; or two courses providing a total of 6 credits
- Humanities/Literature/Arts, 6 credits
- Social Studies, 3 credits

This requirement challenges students to understand that there are many ways to research, understand, communicate about, and interpret creatively the world around us. These "ways of knowing" intersect and overlap, and the ideas presented in one area will often inform and transform what students know and how they think about the others. Students develop skills that help them make informed decisions in a wide range of political, economic, and social contexts, to think critically about the world, to better understand their own and others' experience, and to behave in socially responsible ways. (For more information about how this exposure to breadth of inquiry and expression enriches students' undergraduate experience and
complements intensive study in the major, please see the General Education Requirements (https://gened.wisc.edu/) website.)

## COMMUNICATION, 3 TO 5/6 CREDITS

The Communication requirement helps to ensure that all graduates of UW-Madison acquire essential communication and researchgathering skills necessary for success in university course work and beyond. Communication-A (Comm-A) and Communication-
B (Comm-B) courses train students to gather and assess information from a variety of sources and to present different kinds of information, insight, and analysis to diverse audiences. These courses are essential for students' career success and their preparation for public life in a rapidly changing world. While Comm-A courses focus exclusively on essential communication skills, Comm$B$ courses provide content instruction in a specific discipline and teach research, writing, and communication skills in conjunction with the course content. Comm-B courses are offered by departments across campus and vary widely in topic, content, and format.

## Learning Outcomes

Students develop skills that enable them to be effective communicators in and out of the classroom. In courses satisfying the Communication requirement, students will:

- Make effective use of information retrieved, organized, and synthesized from appropriate sources
- Present ideas and information clearly and logically to achieve a specific purpose
- Make effective use of communicative forms appropriate to a specific discipline and adapted to the intended audience
- Use appropriate style and conventions associated with particular communicative forms, genres or disciplines

To achieve these outcomes, students must complete the following Communication requirements:

## Part A. Literacy Proficiency.

2-3 credits at first-year level dedicated to reading, listening, and discussion, with emphasis on writing. While most incoming freshmen are required to complete coursework to fulfill this requirement, students may be exempted from Part A by approved college course work while in high school, AP test scores, or placement testing. Students are expected to satisfy this requirement by the end of their first year of undergraduate study.

## Learning Outcomes

- Use the four modes of literacy: writing, speaking, reading, and listening to formulate strategies for critical thinking
- Use information-seeking skills to demonstrate the four modes of literacy

## Part B. Enhancing Literacy Proficiency.

2-3 credits of more advanced coursework for students who have completed or been exempted from Part A. Students should consult with the appropriate undergraduate advisor about when this requirement should be completed. Courses that satisfy this requirement are offered in many fields of study; although a wide variety of courses fulfill this requirement, students are encouraged to select a course most in keeping
with their interests or other requirements of their intended field(s) of study.

## Learning Outcomes

- Identify and make skillful use of relevant, reliable, and high-quality research sources appropriate to the course subject and discipline
- Make productive use of the writing process, including brainstorming, outlining, drafting, incorporating feedback, and revising, to develop a fledgling idea into a formal paper, presentation, and/or project
- Share research, course content, or creative activity in writing and at least one other mode of communication relevant to the discipline. Other modes of communication might include presentations using one or more media, debate, discussion, poster presentations, and other forms of expression that convey course content

Please note: Because English is the language of instruction at UWMadison, Communication $A$ and $B$ courses are taught in English, and student work in them is also completed in English.

## ETHNIC STUDIES, 3 CREDITS

The Ethnic Studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Because this increased understanding is expected to have a positive effect on campus climate, students are expected to complete this requirement within the first 60 credits of undergraduate study

## Learning Outcomes

Students draw connections between historical and present day circumstances and consider perceptions and cultural assumptions when examining questions and making decisions. In courses satisfying the Ethnic Studies requirement, students will:

- Articulate how the past has affected present day circumstances regarding race and racial inequities in the U.S.
- Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity
- Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others
- Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society

The skills listed above apply to students' lives inside and outside the classroom, and by pursuing these objectives, students will further enhance their ability to participate in a multicultural society more effectively, respectfully, and meaningfully. Students complete this requirement by taking one course of at least 3 credits that is designated as an Ethnic Studies course.

## QUANTITATIVE REASONING, 3 TO 6 CREDITS

Quantitative Reasoning is the process of forming conclusions, judgments or inferences from quantitative information. The Quantitative Reasoning requirement at UW-Madison has two parts: Part A and B. Quantitative Reasoning A courses provide students
with skills in mathematics, computer science, statistics or formal logic that are needed for dealing with quantitative information. The acquired skills are broad-based in order to have a positive impact on the readiness of students to take a Quantitative Reasoning B course in a variety of disciplines. Quantitative Reasoning B courses allow students to enhance their Quantitative Reasoning Proficiency in a more advanced setting, where they make significant use of quantitative tools in the context of other course material. To ensure timely completion of the undergraduate degree, students must demonstrate minimum math proficiency before they can enroll in a Quantitative Reasoning Part A course. They should complete Part A of the Quantitative Reasoning requirement by the end of their first year, and must complete Part A before they enroll in Part B.

## Quantitative Reasoning Part A:

An an introductory course in college-level mathematics, computer science, statistics, or formal logic that is intended to prepare students for more advanced work in a disciplinary context.

## Learning Outcomes

- Solve problems using quantitative information and the tools of college\#level mathematics, computer science, statistics or formal logic
- Draw conclusions using quantitative information and the tools of college\#level mathematics, computer science, statistics or formal logic
- Develop models and/or interpret data and/or devise algorithm using quantitative information and the tools of college\#level mathematics, computer science, statistics or formal logic

## Quantitative Reasoning Part A Requirement

Can be satisfied by approved college work while in high school, AP test scores, placement testing, or taking a 3-credit course at UW-Madison with a Quantitative Reasoning A designation.

## Quantitative Reasoning Part B:

In the disciplinary or interdisciplinary context of a course designed to build on the tools of college-level mathematics, computer science, statistics, or formal logic.

## Learning Outcomes

- Manipulate quantitative information to create models, and/or devise solutions to problems using multi\#step arguments, based on and supported by quantitative information
- Evaluate models and arguments using quantitative information
- Express and interpret in context models, solutions, and/or arguments using verbal, numerical, graphical, algorithmic, computational or symbolic techniques

## Quantitative Reasoning Part B Requirement

Can be satisfied by taking a designated QR-B course of at least 3 credits in a variety of fields of study, which enhances students' proficiency in this domain. Students are encouraged to select a course in keeping with their interests or to satisfy other requirements for their major or degree program.

## IDENTIFYING COURSES THAT MEET

 GENERAL EDUCATION REQUIREMENTSThe university offers hundreds of courses that meet the requirements described above. Students should consider their own
interests and check with their advisor when deciding which courses to complete. Please note that many undergraduate programs of study have breadth requirements that go beyond these basic university-wide requirements.

The following language is used in the UW-Madison course listings to indicate how courses count toward satisfying the communication, quantitative reasoning, and ethnic studies portions of the General Education Requirements. Courses that satisfy these requirements are also tagged with a mortarboard (graduate cap) symbol. \#

- Communication Part A
- Communication Part B
- Ethnic Studies
- Quantitative Reasoning Part A
- Quantitative Reasoning Part B

Note: Some Communication Part B courses carry Communication B credit only at the lecture or section level and/or only in certain semesters; these courses will be indicated in the Schedule of Classes.

Course descriptions also include information about whether courses meet General Education Humanities, Natural Science, or Social Studies Breadth Requirements. (Click on course numbers in the Guide to see this information.) Students should also be aware that each school and college may, at its own discretion, designate additional courses that satisfy these requirements. For this reason, students should consult their advisors to obtain information about how these requirements are implemented in the school or college in which they are enrolled.

## GENERAL EDUCATION POLICIES

- Only undergraduate-level college courses may satisfy General Education Requirements.
- Directed or Individualized Study may not be used to satisfy General Education Requirements.
- Because these requirements assume that students are engaged in focused study within the designated area of general education, requirements cannot be met with portions of courses.
- Exemption from General Education: All students are required to meet the fundamental degree requirements of the university, which include general education.
- Disability-Based Waivers: The university has determined that waivers to the communication and quantitative reasoning portions of the general education component would fundamentally alter the nature of the University of Wisconsin-Madison degree. Students should not expect to obtain disability-based waivers to the communication and quantitative reasoning portions of the General Education Requirements.
- Pass/Fail: Effective fall 2012, all courses taken to meet the University General Education Requirements must be taken on a graded basis. These grades are included in students' GPA calculations according to school/college GPA rules.

## GRADUATING

DECLARATION OF INTENT TO GRADUATE
When students expect to graduate, they must indicate their intent by completing the graduation application available in the MyUW Student Center. It is the policy of UW-Madison that all work for the
degree must be completed and all degree requirements satisfied before the degree can be conferred.

## CONFERRAL OF DEGREES

When students have been certified as having completed all university general education, degree, and major requirements, the degree will be awarded. When the degree is awarded, a diploma will be issued, listing the degree earned, and the transcript updated to reflect the degree, major, and any other approved academic programs completed. Students who have holds (https://kb.wisc.edu/helpdesk/ page.php?id=4139) on their records will not receive their diplomas, or be able to order transcripts, until the holds are cleared.

## COMMENCEMENT

Students who wish to attend the spring or winter commencement ceremony must indicate their intent by completing the graduation application available via Student Center in My UW (https:// login.wisc.edu/idp/profile/SAML2/Redirect/SSO/?execution=e4s1) by the posted deadline (https://commencement.wisc.edu/graduatechecklist/). Students may participate in the commencement ceremony (https://commencement.wisc.edu/), in which the chancellor and deans symbolically confer the degrees, even if all degree requirements have not been completed. Neither participation in the ceremony nor listing in the program conveys degree conferral. Students will not receive the diploma or transcript notation until all degree requirements are certified as complete by their respective school or college. Should a student's graduation plans change, updates to the intended term of graduation must be indicated via the graduation application in the MyUW Student Center.

## ENROLLMENT AND RECORDS

The Office of the Registrar (https://registrar.wisc.edu/) is responsible for maintaining the academic records of students who attend the University of Wisconsin-Madison and for many services associated with these records, including enrollment and grading. The office is located at:

333 East Campus Mall \#11101
Madison, WI 53715-1384
registrar@em.wisc.edu
608-262-3811
Many student services are available online in the Student Center on My UW-Madison (My UW) (https://login.wisc.edu/idp/profile/SAML2/ Redirect/SSO/?execution=e2s1), including viewing grades, ordering transcripts, and updating address and emergency contact information. Students are responsible for the accuracy of the addresses provided in My UW and for the courses selected when they enroll.

My UW is available to eligible students, who gain access by using their Net ID and password. Access to My UW-Madison is available from any device with Internet access. For further information about My UW-Madison, see DoIT (Division of Information Technology) (http://it.wisc.edu/).

## ENROLLMENT

Students enroll for courses, obtain information about deadlines, view their class schedule, and more in the Course Search \& Enroll (http:// public.enroll.wisc.edu) application on My UW (https://login.wisc.edu/idp/ profile/SAML2/Redirect/SSO/?execution=e3s1). Information about key deadlines and course enrollment are also available at the Office of the Registrar website (https://registrar.wisc.edu/). Additional assistance with
the course enrollment process is available by calling 608-262-3811 or emailing registrar@em.wisc.edu.

## GRADING SYSTEM

The general quality of a student's work is expressed in terms of a grade point average (GPA). It is based on the total number of credits taken for which grades of $A$ through $F$ are received. Semester grades are reported by letter only; plus and minus signs are not authorized. The highest possible GPA is 4.0, representing A grades in every course; the lowest possible is 0.0 . The following is the official scale of grades at UW-Madison.

GRADES WITH ASSOCIATED GRADE POINTS PER CREDIT

| Grade |  | Grade <br> Points Per <br> Credit |
| :--- | :--- | :--- |
| A | Excellent | 4 |
| AB | Intermediate Grade | 3.5 |
| B | Good | 3 |
| BC | Intermediate Grade | 2.5 |
| C | Fair | 2 |
| D | Poor | 1 |
| F | Failure | 0 |

Excluded from the GPA calculation are:
S or U (Satisfactory or Unsatisfactory) in courses taken on the pass/fail basis.

SD/UD (Satisfactory-Disruption/University Disruption-No Credit): special grading option for students in response to the COVID-19 events.

Cr or N (Credit or No Credit) in courses offered on a credit/no credit basis.

Def (Deferred), Ex (Excused), PE (Permanently Excused), formerly used only for required Physical Education. The Physical Education requirement was discontinued effective August 30, 1976.

DR (Dropped), indicates the course was dropped
I (IN for $\mathrm{Cr} / \mathrm{N}$ Courses) (Incomplete), a temporary grade used when work is not completed during a term.

El (Extended Incomplete), a temporary grade for an extended time limit to remove an Incomplete.

PI (Permanent Incomplete), a permanent grade replacing an Incomplete incurred in a student's last semester in residence and not removed within five years.

NR (No Report), indicates that a grade was not submitted by the instructor. Has no net effect on GPA. Effective Summer 1999.

NW (No Work)..."should be used for students who enroll in a course and then never attend. 'No Work' in this context means that the instructor has no evidence that the student ever attended, in that no course work was ever submitted. Any student who does attend for part of the semester, and then stops participating should be given a grade of ' $F$ ' unless there are grounds for assignment of a grade of 'I'(Incomplete)." Fac. Doc. 1028; effective 9/94.

P (Progress), a temporary grade used for courses extending beyond one term. The final grade determines the grade for each term and replaces P grades for the course.

Q (Question on Credits or Honors), a temporary grade used during grade reporting to indicate a credit problem. Should only be used when the student is enrolled for the wrong number of credits or their honors indication is incorrect. A Q grade may be represented on a grade report as "?"

R (Registered), not used after the Summer 1974.
W (Withdrew), indicates the student withdrew from the University while enrolled in the course.

Audited courses, denoted as such by 'AU' in place of a number of credits, are graded either S (Satisfactory) or NR (No Report).

## CREDIT/NO CREDIT COURSES

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR, meaning the student earned the credits for which the course was offered, or N , meaning that the student did not earn any credit even though enrolled for the course. Students may not take such courses on any other basis.

## PASS/FAIL

## POLICY ON USE OF PASS/FAIL GRADING OPTION FOR UNDERGRADUATES

This policy concerns the use of the pass/fail grading option for degreeseeking undergraduate students. According to the UW-Madison grading scale, grades of $S$ (satisfactory) and $U$ (unsatisfactory) are the transcripted grades that are used for what is commonly known as pass/fail. It applies only to courses that use the default A-F grading scale and that also allow students to choose to take a course on a pass/fail (PF) basis. ${ }^{1}$

The instructor enters the letter grade earned by students on the grade roster, and those letter grades are subsequently recorded as a pass (S) or fail ( $U$ ) on the student record. A pass (S) will be recorded when a letter grade of A through $C$ is earned. A fail (U) will be recorded when a letter grade of $D$ or $F$ is earned. In addition to the $S$ or $U$ notation, the student transcript includes the symbol \# for courses that were taken on a pass/ fail basis. Neither the $S$ nor the $U$ is used in computing the grade point average. Instructors are not informed that a student has elected to take the course pass/fail.

## STUDENT ELIGIBILITY

Students must be in good academic standing according to their school/ college in order to be eligible to request the pass/fail grading option.

Undergraduates may carry one course on a pass/fail basis per term and a maximum of 16 credits during their undergrad career. The summer sessions collectively count as a single term.

Required courses cannot be taken on a pass/fail basis. The student's school or college may review the request to take a course pass/fail and reject requests for nonelective work. It may be difficult for the school or college official to determine whether a course is an elective or being used to fulfill a requirement since a student's enrollment or the way a course is being used in the specific program of study may change. Ultimately it is the student's responsibility to be sure that the requested course is an elective. Students are strongly advised to consult with an academic advisor before taking a course pass/fail. Courses taken on a pass/fail basis
will not count for nonelective requirements even if they would normally count toward such requirements.

Each school or college is responsible for clearly communicating to its students what the definition of "good academic standing" is and what a free elective is.

In each school or college, the office responsible for academic policy exceptions is authorized to make exceptions to the pass/fail policy.

## PROCESS FOR REQUESTING THE PASS/FAIL GRADING OPTION

Students indicate that they would like to have a course they are enrolled in graded on a pass/fail basis by completing a course change request via their Student Center (see Course (https://kb.wisc.edu/ registrar/7700/)Change Request for detailed information). Students may submit pass/fail requests via their Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed).

The deadline for requesting the pass/fail grading option is posted on the Office of the Registrar website (https://registrar.wisc.edu/dates/). These deadlines are based on the idea that the pass/fail option is intended to encourage students to explore educational opportunities that they might otherwise not be willing to attempt. Pass/fail is not intended as a way for students to avoid academic consequences.

Once the student has submitted the request to take a course on a pass/ fail basis the request is routed via Student Information System workflow to an academic dean in the school or college for approval or further communication with the student. The school/college official must approve the request before the grading option is changed to pass/fail by the Office of the Registrar.

Students can see whether a course is being graded on a pass/fail basis in the MyUW Student Center's Academic Records > View Grades section.
${ }^{1}$ For study abroad programs operated by the College of Engineering, courses taken abroad toward an engineering major will be posted as pass/ fail. This occurs automatically and is not a student option; this practice is not covered or affected by this policy.

## FAILURES

Every course grade of F counts as O grade points and remains permanently on the transcript. If the course is repeated, the original $F$ will remain on the transcript and will be included in computing the GPA.

## INCOMPLETES

An Incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester. If a student is unable to take or complete the final examination because of illness or other circumstances beyond his or her control, the student may be granted an Incomplete. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of such proof the grade shall be F; even with such proof, if the instructor is convinced that the student cannot pass, the grade shall be F.

Undergraduate students enrolled in the College of Letters \& Science must complete the course work for which they received the Incomplete by the end of the fourth week of classes of their next term of enrollment at UW-

Madison (exclusive of summer sessions). Failure to do so will result in a lapse into a grade of $F$, unless the time limit has been formally extended. Letters \& Science students should see the L\&S section on Incompletes (p. ) for important details.

Undergraduates enrolled in schools or colleges other than Letters \& Science must complete the course work for which they received the Incomplete by the end of their next term of enrollment (exclusive of summer sessions). Incompletes incurred in the last term of enrollment may not be removed after five years of absence from the university without special advance permission of the student's associate or assistant dean. Such Incompletes remain on the record permanently but do not lapse into a grade of F.

## AUDIT

Students may audit eligible courses with instructor and academic dean consent, and if no laboratory or performance skills are involved. Auditors may not recite or take examinations but are expected to attend classes regularly and do some assigned work. Although courses for which students enroll as an auditor are factored into tuition, such courses do not earn academic credit and do not count in determining full-time/part-time load for enrollment certification in an academic term. Students initiate a request to audit by completing a course change request via their MyUW Student Center (see Course Change Request (https://kb.wisc.edu/ registrar/7700/) for detailed information). Students may submit audit requests via their Student Center from the time that they enroll until midnight on the Friday at the end of the fourth week of fall and spring semesters. (For modular and summer session courses, audit requests must be submitted by midnight Friday of the week in which the session is one-fourth completed). School and college policies may vary from this description. Students are advised to consult with the instructor concerning specific course requirements that must be satisfied.

## CLASS STANDING

Students are classified by year according to the number of credits they have earned:

Freshman: fewer than 24 credits
Sophomore: 24-53 credits
Junior: 54-85 credits
Senior: 86 or more credits

## TUITION AND FEES

The UW System Board of Regents sets tuition and fee rates annually. Rates are subject to change without notice.

The tuition and fee schedule is available on the Bursar's Office website (https://bursar.wisc.edu/tuition-and-fees/). Students who enroll after the first Friday of the official first week of classes are assessed a late initial enrollment fee. Exception: Special and Guest students have until the Friday of the second week of classes to enroll.

Enrolled students can view account charges/payments, financial aid (loans, grants, scholarships) received, and refunds on their My UW (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/? execution=e5s1) Student Center, Financial Account. Students can also access links to view and pay student account eBills, set up Authorized Payers for account access, and enroll for eRefund.

The Bursar's Office provides the student account bill electronically (eBill). The eBill is published on the My UW (https://login.wisc.edu/idp/profile/ SAML2/Redirect/SSO/?execution=e5s1) Student Center payment portal.

Students and their Authorized Payers receive an email when the eBill is available to view.

For questions about tuition rates, student account activity and billing questions, contact the Bursar's Office.
tuition@bussvc.wisc.edu (include student ID and name)
608-262-3611
333 East Campus Mall \#10501
Madison, WI 53715-1383

## MAKING PAYMENTS

Student Account payment options include making an online ePayment, mailing a check to the Bursar's Office, or placing a check in the first-floor lobby dropbox. For detailed payment information, see Payment Methods (https://bursar.wisc.edu/student-tuition-account/payment-methods/) on the Bursar's Office website.

If the balance is not paid by the due date, a late fee is assessed and a hold is placed to prevent future enrollment and release of official transcripts and diplomas, until the account is paid.

## RESIDENCE FOR TUITION PURPOSES

At the University of Wisconsin-Madison, residence for tuition determinations are governed by Wisconsin Stautes 36.27(2). The standards to qualify as a Wisconsin resident are unique to this law and may differ from standards used to determine residency for other purposes, such as voting, paying taxes, obtaining licensures, and other forms of residency. In general, eligibility for resident status requires that an independent student (or the student's parent, if the student is a dependent) must demonstrate bona fide residency in Wisconsin for at least twelve months immediately prior to enrollment for any term. However, the law also states that individuals who come to Wisconsin primarily for educational purposes do not qualify as Wisconsin residents for tuition purposes, even if they meet the remaining eligibility criteria. As a result, students who begin their enrollment as nonresidents usually maintain nonresident status for the duration of their enrollment.

While all individuals who do not demonstrate eligibility under Wisconsin Statutes 36.27 (2) will be classified as nonresidents, the law does provide a limited set of exceptions to twelve-month period normally required to establish bona fide residency. These exceptions pertain to some (but not all) individuals who are refugees in Wisconsin, who have certain military or veteran statuses, or who have relocated to Wisconsin for full-time, permanent employment under certain conditions. If you have questions about whether your circumstances might align with the exemptions noted here, you may wish to contact a residence specialist to discuss your residency further.

For more information and the full text of Wisconsin Statutes, Section 36.27(2), see the Office of the Registrar website (https:// registrar.wisc.edu/residence/) or contact a residence specialist at 608-262-1355 or ResidenceForTuition@registrar.wisc.edu.

Nonresident students who plan to use federal veteran benefits such as the post-9/11 GI Bill may be eligible for resident tuition rates even though they are formally classified as nonresidents of Wisconsin. If you plan to use veteran benefits while enrolled at UW-Madison, you may wish to speak with University Veterans Services at 608-265-4628 or veterans@wisc.edu for more information about how to use your military benefits at the University.

## MINNESOTA RECIPROCITY FOR TUITION RATES

Minnesota residents who are certified by the Minnesota Office of Higher Education for the appropriate term to attend UW-Madison under the Minnesota-Wisconsin Tuition Reciprocity Agreement will be assessed the approved reciprocity tuition rate, plus the segregated fees assessed all UW-Madison students. Students under this program will be classified as nonresidents of Wisconsin. Minnesota residents must apply to the Minnesota Office of Higher Education for verification of their eligibility for reciprocity.

It is the student's responsibility to inquire about application procedures, deadline dates, and reapplication procedures. Students may apply online on the Minnesota Office of Higher Education website (http:// www.ohe.state.mn.us/). Questions may be directed to the Minnesota Office of Higher Education:
1450 Energy Park Drive, Suite 350
St. Paul, MN 55108-5227
651-642-0567 or 1-800-657-3866
They may also be directed to the UW-Madison Office of the Registrar (https://registrar.wisc.edu/):
333 East Campus Mall \#11101
Madison, WI 53715-1384
registrar@em.wisc.edu
608-262-3811

## RULES, RIGHTS, AND RESPONSIBILITIES

## STUDENT PRIVACY RIGHTS (FERPA)

Students have the right to inspect and review most education records maintained about them by the University of Wisconsin-Madison and, in many cases, decide if a third person can obtain information from them. Students may challenge information in their records which they believe to be inaccurate, misleading, or inappropriate.

The university has adopted a policy statement implementing all provisions of the Family Educational Rights and Privacy Act (FERPA). A copy of this statement may be obtained at the Office of the Registrar (https:// registrar.wisc.edu/), 333 East Campus Mall \#11101. The university, in accordance with the act, has designated the following as "directory information," which is publicly available unless a student asks to have any or all of it withheld: name; postal address; telephone numbers; email addresses; date of birth; major field(s) of study and number of academic credits earned toward degree; attendance status (including current year, credit load, and full-or part-time status); dates of attendance (matriculation and withdrawal dates); degrees and awards received (type of degree and date granted); previously attended educational agencies or institutions; participation in officially recognized activities; and participation in athletics and weight and height of athletes.

Students wishing to keep some or all of their "directory information" confidential should restrict their information in the Student Center in My UW (https://login.wisc.edu/idp/profile/SAML2/Redirect/SSO/? execution=e6s1). Students with questions about the provisions of the act
or who believe the university is not complying with the act may obtain assistance from the Office of the Registrar:
333 East Campus Mall \#11101
Madison, WI 53715-1384
reginfo@em.wisc.edu
608-262-3811
Students have the right to file complaints alleging university noncompliance with the act with the federal agency that enforces the act. The address is: The Family Educational Rights and Privacy Act (http:// www2.ed.gov/policy/gen/guid/fpco/ferpa/) Office, Department of Education, 330 Independence Avenue SW, Washington, DC 20201.

Information about the Family Educational Rights and Privacy Act of 1974, as amended, is distributed during Wisconsin Welcome and is available at: Office of the Registrar (https://registrar.wisc.edu/)
333 East Campus Mall \#11101
Madison, WI 53715-1384

## AVAILABILITY OF ACADEMIC RECORD INFORMATION TO PARENTS OR GUARDIANS OR OTHERS

A student may authorize a third party (e.g., a parent, guardian, spouse, potential employer, etc.) access to academic record information. An authorization form is available at the Office of the Registrar's website, or by visiting the Office of the Registrar (https://registrar.wisc.edu/), 333 East Campus Mall \#11101. The authorization form permits release of specified information on a one-time basis to the specified third party. If no authorization is on file, it will be assumed that the student does not wish to give a third party access to academic record information. This policy is designed to give students specific control over the parties to whom academic record information may be released.

Grade reports will not be sent by the university to parents or guardians. Students are urged to keep their parents informed of their academic progress.

## ACADEMIC INTEGRITY

UW-Madison students are required to conduct their academic work with integrity.. Students have due process rights if they are accused of academic misconduct. It is important students:

- be familiar with the rules of academic misconduct (UWS Ch. 14);
- ask their instructors if they are unsure (for example, using sources in a paper or if collaboration with another student is permitted);
- tell your instructors if they see misconduct;
- don't help someone else cheat, it is a violation of the rules

The complete rules and procedures regarding academic integrity, is found in UWS Ch. 14 (https://docs.legis.wisconsin.gov/ code/admin_code/ uws/14/). Additional information is on the Office of Student Conduct and Community Standards website (https:// conduct.students.wisc.edu/ academic-misconduct/) or contact the office via phone at 608-263-5701 or conduct@studentafairs.wisc.edu.

## STUDENT RIGHTS AND RESPONSIBILITIES

Every member of the University of Wisconsin-Madison community has the right to conduct their academic and social life in an environment free from threats, danger, or harassment. Students are also responsible for conducting themselves in a manner compatible with membership in the university and local communities.

UWS Chapters 17 and 18 of the Wisconsin Administrative Code list the university policies students are expected to follow and describes the procedures used when students are accused of misconduct, including possible outcomes. Review the complete text of UWS Chapter 17 (https:// docs.legis.wisconsin.gov/code/admin_code/uws/17/); and additional information is on the Office of Student Conduct and Community Standards website (https://conduct.students.wisc.edu/academicmisconduct/), or contact the office via phone at 608-263-5701 or conduct@studentaffairs.wisc.edu.

## STUDENT GRIEVANCE PROCEDURE

Any student at UW-Madison who feels that they have been treated unfairly has the right to voice a complaint and receive a prompt hearing of the grievance. The basis for a grievance can range from something as subtle as miscommunication to the extreme of harassment.

Each school or college has a procedure to hear grievances. Generally the process involves an informal attempt to solve the problem, if appropriate. If not, more formal proceedings can be undertaken until a resolution is reached. Advisors and school or college offices have detailed information. For assistance in determining options, students can contact the drop-in staff member within the Dean of Students Office at 608-263-5700, within Bascom Hall, Room 70, Monday-Friday, 8:30 a.m.-4 p.m.

## SEEKING ASSISTANCE

The Dean of Students Office (http://guide.wisc.edu/undergraduate/ doso.students.wisc.edu) assists students with matters outside of the classroom. They assist with a variety of concerns and connecting students with resources on campus. A great place to start when you don't know where to go.

If you need personal assistance or resources, staff members in the Dean of Students Office are available on a drop-in basis, Monday-Friday. Reach out if you are dealing with a financial crisis, sudden health issues, housing/ food insecurity, or other sensitive situations.

A student can seek help at many places on campus, for both personal and academic problems. For answers to general questions on many topics, a good place to start is Ask Bucky (https://info.wisc.edu/ask-bucky/), which is an excellent general referral service.

For personal concerns, Mental Health Services, a unit of University Health Services (http://www.uhs.wisc.edu/), offers individual, group and couple counseling services. Experienced counselors, psychologists, and psychiatrists can assist students in addressing depression and managing anxiety, and in developing self-awareness and understanding, independence, and self-direction. Our experienced staff is committed to understanding and respecting every individual. Mental Health Services is located at 333 East Campus Mall; 608-265-5600. In addition, an oncall dean in Student Assistance and Judicial Affairs is usually available by telephone (608-263-5700) or on a drop-in basis (75 Bascom Hall)

Monday-Friday, 8:30 a.m.-4:30 p.m. UHS also offers students at 24/7 crisis line for mental health support. 608-265-5600 (option 9).

For academic problems, many places can offer help. The student should first discuss the problem with the professor or TA. If the problem is not resolved at that time, the student can speak with an academic advisor or the chair of the department. If further assistance is needed, the student should contact one of the academic deans in the school or college.

## STUDENT AFFAIRS

Student Affairs at UW-Madison (https://students.wisc.edu) serves students in areas including health and well-being, identity and inclusion, leadership and engagement, and student advocacy. Its multiple departments collaborate broadly across the many programs and campus units that serve students, such as the Division of Diversity, Equity and Educational Achievement (https://diversity.wisc.edu/), International Student Services (https://iss.wisc.edu), and University Housing (https:// www.housing.wisc.edu/), to enhance UW-Madison as a welcoming and inclusive community for all students.

## ASSOCIATED STUDENTS OF MADISON (ASM)

4301 Student Activity Center
333 East Campus Mall
608-265-4276 (265-4ASM)
Email: info@asm.wisc.edu
Web: asm.wisc.edu (http://asm.wisc.edu)
Facebook: Associated Students of Madison (https://www.facebook.com/ ASMStudentGov/)
Twitter: @ASMstudentgovt (https://twitter.com/search/?q= \%40ASMstudentgovt\&src=typd)
Instagram: https://www.instagram.com/asmstudentgovt/

- Promotes student voice as it pertains to legislative, diversity, and university affairs
- Distributes funding for student activities, organizations, and events to maximize student involvement in shaping campus life
- Supports elected student representatives
- Serves as the home for student Shared Governance, which ensure that students have a voice in setting and executing campus policies that impact student life
- Supports the Open Seat Food Pantry, which strives to alleviate the stresses of food insecurity for those who need support.
- Provides policy direction to the Student Activity Center, which offers office and meetings space to student organizations
- Distributes the student bus pass every semester, which allows students to take unlimited rides on any Madison Metro bus route, in addition to the free campus bus routes

## CENTER FOR THE FIRST-YEAR EXPERIENCE

155 Middleton Building
1305 Linden Drive
608-263-0367
Web: newstudent.wisc.edu (http://newstudent.wisc.edu)
Facebook: UW First-Year Experience (https://www.facebook.com/ UWNewStudent/)

Twitter: @UWNewStudent (https://twitter.com/search/?q=
\%40UWNewStudent\&src=typd)
Instagram: https://www.instagram.com/uwnewstudent/

- Collaborates with campus partners to plan and implement Student Orientation, Advising, and Registration (SOAR) for incoming undergraduates and their families
- Oversees the Transfer Transition Program, which provides support services to new transfer students on campus
- Offers seminar courses on the Wisconsin Experience and provides consultation and support to faculty and graduate students who work with first-year students
- Houses the Parent and Family program, which welcomes parents and family members to UW-Madison so they can encourage and reinforce their student's success

## CENTER FOR LEADERSHIP \& INVOLVEMENT

## Red Gym

716 Langdon Street
Student Activity Center
3rd \& 4th Floors, 333 East Campus Mall
608-263-0365
Email: cfli@studentlife.wisc.edu
Web: cfli.wisc.edu (http://cfli.wisc.edu)
Facebook: UWCfLI (https://ourwisconsin.students.wisc.edu)
Twitter: @UWCfLI (https://twitter.com/uwcfli/)
Instagram: https://www.instagram.com/uwcfli/

- Manages the Student Activity Center (3rd and 4th floors of 333 E. Campus Mall), which offers office and meeting spaces to student organizations.
- Facilitates the registration and advising for more than 1,000 student organizations
- Hosts student organization fairs in fall and spring
- Supports leadership development opportunities, such as the Student Leadership Program, Willis L. Jones Leadership Center, and the Wisconsin Experience Bus Trip.
- Administers the UW-Madison Leadership Certificate

## DEAN OF STUDENTS OFFICE

70 Bascom Hall
500 Lincoln Drive
608-263-5700
Email: doso@stu (dean@studentlife.wisc.edu)dentaffairs.wisc.edu (doso@studentaffairs.wisc.edu)
Web: https://www.doso.students.wisc.edu

- Creates a culture of care so students know the Dean of Students Office is the place to go when you need support
- Connects students who are navigating personal, academic, financial, or health issues, to supportive campus and community resources
- Provides walk-in, email, virtual, and call-in assistance meetings to discuss concerns that students have without judgement
- Supports students who have concerns about their friends and classmates
- Responds to incidents of hate and bias by providing support and resources to those impacted

## GENDER \& SEXUALITY CAMPUS CENTER

123 Red Gym
716 Langdon Street
Phone: 608-265-3344
Email: Igbt@studentaffairs.wisc.edu
Web: Igbt.wisc.edu (http://Igbt.wisc.edu)
Facebook: Gender and Sexuality Campus Center (https:// www.facebook.com/uwgscc/)
Instagram: @UWGSCC (http://guide.wisc.edu/undergraduate/ instagram.com/uwgscc/)

- Provides support to LGBTQ+ and ally communities through trainings, workshops, a Discord server, the website, newsletter, and resource library
- Advocates for LGBTQ+ students through policies and procedures including bias reporting, restroom policy, name and pronoun display, RecWell inclusion, and trans health care
- Organizes health and identity courses, a peer mentor program, identity-based discussion groups, and a council of $20+$ student organizations
- Coordinates educational and community-building events, including Trans Monologues, Rainbow Graduation, and dozens of recurring programs per semester
- Fosters connections through Crossroads, a suite of programming for LGBTQ+ students of color, and Qouncil, a coalition of 20+ LGBTQ+ student organizations

## MCBURNEY DISABILITY RESOURCE CENTER

702 West Johnson Street, Suite 2104
608-263-2741
Email: mcburney@studentlife.wisc.edu
Web: mcburney.wisc.edu (http://mcburney.wisc.edu)
Facebook: McBurney Disability Resource Center (https://
www.facebook.com/McBurney-Disability-Resource-
Center-1408271469436889/)
Text: (608) 225-7956

- Promotes accessible, open, and welcoming campus community for students with disabilities
- Works with students with a variety of disabilities such as psychological/mental health, learning, chronic health, ADHD, vision, hearing, mobility, etc
- Develops individualized accommodation plans for students with disabilities and provides classroom accommodations to students with disabilities taking undergraduate, graduate, and professional school courses
- Provides information and referral services on disability issues for students, faculty, staff, and campus visitors
- Offers peer education and campus programming around disability issues and inclusive practices

## MULTICULTURAL STUDENT CENTER

716 Langdon Street
608-262-4503
Web: msc.wisc.edu (http://msc.wisc.edu/)
Facebook: UW-Madison Multicultural Student Center (https:// www.facebook.com/UWMulticultural/)
Instagram: @UWMulticultural (https://twitter.com/@UWMulticultural/)

- Provides spaces, services, and events for students of color to find community and belonging
- Celebrates and honors heritage and history through monthly recognitions including Latinx Heritage Month, Native November, Black History Month, and APIDA Heritage month
- Organizes 'MCOR' and 'The Meet Up,' welcome week events featuring cultural performances and multicultural student organizations
- Develops leadership development opportunities for student leaders through the Multicultural Leadership Summit, and student organization affiliation program in which more than 65 multicultural organizations are recognized
- Provides opportunities for students of all backgrounds to engage in conversations and dialogue around racial justice and intersectional communities and issues
- The MSC includes the Black Cultural Center, APIDA (Asian Pacific Islander Desi American) Student Center, Indigenous Student Center, and Latinx Cultural Center. Each identity center hosts events including new student welcomes and graduation celebrations

## OFFICE OF FRATERNITY \& SORORITY LIFE

University Club - 432 East Campus Mall
Phone: 608-265-9019
Email: advisor@greeklife.wisc.edu (http://guide.wisc.edu/undergraduate/ advisor@greeklife.wisc.edu)
Web: https://www.fsl.wisc.edu
Facebook: facebook.com/FSL.UWMadison (http://guide.wisc.edu/ undergraduate/facebook.com/FSL.UWMadison/)
Instagram: instagram.com/fsl_uwmadison (http://guide.wisc.edu/ undergraduate/instagram.com/fsl_uwmadison/)
Twitter: twitter.com/FSL_UWMadison (http://guide.wisc.edu/
undergraduate/twitter.com/FSL_UWMadison/)

- Advises more than 40 student leaders who serve in council and community leadership roles
- Provides coaching to 60+ fraternities and sororities
- Plans and implements programming to support the development of members in multiple areas, such as leadership, social justice, and harm prevention
- Reinforces expectations of the fraternal experience and supports a variety of accountability processes.

## OFFICE OF INCLUSION EDUCATION

Office of Inclusion Education
716 Langdon Street, Office \#123

Email: inclusioneducation@studentaffairs.wisc.edu
Web: http://inclusioneducation.wisc.edu
Instagram: https://www.instagram.com/uw_inclusioneducation/
The Office of Inclusion Education elevates and prioritizes diversity, equity, and inclusion for all students at UW-Madison. The Office of Inclusion Education includes:

- Our Wisconsin is an educational program that encourages students to contribute to an inclusive campus community and celebrate each other's backgrounds and identities. Our Wisconsin consists of an online training and additional in-person programming. All incoming first-year and transfer students are required to participate in the online component of Our Wisconsin
- Social Justice Education Programs develops resources and facilitates workshops and trainings to support self-exploration, critical dialogue, and the capacity to build just and inclusive communities. Signature programming also includes an annual Social Justice Leadership Retreat (SJLR)
- The Social Justice Hub connects UW-Madison students to social justice-related initiatives on campus and in the Madison community. The Hub provides space and resources for students to engage in action teams focused on criminal justice reform, housing equity, and food justice.

## OFFICE OF STUDENT CONDUCT

 AND COMMUNITY STANDARDS
## 724 West Johnson

608-263-5701
Email: conduct@studentaffairs.wisc.edu
Web: conduct.students.wisc.edu (https://www.conduct.students.wisc.edu)

- Upholds every student's right to learn in a safe community
- Fosters integrity and accountability
- Challenges and supports students to reflect, integrate and act on their Wisconsin Experience
- Partners with instructors to resolve academic misconduct

## UNIVERSITY HEALTH SERVICES (UHS)

333 East Campus Mall
608-265-5600
Email: uhs@uhs.wisc.edu
Web: uhs.wisc.edu (https://www.uhs.wisc.edu)
Facebook: https://www.facebook.com/UHSMadison (https:// www.facebook.com/UHSMadison/)
Twitter: https://twitter.com/UHSMadison (https://twitter.com/ UHSMadison/)
Instagram: @uhsmadison (https://www.instagram.com/uhsmadison/)

- Offers comprehensive, high-quality medical, mental health, prevention, and wellness services to UW-Madison students
- Most services are available at no additional charge since students pay for UHS services with their tuition and fees
- Services are designed to meet student health needs, including mental health counseling, health screenings, treatment of common health concerns, support for survivors of sexual assault and students recovering from substance dependence, and more

## UNIVERSITY RECREATION \& WELLBEING (REC WELL)

797 W. Dayton Street

608-262-8244
Email: hello@recwell.wisc.edu
Web: https://recwell.wisc.edu
Facebook: https://www.facebook.com/uwrecwell (https://
www.facebook.com/uwrecwell/)
Twitter: https://twitter.com/UWRecWell (https://twitter.com/ UWRecWell/)
Instagram: @uwrecwell (https://www.instagram.com/uwrecwell/)

- Motivates students to play hard, get fit, and live well on campus by fostering a culture of healthy habits through inclusive \& educational recreational programs and offerings
- All full-time students are already members of Rec Well (funded by segregated fees). This allows unlimited access to our state-of-the-art indoor facilities, outdoor multipurpose fields and courts, cardio/strength equipment, swimming pools and diving well, as well as multi-sport gyms and courts
- Offers a wide variety of programs including intramural sports, sport clubs, group fitness, personal training, wellbeing support, nutrition services, athletic training, lessons (swim, tennis, and ice skating), first aid/CPR/AED certification, and lifeguard training classes
- We provide inclusive and accessible programs to the Madison community and have a variety of accessibility options across our programs, services, and facilities
- Employs over 800 student employees each year in a wide range of program areas, including building operations, member services, human resources, marketing \& communications, fitness

## UNIVERSITY VETERAN SERVICES

333 East Campus Mall, Room 10320
608-265-4628
Email: veterans@wisc.edu
Web: veterans.wisc.edu (https://www.veterans.wisc.edu)
Facebook: www.facebook.com/uwveterans (http://guide.wisc.edu/ undergraduate/www.facebook.com/uwveterans/)
Instagram: https://www.instagram.com/uwveterans/

- Certifies both state and federal military/veteran education benefits, advises students on the use of education benefits, and assists with applying for new benefits
- Develops programming to build community among our militaryconnected students and campus as a whole
- Educates the greater campus community and act as a resource for faculty/staff
- Supports students called to active duty in accordance with the Active Duty Policy (https://policy.wisc.edu/library/UW-1034/)

Isakson Roe (PL 116-315) Section 1018 Disclosures

- Amounts Covered By VA Education Benefits
- Estimated Cost Of Attendance
- Graduation Rates
- Transfer Credit Rules - Including Military Credit
- Graduate Outcomes
- License And Certifications For Professions

DoD Policies \& Tuition Assistance (TA) (https://veterans.wisc.edu/military-tuition-assistance/)

## WISCONSIN UNION

Memorial Union
800 Langdon Street
Madison, WI 53706
608-265-3000
Union South
1308 W. Dayton St.
Madison, WI 53715
608-890-3000
Email: union@union.wisc.edu
Web: union.wisc.edu (https://www.union.wisc.edu) Facebook: www.facebook.com/TheWisconsinUnion (http:// guide.wisc.edu/undergraduate/www.facebook.com/TheWisconsinUnion/) Instagram: www.instagram.com/wisconsinunion (http://guide.wisc.edu/ undergraduate/www.instagram.com/wisconsinunion/) Twitter: twitter.com/WisconsinUnion (http://guide.wisc.edu/ undergraduate/twitter.com/WisconsinUnion/)

- Provides student leadership opportunities, including some positions that provide stipends for $60-80 \%$ of in-state tuition
- Hosts more than 1,000 mostly-free events each year, including theater performances, live music, art classes, outdoor activities, cuisine-related events, free film showings, talks by thought leaders and much more
- Offers many ways to enjoy and learn about the outdoors through Outdoor UW, including kayak and canoe rentals
- Provides more than 30 dining options at Union South, Memorial Union and satellite cafes and markets throughout downtown Madison
- Provides spaces for studying, relaxing, and dining at the Memorial Union, Union South, the University Club and the seasonally open Memorial Union Terrace
- Offers an in-house open arts studio, called Wheelhouse Studios, with spaces that can be used on a drop-in or reservation basis
- Offers outdoor equipment rentals through Outdoor UW, including camping equipment, climbing equipment, snowshoes (seasonally) and paddling equipment (seasonally)
- Provides indoor climbing, billiards and bowling activities at Sett Recreation at Union South
- Employs more than 1,000 students, who work in more than 70 kinds of jobs throughout the Union's departments

## ACADEMIC CALENDAR

## ACADEMIC CALENDAR

Establishment of the academic calendar (https://www.secfac.wisc.edu/ academic-calendar.htm) for the University of Wisconsin-Madison falls within the authority of the faculty as set forth in Faculty Policies and Procedures. Construction of the academic calendar is subject to various rules and guidelines prescribed by the Board of Regents, the Faculty

Senate and State of Wisconsin legislation. The Faculty Senate approves an academic calendar which spans a future five-year period.

## COLLEGE OF <br> AGRICULTURAL AND LIFE SCIENCES

Students curious to discover how our living world works and how they can improve it-from the smallest microbe to ecosystem-wide weather patterns-will find a home in the College of Agricultural and Life Sciences. Students explore global questions in these five CALS areas of study:

- Health and nutrition
- Food and agriculture
- Biological sciences
- Sustainability, natural resources, and the environment
- Business, communication, and society

CALS brings together students, faculty, and staff from diverse backgrounds to create an enriching and welcoming culture that produces socially aware graduates who will make an impact locally and globally.

CALS students are passionate about using science to improve the world, and CALS programs encourage students to pursue their passions in the classroom and beyond.

CALS students gain critical thinking, research, and communication skills that lead them to careers in a wide variety of industries and public service - including biotechnology, healthcare, food, and agriculture - and prepare them well for graduate and professional studies at top-ranked institutions.

Students in all majors graduate on average in four years.
CALS faculty are involved in all aspects of student education, including teaching in classrooms, hosting research opportunities in labs, leading study abroad experiences, and providing professional mentorship to students.

CALS promotes working across disciplines; half of CALS students doublemajor or complete at least one certificate (similar to a minor).

As evidence of a strong community, CALS awards over $\$ 1.2$ million in scholarships supported by alumni and friends eager to give new students the same positive experiences they enjoyed. These awards are in addition to university scholarships, grants, and loans.

CALS Signature Experiences reflect the core values of a CALS education and offer a variety of options for students in all majors:

## Learn through hands-on, real world experience

All CALS majors include a senior-level capstone course that integrates interdisciplinary knowledge to address a problem of societal relevance and also helps prepare students for their future careers. Additionally, most students complete independent research under the guidance of internationally recognized faculty researchers.

## Build community and networks

With more than 20 CALS-sponsored student organizations, students can build their professional networks early and enhance their leadership skills.

Students also engage with faculty mentors, often for exploration of majors and career pathways.

## Customize a path of study

More than half of CALS students double-major or complete at least one certificate (similar to a minor) to meet their goals and interests. To augment bachelor of science degrees for top students, CALS offers honors programs in research and in many majors.

## Make a strong start

All CALS students take a First-Year Seminar to explore different areas of study, learn about how to access student services, and make friends. There are several seminars to choose from, including QuickStart (https:// cals.wisc.edu/academics/undergraduate/quick-start/), an online course that allows students to begin their college career the summer before they arrive on campus.

## Gain global perspective

Because CALS disciplines have global reach, students take at least one course with a purposeful international focus, and many students choose to study abroad. CALS offers more than 34 faculty-led study abroad programs specifically designed to fulfill CALS students' academic, professional and personal goals. Additionally, CALS students can choose from more than 250 UW-Madison study abroad programs.

CALS students are growing the future through a better understanding of living things. Explore our majors and certificates (p. 44) to learn more.

## DEGREES/MAJORS/CERTIFICATES

The College of Agricultural and Life Sciences provides opportunities for study in a wide variety of majors. Students are responsible for knowing
academic requirements for graduation and should consult with an advisor regularly.

First-year students are encouraged to declare a major so that an advisor can be assigned in their area of interest. However, students may change majors if their academic or professional goals change. Incoming or continuing students unsure about which CALS major to declare may opt to remain undecided in CALS while exploring their options. Undecided students are assigned a CALS advisor (https://cals.wisc.edu/academics/ undergraduate-students/advising/) in the Academic Affairs Office. In addition to their major, students may also elect to complete additional majors or one or more certificate programs.

- Agricultural and Applied Economics, B.S. (p. 51)
- Agricultural Business Management, B.S. (p. 56)
- Agronomy, B.S. (p. 67)
- Animal Sciences, B.S. (p. 73)
- Biochemistry, B.S. (CALS) (p. 108)
- Biological Systems Engineering, B.S. (p. 118)
- Biology, B.S. (CALS) (p. 84)
- Business Management for Agricultural and Life Sciences, Certificate (p. 60)
- Community and Environmental Sociology, B.S. (p. 130)
- Dairy Science, B.S. (p. 78)
- Development Economics, Certificate (p. 61)
- Entomology, B.S. (p. 136)
- Environmental Sciences, B.S. (CALS) (p. 214)
- Food Science, B.S. (p. 153)
- Food Systems, Certificate (p. 134)
- Forest Science, B.S. (p. 159)
- Genetics and Genomics, B.S. (p. 172)
- Global Health, B.S. (p. 142)
- Global Health, Certificate (p. 148)
- Horticulture, B.S. (p. 178)
- Individual Major, B.S. (p. 64)
- Life Sciences Communication, B.S. (p. 185)
- Microbiology, B.S. (CALS) (p. 102)
- Nutritional Sciences, B.S. (p. 193)
- Nutritional Sciences, B.S. Nutrition and Dietetics (p. 199)
- Organic Agriculture, Certificate (p. 205)
- Plant Pathology, B.S. (p. 207)
- Science Communication, Certificate (p. 191)
- Science of Fermented Food and Beverages, Certificate (p. 157)
- Soil Science, B.S. (p. 223)
-Wildlife Ecology, B.S. (p. 166)

## ENTERING THE COLLEGE

## ADMISSION

CALS offers 23 majors in a broad area of topics encompassed within the life sciences and agriculture. Students who know they are interested in CALS areas of study but are uncertain about a specific major may choose "undecided" in CALS to take advantage of all that CALS has to offer students while they explore life science and agricultural science options.

Admissions for incoming first-year and transfer students are handled centrally through the UW-Madison Office of Admissions and Recruitment (https://admissions.wisc.edu/). However, through this process students will be directly admitted into CALS if they choose a CALS major, including the CALS undecided option. CALS majors do not have enrollment caps, and most do not have special admissions criteria.

All students, including incoming first-year and transfer students, with questions about study in the College of Agricultural and Life Sciences are encouraged to contact the CALS Office of Academic Affairs at 608-262-3003 or academicaffairs@cals.wisc.edu. Prospective students can also connect with the college and learn more in a variety of other ways, including attending informational sessions, taking a tour, and connecting with student ambassadors.

For students transferring from another university or college, transfer credits are evaluated by the UW-Madison Registrar's Office (https:// registrar.wisc.edu/transfer-your-credit-to-uw-madison/) after acceptance. Transfer students must complete all CALS degree requirements, including earning at least 30 credits at UW-Madison.

Students may also transfer to the College of Agricultural and Life Sciences from other schools and colleges at UW-Madison. For more information, contact the academic advisor in your intended major or the CALS Office of Academic Affairs (academicaffairs@cals.wisc.edu), or visit the CALS transfer information page (https://cals.wisc.edu/academics/ undergraduate/visit-and-apply/transfer-students/).

## WISCONSIN EXPERIENCE

Opportunities to apply classroom learning to real-world settings is at the core of a CALS education. We offer a variety of CALS Signature Experiences for students in all majors to live the Wisconsin idea and fulfill the Wisconsin Experience (https://wisconsinexperience.wisc.edu/).

These opportunities fall into five major categories:
We want our students to make a strong start and every CALS first-year student can achieve that through a CALS First-Year seminar to explore different areas of study, learn about how to take advantage of campus resources, and make friends. There are several seminars to choose from, including QuickStart (https://cals.wisc.edu/academics/undergraduate/ quick-start/), which allows students to begin their college career the summer before they arrive on campus.

CALS students learn through hands-on, real world experiences. A majority of CALS students earn credit for research experiences in labs and internships.

Through student organizations, peer advising and mentoring, and residential learning communities, students build their community and networks.

Students gain a global perspective by taking courses with an international focus and many students choose to study abroad. CALS offers more than 34 faculty-led study abroad programs, and students may also choose from general UW-Madison study abroad opportunities.

Finally, many CALS students take advantage of the ability to customize their path of study by participating in an honors program (p. 50), pursuing certificates or second majors, and choosing elective courses that match their interests and meet their goals.

## POLICIES AND REGULATIONS

Policies may be found on the Office of Academic Affairs KnowledgeBase (https://kb.wisc.edu/cals/academicaffairs/).

## REQUIREMENTS

All undergraduate students in CALS must satisfy a set of college and university requirements:

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

## General

Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

## Code <br> Title

Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.

Physical Science Fundamentals 4-5

| CHEM 103 | General Chemistry I |
| :---: | :--- |
| or CHEM 108 | Chemistry in Our World |
| or CHEM 109 | Advanced General Chemistry |

Biological Science 5

Additional Science (Biological, Physical, or Natural) 3
Science Breadth (Biological, Physical, Natural, or Social) 3
CALS Capstone Learning Experience: included in
the requirements for each CALS major (see "Major
Requirements") (p. 48)
Students are advised to complete introductory and basic course requirements (i.e., biological and physical sciences, chemistry, mathematics, communications, etc.) early in their academic programs.

Students must also satisfy a minimum of 15 credits in the selected major (these 15 credits may not be double counted with CALS or General Education requirements) and a Capstone course that meets the stated criteria (and may be included in the 15 credits toward the major).

## CALS FIRST-YEAR SEMINAR REQUIREMENT

## Courses meeting the CALS first-year seminar requirement must meet most of the following criteria

- The course is designed specifically for first-year undergraduate students, to support their academic and personal transition to UW-Madison. For example, the course may acquaint students with academic, campus and community resources to assist in their transition through presentations, discussion, projects, or papers. Because students took this course, their transition to UW-Madison is more rapid and well supported.
- Course enrolls fewer than 25 students or a significant portion of the course meets in groups of fewer than 25 students. A larger lecture course will be considered if students interact regularly in sustained and substantive small groups with a faculty member or well-prepared graduate student or peer. This interaction must go beyond review of material and question and answer and be an ongoing relationship.
- Students receive frequent feedback from the instructor(s) on their academic performance and receive a grade in the course.
- Students are put in circumstances that essentially demand they interact with faculty and peers about substantive matters. As a result of taking this course, students have gotten to know their instructor(s) and peers through meaningful course-related dialogue.
- Students will experience diversity through meaningful dialogue with people who are different from themselves and/or engage with diversity through course content which addresses inclusivity, diversity and identity.
- Students experience an integration of experiential and classroom learning. For example, students might be asked to attend a student organization meeting, meet with a faculty or staff member, or participate in research or service.
- Students have opportunities to integrate, synthesize and apply knowledge while exploring big questions and big ideas.
- The learning objectives for the course are aligned with the UW-Madison Essential Learning Outcomes (https:// assessment.provost.wisc.edu/uw-madison-essential-learningoutcomes/).

## APPROVED FIRST-YEAR SEMINAR COURSES

| Code | Title | Credits |

For more information, see http://figs.wisc.edu/

## CALS INTERNATIONAL STUDIES REQUIREMENT

Required of all CALS majors, the intent of the CALS International Studies requirement is to deepen student knowledge and understanding of international issues related to scientific and sociological themes in CALS; develop openness, awareness and respect with regard to other cultures; and prepare students to address global challenges as engaged employees and active citizens.

The following learning outcomes must be satisfied for courses to fulfill the CALS International Studies requirement:

- Identify and explain, to diverse audiences, global issues pertaining to one or more CALS Priority Themes (https:// cals.wisc.edu/about-cals/initiatives/strategic-plan/prioritythemes/)
- Demonstrate critical thinking and comparative perspectives with respect to experiences or cultural approaches to international challenges

Courses that satisfy the 3-credit CALS International Studies requirement must meet all of the following criteria:

- Be connected to one or more of the CALS Priority Themes
- Include substantial international comparative content
- Include substantial non-U.S. content (typically $>50 \%$ of the content or assignments or grade in the course)
- Facilitate active student engagement consistent with the learning outcomes and university assessment criteria
- Fulfill 3 credits (either by a single course or a pair of courses)

## APPROVED INTERNATIONAL STUDIES COURSES (EFFECTIVE FALL 2019 UNLESS OTHERWISE NOTED)

## CALS CAPSTONE LEARNING LEARNING EXPERIENCE REQUIREMENT

A CALS Capstone is a course in which students are required to integrate diverse bodies of knowledge to solve a problem or formulate a policy of societal importance with the intent of facilitating the transition to postbaccalaureate life. Capstone courses are approved by the college for each major.

A Capstone Experience should:

- Develop problem solving skills
- Expose the student to multidisciplinary approach
- Develop teamwork and interpersonal skills, including the ability to communicate effectively to multiple audiences
- Develop skills in accessing and using information resources (e.g., electronic databases, library resources, national repositories)
- Address societal, economic, ethical, scientific, and professional issues
- Communicate and extend the capstone experience via written, oral, and/or multimedia reports by each student

The Capstone Experience will normally be completed during the student's final 2 or 3 semesters. The intent is to have the student utilize and integrate their undergraduate learning into a culminating, or capstone, experience. Students should consult with their departmental faculty advisors for specific information regarding this requirement. Where

3 appropriate, students should submit a copy of the final project materials to the campus library (via Minds@UW (https://www.library.wisc.edu/researchsupport/minds/) or similar).

## DEGREES OFFERED

The College of Agricultural and Life Sciences offers four bachelor of science (B.S.) degree programs:

## B.S. DEGREE <br> B.S.-AGRICULTURAL BUSINESS MANAGEMENT (P. 56) <br> B.S.-BIOLOGICAL SYSTEMS ENGINEERING (P. 118) <br> B.S.- NUTRITION AND DIETETICS (P. 199)

Three of the college's majors have specialized B.S. degree programs, as listed above. The general B.S. degree program provides a broad and general foundation for the other majors in the college.

## MULTIPLE DEGREES OR MAJORS

Under certain circumstances it may be possible for a student to earn more than one undergraduate major or degree. It is expected that the programs be significantly different from each other and that approval for simultaneous majors or degrees be received prior to the student having earned 86 credits. More information is available below and through the CALS Office of Academic Affairs (https://cals.wisc.edu/academics/ undergraduate/current-students/)

## EARNING TWO UNDERGRADUATE MAJORS SIMULTANEOUSLY

CALS permits undergraduates to pursue two CALS majors simultaneously. Both majors must be in the same degree program; two degrees must follow the policy outlined below. The following policies and procedures have been established for this program:

1. The student must complete an application form and have approval in advance from their CALS major advisor, the advisor of their desired second major, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The student must satisfy all requirements of both majors. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements.

The diploma awarded will be based on the certification of completion of the degree. The transcript will note the completion of requirements for two or more majors.

## EARNING A NON-CALS MAJOR WHILE COMPLETING A DEGREE PROGRAM IN THE COLLEGE OF AGRICULTURAL AND LIFE SCIENCES

The College of Letters \& Science (L\&S) and the School of Education permit undergraduates currently enrolled in the College of Agricultural and Life Sciences to complete certain additional undergraduate majors offered by L\&S or the School of Education and have this noted on the transcript. The following policies have been established for this program:

1. The student must complete an application form and have advance approval from their CALS major advisor, their non-CALS major
advisor, and the Associate Dean for Academic Affairs in the Office of Academic Affairs in CALS. This approval must be granted before the student has earned 86 credits.
2. The non-CALS major is not to substitute for any major in CALS.
3. The student must satisfy all requirements of the non-CALS major, both the requirements established by the department (i.e., certain courses) and those established by the other school/college (e.g. for L\&S, 15 credits of advanced work in the major in residence at UWMadison), but is not required to complete the other school/college's degree requirements. The student must meet all CALS general course requirements and the degree program requirements, as well as all major field requirements for the CALS major.

## EARNING A GLOBAL HEALTH ADDITIONAL MAJOR WHILE COMPLETING A DEGREE PROGRAM IN ANOTHER SCHOOL/COLLEGE AT UW-MADISON

Students in another school/college at UW-Madison are eligible to declare a Global Health major if they have fewer than 86 credits toward graduation, receive permission from their home school/college, and maintain a primary major in the home school/college. The process for obtaining special permission to declare a Global Health major is dependent on the student's home school/college. Students must also contact the Global Health major advising unit about the steps required to declare an additional major and fulfill all the Global Health major requirements.

## EARNING TWO UNDERGRADUATE DEGREES SIMULTANEOUSLY

A student who wishes to earn two undergraduate degrees simultaneously (in contrast to earning two undergraduate majors simultaneously) should consult with the CALS Office of Academic Affairs as early as possible in their academic career regarding feasibility.
If the two degrees to be earned are within the College of
Agricultural and Life Sciences, at least 30 additional credits and all course and grade point requirements must be completed. Thus, a minimum of 150 credits (for most majors) would be required. Some courses may satisfy requirements for both degrees; however, students must complete 15 unique credits in each major. A student must have an advisor in both major fields. To work on two degrees simultaneously within the college, a student should seek permission as early as possible to ensure that it is feasible to complete both degrees.

## If the two degrees to be earned are from two different colleges

 (one degree in Agricultural and Life Sciences and one degree in another school or college on this campus), the academic dean in both colleges must approve the student's plan. Note that not all colleges will allow dual degrees. Where allowed, the following academic policies shall be followed (additional policies may exist):1. Admission into the other college or school shall be based on that particular college or school admission criteria.
2. A student may seek two baccalaureate degrees simultaneously (in contrast to two majors), each from a different college, provided that the two degree programs differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits and that the student's program is approved by both colleges before the student has earned $\mathbf{8 6}$ credits. The degrees from each college will be awarded simultaneously.

Applications and additional information pertaining to the earning of two undergraduate degrees simultaneously are on the CALS website (https://
cals.wisc.edu/academics/undergraduate/current-students/) and available from the Office of Academic Affairs, 116 Agricultural Hall.

## SECOND BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Students with a bachelor of science (B.S.) or bachelor of arts (B.A.) degree from the University of Wisconsin-Madison or other accredited institution may, if eligible, pursue a second bachelor's degree from the College of Agricultural and Life Sciences.
Students who have been out of school for one semester or more must apply for admission (or readmission) with the regular undergraduate application. Continuing UW-Madison students do not need to submit this form. All candidates need an academic dean's permission from the Office of Academic Affairs to work toward a second bachelor's degree. A minimum of a 2.0 GPA is required. Several college majors require a higher GPA.

The following requirements for the second bachelor's degree must be met:

- Students must complete a minimum of $\mathbf{3 0}$ credits in residence, of which 15 or more must be in the major field as specified by the major department. These credits are in addition to credits earned for the first degree.
- Candidates must complete all university, college, major, and curricular degree program requirements. Credits earned for the first degree will apply toward appropriate requirements for the second. However, students must take at least 30 additional credits, as noted above. Students with their first B.S. degree from the college must select a new major or degree program.

All second-degree candidates must be accepted by the department offering their program of interest and have their program approved by the college before beginning the program.

## RESOURCES

## STUDENT SERVICES

Regardless of major, CALS professionals can help students navigate their UW-Madison educational experience. As the academic dean's office for CALS, the Office of Academic Affairs (https://cals.wisc.edu/academics/ undergraduate/student-life/advising-and-services/) assists all CALS and CALS-interested students with questions or concerns around academics, major exploration, careers, scholarships, study abroad, or other areas of student life. Individual advising is tailored to fit students' specific needs and circumstances. CALS also offers programs for students from underrepresented populations.

## ACADEMIC ADVISING

Every student has an assigned advisor, and students are encouraged to consult with them regularly. In CALS, all students are assigned an advisor in their major field of study, or for undecided students in the Office of Academic Affairs. These advisors assist students with choosing courses to match their interests and fulfill all requirements for graduation. Advisors also talk with students about achieving their educational objectives, engaging in the full Wisconsin Experience, and planning for the future.

Students are also encouraged to seek advice from other university faculty and staff. There are many people on campus who are willing and able to help students who proactively seek advice.

## CAREER SERVICES

CALS Career Services (https://cals.wisc.edu/academics/undergraduate-students/career-services/) provides resources and guidance for students to explore career interests and develop skills as they seek employment, internships, or admission to graduate or professional programs. Academic advisors and faculty in every CALS major also provide specialized career and pre-professional advising. CALS students and alumni have access to Handshake (https://careers.wisc.edu/handshake/), an online job and internship posting tool that includes thousands of listings. The Center for Pre-Health Advising (https://prehealth.wisc.edu/) is an excellent resource for CALS students interested in exploring professional careers in medicine, including human health and veterinary medicine.

## DEAN ON CALL

"Dean On Call" is a drop-in service that provides the opportunity for all CALS students to have a one-on-one session with an academic affairs professional to discuss an academic policy or problem, seek advice about a personal issue, or receive assistance when confronted with a special situation. See the CALS Office of Academic Affairs website (https:// cals.wisc.edu/academics/undergraduate/student-life/advising-andservices/) for more information.

## SCHOLARSHIPS AND FINANCIAL RESOURCES

CALS has an extensive scholarship program (https://cals.wisc.edu/ academics/undergraduate/funding-your-education/cals-scholarships/) with more than $\$ 1.2$ million in awards available to CALS students annually, including first-year students. This is in addition to university scholarships, grants, loans, and employment available at the Office of Student Financial Aid (https://financialaid.wisc.edu/). One yearly application allows students to be considered for any scholarships administered by the college. Scholarships that are awarded based on financial need require a current Free Application for Federal Student Aid (FAFSA (https:// studentaid.gov/)) on file with the university.

## STUDY ABROAD

Today's college graduates must be prepared for the international community in which they will live and work. Study and research abroad programs offer students unique opportunities to enrich their education by experiencing other cultures and broadening their understanding of agricultural and life sciences outside the United States. CALS offers more than 34 short- and long-term programs in more than 20 countries, led by CALS faculty and administered by CALS Study Abroad (https:// cals.wisc.edu/academics/undergraduate-students/studyabroad/). Additionally, CALS students can choose from more than 250 UW-Madison study abroad programs (https://studyabroad.wisc.edu/programs/). All programs carry UW-Madison academic credit, and many fulfill academic and major requirements (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/). CALS offers scholarships to CALS students for study abroad to reduce any financial barriers to participation.

## HONORS

The CALS Honors Program (p.50) allows highly motivated students to continue challenging themselves through research and coursework. The objective of the Honors Program is to help students develop critical thinking and problem-solving abilities and to provide students the
challenge of designing, conducting, and reporting research in collaboration with faculty from one of the world's leading research institutions.

## STUDENT ORGANIZATIONS

Student organizations (https://cals.wisc.edu/academics/undergraduate/ student-life/student-organizations/) provide a vehicle for students to gain leadership experience, develop professional skills, and build on personal interests. CALS sponsors more than 20 organizations that help students meet their professional and personal interests.

## HONORS

## HONORS PROGRAM

The CALS Honors Program allows highly motivated students to continue challenging themselves through research and coursework. The objective of the Honors Program is to help students develop critical thinking and problem-solving abilities through specialized courses and to provide students the challenge of designing, conducting, and reporting research in collaboration with faculty from one of the world's leading research institutions.

## HONORS

CALS has two different avenues to earn an Honors degree designation. Students may complete either based on their interests and goals. Students are not allowed to complete both types of honors. In either option, a student must successfully complete a Senior Honors Thesis approved by the research mentor or committee.

## Honors in Research

Students engage in the university's great research tradition through the completion of two research projects: an introductory project and a senior thesis project. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to the hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery. Students who successfully complete Honors in Research (https://cals.wisc.edu/academics/undergraduate/current-students/honors-program/honors-research/) will receive an Honors designation on their diploma.

## Honors in the Major

Students complete a specified number of Honors credits in a designated set of courses to gain advanced knowledge and inquiry within their major field of interest. A limited number of CALS majors offer this program option; more information is located on the Requirements tab for the major. Students who successfully complete Honors in the Major will receive an Honors designation on their transcript.

For complete information contact the Office of Academic Affairs, 116 Agricultural Hall, at 608-262-3003 or academicaffairs@cals.wisc.edu.

## DEAN'S LIST

Students who achieve at a high level academically are recognized by the dean. Selections to the Dean's List are announced at the close of each semester. The student's achievement for only the single semester is considered and is noted on the transcript. To be placed on the Dean's List, a student must have achieved at least a 3.5 GPA or above for the semester's study load of not less than 12 credits, on a regular grade basis (A, $A B, B, B C, C, D, F)$, regardless of overall grade point average, and must not have received a grade of F or an Incomplete for any course, or a U (for a
pass/fail course) or an $N$ (for Credit/No Credit graded course that was not passed).

## GRADUATION WITH DISTINCTION OR HIGHEST DISTINCTION

Students who graduate with a cumulative GPA that places them in the top 20 percent of the graduating class in the college will graduate with "Distinction"; those in the upper 5 percent, with "Highest Distinction." These students must have at least 60 credits on the UW-Madison campus. The notations on the student's transcript will read "Graduated with Distinction" or "Graduated with Highest Distinction" in the "Degrees Awarded" section of the transcript. The registrar makes these calculations and updates final transcripts approximately 45 days after the grading deadline for each semester.

## DISTINCTIVE SCHOLASTIC ACHIEVEMENT

A preliminary list of those degree candidates who may be eligible for Graduation with Distinction is prepared by the registrar prior to commencement. These students are eligible to wear a cardinal stole with their caps and gowns at commencement. Inclusion on the Distinctive Scholastic Achievement list does not guarantee Graduation with Distinction, which is determined after final grades are awarded.

## AGRICULTURAL AND APPLIED ECONOMICS

The Department of Agricultural and Applied Economics (AAE) at the University of Wisconsin-Madison was founded in 1909 and was the first department of agricultural economics in the United States. The department offers two undergraduate programs-Agricultural and Applied Economics (p. 51) and Agricultural Business Management (http:// guide.wisc.edu/undergraduate/agricultural-life-sciences/agricultural-applied-economics/business-management-abm/). Both majors will give students a strong base in economics and how it is applied to realworld situations. The teaching and research in AAE focuses on the areas of development economics, environmental economics, and managerial economics.

The department also offers two certificates to undergraduate students enrolled at the University of Wisconsin-Madison: the Certificate in Business Management for Agricultural and Life Sciences (p. 60) and the Certificate in Development Economics (p. 61).

## DEGREES/MAJORS/CERTIFICATES

- Agricultural and Applied Economics, B.S. (p. 51)
- Agricultural Business Management, B.S. (p. 56)
- Business Management for Agricultural and Life Sciences, Certificate (p. 60)
- Development Economics, Certificate (p. 61)

## RESOURCES AND SCHOLARSHIPS

## SCHOLARSHIPS

The Department of Agricultural and Applied Economics offers a number of scholarships to students declared in both of our majors, Agricultural \& Applied Economics (p. 51) and Agricultural Business Management (p. 56). All of our students are encouraged to apply each year for department and CALS scholarships through the Wisconsin Scholarship Hub (WiSH). Students in either of our majors or who have declared the Certificate in Business Management for Agricultural \& Life Sciences (p. 60) are also eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship/), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://renk.aae.wisc.edu/) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

## RESOURCES

There are a number of student organizations of interest to students in our majors. For more information, please visit the CALS Student Organization (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/student-organizations/\#association-of-women-in-agriculture) website.

## AGRICULTURAL AND APPLIED ECONOMICS, B.S.

Agricultural and applied economics (AAE) majors learn about the principles of economics and how to apply them to real-world problems
and public policy debates. This training equips students to analyze the economic factors impacting a wide range of issues, including environmental challenges and sustainability; energy and climate change; globalization and trade; business economics and finance; global poverty and hunger; community and regional economic development; biotechnology; and food systems.

All AAE students take a set of core courses in microeconomics, macroeconomics, statistics and math, then select one of four concentrations: environmental economics, development economics, managerial economics or applied economics.

A degree in agricultural and applied economics helps students prepare to work as environmental economists, environmental managers, agricultural economists, policy and business analysts, researchers, managers, consultants, and auditors with nonprofit organizations, government agencies, co-operatives, multinational firms, agribusiness companies, financial institutions, and the food or retailing industry. Students also go on to pursue graduate-level degrees in economics, public policy, business, or law.

LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES
Students are encouraged to apply their course learning to real life through research projects, independent studies and internships with guidance from faculty and staff members. During their final year, majors complete a senior capstone course where they work closely with fellow students on a semester-long project and also hear from program alumni.

## BUILD COMMUNITY AND NETWORKS

Students get to know faculty and instructors through the courses they take, and they can build their networks by participating in student organizations and the department's commodity trading challenge team.

Individuals selected for the Renk Scholarship Program (https:// renk.aae.wisc.edu/renk-scholarship/), operated by the Renk Agribusiness Institute (https://renk.aae.wisc.edu/), receive mentorship and financial support, as well as internship and networking opportunities.

CUSTOMIZE A PATH OF STUDY

AAE students customize their academic experience to fit their career goals by selecting one of four concentrations within the major: environmental economics, development economics, managerial economics, or applied economics

## MAKE A STRONG START

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

GAIN GLOBAL PERSPECTIVE
Many AAE majors study abroad to gain an international perspective and prepare to participate in today's global economy. Students can explore studying abroad as an AAE major utilizing the AAE Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about
becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits

- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.

| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |
| :---: | :---: |
| First Year Seminar (p. 46) | 1 |
| International Studies (p. 47) | 3 |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science | 5 |
| Additional Science (Biological, Physical, or Natural) | 3 |
| Science Breadth (Biological, Physical, Natural, or Social) | 3 |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

## MAJOR REQUIREMENTS

Title
Mathematics and Statistics
This major requires calculus. Prerequisites may need to be taken before enrollment in calculus.
Select one of the following:

| MATH 211 | Calculus |
| :--- | :--- |
| MATH 217 | Calculus with Algebra and <br> Trigonometry II |
| MATH 221 | Calculus and Analytic Geometry 1 |

Select one of the following: 3-6

| ECON 310 | Statistics: Measurement in <br> Economics |

AAE courses 200 level and above may not include A A E 215 Introduction to Agricultural and Applied Economics, A A E 299 Independent Study, or A A E 500 Senior Capstone Experience.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Use economic concepts to think critically about real-world problems and public policy debates.
2. Use appropriate quantitative techniques to analyze economic problems.
3. Communicate results effectively orally and in writing.

## Total Credits 30

## 1

Students must complete MATH 211 or MATH 217 or MATH 221. Students may satisfy the required level of math proficiency through the math placement exam. On the other hand, this level of competence may require as many as three semesters of coursework in mathematics.

## ADVISING AND CAREERS

## ADVISING

Each agricultural and applied economics major receives one-on-one guidance from an academic advisor. The advisor helps students plan their coursework and identify opportunities to get involved in department and campus activities.

The agricultural and applied economics department offers a one-credit course in career development for majors. Students in the course hear from department alumni and others about their career paths and receive resume writing assistance and interviewing tips.

## CAREER OPPORTUNITIES

Agricultural and applied economics graduates have great careers as environmental economists, agricultural economists, policy and business analysts, consultants, researchers, managers, traders and auditors for nonprofit organizations, government agencies, multinational firms, financial institutions, agribusiness companies, co-operatives and food companies. Graduates also pursue advanced degrees in economics, public policy, business, or law.

AAE graduates are recognized for their skills in data analysis, business and economic forecasting, strategic planning, management, and leadership.

For more information contact Michaela Thaw (pthaw@wisc.edu)
or schedule an appointment through Starfish (https://
wisc.starfishsolutions.com/starfish-ops/dl/instructor/ serviceCatalog.html?bookmark=connection/129721/schedule).

## Undergraduate Advisor:

## Michaela Thaw

For faculty and instructor profiles, visit the department website (http:// aae.wisc.edu/).

## WISCONSIN EXPERIENCE

## STUDENT ORGANIZATIONS

There are numerous campus student organizations of interest to agricultural and applied economics majors, including Economics Student Association, Global Economic Forum - Madison, and Women in Economics. A full list of organizations is available on the Wisconsin Involvement Network website (https://win.wisc.edu/organizations/).

## COMPETITIVE TEAMS

Each year, a team of UW-Madison students participates in the annual CME Group University Trading Challenge (https://www.cmegroup.com/events/ university-trading-challenge.html), a simulated trading competition that pits hundreds of college teams from around the world against one another as they make real-time commodity trading decisions.

## RESEARCH EXPERIENCE

AAE students are able to gain social science research experience on both domestic and international topics by working with a faculty member on a specific project.

## INTERNSHIPS

Agricultural and applied economics majors can complete an internship during their undergraduate years.

## GLOBAL ENGAGEMENT

Many agricultural and applied economics students choose to study abroad. These programs help students gain an international perspective and prepare them to participate in today's global economy. Students can find more information on the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/). Study abroad options include programs that focus on sustainable development, food systems, agriculture, health and wellness, and community and economic development.

AAE students who select development economics as their area of concentration take numerous international-focused courses that address the global economy, population, and poverty.

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

AAE students have numerous volunteer activities to choose from. The Morgridge Center for Public Service (https://morgridge.wisc.edu/)
provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. The Department of Agricultural and Applied Economics awards an average of \$60,000 in scholarships per year to students in the department. Students apply for CALS and AAE scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). Learn more about college scholarships (https://cals.wisc.edu/ academics/undergraduate-students/financing-your-education/calsscholarships/).

AAE majors are also eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship/), which can provide scholarships for up to three years. The program, offered through the Renk Agribusiness Institute (https://renk.aae.wisc.edu/), is designed for highperforming students with an interest in agriculture or agribusiness. In addition to financial support, Renk Scholars are provided networking opportunities that help them find internships and other experiences to build their business and leadership skills.

## AGRICULTURAL BUSINESS MANAGEMENT, B.S.

Agricultural business management (ABM) majors learn to apply the fundamentals of business to agriculture and related industries. Students study business operations; finance and economic decision analysis; analytical and managerial tools; organization of the food system; and commodity markets.

Offered through the Department of Agricultural and Applied Economics, ABM coursework includes agribusiness, economics, statistics, accounting, finance, and management. Majors can take some courses through the School of Business, including business law, fundamentals of accounting and finance, and fundamentals of management. ABM majors learn managerial economics, how businesses make decisions and minimize risk, and how to use applied mathematics and statistics to analyze prices and markets.

The agribusiness industry-which encompasses enterprises related to farming and the bio-economy-needs staff who are educated in both business and agriculture. The ABM major prepares students for great careers in management, business analysis, marketing, commodities trading, sales, consulting, banking, and finance. In addition to agribusiness firms, ABM graduates find employment with food companies, tech companies, co-operatives, government agencies, and financial institutions.

## Learn through hands-on, real-world Experiences

Students are encouraged to apply their course learning to real life through research projects, independent studies, and internships with guidance from faculty and staff members. During their final year, majors complete a senior capstone course where they work closely with fellow students on a semester-long project and also hear from program alumni.

## Build community and networks

Students get to know faculty and instructors through the courses they take, and they can build their networks by participating in student organizations and the department's commodity trading challenge team.

Individuals selected for the Renk Scholarship Program (https:// renk.aae.wisc.edu/renk-scholarship/), operated by the Renk Agribusiness Institute (https://renk.aae.wisc.edu/), receive mentorship and financial support, as well as internship and networking opportunities.

## Customize a path of study

Core courses focus on macroeconomics, microeconomics, finance, accounting, commodity markets, and economic analysis, planning, and management. ABM students customize their academic experience to fit their career goals by completing additional coursework in finance, accounting, management, marketing, business law, and human resources.

## Make a strong start

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

## Gain global perspective

There are several internationally focused courses that ABM majors can take within the Department of Agricultural and Applied Economics. Some students choose to study abroad, working with their advisor and the CALS study abroad office to identify appropriate programs. Students can explore studying abroad as an ABM major utilizing the Agricultural Business Management Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

Students in the Agricultural Business Management BS degree program may not declare the Certificate in Business Management for Agricultural and Life Sciences.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the
requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits

ABM majors are also eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship/), which can provide scholarships for up to three years. The program, offered through the Renk Agribusiness Institute (https://renk.aae.wisc.edu/), is designed for highperforming students with an interest in agriculture or agribusiness. In addition to financial support, Renk Scholars are provided networking opportunities that help them find internships and other experiences to build their business and leadership skills.

## BUSINESS MANAGEMENT FOR AGRICULTURAL AND LIFE SCIENCES, CERTIFICATE

Basic business literacy can benefit all graduates, whatever their field or intended career may be. When entering the professional world, CALS students increasingly encounter situations that require an understanding of basic business and management concepts. The Certificate in Business Management for Agricultural and Life Sciences can provide students the business skills that employers value.

The certificate offers students in the College of Agricultural and Life Sciences (CALS) the opportunity to gain business knowledge and have it recorded on their transcript. The certificate is designed specifically for students intending to pursue careers in agriculture and life sciences, and enrollment is open only to undergraduates currently enrolled in CALS. This professional credential is offered by the Department of Agricultural and Applied Economics, the Department of Life Sciences Communication, and the Renk Agribusiness Institute.

## HOW TO GET IN

To declare this certificate, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44). Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

Students may not earn this certificate in conjunction with a BS in Agricultural Business Management.

REQUIREMENTS

| Code | Title | Credits |
| :---: | :---: | :---: |
| Completion of the certificate requires a total of six courses. |  |  |
| The following four courses are required: |  |  |
| A A E 215 | Introduction to Agricultural and Applied Economics | 4 |
| LSC 270 | Marketing Communication for the Sciences | 3 |
| GEN BUS 310 | Fundamentals of Accounting and Finance for Non-Business Majors | 3 |
| GEN BUS 311 | Fundamentals of Management and Marketing for Non-Business Majors | 3 |
| Select two courses from the following: |  | 5-6 |

| A A E 319 | The International Agricultural Economy |
| :---: | :---: |
| A A E 320 | Agricultural Systems Management |
| A A E 322 | Commodity Markets |
| A A E 323 | Cooperatives and Alternative Forms of Enterprise Ownership |
| A A E 335 | Introduction to Data Analysis using Spreadsheets |
| A A E 419 | Agricultural Finance |
| A A E/ECON 421 | Economic Decision Analysis |
| A A E 422 | Food Systems and Supply Chains |
| A A E/ECON 526 | Quantitative Methods in Agricultural and Applied Economics |
| A AE/MHR 540 | Intellectual Property Rights, Innovation and Technology |
| DY SCI 233 | Dairy Herd Management I |
| DY SCI 234 | Dairy Herd Management II |
| DY SCI 535 | Dairy Farm Management Practicum |
| LSC 250 | Research Methods in the Communication Industry |
| LSC 251 | Science, Media and Society |
| LSC 432 | Social Media for the Life Sciences |
| LSC 435 | Brand Strategy for the Sciences |

- No substitutions are allowed for the core courses.
- Students may count no more than two courses toward both their major requirements and these certificate requirements.
- Minimum average 2.000 GPA in all certificate courses.
- 12 credits in the certificate must be taken in residence.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Understand general business concepts.
2. Understand business management fundamentals in an agricultural and life sciences context.
3. Understand economics, marketing and communication as they relate to business management in agricultural and life science industries.

## ADVISING AND CAREERS

For more information or to declare the Certificate in Business Management for Agricultural and Life Sciences, contact:

Michaela Thaw
Department of Agricultural and Applied Economics
424 Taylor Hall
608-262-9488
pthaw@wisc.edu

Schedule an appointment using Starfish (https:// wisc.starfishsolutions.com/starfish-ops/dl/instructor/ serviceCatalog.html?bookmark=connection/129721/schedule).

## CAREERS

Students pursing the Certificate in Business Management for Agricultural and Life Sciences are often interested in careers such as running a research lab, managing the books on their family farm, banking, business analysis, marketing, or management and sales, depending on their major. When combined with their major, the certificate can provide a basic background in business management that many employers find valuable.

Students can use the services provided by the CALS Career Services Office (https://cals.wisc.edu/academics/undergraduate-students/careerservices/), which include help with creating a resume or cover letter and mock interviews. CALS students also have access to Handshake (https:// cals.wisc.edu/academics/undergraduate-students/career-services/ handshake/), an online job/internship posting tool that provides students with hundreds of job and internship listings.

## WISCONSIN EXPERIENCE

## INTERNSHIPS

Students declared in the Certificate in Business Management for Agricultural and Life Sciences may choose to do an internship to get some experience in their field of interest. They can use the services provided by the CALS Career Services Office (https://cals.wisc.edu/academics/ undergraduate-students/career-services/) to help find an internship, including Handshake (https://cals.wisc.edu/academics/undergraduate-students/career-services/handshake/), an online job/internship posting tool that provides students with hundreds of job and internship listings.

## RENK SCHOLARSHIP PROGRAM

Students declared in the Certificate in Business Management for Agricultural and Life Sciences are eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship/), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https://
renk.aae.wisc.edu/) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

## RESOURCES AND SCHOLARSHIPS

## RENK SCHOLARSHIP PROGRAM

Students declared in the Certificate in Business Management for Agricultural and Life Sciences are eligible to apply for the Renk Scholarship Program (https://renk.aae.wisc.edu/renk-scholarship/), which can provide scholarships for up to three years. The Renk Scholarship Program is part of the Renk Agribusiness Institute (https:// renk.aae.wisc.edu/) and emphasizes leadership in contemporary agricultural issues and activities linked to agribusiness.

## DEVELOPMENT ECONOMICS, CERTIFICATE

The certificate in development economics gives students a solid foundation of analytical skills that will enable them to better understand the challenges created by world poverty. They will learn how economics can be used to address the problems of poverty and the impact of globalization on growth and development. Students will focus on such issues as: the relationship between population growth and economic growth, the major debates about food self-sufficiency and food security, how child labor and gender discrimination limit economic development, and what environmental problems are posed by economic development.

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin-Madison.

## HOW TO GET IN

The certificate in development economics is open to any undergraduate student enrolled at the University of Wisconsin-Madison. In order to declare the certificate, the student must have successfully completed A A E 215, ECON 101 or ECON 111. Contact the advisor listed under the Advising and Careers tab for more information or to declare the certificate.

## REQUIREMENTS

## Code

Title
Credits
In order to declare the certificate, the student must have successfully completed one of the following:

| A A E 215 | Introduction to Agricultural and <br> Applied Economics |  |
| :--- | :--- | :--- |
| ECON 101 | Principles of Microeconomics |  |
| ECON 111 | Principles of Economics- <br> Accelerated Treatment | Credits |
| Code | Title |  |
| The certificate requires five courses. |  |  |
| Complete two core courses: | 3 |  |
| A A E/ECON 474 | Economic Problems of Developing <br> Areas | 3 |

| POLI SCI 348 | Analysis of International Relations |
| POLI SCI 350 | International Political Economy |

Select one additional course from any of the courses listed 3 above

Total Credits

- A student may combine this certificate with any other certificate and/ or major. However, students with a major in Agricultural and Applied Economics, a major in Economics, or a major in the Politics and Policy in the Global Economy option in International Studies may count no more than 2 courses toward both their major requirements and the requirements for the certificate in development economics.
- $50 \%$ of certificate coursework must be completed in residence.
- Minimum average 2.000 GPA in all certificate courses.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Understand the impacts of global economic processes, such as trade foreign investment, and migration, on growth and development.
2. Understand the contributions of private and public investments in areas such as agriculture, education, environmental resources, health care, industrialization, and technology adoption to growth and development, and the methods for measuring those effects.

## ADVISING AND CAREERS

For more information or to declare the certificate in development economics, contact:

## Michaela Thaw

## CAREERS

Students pursuing the certificate in development economics are often interested in careers in international development. Depending on their major, they often find careers in policy analysis, consulting, or working abroad. They can find employment with a variety of employers such as nonprofit organizations, government agencies, cooperatives, or multinational firms. Many students pursue graduate degrees in economics, public policy, law, or other areas.

## STUDY ABROAD

Many students declared in the certificate in development economics choose to study abroad. Study abroad programs offer students the opportunity to gain an international perspective and can prepare them to participate in today's global economy. International Academic Programs (IAP) (https://www.studyabroad.wisc.edu/) serves as the primary study abroad office on campus, offering more than 200 programs in more than 60 countries around the world. IAP program offerings, available to all majors, range from short-term, faculty-led opportunities to intensive language study, internships, a semester or a year at a university overseas, service learning, and programs with special themes. There are also international programs offered through the College of Agricultural and Life Sciences (CALS) (https://cals.wisc.edu/academics/ undergraduate-students/studyabroad/). Study abroad programs in CALS cover a variety of content areas such as sustainable development, food systems, agriculture, health and wellness, and community and economic development.

> AGRICULTURAL AND LIFE SCIENCES - COLLEGE-WIDE

## DEGREES/MAJORS/CERTIFICATES

- College of Agricultural and Life Sciences Honors (p. 63)
- Individual Major, B.S. (p. 64)

> COLLEGE OF AGRICULTURAL AND LIFE SCIENCES HONORS

The CALS Honors Program allows motivated students to continue challenging themselves in the classroom and beyond. Students may pursue either Honors in Research or Honors in the Major. Both tracks require a senior honors thesis and result in an honors designation upon graduation.

## HONORS IN RESEARCH

Students completing the CALS Honors in Research track engage in the university's great research tradition. From selecting a research question and designing a study through analysis and presentation of the results, the Honors in Research track requires students to explore the full scientific process. Students identify a faculty mentor to oversee their research efforts and support their progression through the program. In addition to this hands-on research experience, students are required to enroll in coursework directed at furthering their knowledge in quality and ethical scientific discovery.

## HONORS IN MAJOR

Information can be found in the "Requirements" tab for each major that offers the option.

## HOW TO GET IN

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

The Honors in Research track requires students to complete two research projects, an introductory project and a senior thesis project. Students work under the guidance of a faculty mentor for both projects.

In the course of this program, it is expected that the student will: (i) learn the background and methods of the discipline; (ii) identify an interesting and tractable problem or question for study; (iii) learn to draft a proposal defending the relevance and appropriateness of specific research efforts; (iv) demonstrate appropriate skills in working on that problem in a manner appropriate to a professional in the discipline; (v) analyze and interpret the results of their efforts; and (vi) present these results as a thesis and in an approved public forum.

To earn Honors in Research, students must first be admitted to the college's Honors Program. Students must then make satisfactory progress toward the program requirements listed below and maintain a 3.25 GPA. Failure to maintain this progress will result in removal of the student from the Honors Program.

## Program requirements:

- Identify a research mentor
- Complete introductory (one-semester) research project and presentation
- Complete three seminar courses (one credit each)
- INTER-AG 288 (spring of freshman year)
- INTER-AG 388 (spring of sophomore year)
- INTER-AG 488 (spring of junior year)
- Enroll in Senior Honors Thesis credits (681 and 682; or 699 in the mentor's department) for two semesters at a minimum of two credits each semester
- Complete a Senior Honors Thesis research project and presentation
- Submit the Senior Honors Thesis and related documentation to CALS Academic Affairs
- Maintain a cumulative grade point average of 3.25

Additional information can be found on the Honors website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/).

## ADVISING AND CAREERS

Find additional information on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Questions may be directed to Heather Mialik, the CALS Honors Program Manager, at heather.mialik@wisc.edu or CALS Academic Affairs at 608-262-3003.

## INDIVIDUAL MAJOR, B.S.

Students who wish to pursue a special intellectual problem or academic path not adequately covered by existing majors can work with advisors and faculty to create an individual path of study to meet their goals. The individual major must involve courses from several programs, must be at least as rigorous as existing majors, and must be targeted at a special intellectual problem or academic need identified by the student.

The individual major must be approved by a faculty committee and the CALS Curriculum Committee. Students are strongly encouraged to consult with an assistant dean in the CALS Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

## Learn through hands-on, real world experiences

Most CALS students complete independent research under the guidance of internationally recognized faculty researchers. Lab or field courses related to the special interests of the student are encouraged as part of the individual major.

## Build community and networks

With more than 20 CALS-sponsored student organizations, students can build their professional networks early and enhance their leadership skills.

## Customize a path of study

Students who complete an approved individual major work closely with faculty and staff to craft a path of study unique to them. Their diploma will include the approved name of their specialized major.

## Make strong start

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

All individual majors must complete a CALS International Studies course or approved study abroad experience. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

Individual majors must be approved by a faculty committee and the CALS Curriculum Committee. Approval is not guaranteed, so students should consider alternative options carefully. Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. The process to request to pursue an individual major is outlined below.

The student selects a three-person faculty committee from departments offering courses in the proposed major. The major advisor is from a CALS department that offers many of the courses in the proposed individual major. No more than two members of the committee can be from a single department. The student must submit a proposed plan of study to the committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The plan should include: the title of the proposed major; the rationale for the major; learning outcomes for the major and a brief assessment plan; the list of courses and the reasons for including each course in the major; and a semester plan for degree completion. The student is required to earn at least 30 credits after the term in which the proposal is approved. Thus, early planning is essential.

If the faculty committee approves the plan, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the Curriculum Committee to present the proposal. The Curriculum Committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. The decision of the Curriculum Committee is final.

Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the Curriculum Committee.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code Title | Credits |
| :---: | :---: |
| Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation. |  |
| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |
| First Year Seminar (p. 46) |  |
| International Studies (p. 47) | 3 |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science | 5 |
| Additional Science (Biological, Physical, or Natural) | 3 |
| Science Breadth (Biological, Physical, Natural, or Social) | 3 |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

## INDIVIDUAL MAJOR REQUIREMENTS

 DEVELOPMENT OF THE INDIVIDUAL MAJORStudents are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion. Development of the
individual major is the responsibility of the student. The student should identify a faculty major advisor from the CALS department that offers many of the courses in the proposed individual major. In addition, the student should select two additional faculty from departments offering the courses in the proposed major to serve on the faculty committee. The student should consult with the faculty members and an assistant dean in Academic Affairs as a plan of study is developed. The plan of study must include the following:

- title of proposed major
- rationale for the major (what specific goal does the major achieve that cannot be achieved through one or more existing majors? what is the targeted intellectual problem? why is the major necessary for achieving the student's academic and career goals?)
- 3-5 learning outcomes for the major with a brief explanation of how learning will be assessed
- list of courses, including the reason for including each course in the major (how does each course contribute to the major learning outcomes?)
- semester plan for degree completion and estimated graduation term (if graduation exceeds four total years, include a justification for the extended time-to-degree; note that the student must earn at least 30 credits after the term in which the proposal is approved)

## APPROVAL OF THE INDIVIDUAL MAJOR

Once the plan of study is developed, the student submits the plan to the faculty committee for review and approval. The faculty committee must consult with the department with the most courses in the proposed major. The faculty committee may require revisions prior to approval, or choose not to accept the plan. Once approved, the student should work with CALS Academic Affairs to submit the plan of study to the CALS Curriculum Committee along with a letter of support from the major advisor and a summary of the department discussion of the plan. The student and faculty advisor will meet with the curriculum committee to present the proposal. The curriculum committee may approve the proposal, reject the proposal, or ask for further clarification and resubmission. Approval of an individual major is not guaranteed, so students should consider alternative options carefully. The decision of the curriculum committee is final.

Any changes in the major must be approved by the faculty advisor and reported to the Office of Academic Affairs, and any changes that significantly affect the nature or rigor of the program must be reviewed and approved by the curriculum committee.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

Students will develop learning outcomes as part of the individual major proposal process in consultation with their faculty mentors and an assistant dean. Review the Provost's website (https:// assessment.provost.wisc.edu/student-learning-outcomes/writing-student-learning-outcomes/) for guidelines on developing learning outcomes.

## FOUR-YEAR PLAN

Students will develop a semester-by-semester plan as part of the proposal process for the individual major, in consultation with their faculty mentors and an assistant dean. Review the Four-Year Plans available for similar or related majors in the Guide to begin planning. Students should submit the proposal early in their academic career but no later than achieving senior standing ( 86 credits) to ensure timely progress to degree completion.

## ADVISING AND CAREERS

## Advising

Students are strongly encouraged to consult with an assistant dean in the Office of Academic Affairs early in their undergraduate career to discuss the process, planning, and feasibility of completion.

Students are required to identify a faculty advisor as part of the process for requesting approval to pursue an individual major. The faculty advisor serves as the student's academic advisor along with support from the other members of the student's faculty committee and professional advisors in the Office of Academic Affairs.

## Career opportunities

Students with specific post-graduate plans who pursue an individual major can work with advisors to craft a curricular plan that will meet their career goals.

## WISCONSIN EXPERIENCE

Opportunities to apply classroom learning to real-world settings is at the core of a CALS education. We offer a variety of CALS Signature Experiences for students in all majors to live the Wisconsin idea and fulfill the Wisconsin Experience (https://wisconsinexperience.wisc.edu/).

These opportunities fall into five major categories:
CALS students make a strong start, and every CALS first-year student can achieve that through a First-Year Seminar to explore different areas of study, learn about how to take advantage of campus resources, and make friends. There are several seminars to choose from, including QuickStart (https://cals.wisc.edu/academics/prospective-students/quickstart/), an online course that allows students to begin their college career the summer before they arrive on campus.

CALS students learn through hands-on, real world experiences. A majority of CALS students earn credit for research experiences in labs and internships.

Through student organizations, peer advising and mentoring, and residential learning communities, students build their community and networks.

Students gain a global perspective by taking courses with an international focus, and many students choose to study abroad. CALS offers more than 34 faculty-led study abroad programs, and students may also choose from general UW-Madison study abroad opportunities.

Finally, many CALS students take advantage of the ability to customize their path of study by participating in an honors program (https:// guide.wisc.edu/undergraduate/agricultural-life-sciences/\#honorstext), pursuing certificates or multiple majors, and choosing elective courses that match their interests and meet their goals.

## RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships (https://cals.wisc.edu/academics/undergraduate-students/ financing-your-education/cals-scholarships/).

## AGRONOMY

Agronomy is plant biology striving to meet the world's expanding need for food, fiber, and fuel in an efficient, environmentally sound, and sustainable manner.

An undergraduate student majoring in Agronomy earns a bachelor of science degree. The Agronomy curriculum offers undergraduate and graduate studies in plant biotechnology, breeding, genetics, physiology, crop management and protection strategies, agroecology, and sustainable agriculture. Agronomy undergraduate students concentrate on plant science courses but also select related courses in soil science, genetics, economics, business, engineering, entomology, and the animal sciences, depending upon their interests.

The current demand for Agronomy graduates exceeds supply, and we expect the demand to increase. Career possibilities include biotechnology, research, agri-business, resource conservation, and crop production and management. In addition to classroom learning, students gain practical experience in their area of interest and earn degree credit at the same time through internships and independent study. The Agronomy major also serves as an excellent foundation for students interested in pursuing advanced studies in plant biotechnology, breeding, genetics, physiology, crop management, agroecology, or sustainable agriculture. Graduate programs are described in the Graduate Guide.

For more information about our faculty and their research interests, visit our departmental website (https://agronomy.wisc.edu/people/faculty/).

## RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

In addition, the department awards money each year to students who wish to study abroad.

## AGRONOMY, B.S. <br> CREATING A HEALTHIER, MORE PRODUCTIVE, MORE RESILIENT AGRICULTURE FOR WISCONSIN AND THE WORLD.

That is the challenge taken up by the faculty, staff, and students of the Department of Agronomy.

We generate and apply knowledge about the plants that feed and benefit humankind. Agronomic crops are typically grown for grain to feed people and livestock, or are processed into products. Feed crops are grown specifically to meet the nutritional needs of livestock. Forage crops are grown for their stems, leaves, and other edible plant parts.

We find and implement solutions to problems and opportunities concerning efficiency and sustainability of crop production and in safe and environmentally sound ways.

We generate knowledge on the genetics, genomics, biochemistry, and physiology of plants.

We study the interactions among cropping systems, climate, and the environment. We emphasize sustainable agriculture, whether precision, traditional or organic, in order to reduce the impact on the environment and the inhabitants of our planet.

We work to ensure that agricultural systems and products in Wisconsin and the world are able to meet rapidly-changing needs and those of future generations.

Undergraduates in the Department of Agronomy earn a bachelor of science degree to prepare them for everything from pursuit of a graduate degree to careers in science, education, agriculture, agribusiness, and environment and conservation.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.

Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46)
International Studies (p. 47) 3
Physical Science Fundamentals 4-5

| CHEM 103 | General Chemistry I |
| :---: | :--- |
| or CHEM 108 | Chemistry in Our World |
| or CHEM 109 | Advanced General Chemistry |

Biological Science 5
Additional Science (Biological, Physical, or Natural) 3
Science Breadth (Biological, Physical, Natural, or Social) 3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48)

## MAJOR REQUIREMENTS

| Code | Title | Credits |
| :---: | :---: | :---: |
| Mathematics and Statistics |  |  |
| Complete one of the following (or may be satisfied by placement exam): |  | 5-6 |
| MATH 112 <br> \& MATH 113 | Algebra and Trigonometry |  |
| MATH 114 | Algebra and Trigonometry |  |
| MATH 171 | Calculus with Algebra and Trigonometry I |  |
| MATH 211 | Calculus |  |
| MATH 221 | Calculus and Analytic Geometry 1 |  |
| Complete one of the following: |  | 3 |
| STAT 301 | Introduction to Statistical Methods |  |
| STAT 371 | Introductory Applied Statistics for the Life Sciences |  |
| STAT/B M I 541 | Introduction to Biostatistics |  |
| STAT/F\&W ECOL/ HORT 571 | Statistical Methods for Bioscience I |  |

## Chemistry

Complete one of the following: 5-9

| CHEM 103 | General Chemistry I |
| :--- | :--- |
| \& CHEM 104 | and General Chemistry II |
| CHEM 109 | Advanced General Chemistry |

Biology
Complete one of the following options: 10
Option 1:

| BOTANY/ | General Botany |
| :--- | :--- |
| BIOLOGY 130 |  |
| ZOOLOGY/ | Animal Biology |
| BIOLOGY 101 |  |
| ZOOLOGY/ <br> BIOLOGY 102 | Animal Biology Laboratory |

Option 2:

| BIOLOGY/ | Introductory Biology |
| :--- | :--- |
| BOTANY/ | and Introductory Biology |
| ZOOLOGY 151 |  |
| \& ZOOLOGY/ |  |
| BIOLOGY/ |  |
| BOTANY 152 |  |
| Option 3: |  |
| BIOCORE 381 | Evolution, Ecology, and Genetics |
| BIOCORE 382 | Evolution, Ecology, and Genetics |
| BIOCORE 383 | Cellular Biology |
| BIOCORE 384 | Cellular Biology Laboratory |

Economics
Complete one of the following:

| A A E 215 | Introduction to Agricultural and |
| :--- | :--- |
| ECON 101 | Applied Economics |
| ECON 111 | Principles of Microeconomics |
|  | Accelerated Treatment |

## Foundation

Complete 8 credits from any Foundation category (see list 8 below)
Complete all of the following: 12

| AGRONOMY 100 | Principles and Practices in Crop <br> Production |
| :--- | :--- |
| SOIL SCI 301 | General Soil Science <br> \& SOIL SCI 302 <br> and Meet Your Soil: Soil Analysis and <br> Interpretation Laboratory |

PL PATH 300 Introduction to Plant Pathology
Complete one of the following:
GENETICS 466 Principles of Genetics
AGRONOMY/ Plant Breeding and Biotechnology
HORT 338
Complete one of the following: 3-4
ENTOM/ Introduction to Entomology
ZOOLOGY 302
ENTOM 351 Principles of Economic Entomology
Complete one of the following:

| AGRONOMY/ | Grassland Ecology |
| :--- | :--- |
| BOTANY/SOIL |  |
| SCl 370 |  |
| BOTANY/F\&W | The Vegetation of Wisconsin |
| ECOL 455 |  |
| BOTANY/F\&W | General Ecology |
| ECOL/ZOOLOGY |  |
| 460 |  |
| ENVIR ST/LAND | Wetlands Ecology |
| ARC 361 |  |

Electives within the Major
Complete 14 additional credits of Agronomy courses ${ }^{1} 14$

## Capstone

| AGRONOMY 500 | Senior Capstone Experience | 2 |
| :--- | ---: | ---: |
| Total Credits | $\mathbf{7 1 - 7 9}$ |  |

1
No more than 3 credits total in AGRONOMY 299 Independent Study, AGRONOMY 399 Coordinative Internship/Cooperative Education, AGRONOMY 699 Special Problems. Credits used to satisfy the Capstone experience may not count here.

## FOUNDATION COURSES

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements

| Residency | Degree candidates are required to earn a minimum of <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
| :--- | :--- |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
| Quality of $\quad$Away programs. |  |
| Undergraduate students must maintain the minimum grade |  |
| porkt average specified by the school, college, or academic |  |
| program to remain in good academic standing. Students |  |
| whose academic performance drops below these minimum |  |
| thresholds will be placed on academic probation. |  |

## LEARNING OUTCOMES

1. Articulate the role of biological processes, management systems, environmental influences, and economic and social factors on world food, feed, and fiber production. Specific topics that all students should have knowledge of include: photosynthesis, nutrient cycling, genetic inheritance, and management and uses of primary U.S. crop species.
2. Develop a global perspective and appreciate the interdependencies among individuals and their workplaces, communities, environments, and the planet; and an understanding of the role of science in society.
3. Communicate effectively through writing and speaking, and will be able to identify and critically evaluate available sources of information.
4. Demonstrate the ability to critically and creatively analyze problems and evaluate systems.

1
Determined by placement exam. Consult SOAR advisor.
2
Eight (8) credits of Foundation courses required. See Requirements tab for details.

## 3

Fourteen (14) credits of agronomy electives required. See Requirements tab for details.

## ADVISING AND CAREERS

## ADVISING

The Department of Agronomy is faculty-advised, meaning that faculty members take on the responsibility of guiding and advising undergraduates through graduation. Students and faculty are matched as closely as possible by interest. All new freshmen and transfer students are temporarily advised by the student services coordinator until the advising relationship between professor and student is established. If you would like to have a conversation about joining the Department of Agronomy, please contact agronomy@wisc.edu.

## CAREERS

An Agronomy degree is an open door to careers in many related fields such as biotechnology, plant genetics, crop management,
agricultural financial management, farming, seed sales, crop consulting, Certified Crop Advising, Certified Professional Agronomy, agribusiness, extension agronomy, agricultural education, government work, and international agronomy.

## GENETICS

The fastest growing sector of agriculture is plant breeding, genetics, and genomics. Plant scientists are working at the field, plant, cellular, and molecular level to create cultivars that are hardier, disease resistant, nutritious, and affordable. The industry's growth is currently outstripping the rate of graduation; graduates can take their pick of interesting, fulfilling careers in the public and private sectors.

## BIOFUELS

The biofuel industry is also experiencing rapid growth, with research and development being focused on sugar-based biofuels, cellulosic biofuels, and biodiesels, made from plants as varied as switchgrass, sugar cane, corn, and wood pulp. These energy crops are harvested and processed into alternatives to fossil fuels.

## AGRIBUSINESS

In agribusiness, agronomists take data and translate it into real world applications. They sell tools for crop production, provide agricultural loans, consult on crops, manage businesses, and much more. They are often responsible for translating technical research data into applications. Numerous agronomy graduates are also involved in the sale of agricultural products, which are vital to today's economy. Other successful agronomists serve as crop advisers, farm managers, consultants, bank loan specialists, managers, and much more.

## RESEARCH/EDUCATION AND EXTENSION

Agronomic educators specialize in teaching and working with high school and college students. They also teach and advise students who chose advanced studies for a master's degree and/or Ph.D. They are extensively involved in research, publishing findings on a regular basis and making scientific advances.

Extension agronomists usually work for a state, local, or national government; they consult with farmers and others to help find answers to their specific problems and help farmers translate research results into usable management practices. Government-employed agronomists also work with farmers and ranchers to plan for soil and water conservation so crops and land can be managed efficiently and with minimal impact to the environment.

Werle, Rodrigo
For more information about our faculty and their research interests, visit our departmental website (https://agronomy.wisc.edu/people/faculty/).

## WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in agronomy, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Badger Crops Club (https://www.facebook.com/badgercropsclub/), a professional, social, and educational group for agronomy students and students in related fields interested in any aspect of crop production.
- Collegiate FFA (http://collegiateffamadison.weebly.com/), an official collegiate chapter of the National FFA organization.
- AWA (http://awamadison.org/)-the Association of Women in Agriculture, a professional student organization for young women with a passion for agriculture.
- WISELI (http://wiseli.engr.wisc.edu/)-Women in Science and Engineering Leadership Institute, a research center aiming to increase the representation, advancement, and satisfaction of women faculty and members of groups currently underrepresented on the faculty and in leadership at UW-Madison.
- Study Abroad: Agronomy majors have the opportunity to go on experiential study abroad programs, where students can immerse themselves in research or global agronomy field experiences. Students can review the International Academic Programs website (https://studyabroad.wisc.edu/) and the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/ international-programs/study-abroad-advising/) for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Research/Lab experience: Students are encouraged to get involved in research, whether in the agronomy department or through other plant-, soil-, or ecology-related departments. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can primarily be found by inquiring with faculty members.

## RESOURCES AND SCHOLARSHIPS

The Department of Agronomy is proud to participate in the CALS Scholarship Program, which awards thousands of dollars to undergraduate scholars every year. The majority of our students have some form of financial aid through CALS, the university, or work-study or laboratory jobs.

In addition, the department awards funds every year to students who wish to study abroad.

# ANIMAL AND DAIRY SCIENCES 

The Department of Animal and Dairy Sciences is the home of undergraduate and graduate programs in animal sciences and dairy science. It has a long and proud history of groundbreaking discoveries in animal nutrition, physiology, genetics, management, and muscle biology, which are coupled with excellence in the emerging fields of animal welfare, digital agriculture, and animal biologics to generate new knowledge and solve practical problems. The department is interdisciplinary, and the interests and skillsets of our faculty and graduate students range from molecular biology to animal care and management. Virtually all of our work happens in a biological context, with an eye toward advancing our understanding of animal biology, improving the lives of domestic animals, enhancing the sustainability of animal agriculture, and improving human health and nutrition.

The department was formed as a merger of the Department of Animal Sciences and the Department of Dairy Science in 2020, as a culmination of a long-stranding, interdependent relationship that includes sharing the Animal Sciences Building at 1675 Observatory Drive, cross-listing and co-teaching many core courses, and collaborating on countless research projects and outreach programs.

## ANIMAL SCIENCES, B.S. <br> OVERVIEW

Studying the biology of domesticated animals helps us better understand their health. The major addresses important issues related to animal health and welfare, biomedical advancements, food safety, precision livestock farming, and land and water stewardship.

Students in the animal sciences major learn about cattle, swine, sheep, horses, poultry, and goats, as well as companion animals. They also examine recent discoveries connecting human and animal health.

The Department of Animal and Dairy Sciences is home to the undergraduate program in animal sciences. It produces skilled leaders in animal agriculture and sustainable food systems while embracing innovation and technology. A 10:1 student-faculty ratio and small classes allow for meaningful connections among students and instructors.

Students can take courses on an assortment of topics including animal breeding, veterinary genetics, animal health and welfare, animal nutrition, and companion animals including dogs and cats, and more. The major offers a science-focused path for students interested in veterinary medicine, animal science, medicine, or other graduate programs.
Students can also focus on the business of animal sciences with classes in economics, accounting, marketing, farm management, and other courses.

## Learn through hands-on, real world experiences

The program emphasizes hands-on learning, and students choose from more than a dozen lab courses covering animal handling, reproductive biology, veterinary genetics, meat processing, animal welfare, and more. Field courses look at international agriculture and sustainability. The department encourages animal sciences majors to get involved with internships and research with faculty and staff.

## Build community and networks

Animal sciences majors find a welcoming community where professors know their students and can provide guidance based on their specific goals. Outside of the classroom, students can join several student organizations including the Pre Vet Club (https://win.wisc.edu/ organization/prevetassociation/), Badger Meat Science Club (https:// win.wisc.edu/organization/badgermeatscienceclub/), Saddle and Sirloin Club (https://win.wisc.edu/organization/saddleandsirloin/), and Poultry Club (https://www.facebook.com/PoultryClubUWMadison/).

Competitions, such as animal welfare assessment and meat judging offer students unique networking experiences in the industry.

## Customize a path of study

The variety of classes in the department, including paths that emphasize science or business, allows animal sciences students to customize their coursework to fit their career goals. Students can elect to complete Honors in Animal Sciences.

## Make a strong start

The department offers an introductory seminar course that helps students maximize their education, develop professional skills, and make informed decisions about their classes, internships, and career opportunities.

## Gain global perspective

Students are encouraged to study abroad; the department offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development. Students can explore studying abroad as an Animal Sciences major utilizing the Animal Sciences Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code Title Credits

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree
First Year Seminar (p. 46) 1
International Studies (p. 47) 3
Physical Science Fundamentals 4-5

| CHEM 103 | General Chemistry I |
| :---: | :--- |
| or CHEM 108 | Chemistry in Our World |
| or CHEM 109 | Advanced General Chemistry |

Biological Science
Additional Science (Biological, Physical, or Natural) 3
Science Breadth (Biological, Physical, Natural, or Social) 3
CALS Capstone Learning Experience: included in
the requirements for each CALS major (see "Major
Requirements") (p. 48)

## MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

| Code |  | Credits |

## Total Credits

26

1
A A E 215 Introduction to Agricultural and Applied Economics not accepted as a prerequisite for some advanced Business courses.

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take AN SCI 681 Senior Honor Thesis and AN SCI 682 Senior Honors Thesis when completing
their thesis project; please see the Honors in Major Checklist (http:// www.cals.wisc.edu/academics/undergraduate-programs/get-involved/ honors-program/honors-in-the-major/) for more information.

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. <br> The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| :--- | :--- |
| Residency | Degree candidates are required to earn a minimum of <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
| Quality of | Away programs. |
| Undergraduate students must maintain the minimum grade |  |
| Work | point average specified by the school, college, or academic <br> program to remain in good academic standing. Students <br> whose academic performance drops below these minimum |
| thresholds will be placed on academic probation. |  |

## LEARNING OUTCOMES

1. (Knowledge and comprehension) Develop the working vocabulary of an animal scientist, a working knowledge of the basic anatomy, biochemistry, physiology, and genetics of animal and meat biology, and the applied nutrition, breeding, product harvest and processing skills, necessary to manage animal production systems. Demonstrate knowledge through rigorous examination and demonstration through hands-on instructional laboratory activities.
2. (Analytical processing) Develop the ability to reduce complex datasets and scientific information into meaningful relationships and correlations, and using the scientific literature, develop hypotheses to test the cause of predicted relationships using the scientific method. Demonstrate skills through a senior capstone experience and through individualized research opportunities and instructional activities.
3. (Integration for application) Apply knowledge to develop solutions to real world problems. Identify problems yet to be investigated and in need of advanced study. Ability to integrate and apply knowledge is demonstrated through our internship programs, animal related job experiences, club activities, and problems sets that students solve in exams and laboratory settings.
4. (Critical thinking) Find their sources of information using peer reviewed research articles. Learn not only to question popular press, but understand that even in the scientific literature there are contradictory findings. Capacity to synthesize scientific literature such that they can communicate a position backed with strong scientific support. Skills are demonstrated through the reading, writing and discussion of science-based papers in key courses during their educational process and through an oral presentation in their capstone course.
5. (Effective communication) Communicate, both in writing and orally, the science behind the biology and management of domestically farmed animals. Communications provide new insights into animal production, and are explained in a manner fitting with the audience.

Ability to communicate is measured by their effectiveness in presenting research posters and presentations, their analysis of the literature in papers and presentations in class and during their senior capstone course.

## Total Credits 110-122

Choose Science or Business Emphasis; see Requirements tab for details. 2

12 credits required; see Requirements tab for options.

These courses are generally offered as intensive modular courses with 361 being offered first half of the semester and 362/363 offered second half of the semester.

## ADVISING AND CAREERS

## Advising

Each student receives one-on-one guidance from their professional advisor. Academic advisors will help students build an individualized, four-year plan. Many animal sciences majors have completed double majors with Life Sciences Communication, Genetics and Genomics, and departments outside of CALS such as Spanish, depending on the students' interests. Certificates such as CALS Business Management, Environmental Studies, Food Systems, and Global Health compliment several of our students interests and provide depth to their undergraduate program.

## Career opportunities

All students have a faculty mentor to assist with their career planning.
Students graduating with a degree in animal sciences can enter a number of career fields. These include nutrition, herd management, food testing, business, marketing, technology, meat science, healthcare, research, and teaching. Graduates have also found positions within zoos. Many students go on to pursue graduate education in veterinary medicine, animal science, or human medicine.

## WISCONSIN EXPERIENCE

## Internships

Animal sciences majors take part in a number of internships around campus and beyond. Past students interned at veterinary clinics and hospitals, genetics companies, animal feed companies, Extension, food companies, farms, animal pharmaceutical companies, animal councils, and more.

Opportunities at Bucky's Varsity Meats, an on-campus meat-processing facility, and the Livestock Laboratory give students hands-on experience with all aspects of meat production.

## Research experience

There are numerous opportunities to conduct research with faculty and staff in the department. Around 75 percent of animal sciences majors have completed independent study projects, and research stipends are available. Some students also take part in research as part of an honors thesis.

## Student organizations

By joining a student organization, animal sciences majors connect with other students and build relationships with faculty and staff. Organizations available to animal sciences students include Pre Vet Club (https:// prevetassociation.weebly.com/), Badger Meat Science Club (https:// win.wisc.edu/organization/badgermeatscienceclub/), Saddle and Sirloin Club (https://win.wisc.edu/organization/saddleandsirloin/), and Poultry Club (https://www.facebook.com/PoultryClubUWMadison/).

There are additional opportunities for students to get involved in animal-related organizations on campus such as Hoofer Riding Club (https://www.hooferriding.org/), Badger Dairy Club (https:// win.wisc.edu/organization/badgerdairyclub/), Collegiate FFA (http:// collegiateffamadison.weebly.com/), and Association of Women in Agriculture (http://awamadison.org/).

## Competitive teams

Students can join teams and compete against other universities for events such as the Animal Welfare Assessment and the Animal Science Academic Quadrathalon competition.

## Global engagement

The department encourages students to study abroad and offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development. Students can find more information on the International Academic Programs website (https:// www.studyabroad.wisc.edu/) and the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/).

## Community engagement and volunteering

Animal sciences students engage in a number of volunteer opportunities including working at the Livestock Lab, the Poultry Research Lab, the Dairy Cattle Center, Bucky's Varsity Meats, and Animal Farm Units. Students also participate in Extension, 4-H and undergraduate student recruitment events.

On campus, the Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

The animal sciences program awards $\$ 25,000-35,000$ in annual scholarships. Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships here. (https://cals.wisc.edu/academics/ undergraduate-students/financing-your-education/cals-scholarships/)

The new, state-of-the-art Meat Science \& Animal Biologics Discovery Building houses a fully functional meat processing facility, a retail shop called Bucky's Varsity Meats, and an advanced laboratory that offer students highly valued hands-on opportunities.

Other specialized facilities offering students hands-on experiences include:

- The Livestock Laboratory accommodates research on multiple species and includes a surgery room.
- The Poultry Research Laboratory houses chickens and other birds.
- The Dairy Cattle Center houses more than 80 dairy cows on campus in a tie-stall barn.
- A network of off-campus Agricultural Research Stations (https:// ars.wisc.edu/) serve as living laboratories for agricultural animal research.

## DAIRY SCIENCE, B.S.

## OVERVIEW

Studying the biology and management of dairy cows can lead to improvements in dairy production, animal welfare, human nutrition, and environmental protections. Students in the dairy science major learn all of these principles while embracing innovation and technology to meet needs in the dairy industry. The Department of Animal and Dairy Sciences, home of the undergraduate program in dairy science, produces skilled leaders who address the challenges of animal health and welfare, land and water stewardship, precision livestock farming, food safety, and biomedical advancements.

A 10:1 student-faculty ratio and small classes allow for meaningful connections. Out-of-classroom learning opportunities, such as internships on farms or with agribusiness, give students the training they need for successful 21st-century careers. Students can also gain valuable experience in research labs or in the student-operated Dairy Cattle Center.

Students majoring in dairy science are working toward a variety of careers that require a strong background in animal biology including agribusiness, dairy farm management, technical services and consulting, research, and teaching. Students also prepare for veterinary medicine or graduate school.

## Learn through hands-on, real-world experiences

UW-Madison has cows on campus. The Dairy Cattle Center is located near classrooms giving students access to cows during lab sessions. But dairy science isn't just about milking cows-it includes genetics, nutrition, lactation, and biological and digital technologies that are relevant to the dairy industry and beyond. Out-of-the-classroom experiences are the norm for dairy science students, with 100 percent of students completing an internship or field experience.

Field courses include dairy nutrition and dairy cattle judging. Lab courses cover dairy herd management, lactation, reproduction, and dairy cattle improvement. Students solve problems through field trips to working commercial dairy operations.

## Build community and networks

Madison is an ideal location for the study of dairy science. It is a vibrant city-home to many large agribusinesses-that's also located close to dairy farms. Students volunteer in a variety of activities directed by the Badger Dairy Club (https://win.wisc.edu/organization/badgerdairyclub/). The largest effort is their work at the World Dairy Expo, an international dairy event held in Madison.

## Customize a path of study

Dairy science students can customize their coursework to fit their career goals with a large variety of classes in the department. The major can be combined with other majors such as agricultural business management, genetics and genomics, life science communications, or agronomy. Students can also pursue Honors in Dairy Science.

## Make a strong start

Students can take an introductory seminar course that helps them develop an individualized four-year course plan, learn about internships and job opportunities, and discuss leadership development opportunities.

## Gain global perspective

Dairy science majors are encouraged to go on study abroad programs, where they can immerse themselves in research or field experiences. In recent years, a program to central Mexico has focused on global agricultural, rural development, and the relationship between the U.S. and Mexican dairy industries, and many students have completed a semester abroad in The Netherlands. Students can explore studying abroad as a Dairy Science major by utilizing the Dairy Science Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

## Code

Title
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46) 1
International Studies (p. 47) 3

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## EARNING OUTCOMES

1. Gain knowledge of current and emerging research based information in animal biology and management sciences to support dairy production.
2. Gain intellectual, practical and attitudinal skills needed to identify and solve problems and challenges facing dairy producers and allied industries.
3. Gain in life-long learning skills to enable graduates to adapt to changing technological, economic and social circumstances throughout their professional career.

1
Students are encouraged to apply for DY SCI/AN SCI/FOOD SCI/ SOIL SCI 473, a summer study abroad experience associated with this course.

## ADVISING AND CAREERS

## Advising

Each dairy science student receives one-on-one guidance from their academic advisor. Academic advisors will help students build an individualized, four-year plan. Students are encouraged to take part in research experiences and internships.

## Career Opportunities

As students find their career interests, faculty working in those fields serve as career advisors to help students make progress toward their goals.

Undergraduates in dairy science prepare for a variety of career opportunities. Science-related career opportunities include research, quality control, communications, patent law, pharmaceuticals, food testing, and human nutrition. Animal agriculture career opportunities include veterinary medicine, animal nutrition and consulting, dairy genetics, herd management, information technology, and business.

Dairy science graduates are in high demand by employers and receive job offers with competitive salaries.

## WISCONSIN EXPERIENCE

## Internships

In the dairy science program, 100 percent of students complete an internship or field experience. The department offers an internship course under the guidance of a faculty or staff member.

UW-Madison's proximity to farms, agribusinesses, and events-such as World Dairy Expo-provide undergraduates with unique networking experiences and valuable hands-on learning.

## Research experience

More than half of the students complete a research project under mentorship from a faculty member. Dairy science researchers are internationally recognized specialists in nutrition, genetics, lactation, reproduction, animal welfare, herd management, and more. Students can take on research projects with faculty members for either course credit or pay, depending on the opportunity.

## Student organizations

The Badger Dairy Club (https://win.wisc.edu/organization/ badgerdairyclub/) is a large, motivated student organization on campus with more than 75 members of various majors who share a passion for the dairy industry. Students are involved in dairy industry events that provide leadership and networking opportunities. Highlights of the club's activities include work at the World Dairy Expo, hosting the Badger Invitational Sale, volunteering at the Wisconsin 4-H Dairy Bowl and FFA Dairy Judging Contests, and club trips.

There are other opportunities for students to get involved in agriculturerelated organizations on campus such as Collegiate FFA (http:// collegiateffamadison.weebly.com/), Association of Women in Agriculture (http://awamadison.org/), Babcock House (https://win.wisc.edu/ organization/babcockhouse/), and Alpha Gamma Rho (https:// win.wisc.edu/organization/agr/).

## Competitive teams

Students can join competitive teams that take part in Intercollegiate Dairy Judging (https://andysci.wisc.edu/uw-madison-dairy-judging/), the North American Intercollegiate Dairy Challenge (https://andysci.wisc.edu/ national-north-american-intercollegiate-dairy-challenge/), and the Animal Welfare Assessment Contest (https://www.awjac.org/ \#YPcEjUxOnct).

## Global engagement

Dairy science students are encouraged to study abroad; the department offers globally focused courses that look at livestock production, health, animal agriculture, and sustainable development, including a summer field study program focused on animal agriculture. Students can find more information on the International Academic Programs website (https:// www.studyabroad.wisc.edu/) and the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/).

In addition to study abroad programs, the dairy science major offers several courses that cover animal systems and their improvement in developing countries, the world role of U.S. animal agriculture, and food production related to human and environmental health, land use, and social justice.

## Community engagement and volunteering

Students volunteer at a number of activities directed by the Badger Dairy Club. The largest effort is their work at the World Dairy Expo, an international dairy event held in Madison. There students have the unique opportunity to be directly involved in the event working behind the scenes before, during, and after the show.

On campus, the Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

## RESOURCES AND SCHOLARSHIPS

The department offers more than 30 scholarships and awards more than \$170,000 annually.

Students across the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships here (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

UW-Madison has specialized facilities offering students hands-on dairy science experiences, including:

- The Dairy Cattle Center is home to more than 80 dairy cows on campus in a tie-stall barn.
- A network of off-campus Agricultural Research Stations (https:// ars.wisc.edu/) serve as living laboratories for dairy research to enhance research taking place on campus.
- The Babcock Dairy Plant is a fully operational dairy plant with a retail store selling dairy products. Students can find part-time work and experience in a wide range of dairy processing jobs.

## BACTERIOLOGY

See Microbiology Major in Guide for information on exploring, declaring, advising, and careers within microbiology.

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn
more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development and other issues of national concern.

The microbiology major, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques-gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical and biotechnology firms, and in university and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process, as well as training in microbiology, allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

The department also serves as the administrative home for the biology major in the College of Agricultural and Life Sciences.

For more information, see the Department of Bacteriology directory (https://bact.wisc.edu/people.php).

## BIOLOGY, B.S. (CALS)

The biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:

1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain pre-professional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists, and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Agricultural and Life Sciences and the College of Letters \& Science.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

Students who intend to major in Biology in either the College of Letters and Science (L\&S) or the College of Agricultural and Life Sciences (CALS) may not combine this major ("double major") with the Molecular and Cell Biology Major or the Neurobiology Major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code Title $\quad$ Credits |  |
| :--- | ---: |
| Quality of Work: Students must maintain a minimum |  |
| cumulative grade point average of 2.000 to remain in good <br> standing and be eligible for graduation. |  |
| Residency: Students must complete 30 degree credits in |  |
| residence at UW-Madison after earning 86 credits toward |  |
| their undergraduate degree. | 1 |
| First Year Seminar (p. 46) | 3 |
| International Studies (p. 47) | $4-5$ |

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.

| Requirements") (p. 48) |  |5

Additional Science (Biological, Physical, or Natural) ..... 3CALS Capstone Learning Experience: included inthe requirements for each CALS major (see "MajorRequirements") (p. 48)

## REQUIREMENTS FOR THE MAJOR

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, and Capstone requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

In addition to the standard Biology major, there are two Named Options: Biology with a Named Option in Evolutionary Biology and Biology with a Named Option in Plant Biology. Admissions to the Named Option in Plant Biology is suspended as of Fall 2021.

Students may complete only one Biology major/named option and must declare the option they are pursuing.

## CORE REQUIREMENTS

Mathematics and Statistics

| Code | Title | Credits |
| :---: | :---: | :---: |
| Complete one of the following: |  | 5-10 |
| MATH 221 | Calculus and Analytic Geometry 1 |  |

## CAPSTONE REQUIREMENT

Code Title Credits

Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.

| ANAT\&PHY 435 | Fundamentals of Human Physiology | 5 |
| :--- | :--- | :--- |
| BIOCORE 486 | Principles of Physiology Laboratory | 2 |
| BOTANY/ | The Vegetation of Wisconsin | 4 |
| F\&W ECOL 455 | General Ecology | 4 |

| :--- | :--- | :--- |

| PL PATH 315 | Plant Microbiomes | 4 |
| :--- | :--- | ---: |
| ZOOLOGY 316 | Laboratory for Limnology- | $2-3$ |

Conservation of Aquatic Resources 2-3

## BIOLOGY NAMED OPTIONS

Instead of completing the requirements above, students may choose to select one of the options below.

View as listView as grid

\author{

- BIOLOGY: EVOLUTIONARY BIOLOGY (P. 93) <br> - BIOLOGY: PLANT BIOLOGY (P. 98)
}

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

## HONORS IN THE MAJOR IN BIOLOGY: REQUIREMENTS

To earn Honors in the Major in Biology, students must satisfy the requirements for the major (above) as well as the following requirements:

- Earn a 3.300 overall university GPA
- Complete a two-semester Senior Honors Thesis for 6 credits total and present research in a public forum
- Complete at least 20 credits of Honors coursework from the following sections of the Biology curriculum:
- Introductory Biology
- Foundation Courses
- Upper-Level Breadth in the Major
- At least 6 of the 20 credits of Honors coursework must be from the Upper-Level Breadth in the Major requirement

## FOOTNOTES

1
Course also approved for lab credit
2
To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratory and BIOCORE 384 Cellular Biology Laboratory.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## EARNING OUTCOMES

1. Know and understand core concepts that unify the breadth of biological sciences including: evolution; structure and function; information flow, exchange, and storage; pathways for transformations of energy and matter; and systems.
2. Demonstrate practical skills of a professional biologist including: problem\#solving by engaging the process of science; written and verbal proficiency; laboratory skills; quantitative analysis skills; and teamwork skills.
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

## FOUR-YEAR PLAN

Four-year plans for the biology major are designed to support biological science major exploration. The four-year plan is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search \& Enroll. Your specific program of study could, and probably will, look different. You should customize your own four-year plan to fit your unique path at UW-Madison. Consult with your advisor about the best path for you.

## FOUR-YEAR PLAN <br> SAMPLE BIOLOGY MAJOR-NO OPTION FOUR-YEAR PLAN

3
Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/ BOTANY/ZOOLOGY 152 \& a foundational course or (recommended) BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/ BOTANY 130 \& a foundational course or BIOCORE (three lectures and two labs required).

## 4

See Requirements tab for Upper-Level Breadth in the Major course lists.

## ADVISING AND CAREERS

## ADVISING

Your advisor is here to guide you through the biology major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising appointment, visit UW Undergraduate Advising (https://advising.wisc.edu/soar/ advising-101/).

In the biology major, students are assigned to an advisor according to last name. Please schedule an advising appointment here (http:// biologymajor.wisc.edu/advising/).

## CAREERS

The biology major encourages students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the CALS Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

College of Agricultural and Life Sciences graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Career Resources:

- Schedule a Career Advising appointment (https://cals.wisc.edu/ academics/undergraduate-students/career-services/students/)
- Explore CALS Career Services for Students (https://cals.wisc.edu/ academics/undergraduate-students/career-services/resources/)

## WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biology, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Many study abroad programs offer a plethora of excellent upperlevel biological science courses. Students often complete courses abroad that meet major requirements while others use this opportunity to focus on non-science coursework and explore other topics that interest them. Students can explore studying abroad as a Biology major utilizing the Biology Major Advising Page (https:// studyabroad.wisc.edu/academics/major-advising-pages-maps/ biology/). Students work with their advisor and the CALS study abroad office (https://cals.wisc.edu/academics/undergraduate-students/ studyabroad/) to identify appropriate programs.
- Students are encouraged to get involved in research in any life science department. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities can be identified by inquiring directly (https://biology.wisc.edu/findingmentor/) with faculty members, reading the Biology Major Newsletter (https://biologymajor.wisc.edu/newsletters/), or announcement on the Student Job Center (https://jobcenter.wisc.edu/).

## BIOLOGY:EVOLUTIONARY BIOLOGY

The Evolutionary Biology Named Option allows biology majors to concentrate their studies in evolution and to have this reflected on their transcript. Since there is no evolutionary biology major available at UWMadison, this is the only mechanism to indicate specialization in this rapidly growing and popular field. In taking this named option, students will be able to fulfill their intermediate/advanced biology requirement with courses that emphasize evolutionary biology, ranging from required courses in fundamental evolutionary biology to more advanced optional courses that cover a wide range of evolutionary biology topics. They will also take a seminar course in evolutionary biology.

Who should enroll in this option? Students with broad interest in the biological sciences who want to:

- Prepare for graduate study in evolutionary biology or related fields
- Prepare for professional studies (e.g. medical school, veterinary school, dentistry)
- Concentrate their biological studies in evolutionary biology

## REQUIREMENTS

## REQUIREMENTS FOR THE NAMED OPTION

A minimum of 15 credits must be completed in the major that are not used elsewhere. Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, Capstone, and Evolutionary Biology Seminar requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

## CORE REQUIREMENTS

Mathematics and Statistics

| Code | Title | Credits |
| :---: | :---: | :---: |
| Complete one of the following: |  | 5-10 |
| MATH 171 <br> \& MATH 217 | Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II |  |
| MATH 221 | Calculus and Analytic Geometry 1 |  |
| Complete one of the following: |  | 3-4 |
| STAT 240 | Data Science Modeling I |  |
| STAT 301 | Introduction to Statistical Methods |  |
| STAT 371 | Introductory Applied Statistics for the Life Sciences |  |

## Total Credits

## Chemistry

| Code | Title | Credits |
| :---: | :---: | :---: |
| General Chemistry (Complete one of the following): |  | 5-10 |
| CHEM 103 <br> \& CHEM 104 | General Chemistry I and General Chemistry II |  |

| GENETICS 468 | General Genetics 2 | 3 |

## UPPER-LEVEL BREADTH IN THE MAJOR

Minimum of 13 credits required as follows and must include one approved
lab course. (Approved lab courses are indicated by footnote.) A course taken to meet the Foundation requirement may not also count as UpperLevel Breadth in the Major.

- Complete the Evolutionary Biology course listed below.
- Complete at least two credits from either category A or B.
- Complete at least two credits from category C.
- Complete at least two credits from category D.
- Additional courses needed to reach 13 credits of Upper-Level Breadth in the Major may be taken from any category (A, B, C, D, E).

1
Math determined by placement scores. Students in the Evolutionary Biology Named Option must complete MATH 171/MATH 217 or MATH 221 plus STAT 301 or STAT 371

## 2

See CALS requirements (p. 45) for a list of approved CALS First-Year Seminar courses.
3
Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/ BOTANY/ZOOLOGY 152 \& a foundational course or BIOLOGY/ ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/BOTANY 130 \& a foundational course or BIOCORE (three lectures and two labs required).

4
See Requirements tab for Upper-Level Breadth in the Major course lists.

## BIOLOGY: PLANT BIOLOGY

Admissions to the Biology: Plant Biology, B.S. named option have been suspended as of fall 2021 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

The Plant Biology Named Option allows biology majors to focus their studies on plant science and to have this reflected on their transcript. There are a number of departments at UW-Madison who host plant science-based majors, including agronomy, botany, horticulture, plant pathology, and forest and wildlife ecology. While those specialized majors offer in-depth programs in their disciplines, the Plant Biology Named Option allows students to pursue a course of study within the biology major and explore plant biology at the same time. Students in this option can fulfill their requirements with courses that emphasize various aspects of plant science, including anatomy, physiology, genetics, crop production, disease resistance, and molecular techniques in plant improvement. Students also participate in a one-credit seminar focusing on plant biology.

Who should enroll in this option? Students with broad interest in biological sciences who also want to:

- Prepare for graduate work in a plant science field
- Prepare for advanced study or graduate work in a natural or environmental science field
- Concentrate their studies on the biology of plants

## REQUIREMENTS

## REQUIREMENTS FOR THE NAMED OPTION

A minimum of 15 credits must be completed in the major that are not used 5 elsewhere. Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, and Capstone requirements. Unless
specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

| CORE REQUIREMENTS |  |  |

Foundation Course (complete one of the following):
Students may use BIOCORE 381 and BIOCORE 383 toward both Introductory Biology and Foundation.
Code Title Credits

AGRONOMY/ Plant Breeding and Biotechnology 3
HORT 338
BIOCHEM 501 Introduction to Biochemistry 3
BIOCHEM 508 General Biochemistry II 3-4
BIOCORE 381 Evolution, Ecology, and Genetics 6
\& BIOCORE 383 and Cellular Biology
GENETICS 466 Principles of Genetics 3
GENETICS 468 General Genetics 2

## UPPER-LEVEL BREADTH IN THE MAJOR

Minimum of 13 credits required and must include one approved lab
course. Approved lab courses are indicated by footnote. A course taken to meet the Foundation requirement may not also count as an Upper-Level Breadth in the Major course.

- Complete at least two credits from either category A or B.
- Complete at least two credits from either category C or D.
- Complete at least two credits from category E.

## A. Cellular and Subcellular Biology

| BIOCHEM 375 | Special Topics (Biochemistry <br> and Molecular Biology of Plants <br> Seminar ) <br> PL PATH 375 | Special Topics (Frontiers in Plant <br> Biology) |

## CAPSTONE REQUIREMENT

## Code

## Title

Two credits minimum required. With advisor approval, directed study or research-based senior thesis in a biological science discipline can also count. The experience must be completed after the first year of an introductory biology sequence above. The capstone experience will normally be completed during the student's final two or three semesters. Also, a subset of laboratory courses has been approved for capstone. The following courses, along with 682s and 692s in biological science departments (taken senior year), can be accepted as fulfilling the capstone experience.

| ANAT\&PHY 435 | Fundamentals of Human Physiology | 5 |
| :--- | :--- | :---: |
| BIOCORE 486 | Principles of Physiology Laboratory <br> 2 | 2 |
| BOTANY/ The Vegetation of Wisconsin <br> F\&W ECOL 455  <br> BOTANY/ General Ecology | 4 |  |

F\&W ECOL/
ZOOLOGY 460

| BOTANY/ | Adaptive Restoration Lab | 2 |
| :--- | :--- | :--- |
| LAND ARC 670 |  | 2 |
| ENVIR ST/ | Ecology of Fishes Lab | 2 |

ZOOLOGY 511
F\&W ECOL $599 \quad$ Wildlife Research Capstone (limited access)

| GENETICS 527 | Developmental Genetics for <br> Conservation and Regeneration | 3 |
| :--- | :--- | ---: |
| PL PATH 315 | Plant Microbiomes | 4 |
| ZOOLOGY 316 | Laboratory for Limnology- <br> Conservation of Aquatic Resources | $2-3$ |
| ZOOLOGY 555 | Laboratory in Developmental <br>  <br> ZOOLOGY | 3 |
|  | Comparative Physiology Laboratory | 2 |

## FOOTNOTES

1
Course also approved for lab credit

To count BIOCORE 486 Principles of Physiology Laboratory for capstone, students must also complete BIOCORE 382 Evolution, Ecology, and Genetics Laboratoryy and BIOCORE 384 Cellular Biology Laboratory.

## Total Credits 26-34

1
Math determined by placement scores. Biology majors must complete MATH 171/MATH 217 or MATH 221 plus one additional math/stats course.
Stats recommended.

2
See CALS requirements (p. 45) for a list of approved First-Year Seminar courses.

3
Students may complete BIOLOGY/BOTANY/ZOOLOGY 151-BIOLOGY/ BOTANY/ZOOLOGY 152 \& a foundational course or (recommended) BIOLOGY/ZOOLOGY 101-BIOLOGY/ZOOLOGY 102, BIOLOGY/ BOTANY 130 \& a foundational course or BIOCORE (three lectures and two labs required).

## 4

See Requirements tab for Upper-Level Breadth in the Major course lists.

## MICROBIOLOGY, B.S. (CALS)

The smallest living things - including bacteria, viruses, and yeast-may not be visible to the human eye, but they have big effects on health, food, medicine, energy, and the environment. These tiny organisms, called microbes, were the first life forms on Earth and continue to influence the planet in significant ways. Microbiomes-communities of microbesare increasingly studied by researchers focusing on human health, global warming, infectious disease, environmental remediation, bioenergy, and much more.

The microbiology major prepares students for modern research in microbiology, with a heavy emphasis on practical laboratory experiences. Students learn the cellular biology, genetics, ecology, evolution, and physiology of microbes. Through courses, students learn laboratory techniques-gaining the type of hands-on experiences with modern equipment that employers and graduate and professional schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories where they will learn to critically evaluate scientific data, carry out laboratory experiments, and communicate scientific information.

Microbiology majors graduate prepared for careers in biotechnology, education, healthcare, information technology, and food safety. Many students pursue graduate and professional studies, including medical school, dental school and biological sciences PhD programs.

## Learn through hands-on, real world experiences

With so many microbiologists on the faculty, students have numerous opportunities to conduct research in faculty labs. As one of the largest research buildings on campus, students have access to state-of-theart facilities and are able to conduct cutting edge experiments using novel techniques that few other undergraduate programs allow. Through a senior-year capstone course, students conduct research under the direction of a professor or as part of class projects that have included culturing microbes from the gut of hibernating ground squirrels, comparing bacteria from the mouths of athletes and non-athletes, and culturing microbes found in deep sea vents. This kind of hands-on experience distinguishes microbiology majors from other graduates and enhances the real-world skills that are valued by post-secondary schools and employers.

## Build community and networks

Through the Microbiology Club, students establish study groups, explore careers, and teach others on campus and in the community about microbiology. Through events like cheese, yogurt, and kombucha making, the club offers opportunities for community-building both within the program and with the broader university community. This
student organization is the official American Society of Microbiology undergraduate chapter for the UW-Madison and provides annual travel and research awards to outstanding students.

## Customize a path of study

Core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes, microbial biotechnology, and public health, as well as advanced topics in microbial genetics and physiology. Students may also pursue Honors in Microbiology.

## Make a strong start

All courses in the program, including entry level courses, are taught by faculty who specialize in teaching microbiology.

## Gain global perspective

Majors can also choose from a variety of study abroad programs including short-term field experiences, summer research opportunities and semester-long exchange programs at top universities around the world. A study abroad program in Thailand specifically tailored for microbiology majors is frequently offered and led by microbiology faculty from UWMadison. Students can explore studying abroad as a Microbiology major by utilizing the Microbiology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

Incoming or current students in good academic standing may declare the microbiology major at any time.

Schedule an appointment with a microbiology major advisor to discuss how to declare the major, appropriate coursework to take, and much more. Please see the Advising and Careers tab for information on how to schedule an appointment with a microbiology major advisor.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code Title | Credits |
| :---: | :---: |
| Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation. |  |
| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |
| First Year Seminar (p.46) | 1 |
| International Studies (p. 47) | 3 |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science | 5 |
| Additional Science (Biological, Physical, or Natural) | 3 |
| Science Breadth (Biological, Physical, Natural, or Social) | 3 |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

REQUIREMENTS FOR THE MAJOR

| Code Title | Credits |  |
| :--- | :--- | ---: |
| Mathematics |  |  |
| Complete one of the following: | $5-10$ |  |

$\left.\begin{array}{lll}\text { MATH 171 } & \begin{array}{l}\text { Calculus with Algebra and }\end{array} & \\ \text { \& MATH 217 } & \begin{array}{l}\text { Trigonometry I } \\ \text { and Calculus with Algebra and }\end{array} & \\ & \begin{array}{ll}\text { Trigonometry II }\end{array} \\ \text { MATH 221 } & \text { Calculus and Analytic Geometry 1 }\end{array}\right]$

| Microbiology Courses |  |  |

Total Credits
1
( BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ ZOOLOGY 152) or (BIOCORE 381 / BIOCORE 382 / BIOCORE 383 / BIOCORE 384 / BIOCORE 485) are recommended.
2
(PHYSICS 103 / PHYSICS 104) or (PHYSICS 207 / PHYSICS 208) are recommended.

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## HONORS IN THE MAJOR IN MICROBIOLOGY: REQUIREMENTS

To earn Honors in the Major in Microbiology, students must satisfy the Requirements for the Major (above) as well as the following requirements. All courses used for Honors in the Major requirements must receive "B" or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA.
- Earn a 3.300 GPA for all MICROBIO courses, and all courses accepted in the major.
- Complete a two-semester Senior Honors Thesis (MICROBIO 681 and MICROBIO 682) for 6 credits total and present research in a public forum. Students completing their senior honors theses in laboratories or departments outside of Microbiology may be able to count that thesis toward Honors in the Major.
- Complete at least 20 credits of any combination of the following coursework:
- Honors courses that fulfill Requirements for the Major (see above); independent study and thesis credits do not count here.
- Non-honors coursework credits from this list: CHEM 115, CHEM 311, CHEM 327, GENETICS 466, MATH 222, MATH 234.
These courses do not need to be taken for honors to count.
- At least 10 of the 20 credits of coursework above must come from courses taken for honors from this Microbiology course list: MICROBIO 303, MICROBIO 304, MICROBIO/FOOD SCI 325, MICROBIO 330, MICROBIO/AN SCI/BOTANY 335, MICROBIO 345, MICROBIO/SOIL SCI 425, MICROBIO 450, MICROBIO 470, MICROBIO 526, MICROBIO 607, MICROBIO/BIOCHEM/ GENETICS 612, MICROBIO 657, MICROBIO/BMOLCHEM 668.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes <br> UW-Madison courses offered in distance or online formats |
| :--- | :--- |
|  | and credits earned in UW-Madison Study Abroad/Study |
| Away programs. |  |

## LEARNING OUTCOMES

1. Develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology
2. Apply the scientific method to questions. Formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving
4. Access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Learn about and demonstrate personal and professional ethics.

| 15-16 |  | 15-16 |

## Total Credits 98-100

Students must earn $\mathbf{1 2 0}$ total credits to graduate, including accepted advanced standing or transfer credits. The above charts reflect 100-102 total credits from six fall/spring semesters and two summer terms, including courses taken in the summer before the first year.

1
The Microbiology major recommends QuickStart (INTER-AG 140 and INTER-AG 141) for the First-Year Seminar requirement. However, this requirement can be fulfilled through courses offered in Fall and Spring semester of the first year.

## 2

The Microbiology major encourages students with an interest in research to work with faculty through Independent Research courses as electives.

## ADVISING AND CAREERS

## Advising

Each student is assigned a professional academic advisor who works to understand student goals and helps to craft a path that best suits their needs. Additionally, faculty provide students with ongoing professional and scientific mentorship. More than 60\% of students in the major conduct faculty-directed research. With low ratios of students to faculty, students also receive additional faculty mentoring in the classroom.

Current UW-Madison students should use Starfish to schedule an appointment with an advisor in the Biochemistry \& Microbiology Undergraduate Advising Hub (https://biochemmicrobio.wisc.edu/).

## Career opportunities

Alumni hold professional positions as physicians, research scientists, public health officials, dentists, optometrists, physician assistants, physical therapists, master brewers, quality control officers, health inspectors, professors, and more.

Graduates are recognized for their skills in laboratory research and scientific communication - skills that are valued by potential employers and professional schools.

## WISCONSIN EXPERIENCE

## A rich history of microbiology

The UW-Madison is recognized as one of the birthplaces of Microbiology, as recognized by the American Society for Microbiology's Milestones in Microbiology. The UW-Madison is the first school to teach microbiology in the US and it is consistently ranked as one of the top public schools in the field.

## Research experience

The majority of microbiology majors conduct research in a faculty-led research lab where they receive direct mentorship from professors, scientists, and graduate students. Because the UW-Madison has the highest concentration of microbiologists on any U.S. campus, students have many research options.

## Student organization

The Microbiology Club is the undergraduate-led student chapter of the American Society of Microbiology. Follow them on Twitter at @MadisonMicrobio (https://twitter.com/madisonmicrobio/).

## Global engagement

Microbiology majors can participate in several international academic experiences including short-term field experiences, summer research opportunities, and semester-long exchange programs at top universities around the world. The UW Microbiology and Public Health in Northern Thailand program occurs during the summer.

## Community engagement and volunteering

Our students engage in numerous volunteer activities spearheaded by the Microbiology Club. This involves explaining microbiology and its impact during public educational events at UW-Madison. Many students also volunteer at local public schools to teach microbiology to elementaryaged students.

## RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships at https://cals.wisc.edu/academics/undergraduate-students/ financing-your-education/cals-scholarships/

The Department of Bacteriology offers several scholarships to students in the Microbiology major. Awards are given annually and fund undergraduate research, provide travel stipends to microbiology students attending professional scientific conferences, or recognize outstanding graduating seniors. Learn more: https://bs.microbiology.wisc.edu/awards-andscholarships/

## BIOCHEMISTRY

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal or population level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

## BIOCHEMISTRY, B.S. (CALS)

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and
interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal, or population-level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

## HOW TO GET IN

Students may declare the major via an appointment with the undergraduate advisor at any time.

The Biochemistry major is offered through either CALS or the College of Letters \& Science (L\&S). Students interested in the differences or transferring between CALS and L\&S should meet with the advisor to discuss this in more detail.

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences (CALS) have the option to declare biochemistry at SOAR. Students may otherwise declare after they have begun their undergraduate studies.

Students who intend to major in Biochemistry may not combine this major ("double major") with the Molecular and Cell Biology major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code

Title

Credits

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46) 1
International Studies (p. 47) 3
Physical Science Fundamentals 4-5

| CHEM 103 | General Chemistry I |
| :---: | :--- |
| or CHEM 108 | Chemistry in Our World |
| or CHEM 109 | Advanced General Chemistry |

Biological Science

Additional Science (Biological, Physical, or Natural) 3
Science Breadth (Biological, Physical, Natural, or Social) 3
CALS Capstone Learning Experience: included in
the requirements for each CALS major (see "Major
Requirements") (p. 48)
REQUIREMENTS FOR THE MAJOR
MATHEMATICS

## CHEMISTRY

General Chemistry

| Code | Title | Credits |
| :--- | :--- | ---: |
| Complete one of the following options: |  |  |
| CHEM 103 | General Chemistry I | 9 |
| \& CHEM 104 | and General Chemistry II | 5 |
| CHEM 109 15 | Advanced General Chemistry | 10 |
| CHEM 115 | Chemical Principles I <br> \& CHEM 116 | and Chemical Principles II (satisfies <br> both general and analytical <br> chemistry requirements) |

## Organic Chemistry

| Code | Title | Credits |
| :--- | :--- | ---: |
| Complete ALL of the following courses: |  |  |
| CHEM 343 | Organic Chemistry I | 3 |
| CHEM 345 | Organic Chemistry II | 3 |
| CHEM 344 | Introductory Organic Chemistry | 2 |
|  | Laboratory |  |

## Analytical Chemistry

| Code | Title | Credits |
| :--- | :--- | ---: |
| Complete one of the following options: |  |  |
| CHEM 327 | Fundamentals of Analytical Science | 4 |
| CHEM 329 | Fundamentals of Analytical Science | 4 |
| CHEM 115 | Chemical Principles I <br> \& CHEM 116 | and Chemical Principles II (satisfies <br> both general and analytical <br> chemistry requirements) |

## Physical Chemistry

## Code <br> Title

Complete 4 credits of physical chemistry. Select one of the following options:
CHEM 565
Biophysical Chemistry
(recommended)

CHEM 561
\& CHEM 563
BIOLOGY
Students must complete either Option A (introductory + upper-level biology), or Option B (Biocore), for 16 total credits of biological science coursework.

## Option A (Introductory + Upper-Level Biology) Option A Introductory Biology Title <br> Credits

## Code

Complete one of the following introductory biology
options:
BIOLOGY/BOTANY/ Introductory Biology
ZOOLOGY 151 and Introductory Biology
\& BIOLOGY/ (recommended)
BOTANY/
ZOOLOGY 152
BIOLOGY/
Animal Biology
10
ZOOLOGY 101 and Animal Biology Laboratory
\& BIOLOGY/
ZOOLOGY 102
\& BOTANY/
BIOLOGY 130

## AND Option A Upper-Level Biology

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits-more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the course list below. To see courses offered in specific upcoming semesters, please see the Biochemistry website (https:// biochem.wisc.edu/undergraduate_program/advanced-biology-courses-undergraduate-program/).

Important: A course may not double count in both the "Upper-Level Biology" and the "Biochemistry" requirements for the major. Biochemistry courses on this list can count only for "Upper-Level Biology" if they are above-and-beyond what is needed to fulfill the "Biochemistry" portion of the major. For example, if students have taken BIOCHEM 501 , they will need one advanced biochemistry elective to fulfill the Biochemistry requirement, and then any additional biochemistry courses taken can count for Upper-Level Biology.

## Option B (Biocore) <br> Option B (Biocore)

Biocore is an honors-level, integrated sequence of lecture and lab courses that covers introductory and intermediate biology topics. Students must apply and be accepted to the program to take BIOCORE classes.

| Code | Title | Credits |
| :--- | :--- | ---: |
| Complete these lecture courses: |  |  |
| BIOCORE 381 | Evolution, Ecology, and Genetics | 3 |
| BIOCORE 383 | Cellular Biology | 3 |
| BIOCORE 485 | Principles of Physiology | 3 |
| BIOCORE 587 | Biological Interactions | 3 |
| Complete two of these lab classes: | 4 |  |
| BIOCORE 382 | Evolution, Ecology, and Genetics |  |
| BIOCORE 384 | Cellular Biology Laboratory |  |
| BIOCORE 486 | Principles of Physiology Laboratory |  |

Total Credits
PHYSICS (CALCULUS-BASED)
Physics Requirements

## Code Title

Complete one of the following options: ${ }^{1}$
PHYSICS 207 General Physics
\& PHYSICS 208 and General Physics
(recommended)
PHYSICS 201
General Physics
10
\& PHYSICS 202
and General Physics

## 1

Students should consult with their advisor if they have credit for PHYSICS 103 and PHYSICS 104 to discuss options.

## BIOCHEMISTRY

One set of introductory coursework and the capstone course are required, for a total of three BIOCHEM courses.

## Introductory Courses <br> Code Title

## Complete one of the following options:

| BIOCHEM 507 | General Biochemistry I <br> \& BIOCHEM 508 <br> and General Biochemistry II <br> (recommended) |
| :--- | :--- |

OR
BIOCHEM 501
Introduction to Biochemistry
Credits6

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may
apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## HONORS IN THE MAJOR IN BIOCHEMISTRY: REQUIREMENTS

To earn Honors in the Major in Biochemistry, students must satisfy the requirements for the major (above) as well as the following requirements. All courses used for Honors in the Major requirements must receive " B " or better grades to fulfill requirements.

- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all BIOCHEM courses, and all courses accepted in the major
- Complete BIOCHEM 507 and BIOCHEM 508 for Honors
- Complete a two-semester Senior Honors Thesis for 6 credits total, present research in a public forum and submit documentation to CALS Academic Affairs.
- Complete at least 14 credits of any combination of the following coursework:
- Honors courses that would fulfill the biological science requirement in the major (see above)
- Statistics coursework (does not need to be taken for Honors): STAT 301, STAT 371, or STAT/B M I 541
- Biochemistry elective coursework beyond the major requirements (does not need to be taken for Honors): NUTR SCI/
BIOCHEM 510, BIOCHEM 550, BIOCHEM 570, M M \& I/ BIOCHEM 575, BIOCHEM 601, MATH/B M I/BIOCHEM/ BMOLCHEM 609, MICROBIO/BIOCHEM/GENETICS 612, MD GENET/BIOCHEM/GENETICS 620, BOTANY/ BIOCHEM 621, BIOCHEM 625, BIOCHEM/PHMCOL-M/ ZOOLOGY 630, BIOCHEM/NUTR SCI 645
- Honors coursework in MATH, CHEM, or PHYSICS from the list below:

| Math |  |  |
| :--- | :--- | ---: |
| Code | Title | Credits |
| MATH 275 | Topics in Calculus I | 5 |
| MATH 276 | Topics in Calculus II | 5 |
| MATH 341 | Linear Algebra | 3 |
| MATH 375 | Topics in Multi-Variable Calculus and | 5 |
|  | Linear Algebra |  |
| MATH 376 | Topics in Multi-Variable Calculus and | 5 |
|  | Differential Equations |  |
| MATH 521 | Analysis I | 3 |
| MATH 522 | Analysis II | 3 |
| MATH 541 | Modern Algebra | 3 |
| MATH 542 | Modern Algebra | 3 |

| Chemistry |  |  |
| :--- | :--- | ---: |
| Code |  |  |
| CHEM 109 | Title | Credits |
| CHEM 115 | Advanced General Chemistry | 5 |
| CHEM 116 | Chemical Principles I | 5 |
| CHEM 343 | Chemical Principles II | 5 |
| CHEM 345 | Organic Chemistry I | 3 |
| CHEM 344 | Inganic Chemistry II | 3 |
|  | Laboractory Organic Chemistry | 2 |
| CHEM 329 | Fundamentals of Analytical Science | 4 |
| CHEM 547 | Advanced Organic Chemistry | 3 |
| CHEM 561 | Physical Chemistry | 3 |
| CHEM 565 | Biophysical Chemistry | 4 |
| CHEM 563 | Physical Chemistry Laboratory I | 1 |
| CHEM 562 | Physical Chemistry | 3 |
| CHEM 564 | Physical Chemistry Laboratory II | 1 |
| Physics |  |  |
| Code | Title | Credits |
| PHYSICS 201 | General Physics | 5 |
| PHYSICS 202 | General Physics | 5 |
| PHYSICS 207 | General Physics | 5 |
| PHYSICS 208 | General Physics | 5 |
| PHYSICS 241 | Introduction to Modern Physics | 3 |
| PHYSICS 247 | A Modern Introduction to Physics | 5 |
| PHYSICS 248 | A Modern Introduction to Physics | 5 |
| PHYSICS 249 | A Modern Introduction to Physics | 4 |

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. |
| :--- | :--- |
|  | The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
| Away programs. |  |

## LEARNING OUTCOMES

1. Identify the fundamental biochemical principles that underlie all biological processes.
2. Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
3. Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
4. Demonstrate professional and ethical responsibility in scientific research.
5. Design and conduct quantitative experiments and/or interpret data to address a scientific question.

## FOUR-YEAR PLAN

## FOUR-YEAR PLAN

SAMPLE BIOCHEMISTRY FOUR-YEAR PLAN
Freshman

| Fall | Credits Spring | Credits |
| :---: | :---: | :---: |
| CHEM 103 or 109 | 4-5 CHEM 104 (if needed) | 5 |
| MATH 221 | 5 MATH 222 | 4 |
| COMM A or Elective | 3 Humanities Course | 3 |
| INTER-AG 155 or BIOCHEM 100¹ | 1 Elective | 3 |
|  | 13-14 | 15 |

Total Credits 28-29
Sophomore

| Fall | CreditsSpring | Credits |
| :--- | :---: | ---: |

| Electives or Remaining <br> Requirements | 6-10 Electives or Remaining <br> Requirements | $6-10$ |
|  | $\mathbf{1 2 - 1 7}$ | $\mathbf{1 2 - 1 7}$ |

## Total Credits 24-34

## 1

First-year students interested in exploring the major can enroll in INTERAG 155 or BIOCHEM 100.

## 2

BIOCORE sequence requires four lecture courses plus two lab courses. Student may also take ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/BIOLOGY/BOTANY 152 plus 6 credits of upper-level Biology instead of BIOCORE.

Students must take either: (1) both BIOCHEM 507 and BIOCHEM 508 or (2) BIOCHEM 501 and one additional course in Biochemistry from the 500/600-level electives.

## 4

Senior Thesis, independent study or work experience in laboratory are recommended, but are not required. However, a Senior Honors Thesis is required to earn Honors in the Major.

## ADVISING AND CAREERS

## HOW TO SEEK ADVISING

- To schedule an appointment with the advisor, use Starfish (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/).
- Send an email with brief questions to biochemmicrobioadvisor@wisc.edu.
- Drop-in advising hours for quick (10-15 minute) questions, on a first-come, first-serve basis, are posted on the Biochemistry / Microbiology Undergraduate Advising Hub website (https:// biochemmicrobio.wisc.edu/) each semester.

## CAREER EXAMPLES

- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

## CALS CAREER RESOURCES

CALS Career Services provides expertise to support students and alumni of the college as they explore, experience and achieve their career
goals. In short, CALS Career Services helps students in the College of Agriculture and Life Sciences discover themselves, find opportunities, and develop the skills they need for success after graduation.

CALS Career Services can also assist students in career advising, résumé and cover letter writing, networking opportunities, and interview skills, as well as assisting undergraduates to begin their career exploration early in their undergraduate career.

Students should set up their profiles in Handshake (https:// wisc.joinhandshake.com/login/) to take care of everything they need to explore career events, manage their campus interviews, and apply to jobs and internships from 200,000+ employers around the country.

- CALS Career Services (https://cals.wisc.edu/academics/ undergraduate-students/career-services/)
- Set up a career advising appointment (https://cals.wisc.edu/ academics/undergraduate-students/career-services/advising/)
- INTER-LS 210 (https://guide.wisc.edu/search/?P=INTER-LS \%20210) L\&S Career Development: Taking Initiative (1 credit, targeted to first- and second-year students)
- INTER-LS 215 (https://guide.wisc.edu/search/?P=INTER-LS \%20215) Communicating About Careers (3 credits, fulfills Com B General Education Requirement)
- Handshake (https://wisc.joinhandshake.com/login/)

Biochemistry \& Microbiology Undergraduate Advising Hub (https:// biochemmicrobio.wisc.edu/advising/)
For more information, see the Department of Bacteriology directory (https://bact.wisc.edu/people.php).

## WISCONSIN EXPERIENCE

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:
> - The American Society for Biochemistry and Molecular Biology (ASBMB) UW-Madison Student Chapter (https://win.wisc.edu/ organization/ASBMB/) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
> - Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biochemistry/) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
> - Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistryrelated departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (https://biochem.wisc.edu/undergraduate_program/research-opportunities-undergraduate-program/) and the advisors can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

## BIOLOGICAL SYSTEMS ENGINEERING

Biological systems engineering (BSE), an accredited engineering program in the College of Agricultural and Life Sciences, applies engineering principles to natural systems and machinery design that impact production of food, water, energy, and more. Uniquely positioned at the intersection of engineering and sustainability with multiple flexible study options to match a wide range of interests, students can follow defined tracks in natural resources and environmental engineering, food or bioprocess engineering, machinery systems engineering, or customize their classes using the general option.

Students benefit from a low student to faculty ratio and individualized advising that fosters teamwork. They have access to all resources for

UW-Madison students in the College of Engineering, plus those available to students in the College of Agricultural and Life Sciences. Admission is not competitive, meaning all students who meet the criteria are admitted. The program provides a broad education in physical sciences and engineering, but also teaching skills in fabrication, electronics, design, product development, and management.

The BSE program, like all undergraduate engineering programs on the UW-Madison campus, is accredited by ABET (http:// www.abet.org) (Accreditation Board for Engineering and Technology) and prepares students for licensure as a professional engineer. Students who graduate from the program are well prepared for research and engineering careers in industry or government, or to continue their studies in graduate school.

## LEARN THROUGH HANDS-ON, REAL WORLD EXPERIENCES

BSE offers hands-on courses and experiences. First-year and seniorlevel design courses challenge students to develop solutions, build and test prototypes, and analyze results. Students integrate practical work experience through co-operative education (co-op) programs where students earn full-time salaries while working for a firm or through forcredit internships (paid or unpaid).

## BUILD COMMUNITY AND NETWORKS

The program fosters community building through advising, coursework and outside activities. Students can join the UW-Madison student chapter of the professional American Society of Agricultural and Biological Engineers (ASABE) to meet professionals, tour companies, explore career paths, and participate in national design competitions. Additionally, the department hosts student events, such as our fall mixer or Thanksgiving meal, to allow students to get to know each other and the faculty.

## CUSTOMIZE A PATH OF STUDY

All majors take core engineering courses, then specialize in areas including machinery systems, natural resources and engineering, food engineering, or bioprocessing. Students can also develop their own customized focus areas. Many students also complete certificates in sustainability or renewable energy.

## MAKE A STRONG START

An introductory engineering design course allows students to make personal connections with peers and learn fabrication skills on various industry machines in the BSE shop. In all courses, instructors offer homework help sessions to support students and encourage the formation of study groups.

## GAIN GLOBAL PERSPECTIVE

Students can choose from study abroad options, including courses taught in English, offered through the College of Agricultural and Life Sciences, the College of Engineering, or campus wide opportunities. Recent students have traveled to China, France, Costa Rica, Africa, and more. Programs occur over full semesters or during summer and winter breaks. International internships, many with summer options, offer additional opportunities to gain global experience.

The program provides a broad education in physical sciences and engineering, but also teaching skills in fabrication, electronics, design, product development, and management.

The BSE program, like all undergraduate engineering programs on the UW-Madison campus, is accredited by ABET (the Accreditation Board for Engineering \& Technology) and prepares students for licensure as a professional engineer. Students who graduate from the program are well prepared for research and engineering careers in industry or government, or to continue their studies in graduate school.

## LEARN THROUGH HANDS-ON, REAL WORLD EXPERIENCES

BSE offers hands-on courses and experiences. First-year and seniorlevel design courses challenge students to develop solutions, build and test prototypes, and analyze results. Students integrate practical work experience through co-operative education (co-op) programs where students earn full-time salaries while working for a firm or through forcredit internships (paid or unpaid).

## BUILD COMMUNITY AND NETWORKS

The program fosters community building through advising, coursework and outside activities. Students can join the UW-Madison student chapter of the professional American Society of Agricultural and Biological Engineers (ASABE) to meet professionals, tour companies, explore career paths, and participate in national design competitions. Additionally, the department hosts student events, such as our fall mixer or harvest meal, to allow students to get to know each other and the faculty.

## CUSTOMIZE A PATH OF STUDY

All majors take core engineering courses, then specialize in areas including machinery systems, natural resources and engineering, food engineering, or bioprocessing. Students can also develop their own customized focus areas. Many students also complete certificates in sustainability or renewable energy.

MAKE A STRONG START
An introductory engineering design course allows students to make personal connections with peers and learn fabrication skills on various industry machines in the BSE shop. In all courses, instructors offer homework help sessions to support students and encourage the formation of study groups.

## GAIN GLOBAL PERSPECTIVE

Students can choose from study abroad options, including courses taught in English, offered through the College of Agricultural and Life Sciences, the College of Engineering, or campus wide opportunities. Recent students have traveled to China, France, Costa Rica, Africa, and more. Programs occur over full semesters or during summer and winter breaks. International internships, many with summer options, offer additional opportunities to gain global experience.Students can explore studying abroad as a BSE major utilizing the Biological Systems Engineering Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

Entry to this professional program requires students to meet the five admission requirements detailed below. Students are admitted to the department as pre-Biological Systems Engineering until they meet the admission criteria. Admission eligibility must be confirmed by the

## department.

1. Must complete a minimum of 24 degree credits.
2. Must have completed a minimum of 17 graded credits of calculus, statistics, chemistry, computer science, statics, biology, and physics courses required for a BSE degree.
3. Must have a math and science grade point average (M\&SGPA) of at least 2.65 with a minimum grade of $C$ in every course used to calculate the M\&SGPA. The M\&SGPA is based on: math courses numbered 217 and above (MATH 228 is excluded); statistics courses numbered 224 and above; all chemistry courses; any biology courses (courses with biological science breadth; maximum three courses, any required course must be included if taken); computer sciences courses numbered 302 and above (COMP SCI 402 is excluded); E M A 201; BSE 380; and physics courses numbered 201 and above. For any course that a student repeats, only the most recent grade will be used in the calculation. Any transfer course from another university that is included in the previous list must be included in the GPA calculation.
4. Must be in good academic standing-i.e., not on academic probation or dropped status.
5. Must successfully complete introductory chemistry (CHEM 103 \& CHEM 104, or CHEM 109, or equivalent) and math through MATH 222.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

## Code <br> Title

Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.

| First Year Seminar (p. 46) |  |
| :---: | :---: |
| International Studies (p. 47) |  |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science |  |
| Additional Science (Biological, Physical, or Natural) |  |
| Science Breadth (Biological, Physical, Natural, or Social) |  |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

## NAMED OPTIONS WITHIN THE MAJOR

Students may complete the Biological Systems Engineering General Program or select a Named Option. The course requirements on this page represent the general program. Students are encouraged to consider one of the Named Options (Food and Bioprocess Engineering; Machinery Systems Engineering; or Natural Resources and Environmental Engineering). Links to learn more about these options, including the course requirements, are included below.

View as listView as grid

## - BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING (P. 124)

- BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING (P. 126)
- BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING (P. 128)

## MAJOR REQUIREMENTS

| Code Title | Credits |
| :--- | ---: |
| Major Requirements |  |
| Common Requirements | 53 |
| General Program Classes and Technical Electives | 43 |
| Capstone | 5 |
| Total Credits | $\mathbf{1 0 1}$ |

## COMMON REQUIREMENTS

| Code | Title | Credits |
| :--- | :--- | ---: |
| The Biological Systems Engineering program |  |  |
| requires completion of a minimum of $\mathbf{1 2 5}$ credits to |  |  |
| be eligible for graduation. Note that this is higher |  |  |
| than the minimum for other CALS programs. |  |  |

Taking the combination of CHEM 103 and CHEM 104 instead of CHEM 109 may increase the total minimum number of credits required to complete the program.

2
Machinery Systems students may select AN SCI/DY SCI 101 or AGRONOMY 100 to also satisfy the Production Agriculture requirement. Any biological science course of 2 or more credits is accepted. Additional courses taken may be counted as Technical Electives.
3
MICROBIO 101 or MICROBIO 303 required for Food \& Bioprocess Engineering specialization.
4
E M A 201 Statics is an acceptable prerequisite for PHYSICS 202 General Physics.

## 5

Students selecting the Food \& Bioprocess Engineering option who plan to enroll in CBE 310 Chemical Process Thermodynamics and CBE 320 Introductory Transport Phenomena must take CBE 250 here as a prerequisite. Students selecting the Food \& Bioprocess Engineering option who plan to enroll in M E 361 Thermodynamics and M E 363 Fluid Dynamics are recommended to take BSE 249 here.

## GENERAL PROGRAM REQUIREMENTS

| Code | Title | Credits |
| :---: | :---: | :---: |
| M E 361 | Thermodynamics ${ }^{1}$ | 3 |
| or CBE 310 | Chemical Process Thermodynamics |  |
| Select one of the following: ${ }^{1}$ |  | 3-4 |
| M E 363 | Fluid Dynamics |  |
| CIV ENGR 310 | Fluid Mechanics |  |
| CBE 320 | Introductory Transport Phenomena |  |
| BSE 464 | Heat and Mass Transfer in Biological Systems | 3 |
| EMA 303 | Mechanics of Materials | 3 |
| or M E 306 | Mechanics of Materials |  |
| Select a minimum of three of the following: |  | 6-9 |
| BSE 301 | Land Information Management |  |
| BSE 364 | Engineering Properties of Food and Biological Materials |  |
| BSE/ <br> ENVIRST 367 | Renewable Energy Systems |  |
| BSE/CIV ENGR/ <br> SOIL SCI 372 | On-Site Waste Water Treatment and Dispersal |  |
| BSE 405 | Intelligence and Automation in Agriculture |  |
| BSE 460 | Biorefining: Energy and Products from Renewable Resources |  |
| BSE 461 | Food and Bioprocessing Operations |  |
| BSE 472 | Sediment and Bio-Nutrient Engineering and Management |  |
| BSE 473 | Water Management Systems |  |
| BSE/ME 475 | Engineering Principles of Agricultural Machinery |  |

| BSE/M E 476 | Engineering Principles of Off-Road <br> Vehicles |
| :--- | :--- |
| BSE 571 | Small Watershed Engineering |

## Total Credits

Take BSE 249 and M E 361 and M E 363, or take CBE 250 and CBE 310 and CBE 320.

## TECHNICAL ELECTIVES

Select courses from one or more of the following four technical elective categories to bring the total number of credits in the General Program Area or in the selected specialization area to 43 . See the BSE Undergraduate Student Handbook for a list of recommended technical electives for various areas of specialization.

## A. INTRODUCTION TO ENGINEERING COURSES (FRESHMEN ONLY)

| Code | Title | Credits |
| :--- | :--- | ---: |
| INTEREGR 170 | Design Practicum | 3 |
| BSE 170 | Product Design Practicum | 2 |

## B. INDEPENDENT STUDY/INSTRUCTION COURSES

CALS or CoE courses with a 001, 299, 399, or 699 course number. No more than 3 credits of coursework in this category can be used to meet technical elective requirements.

## C. UPPER-LEVEL COURSES

 Part 1. Upper-Level Engineering CoursesThis includes BSE courses not taken to meet other curricular requirements. This does not include independent study/ instruction courses.

| Code | Title | Credits |
| :--- | :--- | ---: |
| Any Engineering course numbered 300 or above |  |  |
| E M A 202 | Dynamics | 3 |
| or M E 240 | Dynamics |  |

## Part 2. Upper-Level Science Courses

This includes BSE courses not taken to meet other curricular requirements. This does not include independent study/ instruction courses.

| Code | Title | Credits |
| :--- | :--- | ---: |
| Advanced biological, natural, and physical science courses <br> (i.e., courses with a B, N, or P designation) |  |  |
| CHEM 341 | Elementary Organic Chemistry | 3 |
| CHEM 342 | Elementary Organic Chemistry | 1 |
|  | Laboratory |  |
| CHEM 343 | Organic Chemistry I | 3 |
| CHEM 344 | Introductory Organic Chemistry | 2 |
|  | Laboratory |  |
| CHEM 345 | Organic Chemistry II | 3 |
| CHEM/M S \& E 421 | Polymeric Materials | 3 |

## D. LOWER-LEVEL SCIENCE AND ENGINEERING COURSES, BREADTH COURSES

Elementary and intermediate biological, natural and physical science courses except elementary and intermediate math courses; College of Engineering courses with a 100 or 200 level designation; College of Agricultural and Life Sciences courses, Institute of Environmental Studies courses, and/or School of Business courses. Independent study/instruction courses cannot be counted in this category. No more than 12 credits of coursework in this category can be used to meet technical elective requirements.

## CAPSTONE

| Code | Title |
| :---: | :---: |
| BSE 508 | Biolog Desig |
| BSE 509 | Biolog Desig |
| Fundamentals of Engineering Exam ${ }^{1}$ |  |
| 1 |  |
| Grades for BSE 509 will not be posted until proof presented. |  |
| UNIVERSITY DEGREE |  |

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade
Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## EARNING OUTCOMES

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Display effective communication with a range of audiences.
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Display teamwork skills, functioning effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

## FOUR-YEAR PLAN

## FOUR-YEAR PLAN

SAMPLE BIOLOGICAL SYSTEMS 2 ENGINEERING FOUR-YEAR PLAN-GENERAL PROGRAM

| First Year |  |  |  |
| :---: | :---: | :---: | :---: |
| Fall | Credits | Spring | Credits |
| MATH $221{ }^{1}$ |  | 5 MATH 222 | 4 |
| CHEM $109{ }^{2}$ |  | 5 BSE 170 or INTEREGR $170$ | 2-3 |
| Biological Science Course |  | 3 BSE 310 | 3 |
| Humanities |  | 3 LSC 100 (or other COMM A) | 3 |
|  |  | Ethnic Studies | 3 |
|  |  | 16 | 15-16 |
| Second Year |  |  |  |
| Fall | Credits | Spring | Credits |
| E M A 201 |  | 3 BSE 308 | 1 |
| MATH 234 |  | 4 BSE 349 | 3 |
| BSE 249 |  | 3 MATH 320 | 3 |
| BSE 270 |  | 3 PHYSICS 202 | 5 |
| BSE 380 |  | 3 BSE General Program Elective | 3 |

## Fourth Year

Fall

## Credits

Spring
Credits
BSE 509
3 BSE 464

| 300 level or higher non- | 3300 level or higher non- | 3 |
| :--- | :---: | :---: |

| Technical Electives | 4 Technical Electives | 4 |
| BSE General Program <br> Elective | 3 Elective Course | 3 |
| Humanities | 3 | $\mathbf{1 3}$ |

## Total Credits 126-127

Students must complete at least 125 total credits to be eligible for graduation.
1
MATH course dependent on placement score and transfer credit evaluation.

2
If CHEM 103 \& CHEM 104 are taken in place of CHEM 109, it is suggested to take CHEM 103 in the fall semester and CHEM 104 in the spring semester of the first year, and move BSE 310 to the fall semester of the second year.

## ADVISING AND CAREERS

## ADVISING

All students are assigned an advisor when they join the department. Firstyear students work with a professional staff advisor; more advanced students transition to a faculty advisor in their specialization area. The BSE department promotes personalized advising through accessible appointments and requires advising meetings at least once each semester.

## CAREER OPPORTUNITIES

BSE graduates have great careers developing new products, processes and systems to protect soil, air and water quality while meeting demand for food, materials, and energy. Alumni hold positions in research and engineering in organizations developing off-road equipment, food production, renewable energy systems, animal housing, environmental control systems, irrigation and drainage systems, and with engineering consulting companies. Earning a BSE degree puts students on track to become a professional engineer and take the Fundamentals of Engineering (FE) exam, the first step toward licensure which opens even more career opportunities.

## PEOPLE

First contact for prospective students is Betsy Wood, Academic Advising Manager/ Student Services, (608) 262-3310, betsy.wood@wisc.edu. Schedule an appointment with her via Starfish.

## PROFESSORS

Neslihan Akdeniz, Robert Anex, Christopher Choi, Matt Digman, Sundaram Gunasekaran, Awad Hanna, Margaret Kalcic, Krishnapuram Karthikeyan, Brian Luck, Xuejun Pan, Douglas Reinemann, Troy Runge, John Shutske, Paul Stoy, Anita Thompson, and Zhou Zhang

## INSTRUCTORS

Kody Habeck and Jeff Nelson

## STUDENT ADVISOR

Betsy Wood
Click here for the full BSE directory of contacts (https://bse.wisc.edu/ people/)

## WISCONSIN EXPERIENCE

## STUDENT ORGANIZATIONS

The American Society of Agricultural and Biological Engineers (ASABE) Pre-professionals Club (https://asabe.bse.wisc.edu/) connects students to professional development opportunities.

UW-Madison offers many other student groups to encourage networking and development of leadership skills. Some cater to agricultural interests, others focus on engineering and biosciences. Many food and bioprocess engineering students are active in the Food Science Club. Other options include Minorities in Agriculture, Natural Resources and Related Sciences (https://win.wisc.edu/organization/manrrs/), Engineers for a Sustainable World (UW-Madison Chapter) (https://win.wisc.edu/organization/eswuwmadison/), and more. Many student organizations exist to support engineering students who identify as Native American, Black, Latinx, or part of the LGBTQIA+ community in professional development and academic success.

Find more student organizations (https://win.wisc.edu/organizations/).

## COMPETITIVE TEAMS

The BSE department is the home of several engineering design teams that compete in one of several National Student Design Competitions through the American Society of Agricultural and Biological Engineers (ASABE). The Quarter-Scale Tractor Team (https://badgerpulling.bse.wisc.edu/) designs and builds a small-scale tractor judged by industry experts and put to the test in performance events against other national and international university teams. The Robotics Student Design Competition allows students to develop skills in robotic systems, electronics, and sensing technologies by simulating a fully autonomous robotic solution to a common agricultural process.

Many BSE students participate in or hold leadership positions in other engineering design competition teams, such as: Formula SAE (https:// vehicles.wisc.edu/formula/formulaabout.html), SAE Clean Snowmobile (https://vehicles.wisc.edu/SNOWMOBILE/SNOWMOBILEabout.html) ${ }_{\llcorner }$ ASCE Concrete Canoe (https://win.wisc.edu/organization/canoe/) Human Powered Vehicle Challenge (https://hpvc.slc.engr.wisc.edu/new/) Collegiate Wind Power Competition, (https://energy.wisc.edu/news/ uw-madison-team-compete-2022-collegiate-wind-competition/) Baja Team (https://vehicles.wisc.edu/BAJA/BAJAabout.html), and UW Hybrid. (https://vehicle.slc.engr.wisc.edu/)

## INTERNSHIPS

Internships are an excellent way for students to ground what they have learned in practical applications. Students also participate in co-operative (co-op) education programs where they earn full-time salaries while working for a company. The program supports students in finding co-ops and internships and provides flexibility in class plans for opportunities that occur during fall or spring semesters. Students learn of pre-professional internships through on-campus career fairs-primarily by those hosted by the CoE and CALS-and through regular email announcements. Students also have opportunities to intern with professors performing research over
the summer. Although not a program requirement, school credit may be earned for internships.

## RESEARCH EXPERIENCE

Many professors in BSE and across campus provide opportunities for students to gain hands-on experience in research labs. Undergraduate researchers learn how knowledge is constructed, gain independence, and increase their self-confidence. These benefits are an advantage in any career path. BSE students are sought out by research groups across campus and governmental agencies because of their unique research experiences

## GLOBAL ENGAGEMENT

The program supports study abroad and international experiences with flexible scheduling. In addition to study abroad programs and internships, students can volunteer with student organizations like Engineers Without Borders (http://ewbuwmadison.weebly.com/). Students can choose to fulfill their International Studies requirement with an appropriate study abroad course.

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

BSE students participate in campus-wide volunteer programs like Badger Volunteers, offering their expertise in education, sustainability, and public health to support community organizations. In addition, BSE students volunteer through student organizations to work on special projects related to engineering. Past projects included the fabrication of bioreactors for communities in Uganda or Habitat for Humanity projects in Madison, WI.

## RESOURCES AND SCHOLARSHIPS

## SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually from a standard application (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

Each year dozens of outstanding Biological Systems Engineering students are awarded scholarships from funds designated exclusively for this major. These funds seek to support students based on many different criteria such as financial need, specific academic interests, extracurricular involvement, and academic success.

## RESOURCES

BSE students have full access to the resources of both the College of Agricultural and Life Sciences and the College of Engineering, including Career Services, Study Abroad programs, access to specialized engineering software, and computer labs.

The Biological Systems Engineering Shop (https://bse.wisc.edu/shop-information/shop-info-for-students/) provides students hands-on experience with machining equipment commonly used in industry. Students can learn machining and metal fabrication techniques, as well as woodworking skills, and improve their understanding of design and assembly processes. Training and support are available for all skill levels. In addition, BSE students have access to all College of Engineering fabrication shops and the UW Makerspace (https:// making.engr.wisc.edu/).

Other resources in the Agricultural Engineering Building include a dedicated student computer lab and a student lounge available for group study or individual work. Department-wide social events are also held here.

## ACCREDITATION

Accreditation
Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

> BIOLOGICAL SYSTEMS ENGINEERING: FOOD AND BIOPROCESS ENGINEERING

Food and bioprocess engineers develop and manage equipment and systems that process and distribute food and other biologically based materials. They are required by the food industry to help develop processes that add value to food products. These processing technologies are designed to improve the storage life and marketability of food products, reduce their transportation costs, handle processing wastes, and develop alternative uses for biological materials. (For example, newspaper and soy flour are used to make the construction material, Environ ${ }^{\text {TM }}$, and corn stalks can be used to make chemical absorbent pads.)

The food industry makes up one of the largest segments of our nation's economy and continues to enjoy steady growth due to the everchanging needs of consumers and increased awareness of nutritional and environmental issues. Food and bioprocess engineers play a vital role in meeting this need. From potato chips to microwavable entrees, food and bioprocess engineers continue to develop processes to convert raw materials from the farm to food products for the dining room table.

If CHEM 103 \& CHEM 104 are taken in place of CHEM 109, it is suggested to take CHEM 103 in the fall semester and CHEM 104 in the spring semester of the first year, and move BSE 310 to the second year.

> BIOLOGICAL SYSTEMS ENGINEERING: MACHINERY SYSTEMS ENGINEERING

Machinery systems engineering is what many students initially perceive biological systems engineering to be. These engineers are trained to design machines for production agriculture and construction. Concepts covered in this field include power transmission, traction, hydraulic power, and crop handling, such as planting and harvesting.

Over the past 50 years, machines have improved production efficiency in all aspects of life. Machinery systems engineers have played a key role in moving society from the highly manual culture of the early 20th century to the highly technical culture of the late 20th century. Even with these advances, the job of the machinery systems engineer is not complete. Concern for our natural environment and worker safety, and the constant desire to reduce costs and energy consumption while improving production efficiency, will continue to challenge machinery systems engineers.

## BIOLOGICAL SYSTEMS ENGINEERING: NATURAL RESOURCES AND ENVIRONMENTAL ENGINEERING

Natural resources and environmental engineers work with all kinds of natural resources, like water, soil, plants, and air. For example, they could be responsible for the design of livestock or wildlife watering stations in a natural forest or the design of a recycling waste management system on a dairy farm. Graduates find challenging and rewarding work with engineering and environmental consultants, with government agencies like the Forest Service, and with companies such as Valmont Irrigation and Creative Habitat.

Conserving soil and water resources is critical to our future. Expanding populations and increasing needs for food, goods, and services are placing an ever growing demand upon our precious soil and water resources. Natural resources and environmental engineers are finding ways to manage and conserve our resources today so that we can meet the demands of the future.

## COMMUNITY AND ENVIRONMENTAL SOCIOLOGY

Community and environmental sociology explores the communities in which people live and the relationships between people and their natural environments. Using an integrative approach, the major provides students a broad view of the societal factors involved in issues of environment, food systems, health, and community development, as well as strategies for promoting a more just and sustainable world.

Through core courses, students receive foundational knowledge in sociology and select from a wide range of electives covering environmental stewardship, resource conflicts, public health, social change, social justice, agroecology, rural development, labor, science and technology, colonialism, and globalization.

Students can apply their course learning to real life through internships, field courses, and research projects. During their final year, majors complete a senior capstone course where they work with local community groups to address specific challenges or explore social and environmental problems through case studies.

## Build community and networks

Students get to know faculty and instructors through departmental courses and social activities, and they can build their networks by participating in student organizations, internships, and research experiences.

