All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS-JOURNALISM (JBA)}

The School of Journalism and Mass Communication is a professional school within the College of Letters \& Sciences (L\&S). The College confers the Bachelor of Arts-Journalism (JBA) degree.

Students pursuing a Bachelor of Arts-Journalism (JBA) degree in the College of Letters \& Science must complete all of the requirements below. The JBA is a special degree program; it is not considered a major. The JBA degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

\section*{Foreign}

Complete either:
Language - the fourth unit of a foreign language; or
- the third unit of a foreign language and the second unit of a different foreign language.
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of \(\quad\) Complete at least 60 credits at the Intermediate or
Intermediate/ Advanced level.
Advanced
Coursework

\section*{REQUIREMENTS FOR THE MAJOR}

Students must complete 32 credits in major course work, to include:

\section*{INTRODUCTORY REQUIREMENTS}
\begin{tabular}{llr} 
Code & Title & Credits \\
Introduction to Journalism & \\
\hline JOURN 201 & \begin{tabular}{l} 
Introduction to Mass \\

\section*{Total Credits}

11-12

\section*{2}

Special Topics courses may count for either track, or no track, depending on Topic. Consult the advisor for this major to determine eligibility of JOURN 475 to meet a major requirement.

\section*{3}

Students planning to complete both tracks should consult with the undergraduate academic advisor about course availability and planning.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all JOURN and all major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence \({ }^{5}\)
- 15 credits in JOURN, taken on the UW-Madison campus

5
JOURN 400-699 are upper-level in the major.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Journalism undergraduate advisor.

\section*{HONORS IN THE JOURNALISM MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.400 GPA for all JOURN courses and all courses that count toward the major
- Complete one additional Topics or Advances course, for a total of two Topics or Advances courses
- Earn a grade of B or better in the four Perspectives, Topics and Advances courses
- Complete a two-semesters of Senior Honors Thesis in JOURN 681 and JOURN 682, for a total of 6 credits.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
\begin{tabular}{ll} 
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Undergraduate students must maintain the minimum grade \\
Work & \begin{tabular}{l} 
point average specified by the school, college, or academic \\
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{EARNING OUTCOMES}
1. Convey information and express ideas effectively in contemporary media.
2. Understand the responsible and ethical use of mass media.
3. Appreciate the media's relationship with social, political, legal and economic systems.
4. Think strategically, creatively and critically, to solve problems in a professional context.
5. Develop effective practices to advance inclusion and social justice in media professions and communication research.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{lcr}

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING}

For information about academic advising, see the School of Journalism and Mass Communication website (https://journalism.wisc.edu/ undergraduate/meet-with-an-advisor/).

\section*{JOB INFORMATION SERVICE}

The school provides a job listing service at current listings (https:// journalism.wisc.edu/career-services/current-listings/) on the SJMC website. Questions concerning that can be directed to Pam Garcia-Rivera.

Current students and recent alumni are encouraged to meet with the undergraduate career advisor to discuss career and internship opportunities. Students may consult the school website (http:// journalism.wisc.edu/career-services/) or with the undergraduate career advisor for specific information.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Professor and Director: Culver
Professors Downey, Friedland, Kim, McLeod, Riddle, Robinson, Rojas, D. Shah, H. Shah, Wagner
Associate Professors Culver, Graves, Palmer
Assistant Professors Cascio, Christy, McGarr, Yang

\section*{JOURNALISM, JBS}

The School of Journalism and Mass Communication (SJMC), founded in 1905, offers professional education within the context of the liberal arts degree of the College of Letters \& Science. The student earns the journalism bachelor of arts (JBA) or journalism bachelor of science (JBS) degree upon completion of the program. Students are required to complete at least one of the two professional tracks, Journalism or Strategic Communication.

The school seeks to provide students with both a broad cultural base for future careers and the competence to do professional work immediately after graduation. Of the 120 credits required for graduation, at least 21 must be in the social sciences/humanities-for example, economics, history, psychology, political science, sociology. In addition to skills courses, students are required to take courses in conceptual subjects such as law and history of mass communication, public opinion, international communication and communication theory. The student approaches mass communication as science, art, and service while relating it to many facets of society.

\section*{PRACTICAL EXPERIENCE: ORGANIZATIONS}

The school encourages students to gain practical experience through part-time jobs and internships. Student media include (but are not limited to) The Daily Cardinal, the Badger Herald (http:// www.badgerherald.com), WSUM radio (http://wsum.wisc.edu) and the Wisconsin Union Directorate Publications (https://union.wisc.edu/
get-involved/wud/publications/). Student organizations related to the school and major include (but are not limited to) the Public Relations Student Society of America (PRSSA), the Advertising Club, the Society of Professional Journalists (SPJ) and the Association for Women in Communication (AWC). Professionals from the media and related fields appear often in classes and meet with students in professional student organizations.

\section*{INTERNSHIPS}

Students planning careers as media professionals are encouraged to hold one or more internships in the area of their academic specialization(s).
Declared journalism majors or prospective Journalism majors with no other declared major may earn course credit for internships that relate to their professional tracks. As part of their degree programs, students may earn a maximum of 3 credits of JOURN 697 Internship during their undergraduate careers. Students may earn only one credit of JOURN 697 per semester, but may repeat the credit up to three times. Students who wish to earn degree credit for their internships should consult with career advisor Pam Garcia-Rivera before they accept an internship. Students must enroll in JOURN 697 at the time they hold the internship. Students who wish to enroll in JOURN 697 should see Pam Garcia-Rivera for authorization to enroll.

\section*{HOW TO GET IN}

\section*{ADMISSION TO THE JOURNALISM DEGREE PROGRAM}

Students who wish to declare themselves as degree candidates in journalism must submit an application to the School of Journalism and Mass Communication (SJMC). Applications are accepted each fall and spring semester for admission the following semester. Prospective degree candidates must present to the school a record of academic achievement, writing ability and extracurricular participation that indicate a probability of success in some field of communication.

In order to apply for admission to the school, students must have met the following requirements:
- A minimum of 24 credits completed by the end of the semester in which they apply, including transfer credits but excluding AP and retroactive language credits.
- Completion of JOURN 201 by the end of the semester in which they apply. Students may have no more than 16 credits in Journalism courses taken at UW-Madison when applying for admission.

Transfer students must be enrolled for at least one semester at UW-Madison before applying for admission to the SJMC (their first semester may be in progress at the time they submit their application). Students transferring journalism course credit from other colleges and universities should check their record of transferred credit with the SJMC undergraduate academic advisor. The academic advisor is available for consultation at most SOAR orientation sessions for transfer students.

The number of students to be admitted in a given semester is subject to change based on the school's capacity to provide adequate access to required courses. Admissions decisions are based on the entire application, with particular emphasis on academic performance and writing ability. Specific guidelines for submitting the application portfolio are available online at this link (http://journalism.wisc.edu/undergraduate/ admissions/the-application/) or in SJMC academic advising. The
academic advisor conducts one-hour information sessions for applicants each semester, with dates and times listed on the application; these sessions are highly recommended and provide more information for applicants than is possible in a one-on-one advising meeting.

After admission to the school, the student's classification will be changed to JBA or JBS to reflect this change in status.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE-JOURNALISM (JBS)}

The School of Journalism and Mass Communication is a professional school within the College of Letters \& Sciences (L\&S). The College confers the Bachelor of Science-Journalism (JBS) degree.

Students pursuing a Bachelor of Science-Journalism (JBS) degree in the College of Letters \& Science must complete all of the requirements below. The JBS is a special degree program; it is not considered a major. The JBS degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

\section*{BACHELOR OF SCIENCE-JOURNALISM DEGREE REQUIREMENTS}

Mathematics
Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign
Language \(\quad\)\begin{tabular}{ll} 
Complete the third unit of a foreign language.
\end{tabular}

\section*{REQUIREMENTS FOR THE MAJOR}

Students must complete 32 credits in major course work, to include:

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING}

For information about academic advising, see the School of Journalism and Mass Communication website (https://journalism.wisc.edu/ undergraduate/meet-with-an-advisor/).

\section*{JOB INFORMATION SERVICE}

The school provides a job listing service at current listings (https:// journalism.wisc.edu/career-services/current-listings/) on the SJMC website. Questions concerning that can be directed to Pam Garcia-Rivera.

Current students and recent alumni are encouraged to meet with the undergraduate career advisor to discuss career and internship opportunities. Students may consult the school website (http:// journalism.wisc.edu/career-services/) or with the undergraduate career advisor for specific information.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

Professor and Director: Culver
Professors Downey, Friedland, Kim, McLeod, Riddle, Robinson, Rojas, D. Shah, H. Shah, Wagner
Associate Professors Culver, Graves, Palmer
Assistant Professors Cascio, Christy, McGarr, Yang

\section*{SPORTS COMMUNICATION, CERTIFICATE}

The Certificate in Sports Communication is a 12-credit program that provides students with practical skills training and knowledge for success in the growing professions of sports journalism/broadcasting and sports strategic communication (sports marketing communication, and media/ public relations). The program also includes coursework on sports, media and society. This program serves both Journalism majors (as an elective sequence) and non-Journalism majors (providing an opportunity for them to take professional skills courses in journalism and strategic communication). Many of these courses can be taken online and over the summer to maximize flexibility for student schedules.

The certificate includes a required Introduction to Sports Communication, a choice of professional skills courses on either Sports Marketing

Communications or Advanced Sports Communication and a Social Impacts course. Students will take a final elective course, which can be a professional enrichment course such as an internship, careers colloquium or directed study.

\section*{HOW TO GET IN}

The Certificate in Sports Communication will be open to any University of Wisconsin-Madison undergraduate. Students may declare or cancel the certificate at any time in consultation with the School of Journalism and Mass Communication undergraduate advisor and administrative staff.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

The certificate requires 12 credits as follows: \({ }^{1}\)
\begin{tabular}{|llr|}
\hline \begin{tabular}{l} 
Code \\
Survey Course:
\end{tabular} & Title & Credits \\
\hline JOURN 150 & \begin{tabular}{l}

\end{tabular}
\end{tabular}

Elective credit from any course above to achieve 12 0-2 credits
Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 2.000 GPA on all certificate-approved courses
- At least 6 credits in the certificate must be taken in residence

1
Courses taken on a Pass/Fail basis do meet requirements of the certificate.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Students will be able to convey information and express ideas pertaining to sports effectively in contemporary media.
2. Students will understand the responsible and ethical use of mass media to disseminate information to sports-interested audiences.
3. Students will be able to articulate the role of sports in culture and society and the media's relationship to that role.
4. Students will be able to think strategically, creatively and critically to meet the demands and challenges of informing the public about sports while understanding the norms of amateur and professional sports organizations.

\section*{ADVISING AND CAREERS}

Matt Hermann is the undergraduate advisor for the Sports
Communication Certificate. Students are encouraged to meet with Herman when they have questions about the courses and requirements for the certificate. Contact him by email at mrhermann@wisc.edu.

The Sports Certificate Program encourages students to get involved in sports-related internships and career-building courses (see certificate requirements). Students seeking assistance in securing internships and/or planning their careers should contact Pamela GarciaRivera, Media, Information and Communication Career Advisor. Contact her by email at pgarciariver@wisc.edu.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

\section*{SOCIOLOGY}

Sociology applies the methods of science to explain social behavior. The interactions of individuals in families, groups, or organizations, and the institutions, social class, or shared beliefs of a common culture are all subjects for sociological research. There are many career opportunities open to people who complete a major in sociology, including business, counseling and social service, public policy, law, and criminal justice.

Students interested in sociology should meet with the undergraduate advisor before they register for the second semester of the sophomore year. The undergraduate office's resource center holds detailed information about the major, the department, research interests of sociology faculty, career opportunities, and student work. Declaration of the major during the sophomore year will give students access to required sociology courses for fall of the junior year.

\section*{CRIMINAL JUSTICE CERTIFICATE}

Sociology majors wishing to earn a certificate in criminal justice may do so with a minimum of additional course requirements and permission of the Criminal Justice advisor. See Criminal Justice (p. 551) section in this Guide.

\section*{ENROLLMENT}

Required courses for the sociology major and for the CAR option may have temporary course controls that send non-declared students "Course Requisites Not Met" enrollment error messages. Certain 100-numbered courses each semester are restricted to freshmen and sophomores until freshmen have enrolled. Check the Course Guide for notes each semester.

Transfer students whose equivalent courses have been posted to their records as "electives," numbered XXX, may use those courses as prerequisites if the department approves their equivalencies to similar UW-Madison courses. What is needed is a conversation with the undergraduate advisor either in the office or at SOAR.

\section*{HONORS PROGRAM}

A variety of courses in sociology offer honors credit, and may be used toward Honors in the Liberal Arts in the College of Letters \& Science.

These include the special honors introductory seminar, Sociology 181, Sociology 380 Contemporary Population Problems, other special honors sections of 100-and 200-level courses, and courses that provide honors by arrangement with the instructor. Sociology also has courses that award automatic honors, including SOC 362 Statistics for Sociologists III and SOC/C\&E SOC 693 Practicum in Analysis and Research, and certain other upper-division courses designated by semester in the Course Guide. Sociology also makes special offerings of upper-level courses available to sophomores in the honors program for one semester at a time.

Assistant Professors Goffman, Jensen

\title{
INTEGRATED STUDIES IN SCIENCE, ENGINEERING, AND SOCIETY, CERTIFICATE
}

The certificate in Integrated Studies in Science, Engineering, and Society Undergraduate (ISSuES) offers undergraduate students an opportunity to explore the social sciences and humanities in a way that emphasizes the relationship between science, technology, medicine, engineering, and society. From energy to communications technologies to gene editing to automation, the interplay between researchers, developers, policy makers and the public is constantly shaping and reshaping our world. The ISSuES certificate allows undergraduate students to complement their majors with a set of courses aimed at helping them understand how society shapes science and how science shapes society.

Offered by the Holtz Center for Science \& Technology Studies, ISSuES was designed to help STEM-field majors fulfill their liberal arts requirements, but is highly flexible and is available to all undergraduate students interested in exploring the complex interplay between science, technology, medicine, engineering, and society. For more information, see the program website (http://sts.wisc.edu).

\section*{HOW TO GET IN}

The certificate in integrated studies in science, engineering and society is offered to all undergraduate students. Students should begin the application process by the end of sophomore year, but no later than the end of their junior year.

The first step in applying to the program is to consult with the ISSuES certificate advisor. To make an appointment, please send an email to sts@ssc.wisc.edu.

\section*{Total Credits}

\section*{1}

Courses taken with the pass/fail grade option do not apply to the certificate.

2

Courses used for the Focus area cannot also count for Capstone.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA on all courses counting toward the certificate and certificate approved courses
- 8 credits in the certificate, in residence

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Be exposed to the social sciences and humanities and see their relevance to scientific and technological enterprises.
2. Develop the capacity for interdisciplinary, critical thinking about the relationship between science, technology, engineering, medicine and society.
3. Develop a sense of personal and social responsibility for their engineering, scientific or other professional practice.
4. Strengthen written communication skills.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

To obtain advising assistance, students should consult with the ISSuES certificate advisor. To make an appointment, send an email to sts@ssc.wisc.edu.

All UW-Madison undergraduates are encouraged to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Scence. L\&S graduates are in high demand by employers and graduate programs, and the ISSuES certificate provides students with a way to integrate their liberal studies with the skills they are developing in their majors. It is important to us that our students are career ready at the time of graduation, and we are committed to your success. Students who have completed the certificate say that it helped them enhance the portfolio of skills they offered to employers and graduate programs by giving them foundations for understanding and communicating effectively about the ethical, policy, design, and other non-technical aspects of science, engineering and medicine.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

Sociology applies the methods of science to explain social behavior. The interactions of individuals in families, groups, or organizations, and the institutions, social class, or shared beliefs of a common culture are all subjects for sociological research. There are many career opportunities open to people who complete a major in sociology, including business, counseling and social service, public policy, law, and criminal justice.

Students interested in sociology should meet with the undergraduate advisor before they register for the second semester of the sophomore year. The undergraduate office's resource center holds detailed information about the major, the department, research interests of sociology faculty, career opportunities, and student work. Declaration of the major during the sophomore year will give students access to required sociology courses for fall of the junior year.

\section*{CRIMINAL JUSTICE CERTIFICATE}

Sociology majors wishing to earn a certificate in criminal justice may do so with a minimum of additional course requirements and permission of the Criminal Justice advisor. See Criminal Justice (p. 551) section in this Guide.

\section*{ENROLLMENT}

Required courses for the sociology major and for the CAR option may have temporary course controls that send non-declared students "Course Requisites Not Met" enrollment error messages. Certain 100-numbered courses each semester are restricted to freshmen and sophomores until freshmen have enrolled. Check the Course Guide for notes each semester.

Transfer students whose equivalent courses have been posted to their records as "electives," numbered XXX, may use those courses as prerequisites if the department approves their equivalencies to similar UW-Madison courses. What is needed is a conversation with the undergraduate advisor either in the office or at SOAR.

\section*{HONORS PROGRAM}

A variety of courses in sociology offer honors credit, and may be used toward Honors in the Liberal Arts in the College of Letters \& Science. These include the special honors introductory seminar, Sociology 181, Sociology 380 Contemporary Population Problems, other special honors sections of 100- and 200-level courses, and courses that provide honors by arrangement with the instructor. Sociology also has courses that award automatic honors, including SOC 362 Statistics for Sociologists III and SOC/C\&E SOC 693 Practicum in Analysis and Research, and certain other upper-division courses designated by semester in the Course Guide. Sociology also makes special offerings of upper-level courses available to sophomores in the honors program for one semester at a time.

\section*{HOW TO GET IN}

Students must meet with the undergraduate advisor and review the requirements prior to declaring the major.

To declare the Concentration in Analysis and Research, students must have completed SOC/C\&E SOC 360 and SOC/C\&E SOC 357 with a 3.000 GPA between the two courses.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Foreign - Complete the fourth unit of a foreign language; OR

Language - Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth • 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & \(\cdot 30\) credits in residence, overall; and \\
Experience & \(\cdot 30\) credits in residence after the 86 th credit.
\end{tabular}

Quality of
Work
- 2.000 in all coursework at UW-Madison
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

A minimum of 30 credits in SOC courses is required for the basic major. Students are strongly encouraged to complete the Foundation courses as early as possible; these courses are prerequisites for most upper-level SOC courses.

\section*{FOUNDATION (CORE)}

1
Students may take methods and statistics in the same semester. If students take methods and statistics in different semesters, we recommend taking methods before statistics as an entry point to the methods and materials of the field.

\section*{2}

Statistics courses taken outside of the SOC subject do not count for 30credits required in the major, nor are they upper level in the major.

\section*{DISTRIBUTION}

4 courses from at least 2 of these areas:
Methods/Statistics
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline SOC 351 & Introduction to Survey Methods for Social Research & 3 \\
\hline SOC/C\&E SOC 361 & Statistics for Sociologists II & 4 \\
\hline SOC 362 & Statistics for Sociologists III & 4 \\
\hline SOC/C\&E SOC 365 & Data Management for Social Science Research & 3-4 \\
\hline SOC 375 & Introduction to Mathematical Sociology & 3 \\
\hline SOC 376 & Mathematical Models of Social Systems & 3 \\
\hline SOC 461 & Study Abroad in Additional Methods and Statistics & 1-6 \\
\hline \multicolumn{3}{|l|}{Theory} \\

SOC courses numbered 300-699 are upper level, except for: C\&E SOC/ SOC 357, C\&E SOC/SOC 360, LEGAL ST/SOC 415, PSYCH/SOC 453, and SOC 497.

\section*{SOCIOLOGY: CONCENTRATION IN ANALYSIS AND RESEARCH OPTION}

View as listView as grid

\section*{- SOCIOLOGY: CONCENTRATION IN ANALYSIS AND RESEARCH (P. 1391)}

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Sociology Major in consultation with the Sociology undergraduate advisor.

\section*{HONORS IN THE SOCIOLOGY MAJOR: REQUIREMENTS}

To earn Honors in the Major in Sociology, students must satisfy the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 Unversity GPA
- Earn a 3.300 GPA for all SOC courses, and all courses accepted in the major
- Complete 21 credits, taken for Honors, with individual grades of \(B\) or better, to include:
\begin{tabular}{llr} 
Code & Title & Credits \\
SOC/C\&E SOC & 357 & Methods of Sociological Inquiry
\end{tabular}
\begin{tabular}{lll} 
SOC 681 & Senior Honors Thesis & 3 \\
SOC 682 & Senior Honors Thesis & 3
\end{tabular}

The remaining Honors credits, to reach the 21 credit minimum, must be in courses at or above the 300 level.

Students may declare the Concentration in Analysis and Research ("CAR"). Speak to the major advisor about this option.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. (Conduct Research and Analyze Data) Sociology encompasses both qualitative and quantitative research methods. Quantitative methods are used in market research, opinion polling, sales, government, and countless other applications and allow researchers to recognize trends and patterns and produce social statistics. Qualitative research skills provide an in depth understanding of interactions, communications, worksite practices, and social worlds. Advanced sociological research methods require graduate\#level training beyond the scope of our undergraduate major, but we expect that all undergraduate majors will be able to conduct small-scale research using surveys, interviews, experiments, textual analysis or observations in which they formulate a research question, collect data, analyze results, and draw conclusions.
2. (Critically Evaluate Published Research) Sociology graduates will be able to read and evaluate published research as it appears in academic journals and popular or policy publications. They will be able to identify the research methods used, assess the quality of the sample, assess the quality of measurements and procedures, evaluate the links between the data and the interpretations, identify possible threats to the validity of the results, and provide an overall assessment of the trustworthiness of the research results. They will be able to read and evaluate a set of research articles on the same broad issue and be able to draw summarize the research findings across multiple issue.
3. (Communicate Skillfully) Because the sociology major involves a large amount of reading, writing, and discussion, majors learn how to convey ideas effectively in writing, presentations, and everyday conferences and meetings. Sociology majors write papers and make
oral presentations that build arguments and assess evidence in a clear and effective manner.
4. (Critical Thinking about Society and Social Processes) Sociological inquiry involves learning to look beyond the surface of issues to discover the "why" and "how" of social order and structure. Sociology majors develop strong analytical skills and learn to solve problems and identify opportunities. They are able to consider the underlying social mechanisms that may be creating a situation, identify evidence that may adjudicate between alternate explanations for phenomena, and develop proposed policies or action plans in light of theory and data.
5. (See Things from a Global Perspective) Sociologists learn about different cultures, groups, and societies. They examine both variation and universality across places and through history. They are aware of the diversity of backgrounds and experiences among residents of the United States. They understand the ways events and processes in one country are linked to those in other countries.
6. (Prepare for Graduate School and the Job Market) An undergraduate major in sociology provides an excellent foundation for work and graduate study in a wide range of fields including law, business, social work, medicine, policy research, public health, public administration and, of course, sociology. With the aid of faculty and staff, students use their social research skills to identify opportunities for employment or further study, assess their qualifications for these opportunities, and identify strategies for gaining the necessary knowledge and experience to improve their qualifications. Students are encouraged to develop and maintain portfolios of their written work and educational experiences to aid them in preparing applications.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

This university is a very big place. Even the most well-prepared new students will have moments when they say to themselves, "Uh oh. What have I got myself into going to such a big school? Choosing courses at SOAR was stressful, fun, or both, but after SOAR am I on my own?" The answer is no. Every student has at least one assigned advisor. Over the course of their time at the university, students may have several assigned advisors. That is a good thing; L\&S advisors are highly networked, and they always communicate with each other about shared students.

4 When students read their DARS reports-documents that were developed to help them find their way to a timely graduation, they can feel overwhelmed; it looks like they need 500 credits to graduate. How can they get all those requirements done? Do sociology (or Spanish, or English) majors really have to take biology courses?

In the Sociology Department, we take advising very seriously. We encourage our majors to see the advisor at least once every semester. The advisor will help you summarize the DARS and map your completed coursework onto the goals and timeline for graduation, including the sociology major and L\&S requirements. The sociology advisor will have departmental or college news about guest speakers, new faculty, new courses, internships, and scholarships. This advisor will also be able to assist in preparation for, and applications to graduate school, and be able to connect students with faculty whose information about various sociology programs is always the most current. The sociology advisor will also see freshmen and sophomores exploring the major in sociology. See
academic advising (https://sociology.wisc.edu/undergraduate-program/ academic-advising/) for more information.

\section*{PREREQUISITES, L\&S BREADTH, AND COURSE LEVELS}

Sociology course numbers over 300 indicate subject matter rather than level of difficulty. Unless indicated otherwise, prerequisites at the upper level are junior standing and an introductory course in sociology or consent of instructor.

Most courses in sociology count toward the social studies breadth requirement. Courses SOC/GEN\&WS 200 Introduction to Lesbian, Gay, Bisexual, Transgender and Queer+ Studies, SOC/ASIAN/GEOG/ HISTORY/POLI SCI 244 Introduction to Southeast Asia: Vietnam to the Philippines, and SOC/AFRICAN/AFROAMER/ANTHRO/GEOG/ HISTORY/POLI SCI 277 Africa: An Introductory Survey count toward breadth requirements in either humanities or social studies. The following do not count toward any breadth requirement:
\begin{tabular}{llr} 
Code & Title & Credits \\
SOC/C\&E SOC & 357 & Methods of Sociological Inquiry
\end{tabular}

\section*{CAREERS}

Sociology majors do very well in the job market. The critical, analytic, and quantitative skills they have mastered in the major, along with their commitments to social justice and their understanding of organizations make them desirable job candidates. Every year the department invites sociology alumni to campus for career panels or "speed mentoring." Current sociology majors get to talk to people only slightly older than themselves who have successfully made the transitions from undergraduate to professional.

Sociology also has an advisor devoted exclusively to careers. This advisor teaches a 1-credit course where students learn the arts of resume building and resume writing, applying for and getting internships, and in which they practice self-reflection activities which lead to insights about what they really want to do after college, and where they learn how to make connections between their academic work and their work in the "real world." This advisor is also available for one-on-one advising.

Our career advisor also partners with the L\&S Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers). See SuccessWorks for more information.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Faculty: Professors Schwartz (chair, Sociology), Borman (affiliated), Carlson, Elwert, Emirbayer, Ermakoff, Fletcher, Freeland, Friedland (affiliated), Fujimura, Gerber, Goldberg, Grodsky, Lim, Logan, Massoglia, Maynard, Montgomery, Morales (affiliated), Nobles, Nordheim (affiliated), Rogers (director, COWS), Schaeffer (director, UWSC), Seidman, Thornton (affiliated); Associate Professors Christens (affiliated), Conti, Eason, Engelman, Feinstein, Grant (director, Graduate Studies), Higgins (affiliated), Light, Shoemaker (affiliated); Assistant Professors Addo (affiliated), Conwell, Halpern-Meekin (affiliated), Jensen, Leachman (affiliated), O'Brien (affiliated), Oh, Simmons (affiliated), Xiong (affiliated).

For more information about individual faculty members, the research they do, and the classes they teach, see the Sociology web page (https:// sociology.wisc.edu/faculty/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE: ESSENTIAL LEARNING IN THE COLLEGE OF LETTERS \& SCIENCE}

The three elements of learning described below-tools, breadth, and depth-work together to create a broad and rich education in the liberal arts and sciences, and promote attainment of core areas of essential learning: knowledge of human cultures and the natural and physical world, intellectual and practical skills, personal and social responsibility, and integrative and applied learning. These and countless other experiences
comprise the Letters \& Science approach to helping students obtain a distinctive Wisconsin Experience.

Additional information about the Wisconsin Experience can be found through the Office of Admissions and Recruitment/Why UW link (https:// www.admissions.wisc.edu/why/wisconsin_experience.php).

\section*{SOCIOLOGY: \\ CONCENTRATIONIN ANALYSIS AND RESEARCH}

REQUIREMENTS

The Concentration in Analysis and Research-an elective option within the undergraduate sociology major-is designed for students who do well and are interested in research methods and statistics. CAR prepares students for entry-level jobs in applied social research and/or for graduate study. Key features of the concentration include advanced statistics courses, training in social science computing, and research. By selecting appropriate electives and internships, students may focus their training on demography, survey research, marketing and communications, criminal justice, health care, education, social services, natural resources, organizations, or personnel and human resources.

\section*{REQUIREMENTS FOR THE CAR OPTION (CAR)}

36 CREDITS OF SOC, TO INCLUDE: \({ }^{1}\)
All requirements for the general Sociology major
All students are required to take four foundation core courses (Introduction, Research, Statistics, and Theory) and additional CAR Distribution courses in Statistics, Research, Computing, and Practicum that build on prior sociological and social scientific knowledge from the foundation core courses.

Students are strongly encouraged to complete the four required foundation core courses as early as possible. These foundation courses are prerequisites for most upper-level courses and the option has several sequenced courses, some of which are taught only once a year.

\section*{REQUIREMENTS}

36 credits in SOC courses to include Foundation (Core) requirements for the general Sociology major (above), plus these CAR-specific requirements: \({ }^{1}\)

\section*{CAR REQUIREMENTS}

\section*{Code \\ Title}

\hline
\end{tabular}

Total Credits

1
Although students may choose courses outside of the SOC subject to meet some requirements of the CAR option, all 36 of the credits required for this major option must be in SOC courses.

In addition, students must complete the Residence \& Quality of Work requirement which includes 15 credits of Upper Level work in the major, taken in Residence. Major courses outside of SOC do compute into the major GPA, but are not considered Upper Level for purposes of this requirement.

\section*{2}

Unlike the general major, CAR option students are required to complete two (not four) courses in distribution, among the courses listed as Research Electives.

\section*{CAR OPTION QUALITY OF WORK}

A minimum 3.000 GPA on all CAR-specific courses is required at the time of graduation.

\section*{Fourth Year}
\(\begin{array}{lcr}\text { Fall } & \text { Credits } & \text { Spring }\end{array}\) Credits \(\left.\begin{array}{lr}\text { SOC Distribution (upper } & 3 \text { SOC/C\&E SOC 693 }\end{array}\right) 3\)

\section*{Total Credits 120}

Sociology applies the methods of science to explain social behavior. The interactions of individuals in families, groups, or organizations, and the institutions, social class, or shared beliefs of a common culture are all subjects for sociological research. There are many career opportunities open to people who complete a major in sociology, including business, counseling and social service, public policy, law, and criminal justice.

Students interested in sociology should meet with the undergraduate advisor before they register for the second semester of the sophomore year. The undergraduate office's resource center holds detailed information about the major, the department, research interests of sociology faculty, career opportunities, and student work. Declaration of the major during the sophomore year will give students access to required sociology courses for fall of the junior year.

\section*{CRIMINAL JUSTICE CERTIFICATE}

Sociology majors wishing to earn a certificate in criminal justice may do so with a minimum of additional course requirements and permission of the Criminal Justice advisor. See Criminal Justice (p. 551) section in this Guide.

\section*{ENROLLMENT}

Required courses for the sociology major and for the CAR option may have temporary course controls that send non-declared students "Course Requisites Not Met" enrollment error messages. Certain 100-numbered courses each semester are restricted to freshmen and sophomores until freshmen have enrolled. Check the Course Guide for notes each semester.

Transfer students whose equivalent courses have been posted to their records as "electives," numbered XXX, may use those courses as prerequisites if the department approves their equivalencies to similar UW-Madison courses. What is needed is a conversation with the undergraduate advisor either in the office or at SOAR.

\section*{HONORS PROGRAM}

A variety of courses in sociology offer honors credit, and may be used toward Honors in the Liberal Arts in the College of Letters \& Science. These include the special honors introductory seminar, Sociology 181, Sociology 380 Contemporary Population Problems, other special honors sections of 100- and 200-level courses, and courses that provide honors by arrangement with the instructor. Sociology also has courses that award automatic honors, including SOC 362 Statistics for Sociologists III and SOC/C\&E SOC 693 Practicum in Analysis and Research, and certain other upper-division courses designated by semester in the Course Guide. Sociology also makes special offerings of upper-level courses available to sophomores in the honors program for one semester at a time.

\section*{HOW TO GET IN}

Students must meet with the undergraduate advisor and review the requirements prior to declaring the major.

To declare the Concentration in Analysis and Research, students must have completed SOC/C\&E SOC 360 and SOC/C\&E SOC 357 with a 3.000 GPA between the two courses.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCl and STAT subjects counts toward this requirement.
Foreign

\section*{Language}

L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts
Complete at least 108 credits.
and Science
Coursework

Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

A minimum of 30 credits in SOC courses is required for the basic major. Students are strongly encouraged to complete the Foundation courses as early as possible; these courses are prerequisites for most upper-level SOC courses.

\section*{FOUNDATION (CORE)}
\begin{tabular}{|c|c|c|}

\section*{ELECTIVES}

Additional SOC courses to achieve the required 30 credits for the major. \({ }^{4}\)
4
A maximum one introductory course (SOC 181, SOC/C\&E SOC 210,
SOC/C\&E SOC 211) may count toward the 30 required for the major.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all SOC courses and courses that count toward the major
- 2.000 GPA on 15 upper-level major credits, taken in Residence \({ }^{5}\)
- 15 credits in SOC, taken on the UW-Madison campus

\section*{5}

SOC courses numbered 300-699 are upper level, except for: C\&E SOC/ SOC 357, C\&E SOC/SOC 360, LEGAL ST/SOC 415, PSYCH/SOC 453, and SOC 497.

\section*{SOCIOLOGY: CONCENTRATION IN ANALYSIS AND RESEARCH OPTION}

View as listView as grid

\section*{- SOCIOLOGY: CONCENTRATION IN ANALYSIS AND RESEARCH (P. 1391)}

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Sociology Major in consultation with the Sociology undergraduate advisor.

\section*{HONORS IN THE SOCIOLOGY MAJOR: REQUIREMENTS}

To earn Honors in the Major in Sociology, students must satisfy the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 Unversity GPA
- Earn a 3.300 GPA for all SOC courses, and all courses accepted in the major
- Complete 21 credits, taken for Honors, with individual grades of B or better, to include:
\begin{tabular}{llr} 
Code & Title & Credits \\
SOC/C\&E SOC & 357 & Methods of Sociological Inquiry
\end{tabular}

3 The remaining Honors credits, to reach the 21 credit minimum, must be in courses at or above the 300 level.

Students may declare the Concentration in Analysis and Research ("CAR"). Speak to the major advisor about this option.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. (Conduct Research and Analyze Data) Sociology encompasses both qualitative and quantitative research methods. Quantitative methods are used in market research, opinion polling, sales, government, and countless other applications and allow researchers to recognize trends and patterns and produce social statistics. Qualitative research skills provide an in depth understanding of interactions, communications, worksite practices, and social worlds. Advanced sociological research methods require graduate\#level training beyond the scope of our undergraduate major, but we expect that all undergraduate majors will be able to conduct small-scale research using surveys, interviews, experiments, textual analysis or observations in which they formulate a research question, collect data, analyze results, and draw conclusions.
2. (Critically Evaluate Published Research) Sociology graduates will be able to read and evaluate published research as it appears in academic journals and popular or policy publications. They will be able to identify the research methods used, assess the quality of the sample, assess the quality of measurements and procedures, evaluate the links between the data and the interpretations, identify possible threats to the validity of the results, and provide an overall assessment of the trustworthiness of the research results. They will be able to read and evaluate a set of research articles on the same broad issue and be able to draw summarize the research findings across multiple issue.
3. (Communicate Skillfully) Because the sociology major involves a large amount of reading, writing, and discussion, majors learn how to convey ideas effectively in writing, presentations, and everyday conferences and meetings. Sociology majors write papers and make oral presentations that build arguments and assess evidence in a clear and effective manner.
4. (Critical Thinking about Society and Social Processes) Sociological inquiry involves learning to look beyond the surface of issues to
discover the "why" and "how" of social order and structure. Sociology majors develop strong analytical skills and learn to solve problems and identify opportunities. They are able to consider the underlying social mechanisms that may be creating a situation, identify evidence that may adjudicate between alternate explanations for phenomena, and develop proposed policies or action plans in light of theory and data.
5. (See Things from a Global Perspective) Sociologists learn about different cultures, groups, and societies. They examine both variation and universality across places and through history. They are aware of the diversity of backgrounds and experiences among residents of the United States. They understand the ways events and processes in one country are linked to those in other countries.
6. (Prepare for Graduate School and the Job Market) An undergraduate major in sociology provides an excellent foundation for work and graduate study in a wide range of fields including law, business, social work, medicine, policy research, public health, public administration and, of course, sociology. With the aid of faculty and staff, students use their social research skills to identify opportunities for employment or further study, assess their qualifications for these opportunities, and identify strategies for gaining the necessary knowledge and experience to improve their qualifications. Students are encouraged to develop and maintain portfolios of their written work and educational experiences to aid them in preparing applications.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}

\hline
\end{tabular}

\section*{Total Credits 120}

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

This university is a very big place. Even the most well-prepared new students will have moments when they say to themselves, "Uh oh. What have I got myself into going to such a big school? Choosing courses at SOAR was stressful, fun, or both, but after SOAR am I on my own?" The answer is no. Every student has at least one assigned advisor. Over the course of their time at the university, students may have several assigned advisors. That is a good thing; L\&S advisors are highly networked, and they always communicate with each other about shared students.

When students read their DARS reports-documents that were developed to help them find their way to a timely graduation, they can feel overwhelmed; it looks like they need 500 credits to graduate. How can they get all those requirements done? Do sociology (or Spanish, or English) majors really have to take biology courses?

In the Sociology Department, we take advising very seriously. We encourage our majors to see the advisor at least once every semester. The advisor will help you summarize the DARS and map your completed coursework onto the goals and timeline for graduation, including the sociology major and L\&S requirements. The sociology advisor will have departmental or college news about guest speakers, new faculty, new courses, internships, and scholarships. This advisor will also be able to assist in preparation for, and applications to graduate school, and be able to connect students with faculty whose information about various sociology programs is always the most current. The sociology advisor will also see freshmen and sophomores exploring the major in sociology. See academic advising (https://sociology.wisc.edu/undergraduate-program/ academic-advising/) for more information.

\section*{PREREQUISITES, L\&S BREADTH, AND COURSE LEVELS}

Sociology course numbers over 300 indicate subject matter rather than level of difficulty. Unless indicated otherwise, prerequisites at the upper
level are junior standing and an introductory course in sociology or consent of instructor.

Most courses in sociology count toward the social studies breadth requirement. Courses SOC/GEN\&WS 200 Introduction to Lesbian, Gay, Bisexual, Transgender and Queer+ Studies, SOC/ASIAN/GEOG/ HISTORY/POLI SCI 244 Introduction to Southeast Asia: Vietnam to the Philippines, and SOC/AFRICAN/AFROAMER/ANTHRO/GEOG/ HISTORY/POLI SCI 277 Africa: An Introductory Survey count toward breadth requirements in either humanities or social studies. The following do not count toward any breadth requirement:
\begin{tabular}{llr} 
Code & Title & Credits \\
SOC/C\&E SOC & 357 & Methods of Sociological Inquiry
\end{tabular}

\section*{CAREERS}

Sociology majors do very well in the job market. The critical, analytic, and quantitative skills they have mastered in the major, along with their commitments to social justice and their understanding of organizations make them desirable job candidates. Every year the department invites sociology alumni to campus for career panels or "speed mentoring." Current sociology majors get to talk to people only slightly older than themselves who have successfully made the transitions from undergraduate to professional.

Sociology also has an advisor devoted exclusively to careers. This advisor teaches a 1-credit course where students learn the arts of resume building and resume writing, applying for and getting internships, and in which they practice self-reflection activities which lead to insights about what they really want to do after college, and where they learn how to make connections between their academic work and their work in the "real world." This advisor is also available for one-on-one advising.

Our career advisor also partners with the L\&S Career Services office to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers). See SuccessWorks for more information.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or
graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Faculty: Professors Schwartz (chair, Sociology), Borman (affiliated), Carlson, Elwert, Emirbayer, Ermakoff, Fletcher, Freeland, Friedland (affiliated), Fujimura, Gerber, Goldberg, Grodsky, Lim, Logan, Massoglia, Maynard, Montgomery, Morales (affiliated), Nobles, Nordheim (affiliated), Rogers (director, COWS), Schaeffer (director, UWSC), Seidman, Thornton (affiliated); Associate Professors Christens (affiliated), Conti, Eason, Engelman, Feinstein, Grant (director, Graduate Studies), Higgins (affiliated), Light, Shoemaker (affiliated); Assistant Professors Addo (affiliated), Conwell, Halpern-Meekin (affiliated), Jensen, Leachman (affiliated), O'Brien (affiliated), Oh, Simmons (affiliated), Xiong (affiliated).

For more information about individual faculty members, the research they do, and the classes they teach, see the Sociology web page (https:// sociology.wisc.edu/faculty/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE: ESSENTIAL LEARNING IN THE COLLEGE OF LETTERS \& SCIENCE}

The three elements of learning described below-tools, breadth, and depth-work together to create a broad and rich education in the liberal arts and sciences, and promote attainment of core areas of essential learning: knowledge of human cultures and the natural and physical world, intellectual and practical skills, personal and social responsibility, and integrative and applied learning. These and countless other experiences comprise the Letters \& Science approach to helping students obtain a distinctive Wisconsin Experience.

Additional information about the Wisconsin Experience can be found through the Office of Admissions and Recruitment/Why UW link (https:// www.admissions.wisc.edu/why/wisconsin_experience.php).

\section*{SOCIOLOGY: CONCENTRATION IN ANALYSIS AND RESEARCH}

\section*{REQUIREMENTS}

The Concentration in Analysis and Research-an elective option within the undergraduate sociology major-is designed for students who do well and are interested in research methods and statistics. CAR prepares students for entry-level jobs in applied social research and/or for graduate study. Key features of the concentration include advanced statistics courses, training in social science computing, and research. By selecting appropriate electives and internships, students may focus their training on demography, survey research, marketing and communications, criminal justice, health care, education, social services, natural resources, organizations, or personnel and human resources.

\section*{REQUIREMENTS FOR THE CAR OPTION (CAR) \\ 36 CREDITS OF SOC, TO INCLUDE: \({ }^{1}\)}

All requirements for the general Sociology major
All students are required to take four foundation core courses (Introduction, Research, Statistics, and Theory) and additional CAR Distribution courses in Statistics, Research, Computing, and Practicum that build on prior sociological and social scientific knowledge from the foundation core courses.

Students are strongly encouraged to complete the four required foundation core courses as early as possible. These foundation courses are prerequisites for most upper-level courses and the option has several sequenced courses, some of which are taught only once a year.

\section*{REQUIREMENTS}

36 credits in SOC courses to include Foundation (Core) requirements for the general Sociology major (above), plus these CAR-specific requirements: \({ }^{1}\)

\section*{SPANISH AND PORTUGUESE}

The Department of Spanish \& Portuguese offers an integrated curriculum in introductory and specialized instruction in Spanish and Portuguese languages, literatures, and linguistics for undergraduates to fulfill major, college, and campus requirements as well as for those seeking
fluency and a solid language preparation for other opportunities. The objectives and goals of the undergraduate majors include the skills of advanced proficiency in oral communication and written expression, an understanding of Hispanic and Luso-Brazilian cultures, general familiarity with aspects of Hispanic and Luso-Brazilian literatures, and an understanding of aspects of Ibero-Romance linguistics.

\section*{PORTUGUESE, B.A.}

Here are some of the many reasons to learn Portuguese.
- Close to 250 million people speak Portuguese. Brazil alone has a population of 205 million.
- Portuguese is the sixth most widely spoken language in the world, before German (10th), French (11th) and Italian (15th).
- Portuguese is spoken in 11 countries on four continents. Portuguese is the official language of Portugal, Brazil, Angola, Cape Verde, GuineaBissau, Mozambique, São Tomé and Príncipe, East Timor, and is also widely spoken in Equatorial Guinea, Macau (China), and Goa (India).
- Portuguese is a working and/or official language of important international organizations, such as the African Union, the Community of Portuguese Language Countries, the European Union, Mercosul, the Organization of American States, and the Organization of IberoAmerican States.
- An estimated 1.3 million native Portuguese-speakers live in the United States.
- To study Portuguese is an asset in today's global economy. For example, Brazil's economy is among the largest in the world.
- The Portuguese novelist José Saramago won the 1998 Nobel Prize for Literature. The music, festivities, culture, and art of the Portuguesespeaking countries are appreciated all over the world.
- Portuguese shares some grammar rules, sentence structure, and similar vocabulary words with other Romance languages. If you already speak French, Spanish or Italian, Portuguese is an easy and fun language to learn.
- You will certainly enjoy our Portuguese classes that are studentfocused and culturally engaging. Our 101-102 textbook will soon be available as an interactive open-access e-book.
- Last but not least, Brazil is the only country that has won the World Soccer Cup Championship five times.

\section*{HOW TO GET IN}

Students may declare at any time in consultation with the Portuguese undergraduate advisor.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of

Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B(Q R-B)\) coursework.
- Complete the fourth unit of a foreign language; OR

Foreign
Language

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
Total Credits & Complete at least 120 credits. \\
UW-Madison & \(\cdot 30\) credits in residence, overall; and \\
Experience & \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & • 2.000 in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR 25 CREDITS FROM PORTUG 202-699, TO INCLUDE:}

\end{tabular}

2
PORTUG courses with the Advanced level designation are considered upper-level in the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits.
\end{tabular} \\
& \begin{tabular}{l} 
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate
\end{tabular} \\
& \begin{tabular}{l} 
degree classification. "In residence" credit also includes \\
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic \\
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Develop communication skills in Portuguese and integrate these skills to exchange and assess ideas effectively and with level-appropriate accuracy in written and spoken Portuguese.
2. Demonstrate understanding of linguistic, pragmatic, sociolinguistic, and stylistic features of written and spoken Portuguese, understand how they influence meaning, and apply these features in levelappropriate ways in writing and speech.
3. Demonstrate knowledge of Lusophone cultures across historical epochs, including awareness of the social, cultural, and linguistic diversity that characterizes the Portuguese-speaking world.
4. Demonstrate familiarity with and apply basic methods of literary and/ or linguistic analysis, which for literary analysis includes interpretation of written texts and other forms of artistic/cultural creation, both in and of themselves and in the context of the particular social, cultural, and historical milieus in which they were created.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in PORTUG and all major courses
- 2.000 GPA on 15 upper-level major credits in residence \({ }^{2}\)
- 15 credits in PORTUG, taken at UW-Madison

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Portuguese undergraduate advisor.

\section*{HONORS IN THE PORTUGUESE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn 3.500 GPA for all PORTUG courses at or above PORTUG 302, and any course that counts for the major
- Complete at least 16 credits, taken for Honors, with individual grades of B or better, to include:
- 10 credits from PORTUG 202 to 680, excluding PORTUG 301
- A two-semester Senior Honors Thesis in PORTUG 681 and PORTUG 682, for a total of 6 credits.

\section*{FOOTNOTES}

1

May not include PORTUG 301 which is the equivalent of PORTUG 101 and PORTUG 102.

\section*{2}

PORTUG courses with the Advanced level designation are considered upper-level in the major.

\section*{SPANISH STUDIES FOR BUSINESS STUDENTS, CERTIFICATE}

Did you know that by 2050 the United States could have more Spanish speakers than any other country (http://qz.com/441174/by-2050-united-states-will-have-more-spanish-speakers-than-any-other-country/)?

Spanish continues to gain ground as a widely spoken, national and international language, making the ability to communicate effectively in both written and spoken Spanish an invaluable intellectual, social, cultural, and professional resource. Spanish is the official or co-official language of 21 countries, and with more than 400 million speakers worldwide
(projected increase to about 530 million by 2050), it is the third most widely spoken language on the planet after Mandarin and English.

\section*{HOW TO GET IN}

Students must earn admission to the School of Business to be eligible for the Certificate in Spanish Studies for Business Students. The certificate can be declared in consultation with the Spanish undergraduate advisor.

Students declared in the Certificate in Spanish Studies for Business Students are not eligible to declare the Spanish major.