## Customize a path of study

In addition to a set of core courses, students choose from a wide array of electives to explore their areas of interest within the major. Many choose to add a certificate or double major to their degree. Common certificate options include global health, food systems, organic agriculture, science and technology policy, and environmental studies. Common second majors
include environmental sciences, nutritional sciences, agronomy, biology, and wildlife ecology.

## Make a strong start

An introductory course provides an overview of topics such as community organizing, local food systems, energy transitions, environmental justice, resource dependence, and sustainable development.

## Gain global perspective

Majors learn about different cultures, communities, and environments through the classes they take, and many choose to study abroad to further expand their perspectives. Majors can choose semester-long programs or summer opportunities at top universities in Africa, Asia, Europe, and Latin America, or shorter faculty-led study abroad experiences. Students can explore studying abroad as a Community and Environmenta Sociology major by utilizing the Community and Environmental Sociology (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/ community-and-environmental-sociology/)Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## COMMUNITY AND ENVIRONMENTAL SOCIOLOGY, B.S.

Community and environmental sociology explores the communities in which people live and the relationships between people and their natural environments. Using an integrative approach, the major provides students a broad view of the societal factors involved in issues of environment, food systems, health, and community development, as well as strategies for promoting a more just and sustainable world.

Through core courses, students receive foundational knowledge in sociology and select from a wide range of electives covering environmental stewardship, resource conflicts, public health, social
change, social justice, agroecology, rural development, labor, science and technology, colonialism, and globalization.

Graduates go on to a wide variety of careers in environmental conservation, community and international development, food systems, law, public policy, sociology, and public health - in the private, public, and non-profit sectors. A Community and Environmental Sociology major also provides excellent preparation for graduate school. Alumni hold positions as directors, managers, administrators, policy makers, data analysts,
planners, consultants, researchers, teachers, health care workers, and civil servants.

## Learn through hands-on, real-world experience

Students can apply their course learning to real life through internships, field courses, and research projects. During their final year, majors complete a senior capstone course where they work with local community groups to address specific challenges or explore social and environmental problems through case studies.

## Build community and networks

Students get to know faculty and instructors through departmental courses and social activities, and they can build their networks by participating in student organizations, internships, and research experiences.

## Customize a path of study

In addition to a set of core courses, students choose from a wide array of electives to explore their areas of interest within the major. Many choose to add a certificate or double major to their degree. Common certificate options include global health, food systems, organic agriculture, science and technology policy, and environmental studies. Common second majors include environmental sciences, nutritional sciences, agronomy, biology, and wildlife ecology.

## Make a strong start

An introductory course provides an overview of topics such as community organizing, local food systems, energy transitions, environmental justice, resource dependence, and sustainable development.

## Gain global perspectives

Majors learn about different cultures, communities, and environments through the classes they take, and many choose to study abroad to further expand their perspectives. Majors can choose semester-long programs or summer opportunities at top universities in Africa, Asia, Europe, and Latin America, or shorter faculty-led study abroad experiences. Students can explore studying abroad as a Community and Environmental Sociology major by utilizing the Community and Environmental Sociology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option
to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General

- Breadth-Humanities/Literature/Arts: 6 credits

Education

- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

## Code

Title
Credits
Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46)
International Studies (p. 47) ..... 3
Physical Science Fundamentals ..... 4-5
CHEM 103 General Chemistry I
or CHEM 108 Chemistry in Our World
or CHEM 109 Advanced General Chemistry
Biological Science5
Additional Science (Biological, Physical, or Natural) ..... 3
Science Breadth (Biological, Physical, Natural, or Social) ..... 3

Select 6-9 credits from the Environment course set ${ }^{3}$
Capstone
C\&E SOC $500 \quad$ Capstone Experience ..... 3
Total Credits32-33

We strongly encourage our majors to take C\&E SOC/SOC 360 Statistics for Sociologists I, if they have not already taken a statistics course at time of major declaration. Acceptable statistics courses other than C\&E SOC/ SOC 360 Statistics for Sociologists I are: STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences, ECON 310 Statistics: Measurement in Economics, PSYCH 210 Basic Statistics for Psychology, GEOG 360 Quantitative Methods in Geographical Analysis, and MATH/STAT 310 Introduction to Probability and Mathematical Statistics II. Please note that statistics courses taken outside the major do not count toward the credit requirement in the major. 2

Must complete a total of 15 credits of Community and Environment electives. No more than 6 credits may be 100- or 200-level courses. At least 6 credits must be taken in each course set.

Consult advisor to request permission to use C\&E SOC 299 Independent Study, C\&E SOC 399 Coordinative Internship/Cooperative Education, or C\&E SOC 699 Special Problems toward the Community or Environmental course sets. No more than 4 such credits may be counted toward the major.

## CREDIT REQUIREMENT

Must complete a total of 30 credits of C\&E SOC courses. Students may count up to 4 credits of Independent Study (C\&E SOC 299 Independent Study, C\&E SOC 699 Special Problems), Internship (C\&E SOC 399 Coordinative Internship/Cooperative Education), or Thesis (C\&E SOC 681 Senior Honors Thesis/C\&E SOC 682 Senior Honors Thesis/C\&E SOC 691 Senior Thesis/C\&E SOC 692 Senior Thesis) here, with permission of their advisor.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Understand how social science arguments are constructed and evaluated.
2. Develop ability to assess data quality and understand whether particular data is appropriate to answer specific questions.
3. Learn general theories on basic social processes, especially those related to the relationships between society and the environment and the social organization of communities.
4. Learn communication skills in the social sciences.

2
C\&E SOC electives include the Community course set and the Environmental course set. See Requirements tab for details.

## 3

Students may take the capstone course either semester of their senior year. The fall semester and spring semester courses may have different content.

The above plan assumes that a student enters with standard high school preparation (algebra, geometry, third-year math, two years' foreign language).

## ADVISING AND CAREERS

## Advising

Students have an academic advisor who helps them with course planning and mapping out their degree plans. They also have a faculty mentor, with whom they can discuss internship opportunities and career goals.

## Career opportunities

Graduates go on to a wide variety of careers that help support environmental sustainability, sustainable agricultural systems, community development, and public health - in the private, public, and non-profit sectors. The major also provides excellent preparation for graduate school. Alumni hold professional positions as directors, managers, administrators, policy makers, data analysts, planners, consultants, researchers, teachers, health care workers, and civil servants.

## PEOPLE

## WISCONSIN EXPERIENCE

## Internships

Many students complete internships, including with campus clubs, community groups, and national and international non-profit organizations. Learn more about internship opportunities. (https:// dces.wisc.edu/programs/opportunities/possible-internships/)

## Research experience

Community and Environmental Sociology majors can gain research experience by participating in a faculty-led research project or conducting
their own project supervised by a faculty member. Students can choose to write thesis papers, and some become authors or co-authors on published research papers

## Global engagement

Majors are encouraged to participate in study abroad experiences across all continents. Options include a sustainable development course in Uganda, a food systems and health course in South Africa, and many other options.

## Community engagement and volunteering

There are many opportunities to engage in volunteer activities. The Morgridge Center for Public Service (https://morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## Student organizations

There are numerous campus student organizations of interest to majors, including F.H. King Students for Sustainable Agriculture, Campus Food Shed, and REthink Wisconsin. A full list of UW-Madison student organizations is available on the Wisconsin Involvement Network website (https://win.wisc.edu/organizations/).

## RESOURCES AND SCHOLARSHIPS

## Scholarships

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships (https://cals.wisc.edu/academics/undergraduate-students/ financing-your-education/cals-scholarships/).

The Department of Community and Environmental Sociology awards an average of \$15,000 in scholarships each year to undergraduate students in the department. This includes numerous Crowe Scholarships, which are awarded to students to support research, study abroad, conference fees, and professional society memberships. Crowe Scholarships are also awarded for financial need and academic achievement. Learn more about Community and Environmental Sociology scholarships. (https:// dces.wisc.edu/programs/scholarships/)

## FOOD SYSTEMS, CERTIFICATE

The certificate in food systems is an option open to all undergraduate students. It assembles an interdisciplinary curriculum, integrating different paradigms across all aspects of food production, distribution, and consumption, along with the context and values inherent to the systems.

For students in food or agriculture-related majors, the certificate in food systems will provide a broader context to their disciplinary studies. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students of any discipline, the certificate will help students be more informed consumers and citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic,
and environmental outcomes of different patterns of production, processing, distribution, and consumption.

## HOW TO GET IN

Undergraduate students of any major are welcome to pursue the certificate in food systems.

Students are eligible to declare the certificate once they complete one of the three core courses (AGROECOL/AGRONOMY/C\&E SOC/ ENTOM/ENVIR ST 103 Agroecology: An Introduction to the Ecology of Food and Agriculture, C\&E SOC/A A E/SOC 340 Issues in Food Systems, and DY SCI/AGRONOMY 471 Food Production Systems and Sustainability) with a grade of B or better. While there are different pathways to complete the certificate, students who declare and plan their coursework earlier in their careers will be in a better position to complete the required coursework.

Students who meet the eligibility criteria should fill out this short questionnaire (https://uwmadison.co1.qualtrics.com/jfe/form/ SV_OJPABAckGujKA2p/) and then contact Megan Banaszak (mbanaszak@wisc.edu) to declare the certificate.

## REQUIREMENTS

The certificate in food systems requires that students take two highly interdisciplinary core courses (6 total credits), and at least one course in each of three thematic elective categories (for 9 total credits across electives), plus a one credit culminating activity such as an internship, independent study, or appropriate capstone. The course list below provides a complete list of courses that satisfy each requirement.

## MINIMUM REQUIREMENTS

- 2.0 GPA in certificate courses
- At least 50\% of certificate courses taken in-residence (i.e. at UWMadison or through a UW-Madison sponsored study abroad program)
- Minimum of 16 credits total

| Code | Title | Credits |
| :--- | ---: | ---: |
| Core Courses |  |  |
| Select two of the following: | $6-7$ |  |

AGROECOL/ Agroecology: An Introduction to the AGRONOMY/ Ecology of Food and Agriculture C\&E SOC/
ENTOM/
ENVIR ST 103
C\&E SOC/A A E/ Issues in Food Systems
SOC 340
DY SCI/ Food Production Systems and
AGRONOMY 471 Sustainability

## Elective Courses

Select at least one course from each list: Provisioning,
Context, and Values for a total of 9 credits
Provisioning (production, processing, distribution)
AGRONOMY 100 Principles and Practices in Crop Production
AGRONOMY 300 Cropping Systems
AGRONOMY 377 Global Food Production and Health

| AN SCI/ DY SCI 101 | Introduction to Animal Sciences |
| :---: | :---: |

| BOTANY/ AMER IND/ ANTHRO 474 | Ethnobotany |
| $\begin{aligned} & \text { C\&E SOC/ } \\ & \text { SOC } 341 \end{aligned}$ | Labor in Global Food Systems |
| $\begin{aligned} & \text { C\&E SOC/ } \\ & \text { SOC } 222 \end{aligned}$ | Food, Culture, and Society |

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Evaluate critically the key elements of a food system.
2. Evaluate critically how political, social, economic, and environmental forces interact to shape food systems.
3. Evaluate critically the biophysical processes inherent in various agricultural production systems.
4. Evaluate critically how individuals from different backgrounds interact with local and global food systems as humans, consumers, producers, and citizens.
5. Evaluate critically the social, economic, and environmental outcomes of different food systems.

## ADVISING AND CAREERS

## ADVISING

Questions about the certificate may be directed to the advisor, Megan Banaszak (mbanaszak@wisc.edu), or to the Faculty Chair, Michael Bell (michaelbell@wisc.edu).

## CAREERS

For students in food or agriculture related majors, the certificate in food systems will provide a broader context to their disciplinary studies. As they seek careers, they will be able to provide evidence of enhancing their disciplinary learning and skills with a broader framework of food system concepts, including ideas for enhancing food system sustainability. For students in fields that include food as a possible orientation of their studies, it will provide exposure to the full range of food systems, potentially inspiring an orientation to food as a focus of their studies. For students in any discipline, the certificate in food systems will help them be more informed consumers and better informed citizens, hopefully leading to better choices about what they eat through knowledge of food and the social, economic, and environmental consequences of production, processing, distribution, and consumption.

## PEOPLE

Faculty across campus teach courses in the certificate. Please use the Guide to seek out information on individual courses.

For general certificate inquiries, questions about the culminating experience, direct advising on curricular requirements, or to declare the certificate, contact Megan Banaszak (mbanaszak@wisc.edu).

## WISCONSIN EXPERIENCE

- Integrated, interdisciplinary course work
- Professional development opportunities, including options to intern off campus
- Hands-on culminating experience

## ENTOMOLOGY

Insects have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insects species-with estimates ranging from 3 to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded humans-sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time,
an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory or classroom.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, research and extension work, state and federal government service, industry, and research institutes.

Students can complete an undergraduate major in entomology or global health in the Entomology department.

Students interested in graduate work should consult the Graduate Guide (http://guide.wisc.edu/graduate/).

## ENTOMOLOGY, B.S.

Entomology is the study of insects, who have dominated the terrestrial planet for more than 350 million years. While entomologists have recognized and named more than one million different species of insects, experts vary widely on the true number of insects species-with estimates ranging from 3 to 30 million unique species. At any given moment, 200+ million insects live for every human on Earth; over 70 percent of all animal species are insects. They have achieved something that has eluded
humans-sustainable development. Insects are the primary consumers of plants, yet they are also the dominant pollinators, thus ensuring plant reproduction. They play a critical role in disease transmission yet the service they provide to ecological maintenance is unparalleled.

Entomologists conduct insect-based research in numerous areas ranging from general biology, natural history, systematics, ecology and behavior, to molecular biology, physiology and development, to medical and agricultural entomology. Emerging areas include invasive species, biodiversity, pollination ecology, forensics, global health, and genomics. Entomology is a very specific discipline, yet at the same time, an immensely broad and diverse field of study touching a wide array of other subjects. As such, entomological training provides many choices and opportunities for those interested in the diversity of nature. While some entomologists work in the field, others work in the laboratory, classroom, or museum settings.

Students majoring in entomology study in a variety of fundamental and applied fields. Graduates find employment in college and university teaching, community education, research and extension work, state and federal government service, industry, and research institutes.

## Learn through hands-on, real world experiences

Entomology students learn in many field and lab courses, including classes that focus on taxonomy, physiology, parasitology, insects and human culture, issues in global health, and medical entomology. Students can complete their capstone requirement as part of a summer field course. There are also numerous internships and research opportunities available both on and off-campus.

## Build community and networks

The UW-Madison Entomology Department is committed to the UW System's (http://www.wisconsin.edu/campuses/) goal to provide Wisconsin's citizens with opportunities to benefit from and contribute to the state's growing "knowledge economy" through the land-grant university three-fold mission of teaching, research and public service.

In the spirit of The Wisconsin Idea (http://www.wisconsinidea.wisc.edu/), Entomology Department faculty and students fulfill the public service mission through entomology outreach engagement. Entomology Department interactions with the surrounding and statewide community encompass a wide range of insect and human affairs from human medical issues such as West Nile Virus and Lyme disease, to forest products and natural resources entomology, integrated pest management programs for agriculture, turf and ornamental and household settings, K-12 primary and secondary school education, and more.

## Customize a path of study

Students are often able to customize their program of study by exploring a double major and/or undergraduate certificates based on their unique areas of interest. Both faculty and staff advisors are available to help students choose electives based on their educational and professional goals.

## Make a strong start

Freshman who are interested in Entomology are encouraged to participate in a First-Year Interest Group (https://figs.wisc.edu/what/) (FIG) program. During Fall semesters, the department has historically offered a fascinating FIG titled "Global Biodiversity and the 6th Mass Extinction" where students explore what the immense richness of biodiversity means not only to the human species but to the very health of the planet. This
program includes field trips, a museum experience, and other hands-on and experiential learning opportunities to bring concepts and classmates together for an eye-opening journey.

## Gain global perspective

The Entomology major is a great choice for students who wish to participate in a study abroad experience. Students can choose from a multitude of destinations world-wide, and can travel abroad during Summer, Spring, or Fall terms. Students can explore studying abroad as an Entomology major by utilizing the Entomology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code | Titl | Cred |
| :---: | :---: | :---: |
| Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation. |  |  |
| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |  |
| First Year Seminar (p. 46) |  |  |
| International Studies (p. 47) |  |  |
| Physical Science Fundamentals |  |  |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |  |
| Biological Science |  |  |
| Additional Science (Biological, Physical, or Natural) |  |  |
| Science Breadth (Biological, Physical, Natural, or Social) |  |  |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |  |

## MAJOR REQUIREMENTS

| Code Mathematics | Title | Credits |
| :---: | :---: | :---: |
| Select one of the following (or placement exam): |  | 5-6 |
| MATH 112 <br> \& MATH 113 | Algebra and Trigonometry |  |
| MATH 114 | Algebra and Trigonometry |  |
| MATH 171 | Calculus with Algebra and Trigonometry ${ }^{1}$ |  |
| Select one of the following: |  | 5 |
| MATH 211 | Calculus |  |
| MATH 217 | Calculus with Algebra and Trigonometry II |  |
| MATH 221 | Calculus and Analytic Geometry 1 |  |
| STAT 371 | Introductory Applied Statistics for the Life Sciences |  |
| Chemistry |  |  |
| Select one of t | owing: | 5-9 |

| CHEM 103 | General Chemistry I |
| :--- | :--- |
| \& CHEM 104 | and General Chemistry II |
| CHEM 109 | Advanced General Chemistry |

ZOOLOGY/
BIOLOGY 101
& ZOOLOGY/
BIOLOGY 102
& BOTANY/
BIOLOGY 130
Option 3:
```

BIOCORE 381
\& BIOCORE 382
\& BIOCORE 383
\& BIOCORE 384

Animal Biology
and Animal Biology Laboratory and General Botany

Select 12 additional credits from any biological or physical science course (at least 8 credits must be 300level or 200-level courses with the intermediate-leve designation). ${ }^{2}$

| Physics |  |  |
| :--- | :--- | ---: |
| Select one of the following: | $3-5$ |  |
| PHYSICS 103 | General Physics |  |
| PHYSICS 107 | The Ideas of Modern Physics |  |
| PHYSICS 109 | Physics in the Arts |  |
| PHYSICS 115 | Energy and Climate |  |
| PHYSICS 201 | General Physics |  |
| PHYSICS 207 | General Physics | 4 |
| Entomology Core |  | 4 |

302
Select 11 credits as follows
Must select at least 3 credits from at least two subsets (organismal, suborganismal, or applied)
May select up to 3 credits from subset called "other"

## Capstone

ENTOM $468 \quad$ Studies in Field Entomology ${ }^{3} \quad 3$
Total Credits 36-43

1
If MATH 171 is taken, student must take MATH 217.

Suggested courses/subjects include GENETICS 466, CHEM 341, CHEM 342 CHEM 343, CHEM 344, CHEM 345, PHYSICS 104, PHYSICS 202, PHYSICS 208, ENTOM not used elsewhere, BOTANY, ZOOLOGY, F\&W ECOL, MICRO, PL PATH.

3
ENTOM 468, taken after the junior year, is the recommended capstone course (can double count in Core Courses). ENTOM 681 Senior Honors Thesis, ENTOM 682 Senior Honors Thesis, ENTOM 691 Senior Thesis, ENTOM 699 Special Problems can be substituted in special circumstances (and can double count up to 3 credits in Core Category); see advisor.

## SUBSET COURSES

 ORGANISMAL| Code | Title | Credits |
| :--- | :--- | ---: |
| ENTOM 331 | Taxonomy of Mature Insects | 4 |
| ENTOM 432 | Taxonomy and Bionomics of <br> Immature Insects | 4 |
| ENTOM 450 | Basic and Applied Insect Ecology |  |
| ENTOM 451 | Basic and Applied Insect Ecology <br> Laboratory (requires enrollment in | 3 |
|  | ENTOM 450) 1 | 1 |
| ENTOM 468 | Studies in Field Entomology | 3 |
| ENTOM/BOTANY/ | Plant-Insect Interactions | 3 |
| ZOOLOGY 473 |  | 3 |
| The following three courses: |  |  |

| ENTOM/ | Ecotoxicology: The Chemical Players |
| :--- | :--- |
| AGRONOMY/ |  |
| F\&W ECOL/ |  |

| ENTOM 375 | Special Topics | $1-4$ |
| ENTOM 399 | Coordinative Internship/ | $1-8$ |
|  | Cooperative Education | $2-4$ |
| ENTOM 681 | Senior Honors Thesis | $2-4$ |
| ENTOM 682 | Senior Honors Thesis | 2 |
| ENTOM 691 | Senior Thesis | $1-4$ |

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## EARNING OUTCOMES

1. Define and explain major concepts in the biological sciences focusing on insects.
2. Knowledge of laboratory and/or field methodology
3. Explain and apply scientific methods including designing and conducting experiments and testing hypotheses.
4. Recognize relationships between structure and function at all levels including molecular, cellular, organismal and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physics, and technology to answer biological questions using the scientific method.

## FOUR-YEAR PLAN

## FOUR-YEAR PLAN

SAMPLE ENTOMOLOGY FOUR-YEAR PLAN

| Freshman | CreditsSpring | Credits |
| :--- | :---: | ---: |
| Fall | 4-5 CHEM 104 | 5 |
| CHEM 103 or 109 | 3-5 MATH 113, 211, 217, or 221 | $3-5$ |
| MATH 112, 113, 114, or 171 | 3 Electives (to reach ~15 <br> credits) | $5-8$ |
| COMM A or Elective | 1 |  |
| First Year Seminar | 3 |  |
| Additional Elective <br> Course |  |  |

## Total Credits 27-35

## Sophomore

| Fall | CreditsSpring | Credits |
| :--- | :---: | ---: |
| MATH 211, 217, 221, or | $3-5$ ZOOLOGY/BIOLOGY/ | 5 |
| STAT 371 | BOTANY 152 or BOTANY |  |

ENTOM 468 (Capstone, even \#'d
summers)

## Total Credits 3

## Senior

| Fall | CreditsSpring | Credits |
| :--- | :---: | :---: |
| Biological or Physical | Biological or Physical <br> Elective | 6 |
| Elective Course | $3-6$ Breadth Course in Core | 3 |
| Breadth Course(s) in <br> Core |  |  |

Electives (to reach ~15 6-9 Electives 6 credits)

## 12-18

## Total Credits 27-33

1
When choosing electives, students should first consider UW and CALS requirements (ethnic studies, humanities, social science, international studies, etc.)
For additional Biological or Physical Science courses students may want to choose from the following depending on interest

* Health/graduate school: CHEM 343/CHEM 344/CHEM 345,

PHYSICS 104 or PHYSICS 207, GENETICS 466,
MICROBIO 303/MICROBIO 304, BIOCHEM 501

* Ecology: F\&W ECOL/ENVIR ST/ZOOLOGY 360, BOTANY/F\&W ECOL/ ZOOLOGY 460, F\&W ECOL 550, ZOOLOGY/ANTHRO/BOTANY 410, BOTANY 400 or BOTANY 401.
* Agriculture: PL PATH 300, AGRONOMY 300, SOIL SCI 301

Students may reduce the number of required courses via:

- Testing out of Comm-A
- Using ZOOLOGY/BIOLOGY/BOTANY 152 Introductory Biology to satisfy Comm-B
- Testing out of Quantitative Reasoning, Part A
- Earning AP/IB credits
- Using ENTOM/ZOOLOGY 371 Medical Entomology for International Course

## ADVISING AND CAREERS

## ADVISING

Undergraduate students are assigned to the Entomology undergraduate faculty advisor Dr. Dan Young and academic staff advisor Allee Hochmuth, MS. However, since the vast majority of Entomology B.S. students conduct independent research during their undergraduate career, it is important to meet with other entomology faculty members (https:// entomology.wisc.edu/people/faculty/) to learn about all of the research possibilities.

Undergraduates in Entomology are strongly urged to meet with their advisor before they enroll for the upcoming term. If you have questions about advising or declaring the major, please contact Allee Hochmuth by making an appointment in Starfish.

For more information about the Entomology B.S. or the department in general, please contact Dr. Dan Young (dkyoung@wisc.edu).

## CAREER OPPORTUNTIES

Entomologists, from all educational levels, are able to seek employment in a variety areas. Graduates find employment in college and university teaching, community education, research and extension work, state and federal government service, industry, and research institutes. Some examples include:

- college and universities
- biotechnology companies
- state and federal agencies
- international agricultural research centers
- nurseries, greenhouses and garden centers
- non-governmental organizations
- golf courses, public parks and landscape maintenance companies
- agricultural companies
- a variety of private consulting firms

For more information on careers available to Entomology students, please visit our Internship \& Job Resources (https://entomology.wisc.edu/ graduate-study/internships-and-job-resources/) page. For more information on other academic, co-curricular, financial aid, and career opportunities and services available to Entomology B.S. students, please visit the CALS Career Services (https://cals.wisc.edu/academics/ undergraduate-students/career-services/) page. Students in the major are welcome to make an individual appointment with their advisor to discuss a number of career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

## PEOPLE

## FACULTY

Crall, James
Gratton, Claudio

Currie, Cameron (Bacteriology)
Coon, Kerri (Bacteriology)

Zhu, Jun (Statistics)
Ives, Anthony (Integrated Biology)
Mattson, William (adjunct)
Peckarsky, Bobbi (adjunct)

## INSTRUCTIONAL STAFF

Brabant, Craig, Curator Wisconsin Insect Research Collection Liesch, Patrick (PJ), Assistant Faculty Associate Insect Diagnostic Lab

## WISCONSIN EXPERIENCE

While entomology clearly is "big science," our department prides itself on a "small campus" feel in which we get to know our undergraduate students during their time with us.

In the classroom, we strive to maintain labs at not more than 15-20 students to maximize individualized and participatory learning. Students are given additional opportunities for deep and engaged learning experiences through honors options that are generally available for most courses and field and/or lab experiences in many of the upper-level courses.

## nternships

Please visit our Internships \& Job Resources (https:// entomology.wisc.edu/graduate-study/internships-and-job-resources/) page for more information on the multitude of internship and employment opportunities available to Entomology students. Research and internship opportunities are also available in the UW Insect Research Collection (WIRC) (http://labs.russell.wisc.edu/wirc/), as well as possible participation in WIRC sponsored collecting expeditions in Wisconsin and around the United States.

## Research experience

Very nearly all our undergraduate students have opportunities to work alongside our faculty and graduate students in research labs and in the field. Our major accommodates $1-3$ credits (of the 15 entomology credits required to major) in the area of directed/independent study and internships to promote extracurricular and outside the traditional classroom learning.

## Student organizations

Undergraduate students are also involved in service learning and teaching through our departmental "Insect Ambassadors (https:// insectambassadors.wiscweb.wisc.edu/)" outreach program to K12, various clubs, and organizations. We are committed (https:// insectambassadors.wiscweb.wisc.edu/) to the UW System goal to provide Wisconsin's citizens with opportunities to benefit from, and contribute to, the state's growing "knowledge economy" through the land-grant university three-fold mission of teaching, research, and public service. We also have an active Undergraduate Entomology Society for majors-or any UW-Madison students interested in entomology.

## Global engagement

Entomology students are encouraged to participate in a study abroad experience. Students can find more information about study abroad on the CALS study abroad advising page (https://cals.wisc.edu/academics/ undergraduate-students/international-programs/study-abroadadvising/).

## Community engagement and volunteering

In the spirit of The Wisconsin Idea (http://www.wisconsinidea.wisc.edu/), Entomology Department faculty and students fulfill the public service mission through entomology outreach engagement. Entomology Department interactions with the surrounding and statewide community encompass a wide range of insect and human affairs from human medical issues such as West Nile Virus and Lyme disease, to forest products and natural resources entomology, integrated pest management programs for agriculture, turf and ornamental and household settings, K-12 primary and secondary school education, and more. Please visit our Outreach (https:// entomology.wisc.edu/outreach/) page for more information.

On campus, the Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

Department scholarships are available to Entomology students and fellowships are available to support research work with a professor. Please visit our Awards \& Scholarships (https://entomology.wisc.edu/ undergraduate-study/awards-scholarships/) page for additional details.

Students across the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships here (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

## GLOBAL HEALTH, B.S.

## OVERVIEW

Global health is about improving health for everyone, while considering the connections among people, animals, plants, and the planet. Students explore how human health intersects with economic development, healthcare access, food systems, environmental health, and climate change in order to address the root causes of disease around the world. The program helps students develop a broad, planetary-scale perspective that can be applied to community, state, national, and international health challenges.

Students in the global health major study human health and well-being with an emphasis on empathy, cultural awareness, and collaborative approaches. The major, which covers bioscience and public health, provides students with foundational knowledge in disease and epidemiology, food systems, environmental health, and public health and policy. Majors are encouraged to pursue their own areas of interest through coursework and by participating in field experiences, laboratory research, internships, and volunteer work.

The global health major prepares students for a wide variety of careers. Students can become healthcare professionals well-informed about the systems that impact patient health. They can become epidemiologists or research scientists in academia or with government agencies, or community health professionals working on policy, education, or communication for governmental agencies or non-governmental organizations anywhere in the world. The program supports students who intend to go directly into the workforce after graduation, as well as those who plan to further their education through graduate or professional programs.

## LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

Students can apply their course learning to real life by participating in global health field experiences (https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/), which provide opportunities to study and help mitigate real world health challenges. Additionally, students gain experience through laboratory courses and through independent study in research labs that focus on health-related issues such as infectious diseases, environmental health, sustainable agriculture, and community engagement. Campus internship programs through the Wisconsin Area Health Education Centers (https://ahec.wisc.edu/), Center for Patient Partnerships (https://patientpartnerships.wisc.edu/), and International Division (https://internships.international.wisc.edu/) are also options for global health majors.

## BUILD COMMUNITY AND NETWORKS

Many advanced courses enroll 15-50 students allowing students to get to know faculty and instructors personally. Students also have opportunities to connect with other global health major and certificate students through classes, events, field experiences, and student organizations.

## CUSTOMIZE A PATH OF STUDY

In addition to a set of core courses, students are encouraged to take classes to explore and identify their particular areas of interest within
the broader field of global health. Students also tailor their major and Wisconsin Experience through global health field programs, laboratory research, capstone courses, internships, and volunteer work.

## MAKE A STRONG START

A number of first-year seminar courses are available to help new students understand academic programs, access student services, and develop time management and study skills.

## GAIN GLOBAL PERSPECTIVE

Global health students learn to take a broad, planetary-scale perspective, and apply it to challenges at community, state, national, and international levels. This big-picture perspective is interwoven through nearly all aspects of the global health major, including classes, capstone experiences, lab opportunities, and internships. Global health field experiences, which range from one week to a full semester, expose students first-hand to complex global health challenges in diverse settings, and give them the opportunity to learn from community members and practitioners who are working to address these issues. Students can explore studying abroad as a Global Health major by utilizing the Global Health Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

## PRIMARY MAJOR IN GLOBAL HEALTH

To declare this as the primary major, students must be admitted to UWMadison and the College of Agricultural and Life Sciences (CALS).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after beginning their undergraduate studies at UW-Madison (see Entering the College (p. 44)). For more information, contact the advisor listed on the Advising and Careers tab.

## ADDITIONAL MAJOR IN GLOBAL HEALTH

Current UW-Madison students in other schools and colleges interested in completing an additional ("double") major in Global Health should consult with a global health advisor. Advisor contact information is found on the Advising and Careers tab.

Students cannot earn both the Global Health certificate and the Global Health major. Additionally, students declared in the Global Health major cannot earn the Health and the Humanities certificate.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. |
| :--- | :--- |
|  | The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
|  | Away programs. |
| Quality of | Undergraduate students must maintain the minimum grade <br> Work |
|  | point average specified by the school, college, or academic <br> program to remain in good academic standing. Students <br> whose academic performance drops below these minimum |
|  | thresholds will be placed on academic probation. |

## EARNING OUTCOMES

1. Describe the current status of health, well-being and sustainability for humans and all life, the environment, and the planet.
2. Compare and contrast health and environmental conditions in the context of local settings and our state with national, international and global settings.
3. Quantify health challenges in terms of the global burden of disease, the human development index, and the metrics associated with the sustainable development goals and the planetary health boundaries.
4. Evaluate the strengths and weaknesses of contemporary initiatives and programs to improve global public health and sustainable systems
5. Use socioeconomic and political frameworks to characterize health challenges and demonstrate social awareness.
6. Demonstrate interpersonal and communication skills necessary for teamwork and leadership, ethical conduct, cross-cultural collaboration and civic engagement.
7. Use a systems approach to analyze complex relationships related to creating conditions for healthy life, sustainability and survival and describe the challenges and opportunities related to sustainable systems and survival.

|  |  | 16 | 15 |

Total Credits 119-121

Students must complete at least 120 total credits to be eligible for graduation.

## ADVISING AND CAREERS

## ADVISING

Each student is assigned an academic advisor who works to understand student goals and helps each student shape their unique Wisconsin Experience and make the most of their time at UW-Madison. Advisors also provide students career advising, as well as resources and guidance on planning for post-college activities such as graduate/professional school and "gap year" experiences.

Connect with Global Health Advisors (https:// globalhealth.cals.wisc.edu/advising/)

## CAREER OPPORTUNITIES

The knowledge and skills developed through the global health major prepare students for success in a wide range of careers. Global health students are prepared to become physicians, nurses, researchers, public health officials, policy makers, data analysts, administrators, non-profit employees, educators, and communications specialists in fields related to public health, epidemiology, environmental health, and international development.

Examples of employers seeking individuals with global health training include international agencies (such as the World Health Organization);
federal agencies (such as the Centers for Disease Control and Prevention); state and county health departments (such as the Wisconsin Department of Health Services); non-profit organizations (such as the Bill and Melinda Gates Foundation), hospitals; universities; research centers; and biotech companies.

## WISCONSIN EXPERIENCE

## WISCONSIN EXPERIENCE

## FIELD EXPERIENCES

Issues related to global health occur everywhere-at community, state, national and international levels-and global health majors are strongly encouraged to participate in one of many field experience options (https://globalhealth.cals.wisc.edu/about-the-certificate/fieldexperiences/) to learn about and help mitigate these challenges. Field experiences can take place locally or internationally, and they range in length from one week to an entire semester. All options emphasize human health and sustainable systems, and help provide students a more personal connection to what they are learning-whether in Kenosha or Kenya.

COMMUNITY ENGAGEMENT AND VOLUNTEERING
Students have numerous volunteer activities to choose from related to health improvement. The Morgridge Center for Public Service (https://
morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESEARCH EXPERIENCE

Global health majors are encouraged to join research teams and laboratories, where they can get involved in health-related research on infectious diseases, environmental health, sustainable agriculture, and community engagement. Many students take advantage of such research opportunities (https:// globalhealth.cals.wisc.edu/involvement/research/), receiving direct mentorship from professors, scientists, and graduate students.

## STUDENT ORGANIZATIONS

There are numerous campus student organizations (https:// globalhealth.cals.wisc.edu/involvement/student-orgs/) that global health majors can join to connect with students with similar interests. A full list of organizations is available on the Wisconsin Involvement Network website (https://win.wisc.edu/).

## INTERNSHIPS

A number of campus internship programs are available that are a good fit for global health majors, including opportunities through the Wisconsin Area Health Education Centers (https://ahec.wisc.edu/), Center for Patient Partnerships (https://patientpartnerships.wisc.edu/), and the International Division (https://internships.international.wisc.edu/).

## RESOURCES AND SCHOLARSHIPS

## RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually, including funding to help support global health majors who participate in field experiences and study abroad. Students apply for these scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). To learn more about college scholarships please visit the CALS scholarship website (https:// cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

## GLOBAL HEALTH, CERTIFICATE

## OVERVIEW

The 15-credit certificate provides interdisciplinary perspectives on wellbeing, health inequities, and the root causes of global health challenges, and it is a great compliment to many majors. The certificate is open to all UW-Madison students and welcomes all who are passionate about improving the health of populations across the world.

Students build knowledge about the global burden of disease and threats to well-being, and are able to identify parallels between local, domestic, and international health issues. Through coursework and field experiences students learn about public and global health careers and build valuable cross-cultural communication skills.

## CUSTOMIZE A PATH OF STUDY

The certificate curriculum is flexible including core courses, a diverse range of electives, and a credit-bearing field experience requirement, allowing
students to enhance the connection between the certificate and their major field of study as desired. Students have added the certificate to more than 50 majors in Agricultural and Life Sciences, Letters \& Science, Human Ecology, Education, Nursing, Engineering, and Business.

## LEARN THROUGH HANDS-ON, REAL-WORLD EXPERIENCES

A required field experience (https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/) allows students to apply their coursework with a real-life setting where they examine global health issues and explore the connections among human, animal, plant, and environmental health alongside community members and health practitioners in Wisconsin, the U.S., and abroad.

## GAIN GLOBAL PERSPECTIVE

Core courses provide students with a strong global and comparative framework for understanding complex health challenges, and faculty-led field experiences, whether international or within the US, allow students to learn about global health challenges from leading experts in the field.

## BUILD COMMUNITY AND NETWORKS

Field experience courses provide opportunities for community-building and high-impact educational experiences in courses with fewer than twenty students. Many students also build connections and develop leadership skills though participation in the many student organizations (https://globalhealth.cals.wisc.edu/involvement/student-orgs/) on campus related to global health.

## HOW TO GET IN

Undergraduate students from across campus are encouraged to consider completing the Certificate in Global Health. There are no prerequisites for declaring, and students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests and plan their field experience.

Students can declare the program by scheduling an appointment with their assigned Global Health advisor, or by filling out the online declaration form on the program's website (https://education.ghi.wisc.edu/undergraduate-certificate-in-global-health/).

Students declared in the certificate should plan to complete the program before or alongside their degree and major requirements, as they are not able to extend their time on campus to complete a certificate. Students declared in the Global Health major are not eligible to declare the certificate. Students may not declare both the Certificate in Global Health and the Health and the Humanities Certificate.

## REQUIREMENTS

## MINIMUM REQUIREMENTS

- Minimum grade of C in all certificate coursework
- At least 50\% of certificate coursework taken in residence

| Code | Title | Credits |

## LEARNING OUTCOMES

1. Identify and articulate the global burden of disease, opportunities and threats to well-being, and the root causes and possible solutions to these challenges.
2. Demonstrate a holistic and critical perspective on human health and well-being.
3. Utilize global frameworks for policy development and action for improved health, well-being, and equity.
4. Identify local, national and international health issues, and the connections between these challenges.
5. Engage and communicate respectfully with diverse colleagues and local partners.
6. Reflect and demonstrate self-awareness, humility, and empathy toward multiple cultural perspectives and knowledge.

## ADVISING AND CAREERS

## ADVISING

Each certificate student is assigned an advisor who works to understand student goals and helps each student shape their path through the certificate. Advisors also provide students with advising around options to fulfill the field experience requirement and post-graduation plans such as "gap year" opportunities, jobs, fellowships, and graduate school.

Connect with Global Health Advisors (https:// globalhealth.cals.wisc.edu/advising/)

## CAREER OPPORTUNITIES

Many graduates connect their major and certificate studies to best match employers looking for a global health perspective. Areas for future careers are extremely varied, but include healthcare professions, public health and epidemiology, research, policy, education, health communications, environmental health, and international development.

Kelcey Daniels, Advisor
Megan Juneau, Advisor

## WISCONSIN EXPERIENCE

## WISCONSIN EXPERIENCE

## INTERNSHIP

Local or international internships may be part of students' field experience requirement. Examples include: Community Health Internship Program with the Wisconsin Areas Health Education Centers (https://ahec.wisc.edu/); Resource Navigator Internship Program with the Center for Patient Partnerships (https://patientpartnerships.wisc.edu/); Wisconsin in Washington Internship Program (https://studyabroad.wisc.edu/uwindc/); and internships through the International Internship Program (https:// internships.international.wisc.edu/).

## GLOBAL ENGAGEMENT

Immersive field experiences (https://globalhealth.cals.wisc.edu/about-the-certificate/field-experiences/) are a hallmark of the certificate program and include both local and international opportunities. Local field experiences are offered in Madison and throughout Wisconsin, International field experiences are offered across the globe: Mexico, Costa Rica, Ecuador, Tanzania, Ghana, Uganda, Sri Lanka, Nepal, Thailand, Japan, China, Spain, and Austria.

## RESEARCH EXPERIENCE

Many students pursuing the certificate choose to be involved in research (https://globalhealth.cals.wisc.edu/involvement/research/) and are mentored by leading researchers in global health. Examples include: studying the effects of climate change on human and ecosystem health; researching ways to prevent Lyme disease spread by ticks; examining how women's empowerment leads to better health outcomes; or investigating methods to evaluate population vitamin A status which informs global health policy.

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

Several student organizations (https://globalhealth.cals.wisc.edu/ involvement/student-orgs/) on campus are related to global health. These organizations can be a great way to connect with other students with similar interests, network, get involved in the local community (https:// globalhealth.cals.wisc.edu/involvement/community-engagement/), and learn more about global health or other similar topics. Examples include Slow Food, Community Health Volunteers of Madison, and Partners in Health Engage.

## FOOD SCIENCE

Food science is the application of science and engineering to the production, processing, distribution, preparation, and evaluation of food.

The Department of Food Science at the University of Wisconsin-Madison has been a part of the College of Agricultural and Life Sciences for more than 100 years, instructing generations of food science and industry leaders. Housed in the recently remodeled Babcock Hall, the Department of Food Science offers students a unique undergraduate and graduate experience. Known for our distinguished and dedicated faculty and staff, students find the Department of Food Science a stimulating and encouraging environment to study and conduct research.

The Department of Food Science's undergraduate program offers students valuable real-world experience and leadership skills by providing an innovative curriculum; various club and extracurricular activities; research lab opportunities; access to a fully functional and award-winning dairy plant; professional and industry contacts and experience; numerous internships and scholarships, and nearly $100 \%$ job placement.

Students find career opportunities in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

## FOOD SCIENCE, B.S.

## Overview

The study of Food Science incorporates real-life aspects of chemistry, physics, microbiology, and engineering to solve today's global and local food problems. The curriculum emphasizes high-level technical competence while instilling communication, critical thinking, and problemsolving skills.

Housed in Babcock Hall, the Food Science major offers close contact with faculty and instructors, opportunities to conduct research, skillbuilding extracurricular activities, networking with industry professionals, and access to the modern Food Application Lab and a commercial dairy processing plant that manufactures the campus' famous Babcock ice cream.

With a nearly $100 \%$ job placement rate, graduates are equipped to compete and succeed in a modern global economy. Students find career
opportunities with corporations, government agencies, and nonprofits in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations.

## Learn through hands-on, real-world experience

Hands-on, practical learning is essential to the program, and laboratory courses are included at every level. A capstone course integrates earlier coursework, and students conduct a lab-based research project and analyze and present their findings. Students are encouraged to pursue internships to gain additional experience; many complete more than one before graduation. Some gain practical experience by working in the Babcock Dairy Plant, making consumer dairy products sold on campus. Others participate in undergraduate research projects on food quality, microbiology, chemistry, and food and health.

## Build community and networks

Faculty teach courses at every level and are on a first-name basis with students. The Food Science Club student organization is active and provides students with leadership opportunities and connections to alums and industry professionals. Additionally, more than 40 companies recruit students annually, providing many links to professionals and job opportunities.

## Customize a path of study

Students can select from lab-based elective courses focused on dairy, candy, meat, or fermented foods. The program also offers students the option to participate in Honors in Food Science.

## Make a strong start

A course for first-year students focuses on discovering food science and includes study skills, on-campus networking, resume writing, job interview skills, and learning from alums about career options.

## Gain global perspective

Study abroad is encouraged and students can use the program's road map to take advantage of summer and winter break study abroad opportunities or even a semester abroad with careful planning. Students can explore studying abroad as a Food Science major by utilizing the Food Science Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

## Code <br> Title

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46)
International Studies (p. 47)3
Physical Science Fundamentals ..... 4-5

| or CHEM 108 <br> or CHEM 109$\quad$Chemistry in Our World <br> Advanced General Chemistry | 5 |
| :--- | :--- |
| Biological Science | 3 |

## MAJOR REQUIREMENTS

NUTR SCI/A A E/AGRONOMY 350 World Hunger and Malnutrition is recommended to fulfill the CALS International Studies requirement.

## Code <br> Title <br> Credits

## Mathematics and Statistics

This major requires calculus. Prerequisites may need to taken before enrollment in calculus.
Complete one of the following:

| MATH 217 | Calculus with Algebra and Trigonometry II ${ }^{1}$ |  |
| :---: | :---: | :---: |
| MATH 221 | Calculus and Analytic Geometry 1 |  |
| Complete one of the following: |  | 3 |
| STAT 301 | Introduction to Statistical Methods |  |
| STAT 371 | Introductory Applied Statistics for the Life Sciences |  |
| Chemistry |  |  |
| General Chemistry |  |  |
| Complete one of the following: |  | 5-9 |
| CHEM 103 <br> \& CHEM 104 | General Chemistry I and General Chemistry II |  |
| CHEM 109 | Advanced General Chemistry |  |
| Organic Chemistry |  |  |
| CHEM 343 | Organic Chemistry I | 3 |
| CHEM 344 | Introductory Organic Chemistry Laboratory | 2 |
| CHEM 345 | Organic Chemistry II | 3 |
| Physics |  |  |
| Complete one of the following: |  | 4-5 |
| PHYSICS 103 | General Physics |  |
| PHYSICS 201 | General Physics |  |
| PHYSICS 207 | General Physics |  |

## Biology

Introductory Biology
BIOLOGY/BOTANY/ Introductory Biology 5
ZOOLOGY 151
Complete one of the following: 3-5
Any course numbered 400 or above with Biological
Science designation
BIOLOGY/ Introductory Biology
BOTANY/
ZOOLOGY 152
Fundamental Biological Sciences
MICROBIO 101 General Microbiology 3
or MICROBIO 303 Biology of Microorganisms

| MICROBIO 102 <br> or MICROBIO 304 | General Microbiology Laboratory Biology of Microorganisms Laboratory | 2 |
| :---: | :---: | :---: |
| BIOCHEM 501 | Introduction to Biochemistry | 3 |
| Foundation |  |  |
| Economics and Applied Economics |  |  |
| Complete one of the following: |  | 3 |
| A A E 215 | Introduction to Agricultural and Applied Economics |  |
| A A E 323 | Cooperatives and Alternative Forms of Enterprise Ownership |  |
| ECON 101 | Principles of Microeconomics |  |
| ECON 111 | Principles of Economics- <br> Accelerated Treatment |  |
| Nutritional Science |  |  |
| NUTR SCI/ <br> BIOCHEM 510 <br> or NUTR SCI 332 | Nutritional Biochemistry and Metabolism Human Nutritional Needs | 3 |
| Core |  |  |
| FOOD SCI 301 | Introduction to the Science and Technology of Food | 3 |
| $\begin{aligned} & \text { AN SCI/FOOD SCI } \\ & 321 \end{aligned}$ | Food Laws and Regulations | 1 |
| FOOD SCI/ MICROBIO 324 | Food Microbiology Laboratory | 2 |
| FOOD SCI/ <br> MICROBIO 325 | Food Microbiology | 3 |
| FOOD SCI 410 | Food Chemistry | 3 |
| FOOD SCI 412 | Food Analysis | 4 |
| FOOD SCI 432 | Principles of Food Preservation | 3 |
| FOOD SCI 440 | Principles of Food Engineering | 3 |
| FOOD SCI 514 | Integrated Food Functionality | 4 |
| FOOD SCI 532 | Integrated Food Manufacturing | 4 |
| Integrated Food Product Elective |  |  |
| Complete one of the f | following (2 credits minimum): | 2 |
| FOOD SCI 511 | Chemistry and Technology of Dairy Products |  |
| FOOD SCI/ AN SCI 515 | Commercial Meat Processing |  |
| FOOD SCI 535 | Confectionery Science and Technology |  |
| $\begin{aligned} & \text { FOOD SCI } 550 \\ & \text { \& FOOD SCI } 551 \end{aligned}$ | Fermented Foods and Beverages and Food Fermentation Laboratory |  |

## Science Elective

Any course numbered 400 or above with Physical Science 3
designation

## Capstone

| FOOD SCI 602 | Senior Project | 2 |
| :--- | :--- | :---: |
| FOOD SCI 603 | Senior Seminar | 1 |

## Total Credits

MATH 217 Calculus with Algebra and Trigonometry II requires MATH 171 Calculus with Algebra and Trigonometry I as a prerequisite.

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take FOOD SCI 681 Senior Honors Thesis and FOOD SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors Program page (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/) for more information.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Clearly and effectively communicate, both verbally and written, to a diverse range of audiences including technical experts and a lay audience.
2. Apply quantitative problem solving and critical thinking skills in all aspects of food science.
3. Rigorously apply scientific principles and quantitative reasoning to solve food science problems (technical competence)
4. Demonstrate the ability to work both independently and in groups across a wide range of situations.

FOUR-YEAR PLAN

## FOUR-YEAR PLAN

SAMPLE FOOD SCIENCE FOUR-YEAR PLAN
First Year

| Fall | Credits Spring | Credits |
| :---: | :---: | :---: |
| CHEM 103 or 109 ${ }^{1}$ | 4 CHEM $104^{1}$ | 5 |

| Integrated Food Product Elective ${ }^{4}$ |  | 1-3 General Education Course | 3 |
| Science Elective ${ }^{5}$ |  | 3-5 Integrated Food Product Elective ${ }^{4}$ | 1-3 |
|  | 13-1 | -17 | 12-16 |

## Total Credits 113-123

1
Students taking CHEM 109 do not take CHEM 104.
2
Note that the Communications B requirement (Comm-B) is met through FOOD SCI 602 Senior Project \& FOOD SCI 603 Senior Seminar

3

Students may choose to complete a General Education Course requirement this semester. Note: Enrolling in 17 credits this semester is not recommended.

4
Students are required to take at least one Integrated Food Product Elective course; students may choose to meet the Integrated Food Product Elective requirement during this semester.
Note: FOOD SCI 550 Fermented Foods and Beverages must be taken with FOOD SCI 551 Food Fermentation Laboratory to meet the Food Product Elective Requirement.

## 5

Both Biological and Physical Science elective classes are required Biological: 3 credits of any B designated course numbered 400 or above or BIOLOGY/BOTANY/ZOOLOGY 152 Introductory Biology (5 credits) Physical: 3 credits of any P designated course numbered 400 or above.

Note: Students must complete a minimum of 120 credits. This may require taking $\mathbf{1 6}$ credits per semester for at least four semesters.

## ADVISING AND CAREERS

## Advising

All students are assigned a faculty or staff advisor once they declare the major. Advisors are prepared to help with curricular planning and course access; major and degree questions; discussion of independent study and lab research experience; and navigating internship and scholarship opportunities. Declared Food Science majors must meet with their assigned advisor before semester enrollment. Additional information can be found on the department's website.

Prospective food science majors should contact the Department of Food Science at foodsci@wisc.edu or 608-265-2729 for more information.

## Career Opportunities

More than 40 organizations recruit students each year, and nearly all Food Science majors receive a job offer before graduation. Careers include working in product development, quality assurance/control, processing and engineering, technical sales, management, research, sensory analysis, and food law and regulations for corporations, nonprofits, and government agencies. Faculty advisors and course assignments help prepare students to write resumes, interview for jobs, and network with professionals in the field.

## PEOPLE

## Professors

Bradley Bolling, Audrey Girard, Richard Hartel, Tu-Anh Huynh, Barbara Ingham, John Lucey, Gulustan Ozturk, Scott Rankin (chair), Victor Ujor, Jan Peter van Pijkeren

## Instructors

Beth Button, Arnoldo Lopez-Hernandez, Yaa Klu, Nick Smith

## Advisors

Professor Brad Bolling, Professor Rich Hartel
Full faculty and staff list (https://foodsci.wisc.edu/faculty.html)

## WISCONSIN EXPERIENCE

## Student organizations

The Food Science Club organizes many programs, including mentoring first-year students, organizing company visits and tours, monthly socials, K-12 educational outreach, a food and health initiative, and a food systems initiative. Faculty advise the club, and activities are coordinated with coursework.

## Competitive teams

The Food Science Club coordinates many competitions. Each year, there are several different product development competitions, which are very popular with students. There is also a College Bowl, a food science trivia competition, and a dairy judging team that competes regionally and nationally.

## Internships

Advisors encourage students to pursue internships with one of the dozens of companies connected to the program. Most students complete at least one internship before graduation, but some complete as many as three. Students spend their summers at companies that include General Mills, Pepsico, Kraft-Heinz, Organic Valley, Danone, Agropur, Schreiber Cheese, Lindt Chocolate, and many more. These internships are generally paid, and many have lodging subsidies.

Students can also gain experience in several campus centers and programs focused on food, including the Babcock Dairy Plant, Center for Dairy Research, Food Research Institute, or Bucky's Varsity Meats.

## Research experience

First-year students are encouraged to pursue research experiences in faculty labs to get involved. Undergraduates can participate for credit through independent study or work for pay. Students working in faculty labs have been co-authors of scientific publications in food science and nutrition journals.

## Global engagement

With advance planning, students can study abroad and complete the degree in four years. Opportunities include: France, the Netherlands, and Australia. Read more about study abroad as a Food Science major. (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/ food-science/)

## Community engagement and volunteering

The Food Science Club organizes various volunteer activities. These have included dinners at the Ronald McDonald House, working with food pantries, and reducing food waste.

## RESOURCES AND SCHOLARSHIPS

## Scholarships

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships.

Food Science students are additionally eligible for \$25,000 in annual scholarships. Well-qualified students receive awards ranging from \$1,000\$3,000.

## Resources

Babcock Dairy Plant. Want practical experience in a fully operational dairy plant? Consider signing up for part-time work in the Babcock Dairy Plant to gain experience in a wide range of practical jobs, from quality control to production.

Babcock Hall Food Application Lab. This lab has 11 culinary workstations, food service equipment, and other amenities needed to prepare food at both small and food service scales.

Center for Dairy Research (CDR). Also within Babcock Hall is the internationally-renowned Center for Dairy Research. Students can conduct research, work in the analytical labs, or participate in the CDR Sensory Panel to gain invaluable practical experience.

Food Research Institute (FRI). Housed in the Microbial Sciences Building, FRI conducts industry-oriented research on various food safety topics.

Bucky's Varsity Meats. Interested in meat science? The meat processing facilities within the Department of Animal and Dairy Sciences apply many food science principles and provide a unique opportunity for students to get hands-on experience with all aspects of meat production.

> SCIENCE OF FERMENTED FOOD AND BEVERAGES, CERTIFICATE

Admissions to the Science of Fermented Food and Beverages, Certificate have been suspended as of fall 2022 and will be

## discontinued as of fall 2025. If you have any questions, please contact the department.

The purpose of this certificate program is to provide undergraduates at UW-Madison with an opportunity to gain unique knowledge and skill sets specific to the fermented food and beverage industries. Students that successfully complete this program will graduate with a competitive edge and leadership potential specific to career opportunities in this unique and growing field.

## HOW TO GET IN

## Admissions to the Science of Fermented Food and Beverages, Certificate have been suspended as of fall 2022 and will be discontinued as of fall 2025. If you have any questions, please contact the department.

This certificate is open to all degree-seeking undergraduate students. Students must be over the age of 21 by the time they take the lab requirements (FOOD SCI 551 Food Fermentation Laboratory or FOOD SCI 552 Food Fermentation Laboratory: The Science of Wine). For more information, or to declare the certificate, contact Rich Hartel (rwhartel@wisc.edu). Students are strongly encouraged to declare the certificate early in their academic career to ensure timely completion of certificate requirements.

| REQUIREMENTS |  |
| :---: | :---: |
| Code | Title Credits |
| FOOD SCl 410 | Food Chemistry 3 |
| FOOD SCI 550 | Fermented Foods and Beverages 2 |
| FOOD SCI 551 or FOOD SCI 552 | Food Fermentation Laboratory <br> Food Fermentation Laboratory: The Science of Wine |
| MICROBIO/ <br> FOOD SCI 325 | Food Microbiology 3 |
| MICROBIO 450 | Diversity, Ecology and Evolution of Microorganisms |
| MICROBIO 526 | Physiology of Microorganisms 3 |
| MARKETNG 300 | Marketing Management 3 |

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate

## LEARNING OUTCOMES

1. Identify and describe how microbial and chemical features of ingredients and raw materials influence the quality and functionality of fermented foods and beverages.
2. Explain the compositional features of ingredients and raw materials specific to various fermented foods and beverages.
3. Identify and describe the operational units and transformational processes unique to the production of fermented foods and beverages.
4. Design and produce fermented foods and/or beverages that meet specified standards for styles or varieties.
5. Measure and interpret analytics to assess quality and correct defects.
6. Describe the concept of branding and its impact on marketing fermented foods and beverages.

## ADVISING AND CAREERS

For more information or to declare the certificate in the science of fermented food and beverages, contact:

Richard W. Hartel
rwhartel@wisc.edu (mltheis@wisc.edu)
608-263-1965
A13 Babcock Hall
1605 Linden Dr, Madison, WI 53706

## PEOPLE

Nick Smith, Ecologist and Instructor
Victor Ujor, Assistant Professor, Food Science
Advisor: Richard W. Hartel

## WISCONSIN EXPERIENCE

The experiences offered through this certificate provide students with a number of opportunities to fulfill the Wisconsin Experience. In addition to 18 credits of rigorous course work with a focus on the science of fermentation, students work directly with local brewers, winemakers and bakers where they can explore innovations in product development, apply their knowledge and help local industries solve problems specific to their craft. Engagement allows for intellectual growth as well as an appreciation for the influence of local culture and values on what makes for "good" food and beverages.

Our industry and campus partners celebrate curiosity and exploration by allowing students to experiment with novel ingredients such as wild yeast, winter hardy grapes and local hops. Most exciting of all, students find that they can make a direct contribution to food and beverage products that are launched into the Wisconsin marketplace.

## FOREST AND WILDLIFE ECOLOGY

The Department of Forest and Wildlife Ecology provides sciencebased teaching that prepares future natural resource professionals to sustainably manage and conserve forests and wildlife. Building on the rich traditions of Aldo Leopold (the department's first chair), we offer students an interdisciplinary environment to learn about the natural world, apply science to management toward sustainable ecological systems, and understand complex human-environment relationships. We offer two undergraduate majors-Forest Science and Wildlife Ecology -that provide opportunities for employment in the public, private, and non-governmental sectors. Students can also gain a strong foundation
for graduate training in forestry, wildlife, ecology, and related fields. The Forest Science program is accredited by the Society of American Foresters. The Wildlife Ecology major provides a path to becoming a certified wildlife biologist. Both degrees provide a mix of field, lab, and classroom experiences.

The department also offers graduate programs at the M.S. and Ph.D. levels. See the Graduate Guide (http://guide.wisc.edu/graduate/) for additional information.

## FOREST SCIENCE, B.S.

Forests cover one-third of Earth and nearly half of Wisconsin. They provide diverse habitat, wood and fiber, clean water, carbon storage, recreation, beauty, and connections to many cultures. Forest managers and scientists work largely outdoors to conserve and manage forest resources and respond to disturbances from insects, diseases, wildfire, fragmentation,
deforestation, and other changes. They also use technology to map and inventory forests.

Students in forest science learn the skills needed for many career paths through a mix of classroom, laboratory, and field instruction. They make frequent visits to forests and engage in professional and student-led trainings and networking. Students have flexibility to customize their learning experience through a variety of different elective options.

The department offers excellent teaching, research, and computing facilities. Classes are sized to ensure that undergraduates receive individual attention. Each student has a faculty adviser, and many students gain experience assisting faculty with research projects.

Students go on to work as foresters, park rangers, conservation scientists, educators, researchers, environmental planners, arborists, and more. Graduates of the program also pursue graduate training in forestry, ecology, natural resource policy, or environmental law. Forest science has an excellent job placement track record.

## Learn through hands-on, real world experiences

Forest science students learn in many field and laboratory courses, putting their knowledge to work in outdoor, everyday circumstances. They also participate in a variety of opportunities beyond campus, including a threeweek introduction to forest ecosystems in northern Wisconsin and summer research opportunities. All forest science undergraduates are required to complete an internship, often with a federal, state, or local government agency, an environmental nonprofit organization, timber industry firm, or environmental consultant.

## Build community and networks

Students can join a competitive quiz bowl team and the Forestry Club (https://www.facebook.com/WUMadisonForestryClub/), UW-Madison's Student Chapter of the Society of American Foresters. The club organizes the annual holiday tree sale, and students can attend a national foresters conference and take part in trainings for prescribed burns, chainsaw use and tree identification. Forest science undergraduates also have opportunities to work with local schools to help kids understand the forests around them.

## Customize a path of study

Forest science students select from a large variety of classes to fit their career goals. Students can customize their learning experience and choose electives in focus areas such as forest conservation, forests and the environment, and forest management. In consultation with advisors, students will choose electives in alignment with their unique professional interests. The program meets accreditation standards of the Society of American Foresters, a key credential for many jobs.

## Make a strong start

Students can take introductory courses that focus on forest science and the department's curriculum. One course explores forests of the world, as well as threats to forests, their roles in climate change, and strategies to conserve and manage them.

## Gain global perspective

Forest science students are encouraged to complete study abroad experiences. Students can explore studying abroad as a Forest Science major utilizing the Forest Science Major Advising Page (https:// studyabroad.wisc.edu/academics/major-advising-pages-maps/forest-
science/). Students work with their advisor and the CALS study abroad office (https://cals.wisc.edu/academics/undergraduate-students/ studyabroad/) to identify appropriate programs. The department also offers an international course focused on the extinction of species.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly,
courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS <br> Code <br> Title <br> Credits

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.

Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46) 1
International Studies (p. 47) 3
Physical Science Fundamentals 4-5
CHEM 103 General Chemistry I
or CHEM 108 Chemistry in Our World
or CHEM 109 Advanced General Chemistry
Biological Science 5
Additional Science (Biological, Physical, or Natural) 3
Science Breadth (Biological, Physical, Natural, or Social) 3
CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major
Requirements") (p. 48)

## Total Credits

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

[^1]
## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take F\&W ECOL 681 and F\&W ECOL 682 when completing their thesis project; please see the Honors Program page (https://cals.wisc.edu/academics/undergraduate/ current-students/honors-program/) for more information.

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. |
| :--- | :--- |
|  | The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| Residency | Degree candidates are required to earn a minimum of <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
| Quality of | Away programs. |
| WorkUndergraduate students must maintain the minimum grade <br> point average specified by the school, college, or academic <br> program to remain in good academic standing. Students <br> whose academic performance drops below these minimum |  |
|  | whresholds will be placed on academic probation. |
| thren |  |

## LEARNING OUTCOMES

1. (Ecology) Understanding of taxonomy and ability to identify forest and other tree species, their distribution, and associated vegetation and wildlife.
2. (Ecology) Understanding of soil properties and processes, hydrology, water quality, and watershed functions.
3. (Ecology) Understanding of ecological concepts and principles including the structure and function of ecosystems, plant and animal communities, competition, diversity, population dynamics, succession, disturbance, and nutrient cycling.
4. (Ecology) Ability to make ecosystem, forest, and stand assessments.
5. (Ecology) Understanding of tree physiology and the effects of climate, fire, pollutants, moisture, nutrients, genetics, insects and diseases on tree and forest health and productivity.
6. (Forest Resources Measurement and Management) Ability to identify and measure land areas and conduct spatial analysis.
7. (Forest Resources Measurement and Management) Ability to design and implement comprehensive inventories that meet specific objectives using appropriate sampling methods and units of measurement.
8. (Forest Resources Measurement and Management) Ability to analyze inventory data and project future forest, stand, and tree conditions.
9. (Forest Resources Measurement and Management) Ability to develop and apply silvicultural prescriptions appropriate to management objectives, including methods of establishing and influencing the composition, growth, and quality of forests, and understand the impacts of those prescriptions.
10. (Forest Resources Measurement and Management) Ability to analyze the economic, environmental, and social consequences of forest resource management strategies and decisions.
11. (Forest Resources Measurement and Management) Ability to develop management plans with specific multiple objectives and constraints.
12. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market forces, processing systems, transportation and harvesting activities that translate human demands for timber-based and other consumable forest products into the availability of those products.
13. (Forest Resources Measurement and Management) Understanding of the valuation procedures, market, and non-market forces that avail humans the opportunities to enjoy non-consumptive products and services of forests.
14. (Forest Resources Measurement and Management) Understanding of the administration, ownership, and organization of forest management enterprises.
15. (Forest Resource Policy, Economics, and Administration) Understanding of forest policy and the processes by which it is developed.
16. (Forest Resource Policy, Economics, and Administration) Understanding of how federal, state, and local laws and regulations govern the practice of forestry.
17. (Forest Resource Policy, Economics, and Administration) Ability to understand the integration of technical, financial, human resources, and legal aspects of public and private enterprises.

## FOUR-YEAR PLAN

## FOUR-YEAR PLAN

The four-year plan is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search \& Enroll to determine your program of study. Your program of study will likely look different from this sample four-year plan. Consult with your advisor to
determine the best path for you. Courses may not be offered every year, so plan ahead with your advisor.

## SAMPLE FOREST SCIENCE FOUR-YEAR PLAN

| First Year |  |  |

## Fourth Year

$\left.\begin{array}{lcc}\text { Fall } & \text { Creditspring } & \text { Credits } \\ \text { F\&W ECOL 390 } & \text { 1F\&W ECOL/ } & 4 \\ & \text { AA E/ } \\ & \text { ENVIR ST 652 }\end{array}\right]$

| Humanities | 3 |  |
| :--- | ---: | ---: |
| Electives | 5 | $\mathbf{1 5}$ |
|  | $\mathbf{1 6}$ |  |

Total Credits 119-122

Students must complete at least 120 total credits to be eligible for graduation.

1
MATH course dependent on placement score and transfer credit evaluation.

2
BIOLOGY/BOTANY 130, BIOLOGY/ZOOLOGY 101 \& BIOLOGY/ ZOOLOGY 102 are strongly recommended to satisfy the introductory biology requirement for forest science, but students may use BIOLOGY/ BOTANY/ZOOLOGY 151 \& BIOLOGY/BOTANY/ZOOLOGY 152.

Students should plan ahead for this course with their advisor, as it may not be offered every year.

ADVISING AND CAREERS

## ADVISING

Students are assigned an academic advisor as well as a faculty advisor. Faculty members lead undergraduate research, advise students on career planning, and help students with critical thinking. Professional academic advisors help students plan their coursework, identify internship opportunities, as well as ways to get involved in department and campus activities.

## Career Opportunities

Undergraduates in forest science prepare for a variety of career opportunities. They can work as foresters, arborists, park rangers, conservation scientists, environmental educators, geospatial analysts, researchers, and more. They also pursue graduate training in forestry, ecology, natural resource policy, or environmental law. Graduates of the program work for many organizations including the U.S. Forest Service, the Wisconsin Department of Natural Resources, the Society of American Foresters, the Aldo Leopold Foundation, environmental consultants, and private corporations.

## PEOPLE

## INSTRUCTORS AND TEACHING FACULTY

Berkelman, James
Nack, Jamie
Meindl, George

## ADVISOR

Hochmuth, Allee
For faculty and staff profiles, visit https://
forestandwildlifeecology.wisc.edu/people/faculty-and-staff/

## WISCONSIN EXPERIENCE

## INTERNSHIPS

All forest science undergraduates are required to complete an internship. Students find positions outdoors, as well as laboratory and analytical positions. See the Internship \& Job Resources (https:// forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/ internship-job-resources/) page for more information.

## RESEARCH EXPERIENCE

Forest science undergraduates can undertake independent research by joining a professor's field- or lab- based research activities. In their research experiences, students gain skills in a variety of forest science areas including forest structure and function, forest policy, human dimensions of forest management, forest economics, and plant species identification.

## STUDENT ORGANIZATIONS

Students can join the Forestry Club, UW-Madison's Student Chapter of the Society of American Foresters. The club organizes the annual holiday tree sale, and students can attend a national foresters conference and take part in trainings for prescribed burns, chainsaw use and tree identification.

## COMPETITIVE TEAMS

Students can join a quiz bowl team that competes at the national Society of American Foresters annual conference.

## GLOBAL ENGAGEMENT

Forest science students are encouraged to complete a study abroad experience. The department also offers an international course focused on the extinction of species that meets the CALS International Studies requirement. Students can find more information on the CALS study abroad advising page (https://cals.wisc.edu/academics/undergraduate-students/international-programs/study-abroad-advising/).

Students involved in the Forestry Club volunteer at a number of activities including the annual holiday tree sale. Forest science undergraduates also have opportunities to work with local schools to help kids understand the forests around them.

On campus, the Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

There are five scholarships available to forest science students and fellowships are available for students to conduct research with professors. Students across the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships here (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

UW-Madison offers a special practicum course for majors known as "Forestry Camp." The Forest Resources Practicum is an intensive, threeweek field course at the Kemp Natural Resources Station (https:// kemp.wisc.edu/) in Woodruff, Wisconsin. Students learn firsthand about forest ecosystem structure, function, processes, and services. Subject areas include basic field skills, plant identification, GPS, forest soils, wildlife survey methods, and forest ecology. Students at Forestry Camp work closely with faculty and natural resource professionals.

## ACCREDITATION

## Accreditation

Society of American Foresters (https://www.eforester.org/)
Accreditation status: Accredited. Next accreditation review: 2027.

## WILDLIFE ECOLOGY, B.S.

Students in the wildlife ecology program learn about species ecology habitat management, monitoring techniques, and conservation through courses that are based in the natural sciences. Wildlife ecologists study wild animals and their interactions with people. Working largely outdoors, they manage and conserve wildlife populations and their habitats, aiming to meet the complex needs of wildlife in a human-dominated world.

The Department of Wildlife Ecology was the first wildlife program in an American university. Students learn through a mix of classroom, laboratory, and field instruction. They have flexibility to customize their learning experience within one of two tracks: natural sciences and natural resources. Students can work toward substantively completing requirements for being recognized as an Associate Wildlife Biologist by The Wildlife Society (https://wildlife.org/learn/professional-development-certification/certification-programs/), a professional organization, if they choose to.

Wildlife ecology graduates work in public resource management agencies, educational institutions, private industry, and non-governmental organizations such as the National Wildlife Federation and The Nature Conservancy. Students in the wildlife ecology major are also well prepared to pursue advanced degrees in wildlife and related fields or veterinary medicine.

## Learn through hands-on, real world experiences

Wildlife ecology students learn in many field and lab courses, including classes that focus on wildlife management, reptiles, amphibians, birds, and mammals. They can also take part in a summer field course in northern Wisconsin, numerous internships, and research opportunities.

## Build community and networks

Students can join the Student Chapter of the Wildlife Society and the Audubon Society, UW-Madison. Members of the Wildlife Society work with elementary school students, volunteer for numerous projects, and send a competitive team to the Quiz Bowl at the Wildlife Society annual meeting.

## Customize a path of study

Students learn through a mix of classroom, laboratory, and field instruction. They have flexibility to customize their learning experience by selecting from a variety of courses in consultation with their advisor. Courses include options in the natural sciences, as well as coursework that meets educational requirements for certification as a wildlife biologist by The Wildlife Society.

## Make a strong start

Students can take an introductory course that gives students an orientation to wildlife ecology and introduces them to the major and professions within the field of wildlife management and conservation.

## Gain global perspective

Wildlife ecology students are encouraged to participate in a study abroad experience. The program also offers an international class focused on the extinction of species (meeting the CALS International Studies Requirement), as well as a study abroad experience in Mexico. Students can explore studying abroad as a Wildlife Ecology major utilizing the Wildlife Ecology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code Title Credits

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Define and explain basic principles in biological sciences and major concepts in wildlife ecology including, population ecology, organismal biology, plant ecology/taxonomy, and genetics/evolution.
2. Explain and discuss principles of wildlife management including natural resource legislation, policy, and applications.
3. Explain and apply the scientific methods including designing and conducting experiments and testing hypotheses.
4. Explain and demonstrate techniques for collection of data in laboratory and field settings, keep accurate records, and analyze data to address hypotheses.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form. Provide opportunity to develop these communication skills.

## FOUR-YEAR PLAN

## FOUR-YEAR PLAN

The four-year plan is a tool to assist you and your advisor in planning your academic career. Use it along with your DARS report and Course Search \& Enroll to determine your program of study. Your program of study will likely look different from this sample four-year plan. Consult with your advisor to determine the best path for you.

## SAMPLE WILDLIFE ECOLOGY FOUR-YEAR PLAN

First Year
Fall
F\&W ECOL 101 (Counts
for CALS First Year
Seminar)

| F\&W ECOL 318 | 3 MATH 113 |  |
| :--- | :--- | :--- |
|  |  |  |
| MATH $112^{1}$ | 3 Humanities | 3 |
|  |  |  |

| Communication Part A | 3 CHEM 103 | 4 |
| :--- | :--- | ---: |
| Humanities | 3 Elective | 2 |
|  | $\mathbf{1 3}$ | $\mathbf{1 5}$ |

Second Year

| Fall | Credits Spring | Credits |
| :---: | :---: | :---: |
| F\&W ECOL 561 | 3 ZOOLOGY/BIOLOGY/ BOTANY $152^{2}$ | 5 |
| ZOOLOGY/BIOLOGY/ BOTANY $151^{2}$ | 5 BOTANY 401 | 4 |
| Social Science | 3 STAT 301 or 371 | 3 |
| Electives | 5 Ethnic Studies | 3 |
|  | 16 | 15 |
| Third Year |  |  |
| Fall | Credits Spring | Credits |
| CALS International Study Requirement | 3 F\&W ECOL 306 | 4 |
| Evolution/Genetics Requirement | ```3 F&W ECOL/AN SCI/ ZOOLOGY 520 & F&W ECOL/AN SCI/ ZOOLOGY 521``` | 6 |
| Major Electives | 6 Electives | 6 |
| Elective | 4 |  |
|  | 16 | 16 |

## Fourth Year

| Fall | Credits | Spring |
| :--- | :---: | ---: |
| Major Electives | 6 F\&W ECOL 655 | Credits |
| Electives | 6 Major Elective | 3 |
| F\&W ECOL 577 or 599 | 3 Electives | 3 |
|  | $\mathbf{1 5}$ | 9 |

## Total Credits 121

1
MATH course dependent on placement score and transfer credit evaluation.

## 2

BIOLOGY/BOTANY/ZOOLOGY 151 \& BIOLOGY/BOTANY/ZOOLOGY 152 are recommended but students may complete BIOLOGY/ZOOLOGY 101, BIOLOGY/ZOOLOGY 102, \& BIOLOGY/BOTANY 130 to satisfy the introductory biology requirement.

## ADVISING AND CAREERS

## ADVISING

Students are assigned an academic advisor and a faculty advisor in the department. Professional academic advisors help students plan their coursework and identify opportunities to get involved in department and campus activities. Faculty advise students on career planning and challenge students to think critically.

## CAREER OPPORTUNITIES

Undergraduates in wildlife ecology prepare for a variety of careers. They can become wildlife biologists, habitat restoration technicians, attorneys, wildlife enforcement officers, researchers, and more. Students are also well prepared to pursue advanced degrees in wildlife and related fields, including veterinary medicine. Graduates of the program work for many

## organizations, such as state departments of natural resources, the U.S. Fish and Wildlife Service, the Chicago Zoological Society, and The Nature Conservancy.

## WISCONSIN EXPERIENCE

## Internships

Many wildlife ecology students include internships and professional work experiences in their studies. Students are encouraged to talk to their advisor about internship possibilities. See the Internship \& Job Resources (https://forestandwildlifeecology.wisc.edu/academics/undergraduate-programs/internship-job-resources/) page for more information.

## Research experience

Wildlife ecology undergraduates are encouraged to get involved in fieldor lab-based research with a professor. In their research experiences, students gain skills in a variety of areas including measuring habitats, reviewing literature, identifying species, deploying wildlife cameras, and more.

## Student organizations

Students can join the Student Chapter of the Wildlife Society and the Audubon Society, UW-Madison. Members of the Wildlife Society can work with elementary school students and volunteer for numerous projects.

## Competitive teams

Wildlife ecology undergraduates can join a team that competes at the Quiz Bowl at the Wildlife Society annual meeting.

## Global engagement

Wildlife ecology students are encouraged to participate in a study abroad experience. The program offers an experience in Mexico focused on wildlife ecology, as well as an international course focused on the extinction of species that meets the CALS International Studies requirement. Students can find more information about study abroad on the CALS study abroad advising page (https://cals.wisc.edu/academics/ undergraduate-students/international-programs/study-abroadadvising/).

## Community engagement and volunteering

The Student Chapter of the Wildlife Society organizes several volunteer activities, including spring and summer frog surveys, summer fawn searches, and roadside clean-up. Students also have opportunities to work with elementary school students and give presentations about wildlife.

On campus, the Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

Department scholarships are available to wildlife ecology students and fellowships are available to support research work with a professor. Students across the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships here (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

## GENETICS

This program explores how genetic material shapes life - from the cellular level to the population level - and prepares students to solve some of society's most pressing challenges in the fields of medicine, biotechnology, biomedical research, and agriculture. Genetics and genomics are at the heart of many important issues of the day, including genetic testing, genetic therapies, genome sequencing, evolution, and the genetic engineering of humans, plants, and animals.

Students who major in genetics and genomics take courses in biology, chemistry, physics, statistics, and introductory genetics, and then delve into specialized genetics topics focused on humans, plants, populations, cancer, biological development, neurology, and epigenetics. They gain laboratory research experiences by taking laboratory courses and conducting independent research projects in faculty labs.

The genetics and genomics major provides a solid foundation for careers in medicine, public health, research, life sciences, agriculture, biotechnology, education, law, and science communication - in the private, public, and non-profit sectors. Many students choose to pursue graduate and professional studies, including research-focused PhD
programs, medical school, veterinary school, and law school. Alumni go on to be physicians, medical directors, genetic counselors, epidemiologists, research scientists, data analysts, plant breeders, veterinarians, professors, teachers, attorneys, and science writers.

## Learn through hands-on, real-world experiences

All genetics and genomics majors participate in hands-on research, which equips them with real-world skills valued by graduate and professional schools and employers. In addition to laboratory coursework, students have numerous opportunities to conduct independent research in faculty labs, where they receive mentoring from faculty, staff, and graduate students.

## Build community and networks

Students get to know faculty and instructors through small classes; and they can grow their networks by getting involved in student organizations or participating in undergraduate research experiences mentored by faculty. The Undergraduate Genetics Association (https://win.wisc.edu/ organization/UGA/), a club for students interested in genetics and genomics, provides professional development, volunteer, and social opportunities for members. The Pre-Genetic Counseling Organization (https://win.wisc.edu/organization/pregeneticcounseling/), a club for students interested in genetic counseling, specializes in bringing counseling opportunities and information to undergraduates. Students can also participate in the Genetics and Genomics Peer Mentorship Program, which connects incoming students with those further along in their college careers.

## Make a strong start

A course for first-year students introduces new majors to faculty researchers and fellow classmates, and makes campus connections. It also prepares them to work in research labs, teaches study skills needed to succeed in college, and provides peer networking opportunities.

## Customize a path of study

Students have many options to pursue coursework that meets their career goals. They also may pursue Honors in Research, an option that includes conducting hands-on research in campus labs.

## Gain global perspective

Majors can choose from a variety of study abroad programs including short-term field experiences, summer research opportunities and semester-long exchange programs at top universities around the world. A study abroad program in Costa Rica specifically tailored for genetics and genomics majors is typically offered each spring and is led by genetics program faculty from UW-Madison. Students can explore studying abroad as a Genetics and Genomics major by utilizing the Genetics and Genomics Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## GENETICS AND GENOMICS, B.S.

This program explores how genetic material shapes life - from the cellular level to the population level - and prepares students to solve some of society's most pressing challenges in the fields of medicine, biotechnology, biomedical research, and agriculture. Genetics and genomics are at the heart of many important issues of the day, including genetic testing, genetic therapies, genome sequencing, evolution, and the genetic engineering of humans, plants, and animals.

Students who major in genetics and genomics take courses in biology, chemistry, physics, statistics, and introductory genetics, and then delve into specialized genetics topics focused on humans, plants, populations, cancer, biological development, neurology, and epigenetics. They gain laboratory research experiences by taking laboratory courses and conducting independent research projects in faculty labs.

The genetics and genomics major provides a solid foundation for careers in medicine, public health, research, life sciences, agriculture, biotechnology, education, law, and science communication - in the private, public, and non-profit sectors. Many students choose to pursue graduate and professional studies, including research-focused PhD programs, medical school, veterinary school, and law school. Alumni go on to be physicians, medical directors, genetic counselors, epidemiologists, research scientists, data analysts, plant breeders, veterinarians, professors, teachers, attorneys, and science writers.

## Learn through hands-on, real-world experiences

All genetics and genomics majors participate in hands-on research, which equips them with real-world skills valued by graduate and professional schools and employers. In addition to laboratory coursework, students have numerous opportunities to conduct independent research in faculty labs, where they receive mentoring from faculty, staff, and graduate students.

Build community and networks

Students get to know faculty and instructors through small classes, and they can grow their networks by getting involved in student organizations or participating in undergraduate research experiences mentored by faculty. The Undergraduate Genetics Association (https://win.wisc.edu/ organization/UGA/), a club for students interested in genetics and genomics, provides professional development, volunteer, and social opportunities for members. The Pre-Genetic Counseling Organization (https://win.wisc.edu/organization/pregeneticcounseling/), a club for students interested in genetic counseling, specializes in bringing counseling opportunities and information to undergraduates. Students can also participate in the Genetics and Genomics Peer Mentorship Program, which connects incoming students with those further along in their college careers.

## Make a strong start

A course for first-year students introduces new majors to faculty researchers and fellow classmates, and makes campus connections. It also prepares them to work in research labs, teaches study skills needed to succeed in college, and provides peer networking opportunities.

## Customize a path of study

Students have many options to pursue coursework that meets their career goals. They also may pursue Honors in Research, an option that includes conducting hands-on research in campus labs.

## Gain global perspective

Majors can choose from a variety of study abroad programs including short-term field experiences, summer research opportunities and semester-long exchange programs at top universities around the world. A study abroad program in Costa Rica specifically tailored for genetics and genomics majors is typically offered each spring and is led by genetics program faculty from UW-Madison. Students can explore studying abroad as a Genetics and Genomics major by utilizing the Genetics and Genomics Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code Title Credits

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46) 1
International Studies (p. 47) 3
Physical Science Fundamentals 4-5

| $\begin{aligned} & \text { BIOCHEM } 501 \\ & \text { or BIOCHEM } 507 \end{aligned}$ | Introduction to Biochemistry ${ }^{2}$ General Biochemistry I | 3 |
| Complete one of the following options: |  | 6 |
| Option 1: |  |  |
| GENETICS 467 \& GENETICS 468 | General Genetics 1 and General Genetics 2 (preferred) |  |
| Option 2: |  |  |
| GENETICS 466 | Principles of Genetics (consult advisor ( 467 \& 468 preferred)) |  |
| additional 3 credit Genetics depth course (see course list below) ${ }^{3}$ |  |  |
| Select 2 credits from the following: |  | 2 |
| GENETICS 545 | Genetics Laboratory |  |
| GENETICS 299 | Independent Study ${ }^{4}$ |  |
| GENETICS 699 | Special Problems ${ }^{4}$ |  |
| GENETICS 681 | Senior Honors Thesis |  |
| GENETICS 682 | Senior Honors Thesis |  |
| GENETICS 399 | Coordinative Internship/ Cooperative Education |  |
| Genetics Depth |  | 9 |
| See course list below |  |  |
| Genetics Breadth |  | 6 |
| See course list below |  |  |
| Capstone |  |  |
| Select one of the following: |  | 3-9 |
| Option 1: |  |  |
| GENETICS/ BIOLOGY 522 | Communicating Evolutionary Biology (Three-credit version only) ${ }^{5}$ |  |
| Option 2: |  |  |
| GENETICS 527 | Developmental Genetics for Conservation and Regeneration (offered in fall semester) ${ }^{5}$ |  |
| Option 3: |  |  |
| GENETICS 566 | Advanced Genetics (offered in spring semester) |  |
| Option 4: |  |  |
| GENETICS 564 | Genomics and Proteomics (offered in spring semester) ${ }^{5}$ |  |
| Option 5 (must be taken concurrently): |  |  |
| GENETICS 699 | Special Problems (offered in fall semester) |  |
| GENETICS 567 | Companion Research Seminar (offered in fall semester) |  |
| Option 6 (must be taken concurrently): |  |  |
| GENETICS 681 | Senior Honors Thesis |  |
| GENETICS 682 | Senior Honors Thesis |  |

GENETICS 567 Companion Research Seminar (offered in fall semester)

## Total Credits

65-83
1
If CHEM 343 is taken, it must be taken as a part of CHEM 343 \& CHEM 345, the latter of which counts as a Genetics Breadth requirement. 2

If BIOCHEM 507 is taken, it must be taken as a part of BIOCHEM 507 \& BIOCHEM 508, the latter of which counts as a Genetics Breadth requirement.

3
Additional Depth course will not count toward the 9-credit Genetics Depth requirement.

4
Consult with your advisor if genetics-related research will be performed in a department other than Genetics.

May count for Genetics Depth or Capstone, but not both.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Analyze the transmission of genes and chromosomes between cells during cell division and within pedigrees over generations.
2. Demonstrate a deep understanding of how information encoded in DNA can be mutated, epigenetically modified, transcribed into RNA, and translated for protein production, enabling this information to orchestrate the activities of cells singly or collectively throughout development in multicellular organisms.
3. Predict the impact of the forces of mutation, natural selection, chance, and genetic recombination on the amount of genetic variation in populations at the DNA and phenotypic levels using quantitative models.
4. Formulate research questions about the genetic control of biological processes and design experiments to answer these questions using appropriate genetic tools including model organisms.
5. Demonstrate team-work, interpersonal and problem-solving skills to address societal, ethical and scientific issues related to genetics, and communicate their findings through written, oral and multi-media reports.

## FOUR-YEAR PLAN <br> FOUR-YEAR PLAN <br> SAMPLE GENETICS AND GENOMICS FOUR YEAR PLAN

| First Year |  |  |  |
| :---: | :---: | :---: | :---: |
| Fall | Credits | Spring | Credits |
| CHEM 103 or 109 | 4-5 CHEM 104 |  | 5 |

| :--- | :--- |

## Fourth Year

| Fall | Credits Spring | Credits |
| :---: | :---: | :---: |
| Genetics Depth/Breadth | 6 Genetics Depth/Breadth | 3 |
| Elective (research or thesis recommended) ${ }^{3}$ | 2-3 Elective (research or thesis recommended) ${ }^{3}$ | 2-3 |
| Humanities | 3 Genetics Capstone | 3 |
| Electives | 6 Electives | 6 |
| 17-18 |  | 14-15 |

Total Credits 115-123

Students must complete at least 120 total credits to be eligible for graduation

1
Instead of ZOOLOGY/BIOLOGY/BOTANY 151 and ZOOLOGY/
BIOLOGY/BOTANY 152, students can take either BOTANY/
BIOLOGY 130, ZOOLOGY/BIOLOGY 101 \& ZOOLOGY/BIOLOGY 102, or BIOCORE 381, BIOCORE 383 \& two labs (BIOCORE 382, BIOCORE 384, or BIOCORE 486).

2
Physics could be taken in Second Year (consult your advisor).

If in CALS Honors in Research.
Notes

- First-year students are recommended to take GENETICS 155 to fulfill the CALS first year seminar requirement.
- Study Abroad is an enriching experience. Check with your advisor on how you can fulfill your curriculum and study abroad.

## ADVISING AND CAREERS

## Advising

Each student is assigned a professional academic advisor who works to understand student goals and helps to craft a path that best suits their needs. Additionally, students receive professional and scientific mentorship through interactions with faculty, staff, and graduate students.

## Career opportunities

Alumni go on to a wide variety of careers in medicine, public health, research, life sciences, biotechnology, education, law, and science communication - in the private, public, and non-profit sectors. They hold professional positions as physicians, medical directors, genetic counselors, epidemiologists, research scientists, data analysts, plant breeders, veterinarians, professors, teachers, attorneys, and science writers.

## PEOPLE

## PROFESSORS

Pelegri, Francisco (chair); Brunkard, Jake; Chang, Qiang; DrummondBarbosa, Daniela; Gasch, Audrey; Hittinger, Chris; Ikeda, Aki; Masson, Patrick; Payseur, Bret; Perna, Nicole; Pool, John; Prolla, Tom; Richardson, Claire; Schroedi, Steven; Schwartz, David; Sharp, Nathaniel; Skop, Ahna; Wassarman, David; Werling, Donna; Yin, Jerry; Zhong, Xuehua

## TEACHING FACULTY

Loewen, Carin; Tilmann, Kit; Vermillion Kalmon, Katie; Zumwalde, Nicholas

## ADVISORS

Loewen, Carin; Rude, Cullen; Tilmann, Kit; Vermillion Kalmon, Katie; Zumwalde, Nicholas

## GRADUATE PROGRAM MANAGER

Reck, Martha

## WISCONSIN EXPERIENCE

## Research experience

Many genetics and genomics majors conduct research in a faculty-led research lab where they receive direct mentorship from faculty, staff, and graduate students. With hundreds of faculty members on campus using genetic strategies in their labs, students have many research options.

## Student organizations

The Undergraduate Genetics Association (https://win.wisc.edu/ organization/UGA/), a club for all students interested in genetics and genomics, brings in guest speakers to discuss their research and career paths; provides guidance on finding campus research and internship opportunities; holds informational sessions on jobs and careers; and hosts networking, volunteer, and social events. The Pre-Genetic Counseling Organization (https://win.wisc.edu/organization/pregeneticcounseling/), for students interested in genetic counseling, hosts talks by genetic counselors, clinicians, and ethicists; informs students of advocacy opportunities; provides training in practical counseling skills; and offers networking, volunteer, outreach, and social events.

## Global engagement

Genetics and genomics majors participate in study abroad programs in countries around the world, including in China, Costa Rica, England, Germany, Mexico, New Zealand, and Uganda. Students can find more information on the CALS study abroad advising page (https:// cals.wisc.edu/academics/undergraduate-students/studyabroad/study-abroad-advising/).

## Community engagement and volunteering

Students have opportunities to engage in volunteer activities through the Undergraduate Genetics Association, including participating in campus' annual Darwin Day (https://evolution.wisc.edu/darwin-day/) science outreach event. The Pre-Genetic Counseling Organization also offers outreach opportunities.

## Internships

Majors are encouraged to participate in internships. With a large biotech industry presence in the Madison area, there are many opportunities for students to participate in genetically-relevant internship experiences. Students can use these internship opportunities to complete the research requirement for the genetics and genomics major.

## A rich history or genetics

Established in 1910, the UW-Madison Department of Genetics is among the oldest genetics departments in the nation and is highly regarded for its research contributions in diverse areas of the field. Many of the greatest discoveries in genetics and genomics took place at UW-Madison, including cracking the genetic code, sequencing one of the first bacterial genomes, synthesizing the first gene, and developing targeted gene knockout methods in mice.

## RESOURCES AND SCHOLARSHIPS

## Scholarships

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships (https://cals.wisc.edu/academics/undergraduate-students/ financing-your-education/cals-scholarships/).

The genetics department offers a Genetics and Genomics Excellence in Research Award of up to \$6,000 to support undergraduate research in genetics- and genomics-related areas. There are also scholarships available for students who participate in certain genetics-focused study abroad programs.

The Center for Pre-Health Advising (https://prehealth.wisc.edu/) provides information about health careers including pre-med, pre-nursing, pre-vet, and pre-physical therapy, and offers course suggestions.

## HORTICULTURE

The Department of Horticulture at the University of Wisconsin-Madison is one of the four original departments of the College of Agricultural and Life Sciences and was founded in 1889. The department provides programs that are focused on fundamental studies of plant biology, crop production, and utilization of horticultural crops. It also seeks to provide educational opportunities for the pursuit of careers in horticulture, strengthen the competitive position of Wisconsin's horticulture industry, and increase the use of plants for environmental improvement and as a source of personal enrichment. The work of department faculty, staff, and students has made substantial impacts in the state and nation for over 125 years and continues to do so.

The department prides itself on cutting-edge research focusing on horticultural plants, solving problems for our horticultural industry partners and farmers, helping students gain key experiences in research and outreach during their degree programs, and serving both the State of Wisconsin and the broader scientific community through the generation of new knowledge, techniques, and discoveries that can benefit society.

The department maintains a vibrant undergraduate major. Innovative ideas have been generated from among our undergraduates, including the Campus Food Shed, a program to redistribute unused produce from nearby farms to the campus community free of charge. Instruction is offered in all of the primary areas of horticulture and additional coursework is available in a number of subjects including molecular biology and bioinformatics. Approximately $\$ 25,000$ in scholarship funds are available annually to undergraduate students in the department each year. The department's graduate program offers both M.S. and Ph.D. degrees in a variety of specialties. Many graduate students advised by horticulture faculty also pursue graduate degrees in programs such as plant breeding and plant genetics, cell and molecular biology, and agroecology. The department has also recently created a new M.S. program that has an emphasis in organic and sustainable production. The department offers some unique international opportunities in Costa Rica and other Central American countries that focus on tropical horticulture.

The Department of Horticulture is home to a number of successful outreach programs that serve the citizens, public sector, and businesses of the State of Wisconsin. These include the Nutrient and Pest Management Program, the Integrated Pest and Crop Management Program, the Crop Diagnostic Training program, the IR-4 program, the Master Gardener Program, and the Allen Centennial Gardens. In addition to these activities, faculty and staff are active in field days, Extension programs, courses, seminars, and webinars, and author newsletters and other media that are distributed statewide.

## RESOURCES AND SCHOLARSHIPS

## SCHOLARSHIPS

The Department of Horticulture offers several departmental scholarships (https://horticulture.wisc.edu/academics/undergraduate-program/ scholarships-and-awards/) that students can apply for through the CALS Scholarship Application (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/). The application opens at the beginning of November and remains open until the beginning of February each academic year. Students only need to fill out one single application to be considered for all CALS scholarships.

## FACILITIES

Several important supporting facilities are associated with the Department of Horticulture, including:

- Allen Centennial Garden (https://allencentennialgarden.org/)
- D.C. Smith Greenhouse (http:// dcsmithgreenhouse.cals.wisc.edu/)
- Arlington Horticulture Farms (http://arlington.ars.wisc.edu/)
- U.S. Potato Genebank (https://www.ars-grin.gov/nr6/)
- O.J. Noer Turfgrass Center (http://ojnoer.ars.wisc.edu/)
- Longenecker Gardens (https://arboretum.wisc.edu/)

## HORTICULTURE, B.S.

Horticulturists work to enrich our lives by integrating and applying plant science, environmental science, molecular biology, biotechnology, genetics, physiology, and management. Specifically, horticultural science deals with the development, production, growth, distribution, and use of fruits, vegetables, greenhouse crops, ornamentals, and specialty plant crops (used for flavoring and medicine). Horticultural science is one of the most diverse biological sciences one can study at a university. Not only are the biology and genetics of crop plants interesting, but the application of this knowledge is equally important in a myriad of situations. Undergraduate horticulture majors will obtain specialized training in greenhouse/field management and the production and use of fruits, vegetables, nuts, and herbaceous/woody ornamentals through the bachelor of science degree program.

In addition to obtaining a job with an undergraduate degree in horticulture, the major provides an excellent background for graduate study in the field of plant sciences. Areas of graduate study include plant breeding and plant genetics, horticulture, agronomy, plant pathology, or other related fields such as biology, environmental science, natural resource management, agroecology, and genetics.

Students with either undergraduate or graduate degrees in horticulture have a variety of career opportunities. Recent studies show that there are more jobs in agriculture in the US than there are students graduating with agricultural bachelor of science degrees to fill them. As our world grapples with the need to contribute science-based solutions to feeding 9 billion people by 2050, students trained in the agricultural and horticultural sciences will be called on to contribute.

Horticulture graduates may find opportunities to develop higher yielding crops or crops that can withstand more stressful growing conditions. Others may find opportunities working on improving qualities such as flavor, appearance, texture, and postharvest shelf life for a wide range of horticultural commodities from fruits to vegetables to flowers. Sustainable production is an area of growth where horticultural expertise can make a contribution.

The horticulture degree serves as excellent preparation for careers in food production, plant nurseries, community-supported agriculture (CSA), public gardens, greenhouse production, teaching, public parks, vegetable production, urban agriculture, extension- and communitybased educational work, work in research labs, and the health sciences. In addition, many horticultural science majors go on to work in public sector jobs including city and state positions with the Department of Natural Resources, the Wisconsin Department of Agriculture, and the University of Wisconsin Division of Extension. Students with degrees in horticulture also work in hospitals (horticultural therapy), aerospace (food and recycling in space labs), and zoos (managing environments for animals and visitors). Although the career opportunities are numerous, horticulture students have a common desire to work intensively with plants to improve our environment and our health.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

## MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program

Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take HORT 289 Honors Independent Study, HORT 681 Senior Honors Thesis and HORT 682 Senior Honors Thesis when completing their thesis project; please see the Honors Program page (https://cals.wisc.edu/academics/ undergraduate/current-students/honors-program/) for more information. The Department of Horticulture also works collaboratively to strongly support students through the Honors in Research program.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Acquire, integrate and apply knowledge of plant science to horticultural systems.
2. Demonstrate interdisciplinary knowledge and competency in managing horticultural systems.
3. Synthesize knowledge and use insight and creativity to better understand and improve horticultural systems.
4. Appreciate and communicate the diverse impacts of horticulture on people.
5. Demonstrate professionalism and proficiency in skills that relate to horticulture

1
BIOLOGY/BOTANY 130, BIOLOGY/ZOOLOGY 101, and BIOLOGY/ ZOOLOGY 102 is the preferred biology track.
2
Please consult with a Horticulture advisor to discuss when specific courses are typically offered.

## 3

Students can choose to complete the CALS International Studies requirement using HORT 370 or HORT/AGRONOMY 376 \& HORT 378, which also fulfill Horticulture major requirements.

SAMPLE HORTICULTURE FOUR-YEAR PLAN (WITH CHEM 103 IN THE FIRST SEMESTER)

## First Year

| Fall | Credits | Spring | Credits |
| :---: | :---: | :---: | :---: |
| HORT 120 |  | 3 CHEM 104 | 5 |
| HORT 121 |  | 1 BIOLOGY/BOTANY 130¹ | 5 |
| CHEM 103 |  | 4 MATH 113 | 3 |
| MATH 112 |  | 3 Ethnic Studies | 3 |
| COMM A Course |  | 3 |  |
| CALS First Year Seminar |  | 1 |  |

## Second Year

Fall Credits Spring Credits

| HORT 320 | 3 HORT 227 | 3 |
| :--- | :--- | ---: |
| BIOLOGY/ | 5 HORT 334 | 3 |
| ZOOLOGY 101 | \& HORT 335 |  |
| \& BIOLOGY/ |  |  |
| ZOOLOGY 102 | 3 Horticulture Breadth | 6 |
| Horticulture Breadth | 3 Humanities | $3-4$ |
| COMM B Course | $\mathbf{1 4}$ | $\mathbf{1 5 - 1 6}$ |

Third Year

| :---: | :---: | :---: |
| Agricultural Breadth ${ }^{2}$ | 6 Agricultural Breadth ${ }^{2}$ | 6 |
| Horticulture Breadth | 3 Math / Statistics / Computer Science | 3 |
| CALS International Studies ${ }^{3}$ | 3 Humanities | 3-4 |
| Electives | 3-4 Elective | 3 |
|  | 15-16 | 15-16 |
| Fourth Year |  |  |
| Fall | Credits Spring | Credits |
| Agricultural Breadth ${ }^{2}$ | 3 Agricultural Breadth ${ }^{2}$ | 3-4 |
| Social Sciences | 3 Electives | 9 |
| Horticulture Capstone | 3 |  |
| Electives | 6-7 |  |
|  | 15-16 | 12-13 |

Total Credits 117-122

Students must complete at least 120 total credits to be eligible for graduation.

Students must complete at least 120 total credits to be eligible for graduation.

1
BIOLOGY/BOTANY 130, BIOLOGY/ZOOLOGY 101, and BIOLOGY/ ZOOLOGY 102 is the preferred biology track.
2
Please consult with a Horticulture advisor to discuss when specific courses are typically offered.
3
Students can choose to complete the CALS International Studies requirement using HORT 370 or HORT/AGRONOMY 376 \& HORT 378, which also fulfill Horticulture major requirements.

ADVISING AND CAREERS

## ADVISING

Students interested in learning more about the Horticulture major should meet with Kathryn Jones, kjones26@wisc.edu, or schedule an advising appointment via Starfish (https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/).

## FACULTY MENTORS

The Horticulture Department maintains a list of faculty mentors (https:// horticulture.wisc.edu/faculty-and-staff-2/faculty-and-staff/) that are available to help current students with internships and careers, graduate school preparation, research opportunities, etc.

## CAREERS

A degree in horticulture prepares students for numerous career paths, including plant breeding and genetics, applied plant science, food crop production, greenhouse production, urban agriculture, communitysupported agriculture (CSA), gardening and landscaping, horticulture education, extension- and community-based education, horticultural therapy, and the health sciences. For sample career profiles in horticulture, see Career Opportunities (https://horticulture.wisc.edu/academics/ undergraduate-program/research-career-opportunities-3/) on the department website.

## PEOPLE

## PROFESSORS

Bamberg, Colquhoun, Goldman, Krysan (chair), Simon, Weng, Zalapa

## ASSOCIATE PROFESSORS

Atucha, Bethke, Dawson, Endelman, Jull

## ASSISTANT PROFESSORS

Ellison, Kovaleski, Wang
USDA SCIENTIST
Mura
INSTRUCTIONAL STAFF
Calderon, Luiken, Oosterwyk

## WISCONSIN EXPERIENCE

## INTERNSHIPS

Internships are a great way for Horticulture students to get hands-on horticultural experience. Many of our students intern at locations that vary from seed companies to wineries to public gardens. Horticulture students also have many opportunities to intern during the year on or near campus at facilities such as the Allen Centennial Garden (https://allencentennialgarden.org/), the UW Arboretum (https:// arboretum.wisc.edu/), and the Agricultural Research Stations (https:// ars.wisc.edu/).

## RESEARCH

Horticulture students have many opportunities to get involved with research in the department. Students primarily find research opportunities by directly contacting faculty. Faculty can be found on the department's website by the directory list (https://horticulture.wisc.edu/ faculty-and-staff-2/faculty-and-staff/), by crops studied (https:// horticulture.wisc.edu/research-and-outreach-2/crops-studied/), or by program area (https://horticulture.wisc.edu/research-and-outreach-2/ faculty-by-program-area/). Occasionally, research positions are posted on the Student Job Center.

## STUDY ABROAD

Horticulture students have unique opportunities to contextualize the learning acquired in traditional face-to-face courses on campus by participating in short-term field experiences abroad led by program leaders from the Department of Horticulture.

Some of these programs include: UW Tropical Horticulture in Costa
Rica and UW Food Systems and the Environment in Northern Japan.

## HORTICULTURE SOCIETY

Connect with other Horticulture majors and those interested in horticulture by joining the Horticulture Society. The Horticulture Society is a professional, social, and educational group which provides a common ground for all students interested in horticulture to meet other students with the same interests.

## LIFE SCIENCES COMMUNICATION

The Department of Life Sciences Communication (LSC) is one of the world's leading science communication programs, working at the intersection of science, media and society. The LSC major teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs. This theoretical background is a foundation to effectively communicate about controversial science topics in areas such as the environment and natural resources, health, agriculture and new science technologies like gene editing and artificial intelligence.

Students receive instruction across multimedia platforms such as print, audio, video and web. They are taught how to target and create communications for both news and marketing. Most important, they learn how to plan strategically and implement the most effective communications for diverse audiences.

Many courses in LSC have a strong professional focus, combining classroom instruction with projects that have real-world clients from industry and non-profit. Our faculty and instructors work with clients from a variety of industries and the policy world and bring those experiences into the classroom. These collaborations and projects prepare LSC students for careers in a wide variety of fields, including healthcare, digital marketing, education, media, agriculture, information technology, consumer goods, life sciences and consulting. LSC students also pursue graduate and professional school after graduation in the health, biological, social and physical sciences.

Students can also participate in an honors in major program in LSC (https://guide.wisc.edu/undergraduate/agricultural-life-sciences/ life-sciences-communication/life-sciences-communication-bs/ \#requirementstext).

## Learn through hands-on, real world experiences

State-of-the-art computer labs, radio labs and video production equipment support student learning and preparation for careers.

Capstone courses provide students with an opportunity to put their LSC education into practice. Students apply their skills in the real world through these capstones, working with a real-life client on a social marketing campaign to influence behavioral change or participate in a science communication internship.

Students interested in science communication research can participate in research projects with professors leading the field of science communication.

## Build community and networks

LSC instructors are world-class researchers and real-world practitioners. Many courses enroll between 15-50 students, allowing students to get to know award-winning faculty and instructors personally throughout their time in the major.

## Customize a path of study

LSC is an attractive major, and double major, to students interested in a variety of fields including genetics, global health, environmental science, physics, legal studies, psychology and more. The LSC major is highly customizable both in terms of course selection in the major and in the ability to add majors and certificates to the LSC bachelor's degree based on each student's interests and career goals.

## Make a strong start

LSC introduces students to the field of science communication, the College of Agricultural and Life Sciences, and the university by offering LSC 155: First Year Seminar in Science Communication, a seminar course for first year students.

## Gain global perspective

LSC students often participate in study abroad opportunities around the world including places like Spain, Uganda, Denmark, England and Ecuador. Programs range from two-weeks in duration to an entire year. Learn more about studying abroad as an LSC major by checking out the LSC Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## DEGREES/MAJORS/CERTIFICATES

- Life Sciences Communication, B.S. (p. 185)

Students work with their advisor and the CALS study abroad office (https://cals.wisc.edu/ academics/undergraduate/current-students/study-abroad/) to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

Students are not allowed to earn both the science communication certificate and the life sciences communication major.

REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits

- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS <br> Code <br> Title

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46)

Physical Science Fundamentals 4-5

| CHEM 103 | General Chemistry I |
| :---: | :--- |
| or CHEM 108 | Chemistry in Our World |
| or CHEM 109 | Advanced General Chemistry |

Biological Science
Additional Science (Biological, Physical, or Natural) 3
Science Breadth (Biological, Physical, Natural, or Social)
CALS Capstone Learning Experience: included in
the requirements for each CALS major (see "Major
Requirements") (p. 48)

## MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. Students must have a minimum of 15 credits within the LSC major that do not double count with CALS or university "general education" requirements.

## MATH AND STATISTICS FOUNDATION

LSC strongly recommends that all students complete MATH 112 Algebra or MATH 114 Algebra and Trigonometry to complete the university Quantitative Reasoning A requirement and either STAT 301 Introduction to Statistical Methods, STAT 371 Introductory Applied Statistics for the Life Sciences or SOC/C\&E SOC 360 Statistics for Sociologists I which would complete the university Quantitative Reasoning B requirement.

## REQUIRED COURSES

| Code | Title | Credits |
| :--- | :--- | ---: |
| Foundation Course |  |  |
| LSC 111 | Science and Technology | 3 |
| or LSC 212 | Newswriting |  |

| LSC 250 | Research Methods in the Communication Industry | 3 |
| :---: | :---: | :---: |
| LSC 251 | Science, Media and Society | 3 |
| Select two of the following: |  | 6 |
| LSC 270 | Marketing Communication for the Sciences |  |
| LSC 314 | Introduction to Digital Video Production |  |
| LSC 332 | Print and Electronic Media Design |  |
| LSC 340 | Misinformation, Fake News, and Correcting False Beliefs about Science |  |
| LSC 350 | Visualizing Science and Technology |  |
| LSC 360 | Information Radio |  |
| Concentration within the Major |  |  |
| Select 6 credits from one of the following concentrations: |  | 6 |
| Communication Strategy |  |  |
| Communication Skills and Technologies |  |  |
| Capstone |  |  |
| LSC 515 | Social Marketing Campaigns in Science, Health and the Environment | 3 |

| or LSC 640 | Case Studies in the Communication of Science and <br> Technology |
| :--- | :--- |

Total Credits

## CONCENTRATIONS WITHIN THE MAJOR COMMUNICATIONSTRATEGY

This concentration focuses on the skills and theory necessary to effectively communicate with audiences in the life sciences context, while satisfying the long terms strategic goals of an organization. The concentration includes courses in marketing, strategic and risk communication, and data analysis.

## Code Title Credits

Select two of the following: 6

| LSC 432 | Social Media for the Life Sciences |
| :--- | :--- |
| LSC 435 | Brand Strategy for the Sciences |
| LSC 440 | Digital Media and Science <br> Communication |
| LSC/ | Native American Environmental |
| AMER IND 444 | Issues and the Media |
| LSC 460 | Social Media Analytics |
| LSC/COM ARTS/ | Health Communication in the <br> JOURN 617 |
| Information Age |  |
| LSC 625 | Risk Communication |
| LSC 660 | Data Analysis in Communications |
|  | Research |

## COMMUNICATION SKILLS AND TECHNOLOGIES

This concentration focuses on the skills required to translate organized information into informative and persuasive messages for a variety of media, such as writing, documentary photography, social media, web design and video production.

| Code | Title | Credits |
| :--- | :--- | ---: |
| Select two of the following: | 6 |  |
| LSC 430 | Communicating Science with <br> Narrative |  |
| LSC 432 | Social Media for the Life Sciences <br> LSC 450Documentary Photography for the <br> Sciences |  |
| LSC 532 | Web Design for the Sciences |  |
| LSC 614 | Advanced Video Production |  |

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## HONORS IN THE MAJOR IN LIFE SCIENCES COMMUNICATION: REQUIREMENTS

Students may apply for admission to Honors in the Major in Life Sciences Communication (LSC) at any time but are strongly advised to apply before their junior year. Interested students are encouraged to meet with the LSC advisor with any questions about Honors in the Major in LSC.

- 24-28 credits of coursework, as outlined in the chart below.
- For the 15 credits of LSC coursework taken for honors credit:
- Students must earn at least a 3.5 cumulative GPA in this coursework.
- It is the student's responsibility to enroll in honors sections or to select honors optional in order for courses to count toward Honors in the Major.
- Thesis and Independent Study credits do not count toward the required 15 credits of LSC honors coursework.
- Complete a senior honors thesis and present the thesis at the CALS Undergraduate Research Symposium or another public venue.

## Code Title

## Required Coursework

| STAT 301 | Introduction to Statistical Methods |  |
| :--- | :--- | ---: |
| or STAT 371 | Introductory Applied Statistics for the Life <br> Sciences | 3 |
| or C\&E SOC/ <br> SOC 360 | Statistics for Sociologists I |  |
| LSC 289 | Honors Independent Study |  |

| LSC 681 <br> \& LSC 682 | Senior Honors Thesis <br> and Senior Honors Thesis | 2 |
| 15 credits of LSC coursework taken for Honors credit | $4-8$ |  |

Total Credits

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade

Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Specialized knowledge in theoretical and applied communication of science and technology, along with an education broad enough to meet the challenges of changing careers and opportunities.
2. The ability to think critically and creatively: to synthesize, analyze, and integrate ideas for decision making and problem solving.
3. The ability to communicate effectively across media and a broad range of audiences.
4. A global perspective; an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
5. The ability to work with others in small or large groups, to recognize civic and social responsibilities, and to appreciate the uses of public policy in a democracy.
6. A respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

|  |  | 15 | 15 |

## Total Credits 121-126

Students must complete at least 120 total credits to be eligible for graduation.

1
LSC 100 is not required for the major but is strongly encouraged for students who need to take a Comm A course.

## 2

LSC recommends MATH 112 or MATH 114 for students who need to complete the university Quantitative Reasoning A requirement.

3
Many LSC students choose to use elective spaces throughout their career to complete an additional major or certificate. Other students choose to take more LSC courses than the minimum required. Students should consult the advisor for more information and to create a personalized fouryear plan based on their background, interests, and career goals.
4
LSC strongly recommends STAT 301, STAT 371, or C\&E SOC/SOC 360 to fulfill the university Quantitative Reasoning B requirement.

## THREE-YEAR PLAN

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students
interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

These three-year road maps below are designed to provide an example of how a student could complete their B.S. in Life Sciences Communication within three years. One plan assumes you are entering college with 29 credits from Advanced Placement, International Baccalaureate, or college transfer courses, including fulfilling UW-Madison's Quantitative Reasoning A requirement through credit or placement scores. The other plan assumes you are entering without bringing in outside credits. Your specific program of study could, and probably will, look different. You should customize the road map to fit your unique path at UW-Madison. Consult with your advisor about the best path for you.

## Total Credits 91-93

Students must complete at least 120 total credits to be eligible for graduation.

1
Plan \#1 assumes that students are coming to UW-Madison with approximately 29 credits from AP/IB or college transfer credits and that the University Quantitative Reasoning A requirement is fulfilled through transfer credit or placement scores. Your plan may look different depending on the number of credits you bring in.

2
LSC 100 is not required for the major but is strongly encouraged for students who need to take a Communication A course.

## 3

Many LSC students use their elective coursework to take additional LSC courses, to add one or more certificates, to add a double major, or to take other coursework to work to achieve their academic and career goals.

## 4

LSC recommends STAT 301, STAT 371, or C\&E SOC/SOC 360 to fulfill the university Quantitative Reasoning B requirement.

## SAMPLE THREE-YEAR PLAN \#2 ${ }^{1}$

| First Year <br> Fall | Creditspring | Creditsummer | Credits |
| :---: | :---: | :---: | :---: |
| LSC $100^{2}$ | 3 LSC 111 or 212 <br> (Comm B) | 3 LSC 251 | 3 |
| MATH 112 or $114^{3}$ | 3-5 LSC 250 | 3 Electives | 6 |
| CALS First Year Seminar | 1 CHEM 103, 108, or 109 | 4-5 |  |
| Humanities <br> Elective | 3 Ethnic Studies | 3 |  |
| Electives ${ }^{4}$ | 4 Elective | 3 |  |
|  | 14-16 | 16-17 | 9 |
| Second Year |  |  |  |
| Fall | Creditspring | Creditsummer | Credits |
| STAT 301, 371, <br> or C\&E SOC $360^{5}$ | 3-4 Biological <br> Science Elective | 3 LSC Core | 3 |
| LSC Core | 3 Social Sciences Elective | 3 Science Breadth Elective | 3 |
| Additional Science Elective | 3 Humanities Elective | 3 Elective | 3 |
| Electives | 7 Electives | 7 |  |
|  | 16-17 | 16 | 9 |
| Third Year |  |  |  |
| Fall | CreditSpring | Creditsummer | Credits |
| LSC <br> Concentration | 3 LSC Capstone | $\begin{aligned} & 3 \text { LSC } \\ & \text { Concentration } \end{aligned}$ | 3 |
| CALS <br> International <br> Studies | 3 Biological Science Elective | 3 Electives | 6 |
| Electives | 9-11 Electives | 10 |  |
|  | 15-17 | 16 | 9 |

## Total Credits 120-126

Students must complete at least 120 total credits to be eligible for graduation.

1
Plan \#2 assumes that you are coming to UW-Madison without credits from AP/IB or another college/university.

## 2

LSC 100 is not required for the major but is strongly encouraged for students who need to take a Comm A course.
3
LSC recommends MATH 112 or MATH 114 for students who need to complete the university Quantitative Reasoning A requirement.

## 4

Many LSC students use their elective coursework to take additional LSC courses, to add one or more certificates, to add a double major, or to take other coursework to work to achieve their academic and career goals.

## 5

LSC strongly recommends STAT 301, STAT 371, or C\&E SOC/SOC 360 to fulfill the university Quantitative Reasoning B requirement.

## ADVISING AND CAREERS

## ADVISING

Each LSC student is assigned to both an academic advisor and a faculty mentor in LSC. The academic advisor is a professional advisor who works with students on planning their coursework, as well as navigating and getting involved on campus. Current and prospective students should contact the advisor with questions.

The faculty mentors are LSC faculty and instructors who provide students with another direct contact and resource in the department specifically focusing on career conversations as well as how to get involved in research as a student.

## CAREER OPPORTUNITIES

LSC alumni hold professional positions in communications, digital marketing, environmental advocacy, and research or consulting in a variety of industries including health care, media, education, agriculture, information technology and life sciences. Many pursue advanced degrees in graduate and professional programs in the health, biological, social and physical sciences.

Graduates are recognized for their skills in social media, event management, marketing, leadership, public speaking, customer service, public relations, strategic planning, research, data analysis, writing and digital video production.

LSC has a large alumni network across many industries and fields. To connect students to these networks, LSC hosts career panels during the academic year, posts alumni profiles (https://Isc.wisc.edu/alumni-friends/ what-our-undergraduate-alumni-are-doing/) on its website, and manages a Linkedln group to share job opportunities and facilitate connections between alumni and students.

## PEOPLE

PROFESSORS \& INSTRUCTORS (HTTPS:// LSC.WISC.EDU/PEOPLE/FACULTY-RESEARCHSTAFF/)
Botham, Sarah

Brossard, Dominique (chair)
Chen, Kaiping
Chinn, Sedona
Fisher, Madeline
Li, Nan
Newman, Todd
Patterson, Dexter
Scheufele, Dietram
Shaw, Bret
Stanley, Don
Xenos, Michael (director of undergraduate studies)

## WISCONSIN EXPERIENCE

## INTERNSHIPS

Most LSC students participate in internships during their time as undergraduates. LSC staff notify students of opportunities to apply for summer and academic year internships related to science communication and students are encouraged to discuss their goals with their career mentor (https://guide.wisc.edu/undergraduate/agricultural-life-sciences/life-sciences-communication/life-sciences-communicationbs/\#advisingandcareerstextcontainer). Students intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies. Read about student internship experiences (https://lsc.wisc.edu/?s=internship\&submit=Search).

## STUDENT ORGANIZATIONS

LSC is home to both the Science Communication Club and the National Agri-Marketing Association UW-Madison chapter (https://Isc.wisc.edu/ academic-programs/undergraduate/\#student-organizations), and there are many additional opportunities for students to get involved with other student organizations on campus.

## GLOBAL ENGAGEMENT

LSC students are encouraged to gain global perspective by participating in study abroad opportunities all over the world including places like Spain, Uganda, Denmark, England and Ecuador. Students choose programs ranging anywhere from two-weeks in duration to an entire year. Learn more about studying abroad as an LSC major (https:// studyabroad.wisc.edu/academics/major-advising-pages-maps/life-sciences-communication/).

LSC offers a course introducing students to communication at the intersection of science, politics and society to provide students with an international perspective on science communication. Taught by faculty from around the world, LSC courses provide an overview of the theoretical foundations of science communication and their relevance for societal debates about science and emerging technologies across different parts of the world.

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

LSC students often volunteer in healthcare, non-profits, advocacy agencies and more. The Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. LSC awards over $\$ 42,000$ in scholarships each year to students in the department. Students apply for CALS and LSC scholarships through a single application in the Wisconsin Scholarship Hub (WiSH). Learn more about college scholarships (https:// cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

## SCIENCE COMMUNICATION, CERTIFICATE

The Department of Life Sciences Communication (LSC) is one of the world's leading science communication programs, working at the intersection of science, media and society. The certificate in Science Communication teaches students how to understand the way we all make sense of increasingly complex scientific breakthroughs. Certificate students will gain an introduction to science communication theory and practical experience which allows them to more effectively communicate about controversial science in areas such as gene editing, the environment, health, agriculture, and artificial intelligence.

## HOW TO GET IN

Students are eligible to declare the certificate at any point in their undergraduate career but are encouraged to declare as early as possible to plan the required coursework. Students are encouraged to meet with the advisor to discuss certificate requirements and ensure it fits with their academic and career goals. Students who are ready to declare the certificate can do so by completing this form (https:// uwmadison.co1.qualtrics.com/jfe/form/SV_294pS5tCjs8sjVI/).

Students are not allowed to earn both the science communication certificate and life sciences communication major.

## REQUIREMENTS

- Minimum 2.0 GPA on all certificate courses
- At least 9 credits must be taken in residence at UW-Madison
- Courses in which a student elects the pass/fail option will not count toward completion of the certificate requirements

| Code | Title | Credits |
| :--- | ---: | ---: |
| Core Course (Required) | $\mathbf{3}$ |  |
| LSC 251 $\quad$ Science, Media and Society |  |  |
| Focus Area, complete one course in each area | $\mathbf{6}$ |  |
| Communication Strategy (See list below) |  |  |
| Communication Skills \& Technology (See list below) | $\mathbf{3}$ |  |
| Elective, complete one course from either area |  |  |
| Communication Strategy (See list below) |  |  |
| Communication Skills \& Technology (See list below) |  |  |

Total Credits

| FOCUS AREAS |  |  |
| :---: | :---: | :---: |
| COMMUNICATION STRATEGY |  |  |
| Code | Title | Credits |
| LSC 250 | Research Methods in the Communication Industry | 3 |
| LSC 270 | Marketing Communication for the Sciences | 3 |
| LSC 340 | Misinformation, Fake News, and Correcting False Beliefs about Science | 3 |
| LSC 350 | Visualizing Science and Technology | 3 |
| LSC 432 | Social Media for the Life Sciences | 3 |
| LSC 435 | Brand Strategy for the Sciences | 3 |

| LSC 450 | Social Media for the Life Sciences |  |
| LSC 532 | Sciences | 3 |
| LSC 614 | Web Design for the Sciences | 3 |

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Apply knowledge in theoretical and applied communication to help meet society's biggest challenges in science and technology.
2. Discuss the interdependencies among individuals and their workplaces, communities, environments, and world; and the interrelationships between science and society.
3. Communicate effectively across media and a broad range of audiences.
4. Collaborate with others in small and large groups, demonstrating an appreciation for diverse views and a strong sense of personal and professional ethics.

## ADVISING AND CAREERS

## ADVISING

Current and prospective students should contact the advisor with questions or schedule an advising meeting using Starfish.

## CAREERS

The interdisciplinary education provided through the Certificate in Science Communication will make graduates highly sought after by employers across both scientific and communication industries. Graduates can pursue careers in science writing, digital media and marketing, public health, environmental advocacy, and research in industry, non-profits and the government. Alternatively, others may go on to graduate and professional schools in the health, biological, social and physical sciences.

We encourage you to check out our website (http://lsc.wisc.edu/) to view recent alumni profiles.

## WISCONSIN EXPERIENCE

## INTERNSHIPS

LSC staff notify certificate students of opportunities to apply for summer and academic year internships related to science communication.
Students could intern with marketing agencies, environmental and sustainability organizations, and healthcare and agricultural agencies.

## STUDENT ORGANIZATIONS

LSC is home to both the Science Communication Club and the National Agri-Marketing Association UW-Madison chapter (https://Isc.wisc.edu/ academic-programs/undergraduate/\#student-organizations) and there
are many additional opportunities for students to get involved with other student organizations on campus.

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

Certificate students could volunteer in healthcare, non-profits, advocacy agencies and more. The Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## NUTRITIONAL SCIENCES

Nutritional sciences is an interdisciplinary field rooted in biology and biochemistry. The majors integrates the study of nutrition within the role of diet in health and disease and combines the basic and applied sciences to health and medicine.

The Department of Nutritional Sciences offers two areas of undergraduate study in nutrition, both of which require core courses within the chemistry, physiology, biochemical, clinical, business, and public health aspects of nutrition.

With focus on nutrition and preventative health, the Nutritional Sciences majors provide an excellent foundation for students who are looking to work in clinical and community nutrition, prepare for graduate education in the health and biochemical sciences, and/or pursue careers in research and industry.

## NUTRITIONAL SCIENCES, B.S.

Nutritional sciences is the study of the biochemical and physiological basis of how diet impacts health and disease. Students explore a variety of biological concepts including biochemistry, genetics, microbiology, kinesiology, community nutrition, and epidemiology to understand how nutrients in food affect the body.

Students can tailor their studies by selecting from more than 20 courses covering a wide variety of topics, including, microbiology, genetics, obesity, metabolism, kinesiology and sports nutrition, as well as ethics of public health, global health, community nutrition, and cultural aspects of food. Many students supplement their studies outside of the classroom by contributing to research in a university lab or volunteering in the community.

With an emphasis on human health, the program prepares students for health and research careers in a variety of settings, including healthcare, education, corporate wellness, sports nutrition, government agencies, food companies, or pharmaceuticals.

## LEARN THROUGH HANDS-ON, REAL WORLD EXPERIENCE

In the classroom, students apply what they learn to real-world cases and approach nutritional health as they would in a clinical setting. Some courses also include field experiences or community-based learning experiences.

Because of the emphasis on biological sciences, many students choose to join a professor's research lab and may earn credit for their work within the lab. Students also have opportunities for community service internships under the guidance of a faculty member.

## BUILD COMMUNITY AND NETWORKS

The Dietetics and Nutrition Club (DNC) (https://nutrisci.wisc.edu/ undergraduate/dietetics-and-nutrition-club/) is a registered student organization open to undergraduate and graduate students. The club offers a variety of opportunities for members to engage in networking events, participate in volunteer and community outreach opportunities, and to learn about the field of nutrition and the dietetics profession.

## CUSTOMIZE A PATH OF STUDY

With nearly 20 elective courses available in the third and fourth years of the program, students can plan their coursework to best fit their professional goals and explore scientific principles of greatest interest to them.

Students may participate in the college's Research in Honors program (https://cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-research/). Many students enhance their major by participating in a certificate program such as the Biology Core Curriculum Honors (Biocore) Certificate (https:// guide.wisc.edu/undergraduate/letters-science/biology-core-curriculum/ biology-core-curriculum-honors-certificate/).

## MAKE A STRONG START

A popular First Year Interest Group (FIG) focuses on issues of food and identity and covers current events, nutrition policies related to chronic disease, and community-led programs to improve health outcomes.

## GAIN GLOBAL EXPERIENCE

Several courses emphasize global health and world nutrition. Many students pair a major in Nutritional Sciences with the Global Health Certificate, which includes a field experience/internship focused on a health-related topic of global importance.Students can explore studying abroad as a Nutritional Sciences major by utilizing the Nutritional Sciences Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies*
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

Code Title Credits

Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation.
Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree.
First Year Seminar (p. 46)

| CHEM 103 | General Chemistry I |
| :---: | :--- |
| or CHEM 108 | Chemistry in Our World |
| or CHEM 109 | Advanced General Chemistry |

Biological Science5
Additional Science (Biological, Physical, or Natural) ..... 3
Science Breadth (Biological, Physical, Natural, or Social) ..... 3
CALS Capstone Learning Experience: included inthe requirements for each CALS major (see "MajorRequirements") (p. 48)

## MAJOR REQUIREMENTS

| Code | Title | Credits |

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take NUTR SCI 681 Senior Honors Thesis and NUTR SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors Program page (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/) for more information.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

> Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
> Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
2. Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
3. Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
4. Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
5. Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
6. Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
7. Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
8. Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

BIOCORE 381/BIOCORE 382, BIOCORE 383/BIOCORE 384, BIOCORE 485/BIOCORE 486, BIOCORE 587 also accepted.

5
Select 6 credits from major elective options.

## ADVISING AND CAREERS

## ADVISING

Students are assigned a professional advisor who assists them with building their personalized Wisconsin Experience-including a strong curriculum to match student interests-and provides advising on career paths including graduate school or pursuing advanced degrees in the health sciences.

Professors provide mentorship to students in the program through work on faculty-led research, including learning research paper- and grant-writing skills, communicating about scientific concepts, and presenting research results to different audiences.

## CAREER OPPORTUNITIES

Graduates of the program are working as physicians, scientists, physician assistants, nutrition product developers, foodservice directors, nutrition educators, wellness directors, and professors; and have a wide-range of employers including hospitals, clinics, nursing homes, school districts, food companies, universities, grocery stores, and non-profit organizations.

Alumni are recognized for their skills in healthcare, leadership, clinical research, communication, critical thinking, and problem solving.

## WISCONSIN EXPERIENCE

## RESEARCH EXPERIENCE

Undergraduate students have the opportunity to take for-credit and not-for-credit hours in labs (https://nutrisci.wisc.edu/undergraduate/ student-research/) to participate in research and learn additional lab skills Faculty-led research programs inform the scientific understanding of nutrition's role in health. Students can work with internationally recognized researchers who study metabolism, genetics, genomics, physiology, and nutritional management of diseases including phenylketonuria (PKU), cystic fibrosis, and diabetes.

## GLOBAL ENGAGEMENT

Faculty and students in the program have many connections with global activities. The UW Mobile Clinic and Health Care in Uganda (https://studyabroad.wisc.edu/program/?programld=532) study abroad program provides students an opportunity to visit Uganda and learn
about nutrition and public health. The Village Health Project (https:// www.villagehealthproject.org/) student organization grew out of students traveling to Uganda on UW-Madison programs and supports ongoing public health projects in the region.

## STUDENT ORGANIZATION

The Dietetics and Nutrition Club (DNC) (https://nutrisci.wisc.edu/ undergraduate/dietetics-and-nutrition-club/), open to undergraduate and graduate students, hosts biweekly evening meetings featuring speakers on many topics related to nutrition. The group also assists students in finding volunteer and job opportunities in the field of nutrition.

## VOLUNTEER ACTIVITY

Students volunteer through many different programs in the community. Examples include:

- Volunteering at UW Hospitals and Clinics or other local hospitals to gain experience in patient care
- Joining the student organization Slow Food UW, a group that hosts dinners in the Madison community
- Addressing food insecurity through student groups including Food Justice Collective, Campus Food Shed, UW Frozen Meals program, Open Seat food pantry, Food Recovery Network-Madison Chapter, F.H. King: Students for Sustainable Agriculture; and Madison-area food pantries such as Madison Community Fridges

The Dietetics and Nutrition Club also offers volunteer opportunities.

## INTERNSHIP

Students may obtain academic credit along with community-based engagement by creating their own internship under the supervision of a faculty member.

## RESOURCES AND SCHOLARSHIPS

The Department of Nutritional Sciences awards tens of thousands of dollars in scholarship funds (https://nutrisci.wisc.edu/undergraduate/ scholarships/) for students each year and Nutritional Sciences students are also eligible for scholarships in the College of Agricultural and Life Sciences.

Students in the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships. (https://cals.wisc.edu/academics/undergraduate-students/ financing-your-education/cals-scholarships/)

## NUTRITIONAL SCIENCES, B.S. NUTRITION AND DIETETICS

In this major, students explore nutrition through clinical and management courses and prepare for postgraduate training required to become registered dietitian nutritionists (RDN). With an increased emphasis on the role of food and nutrition in treating and preventing disease, employment of registered dietitians is projected to grow faster than other occupations.

Registered dietitian nutritionists work in a wide variety of settings, including health care, business and industry, community and public health, education, research, government agencies, and private practice. Many
organizations, particularly those in medical and health care settings, require RDN credentials.

## LEARN THROUGH HANDS-ON, REAL WORLD EXPERIENCES

Courses expose students to clinical problem solving, assessing medical record data, evaluating food intake, planning modified diets, and reviewing medical and research literature related to certain diseases or conditions. This training develops critical thinking, teamwork, and communication skills needed by dietetic interns and registered dietitians.

## BUILD COMMUNITY AND NETWORKS

The Dietetics and Nutrition Club (https://win.wisc.edu/organization/dnc/) is an academic and professional registered student organization offering a variety of opportunities for members to participate in networking events, volunteer activities, and community outreach opportunities.

## CUSTOMIZE A PATH OF STUDY

Students in the program can pursue Honors in Research (https:// cals.wisc.edu/academics/undergraduate-students/outside-the-classroom/honors-program/honors-in-research/) through the College of Agricultural and Life Sciences.

Many students enhance their major by participating in a certificate program, including Global Health (https://guide.wisc.edu/undergraduate/ agricultural-life-sciences/nutritional-sciences/global-health-certificate/).

## MAKE A STRONG START

A popular First Year Interest Group (FIG) focuses on issues of food and identity, and promotes respectful and inclusive interactions with patients and communities.

## GAIN A GLOBAL PERSPECTIVE

Several courses emphasize global health and world nutrition and UWMadison offers more than a dozen study abroad and exchange programs that include a nutritional science component. Students can explore studying abroad utilizing the Nutrition and Dietetics Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

## ADMISSION TO NUTRITION AND DIETETICS DEGREE PROGRAM

Students will have Pre-Dietetics classification until admission to the nutrition and dietetics degree program (Dietetics classification) as defined by completion of prerequisite courses with a cumulative GPA of \#2.800, as well as, an overall GPA of \#2.800. Students must apply for and be admitted to the program no later than the end of the semester in which the student accumulates 86 credits, which is senior standing. Department approval is required for admission. Students who are not admitted to the program by the time they accumulate 86 credits will not be allowed to continue in the Pre-Dietetics classification. ${ }^{1}$

To be admitted to the B.S. nutrition and dietetics program, the following requirements must be met effective fall 2019:

[^3]2. Students must have completed one semester at UW-Madison before applying.
3. A minimum mean GPA of 2.800 in the following required ${ }^{2}$ prerequisite courses:

| Code | Title |
| :--- | ---: |
| Select one of the following: | Credits |

| CHEM 103 <br> \& CHEM 104 | General Chemistry I and General Chemistry II |  |
| :---: | :---: | :---: |
| CHEM 109 | Advanced General Chemistry |  |
| Select one of the following: |  | 5 |
| ZOOLOGY/ BIOLOGY 101 \&ZOOLOGY/ BIOLOGY 102 | Animal Biology and Animal Biology Laboratory |  |
| ZOOLOGY/ BIOLOGY/ BOTANY 151 | Introductory Biology |  |
| ANAT\&PHY 335 | Physiology | 5 |
| NUTR SCI 332 | Human Nutritional Needs | 3 |
| Select one of the following: |  | 3-4 |
| PSYCH 202 | Introduction to Psychology |  |
| MICROBIO 101 | General Microbiology |  |
| PSYCH 210 | Basic Statistics for Psychology |  |
| $\begin{aligned} & \text { SOC/ } \\ & \text { C\&E SOC } 360 \end{aligned}$ | Statistics for Sociologists I |  |
| STAT 301 | Introduction to Statistical Methods |  |
| STAT 371 | Introductory Applied Statistics for the Life Sciences |  |
| GEN BUS 360 | Workplace Writing and Communication |  |

## 1

This policy is applicable to undergraduate students entering or transferring into Pre-Dietetics classification fall 2018 and beyond. Students who have already completed a college degree (B.S. or B.A.) may choose to pursue the nutrition and dietetics program as either a second degree candidate, or as a Didactic Program in Dietetics (DPD) completer. Because they have already completed a bachelor's degree, second-degree candidates and DPD completers are not required to follow this progression policy. Progression for these students will be closely monitored by the program coordinator.

## 2

Any transfer course from another university that will be used to meet the above required courses cannot be included in the GPA calculation. If the same course is taken more than once, only the grade from the last time the course was taken will be used in the GPA calculation.

Note: Admission to the DPD program is competitive, as enrollment is limited by accreditation standards; students meeting the minimum criteria are not guaranteed admission.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS

 B.S. DEGREE PROGRAMS
## Code

Title

1
Note that placement into MATH 114 does not guarantee that credit has been earned for MATH 112.

2
Consult advisor about combining MICROBIO 303 with MICROBIO 102.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Obtains and can articulate specialized knowledge in the field of nutritional sciences and dietetics along with an education broad enough to meet the challenges of future careers and opportunities.
2. Obtains and can articulate foundational knowledge in areas relevant to the field of nutrition and dietetics.
3. Communicates complex ideas in a clear and understandable manner through both written and oral presentations.
4. Demonstrates quantitative literacy in math and statistics relevant to nutritional sciences and dietetics.
5. Demonstrates the ability to think critically and creatively, to synthesize, analyze, and integrate ideas for decision making and problem solving.
6. Develops the skills for life-long learning and is capable of locating, interpreting, and critically evaluating professional literature and current research.
7. Develops a global perspective and an appreciation for the interdependencies among individuals and their workplaces, communities, environments, and world; and an understanding of the interrelationships between science and society.
8. Develops a respect for truth, a tolerance for diverse views, and a strong sense of personal and professional ethics.

## Total Credits 117-124

Students must complete at least 120 total credits to be eligible for graduation.

1
Offered only fall semester
2
Offered only spring and summer semesters

## 3

Offered only spring semester

## 4

May be taken spring of third year or spring of fourth year.
5
BIOCHEM 501 is offered Fall and Spring. BIOCHEM 301 is offered Spring only.

- Advisors can recommend elective courses.
- Students interested in pursuing the nutrition and dietetics program must first complete specific prerequisite courses, hold pre-dietetics classification, and must achieve the necessary grade point average criteria, as listed on the How to Get In (https://guide.wisc.edu/ undergraduate/agricultural-life-sciences/nutritional-sciences/ nutritional-sciences-bs-nutrition-dietetics/\#howtogetintext) tab. Consult https://www.nutrisci.wisc.edu for specific information on the application procedure.

## ADVISING AND CAREERS

## ADVISING

Students are assigned a professional advisor who assists them with building their personalized Wisconsin Experience-including a strong curriculum to match student interests-and provides advising on career paths including graduate school or pursuing advanced degrees in the health sciences.

Professors provide mentorship to students in the program through work on faculty-led research, including learning research paper- and grant-writing skills, communicating about scientific concepts, and presenting research results to different audiences.

## CAREER OPPORTUNITIES

Registered dietitian nutritionists (RDN) work in hospitals, outpatient clinics, schools, colleges, wellness programs, and nursing homes, as well as in public health agencies, the food industry, and research labs. Students who receive a Nutritional Sciences B.S. in Dietetics and fulfill the requirements of the Didactic Program in Dietetics are qualified to complete a post-graduate Dietetic Internship. Upon completing the Dietetic Internship, a graduate is eligible to take the examination administered by the Commission on Dietetic Registration leading to certification as a RDN.

Alumni of the program are working as Registered Dietitians, clinical nutritionists, physician assistants, nutrition directors and counselors, and health coaches.

The Academy of Nutrition and Dietetics offers more information on career paths (https://www.eatrightpro.org/about-us/become-an-rdn-or-dtr/ high-school-students/exploring-a-career-in-dietetics/) in dietetics.

## STUDENT ORGANIZATIONS

The Dietetics and Nutrition Club (DNC) (https://nutrisci.wisc.edu/ undergraduate/dietetics-and-nutrition-club/), open to undergraduate and graduate students, hosts biweekly evening meetings featuring speakers on many topics related to nutrition. The group also assists students in finding volunteer and job opportunities in the field of nutrition.

Students can join the Academy of Nutrition and Dietetics (http:// eatright.org/), the world's largest organization of food and nutrition
professionals, providing public information on advocacy, leadership, career development, dietetics resources, position, and practice papers.

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

Students in the program volunteer throughout the community on projects related to nutrition and food through student organizations like Slow Food UW (http://win.wisc.edu/organization/slowfooduw-madison/) or the Campus Food Shed (http://win.wisc.edu/organization/campusfoodshed/). Several students have developed their own community projects to educate people about nutrition and to fight food insecurity.

## GLOBAL ENGAGEMENT

Faculty and students in the program have many connections with global activities. The UW Mobile Clinic and Health Care in Uganda (https:// studyabroad.wisc.edu/program/?programld=532) study abroad program provides students an opportunity to visit Uganda and learn about nutrition and public health. The Village Health Project student organization (http:// villagehealthproject.org/) grew out of students traveling to Uganda on UW-Madison programs and supports ongoing public health projects in the region.

## RESEARCH EXPERIENCE

Undergraduate students have the opportunity to participate in independent research in labs to learn research techniques. Students can expand their scientific knowledge outside of the classroom and contribute to ongoing papers, research, and discoveries. These experiences lead some students to pursue graduate studies in research after graduation. Read more about faculty research opportunities (https://nutrisci.wisc.edu/ people/faculty-staff/).

## CERTIFICATION/LICENSURE

## ELEVATED EDUCATION REQUIREMENTS FOR THE FUTURE REGISTERED DIETITIAN NUTRITIONIST (RDN)

The registration examination for RDNs is designed to evaluate a candidate's ability to perform at the entry-level, and currently, candidates must hold the minimum of a baccalaureate degree to take the exam. In 2013, Commission on Dietetics Registration (CDR) moved to change the entry-level registration eligibility requirements for RDNs; instead of requiring a Baccalaureate degree, the educational preparation for the future entry-level RDN is now the minimum of a master's degree. CDR's
mandate goes into effect January 1, 2024.

## CURRENT STUDENTS

Students completing dietetics coursework and a dietetic internship by January 1, 2024 will still be eligible to take the RDN exam with a baccalaureate degree.

## PROSPECTIVE STUDENTS

Freshmen declaring Pre-Dietetics in 2020 and beyond will be held to the new 2024 mandate, which will require students to hold the minimum of a master's degree in order to be eligible to take the RDN exam.

## PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

## The requirements of this program meet Certification/ Licensure in the following states: <br> Wisconsin

## The requirements of this program do not meet Certification/Licensure in the following states: The requirements of this program have not been determined if they meet Certification/Licensure in the following states:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

## RESOURCES AND SCHOLARSHIPS

## RESOURCES AND SCHOLARSHIPS

The Department of Nutritional Sciences awards tens of thousands of dollars in scholarship funds (https://nutrisci.wisc.edu/undergraduate/ scholarships/) for students each year, and Nutrition and Dietetics students are also eligible for scholarships in the College of Agricultural and Life Sciences (https://cals.wisc.edu/academics/undergraduate-students/ financing-your-education/cals-scholarships/).

The Academy of Nutrition and Dietetics Foundation provides dietetic scholarships to students. Visit eatrightfoundation.secure-platform.com/ a (https://eatrightfoundation.secure-platform.com/a/) for more information.

## ACCREDITATION

## ACCREDITATION

Accreditation Council for Education in Nutrition and Dietetics (https:// www.eatrightpro.org/acend/)

Accreditation status: Accredited. Next accreditation review: 2027.
Students meet the following criteria as a pathway for becoming an RDN:

1. Fulfill all academic course requirements of the Didactic Program in Dietetics (DPD) according to the Accreditation Council for Education in Nutrition and Dietetics (ACEND) 2022 Standards of Education
2. Receive a Nutritional Sciences, B.S. Nutrition and Dietetics
3. Complete an ACEND-accredited Dietetic Internship Program*
4. Pass a national exam administered by the Commission on Dietetic Registration (CDR). Effective January 1, 2024, the CDR will require a minimum of a master's degree to be eligible to take the registration examination to become an RDN.

* Many ACEND accredited Dietetic Internship Programs now include both supervised practice and graduate requirements to meet the 2024 CDR mandate.

## PLANT PATHOLOGY

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin-Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong.

Undergraduates in plant pathology can choose between two tracks. The plant-microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree. The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/ management and upper-level courses in plant pathology, entomology, and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree. More information about careers in plant pathology is available from the department.

For those interested in graduate studies, the Department of Plant Pathology offers a broad program leading to M.S. and Ph.D. degrees, which is described in the Graduate Guide (http://guide.wisc.edu/ graduate/).

## ORGANIC AGRICULTURE, CERTIFICATE

As consumer, industry, and society engagement with organic agriculture expands, the Certificate in Organic Agriculture provides undergraduate students excellent opportunities for learning on a variety of levels, including hands-on experiences. While the certificate focuses on the production and processing approaches that define organic agriculture, students can also explore other dimensions including economic, environmental, health, food systems, and policy. This interdisciplinary certificate can help UW students from various majors to develop employment opportunities in organic agriculture businesses (farm to fork), policy, public and non-governmental agency work, individual wellness and health initiatives, and sustainable development efforts.

## HOW TO GET IN

University of Wisconsin - Madison undergraduate students of any major are welcome to pursue the Certificate in Organic Agriculture. Students are eligible to declare the certificate once they complete AGROECOL/ AGRONOMY/C\&E SOC/ENTOM/ENVIR ST 103 Agroecology: An Introduction to the Ecology of Food and Agriculture with a grade of $B$ or better.

Students who meet the eligibility criteria must contact the Certificate Advisor to declare the certificate and be assigned an adviser. Students are encouraged to meet with the Certificate Advisor at any stage of their interest in the certificate.

Students cannot declare the Certificate in Environmental Studies or Certificate in Food Systems and the Certificate in Organic Agriculture.

## REQUIREMENTS

- Minimum of 15 credits and successful completion of all course requirements
- A minimum cumulative GPA of 2.5 in certificate coursework is required
- Courses in which a student elects the pass/fail option will not count toward completion of requirements.

| Code <br> Core Courses | Title | Credits |
| :---: | :---: | :---: |
| AGROECOL/ AGRONOMY/ C\&E SOC/ENTOM/ ENVIRST 103 | Agroecology: An Introduction to the Ecology of Food and Agriculture | 3 |

## Total Credits

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.
2. Explore the biological, ecological, and agricultural underpinnings of organic production systems
3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.
4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives
5. Apply knowledge of organic production through experiential opportunities within local, national and/or international communities.

## ADVISING AND CAREERS

## ADVISING

Advising is an essential resource for students in the Certificate for Organic Agriculture and helps students shape their unique Wisconsin Experience and career path by making the most of their time at UWMadison. Advisors can help students make well-informed decisions about coursework and academics, share strategies for success, support them as they encounter challenges, connect them to resources, and provide information about campus policies and procedures. Students are encouraged to regularly meet with their advisor to help ensure that they are aware of opportunities and progressing in their academic and career goals.

Advising is typically done through individual in-person appointments, but advisors are also able to meet with students over the phone or through video conferencing if needed. Quick questions can be answered via email, but an appointment should be scheduled if a conversation is needed.

## Certificate Advisor:

Allee Hochmuth

## CAREERS:

The knowledge and skills developed through the Certificate in Organic Agriculture equips students for success in a range of career paths. Some certificate graduates may use this background to go into organic production, while others may choose a career path in relation to economics, policy, environmental stewardship, health, food systems, and beyond. This certificate has the potential to positively impact the employability of UW students across a variety of disciplines that intersect with organic agricultural production, policy, marketing, business, management, wellness, and community development.

Because an interest in organic agriculture can lead to many different careers, students are encouraged to begin the career exploration process early in their UW-Madison journey by working with advisors, faculty, and career resources on campus. These resources can help students reflect on their values and goals, identify career paths, and outline strategies for pursuing their goals.

## PEOPLE

## Instructors:

Tom Bryan (Teaching Faculty, Agronomy)
Julie Dawson (Associate Professor, Horticulture)
Paul Mitchell (Professor, Agricultural and Applied Economics)
Chuck Nicholson (Professor, Agricultural and Applied Economics)
Erin Silva (Associate Professor, Plant Pathology)
Bill Tracy (Professor, Agronomy)

## Staff:

Allee Hochmuth (Advisor)
Anders Gurda (Outreach Manager)

## WISCONSIN EXPERIENCE

Students who are engaged in the Certificate in Organic Agriculture can be involved in an array of opportunities across campus. In addition to the hands-on experiences in the Certificate program, students are highly encouraged to complement their coursework with out-of-classroom experiences such as research, volunteering, and study abroad.

The following opportunities can help students connect with other students interested in organic agriculture, build relationships with faculty and staff, and contribute to out-of-classroom learning:

- Association of Women in Agriculture (https://awamadison.org/)
- GreenHouse Learning Community (https://www.housing.wisc.edu/ residence-halls/learning-communities/greenhouse/)
- Women in Science and Engineering Learning Community (https:// www.housing.wisc.edu/residence-halls/learning-communities/wise/)
- F.H. King Students for Sustainable Agriculture (https:// www.fhking.org/)
- Slow Food UW (https://slowfood-uw.org/)
- Minorities in Agriculture, Natural Resources and Related Sciences MANRRS (https://www.manrrs.org/)
- UW Horticulture Society (https://horticulture.wisc.edu/academics/ undergraduate-program/uw-horticulture-society/)
- Collegiate Future Farmers of America - FFA, UW chapter (https:// biology.wisc.edu/program/collegiate-ffa-uw-madison-chapter-cffa/)
- CALS Study Abroad (https://cals.wisc.edu/academics/ undergraduate-students/studyabroad/)
- Badger Volunteers (https://morgridge.wisc.edu/students/badgervolunteers/)
- UW Student Organic Farm (https://uworganic.wisc.edu/uw-student-organic-farm/)

## PLANT PATHOLOGY, B.S.

Plant pathology is the study of plants and their pathogens, the process of disease, and how plant health and disease are influenced by factors such as the weather, nonpathogenic microorganisms, and plant nutrition. It encompasses fundamental biology as well as applied agricultural sciences.

Plant pathology involves the study of plants and pathogens at the genetic, biochemical, physiological, cellular, population, and community levels, and how the knowledge derived is integrated and put into agricultural
practice. Prerequisite to effective research, teaching, and extension in plant pathology is a breadth of interdisciplinary interest and knowledge, in a department and in its individual members, reaching from ecology to microbiology, from meteorology to applied mathematics, and from molecular biology to communication skills.

## Learn through real-world, hands on experiences

Plant Pathology students learn in many field and lab courses, including classes that focus on economics of plant disease, interactions between plants and people, fungi, organic agriculture, and global food security. They can also take part in a summer field course, numerous internships, and research opportunities.

## Build community and networks

Plant pathology is a field that thrives in, and makes its greatest contribution to, comprehensive institutions like the University of Wisconsin-Madison where the proximity and complementarity of basic sciences and the other applied agricultural sciences are exceptionally strong. Please visit the department's Extension and Outreach (https:// plantpath.wisc.edu/extension-overview/) overview page for additional details on the departments outreach activities, public education programs, and student organizations.

## Customize a path of study

Undergraduates in plant pathology can choose between two tracks. The plant-microbe biology track has courses in basic math and sciences, including biology, chemistry, and physics, along with upper-level courses in plant pathology, biochemistry, and microbiology. This track is geared toward students who have an interest in receiving a broad education in the basic sciences or plan to pursue a graduate or professional degree.

The plant health and industry track includes some courses in basic math and sciences, as well as additional courses in agriculture and economics/ management and upper-level courses in plant pathology, entomology, and other agricultural sciences. This track is designed for students who intend to work in industry after receiving their undergraduate degree.

Students are also able to explore double majors and a multitude of undergraduate certificates based on their unique educational and professional interests. More information about careers in plant pathology is available from the department.

## Make a strong start

Freshman who are interested in plant pathology are encouraged to participate in a First-Year Interest Group (https://figs.wisc.edu/ what/) (FIG) program. Topics of interest to Plant Pathology students include global food security, plants and human well-being, and many other fascinating options. See the latest Choose Your FIG (https://figs.wisc.edu/ choose/) catalog for details.

## Gain global perspective

The plant pathology program is a great choice for students who wish to participate in a study abroad experience. Students can choose from a multitude of destinations world-wide, and can travel abroad during Summer, Spring, or Fall terms. Students can explore studying abroad as a Plant Pathology major by utilizing the Plant Pathology Major Advising Page. Students work with their advisor and the CALS study abroad office to identify appropriate programs.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits

- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code Title | Credits |
| :---: | :---: |
| Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation. |  |
| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |
| First Year Seminar (p.46) | 1 |
| International Studies (p. 47) | 3 |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science | 5 |
| Additional Science (Biological, Physical, or Natural) | 3 |
| Science Breadth (Biological, Physical, Natural, or Social) | 3 |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

## MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement.
A minimum of 15 credits must be completed in the major that are not used elsewhere.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Define and explain major concepts in the biological sciences including Plant Pathology.
2. Appropriately use biological instrumentation and laboratory techniques.
3. Explain and apply the scientific method including designing and conducting experiments and testing hypotheses.
4. Recognize the relationship between structure and function at all levels: molecular, cellular, organismal, and ecological.
5. Demonstrate a style appropriate for communicating scientific results in written and oral form.
6. Integrate math, physical sciences, and technology to answer biological questions using the scientific method.

## FOUR-YEAR PLAN

## Total Credits 17-53

1
Gen-Ed requirements include communications, ethnic studies, humanities, social science, or international studies. See Requirements tab for more details.

## Note: Possible places where students may cut down on courses:

COMM-A placement test, COMM-B taken as ZOOLOGY/BIOLOGY/
BOTANY 152, QR-A placement test, AP/IB credits (biology, social sciences, humanities, language, chemistry, physics, math, statistics)

## ADVISING AND CAREERS

## ADVISING

Students in plant pathology are assigned to both a professional staff advisor and one of our faculty advisors. Current faculty advisors include:

## Caitilyn Allen

Jeri Barak (lead faculty advisor)
Amanda Gevens
Mehdi Kabbage
Paul Koch
Richard Lankau
Details can be found on our faculty webpage (https://plantpath.wisc.edu/ faculty/). Undergraduates in plant pathology are strongly encouraged to consult with an advisor before enrollment for the upcoming term.

For more information about the Plant Pathology major or the department in general, please see the Contact Information on this page. Students with questions regarding Plant Pathology lab positions - both paid and unpaid should contact Professor Jeri Barak.

## CAREER OPPORTUNTIES

Please visit our Internship \& Job Resources (https://plantpath.wisc.edu/ undergrad-overview/undergrad-student-internship-job-resources/) page for information on career opportunities available to plant pathology students. For more information on other academic, co-curricular, financial aid, and career services available to plant pathology students, please visit the CALS Career Services (https://cals.wisc.edu/academics/ undergraduate-students/career-services/) page. Students in the major are welcome to make an individual appointment with an advisor to discuss career related topics such as career exploration, search strategies, graduate school, and review of application materials (resume, CV, letters, etc.).

Plant Pathologists, from all educational levels, are able to seek employment in a variety of areas. Some examples include:

- colleges and universities
- biotechnology companies
- state and federal agencies
- international agricultural research centers
- nurseries, greenhouses and garden centers
- non-governmental organizations
- golf courses, public parks and landscape maintenance companies
- diagnostic laboratories
- seed, plant production and tissue culture companies
- a variety of private consulting firms

If you would like to know more about what is Plant Pathology and how an undergraduate education in Plant Pathology can help you make an impact on the world around you, please check out the "Plant Pathology: taking you further than you ever imagined (https://www.youtube.com/watch/? v=mzTE3StOHIQ)" video from the American Phytopathological Society (http://www.apsnet.org/Pages/default.aspx).

## WISCONSIN EXPERIENCE

## WISCONSIN EXPERIENCE

Undergraduates majoring in plant pathology at UW-Madison will find an inclusive, welcoming community where professors know their students and are able to provide guidance based on students' specific academic and career goals. There are numerous opportunities to conduct research with internationally prominent faculty and to take part in the Wisconsin Idea, whereby faculty and students extend the knowledge developed at the university to stakeholders in Wisconsin and beyond for the betterment of society.

## INTERNSHIPS

Plant pathology offers paid research internships during summer term, as well as paid or credit-earning research opportunities year-round. Undergraduates get a firsthand view of how research is conducted and what it means to be a professional scientist. For more information on internship opportunities available to plant pathology students please visit our Internship \& Job Resources (https://plantpath.wisc.edu/undergrad-overview/undergrad-student-internship-job-resources/) page.

## RESEARCH EXPERIENCE

Nearly all Plant Pathology undergraduates participate in field- or labbased research with a professor. Research in the department has a long tradition of supporting grower needs. Many faculty are using the plethora of research tools available, including molecular biology and systematics, to answer questions that are directly applicable to grower groups. Please visit the department's Research (https://plantpath.wisc.edu/research/) page for additional details on research activities in Plant Pathology.

## STUDENT ORGANIZATIONS

By joining the Plant Pathology Undergraduate Club, majors get to know their fellow students outside the classroom. The department provides resources for students to meet experts who lead discussions on a range of topics including cutting-edge research and technology, career options, and how to apply and compete for jobs.

Undergraduate students are also welcome to join What's Eating My Plants (https://www.facebook.com/wemp.uw/) (WEMP). This organization, founded in 2010 by Plant Pathology graduate students, is dedicated to bridging the gap between the University and the greater Madison community. The students visit Family Science Nights at schools, community centers, and Saturday Science at the Wisconsin Institute for Discovery (WID) throughout the year.

## GLOBAL ENGAGEMENT

Plant Pathology students interested in studying issues on a global scale are encouraged to enroll in Plant Path 311: Global Food Security, which explores drivers of food insecurity: barriers to food production (pests, land availability, climate), barriers to food availability (politics, price, biofuels), and a greater need due to population growth. The Plant Pathology program is an excellent choice for students wishing to participate in a study abroad experience. Students can find more information about study abroad on the CALS study abroad advising page (https://cals.wisc.edu/ academics/undergraduate-students/international-programs/study-abroad-advising/).

## COMMUNITY ENGAGEMENT AND VOLUNTEERING

The UW-Madison Division of Extension provides statewide access to the resources and research of the University of Wisconsin, other universities and the United States Department of Agriculture, so that people of Wisconsin can learn, grown and succeed at all stages of life. The UWMadison Division of Extension carries out the tradition of the Wisconsin Idea (http://www.wisconsinidea.wisc.edu/) - extending the boundaries of the university to the boundaries of the state. UW-Madison Extension and outreach activities support educational programs for farmers, businesses, communities, families and youth. More details can be found on the department Extension \& Outreach (https://plantpath.wisc.edu/extensionoverview/) page.

On campus, the Morgridge Center for Public Service (https:// morgridge.wisc.edu/) provides resources to help students connect with volunteer opportunities based on their interests and goals.

## RESOURCES AND SCHOLARSHIPS

Department scholarships are available to Plant Pathology students and fellowships are available to support research work with a professor. Students across the College of Agricultural and Life Sciences receive more than $\$ 1.25$ million in scholarships annually. Learn more about college scholarships here (https://cals.wisc.edu/academics/undergraduate-students/financing-your-education/cals-scholarships/).

## SOIL SCIENCE

The Department of Soil Science provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion management; soil fertility and plant nutrition; soil physical and chemical characterization; biogeochemistry; urban soils; soil carbon; soil health; soil contaminants; waste management; pedology; and land-use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil Science majors prepare for professional, technical, consulting, and project positions
in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in Soil Science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

The department also serves as the administrative home for the Environmental Sciences major in the College of Agricultural and Life Sciences.

## DEGREES/MAJORS/CERTIFICATES

- Environmental Sciences, B.S. (CALS) (p. 214)
- Soil Science, B.S. (p. 223)

## PEOPLE

## FACULTY

## Associate Professor Francisco Arriaga

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and noninversion tillage for traditional cropping systems.

## Professor Nicholas Balster

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

## Professor Phillip Barak

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

## Assistant Professor Zachary Freedman

Soil microbiology, ecology and sustainability: Effects of environmental change on biogeochemical cycles; community ecology and trophic dynamics; forest soil ecology; soil organic matter dynamics; sustainable agroecosystems; bio-based product crop production on marginal lands.

## Professor Alfred Hartemink

Pedology and Digital Soil Mapping: Pedology, soil carbon; digital soil mapping; tropical soils; history and philosophy of soil science.

## Assistant Professor Jingyi Huang

Soil Physics, Proximal and Remote Sensing, Soil Monitoring and Management, Digital Soil Mapping: Application of proximal and remote sensing technologies for understanding the movement of water, heat, gas, and solutes in soils across different spatial and
temporal scales; application of physical and empirical models for monitoring, mapping, and managing soil changes due to natural processes and human activities.

## Assistant Professor Inna Popova

Environmental soil chemistry; understanding and mitigating the response of soil systems to the increased pressure of organic contaminants; application of biopesticides; development of novel separation and analyses methods for contaminants in environmental matrices.

## Professor Matthew Ruark

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

## Professor Douglas Soldat

Turfgrass and Urban Soils: Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

## Associate Professor Thea Whitman

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

## Assistant Professor Xia Zhu-Barker

Soil Biogeochemistry, Land Management, and Environmental Sustainability: Nitrogen and carbon biogeochemical cycles; Greenhouse gas and air pollutant emissions; Nitrate leaching and runoff; Innovative manure and nutrient utilization; Composting; Climate change mitigation and adaptation; Ecosystem services and carbon markets; Dairy environmental sustainability; Novel methods in isotopic techniques; Mechanistic exploration of soil-plant-microbe interactions; Process-based modelling. The specific research topics include:

- Microbial and abiotic processes involved in the production and consumption of nitrogen and carbon gases (N2O, NOX, NH3, CO2, CH4)
- Land management practices (e.g., compost, fertilizer, cover crops, irrigation, and tillage) that change soil health, nitrogen use efficiency, crop productivity, nitrogen losses, carbon turnover.
- Process oriented modelling of carbon/nitrogen turnover in agricultural ecosystems.
- Environmental changes on the sustainability and resilience of agricultural ecosystems especially dairy production systems.

## RESOURCES AND SCHOLARSHIPS

Financial support-in the form of approximately 15 scholarships, parttime employment, paid internships, and work-study programs-is available to qualified undergraduate students. The department also provides
opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph.D. degrees (see the Graduate Guide).

## ENVIRONMENTAL SCIENCES, B.S. (CALS)

The Environmental Sciences major satisfies the growing demand among entry-level students for a rigorous, science-based program that promotes critical thinking and emphasizes environmental problem solving in service to society. The program is designed to prepare graduates who will be highly competitive for entry-level positions in nonprofit and private sectors, and for master's programs and doctoral research programs in environmental fields. Possible career paths include environmental monitoring, consulting, education, research, and planning, as well as natural resource management, ecology restoration, remediation, water and air quality assessment, sustainability practices, and more. Undergraduates in Environmental Sciences prepare for a variety of career and graduate school opportunities that require a strong background in the natural sciences. Foundational course work in the major includes calculus, biology, chemistry, and physics. Core and elective course work is fulfilled through diverse offerings from both the College of Agricultural and Life Sciences and the College of Letters \& Science.

The Environmental Sciences major can be earned in either the College of Agricultural and Life Sciences (CALS) or the College of Letters \& Science (L\&S) under the bachelor of science (B.S.) or bachelor of arts (B.A.) degree program. An undergraduate B.S. degree is offered through both colleges. A B.A. option is offered through L\&S only. Students are encouraged to review the degree requirements for both L\&S and CALS and choose the college from which they would prefer to earn their degree; students may choose only one degree "home."

- In CALS, the major is housed in the Department of Soil Science.
- In L\&S, the major is housed in the Department of Atmospheric and Oceanic Sciences.

The major can be taken as a stand-alone or as a double major with a variety of other majors on campus including Life Sciences Communication, Biology, Community \& Environmental Sociology, Soil Science, foreign language/culture, and a number of other disciplines.

## HOW TO GET IN

Students wishing to declare the Environmental Sciences major should meet with an academic advisor. Contact information for advisors can be found here (http://envirosci.wisc.edu/advising/).

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world.

Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

| General | - Breadth-Humanities/Literature/Arts: 6 credits |
| :--- | :--- |
| Education | - Breadth-Natural Science: 4 to 6 credits, consisting of |
|  | one 4- or 5-credit course with a laboratory component; |
|  | or two courses providing a total of 6 credits |
|  | - Breadth-Social Studies: 3 credits |
|  | - Ethnic Studies * |
|  | - Quantitative Reasoning Part A \& Part B * |
|  | * The mortarboard symbol appears before the title of any |
| course that fulfills one of the Communication Part A or |  |
|  | Part B, Ethnic Studies, or Quantitative Reasoning Part A or |
| Part B requirements. |  |

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code Title | Credits |
| :---: | :---: |
| Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation. |  |
| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |
| First Year Seminar (p. 46) | 1 |
| International Studies (p. 47) | 3 |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science | 5 |
| Additional Science (Biological, Physical, or Natural) | 3 |
| Science Breadth (Biological, Physical, Natural, or Social) | 3 |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

## REQUIREMENTS FOR THE MAJOR

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of $\mathbf{1 5}$ credits must be completed in the major that are not used elsewhere.

## MATHEMATICS AND STATISTICS

This major requires calculus. Prerequisites may need to be taken before enrollment in calculus. Refer to the Course Guide for information about calculus prerequisites.

| Code | Title | Credits |
| :---: | :---: | :---: |
| Complete one of the following: |  | 5-10 |
| MATH 221 | Calculus and Analytic Geometry 1 (Recommended) |  |
| MATH 171 <br> \& MATH 217 | Calculus with Algebra and Trigonometry I and Calculus with Algebra and Trigonometry II |  |
| MATH 211 | Calculus |  |
| Complete one of the following: |  | 3 |
| STAT 240 | Data Science Modeling I |  |
| STAT 302 | Accelerated Introduction to Statistical Methods |  |
| STAT 371 | Introductory Applied Statistics for the Life Sciences |  |
| Total Credits |  | 8-13 |
| CHEMISTRY |  |  |

## MAJOR ELECTIVES

There are two ways to complete this requirement, either by distributing 12 credits across at least three categories, or by focusing those credits in a single category. ${ }^{1}$

## DISTRIBUTED ELECTIVES

Students choosing the Distributed Electives path must complete a total of $\mathbf{1 2}$ credits of Environmental Sciences Electives from the categories below, including at least one course from each category.

## 1

Students may speak with their environmental science advisor about alternatives (e.g., courses, directed study, senior thesis) to complete the capstone. To be approved, the alternative must be taken for a minimum of 3 credits, clearly focused on environmental science, and approved by the Environmental Sciences Administrative Committee. Students must consult with their environmental sciences advisor and fill out all necessary paperwork before registering.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Demonstrate understanding of Environmental Science fundamentals in the context of biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate a quantitative and qualitative understanding of the ecological relationships (material and energetic) between organisms, both as individuals and in groups, and their biotic and abiotic environment. This may include processes influencing the distribution and abundance of organisms.
3. Demonstrate a quantitative and qualitative understanding of the physical, largely abiotic, conditions (e.g. climate, water, soil, air, noise, greenspace, etc.) of the environment. The physical environment can include natural or managed settings such as urban environments.
4. Demonstrate a quantitative and qualitative understanding of geospatial processes and information as it relates to the environment including how to collect, interpret, and analyze geospatial information regarding the features of the Earth's surface. These technologies may include geographic information systems (GIS), the global positioning system (GPS), digital maps, and satellite based remote sensing.
5. Demonstrate a basic understanding of relationships that focus on the organization and implementation of laws, regulations, and other policy mechanisms concerning environmental issues and sustainability and their effect on society. This includes how human behaviors influences, and are also influenced by, the natural environment.
6. Apply skills in critical thinking, problem identification and resolution of a complex environmental issues that require interdisciplinary solutions and team-based work.
7. Articulate the role of environmental science in one or more focused areas of a specific environmental discipline (e.g. geology, soils, atmosphere, water, plants, animals).
8. Demonstrate expertise in organizing and presenting (written and oral) scientific information to both lay and professional audiences.

## Total Credits 116-126

Students must complete at least 120 total credits to be eligible for graduation.

1
Sequence of MATH 112/MATH 113 (or MATH 114) and MATH 221 is recommended.

## 2

Completion of BIOLOGY/BOTANY/ZOOLOGY 152 fulfills the Communication Part B university requirement.
$\square$

## ADVISING AND CAREERS

## ADVISING

Students wishing to declare the Environmental Sciences major should meet with an academic advisor. Contact information for advisors can be found here (http://envirosci.wisc.edu/advising/).

CALS undergraduate students interested in pursuing the Environmental Sciences major in the College of Agricultural and Life Sciences should contact Nick Balster, njbalster@wisc.edu or 608-263-5719.

L\&S undergraduate students interested in pursuing the Environmental Sciences major in the College of Letters \& Science should contact the faculty advisor.

## CAREERS

 internships/).

## PEOPLE

## PROGRAM COMMITTEE

Nick Balster, Professor, Department of Soil Science (Co-Chair) Ken Ferrier, Associate Professor, Department of Geoscience Zac Freedman, Assistant Professor, Department of Soil Science Hazel M. Holden, Professor, Department of Biochemistry Erin Silva, Associate Professor, Department of Plant Pathology Daniel J. Vimont, Professor, Department of Atmospheric and Oceanic Sciences (Co-Chair)

## Staff Advisors

Kathryn Jones, Academic Advising Manager (CALS)
TBA, Academic Advising Manager (L\&S)

## WISCONSIN EXPERIENCE

As an interdisciplinary cross-college major, students majoring in Environmental Sciences are involved in a wide array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (https://research.wisc.edu/information-for-undergraduate-students/), volunteering (https://morgridge.wisc.edu/), internships (https:// envirosci.wisc.edu/careers-internships/), and study abroad (https:// www.studyabroad.wisc.edu/).

Many students are also involved in environmental and sustainability organizations (https://sustainability.wisc.edu/student-organizations/).

## SOIL SCIENCE, B.S.

The Department of Soil Science provides undergraduate and graduate education in the environmental, agricultural, and natural resource aspects of soils. Areas of emphasis include soil ecology; soil erosion management; soil fertility and plant nutrition; soil physical and chemical characterization; biogeochemistry; urban soils; soil carbon; soil health; soil contaminants; waste management; pedology; and land use analysis.

Soils are a critical natural resource in environmental protection, food and fiber production, turf and grounds management, rural and urban planning, and waste disposal. All of these facets are integrated into the department's course offerings and research programs. Soil science majors prepare for professional, technical, consulting, and project positions in environmental sciences, ecology and restoration, crop and timber production, soil informatics, soil conservation, environmental pollution control, turf and grounds management, and land-use planning. Please contact the department for further information on career opportunities.

Students completing an undergraduate major in soil science earn a bachelor of science degree. A problem-solving "capstone course" that integrates knowledge gleaned from a diversity of courses is required.

## HOW TO GET IN

To declare this major, students must be admitted to UW-Madison and the College of Agricultural and Life Sciences (CALS). For information about becoming a CALS first-year or transfer student, see Entering the College (p. 44).

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies. For more information, contact the advisor listed in the Contact Box for the major.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF AGRICULTURAL AND LIFE SCIENCES REQUIREMENTS

In addition to the University General Education Requirements, all undergraduate students in CALS must satisfy a set of college and major requirements. Courses may not double count within university requirements (General Education and Breadth) or within college requirements (First-Year Seminar, International Studies, Science, and Capstone), but courses counted toward university requirements may also be used to satisfy a college and/or a major requirement; similarly, courses counted toward college requirements may also be used to satisfy a university and/or a major requirement.

## COLLEGE REQUIREMENTS FOR ALL CALS B.S. DEGREE PROGRAMS

| Code Title | Credits |
| :---: | :---: |
| Quality of Work: Students must maintain a minimum cumulative grade point average of 2.000 to remain in good standing and be eligible for graduation. |  |
| Residency: Students must complete 30 degree credits in residence at UW-Madison after earning 86 credits toward their undergraduate degree. |  |
| First Year Seminar (p. 46) | 1 |
| International Studies (p. 47) | 3 |
| Physical Science Fundamentals | 4-5 |
| CHEM 103 General Chemistry I <br> or CHEM 108 Chemistry in Our World <br> or CHEM 109 Advanced General Chemistry |  |
| Biological Science | 5 |
| Additional Science (Biological, Physical, or Natural) | 3 |
| Science Breadth (Biological, Physical, Natural, or Social) | 3 |
| CALS Capstone Learning Experience: included in the requirements for each CALS major (see "Major Requirements") (p. 48) |  |

## MAJOR REQUIREMENTS

Courses may not double count within the major (unless specifically noted otherwise), but courses counted toward the major requirements may also be used to satisfy a university requirement and/or a college requirement. A minimum of 15 credits must be completed in the major that are not used elsewhere.

| Select one of the following courses: |  | 3-4 |
| STAT 371 | Introductory Applied Statistics for the Life Sciences (recommended) |  |
| STAT/F\&W ECOL/ HORT 571 | Statistical Methods for Bioscience I |  |
| Chemistry |  |  |
| Select one of the following options: |  | 5-9 |
| Option 1: |  |  |
| CHEM 103 <br> \& CHEM 104 | General Chemistry I and General Chemistry II |  |
| Option 2: |  |  |
| CHEM 109 | Advanced General Chemistry |  |
| Biology |  |  |
| Select one of the following options: |  | 10 |
| Option 1 (recommended): |  |  |
| BOTANY/ BIOLOGY 130 | General Botany ${ }^{2}$ |  |
| ZOOLOGY/ BIOLOGY 101 | Animal Biology |  |
| ZOOLOGY/ BIOLOGY 102 | Animal Biology Laboratory |  |
| Option 2: |  |  |
| BIOLOGY/ BOTANY/ ZOOLOGY 151 | Introductory Biology |  |
| BIOLOGY/ BOTANY/ ZOOLOGY 152 | Introductory Biology |  |
| Option 3: |  |  |
| BIOCORE 381 | Evolution, Ecology, and Genetics |  |
| BIOCORE 382 | Evolution, Ecology, and Genetics Laboratory |  |
| BIOCORE 383 | Cellular Biology |  |
| BIOCORE 384 | Cellular Biology Laboratory |  |
| Core |  |  |
| SOIL SCI 301 \& SOIL SCI 302 | General Soil Science and Meet Your Soil: Soil Analysis and Interpretation Laboratory | 4 |
| SOIL SCI 325 | Soils and Landscapes | 3 |
| Select one of the follo | wing courses: | 3 |
| SOIL SCI 321 | Soils and Environmental Chemistry |  |
| SOIL SCI 621 | Soil Chemistry |  |
| SOIL SCI/ AGRONOMY/ HORT 326 | Plant Nutrition Management |  |
| SOIL SCI/ BOTANY/ HORT 626 | Mineral Nutrition of Plants |  |

| Select one of the following courses: |  | 3 |
| :---: | :---: | :---: |
| SOIL SCI 322 | Physical Principles of Soil and Water Management |  |
| SOIL SCI 622 | Soil Physics |  |
| Select one of the following courses: |  | 3 |
| SOIL SCI/ <br> PLPATH 323 | Soil Biology |  |
| SOIL SCI/ MICROBIO 425 | Environmental Microbiology |  |
| SOIL SCI/ MICROBIO 523 | Soil Microbiology and Biochemistry |  |

## Specialization

Students must complete 1 of 3 specializations: 1 . 28-5
Environmental Soil Science 2. Soil and Food Systems 3.
Turf and Grounds (see below)

## Capstone ${ }^{3}$

Select one of the following courses: 3-4

| SOIL SCI 499 | Soil Management ${ }^{4}$ |
| :--- | :--- |
| ENVIR ST/ | Assessment of Environmental |
| SOIL SCI 575 | Impact |
| F\&W ECOL/A A E/ | Decision Methods for Natural |
| ENVIR ST 652 | Resource Managers |

Total Credits
1
Note that MATH 171 \& MATH 217 must be taken as a sequence.
2
BOTANY/BIOLOGY 130 is required by the Turf and Grounds Track.

## 3

Consult advisor to request permission to substitute another course for the Capstone requirement. Course must meet CALS Capstone Characteristics described in the Undergraduate Catalog and be approved by advisor and 116 Ag Hall.

4
SOIL SCI 499 capstone required for Turf and Grounds Track.

## SPECIALIZATIONS WITHIN THE MAJOR <br> ENVIRONMENTAL SOIL SCIENCE

C
Mathematics
Select one of the following courses: 5

| MATH 211 | Calculus |
| :--- | :--- |
| MATH 221 | Calculus and Analytic Geometry 1 |
| MATH 217 | Calculus with Algebra and |
|  | Trigonometry II |

## Physics

Select one of the following courses: 4-5

| PHYSICS 103 | General Physics (recommended) |
| :--- | :--- |
| PHYSICS 104 | General Physics |
| PHYSICS 207 | General Physics |
| PHYSICS 208 | General Physics |
| Chemistry |  |
| Select one of the following options: |  |

| Option 1: |  |  |
| :---: | :---: | :---: |
| CHEM 311 | Chemistry Across the Periodic Table |  |
| CHEM 327 or CHEM 329 | Fundamentals of Analytical Science Fundamentals of Analytical Science |  |
| Option 2: |  |  |
| CHEM 341 <br> \& CHEM 342 | Elementary Organic Chemistry and Elementary Organic Chemistry Laboratory |  |
| Option 3: |  |  |
| CHEM 343 <br> \& CHEM 344 <br> \& CHEM 345 | Organic Chemistry I and Introductory Organic Chemistry Laboratory and Organic Chemistry II |  |
| Physical Environment |  | 6-8 |
| Select one course from the following: |  |  |
| ATM OCN 100 | Weather and Climate |  |
| ATM OCN 101 | Weather and Climate |  |
| ATM OCN/ SOIL SCI 132 | Earth's Water: Natural Science and Human Use |  |
| GEOG/ ENVIRST 120 | Introduction to the Earth System |  |
| GEOG/ ENVIRST 127 | Physical Systems of the Environment |  |

1
Counts toward Soil Science Major Biology requirements, above.

## HONORS IN THE MAJOR

Students admitted to the university and to the College of Agricultural and Life Sciences are invited to apply to be considered for admission to the CALS Honors Program.

## Admission Criteria for New First-Year Students:

- Complete program application including essay questions

## Admission Criteria for Transfer and Continuing UW-Madison Students:

- UW-Madison cumulative GPA of at least 3.25
- Complete program application including essay questions

## HOW TO APPLY

The application is available on the CALS Honors Program website (https:// cals.wisc.edu/academics/undergraduate/current-students/honorsprogram/). Applications are accepted at any time.

New first-year students with accepted applications will automatically be enrolled in Honors in Research. It is possible to switch to Honors in the Major in the student's first semester on campus after receiving approval from the advisor for that major. Transfer and continuing students may apply directly to Honors in Research or Honors in the Major (after approval from the major advisor).

## REQUIREMENTS

All CALS Honors programs have the following requirements:

- Earn at least a cumulative 3.25 GPA at UW-Madison (some programs have higher requirements)
- Complete the program-specific requirements listed below
- Submit completed thesis documentation to CALS Academic Affairs

## REQUIREMENTS

To earn Honors in the Major, students are required to take at least 20 honors credits. In addition, students must take SOIL SCI 681 Senior Honors Thesis and SOIL SCI 682 Senior Honors Thesis when completing their thesis project; please see the Honors in Major Checklist (http:// www.cals.wisc.edu/academics/undergraduate-programs/get-involved/ honors-program/honors-in-the-major/) for more information.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. To instill in our undergraduate majors the knowledge base required for them to intelligently discuss, debate and communicate those aspects of soil science pertinent to their degree, specialization and career goals.
2. To provide our undergraduates with the skills and experience needed to identify and solve problems and issues of the types they may encounter in their professions.
3. To ensure that our undergraduates possess an awareness of and an appreciation for the potential impacts of soil, water, crop and waste management practices, and land use on the quality of the environment.

## ADVISING AND CAREERS

## ADVISING AND CAREERS

Students are assigned a faculty advisor once they declare the major. Prospective students should contact the undergraduate coordinator, Julie Garvin (jgarvin2@wisc.edu, 608-262-2239), with questions.

Most of our graduates find employment in a diversity of private and commercial enterprises and governmental agencies. Recent examples of employment include laboratory technician, turf and grounds manager, agrichemical sales representative, environmental scientist, land use planner, land zoning administrator, project manager, wetlands delineator, and hydrogeologist. Approximately $12 \%$ of our undergraduates pursue advanced degrees.

## PEOPLE

## FACULTY

## Associate Professor Francisco Arriaga

Applied Soil Physics, Soil and Water Management and Conservation: Conservation agriculture systems; development of conservation tillage practices that enhance soil quality, soil hydraulic properties, and plant water use through the adoption of cover crops and noninversion tillage for traditional cropping systems.

## Professor Nicholas Balster

Soil Ecology, Plant Physiological Ecology, and Education: Energy and material cycling in natural and anthropogenic soils including forests, grasslands, and urban ecosystems; stable isotope ecology; environmental education; nutrition management of nursery soils; tree physiology, production and response; ecosystem response to global change; urban ecosystem processes; invasive plant ecology; biodiversity.

## Professor Phillip Barak

Soil Chemistry and Plant Nutrition: Nutrient cycling; nutrient recovery from wastewater; molecular visualization of soil minerals and molecules; soil acidification.

## Assistant Professor Zachary Freedman

Soil microbiology, ecology and sustainability: Effects of environmental change on biogeochemical cycles; community ecology and trophic dynamics; forest soil ecology; soil organic matter dynamics; sustainable agroecosystems; bio-based product crop production on marginal lands.

## Professor Alfred Hartemink

Pedology, Digital Soil Mapping: Pedology; soil carbon; digital soil mapping; tropical soils; history and philosophy of soil science.

## Assistant Professor Jingyi Huang

Soil Physics, Proximal and Remote Sensing, Soil Monitoring and Management, Digital Soil Mapping: Application of proximal and remote sensing technologies for understanding the movement of water, heat, gas, and solutes in soils across different spatial and temporal scales; application of physical and empirical models for monitoring, mapping, and managing soil changes due to natural processes and human activities.

## Assistant Professor Inna Popova

Environmental soil chemistry; understanding and mitigating the response of soil systems to the increased pressure of organic contaminants; application of biopesticides; development of novel separation and analyses methods for contaminants in environmental matrices.

## Professor Matthew Ruark

Soil Fertility and Nutrient Management: Soil fertility and management of grain biofuel, and vegetable crops; cover crop management; agricultural production and water quality; sustainability of dairy cropping systems; soil organic matter management.

## Professor Douglas Soldat

Turfgrass and Urban Soils: Turfgrass, urban soils, nutrient management, water resources, soil testing, landscape irrigation; soil contamination.

## Assistant Professor Thea Whitman

Soil Ecology, Microbiology, and Biogeochemistry: Soil microbial ecology; organic matter decomposition and carbon stabilization; global environmental change; stable isotopes; linking functional significance of microbial communities with ecosystem processes; fire effects on soil carbon and microbes; management and policy.

## Assistant Professor Xia Zhu-Barker

Soil Biogeochemistry, Land Management, and Environmental Sustainability: Nitrogen and carbon biogeochemical cycles; greenhouse gas and air pollutant emissions; nitrate leaching and runoff; innovative manure and nutrient utilization; composting; climate change mitigation and adaptation; ecosystem services and carbon markets; dairy environmental sustainability; novel methods in isotopic techniques; mechanistic exploration of soil-plant-microbe interactions; process-based modelling. The specific research topics include:

- Microbial and abiotic processes involved in the production and consumption of nitrogen and carbon gases $\left(\mathrm{N}_{2} \mathrm{O}, \mathrm{NO}_{\mathrm{X}}\right.$, $\left.\mathrm{NH}_{3}, \mathrm{CO}_{2}, \mathrm{CH}_{4}\right)$
- Land management practices (e.g., compost, fertilizer, cover crops, irrigation, and tillage) that change soil health, nitrogen use efficiency, crop productivity, nitrogen losses, carbon turnover.
- Process oriented modelling of carbon/nitrogen turnover in agricultural ecosystems.
- Environmental changes on the sustainability and resilience of agricultural ecosystems especially dairy production systems.

## WISCONSIN EXPERIENCE

Students majoring in soil science are involved in an array of opportunities across campus. Students are highly encouraged to complement their coursework with out-of-classroom experiences such as research (https://soils.wisc.edu/research-programs/), volunteering (https:// morgridge.wisc.edu/), internships (https://cals.wisc.edu/academics/ undergraduate-students/outside-the-classroom/internships/), and study abroad (https://www.studyabroad.wisc.edu/).

## RESOURCES AND SCHOLARSHIPS

## RESOURCES AND SCHOLARSHIPS

Financial support-in the form of approximately 15 scholarships, parttime employment, paid internships, and work-study programs-is available to qualified undergraduate students. The department also provides opportunities and limited financial support in the form of research assistantships to qualified students seeking M.S. and/or Ph. D. degreessee the Graduate Guide (http://guide.wisc.edu/graduate/).

## COLLEGE OF ENGINEERING

Engineers design products and develop solutions to society's national and global challenges. The variety of engineering projects requires engineers to have an understanding of people and their values. Engineers blend their knowledge and practical experience with their communication and teamwork skills to work as members of diverse, multidisciplinary teams. Engineers frequently make decisions affecting the development of society and the direction it will take.

The University of Wisconsin-Madison College of Engineering is one of the best places in the world for an engineering education. The outstanding curriculum and the world-class faculty focus on providing students with the technological tools, resources, and knowledge to develop solutions to problems in fields ranging from medicine to energy to manufacturing-and many more.

In the classroom and in the lab, students study and grow their skills, yet they also enrich their academic experience outside of the classroom through opportunities such as international study, field research, internships, laboratory experience, and entrepreneurial opportunities.

Learning isn't confined to the classroom. It can happen anywhere-in the Engineering Hall study lounge, in the state-of-the-art makerspace, or in casual conversation on Engineering Mall. As Badger engineers, students are surrounded by some of the smartest, most innovative people in the world. The faculty do more than teach. They immerse students in interdisciplinary activities and offer real design challenges-and students can actually design and build products that solve those challenges.

In a college internationally renowned for its research, there also are many opportunities for undergraduate students to work directly with faculty members to propose and conduct research, and to publish and patent their results.

The Wisconsin Experience is not limited to academics. Across the university, there are many ways to get involved in the campus community.

From the UW Marching Band to student government, students can find a home at UW.

A College of Engineering education will not only offer students the time of their lives, it will also prepare them to change life as we know it.

## DEGREES/MAJORS/CERTIFICATES

- Architecture, Certificate (p. 259)
- Biology in Engineering for Engineering Majors, Certificate (p. 242)
- Biomedical Engineering, B.S. (p. 244)
- Chemical Engineering, B.S. (p. 252)
- Civil Engineering, B.S. (p. 260)
- Computer Engineering, B.S. (p. 283)
- Electrical Engineering, B.S. (p. 289)
- Engineering Data Analytics, Certificate (p. 304)
- Engineering for Energy Sustainability, Certificate (p. 336)
- Engineering Mechanics, B.S. (p. 317)
- Engineering Physics, B.S. (p. 338)
- Engineering Thermal Energy Systems, Certificate (p. 327)
- Environmental Engineering, B.S. (p. 270)
- Geological Engineering, B.S. (p. 275)
- Industrial Engineering, B.S. (p. 305)
- International Engineering, Certificate (p. 297)
- Manufacturing Engineering, Certificate (p. 328)
- Materials Science and Engineering, B.S. (p. 311)
- Mechanical Engineering, B.S. (p. 330)
- Naval Science, BNS (p. 298)
- Nuclear Engineering Materials, Certificate (p. 344)
- Nuclear Engineering, B.S. (p. 344)
- Technical Communication, Certificate (p. 300)

## PEOPLE

"If you think of the challenges that we face-energy, transportation, clean air and water, building the next generation of computing and communications technologies as we use up our raw materials-those are problems engineers must address. I'd like our students and faculty to take the leadership role in solving those problems in their classrooms and research."

## -Dean lan Robertson

COLLEGE OF ENGINEERING LEADERSHIP (HTTPS://ENGINEERING.WISC.EDU/ABOUT/ LEADERSHIP/)

Dean: Ian M. Robertson
Executive Associate Dean: David A. Noyce
Associate Dean and Chief Financial Officer: Adam Whitehorse
Associate Dean for Inclusion, Equity and Diversity: Chris Castro
Associate Dean for Academic Affairs: Kathy Prem
Associate Dean for Research and Graduate Affairs: Oliver Schmitz
Associate Dean for Interdisciplinary Professional Programs: Edward G. Borbely

Associate Dean for Advancement: Cathleen Walters

## ENTERING THE COLLEGE

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/
undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## POLICIES AND REGULATIONS

## REGULATIONS

Official regulations regarding enrollment, scholarship, and graduation for undergraduates in the College of Engineering.

A printer-friendly PDF can be found on the College of Engineering Regulations page (https://engineering.wisc.edu/student-services/ undergraduate-regulations/).

## ADMISSIONS

## 1. Direct Admission

New students are admitted directly to the degree program (major) of their choice or to the College of Engineering as Engineering Undecided. Progression requirements must then be satisfied as described in Regulations 3-7.

## 2. Degree Programs (Majors)

Biomedical Engineering (BME)
Chemical Engineering (CHE)
Civil Engineering (CEE)
Computer Engineering (CMPE)
Electrical Engineering (EE)
Engineering Mechanics (EM)
Engineering Physics (EP)
Environmental Engineering (EnvE)
Geological Engineering (GLE)
Industrial Engineering (IE)
Materials Science and Engineering (MSE)
Mechanical Engineering (ME)
Nuclear Engineering (NE)

## PROGRESSION

## 3. First Year Progression Requirements

To automatically progress in a College of Engineering (CoE) degree program (major) after direct admission or to switch between engineering degree programs, students must complete the following requirements after their first two semesters of residency at UWMadison:
A. 24 credits completed at UW-Madison. Special topics, independent study, seminar, pass/fail, and credit/no credit courses will not be included in the 24 credits except for required English as a Second Language courses.
B. General Education Communications Part A (Comm A) requirement. If Comm $A$ is not completed as a graded course at UW-Madison (i.e., completed through placement test, AP/IB, or transfer credit), then a liberal studies course of at least 3 credits with a breadth designation of Humanities, Literature, or Social Sciences must be taken on a graded basis at UW-Madison.
C. Introduction to Engineering: course specified by degree program or INTEREGR 170 Design Practicum for Engineering Undecided students.
D. Math course sequence through MATH 222 Calculus and Analytic Geometry 2 or MATH 276 Topics in Calculus II
E. Four core courses, required for engineering degree programs (majors), completed at UW-Madison, as defined below:

1. Math: A minimum of two math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above; or one math course 300 level or above. If the math requirement for the degree program (major) is complete or the student has completed the calculus sequence through MATH 234 Calculus--Functions of Several Variables, then additional math courses numbered MATH 217 Calculus with Algebra and Trigonometry II or above or additional courses from the science requirement in Regulation 3.E.2. can be taken to complete the four core course requirement. Excludes MATH 228 WES Calculus Supplement, MATH/HIST SCI 473 History of Mathematics, special topics, independent study, seminar, pass/fail, and credit/no credit courses.
2. Science: A minimum of two science courses required for engineering degree programs (majors) as defined below. If the math and science requirements for the degree program are complete, then departmental engineering courses 200 level and above can be taken to complete the four core course requirement. Excludes EPD, InterEGR, special topics, independent study, seminar, pass/fail, and credit/no credit courses.

> For Chemical Engineering majors, the following science requirements apply:
> i. One course must be CHEM 104 General Chemistry II or higher
> ii. One course must be PHYSICS 201 General Physics/E M A 201 Statics or higher

If above two requirements are completed, select from additional science courses below.

- For majors in Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Engineering Mechanics, Engineering Physics, Environmental Engineering, Geological Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, and Nuclear Engineering, the following science requirements apply:
i. One course must be either CHEM 104 General Chemistry II or higher OR PHYSICS 201 General Physics/E M A 201 Statics or higher
ii. One other science course, from the following:
- Chemistry, all classes
- E M A 201 Statics, E M A 202 Dynamics, M E 240 Dynamics
- PHYSICS 201 General Physics and above
- Statistics, calculus-based
- E P 271 Engineering Problem Solving I
- COMP SCI 200 Programming

I, COMP SCI 220 Data Science
Programming I, or COMP SCI 300
Programming II or above, excluding COMP SCI 304 WES-CS Group Meeting

- Excludes special topics, independent study, seminar, pass/fail, and credit/no credit courses
F. Core and Overall GPA requirements must be satisfied as defined by CoE departments for each engineering degree program (major) (Progression - College of Engineering - University of Wisconsin-Madison (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/)). All graded UW-Madison courses referenced in E.1. and E.2. above and any departmental engineering courses level 200 or above will be counted in the Core GPA (excludes EPD, InterEGR, special topics, independent study, and seminar courses). All graded UW-Madison courses are counted in the Overall GPA. For one and only one of these core courses that a student has repeated, the more recent of the two grades will be used in the calculation of Core and Overall GPAs. Students may not be on academic probation for GPA reasons for automatic completion of first year progression requirements.

Students who do not meet the first year progression requirements to automatically progress in a degree program (major) can be considered for non-automatic progression (Regulation 4) or extension (Regulation 5).

## 4. Consideration for Non-Automatic Progression

Students who do not meet progression GPAs but meet all other progression requirements will be considered for progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends.

## 5. Extension for First Year Progression Requirements

A. Students who will not meet progression requirements due to University of Wisconsin placement and/or assessment tests (math and ESL) will be granted a one semester extension up to their fourth semester if they are making satisfactory progress in a degree program (major).
B. Students who do not meet the requirements in Regulation 3 may apply for a one semester extension but not beyond their fourth semester. Students granted extensions will be considered for non-automatic progression in degree program (major). The consideration process includes review of written statement, rigor of completed courses, and grade trends. Extensions will be evaluated only in cases where it is mathematically possible during the one semester extension to meet progression GPAs for intended program.

## 6. Diversity of Student Body

When the number of non-automatic considerations and/or applications for admission to a degree program (major) exceed the capacity of that program, progression and admission will be limited to capacity. In order to implement the University's goals of achieving a heterogeneous and diverse student body, selection of students under consideration or admission to a program operating at capacity will be based on demographic background, written statement, rigor of completed courses, and grade trends.

## 7. Progression Requirement Completion and Extension Application

Students are required to submit to the dean's office an application for progression for a degree program (major) or an application for an extension by the deadline. Deadlines will be posted on the College of Engineering website at Progression Requirements (https://
engineering.wisc.edu/student-services/undergraduate-studentadvising/progression/) and emailed to students in the College of Engineering

## REGISTRATION

## 8. Definitions

A. Full-time student: One carrying a minimum credit load of 12 credits. All students are expected to be full-time unless they have the permission of the dean to be part-time. A student carrying less than the minimum credit load without the dean's permission will be placed on part-time warning at the end of the semester.
B. Part-time student: One who has the dean's permission to carry less than the minimum credit load (Regulation 9.F.).
C. Semester: A term of 15 weeks minimum duration.
D. Session: A term of less than 15 weeks duration (e.g., summer session or intersession).
E. Modular Course: A course that is offered during a semester, but which lasts fewer than 15 weeks.

## 9. Credit Load Constraints

A. Maximum credit load: 20 enrolled credits per semester.
B. Minimum credit load: 12 enrolled credits per semester or enrolled for one cooperative education program credit as an engineering co-op student during a co-op work period.
C. For sessions there is no minimum credit load; the maximum credit load equals the number of weeks in the session.
D. A student not on academic probation may freely choose to carry any number of credits between a minimum credit load and a maximum credit load.
E. A student may carry more than a maximum credit load only with the recommendation of an advisor and with written approval of the dean.
F. Part-time student: A student who wishes to carry less than a minimum credit load in a specific semester for definitive reasons -e.g., a verifiable disability, or a necessity of employment or other outside obligations exceeding 15 hours per week-must request permission from the dean to become a part-time student. Part-time permissions must be renewed during the first two weeks of each semester part-time permission is requested. Part-time students must satisfy all regulations other than the minimum credit load.
G. A student on academic probation is advised to carry not more than 14 credits per semester unless repeating a course. For every three credits being repeated, the student is advised to carry not more than one additional credit beyond 14 , up to a maximum of 16 credits.

## 10. Student Responsibility for Scheduling

Each student is responsible for arranging a course list that will permit satisfactory progress towards degree requirements and a class schedule that (a) avoids class and final exam scheduling conflicts, (b) avoids an excessively demanding final exam schedule, and (c) verifies registration in chosen classes.

## 11. Access to Courses

Departments may specify courses as not open to students who need to complete progression requirements, or as open only to students in a specific degree program (major).

## 12. Transfer of Degree Applicable Credits

A course taken anywhere other than UW-Madison, or by independent study or resident extension, is transferable to the College of Engineering, in credits only, if it is transferable to the UWMadison. The course counts toward graduation only if it satisfies a graduation requirement of the curriculum to which it is to be applied and only if it was passed with a grade of $C$ ( 2.0 on a 4.0 scale) or better.

## 13. Transfer of Grades

Grades for courses taken anywhere other than UW-Madison are not transferable, even if the credits for those courses are transferable.

## 14. Adding Courses

Students may add full-semester courses only during the first two weeks of classes (Regulation 19). The deadline to add a course is specified on the Office of the Registrar's website.

## 15. Dropping Courses

Students may drop full-semester courses during the first twelve weeks of classes. Courses dropped after the initial drop deadline are noted on the transcript as DR (Regulations 14, 19 and 22.G.). The deadlines to drop a course are specified on the Office of the Registrar's website.

## 16. Course Substitutions

A student may substitute courses that deviate from the requirements of a published curriculum of the College of Engineering upon the recommendation of the student's degree-granting department and with the approval of the college governance committee.

## 17. Pass/Fail and Credit/No Credit Courses

Pass/fail is a student-option alternative way of being graded in a regularly graded course. Credit/no credit describes courses approved for two-level grading and is not a student option.

A student may change the grading option of a full-semester course to or from pass/fail only during the first four weeks of classes. (Regulation 19). These courses must be free electives. Only students in good standing may elect the pass/fail privilege.

The pass/fail agreement is between the student and the Registrar, and is not revealed to the person teaching the course. The person teaching the course submits the appropriate letter grade to the Registrar, who converts C or higher grades to S (Satisfactory), D and F grades to U (Unsatisfactory).

Courses designated as credit/no credit will not be counted in determining the number of pass/fail courses the student may elect.

## 18. Audited Courses

A student may audit a course only if the instructor consents. Auditors are expected to attend with a reasonable regularity and to participate in the class, as determined by the instructor. Audited courses carry no degree credit, do not count in determining the minimum number of credits permitted in each term, and are not included in the calculation of the GPA. The only valid grade for audited courses is a grade of S (Satisfactory) or NR (No Report). A student may change to or from credit to audit only during the first four weeks of classes (Regulation 19).

## 19. Courses Scheduled for Fewer Than 15 Weeks

Deadlines for sessions and modular courses are listed on the Office of the Registrar's website.

## PERFORMANCE AND EVALUATION

## 20. Attendance

Each student is expected to attend all assigned classes during the regular meeting times, and take all of the examinations for those courses at the regularly scheduled times. In the case of course or examination absences excused for a reason acceptable to the course instructor, the student is expected to make up the work within a reasonable time, and may do so without a grade penalty.

## 21. Grading System

Course grades are reported by letter only; plus and minus grades are not authorized. The following grades are included in computing grade point average (GPA) and point-credit ratio (PCR).
Grade: A (Excellent)
Grade Points Per Credit: 4.0
Grade: AB (Intermediate)
Grade Points Per Credit: 3.5
Grade: B (Good)
Grade Points Per Credit: 3.0
Grade: BC (Intermediate)
Grade Points Per Credit: 2.5
Grade: C (Fair)
Grade Points Per Credit: 2.0
Grade: D (Poor)
Grade Points Per Credit: 1.0
Grade: F (Failure)
Grade Points Per Credit: 0.0

## 22. Special-Purpose Grades

The following ways of reporting course grades are also used and, except for NR, do not affect GPA or PCR
A. S (Satisfactory) or U (Unsatisfactory) - used to report pass/fail courses (Regulation 17). S is also used in audited courses (Regulation 18).
B. CR (Credit) or N (No Credit) - used to report credit/no credit courses (Regulation 17).
C. NR (No Report) - signifying that no grade has been reported to the Registrar's Office - a temporary grade that must be replaced by an A-F grade; also used for a permanent grade in audited courses (Regulation 18).
D. NW (No Work) - student enrolls in a course and then never attends. This means that instructor has no evidence that student ever attended.
E. I (Incomplete) - a temporary grade (Regulation 27); EI is used for an extended incomplete (requires a dean's action); IN is used to indicate an incomplete in a credit/ no credit course; PI is used for a permanent incomplete (Regulation 28).
F. P (Progress) - a temporary grade used for courses extending beyond one term. The final grade determines
the grade for each term and replaces $P$ grades for the course.
G. DR (Dropped) - indicates the course was dropped after the initial drop deadline noted on the Office of the Registrar's website.

## 23. Course Grade Changes

The final course grade may be changed only by the professor in charge of the course section, and then only to correct a clerical error in the computation or reporting of the original grade.

## 24. Grade Point Average (GPA) and Point-Credit Ratio (PCR)

Grade point average (GPA) is computed by dividing the total number of grade points earned at UW-Madison by the total number of credits attempted (excluding pass/fail or credit/no credit courses) at UW-Madison. The point-credit ratio (PCR) differs from the grade point average in that it involves only those credits that count toward graduation and the related grade points. When a course is repeated, the credits and grade points earned only for the final attempt are included in the point-credit ratio.

## 25. Dean's Honor List

At the end of each semester the names of all full-time students in good standing with a 3.5 or higher semester GPA and cumulative GPA of at least 3.0 and no incomplete or unreported grades will be included on the Dean's Honor List. Credit/no credit and pass/ fail courses are not considered in meeting the full-time standing requirement for the Dean's Honor List. Transcript will show a notation of "Dean's Honor List."

## 26. Repeating Courses

Any course may be repeated at the student's option. In the case of a required course in which the student earned a grade of $D$ and which is a prerequisite to another required course, the student is encouraged (or may be required by departmental regulation) to repeat the course. For courses taken more than once, all grades count in the grade point computations, but only the last grade for the course is applied to the student's point-credit ratio.

## 27. Incomplete

An incomplete may be reported for a student who has carried a subject with a passing grade, but because of illness or other unusual and substantiated cause beyond the student's control has been unable to complete the final examination or some limited amount of term work. A student who stays away from a final examination without proof of being prevented from attending as indicated above will receive a grade of $\mathrm{F}, \mathrm{N}$, or U (whichever is appropriate). Even with such proof, if the term work has convinced the instructor that the student cannot pass, the grade shall be $\mathrm{F}, \mathrm{N}$, or U (whichever is appropriate).

## 28. Resolution of an Incomplete

At the instructor's option, a course marked incomplete may be completed at any time no later than last day of class of the student's next semester of attendance at UW-Madison, or it will lapse into a fail. An incomplete may not be removed after five years of absence from UW-Madison without special permission of the dean. Such an incomplete remains on the record with a grade of Pl and does not lapse into an $\mathrm{F}, \mathrm{N}$, or U .

## 29. Final Exam Rescheduling

A student may be permitted to take an examination at other than the regularly scheduled time only with permission of the instructor. Permission will be granted only for illness or other unusual and substantiated cause beyond the student's control. (Regulation 10).

## 30. Withdrawal

Students may withdraw from the University after consulting with their advisor and with the approval of the Dean. The withdrawal date and a DR notation will be recorded for courses in progress if the student withdraws after the initial deadline to drop a course and before the withdrawal deadline (Regulations 14, 19 and 22.H.). The deadline to withdraw is specified on the Office of the Registrar's website.

A Medical Withdrawal may be granted to students who experience a serious or unexpected physical or behavioral health condition; who may need to provide care to an immediate family member who is experiencing a serious or unexpected physical or behavioral health condition; or who have experienced the death of an immediate family member. Approval will be granted on a case-by-case basis.

Withdrawals (other than Medical Withdrawals) are not granted in the last three weeks of scheduled classes. Grades of Incomplete, if justified (Regulation 27), or F, N, or U will be recorded for students who leave the University during this time.

## 31. Year Classification

The year classification of a student is determined by the number of credits passed and the number of grade points earned, applicable to the student's degree, as indicated by the following tabulation:

## Freshman

Numerical Classification of Year: 1
Minimum Credits Passed: 0
Minimum Grade Points Earned: 0

## Sophomore

Numerical Classification of Year: 2
Minimum Credits Passed: 24
Minimum Grade Points Earned: 48

## Junior

Numerical Classification of Year: 3
Minimum Credits Passed: 54
Minimum Grade Points Earned: 108

## Senior

Numerical Classification of Year: 4
Minimum Credits Passed: 86
Minimum Grade Points Earned: 172
For the purpose of year classification only, pass/fail and credit/no credit courses and courses transferred from another campus are assumed to have earned 2.0 grade points per credit.

## 32. Good Standing

A student is in good academic standing unless on academic probation or dropped.

## 33. Part-time Warning

A student is placed on part-time warning when that student has, in the semester just completed, passed fewer than 12 credits without permission from the Dean.

## 34. Probation

A student is placed on academic probation when that student has, in the semester just completed, attained less than a 2.0 GPA. Once on probation, the student is continued on probation until either removed from probation or dropped (Regulations 35, 36).

## 35. Removal From Probation

The following requirements must be satisfied for the removal of a student from academic probation (Regulation 34):
A. A cumulative GPA of at least 2.0;
B. A GPA of at least 2.0 for the semester just completed.

## 36. Drop

A. A student on academic probation will be dropped at the end of any semester for which that student has attained a GPA of less than 2.0 or passed fewer than half of the credits attempted (Regulation 34).
B. A student not on academic probation will be dropped at the end of any semester for which that student has passed fewer than half of the credits attempted.

## 37. Readmission

A student who has been dropped for academic reasons may be readmitted by the dean only after the student has been out of the College of Engineering for at least one semester.

## 38. Session Actions

No academic actions (part-time warning, probation, drop, removed from probation) will be taken at the end of sessions (Regulation 8.D.).

## 39. Graduation

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all the following graduation requirements have been met:
A. Have fulfilled the published graduation requirements of that curriculum, with all substitutions formally approved, and have achieved a minimum 2.0 GPA overall.
B. Have a PCR (Regulation 24) of at least 2.0 for those semesters and sessions containing the last 60 credits taken at UW-Madison or for all credits taken at UW-Madison if fewer than 60.
C. Have a departmental PCR of at least 2.0 for all courses taken in the degree-granting department that count toward graduation.
D. Have completed at least 30 credits in residence in the College of Engineering, including 15 credits of work in the degree-granting department.
E. Have completed the last two semesters in residence in the College of Engineering. Cannot be on co-op or study abroad in the last semester. Students may seek permission from the Dean to be on co-op or study abroad in their second to last-semester.
F. Have completed the last semester in the College of Engineering enrolled in courses required for their engineering degree.
G. Have a GPA of at least 2.0, both for the last semester and also for the combined last two semesters.

## 40. Graduation with Distinction and Highest Distinction

Students who have earned at least 60 credits on the University of Wisconsin-Madison campus and whose total cumulative GPA is in the top 5 percent of the College graduating class will receive the designation "Graduated With Highest Distinction," or if in the next 15 percent, "Graduated with Distinction." The appropriate designation is entered as a permanent record on the student's transcript.

## APPEAL

## 41. Appeal

The Dean of the College of Engineering has the authority to suspend or modify the operation of these regulations if their enforcement is judged to work an injustice to the student.

## POLICIES <br> ACCREDITATION

The following engineering undergraduate degree programs described in this catalog are accredited by the Engineering Accreditation Commission of ABET, www.abet.org (http:// www.abet.org/):