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 3.000 GPA in all Certificate courses
- 8 SPANISH credits in residence
- 6 SPANISH credits, taken at UW-Madison

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Develop communication skills in Spanish; integrate these skills to exchange and assess ideas effectively and with level-appropriate accuracy; and practice pragmatic, linguistic and stylistic norms in a formal, professional register of standard Spanish in a variety of written and oral assignments.
2. Acquire specialized vocabulary related to business and commerce; analyze authentic informational, financial and marketing materials in Spanish; and incorporate the newly-acquired vocabulary and businessrelated knowledge into their speech and writing.
3. Demonstrate knowledge of Hispanic cultures, including awareness of the social, cultural, and linguistic diversity that characterizes the Spanish-speaking world, as well as familiarity with basic methods of literary, cultural and/or linguistic analysis.

- Translation
- Interpretation
- Non-governmental/nonprofit work
- Library science
- Foreign service

\section*{Students declared in the Spanish major are not eligible to declare the Certificate in Spanish Studies for Business Students.}

REQUIREMENTS

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B(Q R-B)\) coursework.

Foreign
Language
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

\section*{HOW TO GET IN}

Students may declare at any time in consultation with the Spanish undergraduate advisor.

L\&S Breadth • 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86 th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}
\begin{tabular}{|c|c|c|}

\hline LITTRANS 252 & Spanish Literary Masterpieces in Translation & \\
\hline PORTUG 301 & Intensive Portuguese & \\
\hline
\end{tabular}

Total Credits

\section*{FACULTY ENGAGEMENT}

At least 6 credits of SPANISH at or above the 400-level must be taken while physically on the UW-Madison campus.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in SPANISH and all major courses
- 2.000 GPA on at least 15 credits of upper-level work in the major, taken in residence \({ }^{1}\)
- 15 credits in SPANISH, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Spanish undergraduate advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA for all SPANISH courses 300 level and higher
- Complete the following coursework, taken for Honors, with individual grades of B or better:
- 6 credits, SPANISH 327 to SPANISH 680
- 3 credits, SPANISH 300 to SPANISH 680
- A two-semester Senior Honors Thesis in SPANISH 681 and SPANISH 682 for at least 6 credits. \({ }^{2}\)

\section*{FOOTNOTES}

\section*{1}

Courses numbered above SPANISH 311 Advanced Language Practice are considered upper-level in the major.

\section*{2}

In certain circumstances (particularly when the student is an Honors candidate in two or more departments), 6 credits in literature, linguistics, or cultural studies at the 500 or 600 level, excluding SPANISH 681, SPANISH 682, SPANISH 691, SPANISH 692, and SPANISH 699, may be substituted for the Honors Thesis, upon recommendation by the Spanish undergraduate advisor.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Develop communication skills in Spanish and integrate these skills to exchange and assess ideas effectively and with level-appropriate accuracy in written and spoken Spanish.
2. Demonstrate understanding of linguistic, pragmatic, sociolinguistic, and stylistic features of written and spoken Spanish, understand how they influence meaning, and apply these features in level-appropriate ways in writing and speech.
3. Demonstrate knowledge of Hispanic cultures across historical epochs, including awareness of the social, cultural, and linguistic diversity that characterizes the Spanish-speaking world.
4. Demonstrate familiarity with and apply basic methods of literary and/ or linguistic analysis, which for literary analysis includes interpretation of written texts and other forms of artistic/cultural creation, both in and of themselves and in the context of the particular social, cultural, and historical milieus in which they were created.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}

\section*{HOW TO GET IN}

Students may declare at any time in consultation with the Spanish undergraduate advisor.

Students declared in the Spanish major are not eligible to declare the Certificate in Spanish Studies for Business Students.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General • Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of \(3+\) credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

REQUIREMENTS FOR THE MAJOR
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Introductory Courses (complete all):} \\
\hline SPANISH 223 & Introduction to Hispanic Cultures & 3 \\
\hline SPANISH 224 & Introduction to Hispanic Literatures & 3 \\

\hline \multicolumn{3}{|l|}{SPANISH courses numbered 400-699} \\
\hline \multicolumn{3}{|l|}{One (and only one) SPANISH course numbered 400-699 may be replaced by one (and only one) of the following three courses:} \\
\hline LITTRANS 245 & Topics in Spanish American Literature in Translation & \\
\hline LITTRANS 252 & Spanish Literary Masterpieces in Translation & \\
\hline PORTUG 301 & Intensive Portuguese & \\
\hline \multicolumn{2}{|l|}{Total Credits} & 36 \\
\hline
\end{tabular}

\section*{FACULTY ENGAGEMENT}

At least 6 credits of SPANISH at or above the 400-level must be taken while physically on the UW-Madison campus.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in SPANISH and all major courses
- 2.000 GPA on at least 15 credits of upper-level work in the major, taken in residence \({ }^{1}\)
- 15 credits in SPANISH, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Spanish undergraduate advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA for all SPANISH courses 300 level and higher
- Complete the following coursework, taken for Honors, with individual grades of B or better:
- 6 credits, SPANISH 327 to SPANISH 680
- 3 credits, SPANISH 300 to SPANISH 680
- A two-semester Senior Honors Thesis in SPANISH 681 and SPANISH 682 for at least 6 credits. \({ }^{2}\)

\section*{FOOTNOTES}

\section*{1}

Courses numbered above SPANISH 311 Advanced Language Practice are considered upper-level in the major.

\section*{2}

In certain circumstances (particularly when the student is an Honors candidate in two or more departments), 6 credits in literature, linguistics, or cultural studies at the 500 or 600 level, excluding SPANISH 681, SPANISH 682, SPANISH 691, SPANISH 692, and SPANISH 699, may be substituted for the Honors Thesis, upon recommendation by the Spanish undergraduate advisor.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits. \\
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
\begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
Woint average specified by the school, college, or academic \\
program to remain in good academic standing. Students
\end{tabular} \\
& \begin{tabular}{l} 
prose academic performance drops below these minimum \\
whose \\
thresholds will be placed on academic probation.
\end{tabular}
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Develop communication skills in Spanish and integrate these skills to exchange and assess ideas effectively and with level-appropriate accuracy in written and spoken Spanish.
2. Demonstrate understanding of linguistic, pragmatic, sociolinguistic, and stylistic features of written and spoken Spanish, understand how they influence meaning, and apply these features in level-appropriate ways in writing and speech.
3. Demonstrate knowledge of Hispanic cultures across historical epochs, including awareness of the social, cultural, and linguistic diversity that characterizes the Spanish-speaking world.
4. Demonstrate familiarity with and apply basic methods of literary and/ or linguistic analysis, which for literary analysis includes interpretation of written texts and other forms of artistic/cultural creation, both in and of themselves and in the context of the particular social, cultural, and historical milieus in which they were created.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to
accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{lcr}

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{STATISTICS}

Modern statistics is an exciting subject that affects most aspects of modern living. It has been developed to deal rationally and objectively with the uncertainty that accompanies variation in phenomena as highly complex as the interplay of the many factors that affect our environment. It derives vitality in coping with practical problems arising in all fields of scientific activity, including the social, business, biological, agricultural, medical, natural, and engineering sciences. Investigators' efforts to learn about a specific phenomenon, be it the response of a patient to a certain medical treatment or the effectiveness of a particular instructional program on a student's learning, are impacted by the presence of natural variation. The field of statistics is concerned with valid and efficient ways to learn more about these phenomena in the presence of such variation. It is an inductive science in which information is extracted from sample data in order to draw inferences. This process most often involves planning experiments or designing studies to ensure that valid answers to questions are obtained from the sample.

\section*{DATA SCIENCE, B.A.}

Students in the Data Science major will be able to apply computational, mathematical, and statistical thinking to data-rich problems in a wide variety of fields in a responsible and ethical manner. This includes the ability to manage, process, model, gain meaning and knowledge, and present data. Data Science is one of the fastest growing career sectors in Wisconsin and across the nation.

By its very nature, the field of data science is one that teaches novel and cutting-edge ways to engage in the "continual sifting and winnowing by which alone the truth can be found."

\section*{HOW TO GET IN}

To declare the data science major, student should meet with a data science major advisor prior to attaining senior standing ( 86 credits).

Students must have a 2.000 GPA on coursework counting in the major, and a 2.000 GPA on any upper-level work in the major completed prior to declaration. No specific coursework must be completed to declare.

Please see the Data Science major page (https://stat.wisc.edu/ undergraduate-data-science-studies/) on the Department of Statistics website for information on how to declare the major and meet with advisors.

Students declared in the Data Science certificate may not be declared in the Data Science major at the same time. Students who do wish to
declare this major must first cancel their declaration in the Data Science certificate.

Students declared in the Statistics certificate may not be declared in the Data Science major at the same time. Students who do wish to declare this major must first cancel their declaration in the Statistics certificate.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B(Q R-B)\) coursework.
Foreign
Language
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth • 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86 th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all major courses
- 2.000 GPA in all upper level work in the major \({ }^{1}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{FOOTNOTES}

1

Upper-level in the major includes L I S 461 and all courses listed in the Data Science Electives (i.e. Machine Learning, Advanced Computing, Statistical Modeling, Linear Algebra, and Other Electives).

Students are only allowed to count one course from each of probability (STAT/MATH 309, STAT 311, or STAT/MATH 431), inference (STAT/ MATH 310 or STAT 312), and linear algebra (MATH 320, MATH 340, MATH 341, or MATH 375) towards the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Integrate foundational concepts and tools from mathematics, computer science, and statistics to solve data science problems.
2. Demonstrate competencies with tools and processes necessary for data management and reproducibility.
3. Produce meaning from data employing modeling strategies.
4. Demonstrate critical thinking related to data science concepts and methods.
5. Conduct data science activities aware of and according to policy, privacy, security and ethical considerations.
6. Demonstrate oral, written, and visual communication skills related to data science.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{Total Credits 120}

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

A three-year degree is feasible for students with a variety of backgrounds and specific preparation. Students should ideally be entering the University with a minimum of 30 advanced standing credits, and have satisfied the following requirements with course credit or via placement examination:

> - MATH 221 Calculus and Analytic Geometry 1
> - MATH 222 Calculus and Analytic Geometry 2
> - 3-4 units of foreign language

First Year
\begin{tabular}{|c|c|c|}

Total Credits 90

\section*{ADVISING AND CAREERS}

\section*{LOOKING FOR DATA SCIENCE ADVISING?}

Information on group declaration sessions, individual advising appointments, drop-in advising, and contact information for advisors is available on our website (https://stat.wisc.edu/undergraduate-data-science-studies/).

\section*{WHAT DO DATA SCIENTISTS DO?}

Data Scientists are trained to manage, process, model, gain meaning and knowledge, and present data. These skills can be employed in a wide variety of different sectors of employment. Examples of interests of our students include finance, banking, sports analytics, marketing, retail, humanities, psychology, biosciences, healthcare, and consulting, just to name a few. Students are encouraged to combine data science with majors, certificates, and courses from differing areas to best be able to apply their data science in the area of their choosing.

Data science is one of the fastest growing area of jobs in the U.S. and in Wisconsin. All of the major job search engines regularly list a multitude of positions, for example, in 2022 Data Scientist was the \#3 job on the web site Glassdoor with over 10,000 jobs, Indeed.com had over 20,000 jobs for data science, and thousands of positions in multiple data oriented categories can be found on Monster.com.

Additionally, the Occupational Outlook Handbook (OOH) from the Bureau of Labor Statistics (https://www.bls.gov/ooh/math/data-scientists.htm) shows the job growth outlook from 2021-31 for Data Scientists to be 36\% (much faster than average).

Some students may want to continue to develop additional advanced data science skills through graduate education.

\section*{L\&S CAREER RESOURCES}

3 Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{ADVISING STAFF}

Information regarding the Data Science advisors and how to make appointment can be found on the program page (https://stat.wisc.edu/ undergraduate-data-science-studies/).

\section*{DATA SCIENCE MAJOR PROGRAM COMMITTEE}
- Tyler Caraza-Harter (Computer Sciences)
- Michael Ferris (Computer Sciences)
- B. Ian Hutchins (iSchool)
- Bret Larget, Program Director (Statistics), committee chair
- Sebastien Roch (Mathematics)
- Sara Rodock (Statistics), advising representative

\section*{RESOURCES AND SCHOLARSHIPS}

Helpful resources can be found at scholarships (https:// financialaid.wisc.edu/types-of-aid/scholarships/) and Wisconsin Scholarship Hub (https://wisc.academicworks.com/). Additional information specific to Data Science students can be found on our major webpage (https://stat.wisc.edu/undergraduate-data-science-studies/)
and opportunities are regularly sent to declared students via our weekly newsletter.

\section*{DATA SCIENCE, B.S.}

Students in the Data Science major will be able to apply computational, mathematical, and statistical thinking to data-rich problems in a wide variety of fields in a responsible and ethical manner. This includes the ability to manage, process, model, gain meaning and knowledge, and present data. Data Science is one of the fastest growing career sectors in Wisconsin and across the nation.

By its very nature, the field of data science is one that teaches novel and cutting-edge ways to engage in the "continual sifting and winnowing by which alone the truth can be found."

\section*{HOW TO GET IN}

To declare the data science major, student should meet with a data science major advisor prior to attaining senior standing ( 86 credits).

Students must have a 2.000 GPA on coursework counting in the major, and a 2.000 GPA on any upper-level work in the major completed prior to declaration. No specific coursework must be completed to declare.

Please see the Data Science major page (https://stat.wisc.edu/ undergraduate-data-science-studies/) on the Department of Statistics website for information on how to declare the major and meet with advisors.

Students declared in the Data Science certificate may not be declared in the Data Science major at the same time. Students who do wish to declare this major must first cancel their declaration in the Data Science certificate.

Students declared in the Statistics certificate may not be declared in the Data Science major at the same time. Students who do wish to declare this major must first cancel their declaration in the Statistics certificate.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCl and STAT subjects counts toward this requirement.
Foreign Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits. and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.
REQUIREMENTS FOR THE MAJOR
\begin{tabular}{llr} 
Code & Title & Credits \\
Foundational Math Courses & \\
MATH 221 & Calculus and Analytic Geometry 1 & 5 \\
or MATH 217 & Calculus with Algebra and Trigonometry II & \\
or MATH 275 & Topics in Calculus I & \\
MATH 222 & Calculus and Analytic Geometry 2 & 4 \\
or MATH 276 & Topics in Calculus II & \\
\hline Total Credits & & \(\mathbf{9}\)
\end{tabular}
Code Title Credits
\begin{tabular}{llr} 
Foundational Data Science Courses & \\
STAT 240 & Data Science Modeling I & 4 \\
STAT 340 & Data Science Modeling II & 4 \\
COMP SCl 220 & Data Science Programming I & 4 \\
or COMP SCl 300 & Programming II & \\
COMP SCl 320 & Data Science Programming II & 4 \\
LIS 461 & \begin{tabular}{l} 
Data and Algorithms: Ethics and \\
\\
\\
Total Credits \\
Policy
\end{tabular} & \(3-4\) \\
Code & & \(\mathbf{1 9 - 2 0}\) \\
\hline
\end{tabular}

\section*{Electives}

Students must complete at least one course from each of the four following categories, plus additional electives to reach the minimum credits. Additional courses taken within each category (except for linear algebra) may count towards other electives. \({ }^{2}\)
Machine Learning
Complete one of the following:
\begin{tabular}{ll} 
COMP SCI/E C E/ & Matrix Methods in Machine Learning \\
M E 532 & \\
COMP SCI/E C E/ & Introduction to Artificial Neural \\
M E 539 & Networks \\
COMP SCI 540 & Introduction to Artificial Intelligence \\
GEN BUS 656 & \begin{tabular}{l} 
Machine Learning for Business \\
Analytics
\end{tabular} \\
I SY E 521 & \begin{tabular}{l} 
Machine Learning in Action for \\
Industrial Engineers
\end{tabular} \\
MATH 535 & \begin{tabular}{l} 
Mathematical Methods in Data \\
Science
\end{tabular} \\
STAT 451 & \begin{tabular}{l} 
Introduction to Machine Learning \\
and Statistical Pattern Classification
\end{tabular} \\
STAT 453 & \begin{tabular}{l} 
Introduction to Deep Learning and \\
Generative Models
\end{tabular}
\end{tabular}

\section*{Advanced Computing}

Complete one of the following:
\begin{tabular}{ll} 
COMP SCI 400 & Programming III \\
COMP SCI 412 & Introduction to Numerical Methods \\
COMP SCI/ & Introduction to Computational \\
STAT 471 & Statistics
\end{tabular}
\begin{tabular}{ll}
\hline COMP SCI/ & Numerical Linear Algebra \\
MATH 513 & \\
\hline COMP SCI/ & Numerical Analysis \\
MATH 514 & \\
\hline COMP SCI/E C E/ Introduction to Optimization \\
ISY E 524 & \\
\hline COMP SCI 544 & Introduction to Big Data Systems \\
\hline COMP SCI 564 & \begin{tabular}{l} 
Database Management Systems: \\
Design and Implementation
\end{tabular} \\
\hline COMP SCI/ & Introduction to Bioinformatics \\
B M 576 & \begin{tabular}{ll} 
Advanced Geocomputing and
\end{tabular} \\
\hline GEOG 573 & Geospatial Big Data Analytics
\end{tabular}
\begin{tabular}{ll}
\multicolumn{1}{l}{ MATH 375 } & \begin{tabular}{l} 
Topics in Multi-Variable Calculus and \\
Linear Algebra
\end{tabular} \\
\begin{tabular}{ll} 
Other Electives
\end{tabular} \\
\begin{tabular}{ll} 
For additional electives students may complete courses \\
from the list below or additional courses from the required \\
categories above:
\end{tabular} \\
\begin{tabular}{ll} 
COMP SCI/I SY E/
\end{tabular} \\
MATH 425 & Introduction to Combinatorial \\
COMP SCI/I SY E/
\end{tabular}

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all major courses
- 2.000 GPA in all upper level work in the major \({ }^{1}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{FOOTNOTES}

Upper-level in the major includes L I S 461 and all courses listed in the Data Science Electives (i.e. Machine Learning, Advanced Computing, Statistical Modeling, Linear Algebra, and Other Electives).

\section*{2}

Students are only allowed to count one course from each of probability (STAT/MATH 309, STAT 311, or STAT/MATH 431), inference (STAT/ MATH 310 or STAT 312), and linear algebra (MATH 320, MATH 340, MATH 341, or MATH 375) towards the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

\section*{Residency Degree candidates are required to earn a minimum of} 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Integrate foundational concepts and tools from mathematics, computer science, and statistics to solve data science problems.
2. Demonstrate competencies with tools and processes necessary for data management and reproducibility.
3. Produce meaning from data employing modeling strategies.
4. Demonstrate critical thinking related to data science concepts and methods.
5. Conduct data science activities aware of and according to policy, privacy, security and ethical considerations.
6. Demonstrate oral, written, and visual communication skills related to data science.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer
experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

\section*{LOOKING FOR DATA SCIENCE ADVISING?}

Information on group declaration sessions, individual advising appointments, drop-in advising, and contact information for advisors is available on our website (https://stat.wisc.edu/undergraduate-data-science-studies/).

\section*{WHAT DO DATA SCIENTISTS DO?}

Data Scientists are trained to manage, process, model, gain meaning and knowledge, and present data. These skills can be employed in a wide variety of different sectors of employment. Examples of interests of our students include finance, banking, sports analytics, marketing, retail, humanities, psychology, biosciences, healthcare, and consulting, just to name a few. Students are encouraged to combine data science with majors, certificates, and courses from differing areas to best be able to apply their data science in the area of their choosing.

Data science is one of the fastest growing area of jobs in the U.S. and in Wisconsin. All of the major job search engines regularly list a multitude of positions, for example, in 2022 Data Scientist was the \#3 job on the web site Glassdoor with over 10,000 jobs, Indeed.com had over 20,000 jobs for data science, and thousands of positions in multiple data oriented categories can be found on Monster.com.

Additionally, the Occupational Outlook Handbook (OOH) from the Bureau of Labor Statistics (https://www.bls.gov/ooh/math/data-scientists.htm) shows the job growth outlook from 2021-31 for Data Scientists to be 36\% (much faster than average).

Some students may want to continue to develop additional advanced data science skills through graduate education.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{ADVISING STAFF}

Information regarding the Data Science advisors and how to make appointment can be found on the program page (https://stat.wisc.edu/ undergraduate-data-science-studies/).

\section*{DATA SCIENCE MAJOR PROGRAM COMMITTEE}
- Tyler Caraza-Harter (Computer Sciences)
- Michael Ferris (Computer Sciences)
- B. Ian Hutchins (iSchool)
- Bret Larget, Program Director (Statistics), committee chair
- Sebastien Roch (Mathematics)
- Sara Rodock (Statistics), advising representative

\section*{RESOURCES AND SCHOLARSHIPS}

Helpful resources can be found at scholarships (https:// financialaid.wisc.edu/types-of-aid/scholarships/) and Wisconsin Scholarship Hub (https://wisc.academicworks.com/). Additional information specific to Data Science students can be found on our major webpage (https://stat.wisc.edu/undergraduate-data-science-studies/) and opportunities are regularly sent to declared students via our weekly newsletter.

\section*{DATA SCIENCE, CERTIFICATE}

Students in the data science certificate will develop abilities such as data management, reproducibility, modeling strategies, and ethical considerations of data science to be paired with their knowledge gained from their major or domain area. The certificate is a great fit for students who like programming, want to learn data analysis, and seek to be highend users of data science tools in domain areas. Data science is one of the fastest growing career sectors in Wisconsin and across the nation.

By its very nature, the field of data science is one that teaches novel and cutting-edge ways to engage in the "continual sifting and winnowing by which alone the truth can be found."

\section*{HOW TO GET IN}

Students are eligible to declare the certificate at any point in their studies. They should declare it as early as possible to plan the required coursework. See the departmental website (https://stat.wisc.edu/data-sciencecertificate/) for information about how to declare.

Students declared in the Data Science major and Engineering Data Analytics Certificate are not eligible to declare the Data Science certificate.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE IN DATA SCIENCE}

The certificate requires a minimum of 16 credits.
\begin{tabular}{|c|c|c|}

\end{tabular}
\end{tabular}

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 2.000 GPA on all certificate courses
- At least 9 credits must be taken in residence at UW-Madison

\section*{FOOTNOTES}

1
COMP SCI 320 may count toward either the Foundation Courses or Fundamental Electives requirement, but not both.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Apply tools and processes necessary for data management and reproducibility.
2. Produce meaning from data employing modeling strategies.
3. Learn best practices related to data science concepts and methods.
4. Articulate policy, privacy, security and ethical considerations in data science projects.

\section*{ADVISING AND CAREERS}

\section*{LOOKING FOR DATA SCIENCE ADVISING?}

Students who are interested in data science academic advising should check out the advising information on our website (https://stat.wisc.edu/ data-science-certificate/) or send an email to dscert@stat.wisc.edu.

\section*{WHAT DO DATA SCIENTISTS DO?}

Data Scientists are trained to manage, process, model, gain meaning and knowledge, and present data. These skills can be employed in a wide variety of different sectors of employment. Examples of interests of our students include finance, banking, sports analytics, marketing, retail, humanities, psychology, biosciences, healthcare, and consulting, just to name a few. Students are encouraged to combine data science with
majors, certificates, and courses from differing areas to best be able to apply their data science in the area of their choosing.

Data science is one of the fastest growing area of jobs in the U.S. and in Wisconsin. All of the major job search engines regularly list thousands of jobs, for example, in 2018 Data Scientist was the \#1 job on the web site Glassdoor with over 25,000 jobs, Monster.com listed over 12,000 jobs in data science nationally, and Indeed.com had over 1,000 jobs for data analysts just in the state of Wisconsin.

Additionally, the Occupational Outlook Handbook (OOH) from the Bureau of Labor Statistics shows the job growth outlook from 2016-26 for Mathematicians and Statisticians to be 33\% (much faster than average) and for Computer and Information Research Scientists to be 19\% (much faster than average).

Some students may want to continue to develop additional advanced data science skills through graduate education.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{ADVISING STAFF}

Information regarding the Data Science advisors and how to make appointment can be found on the program page (https://stat.wisc.edu/ data-science-certificate/).

\section*{DATA SCIENCE MAJOR PROGRAM COMMITTEE}
- Tyler Caraza-Harter (Computer Sciences)
- Michael Ferris (Computer Sciences)
- B. Ian Hutchins (iSchool)
- Bret Larget, Program Director (Statistics), committee chair
- Sebastien Roch (Mathematics)
- Sara Rodock (Statistics), advising representative

\section*{STATISTICS, B.A.}

Modern statistics is an exciting subject that affects most aspects of modern living. It has been developed to deal rationally and objectively with the uncertainty that accompanies variation in phenomena as highly complex as the interplay of the many factors that affect our environment. It derives vitality in coping with practical problems arising in all fields of scientific activity, including the social, business, biological, agricultural, medical, natural, and engineering sciences. Investigators' efforts to learn about a specific phenomenon, be it the response of a patient to a certain medical treatment or the effectiveness of a particular instructional program on a student's learning, are impacted by the presence of natural variation. The field of statistics is concerned with valid and efficient ways to learn more about these phenomena in the presence of such variation. It is an inductive science in which information is extracted from sample data in order to draw inferences. This process most often involves planning experiments or designing studies to ensure that valid answers to questions are obtained from the sample.

\section*{HOW TO GET IN}

To declare the statistics major, students should schedule an appointment with a statistics major advisor prior to attaining senior standing (86 credits). Information regarding major declaration and how to schedule an appointment is available on the major webpage (https://stat.wisc.edu/ undergraduate-statistics-major/).

Students must have a 2.000 GPA on coursework counting in the major, and a 2.000 GPA on any upper-level work in the major completed prior to declaration. No specific coursework must be completed to declare.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF

\section*{ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
\begin{tabular}{|c|c|}
\hline \begin{tabular}{l}
Foreign \\
Language
\end{tabular} & \begin{tabular}{l}
- Complete the fourth unit of a foreign language; OR \\
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\end{tabular} \\
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline
\end{tabular}
Liberal Arts Complete at least 108 credits.
and Science
Coursework

Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{|c|c|}
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86 th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR MATHEMATICS}

- 15 credits in STAT courses, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Statistics Major in consultation with the Statistics major advisor(s). To be admitted to the Honors Program in Statistics, students must have declared Statistics, must have a 3.500 University GPA, and must have completed STAT 302, STAT/ MATH 309, and STAT 333 (or other courses with the approval of the advisor) with a GPA of 3.500 or higher in these three classes.

\section*{HONORS IN THE STATISTICS MAJOR: REQUIREMENTS}

To earn Honors in the Major in Statistics, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.500 University GPA
- Earn a 3.500 GPA for all STAT courses
- Complete two STAT major courses (excluding 699) for a total of 6 Honors credits (http://honors.Is.wisc.edu/SiteContent.aspx? prev=1\&id=370) or complete 18 total credits of electives in the major where 12-18 credits come from the core elective category and \(0-6\) credits from the domain elective category
- STAT 681 -STAT 682, for a total of 6 credits, under the supervision of a member of the Statistics faculty.

\section*{FOOTNOTES}

1
A grade of \(C\) or higher is required for this course to meet the requirement.

\section*{2}

STAT 479 and STAT 679 can be repeated for elective credit when enrolled for different topics.
3
Courses that are considered Upper-Level in the major are STAT 303, STAT 304, STAT 305, STAT/MATH 309,MATH 531 STAT/MATH 310, STAT 311, STAT 312 , STAT 327, STAT 333 , STAT 340 , STAT 349 , STAT 351 , STAT 360, STAT 405, STAT 411, STAT 421, STAT/M E 424, STAT/ MATH 431,STAT 433, STAT 436, STAT 443, STAT 451, STAT 453, STAT 456, STAT 461, STAT/COMP SCI 471, STAT 479, STAT/I SY E/MATH/ OTM 632, STAT/B M I 641, STAT/B M I 642, STAT 699, ACT SCI 653, ACT SCI 654, COMP SCI/E C E/M E 532, COMP SCI/E C E 561, ECON 570, GEN BUS 656, GEOG 560, I SY E 521, MATH 635, SOC 362, SOC 375, STAT/COMP SCI/MATH 475, STAT/COMP SCI/I SY E/ MATH 525.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Frame a scientific question with the appropriate mode of data analysis, to analyze such data correctly, and to summarize and interpret the results in a useful manner. Master a number of key statistical techniques, certainly including significance testing, goodness-of-fit testing, and regression analysis, which are common tools in analyzing data. This will include a careful checking of assumptions that underlie the techniques.
2. Design experiments/studies - in conjunction with scientists proposing the study - that will lead in an efficient manner to the collection of data that can be properly analyzed. Design studies with multiple factors taking variable reduction techniques into account. Interpret and critique designs they encounter in analyzing data.
3. Use tools from mathematical statistics and probability to assess the quality of point estimators, confidence intervals, and hypothesis tests. Demonstrate the skills to connect methods of application to their theoretical underpinnings.
4. Use a statistical language (with emphasis on R ) to manipulate data and perform exploratory data analysis using basic statistical methods. Write structured R programs using conditional expressions, loops, and
functions and to use regular expressions to extract data from text and make high-level visualizations.
5. Evaluate critically articles that use statistical argumentation. Assess whether or not the statistical arguments have been developed properly and the conclusions are reliable. If the arguments are not properly developed, they will be able to provide specific evidence for this.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline Communication A & 3 MATH 222 & 4 \\
\hline MATH 221 & 5 COMP SCI 200 or 220 & 3-4 \\
\hline Foreign Language & 4 Ethnic Studies course & 4 \\
\hline Physical Science Breadth & 3 Foreign Language & 4 \\
\hline & 15 & 15 \\
\hline
\end{tabular}

\section*{Second Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline MATH 234 & 4 STAT 303 & 1 \\
\hline Introductory Statistics course & 3-4 STAT 333 or 340 & 3-4 \\
\hline Communications B & 3 MATH 320, 340, or 341 & 3 \\
\hline Social Science Breadth & 3 INTER-LS 210 & 1 \\
\hline Humanities Breadth & 3 Biological Science Breadth & 3 \\
\hline & Literature Breadth & 3 \\

Elective & 9 Elective & 6 \\
\hline & \(\mathbf{1 5}\) & 9 \\
\hline
\end{tabular}

Total Credits 120

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

A three-year degree is feasible for students with a variety of backgrounds and specific preparation. Students should ideally be entering the University with a minimum of 30 advanced standing credits, and have satisfied the following requirements with course credit or via placement examination:
\begin{tabular}{llr} 
Code & Title & Credits \\
MATH 221 & Calculus and Analytic Geometry 1 & 5 \\
MATH 222 & Calculus and Analytic Geometry 2 & 4 \\
STAT 301 & Introduction to Statistical Methods & 3 \\
or STAT 302 & Accelerated Introduction to Statistical Methods & \\
or STAT 324 & Introductory Applied Statistics for Engineers & \\
or STAT 371 & Introductory Applied Statistics for the Life & \\
or STAT 240 & Sciences & \\
& Data Science Modeling I
\end{tabular}
- 3-4 units of foreign language
- At least 3 credits of L\&S Breadth (Humanities, Social Science, Biological Science, or Physical Science)

First Year
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline MATH 234 & 4 STAT 303 & 1 \\
\hline COMP SCI 200 or 220 & 3-4 STAT 333 or 340 & 3-4 \\
\hline Communications A & 3 MATH 320, 340, or 341 & 3 \\
\hline Social Science Breadth & 3 Ethnic Studies & 3 \\
\hline Elective & 3 Humanities Breadth & 3 \\
\hline & Elective & 3 \\
\hline
\end{tabular}

\section*{Second Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline STAT/MATH 309 & 3 STAT/MATH 310 & 3 \\
\hline STAT/M E 424 & 3 STAT Elective course & 3 \\
\hline Communications B & 3 Literature Breadth & 3 \\
\hline Physical Science Breadth & 3 Biological Science Breadth & 3 \\
\hline Social Science Breadth & 3 INTER-LS 210 & 1 \\
\hline & 15 & 13 \\
\hline
\end{tabular}

Third Year
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline STAT Elective course & 3 STAT Elective course & 3 \\
\hline STAT Elective course & 3 STAT Elective course & 3 \\
\hline Humanities Breadth & 3 Literature Breadth & 3 \\
\hline Physical Science Breadth & 3 Biological Science Breadth & 3 \\
\hline Social Science Breadth & 3 Elective & 3 \\
\hline & 15 & 15 \\
\hline
\end{tabular}

\section*{Total Credits 90}

\section*{ADVISING AND CAREERS}

\section*{Looking for Statistics Advising?}

Students who are interested in statistics academic advising for the statistics major should visit the Undergraduate Statistics Advising (https:// stat.wisc.edu/undergraduate-statistics-major/) website or contact the advisor group by email: advising@stat.wisc.edu.

\section*{So what can you do with a statistics major after you graduate?}

Well-trained statisticians are in strong demand and have excellent employment prospects. Statisticians work in industry and business, in government, and in universities and other research institutions.

In most cases an undergraduate major in statistics can find employment as a quantitative analyst or other "generalist" position. A number of our graduates have been successful following this path. However, in most cases, positions aimed at "professional statisticians" require a master's (or Ph.D.) degree. As a professional statistician, typical employment in industry might be as a statistical consultant to biologists, engineers, and/or other scientists in a research and development branch of a large company.

The single, best place to look for statistics jobs is the American Statistical Association Career Center (http://www.amstat.org/ASA/Your-Career/ home.aspx). Consult with a statistics undergraduate advisor about the best fit for you.

Statistical training is seen as very desirable in many other areas (e.g., agricultural, biological, engineering, and social sciences, business, and economics) where the primary activity may not be statistics. In view of this, statistics may often be a strong choice for a second or additional major.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or
graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

A full listing of the Statistics faculty, including affiliated faculty and links to webpages, can be found on the departmental website (https:// stat.wisc.edu/people-main-faculty/).

Faculty:
- Cecile Ane, Professor Statistics and Botany
- Joshua Cape, Assistant Professor, Statistics
- Peter Chien, Professor Statistics
- Jessi Cisewski-Kehe, Assistant Professor, Statistics
- Sameer Deshpande, Assistant Professor, Statistics
- Nicolas Garcia Trillos, Assistant Professor, Statistics
- Yinqiu He, Assistant Professor, Statistics
- Hyunseung Kang, Assistant Professor, Statistics
- Sunduz Keles, Professor, Statistics \& Biostatistics and Medical Informatics
- Bret Larget, Professor Statistics
- Keith Levin, Assistant Professor, Statistics
- Wi-Yin Loh, Professor, Statistics
- Michael Newton, Professor, Statistics \& Biostatistics and Medical Informatics
- Vivak Patel, Assistant Professor, Statistics
- Alejandra Quintos, Assistant Professor, Statistics
- Sebastian Raschka, Assistant Professor, Statistics
- Garvesh Raskutti, Associate Professor, Statistics
- Karl Rohe, Professor, Statistics
- Kris Sankaran, Assistant Professor, Statistics
- Jun Shao, Professor, Statistics
- Miaoyan Wang, Assistant Professor, Statistics
- Yazhen Wang, Chair and Professor, Statistics
- Brian Yandell, Professor, Statistics
- Chunming Zhang, Professor, Statistics
- Zhengjun Zhang, Professor, Statistics
- Yiqiao Zhong, Assistant Professor, Statistics
- Jun Zhu, Professor, Statistics

\section*{STATISTICS, B.S.}

Modern statistics is an exciting subject that affects most aspects of modern living. It has been developed to deal rationally and objectively with the uncertainty that accompanies variation in phenomena as highly complex as the interplay of the many factors that affect our environment. It derives vitality in coping with practical problems arising in all fields of scientific activity, including the social, business, biological, agricultural, medical, natural, and engineering sciences. Investigators' efforts to learn about a specific phenomenon, be it the response of a patient to a certain medical treatment or the effectiveness of a particular instructional program on a student's learning, are impacted by the presence of natural variation. The field of statistics is concerned with valid and efficient ways to learn more about these phenomena in the presence of such variation. It is an inductive science in which information is extracted from sample data in order to draw inferences. This process most often involves planning experiments or designing studies to ensure that valid answers to questions are obtained from the sample.

\section*{HOW TO GET IN}

To declare the statistics major, students should schedule an appointment with a statistics major advisor prior to attaining senior standing (86 credits). Information regarding major declaration and how to schedule an appointment is available on the major webpage (https://stat.wisc.edu/ undergraduate-statistics-major/).

Students must have a 2.000 GPA on coursework counting in the major, and a 2.000 GPA on any upper-level work in the major completed prior to declaration. No specific coursework must be completed to declare.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of \(3+\) credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT
\end{tabular} \\
& \begin{tabular}{l} 
subjects counts toward this requirement.
\end{tabular} \\
\begin{tabular}{ll} 
Foreign \\
Language
\end{tabular} & Complete the third unit of a foreign language.
\end{tabular}

L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR MATHEMATICS}
\begin{tabular}{llr} 
Code & Title & Credits \\
Calculus 1 (Complete one): & \(\mathbf{5 - 1 0}\) \\
MATH 221 & Calculus and Analytic Geometry 1 & \\
MATH 171 & Calculus with Algebra and & \\
\& MATH 217 & Trigonometry I & \\
& and Calculus with Algebra and & \\
& Trigonometry II \(^{1}\) &
\end{tabular}
\begin{tabular}{|c|c|c|}
\hline \multicolumn{2}{|l|}{Calculus 2 (Complete one):} & 4-5 \\
\hline MATH 222 & Calculus and Analytic Geometry \(2^{1}\) & \\
\hline \multicolumn{2}{|l|}{Calculus 3 (Complete one):} & 4-5 \\
\hline MATH 234 & Calculus--Functions of Several Variables \({ }^{1}\) & \\
\hline MATH 376 & Topics in Multi-Variable Calculus and Differential Equations & \\
\hline \multicolumn{2}{|l|}{Linear Algebra (Complete one):} & 3-5 \\
\hline MATH 340 & Elementary Matrix and Linear Algebra & \\
\hline MATH 320 & Linear Algebra and Differential Equations & \\
\hline MATH 341 & Linear Algebra & \\
\hline MATH 375 & Topics in Multi-Variable Calculus and Linear Algebra & \\
\hline
\end{tabular}

Total Credits
16-25

\section*{COMPUTER PROGRAMMING}
\begin{tabular}{llr}

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all STAT and major courses
- 2.000 GPA on 15 Upper-Level Major credits, taken In Residence \({ }^{3}\)
- 15 credits in STAT courses, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Statistics Major in consultation with the Statistics major advisor(s). To be admitted to the Honors Program in Statistics, students must have declared Statistics, must have a 3.500 University GPA, and must have completed STAT 302, STAT/ MATH 309, and STAT 333 (or other courses with the approval of the advisor) with a GPA of 3.500 or higher in these three classes.

\section*{HONORS IN THE STATISTICS MAJOR: REQUIREMENTS}

To earn Honors in the Major in Statistics, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.500 University GPA
- Earn a 3.500 GPA for all STAT courses
- Complete two STAT major courses (excluding 699) for a total of 6 Honors credits (http://honors.Is.wisc.edu/SiteContent.aspx? prev=1\&id=370) or complete 18 total credits of electives in the major where 12-18 credits come from the core elective category and \(0-6\) credits from the domain elective category
- STAT 681 -STAT 682, for a total of 6 credits, under the supervision of a member of the Statistics faculty.

\section*{FOOTNOTES}

\section*{1}

A grade of \(C\) or higher is required for this course to meet the requirement. 2

STAT 479 and STAT 679 can be repeated for elective credit when enrolled for different topics.

3
Courses that are considered Upper-Level in the major are STAT 303, STAT 304, STAT 305, STAT/MATH 309,MATH 531 STAT/MATH 310, STAT 311, STAT 312, STAT 327, STAT 333, STAT 340, STAT 349, STAT 351, STAT 360, STAT 405, STAT 411, STAT 421, STAT/M E 424, STAT/ MATH 431,STAT 433, STAT 436, STAT 443, STAT 451, STAT 453, STAT 456, STAT 461, STAT/COMP SCI 471, STAT 479, STAT/I SY E/MATH/ OTM 632, STAT/B M I 641, STAT/B M I 642, STAT 699, ACT SCI 653, ACT SCI 654, COMP SCI/E C E/M E 532, COMP SCI/E C E 561, ECON 570, GEN BUS 656, GEOG 560, I SY E 521, MATH 635, SOC 362, SOC 375, STAT/COMP SCI/MATH 475, STAT/COMP SCI/I SY E/ MATH 525.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Frame a scientific question with the appropriate mode of data analysis, to analyze such data correctly, and to summarize and interpret the results in a useful manner. Master a number of key statistical techniques, certainly including significance testing, goodness-of-fit testing, and regression analysis, which are common tools in analyzing data. This will include a careful checking of assumptions that underlie the techniques.
2. Design experiments/studies - in conjunction with scientists proposing the study - that will lead in an efficient manner to the collection of data that can be properly analyzed. Design studies with multiple factors taking variable reduction techniques into account. Interpret and critique designs they encounter in analyzing data.
3. Use tools from mathematical statistics and probability to assess the quality of point estimators, confidence intervals, and hypothesis tests. Demonstrate the skills to connect methods of application to their theoretical underpinnings.
4. Use a statistical language (with emphasis on R ) to manipulate data and perform exploratory data analysis using basic statistical methods. Write structured R programs using conditional expressions, loops, and functions and to use regular expressions to extract data from text and make high-level visualizations.
5. Evaluate critically articles that use statistical argumentation. Assess whether or not the statistical arguments have been developed properly and the conclusions are reliable. If the arguments are not properly developed, they will be able to provide specific evidence for this.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline Communication A & 3 MATH 222 & 4 \\
\hline MATH 221 & 5 COMP SCI 200 or 220 & 3-4 \\
\hline Foreign Language & 4 Ethnic Studies course & 4 \\
\hline Physical Science Breadth & 3 Foreign Language & 4 \\
\hline & 15 & 15 \\
\hline \multicolumn{3}{|l|}{Second Year} \\
\hline Fall & Credits Spring & Credits \\
\hline MATH 234 & 4 STAT 303 & 1 \\
\hline Introductory Statistics course & 3-4 STAT 333 or 340 & 3-4 \\
\hline Communications B & 3 MATH 320, 340, or 341 & 3 \\
\hline Social Science Breadth & 3 INTER-LS 210 & 1 \\
\hline \multirow[t]{4}{*}{Humanities Breadth} & 3 Biological Science & 3 \\
\hline & Breadth & \\
\hline & Literature Breadth & 3 \\
\hline & 16 & 14 \\
\hline
\end{tabular}

\section*{Third Year}

\section*{Fourth Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline STAT elective course & 6 STAT elective course & 6 \\
\hline Elective & 9 Elective & 9 \\
\hline & 15 & 15 \\
\hline
\end{tabular}

\section*{Total Credits 120}

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

A three-year degree is feasible for students with a variety of backgrounds and specific preparation. Students should ideally be entering the University with a minimum of 30 advanced standing credits, and have satisfied the following requirements with course credit or via placement examination:
\begin{tabular}{llr} 
Code & Title & Credits \\
MATH 221 & Calculus and Analytic Geometry 1 & 5 \\
MATH 222 & Calculus and Analytic Geometry 2 & 4 \\
STAT 301 & Introduction to Statistical Methods & 3 \\
or STAT 302 & Accelerated Introduction to Statistical Methods & \\
or STAT 324 & Introductory Applied Statistics for Engineers \\
or STAT 371 & Introductory Applied Statistics for the Life & \\
or STAT 240 & Sciences & \\
& Data Science Modeling I
\end{tabular}
- 3-4 units of foreign language
- At least 3 credits of L\&S Breadth (Humanities, Social Science, Biological Science, or Physical Science)

\section*{First Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline MATH 234 & 4 STAT 303 & 1 \\
\hline COMP SCI 200 or 220 & 3-4 STAT 333 or 340 & 3-4 \\
\hline Communications A & 3 MATH 320, 340, or 341 & 3 \\
\hline Social Science Breadth & 3 Ethnic Studies & 3 \\
\hline Elective & 3 Humanities Breadth & 3 \\
\hline & Elective & 3 \\
\hline & 16 & 16 \\
\hline
\end{tabular}

\section*{Second Year}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline STAT/MATH 309 & 3 STAT/MATH 310 & 3 \\
\hline STAT/M E 424 & 3 STAT Elective course & 3 \\
\hline Communications B & 3 Literature Breadth & 3 \\
\hline Physical Science Breadth & 3 Biological Science Breadth & 3 \\
\hline Social Science Breadth & 3 INTER-LS 210 & 1 \\
\hline & 15 & 13 \\
\hline
\end{tabular}

Third Year
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline STAT Elective course & 3 STAT Elective course & 3 \\
\hline STAT Elective course & 3 STAT Elective course & 3 \\
\hline Humanities Breadth & 3 Literature Breadth & 3 \\
\hline Physical Science Breadth & \begin{tabular}{l}
3 Biological Science \\
Breadth
\end{tabular} & 3 \\
\hline Social Science Breadth & 3 Elective & 3 \\
\hline \multicolumn{2}{|r|}{15} & 15 \\
\hline
\end{tabular}

\section*{Total Credits 90}

\section*{ADVISING AND CAREERS}

\section*{Looking for Statistics Advising?}

Students who are interested in statistics academic advising for the statistics major should visit the Undergraduate Statistics Advising (https:// stat.wisc.edu/undergraduate-statistics-major/) website or contact the advisor group by email: advising@stat.wisc.edu.

\section*{So what can you do with a statistics major after you graduate?}

Well-trained statisticians are in strong demand and have excellent employment prospects. Statisticians work in industry and business, in government, and in universities and other research institutions.

In most cases an undergraduate major in statistics can find employment as a quantitative analyst or other "generalist" position. A number of our graduates have been successful following this path. However, in most cases, positions aimed at "professional statisticians" require a master's (or Ph.D.) degree. As a professional statistician, typical employment in industry might be as a statistical consultant to biologists, engineers, and/or other scientists in a research and development branch of a large company.

The single, best place to look for statistics jobs is the American Statistical Association Career Center (http://www.amstat.org/ASA/Your-Career/ home.aspx). Consult with a statistics undergraduate advisor about the best fit for you.

Statistical training is seen as very desirable in many other areas (e.g., agricultural, biological, engineering, and social sciences, business, and economics) where the primary activity may not be statistics. In view of this, statistics may often be a strong choice for a second or additional major.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or
graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

A full listing of the Statistics faculty, including affiliated faculty and links to webpages, can be found on the departmental website (https:// stat.wisc.edu/people-main-faculty/).

Faculty:
- Cecile Ane, Professor Statistics and Botany
- Joshua Cape, Assistant Professor, Statistics
- Peter Chien, Professor Statistics
- Jessi Cisewski-Kehe, Assistant Professor, Statistics
- Sameer Deshpande, Assistant Professor, Statistics
- Nicolas Garcia Trillos, Assistant Professor, Statistics
- Yinqiu He, Assistant Professor, Statistics
- Hyunseung Kang, Assistant Professor, Statistics
- Sunduz Keles, Professor, Statistics \& Biostatistics and Medical Informatics
- Bret Larget, Professor Statistics
- Keith Levin, Assistant Professor, Statistics
- Wi-Yin Loh, Professor, Statistics
- Michael Newton, Professor, Statistics \& Biostatistics and Medical Informatics
- Vivak Patel, Assistant Professor, Statistics
- Alejandra Quintos, Assistant Professor, Statistics
- Sebastian Raschka, Assistant Professor, Statistics

- Miaoyan Wang, Assistant Professor, Statistics
- Yazhen Wang, Chair and Professor, Statistics
- Brian Yandell, Professor, Statistics
- Chunming Zhang, Professor, Statistics
- Zhengjun Zhang, Professor, Statistics
- Yiqiao Zhong, Assistant Professor, Statistics
- Jun Zhu, Professor, Statistics

\section*{STATISTICS, CERTIFICATE}

The Statistics certificate is a great fit for students who wish to use statistical principles to solve data problems with a mathematical approach Students will develop knowledge and skills in analytics and statistics, such as understanding how to work with data and applying their analysis within their given major or domain area. Statistics continues to be one of the fastest growing employment sectors in the nation and in Wisconsin and the Statistics certificate will allow a broader range of students to gain these highly desired skills.

Students in the certificate will gain "scientific, professional and technological expertise, and a sense of purpose."

\section*{HOW TO GET IN}

Students must have credit for the following to declare the certificate:
\begin{tabular}{|ll|}
\hline \begin{tabular}{l} 
Code \\
Complete one introductory statistics course
\end{tabular} & Credits \\
STAT 240 & Data Science Modeling I \\
STAT 301 & Introduction to Statistical Methods \\
\hline STAT 302 & \begin{tabular}{l} 
Accelerated Introduction to \\
Statistical Methods
\end{tabular} \\
\hline STAT 324 & \begin{tabular}{l} 
Introductory Applied Statistics for \\
Engineers
\end{tabular} \\
\hline STAT 371 & \begin{tabular}{l} 
Introductory Applied Statistics for \\
the Life Sciences
\end{tabular} \\
\hline Complete one calculus course \\
MATH 221 & Calculus and Analytic Geometry 1 \\
MATH 171 & \begin{tabular}{l} 
Calculus with Algebra and \\
\& MATH 217
\end{tabular} \\

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- At least 7 certificate credits must be completed in residence
- Minimum 2.000 GPA on all certificate courses

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Frame a scientific question with the appropriate mode of data analysis, analyze such data correctly, and summarize and interpret the results in a useful manner
2. Apply a number of key statistical techniques, including significance testing, goodness-of-fit testing, and regression analysis
3. Use tools from mathematical statistics and probability to assess the quality of point estimators, confidence intervals, and hypothesis tests
4. Apply a statistical language to manipulate data and perform exploratory data analysis using basic statistical methods

\section*{ADVISING AND CAREERS}

Students who are interested in statistics academic advising should check out the advising information on our website (https://stat.wisc.edu/ statistics-certificate/) or send an email to statcert@stat.wisc.edu.

Please note that students will need at least Calculus 2 to finish the Statistics certificate requirements.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/career-courses/)- a great idea for first- and second-year students:
- INTER-LS 210 (https://guide.wisc.edu/search/?P=INTER-LS \%20210) L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 (https://guide.wisc.edu/search/?P=INTER-LS \%20215) Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/)to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

A full listing of the Statistics faculty, including affiliated faculty and links to webpages, can be found on the departmental website (https:// stat.wisc.edu/people-main-faculty/).

Faculty:
- Cecile Ane, Professor Statistics and Botany
- Joshua Cape, Assistant Professor, Statistics
- Peter Chien, Professor Statistics
- Jessi Cisewski-Kehe, Assistant Professor, Statistics
- Sameer Deshpande, Assistant Professor, Statistics
- Nicolas Garcia Trillos, Assistant Professor, Statistics
- Yinqiu He, Assistant Professor, Statistics
- Hyunseung Kang, Assistant Professor, Statistics
- Sunduz Keles, Professor, Statistics \& Biostatistics and Medical Informatics
- Bret Larget, Professor Statistics
- Keith Levin, Assistant Professor, Statistics
- Wi-Yin Loh, Professor, Statistics
- Michael Newton, Professor, Statistics \& Biostatistics and Medical Informatics
- Vivak Patel, Assistant Professor, Statistics
- Alejandra Quintos, Assistant Professor, Statistics
- Sebastian Raschka, Assistant Professor, Statistics
- Garvesh Raskutti, Associate Professor, Statistics
- Karl Rohe, Professor, Statistics
- Kris Sankaran, Assistant Professor, Statistics
- Jun Shao, Professor, Statistics
- Miaoyan Wang, Assistant Professor, Statistics
- Yazhen Wang, Chair and Professor, Statistics
- Brian Yandell, Professor, Statistics
- Chunming Zhang, Professor, Statistics
- Zhengjun Zhang, Professor, Statistics
- Yiqiao Zhong, Assistant Professor, Statistics
- Jun Zhu, Professor, Statistics

\section*{GAYLORD NELSON \\ INSTITUTEFOR ENVIRONMENTAL STUDIES}

The Institute for Environmental Studies was created in 1970 to promote and enhance interdisciplinary environmental instruction, research, and outreach at UW-Madison. In 2002, it was renamed in honor of former Wisconsin governor and U.S. Senator Gaylord Nelson, the founder of Earth Day and a lifelong champion of environmental stewardship.

The program espouses an integrated approach to learning about the environment. Students are encouraged to consider their interests, strengths, and values beyond the context of their courses and connect the subject of the environment to their other courses as well as their extracurricular experiences. The Nelson Institute is a robust environmental community in which students learn about current environmental issues, and more important, how to link environmental science, policy, literature, art, and philosophy to other fields of study. The focus on the intentional integration of their academic endeavors with their interests, skills, and values provides a powerful source of self-awareness that prepares students for success across a variety of options. Finding one's strength within this interdisciplinary approach affords students access to a wide variety of career settings and postgraduate options.

Approximately 170 faculty members from more than 50 natural and social science, engineering, and humanities departments are affiliated with the Nelson Institute, which offers scores of undergraduate-level courses in cooperation with the university's schools and colleges. The institute offers an undergraduate major and two certificates. The environmental studies major must always be done in tandem with another major on campus. Environmental studies majors have second majors in every school and college on campus, and the student population reflects the interdisciplinary focus of the Nelson Institute and its curricular offerings. All UW-Madison undergraduates are invited to consider the program.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Environmental Studies, Certificate (p. 1440)
- Sustainability, Certificate (p. 1446)

The Nelson Institute also administers the Environmental Studies major (p. 716), available through the College of Letters \& Science.

\section*{ENVIRONMENTAL STUDIES}
- Environmental Studies, Certificate (p. 1440)
- Sustainability, Certificate (p. 1446)

\section*{ENVIRONMENTAL STUDIES, CERTIFICATE}

\section*{WHY CHOOSE AN} ENVIRONMENTAL STUDIES CERTIFICATE?

The Environmental Studies Certificate Program allows undergraduate students at UW-Madison to explore the environmental intersections that complement their major, but with fewer curricular requirements than the major. Students completing the certificate also benefit from participation in the Nelson academic community and gain invaluable access to a network of multidisciplinary problem-solving colleagues. The certificate program is available only to UW-Madison students pursuing a bachelor's degree through the university's regular academic departments.

Completion of the certificate program is noted on a student's academic transcript.

\section*{HOW TO GET IN}

\section*{HOW TO DECLARE}

Students interested in declaring the environmental studies certificate can email undergrad@nelson.wisc.edu or request a declaration appointment. Information about declaring the certificate can be found at undergraduate advising (https://nelson.wisc.edu/undergraduate/advising.php).

Students who earn an environmental studies certificate may not earn the environmental studies major or the sustainability certificate or the organic agriculture certificate.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

Students are required to take five courses/ 15 credits to include two courses in the Foundation section and three courses in the thematic areas. A minimum of 6 credits overall must be at the intermediate or advanced level (I/A/D). A minimum of 8 credits must be taken in residence. A minimum GPA of 2.0 is required in certificate courses.

Certificate students may enroll in a capstone course after the majors have enrolled, and the capstone course will be allowed to count in the thematic requirement. Junior standing is required for enrollment.

\section*{PASS/FAIL COURSES}

Courses taken on a pass/fail basis will not count toward the certificate.
Courses listed under more than one category in the curriculum may be used to satisfy only one category.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Explain the social and historical processes that impact our current environments. Interpret the meanings, values, and aesthetics that are created, shaped, and revealed as humans interact with and modify the environments they inhabit.
2. Explain ecological processes and fundamental principles of environmental sciences relating to humanity's key environmental challenges of the past, present, and future.
3. Analyze and respond to environmental questions by applying interdisciplinary approaches that integrate multiple perspectives, including those from a coordinate major.
4. Recognize through critical thinking a diversity of viewpoints, ethical commitments, and disciplinary approaches to environmental concerns across various scales from the local to the global.
5. Demonstrate excellent reading, writing, communication, and research skills, both individually and in interdisciplinary teams.

\section*{ADVISING AND CAREERS}

Environmental studies students are represented in majors across campus and in most undergraduate schools and colleges. Environmental studies certificate students should utilize the career office for their home school as appropriate. All students, not just Letters \& Science students, can also benefit from SuccessWorks at the College of Letters \& Science.

\section*{PEOPLE}

A complete list of faculty and staff affiliated with the Nelson Institute is available here. (http://nelson.wisc.edu/people/)

\section*{SUSTAINABILITY, CERTIFICATE}

\section*{WHY CHOOSE A SUSTAINABILITY CERTIFICATE?}

Perhaps the best reason for pursuing a sustainability certificate is a personal interest in learning practical skills to make a difference in the world-in your life, in your job, and in your community. Working toward a certificate offers students the opportunity to pursue interests that complement their major(s). For example, the interdisciplinary nature of sustainability encourages students to consider multiple perspectives. In doing so, this certificate provides a breadth of perspective highly applicable to complex problems, such as those we face in our communities, in our workplaces, and in our personal lives.

The Nelson Institute also offers a major and another certificate:
Environmental Studies Major (p. 716)
Environmental Studies Certificate (p. 1440)

\section*{HOW TO GET IN}

\section*{HOW TO DECLARE}

Students interested in declaring the sustainability certificate can email undergrad@nelson.wisc.edu or request a declaration appointment. Information about declaring the certificate can be found at undergraduate advising (https://nelson.wisc.edu/undergraduate/advising.php).

Students who earn a sustainability certificate may not earn the environmental studies certificate or the certificate in engineering for energy sustainability.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}
- A 2.00 GPA in all coursework that counts toward the certificate
- 12 credits of coursework, 3 credits from each of the four main categories below
- 1 credit in ENVIR ST 398 Independent Study: Sustainability Community Engagement for a sustainability-related community service project or 2 credits in ENVIR ST 317 Community Environmental Scholars Program Seminar
- Courses taken on a pass/fail basis will not count toward the certificate.

\section*{EXCEPTIONS}

Students can request to use a maximum of 3 credits from the
"Multidimensional and Cross-Topics Courses" list to substitute for 3 credits from the economic, social or environmental category. Requests
can be granted to the extent that the student's proposed course portfolio still covers all four dimensions of the certificate's curriculum. Such a request requires that the student submits a written explanation how the substitute course meets the learning outcomes (https://guide.wisc.edu/ undergraduate/environmental-studies/environmental-studies/ sustainability-certificate/\#learningoutcomestext) of the certificate and assists the student in reaching his or her individual goals for taking the certificate. Please also submit a syllabus of the substitute class. All substitution requests require approval.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Students will be able to identify, critically analyze, and propose solutions to the environmental, social, and economic dimensions of sustainability.
2. Students will be able to engage in systems thinking and practice so as to address the interrelationships among the three dimensions of sustainability.
3. Students will develop the capacity for an engaged life in which theory, practice, and reflection are integrated in the pursuit of a more sustainable world.

\section*{ADVISING AND CAREERS}

Nelson Institute students are represented in majors across campus and in most undergraduate schools and colleges. Sustainability certificate students should utilize the career office for their home school as appropriate. All students, not just Letters \& Science students, can also benefit from SuccessWorks at the College of Letters \& Science.

\section*{PEOPLE}

A complete list of faculty and staff affiliated with the Nelson Institute is available here. (http://nelson.wisc.edu/people/)

\section*{SCHOOL OF BUSINESS}

The School of Business (https://business.wisc.edu/) attracts talented, energetic, creative students who are known for their strong work ethic and technical capabilities. Students in the School of Business Undergraduate Program (https://business.wisc.edu/undergraduate/? _ga=1.242357250.1617918104.1481300313) experience innovative coursework directed by leading scholars in business. They have opportunities to connect with outstanding alumni for applied learning, mentoring, and general life-experience lessons. Students also enjoy access to an unlimited array of activities, clubs, and life-changing opportunities.

In 1900, UW-Madison established one of the first six commerce programs in the country, beginning as a department in the College of Letters \& Science, and receiving separate school status by a 1944 act of the Wisconsin Legislature. The School of Business was a founding
member of Beta Gamma Sigma (https://www.betagammasigma.org/ home/), a national professional business honor society and the Association to Advance Collegiate Schools of Business (AACSB) (http:// www.aacsb.edu/), the standard-setting organization for collegiate business education. The School's undergraduate and graduate programs were reaccredited by the AACSB in 2017.

\section*{EXPERIENCE A HIGH-CALIBER UNDERGRADUATE BUSINESS EDUCATION}

The University of Wisconsin-Madison is a world-class university, nationally and internationally recognized for academic excellence, incredible students, and inspiring faculty. As a student in the undergraduate business program, you will have access to the academic and co-curricular resources of the entire university, combined with the personalized experience of being a Business Badger. It's like having the best of both worlds.

The curriculum for the WSB Undergraduate Program incorporates a foundation in the liberal arts with a business education, including focused coursework in eleven majors. The liberal arts foundation-including courses taken outside of the School of Business-develops your skills in thinking critically, analyzing problems, generating creative solutions, communicating effectively, and working in diverse teams. These are all skills top employers seek when filling positions with strong potential for advancement.

Eleven undergraduate business majors are offered, giving you the specialized knowledge you need to begin a great career. You will graduate with skills gained from top-notch faculty and real-world learning experiences. It all adds up to an educational experience that prepares you for career success and to be a trusted leader. The School of Business offers many certificate options. There are also opportunities for further education through our graduate, master's, and doctoral programs.

\section*{THE BUSINESS BADGER EXPERIENCE}

The Wisconsin Business Badger Experience is about creating strong foundations and exploring student passions. Business Badgers take part in core experiences and amazing opportunities on their path toward graduation. All our Business Badgers gain academic preparation that applies learning in and out of the classroom building both technical knowledge rooted in business school courses and a broad-based liberal arts education. Our career preparation builds skills that don't just get students a first job, but build a life-long growth mindset. We staff our own Student Life office which supports over 40 student organizations that are integrated into our leadership framework and corporate partners. Our students develop a leadership style that is grounded in personal integrity, inclusive engagement, and community. Nearly all of our students participate in at least one internship and \(40 \%\) of our students study abroad. These experiences help students develop intercultural competence that prepare them to be trusted global business leaders. Our network of School of Business Alumni is 40,000 strong-and growingand fiercely loyal to our students. As students build their Business Badger Experience they are challenged and supported by a team of outstanding faculty and staff.

\section*{THE ACCENTURE LEADERSHIP CENTER}

The Accenture Leadership Center (https://business.wisc.edu/ undergraduate/leadership/) (ALC) was one of the first in-house leadership centers at a US business school. Today, it continues to be
student-driven and alumni-supported. The center offers a variety of activities, workshops, service opportunities and leadership training events. WSB undergraduate students graduate with the confidence, selfawareness, and professional skills to lead and inspire others.

\section*{SCHOOL OF BUSINESS CLUBS}

There are more than 40 student-run clubs associated with the School of Business. These clubs enable students to connect with peers interested in similar majors or career fields. Clubs also have access to funding to help them go to career and industry-related conferences.

\section*{PERSONAL AND PROFESSIONAL FOUNDATIONS IN BUSINESS (GENERAL BUSINESS 110)}

Every student admitted to the School of Business takes GEN BUS 110 Personal and Professional Foundations in Business. This 1-credit course helps students explore their leadership style, who they are as individuals, and how they function in team-orientated tasks. The course also provides career foundations such as resume building and introduction of networking at career fairs.

\section*{BUSINESS BADGER BADGES: LEADERSHIP PATHWAYS TO SUCCESS}

The Business Badger Badge (https://business.wisc.edu/undergraduate/ leadership/badges/) program is a customizable co-curricular leadership program that combines workshops, experiences, and reflection opportunities designed to provide a deeper level of understanding and practice with certain skills/competencies. By completing specific criteria for each badge, students can earn digital achievements, which serve as credentials that can be showcased via personal profile, social media, and shared with potential employers as a way to help articulate skills gained from completing a badge. The badges available to earn are Personal Leadership Styles, Group Dynamics, Inclusive Leadership, Leading for Change, and Leadership at Lambeau. Each Badge has specific learning outcomes and criteria. Additionally, we've collaborated with the campus leadership office to make sure our program is integrated into the campus leadership certificate as well!

- International Business, Certificate (p. 1473)

\section*{PEOPLE}

For a complete listing of School of Business Undergraduate Program staff, please visit our directory (https://business.wisc.edu/ undergraduate/contact/).

\section*{ENTERING THE SCHOOL}

\section*{A STUDENT-CENTERED ADMISSIONS PROCESS}

The School of Business boasts a student body that is focused and engaged. Our highly talented undergraduate students, in turn, attract recruiting employers who return to Wisconsin year after year to fill internships and full-time positions.

Although admission to the Wisconsin Undergraduate Business Program is selective, we provide a variety of informational and workshop events to help you prepare for the admissions process.

Students may apply and enroll into the residential Undergraduate Business Program through the following pathways:
- Prospective high school students may be considered for Direct Admission to Business based on their application to the University of Wisconsin-Madison. Simply list a Business interest as your top academic area of interest on the University application.
- Current University of Wisconsin-Madison students can participate in a series of preparatory workshops and apply through the spring-term pre-business admissions process.
- Transfer students at University of Wisconsin System campuses or Wisconsin Technical Colleges may apply separately for admission to both the University of Wisconsin-Madison and the School of Business during the spring term for fall enrollment.

Once a student knows they have a Business interest, earlier enrollment in the Undergraduate Business Program is encouraged to maximize the use of resources like advising, career coaching, co-curricular engagement, and other enriching opportunities. The right choice for you depends on your current goals and where you are in your journey to becoming a Business Badger. Prospective/pre-business applicants are encouraged to familiarize themselves with the admissions eligibility policies listed on the Wisconsin BBA Admissions Policies (https://business.wisc.edu/undergraduate/ admissions/pre-business-policies/) page.

For more information about these options, including directions for navigating the admissions processes and tips for submitting a competitive application, please visit the Wisconsin BBA Program website (https:// business.wisc.edu/undergraduate/admissions/).

Transfer applicants (https://business.wisc.edu/undergraduate/ admissions/transfer-students/) should visit the School of Business website to determine which process fits their situation.

Questions along the way? We're here to help. Reach out to a Wisconsin BBA Student Ambassador (https://business.wisc.edu/undergraduate/ contact/ambassadors/) or contact the School of Business Undergraduate Program Office (https://business.wisc.edu/undergraduate/contact/) at 608-890-2490.

\section*{BUSINESS ONLINE UNDERGRADUATE PROGRAMS}

Students applying to a School of Business Online Undergraduate Program apply through UW-Madison Online (https://online.wisc.edu/). Students who have earned 12 or more college credits are eligible to apply. For more information, visit the UW-Madison Online admissions website (https:// online.wisc.edu/apply/) or email a UW-Madison Online enrollment coach (uwmadisononline@wisc.edu). They are here to help you navigate the application process.

\section*{WISCONSIN EXPERIENCE}

\section*{INTEGRATE CLASSROOM LEARNING WITH DIRECT EXPERIENCE}

School of Business Undergraduate students are expected to apply learning inside and outside the traditional classroom in ways that have a positive impact on the world. Known as the Wisconsin Experience, this principle draws upon opportunities ranging from conducting research to embracing entrepreneurship to developing multicultural competence (https://business.wisc.edu/undergraduate/diversity-inclusion/), on campus or through study abroad programs (https://business.wisc.edu/ undergraduate/study-abroad/). By applying classroom learning in leadership programs (https://business.wisc.edu/undergraduate/ leadership/) or student organizations (https://business.wisc.edu/ undergraduate/student-organizations/), you will build your résumé and gain practical experience in using your business skills.

\section*{POLICIES AND REGULATIONS}

\section*{RESIDENTIAL PROGRAM}

School of Business students are responsible for being familiar with the policies that affect them. School of Business policy is subject to change, so be sure to review this website for the most up-to-date information. Questions related to policy interpretation can be directed to your academic advisor for clarification. Please note that pre-business students are subject to the academic policies and procedures of their current school/college. In addition to the academic-related policies below, we strongly encourage prospective/pre-business applicants to review all admission policies listed on the Wisconsin BBA Admission Policies (https://business.wisc.edu/undergraduate/admissions/pre-business-policies/) page.

\title{
COURSES/ENROLLMENT
}

\section*{Business Credit Limit}

Undergraduate students may not take more than 75 credits of School of Business courses.

\section*{10-semester rule (reentry and transfer)}

Students re-entering after an absence of 10 or more semesters:
A pre-business student seeking admission to the School of Business is responsible for completing all of the current School of Business admission and degree requirements that are in effect at the time of re-entry to UWMadison.

A business student reentering UW-Madison is responsible for completing all the current School of Business degree requirements that are in effect at the time of reentry to UW-Madison and the School of Business. Students who left the institution as a business student do not need to reapply for admission to the School of Business when they return.

Transfer Students seeking admission to the School of Business:
A transfer student whose first college entry date is ten or more semesters prior to UW-Madison matriculation must complete all of the current School of Business requirements that are in effect at the time of UWMadison matriculation.

A transfer student whose first college entry date is less than ten semesters prior to UW-Madison matriculation must complete all School of Business requirements that were in effect at the time of the student's first college matriculation date.

\section*{Graduation}

The School of Business will graduate a student at the end of the semester (spring, summer or fall) in which all university, BBA degree and business major requirements are complete and have a cumulative GPA of 2.00 or higher. Students cannot graduate with a temporary grade (https:// registrar.wisc.edu/valid-grades/), such as I or NR, for any requirements. Speak with the course instructor or your advisor to resolve temporary grades. The date when the outstanding Incompletes (I) are resolved will determine the semester of graduation.

If a student is completing their final coursework while not in residence, the student must notify the School of Business Undergraduate Program's Advising Office when the official transcript has been evaluated by UWMadison and appears on their record. This allows their DARS to be certified for graduation.

Graduation will not be postponed for any incomplete School of Business certificate(s), specialization(s); or additional certificate(s) or major(s) outside the School of Business.

It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all graduation requirements have been met.

\section*{Student responsibility for enrollment}

Each student is responsible for arranging a course list that will permit satisfactory progress toward degree requirements and a class schedule that (a) avoids class and final exam scheduling conflicts, (b) avoids an excessively demanding final exam schedule, and (c) verifies registration in chosen classes.

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection
options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc.
Students are strongly encouraged to consult with an academic advisor prior to initial enrollment and before making any changes to enrollment.

\section*{No-Credit Courses}

The School of Business does not award credit for the following:
- Failed courses (grade of "F")
- Repeated courses (except where a repeat is allowed)
- Courses for which a student may not receive credit because of a previously completed course (as indicated in the Course Search \& Enroll App)

Being enrolled in any of the above courses could impact a prebusiness student's application to the School of Business. Before enrolling in and taking any of the above courses, please consult your academic advisor.

\section*{Part-time Enrollment}

To maintain full-time standing, students must be enrolled in 12-18 credits.
Undergraduate students who are considering dropping below full time (less than 12 credits) are responsible for knowing how part-time status will affect them. Below are some of the more common scenarios to explore before dropping credits:

\section*{International Students:}

Dropping below full time as an international student can have serious consequences, up to and including deportation. Please be sure to check with the International Student Services Office before dropping below 12 credits.

\section*{Scholarships, Grants, and Other Awards:}

Depending on the conditions of the scholarship, a student may be required to be full time in order to remain eligible for an award. Be sure to check the stipulations for any awards you have received.

\section*{Financial Aid:}

Be sure to check with the Office of Student Financial Aid to find out if being part time will affect your financial aid package.

\section*{Tuition Refunds:}

Depending on when the credits are dropped, you may be eligible for a tuition refund. Check the registrar's website for information about refund deadlines.

\section*{Athletes:}

Varsity athletes are governed by Big Ten and NCAA rules that do not allow them to drop below full time. Be sure to check with your coach and athletic advisor before dropping below 12 credits.

\section*{Degree Completion:}

Taking fewer credits or courses than anticipated may delay your graduation. Be certain that if you drop a course, you will still be able to complete all required courses within your desired timeline. If you are not sure, please see your academic advisor.

\section*{Pass/Fail}

Undergraduate business students who are in good academic standing (i.e. not on probation) may take only one (1) course as pass/fail per semester
including the summer session. A maximum of 16 total credits may be completed as pass/fail to count toward completion of the 120 degree credits required for the BBA.

The pass/fail privilege is for a non-business elective course. The following courses cannot be taken pass/fail:
- Any business courses including those designated as "meets with," "cross-listed," and business courses taken during study abroad programs
- Any requirement for the business major or degree, including, but not limited to, pre-business and liberal studies requirements

It is the responsibility of the student to check requirements and policies for non-business majors and certificates prior to requesting the pass/fail privilege.

The pass/fail grade will not be included when computing your GPA, but the pass/fail credits with S (Satisfactory) grades will apply toward graduation. \(S\) is the grade for \(A\) to \(C ; U\) (Unsatisfactory) is the grade for \(D\) and \(F\).

Students must complete a minimum of 12 graded credits each semester in order to be eligible for the dean's list.

In order to apply for the pass/fail privilege, students must submit an online request (https://kb.wisc.edu/7700/) via Student Center. Please disregard the message that says "Reminder - print this form and obtain appropriate signatures." You do not need to do this.

Your request is then sent directly to the School of Business Undergraduate Program. You will be notified by email whether or not your request has been approved.

Please complete the online pass/fail form by the deadline. See the Office of the Registrar website (https://registrar.wisc.edu/dates/) for deadline information.

Once the student has submitted the form, the course may not be changed from pass/fail back to a conventionally graded course after the established deadline. Once a pass/fail grade is recorded as S or U , it cannot be changed to a letter grade.

\section*{Auditing a Course}

Auditing a course allows a student to take a class without the benefit of a grade or credit for a course.
A student who wishes to audit a course is expected to attend classes on a regular basis as an observer. Auditors do not take exams. Auditors will receive a final grade of Satisfactory (S) or No Report (NR), and AU will appear in place of a number of credits. Audit courses carry no academic credit and do not satisfy any degree or major requirements. Also audit courses do not satisfy any minimum or maximum credits required in each term. Students interested in auditing a course should consult with their academic advisor.
Audits are not free. A course taken for audit costs the same as a course taken for credit. If students are not paying full-time fees, they will be assessed per-credit fees for an audit course.
Information about submitting a formal request to audit a class can be found at the course change request on the Registrar's Office website. The course is offered only on a space available basis with approvals of both the instructor of the course and the Academic Dean's Office in the School of Business.

\section*{Repeating a Course}

Students thinking about repeating a course should talk with their advisor. Students must do all the work in the repeated course, including laboratory;
attend regularly; participate in class discussions; and take examinations. Students will earn a final grade in the course. The transcript denotes repeated courses with a lowercase ' \(x\) ' appearing immediately before the course description. Students should know that:
- the original grade still counts in GPA and remains on the transcript;
- credits in the repeated course do not count toward the degree, unless the course was failed the first time;
- grade points in the repeated course count toward calculation of cumulative GPA;
- credits carried on courses being repeated count toward the maximum credits permitted in a semester.

Transfer students must be particularly careful to avoid taking courses on the UW-Madison campus that duplicate courses taken at another school. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower-level course in a sequence if students have already received credit for a higher-level course in that sequence. Students should carefully check the Evaluation of Transfer Credits prepared by Credit Evaluation Services and should consult with their advisor. Duplicate courses may include transfer credits and credit by exam, such as Advanced Placement, coming in as course equivalents.

\section*{Residency for Degree}

Students admitted to the School of Business Undergraduate Program, including students who transfer from another college or university, must complete a minimum of 30 credits in business courses in residence.

\section*{Withdrawal}

Withdrawal indicates that a student intends to stop attending all classes for the current term/semester. If a student wishes to drop all of their classes for a particular semester/term after the first day of classes, a student needs to formally withdraw from the semester by submitting the online withdrawal request in the MyUW Student Center. Failure to do so may result in a recording of Failure for all courses and a "may not continue" action. Any student may withdraw with permission and without grades being recorded at any time up to the last three weeks of a fall or spring semester. Students should refer to the enrollment dates and deadlines (https://registrar.wisc.edu/dates/) provided by the Office of the Registrar if they are enrolled in summer term and wish to withdraw. The Office of the Registrar provides additional information regarding withdrawal (https:// registrar.wisc.edu/withdraw/), including impacts of withdrawal.

Medical Withdrawal: For information on medical withdrawals, students should refer to the Medical Withdrawal (https://policy.wisc.edu/library/ UW-1084/) policy.

In addition to entering a request for medical withdrawal in the MyUW Student Center, Business students will need to submit the Petition for Special Consideration form. (https:// buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/? _ga=2.152083449.1715547210.1624291160-630380142.1620053901) A staff member from the Academic Dean's Office will be in contact with you following the submission. Medical withdrawals are approved on a case-bycase basis, and medical documentation will be required.

\section*{Courses scheduled for fewer than 15 weeks}

Deadlines for sessions and modular courses (https://registrar.wisc.edu/ modular/) are listed on the Office of the Registrar's website.

\section*{Credit Overload}

To obtain special permission for a credit overload, students need to submit a petition for special consideration (https://
buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?
_ga=2.5642675.1034170563.1614009576-1842162041.1564425520) and demonstrate that special circumstances are involved.

Students who wish to take more than 18 credits during the fall or spring semester must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 20 total credits during the fall or spring semester.

Students can take a maximum of 12 credits during the summer session. Please note that there are credit limits by session as well. Students may enroll for one credit per week of instruction (e.g.: a student can earn 3 credits during a 3-week session, but needs approval to earn 4 credits in a 3-week session). Students who are seeking a credit overload for the summer session must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 13 total credits during the summer session.

Credit overloads will incur additional tuition costs. Visit Tuition \& Fees (https://bursar.wisc.edu/tuition-and-fees/) for more information.

\section*{FIRST-YEAR REQUIREMENTS (FRESHMAN DIRECT ADMIT STUDENTS ONLY)}

\section*{Academic progression requirements \& policies}

To progress in the School of Business Undergraduate Program after direct admission, students must complete the following requirements by the end of their first year at UW-Madison:
1. Students must complete a minimum of 24 degree credits in residence.
2. Students must complete the following requirements through successful completion of a course, placement test, transfer credit or test credit:
a. Communication Part A (complete one), preferably:
- ENGL 100 Introduction to College Composition (3 cr)
- COM ARTS 100 Introduction to Speech Composition (3 cr)
- ESL 118 Academic Writing II (3 cr), non-native English speakers only
b. Calculus (complete one):
- MATH 211 Calculus (5 cr)
- MATH 217 Calculus with Algebra and Trigonometry II (5 cr) (must complete MATH 171 first)
- MATH 221 Calculus and Analytic Geometry 1 (5 cr)
c. Economics (complete one):
- ECON 101 Principles of Microeconomics (4 cr)
- ECON 111 Principles of Economics-Accelerated Treatment (4 cr, Honors course)
d. Psychology
- PSYCH 202 Introduction to Psychology (3 cr)
e. Business course for first-year students
- GEN BUS 110 Personal and Professional Foundations in Business ( 1 cr )

\section*{Monitoring and communication after fall semester}

First-year progression progress will be monitored after the fall semester. Students will receive an email notification after the fall term informing them whether or not they are on track to meet the progression requirements by the end of their first year.

Action for students who did not meet the First-Year Progression Requirements

Students who do not meet progression requirements after the first year will receive an enrollment hold. To remove the enrollment hold, students must meet with their academic advisor in the Undergraduate Program and create a progression plan.

\section*{EXAMS}

\section*{Finals}

\section*{General Info/Schedule:}

Final exam times are automatically assigned for both fall and spring semesters. Final exam times can be found in MyUW.

\section*{Make-Up Final Exams:}

Make-up exams may not consist of more than \(10 \%\) of the total number of students enrolled. If an instructor needs to give a makeup to more than \(10 \%\) of students enrolled, they must obtain the dean's written approval.

\section*{Student Conflicts:}

Students should attempt to avoid having more than two exams within 24 hours. If a student has more than two exams in 24 hours, the instructor may-but is not required to-offer a make-up final exam or allowable alternative. However, if a student has two exams at the same time and date, one instructor must offer a make-up final exam or allowable alternative.

\section*{Midterms}

Midterm exams can occur throughout the term and may take place outside of the regularly scheduled class time. More information on the campus policy for evening midterm exams can be found here (https://policy.wisc.edu/library/UW-879/).

\section*{GRADES}

\section*{Academic Probation}

Students admitted to the School of Business must maintain all of the following GPA minimums:
2.00 cumulative GPA on all UW-Madison coursework
2.00 semester GPA for each semester (including summer term)

Students who do not meet these GPA minimums will be assigned an academic action (see below for list of actions) based on:
1. The student's most recent academic action from a prior term
2. The student's cumulative GPA (including the current term)
3. The student's term GPA for the semester just completed

A student will be cleared of probationary status at the end of the semester when all of the above conditions are met and the student's record contains no grade of incomplete.

\section*{Probationary actions}

Students will be notified via email of the requirements they must complete as part of their probationary status.

Probation: A student who has a prior academic action of Good Academic Standing or who has no prior academic action and who achieves a cumulative or term GPA between 1.0 and 2.0 will be placed on probation.
Continued Probation: A student on Probation whose cumulative GPA remains below 2.0 and whose term GPA for the term just completed is 2.0 or above will be placed on continued probation.
Strict Probation: A student can be placed on Strict Probation when they either:
1. Have a prior academic action of Good Academic Standing and achieve a term GPA of less than 1.0 in the semester just completed.
2. Have a prior academic action of Probation and achieve a term GPA of less than a 2.0 in the semester just completed

Continued Strict Probation: A student on Strict Probation whose cumulative GPA remains less than a 2.0 but whose term GPA for the term just completed is 2.0 or above will be placed on Continued Strict Probation.
Dropped for one semester (Academic Suspension): A student on Strict Probation or Continued Strict Probation who earns a term GPA for the term just completed less than 2.0.

Students have the opportunity to appeal the "dropped for one term" status by participating in an appeals process. The School of Business' Academic Dean's Office will notify students by email of the appeals process and timeline.

Students who were dropped for one term may reapply on probationary status (after a one-semester hiatus) if they can demonstrate the ability and desire to devote sufficient energy to scholastic work. To reapply, students may complete a reentry application (https:// admissions.wisc.edu/apply-as-a-reentry-student/) through the Office of Admissions and Recruitment.

GPA deficiencies causing probationary status cannot be removed through coursework at another university or through correspondence study.

\section*{Dean's List}

Business students who achieve a grade point average of 3.75 for any semester in which they complete 12 graded degree credits will have their names on the dean's list. A permanent record of this achievement is entered on the student's transcript. Students with I, P, or U on their grade report will automatically be ineligible for the dean's list. Subsequent academic action may change eligibility.

\section*{Grading Policy}

The mean grade should be no higher than 3.0 in the following undergraduate classes:

ACCT I S 100 Introductory Financial Accounting, GEN BUS 301 Business Law, ACCT I S 211 Introductory Managerial Accounting, FINANCE/ ECON 300 Introduction to Finance, MARKETNG 300 Marketing Management, M H R 300 Managing Organizations, OTM 300 Operations Management, R M I 300 Principles of Risk Management

For all other undergraduate courses with class numbers below 600 and 15 or more students enrolled, the mean grade should be no higher than 3.3 and the maximum percentage of As is \(30 \%\).

\section*{Graduating with Distinction}

The Office of the Registrar compiles a preliminary list of business students eligible for distinction. These students are eligible to wear an honors stole with their commencement attire. The School of Business Undergraduate Program will notify eligible students via email 2-3 weeks before the commencement ceremony.

Distinction is awarded to graduated business students who meet the following criteria:
- At least sixty (60) credits earned (in residence) at UW-Madison
- A cumulative UW-Madison GPA in the top twenty percent (20\%) of the graduating business class

Please note that students on the preliminary list for distinction may or may not receive distinction. The distinction designation is subject to change and is dependent upon official graduation date (semester), number of students graduating, and final grade calculations, including last semester and in-progress courses.

Students who graduate with distinction are eligible to wear a cardinal stole with their commencement attire. The stoles can be obtained from the University Bookstore with a deposit and do not need to be ordered in advance. More information on graduation attire can be found on the site of the Secretary of the Faculty.
"Graduated with Distinction" is notated on official transcripts only.

\section*{Incomplete Policy}

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond his/her control, has been unable to take or complete the final examination or to complete some limited amount of term work. An incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof, the grade shall be F; even with such proof, if his/her work has convinced the instructor that he/she cannot pass, the grade shall be F.

If an admitted business student earns an incomplete, the work for that course must be completed by the last class day of the student's next semester in residence (exclusive of summer sessions). Incompletes incurred in the last semester of residence may not be removed after five years of absence from the university without special advance permission of the associate dean. Such incompletes must remain on the record with grades of PI and do not lapse into failures.

Probationary status will be applied, when applicable, to business students with an incomplete. The academic action will be based on their GPA without the course that has an incomplete. This is a temporary action that could change once the incomplete is resolved. Please see the "Academic Probation" section for further information on the policy and GPA minimums.

If a student is graduating and has an incomplete in the term they wish to graduate, they will need to complete the work before their degree can be awarded. Finishing up work for an incomplete after the term/semester means that a student will be awarded their degree at the next official graduation date.

\section*{MAJOR DECLARATION}

\section*{Additional major outside of business}

Business students may declare one additional major outside the School of Business in the College of Letters \& Science (excluding AMEP, Journalism, Landscape Architecture, Social Work, Music: Education B.M., and Music: Performance: B.M.), School of Education (options include: Educational Policy Studies, Health Promotion and Health Equity or Theater \& Drama), or College of Agricultural and Life Sciences (only including Global Health). Students who gain approval to complete an additional major in the College of Letters \& Science, the School of Education, or the College of Agricultural and Life Sciences must complete major requirements prior to, or concurrently with, their business degree. Students who have fulfilled the degree requirements for the BBA will be graduated, even if the additional major outside the School of Business had not been completed.

To declare a second major:

Students will need to meet with the advisor of their additional major, and the advisor will fill out and submit an additional major declaration form on their behalf. This will be sent to the School of Business Undergraduate Program for approval.

Meet regularly with your School of Business academic advisor and additional major advisor regarding major and/or degree requirements.

\section*{To cancel a second major:}

Students interested in cancelling their additional major will need to make this request through their additional major advisor or department.

\section*{School of Business Major}

Direct admit business students will declare their business major at SOAR, and business students admitted through the prebusiness process will be declared in their selected business major at time of acceptance into the School. Students can indicate that they are exploring in business at that time. Business students may update their major plan (can declare or cancel any of the business majors offered) by completing the major declaration form (https://bus.wisc.edu/current-student-resources/bba/ academic-support-resources/forms/).

Students interested in declaring a certificate offered through the School of Business should follow the procedures outlined on the Certificates page for the appropriate program.

\section*{COURSES AT OTHER INSTITUTIONS}

\section*{Common Guidance for Off-Campus Coursework}

School of Busness undergraduate students are advised to take no more than two courses in their major (or per major if pursuing multiple majors) off-campus. This guidance includes courses taken for transfer credit at another accredited institution as well as courses taken on a School of Business or UW-Madison-sponsored study abroad program. The academic departments of the School of Business strongly recommend that all BBA students complete the core or initial course in their major(s) on campus.

While School of Business undergraduate students are able to take courses off-campus, the School of Business Undergraduate Program reminds students that they should plan to complete all prerequisites for any offcampus course, regardless of its place in the BBA curriculum, prior to taking the course off-campus. Attention to these prerequisites is crucial to ensuring School of Business undergraduate students are prepared for their coursework whether it is taken on or off campus. Advance academic planning is an integral part of a student's success and ability to remain on track to graduate. Students are strongly encouraged to share with their advisor if they plan to enroll in course work off-campus at any time once they are a UW-Madison student. Advisors assist students in making decisions regarding enrollment in off-campus course work and share resources with students to ensure that courses will transfer to UWMadison for degree credit and satisfy the requirement(s) they expect. While students are always encouraged to share this information with their advisor, students are required to gain permission to take courses offcampus in certain circumstances.

\section*{Concurrent Enrollment}

School of Business students are not allowed to enroll concurrently at other accredited post-secondary institutions during any term in which they are enrolled at UW-Madison (fall, spring) without seeking special permission via the Petition for Special Consideration (https://business.wisc.edu/ undergraduate/academic-advising/). This includes enrollment in online, distance education, and physical attendance classes (exceptions may be made for UW-Extension/Independent Learning-see below).

Students are permitted to enroll in more than one university during the summer session. However, please be aware that if you are taking a course at another university that begins in the summer and coincides with the fall and/or spring semester, it will fall into this category of concurrent enrollment, regardless of when the course will be completed.

If students are taking a course at another institution of higher learning over UW-Madison's winter break, they do not need to seek permission for concurrent enrollment if the course does not overlap UW-Madison's spring term or if the overlap is two weeks or less. Please note that students may take no more than one course off-campus during winter recess.

If it is discovered that a student violated this policy, this credit will be removed from the student's record. It is the responsibility of the student to verify with their academic advisor that they are not in violation of this policy.

\section*{Independent Learning}

UW Independent Learning (UW IL) is a branch of UW Extension that offers online and distance learning courses. Courses taken through UW Independent Learning are considered concurrent enrollment and require special permission to enroll in the fall, spring or summer.

Students interested in taking a course through UW IL should meet with an academic advisor. If the advisor and student agree this is a good option the student should follow these steps to request permission for concurrent enrollment and request a tuition waiver (if applicable). Forms should be returned to 3150 Grainger.
- Fill out a Petition/Special Consideration Request requesting permission for concurrent enrollment with UW Independent Learning. Be sure to include which class you intend to take.
- Students with full time status at UW-Madison may request a tuition waiver for UW Extension Independent Learning Courses provided that the following conditions are met:
- The student requests the waiver and enrolls in the course by the UW-Madison add deadline (second Friday of the semester).
- The course is taken during the regular academic session.
- The course is completed during the term for which the tuition waiver is requested.
- The student does not exceed 18 credits total between the two campuses.

Students are responsible for the \(\$ 75\) administrative fee for enrolling in a UW IL course.

The minimum length of time to complete an IL course is typically three months. Foreign language courses often require more time. Students should take this into consideration as they are planning the completion of their degree.

\section*{Transfer Credits}

UW-Madison students may choose to take courses off campus during the summer or winter session and potentially transfer credit to UWMadison. The UW-Madison Office of the Registrar handles transfer course equivalencies. Please note that UW-Madison students may not take courses at another institution during the fall or spring semester if they are concurrently taking courses at UW-Madison (see concurrent enrollment policy). Students may take no more than one course off-campus during winter recess. Students interested in earning transfer credit for a nonUW study abroad program must work with UW-Madison's International Academic Programs well in advance.

It is highly recommended that students do not take a course unless they know in advance that it will transfer to UW-Madison for credit. The Office of the Registrar provides information regarding how to determine course equivalencies (https://registrar.wisc.edu/transfer-your-credit-to-uwmadison/).

\section*{Transfer Credit Process}
- Review your DARS report and consult your academic advisor to see what you still need to take and whether the course(s) would be a good option to take at another institution over the summer or winter session. It is not advised to take your business major courses off campus.
- Research course options at the institution where you plan on taking the course(s).
- Determine equivalency using Office of the Registrar course equivalency resources (https://registrar.wisc.edu/course-equivalency-service/), beginning with Transferology (https:// www.transferology.com/state/wisconsin.htm).
- Apply as a "special" or "guest" student at the institution you plan on attending.
- Enroll in the course and pay tuition directly to the institution you are attending.
- After the course is complete, have the institution send an official transcript to the UW-Madison Office of Admissions and Recruitment at 702 West Johnson Street, Suite 1101, Madison, WI 53715-1007 or etranscripts@admissions.wisc.edu.

\section*{APPEAL}

\section*{Academic Policy or Requirement Appeal}

If an undergraduate business student wishes to request an exception to a School of Business academic policy or regulation, or a degree or major requirement, they should start by consulting with their academic advisor. They then will need to formally submit their request using the Petition for Special Consideration (https://
buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?
_ga=2.2520624.1034170563.1614009576-1842162041.1564425520)
form. Exception requests could include dropping a course or withdrawing after the deadline, enrolling in a credit overload, concurrent enrollment, or meeting a requirement with a substitution. Students pursuing one of the business certificate options should utilize the Petition for course or requirement exceptions related to their certificate.

Exceptions to established policies, regulations, and/or program requirements should be rare and will be considered on an individual case by case basis. They will be reviewed by the School of Business Undergraduate Program's Academic Advising Office. School of Business Department Chairs will be consulted on major requirement exceptions. Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate response.

\section*{Grade Appeal}

If a student is dissatisfied with a grade received in a School of Business course, the following procedure must be followed should the student wish to appeal the grade.

The student will first discuss the grade appeal with the instructor of the course.

If the student and instructor cannot come to an agreement, the student will provide a formal written request for grade appeal to the associate dean in charge of the relevant program. The written request must include
the class, instructor, grade received, date and conclusion of meeting with instructor, and the specific reason(s) for appealing the grade.

The associate dean will forward the appeal request to the chair of the department which houses the course in question. The department chair will perform the due diligence necessary (including, but limited to, meeting with the instructor and student) to assess the merits of the appeal request and will provide a decision in writing to the associate dean.

The associate dean will communicate the decision to both the student and instructor.

Should the student wish to appeal the decision further, the associate dean will perform the due diligence necessary (including, but limited to, meeting with the chair, instructor, and student) to assess the merits of the appeal request. The associate dean has the discretion to review not only the process that was undertaken in the first review, but also the earlier decision. The associate dean will provide a decision in writing to the chair, instructor, and student

The instructor will take action if needed.

Please note that The Office of Compliance is responsible for investigating allegations of discrimination. If a student is appealing a grade due to alleged discrimination, they should be in contact with the Office of Compliance.

\section*{ONLINE DEGREE PROGRAM}

School of Business students are responsible for being familiar with the policies that affect them. School of Business policy is subject to change, so be sure to review this website for the most up-to-date information. Questions related to policy interpretation can be directed to your academic advisor for clarification. The following policies apply to students pursuing one of the School of Business online degree programs

\section*{COURSES/ENROLLMENT}

\section*{Program Requirements}

When students enter a School of Business online degree program, they are held to the degree requirements described in the most recent Guide. The term of admittance to the online program results in a catalog and alternate catalog year that reflects the most recent BBA requirements for the online program.

\section*{10 Semester Rule for Reentry Students Students re-entering after an absence of 10 or more semesters:}

A business student reentering UW-Madison is responsible for completing all the current School of Business degree requirements that are in effect at the time of reentry to UW-Madison and the School of Business. Students who left the institution as a business student do not need to reapply for admission to the School of Business when they return.

\section*{Modality}

The modality for School of Business online degree program courses are online only. Students in an online program who are enrolled in a class section which is not "Online Only" will be dropped from that class section. A change of program that requires change of modality of instruction is not permitted. Should there be compelling extenuating circumstances that justify a change in learning modality option for an individual student, the student may request of change of modality via the Petition for Special Consideration (https://
buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/?
_ga=2.207081875.1034170563.1614009576-1842162041.1564425520).

\section*{Graduation}

The School of Business will graduate a student at the end of the semester (spring, summer or fall) in which all university, BBA degree and business major requirements are complete and have a cumulative GPA of 2.00 or higher. Students cannot graduate with a temporary grade (https:// registrar.wisc.edu/valid-grades/), such as I or NR, for any requirements. Speak with the course instructor or your advisor to resolve temporary grades. The date when the outstanding Incompletes (I) are resolved will determine the semester of graduation.
If a student is completing their final coursework while not in residence, the student must notify the School of Business Undergraduate Program's Advising Office when the official transcript has been evaluated by UWMadison and appears on their record. This allows their DARS to be certified for graduation.
It is the student's responsibility to ensure that graduation requirements have been met. All students should regularly consult their DARS (Degree Audit Reporting System) document in conjunction with their advisor to ensure that all graduation requirements have been met

\section*{Student Responsibility for Enrollment}

Each student is responsible for arranging a course list that will permit satisfactory progress toward degree requirements and for verifying registration in chosen classes.
The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Please pay special attention to session deadlines (https://registrar.wisc.edu/sessioncodes/). Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor prior to initial enrollment and before making any changes to enrollment.