```
Biological Systems Engineering (with College of Agricultural
and Life Sciences)
Biomedical Engineering
Chemical Engineering
Civil Engineering
Computer Engineering
Electrical Engineering
Engineering Mechanics
Geological Engineering
Industrial Engineering
Materials Science and Engineering
Mechanical Engineering
Nuclear Engineering
```

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree students (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## ADDITIONAL MAJOR

Engineering students may earn an additional major and have the additional major noted on their transcript at the time of graduation. This includes most majors in the College of Letters \& Science as well as Health Promotion and Health Equity (HPHE), Education Studies, and Theatre \& Drama in the School of Education; and Global Health in the College of Agricultural and Life Sciences. To qualify, the student must have approval in advance from both the department offering the major and the academic dean of the College of Engineering. Students must satisfy all requirements for their declared additional major prior to or concurrently with the
engineering degree. For further details, contact the College of Engineering Dean's Office, 2640 Engineering Hall.

Adding additional majors from colleges other than the College of Letters \& Science and majors not approved in the College of Agricultural \& Life Sciences and the School of Education is not accepted. For example, majors such as art (School of Education) and forestry (College of Agricultural and Life Sciences) cannot be completed in conjunction with an engineering degree. Likewise, students cannot pursue more than one undergraduate engineering degree concurrently.

## STUDENT GRIEVANCES

In compliance with Title IX regulations, the College of Engineering has a grievance procedure to handle student complaints. Students should follow these steps until a resolution is achieved:

1. Attempt to resolve the grievance directly with the individual involved.
2. If that approach seems unsatisfactory, and the grievance involves a teaching assistant (TA), consult the professor in charge of the course.
3. If necessary, discuss the grievance with the appropriate department chair.
4. The next level involves the academic dean. Students should contact the Associate Dean for Academic Affairs, 608-262-5511.
5. All students have the right to appeal to the dean of the college, Ian Robertson, 608-262-3482, if they feel their case has not been justly handled by another dean.
6. Only a few grievances are really serious and difficult to resolve. In these instances, the dean seeks a solution that, as best as can be determined, is appropriate, just, legal and in the best interests of all concerned.

## AUTHORITY LIMITS ON GRADES

There are areas in which the dean does not have authority to override an instructor, such as determination of a student's grade. However, it has happened that the department chair has intervened, for example, by having a grade determined by committee rather than by the course instructor.

It has also occurred, by agreement between deans, department chairs and faculty, that a misgraded course was dropped from the student's record and credit given for the controversial course by having the student pass the next higher course.

## GRIEVANCE EXAMPLES

The following is a list of student grievances (in no particular order of frequency or importance) that have occurred:

- Discrimination based on sex, religion or political views
- Course or exam grade disputes
- Required class or examination attendance at other than regularly scheduled (timetable) times
- Changes in course content contrary to catalog description or division approval
- Difficulty in obtaining space in a critical course
- Personality conflicts between student and instructor
- Difficulty obtaining an appointment with instructor
- Unwillingness of instructor to estimate a grade before the course drop deadline date
- Teaching above the level of the class, which includes the assumption of an unlisted course prerequisite
- Intelligibility of instructors, especially those for whom English is a second language
- Excessive instructor class absences
- Rescheduled final exams by majority approval or apparent unanimity, to possible disadvantage of the minority
- Sexual harassment (Contact the Division of Student Life, 75 Bascom Hall, 608-263-5700; or the Associate Dean for Academic Affairs, 608-262-5511)

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits

- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## ENGINEERING CURRICULA

The graduation requirements for each of the engineering degrees are presented in the form of four-year programs of study. These four-year schedules are available, but rarely followed without deviation. Some students can proceed more rapidly; many must proceed more slowly and take nine or more semesters to complete the degree. Flexibility in course selection is also present though elective categories within curricula.

## All engineering curricula are designed to meet all criteria for accreditation by the Engineering Accreditation Commission of ABET, www.abet.org (http://www.abet.org/). Among other criteria, ABET requires that students complete:

- A minimum of 30 semester credit hours (or equivalent) of a combination of college-level mathematics and basic sciences with experimental experience appropriate to the program.
- A minimum of 45 semester credit hours (or equivalent) of engineering topics appropriate to the program, consisting of engineering and computer sciences and engineering design, and utilizing modern engineering tools.
- A broad education component that complements the technical content of the curriculum and is consistent with the program educational objectives.
- A culminating major engineering design experience that 1) incorporates appropriate engineering standards and multiple constraints, and 2) is based on the knowledge and skills acquired in earlier course work.

Engineering curricula continuously evolve. The requirements that apply to a particular student are determined by the date (catalog year) that a student enters a degree-granting program. At that point, the curriculum becomes fixed throughout the period it takes for a student to complete the degree, although new changes that benefit a student can be adopted by a particular student if he or she so chooses.

The curricular descriptions below do not address how these requirements are satisfied; students seldom need to be concerned with these details. However, if deviations from a curriculum are requested, they must not violate any of the accreditation requirements.

## DEVIATION FROM PRESCRIBED CURRICULA

Circumstances deemed acceptable for deviating from the outlined engineering curricula are included in each departmental description. The choice of courses to fulfill elective credit requirements provides students with considerable flexibility in their programs. In addition, some departments permit the substitution of elective courses for required ones and also offer outstanding undergraduate students the opportunity to enroll in graduate courses. These options aid the student in tailoring a course of study to meet personal goals more closely.

## DEFINITION OF ELECTIVES

There are general types of elective courses including technical electives, liberal studies and free electives.

Technical electives are limited to courses in engineering and closely related fields.

Liberal studies electives are those courses that are classified as either humanities, literature, social studies or as foreign language.

Free electives are courses completely free of any restrictions or requirements other than the course prerequisites.

Other specific elective requirements are established and described in department curricula.

To assist the student in gaining a better understanding of individuals and societies, and to reduce problems of transferring from one curriculum to another, engineering curricula require adherence to the Liberal Studies Guidelines (see below). Some require slight variations from those guidelines.

## INDEPENDENT STUDY

Students who have high grade point averages may satisfy some elective credits by independent study of subjects or problems suitable for analytical investigative work. The student must identify a professor who is willing to supervise study of interest to the student. Together they must agree upon the work to be done, the credits earned (usually 1-3), and the
course number (199, 299, 399, 499, 599, or 699) for which the student is to enroll before the beginning of a semester. Weekly meetings with the professor to discuss questions and report progress are customary.

## LIBERAL STUDIES GUIDELINES

The College of Engineering requires one semester's worth of liberal elective courses in humanities, literature and social science for graduation. The college specifies that students should obtain both breadth (i.e., both social science and literature or humanities), and depth (i.e., more than one course in the same department).

The college has established general liberal elective guidelines that have been adopted by all departments, some of which have additional stipulations (see below).

## FOR ALL ENGINEERING STUDENTS

As a graduation requirement, and to fulfill campus general education guidelines, all engineering undergraduate students must take 15 or 16 credits of liberal electives. These credits must fulfill the following subrequirements.

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectarea/) (the description before the course number). At least one of these two courses must be above the elementary level (i.e., must have I, A, or D level designator), as indicated in Guide (https://guide.wisc.edu/ courses/).
2. A minimum of 6 credits designated as humanities or literature, and an additional minimum of 3 credits designated as social science. Foreign language courses count as humanities credits. ${ }^{1}$
3. At least one course of at least 3 credits designated as ethnic studies (lower case "e" in the Course Guide). These credits may help satisfy subrequirements 1 or 2 as well, but they count only once toward the total required credits.

1
Exception: "Retrocredits," which are credits awarded by foreign language departments for successful completion of a higher level course, do not count toward this subrequirement, nor toward the total credits required (15 or 16). They are still helpful: If a student completes one foreign language course at the intermediate level and is awarded retrocredits, then subrequirement 1 above is satisfied because the student is judged to have achieved "depth" in liberal studies.

## ADDITIONAL RESTRICTIONS/ SUBREQUIREMENTS FOR SPECIFIC DEPARTMENTS

Civil and Environmental Engineering: An economics course
(from an approved list) and an environmental studies course (with approved characteristics) are required.

Industrial Engineering: ECON 101 Principles of Microeconomics or ECON 111 Principles of Economics-Accelerated Treatment is required.

## RESOURCES

The solutions to challenges great and small lie not in the hands of one person, but emerge from the diverse ideas, perspectives, and backgrounds of many people working together. Whether a prospective or current faculty member, staff member, or student, members of the College of Engineering create a welcoming community where they can be themselves
and strive to become whatever they want to be. Here are some of the services and organizations that students can utilize along the way.

## ENGINEERING SCHOLARSHIPS

The College of Engineering awards over two million dollars in scholarships each year to its students.

Incoming Freshman Awards: Beginning in 2021-2022, there is no longer a separate scholarship application for incoming freshmen. The admissions applications of admitted students will be reviewed and selection will be based on students' academic record, extracurricular activities, application essays, and letters of recommendation. This new process pertains to both scholarships that are based on need and those which are not based on need. Learn more about College of Engineering scholarships for incoming first-year students, which include the STAR, LEED, Engineering Freshman Awards, and Departmental Scholarships, here: https://engineering.wisc.edu/admissions/scholarships/. Additional details about LEED scholarships (Leaders in Engineering Excellence and Diversity), can also be found in the Inclusion, Equity, and Diversity Student Center (IEDE Student Center) section below.

Scholarship award considerations are based on a holistic approach that encourages diversity in the programs while considering course rigor and compatibility and potential for success in the program. Financial need can be a factor for some scholarships based on their Free Application for Federal Student Aid (FAFSA $)$. Students must submit a FAFSA to UWMadison in order to be considered for need-based scholarships. For more information on the FAFSA, please refer to the Office of Student Financial Aid website: https://financialaid.wisc.edu/applying/.

Continuing Student Awards: Each spring, continuing undergraduate students in the College of Engineering are eligible to apply for collegewide and departmental scholarships. The application period is midFebruary through mid-April and students must have progressed in their department to be considered for awards for the following academic year. Students can apply by visiting the Wisconsin Scholarship Hub (WiSH) (https://wisc.academicworks.com/).

Off-campus Transfer Students: There is no longer a separate scholarship application for incoming off-campus transfer students. The admissions applications and transcripts of admitted off-campus transfer students will be reviewed for scholarship opportunities. Each semester, several scholarships are awarded to recognize the outstanding achievements of incoming transfer student scholars who join the College of Engineering from other colleges and universities.

## ACADEMIC ADVISING

Each College of Engineering program has academic advisors (https:// engineering.wisc.edu/student-services/undergraduate-studentadvising/) dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues, and more. Students can find their assigned advisor in their student center.

## UNDERGRADUATE LEARNING CENTER

The Undergraduate Learning Center (https://engineering.wisc.edu/ student-services/undergraduate-learning-center/) (ULC) in the College of Engineering provides tutoring and academic support programs for engineering undergraduates wanting to excel in their courses. The ULC is a place where students study, form study groups, and discuss engineering concepts and problem-solving strategies with their peers and with the tutors and facilitators.

## Drop-In-Tutoring Sessions

Sessions are offered for over 60 courses in mathematics, chemistry, physics, statistics, computer sciences, and engineering. The sessions provide help with homework problems, concept review, and exam preparation. Drop-in tutoring sessions are offered each evening from Sunday to Thursday, resulting in approximately 15,000 student visits in a typical year.

## PrEPS (Practicing Engineering Problem Solving) Labs

Labs were developed to help students succeed in core courses that have traditionally proved challenging for students. The courses targeted are early in the engineering curricula and contain dense material content delivered at a fast pace. The labs reinforce concepts through practicing problem solving skills. Students commit to meeting twice every week for 75 minutes per meeting.

## Tutoring by Request

Based on the Tutorial Services Room model developed at MIT, the College of Engineering offers Tutoring by Request (TBR) for students in critical need. Assistance is offered in a variety of courses, ranging from gateway courses such as chemistry, math, physics courses, to intermediate-level engineering courses.

## Special Courses and Workshops

Special courses are targeted toward helping students learn topics that span multiple courses such as math concepts common to a variety of introductory engineering courses. Self-guided online tutorials are available for several early math courses. Workshops are offered in topics such as MATLAB, $R$, and vector review to help students be successful in their engineering courses. Availability varies by semester.

## STUDY ABROAD

In today's global marketplace, there is an increasing need for broadly educated engineering graduates with cross-cultural skills, international understanding, and proficiency in more than one language. International Academic Programs (IAP) and the College of Engineering are committed to providing and expanding international opportunities that will assist engineering students in obtaining these important skills.

International Academic Programs, in collaboration with the College of Engineering, offers semester, year-long, and summer study abroad programs for engineering students (https://studyabroad.wisc.edu/ programsearch/?advisinglocation=103), and additional opportunities (https://studyabroad.wisc.edu/programsearch/?AreaOfFocus=77788) on which engineering students can complete degree requirements through other units at institutions in many countries around the world. These programs offer engineering students the opportunity to continue to make progress toward degree requirements and have a meaningful experience abroad.

The College of Engineering also offers a Certificate in International Engineering. Courses in language and culture taken abroad and in Madison can count toward this certificate, which demonstrates the student's knowledge of a specific country or region. This credential appears on the student's transcript, strengthens their resume, and testifies to their preparation for an international career.

For more information regarding international programs, visit studyabroad.wisc.edu (https://studyabroad.wisc.edu/).

## ENGINEERING CAREERSERVICES WITH COOPERATIVE EDUCATION

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website (https://ecs.wisc.edu) or call 608-262-3471.

## INCLUSION, EQUITY, AND DIVERSITY IN ENGINEERING STUDENT CENTER

The Inclusion, Equity, and Diversity in Engineering Student Center (IEDE Student Center) (https://engineering.wisc.edu/about/inclusion-equity-and-diversity/) exists to affirm a sense of belonging for all students, striving to create a welcoming and supportive campus community for students from historically underrepresented groups in the field of engineering, including women, students from racially and ethnically diverse backgrounds, LGBTQ+, first generation, and socioeconomically disadvantaged student populations.

In partnership with units across campus, the IEDE Student Center develops and implements student-centered programs and services that foster an inclusive campus community; it offers a space and place for intercultural and cross-cultural engagement as well as opportunities for students to make meaningful connections with others. The center provides students a comfortable place to study with access to computers and printers, and a place to be their genuine and authentic selves.

The IEDE Student Center also works closely with the UW-Madison chapters of the National Society of Black Engineers (NSBE), Queer and Trans Engineers (QTE), Society of Hispanic Professional Engineers (SHPE), and the Society of Women Engineers (SWE).

## Undergraduate Programs

The Leaders in Engineering Excellence and Diversity (LEED) Scholars is a community and scholarship program providing students with monthly student development meetings, adjunct academic advising, peer mentoring and networking, personal and career development, leadership and community outreach opportunities, and engagement in social justice. LEED Scholars events are open to any student interested in engaging in a diverse learning community.

## High School Programs and Outreach

The IEDE Student Center, with the help of undergraduate student leaders, offers engineering outreach visits on campus and at high schools. In the summer, we offer residential and virtual programs for high school students, including the Engineering Summer Program and Engineering Tomorrow's Careers (Society of Women Engineers).

## Other Programs

The IEDE Student Center develops programs designed to promote a welcoming climate that celebrates the diversity of all students in the College of Engineering. The variety of events and projects includes History Month Lunch and Learns, Student Success Summit, and the Diversity in Engineering Welcome events.

## COMPUTER-AIDED ENGINEERING CENTER

The Computer-Aided Engineering Center (CAE) (http:// www.cae.wisc.edu) provides computing resources, facilities, and services for students, faculty, and staff in the college. The broad range of services and resources include:

- Windows and Linux computer classrooms;
- open labs which have Windows and Linux workstations;
- industry-standard engineering software;
- software and services available on students' personal computers;
- reliable file storage for coursework;
- customer consulting and help-desk services.

The CAE walk-in help desk is located at 1410 Engineering Drive; 608-262-5349; submit contact form: https://www.cae.wisc.edu/ contact/. For more information, see the CAE website (http:// www.cae.wisc.edu).

## WELLNESS SERVICES

University Health Service's mental health (https://www.uhs.wisc.edu/ mental-health/) providers understand the complexities of student life and offer an open, safe, and confidential environment to help students through issues that may interfere with their development, well-being, and academic productivity.

UHS's no-cost mental health services include individual, couple/partner, group counseling, outreach programming, and stress management. They also offer $24 / 7$ crisis services. Psychiatry services are also available for medication management.