\section*{No Credit Courses}

The School of Business does not award credit for the following:
- Failed courses (grade of "F")
- Repeated courses (except where a repeat is allowed)
- Courses for which a student may not receive credit because of a previously completed course (as indicated in the Course Search \& Enroll App)

Before enrolling in and taking any of the above courses, please consult your academic advisor.

\section*{Part-time Enrollment}

To maintain full-time standing, students must be enrolled in 12-18 credits. Undergraduate students who are considering dropping below full time (less than 12 credits) are responsible for knowing how part-time status will affect them. Below are some of the more common scenarios to explore before dropping credits:

\section*{Scholarships, Grants, and Other Awards:}

Depending on the conditions of the scholarship, a student may be required to be full time in order to remain eligible for an award. Be sure to check the stipulations for any awards you have received.

\section*{Financial Aid:}

Be sure to check with the Office of Student Financial Aid to find out if being part time will affect your financial aid package.

Tuition Refunds:

Depending on when the credits are dropped, you may be eligible for a tuition refund. Check the registrar's website for information about refund deadlines.

\section*{Athletes:}

Varsity athletes are governed by Big Ten and NCAA rules that do not allow them to drop below full time. Be sure to check with your coach and athletic advisor before dropping below 12 credits.

\section*{Degree Completion:}

Taking fewer credits or courses than anticipated may delay your graduation. Be certain that if you drop a course, you will still be able to complete all required courses within your desired timeline. If you are not sure, please see your academic advisor.

\section*{Pass/Fail}

Undergraduate business students who are in good academic standing (i.e., not on probation) may take only one (1) course as pass/fail per semester including the summer session. A maximum of 16 total credits may be completed as pass/fail to count toward completion of the 120 degree credits required for the BBA.
The pass/fail privilege is for a non-business elective course. The following courses cannot be taken pass/fail:
- Any business courses including those designated as "meets with," "cross-listed," and business courses taken during study abroad programs
- Any requirement for the business major or degree, including, but not limited to, pre-business and liberal studies requirements

It is the responsibility of the student to check requirements and policies for non-business majors and certificates prior to requesting the pass/fail privilege.
The pass/fail grade will not be included when computing your GPA, but the pass/fail credits with S (Satisfactory) grades will apply toward graduation.
S is the grade for A to \(\mathrm{C} ; \mathrm{U}\) (Unsatisfactory) is the grade for D and F .
Students must complete a minimum of 12 graded credits each semester in order to be eligible for the dean's list.
In order to apply for the pass/fail privilege, students must submit an online request via Student Center. Please disregard the message that says "Reminder - print this form and obtain appropriate signatures." You do not need to do this.
Your request is then sent directly to the School of Business Undergraduate Program Office. You will be notified by email whether or not your request has been approved.
Please complete the online pass/fail form by the deadline. See the Office of the Registrar website for deadline information (https:// registrar.wisc.edu/dates/).
Once the student has submitted the form, the course may not be changed from pass/fail back to a conventionally graded course after the established deadline. Once a pass/fail grade is recorded as S or U , it cannot be changed to a letter grade.

\section*{Auditing a Course}

Auditing an online degree program course is not permitted.

\section*{Repeating a Course}

Students thinking about repeating a course should talk with their advisor. Students must do all the work in the repeated course, including laboratory; attend regularly; participate in class discussions; and take examinations. Students will earn a final grade in the course. The transcript denotes repeated courses with a lowercase ' \(x\) ' appearing immediately before the course description. Students should know that:
- the original grade still counts in GPA and remains on the transcript;
- credits in the repeated course do not count toward the degree, unless the course was failed the first time;
- grade points in the repeated course count toward calculation of cumulative GPA;
- credits carried on courses being repeated count toward the maximum credits permitted in a semester.

Transfer students must be particularly careful to avoid taking courses on the UW-Madison campus that duplicate courses taken at another school. Credit will not be given twice for the same or similar courses, nor will credit be given for a lower-level course in a sequence if students have already received credit for a higher-level course in that sequence. Students should carefully check the Evaluation of Transfer Credits prepared by Credit Evaluation Services and should consult with their advisor. Duplicate courses may include transfer credits and credit by exam, such as Advanced Placement, coming in as course equivalents.

\section*{Residency for Degree}

Students admitted to the School of Business Undergraduate Program, including students who transfer from another college or university, must complete a minimum of 30 credits in residence.

\section*{Withdrawal}

Withdrawal indicates that a student intends to stop attending all classes for the current term/semester. If a student wishes to drop all of their classes for a particular semester/term after the first day of classes, a student needs to formally withdraw from the semester by submitting the online withdrawal request in the MyUW Student Center. Failure to do so may result in a recording of Failure for all courses and a "may not continue" action. Any student may withdraw with permission and without grades being recorded at any time up to withdrawal deadline. Students should refer to the enrollment dates and deadlines (https://registrar.wisc.edu/ dates/) provided by the Office of the Registrar. The Office of the Registrar provides additional information regarding withdrawal (https:// registrar.wisc.edu/withdraw/), including impacts of withdrawal.
Medical Withdrawal: For information on medical withdrawals, students should refer to the Medical Withdrawal (https://policy.wisc.edu/library/ UW-1084/) policy.
In addition to entering a request for medical withdrawal in the MyUW Student Center, Business students will need to submit the Petition for Special Consideration form (https:// buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/? _ga=2.152083449.1715547210.1624291160-630380142.1620053901). A staff member from the Academic Dean's Office will be in contact with you following the submission. Medical withdrawals are approved on a case-bycase basis, and medical documentation will be required.

\section*{Credit Overload}

To obtain special permission for a credit overload, students need to submit a petition for special consideration (https:// buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/? _ga=2.5642675.1034170563.1614009576-1842162041.1564425520) and demonstrate that special circumstances are involved.
Students who wish to take more than 18 credits during the fall or spring semester must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 20 total credits during the fall or spring semester.
Students can take a maximum of 12 credits during the summer session. Please note that there are credit limits by session as well. Students may enroll for one credit per week of instruction (e.g.: a student can earn 3
credits during a 3-week session, but needs approval to earn 4 credits in a 3-week session). Students who are seeking a credit overload for the summer session must have earned a minimum of 3.000 cumulative GPA on the UW-Madison campus. Students will not be permitted to carry more than 13 total credits during the summer session.
Credit overloads will incur additional tuition costs. Visit Tuition \& Fees (https://bursar.wisc.edu/tuition-and-fees/) for more information.

\section*{GRADES}

\section*{Academic Probation}

Students admitted to the School of Business must maintain all of the following GPA minimums:
2.00 cumulative GPA on all UW-Madison coursework
2.00 semester GPA for each semester (including summer term)

Students who do not meet these GPA minimums will be assigned an academic action (see below for list of actions) based on:
1. The student's most recent academic action from a prior term
2. The student's cumulative GPA (including the current term)
3. The student's term GPA for the semester just completed

A student will be cleared of probationary status at the end of the semester when all of the above conditions are met and the student's record contains no grade of incomplete.

\section*{Probationary actions}

Students will be notified via email of the requirements they must complete as part of their probationary status.

Probation: A student who has a prior academic action of Good Academic Standing or who has no prior academic action and who achieves a cumulative or term GPA between 1.0 and 2.0 will be placed on probation.
Continued Probation: A student on Probation whose cumulative GPA remains below 2.0 and whose term GPA for the term just completed is 2.0 or above will be placed on continued probation.
Strict Probation: A student can be placed on Strict Probation when they either:
1. Have a prior academic action of Good Academic Standing and achieve a term GPA of less than 1.0 in the semester just completed
2. Have a prior academic action of Probation and achieve a term GPA of less than a 2.0 in the semester just completed

Continued Strict Probation: A student on Strict Probation whose cumulative GPA remains less than a 2.0 but whose term GPA for the term just completed is 2.0 or above will be placed on Continued Strict Probation.
Dropped for one semester (Academic Suspension): A student on Strict Probation or Continued Strict Probation who earns a term GPA for the term just completed less than 2.0.

Students have the opportunity to appeal the "dropped for one term" status by participating in an appeals process. The School of Business' Academic Dean's Office will notify students by email of the appeals process and timeline.

Students who were dropped for one term may reapply on probationary status (after a one-semester hiatus) if they can demonstrate the ability and desire to devote sufficient energy to scholastic work. To reapply, students may complete a reentry application (https://
admissions.wisc.edu/apply-as-a-reentry-student/) through the Office of Admissions and Recruitment.

GPA deficiencies causing probationary status cannot be removed through coursework at another university or through correspondence study.

\section*{Dean's List}

Business students who achieve a grade point average of 3.75 for any semester in which they complete 12 graded degree credits will have their names on the dean's list. A permanent record of this achievement is entered on the student's transcript. Students with I, P, or U on their grade report will automatically be ineligible for the dean's list. Subsequent academic action may change eligibility.

\section*{Grading Policy}

The mean grade should be no higher than 3.0 in the following undergraduate classes:

ACCT IS 100 Introductory Financial Accounting, GEN BUS 301
Business Law, ACCT I S 211 Introductory Managerial Accounting, ECON/ FINANCE 300 Introduction to Finance, MARKETNG 300 Marketing Management, M H R 300 Managing Organizations, OTM 300 Operations Management, R M I 300 Principles of Risk Management

For all other undergraduate courses with class numbers below 600 and 15 or more students enrolled, the mean grade should be no higher than 3.3 and the maximum percentage of As is \(30 \%\).

\section*{Graduating with Distinction}

The Office of the Registrar compiles a preliminary list of business students eligible for distinction. These students are eligible to wear an honors stole with their commencement attire. The School of Business Undergraduate Program will notify eligible students via email 2-3 weeks before the commencement ceremony.
Distinction is awarded to graduated business students who meet the following criteria:
- At least sixty (60) credits earned (in residence) at UW-Madison
- A cumulative UW-Madison GPA in the top twenty percent (20\%) of the graduating business class

Please note that students on the preliminary list for distinction may or may not receive distinction. The distinction designation is subject to change and is dependent upon official graduation date (semester), number of students graduating, and final grade calculations, including last semester and in-progress courses.
Students who graduate with distinction are eligible to wear a cardinal stole with their commencement attire. The stoles can be obtained from the University Bookstore with a deposit and do not need to be ordered in advance. More information on graduation attire can be found on the site of the Secretary of the Faculty.
"Graduated with Distinction" is notated on official transcripts only.

\section*{Incomplete Policy}

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond his/her control has been unable to take or complete the final examination or to complete some limited amount of term work. An incomplete is not given to a student who stays away from a final examination unless the student proves to the instructor that he or she was prevented from attending as indicated above. In the absence of such proof, the grade shall be F; even with such proof,
if his/her work has convinced the instructor that he/she cannot pass, the grade shall be F.

If an admitted business student earns an incomplete, the work for that course must be completed by the last class day of the student's next semester in residence (exclusive of summer sessions). Incompletes incurred in the last semester of residence may not be removed after five years of absence from the university without special advance permission of the associate dean. Such incompletes must remain on the record with grades of PI and do not lapse into failures.

Probationary status will be applied, when applicable, to business students with an incomplete. The academic action will be based on their GPA without the course that has an incomplete. This is a temporary action that could change once the incomplete is resolved. Please see the "Academic Probation" section for further information on the policy and GPA minimums.

If a student is graduating and has an incomplete in the term they wish to graduate, they will need to complete the work before their degree can be awarded. Finishing up work for an incomplete after the term/semester means that a student will be awarded their degree at the next official graduation date.

\section*{MAJOR DECLARATION}

\section*{Additional Major}

Students in a School of Business online degree program will only be permitted to declare the designated degree/major/option they have been admitted to and will not be permitted to be concurrently enrolled in more than one academic program (degree/major/option or certificate).

\section*{Major Change}

Students enrolled in a School of Business online degree program may apply for change to another online major within the School of Business. Students can submit their request via the Online Degree Major Change Form (https://business.wisc.edu/undergraduate/academic-advising/).

Students enrolled in a School of Business online degree program may apply for a change to another UW-Madison online degree program. All change requests will be reviewed and need approval by the designated academic dean in both schools/colleges.

\section*{COURSES AT OTHER INSTITUTIONS}

\section*{Common Guidance for off campus coursework}

School of Business undergraduate students are advised to take no more than two courses in their major (or per major if pursuing multiple majors) off-campus. This guidance includes courses taken for transfer credit at another accredited institution as well as courses taken on a School of Business or UW-Madison-sponsored study abroad program. While School of Business undergraduate students are able to take courses off-campus, the School of Business Undergraduate Program reminds students that they should plan to complete all prerequisites for any offcampus course, regardless of its place in the BBA curriculum, prior to taking the course off-campus. Attention to these prerequisites is crucial to ensuring School of Business undergraduate students are prepared for their coursework whether it is taken on or off campus. Advance academic planning is an integral part of a student's success and ability to remain on track to graduate.

\section*{Concurrent Enrollment}

Students are strongly encouraged to share with their advisor if they plan to enroll in coursework at another institution at any time once they are a UWMadison student. Advisors assist students in making decisions regarding
enrollment in coursework at a different institution and share resources with students to ensure that courses will transfer to UW-Madison for degree credit and satisfy the requirement(s) they expect. While students are always encouraged to share this information with their advisor, students are required to gain permission to take courses elsewhere in certain circumstances.
School of Business students are not allowed to enroll concurrently at other accredited post-secondary institutions when they are enrolled at UWMadison (fall, spring) without seeking special permission via the Petition for Special Consideration (https://business.wisc.edu/undergraduate/ academic-advising/).
Students are permitted to enroll in more than one university during the summer session. However, please be aware that if you are taking a course at another university that begins in the summer and coincides with the fall and/or spring semester, it will fall into this category of concurrent enrollment, regardless of when the course will be completed. If students are taking a course at another institution of higher learning over UW-Madison's winter break, they do not need to seek permission for concurrent enrollment if the course does not overlap UW-Madison's spring term or if the overlap is two weeks or less. Please note that students may take no more than one course off-campus during winter recess. If it is discovered that a student violated this policy, this credit will be removed from the student's record. It is the responsibility of the student to verify with their academic advisor that they are not in violation of this policy.

\section*{Independent Learning}

UW Independent Learning (UW IL) is a branch of UW Extension that offers online and distance learning courses. Courses taken through UW Independent Learning are considered concurrent enrollment and require special permission to enroll in the fall, spring or summer.
Students interested in taking a course through UW IL should meet with an academic advisor. If the advisor and student agree this is a good option the student should follow these steps to request permission for concurrent enrollment and request a tuition waiver (if applicable). Forms should be returned to 3150 Grainger.
- Fill out a Petition/Special Consideration Request (https:// buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/? _ga=2.215341335.1034170563.1614009576-1842162041.1564425520) requesting permission for concurrent enrollment with UW Independent Learning. Be sure to include which class you intend to take.
- Students with full time status at UW-Madison may request a tuition waiver (https://business.wisc.edu/undergraduate/academicadvising/) for UW Extension Independent Learning Courses provided that the following conditions are met:
- The student requests the waiver and enrolls in the course by the UW-Madison add deadline (second Friday of the semester).
- The course is taken during the regular academic session
- The course is completed during the term for which the tuition waiver is requested
- The student does not exceed 18 credits total between the two campuses.

Students are responsible for the \(\$ 75\) administrative fee for enrolling in a UW IL course.

The minimum length of time to complete an IL course is typically three months. Foreign language courses often require more time. Students should take this into consideration as they are planning the completion of their degree.

\section*{Transfer Credits}

UW-Madison students may choose to take courses off campus during the summer or winter session and potentially transfer credit to UWMadison. The UW-Madison Office of the Registrar handles transfer course equivalencies. Please note that UW-Madison students may not take courses at another institution during the fall or spring semester if they are concurrently taking courses at UW-Madison (see concurrent enrollment policy). Students may take no more than one course off-campus during winter recess. Students interested in earning transfer credit for a nonUW study abroad program (https://studyabroad.wisc.edu/nonapproved/) must work with UW-Madison's International Academic Programs well in advance.
It is highly recommended that students do not take a course unless they know in advance that it will transfer to UW-Madison for credit. The Office of the Registrar provides information regarding how to determine course equivalencies (https://registrar.wisc.edu/transfer-your-credit-to-uwmadison/).

\section*{Transfer Credit Process}
- Review your DARS report and consult your academic advisor to see what you still need to take and whether the course(s) would be a good option to take at another institution over the summer or winter session. It is not advised to take your business major courses off campus.
- Research course options at the institution where you plan on taking the course(s).
- Determine equivalency using Office of the Registrar course equivalency resources (https://registrar.wisc.edu/course-equivalency-service/), beginning with Transferology (https:// www.transferology.com/state/wisconsin.htm).
- Apply as a "special" or "guest" student at the institution you plan on attending.
- Enroll in the course and pay tuition directly to the institution you are attending.
- After the course is complete, have the institution send an official transcript to the UW-Madison Office of Admissions and Recruitment at 702 West Johnson Street, Suite 1101, Madison, WI 53715-1007 or etranscripts@admissions.wisc.edu.

\section*{APPEAL}

\section*{Academic Policy or Requirement Appeal}

If an undergraduate business student wishes to request an exception to a School of Business academic policy or regulation, or a degree or major requirement, they should start by consulting with their academic advisor. They then will need to formally submit their request using the Petition for Special Consideration (https:// buswisc.qualtrics.com/jfe/form/SV_3a4CkoBg7BQhXRr/? _ga=2.2520624.1034170563.1614009576-1842162041.1564425520) form. Exception requests could include dropping a course or withdrawing after the deadline, enrolling in a credit overload, concurrent enrollment, or meeting a requirement with a substitution.
Exceptions to established policies, regulations, and/or program requirements should be rare and will be considered on an individual case by case basis. They will be reviewed by the School of Business Undergraduate Program's Academic Advising Office. School of Business Department Chairs will be consulted on major requirement exceptions. Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate response.

\section*{Grade Appeal}

If a student is dissatisfied with a grade received in a School of Business course, the following procedure must be followed should the student wish to appeal the grade.
The student will first discuss the grade appeal with the instructor of the course.
If the student and instructor cannot come to an agreement, the student will provide a formal written request for grade appeal to the associate dean in charge of the relevant program. The written request must include the class, instructor, grade received, date and conclusion of meeting with instructor, and the specific reason(s) for appealing the grade.
The associate dean will forward the appeal request to the chair of the department which houses the course in question. The department chair will perform the due diligence necessary (including, but limited to, meeting with the instructor and student) to assess the merits of the appeal request and will provide a decision in writing to the associate dean.
The associate dean will communicate the decision to both the student and instructor.
Should the student wish to appeal the decision further, the associate dean will perform the due diligence necessary (including, but limited to, meeting with the chair, instructor, and student) to assess the merits of the appeal request. The associate dean has the discretion to review not only the process that was undertaken in the first review, but also the earlier decision. The associate dean will provide a decision in writing to the chair, instructor, and student. The instructor will take action if needed.
Please note that The Office of Compliance is responsible for investigating allegations of discrimination. If a student is appealing a grade due to alleged discrimination, they should be in contact with the Office of Compliance.

\section*{REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business.

\section*{PRE-BUSINESS REQUIREMENTS}

Students applying through the pre-business or direct transfer process need to complete or be in the process of completing all pre-business courses at the time of application. In-progress courses must be completed by the end of the application term and cannot be deferred to a later term.

Students admitted through the direct admit process must complete these courses by the end of their first year.
\(\left.\begin{array}{llr}\text { Code } & \text { Title } & \text { Credits } \\ \text { Communication Part A }\end{array}\right]\) 0-3

\hline MATH 221 & Calculus and Analytic Geometry 1 & \\
\hline \multicolumn{2}{|l|}{Total Credits} & 2-16 \\
\hline
\end{tabular}

\section*{LIBERAL STUDIES REQUIREMENTS}

Liberal studies requirements must be completed prior to graduation. Students may not use courses offered by the Department of Economics or by the School of Business to fulfill liberal studies requirements. In addition, a single course may not be used to fulfill multiple liberal studies requirements.
\begin{tabular}{|c|c|c|}

1
Note: If a student completes an additional Literature (L) course, this requirement will be satisfied

\section*{BUSINESS FOUNDATION REQUIREMENTS}

All BBA degree candidates are required to complete foundation courses in business and economics. The foundation courses, in conjunction with a broad educational base, are designed to integrate the student's specialized training with an understanding of the structure and
functions of business and its role in the larger social system. Business foundation courses make up the business preparatory, core, and breadth requirements. Sequencing of courses in business preparatory, core, and breadth sections may vary based on a student's academic plan or major. Consult with your academic advisor for specific recommendations.

\section*{BUSINESS PREPARATORY REQUIREMENT}

All students must take the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
GEN BUS 110 & Personal and Professional \\
Foundations in Business
\end{tabular}\(\quad 1\)

\section*{BUSINESS ANALYTICS REQUIREMENT}

The business analytics requirement is part of the Business Preparatory Requirement, and has 3 options. Most students complete Option 1. GEN BUS 306 \& GEN BUS 307 should be taken as soon as possible and in subsequent semesters. Actuarial science majors and economics majors or certificate students will fulfill Option 2 or 3 . Number of credits for this requirement varies between options:

This is a 2-course sequence. Choose one course from each of the two options:
\begin{tabular}{cl} 
ECON 310 & Statistics: Measurement in \\
ECON 410 & Economics \\
or ECON 400 & Introductory Econometrics \\
Intron to Applied Econometrics
\end{tabular}

\section*{BUSINESS CORE REQUIREMENT}

Business Core courses are recommended to be completed by the end of a student's junior year.
\begin{tabular}{llr} 
Code & Title & Credits \\
FINANCE/ & Introduction to Finance & 3 \\
ECON 300 & & \\
MARKETNG 300 & Marketing Management & 3 \\
M H R 300 & Managing Organizations & 3 \\
OTM 300 & Operations Management & 3 \\
\hline Total Credits & & \(\mathbf{1 2}\)
\end{tabular}

\section*{Business Breadth Requirement}

Business Breadth courses must be completed by graduation.
\begin{tabular}{llr} 
Code & Title & Credits \\
GEN BUS 301 & Business Law & 3 \\
Business Breadth Course \(^{1}\) & 3 \\
Business Breadth Course \(^{1}\) & 3 \\
Total Credits \(^{2}\) & & \(\mathbf{3 - 9}\)
\end{tabular}

\section*{1}

Students must complete two business courses (3 credits each) that are outside their major from two separate School of Business departments. Courses taken to satisfy this requirement may not include preparatory or core courses, courses required by or cross-listed with the student's major, general business courses, any 399 (Readings and Research) course, or business courses cross-listed with foreign language departments. Courses taken at another institution must be directly equivalent to a UW-Madison business course and title (i.e. not elective credit which is sometimes given an X10 course number).

Students with two majors in business or students with one major and a business related certificate need only one course (3 credits) outside their majors/certificate to satisfy this requirement. Students with three or more business majors or two majors and a business related certificate are not required to take additional breadth courses.

\section*{CREDITS FOR BBA DEGREE CREDIT REQUIREMENTS}

Candidates for the BBA degree must meet all of the following credit requirements in addition to completing the required coursework.

\section*{120 Degree Credits}

All students who plan to graduate from the University of WisconsinMadison with a bachelor's degree must complete a minimum of 120 degree credits.

\section*{RESOURCES}

\section*{ACADEMIC ADVISING}

As a student in the Wisconsin Business Undergraduate Program, you will work directly with academic advisors who will help you plan your business education every step of the way. The advisors are here to help you explore options, define goals, and accomplish what you set out to achieve during your time as a Business Badger and beyond. Academic advisors also support students in making choices about course enrollment and understanding and interpreting degree requirements and policies.

Advisors in the Wisconsin Business Undergraduate Program work in partnership with you. They give you the tools and support you need to make your own decisions about the course of your education. Your partnership with the advising team begins early in your academic career at the University of Wisconsin-Madison. When you enroll in the UW-Madison, one of your first steps will be to attend Student Orientation, Advising, and Registration (SOAR), where you will have your first meeting with an academic advisor.

Admitted students are welcomed and encouraged to check in with their academic advisor each term. Academic Advising also offers drop-in advising hours daily during the academic year. UW-Madison students who are not yet enrolled in the Wisconsin Business Undergraduate Program but who expect to apply through the pre-business admissions process (https://business.wisc.edu/undergraduate/admissions/current-uwstudents/) receive their business advising at the School of Business with pre-business academic advisors.

In addition to providing advising, the School of Business Undergraduate Program serves as the academic dean's office: interpreting policy, administering academic processes, and performing graduation checks for graduating business students. For more information, visit the advising website (https://business.wisc.edu/undergraduate/ academic-advising/) or contact Undergraduate Academic Advising in 3150 Grainger Hall; 608-262-0471; wibbaadvising@wsb.wisc.edu (wibbaadvising@bus.wisc.edu).

\section*{CAREER DEVELOPMENT}

The WSB Career Engagement Team takes a relationship-based approach to working with students throughout the career development process and consults with top employers to facilitate the recruitment, hiring and career readiness of our students. Our Career Forward program offers a variety of services and experiences to admitted undergraduate business, certificate in business, certificate in entrepreneurship, capstone in actuarial science, and master of accountancy students including 1:1 coaching, career/major pathways exploration and planning, career workshops, mock interviews, career fairs, career treks, employer recruiting events, on-campus interviewing, experiential learning opportunities, job shadowing, industry connections, and networking events. We will also coach you through the development of a professional resume, cover letter, networking and interviewing skills and job search, offer and negotiation skills. Through the exploration of your values, strengths, skills and interests, we will help you create a career roadmap and action plan early on in your collegiate experience so that you can participate in experiences both on and off campus to build your skills and readiness for the workplace or graduate study. Career planning is an ongoing process, and we are committed to helping you determine and achieve your immediate career
goals and support you in developing the skills to manage a successful career throughout your lifetime.

For more information about Career Engagement resources for students and faculty/staff, please see this page (https://business.wisc.edu/ undergraduate/careers/).

\section*{STUDENT LIFE}

The WSB Undergraduate Program Student Life office coordinates leadership and involvement opportunities (https://business.wisc.edu/ undergraduate/leadership/) for students to enhance their personal and professional skills.

The Accenture Leadership Center (ALC) offers students unique, handson opportunities to develop leadership skills through workshops, guest speaker events, leadership case competitions, and more. The ALC acts as a general resource for all business affiliated Student Organizations and coordinates the room reservations for the Undergraduate Lounge space and offices held within. The ALC can also facilitate tailored leadership workshops upon request, and plan larger leadership conferences open to all business and pre-business students.

The WSB Undergraduate Program also has its own student government, UBC (Undergraduate Business Council), to unify and represent the student voice on issues of shared governance within the school and to promote community among business students. In addition, there are 40+ undergraduate business student organizations, offering plenty of opportunities for students to get involved and put their leadership and collaboration skills into practice. A business student organization fair is held at the start of each semester where potential new members can meet with representatives of organizations.

In recognition that community and connection are vital to student success, the Student Life team also provides support and programs geared towards underrepresented student populations. Students can join a variety of identity-based affinity groups, participate with the Student Organization Diversity \& Inclusion Council, and/or get involved with the new Multicultural Space within the School of Business. Student Life also hosts a variety of educational events centered on topics of diversity, equity, and inclusion for all business and pre-business students to attend.

The student life team also oversees the Personal and Professional Foundations in Business course that all newly admitted BBA students take. This course introduces students to School of Business resources, helps them develop important leadership skills, facilitates networking, and encourages personal reflection about their time as a BBA student and future goals.

For more information about Wisconsin BBA Student Life, see this page (https://business.wisc.edu/undergraduate/leadership/).

\section*{BBA GLOBAL PROGRAMS}

The WSB Global Programs team works to advise students in all phases of study abroad including program selection and preparation, while abroad, and upon return. A study abroad experience (https://business.wisc.edu/ undergraduate/ study-abroad/) can complement and enhance every aspect of your business education. This is made possible by partnering with top business schools and study abroad programs across the globe to offer more than 35 business focused study abroad opportunities for students. Around 40 percent of each Wisconsin BBA graduating class studies abroad. These students regularly speak of their experience as professionally rewarding and personally transformative. A study abroad
experience can be a great way to demonstrate enhanced autonomy, motivation, organization, worldview, and resilience. You, too, can return from study abroad with a developed set of skills (that employers value!), a new sense of self, and a greater appreciation of cultural differences.

Expanding access to study abroad opportunities is a priority of our team and we work to develop programs in new locations and of different lengths (ranging from one week to an academic year) as well as create scholarships for study abroad.

The School of Business works in close collaboration with the campuswide study abroad office, International Academic Programs (IAP), to administer study abroad programs geared specifically for undergraduate business students. All approved UW-Madison programs share policies, procedures, and best practices. The UW-Madison Study Abroad website (https://studyabroad.wisc.edu/) highlights the portfolio of business specific programs (https://studyabroad.wisc.edu/programsearch/? advisinglocation=102) as well as other programs that may have a focus outside of, or in addition to, business (e.g. liberal studies, language learning, engineering, or life sciences).

\section*{ACCOUNTING AND INFORMATION SYSTEMS}

The accounting major allows students to develop strong technical and professional skills to succeed in a dynamic profession. Learn how emerging technologies are changing the landscape of business and gain an appreciation for the global and diverse nature of a career path in accounting. The curriculum covers financial, managerial and cost accounting, accounting systems and emerging technologies, taxation, audit and advisory services. Students will learn to evaluate the economic transactions on which businesses are built and organize and report the impact of those transactions.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Accounting, Certificate (p. 1463)
- Business: Accounting, BBA (p. 1465)

\section*{ACCOUNTING, CERTIFICATE}

The undergraduate certificate in accounting provides students the opportunity to develop additional expertise in accounting without having to pursue a double major. This certificate is available to all undergraduate students enrolled in the School of Business, with the exception of those students majoring in accounting. This certificate allows for a lot of flexibility so that students can customize their coursework to best complement their current business major. Students who complete this certificate would be prime candidates to continue their study in the oneyear MAcc program, which will expand potential career opportunities.

\section*{HOW TO GET IN}

To declare this certificate, students must be admitted to UWMadison and the School of Business (WSB). To find out more about the school's admissions process for undergraduate students, please see Entering the School (https://guide.wisc.edu/undergraduate/business/ \#enteringtheschooltext). Contact the Wisconsin BBA Advising Center
listed under the Advising and Careers tab for more information or to declare the certificate.

Students may not earn this certificate in conjunction with a BBA in Accounting.

\section*{REQUIREMENTS}

A minimum 2.5 GPA must be earned on all course work applied to meet the requirements of the certificate program. At least 50\% of the certificate credits must be earned in residence at UW-Madison as a degree-seeking undergraduate. Completion of this certificate satisfies one of the business breadth courses needed for the BBA.
\begin{tabular}{llr} 
Code & Title & Credits \\
ACCT I S 301 & Financial Reporting I & 3 \\
ACCT I S Electives & \\
\multicolumn{2}{c}{ These electives can include any courses numbered } & 9 \\
ACCT I S 302 through ACCT IS 699 & \\
\hline
\end{tabular}

\section*{Total Credits}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Understand the proper presentation, measurement, and reporting financial statement elements and transactions, and the use of financial statement information for analysis purposes.
2. Understand that financial and nonfinancial information serves numerous purposes in an organization, especially in relation to facilitating and influencing decisions.
3. Document, evaluate, and recommend improvements to basic accounting information systems used to control processes and communicate information to be used in financial reporting.
4. Understand the objective of taxes applicable at the federal level, and apply a framework for integrating income tax planning into accounting and business transactions as a foundation for structuring tax efficient business transactions.
5. Gain technical knowledge about how to perform a high-quality audit, and gain familiarity with how independence, objectivity, professional skepticism, and ethical behavior contribute to a high-quality.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

Students may direct questions about the IMAcc program to Katharine Widlak (katharine.widlak@wisc.edu), director of the program, or their academic or career advisor.

\section*{CAREERS}

The most common career paths in accounting include public and corporate accounting.

Public accountants work with clients to review or prepare financial documents. All areas of public accounting work together to inspect control processes and determine accuracy of financial information and compliance with laws, regulations, and generally accepted accounting principles. They make recommendations regarding business decisions and company finances. Public accounting includes audit/assurance and tax.

Corporate accountants manage an organization's financials and provide expertise in financial reporting and control to assist management in forming and implementing business strategy. Corporate accounting is a broad term that can include many different functions, such as management accounting, internal audit, and financial analysis.

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

\section*{PEOPLE}

\section*{ACCOUNTING FACULTY AND STAFF}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{BUSINESS: ACCOUNTING, BBA}

By pursuing the accounting major (https://business.wisc.edu/ undergraduate/majors/accounting/), you will develop strong technical and professional skills to succeed in a dynamic profession. Learn how emerging technologies are changing the landscape of business and gain an appreciation for the global and diverse nature of a career path in accounting.

Topics, skills, and concepts:
- Financial and managerial accounting, cost accounting, accounting systems, emerging technologies, taxation, audit and advisory services.
- Evaluate the economic transactions on which businesses are built, and organize and reporting the impact of those transactions. Learn to evaluate the tax impact of business decisions.
- Critical analysis, group dynamics, problem solving, and communication skills.

\section*{RELATED STUDENT ORGANIZATIONS}

Beta Alpha Psi (https://win.wisc.edu/organization/bap/)
Institute of Management Accountants (https://win.wisc.edu/organization/ imauwmadison/)
Women in Finance and Accounting (https://win.wisc.edu/organization/ wifa/)

\section*{HOW TO GET IN}

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (p. 1449).

Students declared in Business: Accounting BBA cannot earn the Certificate in Accounting, Summer Certificate in Business Fundamentals, Certificate in Business, or the Certificate in Entrepreneurship due to curriculum overlap.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for
living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

\section*{Code}

\hline RMI 670 & Cyber Risk \& Regulations \({ }^{2}\) & 3 \\
\hline
\end{tabular}

1
Students who are interested in sitting for the CPA Exam may consider taking 1-2 extra accounting courses, as CPA requirements vary from state to state. Further, students interested in sitting for the CPA Exam should take INFO SYS 322, which covers many CPA exam learning objectives and meets a requirement to sit for the CPA exam in Wisconsin prior to graduation with a MAcc degree.

\section*{2}

Students interested in pursuing a Graduate Accounting degree from UWMadison will have the ability to transfer up to 6 credits of undergraduate coursework to their graduate degree. These courses would be eligible to transfer under this policy.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Apply Generally Accepted Accounting Principles (GAAP) (and relevant assumptions, principles, and constraints) to prepare financial statements.
2. Recognize that management accounting and control systems, providing financial and non-financial performance information, are integral to the successful design and implementation of an organizational strategy.
3. Interpret and validate business events and transactions through the lens of business processes and systems.
4. Demonstrate technical competence in income taxation of individuals, partnerships, corporations, and international organizations.
5. Identify the legal implications of their choices and how the law impacts their interactions with others in a business setting.
6. Explain how to complete an audit from beginning to end, applying auditing standards, assessing risk, and gathering evidence.

\section*{FOUR-YEAR PLAN}

This page includes four sample four-year plans, two plans for students directly admitted into the School of Business from high school and two plans for students not directly admitted from high school. In each of the two sets of plans, the first plan represents the accounting major and the second plan represents the accounting major with the Integrated Master of Accountancy Program (IMAcc). We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{Total Credits 120}

1
Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issues, PHILOS/ENVIR ST 441 Environmental Ethics

We recommend that IMAcc students who complete an internship during the spring semester fulfill these elective credits outside of the spring semester (summer, online, AP credits, etc.).

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

Students may direct questions about the IMAcc program to Katharine Widlak (katharine.widlak@wisc.edu), director of the program, or their academic or career advisor.

\section*{CAREERS}

The most common career paths in accounting include public and corporate accounting.

Public accountants work with clients to review or prepare financial documents. All areas of public accounting work together to inspect control processes and determine accuracy of financial information and compliance with laws, regulations, and generally accepted accounting principles.

They make recommendations regarding business decisions and company finances. Public accounting includes audit/assurance and tax.

Corporate accountants manage an organization's financials and provide expertise in financial reporting and control to assist management in forming and implementing business strategy. Corporate accounting is a broad term that can include many different functions, such as management accounting, internal audit, and financial analysis.

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

\section*{PEOPLE}

\section*{ACCOUNTING FACULTY AND STAFF}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{CERTIFICATION/LICENSURE}

\section*{CERTIFIED PUBLIC ACCOUNTANT (CPA)}

The state of Wisconsin, and most other states, mandate that candidates for the CPA license must have earned a bachelor's or higher degree and 150 credit hours. There are several degree options for completing these requirements at the University of Wisconsin - Madison, including:
1. Master of Accountancy (MAcc): Students who earn the Master of Accountancy degree will meet the CPA requirements in most states. Students can pursue the MAcc degree through different paths, including:
a. Integrated: Undergraduate business students pursuing the accounting major in the School of Business are eligible to apply for the Integrated Master of Accountancy (IMAcc) program. Students pursuing the IMAcc program will earn a Bachelor of Business Administration (BBA) degree with a major in accounting along with a MAcc degree, typically in about 5-years total. The IMAcc program culminates with students earning a minimum of 150credits and eligibility for the CPA exam.
b. Stand-alone: Any student who has earned a four-year undergraduate degree, in any discipline, from an accredited institution, may pursue the MAcc program. Students with an undergraduate major in accounting will complete a 1-year, 30credit program. Any students applying with a non-business undergraduate major will complete a 2-year, 54-credit program. Upon graduation from the MAcc program, students will have a minimum of 150-credits and will be eligible for the CPA exam.
2. Undergraduate Business Degree with Accounting Major: Students can meet the eligibility requirements for the CPA exam by completing a 120-credit BBA degree with a major in accounting along with 30-additional credits to meet the 150-credit requirement. Students pursuing this option should carefully consider the CPA eligibility requirements in the state in which they intend to get certified as many states will require additional accounting credits beyond what is included in the BBA accounting major. Students can earn the additional 30-credits as follows:
a. Advanced Credits from High School: College credits earned in high school that are reflected on a student's UW-Madison transcript may count towards the 30-additional credits for CPA eligibility.
b. Double Major: Students may pursue an additional undergraduate major to achieve the additional 30-credits for CPA eligibility.
c. Non-accounting Advanced Degree: Students who earn an undergraduate degree with a major in accounting and any other advanced degree (specialized masters, MBA, Law School, etc.) may be eligible for the CPA exam as long as they have 150-total credits.
d. Undergraduate Credits: Students may earn the additional 30credits by taking any undergraduate courses at a degree-granting institution.

Please consult the Department of Accounting and Information Systems (http://guide.wisc.eduhttps:/business.wisc.edu/faculty-research/ accounting-information-systems/) for additional information.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{BUSINESS - SCHOOL-WIDE}

\section*{DEGREES/MAJORS/CERTIFICATES}
- Business Fundamentals, Summer Certificate (p. 1470)
- Business, Certificate (p. 1470)
- Consulting, Certificate (p. 1472)
- International Business, Certificate (p. 1473)

\section*{PEOPLE}

For a full list of School of Business faculty and staff, visit the school's directory (https://business.wisc.edu/directory/).

\section*{BUSINESS FUNDAMENTALS, SUMMER CERTIFICATE}

The Summer Certificate in Business Fundamentals (https:// business.wisc.edu/undergraduate/certificates/summer/) provides basic business education to students pursuing majors outside of the School of Business. The certificate is designed to be completed over multiple summer terms with in-person and online course options, making it a more flexible option for students seeking fundamental business knowledge. Knowledge gained through the Summer Certificate in Business Fundamentals aims to better prepare students for business-related careers upon graduation.

\section*{HOW TO GET IN}

The Summer Certificate in Business Fundamentals is not open to students declared in a major in the School of Business or the Certificate in Business (https://guide.wisc.edu/undergraduate/business/school-wide/businesscertificate/).

To declare students must have completed 12 credits in residence at UWMadison and have earned a minimum GPA of 2.75.

To declare the certificate, go to the Academic Forms (https:// business.wisc.edu/undergraduate/academic-advising/\#forms/) page and complete the Summer Certificate in Business Fundamentals declaration form.

\section*{REQUIREMENTS}

\section*{Students are expected to take 9 of the 12 required credits in-} residence during the summer term.

\section*{REQUIRED COURSES}

\section*{Code}

ACCTIS 300
or ACCT IS 100
Select three of the following:
FINANCE/ECON Introduction to Finance 300

\section*{Title}

Accounting Principles \({ }^{1}\)
Introductory Financial Accounting
\begin{tabular}{ll} 
MARKETNG 300 & Marketing Management \\
M H R 300 & Managing Organizations \\
OTM 300 & Operations Management \\
R M I 300 & Principles of Risk Management \\
\hline
\end{tabular}

1
Students are strongly encouraged to take ACCT I S 300, unless ACCT IS 100 is required by their major.

\section*{QUALITY OF WORK}

A minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

A minimum grade of \(C\) must be earned in each course.
9 of the 12 required credits must be taken in-residence (UW-Madison oncampus, study abroad, or distance courses).

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{EARNING OUTCOMES}
1. Describe basic business measurement as conveyed through accounting methods and reports. Read and interpret a balance sheet and income statement.
2. Describe the basic risk and return relationship and the use of diversification to manage overall risk.
3. Identify and describe basic business strategy and processes.
4. Measure and interpret cost benefit analysis including consideration of time value of money concepts.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students declared in the Summer Certificate in Business Fundamentals will be assigned to the Business Certificate Advising and Career committees. Further information can be found on the School of Business website (https://business.wisc.edu/undergraduate/certificates/summer/).

\section*{BUSINESS, CERTIFICATE}

The Certificate in Business (https://business.wisc.edu/undergraduate/ certificates/business/) (CIB) program provides non-business students the opportunity to earn a concentration in a clearly defined academic program in business. The coursework allows students to develop a foundational understanding of business and apply this to their specific field, such as 3 international studies or engineering. In addition to careers related to their own fields, students who earn the certificate have also found job opportunities in management, marketing, and other business fields.

\section*{HOW TO GET IN}

The certificate in business is for non-business students only. An application is required to be accepted into the CIB Program. Not all students are admitted, so it is important to make your application as strong as possible. There are no specific courses that must be taken before applying. If a student chooses to take CIB courses before being admitted, the courses will fulfill requirements after admission.

\section*{ELIGIBILITY}

To be eligible to apply, students must meet the following requirements:
- 24 degree credits completed at time of application (sophomore standing)
- 12 GPA credits (transfer students must complete a minimum of 12 credits at UW-Madison)
- 3.00 minimum cumulative GPA (This GPA does not guarantee admission to the CIB)
- Grades and GPAs from transfer coursework do not count toward CIB admission
- Currently enrolled UW-Madison student
- Undergraduate, degree-seeking student (non-business)

\section*{APPLICATION}

The application (https://apps.wsb.wisc.edu/undergrad/certificate/ application/closed.aspx) is available the first Friday of the fall semester and due the fourth Friday of the fall semester. Students must complete the application in one sitting.

The certificate in business application requires an essay on behalf of the applicant.

Admission decisions are based primarily on cumulative UW-Madison GPA and fit for the program as evidenced through the applicant's essay. All admission decisions are final and there is no appeal process for denied students.

Admitted students will be charged a \(\$ 150\) tuition differential until degree completion/graduation. The tuition differential provides CIB students access to all School of Business resources, including career coaches and academic advisors within the Undergraduate Program.

\section*{REQUIREMENTS}

The CIB program consists of six courses (four core courses and two additional breadth courses), for a total of 18 credits. Students are also responsible for any pre-requisite courses needed for core or breadth courses. Specific pre-requisites for each course can be found by clicking on the hyperlinked courses below or by searching for the course in Guide.

Students must take at least 12 of the 18 required credits in residence at UW-Madison. Study abroad courses taken through a UW-Madisonsponsored program will count toward the 12 credits in residence.

Students must earn a grade of " C " or better in all required courses for the CIB.

\section*{REQUIRED COURSES}
\begin{tabular}{llr} 
Code & Title & Credits \\
ACCT IS 300 & Accounting Principles \({ }^{1}\) & 3 \\
or ACCT IS 100 & Introductory Financial Accounting & \\
FINANCE/ECON & Introduction to Finance & 3 \\
300 & & 3 \\
MARKETNG 300 & Marketing Management & 3 \\
M H R 300 & Managing Organizations & 3 \\
Breadth Course \(^{2}\) & & 3 \\
Breadth Course \(^{2}\) & & \(\mathbf{1 8}\) \\
\hline Total Credits \({ }^{\mathbf{3}}\) & & 3
\end{tabular}

1
CIB students are strongly encouraged to take ACCT IS 300, unless ACCT IS 100 is required by their major. Please note, however, that ACCT IS 100 is a requirement for many other upper-level accounting and finance courses. Students planning to take additional accounting or finance courses, should consult with the CIB advisor.
2
Breadth Requirement information:
- Breadth courses must be at least 3 credits
- Breadth courses must be School of Business courses (or courses cross-listed with School of Business). Breadth courses may be from the same department as the core courses
- Breadth courses must be from two different School of Business departments (or cross-listed with two different School of Business departments)
- Courses taken at another institution must be directly equivalent to a UW-Madison business course and title (i.e., not elective credit)

3
Due to pre-requisites for some of the required courses, total credits to complete the Certificate in Business may be more than 18.

\section*{EXCLUSIONS}

The following courses may not be used to satisfy the CIB Breadth Courses requirement:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline GEN BUS 306 & Business Analytics I & 3 \\
\hline GEN BUS 310 & Fundamentals of Accounting and Finance for Non-Business Majors & 3 \\
\hline GEN BUS 311 & Fundamentals of Management and Marketing for Non-Business Majors & 3 \\
\hline GEN BUS 365 & Contemporary Topics & 3 \\
\hline ACCTIS 211 & Introductory Managerial Accounting & 3 \\
\hline
\end{tabular}

Any business course numbered 399
Any business course cross-listed with a foreign language

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. (Accounting) Apply accounting principles to develop decisionuseful accounting information that supports implementation of organizational strategy.
2. (Finance) Know and have a deep understanding of the net present value model and its components, and be able to apply the model to the valuation of assets.
3. (Management and Human Resources) Know and be able to illustrate how organizational success is a function of strategy, organizational culture, human resource management, leadership, teams, structure, managing change, and entrepreneurship.
4. (Marketing) Answer the "big questions" of the marketing planning process by explaining and demonstrating mastery of: 1 ) why marketing is a strategy and not a slogan, 2) how marketing is personal, 3 ) the importance of balancing risk, reward, cost, and time to optimize the 4 p's (product, price, place, and promotion), and 4) how marketing is a conduit between customer needs and company wants.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students admitted to the Certificate in Business will be assigned to the Business Certificate Advising and Career committees. Further information can be found on the School of Business website (https:// business.wisc.edu/undergraduate/certificates/business/).

\section*{CAREERS}

Certificate students are qualified for many entry-level business positions. While the career opportunities available to CIB students are vast, common business careers pursued following graduation include:
- Advertising
- Business analyst-information systems
- Business development
- Commercial and retail banking
- Consulting
- Event management
- Human resources
- Investment management
- Management
- Project lead/manager-information systems
- Retail (stores and corporate)
- Underwriting/claims adjusting

Other CIB students pursue careers in education, engineering, the nonprofit sector, or the healthcare industry, to name a few. Some CIB students attend graduate school following graduation in programs including law school, public policy, medical school, engineering, social work, and more.