```
University Health Services/Mental Health Services
333 East Campus Mall
Madison, WI 53715-1384
608-265-5600
```

## REGISTERED STUDENT ORGANIZATIONS

The College of Engineering has just as many opportunities outside the classroom as it does inside. CoE students have access to a wide variety of groups, organizations, and services that will help make their time on campus memorable and unique. There are more than 50 engineering affiliated student organizations (https://engineering.wisc.edu/student-life/student-organizations/) on campus. Students can get involved in organizations that range from competitive, such as teams that build and race vehicles or concrete canoes, to service-oriented, honors societies, and student government. The College of Engineering also offers many discipline-related student chapters of professional organizations that will connect students with their peers and also help them make professional contacts.

## EMERGING LEADERS IN ENGINEERING

The Emerging Leaders in Engineering (ELE) program is the College of Engineering's undergraduate leadership program.

ELE is a one-year cohort-based program created by engineering students, for engineering students. Students who graduate from the ELE program are awarded a formal leadership certificate by the UW-Madison Center for Leadership and Involvement.

Those who are admitted into the program receive individual leadership coaching, join our young alumni mentorship program, create a personal/ professional development plan, work on local technical issues in our
community, and receive course credit for their experience. Any student going into their sophomore year is encouraged to apply.

For more information please contact Angela Kita (amkita@wisc.edu) or visit our website (https://engineering.wisc.edu/student-life/student-organizations/student-leadership-program/).

## HONORS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates-not just a few-excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

## ENGINEERING HONORS IN RESEARCH

Select students in certain degree-granting departments may pursue the Honors in Research distinction. It requires completion of a certain number of semesters of faculty-guided independent study work and completion of a written thesis. Honors in Research programs have been developed for majors in biomedical engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, engineering mechanics, geological engineering, industrial engineering, materials science and engineering, mechanical engineering, and nuclear engineering. Interested students should contact their department for more information.

## ENGINEERING HONORS IN THE LIBERAL ARTS (EHLA)

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters \& Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (https://docs.google.com/forms/d/ e/1FAlpQLSfgNM66tru6Y69xxCmjN5ea34avLOOgc73t8crCdQoSoLW3gw/ viewform/) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "!" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters \& Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

## BIOMEDICAL ENGINEERING

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists, mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

## BIOLOGY IN ENGINEERING FOR ENGINEERING MAJORS, CERTIFICATE

The biology in engineering certificate (BEC) is designed for engineering students who want to strengthen their biology backgrounds. It is offered especially to encourage engineering students in traditional disciplines to prepare themselves to understand the special engineering problems in biology and medicine. A student successfully fulfilling the requirements will have the notation "Biology in Engineering Certificate" added to the transcript.

## HOW TO GET IN

The Biology in Engineering Certificate was designed and is administered by a Biology in Engineering Certificate Committee composed of faculty from multiple engineering disciplines. Students normally should begin the program during their sophomore or junior year, but seniors may also apply.

Prerequisites to enter the certificate program:

- Prior admission to an engineering B.S. degree program (http://guide.wisc.edu/undergraduate/engineering/ \#degreesmajorscertificatestext) or Biological Systems Engineering (http://guide.wisc.edu/undergraduate/agricultural-life-sciences/ biological-systems-engineering/biological-systems-engineeringbs/) through the College of Agricultural and Life Sciences (http:// guide.wisc.edu/undergraduate/agricultural-life-sciences/) at the UWMadison.
- Students pursuing an undergraduate degree at UW-Madison need to have completed at least one intermediate-level (minimum 200-level) engineering course.

Click here (https://go.wisc.edu/bme-bec-application/) for certificate application.

## REQUIREMENTS

The certificate requires a minimum of 15 credits:

| GENERAL BIOLOGY:5 CREDITS |  |  |
| :--- | ---: | ---: |
| Code | Title | Credits |
| Choose one combination: | 5 |  |
| BIOCORE 381 Evolution, Ecology, and Genetics <br> \& BIOCORE 382 and Evolution, Ecology, and <br> Genetics Laboratory | 5 |  |

## SEMINAR: 1 CREDIT

Code Title Credits
B M E 517 Biology in Engineering Seminar ..... 1
Total Credits ..... 1

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Develop an understanding of basic biology and a selected area of advanced biology.
2. Develop an understanding of the challenges in biology, medicine, public health, and environmental health that are currently being addressed by engineering research and development.
3. Demonstrate proficiency in the application of engineering principles to solve problems in the field based on biological principles.

## BIOMEDICAL ENGINEERING, B.S.

Biomedical engineering (BME) is the application of engineering tools for solving problems in biology and medicine. It is an engineering discipline that is practiced by professionals trained primarily as engineers, but with a specialized focus on the medical and biological applications of classical engineering principles. BMEs apply their multidisciplinary expertise to problems such as designing new medical instruments and devices, understanding and repairing the human body, and applying resourceful and cross-disciplinary approaches to age-old problems in the fields of medicine, biology, and beyond. A biomedical engineer can expect to work in a wide variety of multidisciplinary teams with professionals such as physicians, biologists, researchers, nurses, therapists,
mathematicians, administrators, and many others while working in industry, as entrepreneurs, and in the medical profession and academia.

To prepare students for such careers, the 128-credit, four-year BME undergraduate degree emphasizes engineering design; access to cooperatives/internships at local or national medical device manufacturers, hospitals, or laboratories; continuous advising; flexibility in engineering specialization areas; participation in program evaluation and improvement; study-abroad opportunities; and an option to complete a one-year M.S degree following the undergraduate program.

The backbone of the BME program is its unique, seven-semester design curriculum. Students take an advising/design project course the freshman year and every semester during the sophomore through senior years. A faculty member advises small teams of students, serving as advisor/consultant/mentor, to guide them through real-world design projects solicited from clients throughout the university, medical profession, industry, and the community. These clients serve as resources for students in their project, conduct discussions, and expose the students to various aspects of the BME field. Over the course of each semester, teams design, fabricate, and ultimately present a product that meets the needs of the client. This novel approach gives students an exceptionally balanced education by incorporating clinical and biomedical industry experience, thus expanding their network. Overall, the design experiences highlight the very multidisciplinary nature of BME.

Within the program, BME students choose a course of study that emphasizes one of the following four specializations within the field:

1. Bioinstrumentation and medical devices is the application of electronics, measurement principles, and techniques to develop devices used in diagnosis and treatment of disease. Examples include the electrocardiogram, brain-computer interface, implantable electrodes, sensors, tumor ablation, and other medical devices. Neuroengineering, a subfield, involves using engineering technology to study the function of neural systems and the development of implantable technology for neuroprosthetic and rehabilitation applications.
2. Biomedical imaging and optics involves the design and enhancement of systems for noninvasive anatomical, cellular, and molecular imaging. In addition to common imaging techniques such as magnetic resonance imaging (MRI), computed tomography (CT), and positron emission tomography (PET), biomedical imaging includes topics such as biophotonics, optics, and multimode imaging, and is now expanding to serve functional and therapeutic purposes as well. Advanced capabilities result when fundamentals of engineering, physics, and computer science are applied in conjunction with the expertise of clinical collaborators.
3. Biomechanics applies engineering mechanics for understanding biological processes and for solving medical problems at systemic, organ, tissue, cellular, and molecular levels. This includes the mechanics of connective tissues (ligament tendon, cartilage and bone) as well as orthopedic devices (fracture fixation hardware and joint prostheses), vascular remodeling (pulmonary hypertension), muscle mechanics with injury and healing, human motor control, neuromuscular adaptation (with age, injury, and disease), microfluidics for cellular applications, cellular motility and adhesion, and rehabilitation engineering.
4. Biomaterials, cellular and tissue engineering involves the characterization and use of structural materials, derived from synthetic or natural sources, to design medical products that safely interact with tissues for therapeutic or diagnostic purposes such as artificial blood
vessels, heart valves, orthopedic joints, and drug delivery vehicles. Tissue engineers understand structure-function relationships in normal and pathological tissues to engineer living tissues and/or biological substitutes to restore, maintain, or improve function. At the cellular and molecular level this includes the study or manipulation of biological processes such as the cell's differentiation, proliferation, growth, migration, apoptosis, and can involve genetic and stem cell engineering.

Although the various disciplines within BME can be separately defined, solving a biomedical program requires an overall understanding of the field. For example, the design of an artificial hip requires an understanding of the forces and biomechanics of human movement as well as the mechanical and material properties of the prosthetic device. The material choice and topography play a critical role in cellular and tissue integration, which ultimately leads to long-term stability of the implant. In addition,
biomedical imaging techniques are required to characterize the morphology of the diseased hip and the success of the procedure. Finally, instrumentation devices are utilized during the hip replacement surgery.

Students choose the biomedical engineering field to be of service to people; for the excitement of working with living systems; and to apply advanced technology to the complex problems of medical care. Students in the BME program can expect to develop skills in innovative thinking, critical analysis of ethics, project management, and technical writing, all in an environment that cultivates creativity, teamwork, and curiosity. With many possible focuses within the major, BME students have the opportunity to explore and cultivate their interests in specific topics while applying the concepts of engineering to medical applications, hands-on projects, and cutting-edge research.

Students successfully completing the B.S. degree in BME with an overall GPA of 3.0 or a GPA of 3.25 for the last 60 credits of the B.S. program are eligible to apply for the one-year M.S. degree.

## BIOMEDICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

We recognize that our graduates will choose to use the knowledge and skills that they have acquired during their undergraduate years to pursue a wide variety of career and life goals, and we encourage this diversity of paths. Whatever path graduates choose, be it a job, postgraduate education, or volunteer service, be it in engineering or another field, we have for our graduates the following objectives; that they will:

1. exhibit strong skills in problem solving, leadership, teamwork, and communication;
2. use these skills to contribute to their communities;
3. make thoughtful, well-informed career choices; and
4. demonstrate a continuing commitment to and interest in their own and others' education.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to
meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education
requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

| CRB 650 | Molecular and Cellular Organogenesis |  |
| :---: | :---: | :---: |

| Engineering technical elective: Any engineering course(s) from a degree-granting engineering program ${ }^{2}$ |  | 2 |

## Total Credits

Students transferring from other engineering majors may count their previous program's introduction to engineering course(s) here (CBE 150 Introduction to Chemical Engineering, E C E 210 Introductory Experience in Electrical Engineering, E C E/COMP SCI 252 Introduction to Computer Engineering, G L E 171 Introduction to Geological Engineering, INTEREGR 170 Design Practicum, I SY E 191 The Practice of Industrial Engineering, M E 201 Introduction to Mechanical Engineering, M S \& E 260 Materials Experience, and NAV SCI 301 Naval Engineering).

## 2

The number of credits in this area can range from 2 or more such that at least 2 credits are met here and 48 engineering credits are met overall. This number of credits depends on how students decide to fulfill various requirements when they enter or progress into program, and if they study abroad. Examples that may add additional credits include (and are not limited to): Taking PHYSICS 201 General Physics instead of E M A 201 Statics may add 3 credits. Transfer students are not required to take INTEREGR 170 Design Practicum, which may add 3 credits. Students who study abroad may miss a design course which may add credit. Regardless of the choices made, all students must have at minimum 48 credits of engineering courses from degree-granting programs.

- InterEGR courses are not included in this category except INTEREGR 170 Design Practicum.
- Only 3 credits of an engineering independent study may count (e.g., B M E 399 Independent Study, B M E 489 Honors in Research, CBE 699 Advanced Independent Studies, etc.).
- Special topics courses must have prior approval of the B M E Curriculum Committee.

## BIOMEDICAL ENGINEERING AREA TECHNICAL ELECTIVE REQUIREMENTS

- Choose 15 credits of area technical electives in one of the following areas below.
- Choose at least one advanced B M E elective from any area below.
- Introduction to engineering courses (CBE 150, E C E 210, E C E/ COMP SCI 252, G L E 171, INTEREGR 170, I SY E 191, M E 201, M S \& E 260, and NAV SCI 301), seminar courses, and research credits cannot count in these areas. Special topics courses must have prior approval of the BME Curriculum Committee.

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

## TOTAL DEGREE CREDITS: AT LEAST 128 UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

## FOUR-YEAR PLAN

## 8

Students very serious about medical school or a career in research and learning about biology may select to apply for BIOCORE, a rigorous biology honors program:

- BIOCORE 381 Evolution, Ecology, and Genetics
- BIOCORE 382 Evolution, Ecology, and Genetics Laboratory
- BIOCORE 383 Cellular Biology
- BIOCORE 384 Cellular Biology Laboratory
- BIOCORE 485 Principles of Physiology
- BIOCORE 486 Principles of Physiology Laboratory

The BIOCORE courses have limited enrollment and students must be accepted into this program (applying as freshman). It is generally advisable to complete the entire sequence once it is started. Only BIOCORE 382 Evolution, Ecology, and Genetics Laboratory is not required and is not necessary to fulfill premed requirements; however, it is recommended as it has been helpful in understanding the BICORE lab process. If all the other BIOCORE courses are taken (a total of 16 cr ), this will replace the ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/ BIOLOGY 102 Animal Biology Laboratory, the Advanced Life Science Elective, ANAT\&PHY 335 Physiology, and fulfill the Communication B requirement.

## 9

Students interested in pre-health programs should take ZOOLOGY/ BIOLOGY/BOTANY 152 Introductory Biology or BIOCORE 384 Cellular Biology Laboratory to satisfy Communication Part B instead of B M E 301 Biomedical Engineering Design and Communication.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## ACCREDITATION

Accreditation.
Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## CHEMICAL AND BIOLOGICAL ENGINEERING

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand
the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

## CHEMICAL ENGINEERING, B.S.

Chemical engineers exploit advances in chemistry and biology to create new products, design chemical processes, develop energy resources, and protect the environment. Students receive a thorough grounding in chemistry, biology, mathematics and physics. With this broad scientific training, chemical engineers work effectively on a diverse set of problems involving chemical, physical, and biological phenomena. For example, chemical engineers develop environmentally benign and safe processes to make the chemical products that people depend on. They work in research and development laboratories, creating polymeric materials with improved performance and durability. They work in manufacturing, making vaccines and antibiotics. They invent new ways to keep our food and water supplies safe. Opportunities for chemical engineers span numerous industries: pharmaceuticals, polymers, energy, food, consumer products, biotechnology, and electronic and optical materials. Graduates understand the needs of society, and use their training in science and technology to meet those needs.

The chemical engineering program develops the student's capability for invention and analysis of chemical processes and products. Students in the program take several classes in chemistry, along with courses in physics, mathematics, and biology. The curriculum provides a rigorous education in the fundamental chemical engineering sciences of thermodynamics, transport phenomena, and kinetics, as well as more applied areas such as materials science, biochemical engineering, or chemical process design. Because engineers must be skilled communicators, the curriculum places
considerable emphasis on technical report writing, team projects, and formal and informal oral presentation. In addition, students broaden their understanding of people and society by taking several courses in the humanities and social sciences.

The B.S. program in chemical engineering leads to a wide variety of careers. Graduates are prepared for professional lives in industry, government, engineering design, or consulting companies. Graduates with a more practical, hands-on approach are employed in manufacturing support, process development, product development, design, construction, or technical sales. They rapidly advance to responsible technical supervisory and management positions. Graduates with a research interest work to improve understanding of scientific engineering principles, and to apply these principles to solve emerging problems. Entrepreneurial graduates work in smaller enterprises, or create their own businesses, developing the major industries of tomorrow. An undergraduate degree in chemical engineering provides a strong basis for advanced study in graduate school, or for further training in medicine, law, or policy.

## CHEMICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The department recognizes that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths.

Whatever path graduates choose, be it a job, graduate school, or volunteer service, be it in engineering or another field, within the next 5 years and beyond, we have for our graduates the following objectives:

1. That they will exhibit strong skills in problem-solving, leadership, teamwork, and communication;
2. That they will use these skills to contribute to their communities;
3. That they will make thoughtful, well-informed career choices; and
4. That they will demonstrate a continuing commitment to and interest in education (their own and others').

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The
student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

| General | - Breadth-Humanities/Literature/Arts: 6 credits |
| :--- | :--- |
| Education | - Breadth-Natural Science: 4 to 6 credits, consisting of |
| one 4- or 5-credit course with a laboratory component; |  |
|  | or two courses providing a total of 6 credits |
|  | - Breadth-Social Studies: 3 credits |
|  | - Communication Part A \& Part B * |
|  | - Ethnic Studies * |

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the chemical engineering degree program.

| Code $\quad$ Title | Credits |
| :--- | ---: |
| Mathematics | 19 |
| Physics | 10 |
| Chemistry | 20 |
| Life Science | 6 |
| Core Engineering Requirement | 49 |
| Professional Breadth | 6 |
| Communication Skills | 6 |
| Liberal Studies Requirement | 16 |
| Total Credits | $\mathbf{1 3 2}$ |

## MATHEMATICS REQUIREMENT

The calculus requirement must be met with a minimum of 12 credits to cover the three-course basic math sequence. Any deficiency in total math credits must be made up with electives in science or engineering.

| Code | Title | Credits |
| :--- | :--- | ---: |
| MATH 221 | Calculus and Analytic Geometry 1 | 5 |
| or MATH 217 | Calculus with Algebra and Trigonometry II |  |
| or MATH 275 | Topics in Calculus I |  |
| MATH 222 | Calculus and Analytic Geometry 2 |  |
| or MATH 276 | Topics in Calculus II | 4 |
| MATH 234 | Calculus--Functions of Several <br> Variables | 4 |
| MATH 320 | Linear Algebra and Differential <br> or MATH 319 | Equations <br> Techniques in Ordinary Differential Equations |
| STAT 324 | Introductory Applied Statistics for <br> Engineers | 3 |

## Total Credits

## PHYSICS REQUIREMENT

Credit shortages caused by transfer physics courses at fewer than 6 credits for the required courses must be made up with another physics course.

| Code | Title | Credits |
| :--- | :--- | ---: |
| PHYSICS 201 | General Physics | 5 |
| or PHYSICS 207 | General Physics |  |
| PHYSICS 202 | General Physics | 5 |
| or PHYSICS 208 | General Physics |  |

Total Credits

## CHEMISTRY REQUIREMENT

Credit shortages cause by transfer of freshman chemistry courses at fewer than 9 credits must be made up with chemistry, biochemistry, or chemical engineering courses.

| Code | Title | Credits |
| :---: | :---: | :---: |
| General Chemistry (choose one) |  | 5 |
| CHEM 109 | Advanced General Chemistry (preferred) |  |
| CHEM 103 <br> \& CHEM 104 | General Chemistry I and General Chemistry II |  |
| CHEM 329 | Fundamentals of Analytical Science | 4 |
| CHEM 343 <br> \& CHEM 345 <br> \& CHEM 344 | Organic Chemistry I and Organic Chemistry II and Introductory Organic Chemistry Laboratory | 8 |
| CHEM 562 | Physical Chemistry | 3 |
| Total Credits |  | 20 |
| LIFE SCIENCE |  |  |
| Students who meet the Introductory Biology requirement with an AP exam are encouraged to take two advanced biology electives. ${ }^{1}$ |  |  |

Code Title Credits
Introductory Biology requirement (choose one) 3

| PL PATH 375 | Special Topics (Topic: Intro Biology for Engineers) |  |
| :---: | :---: | :---: |
| ZOOLOGY 153 | Introductory Biology |  |
| $\begin{aligned} & \text { ZOOLOGY/ } \\ & \text { BIOLOGY/ } \\ & \text { BOTANY } 151 \end{aligned}$ | Introductory Biology |  |
| Advanced Biology requirement (choose one) |  | 3 |
| BIOCHEM 501 | Introduction to Biochemistry |  |
| BIOCHEM 507 | General Biochemistry I |  |
| ZOOLOGY 570 | Cell Biology |  |
| GENETICS 466 | Principles of Genetics |  |
| MICROBIO 303 | Biology of Microorganisms |  |
| Total Credits |  | 6 |
| 1 |  |  |
| BIOCORE 381 Evolution, Ecology, and Genetics and BIOCORE 383 |  |  |

CORE ENGINEERING REQUIREMENT

## Code

Title
Credits
CBE 150
Introduction to Chemical
1
Engineering
CBE 250
Process Synthesis (with a grade of C or better)

| CBE 255 | Introduction to Chemical Process Modeling | 3 |
| :---: | :---: | :---: |
| CBE 310 | Chemical Process Thermodynamics (with a grade of C or better) | 3 |
| CBE 311 | Thermodynamics of Mixtures (with a grade of $C$ or better) | 3 |
| CBE 320 | Introductory Transport Phenomena (with a grade of C or better) | 4 |
| CBE 324 | Transport Phenomena Lab | 3 |
| CBE 326 | Momentum and Heat Transfer Operations | 3 |
| CBE 424 | Operations and Process Laboratory | 5 |
| CBE 426 | Mass Transfer Operations | 3 |
| CBE 430 | Chemical Kinetics and Reactor Design | 3 |
| Select one of the following: |  | 3 |
| CBE 440 | Chemical Engineering Materials |  |
| CBE 540 | Polymer Science and Technology |  |
| CBE 547 | Introduction to Colloid and Interface Science |  |
| CBE 450 | Process Design | 3 |
| CBE 470 | Process Dynamics and Control | 3 |
| CBE Electives ${ }^{2}$ |  | 6 |

Total Credits

2
Chemical Engineering electives may be chosen from any of the CBE courses that are not required, numbered 300 or above (excluding seminar courses). A maximum of two credits of co-op work (CBE 1 Cooperative Education Program) may be used to meet the CBE elective requirement. Qualified undergraduates may take graduate-level (600 or 700) courses to fulfill this requirement.

## PROFESSIONAL BREADTH

Select 6 credits

| Code Title |
| :--- |

| M HR 300 | Managing Organizations |
| MICROBIO 303 | Biology of Microorganisms |
| STAT/M E 424 | Statistical Experimental Design |
| ZOOLOGY 570 | Cell Biology |

## Total Credits

Students may petition the department to allow other courses related to engineering professional practice. To request that a course not listed above be used, the student should fill out the Professional Breadth Requirement Course Request form available online and submit it to the advisor. The department will then determine if the course can be counted toward the Professional Breadth Requirement. Petitions must be submitted before the beginning of the semester in which the course is to be taken.

## 3

The objective of this requirement is to provide students with skills to interact with professionals from other disciplines. Suitable courses for this requirement include courses in engineering (excluding CBE) and science, as well as a variety of other disciplines.

4
Full degree credit is not allowed if a student takes both CBE 440 Chemical Engineering Materials and M S \& E 350 Introduction to Materials Science. In this case M S \& E 350 Introduction to Materials Science will be awarded only 1 degree credit.

## COMMUNICATION SKILLS

| Code | Title |
| :--- | :--- |
| ENGL 100 | Introduction to College Composition |
|  | 5 |

or COM ARTS 100 Introduction to Speech Composition

| or LSC 100 <br> or ESL 118 | Science and Storytelling |  |
| :---: | :--- | :--- |
| Academic Writing II |  |  |
| INTEREGR 397 | Engineering Communication | 3 |

5
For Part A of the General Education Communication Requirement (3 cr ) students must select one course with an "a" designation in "g" of the "geBLC" information in the Course Guide. Some students will be exempt from this requirement based on their placement test scores or advanced placement in English.
CBE 424 Operations and Process Laboratory satisfies Part B of the
General Education Communication Skills Requirement.

## LIBERAL STUDIES ELECTIVES

Students must complete 16 credits of liberal studies according to the College of Engineering requirements.

1. Liberal studies elective courses must be classified as either Humanities, Social Studies, or Literature courses (identified by the letters $\mathrm{H}, \mathrm{S}, \mathrm{L}$, or Z in " B " of the "geBLC" information in the Guide). At least six credits must have a breadth designation of Humanities ( H , L, or Z ), and at least three credits must have a designation of Social Studies (S or Z). Foreign language courses count as H credits.
2. A three-credit ethnic studies course must be selected from the College of Letters \& Science. Acceptable courses are identified by the letter "e" in Guide. If appropriate, the ethnic studies course may be among those used to satisfy the concentration requirement.
3. A minimum of two liberal studies courses must be taken from the same subject area (https://registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be at an intermediate or advanced level (designated in Guide).
4. Retroactive credits may be awarded for foreign-language work done in high school. The following conditions apply:
a. A university-level foreign language course must be taken before the student has earned 30 college credits in residence.
b. Retroactive Language Credit Request Form must be completed and submitted to the language instructor during the first two weeks of class
c. The student must earn a B or better in this course.
d. Such credits do not count toward the 16 liberal-studies credits required. They may, however, be used to satisfy the concentration and depth requirements as stated in number three above and count as degree credits.
5. English composition courses, English as a Second Language courses, and basic communications arts courses are not accepted as liberal studies electives.

## FREE ELECTIVES

Students fulfilling their course requirements with fewer than 132 credits must take additional free-elective credits to comply with the 132-credit minimum graduation requirement.

## COURSE SUBSTITUTION REGULATIONS

1. Any student may, with advisor approval, replace up to 12 credits of required courses in the curriculum, except CBE 424 Operations and Process Laboratory, by an equal number of credits of other courses within the limitations listed under (3) below.
2. Any student who wishes to amend the curriculum by more than 12 credits or wishes to appeal the advisor's decision in (1) or to request exception to (3) below must submit a written request to the chair of the department, who will bring it to the department faculty for consideration.
3. Restrictions on course substitutions are as follows:
a. Physics courses may be replaced by science or engineering courses.
b. Chemistry/life science courses must be replaced by courses with significant chemistry/life science content.
c. Engineering courses must be replaced by engineering courses.
d. Lab courses must be replaced by courses with an equal number of hours of lab courses.
e. English as a Second Language courses, and MATH 112 Algebra, MATH 113 Trigonometry, and MATH 114 Algebra and Trigonometry may not be used for course substitutions.

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

The Honors in Research program in Chemical Engineering is designed for students who wish to have a more in-depth research experience and is particularly recommended for students considering enrollment in a PhD program. To be accepted into the Honors in Research program, students must have completed at least two semesters on the UW-Madison campus with a cumulative GPA of at least 3.5 and should find a faculty mentor. Students register for 1-3 credits of CBE 489 Honors in Research and are expected to complete at least 8 credits of CBE 489 over 2-3 semesters. Students must also write a senior thesis and present the work to a committee of faculty. Students meeting all requirements, and maintaining a cumulative GPA of at least 3.3 , will receive the Honors in Research designation upon graduation.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. ability with engineering application of the basic sciences to the design, analysis, and control of chemical, physical, and biological processes, including the hazards associated with these processes.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

First Year

| Fall | CreditSpring | Credits |
| :---: | :---: | :---: |

| Elective |  |  |  |
|  | 15 | 12 | 5 |

## Total Credits 132

1
CBE 250 Process Synthesis and CBE 320 Introductory Transport Phenomena both require a grade of C or better.

## 2

CHEM 343 Organic Chemistry I requires a grade of C or better.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## ACCREDITATION

Accreditation.
Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## CIVIL AND ENVIRONMENTAL ENGINEERING

The Department of Civil and Environmental Engineering delivers research and educational programs that help make our environment, society, and communities better places in which to live, work, and play. This is done with a commitment to meeting the societal, environmental, and financial needs of today's generation without sacrificing the ability to meet these needs for future generations - the core principles of sustainability. All three of the department's undergraduate degree programs create career opportunities to:

- Ensure the health, safety, and welfare of the public and the environment,
- Develop and maintain our water, earth, and energy resources,
- Create and operate smart cities and smart infrastructure systems based on analysis of "big data," and
- Work with next generation materials and construction systems.

High-impact educational practices are used in delivering the three undergraduate degree programs, including opportunities to:

- Engage with faculty on innovative research projects,
- Develop career skills by participating in internship or cooperative education with an engineering company,
- Broaden horizons by studying abroad,
- Work with nearby communities in the award-winning senior capstone design class, and
- Lead student organizations in numerous activities, including design competitions like concrete canoe, steel bridge, and others.

The department is committed to ensuring its students are well placed on the pathway to professional engineering licensure and careers in the field. We invite you to explore the details of each degree program by clicking the link to our degrees, majors, and certificates.

## RESOURCES AND SCHOLARSHIPS

## FACILITIES

Facilities available include modern and fully equipped laboratories for instruction and research in the following areas:

Environmental Engineering
Fluid Mechanics
Geoengineering
Hydraulics
Data Acquisition and Analysis
Structures and Materials Testing
Transportation Engineering
Environmental Chemistry and Technology

## ARCHITECTURE, CERTIFICATE

The mission of the Certificate in Architecture is to provide UW-Madison students an opportunity to explore theories and practices of architecture, and the design and meaning of the built environment within socio-political, historical, cultural, and ecological contexts.

The population of the world now exceeds eight billion, half of which live in cities. These numbers will only increase as the century progresses, and the need to understand the issues and challenges in maintaining health, safety, and quality of life in the built environment has never been greater. A collaboration of architects, engineers, interior designers, landscape architects, and urban planners will be needed to apply art and science to address these challenges, using lessons from history to understand contemporary problems.

The certificate requirements create collaborative opportunities for students in engineering, architecture, art history, interior architecture, landscape architecture, and planning. For example, the certificate offers opportunities for engineering students to take courses in art history with students from art history and other majors. Similarly, art history students have opportunities to take courses in engineering, and so on. These cross-college educational opportunities are rare within established curriculum requirements and offer rich experiences for understanding the perspectives, theories, and practices of those in different professions.

At least 3 of the 15 credits will be taught online as a UW-Madison course number by architecture faculty at the University of Wisconsin - Milwaukee.

## HOW TO GET IN

All undergraduate students in good academic standing are eligible to apply. We encourage students to declare as early as possible in order to plan their required coursework. Students should complete and submit the declaration form (https://engineering.wisc.edu/programs/certificates/ architecture/declaration/) to declare the certificate.

## REQUIREMENTS

## PROGRAM REQUIREMENTS

- Students must successfully complete at least 15 credits, including 9 credits in courses numbered 300 or higher.
- Students must complete certificate courses with a GPA of 2.000 or higher.
- Courses completed on a pass/fail or credit/no credit basis will not count toward these requirements.

## Required Coursework

 Code Title Credits Studio Requirement 3CIV ENGR 151 Architectural Making I
Architectural History Course 3-4

Choose one from the following:

| CIV ENGR 155 | Architectural Thinking |

| CIV ENGR 497 | Mechanical Systems for Construction |
| DS 223 | Interior Architectural Design |
| M E 461 | Thermal Systems Modeling |
| LEARNING OUTCOMES |  |

1. Demonstrate knowledge of basic concepts in architecture and related disciplines
2. Employ skills in scale and proportion, composition and form in both 2D and 3D
3. Distinguish and develop a working knowledge of significant developments in architectural thinking across time and in a crosscultural context
4. Apply critical thinking to ideas and theories in the history of architecture

## PEOPLE

- UW-Madison's Department of Civil and Environmental Engineering
- UW-Madison's Department of Art History
- UW-Madison's Department of Design Studies
- UW-Madison's Department of Mechanical Engineering
- UW-Madison's Department of Planning and Landscape Architecture
- UW-Milwaukee's Department of Architecture

Faculty representatives of the UW-Madison departments are as follows:

- Greg Harrington, Professor, Civil and Environmental Engineering (Certificate Director)
- Anna Andrzejewski, Professor, Art History
- Michael Cheadle, Assistant Teaching Professor, Mechanical Engineering
- Uchita Vaid, Assistant Professor, Design Studies
- Edna Ledesma, Assistant Professor, Planning \& Landscape Architecture

## CIVIL ENGINEERING, B.S.

Civil engineers are responsible for the sustainable design of facilities that protect the health and welfare of communities and the environment, while also ensuring society's financial health. More specifically, they are responsible for the conception, design, and construction of public works such as:

- the highways, streets, and bridges that we walk, bike, and drive on
- the water systems and earthworks that treat the water we drink, manage the water we swim in and boat on, and protect us and our property from floodwaters
- the homes, schools, factories, theaters, and stadiums in which we live, learn, work, and play
- the airports, railways, waterways, and harbors that provide additional mobility for people and the materials they produce and consume
- the treatment and emission systems that ensure the safety of the air we breathe
- the recycling, reuse, and disposal systems used to minimize the production of and also provide for the containment of the solid and hazardous wastes we produce
- the production and transmission facilities for the electricity we use, including generation facilities for both conventional and renewable energy sources

Civil engineers are also responsible for the operation of these facilities, an aspect of the field that is being rapidly integrated into the Internet of Things with real-time "big data" collection systems for automated control. This makes it possible for society to rely on:

- autonomous cars, trucks, and mass transport systems, providing safer travel with reduced traffic congestion, improved roadway capacity, reduced energy consumption and air emissions
- smart water infrastructure, including systems that will reduce water consumption, save energy, and improve community resiliency in the wake of natural and human-caused disasters

The Certificate in Architecture is a collaboration of the following departments:

- intelligent buildings, including systems that reduce energy consumption, improve employee and student comfort, and allow for adaptation of structural systems to changing wind and seismic loads

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in the different civil engineering disciplines. These disciplines include construction engineering and management, environmental engineering, geological and geotechnical engineering, structural engineering, transportation engineering, and water resources engineering. Civil engineers perform their work in an interdisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure.

## VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

## MISSION OF BACHELOR OF SCIENCE IN CIVIL ENGINEERING (BSCE) PROGRAM

Create, integrate, and transfer civil engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

## CIVIL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Prepare BSCE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-
services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core
of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits

- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the civil engineering degree program (classification changed to CEE) in fall 2016 or later.

| Title | Credits |
| :--- | ---: |
| Code | 3 |
| Introduction to Engineering | 19 |
| Mathematics and Statistics | 16 |
| Basic Science | 10 |
| Engineering Mechanics | 6 |
| Civil Engineering Mechanics | 6 |
| Civil Engineering Tools | 21 |
| Civil Engineering Breadth | 10 |
| Civil Engineering Design | 13 |
| Engineering Electives | 8 |
| Communications | 16 |
| Liberal Studies | $\mathbf{1 2 8}$ |

## INTRODUCTION TO ENGINEERING

| Code | Title | Credits |

$\begin{array}{lrl}\text { CIVIL ENGINEERING DESIGN REQUIREMENT } \\ \text { Code } & \text { Title } & \text { Credits }\end{array}$
CIV ENGR 578 Senior Capstone Design 4
Every student must take at least one class in at least two of 6 the following CEE disciplines, for a total of 6 credits. One of the two classes MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.
Water Resources
CIV ENGR 414 Hydrologic Design
Environmental

| CIV ENGR 426 | Design of Wastewater Treatment <br> Plants |
| :---: | :--- |
| CIV ENGR 427 | Solid and Hazardous Wastes <br> Engineering |
| CIV ENGR 428 | Water Treatment Plant Design |
| CIV ENGR 522 | Hazardous Waste Management |
| Structural |  |
| CIV ENGR 445 | Steel Structures I |
| CIV ENGR 447 | Concrete Structures I |
| Geological |  |
| CIV ENGR/ | Seepage and Slopes |
| G L E 530 |  |
| CIV ENGR/ | Foundations |
| G L E 532 |  |
| Transportation |  |
| CIV ENGR 573 | Geometric Design of Transport <br> CIV ENGR 574 |
| Facilities |  |
| Traffic Control |  |

Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other classes will count towards the electives requirement (see section below).

## Total Credits

## ENGINEERING ELECTIVES REQUIREMENT

1. Students must take at least 3 credits of coursework from an ABETaccredited degree-granting program outside of the Bachelor of Science in Civil Engineering program. INTEREGR and E P D courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CIV ENGR) do not qualify for meeting this requirement.
2. Students must take at least 3 credits of CEE coursework in addition to the civil engineering design requirement. Note: Students in the Construction Engineering Management or Environmental Engineering option programs must select from a set of CIV ENGR courses approved for those options. ${ }^{1,2,3}$
3. Students must take at least 7 credits of coursework that meets at least one of the following ${ }^{1,2,3}$ :
a. Any course offered by an engineering department, including but not limited to CIV ENGR.
b. Any Intermediate or Advanced level course with a breadth designation of Biological Sciences, Physical Sciences and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities or Literature.
c. Any of the following business courses: INTEREGR 303 Applied Leadership Competencies in Engineering, ACCT IS 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process

## Total Credits: 13

1
Up to three credits of CIV ENGR 1 Cooperative Education Program may be used towards Item 2 or 3.
2
Up to six credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used towards Item 2 or 3.
3
CIV ENGR 150 Introduction to Architectural Theory, CIV ENGR 151 Architectural Making I, CIV ENGR 152 Architectural Making II, CIV ENGR 155 Architectural Thinking, and CIV ENGR 250 Architectural Visualization cannot be used in Items 2 or 3 above.

## COMMUNICATIONS

| Code | Title | Credits |
| :--- | :--- | ---: |
| Communications $A$ (choose one) | 3 |  |
| ENGL 100 | Introduction to College Composition |  |
| LSC 100 | Science and Storytelling |  |
| COM ARTS 100 | Introduction to Speech Composition |  |
| ESL 118 | Academic Writing II |  |
| Speech-Related Course (choose one) | 2 |  |
| EP D 275 | Technical Presentations ${ }^{1}$ |  |

| COM ARTS 105 | Public Speaking |  |
| :---: | :---: | :---: |
| COM ARTS 181 | Elements of Speech-Honors Course |  |
| COM ARTS 262 | Theory and Practice of Argumentation and Debate |  |
| COM ARTS 266 | Theory and Practice of Group Discussion |  |
| Writing-Related Courses (choose one) |  | 3 |
| INTEREGR 397 | Engineering Communication |  |
| ENGL 201 | Intermediate Composition |  |
| Total Credits |  | 8 |
| 1 |  |  |
| E P D 275 Technical Presentations and INTEREGR 397 Engineering Communication strongly recommended to satisfy these requirements. |  |  |
| LIBERAL STUDIES REQUIREMENTS |  |  |
| Code | Title | Credits |
| College of Engineering Liberal Studies Requirements |  |  |
| Complete Requirements (p. 237) ${ }^{1}$ |  | 16 |
| Requirements specific to Civil Engineering: |  |  |
| An economics course must be selected from the following list: |  |  |
| ECON 101 | Principles of Microeconomics |  |
| ECON 102 | Principles of Macroeconomics |  |
| ECON 111 | Principles of EconomicsAccelerated Treatment |  |
| A minimum of three credits of environmental studies course that meets the breadth designations of humanities, literature, and/or social science. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement. |  |  |

Total Credits

All liberal studies credits must be identified with the letter H, S, L, or Z. Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.
Note: See a CEE advisor for additional information.

## HONORS IN RESEARCH

Students in civil engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of at least 3.5 may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of $P$ (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in CIV ENGR 489 Honors in Research.

A senior thesis worth 3 credits of CIV ENGR 489 is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the Department of Civil and Environmental Engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Civil Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in CIV ENGR 489.
4. Completion of a senior honors thesis with a final grade of $B$ or better.

Students interested in the Honors in Research program should contact their advisor or the BSCE chair for more information. Applications to the program are to be submitted to the BSCE chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the BSCE chair.

## NAMED OPTIONS

Note: Beginning Fall 2023, admission to the Environmental Engineering named option for the Civil Engineering, B.S. will be suspended. Students interested in Environmental Engineering and planning to graduate in 2023-24 or later may apply for the Environmental Engineering, B.S. (p. 270) program. Please consult your academic advisor.

View as listView as grid

## - CIVIL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT (P. 266) <br> - CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING (P. 268)

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and
welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. an ability to explain basic concepts in management, business, and public policy
9. an ability to explain the importance of professional licensure
10. an ability to understand common failure mechanisms of a component, process, or system and their causes and prevention

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## CERTIFICATION/LICENSURE

Licensure as a Professional Engineer is expected of civil engineers. Information on steps needed to obtain licensure is available from the National Council for the Examination of Engineers and Surveyors (NCEES) at https://ncees.org/engineering/.

## ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## CIVIL ENGINEERING: CONSTRUCTION ENGINEERING AND MANAGEMENT

The Department of Civil and Environmental Engineering offers an undergraduate option in construction engineering and management (CEM). Students taking the CEM option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science-Civil Engineering with option: Construction Engineering and Management.

Students must complete the following BS Civil Engineering requirements: Introduction to Engineering, Mathematics and Statistics, Basic Science, Mechanics, Tools, Breadth, Communications, and Liberal Studies. CEM requirements for Civil Engineering Design and Engineering Electives are listed here (p. 266), along with additional requirements for the CEM option. The total number of credits required for the CEM option is 132 instead of 128.

## REQUIREMENTS

# CIVIL ENGINEERING: ENVIRONMENTAL ENGINEERING 

## Admissions to the Environmental Engineering named option will be suspended as of fall 2023 and the option will be discontinued as of fall 2027. If you have any questions, please contact the department.

The Department of Civil and Environmental Engineering offers an undergraduate option in environmental engineering. Students taking the environmental engineering option will earn an ABET-accredited B.S. degree in civil engineering. The transcript will indicate that the student has earned a Bachelor of Science-Civil Engineering with option: Environmental Engineering

Students must complete the following BS Civil Engineering requirements: Introduction to Engineering, Mathematics and Statistics, Basic Science, Mechanics, Tools, Breadth, Communications, and Liberal Studies. EV requirements for Civil Engineering Design and Engineering Electives are listed here (p. 268). Students must also meet the Environmental Engineering Breadth Requirement, also listed here (p. 268).

## REQUIREMENTS

Note: Beginning Fall 2023, admission to the Environmental Engineering named option for the Civil Engineering, B.S. will be suspended. Students interested in Environmental Engineering and planning to graduate in 2023-24 or later may apply for the Environmental Engineering, B.S. (p. 270) program. Please consult your academic advisor.

## CIVIL ENGINEERING DESIGN REQUIREMENT

## Code

## Title

 CreditsCIV ENGR 578
Senior Capstone Design
Every student must take at least one course in the environmental or water resources discipline and another course in a different discipline, for a total of 6 credits. One of the two courses MUST be completed BEFORE taking CIV ENGR 578 Senior Capstone Design.
Water Resources
CIV ENGR 414 Hydrologic Design
Environmental

| CIV ENGR 426 | Design of Wastewater Treatment <br> Plants |
| :---: | :--- |
| CIV ENGR 427 | Solid and Hazardous Wastes <br> Engineering |
| CIV ENGR 428 | Water Treatment Plant Design |
| CIV ENGR 522 | Hazardous Waste Management |
| Structural |  |
| CIV ENGR 445 | Steel Structures I |
| CIV ENGR 447 | Concrete Structures I |
| Geological |  |

| GLE 530 |  |

CIV ENGR/ Foundations
GLE 532

Transportation
CIV ENGR 573
Geometric Design of Transport Facilities

## CIV ENGR 574 <br> Traffic Control

CIV ENGR 576
Note: If a student takes three or more courses from the above list, two of those courses will count toward this civil engineering design requirement and the other courses will count toward the electives requirement (see section below).
Total Credits

## ENGINEERING ELECTIVES REQUIREMENT

1. Students must take at least 3 credits of coursework from an ABETaccredited degree-granting program outside of the bachelor of science in civil engineering program. InterEGR and EPD courses do not qualify for meeting this requirement; any courses cross-listed with Civil Engineering (CEE) do not qualify for meeting this requirement.
2. Select at least one of the following: CIV ENGR 322 Environmental Engineering Processes or CIV ENGR 410 Hydraulic Engineering.
3. Students must take at least 7 credits of coursework that meets at least one of the following ${ }^{1,2,3,4}$ :
a. Any course offered by an engineering department, including but not limited to CEE.
b. Any intermediate- or advanced-level course with a breadth designation of Biological Sciences, Physical Sciences, and/or Natural Sciences. These courses cannot also carry a breadth designation of Social Sciences, Humanities, or Literature.
c. Any of the following business courses: INTEREGR 303 Applied Leadership Competencies in Engineering, ACCT IS 300 Accounting Principles, FINANCE/ECON 300 Introduction to Finance, GEN BUS 301 Business Law, M H R 300 Managing Organizations, REAL EST/A A E/ECON/URB R PL 306 The Real Estate Process.

## Total Credits: 13

1
Up to 3 credits of CIV ENGR 1 Cooperative Education Program may be used toward Item 3.

## 2

Up to 6 credits of research work (CIV ENGR 299 Independent Study, CIV ENGR 489 Honors in Research, and/or CIV ENGR 699 Independent Study) may be used toward Item 3.

3
Depending on their choice of courses, students may need to take some of these 7 credits to satisfy the breadth requirement below.

4
CIV ENGR 150 Introduction to Architectural Theory, CIV ENGR 151 Architectural Making I, CIV ENGR 152 Architectural Making II, CIV ENGR 155 Architectural Thinking and CIV ENGR 250 Architectural Visualization cannot be used in Item 3.

## ENVIRONMENTAL ENGINEERING BREADTH REQUIREMENT

Courses selected to meet the design and electives requirement above must also be selected in a manner that meets this requirement. At least
one CEE course must be selected from at least three of the specialty groups in the table below.

| Code | Title | Credits |
| :---: | :---: | :---: |
| Water Resources |  |  |
| CIV ENGR 410 | Hydraulic Engineering | 3 |
| CIV ENGR 412 | Groundwater Hydraulics | 3 |
| CIV ENGR 414 | Hydrologic Design | 3 |
| CIV ENGR 415 | Hydrology | 3 |
| CIV ENGR 416 | Water Resources Systems Analysis | 3 |
| CIV ENGR 619 | Special Topics in Hydrology | 1-3 |
| Environmental Fluid Mechanics |  |  |
| CIV ENGR 411 | Open Channel Hydraulics | 3 |
| CIV ENGR 514 | Coastal Engineering | 2-3 |
| CIV ENGR 618 | Special Topics in Hydraulics and Fluid Mechanics | 1-3 |
| Environmental Chemistry \& Biotechnology |  |  |
| CIV ENGR 425 | Environmental Engineering Microbiology | 3 |
| CIV ENGR 500 | Water Chemistry | 3 |
| CIV ENGR 501 | Water Analysis-Intermediate | 3 |
| CIV ENGR/ SOIL SCI 623 | Microbiology of Waterborne <br> Pathogens and Indicator Organisms | 3 |

| Water \& Wastewater | Treatment |  |
| :--- | :--- | :--- |
| CIV ENGR 322 | Environmental Engineering |  |
|  | Processes |  |$\quad 3$

| APPLIED ENGR ELECTIVE |  | 1 LIBERAL STUDIES ${ }^{2}$ | 3 |
| LIBERAL STUDIES ${ }^{2}$ |  | 3 |  |
|  |  | 16 | 16 |

## Total Credits 128

1
Taking CHEM 103 General Chemistry I/CHEM 104 General Chemistry II instead of CHEM 109 Advanced General Chemistry adds 4 additional credits to degree requirements.

Liberal studies coursework should add up to 16 credits, including economics elective, environmental studies elective, and ethnic studies.

3
After completing E M A 201 Statics, students may take E M A 202 Dynamics and then E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab, or take E M A 303/E M A/M E 307 and then E M A 202.

## 4

At least one Civil Engineering Design course must be taken before CIV ENGR 578 Senior Capstone Design.

5
CIV ENGR 322 Environmental Engineering Processes is offered every Fall semester; CIV ENGR 410 Hydraulic Engineering is offered every Spring semester.

## ENVIRONMENTAL ENGINEERING, B.S.

The Department of Civil and Environmental Engineering offers a B.S. Environmental Engineering (BSEnvE) degree program, an excellent degree choice for students who are interested in the sustainable design, construction, and operation of systems and facilities that:

- Treat and distribute safe and reliable drinking water
- Recover material, nutrient, and energy resources from wastewater and solid waste
- Protect and restore wetlands, streams, lakes, and groundwater
- Allocate water resources for urban, rural, and recreational use
- Protect and develop coastal shorelines and stream banks
- Manage stormwater and minimize risk of flood events
- Reduce, reuse, and recycle solid wastes
- Minimize the production of and provide treatment of industrial and agricultural wastes
- Minimize the production of and provide treatment of industrial air emissions
- Protect society from the impacts of climate change, such as rising sea levels and increasing frequency and severity of severe weather events
- Slow down or reverse climate change via
- Alternative sources of energy such as solar, wind, geothermal and biofuels
- Recovery of carbon and other greenhouse gases from industrial air emissions

The operation of these facilities is being rapidly integrated into the Internet of Things with real-time "big data" collection systems for automated control. This makes it possible for society to rely on smart infrastructure, including systems that will reduce water consumption, save energy, and improve community resiliency in the wake of natural and human-caused disasters.

All of the above items require a core knowledge in mathematics, statistics, physics, chemistry, biology, geology, computer science and computer design tools, as well as breadth in different environmental engineering disciplines. Environmental engineers perform their work in a multidisciplinary setting requiring strong written and verbal communication skills, understanding of professional and ethical obligations coupled with risk management and decision-making, and commitment to lifelong learning and professional licensure. Their daily work also requires a commitment to sustainability - the need to meet today's needs while
also allowing future generations to meet their environmental health, public health, and society's economic health needs.

To meet accreditation policies, eligibility for the program is limited to those students who

- matriculated into UW-Madison's College of Engineering in the Fall 2020 semester or later, and
- expect to graduate no sooner than December 2023.

Students not meeting the above criteria are encouraged to consider the Environmental Engineering Option of the BS Civil Engineering degree program. Additional options for these students include the BS Geological Engineering degree program and the Natural Resources and Environmental Engineering Option of the BS Biological Systems Engineering degree program.

## VISION

Develop and maintain a learning community that pursues new knowledge and understanding, and provides innovative and sustainable solutions to human and ecological needs.

## MISSION OF BACHELOR OF SCIENCE IN ENVIRONMENTAL ENGINEERING (BSEnvE) PROGRAM

Create, integrate, and transfer environmental engineering knowledge and practice in the development of professionals, leaders, and citizens that help define and serve societal and environmental needs by applying this knowledge and practice in an effective and sustainable manner.

## ENVIRONMENTAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Prepare BSEnvE graduates to contribute to their communities through the following career and professional accomplishments:

1. Design and construct both natural and built processes and systems to efficiently meet determined needs using technical knowledge; modern tools; design principles; ethical practice; and communication, leadership, and team skills.
2. Utilize measurement and analysis tools along with experimental data in investigating natural and built systems.
3. Understand and incorporate economic, environmental, political, social, safety and global considerations in design, investigation and construction of natural and built systems.
4. Engage in lifelong learning to keep pace with the continuous evolution of policies, procedures, technologies and tools for engineering analysis, design, and decision making.
5. Serve others through participation in professional and/or civic activities and responsibilities.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to
meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

UNIVERSITY GENERAL EDUCATION REQUIREMENTS
All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education
requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

## General

- Breadth-Humanities/Literature/Arts: 6 credits

Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the environmental engineering degree program (classification changed to BSEnvE) in Fall 2021 or later.
Code Title ..... Credits

12

## Professional Electives

Note: Courses taken to meet this requirement may not be used to meet the environmental engineering breadth requirement.

Select 14 credits of coursework that meets at least one of the following criteria:

- Any engineering course numbered 300 or higher, excluding E P D and INTEREGR. Up to six credits of independent study (e.g. CIV ENGR 699 Independent Study and others) may be counted
- Any intermediate or advanced-level course ${ }^{1}$ from atmospheric and oceanic sciences, botany, chemistry, geography, geoscience, mathematics ${ }^{2}$, microbiology, molecular and environmental toxicology, physics, population health sciences, soil science, statistics ${ }^{2}$, or zoology
- Up to three credits of any intermediate or advanced-level course from agricultural and applied economics, economics, general business, management and human resources, or INTEREGR 303 Applied Leadership Competencies in Engineering
- Up to three credits of CIV ENGR 1 Cooperative Education Program

1
Courses with social science, humanities, or literature breadth (H, L, S, W, X, Y, Z) cannot be used

2
Transfer/test math elective credits for calculus or STAT 301 Introduction to Statistical Methods may not be used to fulfill Professional Electives

## COMMUNICATIONS

| Code | Title | Credits |
| :---: | :---: | :---: |
| Communications $A$ (choose one) |  | 3 |
| ENGL 100 | Introduction to College Composition |  |
| LSC 100 | Science and Storytelling |  |
| COM ARTS 100 | Introduction to Speech Composition |  |
| ESL 118 | Academic Writing II |  |
| Speech-Related Course (choose one) |  | 2 |
| E P D 275 | Technical Presentations ${ }^{1}$ |  |
| COM ARTS 105 | Public Speaking |  |
| COM ARTS 181 | Elements of Speech-Honors Course |  |
| COM ARTS 262 | Theory and Practice of Argumentation and Debate |  |
| COM ARTS 266 | Theory and Practice of Group Discussion |  |
| Writing-Related Course (choose one) |  | 3 |
| INTEREGR 397 | Engineering Communication ${ }^{1}$ |  |
| ENGL 201 | Intermediate Composition |  |
| Total Credits |  | 8 |

1
E P D 275 Technical Presentations and INTEREGR 397 Engineering Communication are strongly recommended to satisfy these requirements.

## LIBERAL STUDIES

## Code <br> Title <br> Complete Requirements (p. 237) ${ }^{1}$ <br> Requirements specific to Environmental Engineering:

Credits
College of Engineering Liberal Studies Requirements 16

An economics course must be selected from the following list:

| ECON 101 | Principles of Microeconomics |
| :--- | :--- |
| ECON 102 | Principles of Macroeconomics |
| ECON 111 | Principles of Economics- |
|  | Accelerated Treatment |

A minimum of three credits of environmental studies course that meets the breadth designations of Humanities, Literature, and/or Social Studies. Courses that also carry breadth designations of Biological Sciences, Natural Sciences, or Physical Sciences will not count towards this requirement.

Total Credits

1
All liberal studies credits must be identified with the letter $\mathrm{H}, \mathrm{S}, \mathrm{L}$, or Z . Language courses are acceptable without the letter and are considered humanities. An economics elective and an environmental studies elective are required.

Note: See an environmental engineering advisor for additional information.

## HONORS IN RESEARCH

Students in environmental engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of at least 3.5 may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of P (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in CIV ENGR 489 Honors in Research.

A senior thesis worth 3 credits of CIV ENGR 489 is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the Department of Civil and Environmental Engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Environmental Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in CIV ENGR 489.
4. Completion of a senior honors thesis with a final grade of $B$ or better.

Students interested in the Honors in Research program should contact their advisor or the BSEnvE chair for more information. Applications to the program are to be submitted to the BSEnvE chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the BSEnvE chair.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

## FOUR-YEAR PLAN

## First Year

| Fall | Credits Spring | Credits |

1
E M A 201 Statics requires a minimum grade of $C$.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471

Nimish Pujara
Mohan Qin
Haoran Wei
Christopher Zahasky

## CERTIFICATION/LICENSURE

Licensure as a Professional Engineer is expected of environmental engineers. Information on steps needed to obtain licensure is available from the National Council for the Examination of Engineers and Surveyors (NCEES) at https://ncees.org/engineering/ .

## ACCREDITATION

This new program will seek accreditation from the Engineering Accreditation Commission of ABET, http://www.abet.org (http:// www.abet.org/). Application for accreditation will be made at the earliest opportunity, in 2024, with an ABET decision in 2025. If accreditation is awarded, it may be retroactively applied to those who graduated in Academic Year 2023-24.

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## GEOLOGICAL ENGINEERING, B.S.

Geological engineering integrates two disciplines-geology and engineering. Geologists study the Earth-its origins, its composition, and its evolution. Engineers apply scientific principles to practical ends, such as the sustainable design and construction of facilities and infrastructure, the environmentally responsible extraction of resources, and the use of geosystems for the generation of alternative energy. Geological engineering is interdisciplinary, with faculty from the College of Engineering and the College of Letters \& Science.

Geological engineers find responsible ways to use the Earth's resources to address engineering challenges while protecting the environment. They solve a variety of practical problems associated with rock and soils using principles of sustainable engineering. They design and construct underground and foundation systems, transportation facilities, dams, tunnels, and power plants. They mitigate natural hazards such as floods, landslides, and earthquakes, and develop safe and environmentally sound sources of energy and minerals. Geological engineers also manage groundwater and surface water resources to ensure the public has
access to safe drinking water. They also design and construct subsurface repositories for waste disposal and remediate contaminated sites.

Students pursuing the B.S. degree in geological engineering are encouraged to obtain the dual major in Geological Engineering and Geology with no required extra course work. The geological engineering curriculum allows students to obtain the dual major in a single 126-credit program. The B.S. degree in geological engineering is accredited by the Accreditation Board of Engineering and Technology (ABET), which is required to obtain a professional engineering license.

## GEOLOGICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Graduates will be prepared to assume positions as geological engineers upon graduation. After proper training and exposure to a comprehensive education in our program, our graduates will be able to:

1. apply geological engineering principles, analyses, and synthesis to design and implement projects in the natural and built environment;
2. incorporate economic, environmental, political, ethical, social, safety, and global considerations to generate sustainable solutions in the natural and built environment;
3. exhibit strong communication, leadership, and teamwork skills;
4. serve others through professional responsibility and participation in professional and public activities and good citizenship; and
5. demonstrate a continuing commitment to and interest in their own and others' education.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.
requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Students must complete the College of Engineering Liberal Studies Requirements (http://guide.wisc.edu/undergraduate/engineering/ \#requirementstext).

Students are encouraged to download a GLE Undergraduate Handbook from the Current Students/Undergraduate page on the program website (http://www.engr.wisc.edu/geological-engineering/). The handbook has detailed curriculum information as well as other practical information for undergraduate students to supplement the information provided here.

Students completing the geological engineering degree are also eligible to earn an additional major in geology and geophysics with no additional coursework. Students must contact an advisor to complete the necessary paperwork to declare the additional geology and geophysics major.

## TECHNICAL ELECTIVES (15 CREDITS)

Students must take at least 15 credits in the Technical Electives category, of which 5-6 credits must be design-focused (noted as 'D' in the tracks below), including at least one design-focused course taken prior to G L E 479 Geological Engineering Design. If students take G L E/ CIV ENGR 430 Introduction to Slope Stability and Earth Retention, G L E/CIV ENGR 432 Introduction to Shallow and Deep Foundation Systems and GLE/CIV ENGR 434 Introduction to Underground Openings Engineering, these combine to count as one design course. Additionally, if students take G L E/CIV ENGR 530 Seepage and Slopes, they can use GLE/CIV ENGR 432 and GLE/CIV ENGR 434 to count as one design credit; or, if students take G L E/CIV ENGR 532 Foundations, they can use GLE/CIV ENGR 430 and GLE/CIV ENGR 434 to count as one design credit. Students may take up to 6 credits of directed research credits as technical electives.

The technical electives are organized into five tracks, described below. Students may select courses within these tracks to focus coursework in a particular area. However, students may complete the technical electives requirement using courses listed in multiple tracks. Suggested technical electives and associated design-focused credits (noted as 'D' in the tracks below) for each track are included below. One credit of G L E 1 Cooperative Education Program can be used as a technical elective.

## Energy, Minerals \& Mining

Geological engineers possess knowledge and a skill set that serve society's need to manage extraction of traditional energy and mineral resources in more sustainable and efficient ways, develop renewable energy systems such as solar and wind energy sites, and to lead in new technologies to limit carbon emissions through geological sequestration or to develop geothermal exchange fields and reservoirs.

Within this track, the 16 credits of liberal studies can be framed to match those of the Energy Institute certificate in Energy Sustainability (http:// guide.wisc.edu/undergraduate/engineering/engineering-physics/ engineering-energy-sustainability-certificate/).

| Code | Title | Credits |
| :--- | :--- | ---: |
| BSE/ENVIR ST 367 | Renewable Energy Systems | 3 |
| CBE 562 | Special Topics in Chemical | $1-3$ |

| GLE 801 | Special Topics in Geological | 1-3 |
|  | Engineering (Topic: Geomechanics) |  |

1
Only certain G L E 401 topics count as design courses.

## Sustainability \& Environment

Methods for quantifying the long-term effects of development, natural resource extraction, and environmental damage are often neglected or misapplied in cost-benefit life cycle analysis. This track intends to produce professionals capable of leading the field in sustainable design and construction. The Sustainability \& Environment track focuses on quantification, design, and optimization in relation to the use of natural resources and construction materials/methods as well as minimizing the long-term impacts of these activities.

| Code | Title | Credits |
| :---: | :---: | :---: |
| BSE/ENVIR ST 367 | Renewable Energy Systems | 3 |

| $\mathbf{1}$ |  |  |

Only certain G L E 401 Special Topics in Geological Engineering topics count as design courses.

## Geohazards

The number of fatalities and amount of economic loss due to geohazards increase every year. These losses may result from various geohazards, such as volcanic eruptions, earthquakes, landslides, flooding and tsunamis. The Geohazards track aims to provide students with the necessary skills to perform analyses that minimize loss of life and economic costs associated with geohazards.

| Code | Title | Credits |
| :---: | :---: | :---: |
| CIV ENGR/ ENVIR ST/ GEOG 377 | An Introduction to Geographic Information Systems | 4 |

## Water

Water is an essential resource for humans and ecosystems. Water is also linked to mineral and energy resource production, waste management, and land reclamation. Population growth and climate change are creating increasing challenges to this resource. Development and sustainable management of groundwater and surface water, including prevention and mitigation of water quality problems, require combined expertise in geoscience, hydrology, and water resources engineering offered through the Water track.

| Code | Title | Credits |

1
Must take one of these topics: "Waterfront \& Coastal Planning" or "Lake \& River Rehabilitation."

## Infrastructure

There are many challenges that need to be overcome to address the aging infrastructure of this country as well as to develop cost effective solutions for new infrastructure in developing nations. The Infrastructure track is developed to provide students a background that enables them to perform engineering calculations to design, construct, assess the current condition (level of safety), and develop repair and retrofit solutions for civil engineering structures resting on, or constructed in, soil or rock.

## COMMUNICATION SKILLS

## LIBERAL STUDIES (16 CREDITS)

Students must complete the $\mathbf{1 6}$ credits of College of Engineering Liberal Studies Requirements (http://guide.wisc.edu/undergraduate/ engineering/\#requirementstext).

## FUNDAMENTALS OF ENGINEERING EXAM

All students must take the Fundamentals of Engineering exam.

## HONORS IN RESEARCH

Students in geological engineering that have completed at least two semesters on the Madison campus with a cumulative GPA of at least 3.5 may apply to participate in the Honors in Research program. Students may register for 1 to 3 credits per semester. A grade of $P$ (Progress) will be assigned each semester until the student completes the honors in research program or drops out of the program, at which time a final grade is assigned (based on research progress and the written thesis, if completed). This becomes the grade for all credits taken in G L E 489 Honors in Research.

A senior thesis worth 3 credits of GLE 489 Honors in Research is required. The senior thesis is a written document reporting on a substantial piece of work that is prepared in the style of a graduate thesis. The thesis advisor determines the grade which the student receives for the thesis. A bound copy of the thesis must be submitted to the geological engineering office to complete the program.

The designation "Honors in Research" will be recorded on the student's transcript if the following criteria are met:

1. Satisfaction of requirements for an undergraduate degree in Geological Engineering.
2. A cumulative grade-point average of at least 3.3.
3. Completion of a total of at least 8 credits in G L E 489 Honors in Research.
4. Completion of a senior honors thesis with a final grade of $B$ or better.

Students interested in the Honors in Research program should contact their advisor or the G L E chair for more information. Applications to the program are to be submitted to the G L E chair with a supporting letter from the student's academic and thesis advisors. Decisions regarding acceptance are made by the GLE chair.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

FOUR-YEAR PLAN

ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## PEOPLE

## PROFESSORS

Kurt L. Feigl
Laurel B. Goodwin
Tracey Holloway
William J. Likos
Steven P. Loheide II
Clifford H. Thurber
Basil Tikoff
Chin H. Wu

## ASSOCIATE PROFESSORS

Michael Cardiff
Ken Ferrier
Dante Fratta
Matthew Ginder-Vogel
Andrea Hicks
Hiroki Sone
James Tinjum (Director)
Lucas Zoet

## ASSISTANT PROFESSORS

Jesse Hampton
Christopher Zahasky
See also Geological Engineering Faculty Directory (https:// engineering.wisc.edu/departments/civil-environmental-engineering/ people/).

## RESOURCES AND SCHOLARSHIPS

## FACILITIES

The geological engineering program utilizes laboratories that are shared with other departments. They include:

Land Information and Surveying Laboratories
Fluid Mechanics Laboratory
Materials Testing Laboratory
Geology and Hydrogeology Laboratories
Rock Mechanics Laboratory
Geotechnical and Geoenvironmental Laboratories
The Halliburton Geoscience Visualization Center

## ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## ELECTRICAL AND COMPUTER ENGINEERING

Electrical engineers (EE) design and develop anything and everything that uses electricity. From the power systems that bring electricity to our homes and communications systems that allow us to keep in touch with family and friends, to the electronic devices, electrical appliances, computers, sensors, and medical equipment that shape our everyday lives. Typical careers may find an EE collaborating with medical doctors or astronauts in the space program, designing advanced automotive and transportation systems, and interacting with other engineers and professionals. Many EEs work as scientists, inventing new kinds of electronic technology, instrumentation, and devices to help people.

Electrical engineers design, develop, analyze, research, and manufacture systems such as those for power generation distribution, communication, control, and instrumentation. Electrical engineers are also concerned with the devices that make up these systems, such as transistors, integrated circuits, rotating machines, antennas, and fusion plasma confinement devices. Low-power, reliable integrated circuits allow dramatic improvements that have driven the revolution in communications and computation. High-power transistors in combination with electronic controls are serving as the foundation for new ways of efficiently utilizing electrical power.

Computer engineers design, develop, analyze, research, and manufacture hardware, software, and systems that process, store, and convey digital information. These systems include personal computers, workstations, mainframe computers, and embedded digital systems. Embedded systems consist of one to many computers within other products such as aircraft, automobiles, communication switching systems, networking components, biomedical instrumentation, and industrial automation systems. These systems are characterized by the use of digital electronic hardware and software in performing useful tasks. Computer software in combination with digital integrated circuits provides the foundation for the current revolution in computers and communications. This focus on software and digital hardware distinguishes the computer engineer from the electrical engineer.

The curriculum in the Department of Electrical and Computer Engineering requires a strong background in mathematics, physics, and computer science. In addition to basic course requirements in these areas, elective credits in the curriculum permit the student to pursue more advanced courses in these areas or in other fields, such as chemistry, biology, and mechanics. Additional electives in liberal studies broaden the programs to include such areas as economics, sociology, psychology, and history.

The electrical engineering and computer engineering programs share many courses in the first few semesters, including digital systems, electrical circuits, and electromagnetic fields. Computer engineering students take additional courses in computer science to provide the software part of their background. In the junior year, the electrical engineering program focuses on areas such as electromagnetic fields and analog electronics whereas computer engineering deals with computer hardware design and combined hardware/software design concepts. Technical elective freedom in both curricula makes it possible for students to choose from approximately 50 more specialized courses at the junior and senior levels in electrical and computer engineering, as well as courses from other departments. In both curricula, a student can choose a broad program covering an introductory treatment of a variety of areas or focus
in one or two specialized areas. An advising program, beginning in the first year, helps students plan their program.

To provide students with hands-on experience in electrical and computer engineering, specialized lab courses are offered at the senior level. For example, one involves the design and fabrication of integrated circuits and the other design and prototyping of a computer. Both classroom instruction and lab work are offered in signal processing and in embedded systems, with microprocessors and personal computers incorporated into larger systems. Independent study and design projects are encouraged at the senior level and an honors research program is available which spans multiple years of the undergraduate program.

Although the B.S. in electrical engineering and B.S. in computer engineering programs are intended to prepare students for immediate entry into the profession of engineering, increasingly, students find an additional year or more of study leading to the M.S. degree very desirable. The Ph.D. degree is the most advanced degree and emphasizes training in research.

Wisconsin Advanced Network Design, Experimentation, and Research (WANDER) Lab

## COMPUTER ENGINEERING, B.S.

As a computer engineering major, you can learn how to design and manufacture computer hardware using the latest semiconductor chip technologies, which form the foundation of everything from automobiles to household appliances to defense systems. In addition, you can learn how to develop, analyze and research systems that process, store and convey digital information. Computer engineering majors explore cuttingedge systems, including wearable technology, mobile devices, personal computers, servers used in the cloud, and embedded systems. You can even focus on the mathematics, tools and practices associated with machine learning and data science in engineering with our new Machine Learning and Data Science named degree option. Become a Badger, and let your curiosity set your path for learning.

## ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or non-profit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of

Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the computer engineering degree program (classification changed to CMPE) in fall 2017 or later.

| Code $\quad$ Title | Credits |
| :--- | ---: |
| Mathematics | 19 |
| Science | $\mathbf{2 0 - 2 1}$ |
| Computer Engineering Core | 34 |
| Computer Engineering Advanced Electives | 16 |
| Professional Electives | 9 |
| Communication Skills | 6 |
| Liberal Studies | $\mathbf{1 5}$ |
| Free Elective | $\mathbf{1}$ |
| Total Credits | $\mathbf{1 2 0 - 1 2 1}$ |

## MATHEMATICS

| Code | Title | Credits |
| :--- | :--- | ---: |
| MATH 221 | Calculus and Analytic Geometry 1 |  |
| or MATH 217 |  |  |
| or MATH 275 |  |  |$\quad$| Calculus with Algebra and Trigonometry II |
| :--- |
| MATH 222 |
| Topics in Calculus I |$\quad 5$

1
MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234.

## SCIENCE

| Code | Title | Credits |
| :--- | :--- | ---: |
| COMP SCI 300 | Programming II | 3 |
| COMP SCI 400 | Programming III | 3 |
| PHYSICS 201 | General Physics ${ }^{1}$ | 5 |
| or PHYSICS 207 <br> or PHYSICS 247 | General Physics | A Modern Introduction to Physics |
| PHYSICS 202 | General Physics |  |
| or PHYSICS 208  <br> or PHYSICS 248 General Physics | A Modern Introduction to Physics |  |
| Select one of the following: |  |  |
| CHEM 109 | Advanced General Chemistry |  |
| CHEM 103 | General Chemistry I |  |
| CHEM 104 | General Chemistry II |  |
| Total Credits |  | $\mathbf{4 - 5}$ |

1
Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics or E M A 201 Statics and M E 240 Dynamics.

## LIBERAL STUDIES ELECTIVES

Code ..... Title

College of Engineering Liberal Studies Requirements
Complete requirements (p. 237) ${ }^{1}$15
Total Credits ..... 15

1
All liberal studies credits must be identified with the letter $\mathrm{H}, \mathrm{S}, \mathrm{L}$, or Z . Language courses are acceptable without the letter and are considered humanities. Note: See an E C E advisor and/or the EE Curriculum Guide (https://www.engr.wisc.edu/department/electrical-computer-engineering/academics/bachelor-of-science-computer-engineering/) for additional information.

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

## NAMED OPTION

View as listView as grid

## - COMPUTER ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S. (P. 288)

## TOTAL DEGREE CREDITS: 120 <br> UNIVERSITY DEGREE REQUIREMENTS

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## FOUR-YEAR PLAN

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## PEOPLE

## PROFESSORS

Susan Hagness (Chair)
Nader Behdad
Daniel Botez
Azadeh Davoodi
John A. Gubner (Associate Chair for Operations)
Yu Hen Hu
Hongrui Jiang (Associate Chair for Graduate Studies)
Irena Knezevic
Bernard Lesieutre (Associate Chair for Undergraduate Studies)
Mikko Lipasti
Zhenqiang Ma
Luke J. Mawst
Robert Nowak
Parameswaran Ramanathan
Bulent Sarlioglu
William A. Sethares
Daniel van der Weide
Giri Venkataramanan
Amy E. Wendt
Zongfu Yu

## 4 ASSOCIATE PROFESSORS

Mikhail Kats
3 Daniel Ludois
Paul H. Milenkovic

Umit Ogras
Dimitris Papailiopoulos
Andreas Velten

## ASSISTANT PROFESSORS

Joseph Andrews
Jennifer Choy
Jeremy Coulson
Kassem Fawaz
Dominic Gross
Chirag Gupta
Robert Jacobberger
Younghyun Kim
Bhuvana Krishnaswamy
Kangwook Lee
Chu Ma
Pedro Morgado

## ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

> COMPUTER ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S.

The Machine Learning and Data Science option in Computer Engineering prepares students for a career in computer engineering with an emphasis on machine learning and data science. The purpose of this option is to provide guidance and recognition for students pursuing this career
path. The option uses 19 of the elective credits within the 120-credit Computer Engineering B.S. degree program to focus on the mathematics, tools, and practices associated with machine learning and data science in engineering. Students selecting this option must submit an option declaration form to the dean's office in Engineering Hall.

## REQUIREMENTS

## MACHINE LEARNING AND DATA SCIENCE REQUIRED COURSES

Code
ECE 204
ECE331

E C E/COMP SCI/
ME 532
E C E/COMP SCI/
ME 539
COMP SCI 564

Title
Data Science \& Engineering ${ }^{1}$
Introduction to Random Signal Analysis and Statistics (typically offered fall) ${ }^{2}$
Matrix Methods in Machine Learning 1 Networks ${ }^{3}$

Database Management Systems: Design and Implementation ${ }^{4}$

## Total Credits

This course should be taken as a Professional Elective. 2

This course fulfills the Probability requirement.

## 3

This course should be taken as a CMPE Elective II.
4
This course fulfills the System Software Requirement.

## MACHINE LEARNING AND DATA SCIENCE ELECTIVE <br> Code Title Credits

## ELECTRICAL ENGINEERING, B.S.

As an electrical engineering major, you can learn to design, develop, analyze, research and create systems for a wide variety of fields, including power generation, communication, healthcare and instrumentation. You'll also learn about the devices and components that make up these systems -from the smallest transistors (of which there can be hundreds of billions on a single chip!) to antennas, lasers, electric engines and even fusion devices that could provide power for the world.

Electrical engineering majors learn the tools for analyzing and operating systems, including signal processing, control and machine learning. You can even focus on the mathematics, tools and practices associated with machine learning and data science in engineering with our new Machine Learning and Data Science named degree option. In the UW-Madison ECE department, our program will match your ambition.

## ELECTRICAL ENGINEERING AND COMPUTER ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Our graduates should be engaged in activities such as:

1. Employment in industry, government, academia, or nonprofit using their degree knowledge or skills for professional functions such as teaching, research and development, quality control, technical marketing, intellectual property management, or sales. Graduates may eventually reach a leadership position supervising others.
2. Continuing education through self-study or short courses and workshops through their employer, local or online educational institutions, or attendance at professional events such as conferences.
3. Taking a principal role in starting a new business or product line.
4. Pursuing a postgraduate degree.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world.

Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students who were admitted to the electrical engineering degree program (classification changed to EE) in Fall 2017 or later.

| Code $\quad$ Title | Credits |
| :--- | ---: |
| Mathematics | 16 |
| Science | $17-18$ |
| Electrical Engineering Core | 33 |
| Electrical Engineering Advanced Electives | 24 |
| Professional Electives | 9 |
| Communication Skills | 6 |
| Liberal Studies | 15 |

Total Credits
120-121
MATHEMATICS ${ }^{1}$

| Code | Title | Credits |
| :---: | :---: | :---: |
| MATH 221 | Calculus and Analytic Geometry 1 | 5 |
| or MATH 217 | Calculus with Algebra and Trigonometry II |  |
| or MATH 275 | Topics in Calculus I |  |
| MATH 222 | Calculus and Analytic Geometry 2 | 4 |
| or MATH 276 | Topics in Calculus II |  |
| MATH 234 | Calculus--Functions of Several Variables ${ }^{2}$ | 4 |
| Probability and Statistics Elective |  | 3 |
| STAT 311 | Introduction to Theory and Methods of Mathematical Statistics I |  |
| STAT/M E 424 | Statistical Experimental Design |  |
| MATH/STAT 431 | Introduction to the Theory of Probability |  |
| E C E 331 | Introduction to Random Signal Analysis and Statistics |  |

Total Credits

In additional to the courses listed in the Mathematics Requirement at least one additional course must be completed for the advanced mathematics auxiliary condition. Choose: MATH 319 Techniques in Ordinary Differential Equations, MATH 320 Linear Algebra and Differential Equations, MATH 340 Elementary Matrix and Linear Algebra, MATH 341 Linear Algebra, E C E 334 State Space Systems Analysis, or E C E/ COMP SCI/M E 532 Matrix Methods in Machine Learning to satisfy the advanced math auxiliary condition. These credits count toward either professional electives or advanced elective credit depending on the course.

## 2

MATH 375 and MATH 376 taken in sequence will fulfill the requirement for MATH 234, professional elective credit, and advanced math auxiliary condition.

## SCIENCE

| Code | Title | Credits |
| :--- | :--- | ---: |
| COMP SCI 300 | Programming II | 3 |
| PHYSICS 201 | General Physics ${ }^{1}$ | 5 |
| or PHYSICS 207 | General Physics |  |
| or PHYSICS 247 | A Modern Introduction to Physics |  |
| PHYSICS 202 | General Physics |  |
| or PHYSICS 208  <br> or PHYSICS 248 General Physics |  |  |
| Select one of the following: | 5 |  |
| CHEM 109 | Advanced General Chemistry |  |
| CHEM 103 | General Chemistry I |  |
| CHEM 104 | General Chemistry II | $4-5$ |

## Total Credits

1
Students may also fulfill this requirement by taking E M A 201 Statics and E M A 202 Dynamics or E M A 201 Statics and M E 240 Dynamics.

ELECTRICAL ENGINEERING CORE

| Code | Title | Credits |
| :--- | :--- | ---: |
| E C E 203 | Signals, Information, and <br> Computation | 3 |
| E C E 210 | Introductory Experience in Electrical <br> Engineering | 2 |
| E C E 219 | Analytical Methods for <br> Electromagnetics Engineering | 2 |

| E C E/ | Electronics | 3 |
| COMP SCI 252 | Introduction to Computer | Engineering |
| E C E 270 | Circuits Laboratory I | 3 |
| E C E 271 | Circuits Laboratory II | 1 |
| E C E 330 | Signals and Systems | 1 |
| E C E 340 | Electronic Circuits I | 3 |
| E C E/ | Digital System Fundamentals | 3 |
| COMP SCI 352 |  | 3 |

E C E 370
Total Credits

## ELECTRICAL ENGINEERING ADVANCED ELECTIVES

Students must take 22 credits in at least three of six areas and at least 2 credits in two laboratory courses.

- At least 9 credits must be in E C E courses numbered 400 and above.
- At least one course must be a capstone design course.
- At least one course must be MATH 319 Techniques in Ordinary Differential Equations, MATH 320 Linear Algebra and Differential Equations, MATH 340 Elementary Matrix and Linear Algebra, MATH 341 Linear Algebra, E C E 334 State Space Systems Analysis, or E C E/COMP SCI/M E 532 Matrix Methods in Machine Learning to satisfy the advanced math auxiliary condition. MATH 319 Techniques in Ordinary Differential Equations, MATH 320 Linear Algebra and Differential Equations, MATH 340 Elementary Matrix and Linear Algebra, and MATH 341 Linear Algebra count toward professional electives. E C E 334 State Space Systems Analysis and E C E/COMP SCI/M E 532 Matrix Methods in Machine Learning count as advanced electives.
- Students can count 1 credit of E C E 1 Cooperative Education Program toward advanced electives.
- Students can count up to 6 credits of E C E 399 Independent Study, E C E 489 Honors in Research or E C E 699 Advanced Independent Study towards advanced electives.
- Students can take E C E 379 Special Topics in Electrical and Computer Engineering and E C E 601 Special Topics in Electrical and Computer Engineering as advanced electives.
- Students can count up to 5 credits of COMP SCI courses numbered 500 and above (not including independent study)
- E C E courses numbered 300 and above that are not specified in an area can count toward the total number of advanced elective credits required.

All liberal studies credits must be identified with the letter $\mathrm{H}, \mathrm{S}, \mathrm{L}$, or Z . Language courses are acceptable without the letter and are considered humanities. Note: See an E C E advisor and/or the EE Curriculum Guide for additional information.

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate
honors research, including a senior thesis. Further information is available in the department office.

## NAMED OPTION

View as listView as grid
ELECTRICAL ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S. (P. 295)

## TOTAL DEGREE CREDITS: 120 UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. |
| :---: | :---: |
| Residency | Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs. |
| Quality of Work | Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation. |

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## ELECTRICAL ENGINEERING: MACHINE LEARNING AND DATA SCIENCE, B.S.

The Machine Learning and Data Science option in Electrical Engineering prepares students for a career in electrical engineering with an emphasis on machine learning and data science. The purpose of this option is to provide guidance and recognition for students pursuing this career path. The option uses 18 of the elective credits within the 120-credit Electrical Engineering B.S. degree program to focus on the mathematics, tools, and practices associated with machine learning and data science in engineering. Students selecting this option must submit an option declaration form to the dean's office in Engineering Hall.

REQUIREMENTS

## ENGINEERING - COLLEGEWIDE

## DEGREES/MAJORS/CERTIFICATES

- College of Engineering Honors in the Liberal Arts (p. 297)
- International Engineering, Certificate (p. 297)
- Naval Science, BNS (p. 298)
- Technical Communication, Certificate (p. 300)

## COLLEGE OF ENGINEERING HONORS IN THE L|BERAL ARTS

In general, the concept of academic honors programs in higher education focuses resources on especially able students who are interested in challenging themselves at unusually high levels. This concept does not translate to the College of Engineering programs. All engineering classes are challenging, focused, and require high academic ability in math and science. Further, in engineering, resources must be used to make sure all engineering graduates-not just a few-excel in every respect. Nonetheless, honors opportunities are available on a limited basis in the College of Engineering.

## HOW TO GET IN

EHLA allows for a small group of highly motivated students who have special, broad interests in liberal arts to take challenging background courses in physical science, natural science, humanities, foreign language, and social science to supplement their engineering program. The EHLA program will allow students access to honors sections in these College of Letters \& Science courses. Honors courses in physical and natural science are available to invited engineering freshmen whether or not they are selected for EHLA. Conversely, no engineering courses are available as honors courses. Admission to EHLA is based on applications from high school students submitted before May 23 of their last year in high school. Fewer than 30 students are admitted each year. Interested students can find the application on the College of Engineering website (https:// www.engr.wisc.edu/academics/undergraduate-academics/honors/) and should contact Dr. Andrew Greenberg at greenberg2@wisc.edu with questions.

## REQUIREMENTS

The EHLA designation will be awarded to those admitted to the EHLA program who meet the following requirements when they graduate with an engineering degree:

- A cumulative grade point average of at least 3.3 in all honors courses through the semester in which all criteria for EHLA are met;
- Completion of at least 24 credits in Honors courses with grades of B or better;
- Completion of at least 6 credits in Honors courses in the humanities, 6 credits in social sciences, and 6 credits in natural sciences;
- Completion of at least 15 Honors credits in courses with the designation "H" or "!" (honors sections).

Because the classes for which Honors designation is available are taken mainly in the first year, students do not apply to the EHLA program once they begin in the College of Engineering. Students can, however, transfer from the College of Letters \& Science Honors in Liberal Arts program into the EHLA program provided they transfer into an engineering program in their first two years.

## INTERNATIONAL ENGINEERING, CERTIFICATE

The certificate in international engineering provides recognition for a student's efforts to prepare for an international career by learning about one or more countries outside the United States. An undergraduate student in the College of Engineering or the Department of Biological Systems Engineering can earn the certificate by completing at least 16 credits in courses with a primary focus on the language, culture, history, geography, society, or institutions of a particular country or region of the world.

## HOW TO GET IN

The application process is outlined on the Certificate in International Engineering website (https://www.engr.wisc.edu/academics/ undergraduate-academics/certificate-in-international-engineering/). Students must have a cumulative GPA of at least 2.75 and have met progression requirements to apply.

## REQUIREMENTS

## CERTIFICATE COURSE REQUIREMENTS

A minimum of 16 credits is required.

## LANGUAGE COURSES (0-9 CREDITS)

Although not required, a maximum of 9 credits may be devoted to courses in a foreign language. Only foreign language courses beyond the initial 8 credits in that particular language may be used to satisfy this requirement. A maximum of 3 credits from Independent Study or Directed Study may be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

## AREA STUDIES COURSES (6-15 CREDITS)

A minimum of 6 credits must be devoted to courses with a major emphasis on the culture, history, geography, society, or institutions of one country or the countries in a geographically identifiable region of the world. These courses must be selected from at least two departments. A maximum of 3 credits from Independent Study or Directed Study may
be counted toward either the language requirement or the area studies requirement. Advanced Placement credits, foreign language retroactive credits, and transfer credits are accepted.

## INTERNATIONAL EXPERIENCE

A documented stay of five weeks or longer for study or engineeringrelated volunteer or work (including internship and co-op) in the designated country or region is required.

## INTERNATIONAL ENGINEERING COURSE

After one's international experience, successful completion of the 1credit course INTEREGR 413 Current Issues in International Engineering is required. This course is offered during the fall semester only.

Students may not elect the pass/fail option for any course that is used to satisfy the requirements for the certificate, with the exception of courses taken on a study abroad program through International Academic Programs (https://studyabroad.wisc.edu/) in collaboration with the College of Engineering. Successful completion of certificate requirements will be noted on the student's official transcript. For additional information, contact international@engr.wisc.edu.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Study the language and/or culture of a specific area of the world.
2. Obtain a significant international experience in that same area of the world (meaning spending 5 weeks or more in the area).
3. Understand and be able to articulate specific insights about the international dimension of engineering as a profession.

## NAVAL SCIENCE, BNS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree.

Earning both the BNS degree and the B.S. degree in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

For additional information see the Officer Education (p. 27) section of the Guide.

## HOW TO GET IN

The Naval Science BNS is not a stand-alone degree. Students interested in pursuing this degree should consult with the Navy ROTC:
1610 University Ave, Madison, WI 53726 | 608-262-3794 | nrotc@aviation.wisc.edu (nrotc.aviation@wisc.edu)

## REQUIREMENTS

The College of Engineering recommends candidates for the Bachelor of Naval Science degree. Requirements for the degree are:

1. A total of 136 credits including no fewer than 100 credits of elected and required courses in one of the engineering curricula.
2. Completion of these additional requirements as approved by the Department of Naval Science: English, two semesters; American Military Affairs/National Security Policy, one semester (see below).

Earning both the BNS degree and the B.S. in the field of engineering may require five years. Engineering students in an ROTC program may require four and one-half to five years to complete both degree and commissioning requirements.

## REQUIRED COURSES:

| Code | Title | Credits |
| :---: | :---: | :---: |
| Naval Laboratory (1 cr each): |  | 8-10 |
| NAV SCI 175 | Introductory Naval Laboratory I |  |
| NAV SCI 176 | Introductory Naval Laboratory II |  |
| NAV SCI 275 | Elementary Naval Laboratory I |  |
| NAV SCI 276 | Elementary Naval Laboratory II |  |
| NAV SCI 375 | Intermediate Naval Laboratory I |  |
| NAV SCI 376 | Intermediate Naval Laboratory II |  |
| NAV SCI 475 | Advanced Naval Laboratory I |  |
| NAV SCI 476 | Advanced Naval Laboratory II |  |
| NAV SCI 575 | Professional Naval Laboratory I ${ }^{1}$ |  |
| NAV SCI 576 | Professional Naval Laboratory II ${ }^{1}$ |  |
| NAV SCI 101 | Introduction to Naval Science | 2 |
| NAV SCI 102 | Seapower-Maritime Affairs ${ }^{2}$ | 3 |
| NAV SCI 201 | Naval Leadership and Management | 3 |
| NAV SCI 402 | Naval Leadership and Ethics | 3 |
| Six credits of English. Must be writing-intensive and focus on areas of grammar and composition. Accepted courses include those designated COM A or COM B |  | 6 |
| Three credits of American Military History or National Security Policy. Accepted courses include: |  | 3 |
| POLISCI 104 | Introduction to American Politics and Government |  |
| POLI SCI 140 | Introduction to International Relations |  |
| POLI SCI 160 | Introduction to Political Theory |  |
| POLISCI/ <br> LEGAL ST 217 | Law, Politics and Society |  |
| POLI SCI 347 | Terrorism |  |
| POLI SCI 348 | Analysis of International Relations |  |
| POLI SCI 356 | Principles of International Law |  |
| POLI SCI 377 | Nuclear Weapons and World Politics |  |
| HISTORY 427 | The American Military Experience to 1902 |  |
| HISTORY 428 | The American Military Experience Since 1899 |  |
| MIL SCI 491 | American Military History |  |

| Navy-Option Track: |  |
| :---: | :---: |
| NAV SCI 202 | Navigation |
| NAV SCl 301 | Naval Engineering |
| NAV SCI 302 | Naval Weapons |
| NAV SCI 401 | Naval Operations |
| Six credits of calculus to include a first- and secondsemester course ${ }^{3}$ |  |
| Six credits of calculus-based physics to include a firstand second-semester course ${ }^{3}$ |  |
| Three credits of World Culture and Regional Studies. Must have an emphasis on regions encompassed by Sub-Sahara Africa, North Africa, Central Asia, East Asia, South Asia, Southwest Asia, Southeast Asia, Central America, Middle East, or Russia/Eastern Europe |  |
| Marine Corps-Option Track: |  |
| NAV SCI 350 | Fundamentals of Maneuver Warfare |
| NAV SCI 351 | Land Campaigns |

Add NAV SCI 575 Professional Naval Laboratory I if taking a 9th semester, NAV SCI 576 Professional Naval Laboratory II if taking a 10th semester.
2
May substitute HISTORY 428 The American Military Experience Since 1899.

3

AP/IB/Transfer credits accepted only for first-semester course.

Also, to be conferred a BNS degree, the candidate must satisfy the degree requirements for any Engineering major, and the above-stated Naval Science requirements.

## LEARNING OUTCOMES

1. Understand and apply the fundamentals and principles of Naval Science.
2. Understand and apply Naval Science professional knowledge and core competencies.
3. Be prepared to perform successfully in the technical and critical reasoning requirements of their careers and pursue continuing education in a field of application within the Naval Service.
4. Understand and demonstrate a strong sense of personal integrity, honor, and individual responsibility and associated ethical leadership required of military officers.

## FOUR-YEAR PLAN

## SAMPLE FOUR YEAR PLANS

The Bachelor of Naval Science degree is not a stand-alone degree. The plans below must be integrated with a student's undergraduate College of Engineering major plan. See your engineering advisor and Naval ROTC program staff with questions.

NAVY SCHOLARSHIP/COLLEGE PROGRAMMER

| First Year |  |  |  |
| :---: | :---: | :---: | :---: |
| Fall | Credits | Spring | Credits |

## ADVISING AND CAREERS

Naval Science BNS students should meet with the Navy ROTC for advising:
1610 University Avenue Madison, WI 53726;
608-262-3794; nrotc.aviation@wisc.edu

## PEOPLE

Naval Science-Professor, CAPT Barnett; Associate Professor, CDR Choquette; Assistant Professors LT Hippe, LT Fox, Gunnery Sgt Smith, and Marine Capt. Hoffman. The assistant professors act as undergraduate advisors and may be contacted through the department office.

## TECHNICAL COMMUNICATION, CERTIFICATE

The Technical Communication Certificate (TCC) has established itself as a program that meets industry and government agencies' demands for students with skills as communicators and for communication specialists. Because employers value well-developed communication skills, TCC courses will enhance success in co-op/intern positions and post-graduation careers. TCC graduates overwhelmingly confirm not only that the certificate gave them an edge over other candidates during the recruitment process, but also that the communication knowledge, skills, and attitudes they acquired while in the program helped them succeed in their jobs and helped prepare them for the diverse communication and management tasks in today's multifunctional team environments.

The Technical Communication Certificate, housed in the College of Engineering, complements all undergraduate degrees, but is especially designed to fit in well with an engineering degree. TCC students gain experience in career-applicable skills by

- Receiving education in principles and processes for communicating about technical subjects (including problem solving methods, audience analysis, rhetorical analysis, conventions of format, and usability testing).
- Gaining education in the fundamentals of written, oral, and visual communication (including organization, structure, style, mechanics, format, and delivery).
- Learning effective interpersonal communication and management skills (including teamwork, interviewing, leading and facilitating groups, project management, and international communication).
- Gaining opportunities to research and think analytically about contemporary issues and to consider ethical issues.
- Using current technology to encourage effective communication in a variety of environments (including use of the web, distance
communication, electronic publishing, group software, and layout and presentation software).

While the certificate is designed especially for engineering students, students from other fields sometimes seek out the program to enhance their career options. Students who complete the certificate will have the notation "Technical Communication Certificate" added to their transcripts.

Students in the program often take on leadership roles in other college or campus student organizations and projects, further developing their communication, team, and management skills.

## HOW TO GET IN

Undergraduates who would like to enroll in the Technical Communication Certificate may download the TCC Application form (PDF) (https:// tc.engr.wisc.edu/certificate/applying-to-the-technical-communicationcertificate/). Email the completed TCC Application along with a PDF of your current DARS report to Laura Grossenbacher, Director of the Tech Comm Program, at Irgrossenbac@wisc.edu. Graduate students and non-degree-seeking students cannot enroll in the TCC.

## PREREQUISITES FOR ADMISSION TO THE TCC PROGRAM

- A grade of at least B in Communication A or equivalent course or AP English credits (score of at least 4 out of 5).
- Four courses (12-credit minimum) in science and/or engineering, including at least one intermediate-level (minimum 200-level) course.
- Three courses (9-credit minimum) in humanities, social sciences, and/ or foreign language.
- Overall GPA of at least 2.5.

Applications are accepted throughout the semester, though students are encouraged to submit applications as early as possible so they have ample time to plan their coursework. The program will notify all new admissions via email.

## REQUIREMENTS

To graduate with the certificate in technical communication, students must complete at least 21 credits, with a minimum of 6 credits in technical proficiency courses and a minimum of 15 credits in both technical and nontechnical communication courses.

In addition to course requirements, students must achieve at least a B in the required Engineering Communication (INTEREGR 397) and the Technical Communications Internship (E P D 398). All students must complete the program within five years from their application date. Students are encouraged to meet with their advisor regularly to ensure they are on track to graduate with their certificate. Students cannot count courses completed on a pass/fail basis toward the certificate.

Substitution of courses substantively equivalent to those listed will be considered by the Technical Communication Curriculum Committee. Students must submit requests for substitution with supporting material before beginning the course.

## PREREQUISITES <br> Code Title

Credits
A grade of at least $B$ in Communication $A$ or equivalent course or AP English credits (score of at least 4 or 5)

Select four courses (12-credit minimum) in science and/ or engineering, including at least one intermediate-level (minimum 200-level) course
Select three courses ( 9 -credit minimum) in liberal studies including a foreign language
Overall GPA of at least 2.5

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Understand and apply principles and processes for communicating about technical subjects to diverse audiences.
2. Understand and apply fundamentals of written, oral, and visual communication.
3. Apply improved skills in interpersonal communication, teamwork, and management.
4. Research, identify, and think analytically about social, global, economic, political, environmental, and ethical issues as they impact technical projects or engineering work.
5. Use current technology to communicate effectively in a variety of formats and environments.
6. Engage in real world experiences through communication internships and guest lectures.

## INDUSTRIAL AND SYSTEMS ENGINEERING

The first bachelor of science in industrial engineering at the University of Wisconsin-Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best -the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW-Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in four main areas:

- Engineering Analytics and Operations Research
- Healthcare Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Supply Chain Management

Although there is no sub major within IE, it is possible to achieve a degree of specialization through choice of a focus area. Courses focusing on teams and design projects prepare students to succeed in the workplace.

## INDUSTRIAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

During the first several years following graduation from the program, a graduate from UW-Madison with a B.S. in industrial engineering would be expected to:

1. Demonstrate competence in the professional practice of industrial engineering.
2. Demonstrate industrial engineering skills needed as a foundation for leadership in a career and the profession.
3. Act with professional and ethical responsibility, fostering an inclusive work environment, and appreciate the impact of proposed solutions to a global and/or societal context.

## ENGINEERING DATA ANALYTICS, CERTIFICATE

This certificate is designed to enhance the skills of engineering students in the field of Data Analytics, which is in high demand across all engineering fields. Students may choose from a wide variety of courses from each of the four main areas: Foundations of Data Analytics, Applications of Data Analytics, Data Science, and Machine Learning. The culminating course in the program focuses on ethical issues in Data Analytics and provides students with principled solutions to address these modern societal challenges.

The program is open to any degree-seeking undergraduate engineering student with a plan of study that fulfills the certificate requirements. Applications can be submitted at any time, but students are encouraged to apply early to ensure a smooth and successful completion of the program.

## HOW TO GET IN

All current undergraduate students in the College of Engineering are eligible to complete the Certificate in Engineering Data Analytics. Students should meet with the Certificate Advisor to discuss their intention to pursue the certificate and submit an online declaration form: https://engineering.wisc.edu/programs/certificates/engineering-data-analytics/declaration (https://engineering.wisc.edu/programs/ certificates/engineering-data-analytics/declaration/).

Students declared in the Certificate in Data Science are not eligible to declare the Certificate in Engineering Data Analytics.

## REQUIREMENTS

Select one course from each area. The ethics course must be taken after the other four courses are completed.

| Code $\quad$ Title | Credits |
| :--- | ---: | ---: |
| Foundations of Data Analytics | $\mathbf{3}$ |

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Apply tools and methods to understand, analyze, and interpret data from a variety of sources
2. Apply tools and methods to draw conclusions from and make decisions based on analysis of data
3. Articulate the potential impact of a data-driven decision in the context of ethics, fairness, and equity
4. Identify how engineers apply data analytics in practice using machine learning, data science, and other fundamental tools of data analytics

## INDUSTRIAL ENGINEERING, B.S.

The first bachelor of science in industrial engineering at the University of Wisconsin-Madison was awarded in 1972. Since that time the demand for industrial engineers has grown dramatically for one chief reason: the need for organizations to raise their level of productivity through thoughtful, systematic applications.

Becoming an industrial engineer (IE) places one in an exciting field of engineering that focuses on productivity improvement worldwide. It is a field that deals as much with human aspects of work as with today's sophisticated tools of work.

What sets industrial engineering apart from other engineering disciplines is its broader scope. An IE deals with people as well as things. The industrial engineer applies problem-solving techniques in almost every kind of industry, business, or institution. There are IEs in banks, hospitals, government at all levels, transportation, construction, processing, social services, electronics, facilities design, manufacturing, and warehousing.

An IE looks at the "big picture" of what makes society perform best -the right combination of human resources, natural resources, and human-made structures and equipment. An IE bridges the gap between management and operations, dealing with and motivating people as well as determining what tools should be used and how they should be used. Industrial engineering is concerned with performance measures and standards, research of new products and product applications, ways to improve use of scarce resources, and many other problem-solving adventures.

Because industrial engineering serves a broad cross-section of business, industry and institutions, the IE's work environment varies from office to plant to field. Choices can be made even after the IE begins his or her career. Few other vocations offer a graduating student such a wide selection of places to work or kind of work to perform. Need for industrial engineers makes this profession particularly attractive from the financial standpoint. Beginning salaries rank in the top group of high-paying engineering disciplines, and fast advancement is not unusual.

In the industrial and systems engineering department at UW-Madison, the course curriculum is set up to provide a diversified background and at the same time allow choices according to individual interests. Specialized coursework might be categorized in four main areas:

- Engineering Analytics and Operations Research
- Healthcare Systems Engineering
- Human Factors and Ergonomics
- Manufacturing and Supply Chain Management

Although there is no sub major within IE, it is possible to achieve a degree of specialization through choice of a focus area. Courses focusing on teams and design projects prepare students to succeed in the workplace.

## INDUSTRIAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

During the first several years following graduation from the program, a graduate from UW-Madison with a B.S. in industrial engineering would be expected to:

1. Demonstrate competence in the professional practice of industrial engineering.
2. Demonstrate industrial engineering skills needed as a foundation for leadership in a career and the profession.
3. Act with professional and ethical responsibility, fostering an inclusive work environment, and appreciate the impact of proposed solutions to a global and/or societal context.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree
requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the Industrial Engineering, BS, degree program beginning in Fall 2020 or later. Required courses and electives satisfying the Mathematics and Basic Science, Computer Sciences, IE Focus Area, and General Education Communication requirements are indicated. For Liberal Studies Electives refer to the College of Engineering Liberal Studies Guidelines.

| Code Title | Credits |
| :--- | ---: |
| Mathematics and Basic Science | $30-31$ |

## MINIMUM REQUIRED CREDITS: 120

## UNIVERSITY DEGREE

 REQUIREMENTSTotal Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies
8. Recognize, describe, predict and analyze systems behavior
9. Understand physiological, cognitive, and sociotechnical aspects of humans as components in complex systems design
10. Apply the techniques, skills, and modern engineering tools necessary for engineering practice, such as quality engineering, optimization, simulation, and project management

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school,
and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## MATERIALS SCIENCE AND ENGINEERING

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society. Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

## MATERIALS SCIENCE AND ENGINEERING, B.S.

Advances in technology are closely linked to the materials that people can design, manipulate, and produce. How we live is connected to our abilities to process materials and manufacture products; to develop and design nontraditional as well as traditional materials for an increasingly broad range of industries; and to research and develop high-performance materials for practical applications in coming decades. The materials that change the way we live may be the next generation of superalloys for applications in extreme conditions such as high-temperature or highly corrosive environments; new materials for application in energy generation, storage, and transmission; organic and inorganic materials for use and integration in applications ranging from electronics to medicine; or new materials systems yet to be developed for the ever-increasing needs of our society. Materials experts find employment in a broad range of industries and may practice experimental, computational, or theoretical materials science and engineering, or all of these in combination. The undergraduate curriculum leads to the Bachelor of Science Degree in Materials Science and Engineering. The curriculum is designed to prepare students with the foundation needed to thrive in broad and rapidly changing industries that are based on materials. It also provides substantial flexibility, through electives and with the assistance of a materials science and engineering faculty advisor, for tailoring to students' specific interests within the materials field. Science, engineering, teamwork, broad thinking, and communication skills all are integral parts of the curriculum. Graduates are well prepared for careers in industry or for graduate studies.

## MATERIALS SCIENCE AND ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Objective 1: Skills and Tools. Graduates will be applying the tools and skills acquired during their undergraduate experience either in post-graduate educational programs or as employees in materials-related industries.

#### Abstract

Objective 2: Early Career Growth. Graduates will have experienced professional growth in their chosen post-baccalaureate pursuits, for example, through acquisition of advanced degrees or advancement in employment rank.

Objective 3: Professional Citizenship. Graduates will have demonstrated awareness of contemporary issues in technology and society and ethical responsibility.

Objective 4: Life-Long Learning: Graduates will have demonstrated a continuing commitment to learning.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits

- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students admitted to the materials science and engineering degree program (MS\&E) in or after fall semester of 2019.

| Code $\quad$ Title | Credits |
| :--- | ---: |
| Mathematics and Statistics | 19 |
| General Science and Engineering Foundations | $25-26$ |
| MS\&E Required Courses | 45 |
| Materials Emphasis Elective Requirements | 12 |
| Communication Skills | 6 |

| Liberal Studies | 16 |

## LIBERAL STUDIES

Complete 16 credits of liberal studies requirements (p. 237).

- Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be designated as above the elementary level (I, A, or D).
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case "e" in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not have $H, S, L$, or $Z$ designation; these courses do not count toward the Liberal Studies requirement.

## FREE ELECTIVES

Select 4-5 elective credits.

- The above subject requirements can be met with 123 credits of UW courses. Students must complete 128 credits of coursework to earn the B.S. in materials science and engineering. The 4-5 elective credits may be earned by choosing elective courses that carry more credits than the requirement's minimum credit load or by taking any additional coursework of the student's choice.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## PEOPLE

## PROFESSORS

## ACCREDITATION

Accreditation.
Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## MECHANICAL ENGINEERING

The Department of Mechanical Engineering (ME) within the University of Wisconsin-Madison College of Engineering is the home of two undergraduate degree programs (mechanical engineering and engineering mechanics, including an option in aerospace engineering) and two
graduate degree programs (mechanical engineering and engineering mechanics). The department's faculty conducts research in the areas of advanced manufacturing, biomechanics, computation \& data-driven engineering, energy systems, solid \& fluid mechanics, and robotics, controls, \& sensing. This combination of topics fosters synergies with respect to polymers, mechatronics, aerospace, thermal, materials, additive manufacturing, and fluids. The mechanical engineering undergraduate program has been ranked in the top twelve, and the mechanical engineering graduate program has been ranked in the top seven, among public universities, according to U.S. News and World Report 2022 rankings.

Senior Design Hub
Solar Energy Lab
TEAM Lab

## ENGINEERING MECHANICS, <br> B.S.

With a degree in engineering mechanics, our graduates design, measure and analyze complex structures in everything from networks of human cells and novel materials constructed at the nanoscale, to roller coasters and spacecraft. Engineering mechanics is the home of aerospace engineering (http://guide.wisc.edu/undergraduate/engineering/ engineering-physics/engineering-mechanics-bs/engineering-mechanics-aerospace-engineering-bs/) at UW-Madison. Our curriculum prepares students for careers in a wide variety of fields, including health, clean energy, space exploration, and many more. As one of the smaller engineering majors, we focus on building a community that supports our students' success during their degree and as they launch their careers.

Engineering mechanics is the study of forces and the resulting deformations, accelerations, motions, vibrations, and other responses they cause. It forms the foundation of aerospace, mechanical or civil engineering, and is fundamental to important parts of biomedical engineering, chemical engineering, materials science, and other engineering disciplines.

Graduates of engineering mechanics apply their expertise in a variety of areas.

Wind turbines, wave power systems, transmission towers, and pipelines all respond to their environments in different ways. The safety and performance of these systems depend on a detailed understanding of how the environmental forces lead to deformations and vibrations that might cause failure. Principles of aerospace engineering are important when wind and water are involved as their flows make the analysis even more challenging, requiring sophisticated mathematical and analytical tools.

At slightly smaller scales, engineering mechanics is fundamental to the design and innovation of vehicles of every type, from sports cars to tractors to aircraft and satellites. Understanding engineering mechanics principles can provide insight to expand the way these vehicles are used while making their operation more sustainable. For some vehicles, aerospace engineering sheds light on their aerodynamic interaction with their environment, as well as the propulsion systems and complexity of controlling vehicles in flight. Landing a rover on Mars requires engineering mechanics to design the rover itself as well as the delivery system.

Innovations in engineering mechanics allow many of the products in our everyday lives to be made lighter, stronger, or cheaper by carefully understanding how they perform and when they fail due to the forces from the outside. In addition to enabling new functionality and aesthetic design, these modifications open the door for improved energy efficiency, selection of green materials, and longer lifetimes, all with broader societal benefits.

Modern technology allows us to fabricate machines at the microscopic scale with moving parts that are only visible under a microscope. Understanding how these micromachines respond to forces from each other or their environment is important to ensure that they function correctly. At this same scale, we can build novel materials whose properties depend on the microscopic structures that define them rather than their chemical composition. Engineering mechanics allows us to design these materials with properties that are not found in nature.

Our curriculum starts with a rich physics and math base to prepare our graduates for advanced analytical and computational skills that they will apply to this range of technologies. We transition from these fundamentals to engineering problem-solving approaches that can be applied to increasingly complex systems, while students build skills in computational modeling and simulation. Students in the aerospace engineering option will take a course in the wind tunnel to refine their understanding of the basics of aerodynamics.

As one of the smaller engineering majors, we focus on building a community that supports our students' success during their degree and as they launch their careers. Many students participate in undergraduate research across one of the biggest research portfolios in the College of Engineering. An alumni network across industry sectors-from John Deere to Tesla to Boeing to SpaceX-provides support for students to find internships and launch their careers.

## ENGINEERING MECHANICS PROGRAM EDUCATIONAL OBJECTIVES

The faculty recognize that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths. Regarding the Engineering Mechanics program, we initially expect graduates will begin their careers in fields that utilize their knowledge, education and training in solid mechanics, fluid mechanics and dynamics/ vibration in a variety of jobs in mechanical, aerospace, manufacturing and other engineering fields.

Our educational objectives for the engineering mechanics program are to allow them to:

1. Exhibit strong performance and continuous development in problemsolving, leadership, teamwork, and communication, initially applied to engineering mechanics, and demonstrating an unwavering commitment to excellence.
2. Demonstrate continuing commitment to, and interest in, his or her training and education, as well as those of others.
3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
4. Contribute to their communities.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission
consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## ENGINEERING MECHANICS CURRICULUM

The following curriculum applies to students who entered the College of Engineering in fall 2023 or later.

## 1

If the Mathematics and Statistics and the Science requirements are fulfilled with fewer than 30 credits combined, additional math/science credits will be needed to meet the math/science auxiliary credit condition.

## MATHEMATICS AND STATISTICS

| Code | Title | Credits |
| :--- | :--- | ---: |
| MATH 221 | Calculus and Analytic Geometry 1 | 5 |
| or MATH 217 | Calculus with Algebra and Trigonometry II |  |
| or MATH 275 | Topics in Calculus I |  |
| MATH 222 | Calculus and Analytic Geometry 2 |  |
| or MATH 276 | Topics in Calculus II | $4-5$ |

## LIBERAL STUDIES

Code Title Credits
College of Engineering Liberal Studies Requirements
Complete Requirements (p. 237) ${ }^{1} \quad 16$
Total Credits 16

1
Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following sub-requirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be designated as above the elementary level ( $\mathrm{I}, \mathrm{A}$, or D ) in the course listing.
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case " $e$ " in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

## TOTAL CREDITS: 128

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## NAMED OPTIONS IN ENGINEERING MECHANICS

Students may elect to declare a named option under the Engineering Mechanics BS. The named option in Aerospace Engineering can be declared as of Fall 2020. The named option in Astronautics is suspended as of Summer 2020; the last term to earn the named option is Summer 2026.

View as listView as grid

## - ENGINEERING MECHANICS: AEROSPACE ENGINEERING (P. 322) <br> - ENGINEERING MECHANICS: ASTRONAUTICS (P. 325)

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn a Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes <br>  <br> UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
| :--- | :--- |
| Away programs. |  |
| Quality of | Undergraduate students must maintain the minimum grade |
| Work | point average specified by the school, college, or academic <br> program to remain in good academic standing. Students <br> whose academic performance drops below these minimum |
|  | thresholds will be placed on academic probation. |

## EARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Total Credits 128-129

1

It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

2
M E 201 Introduction to Mechanical Engineering can be taken in first or second semester
3
Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

## 4

After completing E M A 201 Statics, students may take E M A 202
Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307
Mechanics of Materials Lab in either order or concurrently.
5
Students electing E M A 545 Mechanical Vibrations instead of E M A 542 Advanced Dynamics should note that E M A 545 Mechanical Vibrations is offered in the spring semester only.
6
E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540
Experimental Vibration and Dynamic System Analysis or EM A/
M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that EM A/M E 540 and E M A/M E 570 are typically offered in the fall. E M A 611 and E M A 522 are typically offered in the spring.

M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 is offered in the spring semester only.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned an Engineering Mechanics faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## PEOPLE

New people list here?

## RESOURCES AND SCHOLARSHIPS

## FACILITIES

Facilities available for instruction and research include:
Mechanics Holographic Lab
Viscoelasticity and Composites Lab
Wisconsin Laboratory for Structures and Materials Testing: Materials
Testing Lab
Wind Tunnel Laboratory
Structural Mechanics Lab
Structural Dynamics and Vibrations Lab
Fatigue/Fracture Lab
Instructional Computing Lab (in Computer Aided Engineering)
Research Computing Lab

## SCHOLARSHIPS

The College of Engineering has several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and find specific information on scholarships at UW-Madison. You can use WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to: coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060).

## ACCREDITATION

Accreditation.
Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## ENGINEERING MECHANICS: AEROSPACE ENGINEERING

Engineering mechanics is the home of aerospace engineering at UWMadison. Some of the most exciting innovations in air and space travel require understanding of the engineering mechanics principles at the heart of this major. Whether there are humans in the cockpit or remotecontrolled drones, the interaction of an aircraft with its surroundings results in deformation, vibration and dynamic motions that are all explained by engineering mechanics. Even without the atmosphere experienced by aircraft, spacecraft and vehicles that explore distant planets must also withstand a variety of forces and be reliable in environments where repair may not be possible. In both cases, there is a premium on reducing weight and expanding capabilities. This makes aerospace engineering a natural extension of engineering mechanics. Following the same fundamental courses as our engineering mechanics major, students in the aerospace engineering option will apply their education in structural analysis, material science, advanced dynamics and vibrations to specific courses on aerodynamics, flight dynamics, orbital mechanics and propulsion. A highlight of this program is the aerodynamics laboratory where students conduct field experiments on the UW-Madison wind tunnel. Talk to your academic advisor about declaring this option.

## REQUIREMENTS

The following curriculum applies to students who entered the College of Engineering beginning in Fall 2023.

## SUMMARY OF REQUIREMENTS

| Code $\quad$ Title | Credits |
| :--- | ---: |
| Mathematics and Statistics |  |
| Science ${ }^{1}$ | 22 |
| Engineering Science | 10 |

| College of Engineering Liberal Studies Requirements |  |  |
| Complete Requireme | nts (p.237) ${ }^{1}$ | 16 |

1
Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be designated as above the elementary level ( $\mathrm{I}, \mathrm{A}$, or D ) in the course listing.
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case " $e$ " in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## HONORS IN UNDERGRADUATE RESEARCH

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

## Total Credits 131

1
It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.
2
M E 201 Introduction to Mechanical Engineering can be taken in first or second semester

3
Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
4
After completing E M A 201 Statics, students may take E M A 202
Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307 Mechanics of Materials Lab in either order or concurrently.
5
E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540
Experimental Vibration and Dynamic System Analysis or E M A/M E 570 Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that E M A/M E 540 Experimental Vibration and Dynamic System Analysis and E M A/M E 570 Experimental Mechanics are typically offered in the fall. E M A 611 Advanced Mechanical Testing of Materials and E M A 522 Aerodynamics Lab are typically offered in the spring.
6
M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that M E 563 Intermediate Fluid Dynamics is offered in the spring semester only.
7
E M A 523 Flight Dynamics and Control is offered in the Spring semester only. E M A 524 Rocket Propulsion is offered in the Fall semester only.

## ENGINEERING MECHANICS: ASTRONAUTICS

Admissions to the Engineering Mechanics: Astronautics Named Option have been suspended as of fall 2020 and will be discontinued as of fall 2026. If you have any questions, please
contact the department (https://engineering.wisc.edu/departments/ mechanical-engineering/).

The astronautics option in engineering mechanics prepares students for design, development, and research, with an emphasis on applied mathematics and astronautics. Its purpose is to improve and expand the educational opportunities of students at the university who wish to pursue careers in astronautics and space-related areas. This is accomplished by providing in depth exposure to course sequences in astrodynamics, orbital mechanics, and flight dynamics, as well as a core curriculum of structural and material analysis, advanced dynamics, and vibrations. The program requires a minimum of 128 credits.

## REQUIREMENTS

The following curriculum applies to students who entered the College of Engineering after fall 2018.

LIBERAL STUDIES
Code Title
College of Engineering Liberal Studies Requirements
Complete Requirements (p. 237)

1
Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be designated as above the elementary level ( $I, A$, or $D$ ) in the course listing.
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case " $e$ " in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they count only once toward the total required. Note: Some courses may have "e" designation but not H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

## HONORS IN UNDERGRADUATE RESEARCH

Qualified undergraduates may earn an Honors in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.
mation on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## Total Credits 128

1
It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

## 2

Students who were not able to take INTEREGR 170 (https:// guide.wisc.edu/search/?P=INTEREGR\ 170) Design Practicum as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

## 3

Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
4
After completing E M A 201 Statics, students may take E M A 202
Dynamics and E M A 303 Mechanics of Materials/E M A/M E 307
Mechanics of Materials Lab in either order or concurrently.
5
E M A 611 Advanced Mechanical Testing of Materials or E M A/M E 540
Experimental Vibration and Dynamic System Analysis or E M A/M E 570
Experimental Mechanics or E M A 522 Aerodynamics Lab. Note that EMA/ME 540 and EM A/ME 570 are typically offered in the fall. E M A 611 and E M A 522 are typically offered in the spring.
6
M E 563 Intermediate Fluid Dynamics may be substituted for E M A 521 Aerodynamics. Note that ME 563 is offered in the spring semester only.

7
Before Fall 2020, E M A 524 Rocket Propulsion was offered as E M A 601 Special Topics in Engineering Mechanics with the topic of Rocket Propulsion. It is offered in the fall semester only. E M A 523 Flight Dynamics and Control is offered in the Spring semester only.

Efficient use of thermal energy is an increasingly popular area of interest for UW-Madison engineering students and employers. The objective of the certificate in engineering thermal energy systems program is to provide students in the College of Engineering with an organized set of courses that will improve their capacity to analyze and design innovative thermal energy systems. These systems include, but are not limited to, energy conversion systems and their fuels, refrigeration, combustion, and solar energy. Thermal energy systems either employ thermal energy directly or convert thermal energy to other energy forms.

## HOW TO GET IN

Students who wish to apply for admission into this certificate program will need to complete a major/certificate declaration form obtained from the student services office. Once approved by the student services office and the student's faculty advisor, the form will be forwarded to the Dean's Office to be added to the student record. The student services office will, in conjunction with the student's advisor and curriculum committee chair, assist the student in selecting appropriate courses that fulfill certificate requirements. If a Special student does not have a home department in the College of Engineering, the Department of Mechanical Engineering will advise and sponsor the student in this program. To receive the certificate, the applicant must achieve a GPA of 3.0 or higher in the proposed courses listed on the completed form.

Submit the completed Declaration of Intent Form (https://go.wisc.edu/ u9x8g2/) to student services.

## REQUIREMENTS

The certificate, geared toward UW-Madison undergraduate students, requires a total of 18 completed credits. Up to 9 of the credits can be thermal-energy-related courses that are required in the student's undergraduate major. The additional 9 credits must be selected from an assortment of approved elective courses in the College of Engineering.

## COURSES

Courses not on this list must be specifically approved by the certificate curriculum committee.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Follow a directed sequence of technical elective courses specializing in thermal energy systems.

# 2. Synthesize knowledge gained from a curriculum that focuses on applying fundamentals of engineering to the analysis of thermal energy systems. <br> 3. Be prepared for the job market with a solid background in the energy field. 

## MANUFACTURING ENGINEERING, CERTIFICATE

## OVERVIEW

Are you a student interested in manufacturing? Do you like drawing on a variety of skills and knowledge to solve complex problems? If so, you may wish to consider this certificate.

Because manufacturing itself is complex and broad, manufacturing engineers apply many engineering principles and work in a multidisciplinary world. This certificate allows students to emphasize either manufacturing systems or manufacturing processes-or, they can choose to spread courses evenly across both. Through this certificate, students will gain an understanding of these two areas of manufacturing. Undergraduates in industrial and systems engineering or mechanical engineering can pursue this certificate without adding time to the degree.

## HOW TO GET IN

## ENROLLMENT

This undergraduate certificate is open to all undergraduate students at the University of Wisconsin-Madison. Mechanical engineering and Industrial and Systems Engineering students can complete this certificate without adding time to degree.

## DECLARATION

Declaring the undergraduate Certificate in Manufacturing Engineering requires:

- Undergraduate standing at UW-Madison
- Cumulative GPA (at UW-Madison) greater than or equal to 3.0
- Green Shop Pass with CNC 1 upgrade (College of Engineering TEAM Lab)
- Completion of the declaration form
- Meeting with a faculty advisor

Students must complete a declaration form (https://go.wisc.edu/ ame0j3/), obtain the required signatures, and bring the form to one of the academic advisors for the Department of Mechanical Engineering located in 1410 Engineering Drive, Suite 170. The form will be used to ensure that students have completed the Green Shop Pass and CNC 1 upgrade in the College of Engineering TEAM Lab, meet the GPA requirement for declaration, meet the course grade requirement for courses already completed, and list courses that are planned in order to satisfy the certificate program. The form will contain fields for the following information:

- Study plan (courses that have been taken, are being taken, and plan to take)
- Core courses
- Elective courses
- Grades for any courses that have already been taken
- When future courses will be taken
- Cumulative GPA at time of declaration
- Expected graduation date
- Major
- Signature from a key program faculty member indicating that the student meets the declaration requirements and has discussed the study plan with the faculty member

## COMPLETION

In order to successfully complete the undergraduate certificate in manufacturing engineering, students must:

- Have declared the certificate
- Maintain a cumulative GPA of 3.0 or greater for the courses taken for the certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.
- Have received a grade of BC or higher in all courses taken for the certificate. If a course is repeated, the highest grade received in the course is used for this criteria.

## REQUIREMENTS

The core courses were chosen to include three manufacturing processfocused courses as well as two manufacturing systems-focused courses. A manufacturing engineer must be multidisciplinary because of the complex and broad nature of manufacturing as an application of many engineering principles. The objective of the core course requirements is to provide students with basic understanding of manufacturing systems and basic understanding of manufacturing processes.

The certificate requires a total of 18 credits.

## Code <br> Title

Three courses must be from the following Core Courses with a grade of BC or better:

| M S \& E 332 | Macroprocessing of Materials |
| :--- | :--- |
| M E 310 | Manufacturing: Polymer Processing <br> and Engineering |
| M E 311 | Manufacturing: Metals and <br>  <br> A SY E 315 |
| I SY E 415 | Production Planning and Control |
| Introduction to Manufacturing |  |
|  | Systems, Design and Analysis ${ }^{1}$ |

An additional three courses must be from any of the following Elective Courses with a grade of BC or better, with at least one course from each of the two categories:

1. Mechanical and Materials Engineering Electives

ME $311 \quad$ Manufacturing: Metals and Automation ${ }^{1}$

| M E 417 | Transport Phenomena in Polymer <br> Processing |
| :--- | :--- |
| M E 418 | Engineering Design with Polymers |
| M E 419 | Fundamentals of Injection Molding |
| M E 420 | Introduction to Polymer Composites <br> Processing |
| ME 429 | Metal Cutting |

Credits
9

| M E 437 | Advanced Materials Selection |
| :---: | :---: |
| M E/E C E 439 | Introduction to Robotics |
| M E 447 | Computer Control of Machines and Processes |
| M E 449 | Redesign and Prototype Fabrication |
| M E 514 | Polymer Additive Manufacturing |
| M S \& E 333 | Microprocessing of Materials |
| M E 531 | Digital Design and Manufacturing |
| M S \& E 461 | Advanced Metal Casting |
| MS \& E/M E 462 | Welding Metallurgy |
| 2. Industrial \& Systems Engineering Electives |  |
| I SY E 412 | Fundamentals of Industrial Data Analytics |
| I SY E 415 | Introduction to Manufacturing Systems, Design and Analysis |
| I SY E/M E 510 | Facilities Planning |
| I SYE/ME 512 | Inspection, Quality Control and Reliability |
| I SYE/BME 564 | Occupational Ergonomics and Biomechanics |
| $\begin{aligned} & \text { ISYE } 575 \\ & \text { or M E/ } \\ & \text { STAT } 424 \end{aligned}$ | Introduction to Quality Engineering Statistical Experimental Design |
| I SY E 605 | Computer Integrated Manufacturing |
| I SY E 615 | Production Systems Control |
| I SY E/M E 641 | Design and Analysis of Manufacturing Systems |
| I SYE/ME 643 | Performance Analysis of Manufacturing Systems |

Total Credits

If M E 311 Manufacturing: Metals and Automation and/or I SY E 415 Introduction to Manufacturing Systems, Design and Analysis are taken as part of the Core Course Requirement, then they cannot also count as an elective.

No exceptions or substitutions to the core courses are allowed.
Elective courses not listed must be specifically approved by the curriculum committee of the department teaching the course. The request must include the course number, course name, name and contact information for the professor currently teaching or planning to teach the course; syllabus; and which category it should be listed under. Courses that are approved by the curriculum committee of the department teaching the course must be sent to the certificate program director. Only formal courses will be considered.

Only courses taken for a letter grade count toward this certificate. Only courses in which a grade of BC or better is received count toward this certificate. Courses taken at other institutions may be counted toward this certificate if they have been identified as equivalent through the existing process. At least 50\% of the courses (i.e., three courses) for this certificate must be earned in residence on the UW-Madison campus.

Students must maintain a cumulative GPA of 3.0 or better for the courses taken for this certificate. If a course is repeated, the average of the grades received in the course will be used in calculating the cumulative GPA.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Demonstrate knowledge of the fundamental concepts of manufacturing discrete parts.
2. Utilize skills related to manufacturing engineering.
3. Communicate effectively in the methods related to manufacturing engineering.
4. Generate solutions to problems that may arise in manufacturing engineering.

## PEOPLE

KEY PROGRAM FACULTY (MAY SERVE AS ADVISORS FOR STUDENTS PURSUING THIS CERTIFICATE)
Department of Mechanical Engineering (ME)
Lianyi Chen, Associate Professor
Michael DeCicco, Associate Lecturer
Sangkee Min, Associate Professor
Tim Osswald, Professor
Frank E. Pfefferkorn, Professor
Lih-Sheng (Tom) Turng, Professor

## Department of Industrial \& Systems Engineering (ISyE)

Kaibo Liu, Associate Professor
Leyuan Shi, Professor
Raj Veeramani, Professor
Xin Wang, Assistant Professor
Charlene Yauch, Professor of Practice
Shiyu Zhou, Professor
Department of Materials Science \& Engineering (MS\&E)
Sindo Kou, Professor
Kumar Sridharan, Professor

## MECHANICAL ENGINEERING, <br> B.S.

The Department of Mechanical Engineering (ME) within the University of Wisconsin-Madison College of Engineering is the home of two undergraduate degree programs (mechanical engineering and engineering mechanics, including an option in aerospace engineering) and two graduate degree programs (mechanical engineering and engineering mechanics). The department's faculty conducts research in the areas of advanced manufacturing, biomechanics, computation \& data-driven engineering, energy systems, solid \& fluid mechanics, and robotics, controls, \& sensing. This combination of topics fosters synergies with respect to polymers, mechatronics, aerospace, thermal, materials, additive manufacturing, and fluids. The mechanical engineering undergraduate program has been ranked in the top twelve, and the mechanical
engineering graduate program has been ranked in the top seven, among public universities, according to U.S. News and World Report 2022 rankings.

## MECHANICAL ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

Graduates from the undergraduate program in mechanical engineering will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals. We encourage this diversity of paths.

Independent of whether our graduates choose to pursue a professional career, postgraduate education, or volunteer service in engineering or a different field; we expect that our graduates will achieve the following objectives within three to five years after graduation:

1. They will exhibit a fundamental understanding of broader engineering disciplines with strong skills in mechanical engineering, problem solving, leadership, teamwork, and communication.
2. They will use these skills to contribute to their organizations and communities.
3. They will make thoughtful, well-informed decisions in their career and life.
4. They will demonstrate a continuing commitment to and interest in their own and other's education.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying
to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General

- Breadth-Humanities/Literature/Arts: 6 credits

Education

- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

## SUMMARY OF REQUIREMENTS

The following curriculum applies to undergraduate students admitted to the Mechanical Engineering degree program in Fall 2023 or later.

| Code | Title | Credits |
| :---: | :---: | :---: |
| Mathematics and Statistics |  | 19 |
| Basic Science |  | 13-14 |
| Non-Mechanical Engineering |  | 6 |
| Mechanical Engineering Core |  | 53-54 |
| Technical Electives |  | 12 |
| Math/Science Electives |  | 3 |
| Communication Skills |  | 6 |
| Liberal Studies |  | 15 |
| Total Credits |  | Minimum 128 |
| MATHEMATICS/STATISTICS ${ }^{1}$ |  |  |
| Code | Title | Credits |
| MATH 221 | Calculus and Analytic Geometry 1 | 5 |
| MATH 222 | Calculus and Analytic Geometry 2 | 4 |
| MATH 234 | Calculus--Functions of Several Variables | 4 |
| MATH 320 | Linear Algebra and Differential Equations | 3 |
| STAT 324 | Introductory Applied Statistics for Engineers | 3 |
| or I SY E 210 | Introduction to Industrial Statistics |  |

Total Credits
19
1
All students must have the equivalent of the above courses. If the above requirement is fulfilled with fewer than 19 credits, additional math/ science credits may be needed to meet the math/science auxiliary credit condition.
Transfer students may fulfill the statistics requirement with other statistics courses having a calculus prerequisite and the approval of the mechanical engineering department via a Course Substitution Form.

BASIC SCIENCE ${ }^{1}$

| Code | Title | Credits |
| :--- | :--- | ---: |
| Select one of the following: | $4-5$ |  |
| CHEM 103 | General Chemistry I |  |
| CHEM 109 | Advanced General Chemistry |  |
| COMP SCl 220 | Data Science Programming I | 4 |
| PHYSICS 202 | General Physics $^{2}$ | 5 |
| Total Credits |  | $\mathbf{1 3 - 1 4}$ |

## 1

Basic science courses, excluding Computer Science courses, are included in the math/science auxiliary credit condition.

## 2

Students following the normal M E course sequence need not take PHYSICS 201 General Physics to satisfy the prerequisites for PHYSICS 202 General Physics.

NON-MECHANICAL ENGINEERING

| Code | Title | Credits |
| :--- | :--- | ---: |
| E M A 201 | Statics (with a grade of C or better) | 3 |
| M S \& E 350 | Introduction to Materials Science | 3 |
| Total Credits |  | $\mathbf{6}$ |

MECHANICAL ENGINEERING CORE

| Code | Title | Credits |
| :---: | :---: | :---: |
| M E 201 | Introduction to Mechanical Engineering | 3 |
| M E 231 | Geometric Modeling for Design and Manufacturing | 3 |
| M E 240 | Dynamics (with a grade of C or better) | 3 |
| M E 306 | Mechanics of Materials (with a grade of $C$ or better) | 3 |
| M E/EM A 307 | Mechanics of Materials Lab | 1 |
| M E 310 | Manufacturing: Polymer Processing and Engineering | 3 |
| M E 311 | Manufacturing: Metals and Automation | 3 |
| M E 331 | Computer-Aided Engineering | 3 |
| M E 340 | Dynamic Systems | 3 |
| M E 342 | Design of Machine Elements | 3 |
| M E 351 <br> \& ME 352 | Interdisciplinary Experiential Design Projects I and Interdisciplinary Experiential Design Projects II | 6 |
| M E 361 | Thermodynamics (with a grade of $C$ or better) | 3 |
| M E 363 | Fluid Dynamics | 3 |
| M E 364 | Elementary Heat Transfer | 3 |
| M E 368 | Engineering Measurements and Instrumentation | 4 |
| M E 370 | Energy Systems Laboratory | 3 |
| Choose one: |  | 3-4 |
| M E 376 | Introduction to Mechatronics |  |
| E C E 376 | Electrical and Electronic Circuits |  |

## Total Credits

53-54

## TECHNICAL ELECTIVES

## Code

Title
The mechanical engineering curriculum requires a total of 12 credits of technical electives. A minimum of 3 of those 12 credits must be from formal M E courses numbered 400 and higher. A formal course is defined as a class that meets regularly in a lecture format to study a selected topic. The educational mission is assisted with homework and exams. Formal courses include online courses but do not include seminar, survey, independent study, research, topics, or similar courses.

Additional technical electives may include formal courses in engineering, mathematics, physics, chemistry, statistics, and computer science courses numbered 400 and higher. Course choices may impact the math/science auxiliary credit condition. INTEREGR and E P D courses are limited to those listed below. The following courses are also accepted as technical electives:

| ANAT\&PHY 335 | Physiology | 5 |
| :--- | :--- | :---: |
| BSE 351 | Structural Design for Agricultural | 3 |
|  | Facilities | 3 |
| BSE 364 | Engineering Properties of Food and <br> Biological Materials |  |

BSE/ENVIR ST 367 Renewable Energy Systems 3
CBE 320 Introductory Transport Phenomena 4
CBE 326 Momentum and Heat Transfer 3

CHEM 341 Elementary Organic Chemistry 3
CHEM 343 Organic Chemistry I 3
CHEM 345 Organic Chemistry II 3
CIV ENGR 311 Hydroscience 3
CIV ENGR 320 Environmental Engineering 3
CIV ENGR/ Soil Mechanics 3
GLE 330
CIV ENGR $340 \quad$ Structural Analysis I
CIV ENGR $370 \quad$ Transportation Engineering 3
CIV ENGR $392 \quad$ Building Information Modeling (BIM) 3
CIV ENGR 415 Hydrology 3
COMP SCI $300 \quad$ Programming II 3
COMP SCI 320 Data Science Programming II 4
COMP SCI/ Machine Organization and 3

| E C E 354 | Programming |
| :--- | :--- |
| E C E 320 | Electrodynamics II |

ECE330 Signals and Systems 3
ECE 340 Electronic Circuits I 3
ECE $342 \quad 3$
ECE/ Digital System Fundamentals 3

| COMP SCI 352 |  |
| :--- | :--- |
| ECE 353 | Introduction to Microprocessor |

| ECE/ | Machine Organization and | 3 |
| :--- | :--- | :--- |
| COMP SCI 354 | Programming |  |

ECE355 $\quad$ Electromechanical Energy 3

## Conversion

$\begin{array}{llc}\text { E C E 356 } & \begin{array}{l}\text { Electric Power Processing for } \\ \text { Alternative Energy Systems }\end{array} & 3 \\ \text { E P 272 } & \text { Engineering Problem Solving Using } & 1\end{array}$
EPD 660 Maple $\quad$ Core Competencies of Sustainability 3

INTEREGR 301 Engineering and Biology: 1-4
Technological Symbiosis
I SYE $315 \quad$ Production Planning and Control 3
I SY E $323 \quad$ Operations Research-Deterministic 3
Modeling
I SY E/PSYCH 349 Introduction to Human Factors 3

| INFO SYS 371 | Technology of Computer-Based Business Systems | 3 |
| :---: | :---: | :---: |
| MATH 321 | Applied Mathematical Analysis | 3 |
| MATH 322 | Applied Mathematical Analysis | 3 |
| M E 273 | Engineering Problem Solving with EES | 1 |
| M S \& E 330 | Thermodynamics of Materials | 4 |
| M S \& E 332 | Macroprocessing of Materials | 3 |
| M S \& E 352 | Materials Science-Transformation of Solids | 3 |
| NE 305 | Fundamentals of Nuclear Engineering | 3 |
| PHYSICS 205 | Modern Physics for Engineers | 3 |
| PHYSICS 241 | Introduction to Modern Physics | 3 |
| PHYSICS 311 | Mechanics | 3 |
| PHYSICS 321 | Electric Circuits and Electronics | 4 |
| PHYSICS 322 | Electromagnetic Fields | 3 |
| PHYSICS 325 | Optics | 4 |
| STAT 311 | Introduction to Theory and Methods of Mathematical Statistics I | 3 |
| STAT 312 | Introduction to Theory and Methods of Mathematical Statistics II | 3 |
| STAT 333 | Applied Regression Analysis | 3 |
| STAT 349 | Introduction to Time Series | 3 |
| STAT 351 | Introductory Nonparametric Statistics | 3 |

Up to 3 technical elective credits may be obtained for non-formal courses such as independent study courses (M E 489, M E 491, M E 492, and other engineering independent study courses numbered 399 and higher); Cooperative Education (M E 1); and E P D 690, "Wisconsin Engineer Magazine."

## MATH/SCIENCE ELECTIVES

Code
Title
The mechanical engineering curriculum requires 3 credits
Credits of math/science electives. CHEM 104 or CHEM 109, any formal course listed as a biological science and numbered 100 or higher, any non-engineering formal course listed with physical or natural science breadth and numbered 200 or higher will satisfy this requirement. If the math/science auxiliary credit condition is met with additional coursework, the math/science elective requirement may be met with a formal course offered by an engineering department numbered 200 and above (except INTEREGR and E P D).

## Total Credits

## COMMUNICATION SKILLS

| Code | Title | Credits |
| :--- | :--- | ---: |
| ENGL 100 | Introduction to College Composition | 3 |
| or LSC 100 Science and Storytelling <br> or COM ARTS 100 Introduction to Speech Composition |  |  |
| or ESL 118 Academic Writing II |  |  |
| NTEREGR 397 | Engineering Communication |  |
| Total Credits |  | $\mathbf{6}$ |

## LIBERAL ELECTIVES

Code Title

## The Mechanical Engineering curriculum requires 15 credits

 of liberal elective courses. See College of Engineering Liberal Studies Requirements for details.Complete Requirements (p. 237)
Total Credits

## ADDITIONAL INFORMATION

Students fulfilling all course requirements with fewer than 128 credits must comply with the credit minimum by taking additional free elective credits. Students must meet the math/science auxiliary credit condition with a minimum of 30 credits. Students in good academic standing may take free elective courses pass/fail (see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext) for details). Pass/fail courses do not count toward specific degree requirements.

Independent Studies and projects courses:

| Code | Title | Credits |
| :--- | :--- | ---: |
| M E 291 | Undergraduate Mechanical | $1-3$ |
| M E 299 | Engineering Projects |  |
| M E 489 | Independent Study | $1-3$ |
| M E 491 | Honors in Research | $1-3$ |
| M E 492 | Mechanical Engineering Projects I | $1-3$ |
|  | Mechanical Engineering Projects II | $1-3$ |

Students must have a cumulative 2.5 GPA or a 3.0 GPA for their previous two semesters and have written permission to enroll from their research advisor.

For information on credit loads, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## HONORS IN RESEARCH PROGRAM

The ME Department's Undergraduate Honors in Research Program allows students to participate in the creation of new knowledge and experience the excitement of the research process. Students in the program write and submit a senior thesis. Admission requirements include:

- At least two semesters completed on the Madison campus with a cumulative GPA of at least 3.5;
- Majoring in Mechanical Engineering;
- Approval of an appropriate professor who will serve as the thesis advisor.

The "Honors in Research" designation will be awarded to graduates who meet the following requirements:

- Satisfaction of the requirements for an undergraduate degree in Mechanical Engineering;
- A cumulative GPA of at least 3.3;
- Completion of a total of at least 6 credits of M E 489 Honors in Research;
- Receive a final grade of at least " $B$ " in M E 489;
- Completion of senior thesis.

Students must certify completion of the program with their M E 489 advisor the term they intend to graduate. To certify program completion students must complete the appropriate form and submit to student services.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Total Credits 128

1
CHEM 109 Advanced General Chemistry may be taken in place of CHEM 103 General Chemistry I. If CHEM 103 is taken, students may need to take additional free electives to meet the minimum number of credits required for the degree.

## 2

E M A 201 Statics, M E 240 Dynamics, M E 306 Mechanics of Materials, and ME 361 Thermodynamics each require a minimum grade of $C$.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## ACCREDITATION

Accreditation.

Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## NUCLEAR ENGINEERING AND ENGINEERING PHYSICS

The Department of Nuclear Engineering \& Engineering Physics (NEEP) within the University of Wisconsin-Madison College of Engineering is the home of two undergraduate degree programs (nuclear engineering, including an option in radiation sciences; and engineering physics) and one graduate degree program (nuclear engineering and engineering physics).

The department's faculty conducts research in the areas of nuclear systems, and plasma physics and fusion energy science. This combination of topics fosters synergies with respect to neutronics, nuclear materials, fluid dynamics, and computation. The graduate nuclear engineering program has been ranked in the top four, nationally, by U.S. News and World Report in each of the past ten years.

## DEGREES/MAJORS/CERTIFICATES

- Engineering for Energy Sustainability, Certificate (p. 336)
- Engineering Physics, B.S. (p. 338)
- Nuclear Engineering Materials, Certificate (p. 344)
- Nuclear Engineering, B.S. (p. 344)

## PEOPLE

## PROFESSORS

Paul Wilson (Chair)
Wendy Crone
Chris Hegna
Oliver Schmitz
Carl Sovinec
Kumar Sridharan

## ASSOCIATE PROFESSORS

Adrien Couet

## ASSISTANT PROFESSORS

Stephanie Diem
Juliana Pacheco Duarte
Benedikt Geiger
Ben Lindley
Yongfeng Zhang
See also Nuclear Engineering \& Engineering Physics Faculty Directory (https://directory.engr.wisc.edu/neep/faculty/).

## RESOURCES AND SCHOLARSHIPS

## FACILITIES

Facilities available for instruction and research include:
Fluid Mechanics and Heat Transfer Laboratories Instructional Computing Labs (in Computer Aided Engineering) Nanomechanics Laboratory
Nuclear Instrumentation Laboratory
Plasma Physics Laboratories
Superconductivity and Cryogenics Laboratories

## SCHOLARSHIPS

The Department of Nuclear Engineering \& Engineering Physics and the College of Engineering have several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and find specific information on scholarships at UW-Madison. You can use WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; the Nuclear Engineering \& Engineering Physics Department; and
other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to: coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060).

## ENGINEERING FOR <br> ENERGY SUSTAINABILITY, CERTIFICATE

Equity and sustainability of energy resources in the face of increasing global population and economic development are key issues at the center of the public discourse today. The objective of this certificate program is to offer undergraduate students a suite of courses addressing energy sustainability. The courses span across the engineering curriculum, with firm roots in real-world design and engineering practices.

Students enrolled as degree-seeking undergraduates with a plan of study to fulfill the certificate requirements may enroll in the program. Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program; however, students may take courses that fulfill certificate requirements before submitting an application.

## HOW TO GET IN

## DECLARING THE CERTIFICATE

A student who is interested in declaring the certificate must complete an online application form (https://uwmadison.co1.qualtrics.com/jfe/form/ SV_e3cK4U4xkli9oLX/). The application form requires students to fill out a tentative study plan for completing the certificate requirements.

## - Certificate Application Form (https:// uwmadison.co1.qualtrics.com/jfe/form/ SV_e3cK4U4xkli9oLX/)

Prior to completing the application form, students should either schedule a meeting with the certificate advisor/coordinator or complete an online orientation (https://uwmadison.co1.qualtrics.com/jfe/form/ SV_OVAuEcR28ZNnTyB/) involving a short series of videos and accompanying questions.

Applications may be submitted at any time, but students are encouraged to apply early in their undergraduate careers in order to ensure successful completion of the program. Engineering students must meet progression requirements in their selected major before the certificate can be added to their record.

## REQUIREMENTS

## REQUIREMENTS

## TOTAL CREDITS REQUIRED FOR CERTIFICATE COMPLETION: MINIMUM OF 16

- Minimum of 6 credits required in Liberal Studies and Science category (including one foundational course option)
- Minimum of 6 credits required in Engineering category (including one foundational course option)
- Additional 3 credits from either category above, or students may substitute an applied course such as senior capstone or independent study (with approval). See note under the Capstone heading below.
- 1 credit required in Seminar category
- Grade point average of 2.5 or above for all coursework that counts for the certificate

| Liberal Studies and Science (Minimum of 6 credits) |  |
| :--- | :--- |
| Coder | Title |
| Liberal Studies and |  |

## Engineering (Minimum of 6 credits)

## Capstone (optional 3 credits)

Students may request to count no more than 3 credits of applied coursework toward the 16-credit total through an optional Capstone course. This course must be approved by the certificate's faculty chair in consultation with the certificate's oversight committee. Students must submit a description of their course project, demonstrating application of at least one of the certificate's learning outcomes. Details of the project will be verified with the course instructor. Courses that may qualify include:

- Senior Design Project or Capstone
- Independent Study
- Honors Thesis

To submit a Capstone course request, complete this online course substitution form (https:// uwmadison.co1.qualtrics.com/jfe/form/ SV_9tYyECXdgTwBAs5/). Course substitution requests may be submitted any time, but should be submitted as early as possible once there are sufficient details (such as a course syllabus or a project description) that demonstrate how the course or project aligns with the certificate's learning outcomes.

## - COURSE SUBSTITUTION FORM (HTTPS:// UWMADISON.CO1.QUALTRICS.COM/JFE/ FORM/SV_9TYYECXDGTWBAS5/)

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Understand the physical properties and processes related to energy resources and the conversion technologies involved.
2. Understand how energy decisions are impacted by environmental, social, economic or political factors.
3. Synthesize knowledge of the technical/physical aspects of energy with the social/environmental factors to analyze how energy choices impact the sustainability of energy systems.
4. Apply interdisciplinary energy knowledge to analyze, design or solve a matter of real world significance related to sustainability of energy use.

## ENGINEERING PHYSICS, B.S.

As an engineering physics major, you'll dive into research alongside professors who work at the frontier of translating emerging science into novel technologies. With a curriculum designed specifically to launch your research career and a tight-knit community of scholars, you'll find a supportive environment to pursue a flexible math and physics-centered curriculum and publish an undergraduate thesis. The engineering physics major is ideal for students who are already thinking about graduate school and want the flexibility to design their undergraduate experience to support that goal-but it also prepares students to join high-tech startup companies developing new technologies.

Students choose from three flexible focus areas: nanoengineering, plasma science and engineering, and scientific computing, that include graduatelevel courses and laboratory experiences. Students in nanoengineering take courses in physics, material science, engineering mechanics, and electrical engineering to learn how to design, build and use innovative devices and structures at the nanoscale. Plasma science and engineering students join one of the largest university plasma and fusion communities in the world, with collaborations between physics, electrical engineering, and nuclear engineering, and world-leading facilities. Scientific computing can be applied to nearly every discipline in science, combining modern computing practices with scientific discovery in research groups across campus.

As some of our best and brightest engineering students, EP majors move quickly through fundamental math and physics courses, opening the door for more advanced courses that support their research interests. With more flexibility than most engineering majors, each student works with their faculty advisor to find a selection of courses that is tuned to their specific research needs. The senior thesis is a defining aspect of this program, where students summarize their research findings and present them to a committee of professors, and possibly publish a paper in a scientific journal.

At the heart of the engineering physics program is a small learning community where students develop skills for conducting original research, with support from faculty and peers. The curriculum is designed to bring sophomores, juniors and seniors together in a community where younger students learn from the general research experiences of their more senior counterparts. In addition, every student joins a research group where graduate students, post-docs, scientists and faculty members support the specific skills and expertise needed for their research. Nearly all of our graduates go on to graduate degrees at the best universities in the US and around the world, and ultimately in careers in a variety of fields in academia, industry or national laboratories.

## THE OBJECTIVES OF THE ENGINEERING PHYSICS PROGRAM ARE TO:

- Educate students to think and participate deeply, creatively, and analytically in emerging areas of engineering technology.
- Educate students in the basics of instrumentation, design of laboratory techniques, measurement, data acquisition, interpretation, and analysis.
- Educate students in the methodology of research.
- Provide and facilitate teamwork and multidisciplinary experiences throughout the curriculum.
- Foster the development of effective oral and written communication skills.
- Expose students to environmental, ethical and contemporary issues.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are
considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

Education

General • Breadth-Humanities/Literature/Arts: 6 credits

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## SUMMARY OF REQUIREMENTS

The following curriculum applies to students who entered the program after fall 2018.

| Code $\quad$ Title | Credits |
| :--- | ---: |
| Mathematics and Statistics | 25 |
| Science | 28 |
| Engineering Science | 25 |
| Focus Area | 22 |
| Technical Electives | 6 |

## LIBERAL STUDIES

Code Title
Credits
Complete Requirements (p. 237) ${ }^{1}$
1
Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectareas/) (the description before the course number). At least one of these two courses must be designated as above the elementary level ( $\mathrm{I}, \mathrm{A}$, or D ) in the course listing.
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case " $e$ " in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have $H, S, L$, or $Z$ designation; these courses do not count toward the Liberal Studies requirement.

## TOTAL CREDITS: 130-132

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade

## Work

 point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.
## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering research practices to produce results that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to apply experimental, theoretical, and computational methods to address scientific and engineering objectives
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

## Total Credits 130-134

1

It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits.

2
Students who were not able to take an introductory engineering course as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the departments of Chemistry, Computer Sciences, Mathematics, and Physics.

3
Students are encouraged to take E P 468 Introduction to Engineering Research during their second year to allow for more flexibility in the research sequence.

## 4

Topics from MATH 321 Applied Mathematical Analysis are applied in PHYSICS 322 Electromagnetic Fields, and some students may find it helpful to take PHYSICS 322 Electromagnetic Fields after MATH 321 Applied Mathematical Analysis if PHYSICS 322 Electromagnetic Fields is not required for focus area courses.
5
Students in the nanoengineering focus area should take PHYSICS 531 Introduction to Quantum Mechanics.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned an Engineering Physics faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with

3 in-depth guidance on course content, internship and job opportunities, research, and more.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## PEOPLE

## PROFESSORS

Paul Wilson (Chair)
Wendy Crone
Chris Hegna
Oliver Schmitz
Carl Sovinec
Kumar Sridharan

## ASSOCIATE PROFESSORS

Adrien Couet

## ASSISTANT PROFESSORS

Stephanie Diem
Juliana Pacheco Duarte
Benedikt Geiger
Ben Lindley
Yongfeng Zhang
See also Nuclear Engineering \& Engineering Physics Faculty Directory (https://directory.engr.wisc.edu/neep/faculty/).

## RESOURCES AND SCHOLARSHIPS

## FACILITIES

Facilities available for instruction and research include:
Fluid Mechanics and Heat Transfer Laboratories
Instructional Computing Labs (in Computer Aided Engineering)
Nanomechanics Laboratory
Nuclear Instrumentation Laboratory
Plasma Physics Laboratories
Superconductivity and Cryogenics Laboratories

## SCHOLARSHIPS

The Department of Nuclear Engineering \& Engineering Physics and the College of Engineering have several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and find specific information on scholarships at UW-Madison. You can use

WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; the Nuclear Engineering \& Engineering Physics Department; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to: coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060).

> NUCLEAR ENGINEERING MATERIALS, CERTIFICATE

The goal of this certificate is to combine a comprehensive set of course curricula that will provide students with an understanding of the challenges and remedial measures associated with materials in nuclear energy systems. It includes courses in radiation damage, nuclear fuel performance, corrosion, and joining/welding. A laboratory course will provide hands-on experimental analysis in the areas of corrosion, welding, radiation damage, and non-destructive evaluation.

## HOW TO GET IN

Students must complete the Certificate Declaration Form (https:// engineering.wisc.edu/programs/certificates/nuclear-engineeringmaterials/declaration/). Contact Professor Adrien Couet, Department of Nuclear Engineering \& Engineering Physics, 921 Engineering Research Building, for further information.

## REQUIREMENTS

| Code $\quad$ Title | Credits |
| :--- | :--- | :--- |
| Required courses (4 credits - must be taken for a |  |
| letter grade) |  |

| N E/M S \& E 423 | Nuclear Engineering Materials ${ }^{1}$ | 3 |
| :--- | :--- | ---: |
| N E 424 | Nuclear Materials Laboratory |  |
| Elective courses (minimum 12 credits - must be taken |  |  |
| for a letter grade) |  | 1 |
| CIV ENGR 445 | Steel Structures I | 3 |
| CIV ENGR 447 | Concrete Structures I | 3 |
| E M A 303 | Mechanics of Materials | 3 |
| M S \& E 330 | Thermodynamics of Materials | 4 |
| M S \& E 352 | Materials Science-Transformation of <br> M S \& E/N E 433 | Polids |

NE 545
Materials Degradation in Advanced Nuclear Reactor Environments

Because M S \& E 350 Introduction to Materials Science or M S \& E 351 Materials Science-Structure and Property Relations in Solids are prerequisites for N E/M S \& E 423 Nuclear Engineering Materials, students are expected to take one of the two of these courses as prerequisites for the certificate.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Identify the challenges and remedial measures associated with materials in nuclear energy systems by integrating the contents within each class into a complete understanding.
2. Describe and apply basic radiation damage, nuclear fuel performance, corrosion, and joining/welding concepts.
3. Design and conduct basic hands-on experiments in the areas of nuclear materials characterization.
4. Discuss scientifically and confidently about nuclear materials degradation issues with experts.

## NUCLEAR ENGINEERING, B.S.

Nuclear engineers harness the strongest forces of nature to tackle some of society's biggest challenges. Our curriculum gives students depth and breadth to keep up with rapidly changing technology, and our close-knit learning community supports our students' success during their degree and as they launch their careers. The radiation sciences option (p. 350) provides a pathway for careers in medical applications of radiation.