\section*{CONSULTING, CERTIFICATE}

The Consulting Certificate from the School of Business helps students develop a consultative process and mindset that integrates critical
skills in the areas of project management, business communication, advanced analytics and/or strategy and technology. The Consulting Certificate will prepare students to seek answers to questions in order to define the problem, gather necessary data and information, convert the information into decisions, and successfully communicate that answer in a form appropriate to the audience. Upon completion of the certificate, students will understand how businesses operate, how to communicate successfully with others in business, and will be familiar with the concept of business goals and objectives. This perspective is central to the design and differentiation of our certificate. The goal of this certificate program is to be an add-on to any undergraduate major at UW-Madison so students can apply their major to the field of consulting.

\section*{HOW TO GET IN}

The consulting certificate is open to UW-Madison undergraduate students. Space in the consulting certificate program is limited so an application is required to be accepted into the program. To find out more about the application process for this certificate, please visit the Undergraduate Certificate (https://business.wisc.edu/undergraduate/ certificates/) page of the School of Business.

\hline
\end{tabular}

A minimum 3.0 GPA must be earned on all course work used to meet the requirements ( 13 credits) of the certificate program. All certificate credits must be earned in residence at UW-Madison.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Apply critical thinking skills to complex real-world problems to develop strategies and make actionable recommendations to solve business issues based on a variety of important analytical tools and techniques.
2. Develop case analysis skills in diagnosing business issues and managerial problems, propose workable solutions, and explain and defend solutions.
3. Apply and evaluate project management techniques, and have a basic understanding of the formal and informal tools available to manage time, resources, and stakeholders in executing a project.
4. Develop and practice aspects of successful communication: writing, presenting, and listening. A theoretical foundation provides a method of deep audience analysis; apply that analysis when producing a variety of written genres and when preparing content for formal presentation.

\section*{ADVISING AND CAREERS}

Students who have declared the Consulting Certificate will be assigned a School of Business academic advisor and career coach.

\section*{INTERNATIONAL BUSINESS, CERTIFICATE}

The Certificate in International Business helps students develop an understanding of the global macroeconomic environment and the complexities of cross-border transactions. International Business is an
interdisciplinary field and courses focus on knowledge acquisition as well as application of concepts. The embedded study abroad requirement helps students develop cross-cultural awareness and skills, and gain a regional perspective that often underpins successful adaptation for local markets.

International business careers span industries and economic sectors, as well as business functions and geographies, and often include domestic positions with global scope. Positions in international business involve strategy, leadership, research, government relations, creativity, technical expertise, and cultural fluency.

\section*{HOW TO GET IN}

To declare this certificate, students must be admitted to UWMadison and the School of Business (WSB). To find out more about the school's admissions process for undergraduate students, please see Entering the School (https://guide.wisc.edu/undergraduate/business/ \#enteringtheschooltext). Contact the Wisconsin BBA Advising Center listed under the Advising and Careers tab for more information or to declare the certificate.

Students may not earn this certificate in conjunction with the BBA in Business: International Business, and/or the exclusively online BBAs in Business Administration-Human Resources, Business AdministrationManagement, and Business Administration-Marketing.

\section*{REQUIREMENTS}

A minimum 2.000 GPA must be earned on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

At least 50\% of the certificate credits must be earned in residence at UWMadison as a degree-seeking undergraduate. All certificate courses must be graded; credit/no credit and pass/fail do not qualify.

Completion of this certificate satisfies one of the business breadth courses needed for the BBA.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline INTL BUS 200 & International Business & 3 \\
\hline INTL BUS 450 & Study Abroad in International Business & 1 \\
\hline \multicolumn{2}{|l|}{6 Additional Credits of INTL BUS \({ }^{2}\)} & 6 \\
\hline \multicolumn{2}{|l|}{Global Interdisciplinary Perspective} & 3 \\
\hline \multicolumn{3}{|l|}{Select one course from the following:} \\
\hline ANTHRO 104 & Cultural Anthropology and Human Diversity & \\
\hline GEOG 340 & World Regions in Global Context & \\
\hline INTL ST 101 & Introduction to International Studies & \\
\hline POLI SCI 140 & Introduction to International Relations & \\
\hline
\end{tabular}

\section*{Total Credits}

1
This course must be taken during the required study abroad semester. The study abroad requirement must be satisfied through an approved program.

\section*{2}

A maximum of 3 credits of INTL BUS 365 Contemporary Topics can be applied to this 6 credit requirement.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Apply international business theories and concepts to a variety of business situations.
2. Formulate business strategies appropriate to global, regional and local contexts.
3. Demonstrate the skills necessary for successful cross-cultural adaptation into a host country.

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN INTERNATIONAL BUSINESS}

For more information about the faculty and their teaching and research interests, please visit the directory (https:// business.wisc.edu/directory/).

\section*{FINANCE}

The finance curriculum prepares students for a wide variety of career pathways including corporate finance, the investments and securities industry, the management of financial institutions including banks and insurance companies, and the evolving financial technology sector. The theory of finance and its applications are emphasized. Students learn about: security analysis and valuation, security trading, financial markets and government policies, financial forecasting, capital structure, financial risk management, venture capital, security issuance, international finance and financial technology.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Business: Finance, Investment, and Banking, BBA (p. 1474)

\section*{BUSINESS: FINANCE, INVESTMENT, AND BANKING, BBA}

The finance, investment, and banking (https://business.wisc.edu/ undergraduate/majors/finance-investment-banking/) curriculum prepares students for a wide variety of career pathways including corporate finance, the investments and securities industry, the management of financial institutions including banks and insurance companies, and the evolving financial technology sector. The theory of finance and its applications are
emphasized. Students learn about security analysis and valuation, security trading, financial markets and government policies, financial forecasting, capital structure, financial risk management, venture capital, security issuance, international finance, and financial technology.

A significant part of the coursework teaches students to understand risk and uncertainty, both at an intuitive level and at a technical level. More important, students learn to construct models of financial decisionse.g., an investor's portfolio choice problem, the issuance of securities by corporations, and the structure of financial investments by banks.

\hline MATH 213 & Calculus and Introduction to Differential Equations & 3 \\
\hline or MATH 222 & Calculus and Analytic Geometry 2 & \\
\hline
\end{tabular}

\section*{1}

Students pursuing an additional major in Actuarial Science or Economics may opt for a different Business Analytics course. The approved list is detailed on the School of Business Requirements (p. 1460) page.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for
living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p.1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

&
\end{tabular}

\section*{EARNING OUTCOMES}
1. Apply proper controls and best practices in the governance of modern organizations while recognizing the impact of finance on business and society.
2. Explain the workings of financial markets, the role of financial intermediaries, and market mechanisms to create and trade securities.
3. Evaluate the risk and return of financial securities and transactions.
4. Interpret models of asset pricing and demonstrate how to value financial securities
5. Learn and apply best practices in data-driven decisions about investments, financing and payout policies, corporate restructuring, and risk management.
6. Identify the role of financial technology in shaping the financial system and financial operations.
7. Formulate a comprehensive financial plan for individuals or business entities.

\section*{FOUR-YEAR PLAN}

Please use this recommended course sequencing guide as a reference point as you work with your academic advisor to plan your schedule throughout your BBA experience. This guide is intended for students whose primary major and career interests are in finance. Many business breadth and core finance courses are recommended early on so that students are prepared for the internship interview process which begins as early as sophomore year. There are several factors that may impact your
optimal course sequencing plan, so please consult with your academic advisor.

\section*{Freshman}
\begin{tabular}{|c|c|c|c|}

\end{tabular}

Total Credits 120-123

1
Pre-business admits will take this course in the term of admission to the Wisconsin School of Business.

\section*{2}

This is the recommended course but any elective is acceptable. 3

Taking summer courses is an option to reduce credit loads during the traditional semesters. Ideal classes to take over the summer include: MARKETNG 300, M H R 300, OTM 300, ACCT I S 211, ECON 102 and Business Breadth.

4
This can be any 3 credit FINANCE course numbered above 330 .
5

Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issues, PHILOS/ENVIR ST 441 Environmental Ethics

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{PLANNING FOR THE FINANCE MAJOR}

In preparation for completing the major requirements for the Finance major, taking these courses early will help you graduate in a timely fashion.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Prior to enrolling in FINANCE/ECON 320, FINANCE 325, or FINANCE 330, plan to take:} \\
\hline FINANCE/ ECON 300 & Introduction to Finance & 3 \\
\hline MATH 213 & Calculus and Introduction to Differential Equations & 3 \\
\hline or MATH 222 & Calculus and Analytic Geometry 2 & \\
\hline GEN BUS 307 & Business Analytics II (can be taken concurrently) & 3 \\
\hline \multicolumn{3}{|l|}{Prior to enrolling in FINANCE 325 take:} \\
\hline ACCT IS 301 & Financial Reporting I & 3 \\
\hline \multicolumn{3}{|l|}{Prior to your third year, complete:} \\
\hline FINANCE/ ECON 300 & Introduction to Finance & 3 \\
\hline GEN BUS 307 & Business Analytics II \({ }^{1}\) & 3 \\
\hline ACCT I S 301 & Financial Reporting I & 3 \\
\hline
\end{tabular}

Other guidance:
It is recommended to take FINANCE/ECON 320 before or concurrently with FINANCE 330; FINANCE 330 is the most quantitatively challenging of the three required courses beyond principles.
If the mathematics requirement has not been completed prior to admission to the School of Business, then you must take MATH 213 and MATH 222 as early as possible.
Prior to your summer internship it can be useful to complete certain finance electives that match your internship and/or career focus area. Please discuss with your advisor

1
Students pursuing an additional major in Actuarial Science or Economics may opt for a different Business Analytics course. The approved list are detailed on the School of Business Requirements (p. 1460) page.

\section*{CAREERS}

Finance is the integration of time, returns and risk and how they are interrelated. Two pressing questions in finance are:
-What do l invest in?
- How do I pay for it?

Organizations that focus on finance include banks, credit card companies, insurance companies, consumer finance companies, corporations, stock brokerages, investment funds, government sponsored enterprises, education, and individuals.

Students may pursue careers in many different industries, including but not limited to:
- Commercial and retail banking
- Corporate finance
- Investment banking
- Investment management
- Investment research
- Global markets (sales and trading)
- Financial technology/cryptocurrency
- Wealth management and financial planning

Find more details about these industries on the BBA Finance website (https://business.wisc.edu/undergraduate/majors/finance-investmentbanking/).

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN FINANCE}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{INTERNATIONAL BUSINESS}

\section*{DEGREES/MAJORS/CERTIFICATES}
- Business: International Business, BBA (p. 1477)

\section*{BUSINESS: INTERNATIONAL BUSINESS, BBA}

Admissions to the Business: International Business, BBA is suspended as of fall 2023 and will be discontinued as of fall 2028. If you have any questions, please contact the department.

The international business (https://business.wisc.edu/undergraduate/ majors/international-business/) major helps students develop an understanding of the global macroeconomic environment and the complexities of cross-border transactions. International business is an interdisciplinary field and courses focus on knowledge acquisition as well as application of concepts. A selected regional emphasis provides a platform to gain language and area studies knowledge that often underpins successful adaptation for regional and local markets. The embedded study abroad requirement helps students develop crosscultural awareness and skills.

International business careers span industries and economic sectors, and business functions and geographies, and often include domestic positions with global scope. Positions in international business involve strategy, leadership, research, government relations, creativity, technical expertise, and cultural fluency.

\section*{HOW TO GET IN}

Admissions to the Business: International Business, BBA is suspended as of fall 2023 and will be discontinued as of fall 2028. If you have any questions, please contact the department.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major ( \(p\). 1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

Complete requirements: (p. 1460)
Pre-Business
Liberal Studies

Business Prep
Business Core
Business Breadth

\section*{INTERNATIONAL BUSINESS MAJOR REQUIREMENTS}

International business responsibilities and careers typically arise after graduates first develop skills in a functional area of business, such as marketing, finance, management and operations. This functional expertise typically drives initial career placement and advancement. Therefore, the international business major must be paired with another major within the School of Business.

Some international business issues are global in nature, but many challenges and opportunities faced by multinational firms are regional and local in nature and often arise due to differences in institutions, politics and cultures among nations. This 'glocal' reality means that international business leaders must possess both global and local awareness. To develop some perspective on regional and local cultural issues, international business majors select a geographic region of emphasis and select language and area studies courses accordingly. Studying abroad on an approved program in the selected region of emphasis for one fall or spring semester is also required for the major.

A student must complete a minimum of 24 credits, distributed as follows:
Code Title Credits

INTL BUS 200 International Business 3
\(\begin{array}{ll}\text { International Business Coursework } & 9\end{array}\)
Minimum of 3 credits must be from the International

\section*{LEARNING OUTCOMES}
1. Know and be able to apply international business theories and concepts to a variety of business situations.
2. Formulate business strategies appropriate to global, regional and local contexts.
3. Know the skills necessary for cross-cultural adaptation and know how to access resources to continue future learning.

\section*{FOUR-YEAR PLAN}

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

3 ASSIGNED ACADEMIC AND CAREER COACHES
Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{CAREERS}

The perspective, intercultural awareness and regional knowledge gained through the study of international business is always relevant, but has greatest career impact several years into one's career. Therefore, the international business major is designed to serve as a complement to another business major. International business careers develop after graduates first develop skills and expertise in a functional area of business, which drives initial career placement and advancement.

Careers in international business are not necessarily located oversees or even in major cities. Many positions are in U.S.-based offices or divisions of international firms.

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN INTERNATIONAL BUSINESS}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{MANAGEMENT AND HUMAN RESOURCES}

Students in human resources management study how organizations attract, motivate, develop, and retain employees, and how they interact with organizations representing employees. Management studies focus on the activities of leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions. Studies in entrepreneurship are designed for students who are interested in bringing new ideas to the marketplace.

The M H R major is designed to give students the choice of which option(s) to study: human resources, management, or entrepreneurship.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Business Administration: Human Resources, BBA (p. 1494)
- Business Administration: Management, BBA (p. 1497)
- Business: Management and Human Resources, BBA (p. 1499)
- Entrepreneurship, Certificate (p. 1511)

\section*{PEOPLE}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{BUSINESS ADMINISTRATION: HUMAN RESOURCES, BBA}

Human resources professionals play a crucial role in an organization's success: They attract, motivate, develop and retain employees. If you enjoy a high level of personal interaction and have a healthy amount of empathy and patience, advancing in this field is for you.

In the UW-Madison Online BBA in Human Resources you will learn about leadership, strategy, and decision-making that will land you in a demanding yet rewarding field. Through the highly ranked School of Business, you will gain valuable skills in communication, collaboration, problem solving, research and planning. You will learn to analyze an organization's compensation strategy, discern the best staffing techniques, address challenges facing labor and employment relations, use the best negotiation tactics and design work systems that help employees contribute to an organization's performance.

After you graduate, you'll attract top national employers in a variety of industries, such as finance and insurance, health care and social assistance, professional/scientific/technical services and manufacturing. The BBA in Human Resources from UW-Madison Online will equip you for a broad array of careers, from human resources manager to compensation analyst or compliance manager.

\section*{HOW TO GET IN}

Students applying to the BBA in Business Administration-Human Resources program apply through UW-Madison Online (https://
online.wisc.edu/). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (https://online.wisc.edu/apply/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Communication Part A} \\
\hline Complete one cours preferably: & designated Communication Part A, & 0-3 \\

Select one 3 (or more) credit course designated Social 3

\section*{Science (S or Z)}

Total Credits

\section*{1}

Note: If a student completes an additional Literature (L) course, this requirement will be satisfied.

\section*{BUSINESS FOUNDATION REQUIREMENTS}

All BBA degree candidates are required to complete foundation courses in business and economics. The foundation courses, in conjunction with a broad educational base, are designed to integrate the student's specialized training with an understanding of the structure and functions of business and its role in the larger social system. Business foundation courses make up the business preparatory, core, and breadth requirements. Sequencing of courses in business preparatory, core, and
breadth sections may vary based on a student's academic plan or major. Consult with your academic advisor for specific recommendations.

\section*{BUSINESS PREPARATORY REQUIREMENT}

All students must take the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline GEN BUS 110 & Personal and Professional Foundations in Business & 1 \\
\hline GEN BUS 106 & Foundational Skills for Business Analysis & 1 \\
\hline GEN BUS 206 & Beginning Data Analysis for Business & 3 \\
\hline GEN BUS 207 & Intermediate Data Analysis for Business & 3 \\
\hline GEN BUS 360 & Workplace Writing and Communication & 3 \\
\hline ECON 102 or ECON 111 & \begin{tabular}{l}
Principles of Macroeconomics \\
Principles of Economics-Accelerated

GEN BUS 301 & Business Law & 3 \\
Business Breadth Course \({ }^{1}\) & \(\mathbf{3}\) \\
Business Breadth Course & \\
Total Credits & \\
\hline
\end{tabular}

1
Students must complete two business courses (3 credits each) that are outside their major from two separate School of Business departments. Courses taken to satisfy this requirement may not include preparatory or core courses, courses required by or cross- listed with the student's major, general business courses, any 399 (Readings and Research) course, or business courses cross-listed with foreign language departments. Courses taken at another institution must be directly equivalent to a UW-Madison business course and title (i.e. not elective credit which is sometimes given an X 10 course number).

2
Students with two majors in business or students with one major and a business related certificate need only one course (3 credits) outside their majors/certificate to satisfy this requirement. Students with three or more business majors or two majors and a business related certificate are not required to take additional breadth courses.

\section*{CREDITS FOR BBA DEGREE CREDIT REQUIREMENTS}

Candidates for the BBA degree must meet all of the following credit requirements in addition to completing the required coursework.

\section*{120 Degree Credits}

All students who plan to graduate from the University of WisconsinMadison with a bachelor's degree must complete a minimum of 120 degree credits.

\section*{BBA IN BUSINESS ADMINISTRATION - HUMAN RESOURCES MAJOR REQUIREMENTS}

The BBA in Business Administration - Human Resources major is a total of 12 credits consisting of the following 4 required courses.
\begin{tabular}{llr} 
Code & Title & Credits \\
M H R 305 & Human Resource Management & 3 \\
M H R 423 & Strategic Management & 3 \\
M H R 610 & Compensation: Theory and & 3 \\
M H R 611 & Administration & \\
\hline Total Credits & Strategic Talent Management & \(\mathbf{3}\) \\
\hline
\end{tabular}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

\section*{LEARNING OUTCOMES}
1. Understand that the management of human resources is vital to a successful business strategy and organizational effectiveness.
2. Analyze organization compensation strategy to identify problems and develop solutions that support the organization's strategy.
3. Discern which staffing techniques are poor, fair, and good predictors of employees' future job performance.
4. Identify and address the various challenges currently facing labor and employment relations.
5. Apply appropriate tactics in competitive and cooperative negotiations individually and as part of a negotiation team.
6. Design work systems and roles that allow employees to contribute to organizational performance.

\section*{FOUR-YEAR PLAN}

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the Requirements tab for more information about the curriculum and program plan.

\section*{ADVISING AND CAREERS}

\section*{ACCESSING ADVISING}

Each UW-Madison Online student is assigned an academic and career (AC) advisor (https://online.wisc.edu/academic-career-coach/). The AC advisor will support the academic and personal success of each student by partnering with current School of Business advisors in the Wisconsin BBA Advising Center to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

\section*{CAREERS}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors help prepare students for life post-graduation through individual and group advising.

\title{
BUSINESS ADMINISTRATION: MANAGEMENT, BBA
}

Management studies focus on the activities of leadership, power, decisionmaking, organizational structure and change, strategy and policy, and the integration of organizational functions. If you aim to be an entrepreneur or advance in a leadership position in a private business, government or nonprofit organization, a BBA in Management is a good fit for you.

Through UW-Madison Online, you'll learn from top faculty in the field. From the highly ranked School of Business, you will gain valuable skills in communication, collaboration, planning, problem solving and building relationships. You will learn to develop successful team structures that maximize performance, design systems to achieve strategic objectives in a global business environment, diagnose problems and design effective interventions, and evaluate an organization to maximize its competitive advantage within an industry.

This degree will prepare you to work for businesses large and small or for yourself as a business owner or entrepreneur. Top industries hiring in this field include finance and insurance, health care and social assistance, professional/scientific/technical services and manufacturing. The BBA in Management from UW-Madison Online will equip you for a broad array of careers, from business owner to talent acquisition manager or compensation analyst, to name just a few.

\section*{HOW TO GET IN}

Students applying to the BBA in Business Administration-Management program apply through UW-Madison Online (https://online.wisc.edu/). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UWMadison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (https://online.wisc.edu/ apply/).

1
Students must complete two business courses (3 credits each) that are outside their major from two separate School of Business departments. Courses taken to satisfy this requirement may not include preparatory or core courses, courses required by or cross- listed with the student's major, general business courses, any 399 (Readings and Research) course, or business courses cross-listed with foreign language departments. Courses taken at another institution must be directly equivalent to a UW-Madison business course and title (i.e. not elective credit which is sometimes given an X10 course number).

2
Students with two majors in business or students with one major and a business related certificate need only one course (3 credits) outside their majors/certificate to satisfy this requirement. Students with three or more business majors or two majors and a business related certificate are not required to take additional breadth courses.

\section*{CREDITS FOR BBA DEGREE CREDIT REQUIREMENTS}

Candidates for the BBA degree must meet all of the following credit requirements in addition to completing the required coursework.

\section*{120 Degree Credits}

All students who plan to graduate from the University of WisconsinMadison with a bachelor's degree must complete a minimum of 120 degree credits.

\section*{BBA IN BUSINESS ADMINISTRATION MANAGEMENT MAJOR REQUIREMENTS}

The BBA in Business Administration - Management major is a total of 12 credits consisting of the following 4 required courses.
\begin{tabular}{llr} 
Code & Title & Credits \\
M H R 305 & Human Resource Management & 3 \\
M H R 401 & The Management of Teams & 3 \\
M H R 423 & Strategic Management & 3 \\
M H R 628 & Negotiations & \(\mathbf{3}\) \\
\hline Total Credits & & \(\mathbf{1 2}\)
\end{tabular}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Understand that the management of human resources is vital to a successful business strategy and organizational effectiveness.
2. Develop successful team structures that mitigate decision-making pitfalls and interpersonal conflict while maximizing team performance.
3. Design successful organization structures to achieve strategic objectives and execute operational plans within a global business environment.
4. Diagnose management and organizational problems from an internal or external consultant's perspective and design interventions to enhance organizational effectiveness.
5. Evaluate an organization's internal capabilities and external pressures and maximize its competitive advantage within an industry.

\section*{FOUR-YEAR PLAN}

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the Requirements tab for more information about the curriculum and program plan.

\section*{ADVISING AND CAREERS}

\section*{ACCESSING ADVISING}

Each UW-Madison Online student is assigned an academic and career (AC) advisor (https://online.wisc.edu/academic-career-coach/). The AC advisor will support the academic and personal success of each student
by partnering with current School of Business advisors in the Wisconsin BBA Advising Center to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

\section*{CAREERS}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors help prepare students for life post-graduation through individual and group advising.

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN MANAGEMENT AND HUMAN RESOURCES}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{BUSINESS: MANAGEMENT AND HUMAN RESOURCES, BBA}

Students in the Management and Human Resources (https:// business.wisc.edu/undergraduate/majors/management-humanresources/) major can choose from various options. Students in human resources study how organizations attract, motivate, develop, and retain employees, and how they interact with organizations representing employees. Management studies focus on the activities of leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions. Studies in entrepreneurship are designed for students who are interested in bringing new ideas to the marketplace.

\section*{RELATED STUDENT ORGANIZATIONS}

Collegiate DECA (https://win.wisc.edu/organization/deca/) Enactus (https://win.wisc.edu/organization/madisonenactus/) Sigma lota Epsilon (SIE) (https://www.sienational.com/) Society for Human Resource Management (https:// win.wisc.edu/ organization/shrm/)

\section*{HOW TO GET IN}

Students wishing to pursue this major on campus must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (p. 1449).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
- Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

\section*{LEARNING OUTCOMES}
1. (Human Resources and Management Tracks) Understand that the management of human resources is vital to a successful business strategy and organizational effectiveness.
2. (Human Resources Track) Analyze organization compensation strategy to identify problems and develop solutions that support the organization's strategy.
3. (Human Resources Track) Discern which staffing techniques are poor, fair, and good predictors of employees' future job performance
4. (Human Resources Track) Identify and address the various challenges currently facing labor and employment relations.
5. (Human Resources Track) Apply appropriate tactics in competitive and cooperative negotiations individually and as part of a negotiation team.
6. (Human Resources Track) Design work systems and roles that allow employees to contribute to organizational performance.
7. (Entrepreneurship Track) Develop innovative solutions to challenging problems and generate economic and socially valuable outcomes.
8. (Entrepreneurship Track) Create, assess, shape, and act on opportunities in a variety of contexts and organizations.
9. (Entrepreneurship Track) Make decisions based on mindfulness of relevant stakeholders, ethical reflections, and an attempt to create and sustain social, environmental, and economic value.
10. (Entrepreneurship Track) Incorporate cultural context and complexities when managing in a global environment.
11. (Entrepreneurship Track) Exercise appropriate leadership, value diverse perspectives, and work collaboratively to accomplish organizational objectives in a dynamic environment.
12. (Management Track) Develop successful team structures that mitigate decision-making pitfalls and interpersonal conflict while maximizing team performance.
13. (Management Track) Design successful organization structures to achieve strategic objectives and execute operational plans within a global business environment.
14. (Management Track) Diagnose management and organizational problems from an internal or external consultant's perspective and design interventions to enhance organizational effectiveness.
15. (Management Track) Evaluate an organization's internal capabilities and external pressures and maximize its competitive advantage within an industry.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

There are three named options for the MHR major from which students must choose. Students may also select any combination of two options. There are six plans below representing these options.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{CAREERS}

Students who pursue a major in management go on to careers in a wide range of fields. To find more information about common industries that management majors work in following graduation, please visit our website (https://business.wisc.edu/undergraduate/majors/management-humanresources/).

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

> BUSINESS: MANAGEMENT AND HUMAN RESOURCES: HUMAN RESOURCES

\section*{HUMAN RESOURCES OPTION}

Students in human resources management study how organizations attract, motivate, develop, and retain employees, and how they interact with organizations representing employees. Topics covered include recruiting, external and internal staffing, compensation theory and administration, performance management, training and development, labor-management relations, and equal employment opportunity. This concentration is pursued by students seeking staff jobs in the human resources department, supervisory and team leader jobs, and entry into management training programs that precede job placement. It is appropriate for those who seek positions in both public and private sector organizations.

\section*{BUSINESS: MANAGEMENT AND HUMAN RESOURCES: MANAGEMENT}

\section*{MANAGEMENT OPTION}

This major focuses on the activities of management in organizations. Course material covers leadership, power, decision-making, organizational structure and change, strategy and policy, and the integration of organizational functions (such as marketing and finance). The topics apply to business, government, health care, and other service organizations.
This concentration is especially appropriate for students who seek roles as general managers and administrators at all levels of an organization, rather than roles as technical specialists. Students are also helped in developing a long-term perspective of both their own careers and the function of management in organizations and society.

\section*{ENTREPRENEURSHIP, \\ CERTIFICATE}

The undergraduate certificate in entrepreneurship (https:// business.wisc.edu/undergraduate/certificates/entrepreneurship/) is one of the most popular certificates at UW-Madison. It offers opportunities for non-business undergraduates interested in learning the skills for entrepreneurial thinking. These skills are critical both now and in the future if you are starting a new venture, working for a startup, or tackling new ventures within existing organizations. Modern businesses rely heavily on the ability to recognize and seize opportunities. Cuttingedge technologies, innovative business models, and ever-changing market landscapes determine which firms thrive and which do not. Taking initiative, thinking entrepreneurially, and acting upon opportunities are key ingredients of success in this environment.

This certificate program offers a distinct array of courses that combine business entrepreneurship classes with the curricula of several colleges and schools at UW-Madison. Classes in entrepreneurship and related topics provide the skills necessary to succeed throughout a student's career. Student projects outside the classroom with local firms or student ventures provide students with hands-on business experience. This comprehensive certificate program helps prepare students for roles such as business founder, product manager, engineer/scientist, new product designer, marketing or finance professional, nonprofit administrator, or consultant.

\section*{HOW TO GET IN}

The certificate is open to undergraduate students who have home departments outside of the School of Business and are in good academic standing. Business undergraduates should explore the entrepreneurship major option.

To declare the certificate in entrepreneurship, go to the Academic Forms (https://bus.wisc.edu/current-student-resources/bba/academic-supportresources/forms/) page and complete the declaration form.

\section*{REQUIREMENTS}

A total of 15 credits is required to complete the certificate. The required foundation course, advanced entrepreneurship coursework, and electives from across the campus are used to earn the 15 credits. Coursework options available for fulfilling the certificate program are shown in the accompanying tables. Students are strongly encouraged to participate in related non-credit entrepreneurship immersion experiences such as competitions and student organizations.

\section*{Students will:}
1. Take one 3-credit required foundation course (MHR 322 OR M HR 422)
2. Choose 3 additional credits from a list of approved School of Business advanced entrepreneurship courses
3. Choose 9 credits of additional courses from a list of approved other electives or advanced entrepreneurship courses.

At least 9 of the required 15 credits for the certificate must be completed in residence.

Students must earn a 2.5 cumulative GPA in all certificate in entrepreneurship coursework.

\section*{REQUIRED FOUNDATION COURSEWORK}

Code
M H R 322
or M H R 422

Title
Credits
Introduction to Entrepreneurial
Management (restricted to non-
business majors)
Entrepreneurial Management

\title{
ADVANCED ENTREPRENEURSHIP COURSEWORK \({ }^{1}\)
}

Students must choose at least 3 credits from the following list of courses:

\section*{Code}

GEN BUS 310
or ACCT IS 100
or ACCT IS 300
\begin{tabular}{lll} 
M HR434 & Venture Creation & 3 \\
M HR 427 & Entrepreneurial Growth Strategies & 3 \\
M HR 441 & Technology Entrepreneurship & 3 \\
FINANCE 457 & Entrepreneurial Finance & 3
\end{tabular}

\section*{1}

Some courses listed have pre-requisites, so please make sure those are satisfied before selecting a course.
2
Non-business majors are strongly recommended to take GEN BUS 310 instead of ACCT IS 100 or ACCT IS 300.

\section*{ELECTIVE COURSEWORK}

9 credits of other elective coursework (below) can be counted toward the required 15 certificate credits.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Correctly demonstrate knowledge of basic market discovery techniques and apply basic market discovery techniques.
2. Demonstrate proficiency in knowing the basic steps taken to start a new venture.
3. Demonstrate knowledge of career paths in entrepreneurship (M H R 322 Introduction to Entrepreneurial Management/M H R 422 Entrepreneurial Management).

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING}

Students who have declared the Certificate in Entrepreneurship will be assigned to the Business Certificate Advising and Career Committees.

\section*{MARKETING}

Marketing creates exchanges between organizations and customers. It includes planning, designing, pricing, promoting and distributing goods and services that satisfy organizational and customer needs. In the highlevel economy of the United States and many other countries, marketing has become a critical and comprehensive business function. The concept of marketing is becoming increasingly broad and important. Students may pursue career opportunities in: Advertising/PR/Communication, Digital Marketing, General Marketing, Marketing Research/Analyst, Merchandising/Buyer/Planner, Product/Brand Management, Business-to-Business (B2B), Sales/Business Development, Sports Marketing \& Communication and Supply Chain Management.

Contemporary marketing managers must understand not only the traditional areas of marketing channels, sales management, advertising, and research, but must also be familiar with consumer and dealer
motivation. The manager must be able to translate knowledge of consumer behavior into marketing strategy. The marketing program is broad enough to permit a major to develop knowledge in these several areas, but flexible enough so that students may focus on special interest areas.

DEGREES/MAJORS/CERTIFICATES
- Business Administration: Marketing, BBA (p. 1513)
- Business: Marketing, BBA (p. 1515)

\section*{BUSINESS ADMINISTRATION: MARKETING, BBA}

If you're a strategic thinker and a creative problem-solver, then advancing in a career in marketing could be a good choice for you. Marketing is a diverse field that involves in-demand skills desired by top employers, large and small. It's also a growing field, particularly in the digital realm. Successful marketers will be analytical, creative and know how to leverage technology.

The UW-Madison Online BBA in Marketing provides a robust foundation in business. From the highly ranked School of Business, you will gain valuable skills in communication, collaboration, creativity, relationship building and planning. You will learn to implement strategies related to product, place/distribution, price and promotion; analyze market segments and generate effective plans; leverage relevant sources to determine and support marketing actions; and apply analytical rigor to decisions.

Graduates pursue a variety of careers in marketing, including brand/ product management, marketing research/analytics, sales management, advertising, business-to-business marketing, digital and social media, consulting, and supply chain management. You could be a product manager, social media strategist or market research analyst, among other dynamic jobs.

\section*{HOW TO GET IN}

Students applying to the BBA in Business AdministrationMarketing program apply through UW-Madison Online (https:// online.wisc.edu/). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (https://online.wisc.edu/apply/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the
requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business.

\section*{PRE-BUSINESS REQUIREMENTS}
\begin{tabular}{|c|c|c|}

\section*{Total Credits}

\section*{LIBERAL STUDIES REQUIREMENTS}

Liberal studies requirements must be completed prior to graduation.
Students may not use courses offered by the Department of Economics or by the School of Business to fulfill liberal studies requirements. In addition, a single course may not be used to fulfill multiple liberal studies requirements.

\section*{BBA IN BUSINESS ADMINISTRATION - MARKETING MAJOR REQUIREMENTS}

The BBA in Business Administration - Marketing major is a total of 18 credits consisting of the following 6 required courses.
\begin{tabular}{llr} 
Code & Title & Credits \\
MARKETNG 305 & Consumer Behavior & 3 \\
MARKETNG 310 & Marketing Research & 3 \\
MARKETNG 355 & Marketing in a Digital Age & 3 \\
MARKETNG/ & Fundamentals of Supply Chain & 3 \\
OTM 421 & Management & \\
MARKETNG 430 & Strategic Pricing & 3 \\
MARKETNG 460 & Marketing Strategy & 3 \\
\hline Total Credits & & \(\mathbf{1 8}\)
\end{tabular}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Apply analytical rigor to marketing decisions.
2. Locate, evaluate, and leverage relevant sources to determine and support their marketing actions.
3. Demonstrate the ability to formulate and implement marketing strategies related to product, place/distribution, price, promotion.
4. Demonstrate the ability to evaluate and analyze appropriate market segments and generate effective marketing plans. \(\backslash \backslash n\)

\section*{FOUR-YEAR PLAN}

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the Requirements tab for more information about the curriculum and program plan.

\section*{ADVISING AND CAREERS}

\section*{ACCESSING ADVISING}

Each UW-Madison Online student is assigned an academic and career (AC) advisor (https://online.wisc.edu/academic-career-coach/). The AC advisor will support the academic and personal success of each student by partnering with current School of Business advisors in the Wisconsin BBA Advising Center to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

\section*{CAREERS}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors help prepare students for life post-graduation through individual and group advising.

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN MARKETING}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{BUSINESS: MARKETING, BBA}

Marketing facilitates exchanges between organizations and customers and is a critical, dynamic, and multi-faceted area of business. The marketing function is found throughout organizations and businesses from global enterprises to start-ups; for services such as healthcare and banking; for nonprofits and municipalities. Students may pursue a variety of careers in marketing including: Advertising/PR/Communication, Digital Marketing, General Marketing, Marketing Research/Analyst, Merchandising/Buyer/ Planner, Product/Brand Management, Business-to-Business (B2B), Sales/Business Development, Sports Marketing \& Communication and Supply Chain Management.

In the marketing major, students learn the foundations of marketing -product, place, price, promotion-and how these concepts impact business strategy and execution in different industries and contexts, as well as the importance of relationships with customers and channel partners. Marketing professionals possess and develop a variety of skills including qualitative and quantitative analysis, critical thinking, creativity, communications, and problem solving. The marketing major (https:// business.wisc.edu/undergraduate/majors/marketing/) provides a robust foundation in the marketing discipline, coupled with the flexibility to pursue several areas of interest in the discipline.

\section*{RECOGNITION}

The Marketing Department at the School of Business was ranked 8th in the United States by U.S. News \& World Report for 2022-2023.

\section*{RELATED STUDENT ORGANIZATIONS}

Mu Kappa Tau (MKT) (https://www.mktmadison.club/) American Marketing Association (AMA) (https://win.wisc.edu/ organization/amauwmadison/)

\section*{HOW TO GET IN}

Students wishing to pursue this major on campus must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (p. 1449).

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

3 Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{CAREERS}

The marketing function is found throughout all organizations and businesses from global enterprises to start-ups; for services such as healthcare and banking; for non-profits and municipalities. Students may pursue a variety of careers in: Advertising/PR/Communication, Digital Marketing, General Marketing, Marketing Research/Analyst, Merchandising/Buyer/Planner, Product/Brand Management, Business-to-Business (B2B), Sales/Business Development, Sports Marketing \& Communication and Supply Chain Management.

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{OPERATIONS AND \\ INFORMATION \\ MANAGEMENT}

The Department of Operations and Technology Management administers the operations and technology management major, the information systems major, and the supply chain management major.

The Operations and Technology Management (OTM) major focuses on the design, production, and delivery of products and services to satisfy customer needs. It equips students with the essential tools and strategies to use resources efficiently, make desirable trade-offs, and strategically redesign or restructure operations. OTM majors distinguish themselves by strong analytical and problem-solving capabilities together with the ability to provide high-level managerial insights into value-based service and production management.

Built on a solid foundation of a business and information technology (IT) curriculum, the major in Information Systems delivers a unique blend of business acumen, industry standards, and practical computing instruction. Students enjoy successful placement and satisfying careers because
they possess both the in-depth knowledge of business processes and the ability to readily translate business requirements into value-added IT solutions. The curriculum is designed to prepare effective leaders in the design, development, and management of information systemsthe lifeblood of a successful business model. Students learn how to use computer technologies to analyze business problems and processes in order to design and implement computer-based information systems which support business operations, decision-making, and planning. Career opportunities exist in management consulting and in industry in the areas of systems development, database administration, network management and as corporate information systems managers.

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services, and information along the value chain with the goal of creating value for the end customer. Supply Chain Management majors learn how to develop appropriate strategies through exploration of logistics, routes to market, analytics, sourcing, and IT systems. In today's complex business environment, there is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers.

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Understand how to manage data, model information, and apply appropriate information technology to create effective business solutions.
2. Understand how to use computer technologies to analyze business problems and processes. \(\backslash \backslash n \backslash \backslash n\)
3. Design and implement computer\#based information systems which support business operations, decision-making, and planning.
4. Develop proficiency in project management, consulting, teamwork, conflict resolution, time management, and oral and written communication skills.
5. Effectively lead organizations in the design, development, and management of information systems.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{1}

Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issues, ENVIR ST/PHILOS 441 Environmental Ethics

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{CAREERS}

Information systems professionals help clients address some of their most complex business problems through the effective use of technology. They see pathways to solutions of highly complex technical issues and are key leaders in conceptualizing and sourcing the best solutions. Information systems professionals collect, store, and analyze information and data to assist organizations and departments in executing business initiatives
and making informed decisions. In addition, they use hardware, software, technology infrastructure combined with input from internal or external clients to develop tools to solve and track business objectives.

For more information about careers in information systems, please visit our Undergraduate Info Systems website (https://business.wisc.edu/ undergraduate/majors/information-systems/).

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

> BUSINESS: OPERATIONS AND TECHNOLOGY MANAGEMENT, BBA

The Operations and Technology Management (https://business.wisc.edu/ undergraduate/majors/operations-technology-management/) (OTM) major focuses on the design, production, and delivery of products and services to satisfy customer needs. It equips students with the essential tools and strategies to use resources efficiently, make desirable trade-offs, and strategically redesign or restructure operations. OTM majors distinguish themselves by strong analytical and problem-solving capabilities together with the ability to provide high-level managerial insights into value-based service and production management.

OTM majors have many career opportunities due to their process orientation and analytical training. They are especially well-equipped for positions in supply chain management and logistics, business analytics, management consulting, service operations management, and manufacturing management.

\section*{CAREERS}

All products and services-from cars to surgeries-are delivered by organized systems. It's the job of operations managers to make sure those activities occur when they are planned, in the right way, in the right quantity, and with the right quality. Operations management transforms inputs-such as labor, equipment, facilities, materials, energy, and information-into goods and services for customers. To make this all happen, the operations function is responsible for critical activities such as materials management, resource planning, purchasing, scheduling, and quality.

\section*{Common Career Paths}

\section*{Production Management}
- Production management involves the design, operations, and improvement of processes used to manufacture goods valued by
end users. Key tasks involve planning and control of materials and resources to enable these processes and make them error-free, fast, and low cost.

\section*{Service Operations Management}
- Service operations management is concerned with the design, operations, and improvement of processes used to produce and deliver services to end customers. Key tasks involve planning control of resources (including training of service personnel) to enable these processes and make them error-free, fast, and low cost.

\section*{Technology Management}
- Technology management allows an organization to manage its technological fundamentals to create a competitive advantage. The role of technology management is to understand the value technologies can have for an organization and for its customers-and to decide when to invest in technology development and/or when to withdraw from using it.

\section*{Supply Chain Management}
- Supply chain management focuses on the movement of products and information along the value chain. The organizations that make up the supply chain are "linked" together through physical flows and information flows. Key tasks are focused on integrating marketing, sourcing, production, logistics, and information systemsnot only within the organization, but also with business partners and customers.

\section*{Consulting}
- Operations consulting is the process of assisting various types of businesses to assess the current status of internal procedures and strategies, and enhance the overall operation of the company. While operations consulting is often thought to focus on manufacturing plants or production facilities, the scope of operations consulting is actually broader than that. Even businesses that are service-based rather than product-based can benefit from operations consulting.

\section*{Project Management}
- Project management is the application of processes, methods, knowledge, skills, tools, and experience to achieve project goals. Projects are separate to business-as-usual activities, requiring people to come together temporarily to focus on specific project objectives

Please visit our website (https://business.wisc.edu/undergraduate/ majors/operations-technology-management/) for further details about potential career areas and responsibilities.

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{BUSINESS: SUPPLY CHAIN MANAGEMENT, BBA}

The field of supply chain management (SCM) is a critical area of competitive advantage for businesses around the world. SCM integrates business functions concerned with the movement of goods, services, and information along the value chain with the goal of creating value for the end customer. SCM is a cross-functional discipline involving many components of business including product development, marketing, demand/supply planning, sourcing, production, inventory, logistics, customer service, and the relationships between businesses and their channels of distribution. In today's complex business environment, there is a need to coordinate these supply chain functions not only within the firm, but with business partners and customers. As a result, SCM is a critical, strategic component of business, and students with SCM education and expertise are in high demand in the marketplace.

The supply chain management major is open to all undergraduate students enrolled in the School of Business and is administered by the Grainger Center for Supply Chain Management at the School of Business. Students will have the opportunity to interact with business leaders, participate in experiential learning and social activities, have access to a global trip/ experience, and be eligible for scholarship opportunities from the Grainger Center.

It is important to appreciate SCM from both the theoretical and applied perspectives. Students declared in the supply chain management major will have the opportunity to participate in a large number of speaker events, site visits, and employer networking opportunities. Additionally, students will be eligible to participate in annual global trip opportunities led by the Grainger Center for Supply Chain Management. These trips allow for the exploration of SCM in new and different locations throughout the world.

For questions or additional information about the major in supply chain management, please visit the Grainger Center (https://business.wisc.edu/ centers/grainger/) (3450 Grainger Hall).

\section*{HOW TO GET IN}

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (https:// guide.wisc.edu/undergraduate/business/\#enteringtheschooltext).

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a
wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{ADDITIONAL ADVISING INFORMATION FOR SUPPLY CHAIN STUDENTS}

Students are offered a variety of applied learning events, site visits, a Supply Chain Management career fair, as well as a global experience trip. These activities enhance classroom learning and allow students to gain hands-on knowledge about the industry.

In addition to the advising offered through the School of Business, Supply Chain Management students are also offered degree-specific career and academic coaching from the Grainger Center's Assistant Director. It's encouraged that students connect with the Assistant Director every semester, as well as participate in the many events that the Center offers each year.

\section*{CAREERS}

Students enrolled in the supply chain management major have access to excellent internship opportunities and earn some of the highest salaries at the School of Business. The average full-time salary for members of the graduating class of 2022 with a supply chain management certificate (offered prior to implementation of the supply chain management major) was approximately \(\$ 66,000\), while the average monthly internship salary was \$3,300.

Some of the companies that recruit students with a specialization in supply chain management include (but are not limited to):
- 3M
- Accenture
- Amazon
- BP Americas
- Cargill
- Deloitte
- Ford
- Georgia-Pacific
- KBX Logistics
- Kohler
- Kohl's Department Stores
- Macy's
- Milwaukee Tool
- Nestle
- Procter \& Gamble
- Rockwell Automation
- Target Corporation
- Uline
- Wayfair
- W.W. Grainger

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{REAL ESTATE AND URBAN LAND ECONOMICS}

The primary goal of the undergraduate real estate (https:// business.wisc.edu/undergraduate/majors/real-estate/) major is to comprehensively underwrite commercial real estate, which is broad-based and follows the education thought leadership of James A. Graaskamp, who expressed that "Real estate should be taught as a process of dynamic interactions rather than functional and historical facts." Underwriting commercial real estate includes the analysis of all property types and the development of residential communities, while assessing and managing risk in all aspects of real estate relative to finance, development, valuation and market analysis. To effectively underwrite commercial real estate, students must be able to identify and
synthesize technical or basic skills, conceptual knowledge, critical thinking skills, and understand the real estate landscape to make informed and thoughtful property decisions. Graduates of the real estate major secure employment in a wide-range of positions and responsibility including real estate private equity investment, commercial real lending and valuation, and real estate development among many other areas including asset/ property management and investment sales and brokerage.

\section*{DEGREES/MAJORS/CERTIFICATES}

\section*{HOW TO GET IN}

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (p. 1449).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major (p. 1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

thresholds will be placed on academic probation.
\end{tabular} \\
&
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Assemble and analyze market, linkage, and economic data to make prudent investment decisions.
2. Identify debt and equity capital sources that meet investor risk/ return parameters for development, acquisitions, debt and value-add investment opportunities.
3. Responsibly and ethically consider investor, tenant, community, and municipal needs in the development process.
4. Create value in the built environment through developments that are built to scale, affordable, and sustainable.
5. Communicate the merits of real estate projects to investors, community stakeholders, and municipal/publicly elected officials.
6. Provide a network of professionals with cutting-edge perspectives and employment opportunities.

PEOPLE

\section*{FACULTY AND STAFF IN REAL ESTATE}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{RISK AND INSURANCE}

Actuarial science involves the construction and management of insurance and pension systems using knowledge from statistics/data science, mathematics, economics, finance, and computer science. The field of actuarial science centers on data analytics for risk assessment. The curriculum prepares students for careers with insurance companies, consulting firms, healthcare organizations, and government organizations. Courses offered cover the material of the preliminary examinations of the Casualty Actuarial Society and the Society of Actuaries as well as more advanced subjects such as regression analysis, health analytics, and machine learning. While it is not required for students to sit for actuarial exams, more than \(90 \%\) of our students pass at least two professional exams before they graduate.

The major in risk management and insurance prepares students to identify, analyze, and manage risks that are inherent in the operation of profit and not-for-profit institutions. Besides professional careers in risk management, the major cultivates skills required for challenging opportunities in organizations that accept these risks-private and governmental insurers, as well as brokerage/agency and consulting organizations.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Business: Actuarial Science, BBA (p. 1530)
- Business: Risk Management and Insurance, BBA (p. 1534)

\section*{BUSINESS: ACTUARIAL SCIENCE, BBA}

Actuarial science involves the construction and management of insurance and pension systems using knowledge from statistics/data science, mathematics, economics, finance, and computer science. The field of actuarial science centers on data analytics for risk assessment. The Actuarial Science (https://business.wisc.edu/undergraduate/majors/ actuarial-science/) major curriculum prepares students for careers with insurance companies, consulting firms, healthcare organizations, and government organizations. Courses offered cover the material of the preliminary examinations of the Casualty Actuarial Society and the Society of Actuaries as well as more advanced subjects such as regression analysis, health analytics, and machine learning. Some of our actuarial courses allow students to earn credit for their professional exams by earning a minimum score in those courses (without taking the professional exam). While it is not required for students to sit for actuarial exams, more than \(90 \%\) of our students will sit for at least two professional exams before they graduate.