Nuclear energy is the largest source of clean electricity in the United States and new technologies will allow its impact to grow as we decarbonize our economy. Most nuclear engineers design, build and operate nuclear power plants-today based on fission of uranium, but in the future, based on fusion of hydrogen. With no greenhouse gas emissions, nuclear energy is a reliable and predictable partner to other clean electricity, like wind, solar and hydro. Nuclear power sources have even more potential as new technologies and are deployed to remove carbon emissions from industrial processes like hydrogen production, water desalination, and steel manufacturing.

With radiation from man-made radioisotopes and particle accelerators, we can diagnose and treat cancer and other diseases. Nuclear engineers in the radiation sciences option (p. 350) design systems to generate radioactive tracers that can be injected into patients to pinpoint tumors, stress fractures, and cardiac diseases, while others build accelerators that deliver radiation precisely to diseased tissue while avoiding sensitive organs. Talk to your academic advisor about declaring the Radiation Sciences option. Students must have, and are expected to maintain, a 3.0 cumulative GPA.

Today's rovers on Mars are powered by nuclear power sources and tomorrow's spacecrafts will need nuclear power to transport humans far into space. Nuclear engineers build radioisotope thermal generators that provide nonstop power with no moving parts to deep-space probes and planetary vehicles, allowing missions that last for many years. Nuclear space propulsion cuts the travel time to other planets by months and surface power ensures reliable energy once the spacecraft lands.

Using advanced radiation detection systems, we can seek out explosives and nuclear weapons being smuggled in shipping containers. Nuclear engineers combine sources and detectors that use penetrating radiation that not only can see objects through thick shields, but can also determine the composition of the items inside. Additionally, they use machine learning and artificial intelligence to combine the signals from these systems for even more insight.

Our curriculum starts with an Introduction to Nuclear Engineering designed for first year students to learn about a variety of technical nuclear topics and also to engage with some societal challenges. Later on, the curriculum focuses on the deepest physics and math base in the College of Engineering to prepare our graduates for careers with constantly evolving technologies based on the newest scientific discoveries. We transition from these fundamentals to more applied topics in radiation transport, thermal systems, materials science, imaging and detectors, while students build skills in computational modeling and simulation. All of our students also take at least one course that offers an experience with the UW Nuclear Reactor. Students in the radiation sciences option will complete their degree with graduate courses from the internationally recognized Medical Physics program. This interdisciplinary degree program overlaps with other engineering disciplines, allowing our graduates to transition into a variety of industries and careers.

Small class sizes allow students and professors to get to know each other in a supportive learning community starting in their first year. Many students participate in undergraduate research across one of the biggest research portfolios in the College of Engineering. Faculty collaborations with companies in nuclear science and technology-both established and newcomers, as well as the country's national laboratories-provide a professional network that helps students find internships and launch their careers.

## NUCLEAR ENGINEERING PROGRAM EDUCATIONAL OBJECTIVES

The faculty recognize that our graduates will choose to use the knowledge and skills they have acquired during their undergraduate years to pursue a wide variety of career and life goals and we encourage this diversity of paths. Regarding the Nuclear Engineering program, we initially expect graduates will begin their careers in fields that utilize their knowledge, education and training in the interaction of radiation with matter as it applies to power generation, health and medical physics, security and safeguards and other engineering fields.

Whatever path our graduates choose to pursue, our educational objectives for the nuclear engineering program are to allow them to:

1. Exhibit strong performance and continuous development in problemsolving, leadership, teamwork, and communication, initially applied to nuclear engineering, and demonstrating an unwavering commitment to excellence.
2. Demonstrate continuing commitment to, and interest in, his or her training and education, as well as those of others.
3. Transition seamlessly into a professional environment and make continuing, well-informed career choices.
4. Contribute to their communities.

## HOW TO GET IN

## ADMISSION TO THE COLLEGE AS A FRESHMAN

Students applying to UW-Madison (https://www.admissions.wisc.edu/ apply/) need to indicate an engineering major (https:// engineering.wisc.edu/degrees-programs/undergraduate/) as their first choice in order to be considered for direct admission to the College of Engineering. Direct admission to a major means students will start in the program of their choice in the College of Engineering and will need to meet progression requirements (https://engineering.wisc.edu/student-services/undergraduate-student-advising/progression/) at the end of the first year to guarantee advancement in that program.

## CROSS-CAMPUS TRANSFER TO ENGINEERING

UW-Madison students in other schools and colleges on campus must meet minimum admission requirements (https://engineering.wisc.edu/ admissions/undergraduate/cross-campus-students/) for admission consideration to engineering degree granting classifications. Crosscampus admission is competitive and selective, and the grade point average expectations may increase as demand trends change. The student's overall academic record at UW-Madison is also considered. Students apply to their intended engineering program by submitting the online application by stated deadlines for spring and fall. The College of Engineering offers an online information tutorial and drop-in advising (https://engineering.wisc.edu/admissions/undergraduate/cross-campusstudents/) for students to learn about the cross-campus transfer process.

## OFF-CAMPUS TRANSFER TO ENGINEERING

With careful planning, students at other accredited institutions can transfer coursework that will apply toward engineering degree requirements at UW-Madison. Off-campus transfer applicants are considered for direct admission to the College of Engineering by applying to the Office of Admissions with an engineering major listed as their first choice. Those who are admitted to their intended engineering program must meet progression requirements (https://engineering.wisc.edu/ admissions/undergraduate/transfer-from-off-campus/) at the point of transfer or within their first two semesters at UW-Madison to guarantee advancement in that program. A minimum of 30 credits in residence in the College of Engineering is required after transferring, and all students must meet all requirements for their major in the college. Transfer admission to the College of Engineering is competitive and selective, and students who have exceeded the 80 credit limit at the time of application are not eligible to apply.

The College of Engineering has dual degree programs with select fouryear UW System campuses. Eligible dual degree applicants are not subject to the 80 credit limit.

Off-campus transfer students are encouraged to discuss their interests, academic background, and admission options with the Transfer Coordinator in the College of Engineering: ugtransfer@engr.wisc.edu or 608-262-2473.

## SECOND BACHELOR'S DEGREE

The College of Engineering does not accept second undergraduate degree applications. Second degree student (https:// engineering.wisc.edu/admissions/undergraduate/adult-students-second-degree-students/)s (https://engineering.wisc.edu/student-services/ undergraduate-student-advising/) might explore the Biological Systems Engineering program at UW-Madison, an undergraduate engineering degree elsewhere, or a graduate program in the College of Engineering.

## RADIATION SCIENCES DECLARATION

Talk to your academic advisor about declaring the Radiation Sciences (p. 350) option. Students must have and are expected to maintain a 3.0 cumulative GPA.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

The nuclear engineering curriculum emphasizes nuclear power and is appropriate for students seeking careers in the nuclear power industry.

There is also a Radiation Sciences option (p. 348) available for students interested in medical and other non-power applications.

The following curriculum applies to students who entered the program starting in Fall 2020.

## SUMMARY OF REQUIREMENTS

| Code | Title | Credits |
| :--- | ---: | ---: |

## LIBERAL STUDIES ELECTIVES

Code
Title
Credits
College of Engineering Liberal Studies Requirements
Complete Requirements (p. 237) ${ }^{1}$16
$\begin{array}{ll}\text { Total Credits } & 16\end{array}$

1
Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectarea/) (the description before the course number). At least one of these two courses must be designated as above the elementary level ( $\mathrm{I}, \mathrm{A}$, or D ) in the course listing.
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case " $e$ " in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have $H, S, L$, or $Z$ designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http://guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## NAMED OPTION

Talk to your academic advisor about declaring the Radiation Sciences option. Students must have and are expected to maintain a 3.0 cumulative GPA.

View as listView as grid

## - NUCLEAR ENGINEERING: RADIATION SCIENCES (P. 350)

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Total Credits 129
1
It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits. Three credits of CHEM 103/CHEM 104 may be counted towards Technical Electives credits.

2
Students who were not able to take N E 231 Introduction to Nuclear Engineering as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the Departments of Chemistry, Computer Sciences, Mathematics, and Physics.

## 3

Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.
4
After completing E M A 201 Statics, students may take E M A 202
Dynamics and E M A 303 Mechanics of Materials in either order or concurrently.
5
STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/M E 424 Statistical Experimental Design are acceptable substitutes.
6
M E 363 Fluid Dynamics and M E 364 Elementary Heat Transfer are acceptable substitutions for CBE 320 Introductory Transport Phenomena.

## ADVISING AND CAREERS

## ADVISING

Each College of Engineering program has academic advisors dedicated to serving its students. Program advisors can help current College of Engineering students with questions about accessing courses, navigating degree requirements, resolving academic issues and more. Students can find their assigned advisor on the homepage of their student center.

Continuing students who have fulfilled the progression requirements will also be assigned a Nuclear Engineering faculty advisor. Before enrolling in courses each semester, students must meet with their faculty advisor
for assistance in planning courses and reviewing degree requirements. Faculty advisors are a valuable resource, as they can provide students with in-depth guidance on course content, internship and job opportunities, research, and more.

## ENGINEERING CAREER SERVICES

Engineering Career Services (ECS) assists students in identifying preprofessional work-based learning experiences such as co-ops and summer internships, considering and applying to graduate or professional school, and finding full-time professional employment during their graduation year.

ECS offers two major career fairs per year, assists with resume writing and interviewing skills, hosts workshops on the job search, and meets one-onone with students to discuss offer negotiations.

Students are encouraged to utilize the ECS office early in their academic careers. For comprehensive information on ECS programs and workshops, see the ECS website or call 608-262-3471.

## RESOURCES AND SCHOLARSHIPS

## FACILITIES

Facilities available for instruction and research include:
Nuclear Reactor Laboratory
Nuclear Instrumentation Laboratory
Fluid Mechanics and Heat Transfer Laboratories
Plasma Physics Laboratories
Instructional Computing Labs (in Computer Aided Engineering)

## SCHOLARSHIPS

The Department of Nuclear Engineering \& Engineering Physics \& the College of Engineering have several types of scholarships available to incoming and current engineering students. Students should explore the Wisconsin Scholarship Hub (WiSH), where you can apply to and
find specific information on scholarships at UW-Madison. You can use WiSH to find engineering scholarships available through the College of Engineering; the Inclusion, Equity, and Diversity in Engineering Student Center; the Nuclear Engineering \& Engineering Physics Department; and other UW and external organizations. (Please note: students must be currently enrolled in, or have applied to, the College of Engineering to be considered for engineering scholarships.) To be matched with these available scholarship funds an application is required and the system is typically open to students in the spring of each year. Questions on the process can be directed to: coescholarships@engr.wisc.edu. Additional financial assistance may be awarded through the Office of Student Financial Aid (333 E. Campus Mall RM 9701, 262-3060).

## ACCREDITATION

Accreditation.
Accredited by the Engineering Accreditation Commission of ABET, http:// www.abet.org (http://www.abet.org/).

Note: Undergraduate Program Educational Objectives and Student Outcomes are made publicly available at the Departmental website. (In this Guide, the program's Student Outcomes are designated by our campus as "Learning Outcomes.")

## NUCLEAR ENGINEERING: RADIATION SCIENCES

The radiation sciences option of the nuclear engineering major (p. 344) provides a pathway for careers in medical applications of radiation. Understanding how radiation interacts with biological material is a natural extension of the nuclear engineering fundamentals in modern physics and mathematics. Many students continue to graduate school to get advanced degrees in medical physics, either at UW-Madison or elsewhere.

Radiation science students will use their engineering analysis skills on challenges that range from working with patients to developing new medical devices and equipment. Patients experience radiation to diagnose diseases as well as to treat them. In both cases it may rely on radioactive tracers injected into their bodies or on radiation exposure from outside. Deciding how to administer the radiation to maximize the benefit and minimize the harm requires skills at the intersection between medicine and nuclear engineering. Nuclear engineers in the radiation sciences option also design, analyze and build devices that will generate novel radioactive tracers, deliver radiation externally in ever more precise ways, and detect the radiation levels to ensure the accuracy of the treatments.

Following the same deep curriculum in physics and math in the early years, students in the radiation sciences option will complete their degree with graduate courses from the internationally recognized Medical Physics program. After learning the consequences of radiation interaction with both healthy and diseased tissue, students can take courses in imaging and radiation detection, the production of radiation with radioisotopes or engineered devices, and dig deeper into the use of radiation in medicine.

Talk to your academic advisor about declaring this option.

## REQUIREMENTS

The Radiation Sciences option is intended for students interested in medical and non-power applications. Students must have and are expected to maintain a 3.0 cumulative GPA.

The following curriculum applies to students who entered the program starting in Fall 2022.

## SUMMARY OF REQUIREMENTS

Total Credits

## SCIENCE

| Code | Title | Credits |
| :--- | :--- | ---: |
| Select one of the following: | $5-10$ |  |
| CHEM 109 | Advanced General Chemistry |  |
| CHEM 103 | General Chemistry I |  |
| \& CHEM 104 | and General Chemistry II |  |
| PHYSICS 202 | General Physics |  |
| or PHYSICS 208 | General Physics |  |
| PHYSICS 241 <br> or PHYSICS 205 | Introduction to Modern Physics <br> PHYSICS 322 | Modern Physics for Engineers |
| Total Credits |  | 5 |

## ENGINEERING SCIENCE

| Code | Title | Credits |
| :---: | :---: | :---: |
| ECE 376 or PHYSICS 321 | Electrical and Electronic Circuits <br> Electric Circuits and Electronics | 3 |
| E M A 201 | Statics | 3 |
| $\begin{aligned} & \text { E M A } 202 \\ & \quad \text { or M E } 240 \end{aligned}$ | Dynamics <br> Dynamics | 3 |
| $\begin{aligned} & \text { E M A } 303 \\ & \text { or M E } 306 \end{aligned}$ | Mechanics of Materials <br> Mechanics of Materials | 3 |
| EP 271 <br> or COMP SCI 200 <br> or COMP SCI 220 <br> or COMP SCI 310 | Engineering Problem Solving I <br> Programming I <br> Data Science Programming I <br> Problem Solving Using Computers | 3-4 |
| M E 231 | Geometric Modeling for Design and Manufacturing | 3 |
| M E 361 | Thermodynamics | 3 |
| M S \& E 350 | Introduction to Materials Science | 3 |
| Computing Elective (s | select one of the following): | 3 |
| COMP SCI 300 | Programming II |  |
| COMP SCI 412 | Introduction to Numerical Methods |  |
| EM A/EP 471 | Intermediate Problem Solving for Engineers |  |
| EM A/EP 476 | Introduction to Scientific Computing for Engineering Physics |  |
| Total Credits |  | 27-28 |
| RADIATION SCIENCES CORE REQUIREMENT |  |  |
| Code | Title | Credits |
| N E 305 | Fundamentals of Nuclear Engineering | $3$ |
| N E 405 | Nuclear Reactor Theory | 3 |
| N E 408 | lonizing Radiation | 3 |
| N E 412 | Nuclear Reactor Design | 5 |
| NE 424 | Nuclear Materials Laboratory | 1 |
| N E 427 | Nuclear Instrumentation Laboratory | 2 |
| N E 428 | Nuclear Reactor Laboratory | 2 |
| N E 571 | Economic and Environmental Aspects of Nuclear Energy | 3 |

## Total Credits

## RADIATION SCIENCES ELECTIVES

Code
Title
Credits
Medical Physics Electives
Select credits from Medical Physics Electives Course List below

Technical Electives (not to be confused with Medical 2
Physics Electives) choose 2 credits from:
NE $1 \quad$ Cooperative Education Program (no more than 3 credits)
Courses numbered 300+in the CoE except for E P D/
INTEREGR

Courses numbered 300+ in MATH, PHYSICS, COMP
SCI, STAT (except STAT 301), ASTRON, MED PHYS, and CHEM departments
Students may also propose any class that they feel will benefit their education path with pre-requisite of two physics or calculus classes. For these courses the advisor will review the request and if approved, recommend a DARS substitution.

| Total Credits | 11 |
| :--- | :--- |

## Medical Physics Electives Course List ${ }^{1}$ Code Title

Credits
MED PHYS/N E 506 Monte Carlo Radiation Transport 3
MED PHYS/ Physics of Radiotherapy 3
BME 566
MED PHYS/N E 569 Health Physics and Biological 3-4

MED PHYS/ Mathematical Methods in Medical 3
BME 573 Physics
MED PHYS/ Data Science in Medical Physics 3
B ME 574

| MED PHYS/ | Non-lonizing Diagnostic Imaging | 4 |
| :--- | :--- | :--- |
| B M E 578 |  | 4 |
| MED PHYS/ | The Physics of Medical Imaging with | 4 |

B M E 580 Ionizing Radiation
MED PHYS/ Radiation Production and Detection 4
PHYSICS 588
MED PHYS 671 Selected Topics in Medical Physics ${ }^{2}$ 1-4
MED PHYS 701 Ethics and the responsible conduct 1 of research and practice of Medical Physics

Students are encouraged to access the online N E future course offering grid to plan their future course schedules and to confirm the offering of a course in the table.

## 1

Courses meeting the Medical Physics Electives requirement are selected MED PHYS courses numbered 500 and above and selected PHYSICS courses numbered 400 or above. No more than 3 credits of N E 699 Advanced Independent Study may be used to meet this requirement. (Refer to the NE handbook under Degree Information on the NE department website (https://docs.google.com/document/u/1/d/ e/2PACX-1vRMi-zHWwv19rf6wMx2E5Nzdn1AwfOZHG6pK-QXTSRfsDI3kYuBBCOMZbiWt9vcLejeTxBQQHEjZVs/pub/)).

## 2

N E/MED PHYS 569 Health Physics and Biological Effects and MED PHYS 671 Selected Topics in Medical Physics are especially recommended for students in this focus area.

INTRODUCTION TO ENGINEERING

| Code | Title | Credits |
| :--- | :--- | ---: |
| N E 231 | Introduction to Nuclear Engineering | 3 |

| INTEREGR 397 | Engineering Communication | 3 |
| Total Credits |  | $\mathbf{8}$ |

## LIBERAL STUDIES ELECTIVES

| Code | Title | Credits |
| :--- | ---: | ---: |
| College of Engineering Liberal Studies Requirements |  |  |
| Complete Requirements (p. 237) ${ }^{1}$ | 16 |  |
| Total Credits | $\mathbf{1 6}$ |  |

1
Students must take 16 credits that carry H, S, L, or Z breadth designators. These credits must fulfill the following subrequirements:

1. A minimum of two courses from the same subject area (https:// registrar.wisc.edu/subjectarea/) (the description before the course number). At least one of these two courses must be designated as above the elementary level ( $\mathrm{I}, \mathrm{A}$, or D ) in the course listing.
2. A minimum of 6 credits designated as humanities $(H, L$, or $Z$ in the course listing), and an additional minimum of 3 credits designated as social science ( S or Z in the course listing). Foreign language courses count as H credits. Retroactive credits for language courses may not be used to meet the Liberal Studies credit requirement (they can be used for subrequirement 1 above).
3. At least 3 credits in courses designated as ethnic studies (lower case " $e$ " in the course listing). These courses may help satisfy subrequirements 1 and 2 above, but they only count once toward the total required. Note: Some courses may have "e" designation but not have H, S, L, or Z designation; these courses do not count toward the Liberal Studies requirement.

For information on credit load, adding or dropping courses, course substitutions, pass/fail, auditing courses, dean's honor list, repeating courses, probation, and graduation, see the College of Engineering Official Regulations (http:// guide.wisc.edu/undergraduate/engineering/ \#policiesandregulationstext).

## HONORS IN UNDERGRADUATE RESEARCH PROGRAM

Qualified undergraduates may earn an Honor in Research designation on their transcript and diploma by completing 8 credits of undergraduate honors research, including a senior thesis. Further information is available in the department office.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

## Total Credits 129

## 1

It is recommended that students take CHEM 109 Advanced General Chemistry for 5 credits. However, depending on their high school chemistry experience, students may substitute this with CHEM 103 General Chemistry I and CHEM 104 General Chemistry II for a total of 9 credits. Three credits of CHEM 103/CHEM 104 General Chemistry II may be counted as Technical Electives credits.

## 2

Students who were not able to take N E 231 Introduction to Nuclear Engineering as freshmen may, with the approval of their advisor, substitute a course offered in the College of Engineering or in the Departments of Chemistry, Computer Science, Mathematics, and Physics.

## 3

Students may substitute PHYSICS 201 General Physics, 5 credits, for E M A 201 Statics, 3 credits, with the approval of their advisor.

4
After completing E M A 201 Statics, students may complete E M A 202 Dynamics and E M A 303 Mechanics of Materials in either order or concurrently.

## 5

STAT 311 Introduction to Theory and Methods of Mathematical Statistics I or STAT/M E 424 Statistical Experimental Design are acceptable substitutes.

6
PHYSICS 623 Electronic Aids to Measurement is recommended for students in the Radiation Sciences focus area.

## COLLEGE OF LETTERS \& SCIENCE

What's so great about a liberal arts education from UW-Madison?
For one thing, it makes for a college experience that is rich in discovery, exploration, personal growth, and new ideas.

But while your courses may be fascinating, liberating, eye-opening and mind-blowing, a liberal arts degree from UW-Madison keeps working for you long after you have graduated.

By pursuing a degree in the liberal arts-a bachelor of arts or a bachelor of science-you are preparing for long-term satisfaction in work and in life. A liberal arts degree is a journey of self-discovery, as you explore new topics and discuss ideas with a wide range of people. You delve deeply into a broad range of subjects beyond just your major. When you graduate, you aren't narrowly prepared for one field. You've developed writing, presentation, and analytical skills. You've been exposed to the scientific method, as well as literary analysis. A chemistry major, for example, will also graduate with knowledge of a language, history, social science, the arts, and more.

## WHY DOES THIS MATTER?

Because the more you know, the more curious you become. Curious people seek opportunities to enrich and expand their lives. Learning leads to conversation, dialogue, innovation, advancement. Employers value liberal arts majors because they are problem-solvers, out-of-the-box thinkers, and good communicators.

## CAN A 4-YEAR DEGREE FROM L\&S REALLY OPEN DOORS WITH EMPLOYERS?

Absolutely. Based on a recent L\&S alumni survey rigorously designed and administered by the university's nationally renowned survey center, our graduates' employment rates are on par with the School of Business and the College of Engineering, and out-perform the national average for university graduates. They work for an extremely wide range of fields, including technology, corporate management, education, and nonprofits.

L\&S alumni also report high job satisfaction and believe that their academic preparation gave them an advantage compared to employees from other colleges and universities.

Students in the College of Letters \& Science have an additional builtin career advantage. SuccessWorks, the L\&S center for personal professional development (https://successworks.wisc.edu/), makes it possible for every L\&S student to channel the breadth and depth of
knowledge they gain during their time at UW into meaningful, rewarding lives and careers.

There is nothing like SuccessWorks in any other school or college at UW, or at most other universities around the country. SuccessWorks Career Communities (https://successworks.wisc.edu/what-are-careercommunities/) encourage students to explore jobs and fields where alumni have built fulfilling careers, then dive deep into building skills and experiences once they have discovered the right paths for them. Each Career Community connects students to an advisor with specific expertise, plus a network of supportive alumni mentors and highly engaged employers seeking to hire L\&S students for jobs and internships. We start where you are - and go from there, wherever it takes you in your life and career.

## BUT WE VALUE LEARNING FOR ITS OWN SAKE, HERE.

You will never regret your liberal arts degree from UW-Madison, because it gives you the opportunity to explore subjects that fascinate you, as well as prepare you for a successful career. You will connect with wonderful faculty from 125 departments, programs, centers and institutes, whose mentoring and teaching will influence your goals and direction. And you will gain an appreciation for learning that will last a lifetime.

The University of Wisconsin-Madison is one of the great universities of the world, and the College of Letters \& Science (http://www.ls.wisc.edu/) is at its center. Students who earn a bachelor of arts or bachelor of science degree in the College of Letters \& Science (L\&S) complement their broad study in the liberal arts and sciences with in-depth study of one or more particular fields, or "majors." Majors range from African cultural studies to philosophy in the humanities, from astronomy to zoology in the natural sciences, and from African American studies to sociology in the social sciences.

In addition to the bachelor of arts and bachelor of science degrees available in L\&S, the college also offers a limited number of special degrees. These programs often have additional admission requirements and require completion of additional requirements in the major.

Finally, a wide array of certificate programs are also available for students who have special interests in such diverse topics as integrated liberal studies; international, global, and area studies; religious, ethnic, and gender studies; and more.

## DEGREES/MAJORS/CERTIFICATES

## NOTE: Major requirements are the same whether a student pursues a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.) degree.

- African American Studies, B.A. (p. 375)
- African American Studies, B.S. (p. 379)
- African American Studies, Certificate (p. 384)
- African Cultural Studies, B.A. (p. 386)
- African Cultural Studies, B.S. (p. 391)
- African Studies, Certificate (p. 889)
- American Indian and Indigenous Studies, Certificate (p. 396)
- Anthropology, B.A. (p. 400)
- Anthropology, B.S. (p. 405)
- Applied Mathematics, Engineering, and Physics, B.S. AMEP (p. 1144)
- Applied Social Science, BLS (p. 1105)
- Archaeology, Certificate (p. 409)
- Art History, B.A. (p. 413)
- Art History, B.S. (p. 421)
- Art History, Certificate (p. 429)
- Asian American Studies, Certificate (p. 432)
- Asian Languages and Cultures, B.A. (p. 436)
- Asian Languages and Cultures, B.S. (p. 448)
- Astronomy-Physics, B.A. (p. 490)
- Astronomy-Physics, B.S. (p. 494)
- Atmospheric and Oceanic Sciences, B.A. (p. 499)
- Atmospheric and Oceanic Sciences, B.S. (p. 504)
- Biochemistry, B.A. (L\&S) (p. 1108)
- Biochemistry, B.S. (L\&S) (p. 1117)
- Biology Core Curriculum Honors, Certificate (p. 526)
- Biology, B.A. (L\&S) (p. 1018)
- Biology, B.S. (L\&S) (p. 1037)
- Botany, B.A. (p. 529)
- Botany, B.S. (p. 533)
- Cartography and Geographic Information Systems, B.A. (p. 767)
- Cartography and Geographic Information Systems, B.S. (p. 771)
- Chemistry, B.A. (p. 570)
- Chemistry, B.S. (p. 577)
- Chicana/o and Latina/o Studies, B.A. (p. 585)
- Chicana/o and Latina/o Studies, B.S. (p. 590)
- Chicana/o and Latina/o Studies, Certificate (p. 594)
- Chinese Professional Communication, Certificate (p. 459)
- Chinese, B.A. (p. 463)
- Chinese, B.S. (p. 469)
- Classical Humanities, B.A. (p. 597)
- Classical Humanities, B.S. (p. 602)
- Classical Studies, Certificate (p. 608)
- Classics, B.A. (p. 610)
- Classics, B.S. (p. 614)
- Communication Arts, B.A. (p. 625)
- Communication Arts, B.S. (p. 636)
- Communication Sciences and Disorders, B.A. (p. 653)
- Communication Sciences and Disorders, B.S. (p. 658)
- Computer Sciences, B.A. (p. 662)
- Computer Sciences, B.S. (p. 667)
- Computer Sciences, Certificate (p. 672)
- Conservation Biology, B.A. (p. 538)
- Conservation Biology, B.S. (p. 544)
- Criminal Justice, Certificate (p. 551)
- Data Science, B.A. (p. 1416)
- Data Science, B.S. (p. 1421)
- Data Science, Certificate (p. 1425)
- Digital Cinema Production, Certificate (p. 648)
- Digital Media Analytics, Certificate (p. 1371)
- Digital Studies, Certificate (p. 649)
- East Asian Studies, Certificate (p. 893)
- East Central European Languages, Literatures, and Cultures, Certificate (p. 801)
- Economic Analytics, Certificate (p. 676)
- Economics, B.A. (p. 678)
- Economics, B.S. (p. 687)

- Zoology, B.S. (p. 1085)

## ENTERING THE COLLEGE

## ADMISSIONS

Any student interested in earning an undergraduate degree in the College of Letters \& Science will need to apply for admission through the Office of Admissions and Recruitment at UW-Madison. Information on applying to the university as a freshman, transfer, or international student is available through the Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/apply/).

Prospective students with questions about study in the College of Letters \& Science may contact L\&S Academic Advising Services (http:// advising.ls.wisc.edu/) at 608-262-5858 or Cross-College Advising Service (https://ccas.wisc.edu/) at 608-265-5460. Students should also feel free to contact the major department (p. 353) directly if they have specific questions about a particular major.

## TRANSFER STUDENTS

Transfer students interested in earning an undergraduate degree in the College of Letters \& Science will need to apply for admission through the Office of Admissions and Recruitment at UW-Madison. Transfer students must complete all Letters \& Science degree requirements. Once admitted, transfer students should obtain a copy of their DARS (https://registrar.wisc.edu/dars-student/) report which will explain how their transfer credits will apply toward L\&S requirements. Students can request and review their DARS in the Student Center via My UW (https://my.wisc.edu). Students can also request DARS for programs, majors, or certificates that they have not declared but are interested in declaring. These reports are called "what-if" reports. (Please note that some programs may not be available in DARS. For information about requirements in a program not available in DARS, contact the advisor for the particular program.)

Please note that the DARS audit serves as the document of record (DOR) for students in the College of Letters \& Science. The DOR is used to certify completion of degree requirements, and it is retained according to university record retention and archival polices.

Students can transfer only a limited number of credits from non-degreegranting accredited institutions and correspondence courses. See non-degree-granting accredited institutions' transfer credit limitation (p. 356) in the Guide under Credits.

Transfer students who have more than 30 degree credits are ineligible to earn retroactive credits in a foreign language on the UW-Madison campus. See credit by course examination/retroactive credits (p. 356) in the Guide under Credits.

Advisors for freshman and sophomore students are in the L\&S Academic Advising Services (608-262-5858) in 101 Ingraham Hall and the CrossCollege Advising Service (608-265-5460) in 10 Ingraham Hall. Junior and senior transfer students should meet with an advisor in the department in which they intend to major. All L\&S undergraduate students are expected to declare a major by the time they have $\mathbf{8 6}$ degree credits.

Transfer students should note that the L\&S degree requirements have changed as of summer 2007. Those students who matriculated before May 21, 2007 are eligible to complete the degree requirements in force at the time they began their college-level studies. (See previous catalogs under Archive (http://guide.wisc.edu/archive/) for more information.)

Because some requirements in force before this edition of the Guide differ substantially from the requirements articulated here, transfer students are strongly encouraged to refer to the undergraduate catalog or Guide in force at the time of their first matriculation to college. (See past catalogs (http://guide.wisc.edu/archive/) to review the requirements that apply.) For some students, it may be to their benefit to consider transferring to the new degree requirements; they may consult with their academic advisor if they wish to consider this option.

## ON-CAMPUS TRANSFER

Continuing UW-Madison students must have a minimum 2.000 cumulative grade point average and a UW-Madison grade point average of at least 2.000 in their most recent semester of work in order to transfer into the College of Letters \& Science. First-semester and new transfer students without a UW-Madison grade point average may transfer into Letters \& Science provided they meet university admission requirements (three units of math and two units of a single foreign language). Students admitted to the university with admission deficiencies must remove those deficiencies before they are eligible to transfer into L\&S. For more information about transferring into L\&S, call 608-262-5858 or refer to request to transfer into L\&S (https://advising.ls.wisc.edu/ transfer/).

Students transferring into one of the general courses from a special course (AMEP, Music), or from another college/school of the university to the College of Letters \& Science will receive no more than 18 credits per semester toward graduation for work already completed, unless a 3.000 grade point average was earned the previous semester or the semester the overload was carried. Then a maximum of 20 credits from that term may be transferred. These transferring students will receive credit for studies in another college/school, but will be subject to the conditions of the Liberal Arts and Science Credits requirement. (See Liberal Arts and Science Credits (p. 366).)

## UNIVERSITY SPECIAL STUDENTS

If you are not currently enrolled in a UW-Madison degree program but wish to take courses within the College of Letters \& Science at UW-Madison for credit as a non degree-seeking candidate or as an auditor, it may be
best to consider becoming a special student (https://acsss.wisc.edu/ special-student-types/). Information about becoming a non degreeseeking student at UW-Madison can be found at Adult Career and Special Student Services (https://acsss.wisc.edu/apply/).

## WISCONSIN EXPERIENCE

## THE WISCONSIN EXPERIENCE: ESSENTIAL LEARNING IN THE COLLEGE OF LETTERS \& SCIENCE

The three elements of learning -tools, breadth, and depth-work together to create a broad and rich education in the liberal arts and sciences, and promote attainment of core areas of essential learning: knowledge of human cultures and the natural and physical world, intellectual and practical skills, personal and social responsibility, and integrative and applied learning. These and countless other experiences comprise the Letters \& Science approach to helping students obtain a distinctive Wisconsin Experience.

## POLICIES AND REGULATIONS

## ACADEMIC STATUS

The primary audience for this page are students in one of the L\&S residential undergraduate degrees:

Bachelor of Arts<br>Bachelor of Science<br>Journalism Bachelor of Arts<br>Journalism Bachelor of Science<br>Bachelor of Science, Applied Mathematics, Engineering, And Physics Bachelor of Landscape Architecture<br>Bachelor of Music: Education<br>Bachelor of Music: Performance<br>Bachelor of Social Work

The information may not be relevant to students enrolled in the Bachelor of Liberal Studies online degree.

## ACADEMIC STANDING (P. )

## Good Academic Standing

L\&S undergraduate students are in good academic standing if their [cumulative] University and most recent term (Fall, Spring, Summer) GPA are at least a 2.000. Students in good academic standing are not on any form of academic probation and are not at risk of being dropped from the University. Students (e.g., first-term Freshmen) who have not yet established a University GPA are also in Good Academic Standing.

## Academic Probation and Suspension

Students whose University GPA or most recent term GPA are below a 2.000 will be placed in academic probation or academic suspension, as follows:

- If a student is not on probation and earns a term GPA of 1.000-1.999, the student is placed on probation.
- If a student is not on probation and earns a term GPA of less than 1.000, the student is placed on strict probation.
- If a student is on probation and earns a term GPA of 1.500-1.999, the student is placed on strict probation.
- If a student is on probation and earns a term GPA of less than 1.500, the student is dropped (placed on academic suspension) for one (1) year.
- If a student is on strict probation and earns a term GPA below 2.000, the student is dropped (placed on academic suspension) for one (1) year.

## Readmission

Students who have completed their academic suspension may apply for readmission (https://deans.ls.wisc.edu/policiesforms/probation/readmission/).
Some students may wish to appeal their academic suspension through the L\&S Undergraduate Academic Dean's office.

## DEAN'S LIST (P. )

The College of Letters \& Science Dean's List is established at the end of each fall and spring terms. To be eligible for the Dean's List in a given term, students must:

- complete a minimum of 12 graded* credits in that term with a minimum GPA of 3.600 for students who are classified as freshmen (fewer than 24 credits) and sophomores (24-53 credits), or
- complete a minimum of 12 graded* credits in that term with a minimum GPA of 3.850 for students who are classified as juniors (54-85 credits) and seniors (at least 86 credits)
- Note: Advanced Placement (AP), College-Level Examination Program (CLEP), International Baccalaureate (IB) credits, credit by department examination, transfer credits, and retroactive credits (retrocredits) will count toward a student's class standing (level).
*The grades used to determine the dean's list eligibility are: $A$, $A B, B, B C, C, D$, and $F$. A student must have a minimum of 12 credits from this list of grades in order to qualify for the L\&S Dean's List.

An entry, "Dean's List," appears on the student's grade report and on the transcript.

- Students who have P grades for their senior thesis (regardless of whether they have 12 other graded credits), as well as students with unresolved grades of NR, I, and Q are not eligible for the Dean's List until they get these outstanding temporary grades resolved.
- Once a student has resolved any outstanding grade issues and believes he/she qualifies to be on the Dean's List, the student should contact L\&S Undergraduate Academic Deans' Services (https://saa.ls.wisc.edu/offices/academic-deansservices/) for more assistance.

## - Please note that the College of Letters \& Science does not "round up" for the purpose

## of tabulating the GPA for the Dean's List. For

 example, an L\&S sophomore with a fall or spring term GPA of 3.599 is not eligible for the Dean's List since the minimum GPA for freshmen and sophomores to qualify for the Dean's List is 3.600 .More information can be found at Dean's List (https:// registrar.wisc.edu/deanslist/) and L\&S Dean's List Qualifications (https://kb.wisc.edu/ls/21121/). For information about class standing, see L\&S Undergraduate Classification and Class Standing (https://kb.wisc.edu/ls/21122/).

## TRANSFERRING TO L\&S FROM ANOTHER UW-MADISON SCHOOL OR COLLEGE

Students in Good Academic Standing may apply for transfer to the College of Letters \& Science (L\&S) from within UWMadison, by completing the Transfer Request Form (https:// saa.ls.wisc.edu/policies-forms/Is-on-campus-transfer-request/transfer-to-Is-request-form/).

## COURSES AND ENROLLMENT

CONCURRENT ENROLLMENT (P. )
In some circumstances, it is appropriate for students to enroll for credit at another insitution at the same time as being enrolled at UW-Madison. This is called concurrent enrollment (https://deans.ls.wisc.edu/policies-forms/concurrentenrollment/) (or concurrent registration).

Students can request permission to be concurrently enrolled via the concurrent enrollment request form (https:// saa.ls.wisc.edu/policies-forms/concurrent-enrollment/ concurrent-enrollment-request-form/).

## DROPPING A COURSE

Students may drop one or more courses and remain enrolled if they continue in at least one course in that term. See dropping a course at UW-Madison (https://kb.wisc.edu/ls/page.php? id=21705) for more information.

## ENROLLMENT/REGISTRATION DEADLINES ( P . )

Deadlines for all types of enrollment changes can be found on the Office of the Registrar's Dates \& Deadlines (https:// registrar.wisc.edu/dates/) page.

If a student wishes to drop all of their classes in a term, the student should withdraw from the semester. For more information about withdrawing, see withdrawing from UWMadison (https://kb.wisc.edu/ls/page.php?id=21703).

## DIRECTED/INDEPENDENT STUDY (P. )

Directed/Independent Study offers the student an opportunity to work with a faculty member on an individual study program. A student who is stimulated by a particular concept or problem encountered in a course can pursue and develop that interest in depth through a Directed Study project. Such individualized study can make a valuable contribution to a student's educational experience.

Directed Study courses are made available by departments on the basis of a student's preparation and motivation and a
faculty member's willingness to accept the student in such an endeavor. See L\&S Undergraduate Directed/Independent Study Course Guidelines (https://kb.wisc.edu/ls/page.php? id=20133) for more detailed information.

Directed Study courses with a number ending in 98 (e.g., 198,698 ) are carried on a Credit/No Credit (Cr/N) basis. The student earns credit for the course if the instructor is satisfied with the work the student has performed. If not, there is no credit. Courses ending in 99 (e.g. 199, 699) are graded. (See Grades and GPA (https://registrar.wisc.edu/ grades_and_gpa.htm) for more information)

Prior to registration and before the end of the second week of classes, students are responsible for making all arrangements with the faculty member who agrees to direct their work. The student and faculty member should prepare a study plan, determine the time and place for regular meetings, the number of credits to be earned, and how to enroll in the course.

## Notes:

- Directed Study courses do not carry University General Education, Language, or L\&S Breadth attributes
- Directed/Independent Study courses may not be taken on a pass/fail or audit basis.
- L\&S undergraduates are not permitted to take graduate level directed study (courses numbered 799, 899, and 999) under any circumstance.
- Directed Study courses may be repeated for credit if course content is not duplicated.
- Some majors limit the number of Directed Study credits that can be applied to the major.
- Directed Study courses are not intended as placeholder credits for registration purposes, and students with special rules for full-time status should consult the undergraduate deans before enrolling in Directed Study courses after the enrollment period.
- Directed Study courses taken in non-L\&S departments are considered equivalent to Liberal Arts and Science courses provided that they are offered at the 300-or-above level.
- Because these experiences are intended to provide intensive, one-on-one experiences with faculty, departments are not allowed to use Directed Study courses to teach group instruction courses.

## DROP NOTATION (P. )

The Drop (DR) notation appears on students' records for any course dropped after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see the Office of the Registrar Dates and Deadlines page (https://registrar.wisc.edu/ dates/). Please note that L\&S does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

The DR notation only shows that a student has dropped a course(s) before the official drop deadline. A "DR" on a student's academic record does not have any negative
implications for students when they are applying to graduate schools or seeking employment. The "DR" was instituted as a means to document when a course was dropped after the first eight days in the fall and spring semesters (or the appropriate period during the summer session or module courses).

## GRADUATE COURSES (P. )

All courses numbered 700 and above are graduate courses and considered advanced (A). Enrollment in these courses is strictly limited to only graduate-level students. L\&S undergraduates who, on the rare occasion, are permitted to enroll in graduate level courses and receive passing grades in these classes will be awarded undergraduate degree credit. L\&S undergraduate students SHOULD NOT enroll (or be permitted to enroll) in graduate courses if they are not making satisfactory progress toward their undergraduate degree or if taking graduate-level courses would delay their time to graduation.

- L\&S students who receive permission to enroll in L\&S graduate courses may count those credits toward completion of their Liberal Arts and Sciences credit requirement. These credits may be used to satisfy the requirements related to mastery of intermediate/ advanced level work, but since these courses do not carry breadth designations, they do not satisfy breadth requirements.
- L\&S students who enroll in non-L\&S graduate courses may count those credits as part of their free electives in the degree. These credits may not be used to satisfy breadth or level requirements.
- Grades earned by undergraduates who complete graduate courses will be included in all relevant grade point average calculations (see Quality of Work Requirements ( p . ) for the list of areas in which these averages are calculated). Most graduate courses restrict enrollment to students who have graduate standing, or who have received the instructor's consent to enroll.
- Students can count up to seven (7) credits of graduate-level coursework earned as an undergraduate toward future graduate studies.
- Undergraduate students cannot take or earn degree credit for graduate-level Directed Study, Independent Reading, Independent Study, or Individual Enrollment courses (e.g., 799, 899, 999).

Provided that an instructor wishes to allow undergraduates to enroll in a graduate course, students who wish to enroll in the courses should meet with the instructor, who can evaluate whether or not the student should be allowed to register. This decision is made at the instructor's discretion, based on such considerations as whether or not the student has met course prerequisites, is prepared to perform graduatelevel work in the course, and is likely to successfully complete the course. Instructors are not obligated to accommodate undergraduate student requests to enroll in graduate-level courses. Furthermore, it should be noted that all students in graduate-level courses are expected to be held to a similar
performance standard with respect to quality, quantity, and type of work performed.

## ENGLISH AS A SECOND LANGUAGE

 (P. ) (ESL)The Madison English as a Second Language Test (MSNESLAT) is taken by all students who are required to submit a Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) score for admission to UW-Madison. See more information about Language Placement Exams here (p. 11).

All ESL courses completed in residence, and all credit earned in those courses, will appear on students' transcripts. ESL courses numbered below 118 are not considered Liberal Arts and Science courses but may be counted among L\&S students' free electives in the degree.

## Degree Requirements for ESL Students

International students must complete the same degree requirements as any other entering student. The College of Letters \& Science makes some exceptions to this policy. For example, the College may waive the language requirement for the B.A. and B.S. degrees for students who are native speakers of a language other than English.

A student who graduates from or completes a major portion (the equivalent of at least five semesters) of a secondary school in a non-English-speaking school system may qualify for an exemption from the L\&S language requirement. Exemption is not automatic. Students who believe they may qualify for an exemption should contact the Office of Admissions and Recruitment or an L\&S academic dean to determine how their language background may be applicable toward the language requirement.

Students whose native language is not English may not receive degree credit for work in their native language through Credit by Examination except for literature credit.

I (https://iss.wisc.edu/)nternational Student Services (ISS) (https://iss.wisc.edu/) offers assistance and advising in non-curricular matters such as visa-related issues.

## LIBERAL ARTS AND SCIENCE (LAS) COURSES (P. <br> )

Courses that have been approved as Liberal Arts and Science (LAS) classes are expected to encourage students in one or more of the three "habits of the mind" of liberal arts education, as specified by the College of Letters \& Science. These include:

1. Skilled written and verbal communication, excelling in formulating and expressing a point of view, reflecting and questioning current knowledge through reading, research and consideration of the views of others.
2. The ability to draw flexibly upon and apply the modes of thought of the major areas of knowledge.
3. Knowledge of our basic cultural heritage as a multifaceted and often contested history.

For more detailed information, refer to criteria for Liberal Arts and Science Courses (https://kb.wisc.edu/ls/page.php? id=43819).

## PREREQUISITE COURSES (P. )

The College of Letters \& Science recognizes that some courses that meet general degree requirements (e.g., language, math, ESL) require prior knowledge in that subject. For purposes of distinguishing between necessary prerequisites and electives, coursework that is regarded as prerequisite to courses meeting general degree requirements is considered "necessary" and not purely elective.

## REGISTRATION (ENROLLMENT) CHANGES <br> (P. )

Students may make changes in their registration (add and/ or drop courses, change sections in a course, or change the number of credits in a course) via their Student Center in My UW according to the deadlines (see the Office of the Registrar's Dates and Deadlines Page (https:// registrar.wisc.edu/dates/)). For more specific information about this process, please refer to Course Change Request (https://kb.wisc.edu/registrar/7700/\#change). Students are strongly encouraged to check their current registration and verify they are properly enrolled in the correct courses using My UW (http://my.wisc.edu). For general questions about this process, contact your undergraduate advisor or L\&S Undergraduate Academic Deans' Services at 608-262-0617.

Students who enroll for a course must either complete the course or drop it by the deadline for dropping courses.

## RETAKING A NON-REPEATABLE COURSE (TAKING A COURSE ON A "REFRESHER" BASIS) (P. <br> )

A student who passes a non-repeatable course is allowed to repeat that course for no credit. This is called taking the course on a "refresher basis." All instances of a non-repeatable course will calculate in the semester GPA and in the cumulative University GPA. Repeated courses do not calculate in L\&S requirements for quality of work (Mastery of Intermediate/ Advanced work, Major GPA and Upper-Level Major GPA. Credits carried on a refresher basis count toward a student's credit load, each term. Repeating a course will not remove the prior course or grade(s) earned for that course from the student's record.

See retaking a course for more information.
Transfer students must be particularly careful to avoid taking courses on the Madison campus that duplicate courses taken at another institution. Credit will not be given twice for the same courses. Students should carefully check their Transfer Credit Evaluation and consult an advisor when enrolling.

All courses bearing credit - including UW-Madison, Transfer and Test credit (e.g., AP credit) -- cannot be repeated, unless
the course is designated as repeatable for credit in the Courses section of Guide.

## WITHDRAWING AND CANCELLING ENROLLMENT (P. )

Withdrawal means dropping all courses in a term. Before the first day of classes in a term, students may cancel their enrollment by dropping all their courses via My UWMadison. Information about the withdrawal process for L\&S undergraduates can be found at withdrawing from semester/ term (http://saa.ls.wisc.edu/policies-withdrawal.htm).

After the first day of classes and through the withdrawal deadline, L\&S undergraduate students may withdraw from the term by going to their Student Center in My UW and accessing the Term Withdrawal tab under Course Enrollment. See Withdraw or Cancel Enrollment for a Term (https:// registrar.wisc.edu/withdraw/).

Students who withdraw prior to the withdraw deadline do not need special permission to re-enroll in a subsequent term. Letters \& Science undergraduate students wishing to withdraw after the deadline must obtain permission from an academic dean through appointment with L\&S Undergraduate Academic Deans' Services (608-262-0617). Failure to obtain this permission results in the recording of Failures for all courses.

Students who have neglected their classes, or who have earned unsatisfactory grades, or who have a pattern of withdrawals may need permission of an academic dean to continue or reenter their undergraduate program.

Students are encouraged to confer with a dean regarding the possible effects of withdrawal upon their academic work.

## CREDITS

## CREDIT LOAD ( P . )

Students are Full-time if enrolled for 12-18 credits in a Fall or Spring term (semester). An enrollment in fewer than 12 credits may be carried without the specific authorization of an academic dean. Students are encouraged to consult their undergraduate advisor or an academic dean regarding their credit load.

There is no equivalent to full-time status for Summer terms.
The credit load limit for Fall and Spring terms is 18 credits. The credit load limit for Summer terms is 12 credits.

## Heavy load

Students who have a cumulative GPA of 3.000 or better at the University of Wisconsin-Madison may enroll for 19 or 20 credits during the fall or spring term, or 13 credits in summer term, with permission from an academic dean in L\&S Undergraduate Academic Deans' Services. Additional fees per credit are assessed for all credits above the limits. Under no circumstances may a student carry more than 20 credits in either the fall or spring term or more than 13 in a summer term.

Some students (e.g., international students and students competing in NCAA athletic events) are usually required to maintain full-time status. Some scholarships and other
financial aid packages may require full-time status. Such students should consult their advisor or the academic deans in L\&S before dropping below full-time status.

For more information regarding credit load, see common credit load for L\&S undergraduate students (https://kb.wisc.edu/ ls/21871/).

## CREDIT BY COURSE EXAMINATION/ RETROACTIVE CREDITS (RETROCREDITS) (P. )

The College of Letters \& Science will award degree credit for language work successfully completed in high school under certain circumstances and if an additional language course is taken at UW-Madison. In no case can a student earn retroactive credits simply by taking a placement test or other exam. A student must take the appropriate UW-Madison language class at UW-Madison to earn retroactive credits.

Students who qualify for retrocredits after completing the appropriate language course on the UW-Madison campus will automatically receive retrocredits approximately two to three months after all grades have been posted for all students. This benefit is available to freshmen (first-year students), and can be exercised when the following conditions are met:

- The course must be a student's first course
at the college level in the language. This does not include college-level coursework taken prior to graduating from high school but does include courses transferred from another institution where a student was working towards an undergraduate degree or coursework a student completed after graduating from high school.
- The course must be designated appropriate for earning retroactive credits. These courses are designated with the Foreign Language Level attribute of $2 \mathrm{nd}, 3 \mathrm{rd}$, 4 th, and 5 th semester language course in the Guide under Courses (see course designation). Course designed in the Guide as Frgn Lang - 1st semester language course are not eligible for retrocredits.
- A student must take the course before he/ she has earned 30 degree credits. This does not include AP, CLEP, IB, or other college credit earned in high school, nor does it include retroactive credits earned in another language. It does include courses transferred from another institution where you were working toward a degree.
- A student must earn a B or better in the class.
- The student is not a native speaker of the language of the course

If a student meets all the conditions listed above, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester (e.g., if the language was completed in the fall term, the retroactive credits should appear on a student's record by the beginning of the spring term). If retroactive credits do not appear on a qualified student's records by the end of the fourth week of the following term, the
student should fill out a Retroactive Language Request Form (https://kb.wisc.edu/images/group86/23736/ RETROACTIVELANGUAGECREDITREQUESTFORM-1.pdf) and submit that form to the office of the academic dean at the student's particular school or college. For students earning an undergraduate degree in the College of Letters \& Science, the form should be sent to L\&S Undergraduate Academic Deans' Services (http://saa.ls.wisc.edu/deans-services.htm). Non-L\&S degree-seeking candidates should speak with the undergraduate academic service unit in the school or college for more guidance.

- Retroactive credits (retrocredits) will not automatically be posted for students who have already earned retrocredits. If a student is still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), the student will need to fill out the Retroactive Language Request Form (https://kb.wisc.edu/images/group86/23736/ RETROACTIVELANGUAGECREDITREQUESTFORM-1.pdf) and deliver it to the L\&S Academic Deans' Services Office in 110 Ingraham Hall if the student is an L\&S undergraduate. For further information, contact L\&S Academic Deans Services at 608-262-0617.

## Please note:

- Students can earn retrocredits in more than one language as long as they are within the 29 -credit limit and meet the other requirements listed above to earn retrocredits.
- Retroactive credits (retrocredits) will not be posted automatically for students who have already earned retrocredits. If students are still eligible to earn retrocredits and wishes to receive retrocredits for another language(s), they will need to fill out the Retroactive Language Credit Request Form (http://languages.wisc.edu/sites/default/ files/docs/RETROACTIVE\%2OLANGUAGE \%20CREDIT\%20REQUEST\%20FORM.pdf) and deliver it to L\&S Undergraduate Academic Deans' Services in 110 Ingraham Hall to be reviewed if they are an L\&S undergraduate student.
- Retrocredits can only be earned for the first four semesters/levels of a language sequence. For example, a student who tests into SPANISH 311 can earn a maximum of sixteen retrocredits (SPANISH 101, SPANISH 102, SPANISH 203, and SPANISH 204). The maximum number of credits earned will be impacted if the student already has AP credits for a particular course.
- The maximum number of retrocredits a student can earn in the Chinese/Japanese language sequence is sixteen (16) credits. For example, a student who tests into ASIALANG 301 and successfully completes this course with a grade of $B$ or better can earn a maximum of sixteen (16) retrocredits (ASIALANG 101, ASIALANG 102, ASIALANG 201, and ASIALANG 202).
- UW-Madison will honor retroactive credits earned at another UW System institution provided that
these credits were earned according to UWMadison policy. Students will need to work with the Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/apply/freshman/ apib.php) at UW-Madison to make sure the retrocredits from the other institution get posted to their official UW-Madison records.

For more information about retroactive credits, refer to L\&S retrocredit requirements and information (https://kb.wisc.edu/ Is/page.php?id=23736).

## CREDIT BY DEPARTMENTAL EXAMINATION (P. )

The College of Letters \& Science allows degree credit, as well as placement credit, for the mastery of some L\&S coursework as demonstrated by appropriate achievement tests. The intent of these examinations is to increase opportunities for obtaining degree credit for college-level work done in high school or elsewhere.

Credit may be earned based on an examination given by a department when a student has demonstrated possession of knowledge equivalent to what would be learned in a specific course taught in that department. The credit given is for knowledge possessed by the student regardless of where they have gained that knowledge. For more detailed information, please see the placement and credit by exam tab (p. 11) in the Guide

## TRANSFER CREDITS (P. )

Transfer credit can be awarded to any admitted UWMadison student who has completed coursework at institutions accredited by a regional or national accrediting organization recognized by the Council for Higher Education Accreditation (CHEA). For more details about receiving credit for transfer work at UW-Madison, see transfer your credit to UW-Madison (https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/). Credit Evaluation Services has additional information regarding transfer credit at credit resources for current UW-Madison students (https:// registrar.wisc.edu/credit-resources-for-current-uw-madisonstudents/). Students who have general questions about transfer credits should refer to Credit Evaluation Services (https://apps.admissions.wisc.edu/ces/) on the Office of the Registrar's website (https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/) or contact them via email at crediteval@registrar.wisc.edu.

## LIMITS ON THE NUMBER OF TRANSFER CREDITS FROM NON-BACCALAUREATE INSTITUTIONS

Of the credits required for graduation, the maximum number of transferable semester credits from a two-year college (non-degree-granting accredited institution) is 72 . There is no credit limit on transferable credits from a four-year university. However, of the last 60 credits earned before graduation, not more than 12 may be carried at these non-degree-granting accredited institutions. See transfer your credit to UW-Madison (https://registrar.wisc.edu/transfer-your-credit-to-uw-
madison/) for more information about UW-Madison's transfer credit policy.

## DEGREES

## ASSOCIATE'S DEGREE POLICY (P. )

All new transfer students with an associate's degree from any UW System institution or an approved liberal arts associate's degree from a Wisconsin Technical College System (WTCS) schools (Madison College, MATC-Milwaukee, Nicolet, Chippewa Valley, Western) will have their University General Education (UGER) (p. 32) breadth requirements satisfied at UW-Madison. Students pursuing their undergraduate degrees in the College of Letters \& Science may need to take additional coursework to fulfill the L\&S breadth requirements (p. 366). Students should consult with their undergraduate advisor(s) if they have additional questions.

WTCS transfer students should be aware that only liberal arts associate's degrees that are approved by both WTCS and UW System Administration are eligible for this provision. Students with associate degrees in technical, vocational, or other fields will not have their UGER breadth requirements satisfied.

## DEGREES AND DIPLOMAS INFORMATION ( P )

A UW-Madison undergraduate diploma lists only the degree (e.g., Bachelor of Arts) and does not list major(s) or certificate(s). Major and certificate information will be recorded on a student's official UW-Madison transcript.

All L\&S undergraduate students are expected to graduate as soon as they have completed all of their degree and major requirements. Students should declare their intent to graduate via their Student Center. L\&S reserves the right to graduate an undergraduate student if the College discovers that a student has completed all their major and degree requirements but has not declared intent to graduate.

Graduation is based on the last term a student was enrolled in courses that completed all of their requirements. For additional information about degree conferment, see conferral of degrees under graduating (https://guide.wisc.edu/undergraduate/ \#requirementsforundergraduatestudytext).

## SECOND UNDERGRADUATE DEGREE ( P ) )

Students are not permitted to earn two undergraduate liberal arts degrees within the College of Letters \& Science at UWMadison.

Students who already have a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree from another institution may not enroll for a second B.A. or B.S. degree in L\&S, even if their major is substantially different than what they intend to declare at UW-Madison.

To be permitted admission for a second undergraduate degree in L\&S, the student's first undergraduate baccalaureate degree must be in field substantially different than our liberal arts education. Eligibility is determined as part of the admissions process. Before embarking on a second undergraduate degree, students should clearly identify their
goal(s), research options carefully, and be sure that you need a second undergraduate degree to reach your objectives. For more detailed information about applying for a second undergraduate degree, please see L\&S Second Undergraduate Degree (https://kb.wisc.edu/ls/internal/109226/). Second undergraduate degree students are admitted to a specific major. To make changes to their major, second-degree students must first secure permission from L\&S Undergraduate Academic Deans' Services (https://saa.Is.wisc.edu/offices/ academic-deans-services-2/). Students who are found to have declared another major without first getting permission will be removed from that major. Students admitted as candidates for a second undergraduate degree are subject to the L\&S Academic Probation and Drop system.

Students interested in applying as candidate for a second undergraduate degree in the College of Letters \& Science apply as a second degree student (https:// admissions.wisc.edu/apply-as-a-second-degree-student/) with the UW-Madison Office of Admissions and Recruitment.

Students who started an additional major but did not declare it prior to graduating are not eligible to return as a seconddegree student to finish up coursework for the second or additional major.

## EXAMS

FINAL EXAMINATIONS (P. ) (ACADEMIC SUMMARY PERIOD)

Following the regularly scheduled instructional period each semester is an eight-day summary period. Typically the first day of the summary period is for individual study and review, and no classes or exams are to be scheduled during this designated period. The last seven days are prescheduled to include one two-hour summary block for each course of two or more credits. This two-hour block shall be used for an examination or for other instructional activities as deemed appropriate by the instructional unit offering the course. During the two weeks preceding the summary period, examinations covering the content of the entire course cannot be given. Take-home examinations are due at the scheduled two-hour block.

Faculty policy prohibits giving or taking final examinations earlier than the time assigned in the Course Guide. Students may arrange a make-up examination only if the professor is willing and if there is a valid reason for missing a final examination. (See the Guide entry "incompletes (p. )" below.)

Students are required to attend all their final exams. Leaving prior to the final examination period and not taking finals will have a negative impact on a student's final grade in a course or courses. See class attendance policy (https://kb.wisc.edu/ls/ page.php?id=24628) for more information.

MIDTERM EXAM POLICY (P. )
Information about midterm exam policy along with fall, spring, and summer term final exam policy can be found at midterm and final exam policy information (https://registrar.wisc.edu/ exam-grading/) on the Registrar's website. Additional information can also be located at midterm grades (https://
registrar.wisc.edu/mid_term_grades.htm) and upcoming final exam periods (https://registrar.wisc.edu/exam-grading/).

- It is implicitly understood that no exams, papers, or assignments will be required during any break period (e.g., spring break) or major holiday.

## GRADES

Official information about grades, GPA calculations, and grading processes and deadlines can be found here: Student Grading and GPA (https://registrar.wisc.edu/student-grades/).

## AUDIT (P. )

A student may enroll in a course on an audit (AU) basis with prior consent of the instructor of the course. As an auditor, the student is considered a passive learner and may not recite in class or take examinations. Courses with laboratory or performance skills may not be audited.
(L\&S undergraduate students are not allowed to audit classes required for their major or degree with the purpose of getting some background prior to formally enrolling in the courses). Regular class attendance is expected. Courses audited carry no degree credit and are not graded. The credit value of courses carried on an audit basis is included in the semester/term program load for purposes of determining fees and maximum credits carried.

Courses carried on an audit basis may have an impact on students applying for scholarships or other forms of financial assistance. Students should contact the unit/agency administering the scholarship or Student Financial Services for more guidance. Students should also contact their insurance company to determine whether auditing a course (or courses) will have an impact on their coverage. See information on auditing courses for L\&S undergraduate students (https://kb.wisc.edu/ls/page.php? id=26734) for more details.

L\&S undergraduate students who wish to change their registration in a course from a credit basis to an audit basis must do so within the first four weeks of the semester by submitting a Course Change Form (available at Course Change Request (https://registrar.wisc.edu/ course_change_request.htm) ) to Suite 101 Ingraham Hall, 1155 Observatory Drive. (Course Change Requests can be accessed through an individual's Student Center in My UW (https://my.wisc.edu) under: Course Enrollment/Term Information/Course Change Request.) Students will not be able to submit or cancel a request to audit a course after the fourth week of the fall or spring term

- Audited courses, noted as such by "AU" in place of a number of credits, are graded either "S" (Satisfactory) or "NR" (No Report) or "NW" (No Work). AU is not a grade.
- For modular and summer session courses, audit requests must be submitted by the Friday of the week in which the session is one-fourth completed.
- Audits may affect a student's eligibility for financial aid (including Social Security and Veterans' benefits) Students should consult an advisor in the Office of

Student Financial Aid (http://www.finaid.wisc.edu) for more detailed information.

- Students with questions about their Veteran benefits and taking courses on an audit basis should contact the University Veteran Services (https:// veterans.wisc.edu/).

## CREDIT/NO-CREDIT (P. )

A limited number of courses on campus are offered on a Credit/No Credit basis. Credit/No Credit is not the same as Pass/Fail. At the completion of the course the student is given a grade of CR or N. A grade of CR will give a student degree credit; a grade of N will award no degree credit. Neither grade has any GPA impact.

## FAILURES (P. )

Students who have earned a grade of $F$ may repeat the failed course in residence. The original grade of $F$ remains permanently on a student's record and is averaged into the semester and overall grade point average (GPA). The failure will be counted as zero grade points per credit in computing the GPA. If a student repeats the failed course, the course will appear on the student's transcript twice with the original grade of F recorded and the new grade also recorded. Both grades will be counted in determining all applicable quality of work requirements. Multiple failures in the same course all count in the GPA and will appear on a student's permanent records. See retaking a course at UW-Madison (https://kb.wisc.edu/ls/21853/) for more details.

A course failed in residence at UW-Madison may be repeated for credit at any other educational institution. However, the new grade earned out of residence will not have an impact on the student's UW-Madison GPA.

## GRADE CHANGES (P. )

A change of grade is allowed only if there has been a clerical error. If an L\&S undergraduate student believes a clerical error has been made in the awarding of the final grade for a course, the student should first meet with the instructor of the course to determine whether such an error has occurred.

## GRADE APPEALS

L\&S departments are required to have a written policy and process regarding grade appeals. Students who believe they have been unfairly graded in a course and wish to appeal should follow the appeal procedure established by the department in which the course grade was given. See process for appealing a grade in an L\&S course (https://kb.wisc.edu/ls/ page.php?id=28334) for more information.

## INCOMPLETES (P. )

A grade of incomplete (I) may be reported for a student who has been enrolled in a course with a passing grade until near the end of the semester/term and then, due to illness or some other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination (or to complete some limited amount of term work). An Incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending
as indicated above. In the absence of such proof the grade reported will be an F. Even when a student can provide verifiable documentation, a student may still earn a grade of $F$ if the quality of the student's work convinces the instructor that the student cannot successfully pass the course.

Any subject taken by an L\&S undergraduate student marked Incomplete must be completed by the end of the fourth week of classes of the student's next semester/term in residence at the University (exclusive of summer sessions) or it will lapse into a Failure. If an instructor grants an extended incomplete (EI), a grade change will need to be filed by the instructor, approved by the chairperson of the department, and forwarded to L\&S Undergraduate Academic Deans' Services in 110 Ingraham Hall. In such cases the grade of I is replaced with the grade of extended incomplete (EI).

NOTE: Extended Incompletes (EI) must be removed and replaced with the final grade by the last day of classes prior to the start of final exams or they will lapse into
Failures. The last day of classes is defined as the last day of instruction for a given term prior to the start of study day and final exams.

Incompletes incurred in the last semester in residence at UWMadison may not be removed after five years of absence from the University without special advance permission from L\&S Undergraduate Academic Deans' Services. Such Incompletes must remain on the record with grades of permanent incomplete ( PI ) and do not lapse into failures.

If a student enrolls with an Incomplete grade from a previous semester and is dropped later in the term because the Incomplete has lapsed to an F or has been changed to a low grade, the student will be withdrawn with an effective date within the refund period closest to the time of the student's actual withdrawal if the student has not been granted permission to continue by an L\&S academic dean.

For further information, see UW-Madison incomplete (I) grade information (https://kb.wisc.edu/ls/page.php?id=21330) on the L\&S website and incompletes (https://registrar.wisc.edu/ incompletes/) on the registrar's website.

## NO WORK (NW) (P. )

Students will receive a grade of No Work (NW) on their official records if they enrolled in a course and then never attended. Instructors may award this grade only when the instructor has no evidence that the student ever attended or submitted any work. Any student who does attend for part of the semester/ term and then stops participating is not eligible to receive a grade of NW. The No Work notation does not have an impact on a student's semester/term or cumulative GPA. For more information, see valid instructor assigned grades (http:// registrar.wisc.edu/valid_instructor_assigned_grades.htm).

A course failed in residence at UW-Madison may be repeated for credit at any other educational institution; however the new grade earned out of residence will not have an impact on the student's UW-Madison grade point average (GPA).

PASS/FAIL (S/U) (P. )
Any L\&S undergraduate student in good academic standing is eligible to take one (1) course per term/semester on a pass/ fail (S/U) basis and a maximum of sixteen (16) credits during their entire undergraduate career.

Any student who takes a pass/fail course must earn at least a $C$ to receive credit for the course. Final grades for these courses will be indicated as satisfactory (S) or unsatisfactory (U) without any computation of grade points for those courses into the semester or cumulative grade point average. The grade of $S$ shall be recorded by the registrar in place of instructors' grades of $A, A B, B, B C$, or $C$. The grade of $U$ will be recorded by the Registrar's Office in place of instructors' grades of $D$ or $F$. Neither the $S$ nor the $U$ is used in computing the grade point average. The pass/fail option is the student's choice and the instructor reports the grade without knowing whether or not the student is taking the course on a pass/fail basis.

For more information, see taking a UW-Madison course pass/ fail (https://kb.wisc.edu/ls/page.php?id=21102).

## Notes:

- First-semester freshmen and transfer students without an established UW-Madison GPA are eligible to take one (1) course for pass/fail in their first term at UW-Madison. Summer sessions collectively count as a single term. Thus, a student can only take one (1) course on a pass/fail basis during the summer.
- Students must submit (or cancel) pass/fail requests via their Student Center link (https:// my.wisc.edu/) by the end of the fourth (4th) week of fall and spring terms. (For modular and summer session courses, pass/fail requests must be submitted by the Friday of the week in which the session is one-fourth completed).
- Students may not cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.
- All requests to add or cancel pass/fail must be submitted via the Course Change request in the Student Center by the appropriate deadline.
- For more information about the pass/fail process, refer to Pass/Fail Option (http://registrar.wisc.edu/ pass_fail_option.htm).

## - Students cannot cancel a Pass/Fail request after the deadline if they need the course(s) to fulfill a major or degree requirement at a later date. It is the student's responsibility to determine whether or not they can take a course on a pass/fail basis.

- Pass/Fail and Course Change Requests can be accessed through a student's Student Center in My UW-Madison (http://my.wisc.edu/) by clicking Course Change Request via Course Enrollment, Term Information. For more information about requesting the pass/fail option, refer to pass/fail option (https://registrar.wisc.edu/pass-fail-option/) on the Registrar's Office website.
- Only elective work may be carried on a pass/fail basis. Thus, pass/fail cannot be declared or used to fulfill the following requirements:
- Breadth (humanities, literature, social science, natural science)
- Foreign language (prior to fulfilling the B.A. or B.S. foreign language requirement)
- Math
- Ethnic Studies
- General Education Requirements (Comm A, Comm B, QR A, QR B)
- Major requirements
- Senior Thesis coursework (i.e., 681 682, 691, 692)
- L\&S undergraduates may take courses in their major or major department for pass/fail. However, any coursework taken for pass/fail in the major or major department will not count toward fulfilling any requirements. Students are strongly encouraged not to take coursework in their major program without first consulting with their undergraduate advisor.

For further information, see https://deans.ls.wisc.edu/policies-forms/pass-fail/.

## QUESTION (Q) (P. )

A "Q" grade is assigned by an instructor when there is a discrepancy between the work completed by a student and the student's official registration. The Office of the Registrar (https://registrar.wisc.edu/) will post the temporary Q grade/ mark to a student's record until the discrepancy is resolved. A student will receive a $Q$ in one of three situations:

- a student registers for a variable-credit course and completes the work that is appropriate for a different number of credits;
- a student registers for Honors credit and does not complete the Honors portion of the work; and
- a student does not register for Honors but completes the Honors work appropriate for an Honors designation.

In each of the three cases listed above, students will need to work with the instructor to correct the situation before a grade can be reported. The correct grade will need to be forwarded by the instructor to L\&S Undergraduate Academic Deans' Services (https://saa.ls.wisc.edu/offices/academic-deansservices/). For more information, see valid instructor assigned grades (https://registrar.wisc.edu/valid-grades/).

## MAJORS

DECLARING A MAJOR (P. )
A department, program may specify prerequisites for acceptance into a major, such as a minimum grade point average or completion of specific courses with a minimum grade. Students are responsible for reviewing the quality requirements for a particular major or school, as outlined on the program pages listed in the degrees/majors/certificates
(p. 353) section of this Guide. Students not accepted in a major or special degree program must select a different major.

## MANDATORY MAJOR DECLARATION POLICY

Students must declare a major through the department or unit administering that program. (Please note that all L\&S undergraduate students are required to declare at least one L\&S major by the time they have 86 degree credits.) Students should speak with the advisor for the major/certificate/l degree program to determine their eligibility to declare and the process for declaring the major. If a student does not plan on completing the requirements for a declared major, the student must cancel the major. There is no limit to the number of majors an L\&S undergraduate students can declare. Additional information can be found at how to declare a major in L\&S (https://deans.Is.wisc.edu/declaring-a-major-for-students-in-the-college-of-letters-science-ls/).

## COMPLETING AN L\&S MAJOR WITH A NON-L\&S DEGREE (ADDITIONAL MAJOR/ AMAJ) (P. )

Non-L\&S undergraduate students in other schools/colleges on at UW-Madison (e.g., Business, CALS, Education, Engineering, etc.) are eligible to complete a major in L\&S without having to complete L\&S degree requirements if they receive permission from their home school/college. The process for obtaining special permission to pursue an L\&S major varies based on the student's home school/college. Non-L\&S undergraduate students must contact the appropriate L\&S major department/ unit about the steps they will need to take in order to declare an additional major and fulfill all of the major requirements within the College of Letters \& Science.

## COMPLETING A NON-L\&S MAJOR WITH AN L\&S DEGREE (P.

L\&S undergraduate students must complete at least one (1) L\&S major to earn their L\&S degree. Students may also declare up to one (1) of approved additional major from another UWMadison school/college. These majors are currently approved for L\&S students, with permission from the L\&S Academic Deans Services office:

- Education Studies (https://guide.wisc.edu/ undergraduate/education/educational-policy-studies/education-studies-bs/) (Education)
- Global Health (https://guide.wisc.edu/ undergraduate/agricultural-life-sciences/ entomology/global-health-bs/) (CALS)
- Health Promotion and Health Equity (https:// guide.wisc.edu/undergraduate/education/ kinesiology/health-promo-health-equitybs/) (Education)
- Theatre and Drama (https://guide.wisc.edu/ undergraduate/education/theatre-drama/theatre-drama-bs/) (Education)

The following policies apply to L\&S students with an additional non-L\&S major.

- L\&S undergraduate student must first declare a major in L\&S before being eligible to declare one of the approved non-L\&S majors.
- L\&S undergraduate students may complete these additional majors unless their degree or major explicitly states that their students cannot pursue an additional major or program.
- Students pursuing the Bachelors in Landscape Architecture special degree are not permitted to pursue an additional major.
- A student earning an L\&S undergraduate degree cannot graduate within L\&S with only an approved non-L\&S major.
- L\&S will not delay graduating students who have not completed the requirements for majors outside of L\&S. Thus, students with these additional majors outside L\&S will be graduated at the end of the semester/term in which they complete their L\&S requirements, even if the CALS or School of Education major requirements have not been completed.
- Any courses required for the non-L\&S major that are not designated as Liberal Arts and Science (LAS) courses will not count toward satisfying the requirement that students complete 108 credits in Liberal Arts and Science.

## CANCELING A MAJOR (P. )

Students may cancel a major by contacting the department of that major. A Senior with only one major who cancels that major is still subject to the Mandatory Major Declaration policy above, and should seek permission to cancel their major with Academic Deans Services.

## REQUIREMENTS

Students pursuing an undergraduate degree in Letters \& Science must complete the University General Education Requirements (GER) (p. 32) and the following $L \& S$ requirements:

## L\&S DEGREE REQUIREMENTS

## This page lists the general degree requirements for the Bachelor of Arts (B.A.), Bachelor of Science (B.S.) degrees, Journalism Bachelor of Arts (JBA), and Journalism Bachelor of Science (JBS).

Students must complete at least one L\&S major to earn one of these degrees; please consult the Guide pages for the respective L\&S majors for information about specific major requirements.

Some L\&S degrees have different degree requirements that share some aspects of the requirements described below. Please consult the Guide pages for specific requirements for admission and completion for the Bachelor of Science, Applied Mathematics, Engineering, and Physics, Bachelor of Liberal Studies (online only), Bachelor of Landscape Architecture, Bachelor of Music (in Education and in Performance), and the Bachelor of Social Work.
In L\&S programs, courses may apply to more than one requirement category, unless specifically noted otherwise.

## FOUNDATIONS: TOOLS FOR LEARNING

For all UW-Madison undergraduates, these learning experiences begin with students satisfying the university's General Education Requirements -usually by taking courses taught within the College of Letters \& Science. These common foundations cover key topics which are necessary for any undergraduate major and any prospective career: oral and written communication; mathematical and logical reasoning; and the diversity of cultures within global society.

For more on the General Education Requirements, see Requirements for Undergraduate Study (p. 32).

## Language

The study of a language other than English contributes in an important way to a broad education for today's students, who live in a world where the overwhelming majority of people do not speak or read English and where much of the knowledge that is disseminated may never appear in English. Knowledge of a language other than English is important for an appreciation of the culture of the people using that language, and it also helps students to understand the structure and complexities of their own language. Students with sufficient preparation may be able to use the language for study in their chosen discipline.

To be admitted to the University of Wisconsin-Madison, students must have completed the second-year level of a single language other than English (or American Sign Language) in high school. On rare occasions, students may be admitted with a language deficiency, but they will be required to make up that deficiency by the time they earn their 60th degree credit, or they will not be allowed to continue.

## Language Requirement:

All students working for a B.A. or B.S. degree in the College of Letters \& Science must fulfill the language requirement (previously known as the "Foreign Language Requirement").

## B.A. Degree

For the B.A. degree, the foreign language requirement may be met in one of two ways: (1) completion of the fourth unit (level) in one language, or (2) completion of the third unit (level) in one language and completion of the second unit (level) in another language.

## B.S. Degree

For the B.S. degree, the foreign language requirement may be met by completion of the third level (unit) of a foreign language in high school, or the equivalent third-semester-level college work.

## Language Substitution:

The Foreign Language Substitution Package is for degree-seeking candidates in the College of Letters \& Science (L\&S) only who are seeking to fulfill the L\&S foreign language requirements and also have a documented disability in secondary or additional language acquisitionin foreign language acquisition. Specifically, the Foreign Language Substitution Package, like the foreign language requirement, provides students with information about language in general as well as the literature and culture of the people using a particular language. Courses used to meet the substitution must be approved by the designated academic dean in L\&S Undergraduate Academic Deans' Services (101 Ingraham Hall (https://saa.ls.wisc.edu/offices/academic-deans-services/)). Classes used for the substitution package cannot be used to fulfill any of the following requirements:

- University General Education Requirements
- L\&S Breadth
- Major Requirements

For more detailed information about applying for the substitution package, please see L\&S language substitution (https://kb.wisc.edu/ls/84515/).

## Mathematics

Mathematics is a principal tool of knowledge. Algebra and geometry provide the minimum of mathematics skills that an educated person needs in today's world, and competence in these areas is required for admission to the university. Since mathematics underlies quantitative work in all sciences, and the level of mathematical background required has been steadily increasing in most areas of science, the L\&S math requirements should be viewed as minimums. Students whose placement scores place them in MATH 96 must complete it before enrolling in any Quantitative Reasoning A course.

## B.A. Degree

The B.A. requires completion of the University General Education Requirements for Quantitative Reasoning A and Quantitative Reasoning B.

## B.S. Degree

The B.S. degree requires two courses of at least three credits (each) at the Intermediate or Advanced level in MATH (http:// guide.wisc.edu/courses/math/), COMP SCI (http://guide.wisc.edu/ courses/comp_sci/), or STAT (http://guide.wisc.edu/courses/ stat/). Of the two courses, only one (1) course in COMP SCI and only one (1) course in STAT may count toward the B.S. mathematics requirement.

## BREADTH: EXPLORATION IN THE LIBERAL ARTS AND SCIENCES

## Ways of Knowing

At the heart of any degree in the liberal arts and sciences is an active understanding of the variety and breadth of the many scholarly approaches to knowing the world. Every student in the College of Letters \& Science experiences significant exposure to three principal fields of knowledge: the arts and humanities, the social sciences, and the natural sciences. These broad fields of knowledge are not the same as the areas of depth that we call "majors." In fact, any particular major-or even a particular course within a major-might well involve more than one of these fields of knowledge. (For example, imagine a seminar on "people and the environment" that combines historical background, research on social patterns of energy use, and scientific understanding of climate.) Working together, each of these three fields of knowledge represents a particular "way of knowing" about the world around us.

## Arts and Humanities

Courses in the arts and humanities involve knowing the world through the production and analysis of artistic, literary, and scholarly work. Some courses examine the fine and performing arts, or literature, presenting students with opportunities to interpret and think critically about these creative expressions of the human condition. Other courses help students to understand and compare religious and philosophical conceptions of humankind. Still other courses take on historical subjects, focusing on moments of change and periods of continuity for the peoples and regions of the world. These courses all encourage students to analyze the range of creative and cultural artifacts, expressions, and ideas of human existence -history, literature, art, culture, folklore-and to use that information to better understand humanity and to cultivate civic and social responsibility.

## Social Sciences

Courses in the social sciences involve knowing the world through the systematic study of human society, interactions, and institutions. The social sciences explore these issues from a wide range of perspectives and research techniques, both quantitative and qualitative. Through these courses students learn how to formulate research questions and determine what techniques are best used to answer those questions -for example, exploring ideas and developing theories, conducting surveys and building models, or observing and participating in social life itself. Developing such analytical skills assists students as they approach complex problems and seek to solve them in both the workplace and the community.

## Natural Sciences

Courses in the natural sciences involve knowing the world through scientific inquiry-assembling objective information that can be used to explain observed natural phenomena in a way that is thorough and verifiable. The natural sciences are often divided into the physical sciences (dealing with matter and energy, or the study of the earth, atmosphere, and oceans) and the biological sciences (dealing with life and living systems, like plants, animals, and environments). These courses often contain laboratory components that allow students to gain firsthand experience in scientific research methods. By completing this requirement, science and non-science majors alike will gain an appreciation for science as a way of systematically looking at the natural world, understanding how this process can be used to inform decision-making in a wide range of political, economic, and social contexts.

Together, these broad "ways of knowing" give students a complementary set of tools for seeing, imagining, and asking questions about the worldtools that enhance creative problem solving no matter what the field. And, because twenty-first-century knowledge is not neatly compartmentalized, it is worth noting that these areas of study intersect and overlap; courses in some areas draw upon strategies used in the others. Experiences in "breadth" courses can be life-changing: we frequently hear that a course taken to fulfill a breadth requirement introduced someone to a subject that became a new major, a new way of looking at a current major, or a lifelong interest. For more information, visit the KnowledgeBase help document (https://kb.wisc.edu/ls/page.php?id=27031).

A liberal education involves not only the nature and kinds of knowledge but also the purpose for which knowledge should be used. These considerations are embodied in the breadth or distribution requirement and call for knowledge in several fields of learning. The purpose of this breadth requirement is to ensure that a degree candidate will obtain an understanding of approaches in the humanities, social sciences, biological sciences, and physical sciences adequate for use both as a citizen and as a specialist.

## Breadth Requirements

The L\&S breadth requirement is met with 36 credits in the three broad areas of knowledge described above: humanities, social sciences, and natural sciences. Look in the courses section (http://guide.wisc.edu/ courses/) of the Guide under Course Designation to see what breadth designation courses have.

## B.A. Degree

Humanities: Students are required to complete 12 credits in the humanities, 6 of which must be in literature.
Social Sciences: Students are required to complete 12 credits in social sciences.
Natural Sciences: Students are required to complete 12 credits in natural sciences. Students must take at least one 3+ credit course
in biological science AND one 3+ credit course in physical science. The remaining six (6) credits can be any combination of natural, biological, or physical science credits.

## B.S. Degree

Humanities: Students are required to complete 12 credits in the humanities, 6 of which must be in literature.
Social Sciences: Students are required to complete 12 credits in social sciences.
Natural Sciences: Students are required to complete 12 credits in natural sciences. Students must complete 6 credits in biological science AND 6 credits in physical science.

## DEPTH

## Mastery of Intermediate/Advanced Work

Students must complete a minimum of 60 credits in courses with the Intermediate or Advanced level designation. The purpose of this requirement is to encourage students to undertake advanced work to the greatest possible extent and to ensure that they achieve greater sophistication and a deeper mastery of subject matter as they advance through the baccalaureate curriculum.

## Understanding a Field of Study (Major)

The process of declaring and completing a major provides students with an opportunity to concentrate on an in-depth investigation of at least one subject or issue, putting their tools for learning and ways of knowing to focused use. This intensive understanding of one topic helps students to appreciate the potential depth of the others. A student's work in the major reflects a continuing progression of skills, knowledge, and values, where advanced learning opportunities in upper-level coursework grow from and expand upon earlier experiences, helping students build additional depth in writing, speaking, information literacy, and critical thinking skills from the perspective of a particular discipline. In senior capstone or independent research projects, students are frequently asked to synthesize what they have learned and apply it in a variety of new situations. By the conclusion of their studies, students in the major are better able to understand themselves and their society, to develop their intellectual powers outside of a university setting, and to make productive contributions to the world around them. (See list of L\&S majors. (p. 353))

Every candidate for an L\&S baccalaureate degree must complete a specified and approved L\&S major field of study. Students may elect a department major, a major in a recognized interdisciplinary program, or may develop an individual major if approved by a faculty review committee.

## Declaring a Major or Degree

A department, program, or school may specify prerequisites for declaration into a major, such as a minimum grade point average or completion of specific courses with a minimum grade. Students should review the requirements for a particular major or degree program as outlined under the L\&S majors ( $p$. 353) section of the Guide and consult the major advisor for information. Only the department or school can make an exception to declaration requirements. Students not accepted in a major or school must select a different major.

## Requirements that Apply to All Majors

## Mastery of Upper-Level Work in the Major

All students must complete in residence a minimum of 15 credits of major course work defined as "upper-level" by the major department or program. (Please see the section on Residence Requirements below for additional information about credits taken "in residence.")

## Residence Requirement in the Major

All students must complete at least 15 credits in the major, at any level, on campus (not through a UW-Madison study abroad program). This includes courses offered by a UW-Madison instructor in hybrid and online modes of instruction.

## TOTAL CREDITS

A minimum of 120 degree credits is required for all baccalaureate degrees granted by the College of Letters \& Science. The total credits for the degree encompass the requirements detailed above, but also include elective credits not associated with any specific requirement, that allow students to explore other areas of academic interest.. Refer to the information in the Majors and Certificates section of the L\&S Guide for information about the minimum degree credits required.

## Liberal Arts and Science Credits: 108

Of the minimum 120 credits required for graduation for a B.A. or B.S. degree at least 108 credits must be in courses designated as Liberal Arts and Science (LAS) courses. These courses appear in the Guide as L\&S credit and can be identified by looking at the course designation section for a course in the Guide.

Courses that have been approved as Liberal Arts and Science (LAS) classes are expected to encourage students in one or more of the three "habits of the mind" of liberal arts education, as specified by the College of Letters \& Science. These include:

- skilled written and verbal communication, excelling in formulating and expressing a point of view; reflecting and questioning current knowledge through reading; research and consideration of the views of others.
- the ability to draw flexibly upon and apply the modes of thought of the major areas of knowledge.
- knowledge of our basic cultural heritage as a multifaceted and often contested history.

For more information, refer to criteria for Liberal Arts and Science Courses (https://kb.wisc.edu/ls/page.php?id=43819).

## RESIDENCE

## Residence Requirement in the Degree

All L\&S students must earn a minimum of 30 degree credits in residence at the University of Wisconsin-Madison. A course is considered in residence if the student enrolls for credit through UW-Madison. This would include any course that is completed:

- at UW-Madison, in any instructional mode (in-person, online, or hybrid)
- through a UW-Madison administered program, either domestically or internationally (i.e., Study Abroad through International Academic Programs)

A course is not in residence when credit is earned through:

- another accredited institution of higher learning
- study abroad credit, if administered by an institution other than UW-Madison
- examination, such Advanced Placement (AP), International Baccalaureate (IB), or other approved exams
- retroactive language credit.

UW-Extension and other campuses in the University of Wisconsin System are different institutions and credit earned at any of these campuses is considered transfer credit and not in residence.

## Senior Residence Rule

The 30 minimum credits a student must earn in residence should be completed in the senior year (after a student has completed 86 degree credits). This requirement intends to ensure that the student's depth of study -- which should occur in more advanced-level courses, within the major, with faculty instruction, and in areas of research -- are distinctly UW-Madison experiences. These credits do not have to be contiguous for the requirement to be met.

## QUALITY OF WORK

A student's overall quality of work and their quality of work in their chosen major are important measures of a student's mastery of knowledge. The $L \& S$ quality of work requirements are all computed on courses taken in residence only, and set a minimum 2.000 GPA in four specific areas:

- University GPA, computed using all courses taken for a grade at UW-Madison
- Mastery of Intermediate/Advanced work in LAS courses, computed using all graded courses designated as LAS and as either Intermediate or Advanced level
- Major GPA, which is computed using all courses in each declared major and all courses in the subject of that major (if applicable)
- Upper-Level work in the Major, which is computed using all courses designated as upper-level in each declared major

For the University GPA, all graded courses compute into this grade point average, including courses that are failed and those that were repeated without credit.
For the other three L\&S GPA, all graded courses, including courses that are failed, compute into the grade point average, except for nonrepeatable courses for which credit has already been earned; these courses are considered be taken on a "refresher basis" and do not calculate into any GPA, except for the University GPA. See Repeat of Courses Not for Credit (p. ) in Policies \& Regulations for more information.

## RESOURCES

## ADVISING IN LETTERS \& SCIENCE

Academic advising is an essential component of undergraduate education, and the college's commitment to providing quality advising for undergraduates is reflected in the many advising programs it offers. Students who have not yet declared a major are assigned an advisor in L\&S Academic Advising Services Services or the Cross-College Advising Service (see below). Students who have declared a major are assigned an advisor in their department or program.

All of the advising programs share the goal of assisting students in making responsible, informed decisions as they develop educational plans compatible with their potential, their interests, and their career and life ambitions. Advisors provide much more than information about course selection and academic programs; they encourage students to ask questions about the nature and direction of their learning, and they work with students to find meaningful answers to those questions. Advising involves a process in which students learn to think critically about the variety of options available to them and develop decision-making skills
that will enable them to choose wisely. As adults, students themselves, however, must assume primary responsibility for choosing their academic program and making progress toward their degree.

## ACADEMIC ADVISING SERVICES (AAS)

L\&S Academic Advising Services (https://advising.Is.wisc.edu/) provides advising to undergraduate students who intend to complete a specific $L \& S$ degree, before they have declared a major.

We assist and support students in exploring their educational goals, learning about academic requirements, navigating the university structure, and progressing toward degree completion.

## CROSS-COLLEGE ADVISING SERVICES (CCAS)

Advisors at the Cross-College Advising Service (CCAS) provide personalized advising to help you develop a plan for choosing your major and exploring careers. We are here to help you make decisions about what to major in and also answer your general questions about academics and life on campus.

We'll meet you at SOAR, and after that help you plan your future courses, talk about your academic interests and options, and refer you to other helpful campus resources. We're also here to encourage you when things are going well, as well as support you when times are difficult.

## CENTER FOR ACADEMIC EXCELLENCE (CAE)

The Center for Academic Excellence (https://cae.Is.wisc.edu/) provides an enriching, inclusive community and academic support for L\&S students who have been historically underrepresented in higher education. CAE offers a variety of engagement opportunities, including advising, tutoring programs, health and wellness events, social events, graduate school preparation, and connections with learning communities.

## HONORS

The L\&S Honors Program (https://honors.ls.wisc.edu/) attracts some of UW-Madison's most talented undergraduates who challenge and learn from each other while working closely with faculty members. By bringing students and professors closer together in small classes and individual research settings, the Honors Program fosters a feeling of community even as students push themselves to explore the very frontiers of knowledge. In addition to traditional course work, most Honors students pursue research projects of their own, and many find this experience so exciting that they go on to earn advanced degrees in the nation's best graduate and professional schools.

## MAJOR ADVISING

Students who are eligible to declare their major should do so as soon as possible. All L\&S undergraduate students are expected to declare a major by the time they have earned 86 degree credits. All declared students will be advised by the advisor connected with their particular major/program. For more information about advising in the major, refer to the advising and careers tab for each major/special degree program under the L\&S Degrees/Majors/Certificates (p. 353) section of the Guide.

## OTHER ACADEMIC RESOURCES <br> L\&S UNDERGRADUATE ACADEMIC DEANS' SERVICES

L\&S Undergraduate Academic Deans' Services (https:// deans.ls.wisc.edu/) provide up-to-date information on college policies, procedures, and deadlines; campus resources; and
degree requirements. Academic deans also offer limited academic advising and make decisions regarding exceptions to college policy. They work closely with advising staff in L\&S Academic Advising Services, major advisors, and other student service personnel on the UW-Madison campus. In an institution as diverse as the University of Wisconsin-Madison, students have a wide range of values, interests, and skills. Moreover, as they progress through an academic program, their questions and concerns often change. Therefore, students are encouraged to seek the help of several different types of academic advisors during their years on campus. The university provides a system of staff and faculty advisors to address these ongoing and changing concerns.

## ADVISING IN THE MAJOR

Juniors, seniors, and any other students who are preparing for, or have declared, a major or are contemplating a major in the College of Letters \& Science, are encouraged to meet with an advisor in that major department. Each department has a faculty or staff member who serves as a major advisor. This person knows about prerequisites to courses, program planning for students majoring in the department, major requirements, and in some cases, general career information related to the field. A major advisor can help students make satisfactory progress toward completing requirements in the major, and can suggest courses that address students' interests and help them achieve their goals.

Juniors and seniors are encouraged to seek advice from these major advisors as soon as possible. Please note that the assignment of a major advisor and declaring a major in a particular department(s) are not automatic. Students must reach out to the major advisor to declare their desired L\&S major. Students are also advised to meet with the major's advisors early in their academic career since some majors require students to fulfill prerequisite classes and earn a minimum GPA in the designated coursework before they are eligible to declare the specific major. It is very important that students contact the major department(s) as early as possible so they are aware of any prerequisites.

Transfer students often come to the campus knowing their intended major. These students may go directly to the major advisors for any help they need in pursuing/declaring the major.

Students classified in any of the special degree programs (Applied Mathematics, Engineering and Physics, Journalism, Landscape Architecture, Music: Education, Music: Performance, Social Work) may refer to the specific special degree under Degree/Majors/Certificate (p. 353) tab within this Guide for major advisor information, then consult with the appropriate advisor.

Students pursuing Honors in the Major are encouraged to work closely with the honors coordinator in their major department regarding course and research opportunities within the department or field of interest. Special major advisors are available to help any students, primarily sophomores, juniors, and seniors, who have decided on their major. These advisors are located in department offices throughout the campus. Office hours vary among departments. Consult individual majors and departments for a list of offices and locations, or see the department descriptions in this Guide (https://guide.wisc.edu/undergraduate/lettersscience/\#degreesmajorscertificatestext).

## INTERNATIONAL INTERNSHIP PROGRAM (IIP)

The International Internship Program (IIP) (https:// internships.international.wisc.edu/) at UW-Madison is a resource for undergraduate students from all disciplines seeking to gain hands-on international experience. IIP's mission is to identify, cultivate and promote high-quality internships that advance the professional training of UWMadison undergraduate students; foster global competency; and reinforce academic learning through practical application.

IIP cultivates internship opportunities around the world specifically for Badgers. IIP also identifies and promotes existing international internship and research opportunities offered by other campus offices or international organizations. Both types of opportunities can be found via the IIP database and other search resources are also listed on the website. IIP offers advising for any undergraduates who are exploring internships abroad whether they are just getting started, applying to an IIP-cultivated position, or finding their own. IIP can help with the many questions that come up related to international internships including visas, agreements, academic credit, and scholarships.

The Worldwide Internship Program (WIP) (https://studyabroad.wisc.edu/ program/?programld=343), a collaboration between International Academic Programs (IAP) and the International Internship Program (IIP) (https://internships.international.wisc.edu/), allows UW-Madison undergraduates to earn academic credit for an internship located outside the US. This program is open to students from any major. Internships are located in many countries and types of organizations (companies, nonprofit organizations, government agencies, research centers, etc).

An international internship is often located outside the United States, but IIP also promotes internship opportunities to apply international skills and interests domestically. There are many variables in international internships (compensation, duration, location, fees, credit and more) that IIP can help navigate.

For more information on interning abroad visit International Internship Program (https://internships.international.wisc.edu/).

## PRE-PROFESSIONAL STUDY

General information can be found at Pre-Law (https://prelaw.wisc.edu/) and Pre-Health (https://prehealth.wisc.edu/).

## SCHOLARSHIPS

The College of Letters \& Science welcomes incoming and continuing students to apply for scholarship opportunities created by the support of our donor friends. The undergraduate scholarships program provides support to students who intend to receive a degree from the College of Letters \& Science. With over 63 majors and special degree programs which include journalism, landscape architecture, music, social work, and applied mathematics, engineering, and physics (p. 353), the College of Letters \& Science strongly supports the role of a broad and deeply educated citizenry. L\&S graduates use this strong foundation to flourish in their chosen careers (http://Is.wisc.edu/about/lsci/? $p=$ careerinitiative.html). For more information, see overview of scholarships (http://scholarships.ls.wisc.edu/).

Career advising and development for students and alumni in L\&S
Undergraduate Research Scholars (URS) (https://urs.Is.wisc.edu/)
Helps first- and second-year undergraduates get hands-on experience in research

## STUDY ABROAD

About 25\% of undergraduates make study abroad an integral part of their UW-Madison experience.

International Academic Programs (IAP) (https://studyabroad.wisc.edu/ overview/) at UW-Madison offers over 200 study abroad options in about 60 countries on 6 continents. In addition to taking the opportunity to learn new languages, understand new cultures and see the world, UW-Madison students study abroad to complement their on-campus academic goals, strengthen their professional potential and enrich their personal lives.

Students of all academic levels and majors study abroad. While many programs include language training-from the basics to full language immersion-most IAP programs have no language requirement and include courses taught in English.

All courses taken abroad through IAP count as "in-residence" credit, just like taking courses on campus at UW-Madison, so students advance toward their degrees while abroad. And study abroad isn't limited to
classroom experience. Many students also complete internships, do research, fieldwork and service learning.

In addition to resources on health, safety, academic planning and other aspects, UW-Madison students receive the information and guidance they need to plan a study abroad experiences that fits their budgets. Many study abroad programs cost about the same or less than studying on campus, and student financial aid can be applied in most cases.

## SUCCESSWORKS

SuccessWorks (https://successworks.wisc.edu/) helps students build a bridge from the academic skills learned in the classroom to the internships that inspire them and the jobs they dream of starting after graduation.

In addition to providing basic career support like resume reviews and interview practice, SuccessWorks offers students ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

SuccessWorks Career Communities (https://successworks.wisc.edu/what-are-career-communities/) encourage students to explore jobs and fields where alumni have built fulfilling careers, then dive deep into building skills and experiences once they have discovered the right path - or paths - for them. Each Career Community connects students to expert one-on-one advising, plus a network of supportive alumni mentors and highly engaged employers seeking to hire L\&S students for jobs and internships. Through Career Communities, students take advantage of experience-based programs that help them build skills and try out different occupations with real employers.

SuccessWorks recognizes students don't need to have it all figured out right away. They're here to help students take their first steps, then craft their unique paths toward a lifetime of success. It's never too early to get inspired and get started!

## UNDERGRADUATE RESEARCH SCHOLARS PROGRAM

The Undergraduate Research Scholars program (https://urs.Is.wisc.edu/) (URS) is dedicated to enhancing the academic experience of UWMadison students by providing first- and second-year undergraduates with opportunities to earn credit for participating in the research and creative work with UW-Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities.

## HONORS

## L\&S HONORS PROGRAM

The College of Letters \& Science Honors Program seeks to provide students with a small, liberal arts college experience within this large university. The Honors Program is home to more than 1,600 motivated, curious and high-achieving students, all pursuing one of three degree tracks: Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors-the highest undergraduate degree awarded by the college. In addition to an enhanced curriculum that offers small, faculty-led courses, the program also offers academic advising services; grants, scholarships, and awards; and many professional development and co-curricular opportunities. Events, term-specific deadlines, course descriptions for
the upcoming semester and much more can be found on the L\&S Honors Program website (http://honors.ls.wisc.edu/). We welcome inquiries via phone at 608-262-2984. The L\&S Honors Program is located in the historic Washburn Observatory at 1401 Observatory Drive in Madison, WI 53706.

## HOW TO GET IN

Students may apply to enter the L\&S Honors Program in any semester of their undergraduate careers. Any UW-Madison Honors credits earned before admission to the Honors Program may be applied toward Honors degree requirements. Eligibility criteria and admissions procedures differ for the different Honors degrees.

## ADMISSION TO HONORS IN THE LIBERAL ARTS (HLA)

To become a candidate for the Honors in the Liberal Arts degree, a student must apply directly to the L\&S Honors Program. Students may apply at any point in their undergraduate careers provided they meet the eligibility requirements described below.

All students admitted to the university and to the College of Letters \& Science are invited to apply to be considered for admission to the Honors Program to pursue the Honors in the Liberal Arts degree. Interested students can apply via an online application form. L\&S admitted students receive an invitation message by email that contains the URL to the online application. Admission to the program is competitive, and space is limited.

Continuing and transfer students with a cumulative grade point average of 3.300 or above who are currently enrolled at UW-Madison or who are transferring to UW-Madison from another college or university may apply to the L\&S Honors Program at any time. Applications are available from the Honors Program website (http://honors.ls.wisc.edu/) and admission decisions are usually made within three weeks of submission of the completed application and supporting materials. While continuing or transfer students having 60 or more credits at the time of application to the Honors Program are eligible to participate in the Honors in the Liberal Arts (HLA) degree track, they are encouraged to consider Honors in the Major (HM) as an option (see below), since they may find it difficult to complete the HLA degree requirements if beginning that program in the junior or senior year.

## ADMISSION TO HONORS IN THE MAJOR (HM)

Students interested in pursuing an Honors in the Major degree are encouraged to consult the department listings (p.353) in this Guide and speak with the department's academic advisors, who will be able to explain admissions procedures and requirements for the degree. After officially declaring the major and receiving authorization from the department to declare Honors in the Major, students must complete an online Honors in the Major Declaration Form to the Honors Program office.

## REQUIREMENTS

Honors may be earned in any L\&S undergraduate degree (Bachelor of Arts; Bachelor of Science; Bachelor of Science-Applied Mathematics, Engineering, and Physics; Bachelor of Arts-Journalism or Bachelor of Science-Journalism; Bachelor of Landscape Architecture; Bachelor of Music; and Bachelor of Social Work). For students who complete the requirements, Honors will appear on diplomas and transcripts (for example, B.A. with Honors in the Liberal Arts or B.S. with Honors in the Major).

## HONORS IN THE LIBERAL ARTS (HLA)

Honors in the Liberal Arts is often the primary focus for most first- and second-year Honors students. It requires students earn Honors credits in a breadth of disciplines and is meant to enrich and enhance a student's academic experience outside of the major. Students who complete this curriculum develop strong skills in communication, critical thinking and complex problem solving, which will serve them well regardless of career path. The specific requirements for the HLA degree are:

1. completion of the L\&S general degree requirements;
2. a cumulative grade point average of at least 3.300;
3. completion of at least 24 credits in Honors courses with grades of $B$ or better;
4. of the 24 Honors credits, at least 6 must be in the humanities, 6 in the social sciences, and 6 in the natural sciences; and
5. of the 24 Honors credits, at least 15 must be "Automatic Honors" credits-that is, in courses that carry the "Honors Only" or "Accelerated Honors" designations in the Course Guide (http:// public.my.wisc.edu/).

## HONORS IN THE MAJOR (HM)

Most majors in the College of Letters \& Science offer students the option of pursuing Honors in the Major. A student may formally declare their intent to earn Honors in the Major, if available, after declaring the major. Honors in the Major requirements can be completed independently from Honors in the Liberal Arts; they may also be completed in conjunction with Honors in the Liberal Arts (which would result in a Comprehensive Honors degree). Each academic department and program in the college, with approval of the Faculty Honors Committee, establishes its own requirements for the Honors in the Major degree. Honors in the Major is intended for students who are interested in original research and who wish to graduate with the best possible undergraduate training in the discipline. Honors in the Major is especially appropriate for students who are considering graduate work, or who want a particularly rigorous training in research, reasoning, and writing skills useful to a wide range of career choices.

Although many of the specific requirements for HM vary by department, all students pursuing Honors in the Major must:

1. complete the $L \& S$ general degree requirements, if an $L \& S$ degree candidate ${ }^{1}$;
2. complete the regular major requirements;
3. obtain an overall cumulative grade point average of at least 3.300;
4. earn a grade of $B$ or better in all courses counting towards Honors in the Major requirements; and
5. successfully complete a capstone experience during their senior year, typically a Senior Honors Thesis (see below for more information).

1
Non-L\&S degree candidates may pursue Honors in the Major, but will not receive an L\&S degree.

In addition to these collegewide requirements, Honors in the Major students may be required to complete additional upper-level, Honors coursework; participate in department research colloquia; and meet a minimum grade point average in all classes in the major (typically between 3.300 and 3.500 ).

As mentioned above, most departments require a Senior Honors Thesis as the culmination of their Honors in the Major curriculum. In departments
for which a research thesis is not the most appropriate capstone, an alternative such as a performance, a professional practicum, or a major piece of creative writing may be required instead. The two-semester Honors thesis or capstone project is often the most challenging part of the Honors in the Major experience, and for most students it also proves to be the most rewarding. The Senior Honors Thesis is a two-semester (or summer and semester) effort; students first enroll in Senior Honors Thesis 681, followed the next term by Senior Honors Thesis 682 (some departments may use different numeric designations for Senior Honors Thesis options). These two courses may not be taken concurrently. The final grade for the entire thesis is assigned after 682 has been completed.

Students who intend to complete Honors in the Major and write a Senior Honors Thesis should consult with department advisors as early as possible. They are also strongly encouraged to begin working with a faculty advisor no later than the beginning of the junior year in order to formulate a research topic, which will enhance the student's potential for success in research grant funding cycles for their senior year. Some departments offer special courses designed to facilitate the organization, planning, and execution of Honors thesis projects. Other departments encourage (and some require) students to take a directed study or tutorial course with the thesis advisor sometime during the junior year. Students who receive funding from the L\&S Honors Program for their thesis research should submit an unbound copy of their thesis to the Honors Program Office.

Students pursuing Honors in the Major in two majors may apply for Dual Thesis Authorization, which will allow them to write one interdisciplinary thesis to satisfy both major capstone requirements. Please see the Honors Program to learn more about the application process prior to enrolling in the 681 course.

Prior authorization is needed when students intend to complete either 681 or 682 while away from UW-Madison. Consult with the Honors Program if this is your intention.

## COMPREHENSIVE HONORS

Students who complete the requirements for both Honors in the Liberal Arts and Honors in the Major in at least one department or program earn Comprehensive Honors, the highest undergraduate degree awarded by the College.

## HOW TO EARN HONORS CREDIT

There are three unique Honors course designations, each described here:

- "Honors Only" courses are reserved for Honors candidates. They are generally small classes, led by a faculty member and designed for substantive engagement, or discussion sections or labs reserved for Honors students in larger non-Honors lecture courses. The enrollment system will automatically assign Honors credit to all enrolled students.
- "Accelerated Honors" are open to all students. Honors credit is awarded in recognition of the rigor and pace of the course. These Honors courses are often conducted at a faster pace than the nonHonors course counterparts or are upper-level capstone courses in a major that require significant engagement with the course material. As with "Honors Only" designated courses, the enrollment system will automatically assign Honors credit to all enrolled students.
- "Honors Optional" designates courses for which Honors is available through an optional Honors component of the course curriculum. These courses are open to all students for enrollment. Opting into the Honors component of the course is done through the enrollment process. Students enrolled in an "Honors Optional" course are advised to consult with the instructor during the first weeks of the term to
determine the Honors curriculum if it is not outlined on the syllabus. Instructors either have designated Honors curricula or students may be encouraged to develop a project idea of their own. These "Honors Optional" courses are sometimes denoted with the symbol "\%".

When the Schedule of Classes is published for the upcoming term, students can use the Enroll App to identify which courses are being offered for Honors and with which designation. A course being offered for Honors in a past term in no way guarantees that it will be offered for Honors in a future term.

Honors candidates may also earn Honors credit through the following methods:

- Designing and successfully completing an additional Honors project for a course not carrying any of the Honors designations above in the given term. This option requires consent of the instructor and approval of the L\&S Honors Program. To request permission from the Honors Program, students must submit a completed Green Sheet proposal form and all supporting documentation to the Honors Program no later than the sixth week of a regular semester, or the third week of an eight-week summer term. Green Sheets are available on the Honors Program website (https://honors.Is.wisc.edu/). Supporting documentation includes a written plan and timeline for the additional Honors project and a Course Change Request Form. Additional Green Sheet information and the proposal form are available on the Honors Program website (https://honors.ls.wisc.edu/).
- Students who study abroad on a non-Honors study abroad program may petition to have one course per semester abroad count toward Honors requirements. Upon returning from abroad, students are asked to write a petition in which they are required to reflect on the nature of the course taken abroad and explain why the course meets the desired criteria for general Honors credit, Honors breadth credit and/or Automatic Honors credit. For more details about the petition process, please consult the Honors Program website (https:// honors.ls.wisc.edu/).
- Studying abroad in an Honors Study Abroad Program. (Currently programs are available in Ecuador and Utrecht, Netherlands.) Students may earn up to 16 Honors credits. Students receive Honors credit in these cases through the study abroad equivalency process upon their return from abroad.

In all cases, to receive Honors credit in a course, students must earn a final grade of $B$ or higher in that course. If a grade of $B C$ or lower is earned in an Honors course, the Honors notation remains on the student's record, but the course does not count toward Honors degree requirements. If the course is retaken for Honors, regardless of the grade earned during this second attempt, the course cannot satisfy an Honors degree requirement.

Students may not receive Honors credit in courses carried on a pass/fail basis.

## ADVISING AND CAREERS

The University of Wisconsin-Madison can seem overwhelming because of its size and the complexity of its policies and procedures. Academic advisors help students get (and maintain) their bearings on campus. The L\&S Honors Program has a team of specially trained academic and peer advisors who accompany and support Honors candidates as they pursue diverse educational and co-curricular experiences compatible with their long-term goals. Advising occurs through a variety of formats including small group workshops, individual appointments, drop-in hours and email.

Additional information is available on the Honors Program website (http:// honors.ls.wisc.edu/).

The L\&S Honors Program encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L\&S SuccessWorks office to help students leverage the academic skills learned in your major(s) and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters \& Science graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, regardless of major or career goals.

## PEOPLE

Please see the L\&S Honors website (https://honors.ls.wisc.edu/meet-the-honors-team-members/) to find Honors Team Members, including the Director, Associate Directors, Program Administrators, and Academic Advisors.

## POLICIES

## CRITERIA FOR REMAINING IN GOOD

 STANDING IN HLAStudents must obtain a grade point average of 3.300 or higher to be eligible to graduate with an Honors in the Liberal Arts degree. As such, we encourage students to strive for at least this GPA each academic term. The Honors Program advising team will work with students on an improvement plan should their GPA drop below 3.300. Students must also make satisfactory progress toward degree requirements, meaning:

1. successfully complete (grade of B or higher) at least one Honors course (any designation) by the end of the third semester on campus and
2. successfully complete (grade of $B$ or higher) at least two Automatic Honors courses by the end of the fifth semester on campus.

Students may withdraw from HLA at any time by completing an Honors in the Liberal Arts Withdrawal Form, available from the Honors Program office, and submitting it to the Honors Program.

## CRITERIA FOR REMAINING IN GOOD STANDING IN HM

Because each department sets its own criteria for the HM degree program, students are encouraged to work closely with departmental advisors to stay on track towards successful completion. In addition to the criteria established by individual departments, all students must obtain a cumulative grade point average of 3.300 or higher in UWMadison coursework to be eligible to graduate with the Honors in the Major degree. Students may withdraw from HM at any time by submitting an online Honors in the Major Withdrawal Form, available from either the department advisor or the Honors Program office.

## HONORS IN THE INDIVIDUAL MAJOR

To complete the Individual Major with Honors, the student must earn Honors credit in at least 20 of the 36 or more credits comprising the Individual Major and must complete a Senior Honors Thesis of 6-8 credits. Students wishing to complete an Honors in the Major degree with an Individual Major should append to their Individual Major proposal a specific outline of how the Honors in the Major requirements would be met, including appropriate Honors-caliber courses, upper-level seminars, and
a two-semester capstone project, typically a Senior Honors Thesis. The proposal for Honors in the Individual Major will be reviewed by the Honors Program Associate Director for Academic Services. This individual is authorized to determine whether requests for exceptions to the approved HM requirements will be approved.

## HONORS TRANSFER CREDIT

Honors credit earned at other institutions is not currently accepted towards L\&S Honors Program degree requirements.

## GRANTS AND AWARDS

The L\&S Honors Program strives to support Honors students as they pursue original research, study abroad, attend academic conferences, and pursue other endeavors that complement their learning and growth. The following funding opportunities are regularly offered. Please see the L\&S Honors Program website (http://honors.Is.wisc.edu/) for additional opportunities, specific deadlines and additional information about the applications process.

## SOPHOMORE SUMMER HONORS RESEARCH APPRENTICESHIPS

These competitively awarded grants provide funding for Honors students who learn more about the research process by working as research apprentices with UW-Madison faculty. Students may not earn course credit for this work. For past students, these apprenticeships often evolved into paid research positions and/or Senior Honors Thesis projects. Applications for the apprenticeships are submitted and considered early in the spring term.

## TREWARTHA UNDERGRADUATE THESIS RESEARCH AWARD

This grant enables Honors students to undertake more demanding and extensive Honors Senior Thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients receive funds (up to $\$ 1500$ ) to cover travel expenses and other costs needed to complete the research. These resources may enable students to travel to archives or research sites, or to initiate other research activities that require special funding. Each year 12-16 Trewartha awards are granted. Applications for the Trewartha are submitted and considered during the fall term.

## MARK MENSINK HONORS RESEARCH GRANT

The Mark Mensink Honors Research Grant is the L\&S Honors Program's most prestigious grant, awarded in recognition of an exceptional thesis proposal. The purpose of the grant is to enable its recipient to undertake more demanding and extensive Honors senior thesis research than might otherwise be possible due to limited resources or time. Students do not apply specifically for the Mensink award.

## HONORS SUMMER SENIOR THESIS RESEARCH GRANT

These grants enable students to undertake more demanding and extensive senior thesis research projects than might otherwise be possible. Besides recognition of an excellent thesis proposal, grant recipients are awarded a cash stipend of up to $\$ 3000$ to cover research-related expenses. Such resources may enable students to travel to archives or research sites, arrange participant interviews or initiate other research activities that require special funding. Applications for summer research grants are submitted and considered during the spring term.

## LEADERSHIP AWARD

The Leadership Trust Award supports students as they plan, develop and implement projects designed to improve UW-Madison, the community and/or the university student body. Each year, up to two (2) students receive awards equal to two (2) semesters of resident, full-time tuition plus project funds up to $\$ 3000$ as justified in the submitted project budget. Past award recipients have established mentoring programs for underrepresented students; collaborated with local organizations to improve community access to fresh, healthy and local produce; and founded an academic journal, the Madison Journal of Literary Criticism, to increase students' opportunities to see their work published. Applicants are asked to identify a UW-Madison faculty member who will serve in an advisory/resource capacity and award winners are expected to submit progress reports to the L\&S Faculty Honors Committee. Applications for the Leadership Award are submitted and considered during the spring term for the following academic year.

## STUDY ABROAD AWARDS

Up to four \$1,500 travel awards will be awarded to eligible L\&S Honors Program students who plan to study abroad. Students studying for either a semester or a year abroad are eligible, however preference will be given to students participating in a year-long program. Applications for this funding opportunity are available in the spring term.

## BROMLEY RESEARCH CONFERENCE TRAVEL GRANT

These awards are meant to support students who present at and/or attend regional or national professional conferences. Priority is given to those who plan to present. The award amount is up to $\$ 500$. The application process is competitive and students with the most promising proposals are selected.

## AFRICAN AMERICAN STUDIES

The Department of African American Studies at the University of Wisconsin-Madison offers students an opportunity to study those aspects of black history, culture, and society in ideal interdisciplinary models that reconstruct African American life. It challenges students to critically examine facts and issues that are historically and contemporaneously relevant to the African American experience. The department offers an undergraduate major and certificate. The M.A. program is based on personalized programs of study shaped to meet the needs of individual students, many of whom participate in the "Bridge" programs which enable them to move directly into Ph.D. programs in English and History. Faculty members and students are active in a broad range of activities, including hip-hop programs for at-risk youth, community theater, college classes for low-income adults, and the Public History Project. The department prides itself on positive working relationships with our colleagues in other disciplines, including the other ethnic studies programs, the departments of Gender and Women's Studies, African Cultural Studies, English, History, Interdisciplinary Theatre Studies, and the School of Education. A vibrant community of scholars and students who believe in the ideal of unity without uniformity, we welcome all those committed to a deeper understanding of race and ethnicity in America and the world.

## HOW TO GET IN

Students should inform the Department of African American Studies office of their intention to major and be assigned an advisor within the department.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the
requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits Education

- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

## BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

Foreign

- Complete the fourth unit of a foreign language; OR

Language

- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth

- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts
Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the intermediate or
Intermediate/ advanced level.
Advanced
work
Major Declare and complete at least one major.
Total Credits Complete at least 120 credits.
UW-Madison • 30 credits in residence, overall; and
Experience $\quad 30$ credits in residence after the 86 th credit.

Quality of Work

- 2.000 in all coursework at UW-Madison
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR

The major in African American Studies requires a minimum of 30 credits. 15 credits must be numbered 300 and above. Students must take 2 courses from each of the four areas listed below: 1) Literature; 2) History and Society; 3) Arts and Culture; 4) Seminars and Advanced Courses; and Electives to achieve a total of 30 credits.

## RESIDENCE \& QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses
2.000 GPA on at least 15 credits of upper-level work in the major, in residence ${ }^{2}$

15 credits in AFROAMER, taken on the UW-Madison campus
2
Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

## HONORS IN THE MAJOR

Students may declare Honors in the African American Studies Major in consultation with the African American Studies undergraduate advisor(s).

## HONORS IN THE AFRICAN AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in African American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

| Code | Title | Credits |
| :---: | :---: | :---: |
| AFROAMER/ ART HIST 241 | Introduction to African Art and Architecture | 3 |
| AFROAMER/ ANTHRO/C\&E SOC/ GEOG/HISTORY/ LACIS/POLISCI/ SOC/SPANISH 260 | Latin America: An Introduction | 3-4 |
| AFROAMER/ AFRICAN/ANTHRO/ GEOG/HISTORY/ POLISCI/SOC 277 | Africa: An Introductory Survey | 4 |
| AFROAMER/ AFRICAN/HISTORY/ POLISCI 297 | African and African-American Linkages: An Introduction | 4 |
| AFROAMER/ HISTORY 347 | The Caribbean and its Diasporas | 3 |
| AFROAMER/ AFRICAN 413 | Contemporary African and Caribbean Drama | 3-4 |

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## EARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

## 1

Many AFROAMER courses from Arts \& Culture carry Humanities breadth and will also meet the L\&S Breadth requirement for Humanities (up to 6 credits).

## 2

AFROAMER literature courses will satisfy the L\&S Literature Breadth requirement (6 credits of Literature course work).

3
Nearly all AFROAMER courses carry the Ethnic Studies (ESR) designation and will apply to General Education and the major. Students should complete ESR within first 60 credits.

4
Many AFROAMER courses in History \& Society will carry Social Science Breadth and also meet the L\&S Breadth requirements for Social Science (12 credits) course work.

5
Students must declare a major by the time they reach 86 credits.
ADVISING AND CAREERS

## ADVISING

Students are limited to a maximum of 6 credits of Directed Study courses (AFROAMER 199 Directed Study or AFROAMER 699 Directed Study in Afro-American Studies). With consent of the undergraduate adviser, students may substitute directed studies or thesis credits to satisfy requirements for the major.

The Department of African-American Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

Success!

## Professor Sandra Adell, Undergraduate and Certificate advisor in the major

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## RESIDENCE \& QUALITY OF WORK IN THE MAJOR

2.000 GPA in all AFROAMER and major courses<br>2.000 GPA on at least 15 credits of upper-level work in the major, in residence ${ }^{2}$

15 credits in AFROAMER, taken on the UW-Madison campus
2
Upper-level in the major includes AFROAMER courses numbered 300 and above and courses that count for the major that are designated as Intermediate or Advanced level.

## HONORS IN THE MAJOR

Students may declare Honors in the African American Studies Major in consultation with the African American Studies undergraduate advisor(s).

## HONORS IN THE AFRICAN AMERICAN STUDIES MAJOR REQUIREMENTS

To earn Honors in the Major in African American Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:

- 3.300 University GPA
- 3.500 GPA in all AFROAMER courses, and all courses accepted in the major
- Complete at least one course with a cross-cultural or comparative focus:

| Code | Title | Credits |
| :--- | :--- | ---: |
| AFROAMER/ | Introduction to African Art and | 3 |
| ART HIST 241 | Architecture |  |
| AFROAMER/ | Latin America: An Introduction | $3-4$ |
| ANTHRO/C\&E SOC/ |  |  |
| GEOG/HISTORY/ |  | 4 |
| LACIS/POLI SCI/ |  |  |
| SOC/SPANISH 260 |  | 4 |
| AFROAMER/ | Africa: An Introductory Survey |  |
| AFRICAN/ANTHRO/ |  |  |
| GEOG/HISTORY/ |  |  |
| POLISCI/SOC 277 |  |  |
| AFROAMER/ | African and African-American |  |
| AFRICAN/HISTORY/ | Linkages: An Introduction |  |
| POLI SCI 297 | The Caribbean and its Diasporas |  |
| AFROAMER/ |  | $3-4$ |
| HISTORY 347 | Contemporary African and |  |
| AFROAMER/ | Caribbean Drama |  |

- Complete at least 15 credits in AFROAMER at the 500 or 600 level, to include a two-semester Senior Honors Thesis in AFROAMER 681 and AFROAMER 682, for a total of 6 credits.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency
Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Familiar with the history, culture and social conditions of African Americans in the United States and, secondarily, in the African diaspora.
2. Prepared to interact effectively in a multicultural world.
3. Prepared to share the results of academic research in the area of race with their communities in Wisconsin, the U.S., and the world.
4. Prepared for careers working in institutions that address the needs of multicultural communities.
5. Develop an understanding of the connection between different disciplinary approaches to the study of race.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Associate Professor Davis
Assistant Professors Collin Wilkins, Edmonds, Ifatunji

## AFRICAN AMERICAN STUDIES, CERTIFICATE

The certificate in African American studies introduces undergraduate students to the interdisciplinary study of African American, African diaspora and African history, society, and culture. Students may choose courses in African American history, literature, black women's studies, art history, visual culture, music history, and sociology. The certificate offers students opportunities to engage in interdisciplinary study and practice that will complement their major and enhance their intellectual and creative participation in their chosen professions and as citizens in our global society.

## HOW TO GET IN

To declare a certificate in African American Studies, students must be enrolled as an undergraduate at the University of Wisconsin-Madison. Interested students must contact the department's undergraduate adviser to declare the certificate and be assigned a faculty adviser in their area of interest. Students may not declare both the certificate and the major in African American studies.

## REQUIREMENTS

## CERTIFICATE REQUIREMENTS

Certificate students must plan with a faculty adviser a cohesive program consisting of 15 credits chosen from undergraduate AFROAMER courses.

- At least one 3-credit course must focus on Afro-American history (see list below).
- A minimum of 9 credits must be completed from AFROAMER courses numbered 300-699.
- At least one 3-credit course must be advanced (AFROAMER 500-697).
- A maximum of 3 credits of directed study (AFROAMER 699) may count toward the certificate.
- Students may not substitute courses from other academic programs or subject listings to fulfill the requirements for this program
Code Title Credits

All certificate students must take one 3-credit course in
Afro-American history:

| AFROAMER 231 | Introduction to Afro-American <br> History |
| :--- | :--- |
| AFROAMER 272 | Race and American Politics from the <br> New Deal to the New Right |
| AFROAMER 302 | Undergraduate Studies in Afro- <br> American History |
| AFROAMER/ | Afro-American History Since 1900 |
| HISTORY 321 |  |
| AFROAMER/ | Afro-American History to 1900 |
| HISTORY 322 | Black Women in America: |
| AFROAMER/ | Reconstruction to the Present <br> GEN\&WS 324 |

| AFROAMER/ | African American Women's Activism <br> GEN\&WS 624 <br> (19th \& 20th Centuries) |
| AFROAMER/ | Gender, Race and the Civil Rights <br> GEN\&WS 625 |
| Movement |  |

AFROAMER electives to meet the minimum credit

## requirement for the certificate

## Total Credits

## RESIDENCE \& QUALITY OF WORK

- At least 8 credits must be completed in residence.
- Minimum 2.500 GPA on all certificate courses.
- Courses taken pass/fail or credit/no credit may not apply to the certificate.

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. To familiarize students with the history, culture and social conditions of African Americans in the United States.
2. To introduce students to an interdisciplinary approach to the study of race, gender, and ethnicity in America.
3. To prepare students for careers in institutions that address the needs of multicultural communities.

## ADVISING AND CAREERS

## Professor Sandra Adell, Certificate Advisor

saadell@wisc.edu
608-262-0425
4115 Helen C. White Hall

DARS is the document of record for the Afro-American studies certificate. Students should contact the certificate advisor to make sure they are on track to completing the program and to get confirmation of completion of the certificate.

## AFRICAN CULTURAL STUDIES

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. Our faculty specialize in literature, music, film, critical applied linguistics, drama, diaspora studies, and new media. Our undergraduate program emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines. A student majoring in African Cultural Studies is prepared for careers across the globe!

Undergraduates study one of six languages offered by the department -Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu-and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department offers a wide-range of course topics, including African literature and theater, contemporary cinema and music, Afro-Futurism, gender and sexuality, and internet and media studies.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UWMadison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (http:// www.studyabroad.wisc.edu/) and visit the Majors Advising Page (https:// studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/).

For more information, students should feel free to contact the Department of African Cultural Studies (http://african.wisc.edu/).

## HOW TO GET IN

## DECLARING THE MAJOR

Declaring the major in African Cultural Studies is as easy as meeting with the advisor. Find the African Cultural Studies advisor on Starfish (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/).

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

## BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics
Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning $B(Q R-B)$ coursework.
Foreign
Language

L\&S Breadth

- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of Intermediate/ advanced level.
Advanced
work

| Major | Declare and complete at least one major. |
| :--- | :--- |
| Total Credits | Complete at least 120 credits. |
| UW-Madison | • 30 credits in residence, overall; and |
| Experience | • 30 credits in residence after the 86 th credit. |
| Quality of | $\cdot 2.000$ in all coursework at UW-Madison |
| Work | • 2.000 in Intermediate/Advanced level coursework at <br>  |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

The African Cultural Studies major consists of a combination of literature and culture courses and two semesters of an African language. The major requirements are divided into three areas: Language, Literature and Culture, and Capstone Course.

## REQUIREMENTS FOR THE MAJOR

The major requires a minimum of 32 credits and the specific requirements include:

| LANGUAGE |  | Credits |
| :--- | :--- | ---: |
| Code | Title <br> Complete one of the following language options: | $\mathbf{8 - 1 0}$ |
| AFRICAN 321 | First Semester Arabic |  |

- 15 credits in AFRICAN, taken on the UW-Madison campus

## HONORS IN THE MAJOR

Students may declare Honors in the African Cultural Studies Major in consultation with the African Cultural Studies undergraduate advisor. To earn Honors in the Major in African Cultural Studies students must satisfy
both the requirements for the major (above) and the following additional requirements:

1. Earn a 3.300 overall university GPA
2. Earn 3.300 GPA in all AFRICAN and major courses
3. Complete 15 Honors credits in the major, in residence, that includes: a. 9 credits in courses numbered 200 and above
b. A two-semester Senior Honors Thesis
in AFRICAN 681 and AFRICAN 682, for a total of 6 credits.

## FOOTNOTES

1
Courses with Intermediate or Advanced level are considered upper level in this major.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. (Content) Recognize canonical authors and texts, historical forms, genres, and structures, and recognize aesthetic and cultural concerns in Africa and its diasporas.
2. (Content) Demonstrate their understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary and cultural studies.
3. (Content) Develop a level of proficiency in the different "ways of knowing" Africa and the diaspora through language, literatures, and cultures.
4. (Research Skills) Understand their own learning processes and possess the capacity to intentionally seek, evaluate, and learn from information, and recognize and reduce bias in their thinking.
5. (Research Skills) Effectively retrieve and comprehend primary sources in English and African languages, and secondary sources from a range of disciplines.
6. (Communication Skills) Develop or improve speaking, listening, writing, reading skills in an African language, and integrate these skills to communicate effectively.
7. (Communication Skills) Communicate effectively through essays, oral presentations, and discussion, so they may share their knowledge, wisdom, and values with others across social and professional settings.
8. (Communication Skills) Show knowledge of conventional rhetorical strategies, and integrate research by other authors while distinguishing between their own ideas and those of others.
9. (Communication Skills) Write and speak across disciplinary boundaries with regard to existing research about Africa and the diaspora in the humanities and social sciences.
10. (Analytical Skills) Discuss cultural texts from various theoretical and critical perspectives, formulate ideas and make connections between literary/cultural concepts and themes.
11. (Analytical Skills) Demonstrate command of the terminology and methodology of cultural studies, construct complex arguments, and use primary and secondary sources to support arguments.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Fulfills Communication Part B, Literature OR Humanities requirement

## ADVISING AND CAREERS

## ADVISING

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in Contemporary Arabic Literature and Culture and South Africa's Truth and Reconciliation Commission before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style. Any and all of these discussions can occur during your advising appointment.

In addition to discussing the major, advisors also know a lot about:

- General Education requirements
- Breadth requirements
- Interpreting university policies and deadlines
- Connecting majors to careers
- Getting involved with campus organizations
- Finding volunteer and/or internship opportunities
- Talking about your academic challenges and difficulties
- Connecting with tutors
- Picking a study abroad program
- Practicing for interviews
- Talking about graduate school
- Proofreading résumés and cover letters

Ready to meet with the ACS advisor? Make an appointment using Starfish (https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/).

## CAREERS

Humanities majors develop a wide variety of skills and talents, so they're prepared for just about any type of career or educational pursuit. Our coursework builds the critical thinking and communication skills needed to succeed in careers ranging from politics and education to business and law.

One of the more significant skills ACS majors develop is language acquisition. We offer a number of funding opportunities (https:// languages.wisc.edu/scholarships/) to support language study, small class sizes with more opportunity for participation and cultural exchange, unique study abroad and international internship experiences, and instructors who are primarily native speakers with a keen interest in teaching. Plus, UWMadison ranks \#1 in the nation for students earning a bachelor's degree in language other than English!

In addition to the valuable language training and cultural competence an ACS major affords you, consider what you learn in the classroom as well as what you do each day to be a successful student. The skills you develop are equally important in the workplace:

- critical reading, reflection, and analysis
- expanded world view and exposure to new ideas/ways of thinking
- effective teamwork to advance a common project/purpose
- effective time-management and self-motivation to complete projects independently
- demonstrated writing proficiency in short and long essay format
- discussion and debate strategies
- proper research design and methodology
- broader knowledge of career and graduate-study options

Count on being well-prepared for an exciting and rewarding career!
Visit our website (https://african.wisc.edu/undergraduate-program/ career-and-skill-development/) for more information.

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## PEOPLE

Please visit the African Cultural Studies website (https://african.wisc.edu/ people/faculty-and-staff/) for a complete list of faculty, instructional, and academic staff.

## RESOURCES AND SCHOLARSHIPS

## RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UWMadison (http://www.languages.wisc.edu/).

Learn more about scholarships (http://www.languages.wisc.edu/beyond/ scholarships/) and other opportunities for funded language study.

## AFRICAN CULTURAL STUDIES, B.S.

The mission of the Department of African Cultural Studies is to research and teach the languages and expressive cultures of Africa and Africans around the world. Our faculty specialize in literature, music, film, critical applied linguistics, drama, diaspora studies, and new media. Our undergraduate program emphasizes the development and application of analytical, linguistic, and methodological tools that enable students to work effectively and imaginatively across regions, languages, cultural forms, methodologies, and disciplines. A student majoring in African Cultural Studies is prepared for careers across the globe!

Undergraduates study one of six languages offered by the department -Arabic, Hausa, Swahili, Wolof, Yoruba, and Zulu-and combine their language study with popular courses in the humanities, literature, and ethnic studies. The department offers a wide-range of course topics, including African literature and theater, contemporary cinema and music, Afro-Futurism, gender and sexuality, and internet and media studies.

Majors are encouraged to study abroad in Africa during their undergraduate careers. Study abroad programs sponsored by UWMadison include semesters or full years in Morocco, Senegal, South Africa, Ghana, and other African nations. Other programs are available through different institutions. See International Academic Programs (http:// www.studyabroad.wisc.edu/) and visit the Majors Advising Page (https:// studyabroad.wisc.edu/academics/major-advising-pages-maps/african-cultural-studies/).

For more information, students should feel free to contact the Department of African Cultural Studies (http://african.wisc.edu/).

## HOW TO GET IN

## DECLARING THE MAJOR

Declaring the major in African Cultural Studies is as easy as meeting with the advisor. Find the African Cultural Studies advisor on Starfish (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/).

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

## BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of $3+$ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

| Foreign Language | Complete the third unit of a foreign language. |
| :---: | :---: |
| L\&S Breadth | Complete: <br> $\cdot 12$ credits of Humanities, which must include at least 6 credits of Literature; and <br> - 12 credits of Social Science; and <br> - 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science. |
| Liberal Arts and Science Coursework | Complete at least 108 credits. |
| Depth of Intermediate/ <br> Advanced Coursework | Complete at least 60 credits at the Intermediate or Advanced level. |
| Major | Declare and complete at least one major. |
| Total Credits | Complete at least 120 credits. |
| UW-Madison | Complete both: |
| Experience | - 30 credits in residence, overall, and <br> - 30 credits in residence after the 86th credit. |
| Quality of Work | $\cdot 2.000$ in all coursework at UW-Madison <br> - 2.000 in Intermediate/Advanced level coursework at UW-Madison |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

The African Cultural Studies major consists of a combination of literature and culture courses and two semesters of an African language. The major requirements are divided into three areas: Language, Literature and Culture, and Capstone Course.

## REQUIREMENTS FOR THE MAJOR

The major requires a minimum of 32 credits and the specific requirements include:

| LANGUAGE |  |  |
| :---: | :---: | :---: |
| Code | Title | Credits |
| Complete one of the following language options: |  | 8-10 |
| AFRICAN 321 \& AFRICAN 322 | First Semester Arabic and Second Semester Arabic |  |

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

PEOPLE

Please visit the African Cultural Studies website (https://african.wisc.edu/ people/faculty-and-staff/) for a complete list of faculty, instructional, and academic staff.

## RESOURCES AND SCHOLARSHIPS

## RESOURCES FOR LANGUAGE LEARNERS

One of the most valuable resources for students interested in language study is the Language Institute and its website, Languages at UWMadison (http://www.languages.wisc.edu/).

Learn more about scholarships (http://www.languages.wisc.edu/beyond/ scholarships/) and other opportunities for funded language study.

> AMERICAN INDIAN AND INDIGENOUSSTUDIES PROGRAM

The American Indian and Indigenous Studies Program seeks to provide and maintain the highest levels of education, scholarship, leadership, and support to all students, staff, and faculty at the university. As an integral part of the university, the program maintains a special focus on assisting and supporting American Indians in their educational endeavors. In addition to the commitment to the university community, the program provides consultation and services to numerous local, state, and national organizations.

It is the mission of the American Indian and Indigenous Studies Program to provide leadership to other university departments and programs in the pursuit of American Indian course development and scholarship. In addition, the program serves as a resource center and support for individuals who are interested in American Indian culture, history, research, and contemporary life.

> AMERICAN INDIAN AND INDIGENOUS STUDIES, CERTIFICATE

## CERTIFICATE IN AMERICAN INDIAN STUDIES

A certificate in American Indian \& Indigenous Studies is a way of giving recognition to students who have made a significant effort to learn about American Indian \& Indigenous culture and the place of American

Indians in American society. Students receiving a certificate will have the achievement officially recorded via transcript notation.

## WHAT CAN I DO WITH A CERTIFICATE IN AMERICAN INDIAN \& INDIGENOUS STUDIES?

Students of American Indian \& Indigenous Studies go on to successful careers in administration, advising, academics, advocacy, the arts, business, community outreach, consulting, education, government, health or health education, journalism, library science, literacy programming, lobbying, management, politics, publishing, school counseling, social work, research, and many more.

## HOW TO GET IN

To begin the certificate declaration process, students must submit the Certificate Program Application form to the American Indian and Indigenous Studies office. This form can be found on our Certificate Website (https://amindian.wisc.edu/certificate-program/). The certificate is open to Special students and undergraduate students regardless of the college of enrollment.

## REQUIREMENTS

## REQUIREMENTS FOR THE CERTIFICATE

15 total credits are required, as follows:

| Introduction to American Indian Studies: |  |  |
| :---: | :---: | :---: |
| AMER IND 100 | Introduction to American Indian Studies | 3 |
| Complete four courses from at least two of the following areas: |  | 12 |
| History |  |  |
| AMER IND/ HISTORY 190 | Introduction to American Indian History |  |
| Literature and Media |  |  |
| AMER IND/ ENGL 172 | Literatures of Native America |  |
| AMER IND/ ENGL 246 | Literature by American Indian Women |  |
| AMER IND 325 | American Indians in Film |  |
| AMER IND/ ANTHRO/ FOLKLORE 431 | American Indian Folklore |  |
| Anthropology |  |  |
| AMER IND/ ANTHRO 314 | Indians of North America |  |

## RESIDENCE AND QUALITY OF WORK

- Minimum 2.000 GPA on all certificate courses.
- 6 credits may be taken as pass/fail. All other credits must be taken for a letter grade.
- At least 8 certificate credits must be completed in residence.

## UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

## LEARNING OUTCOMES

1. Apply knowledge and methods of inquiry characteristic of this interdisciplinary field.
2. Apply knowledge of historical precedents to contemporary issues.
3. Demonstrate knowledge of the creativity and ethos contained within the diverse ways of knowing (Indigenous Knowledge Systems) among American Indian nations and communities.
4. Apply knowledge of the effects (ongoing) of oppression and racism that American Indians experience.
5. Demonstrate knowledge of the contributions of American Indian value-belief systems and practical knowledge across all fields of human endeavor.

## ADVISING AND CAREERS

Students are required to declare the American Indian and Indigenous Studies (AIIS) certificate. For academic advising regarding the certificate, students should contact the AllS certificate advisor to obtain more details about the certificate program and general academic advising. Contact Denise Wiyaka at denise.wiyaka@wisc.edu or request information by sending an email to ais@letsci.wisc.edu.

## ANTHROPOLOGY

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin-Madison, anthropology consists of three subfields: archaeology-the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology -the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology-the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW-Madison also offers some classes in anthropological linguistics-the analysis of language and its place in social life. Comparative and empirical
work-and fieldwork in particular-are the hallmarks of anthropology on this campus.

Thus, anthropology at UW-Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

## ANTHROPOLOGY, B.A.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin-Madison, anthropology consists of three subfields: archaeology-the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology -the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology-the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW-Madison also offers some classes in anthropological linguistics-the analysis of language and its place in social life. Comparative and empirical work-and fieldwork in particular-are the hallmarks of anthropology on this campus.

Thus, anthropology at UW-Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

## HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education
requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

## BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning $B(Q R-B)$ coursework.

Foreign
Language

L\&S Breadth

- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits. and Science

## Coursework

Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.

## Advanced

work
Major Declare and complete at least one major.
Total Credits Complete at least 120 credits.

| UW-Madison | $\cdot 30$ credits in residence, overall; and |
| :--- | :--- |
| Experience | $\cdot 30$ credits in residence after the 86 th credit. |
|  |  |
| Quality of | $\cdot 2.000$ in all coursework at UW-Madison |
| Work | $\cdot 2.000$ in Intermediate/Advanced level coursework at |
|  | UW-Madison |

## NON-L\&S STUDENTS PURSUING AN L\&S

MAJOR
Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR

| Code | Title | Credits |
| :--- | :--- | ---: |
| ANTHRO 105 | Principles of Biological <br> Anthropology | 3 |
| ANTHRO 300 | Cultural Anthropology: Theory and <br> Ethnography | 3 |
| Complete two: |  | 6 |
| ANTHRO 212 | Principles of Archaeology |  |
| ANTHRO 321 | The Emergence of Human Culture |  |
| ANTHRO 322 | The Origins of Civilization |  |

## RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ANTHRO and major courses
- 2.000 GPA in 15 upper-level major credits in residence ${ }^{1}$
- 15 credits in ANTHRO, taken on campus

1
ANTHRO 300 and above are upper-level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361, ANTHRO/ LACIS 362, ANTHRO/LACIS 363,ANTHRO/LACIS 364, ANTHRO/ LACIS 376,ANTHRO/LACIS 377).

## HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Anthropology major advisor.

## HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the Anthropology major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all ANTHRO and major courses
- Complete the following coursework:

| Code | T | Credits |
| :---: | :---: | :---: |

Total Credits

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work
point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and bio\# anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

## First Year

## ADVISING AND CAREERS

## ADVISING

Students interested in anthropology and declaring the major should contact the department directly by calling the general number (608-262-2866) or stopping by 5240 William H. Sewell Social Science Building for individual advising

## CAREER EXPLORATION

Anthropology encourages majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important that students are career ready at the time of graduation, and we are committed to your success.

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## ANTHROPOLOGY, B.S.

Anthropology is the comparative study of human diversity through time and across the world. Its scope spans the humanities, the social sciences, and the biological, physical, and evolutionary sciences. As a history of the human species, anthropology studies all human biological and behavioral variation from the earliest fossil records to the present; it includes the study of nonhuman primates as well. As a social science, anthropology aims at uncovering the patterns of past and present societies. As one of the humanities, anthropology seeks to understand the ways cultural meaning and political power have shaped human experience.

At the University of Wisconsin-Madison, anthropology consists of three subfields: archaeology-the investigation and analysis of the remains from past cultures, uncovered through excavation; biological anthropology -the study of human evolution and the roots of the biological and genetic diversity found among contemporary peoples; and sociocultural anthropology-the comparative study of society, politics, economy, and culture, whether in historical times or in our contemporary moment. UW-Madison also offers some classes in anthropological linguistics-the analysis of language and its place in social life. Comparative and empirical work-and fieldwork in particular-are the hallmarks of anthropology on this campus.

Thus, anthropology at UW-Madison is characterized by a comparative point of view, a focus on humans and societies in all their variation and similarity, and an effort to reveal and understand the complex but organized diversity that has shaped the human condition, past and present.

## HOW TO GET IN

Students wishing to declare an anthropology major should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building.

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

## BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of $3+$ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCl and STAT subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language.

## Language

L\&S Breadth Complete:

- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits. and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework

| Major | Declare and complete at least one major. |
| :--- | :--- |
| Total Credits | Complete at least 120 credits. |
| UW-Madison Complete both: <br> Experience $\cdot 30$ credits in residence, overall, and <br>  $\cdot 30$ credits in residence after the 86 th credit. <br> Quality of $\cdot 2.000$ in all coursework at UW-Madison <br> Work $\cdot 2.000$ in Intermediate/Advanced level coursework at <br>  UW-Madison |  |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR

| Code | Title | Credits |
| :--- | :--- | ---: |
| ANTHRO 105 | Principles of Biological <br> Anthropology | 3 |
| ANTHRO 300 | Cultural Anthropology: Theory and <br> Ethnography | 3 |
| Complete two: |  | 6 |
| ANTHRO 212 | Principles of Archaeology |  |
| ANTHRO 321 | The Emergence of Human Culture |  |

| ANTHRO 490 | Undergraduate Seminar | 3 |
| ANTHRO electives |  | 15 |
| Total Credits |  | $\mathbf{3 0}$ |

## RESIDENCE AND QUALITY OF WORK

- 2.000 GPA in all ANTHRO and major courses
- 2.000 GPA in 15 upper-level major credits in residence ${ }^{1}$
- 15 credits in ANTHRO, taken on campus

1
ANTHRO 300 and above are upper-level, with the exception of Quechua and Yucatec Maya language courses (ANTHRO/LACIS 361, ANTHRO/ LACIS 362, ANTHRO/LACIS 363,ANTHRO/LACIS 364, ANTHRO/ LACIS 376, ANTHRO/LACIS 377).

## HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Anthropology major advisor.

## HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the Anthropology major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all ANTHRO and major courses
- Complete the following coursework:

| Code | Title | Credits |
| :--- | :--- | ---: |

## Total Credits

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Acquire specialized training in anthropological research.
2. Obtain comparative global knowledge of human diversity, material culture, culture history, and the evolution of people's relationships with the physical, cultural, and natural world.
3. Gain an awareness of ethnographic, archaeological and bio\# anthropological ethics practice and research.
4. Distinguish between empirical and speculative narratives and claims about human diversity past and present.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based
on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

## First Year

| Fall | Credits | Spring |

## ARCHAEOLOGY, CERTIFICATE

The archaeology certificate is designed to help students to develop the knowledge and practical skills needed to analyze archaeological materials and to participate in archaeological field research. Students who complete the certificate, along with a B.A. or B.S. degree from UWMadison, improve their competitiveness in graduate school applications and are qualified for entry-level employment opportunities in archaeology. In addition to providing a strong intellectual foundation in archaeology and hands-on experience in fieldwork, the certificate provides an
interdisciplinary link to courses in three or more departments, exposing students to diverse approaches to the study of our global human heritage.

Ancient history is a puzzle made up of innumerable fragments-pieces of bone, pottery, stone, and metal; remnants of architecture and monuments; residues of food; and traces of other things. Archaeology is the field of study that provides the tools to discover these fragments and piece them together to reconstruct a picture of the ancient world and to illuminate the stories of past peoples. An accurate understanding of the past is critical for developing a better present and future.

Through their participation in the archaeology certificate program, students gain an appreciation of the diversity of human societies and a fuller understanding of the cultural processes that have resulted in the way that we live today. Students explore the origins of subsistence strategies, trade, technology, belief systems, and conflict that are relevant to understanding the human condition in our modern world.

For further information about the archaeology certificate, including a list of core faculty, please see the Department of Anthropology website (https:// www.anthropology.wisc.edu).

## HOW TO GET IN

To declare an archaeology certificate, should contact or visit the Department of Anthropology.

## REQUIREMENTS

## 7 COURSES AND 21 CREDITS ${ }^{1}$

Credits must be distributed in at least three SUBJECTs, and must meet these requirements:

Choose from:

## Title

ANTHRO 352 Ancient Technology and Invention ${ }^{2}$
ANTHRO 490 Undergraduate Seminar ${ }^{3}$
Total Credits
1
Courses taken Pass/Fail do not count.
2
ANTHRO 352 can count either for a methods course or for the capstone course, but not both.

## 3

ANTHRO 490 is a Topics course. In order to meet the capstone requirement, it must be on an archaeology topic.

## RESIDENCE AND QUALITY OF WORK