\section*{MISSION}

The actuarial science program distinguishes itself through leadership, innovation, community, connections, networks, and recognition of the quality of the faculty, the courses, and the students.

\section*{RELATED ORGANIZATIONS}

Recommended to take either COMP SCI 220 or the STAT 303, STAT 304, STAT 305 sequence.

Students are encouraged to take MATH 234 Calculus--Functions of Several Variables before taking probability (MATH/STAT 431 Introduction to the Theory of Probability, STAT/MATH 309 Introduction to Probability and Mathematical Statistics I , or STAT 311 Introduction to Theory and Methods of Mathematical Statistics I), courses in risk management and insurance; finance; and computer science.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Recognize and explain the concept of risk, and apply the knowledge to the development of insurance products that are used to manage risk for the consumer as well as the risk of those products on the insurance organization.
2. Describe the actuarial profession, including the major professional organizations, the professional obligations of being an actuary, and the requirements to obtain and maintain a professional actuarial designation.
3. Demonstrate skills in critical thinking, quantitative analysis, and communication, as well as to develop an appreciation for actuarial theory, research, and the link to practical application.
4. Demonstrate the soft skills of being a professional.
5. Communicate their experiences and inspire others across the WSOB learning community.

\section*{Total Credits 121-122}

1
Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issues, ENVIR ST/PHILOS 441 Environmental Ethics

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

Actuarial program faculty offer advising nights every fall semester to help students plan their course sequencing and professional exams.

\section*{CAREERS}

Actuaries are problem solvers with expertise in understanding and managing financial risk. They use historical information and models to help predict the future. Actuaries may specialize in life and health (risk of illness, disability or death), pensions (develop and analyze retirement programs) or property and casualty (personal property risks and risks associated with businesses).

Some of our actuarial students utilize the analytical and technical skills they learn in the actuarial program and apply those skills to pursue data analytics or data science as a career. They may do this in the risk and insurance industry or in any industry that has the need to analyze, project and make decisions from large amounts of data.

Find out more about common industries and essential skills needed to be an actuary on the Undergraduate Actuarial Science website (https:// business.wisc.edu/undergraduate/majors/actuarial-science/).

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN RISK AND INSURANCE}

For more information about the faculty and their research interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{CERTIFICATION/LICENSURE}

\section*{CERTIFICATION/LICENSURE}

There are several exams and credentials from the Casualty Actuarial Society (http://www.casact.org/) and the Society of Actuaries (https://www.soa.org) that we prepare students to obtain during their undergraduate career. Students are encouraged to pass at least two actuarial exams before graduation in order to obtain an internship and/or job.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, lowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{RESOURCES AND SCHOLARSHIPS}

If you are good at math and are interested in pursuing a career as an actuary, apply for our UW-Madison Actuarial Program Scholarship (https://www.actuarialclubuw.org/future-members/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\title{
BUSINESS: RISK \\ MANAGEMENT AND \\ INSURANCE, BBA
}

The major in risk management and insurance (https://business.wisc.edu/ undergraduate/majors/risk-management-insurance/) prepares students to identify, analyze, and manage risks that are inherent in the operation of profit and not-for-profit institutions. Besides professional careers in risk management, the major cultivates skills required for challenging opportunities in organizations that accept these risks-private and governmental insurers, as well as brokerage/agency and consulting organizations.

The program of study may be structured to aid students seeking professional designations of Chartered Property and Casualty Underwriter (CPCU) and Associate in Risk Management (ARM).

\section*{RECOGNITION}

Our risk management and insurance undergraduate program is ranked 3rd in the US by U.S. News \& World Report, 2022.

\section*{RELATED ORGANIZATIONS}

Risk Management and Insurance Society (http://www.rmisuw.org/) Co-Curricular Learning Board (https://business.wisc.edu/faculty-research/risk-insurance/learning-board/)

\section*{HOW TO GET IN}

Students wishing to pursue this major must be admitted to the School of Business. Once admitted, students are able to pursue any business major they choose. To find out more about the school's admissions process for undergraduate students, please see Entering the School (p. 1449).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core
of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF BUSINESS REQUIREMENTS}

The Wisconsin Bachelor of Business Administration (BBA) degree program is based on a broad educational foundation combined with courses in business and economics. This curriculum is designed for those students who wish to prepare for careers in business. Students completing any School of Business major ( p . 1460) are required to satisfy a common set of Pre-Business Requirements, Liberal Studies Requirements, Business Preparatory Requirement, Business Core Requirement, Business Breadth Requirement, and Credits for BBA Degree.

\section*{Code \\ Title \\ Credits}

\section*{School of Business BBA Requirements}

Complete requirements: (p. 1460)

\section*{Pre-Business}

Liberal Studies
Business Prep
Business Core
Business Breadth

\section*{RISK MANAGEMENT \& INSURANCE (R M I) MAJOR REQUIREMENTS}

The risk management and insurance major consists of 12 required credits. R M I 300 should be completed prior to any other R M I coursework, as it is a prerequisite for all other courses.
\begin{tabular}{llr} 
Code & Title & Credits \\
R M I 300 & Principles of Risk Management & 3 \\
\hline Complete \(\mathbf{2}\) of the following courses \({ }^{\mathbf{1}}\) & \(\mathbf{6}\) \\
\hline R M I 640 & Management of Insurance & \\
\hline R M I645 & Enterprise \\
\hline R M I655 & Commercial Insurance & \\
\hline
\end{tabular}
\begin{tabular}{|cl|}
\hline R M I 660 & \begin{tabular}{l} 
Risk Analytics and Behavioral \\
Science
\end{tabular} \\
Complete \(\mathbf{1}\) other 600-level R M I course, 600-level & \(\mathbf{3}\) \\
ACT SCI course, FINANCE \(\mathbf{3 2 5}\), or FINANCE \(\mathbf{3 3 0}\) & \\
\hline
\end{tabular}
\begin{tabular}{ll}
\hline Total Credits & 12
\end{tabular}

1
Students may choose to take a third course from this list to count as their additional 3-credit, 600-level R M I course.
2
None of the elective courses may be used to satisfy the business breadth requirement.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade

Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Integrate a holistic risk management process (framework) across all dimensions of an organization, implementing risk management decisions that add value.
2. Use appropriate statistical techniques and data analysis to support risk management decisions.
3. Apply fundamental insurance principles that support economic development through insurance markets.
4. Identify decision-making challenges, and implement strategies to address those challenges, in environments involving risk and uncertainty.
5. Demonstrate strong critical thinking skills as observed through their ability to debate various positions, ask skeptical questions, and probe underlying assumptions.
6. Demonstrate leadership qualities in moving the profession forward.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for students directly admitted into the School of Business from high school. We encourage all students to consult
with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{Freshman}

Students must choose one of the following courses: PHILOS 241 Introductory Ethics, PHILOS 243 Ethics in Business, PHILOS 341 Contemporary Moral Issuess, ENVIR ST/PHILOS 441 Environmental Ethics

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Advising is an integral part of any student's educational journey in the School of Business Undergraduate Program. Starting at Student Orientation, Advising, and Registration (SOAR), we encourage all students to connect with academic advisors. Business academic advisors have a wealth of knowledge about courses on campus, as well as policies and procedures.

Business career coaches help students with career exploration, internships, resumes, job search, interviewing and more. We encourage students to connect with their career coach once they arrive on campus.

Business academic advisors and career coaches are passionate about student success. Students experiencing academic difficulty or personal struggles are encouraged to talk to their advisor about how their individual situation may affect their academic performance.

\section*{ASSIGNED ACADEMIC AND CAREER COACHES}

Admitted business students will have one assigned academic advisor. Career coaches are assigned by academic major to be able to provide industry-specific career guidance. If a student has more than one major, they may have more than one assigned career coach. Students can find their assigned advisor and coach by logging into the Starfish portal through MyUW.

For students not yet admitted to the School of Business, there is a team of pre-business advisors available.

\section*{ACCESSING ADVISING}

Drop-in advising and scheduled appointments are available for admitted business students. Pre-business students may also schedule an appointment with a pre-business academic advisor or utilize drop-in academic advising.

For more information on accessing academic advising, please see our academic advising page (https://business.wisc.edu/undergraduate/ academic-advising/).

For more information on accessing career coaching, please see our career coaching page (https://business.wisc.edu/undergraduate/careers/).

\section*{CAREERS}

Risk professionals identify, develop, and analyze solutions to manage risk (financial, credit, operational, etc.) at both the organizational and consumer level. Effective risk management encompasses all divisions of an organization, allowing the organization to grow safely and to be more resilient. Insurance is a key solution for managing risk and is deployed by risk professionals working as brokers, underwriters, claims adjusters, product developers, and a host of other potential insurance careers.

To learn more about careers in risk management and insurance, please visit the BBA RMI website (https://business.wisc.edu/undergraduate/majors/ risk-management-insurance/).

More information on Career Pathways (https://business.wisc.edu/ undergraduate/careers/pathways/).

\section*{PEOPLE}

\section*{FACULTY AND STAFF IN RISK AND INSURANCE}

For more information about the faculty and their research
interests, please visit the directory (https://business.wisc.edu/ directory/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

AACSB International-The Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Accreditation status: Accredited. Next accreditation review: 2026-2027.

\section*{SCHOOL OF EDUCATION}

The School of Education at UW-Madison is consistently ranked as one of the finest schools of education in the United States, and among the best in the world. The school embraces fields of study that define the human experience: education to challenge minds, health to improve lives, and the arts to enhance creative spirits. World-class research is conducted to drive conversation forward. The school prepares students in a variety of disciplines and for a range of professional roles, including artist, teacher, and therapist.

Approximately 1,500 undergraduates are enrolled each year in the School of Education. While many students are pursuing teacher certification, a significant number are completing programs in the performing and visual arts, human movement, and human services.

The School of Education offers a broad array of undergraduate programs that reflect the wide range of disciplines housed in the school. Although undergraduate majors are not offered in all departments, all ten departments do offer courses to undergraduate students. The school's departments include: Art (p. 1568), Counseling Psychology (http:// counselingpsych.education.wisc.edu/), Curriculum and Instruction (p. 1605), Dance (p. 1672), Educational Leadership and Policy Analysis (http://elpa.education.wisc.edu/), Educational Policy Studies (p. 1693), Educational Psychology (p. 1713), (https://edpsych.education.wisc.edu/) Kinesiology (p. 1715), Rehabilitation Psychology and Special Education (p. 1740), and Theatre and Drama (p. 1771).

School of Education faculty seek committed, creative, and reflective students who are sensitive to differing perspectives. For this reason, most of the school's programs use criteria beyond grade point average in the admissions process. Students are encouraged to challenge themselves and their initial career choices through volunteer experiences, service learning courses, internships or paid work experiences, and study abroad.

Students find that the School of Education is their academic and administrative home-a source of advising, guidance, support, and community. Small class sizes in many pre-professional and professional courses allow students to develop a strong sense of community and to get ample individual attention from professors, instructors, and teaching assistants. Teaching staff are extremely willing to get to know their students and work with them to meet their goals. School of Education courses also provide students the chance to get to know their classmates well. The School of Education works to offer a caring, secure, and supportive environment that encourages taking risks, expanding personal boundaries, and developing into a professional.

\section*{DEGREES/MAJORS/CERTIFICATES}

All students pursuing their undergraduate degree in the School of Education must fulfill the following requirements:
- University-wide General Education Requirements (p. 32)
- School of Education Liberal Studies Requirements (p. 1547)
- Major/Degree Program Requirements (see below)
- Art Education, B.S. (p. 1569)
- Art Studio, Certificate (p. 1577)
- Art, B.S. (p. 1579)
- Art, BFA (p. 1589)
- Arts and Teaching, Certificate (p. 1606)
- Athletic Healthcare, Certificate (p. 1715)
- Communication Sciences and Disorders, BSE (p. 1610)
- Dance Studies, Certificate (p. 1672)
- Dance, B.S. (p. 1674)
- Dance, BFA (p. 1680)
- Dance, Certificate (p. 1686)
- Disability Rights and Services, Certificate (p. 1741)
- Education and Educational Services, Certificate (p. 1713)
- Education Studies, B.S. (p. 1693)
- Educational Policy Studies, Certificate (p. 1700)
- Elementary Education and Special Education, BSE (p. 1742)
- Elementary Education, BSE (p. 1618)
- Game Design, Certificate (p. 1643)
- Global Cultures, Languages, and Education, Certificate (p. 1701)
- Graphic Design, Certificate (p. 1604)
- Health Promotion and Health Equity, B.S. (p. 1717)
- Individual Major, BSE (p. 1689)
- International Development and Education, Certificate (p. 1710)
- Introductory Studies in Dance/Movement Therapy, Certificate (p. 1687)
- Kinesiology, B.S. (p. 1723)
- Physical Education, B.S. (p. 1731)
- Pilates, Certificate (p. 1688)
- Preparing to Teach Abroad, Certificate (p. 1658)
- Promoting Activity for Diverse Abilities, Certificate (p. 1739)
- Rehabilitation Psychology, B.S. (p. 1750)
- Social Justice and Education, Certificate (p. 1712)
- Special Education, BSE (p. 1756)
- Theatre and Drama, B.S. (p. 1771)
- Theatre, Certificate (p. 1778)

Note: Students at UW-Madison become certified to teach secondary English, Mathematics, Science, and Social Studies through graduatelevel coursework, not as undergraduates. A Master's degree offered by the Department of Curriculum and Instruction certifies students to teach in one or more of these four subject areas in grades 4-12, and also English as a Second Language in grades K-12. Information about this Master's degree program is available at UW-Madison Teach (https:// teach.education.wisc.edu/) and on the Curriculum and Instruction (http:// ci.education.wisc.edu/) website.

A new graduate program in World Language Education was recently developed to provide certification in specific world languages Licensing is at the Kindergarten - Grade 12 level. Information about this Master's degree option is also available at UW-Madison Teach (https:// teach.education.wisc.edu/) and on the Curriculum and Instruction (http:// ci.education.wisc.edu/) website.

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience, (https://wisconsinexperience.wisc.edu/about/) combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus.
- Empathy \& Humility (https://wisconsinexperience.wisc.edu/ empathy-and-humility/) - Badgers bring heart-empathy and humility-to everything that we do. It's the very lens of our worldview. We develop and demonstrate a cultural understanding of ourselves and others; we engage locally, nationally, and globally in a respectful and civil manner; and we appreciate and celebrate one another's abilities, views, and accomplishments.
- Relentless Curiosity (https://wisconsinexperience.wisc.edu/ relentless-curiosity/) - Badgers show relentless curiosity at every step of life's journey. We question things that no one has ever thought to question. We actively learn with expert instructors, scholars, and peers; we engage in creative inquiry, scholarship, and research; we develop resilience; and we foster courage in life and learning.
- Intellectual Confidence (https://wisconsinexperience.wisc.edu/ intellectual-confidence/) - Badgers fearlessly sift and winnow until we achieve intellectual confidence. At our core, we're learners and teachers. We develop competence, depth, and expertise in a field of study; we integrate ideas and synthesize knowledge across multiple contexts; and we exercise critical thinking and effective communication.
- Purposeful Action (https://wisconsinexperience.wisc.edu/ purposeful-action/) - Badgers strive to find greater meaning every day through purposeful action. We work for the common good-for something that's bigger than ourselves. We apply
knowledge and skills to solve problems; we engage in public service, partner with others, and contribute to the community; and we lead for positive change.

\section*{THE WISCONSIN EXPERIENCE IN THE SCHOOL OF EDUCATION}

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Some of the current activities are listed below; additional activities are listed under each major.

\section*{SERVICE LEARNING AND COMMUNITY SERVICE}
- Students pursuing health-related studies, including the Health Promotion and Health Equity major (https://guide.wisc.edu/ undergraduate/education/kinesiology/health-promo-health-equity-bs/), have an opportunity to become involved in the Fit Families (https://education.wisc.edu/news/capital-times-spotlights-uw-madisons-luis-columna-and-fit-familiesprogram/) program, developed by Dr. Luis Columna. Fit Families is a physical activity program that brings together children with disabilities, their parents, college students and inservice professionals in related fields such as adapted physical education, special education, orientation \& mobility, psychology, physical education, and exercise science.
- RP \& SE 300 Individuals with Disabilities includes a fieldbased experience where students engage in work that directly or indirectly supports a person with a disability. Hundreds of student each year are placed in a wide variety of placement sites (https://docs.google.com/document/ d/1gXUjnpcFCgJdWTMVyLFIRTQCE4s9ipFsXYtz_K50oCM/ edit/?usp=sharing) in the Madison area. This experience allows students to gain first-hand knowledge of the contributions of, and services provided to, individuals with disabilities within the community.
- The art department offers ART 338, a service learning course. Students work with a community partner in an art-related capacity and learn about community-based practices in the field.
- Students in the Physical Education Teacher Education (PETE) (https://guide.wisc.edu/undergraduate/education/kinesiology/ physical-education-bs/) program partner with the Boys and Girls Club of Dane County to help kids and their families stay active during the holiday break from school. Working together, they develop games that can be done at home using common household items. A flyer describing the games was included in over 500 Thanksgiving baskets distributed by the Boys and Girls Club last year, and associated videos were made available on their website. Who wouldn't want to play "Reverse Pig Trash Ball?"

\section*{STUDY ABROAD}

The School of Education recently developed a number of summer study abroad opportunities. Led by UW-Madison instructors, students studied:
- Diversity and Community in the Galapagos Islands (Ecuador)
- Team Building in Costa Rica
- Theatre in London
- Movement as Medicine in Portugal

Additional courses are in development!

\section*{STUDENT ORGANIZATIONS}
- Aspiring Educators of Wisconsin (https://win.wisc.edu/ organization/aspiringeducators/) is a pre-professional association for those pursuing careers as educators. It provides opportunities to meet other education majors and current teachers, to explore cutting edge issues in education, and interact with the community.
- The Kinesiology Club (https://kinesiology.education.wisc.edu/ home/student-orgs/kines-club/) is a student organization committed to community service through engaging in opportunities to promote physical activity throughout the campus and community. Members are also committed to exploring career opportunities within the field of kinesiology.
- Fresh Hot Press (printmaking), AIGA (graphic design), Mad Gaffers (glassblowing), and Art for Change (activism) are just a few of the available options for art students.
- Diverse Leaders in Education (DLE) (https://win.wisc.edu/ organization/dle/) aims to provide a loving and supportive space for BIPOC students interested in the field of education. The group provides a space that allows future educators of color to create networks with one another throughout subject areas and fields of study. Participants work within the community and provide support for other educators while diversifying the field of education.

\section*{RESEARCH AND DEPTH OF STUDY}
- Kinesiology students are currently serving as Research Assistants in the labs of Professors Cook, Ausderau, Andreae, Schrage, Barnes, and Mason, and also in the Promotion of Health Equity \& Adapted Physical Activity (PHEAPA) lab.
- The Center for Research on Early Childhood Education (https:// crece.wceruw.org/) recently created an undergraduate research fellowship program. The program's goal is to diversify the research communities that address early childhood education.
- More than a dozen rehabilitation psychology students are currently working with professors and graduate students on research in rehabilitation psychology. Several are leading their own research with faculty support, and many students presented at the spring Undergraduate Research Symposium.
- Physical education staff and students recently partnered with experts in the academic technology department to create a smartphone app, "EnCourage." The app provides hundreds of team-building activities for use by teachers, coaches, and anyone trying to develop teamwork with groups. Its development was one of the School of Education Innovation Projects, "Social and Emotional Learning in Physical Education."
- The dance department provides financial awards (https:// dance.wisc.edu/admissions-and-aid/scholarships-and-awards/) to encourage students to continue their studies, both nationally and internationally, over the summer. For example, full-tuition scholarships are given to dance majors to study in the summer study program at the Dance Education Lab in New York. One award of full tuition and accommodation is given to a freshman dance major to study at the six-week Perry Mansfield preprofessional summer study program. Students have these, and other opportunities, to make professional connections in the field and in the global dance community.
- The theatre and drama department offers an Honors option (https://guide.wisc.edu/undergraduate/education/theatre-drama/theatre-drama-bs/\#requirementstext) in the major and a named option in Acting (https://guide.wisc.edu/undergraduate/ education/theatre-drama/theatre-drama-bs/theatre-drama-acting-bs/).
- Undergraduate awards (https://eps.education.wisc.edu/ admissions-and-aid/financial-aid/) in writing, research and community-based scholarship are sponsored by the educational policy studies department. One such award is the Eric Flanagan Community-Engaged Scholarship Award.

\section*{VOLUNTEER OPPORTUNITIES}
- One of the UW's most sought-after volunteer experiences, the kinesiology department's Adapted Fitness (https:// kinesiology.education.wisc.edu/adapted-fitness-personaltraining/) program, located in the heart of campus, offers fitness training and physical activities to community-based clients with a wide variety of permanent and temporary disabilities from heritable disorders, chronic and neurological diseases, and accidental traumas. Students who pursue the Physical Activity for Diverse Abilities certificate (https://guide.wisc.edu/ undergraduate/education/kinesiology/promoting-activity-diverse-abilities-certificate/) receive priority placement for volunteer positions.

\section*{INTERNSHIPS AND FIELD PLACEMENTS}
- Students earning an undergraduate degree in Rehabilitation Psychology (https://guide.wisc.edu/undergraduate/education/ rehabilitation-psychology-special-education/rehabilitation-psychology-bse/) complete at least six credits of internship, selected from a large and diverse number of sites in the community. The goals of the experience include exploring career interests and gaining experience in community agencies serving and advocating for individuals with disabilities.
- Undergraduates in teacher education programs have multiple field experiences in K-12 schools, culminating in a full-time student teaching experience following the semester of the cooperating school.
- Art internships provide real-world experience and can often be completed for university credit through enrollment in ART 393 Internships in Art. Students have interned and conducted research at many businesses, institutions, and on-campus locations, including the Madison Children's Museum, Bayview Center for Arts and Education, ArtWrite Collective, Chazen Museum of Art, Museum of Modern Art, Metropolitan Museum of Art, Monroe Street Arts Center, and the Madison Museum of Contemporary Art.

\section*{POLICIES AND REGULATIONS}

\section*{ACADEMIC CONCERNS AND STATUS}

\section*{ACADEMIC ACTIONS AND EXCEPTIONS}

Academic actions and exceptions are used to record a student's progress through the university and to document various
administrative and academic situations. Actions can be grouped into two broad categories:
- those that permit exceptions to program requirements and school/university policies and
- those that affect a student's standing in the universitye.g., probation or transferring from one program to another.

As the undergraduate dean's office, the School of Education Student Services office is responsible for reviewing, approving, documenting, and sometimes initiating academic actions and exceptions. To be posted to a student's record, exceptions must go through several steps. Exceptions may be initiated either by program faculty/staff or by Student Services staff, who often consult about a specific exception. Once an exception has been approved, it is processed either as an official "Dean's action" or as a DARS exception. Students can find a record of dean's actions on their printed unofficial transcript (also called the student record) or on their DARS report. A DARS exception will be reflected in the individual student's DARS report.

Exceptions to faculty approved program requirements generally include course substitutions and rarely involve course or program requirement waivers. Exceptions to campus or School policies include permission for adding or dropping a course beyond the deadlines, waiving senior or major residency requirements, extending the deadline for meeting a deficiency or finishing an Incomplete, and permitting students to repeat a course for credit. A request for an exception requires careful consideration from all parties involved. Students should be prepared to explain the reasoning behind a request and offer supporting documentation.

Substantial consultation time with faculty, staff, and/or deans may be required, so students should not expect to receive an immediate answer to a request during the initial appointment.

\section*{ACADEMIC STANDING: DEAN'S LIST, ACADEMIC PROBATION, AND MAY NOT CONTINUE.}

To remain in good academic standing in the School of Education, students must earn both a semester grade point average (GPA) and a cumulative grade point average of at least 2.5. Academic standing is not calculated after the completion of summer coursework. While the 2.5 grade point average may not be sufficient to permit students to be considered for admission to their program of choice, it is the minimum required to remain in the School of Education. This may be substantially higher than minimum grade point average requirements in other schools/colleges on campus.

\section*{Dean's List}

Students have at least a 2.5 cumulative GPA and 3.5 or higher for the semester. Students must have received no incompletes in graded courses, no unreported grades, or end-of-semester academic actions for the semester. Credit/no credit and pass/fail courses are not considered in meeting the requirements for the Dean's List.

\section*{Probation}

A student's grade point average for a particular semester falls below 2.5 , while the cumulative campus GPA remains at or above 2.5. Students must earn a minimum 2.5 grade point average on the next semester's coursework to be removed from probation status.

\section*{Strict Probation}

Strict Probation occurs when either (1) a student's cumulative GPA falls below a 2.5 OR (2) a student already on probation earns less than a 2.5 grade point average for the subsequent semester. To be in good academic standing, students on strict probation must earn both a 2.5 GPA on the next semester's coursework and also have a cumulative GPA of 2.5 by the end of the next semester. Students on Strict Probation status have an enrollment hold placed on their record for the subsequent semester. These students are not permitted to enroll until they have met with an advisor in the School of Education Student Services office.

\section*{Continued Strict Probation}

A student already on strict probation obtained a 2.5 GPA or above on the next semester's coursework, but the cumulative GPA is still below 2.5 . Once both grade point averages are at or above 2.5 , the student will be in good academic standing. Students on Continued Strict Probation status have an enrollment hold placed on their record for the subsequent semester. These students are not permitted to enroll until they have met with a Student Services advisor.

\section*{May Not Continue in the School of Education}

Students on strict probation or continued strict probation who earn less than a 2.5 GPA on the next semester's work will receive notice that they may not continue in the School of Education. Students on May Not Continue status who do not seek or are not granted permission to continue may be withdrawn from the university and dropped from courses ("disenrolled"). Students are expected to contact the School of Education Student Services office immediately to discuss options, including transfer to another school or college on campus, transfer to another university, or withdrawal from UW-Madison.

\section*{CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY}

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus coursework. A student whose GPA falls below 2.75 will be placed on probation for the following semester. If the GPA remains below a 2.75 at the end of the probationary semester, the student will receive a discontinuation letter indicating that they must transfer out of the Department of Kinesiology. A hold will be placed on the student's registration for the second semester following the probationary semester, until the transfer is complete. Students in this situation must transfer to another School of Education program, another UW-Madison school/ college, to another institution altogether, or must withdraw from the university.

If a student wishes to appeal being discontinued in the department, it must be done in writing to the Chair of the Undergraduate Studies Committee within 30 days of the date of the notification letter. The Undergraduate Studies Committee may request that the student appear in person at an Undergraduate Studies Committee meeting to present the case.

If a negative decision is reached by the Undergraduate Studies Committee, a student may choose to appeal in writing to the Department of Kinesiology Student Affairs Committee within 30 days of the date of the notification.

If a negative decision is reached by the Department's Student Affairs Committee, a student may choose to appeal in writing to the Chair of the Department of Kinesiology within 30 days of the date of the notification.

If a negative decision is reached by the Chair of the Department of Kinesiology, a student may choose to follow the School of Education Grievance Policy.

In the event of a positive decision at any level, the student will be allowed to continue for one semester in order to raise the GPA to 2.75 or higher. A 2.5 cumulative GPA is required to graduate from the Department of Kinesiology.

\section*{GRIEVANCE POLICY IN THE SCHOOL OF EDUCATION}

\section*{SCHOOL OF EDUCATION GRIEVANCE POLICY AND PROCEDURES}

The following School of Education Student Grievance Policy and associated procedures are designed for use in response to individual student grievances regarding faculty or staff in the School of Education.

Any individual student who feels they have been treated unfairly by a School of Education faculty or staff member has the right to file a grievance about the treatment and receive a timely response addressing their concerns. Any student, undergraduate or graduate, may use these grievance procedures, except employees whose complaints are covered under other campus policies. The grievance may concern classroom treatment, mentoring or advising, program admission or continuation, course grades (study abroad grade complaints are handled through International Academic Programs (https://studyabroad.wisc.edu/)), or issues not covered by other campus policies or grievance procedures.

For grievances regarding discrimination based on protected classes (i.e., race, color, national origin, sex, disability, or age), as well as sexual misconduct, contact the Office of Compliance (https:// compliance.wisc.edu/eo-complaint/).

For grievances that involve the behavior of a student, contact the Office of Student Conduct and Community Standards in the Dean of Students Office at https://conduct.students.wisc.edu/).

For grievances about, or directed at, faculty or staff in a School of Education department, unit, or program, students should follow these steps:
1. Students are strongly encouraged to first talk with the person against whom the concern is directed. Many issues can be settled informally at this level. If students are unable to resolve concerns directly or without additional support, step 2 or 3 should be pursued.
2. If unresolved after taking or considering step 1 :
a. If the concern is directed against a teaching assistant (TA), and the student is not satisfied, the student should contact the TA's supervisor, who is usually the course professor. The course professor will attempt to resolve the concern informally.
b. If the concern involves a non-TA instructor, staff member, professor, academic department, or School of Education office or unit, the student should contact the chair of the department or the director of the office or unit, or their designee. The chair or director, or their designee, will attempt to resolve the concern
informally. If the concern is about the department chair or office/ unit director, the student should consult the School of Education Senior Associate Dean for guidance.
3. If the concern remains unresolved after step 2, the student may submit a formal written grievance to the chair or director within 30 business days \(^{1}\) of the alleged unfair treatment. To the fullest extent possible, a formal written grievance shall contain a clear and concise statement of the issue(s) involved and the relief sought.
4. On receipt of a formal written grievance, the chair or director will notify the person at whom the grievance is directed with a copy of the formal written grievance. The person at whom the complaint is directed may submit a written response, which would be shared with the student.
5. On receipt of a formal written grievance, the chair or director will refer the matter to a department, office, or unit committee comprised of at least two members. The committee may be an existing committee or one constituted for this purpose. The committee, or delegates from the committee, may meet with the parties involved and/or review any material either party shares with the committee.
6. The committee will provide a written description of the facts of the grievance and communicate recommendations to the department chair or office/unit head regarding how the grievance should be handled.
7. The chair or director will offer to meet with the student who made the grievance and also will provide a written decision to the student, including a description of any related action taken by the committee, within 30 business days of receiving the formal grievance.

\section*{1}

For the purpose of this policy, business days refers to those days when the University Offices are open and shall not include weekends, university holidays, spring recess, or the period from the last day of exams of fall semester instruction to the first day of spring semester instruction. All time limits may be modified by mutual consent of the parties involved.

If the grievance concerns an undergraduate course grade, the decision of the department chair after reviewing the committee's recommendations is final.

Other types of grievances may be appealed using the following procedures:
1. Both the student who filed the grievance or the person at whom the grievance was directed, if unsatisfied with the decision of the department, office or unit, has five (5) business days from receipt of the decision to contact the Senior Associate Dean, indicating the intention to appeal.
2. A written appeal must be filed with the Senior Associate Dean within 10 business days of the time the appealing party was notified of the initial resolution of the complaint.
3. On receipt of a written appeal, the Senior Associate Dean will convene a sub-committee of the School of Education's Academic Planning Council. This subcommittee may ask for additional information from the parties involved and/or may hold a meeting at which both parties will be asked to speak separately (i.e., not in the room at the same time).
4. The subcommittee will then make a written recommendation to the Dean of the School of Education, or their designee, who will render a decision. The dean or designee's written decision shall be made within 30 business days from the date when the written appeal was filed with
the Senior Associate Dean. For undergraduate students, the dean or designee's decision is final.

Further appealing a School of Education decision - graduate students only
Graduate students have the option to appeal decisions by the School of Education dean or designee by using the process detailed on the Graduate School's website (https://grad.wisc.edu/ documents/grievances-and-appeals/).

Questions about these procedures can be directed to the School of Education Dean's Office, 377 Education Building, 1000 Bascom Mall, 608-262-1763.

\section*{PART-TIME ENROLLMENT STATUS}

Students who choose part-time enrollment status or who anticipate falling below full-time enrollment status due to dropping a course should consult with an advisor in the School of Education Student Services office. Part-time enrollment may have important implications for any number of issues, including health insurance coverage or financial aid. It is especially important that athletes and international students consult with Student Services advisors and other advisors if considering part-time enrollment. Students who drop below 12 credits need not leave university housing.

\section*{RE-ENTRY TO CAMPUS AFTER AN ABSENCE}

Students wishing to reenter UW-Madison after an absence of a semester or more must file a reentry application form. This form is available from the UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu). If an applicant is not in good academic standing, the reentry application will be referred to the associate dean.

Students admitted to the professional part of a program may leave UW-Madison for a maximum of two consecutive semesters (excluding summer sessions) and be eligible to reenter directly into the program. Students in this situation are not guaranteed immediate placement in a practicum or student teaching placement upon reentry, and graduation may be delayed because of prior commitments to continuing students. Students who leave the program for more than two consecutive semesters (excluding summer sessions) may be considered for readmission only on an individual basis. Lack of space in a program may preclude readmission directly into a program for any future semester. Given the individual circumstances, a student may be required to reapply to the program altogether.

The general policy above may be modified by any particular program so that the conditions of reentry match the structure of the professional program. Some programs require that students obtain prior approval to interrupt the program sequence. All students intending to be absent should leave with a firm understanding of the conditions guiding their reentry into their professional program. Consult with the appropriate faculty advisor and with the School of Education Student Services office.

\section*{RESIDENCY (MAJOR \& SENIOR) REQUIREMENTS}

\section*{Major Residency}

Students must complete at UW-Madison at least 15 credits in upperlevel courses in the major. Some programs, e.g., Art, require more credits to meet major residency requirements. Upper-level courses are generally defined as those numbered 300 and above, but this varies by program area. Retroactive credits and credits granted by examination do not count toward the residency requirement.

\section*{Senior Residency}

Seniors in the School of Education must complete the last 30 credits in residence. Special permission to take a portion of senior work either at another institution or by correspondence (via UW-Extension) must be obtained in advance from the School of Education Student Services office. Coursework taken as part of a UW-Madison sponsored study abroad program does not count against senior residency. Students should discuss senior residency issues with their Student Services advisor. Retroactive credits and credits granted by examination do not count toward the residency requirement.

\section*{EXCESS CUMULATIVE CREDITS AND SATISFACTORY PROGRESS}

\section*{Excess Cumulative Credits}

Wisconsin resident undergraduates who have accumulated more than 165 completed credits will be assessed a 100\% tuition surcharge on credits over 165, as required by the University of Wisconsin-Madison. This policy was effective beginning Spring 2021. See Excess Cumulative Credits (https://kb.wisc.edu/ apir/110093/) on Academic Planning and Institutional Research's

KnowledgeBase page for more information about this policy and the criteria used in counting cumulative, completed credits. Note: Students who have already been awarded a Bachelor's degree from any accredited institution are exempt from the tuition surcharge. Special students are also exempt.

\section*{Satisfactory Progress: Second Degree Candidates and Education Special (non-degree-seeking) Students}

The School of Education is enriched by admitting students with a previous degree to our programs. We welcome these students and encourage them to apply to the School. At the same time, admission as a second-degree or Education Special (designated EDS or EDCS) student is a privilege granted by the School of Education. Seconddegree and Education Special students are expected to make the same timely progress toward program completion as are initialdegree students.

To ensure satisfactory progress, second-degree and Education Special students who are identified to have met any one of the criteria below will be required to confer with her/his program coordinator and the undergraduate academic dean for purposes of developing a formal plan for program completion:
- Student has earned over 200 total credits.
- Student enrolled for two consecutive semesters without completing requirements for the professional program to which the student was initially admitted.
- Student withdrew from classes for two consecutive semesters.
- Student failed to enroll in a required course when it was available, particularly those that are intermittently offered.
- Student engages in other course selection patterns that result in his/ her failing to make progress toward completion of initial program.

Students who do not meet the terms of the plan for program completion may be restricted to enrollment in specific courses or departments, prevented from enrolling entirely, or withdrawn from classes by the academic undergraduate dean after consultation with program faculty. Students may appeal the terms of the plan or any of the dean's actions above under the provisions of the School of Education Grievance Policy.

\section*{WITHDRAWING FROM UW-MADISON}

Formal withdrawal procedures must be observed by individuals who wish to leave the university before completing the semester in progress. Students who leave the university without formally withdrawing may receive failing grades in all courses.

\section*{COURSES AND COURSE \\ ENROLLMENT}

ATTENDANCE POLICIES
Faculty and instructors may require students to attend scheduled meetings of a class and/or to participate in other course-related activities, including distance activities. Students are responsible for materials presented in such meetings or activities. Because courses are designed and conducted in diverse ways, faculty and instructors are expected to inform students in writing at the beginning of each course if there are specific expectations for attendance/ participation, including whether any component of the grade is based on such attendance/participation.

\section*{AUDITING A COURSE}

A student may audit a course only if the instructor consents and if no laboratory or performance skills are required. (The second restriction usually prevents students from auditing Dance or Art courses.) Auditors do not participate in classroom discussions or take examinations, but are expected to attend with reasonable regularity and do some assigned work.

Audited courses carry no degree credits, are not graded, do not count in determining full-time/part-time load for enrollment certification in an academic term, and do not meet degree requirements for School of Education students. Students interested in auditing a course should confer with their Student Services advisor. The deadline to change a course from credit to audit is the end of the fourth week of classes; no exceptions to this deadline are permitted.

\section*{CONCURRENT ENROLLMENT AT TWO INSTITUTIONS}

School of Education students may occasionally choose to take courses at another institution-e.g., Madison College or Independent Learning through UW-Extension-while being a fully enrolled student on the UW-Madison campus. Full-time or part-time student status is usually determined by the credits taken at UW-Madison only; thus, students who take only nine credits on campus and three credits at another institution may not be considered full-time students.

\section*{CREDIT OVERLOAD PERMISSION}

Students may carry a maximum of 18 credits per semester without the special permission of an academic dean. School of Education undergraduates wishing to take over 18 credits should complete the Credit Overload Request Form (https:// uwmadison.co1.qualtrics.com/jfe/form/SV_a5bKn4mlGaeCnpb/). Students must be in excellent academic standing to be considered for a credit overload, usually a 3.0 cumulative GPA on the UWMadison campus.

\section*{Please note that additional fees are assessed for credit overloads on a per credit basis.}

During summer sessions, students may, as a rule, carry one credit per week of instruction unless special permission is given, The maximum credit load for Education students for the entire summer session is 12 . Session-specific limits follow the rule of 1 credit per week of instruction, except 9 credits are allowed in the Eight-Week General Session. Students must obtain permission from an academic dean to carry an overload in any of the summer sessions; start this process by completing the Credit Overload Request Form (https:// uwmadison.co1.qualtrics.com/jfe/form/SV_a5bKn4mlGaeCnpb/).

\section*{DIRECTED/INDEPENDENT STUDY}

Directed Study, also called Independent Study, offers the student an opportunity to work with a School of Education faculty member on an individual topic of interest. Most School of Education departments make directed study courses available to students on the basis of the student's preparation and motivation and a faculty member's willingness to accept the student in such an endeavor. Directed Study courses are generally numbered 199, 299, 399, and 699.

This study option is intended primarily for advanced students who have a depth of knowledge in a field, the self-discipline necessary for
independent work, and strong motivation to pursue a special project. Some program areas limit the number of Directed Study credits that can be applied to major or minor requirements.

Directed Study is taken as a supplement to, but not as a replacement for, available course offerings. In this way, it may be used to expand areas of particularly strong interest. Extra responsibility is required from the faculty member involved, and no member of the faculty is obligated to accept a proposal for a directed study project. Students should have a well-defined outline of the topic to be studied before discussing the project with a faculty member.

Both the student and instructor must follow UW-Madison's Policy on Directed/Independent Study for Undergraduates (https:// kb.wisc.edu/page.php?id=36263). Important components of this document include, but are not limited to:
- The student's responsibility to develop a written study plan, in collaboration and agreement with the instructor, consistent with the responsibilities of the instructor. The study plan will include expectations for learning and student work, the time and place for regular meetings, the number of credits to be earned, and any other issues related to the learning experience.
- Guidelines for assigning the appropriate number of credits to the Directed Study.
- Responsibilities of the Directed Study instructor.
- The approval process for enrolling in a Directed Study after the course add deadline (usually the end of the second week of class in fall and spring semesters).

\section*{INDEPENDENT LEARNING COURSE ENROLLMENT}

Students occasionally elect to take an Independent Learning (https://il.wisconsin.edu/course-catalog/) course through the University of Wisconsin-Extension. Many of the courses offered through Independent Learning (IL) can count toward specific degree requirements and students have an entire year to complete the coursework. Individuals interested in enrolling in an Independent Learning course should note the following important issues:

\section*{Course Equivalencies}

Independent Learning courses are not automatically transferable as equivalent UW-Madison campus courses-even when the Independent Learning course carries the same number and title. Use Transferology (https://www.transferology.com/state/wisconsin.htm) to ensure that the Independent Learning course is equivalent to the campus required course. Faculty and dean's offices may have some discretion in permitting courses to count for requirements even when they are not coded as exactly equivalent; students should see their Student Services advisor.

\section*{Concurrent Enrollment}

UW-Extension is an entirely separate institution from UW-Madison. Thus, UW-Madison students must have permission from their academic dean to be enrolled concurrently in another higher education institution. Permission for concurrent enrollment is granted routinely for School of Education students through the School of Education Student Services office. Students should go to the registrar's office website for the permission form (https:// registrar.wisc.edu/wp-content/uploads/sites/36/2017/06/ independent_learning_form.pdf). The completed form indicates
permission for concurrent enrollment and, in some circumstances, provides for a waiver of the tuition for the Independent Learning course (see additional information below). Students should take this form to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, and meet with an advisor. Send it to Independent Learning after it has been approved at the School of Education Student Services office.

\section*{Tuition Waiver}

The tuition for an Independent Learning course may be waived with the academic dean's permission, although the student is still responsible for other course enrollment fees. Students are eligible for a tuition waiver if they register for an Independent Learning course during the semester they are concurrently enrolled at UW-Madison. In some cases, students may be allowed to register for Independent Learning classes once they have enrolled in courses for the subsequent semester, linking their Independent Learning registration with the credits for the succeeding semester. Students interested in receiving a tuition waiver must be enrolled full time (at least 12 credits) at UW-Madison, and have no more than 18 credits after adding the Independent Learning course. Students should see their Student Services advisor for additional information on these policies. As indicated above, download and complete the form (https://registrar.wisc.edu/documents/ independent_learning_form.pdf) and submit to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. This stamped form must then be sent to Independent Learning, with a copy remaining at Student Services.

\section*{Posting Independent Learning Courses to the UWMadison Transcript}

Independent Learning courses are posted to the campus transcript after staff at the Office of Admissions and Recruitment (http:// admissions.wisc.edu) receive the original transcript. A official transcript for an Independent Learning course must be submitted to this office.

\section*{Timing for Course Completion and Degree Posting}

Independent Learning courses require a substantial time commitment. Students should not plan to begin an Independent Learning course only a few weeks before it must be completed! Perhaps even more important, students completing an Independent Learning course to meet degree requirements during their last semester on campus should be aware that the Independent Learning course must be completed prior to the University's official graduation date for that semester. The completion date listed on the UW-Extension transcript must be on or before the UW-Madison degree completion date or the student's degree will be awarded after the subsequent semester. For example, if a student's UW-Extension transcript indicates a course completion date of May 25 , but the UW-Madison degree completion date is May 23, the student's degree will be posted for the subsequent August graduation date, not for the May graduation day. This could create serious problems for teacher education students hoping to secure a position. For this reason, students completing final degree requirements via Independent Learning should consult carefully with Student Services and Independent Learning staff regarding the timing of their course completion and degree posting.

\section*{LATE COURSE ADDS OR DROPS}

Course enrollment regulations must be followed when adding and dropping courses. Students are responsible for knowing and
complying with the published deadlines; see the registrar's website (http://www.registrar.wisc.edu) for deadlines. Students are expected to check their academic records routinely to minimize the need for late drops based on enrollment errors.

\section*{Late Course Add}

Students must obtain instructor, departmental, and dean's approval to add a course after the course add deadline. See the registrar's website (http://www.registrar.wisc.edu) for instructions.

\section*{Late Course Drop}

After the drop deadline, courses may be dropped only with the permission of the School of Education Student Services office. Such permission is not granted routinely, but only in unusual circumstances. Students seeking a late drop will be required to complete a formal request form and may be asked to supply a written justification, medical or other documentation, and/or proof of having consulted with the course instructor. Requests for backdated drops due to ignorance of campus drop deadlines or to remove a "DR" from the student's record will not be honored. Students seeking a late drop must schedule a meeting with a Student Services advisor.

The student will meet with the advisor to discuss the drop request. The advisor will collect information about the circumstances around the request. If appropriate, the advisor will warn about the drop's possible consequences for financial aid, insurance coverage, student status (for international students), etc. The decision around the late drop may or may not be made during this meeting. Advisors may confer with instructors as needed to verify students' reports and obtain additional information. Advisors may also require students to contact the instructor and may also consult with one another and with the associate dean about specific cases. Students will be informed via email or telephone about the disposition of their request.

\section*{REPEATING COURSES}

Most courses on the UW-Madison campus may be taken only once for purposes of credit. Some courses may be repeated a limited number of times for credit. Other courses may be repeated an unlimited number of times for credit. When courses are taken more than once, all grades and their associated grade points are included in the cumulative campus grade point average.

Some School of Education professional programs may permit students to retake courses for admission eligibility purposes only. Students should consult Student Services staff with questions regarding repeated courses.

\section*{DEGREES, "DOUBLE MAJORS," AND GRADUATION}

\section*{ADDITIONAL MAJOR OR "DOUBLE MAJOR"}

School of Education students may be permitted to complete an additional major with their School of Education degree program. Students must be admitted to the professional part of their degree program to be eligible to add an additional major; pre-professional students cannot add another major.

Education students wishing to complete an additional major in the College of Letters \& Science must complete these steps:
1. Contact the department that houses the major of interest. Meet with the undergraduate major advisor there, if appropriate. Complete the Major Declaration form and obtain departmental approval (usually a signature or stamp).
2. Take the form to the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, and ask for a dean's action to permit the additional major. Student Services staff will take the action and send the form to the registrar's office. Note: Students in the School of Education should not take the form to the L\&S Student Academic Affairs office-even if this is the advice of departmental staff. Requests for an additional major will be rejected by the registrar's office for lack of the appropriate dean's approval.

Students will be granted a degree at the end of the fall, spring, or summer semesters in which all School of Education degree requirements are complete. Graduation will not be postponed if students have an unfinished additional major or certificate program that is not required for the degree.

Exceptions to the requirements of an additional major or certificate program must be approved by the department and school/college dean's office in which the major or certificate program is located.

\section*{CREDITS-TO-DEGREE}

School of Education programs require a minimum of 120 credits in all programs for graduation, although programs may require more To earn 120 credits in four years (eight semesters), students must average 15 credits per semester. The number of credits carried each semester may depend upon a student's preparation, motivation, course selection, employment, and extracurricular activities.

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{DUAL DEGREES}

Students may be permitted to complete two degrees simultaneously. For example, students may complete two degree programs in the School of Education or may choose a degree program in the College of Agricultural and Life Sciences along with their School of Education degree. Not all schools/colleges permit dual degrees -e.g., this is not permitted by the College of Letters \& Science or by the College of Engineering. Students should confer with an academic dean regarding the ability and feasibility of completing two degrees programs simultaneously. Students wishing to earn two undergraduate degrees must follow these academic policies:
- If the two degrees to be earned are within the School of Education, at least 30 additional credits and all course and grade point average requirements for the second degree must be completed for the second degree. When the first degree requires 120 credits, a minimum of 150 credits for most majors will be required. The two degree programs must differ sufficiently to permit the total credits to be accumulated. Courses may count toward the fulfillment of both degree programs. Permission to complete two degrees simultaneously requires the academic dean's approval. This approval, and the formal academic action permitting the dual degree work, should be sought as early as possible to ensure that it is feasible to complete both degrees.
- If the two degrees to be earned are from two different schools/colleges (one degree in Education and one degree in another school or college on this campus), the following academic policies shall be followed:
- Permission to complete two degrees simultaneously requires academic dean's approval from both schools/ colleges. Students should see their current dean's office for the required paperwork.
- Admission into the other school/college shall be based on the admission criteria for that particular school/college and, when necessary, particular program.
- The two degree programs must differ sufficiently so that the combined total requirements for the two degrees are at least 150 credits.
- The student's program must be reviewed and approved in both colleges before the start of a student's senior year in residence.
- The degree from each college will be awarded simultaneously
- Exceptions to degree requirements must be taken by staff from the school/college linked to the particular degree.

\section*{GRADES AND GRADING}

\section*{Grading System}

See Enrollment and Records (p. 35) for detailed information on the campus grading system, including the list of possible grades and their impact on a student's grade point average.

\section*{Credit/No Credit Courses}

Courses designated as being offered on a Credit/No Credit basis are indicated on the transcript as either CR, meaning the student earned the credits for which the course was offered, or N, meaning that the student did not earn any credit even
though enrolled for the course. Students may not take such courses on any other basis.

\section*{"F" Grade Policies}

If the course is repeated, the original \(F\) will remain on the transcript and will be included in computing the GPA. If a grade of \(F, N\) (no credit), or \(U\) (unsatisfactory) is received in student teaching or in courses within required practica, the course may be repeated only if the faculty adviser, the supervisor of the practicum or student teaching, and the appropriate associate dean gives approval. A third attempt to register in a course under these conditions is not allowed.

\section*{Incompletes}

A grade of "Incomplete" may be reported for a student who has carried a subject with passing grades until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond the student's control, has been unable to take or complete the final examination, or to complete some limited amount of term work. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of substantiated cause, the grade shall be F. Even with such proof, if the student's work has convinced the instructor that s/he cannot pass the course, the grade shall be F.

Any Incomplete taken by School of Education students must be completed by the end of the student's next semester of residence (specifically, by the last day of classes), excluding Summer Sessions. If the work is not completed by this deadline, the Incomplete will lapse into a Failure unless the time limit has been extended in writing by the dean's office. (Note that this differs for College of Letters \& Science students: Incompletes must be completed by the end of the fourth week of classes of the student's next semester of residence at UWMadison, excluding Summer Sessions.)

\section*{Pass/Fail Grading}

All undergraduate students are eligible to take a course on a pass/fail basis if they request the option prior to the deadline and are in good academic standing at the time of the request. Good academic standing for this purpose means that students have a minimum 2.5 cumulative grade-point average based on UW-Madison coursework. Undergraduates may carry one course on a pass/fail basis per term. (Each year's summer sessions collectively count as a single term.)

Pass/fail can be chosen only for elective courses. Required courses cannot be taken on a pass/fail basis. The School of Education may reject pass/fail requests for non-elective work, but it is the student's responsibility to be sure that the requested course is an elective. Courses taken on a pass/fail basis will not count for non-elective requirements-even if they would normally count toward such requirements.

Students may submit pass/fail requests via their Student Center link from the time that they register until midnight on the Friday at the end of the fourth week of fall and spring semesters. For modular and summer session courses, pass/fail requests must be submitted by midnight Friday of the week in which the session is one-fourth completed. Students may not cancel or add the pass/fail option after the deadline for submitting Pass/Fail Option Forms.

Instructors are not notified when a student elects the pass/ fail option. (Students can see whether a course is pass/fail in their Student Center.) When a course is taken on a pass/fail basis, the instructor reports a letter grade, which is converted by the registrar to an S (satisfactory) or U (unsatisfactory). The grade of \(S\) shall be recorded by the registrar in place of instructors' grades of \(A, A B, B, B C\), or \(C\). The grade of \(U\) shall be recorded by the registrar in place of instructors' grades of \(D\) or \(F\). Neither the \(S\) nor the \(U\) is used in computing the gradepoint average. A student must earn at least a \(C\) to receive credit for the course.

Please note that courses completed on a pass/fail basis do not apply toward Liberal Studies, major, minor, or professional education requirements for graduation. Students planning graduate study should not take courses on a pass/fail basis if these are pre-professional requirements for admission to graduate and/or professional programs. Individuals who are undecided about a major should avoid taking a course on a pass/fail basis that might later become a required course needed to complete a major. Students may wish to consult with an advisor before taking a course on a pass/fail basis.

\section*{Six-Weeks (Midterm) Grades}

Only first-year students receive midterm, or "six-weeks" grades. Midterm grades for first-year students are prepared at the end of the sixth week of classes and are made available to students in their Student Center in My UW on Monday of the eighth week. An email is sent out to all students with sixweek grades informing them of their availability in the Student Center.

The midterm grade report provides students with important feedback about course enrollment and performance before the course drop deadline. Students should check their six-week grade report to make sure all courses are listed and grades indicated. An "NW" means that "No Work" has been turned in; students who have been attending the course should contact the instructor immediately. In the case of a course registration problem, students should see their Student Services advisor immediately.

\section*{Grades from Transfer Courses}

Grades from transfer courses are not posted to the UWMadison transcript; however, the School of Education uses all attempted transferable coursework to determine program admission eligibility and selection grade point average. Students should be aware that grades earned at another institution will be included in admission calculations. (Courses for which an " \(F\) " is earned do not transfer to UW-Madison.) Student should see their School of Education advisor if they have additional questions about this policy.

\section*{PROGRAM ADMISSIONS \\ LAST 60 CREDIT RULE}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
1. all transferable college level coursework attempted, and
2. the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.)

The use of the last 60 credits does not supersede other eligibility requirements. For example, when a minimum GPA on prerequisite courses is required, or a minimum major GPA is required to be eligible for admission, all required courses will be used in calculating this GPA. This will include courses taken prior to the last 60 credits. A cumulative GPA, however, will still be calculated based on the last 60 college credits attempted.

Currently, retention and graduation GPAs are based on all credits attempted at UW-Madison as an undergraduate student. If each semester's GPA after admission to the program meets the required GPA for retention, the student will be allowed to continue and complete the program.

This policy does not apply to certification programs in Music Education, as the degree is granted from the College of Letters and Science, not the School of Education.

Contact the School of Education Student Services office for additional information regarding the interpretation of this policy.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

A prospective student who already holds an undergraduate degree is admitted to the School of Education as either an Education Special student or a Second Degree student, depending on the academic area of interest and the individual's previous coursework. The term "Special Student" indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; the student does not receive a second degree for this "certification only" coursework. Second undergraduate degree students are seeking a second degree from the School of Education in an area that is different from the major coursework of the first degree. This degree may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission.

\section*{Special Students}

Applicants must file an undergraduate application with the Office of Admissions and Recruitment (http://admissions.wisc.edu). Education Special students not yet admitted to a professional program are given an EDS classification, are not eligible for financial aid, and enroll last with the other special students on campus. Candidates seeking Special student status in open enrollment programs must obtain written permission for admission from the relevant program coordinator and must submit a professional program application to the School of Education Student Services office. Candidates seeking admission to a limited enrollment program must meet all admission eligibility requirements for the program and must compete with other eligible candidates for program admission. Applicants admitted to a certification professional program become Education Certification Special students (EDCS classification) to distinguish them from Special students not so admitted. Students with an EDCS classification may be eligible for financial aid. Continuing EDCS students may register with undergraduates having junior status.

\section*{Second Degree Candidates}

Students who wish to earn a second baccalaureate degree in the School of Education must file an undergraduate application with the Office of Admissions and Recruitment (http:// admissions.wisc.edu) and must file a professional program application with the School of Education Student Services office. Second degree students not yet admitted to a professional program are given a pre-professional classification. Second degree candidates must:
- be seeking a new major that is substantially different from their previous degree work;
- complete at least 15 upper-level credits in the new major;
- complete at least 30 credits beyond their previous coursework.

The determination of whether a student should be admitted as a second degree candidate or Education Special student is made by the faculty advisor in consultation with Student Services staff after analyzing the student's remaining requirements. The faculty advisor will determine the specific remaining requirements for students admitted to a program. In addition to completing the requirements specific to the program(s) of interest, returning students must also complete any relevant campus-wide requirements, complete the requirements specific to individual program areas such as the Environmental Education requirement, and satisfy any high school deficiencies identified at the time of admission to UW-Madison. Students are strongly encouraged to discuss their academic plans with their faculty advisor and must make satisfactory progress toward program completion - see Satisfactory Progress/Excess credits for details.

Students seeing a second degree in Kinesiology-Exercise \& Movement Science must complete PSYCH 202 Introduction to Psychology as part of the professional program if an equivalent course was not completed during the initial baccalaureate degree.

\section*{REQUIREMENTS}

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS} HOW STUDENTS MEET REQUIREMENTS

The School of Education's Liberal Studies Requirements automatically satisfy most of the University's General Education Requirements, including Ethnic Studies, Humanities/Literature, Social Studies, and Science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program.

Beginning at Student Orientation and Registration (SOAR), School of Education academic advisors help each student determine how they can meet General Education Requirements while pursuing a specific degree program, or through exploration of a variety of interests. The General Education and Liberal Studies requirements provide an opportunity to do some academic exploration. If a student cannot complete a General Education requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses
that meet the requirement and augment the student's primary area of study.

Students with a previous undergraduate degree are not required to complete the Liberal Studies coursework.

All students are required to complete a minimum of 40 credits of Liberal Studies coursework. Most Liberal Studies courses are offered by academic departments in the College of Letters \& Science. Each course is assigned a number of descriptors that provide information about its content. For example, a breadth designation indicates what kind of course it is-a Science course, a Literature course, etc. Level designations describe how advanced the content of a course is in relation to other courses in the department-Elementary, Intermediate, Advanced, or Intermediate/ Advanced level. Course listings in Course Search and Enroll (https:// registrar.wisc.edu/course-search-enroll/) provide breadth and level designations Click on the course number to obtain this information. Students can also search for courses meeting specific breadth or level designations using Course Search and Enroll (https://registrar.wisc.edu/ course-search-enroll/).

\section*{UW-Madison breadth designations}

Any course from the Department of Music Performance (http://guide.wisc.edu/courses/mus_perf/)

\section*{Theatre}

Any course from the Department of Theatre and Drama (http://guide.wisc.edu/courses/theatre/)

\section*{Humanities Elective(s)}

May include courses designated as Humanities, Literature, Humanities or Natural Science, Humanities or Social Science, elementary and intermediate level foreign language, or additional fine arts. May also count COM ARTS 105 Public Speaking, COM ARTS 181 Elements of Speech-Honors Course, and any English (http://guide.wisc.edu/courses/engl/) department intermediate or advanced level creative writing or composition course toward this requirement (ESL classes and elementary level composition courses are excluded).

\section*{SOCIAL STUDIES (SOCIAL SCIENCE)}

All students must complete a minimum of 9 credits. Select from courses with a breadth designation of Social Science, Social or Natural Science, Biological or Social Science, or as Humanities or Social Science.

Teacher education and kinesiology students have unique requirements in this category; see below:

\section*{Teacher Education requirement}

Teacher education students must complete a Local, State, and National Government requirement by enrolling in one of the following courses as part of the 9 credits:
- POLI SCI 104 Introduction to American Politics and Government or
- POLI SCI 205 Introduction to State Government

\section*{Kinesiology}

Kinesiology students must complete PSYCH 202 Introduction to Psychology as part of the 9 credits.

\section*{SCIENCE}

All students must complete a minimum of 9 credits, including one course designated as a Biological Science course and one designated as a Physical Science course. All students must complete one science course with a laboratory. The lab course can also count toward the Biological or Physical Science requirement if it has the requisite breadth designation.

\section*{Biological Science}

Any course with a breadth designation of Biological Science, or as Biological or Social Science.

\section*{Physical Science}

Any course with a breadth designation of Physical Science.

\section*{Science Elective(s)}

Other courses with a breadth designation of Biological Science, Physical Science, Natural Science, Social or Natural Science, Humanities or Natural Science, or as Biological or Social Science.

\section*{Laboratory requirement}

Most sciences with lab sections are identified as such in Course Search and Enroll (https://registrar.wisc.edu/course-searchenroll/). An AP Biology score of 4 or 5 will also fulfill the Laboratory requirement.

In addition to courses with lab sections, the following courses include some lab experience and will meet the lab requirements for students in the School of Education:
\begin{tabular}{llc} 
Code & Title \\
Course options within the College of Letters \& \\
Science
\end{tabular} Credits

\section*{PL PATH/ \\ Plants, Parasites, and People \\ BOTANY 123 \\ CULTURAL AND HISTORICAL STUDIES}

All students must complete three requirements met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation. A single course cannot satisfy more than one of the three Cultural and Historical Studies requirements listed below.

\section*{Ethnic Studies (minimum 3 credit course)}

The Ethnic Studies requirement is intended to increase understanding of the culture and contributions of persistently marginalized racial or ethnic groups in the United States, and to equip students to respond constructively to issues connected with our pluralistic society and global community. Courses that meet this requirement have a specific ethnic studies designation that can be utilized in a course search.

\section*{United States or European History (minimum 3 credits)}

The courses listed below count toward this requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services office.

\section*{Global Perspectives (minimum 3 credits)}

Global perspectives courses include courses whose primary emphasis is on:
- cultures whose origins lie outside of the western tradition, or
- analyzing and interpreting cultural differences through the study of language, gender, race, ethnicity, religion, or class, or
- cultural pluralism within specific geographical areas.

The courses listed below count toward this requirement. Additional courses can be considered; students may consult with an advisor in the School of Education Student Services Office.

\section*{LIBERAL STUDIES ELECTIVES}

Complete additional liberal studies coursework as needed to reach the required 40 Liberal Studies credits.

\section*{Important Notes Regarding the Liberal Studies Electives \\ GUIDELINES FOR SPECIFIC PROGRAM AREAS}
- Completion of the Liberal Studies requirements is not a prerequisite to professional program application or admission.
- For the most part, courses listed in School of Education departments may not be used to satisfy the Liberal Studies requirements. School of Education departments include Art, Art Education, Counseling Psychology, Curriculum and Instruction, Dance, Educational Leadership and Policy Analysis, Educational Policy Studies, Educational Psychology, Kinesiology, Rehabilitation Psychology and Special Education, and Theatre and Drama.
- For example, KINES 100 Exercise, Nutrition, and Health, cannot count toward the Liberal Studies requirement even though it is a Biological Science course. ED PSYCH 320 Human Development in Infancy and Childhood cannot count toward Liberal Studies even though it is a Social Science course.
- Exceptions include some courses that are crosslisted in departments outside the School of Education such as ED POL/HISTORY 412 History of American Education. Art and Dance department courses count toward the Humanities requirement.
- Courses that transfer to UW-Madison as departmental electives (e.g., POLI SCI X10) might meet specific Liberal Studies requirements. Students may consult with an advisor in the

School of Education Student Services Office to discuss transfer electives that appear to meet specific course requirements.
- While one course may cover two requirements, students must still complete both the 40-credit total and the 9 -credit minimum requirements in Humanities, Social Studies (Social Science), and Science.
- For example, THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature, a Literature course also on the Fine Arts list, may be used to meet both the specific Fine Arts and Literature requirements of the Humanities area, but a total of 9 credits of Humanities are still required.
- Courses in other schools/colleges (excluding the School of Education) may count as Liberal Studies if they have an L\&S Credit Type designation of \(C\) and/or assigned a level or breadth descriptor.

\section*{Teacher Education programs}

All teacher education students, except those in music education or art education, may apply any appropriate coursework from the major or minor toward the Liberal Studies requirements. Students in music and art education are restricted in this overlap. For students in music education, no more than 6 credits of music history and no more than 4 art and dance credits may count toward the 40 total credits. Music history courses (e.g., MUSIC 211 Survey of the History of Western Music, MUSIC 212 Survey of the History of Western Music) may not be used to meet the U.S./ European History requirement.
Note: Changes in the music education requirements are anticipated; consult with the music education advisor. Art education students may apply all of the aesthetics credits (usually 14) toward the Liberal Studies requirements, but not courses taken to meet the studio requirements.

\section*{Art (BFA and B.S.)}

In general, students may not satisfy Liberal Studies requirements with courses meeting studio or aesthetics requirements. However, Art-BFA candidates may apply 4 aesthetics elective credits toward the Humanities credits.

\section*{Kinesiology and Physical Education}

Kinesiology and physical education students will meet the Science requirement by completing their required science courses-e.g., chemistry and physics.

\section*{Communication Sciences and Disorders}

Communication sciences and disorders students should consult both the Liberal Studies requirements and the communication sciences and disorders program requirements, particularly the "related courses" section, when selecting Liberal Studies coursework. Courses may count in both places. Note: The American Speech-Language-Hearing Association (ASHA) standards now specify that a course in each of the following areas is required for ASHA certification.
- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences

\section*{Dance (BFA \& BS)}

Dance and Dance-BFA students must complete ANAT\&PHY 338 Human Anatomy Laboratory, which will meet both a Science requirement and the Science Laboratory requirement. In general,

Liberal Studies requirements cannot be met with courses taken to meet other program requirements.

\section*{Rehabilitation Psychology}

In general, rehabilitation psychology students may not satisfy Liberal Studies requirements with courses taken to meet the Related Course Requirements in Rehabilitation Psychology. Courses applied toward the other parts of the Rehab Psych requirements cannot also count toward the 40 Liberal Studies credits. However, if a course is taken to meet any of the three Cultural/Historical Studies requirements, the course content can be used to meet both requirements, but the credits will only count in the Rehabilitation Psychology or Related Course Requirements areas. Once the required credits have been met, additional course work in Psychology, Sociology, Social Work, etc. may be applied toward Liberal Studies.

\section*{Theatre and Drama}

Theatre and drama students can apply major coursework toward the Liberal Studies requirements.

\section*{RESOURCES}

\section*{SCHOOL OF EDUCATION STUDENT SERVICES: ACADEMIC ADVISING, STUDENT DIVERSITY SUPPORT, SCHOOL OF EDUCATION CAREER CENTER}

139 Education Building, 1000 Bascom Mall; 608-262-1651
Dedicated to supporting and promoting student success, the School of Education Student Services (https://education.wisc.edu/academics/ undergrad-majors/academic-advising/) office coordinates a number of student-related services for prospective and current School of Education students in all programs. Student Services staff provide:
- Academic advising
- Career advising
- Mentoring and advocacy for underrepresented and international students
- Requirement monitoring and help with course selection
- Referrals to other campus resources
- Someone to talk to
- and more!

Students in the School of Education are encouraged to make Student Services a vital part of their academic and employment journey.

To schedule an appointment: Current students should schedule an appointment online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{ACADEMIC ADVISING}

Choosing a major and navigating the completion of a degree or certificate can be an exciting process, and one that students don't need to figure
out on their own. Advisors help you find the right fit and create a unique pathway through your degree.

All students are assigned an Academic Advisor (https:// education.wisc.edu/academics/undergrad-majors/academic-advising/) from the Student Services office who will provide advising throughout the degree. If desired, appointments can still be made with any advisor on the team. Program or departmental advisors are also assigned to School of Education students. Plan to utilize your advising team - your academic, career, and program advisors; each advisor has specialized knowledge to help you succeed.

Regular meetings with an academic advisor can help keep you on track to complete your requirements and also help to refine your learning goals. Tell us what you are enjoying about your learning, something you want to try out, skills you want to build, and careers that are intriguing to you.

In conversations with your advisor we/you can:
- Discuss your major, degree requirements, course selection, and career ideas.
- Tell us what you need. We are experts on helping you find campus resources such as tutoring, counseling, advising for prehealth careers, getting involved with student organizations, or acquiring experience in your career interest area.
- Explore studying abroad, working/volunteering and internships, or learning specific skills like a language, communication techniques, or leadership.
- Think expansively! Make the most out of your college experience.

Program advisors help students select and plan a program of study in the major, negotiate issues within the department and, in the case of certification programs, follow the students' progress through their professional courses. The divisions between program advising and Student Services advising are flexible. Students are encouraged to consult with all advisors who can help with a situation or answer a question.

\section*{STUDENT DIVERSITY SUPPORT}

The UW-Madison School of Education is committed to promoting equity and increasing diversity in its programs. In keeping with this commitment, Student Services staff include advisors with extensive experience assisting underrepresented and international students.

Students are supported in their personal and professional growth, their transition from high school to college, financial aid, and career exploration. Advisors perform outreach, recruitment, and advising on behalf of the School, and work collaboratively with the rest of Student Services and other campus and community partners to support underrepresented and international students interested in School of Education majors. Prospective transfer students will get assistance with the application process, how courses transfer to UW-Madison, and other transfer-related concerns.

Students are invited to stop in the Student Services office or set up an appointment for a visit. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/facstaff/ starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{SCHOOL OF EDUCATION CAREER CENTER}

As a School of Education student, the experiences and skills you develop through our programs will prepare you for success in a wide variety of career fields.

The Career Center (https://careercenter.education.wisc.edu/) is here to support you every step of the way!
- Meet with a Career \& Internship Advisor (https:// careercenter.education.wisc.edu/appointments/) your first year on campus to begin exploring career pathways of interest. Learn what the possibilities are and start to build your roadmap to success.
- Connect with professionals in your desired field(s) for guidance or to gain experience through paid internships (https:// careercenter.education.wisc.edu/internships-for-school-of-education-students/), field experiences, or career events (https://careercenter.education.wisc.edu/fairs-events/).
- Prepare to successfully land an internship, job, or graduate school admittance through personalized career advising, group workshops or structured career courses. From résumés (https://careercenter.education.wisc.edu/creating-application-materials/resume-writing/), to cover letters (https:// careercenter.education.wisc.edu/creating-application-materials/ cover-letters/), to job or internship searches, interviews (https:// careercenter.education.wisc.edu/interviewing/), and navigating decisions (https://careercenter.education.wisc.edu/job-search/ managing-job-offers/), we will be here to help guide you.
- Stay connected post-graduation as you navigate your professional career; share your experience with future School of Education Badgers!

Current students may schedule career advising appointments through the Starfish app (https://advising.wisc.edu/facstaff/starfish/starfish-studentresources/) in their MyUW account.

\section*{SCHOLARSHIPS/THE TEACHER PLEDGE/TEACH GRANTS SCHOLARSHIPS}

The generosity of alumni and friends has enabled the School of Education to distribute over \$1 million in scholarships and awards annually to deserving undergraduate students.

School of Education departmental scholarships (Art, Dance, Curriculum and Instruction, Theatre and Drama, Kinesiology, Rehabilitation Psychology and Special Education, and Educational Policy Studies) are generally awarded to students declared in their major or accepted to their program. School-wide scholarships are available to any student; however, most of these are based on financial need.

Selections of scholarship recipients are made by committees, and based on matches to particular scholarships as well as strength of application. The criteria for scholarships may include academic performance, excellence in a specific field or area, potential as a prospective teacher, leadership ability, personal attributes (such as returning adult status or home county), and financial need. All scholarship and award recipients must be in good academic standing in the School of Education.

Applying for School of Education Scholarships begins with completing the Wisconsin Scholarship Hub WiSH "General Application." Through a series of filtering questions, students are guided to appropriate departmental
or school-wide applications, including All School and Teacher Education categories. Each application represents a group of scholarships for which a student might be eligible, and a student may be eligible for more than one group (and thus may need to complete several applications). Note that some applications require responses to essay questions and/or submission of letters of recommendation or other materials.

While the WiSH (https://wisc.academicworks.com/) General Application has an annual application cycle from August - August, the School of Education (and several department) scholarship applications open in early February and remain open until the end of March each academic year. There are a few School of Education department applications that open and close outside of the February - March window. Please be sure to check your department's application deadlines. Scholarship decisions are generally made between March - June.

Each year the number of scholarships available continues to grow; however, not every student who applies receives funding.

\section*{THE TEACHER PLEDGE}

The UW-Madison School of Education Wisconsin Teacher Pledge is a financial aid program for UW-Madison teacher education students. The Teacher Pledge offers undergraduate and graduate teacher education students up to the cost of in-state tuition, plus testing and licensing fees, in exchange for a commitment to teach in Wisconsin. For each year taught in a PK-12 school in Wisconsin, a portion of the Teacher Pledge loan will be forgiven - reaching 100\% forgiveness after a three-to-four year teaching commitment.

> - For general information, visit the Teacher Pledge Website (https://tec.education.wisc.edu/teacher-pledge/).
> - Check out How to Take the Teacher Pledge (https:// tec.education.wisc.edu/teacher-pledge/how-to-take-pledge/) - a checklist that guides students through Teacher Pledge requirements from A to Z, including how to participate.
> - For answers to frequently asked questions, check out the Teacher Pledge FAQ (https://tec.education.wisc.edu/teacherpledge/faq/). (https://tec.education.wisc.edu/teacher-pledge/ faq/)

\section*{TEACH GRANTS}

Students willing to teach in high-need teaching fields can receive TEACH Grants of up to \(\$ 4,000\) per year for a total of \(\$ 16,000\) over their undergraduate academic career, or \$8,000 over their graduate academic career. Officially-designated high need fields include Master of Science with Secondary Teaching and ESL Certification; Art; Bilingual Education; Communication Sciences and Disorders; English as a Second Language; Health; Mathematics; Music; Physical Education; Reading Specialist; Science certification areas; Special Education; World Language Education certification areas, and any other fields documented as highneed by the federal government and/or state or local education agency (LEA). Students completing the Elementary Education and Special Education dual certification program or Elementary Education with the ESL minor or the Early Childhood Education minor are also eligible for a TEACH Grant.

Students receiving TEACH Grants must complete a service obligation of four years of teaching full-time in their high-need field in a designated low-income school. This must be accomplished within eight years after completing a teacher preparation program. Low-income schools are defined as public or private nonprofit elementary or secondary schools, or educational service agencies eligible for assistance under Title I of the

Elementary and Secondary Education Act. In Wisconsin, over a thousand schools are designated as low income.

TEACH Grant applicants must attain certain academic eligibility criteria. Candidates must have scored minimally above the 75th percentile on a nationally normed admissions test or have earned a 3.25 minimum cumulative grade point average. Grant recipients must have completed a Free Application for Federal Student Aid (FAFSA) (https:// studentaid.gov/) to be eligible.

Prior to submitting an application, students are strongly encouraged to learn about the parameters of the TEACH Grant and obtain answers to any related questions. Indicate an interest in the TEACH Grant via the FAFSA and by completing the program application (https://education.wisc.edu/ wp-content/uploads/sites/4/2023/03/TEACH-Grant-Application.pdf). Students should make sure to review the complete application instructions (https://education.wisc.edu/wp-content/uploads/sites/4/2023/03/ TEACH-Grant-Instructions.pdf) to ensure the proper submission of all application materials. For more information, please visit the Federal student Aid Webpage (https://studentaid.gov/understand-aid/types/ grants/teach/).

\section*{INTERNSHIPS}

An internship is a learning experience that allows you to apply concepts or skills learned in your academic program in a workplace setting. Most students participate the summer after junior year, but experiences are available during the academic year as well. The School of Education Career Center team actively builds relationships with employers in various fields and geographic locations to offer high-quality, paid internships to our students. Employers are eager to offer experiences to School of Education students due to their academic preparation, creativity, genuine care for others, and appreciation for differing perspectives.

Through an internship experience, students:
- Gain experience in their field(s) of interest.
- "Test drive" career pathways, developing clarity and confidence.
- Build their résumé (https://careercenter.education.wisc.edu/) and network.
- Develop the skills and experience to land a future job or graduate school placement.

Examples of internships that School of Education students have participated in include:
- Badger Den Strength: Intern
- Joffrey Ballet: Administrative Intern
- Morgridge Center for Public Service: Badger Volunteers Education Coordinator
- Panorama Education: Project Management Intern
- UW PEOPLE Program: College Readiness Mentor
- U.S. Senate: Intern
- Wisconsin Union: Wisconsin Union Directorate Internship

Interested in learning more? Visit the Career Center's Internships for Students (https://careercenter.education.wisc.edu/internships-for-school-of-education-students/) web page.

\section*{STUDY ABROAD AND INTERNATIONAL INTERNSHIPS}

The School of Education encourages all students to participate in study abroad and international internship opportunities. Studying and interning abroad builds skills and knowledge that prepare students to work with others from around the globe to address the world's toughest challenges. Through study abroad and international internship programs, students can:
- Expand their world view.
- Enhance their career opportunities and grow their network.
- Position themselves to learn another language and improve multi-lingual and cross-cultural communications skills.
- Experience another culture first-hand.
- Make new friends and connections from around the world.
- Discover new things about their own culture.
- Learn more about themselves and gain self-awareness.
- Strengthen communication, team-building, and adaptability skills.
- Boost confidence and independence.
- Become a savvy traveler
(International Institute of Education (https:// www.iie.org/Learn/Blog/2017/11/2017-Nov-14-10-Great-Reasons-to-Study-Abroad/), 2017)

The School of Education seeks to make studying abroad a possibility for all students. Many academic departments have created Major Advising Pages (MAPs) (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/). MAPs are a guide to the academic requirements of specific majors or certificates in relation to study abroad. Check out the Major Advising Pages to find out when and where might be the best options to study abroad.

The International Academic Programs (IAP) Office (see below) and the School of Education seek to make studying abroad affordable for students. Make sure to review the IAP scholarship page (https:// studyabroad.wisc.edu/funding/scholarships/). In particular, check out the scholarships that are specifically for SoE majors

School of Education students, and students planning to pursue a certificate in the School, are encouraged to explore different study abroad and international internship options early, even during the first or second semester on campus. While study and interning abroad is open throughout the undergraduate years, for some majors going early is the best option.

Why should School of Education students explore their options to study or intern abroad early?
- Some degree programs, such as teacher education or kinesiology, have structured course sequences in the junior and senior year. Studying abroad in the first two years may be the best course of action for students in these program areas. Advisors in the School of Education Student Services and International Academic Programs offices can assist in identifying the best time to study abroad.
- Scholarships! Working with the International Academic Programs, International Internship Program, Financial Aid, and the SoE Global Engagement Office early allows students to explore many scholarship options. Pre-planning around the costs of studying or interning abroad helps make participating a reality.
- Many UW-Madison students are the first in their families to study or intern abroad. Exploring study and intern abroad options early allows students to get key information to share with those closest to them. Considering a study or intern abroad opportunity can be daunting. Getting as much information as possible, as early as possible, can help dispel some of the fears and uncertainties students and their families may have.

Another option is to enroll in one of the summer study abroad courses offered by the School of Education. A new initiative of the school, these courses are led by UW-Madison instructors in 3-4 week sessions. In the summer of 2023 students studied:
- Diversity and Community in the Galapagos Islands (Ecuador)
- Team Building in Costa Rica
- Theatre in London
- Movement as Medicine in Portugal

Additional courses are in development

\section*{STUDY ABROAD}

International Academic Programs, 301 Red Gym, 716 Langdon Street 608-265-6329

International Academic Programs (IAP) (https:// www.studyabroad.wisc.edu/) is the central study abroad office at UWMadison. IAP typically offers over 200 study abroad options in over 60 countries on 6 continents. Studying abroad complements students' on-campus academic goals, strengthens their professional potential and enriches their personal lives. Although COVID-19 has altered IAP's offerings, there are still opportunities to explore both internationally and domestically (e.g., the Washington D.C. semester program).

Students of all academic levels and majors study abroad. While many programs include language training-from the basics to full language immersion-most IAP programs have no language requirement and include courses taught in English.

Students advance towards their degrees while studying abroad. All courses taken abroad through IAP count as "in-residence" credit, just like taking courses on campus at UW-Madison. And study abroad isn't limited to classroom experience! Many students also complete internships, do research, fieldwork, and service learning.

In addition to resources on health, safety, academic planning and other aspects of studying abroad, UW-Madison students receive personalized guidance on how to finance their experience and the many scholarship opportunities available through the UW-Madison and external scholarships. Program costs vary widely. Sometimes studying abroad is no more expensive than studying on campus, and other times the cost can be higher. Student financial aid is usually applied to study abroad experiences, and some countries permit students to work while participating in a study abroad program. Working out these details takes time, dedication, and patience. IAP works closely with students through all of these processes.

For more information on study abroad at UW-Madison, check out IAP's website (http://studyabroad.wisc.edu) or call 608-265-6329. IAP's offices are on the third floor of the Red Gym.

\section*{INTERNATIONAL INTERNSHIPS}

259 Bascom Hall, 500 Lincoln Drive, 608-890-2085

As stated on their website, the International Internship Program (IIP) (http://internships.international.wisc.edu/) at UW-Madison identifies, cultivates and promotes high quality internships that:
- Advance the professional training of UW-Madison undergraduate students.
- Foster global competency.
- Reinforce academic learning through practical application.

Students can pursue international internships during the summer months, as well as during the semester, if allowed by the student's academic program. IIP offers both in-person and virtual internships with organizations and companies outside of the U.S. If traveling to do an internship is not an option at the moment, make sure to review the virtual internship options that are available.

IIP advises undergraduates on all aspects of an international internship experience, which include:
- Internships search strategies and considerations
- Applications
- Academic Credit
- Funding
- Visas
- International health and travel insurance

The office maintains a number of resources, including an IIP Database of international internships that have been cultivated for UW-Madison students and a number of guides to help students navigate participation in an international internship. IIP serves as a resource to students pursuing international internships prior to departure, during the internship, and upon return. Advisors work closely with both students and program sites to ensure that students have a quality experience.

\section*{UNDERGRADUATE RESEARCH}

UW-Madison is a research-rich environment and students are encouraged to participate in the research activities of our world-class faculty and staff. Here are some pathways students use to get involved with research:
1) Apply to a structured program. Some students get involved in research through a specific program (https://research.wisc.edu/ information-for-undergraduate-students/) designed to connect undergraduate students to research. This program may be a scholarship program, or simply provide funding to work on a guided research project. It may provide mentoring related to research methodology and/or require students to enroll in a course for credit. An example of such a program is the Undergraduate Research Scholars (https://urs.ls.wisc.edu/), one of the more popular options available to School of Education students.

The Undergraduate Research Scholars program (URS), 716 Langdon Street, 608-890-3696, is dedicated to enhancing the academic experience of UW-Madison students by providing first and second year undergraduates with opportunities to earn credit for participating in the research and creative work with UW-Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/ artistic presentations. The many benefits of the program are found in the fluid interaction between these activities. Please refer to the website (https://urs.ls.wisc.edu/) for more information.
2) Seek out research opportunities. Many students take the initiative and seek out research opportunities on their own. The School of Education

Career Center (http://careercenter.education.wisc.edu/) can provide help with writing an inquiry email. Here are a few ways to conduct this search:
- The Wisconsin Discovery Portal (https://discoveryportal.org/ default.aspx) is a searchable directory of more than 3,000 researchers at UW-Madison. It provides easy access to information about research interests, publications, patents and more.
- Find information about undergraduate research and fellowship opportunities on the UW Research (https://research.wisc.edu/ information-for-undergraduate-students/) website.
- Find helpful information about undergraduate research experiences in science on the BioCommons (https:// biology.wisc.edu/undergraduate-research/) website and the WISCIENCE (https://wiscience.wisc.edu/research-mentortraining/\#undergrad) website.
- Find a listing of labs on the Wisconsin Center for Education Research (https://www.wcer.wisc.edu/research/) and departmental websites. The lab descriptions often contain contact information for students interested in getting involved in the lab's activities. The Kinesiology department (https://kinesiology.education.wisc.edu/research/) and the Communication Sciences and Disorders department (https:// csd.wisc.edu/research/) are two good examples of how this information is shared. Many School of Education students participate in research through the Department of Educational Psychology.
- The Student Jobs (https://studentjobs.wisc.edu/) website lists some research opportunities.
- Read the online bios of professors to learn about their areas of research. Send an email inquiry. The Center for Pre-Health Advising (https://prehealth.wisc.edu/research-opportunities/) has a helpful email template you may use.
- Ask the professor or TA in a class if they know of any opportunities to become involved with research.
3) Participate when enrolled in a course. Some courses have research opportunities built into the course itself. For example:
- Biology 152 has provided students with an option to participate in a mentored research opportunity.
- Students can serve as research participants to earn extra credit in their courses. Students enrolled in Educational Psychology courses, for example, are often provided with such an opportunity.
- Some professors will announce research opportunities through email to their students.

\section*{OFFICE OF EQUITY, DIVERSITY, AND INCLUSION}

145 Education Building, 1000 Bascom Mall, 608-265-6139
The University of Wisconsin-Madison School of Education seeks to promote equity, diversity, and inclusion by reducing barriers to access, increasing the demographic diversity of our faculty, staff, and students, and encouraging scholarship, teaching and service that embraces and engages the full measure of the diversity of our society. The School of Education recognizes that our desire to be an unbiased and inclusive academic community is ongoing and involves shared commitment, responsibility, action and accountability. We believe that diversity, equity,
inclusion, and excellence, the four essential pillars of inclusive excellence, build upon our scholarship and our reputation as an excellent educational institution.

The Office of Equity, Diversity and Inclusion (OEDI) (https:// education.wisc.edu/about/diversity-inclusion/) provides and promotes programs and initiatives that establish and support a culture of academic and inclusive excellence in the School of Education. OEDI promotes initiatives that recruit, retain, and support the success of historically marginalized students, faculty, and staff, leveraging individual and collective assets to lead in the arts, health, and education fields. OEDI promotes a community of scholars, practitioners, and collaborators within the School that enrich the quality of life for all our faculty, staff, and students, as well as local communities and communities abroad.

OEDI houses programs that serve students at multiple levels. Some of our programs include:
- Summer Education Research Program (SERP): The Summer Education Research Program (SERP) is a 10-week residential program for undergraduate students interested in pursuing graduate degrees in the School of Education. SERP Scholars, as a part of the Summer Research Opportunities Program (SROP), conduct research projects under the supervision of School of Education research mentors. In the process, they engage in cutting-edge research in their chosen fields and present their final projects to faculty members, peers, and the broader university community. SERP Scholars also participate in workshops and seminars to help ensure they are prepared for both the application process to graduate school and for the rigors of the graduate student experience itself. As part of SERP, participants also receive a competitive stipend for their work.
- Education Graduate Research Scholars (Ed-GRS): The Education Graduate Research Scholars Program (Ed-GRS) is a graduate fellowship program and research community which provides funding and a broad support system to graduate students who are either first generation students or from underrepresented backgrounds. Ed-GRS Fellows participate in a variety of discussions and workshops that prepare them to successfully navigate the graduate school experience and beyond, including discussions regarding the job search process and assuming a role as a research or faculty member after graduation. Fellows are also offered a number of special opportunities to connect with faculty, research staff, and peers throughout the School of Education to help them build a sense of supportive community.

\section*{- Summer College Access Program in Education}
(CAPE): CAPE is a free two-week summer experience that allows rising high school seniors to explore potential majors in the School of Education. Participants live on campus as enrolled students while taking a 2-credit course in one of the School's majors, covering Education, Health, or the Arts. Courses are led by world-class instructors who are experts in their fields. The CAPE curriculum also includes college preparatory seminars focusing on admissions, financial aid, and college life.
- Student Affinity Groups: OEDI helps support affinity groups designed to help underrepresented student populations establish a sense of community. The groups convene both to discuss topical issues and for simple fun social outings. If you would like to participate in an existing group or to help launch a new one, please reach out to our office for more information.

Students are encouraged to email oedi@education.wisc.edu with any questions regarding the Office or any of its programs.

\section*{COUNSELING PSYCHOLOGY TRAINING CLINIC}

The Counseling Psychology Training Clinic (CPTC) (https:// counselingpsych.education.wisc.edu/clinic-and-outreach/cptc/) is an award-winning training clinic run by the School of Education's Department of Counseling Psychology. The clinic provides high-quality, cost-efficient, and multiculturally competent psychological and mental health services to UW-Madison students and members of the community. Clinicians assist individuals with a variety of concerns including:
- Depression
- Anxiety
- Relationship issues
- Family concerns
- Trauma
- Eating disorders
- Sexual orientation/identity
- Sexuality
- Culture/ethnicity
- Poor concentration
- Grief
- Gender issues
- Anger
- Counseling for gifted and talented students

Fees for counseling services are on a sliding scale determined by income.

\section*{TEACHER EDUCATION CENTER}

L139 Education Building, 608-262-2997
The Teacher Education Center (https://tec.education.wisc.edu/) supports all prospective, current, and former teacher education students across the UW-Madison campus. The Center highlights the benefits, crucial importance, and real joys of choosing teaching as a career. Our student supports are designed to promote success and cultivate leadership. Specifically, we coordinate the Wisconsin Teacher Pledge student financial support program, assist students to achieve and document mastery of teacher education standards, and facilitate all required field experiences. The Teacher Education Center also oversees the statutory requirements for our teacher education programs, including Act 31, which ensures that all preservice teachers learn about the history, culture, and tribal sovereignty of Wisconsin's American Indian communities. The Teacher Education Center is the main point of contact for school district partners, cooperating teachers, and the Wisconsin Department of Public Instruction. At the TEC, we cultivate a community of inquiry and leverage our shared resources to help prepare the excellent educators our Wisconsin PK-12 schools, families, and students deserve.

\section*{MERIT (MEDIA, EDUCATION RESOURCES, AND INFORMATION TECHNOLOGY)}

301 Teacher Education Building, 608-263-4750

MERIT (https://merit.education.wisc.edu/) offers information and technology services to the School of Education and UW-Madison community partners. MERIT is designed as a collaborative and comprehensive cluster of service and support for the School of Education, the UW-Madison and beyond. Staff play an active role in the design and implementation of programs which connect the K-12 community to UWMadison.

Some of our services include evaluation and selection of tools for delivery of content, instructional design and consulting for development of online learning, library services and collections to support practicing teachers (including equipment loans), workshops and instructional support aimed at adoption of new tools, instructional technologies and information literacy.

\section*{COOPERATIVE CHILDREN'S BOOK CENTER (CCBC)}

401 Teacher Education, 608-263-3720
The CCBC (https://ccbc.education.wisc.edu/) is a library of the School of Education that provides education students, faculty, and staff with a noncirculating collection of children's and adolescent literature. The CCBC also serves other adults on campus and across the state who are interested in literature for the young, including Wisconsin teachers and school and public librarians.

This nationally unique library is the primary resource on campus and elsewhere for contemporary books published for children and young adults from preschool through high school ages. CCBC resources include extensive reference materials about literature for the young and a wide range of books for children and adolescents, including a book examination collection of new and recently published books, a comprehensive collection of recommended contemporary books, and historical literature from the 20th century. The CCBC is nationally known for its services related to intellectual freedom and advocacy for diversity in children's and young adult literature. Each year the CCBC compiles and releases statistics documenting the number of children's and young adult books published by and/or about Black, Indigenous, and People of Color (BIPOC), and additional aspects of identity including disability, LGBTQ+, and religion.

As a library of the School of Education, the CCBC is committed to being a vital part of the teacher education experience on campus. The CCBC's noncirculating collection provides immediate access to a wide range of literature for the young. CCBC librarians are available to meet with education students to help them identify children's and adolescent literature to fulfill class assignments, as well as to use in practicum and student teaching classrooms. Librarians are also available to meet with faculty and teaching assistants to discuss children's and young adult literature as it relates to the courses they are teaching.

The CCBC website (https://ccbc.education.wisc.edu/) provides fulltext access to many national children's and young adult literature awards and recommended lists as well as specialized bibliographies from CCBC staff. The CCBC offers special events throughout the academic year that provide opportunities to hear from authors and illustrators, as well as to interact with others who are interested in books for children and teens.

\section*{HONORS}

\section*{DEAN'S LIST}

Students have at least a 2.5 cumulative GPA and 3.5 or higher for the semester. Students must have received no incompletes in graded courses, no unreported grades, or end-of-semester academic actions for the semester. Credit/no credit and pass/fail courses are not considered in meeting the requirements for the Dean's List.

\section*{GRADUATING WITH HONORS AND GRADUATING WITH DISTINCTION}

Undergraduate students are invited to wear an honors stole at graduation, representing Graduating with Honors, if they have indicated they expect to graduate at the conclusion of the current semester, have a cumulative GPA that places them in the top \(20 \%\) of students expecting to graduate in their school/college, and have earned at least 60 credits in residence at UW-Madison. Credits in progress in the current semester count toward the 60 credit requirement.

Graduating With Distinction is a separate calculation and is posted to the undergraduate student's transcript after all grades and degrees have been recorded. Students qualify for the Distinction notation if they have received their degree, have a cumulative GPA that places them in the top \(20 \%\) of degree recipients in their school/college, and have earned at least 60 credits in residence at UW-Madison.

\section*{HONORS COLLABORATION WITH THE COLLEGE OF LETTERS \& SCIENCE}

The School of Education does not currently offer an Honors degree, with the exception of Honors in the Theatre and Drama major. However, through a collaboration between the School of Education and the College of Letters \& Science (L\&S), students in the School of Education may participate in the L\&S Honors Program and have these achievements posted on their transcript.

Three L\&S Honors options may be completed by School of Education students.

L\&S Honors in the Liberal Arts (HLA). Students pursuing Honors in the Liberal Arts complete Honors courses in broadly distributed subjects from the humanities, social sciences, and natural sciences. Through Honors coursework, students select enriching academic opportunities and build connections with faculty throughout the completion of their degree.

Courses taken for Honors can also be applied toward other degree requirements. For example, of the 24 required Honors credits
- At least 6 of the credits must be in courses designated as Humanities (including Literature)
- At least 6 of the credits must be in courses designated as Social Science
- At least 6 of the credits must be in courses designated as Biological, Physical, or Natural Science

These requirements completely overlap with the School of Education liberal studies requirements.

Honors in the Major (HM). Students completing an additional major housed in the College of Letters and Science may choose to complete the Honors requirements of this major. Honors in the Major requirements vary by program, but typically include a cumulative gpa of at least 3.3, a minimum major gpa, Honors coursework in the major, and successful completion of a two-semester senior Honors thesis or other capstone experience.

If Honors courses overlap with School of Education requirements, they can count in both areas.

Comprehensive Honors (both HLA and HM). Comprehensive Honors, the highest level of Honors achievement, is awarded to students who are admitted to, and complete the requirements for both Honors in the Liberal Arts and Honors in the Major.

Full details of requirements, application procedures and policies are available in the Guide (p. 371) and the program's website (http:// www.honors.ls.wisc.edu). Students with questions about how L\&S Honors connects with School of Education programs and requirements should consult both L\&S Honors and School of Education advisors to plan a course of study.

\section*{WISCIENCE}

\section*{WISCIENCE}

\section*{SUPPORT FOR STEM} UNDERGRADUATES
At WISCIENCE, the Wisconsin Institute for Science Education and Community Engagement, we build and support communities of STEM learners. We deliver courses and programs in STEM disciplines that develop knowledge and skills for success in STEM; build identities and confidence; provide professional development and engagement opportunities in community engagement, leadership, and research in STEM.