```
    2.000 GPA on all certificate-approved courses
```

- At least 11 Certificate credits, taken in Residence

## UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit
availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

## LEARNING OUTCOMES

1. acquire specialized training in archaeological research, which may include: obtaining basic knowledge of and skills in observational methods and recording of information for a variety of lines of archaeological evidence, putting these abilities into practice in the classroom and outside of the classroom, developing research questions and the analytical skills necessary to address them, strengthening archaeological interpretations through critical thinking and reference to empirical evidence, gaining experience in considering a problem, synthesizing information from disparate sources, and evaluating contrasting arguments, being able to distinguish between empirical research and speculation, communicating archaeological findings through written and oral expression.
2. obtain comparative global knowledge of archaeology, material culture, and the evolution of people's relationships with the physical world.
3. become aware of the ethical practice of archaeology and heritage preservation.
4. synthesize information relevant to archaeological research across multiple disciplines.
5. gain an appreciation of cultural diversity through time and space.

## ADVISING AND CAREERS

Students wishing to receive advising for the archaeology certificate should go to the Department of Anthropology, 5240 William H. Sewell Social Science Building. The telephone number for the department is 608-262-2866.

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## ART HISTORY

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions, in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged.

Affiliate Professors Aylward, Clark, Kern, Moskowitz, Nadler, Wolf
Affiliate Associate Professor Abdu'Allah
Affiliate Assistant Professors Campbell, Carter
Affiliate UW-Milwaukee Associate Professors Benyamin, Sen
Affiliate UW-Milwaukee Assistant Professor Moon

## ART HISTORY, B.A. <br> OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

## STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non-UW study abroad programs, the Office of Admissions and Recruitment. For more information, see the Study Abroad website (http://www.studyabroad.wisc.edu/).

## HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (https://arthistory.wisc.edu/undergraduate-program/\#advising).

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS

 \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

## BACHELOR OF ARTS DEGREE REQUIREMENTS

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning $B$ (QR-B) coursework.

| Foreign |  |
| :--- | :--- |
| Language | - Complete the fourth unit of a foreign language; OR |
| L\&S Breadth | -- 12 credits of Humanities, which must include 6 credits <br> second unit of an additional foreign language. |
|  | of literature; and |

| Liberal Arts and Science Coursework | Complete at least 108 credits. |
| :---: | :---: |
| Depth of Intermediate/ Advanced work | Complete at least 60 credits at the intermediate or advanced level. |
| Major | Declare and complete at least one major. |
| Total Credits | Complete at least 120 credits. |
| UW-Madison Experience | - 30 credits in residence, overall; and <br> - 30 credits in residence after the 86th credit. |
| Quality of Work | - 2.000 in all coursework at UW-Madison <br> - 2.000 in Intermediate/Advanced level coursework at UW-Madison |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

- Complete the fourth unit of a foreign language; or
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

## LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

| Intro-level ART HIST (two required) |  |  |
| :---: | :---: | :---: |
| Code | Title | Credits |

## THEORY AND METHOD DISTRIBUTION

Of the nine required ART HIST courses, at least one course from:

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence ${ }^{2}$
- 15 credits in ART HIST taken on the UW-Madison campus
- AP Art History credits may count toward the nine (9) course minimum for the Art History major but not toward the 200-level requirement

## HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

## HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year

## FOOTNOTES

1
Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of of those areas. Students with questions should consult the academic advisor for this program.

2
ART HIST courses numbered 300-699 are considered upper-level in the major.

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. <br> The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| :--- | :--- |
| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
|  | Away programs. |
| Quality of | Undergraduate students must maintain the minimum grade <br> point average specified by the school, college, or academic <br> program to remain in good academic standing. Students |
| whose academic performance drops below these minimum |  |
| thresholds will be placed on academic probation. |  |

## LEARNING OUTCOMES

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such as form, color, light, proportion, viewpoint, material, and narrative structure.
2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner,
and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

## First Year

## Total Credits 120

## ADVISING AND CAREERS

## ADVISING

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options.
We also work closely with SuccessWorks at the College of Letters \& Science to help students best apply the knowledge and skills acquired in
the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors -as well as from L\&S Advising-about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L\&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters \& Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

## Notes about the major requirements:

- Art History AP credits with a score of 4 or higher and 100 -level Art History courses count only toward the nine-course minimum but do not count toward distribution requirements.
- Courses at the 200 level count only toward the nine-course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: 1. 300 level and 2. Chronological-either Ancient to Medieval or Early Modern and 3. Geographic-either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements, even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one area of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

## Career Resources:

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## Art History Department Resources

- Art History professional development webpage (https:// arthistory.wisc.edu/undergraduate-program/\#professionaldevelopment)
- Why major in Art History? (https://arthistory.wisc.edu/undergraduate-program/\#about-the-major)
- Art History majors discuss the value of the degree (https:// arthistory.wisc.edu/undergraduate-program/\#testimonials)
- Art History's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

This directed study may serve as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print or online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3credit internship, the student must average approximately twelve hours a week throughout the semester, including working at the host institution
on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of one hour each month. Requires permission to work with faculty member to receive credit for internship project. 1-3 cr.

## WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.
readers, engaged writers, critical viewers, independent thinkers, and confident cultural citizens who are well prepared to thrive in global society.

Through innovative research, teaching, and outreach activities, the Department of Art History takes a leading role in promoting visual literacy, emphasizing careful attention to continuities and differences across human history and world cultures. Examining expressive forms, from artifacts to new media, the department explores the ways in which art and visual and material culture are fully integrated into larger cultural histories.

## STUDY ABROAD

The department strongly encourages art history majors to participate in study abroad programs. Students gain firsthand experience of other cultures and languages and have the opportunity to study major artistic monuments. Credit for appropriate coursework can be applied toward the major after arrangements have been made with the study abroad program, or, in the case of non-UW study abroad programs, the Office of Admissions and Recruitment. For more information, see the Study Abroad website (http://www.studyabroad.wisc.edu/).

## HOW TO GET IN

Students considering art history as a major should come to the department for advising as early as possible in their undergraduate careers. Upon declaration, students are strongly encouraged to meet regularly with the undergraduate program advisor to ensure timely progress toward completion of the degree. Annual meetings with the director of undergraduate studies are also highly encouraged. More detailed information can be found at Declaring the Art History Major (https://arthistory.wisc.edu/undergraduate-program/\#advising).

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

## ART HISTORY, B.S.

## OVERVIEW

The art history major provides a foundation for answering key questions about what it means to be human as well as valuable skills for today's workplaces. A specialized focus on images, objects, and the built environment promotes critical and creative approaches to analysis, problem-solving, writing, and visual communication in a variety of media. Interdisciplinary collaborations encourage aesthetic, historical, economic, and ethical questions in order to produce new knowledge, sophisticated

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

## COLLEGE OF LETTERS

 \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

## BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of $3+$ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language.

Language
L\&S Breadth Complete:

- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework

| Major | Declare and complete at least one major. |
| :--- | :--- |
| Total Credits | Complete at least 120 credits. |
| UW-Madison Complete both: <br> Experience $\cdot 30$ credits in residence, overall, and <br>  $\cdot 30$ credits in residence after the 86 th credit. <br> Quality of $\cdot 2.000$ in all coursework at UW-Madison <br> Work $\cdot 2.000$ in Intermediate/Advanced level coursework at <br>  UW-Madison |  |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR FOREIGN LANGUAGE

Note: A unit is one year of high school work or one semester/term of college work.

- Complete the fourth unit of a foreign language; or
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

## LEVEL REQUIREMENTS

Nine (9) courses in ART HIST as follows:

| Intro-level ART HIST (two required) |  |  |

## THEORY AND METHOD DISTRIBUTION

Of the nine required ART HIST courses, at least one course from:

- 2.000 GPA in ART HIST and major courses
- 2.000 GPA on 15 upper-level major credits in residence ${ }^{2}$
- 15 credits in ART HIST taken on the UW-Madison campus
- AP Art History credits may count toward the nine (9) course minimum for the Art History major but not toward the 200-level requirement

## HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Art History undergraduate advisor.

## HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.500 GPA in all ART HIST courses
- Complete a two-semester Senior Honors Thesis in ART HIST 681 and ART HIST 682, for a total of 6 credits.
- Present an oral report on work in an undergraduate Honors colloquium during the senior year

## FOOTNOTES

1
Course is accepted in one or more Chronological or Geographical areas, but will only apply to one of of those areas. Students with questions should consult the academic advisor for this program.

2
ART HIST courses numbered 300-699 are considered upper-level in the major.

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. <br> The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| :--- | :--- |
| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
|  | Away programs. |
| Quality of | Undergraduate students must maintain the minimum grade <br> point average specified by the school, college, or academic <br> program to remain in good academic standing. Students |
| whose academic performance drops below these minimum |  |
| thresholds will be placed on academic probation. |  |

## LEARNING OUTCOMES

1. Skill in visual analysis of single images and comparative analysis of multiple images and objects, evaluating a range of elements such as form, color, light, proportion, viewpoint, material, and narrative structure.
2. Proficiency in interpreting images and objects in ways that take into account the historical contexts in which they were produced and received.
3. Consolidation of knowledge across a range of time and geography to reach an understanding of the ways in which art and its meaning are rooted in culture.
4. Ability to locate and enlist research resources in both print and digital form and assess the strengths and weaknesses of various types of resources.
5. Knowledge and skills to interpret images and objects in ways that consider a variety of theoretical perspectives.
6. Ability to assess and critique scholarly arguments and evaluate the strength of the visual and textual evidence presented.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner,
and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

## First Year

## Total Credits 120

## ADVISING AND CAREERS

## ADVISING

The Department of Art History individually mentors its majors toward careers in a wide range of fields. Our academic advisor and director of undergraduate studies are always available to discuss postdegree options.
We also work closely with SuccessWorks at the College of Letters \& Science to help students best apply the knowledge and skills acquired in
the art history major in conjunction with other certificates or majors. We encourage majors to seek information from art history faculty and advisors -as well as from L\&S Advising-about career paths and internships; preparation for the job search; and applying to graduate school. Both the department and L\&S also provide networking opportunities with professionals in the field (employers and alumni).

Letters \& Science graduates, and art history majors in particular, have unique perspectives, knowledge, and skills that make them highly desirable to today's employers.

Students who wish to continue on to graduate studies in art history or related fields, or who simply desire more advanced work in art history, are strongly encouraged to pursue Honors in the Major. Students should begin to plan honors work in art history with their honors advisor as early as possible in their careers and should check with the departmental undergraduate advisor at least once a year to seek guidance about planning the best possible Honors in the Major curriculum that reflects their special interests.

## Notes about the major requirements:

- Art History AP credits with a score of 4 or higher and 100-level Art History courses count only toward the nine-course minimum but do not count toward distribution requirements.
- Courses at the 200 level count only toward the nine-course minimum and 200-level requirements for the major (ART HIST 206 and ART HIST/AFROAMER 242 are exceptions).
- ART HIST/AFROAMER 242 is the only 200-level course that counts toward any content distribution requirements.
- All courses numbered between 200 and 680 count toward level requirements. 600-level courses generally count toward the 400-level requirement.
- Most courses at the 300 and 400 level, and some courses at the 600 level, count toward content distribution requirements. (Example: ART HIST 305 may count in each of the following requirement areas: 1. 300 level and 2. Chronological-either Ancient to Medieval or Early Modern and 3. Geographic-either Cross-Cultural Diaspora or Africa/Middle East)
- Proseminars generally do not satisfy distribution requirements.
- Special topics (including ART HIST 600 Special Topics in Art History) and study abroad courses may satisfy one or more distribution requirements, even if they are not shown in Chronological, Geographic, or Theory and Method categories. In case of questions about how a course might count, students should consult the major advisor.
- Courses footnoted in the Requirements section may meet more than one area of Chronological distribution, Geographical distribution, or both. In nearly all cases, the degree audit (DARS) will select the most advantageous category for students to complete their requirement. In the rare case that an adjustment is necessary, consult the major advisor.

## Career Resources:

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## Art History Department Resources

- Art History professional development webpage (https:// arthistory.wisc.edu/undergraduate-program/\#professionaldevelopment)
- Why major in Art History? (https://arthistory.wisc.edu/undergraduate-program/\#about-the-major)
- Art History majors discuss the value of the degree (https:// arthistory.wisc.edu/undergraduate-program/\#testimonials)
- Art History's internship course: ART HIST 697 Undergraduate Curatorial Studies Internship (Directed Study)

This directed study may serve as an elective for the material culture certificate program, or for a specific stand-alone project. The goal is to give students credit for applied learning experiences in museums and other curatorial settings. Students must identify internship possibilities and have them approved for credit by the faculty member who will serve as instructor of record, and oversee the academic side of the internship. The nature of the internship will vary according to the host institution, but to be accepted for credit, it must have a substantial research component. Examples include but are not limited to: assisting a curator or registrar with research for an exhibition or permanent collection display; producing wall texts and object labels in an exhibition or permanent collection display; researching and writing catalog entries or essays on an object or objects in an exhibition or permanent collection; preparing catalog entries for works in the permanent collection of a museum/historical society; assisting a curator preparing a dossier for acquisitions; researching conservation histories of objects; provenance research; preparing teaching materials associated with an exhibition or permanent collection either in print or online; preparing and giving public tours of exhibitions or permanent collections; participating in exhibition design. To fulfill a 3credit internship, the student must average approximately twelve hours a week throughout the semester, including working at the host institution
on individual projects, and performing any necessary research and writing outside the host institution. In addition, the student should meet with the faculty advisor for a minimum of one hour each month. Requires permission to work with faculty member to receive credit for internship project. 1-3 cr.

## WISCONSIN EXPERIENCE

The Department of Art History promotes an understanding of art, architecture, objects, and ideas worthy of close visual analysis to be local, hemispheric, transnational, and international, and existing both within and outside of traditional institutions of display. In guiding our students to develop skills in visual analysis, close reading, historical contextualization, and communication and interpretation through writing about art, conducting research on objects in our museum collections, and organizing exhibitions, our department is committed to building an understanding of how humans perceive, create, and inhabit the world. Opportunities to work with and present collections to the public, both at the Chazen Museum and through internships at other Wisconsin institutions, afford our students the chance to connect with diverse audiences beyond the borders of campus.

## ART HISTORY, CERTIFICATE

The art history certificate requires four courses and is open to any undergraduate major.

The certificate is designed to meet twenty-first century needs by promoting visual literacy in an increasingly visual world. Our classes teach critical and creative approaches to analysis, problem-solving, writing, and visual communication using a variety of artistic media, including painting, sculpture, architecture, photography, prints, ephemera, and the decorative arts.

Students earning the certificate will hone skills in visual analysis and interpretation that make them more competitive in a variety of today's fields of employment, including (but not limited to) professions in the arts, in social sciences, and in physical sciences-all of which require the skills taught in our courses.

## Important Notes:

- Students who are thinking about declaring the Art History Certificate as well as the Material Culture Certificate: Undergraduate students may request permission to complete both the Art History Certificate and the Material Culture Certificate but only one course may overlap between the two certificates. Please consult with the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions.
- Only one transfer course from another institution may be counted toward the Art History Certificate. (This does not include UW-Madison study abroad programs for which courses taken in these programs are considered "in residence.")
- AP credits may count toward the "Electives" course requirement for the Art History Certificate.

## HOW TO GET IN

Students are eligible to declare the certificate at any point in their studies. We encourage students to declare as early as possible in order to plan their required coursework. Students should contact the undergraduate advisor to declare the certificate.

Students thinking about declaring the Art History Certificate as well as the Material Culture Certificate: Undergraduate students may request permission to complete both the Art History Certificate and the Material Culture Certificate but only one course can overlap between the two certificates. Please consult with the undergraduate advisor with any questions.

Students declared in the Art History major may not declare the Certificate.

## REQUIREMENTS

## REQUIREMENTS FOR THE CERTIFICATE

Four courses and 12 credits are required, as follows:

## INTERMEDIATE SURVEY COURSE

| :--- | :--- | :---: |
| ART HIST 699 | Directed Study | $1-3$ |

## RESIDENCE AND QUALITY OF WORK

- At least 6 Certificate credits must be earned in residence
- A 2.000 GPA is required in all courses approved for the certificate

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## LEARNING OUTCOMES

1. Describe objects and images accurately; identify different stylistic characteristics and media; recall artists and art movements; analyze images.
2. Interpret art in context of deeper historical knowledge of specific cultures, acquire critical reading skills, integrate research.
3. Apply critical reading and writing skills, produce original interpretations, make plausible arguments based on visual and historical evidence, acquire sophisticated research abilities; formal oral presentation skills.

## ADVISING AND CAREERS

Advising questions may be directed to the undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), or the director of undergraduate studies in the department.

Each fall, the department hosts an Art History Majors and Career Fair for majors and certificate students as well as anyone interested in the field. We discuss course opportunities and internships on campus and in the community. We also invite alumni to speak about their career paths. Our director of undergraduate studies also hosts a workshop on "How to Apply to Graduate School" each fall. We also work with SuccessWorks (https:// careers.ls.wisc.edu/) to organize events for our students.

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## ASIAN AMERICAN STUDIES PROGRAM

The Asian American Studies Program is an interdisciplinary program that focuses on the scholarship and experiences of Americans, Pacific Islanders, and immigrants to the United States from Asian heritage groups. The program sheds light on Asian American experiences and concerns, both historically and in contemporary society. The certificate in Asian American studies provides students with an opportunity to develop a sustained intellectual focus on Asian American racial formation, communities, and culture. The program also serves as a teaching and resource center not only for Asian Americans but for the University and Madison community as a whole.

Courses offered by the program and through other departments incorporate the perspective of a variety of disciplines: anthropology, communication arts, cultural studies, dance, education, English, ethnic studies, film, history, human development and family studies, journalism, literature, media, political science, popular culture, psychology, sociology, theatre, and visual arts. New course topics are introduced each year. Examples of past topics include: Asian American History, Asian American Literature, Asian American Women Writers, Asian Americans in the Midwest, Hmong American Studies, Contemporary Legal Issues in Asian American Communities, Mixed Race Asian Americans, Asian American Cultural Politics, Southeast Asian Americans in US Schools, Asian American Dance, Asian Americans \& Media, Afro-Asian Improvisational Dance, Psychology of Hmong Americans, and community-based research and service-learning courses.

All program courses fulfill the ethnic studies requirement and breadth requirements in the appropriate divisions.

## RESIDENCE \& QUALITY OF WORK

- Minimum 2.000 GPA on all certificate courses
- 6 credits in the certificate, in residence

## CERTIFICATE COMPLETION REQUIREMENT

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

## ADVISING AND CAREERS

Please contact the Asian American Studies Program at asianamerican@letsci.wisc.edu to set up a career advising appointment.

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## ASIAN LANGUAGES AND CULTURES

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades, Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclearweapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures (ALC) offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the

Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

## STARTING COURSEWORK TOWARD THE MAJOR

Students may declare the Asian Languages and Cultures major at any time. Before declaring the major, students may begin coursework to explore the language and fields of interest. Those students who have studied an Asian language prior to coming to UW-Madison will have to take a placement test (https://alc.wisc.edu/languages/placementtests/) for a language offered during the academic year to determine the best class to enroll in on campus.

## STUDY ABROAD \& INTERNSHIP

The University of Wisconsin-Madison is ranked \#2 for semester-long study abroad participation among all US institutions, and \#16 among all US universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (https://www.iie.org/en/Why-IIE/ Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/).

Currently there are 60 study abroad programs across Asia. Students who participate in approved programs will receive residence credit for study abroad. More information about study abroad, application process, and costs is available through International Academic Programs (https:// www.studyabroad.wisc.edu/). With pre-planning, students may fulfill major requirements during study abroad. It is important to meet with the undergraduate advisor to create a study plan.

Students can also gain professional experience through various internship opportunities abroad. More information about internship opportunities is available through International Internship Programs (http://internships.international.wisc.edu/).

## PEOPLE

## FACULTY \& STAFF

Please visit the Asian Languages \& Cultures website (https://alc.wisc.edu/ people/) for a complete list of faculty, instructional, and academic staff.

## RESOURCES AND SCHOLARSHIPS

## CAMPUS RESOURCES

Foreign Language \& Area Studies (FLAS) Fellowships (https:// flas.wisc.edu/)
FLAS fellowships are funded by the US Department of Education and administered by UW-Madison's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.htm) and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (https://flas.wisc.edu/Languages.html)of your chosen language.

Applicants must be US citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Scholarships@UW-Madison (https://scholarships.wisc.edu/Scholarships/) This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

Undergraduate Academic Awards Office (https://
awards.advising.wisc.edu/)
We help UW-Madison undergraduates and recent graduates pursue nationally competitive scholarships (https://awards.advising.wisc.edu/scholarships/nationallycompetitive/) and campus-wide awards (https://awards.advising.wisc.edu/ scholarships/campus-wide/) for research, service, and leadershipactivities at the heart of the Wisconsin Experience. We can help you:

- Find scholarship opportunities that match your goals and interests
- Navigate the scholarship application process
- Review scholarship essays
- Prepare for national scholarship interviews

Contact us (https://awards.advising.wisc.edu/schedule-anappointment/) to schedule an appointment to discuss which opportunities are right for you.

## NATIONAL SCHOLARSHIPS

Boren Scholarships (http://borenawards.org/)
Campus Representative: Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director, International Academic Programs

These scholarships provide up to $\$ 20,000$ to US undergraduate students to study abroad in areas of the world that are critical to US interests and underrepresented in study abroad, including Africa, Asia, Central \& Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (http://borenawards.org/boren_scholarship/ preferences.html)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (http:// borenawards.org/boren_scholarship/preferences.html)).

Critical Language Scholarship Program (http://www.clscholarship.org/) Campus Representative: Mark Lilleleht (awards@iris.wisc.edu), Assistant Director, IRIS
The Critical Language Scholarship (CLS) Program is part of the US Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

## Gilman Scholarship Program

Campus Representative: Andy Quackenbush
(quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for US citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

## DEPARTMENT SCHOLARSHIPS

The Department of Asian Languages and Cultures has various scholarships to support meritorious students in our academic programs. Please visit the department website (https://alc.wisc.edu/undergraduate-studies/department-scholarships/) for more details.

## ASIAN LANGUAGES AND CULTURES, B.A.

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclearweapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

## East Asia

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

## South Asia

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

## Southeast Asia

The Southest Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; Human rights in Thailand; literature of the region; and history and politics in Southeast Asia.

## HOW TO GET IN

## PLACEMENT EXAM

The Asian Languages and Cultures department offers placement exams for students with prior language study or experience as a speaker of Chinese, Filipino, Hindi, Hmong, Indonesian, Japanese, Korean, Persian, Thai, Tibetan, Urdu, and Vietnamese. For more information, see the department's website (https://alc.wisc.edu/languages/placement-tests-2/).

## DECLARING THE MAJOR

Declaring the major is as easy as meeting with the undergraduate advisor, make an appointment to review requirements and discuss course plans on Starfish (https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/ serviceCatalog.html?bookmark=connection/10715/schedule).

Students may declare the major prior to completing the requisite language courses (1st and 2nd semester).

The Asian Languages and Cultures major has three named options. Students who intend to declare a named option may not be declared in a certificate program focused on the same region. Students may not combine the following programs:

- East Asian Studies named option and the Certificate in East Asian Studies
- South Asian Studies named option and the Certificate in South Asian Studies
- Southeast Asian Studies named option and the Certificate in Southeast Asian Studies

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education

- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of

Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

## BACHELOR OF ARTS DEGREE REQUIREMENTS

| Mathematics | Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning $B(Q R-B)$ coursework. |
| :---: | :---: |
| Foreign | - Complete the fourth unit of a foreign language; OR |
| Language | - Complete the third unit of a foreign language and the second unit of an additional foreign language. |
| L\&S Breadth | - 12 credits of Humanities, which must include 6 credits of literature; and <br> - 12 credits of Social Science; and <br> - 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course. |

| Liberal Arts and Science Coursework | Complete at least 108 credits. |
| :---: | :---: |
| Depth of Intermediate/ Advanced work | Complete at least 60 credits at the intermediate or advanced level. |
| Major | Declare and complete at least one major. |
| Total Credits | Complete at least 120 credits. |
| UW-Madison Experience | - 30 credits in residence, overall; and <br> - 30 credits in residence after the 86 th credit. |
| Quality of Work | - 2.000 in all coursework at UW-Madison <br> - 2.000 in Intermediate/Advanced level coursework at UW-Madison |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR

- 2.000 GPA in all ASIAN, ASIALANG, and approved courses for the major
- 2.000 GPA in 15 upper-level major credits, taken in residence ${ }^{2}$
- 15 credits in the major, taken in residence

## HONORS IN THE MAJOR

Students may declare Honors in the Major in consultation with the Asian Languages \& Cultures undergraduate advisor.

## HONORS IN THE MAJOR REQUIREMENTS

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:

- Earn a 3.300 University GPA
- Earn a 3.300 for all courses accepted in the major
- Complete the following coursework, with a grade of B or better:
- ASIAN 699 or any course from the list below when taken for at least 3 credits. This course must be taken before ASIAN 681

| Code | Title | Credits |

| ASIAN 672 | Studies in Chinese Fiction | 3 |

- A two-semester Senior Honors Thesis in ASIAN 681 and ASIAN 682 , for a total of 6 credits.

## FOOTNOTES

## 1

Students who test above 4th semester language must still complete a minimum of 32 credits in the major. These students may complete another language sequence or other coursework as approved by the advisor.
2
Intermediate and Advanced level major courses are upper-level.

## UNIVERSITY DEGREE REQUIREMENTS

| Total Degree | To receive a bachelor's degree from UW-Madison, <br> students must earn a minimum of 120 degree credits. <br> The requirements for some programs may exceed 120 <br> degree credits. Students should consult with their college <br> or department advisor for information on specific credit <br> requirements. |
| :--- | :--- |
| Residency | Degree candidates are required to earn a minimum of <br>  <br> 30 credits in residence at UW-Madison. "In residence" <br> means on the UW-Madison campus with an undergraduate <br> degree classification. "In residence" credit also includes |
|  | UW-Madison courses offered in distance or online formats <br> and credits earned in UW-Madison Study Abroad/Study |
|  | Away programs. |

## LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the social and cultural ties within Asia as well as between Asia and the rest of the globe.
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study a new language and culture and how to advance their proficiency as life-long learners.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

ADVISING AND CAREERS

## ADVISING

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in general education and major requirements before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style. Any and all of these discussions can occur during your advising appointment.

Rachel Weiss is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options, prepare for study abroad or advance through their four-year plans. Schedule an appointment in Starfish (https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/ serviceCatalog.html?bookmark=connection/10715/schedule).

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

## PEOPLE

## FACULTY \& STAFF

Please visit the Asian Languages \& Cultures website (https://alc.wisc.edu/ people/) for a complete list of faculty, instructional, and academic staff.

## WISCONSIN EXPERIENCE

## UNDERGRADUATE RESEARCH

Students in the Asian Languages and Cultures (ALC) department academic programs are encouraged to become engaged in undergraduate research. There are numerous programs (https:// teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduateresearch/) that provide research opportunities for undergraduates at UWMadison including:

- Hilldale Undergraduate/Faculty Research Fellowships (https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/)
- McNair Scholars (http://grad.wisc.edu/mcnair/)
- Summer Research Programs (https://grad.wisc.edu/diversity/srop/)
- Undergraduate Research Scholars (https://urs.Is.wisc.edu/)
- The Wisconsin Idea Undergraduate Fellowship Program (https:// morgridge.wisc.edu/students/wisconsin-idea-fellowships/)

## WISCONSIN SUMMER LANGUAGE INSTITUTES

Each summer around 200 undergraduate students, graduate students, professionals, and others come to UW-Madison to study a language at the Wisconsin Intensive Summer Language Institutes (WISLI) (https:// wisli.wisc.edu/). WISLI is host to five summer language institutes which offer high-quality courses in 30 less commonly taught languages:

Arabic, Persian, and Turkish Language Immersion Institute (APTLII) (https://aptlii.wisc.edu/)
Central Eurasian Studies Summer Institute (CESSI) (https:// cessi.wisc.edu/)
South Asia Summer Language Institute (SASLI) (https://sasli.wisc.edu/) Southeast Asian Studies Summer Institute (SEASSI) (https:// seassi.wisc.edu/)

## STUDY ABROAD \& INTERNSHIPS

The University of Wisconsin-Madison is ranked \#2 for semester-long study abroad participation among all US institutions, and \#16 among all US universities and colleges for total students studying abroad, according to the 2018 Open Doors Report (https://www.iie.org/en/ Why-IIE/Announcements/2018/11/2018-11-13-Number-of-International-Students-Reaches-New-High/). There are nearly 60 study abroad opportunities across Asia. Approved UW-Madison programs will allow students to receive residents credit while abroad. With pre-planning, students may also fulfill major requirements on academic programs abroad, however careful planning and discussion with your advisor are key. For more information about programs, application process, and fees, visit: International Academic Programs (https://www.studyabroad.wisc.edu/).

Students may also gain career and professional experience through various internship opportunities abroad. To review opportunities, application process, and fees, visit: International Internship Programs (http://internships.international.wisc.edu/).

## RESOURCES AND SCHOLARSHIPS

## CAMPUS RESOURCES

Foreign Language \& Area Studies (FLAS) Fellowships (https:// flas.wisc.edu/)
FLAS fellowships are funded by the US Department of Education and administered by UW-Madison's National Resource Centers to assist students in acquiring foreign language and either area or international studies competencies. FLAS awards are only available for specific languages (https://flas.wisc.edu/Languages.htm), and are contingent on federal funding. Please direct any questions to the FLAS Coordinator (https://flas.wisc.edu/Languages.html)of your chosen language.

Applicants must be US citizens or permanent residents of the United States. Applications by students in professional fields are encouraged. Preference will be given to applicants with a high level of academic ability and with previous language training. Academic Year and Summer FLAS awards are two separate competitions requiring two separate and complete applications.

Scholarships@UW-Madison (https://scholarships.wisc.edu/Scholarships/) This is the primary campus-wide portal for applicants, current students, and everyone looking for scholarship opportunities on campus.

[^4]Contact us (https://awards.advising.wisc.edu/schedule-anappointment/) to schedule an appointment to discuss which opportunities are right for you.

## NATIONAL SCHOLARSHIPS

Boren Scholarships (http://borenawards.org/)
Campus Representative: Undergraduates with questions should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs

These scholarships provide up to $\$ 20,000$ to US undergraduate students to study abroad in areas of the world that are critical to US interests and underrepresented in study abroad, including Africa, Asia, Central and Eastern Europe, Eurasia, Latin America, and the Middle East. The countries of Western Europe, Canada, Australia, and New Zealand are excluded. (Full list of preferred countries (https://borenawards.org/
eligible-programs/\#countries)) Additionally, all programs must include formal study of an appropriate foreign language. (Full list of preferred languages (https://borenawards.org/eligible-programs/\#languages)). Undergraduates with questions about the Boren Scholarship (https:// www.borenawards.org/scholarships/program-basics/boren-scholarshipbasics/) should contact Matt Geisler (mdgeisler@studyabroad.wisc.edu), Associate Director of International Academic Programs.

Critical Language Scholarship Program (http://www.clscholarship.org/) Campus Representative: Mark Lilleleht, Assistant Director for Awards, at awards@iris.wisc.edu

The Critical Language Scholarship (CLS) Program is part of the US Department of State, Bureau of Educational and Cultural Affairs. It is a fully-funded overseas intensive language and cultural immersion program for American undergraduate and graduate students. With the goal of broadening the base of Americans studying and mastering critical languages and to build relationships between the people of the United States and other countries, CLS provides opportunities to a diverse range of students from across the United States at every level of language learning.

The fourteen CLS languages are: Arabic, Azerbaijani, Bangla, Chinese, Hindi, Indonesian, Japanese, Korean, Persian, Punjabi, Russian, Swahili, Turkish, and Urdu.

The CLS Program seeks participants with diverse interests, from a wide variety of fields of study, backgrounds, and career paths, with the purpose of representing the full diversity of the United States. Thus, students from all academic disciplines, including business, engineering, law, medicine, science, social sciences, arts and humanities, are encouraged to apply.

## Gilman Scholarship Program

Campus Representative: Andy Quackenbush
(quackenbush@studyabroad.wisc.edu), Advisor, International Academic Programs

The Gilman Scholarship Program is an undergraduate grant program for US citizens of limited financial means to enable them to study abroad, thereby internationalizing their outlook and better preparing them to assume significant roles in the increasingly global economy.

## ASIAN LANGUAGES AND CULTURES: EAST ASIAN STUDIES

## East Asia

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime and counterculture. ALC faculty and instructors offering courses in this option include: C. D'Etcheverry, A. Detwyler, N. Geyer, R. Huntington, A. Kern, H. Kim, B. Lim, J. Mori, T. Nakakubo, S. Ridgely, H. Zhang, W. Zhu.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu/); Center for South Asia (https:// southasia.wisc.edu/); and Center for Southeast Asian Studies (https:// seasia.wisc.edu/).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

## REQUIREMENTS

## REQUIREMENTS FOR THE EAST ASIAN OPTION

32 credits to include the Introductory and Residence and Quality of Work requirements of the general major, plus these requirements specific to the East Asian Option:

EAST ASIAN INTERMEDIATE LANGUAGE

## FOUR-YEAR PLAN

See Four Year Plan for the Asian Languages and Cultures Major; course choices for the East Asian Studies Named Option will focus on that region.

## ASIAN LANGUAGES AND CULTURES:SOUTH ASIAN STUDIES

## South Asia

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; and probe the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia. ALC faculty and instructors offering courses in this option include: F. Asif, G. Bühnemann, S. Beckham, A. Cerulli, S. Farsiu, J. Dunne, J. Khedup, N. Tiwari.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the global health certificate, the certificate in health and the humanities, or those offered by the area studies centers: Center for East Asian Studies (https://eastasia.wisc.edu/); Center for South Asia (https:// southasia.wisc.edu/); and Center for Southeast Asian Studies (https:// seasia.wisc.edu/).

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC advisor, is especially important.

## REQUIREMENTS

## FOUR-YEAR PLAN

See Four Year Plan for the Asian Languages and Cultures Major; course choices for the Southeast Asian Studies Named Option will focus on that region.

## ASIAN LANGUAGES AND CULTURES, B.S.

The 21st century has been called the "Asian Century": indeed, many of the world's most pressing issues cannot be understood without a grasp of the histories, cultures, and languages of Asia. Asia is home to over half of the world's population. China, Japan, and India are three of the world's top economies. For decades Asian countries have been leaders in global manufacturing, and Asian universities are renowned centers for literary studies and scientific innovation. Fifty percent of the declared nuclearweapon states are also in the region. Simply put, Asia matters a great deal.

The Department of Asian Languages and Cultures offers a wide variety of courses on East, South, and Southeast Asia taught by faculty who are specialists in their regions and disciplines. Whether you are taking your first step toward learning about Asia or you bring some background experience, an ALC major will expand your ability to think and work across cultural and linguistic boundaries. Majors may opt to study Asia in a transnational and transhistorical perspective or in a more focused course of study by choosing one of our named options in East Asia, South Asia, and Southeast Asia.

To take advantage of the Department of Asian Languages and Cultures' many relationships with other departments and program units across campus, students may choose to double major or enhance their studies in ALC with one of the certificates offered at the university, such as the Certificate in Global Health, the Certificate in Health and the Humanities, or those offered by the area studies centers.

This major is interdisciplinary and offers a wealth of options. Careful planning and consultation with the ALC undergraduate advisor is especially important.

## East Asia

The East Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of China, Japan, Korea and Tibet. Students in the East Asian option can study Chinese, Japanese, Korean or Tibetan language and linguistics; and explore Chinese ghost stories and classical Chinese literature or poetry; Korean cinema and pop culture; classical Japanese fiction; early modern comedic narratives, manga, anime, and counterculture.

## South Asia

The South Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka, and Tibet. Students in the South Asian option can study Hindi, Persian, Sanskrit, Tibetan, or Urdu language; the roots of Yoga; methods of Buddhist philosophy and meditation; South Asian religion and politics in the past and present of the Indian subcontinent; and medical history in South Asia.

The Southest Asian Studies named option offers a multidisciplinary range of courses that explore the diverse and vibrant cultures, arts, histories, political systems, and literatures of Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Timor-Leste, and Vietnam. Students in the Southeast Asian option can study Burmese, Filipino, Hmong, Indonesian, Khmer, Thai, and Vietnamese language; Human rights in Thailand; literature of the region; and history and politics in Southeast Asia.

## HOW TO GET IN

## PLACEMENT EXAM

The Asian Languages and Cultures department offers placement exams for students with prior language study or experience as a speaker of Chinese, Filipino, Hindi, Hmong, Indonesian, Japanese, Korean, Persian, Thai, Tibetan, Urdu, and Vietnamese. For more information, see the department's website (https://alc.wisc.edu/languages/placement-tests-2/).

## DECLARING THE MAJOR

Declaring the major is as easy as meeting with the undergraduate advisor, make an appointment to review requirements and discuss course plans on Starfish (https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/ serviceCatalog.html?bookmark=connection/10715/schedule).

Students may declare the major prior to completing the requisite language courses (1st and 2nd semester).

The Asian Languages and Cultures major has three named options. Students who intend to declare a named option may not be declared in a certificate program focused on the same region. Students may not combine the following programs:

- East Asian Studies named option and the Certificate in East Asian Studies
- South Asian Studies named option and the Certificate in South Asian Studies
- Southeast Asian Studies named option and the Certificate in Southeast Asian Studies

## REQUIREMENTS

## UNIVERSITY GENERAL EDUCATION REQUIREMENTS

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education

- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

## BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language.

Language
L\&S Breadth Complete:

- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework

| Major | Declare and complete at least one major. |
| :--- | :--- |
| Total Credits | Complete at least 120 credits. |
| UW-Madison | Complete both: |
| Experience | $\cdot 30$ credits in residence, overall, and |
|  | $\cdot 30$ credits in residence after the 86 th credit. |
| Quality of | $\cdot 2.000$ in all coursework at UW-Madison |
| Work | $\cdot 2.000$ in Intermediate/Advanced level coursework at |
|  | UW-Madison |

## NON-L\&S STUDENTS PURSUING AN L\&S MAJOR

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

## REQUIREMENTS FOR THE MAJOR

Students must take 32 credits as follows: ${ }^{1}$

| ASIAN 671 | Drama | 3 |
| ASIAN 672 | Studies in Chinese Fiction | 3 |

- A two-semester Senior Honors Thesis in ASIAN 681 and ASIAN 682 , for a total of 6 credits.

## FOOTNOTES

## 1

Students who test above 4th semester language must still complete a minimum of 32 credits in the major. These students may complete another language sequence or other coursework as approved by the advisor.

2
Intermediate and Advanced level major courses are upper-level.

## UNIVERSITY DEGREE REQUIREMENTS

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade
Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

## LEARNING OUTCOMES

1. Broad regional grounding: Understand the variation within and similarities across Asia with reference to historical and contemporary cultural connections (people, societies, languages, literatures, religions, and cultural genres).
2. Multidisciplinarity: Become familiar and proficient with multiple perspectives scholars use to study Asia and use them as resources in their own self-reflective thinking.
3. Depth of knowledge: Employ relevant theoretical and methodological approaches to arrive at informed understandings of key issues involving the environment, human rights, cultural practices, structures of power, etc. based on an understanding of the social and cultural ties within Asia as well as between Asia and the rest of the globe.
4. Analytical skills: Critically examine taken-for-granted notions and stereotypes and to inquire into the process of their construction. They will also be able to read, analyze and explain the significance of Asian texts and artifacts (literary, cultural, historical, and popular culture).
5. Language and cultural competence: Manage basic everyday communication needs in at least one Asian language; understand the relationship between language and culture; and understand how to study a new language and culture and how to advance their proficiency as life-long learners.

## FOUR-YEAR PLAN

## SAMPLE FOUR-YEAR PLAN

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

## ADVISING AND CAREERS

## ADVISING

If you like to plan, seeing your major advisor is very important; it can make the difference between fitting in general education and major requirements before you graduate. Many students also try to complete more than one major or certificate, and discussing how you might be able to reach this goal is another primary role of your major advisor. Advisors can speak to you about course content, which courses fit best with your interest areas, and what kinds of courses might work best with your learning style. Any and all of these discussions can occur during your advising appointment.

Rachel Weiss is the advisor for the undergraduate majors and certificates in the Department of Asian Languages and Cultures. She is happy to meet with students as they explore the degree options, prepare for study abroad or advance through their four-year plans. Schedule an appointment in Starfish (https://wisc.starfishsolutions.com/starfish-ops/dl/instructor/ serviceCatalog.html?bookmark=connection/10715/schedule).

## L\&S CAREER RESOURCES

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or