Exploring Biology (https://wiscience.wisc.edu/Exploring-Biology/) (INTEGSCI 100): This lecture/discussion course is designed to help firstyear students explore topics, research, careers, and campus opportunities in the biosciences. It fulfills CALS seminar requirements and counts as a Biological Science Breadth credit. 2 credits

BioHouse Seminar (https://wiscience.wisc.edu/BioHouse-program/) (INTEGSCI 110): This seminar creates a formal space for residents of UWMadison's 10th learning community to learn about life science and the Wisconsin Idea. 1 credit

Exploring Service in STEM (https://wiscience.wisc.edu/ExploringService/) (INTEGSCI 140): Students learn about campus-community partnership and outreach in STEM. 1 credit

Exploring Research in STEM (https://wiscience.wisc.edu/course/ exploring-research-science-course/) (INTEGSCI 150): This seminar is designed to help students learn research processes and the skills necessary for success with academic programs or careers in research. 1 credit

Exploring Discipline-based Leadership and Mentoring (https:// www.wiscience.wisc.edu/discipline-based-leadership/) (INTEGSCI 230): This course prepares STEM students for various peer leadership positions on campus. As part of a supportive community, students develop knowledge and skills related to leadership, educational equity, and diversity and inclusion in STEM. 2 credits

Service with Youth in (https://wiscience.wisc.edu/EngageChildren/)STEM Series (INTEGSCI 240 and INTEGSCI 341): Integrated Science 240 prepares students to work with community partners and lead elementary after-school science clubs, and to critically reflect on links between campus and community culture. Integrated Science 341 is a practicum that allows students to build upon this experience by continuing to lead after-school science clubs. 2 credits per semester

Entering Research Series (https://wiscience.wisc.edu/Entering-Research/) (INTEGSCI 260 and INTEGSCI 261): This two-semester series is designed to be taken while undergraduates are engaged in mentored research to help them build a meaningful and productive experience in the lab. 1 credit per course

Special Topics (https://wiscience.wisc.edu/secrets-science/) (INTEGSCI 375): Our faculty offers a variety of topics allowing undergraduates to delve into a variety of STEM topics like the "Secrets of Science." 1-3 credits

WISCIENCE also offers customized options for undergraduates with independent study and internship opportunities available.

\section*{SUPPORT FOR STEM GRADUATE STUDENTS AND POSTDOCS}

WISCIENCE provides cross-campus programs and services to STEM graduate students and postdoctoral scholars.

INTEGSCI 605 Scientific Teaching for TAs: This course aims to help new TAs gain skills in scientific teaching to be effective and efficient in their roles. TAs get just-in-time support for their TA experience and apply their knowledge of research-based teaching approaches to the courses they are currently teaching.

Scientific Teaching Fellows Program (https://wiscience.wisc.edu/WPSTprogram/): A year-long program for graduate students and postdocs in the biosciences or connected fields. Through training and practical teaching experience, Fellows learn about and develop innovative and effective ways to teach science.

\section*{ART}

\section*{Undergraduate Degrees}
- B.S.-Art (https://guide.wisc.edu/undergraduate/education/art/ art-bs/\#requirementstext) and B.S.-Art with Graphic Design option (https://guide.wisc.edu/undergraduate/education/art/ art-bs/art-graphic-design-bs/)
- B.S.-Art Education (https://guide.wisc.edu/undergraduate/ education/art/art-education-bs/)
- Bachelor of Fine Arts (BFA) (https://guide.wisc.edu/ undergraduate/education/art/art-bfa/) and Bachelor of Fine Arts (BFA) with Graphic Design option (https://guide.wisc.edu/ undergraduate/education/art/art-bfa/art-graphic-design-bfa/)

\section*{Undergraduate Certificates}
- Certificate in Art Studio (https://guide.wisc.edu/undergraduate/ education/art/art-studio-certificate/)
- Certificate in Graphic Design (https://guide.wisc.edu/ undergraduate/education/art/graphic-design-certificate/)

The Department of Art conducts an exemplary experimental undergraduate program emphasizing the importance of a broad background in the study and practice of visual art and design, liberal arts, and knowledge of art and design movements throughout history.

The nationally and internationally recognized faculty of visual artists and designers provides a stimulating educational environment to prepare students for careers in a broad array of creative fields and/or graduate study. The program also supports and encourages the development of a visually and culturally literate community

The art department offers two professional programs, Art and Art Education. Art majors may pursue either the Bachelor of Science degree (p. 1579) or the Bachelor of Fine Arts degree (p. 1589). Art majors wanting to complete a strong emphasis in graphic design may pursue either the Bachelor of Science: Graphic Design (https://guide.wisc.edu/ undergraduate/education/art/art-bs/art-graphic-design-bs/) or Bachelor of Fine Arts: Graphic Design (https://guide.wisc.edu/undergraduate/ education/art/art-bfa/art-graphic-design-bfa/) options. Art Education majors (p. 1569) receive the Bachelor of Science-Art Education degree and eligibility to apply for licensure to teach in both elementary and secondary schools. Entrance requirements vary for each program. All degree programs are accredited by the National Association of Schools of Art and Design (NASAD).

\section*{DEGREES/MAJORS/CERTIFICATES}
- Art Education, B.S. (p. 1569)
- Art Studio, Certificate (p. 1577)
- Art, B.S. (p. 1579)
- Art, BFA (p. 1589)
- Graphic Design, Certificate (p. 1604)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (https://art.wisc.edu/).

\section*{ART EDUCATION, B.S.}

Art education is a perfect choice for students who thrive in creative, collaborative environments. People who choose this meaningful career path love viewing, discussing, and making works of art/design and are passionate about engaging others in the artistic process. Art educators help children and adults explore their own creative capacities and discover
the countless contributions visual artists have made to our society, both in the past and at the present time.

UW-Madison's art education program provides essential preparation for a variety of careers in art education. Students work directly with children and adolescents in both school and community-based field placements in every semester of the program. They study with outstanding art and education faculty in a range of rigorous and engaging studio, art history, curriculum and instruction, educational psychology, and educational policy studies courses, while also connecting with Madison's vibrant arts community through field trips and service learning.

Graduates of our program earn a Bachelor of Science degree, a careerready Wisconsin teaching license in \(\mathrm{K}-12\) art education, and gain the skills, knowledge, and confidence to teach the visual arts in a variety of school contexts (public and private schools, at the elementary and secondary evels, in the United States and internationally), and in community-based settings such as art museums, ceramic studios, maker spaces, and senior centers. The job market for art educators is incredibly healthy across the nation, and virtually all of our graduates land jobs that match their interests and expertise.

Consult the departmental website (https://art.wisc.edu/undergraduate/ undergraduate-degrees/) for additional information about art education. Students intending to teach in Wisconsin may be eligible for the Teacher Pledge (https://tec.education.wisc.edu/teacher-pledge/), an opt-in loan forgiveness program for teacher education students.

\section*{HOW TO GET IN}

\section*{ART EDUCATION DECLARATION OVERVIEW}

Students typically enter UW-Madison as Pre-Art Education students (PAED), spend the first two years completing liberal studies, general education, and foundational studio requirements, and declare Art Education during their sophomore year for their final two years on campus

On-campus students starting at UW-Madison in other majors can move to Pre-Art Education by completing a Pre-Professional Declaration (http:// www.education.wisc.edu/soe/academics/undergraduate-students/ academic-program-admission/). A GPA of 2.75, based on all UW-Madison coursework or the last 60 credits (p. 1539), is required to transfer into Pre-Art Education. It is not necessary to be a Pre-Art Education student before declaring an Art Education major.

\section*{ELIGIBILITY TO DECLARE ART EDUCATION}

Art Education currently accepts declarations once a year, from February 1 - May 1. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (http://www.education.wisc.edu/ soe/academics/undergraduate-students/academic-program-admission/) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Art Education should complete the on-campus declaration and must also be admitted to UW-

Madison. See Transfer Students and Students with a Bachelor's Degree, below.

\section*{ELIGIBILITY REQUIREMENTS:}
- Meet with the Art Education advisor Dr. Mary Hoefferle (email her directly to set up an appointment at hoefferle@wisc.edu ) or a School of Education Student Services advisor. Email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment in Student Services. On-campus students can schedule using Starfish (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/).
- Earn 40 or more total credits by the end of the semester prior to declaration.
- Complete at least 6 aesthetics credits (such as ART 108, ART 208 and/or art history courses) and 20 studio credits by the end of the declaration semester.
- Earn a minimum 2.75 cumulative GPA based on all college coursework attempted or a 2.75 last 60 credits GPA by the end of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester. \({ }^{1}\)

1
Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1539).

Students will be provisionally admitted pending the completion of all eligibility requirements by the end of the declaration semester.

\section*{TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE}

Transfer students and students who already hold a Bachelor's degree must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (http:// www.admissions.wisc.edu) for campus application information.

Students wishing to enter directly into Art Education should complete both the on-campus declaration and the UW-Madison application. All eligibility requirements must be met. Transfers who do not meet the declaration eligibility criteria will be admitted to UW-Madison with the PreArt Education designation.

An applicant with a previous undergraduate degree will be admitted to Art Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background. Admission as an Education Special Student indicates that the student has an interest in pursuing teacher certification in Art Education and studied this subject area extensively during their initial degree. A student enrolls in Art Education as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to
their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1539).

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

\section*{BACKGROUND CHECKS}

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

REQUIREMENTS

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

\section*{Complete Liberal Studies Electives (p. 1547) to total 40} Credits.

\section*{PROGRAM STRUCTURE}

The art education program is divided into five areas of study:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- The Foundations Program requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- Aesthetics coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- Major requirements offer an in-depth study of studio art.
- Professional education coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn. The professional sequence is a threesemester sequence of art education teaching methods coursework and field experiences in schools.

\section*{ART FOUNDATIONS PROGRAM}

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the foundations program should enroll in ART 102 Two-Dimensional Design, ART 212 Drawing Methods \& Concepts, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 ThreeDimensional Design, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists FirstYear Interest Group (FIG), (https://figs.wisc.edu/) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

\footnotetext{
Additional information about the Foundations Program (https:// art.wisc.edu/media-disciplines/foundations/) is available on the departmental website.
}

\section*{AESTHETICS REQUIREMENT}

Complete four courses focusing on the history of art and contemporary developments in the visual arts.
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 108 & Foundations of Contemporary Art & 3 \\
ART 208 & Current Directions in Art & 3 \\
ART HIST 202 & \begin{tabular}{l} 
History of Western Art II: From \\
Renaissance to Contemporary
\end{tabular} & 4 \\
Select one of the following: \({ }^{1}\) & \(3-4\)
\end{tabular}
\begin{tabular}{ll} 
ART HIST 103 & \begin{tabular}{l} 
Topics in Art History (world art \\
topics)
\end{tabular} \\
\hline ART HIST 104 & \begin{tabular}{l} 
The Art of Diversity: Race and \\
Representation in the Art and Visual \\
Culture of the United States
\end{tabular} \\
\hline ART HIST 203 & Survey of Asian Art \\
ART HIST 205 & Global Arts \\
ART HIST/ & Introduction to African Art and \\
AFROAMER 241 & Architecture \\
ART HIST/ & Introduction to Afro-American Art \\
AFROAMER 242 & \begin{tabular}{l} 
History of Islamic Art and \\
ART HIST 305
\end{tabular} \\
Architecture \\
ART HIST 307 & \begin{tabular}{l} 
From Tomb to Temple: Ancient \\
Chinese Art and Religion in
\end{tabular} \\
& Transition
\end{tabular}

ART HIST 308 The Tastes of Scholars and
Emperors: Chinese Art in the Later Periods
\begin{tabular}{ll} 
ART HIST 354 & \begin{tabular}{l} 
Cross-Cultural Arts Around the \\
Atlantic Rim: 1800 to the Present
\end{tabular} \\
ART HIST/ & \begin{tabular}{l} 
American Indian Art History: \\
AMER IND 359 \\
Contemporary Issues
\end{tabular} \\
ART HIST 372 & Arts of Japan \\
ART HIST 375 & \begin{tabular}{l} 
Later Japanese Painting and \\
Woodblock Prints
\end{tabular} \\
ART HIST 411 & \begin{tabular}{l} 
Topics in Asian Art
\end{tabular} \\
ART HIST 412 & \begin{tabular}{l} 
Topics in African and African \\
Diaspora Art History
\end{tabular} \\
ART HIST/ & Visual Cultures of India \\
ASIAN 428 &
\end{tabular}

ART HIST \(440 \quad\) Art and Power in the Arab World
ART HIST 475 Japanese Ceramics and Allied Arts
ART HIST 479 Art and History in Africa
1
Additional art history courses addressing arts from underrepresented cultures will be considered. A course may also count for the global perspectives or ethnic studies requirement if it has that designation.

\section*{MAJOR REQUIREMENTS}

Students must complete 45 credits of studio art, including the specific requirements below. At least 15 upper-level studio credits must be taken in residence on the UW-Madison campus. Upper-level classes include Art courses numbered 214 and above, excluding ART 236 and ART 338.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline ART 102 & Two-Dimensional Design & 3 \\
\hline ART 104 & Three-Dimensional Design & 3 \\
\hline ART 107 & Introduction to Digital Forms & 3 \\
\hline ART 212 & Drawing Methods \& Concepts & 3 \\
\hline ART 222 & Introduction to Painting & 3-4 \\
\hline ART 306 or ART 336 & Relief Printmaking Serigraphy & 3-4 \\
\hline ART 214 or ART 244 & \begin{tabular}{l}
Sculpture I \\
Art Metal I
\end{tabular} & 3-4 \\
\hline ART 224 & Ceramics I & 4 \\
\hline \multicolumn{3}{|l|}{Digital Media Elective - select one of the following:} \\
\hline ART 176 & Digital Photography for Non-Art Majors & \\
\hline ART 309 & Digital Art and Code & \\
\hline ART 346 & Basic Graphic Design & \\
\hline ART 348 & Introduction to Digital Printmaking & \\
\hline ART 409 & Digital Fabrication Studio & \\
\hline ART 428 & Digital Imaging Studio & \\
\hline ART 448 & Special Topics (digital media topics only) & \\
\hline
\end{tabular}

Take additional art electives to reach the minimum of 45 credits

\section*{PROFESSIONAL EDUCATION REQUIREMENTS}
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{2}{|l|}{Foundations of the Profession} & 3 \\
\hline ```
ED POL/

\hline
\end{tabular}

ART EDUCATION REQUIREMENTS

Code
ART ED 321
ART ED 323
ART ED 324
ART ED 327
ART ED 425
ART ED 423
ART ED 424

\section*{Title} Credits
Introduction to Teaching Art 2
Foundations in Art Education 3
Methods in Art Education 3
Practicum in Art Education6

Seminar in Art Education 2
Student Teaching in Elementary Art \({ }^{1}\)5

Student Teaching in Secondary Art \({ }^{1} 5\)33

Digital Media Elective - select one of the following:

Must have a minimum 2.75 GPA in Professional Education and Art Education courses to student teach.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS

Requirements are based on UW-Madison coursework.
- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average in all major course work.
- 2.75 cumulative grade point average in all upper-level major course work. Art courses numbered 214 and above, excluding ART 236 and ART 338, are considered upperlevel courses.
- 2.75 in professional education course work (excluding practicum and student teaching).
- Major Residency. Students must complete a minimum of 15 upper-level studio credits in residence on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 120 total credits.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1575).

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits. \\
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
& \begin{tabular}{l} 
thresholds will be placed on academic probation.
\end{tabular}
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Identify and explore important eras, developments, movements, and theories in historical and contemporary art practice.
2. Identify and analyze the elements and principles of design in the work of other artists and consistently and effectively employ the elements and principles in their own studio work.
3. Develop technical skill, a personal creative practice, and knowledge of the historical and current practices of at least four separate visual art disciplines, including 2D, 3D, 4D, and graphics areas.
4. Examine best practices (historical and contemporary) in art curriculum planning, instruction and assessment, apply knowledge to k-12 curriculum development, and effectively teach art to diverse populations in community and school-based settings.
5. Meet all School of Education Teacher Education Standards and DPI \(\mathrm{k}-12\) art licensure requirements (including child development and
learning theories, history of American Education, and the role of art in literacy education).

\section*{FOUR-YEAR PLAN}

\section*{Bachelor of Science: Art Education - Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Total Credits 121}

\section*{ADVISING AND CAREERS}

\section*{ART EDUCATION ADVISING}

3 Prospective off-campus and on-campus art education students will meet with the art education program coordinator Dr. Mary Hoefferle, 6241 Humanities Building, 455 North Park Street, hoefferle@wisc.edu. Students considering art education should contact Dr. Hoefferle as soon as possible. Pre-declaration advising is conducted by the Department of Art and advisors in the School of Education Student Services office, see below.

The undergraduate art program advisors are located at 6241 Humanities Building, 455 North Park Street. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made by calling 608-262-1660.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (https://art.wisc.edu/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently
seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{ART EDUCATION AND THE WISCONSIN EXPERIENCE}

Teaching Art - As part of required courses, art education students teach art to children and teens in school and community-based settings in every semester of the program. Some of our most recent partners include:
- The Art Zone at the Madison Museum of Contemporary Art (https://www.mmoca.org/)
- Monroe Street Arts Center (https://www.monroestreetarts.org/)
- Afterschool art clubs in Madison elementary, middle and high schools
- Fieldwork experiences in private schools like Edgewood, Wingra, Eagle and Madison Country Day, and public schools in rural, suburban and urban districts.

Learning from Current Practitioners - In all field placements art education majors receive support, guidance and advice from veteran art teachers and university supervisors. They meet art teachers who lead special-topic workshops such as Adaptive Art, Building a High School Ceramics Program, and Integrating Digital Media in Traditional 2D Art Classes, or teaching artists who lead studio-centric workshops such as Monoprint, Puppetry, and Comics, in which in-service art teachers join them as fellow learners.

Paid Work Experience - Art education majors also find valuable, paid work experience in the community as teaching assistants or lead art instructors in organizations like the Wheelhouse Studios (https:// union.wisc.edu/events-and-activities/open-art-studio-and-classes/), the Chazen Museum of Art (https://chazen.wisc.edu/), Little Picassos (https://www.littlepicassosart.com/) (an art enrichment program for lowincome families), Madison School and Community Recreation (https:// www.mscr.org/), Prairie Music \& Arts, (https://prairiemusic.org/) and provide one-to-one art tutoring.

Student Organizations - Art education majors join a wide variety of student organizations on campus. Art-related organizations (https:// art.wisc.edu/art-at-uw/student-orgs/) include the Mad Gaffers (glass blowing), Fresh Hot Press (printmakers), and the Chazen Art Museum Ambassadors. Aspiring Educators of Wisconsin (https:// www.facebook.com/AspiringEducatorsUWMadison/) is an active organization for pre-service teachers in all areas of education.

Exhibiting Artwork - Art education majors also have ample opportunity to submit their artwork for consideration for art exhibitions, scholarships and competitions.

\section*{CERTIFICATION/LICENSURE}

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS}

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information
about applying for a license, see the Teacher Education Center (https:// tec.education.wisc.edu/current-students/).

\section*{APPLYING FOR A TEACHING LICENSE}

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

\section*{LICENSING LEVELS}

The following licensing options will be offered at UW-Madison.
- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education. The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Secondary Education program areas will license in their subject area Grades 4 through 12, and also in English as a Second Language Kindergarten through Grade 12.
- World Language Education program areas will license at the Kindergarten through Grade 12 level.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level
- Health and Library Media Specialist both license at the Kindergarten through Grade 12 level.
- Communication Sciences and Disorders (Speech-Language Pathology) will license at the K-12 level.

\section*{WISCONSIN STATE LICENSING}

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \(\$ 125\). An online license application is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/ elo/). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/licensing/ fingerprint/electronic-submission/).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UWMadison teacher certification students, the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW-Madison requires that
1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

\section*{LICENSING OUTSIDE OF WISCONSIN}

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (https://education.uky.edu/accreditation/certification/ states/) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW-Madison certification officer. This form verifies that a stateapproved licensing program has been completed. These forms should be sent to the School of Education Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

The requirements of this program do not meet Certification/Licensure in the following states:
Not applicable

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{ART STUDIO, CERTIFICATE}

The Certificate in Art Studio allows students from across campus, regardless of their major or degree program, to engage in a structured, meaningful art studio experience. Students should work closely with their major advisor to see how the certificate requirements can fit into their degree plan. Note: Most art courses do not carry the LAS (L\&S) designation.

This certificate was designed for students who may not have professional ambitions in the arts, but still have an interest in a special discipline and want to develop their talents; previous coursework in art is not required.

The program provides a course of study in four focus areas: 2D, 3D, 4D, or photography. Students select one of these options and complete the courses required of this area of study.

For each option, certificate students complete one course focusing on the historical context of art, one or two courses that provide a foundation for their chosen area, and two related electives that allow for the exploration and development of their skills specific to the area of focus.

Students interested in graphic design and typography should consider the Graphic Design Certificate (https://guide.wisc.edu/undergraduate/ education/art/graphic-design-certificate/), also offered through the Department of Art.

The Art Studio certificate may also appeal to individuals who have already completed a Bachelor's degree in art, but now want to complete an emphasis in a different discipline; see the Nondegree/Visiting Student Guide (https://guide.wisc.edu/nondegree/). In these instances, the student will work closely with an advisor in the Department of Art to substitute higher-level courses for the foundational studio courses.

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

Students intending to complete the Art Studio certificate can find the declaration form on the School of Education's Certificate Programs page. The declaration for this certificate program can be submitted at any time during the academic year.

\section*{ELIGIBILITY}

Undergraduate students in good academic standing with a cumulative GPA of 2.50 or higher, who are not participating in the Art-B.S., Art Education, or Art-BFA degree programs, may declare this certificate. University Special students who have already completed a bachelor's degree are also eligible to complete this certificate.

\section*{REQUIREMENTS}

The studio art certificate may be completed by any UW-Madison undergraduate student who is not a declared art major.

Select a course of study in one of four focus areas: 2D, 3D, 4D (timebased), or Photography, and complete the required courses. For each option, certificate students complete one course focusing on the historical context of art, one or two courses that provide a foundation for their chosen area, and two or three related electives that allow for the exploration and development of their skills.

The certificate requires a minimum total of 17-18 credits, depending on the selected area. A minimum of 12 of these credits must be completed in residence. It is possible to complete the certificate in three semesters, making it a viable option for most students, including transfers.

\section*{HISTORICAL CONTEXT OF ART/ DESIGN}

Students in all certificate focus areas must complete one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 100 & Introduction to Art & 3 \\
ART 108 & Foundations of Contemporary Art & 3 \\
ART 208 & Current Directions in Art & 3 \\
ART HIST 206 & Survey of Photography: 1839 to & \(3-4\) \\
& 1989 &
\end{tabular}

\section*{FOCUS AREAS \\ FOCUS ONE: PAINTING, DRAWING, PRINTMAKING}

Ideal for the novice artist, as well as for students who want to develop previous skill in the creation of two-dimensional art. Students interested in pursuing this focus area can find more information about painting (https:// art.wisc.edu/media-disciplines/drawing-painting/), drawing, (https:// art.wisc.edu/media-disciplines/drawing-painting/) and printmaking (http://art.wisc.edu/art/academics/media/printmaking/) on the art department's website.

\section*{Painting, Drawing, Printmaking Requirements}

\section*{Code \\ Title \\ Credits}

Foundations
Complete one of the following:
\begin{tabular}{lll} 
ART 102 & Two-Dimensional Design & 3 \\
ART 112 & Drawing I & 3 \\
ART 212 & \begin{tabular}{l} 
Drawing Methods \& Concepts \\
(preferred)
\end{tabular} & 3
\end{tabular}

\section*{Development}

Complete a minimum of three courses from the list.
\begin{tabular}{lll} 
ART 222 & Introduction to Painting & 4 \\
ART 232 & Life Drawing I & 4 \\
ART 242 & Watercolor I & 4 \\
ART 302 & Color & 4 \\
ART 306 & Relief Printmaking & 4 \\
\hline ART 307 & Making Comics 1 & 4
\end{tabular}

ART 454 & Neon: Light as Sculpture & 4 \\
ART 514 & Advanced Sculpture Workshop 1 & 4 \\
ART 521 & Installations and Environments & 4 \\
ART 534 & Advanced Wood Working & 4 \\
ART 544 & Advanced Art Metal I & 4 \\
ART 554 & Advanced Glassworking & 4 \\
ART 614 & Advanced Sculpture Workshop 2 & \(3-4\) \\
ART 624 & Advanced Ceramics II & 4 \\
ART 644 & Advanced Art Metal II & 4
\end{tabular}

\section*{FOCUS THREE: 4D-DIGITAL, TIME-BASED, PERFORMATIVE OR SOCIAL PRACTICE}

Ideal for the novice artist, as well as for students who want to develop previous skill with new art genres. Students interested in pursuing this focus area can find more information about digital media and animation (https://art.wisc.edu/media-disciplines/4d/), (https://art.wisc.edu/ media-disciplines/4d/) or performance, video, or social practice (https:// art.wisc.edu/media-disciplines/4d/) on the art department's website.

\section*{4D-Digital, Time-based, Performative or Social Practice Requirements}
\begin{tabular}{lrr} 
Code \(\quad\) Title & Credits \\
Foundations & \\
Complete the following: & \\
ART 107 Introduction to Digital Forms
\end{tabular}

Development
Complete minimum of three courses from list.
\begin{tabular}{llr}

ART 531 & Screen Performance & 4 \\
ART 636 & Computer Augmented Printmaking & \(1-3\) \\
INTEGART 310 & Interdisciplinary Artist in Residence & \\
\hline
\end{tabular}

\section*{FOCUS FOUR: PHOTOGRAPHY (FILM AND DIGITAL)}

Ideal for the novice artist, as well as for students who want to develop previous skill with photography. Students interested in pursuing this focus area can find more information about photography (https:// art.wisc.edu/media-disciplines/printmaking/) on the art department's
website. ART HIST 206 Survey of Photography: 1839 to 1989 is highly recommended as the historical context course.
\begin{tabular}{|c|c|c|}
\hline \multicolumn{3}{|c|}{Photography Requirements} \\
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Foundations} \\
\hline \multicolumn{3}{|l|}{Complete the following:} \\
\hline ART 176 & Digital Photography for Non-Art Majors & 4 \\
\hline \multicolumn{3}{|l|}{Development} \\
\hline \multicolumn{3}{|l|}{Complete the following:} \\
\hline ART 376 & Photography & 4 \\
\hline ART 476 & Intermediate Photography & 4 \\
\hline ART 576 & Advanced Photography & 4 \\
\hline
\end{tabular}

\section*{PROGRESS AND COMPLETION REQUIREMENTS}

A minimum cumulative GPA of 2.5 must be achieved and maintained across all certificate course work in order to remain in, and successfully complete the certificate. All courses required by the certificate must be taken for a grade; none may be taken on a pass/fail, credit/no credit basis or as an auditor.

At least 12 of the required credits must be completed in residence in the UW-Madison Department of Art. Courses taken in a study abroad program sponsored by UW-Madison do not count toward this residency requirement.

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements

\section*{LEARNING OUTCOMES}
1. Correctly identify and explain important eras in historical and contemporary art practice.
2. Develop technical and conceptual skill in studio practice by consistently employing the elements and principles of effective visual art and/or design in their chosen focus area.

PEOPLE

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (https://art.wisc.edu/).

\section*{ART, B.S.}

The highly ranked Department of Art's degree programs provide creative students with the critical and artistic skills needed to excel in contemporary, multidisciplinary art and design practices. The art curriculum fosters positive collaboration, the creation of innovative and
technically advanced art works, and encourages the sharing of diverse points of view. Students can pair the B.S. Art degree with many different majors on campus in order to work toward specific career goals.

Degree programs feature a rigorous foundation program, a set of six courses that students often complete by participating in the popular Contemporary Art \& Artists First-Year Interest Group (FIG), before branching out into one or more specialized areas (https://art.wisc.edu/ media-disciplines/):
- 4D Digital Media
- 4D Video and Performance
- Ceramics
- Drawing/Painting
- Glass/Neon
- Graphic Design
- Metals/Jewelry
- Printmaking/Book Arts
- Photography
- Sculpture
- Wood/Furniture

\section*{The department offers five ways to complete a degree:}
- The Bachelor of Science in Art (https://guide.wisc.edu/ undergraduate/education/art/art-bs/) degree
- The Bachelor of Science in Art degree with Graphic Design option (https://guide.wisc.edu/undergraduate/education/art/ art-bs/art-graphic-design-bs/)
- The Bachelor of Fine Arts (https://guide.wisc.edu/ undergraduate/education/art/art-bfa/) degree
- The Bachelor of Fine Arts degree with Graphic Design option (https://guide.wisc.edu/undergraduate/education/art/art-bfa/ art-graphic-design-bfa/)
- The Bachelor of Science in Art Education (https:// guide.wisc.edu/undergraduate/education/art/art-educationbs/) degree

Potential Careers for Artists include: creative director, content marketing manager, arts coordinator and studio manager, ceramics, glassblowing, metal fabrication, illustration, commercial or fine arts photographer, primary/secondary school art teacher, gallerist, or studio artist. Our graduates also work as community arts organizers, user experience designers, technical assistants for major film companies, jewelry designers and fabricators, book designers, museum preparator and more!

The BFA degree is often selected by students wishing to develop a refined visual art portfolio in preparation for a career as a professional artist or designer, and/or for graduate study. The B.S.-Art degree requires 45 studio art credits, while the BFA requires 72 studio art credits.

All studio art majors begin their undergraduate career in the B.S.-Art program. After completing the foundations and studio breadth coursework, and going through the proper advising steps, students can declare one of the other art programs, such as a BFA or the BFA-Graphic Design Named Option.

The Bachelor of Science in Art Education provides essential preparation for careers in art education. Graduates of the Art Ed program earn a B.S.-Art Education degree, a Wisconsin teaching license in K-12
art education, and gain the skills, knowledge, and confidence to teach the visual arts in public and private schools, at the elementary and secondary levels, and in community settings such as art museums, maker spaces and senior centers.

The Department of Art believes that hardworking students who learn to harness and nurture their creative energies today will be the people influencing progress tomorrow. Come join us!

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

The Art-B.S. degree program currently admits on-campus students to begin in the fall, spring, and summer. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions (https://education.wisc.edu/admissions-aid/ undergraduate-admissions/) page for eligibility requirements prior to submitting an application.

\section*{ENTERING THE SCHOOL OF EDUCATION}

\section*{PROSPECTIVE UW-MADISON} APPLICANTS

Prospective applicants to UW-Madison are strongly encouraged to submit a portfolio to the Department of Art for review. Though a portfolio is not required, it does provide the art department an opportunity to make a recommendation on the applicant's behalf to UW-Madison's Office of Admissions and Recruitment. The Office of Admissions and Recruitment makes final determinations regarding the admission status of all applicants. Additional information, including submission guidelines, is available on the How to Apply (https:// art.wisc.edu/undergraduate/undergraduate-application/) page of the art department's website.

\section*{NEW AND CURRENT UW-MADISON STUDENTS}

New freshmen and off-campus transfers are admitted directly to the Art-B.S. degree program. Students planning on declaring the Art-B.S.: Graphic Design named option should first declare Art-B.S. The successful completion of ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms is required to declare the named option. All other oncampus students interested in becoming Art students must follow the application procedures outlined below.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information. BFA candidates cannot transfer directly into the Art-BFA degree program; instead, they will be admitted to campus as if pursuing the Art-B.S. degree program (ART classification)
and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the art department advisor prior to coming to campus; call 608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here ( \(p .1539\) ).

\section*{APPLICATION AND ADMISSION}

On-campus students should contact an undergraduate advisor in the Department of Art to discuss their interest in pursuing the Art-B.S. degree program. This meeting is required and can be scheduled using Starfish, (https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/) or by contacting the Department of Art at 608-262-1660. An application to the Art-B.S. degree program will be completed after this meeting.

\section*{CRITERIA FOR ADMISSION}
- Cumulative grade point average of at least a 2.5 based on UWMadison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- If applying for named option in Graphic Design, successful completion of ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms.
- Filing of all required paperwork, including professional program application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/) and transcripts. Application must be signed by the art department advisor.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted"
coursework indicates coursework for which a grade has been earned.) For more information on this rule, see this link (p. 1539).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits Education one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies} Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

\section*{Complete Liberal Studies Electives (p. 1547) to total 40} Credits.

\section*{PROGRAM STRUCTURE}

The bachelor of science (B.S.) degree program in art has five components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- The Foundations Program requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- Aesthetics coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- Major requirements permit in-depth studies of studio art. After taking courses in the Foundations area, students complete coursework in each of the four studio areas: 2D, 3D, 4D, and Graphics. B.S.-Art majors are required to reach an advanced level in at least one studio discipline.
- Elective credits to pursue individual areas of interest, such as a second major or additional studio credits. Many B.S.-Art students complete an additional major from the College of Letters \& Science. Some use this major to complement their art preparation (e.g., focusing on written communication for an eventual career in advertising), or a subject that complements their interest in art. Students interested in medical illustration, for example, may wish to take courses in the biological sciences. Others select majors that reflect interests completely unrelated to art.

\section*{ART FOUNDATIONS PROGRAM}

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the Foundations Program should enroll in ART 102 Two-Dimensional Design, ART 212 Drawing Methods \& Concepts, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 ThreeDimensional Design, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists FirstYear Interest Group (FIG), (https://figs.wisc.edu/) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (https:// art.wisc.edu/media-disciplines/foundations/) is available on the departmental website.

\section*{AESTHETICS REQUIREMENTS}
\begin{tabular}{llr} 
Code & Title & Credits \\

\end{tabular}

1
If taken prior to summer, 2018, ART 438 may count toward either the aesthetics or studio requirements, but not both. Effective summer, 2018, it may only count toward the aesthetics requirement. This course is designed for students pursuing graphic design.

\section*{MAJOR REQUIREMENTS}

The requirements listed here are effective for students admitted to the program effective summer 2016. Students admitted prior to this
time can find their major requirements listed in previous editions of the Undergraduate Catalog and on their DARS reports.

Complete a minimum of 45 studio credits, including the specific coursework below. No more than 58 studio credits will be counted toward the minimum 120 credits required for the B.S. degree. Thus, if a student wishes to graduate with the minimum of 120 credits, 62 of these credits must be "non-studio" coursework.

Major residency requirement: Students completing the B.S. degree must complete at least 24 credits of major studio coursework in residence on the UW-Madison campus.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

\section*{REQUIRED STUDIO FOUNDATIONS COURSES}

Complete the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 102 & Two-Dimensional Design & 3 \\
ART 104 & Three-Dimensional Design & 3 \\
ART 107 & Introduction to Digital Forms & 3 \\
ART 212 & Drawing Methods \& Concepts & 3
\end{tabular}

\section*{REQUIRED STUDIO BREADTH COURSES}

Select one course in each of the 2D, 3D, 4D, and Graphics areas. Students will also take ART 508 at least once and complete a 500-level or 600level art studio course in at least one discipline.

\section*{2D Studio}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 222 & Introduction to Painting & \(3-4\) \\
ART 232 & Life Drawing I & 4 \\
ART 242 & Watercolor I & \(3-4\) \\
ART 302 & Color & 4 \\
ART 312 & Intermediate Drawing I & \(3-4\)
\end{tabular}

\section*{3D Studio}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 214 & Sculpture I & 4 \\
ART 224 & Ceramics I & 4 \\
ART 244 & Art Metal I & \(3-4\) \\
ART 334 & Wood Working & \(3-4\) \\
ART 343 & Metal Fabrication and Welding in & \(3-4\) \\
& Sculpture & 4
\end{tabular}

\section*{4D Studio}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 309 & Digital Art and Code & 4 \\
ART 318 & Introduction to Video, Performance & 4 \\
& \& Installation Art &
\end{tabular}
\begin{tabular}{llr} 
ART 338 & Service Learning in Art & 2 \\
ART 409 & Digital Fabrication Studio & 4 \\
ART 428 & Digital Imaging Studio & 4 \\
ART 429 & 3D Digital Studio I & 4 \\
ART 470 & Special Topics in 4D Art & \(3-4\) \\
ART 521 & Installations and Environments & 4 \\
ART 531 & Screen Performance & \(3-4\)
\end{tabular}

\section*{Graphics}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 306 & Relief Printmaking & \(3-4\) \\
ART 316 & Lithography & 4 \\
ART 326 & Etching & 4 \\
ART 336 & Serigraphy & \(3-4\) \\
ART 346 & Basic Graphic Design & 4 \\
ART 348 & Introduction to Digital Printmaking & 4 \\
ART 376 & Photography & 4 \\
ART 446 & Artists' Books & 4
\end{tabular}

\section*{Art Colloquium}

Complete the following:

Code
ART 508

\section*{Title}

Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)

Credits

\section*{Advanced Studio Requirement}

Complete a 500-level or 600-level art studio course in at least one discipline. ART 508, ART 608, and ART 699 will not fulfill this requirement.

\section*{ELECTIVE STUDIO COURSES}

Select elective studio courses (http://guide.wisc.edu/courses/art/) to reach the minimum of 45 credits.

\section*{AREAS OF CONCENTRATION}

Although a concentration is not required, students may wish to select a sequence of related courses to develop an area of interest. Concentrations in multi-media, 2D studio, 3D studio, and printmaking are just some of the concentrations (https://art.wisc.edu/media-disciplines/) listed on the art department's website. Students wishing to concentrate in graphic design should declare the Graphic Design Named Option when eligible..

View as listView as grid

\section*{- ART: GRAPHIC DESIGN, B.S. (P. 1586)}

\section*{ELECTIVE COURSEWORK}
B.S.-Art students must complete additional coursework to reach the minimum 120 credits required for the degree. These students must complete a minimum of 62 non-studio credits. Another way of describing this requirement is that only 13 additional studio credits beyond the required 45 credits can count toward the 120 credits. Students interested in completing more than 58 total studio credits may wish to consider the BFA degree program, which requires at least 72 studio credits.

Completing an additional major. Students choosing the B.S.-Art option often also choose to complete an additional major in the College of Letters \& Science. Review Academic Policies and Procedures (p. 1539) to find detailed information about declaring an additional L\&S major while a student in the School of Education.

Completing two degree programs. Students also occasionally choose a second degree in another campus school or college. For instance, students may choose an Art degree program as well as a science degree program in the College of Agricultural and Life Sciences. See Academic Policies and Procedures (p. 1539) for more detailed information about the requirements and the approvals necessary to be permitted to complete dual degrees. Important note: Some campus schools/colleges do not permit dual degrees; at the present time this includes the College of Letters \& Science and the College of Engineering. These policies do not permit students to complete, for example, an art degree program and a journalism degree program.

Students interested in additional majors or dual degrees should consult carefully with an advisor in the School of Education Student Services office. Students may be referred to the associate dean for additional consultation and approvals.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS}

\section*{GRADUATION REQUIREMENTS}

Requirements are based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.5 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 2.5 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 24 credits of major coursework in residence on the UW-Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits to include at least 62 non-studio credits are required for graduation in the Art-B.S. degree program.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such
as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of
Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Learn the fundamentals of art and design through investigation of form, technology and concept within a cohort of like-minded and diverse artists and designers.
2. Develop skills in research, creative problem solving, and professional practices.
3. Expand knowledge of historical, thematic, critical, and theoretical issues as a means of strengthening verbal and visual vocabulary.
4. Demonstrate a broad understanding of distinct concepts and practices in two-dimensional media, three-dimensional media, four-dimensional media, and in a choice of printmaking, photography, or graphic design media.
5. Demonstrate competency at an advanced level in at least one discipline of student's choice. (Graphic design named option: Generate advanced level competency in graphic design.)

\section*{FOUR-YEAR PLAN}

Bachelor of Science in Art: Sample Four-Year Plan
This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide,
and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Freshman}

\end{tabular}

Total Credits 120

At least 62 "non-studio" credits must be taken to complete the B.S. Art degree. Aesthetics courses are considered to be non-studio. No more than 58 studio credits can be applied toward the 120 credits.

\section*{ADVISING AND CAREERS}

\section*{ART DEPARTMENT ADVISING}

Students declared in the B.S.-Art or BFA-Art major (including graphic design named options), as well as potential transfers into art, will meet with Undergraduate Art Program Advisor Matthew Mauk, mmauk@wisc.edu, or through artadvising@education.wisc.edu.

Prospective freshmen and art studio/graphic design certificate students will meet with Prospective Student and Certificate Advisor Mercedes Brandt, mercedes.brandt@wisc.edu, or through artadvising@education.wisc.edu.

Advisors are located at 6241 Humanities Building, 455 North Park Street.
Current Art majors can schedule an appointment with Matthew online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/) in MyUW. Certificate students can also use the Starfish app (https://wisc.starfishsolutions.com/starfish-ops/ dl/instructor/serviceCatalog.html?bookmark=connection/109896) to schedule an appointment with Mercedes. Appointments can also be made via email or, by calling 608-262-1660. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Art majors include: animation, ceramics, glassblowing, metal fabrication, graphic and multimedia design, illustration, videography, photography, teaching, and gallery art. Our graduates also work as community arts organizers, user experience designers, medical imagists, technical assistants for major film companies, jewelry designers and fabricators, book designers, and more.

Students develop important skills that employers look for, including:
- Diverse forms of communication, personal expression and connection
- Collaboration
- Creative problem solving
- Adaptability, agility, and the ability to learn new skills quickly
- Resilience
- Passion for their craft
- Empathy

Applied experiences, including paid internships, apprenticeship programs, career treks, and professional networking events, are available to UW Art students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (https://art.wisc.edu/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{ART AND THE WISCONSIN EXPERIENCE}

The UW-Madison Art department provides a wide range of opportunities for students on campus and beyond. Available resources include courses that connect with the community, job opportunities, the chance to show work, and the ability to manage campus student organizations.

Visiting Artists - The Art department is unique in its ability to bring in weekly visiting artists through the Art Colloquium series. A professional national or international artist comes to campus to provide an artist's talk, studio visits, and general conversation about artmaking with students. Individual courses often bring in visiting artists throughout the semester to provide workshops on unique techniques from those who specialize in particular processes.

Career Advising and Internships - The School of Education Career Center (https://careercenter.education.wisc.edu/) has a designated advisor for art students who can provide connections with hourly campus employment, internships, and career options after graduation. The Art department offers courses that focus on internships in the arts and many studios hire hourly workers who learn the basics of maintaining an artist's studio space. The BFA capstone course also provides detailed instruction in writing a resume, cover letter, grant proposals, and residency applications.

Student Organizations - Student organizations are an excellent opportunity for art majors to establish connections with working artists, host workshops for the community, and to raise funds for travel. Fresh Hot Press (printmaking), AIGA (graphic design), Mad Gaffers (glassblowing), and Art for Change (activism) are just a few of the art-related options (https://art.wisc.edu/art-at-uw/student-orgs/). Student organizations are led by undergraduates and graduate students, with several using fundraising throughout the year to attend national conferences. Overall, there are multiple ways for undergraduates to refine their professional and technical skills in relation to their future career goals in the arts through student organizations.

Exhibiting Artwork - It is important for any artist to consistently show their work, and the Art Department does its part to provide this professional development to our students. Undergraduates have the opportunity to reserve one of our three large-scale galleries to install their work for documentation and submission of future exhibitions. Students also work with faculty to submit their pieces into galleries throughout Madison, Milwaukee, and nationally. The Art Department works with students in many ways to help promote their work and develop the skills necessary to establish a thriving career in the world of art.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{ACCREDITATION}

\section*{Accreditation}

National Association of Schools of Art and Design (https://nasad.artsaccredit.org/)

Accreditation status: Accredited. Next accreditation review: 2025-2026.

\section*{ART: GRAPHIC DESIGN, B.S.}

\section*{REQUIREMENTS}

As an inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic design courses deliver skills and expertise that are in demand for all graphic design and related communications fields. Students develop abilities to think critically while working seamlessly across disciplines. In current and future iterations of the field, graphic designers must function as the "fusion" between art, business, engineering, research, and science.

Graduates of the Graphic Design named option programs will have experienced a range of forms and media that provides professional preparation, exhibition experience, as well as the development of unique intellectual and visual voice. Graduating students will also possess the flexibility to adapt to a changing, unpredictable world where the methods of communication will continuously evolve and expand.

The named option requirements listed here are components of the B.S. Art (https://guide.wisc.edu/undergraduate/education/art/art-bs/ \#requirementstext) degree requirements.

\section*{ELECTIVE STUDIO COURSES}

Select additional elective studio courses (http://guide.wisc.edu/courses/ art/) to reach the minimum of 45 credits.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS}

GRADUATION REQUIREMENTS
Requirements are based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.75 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 2.75 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 24 credits of major coursework in the UW-Madison Art Department. All graphic design coursework must be completed in residence.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits to include at least 62 nonstudio credits are required for graduation in the Art-B.S. degree program.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{FOUR-YEAR PLAN}

\section*{Bachelor of Science in Art: Graphic Design Option}

\section*{Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Total Credits 120}

\section*{1}

At least 62 "non-studio" credits must be taken to complete the B.S. Art degree. Aesthetics courses are considered to be non-studio. No more than 58 studio credits can be applied toward the 120 credits.

\section*{ART, BFA}

The highly ranked Department of Art's degree programs provide creative students with the critical and artistic skills needed to excel in contemporary, multidisciplinary art and design practices. The art curriculum fosters positive collaboration, the creation of innovative and technically advanced art works, and encourages the sharing of diverse points of view.

Degree programs feature a rigorous foundation program, a set of six courses that students often complete by participating in the popular Contemporary Art \& Artists First-Year Interest Group (FIG), before branching out into one or more specialized areas (https://art.wisc.edu/ media-disciplines/):
-4D Digital Media
- 4D Video and Performance
- Ceramics
- Drawing/Painting
- Glass/Neon
- Graphic Design
- Metals/Jewelry
- Printmaking/Book Arts
- Photography
- Sculpture
- Wood/Furniture

\section*{The department offers five ways to complete a degree:}
- The Bachelor of Science in Art (https://guide.wisc.edu/ undergraduate/education/art/art-bs/) degree
- The Bachelor of Science in Art degree with Graphic Design option (https://guide.wisc.edu/undergraduate/education/art/ art-bs/art-graphic-design-bs/)
- The Bachelor of Fine Arts (https://guide.wisc.edu/ undergraduate/education/art/art-bfa/) degree
- The Bachelor of Fine Arts degree with Graphic Design option (https://guide.wisc.edu/undergraduate/education/art/art-bfa/ art-graphic-design-bfa/)
- The Bachelor of Science in Art Education (https:// guide.wisc.edu/undergraduate/education/art/art-educationbs/) degree

Potential Careers for Artists include: creative director, content marketing manager, arts coordinator and studio manager, ceramics, glassblowing, metal fabrication, illustration, commercial or fine arts photographer, primary/secondary school art teacher, gallerist, or studio artist. Our graduates also work as community arts organizers, user experience designers, technical assistants for major film companies, jewelry designers and fabricators, book designers, museum preparator and more!

The BFA degree is often selected by students wishing to develop a refined visual art portfolio in preparation for a career as a professional artist or designer, and/or for graduate study. The B.S.-Art degree requires 45 studio art credits, while the BFA requires 72 studio art credits.

All studio art majors begin their undergraduate career in the B.S.-Art program. After completing the foundations and studio breadth coursework, and going through the proper advising steps, students can declare one of the other art programs, such as a BFA or the BFA-Graphic Design Named Option.

The Bachelor of Science in Art Education provides essential preparation for careers in art education. Graduates of the Art Ed program earn a B.S.-Art Education degree, a Wisconsin teaching license in K-12 art education, and gain the skills, knowledge, and confidence to teach the visual arts in public and private schools, at the elementary and secondary levels, and in community settings such as art museums, maker spaces and senior centers.

The Department of Art believes that hardworking students who learn to harness and nurture their creative energies today will be the people influencing progress tomorrow. Come join us!

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

Students interested in the Art-BFA degree, or Art-BFA with the Graphic Design named option, initially enroll in the Art-B.S. degree or Art-B.S. with the Graphic Design named option while completing prerequisite coursework and establishing other criteria for BFA eligibility. A portfolio review is part of the BFA selection process. Students will typically apply to the BFA program in their junior year and must have attained a minimum of junior standing. For the BFA, an application may be submitted during the semester that the required courses will be completed. For the BFA: Graphic Design named option, an application may be submitted during the semester that the required courses will be completed, with the exception of ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms, which must be successfully completed.

\section*{APPLICATION AND ADMISSION}

New freshmen and off-campus transfers are admitted directly to the ArtB.S. degree program and receive an ART classification. All art degree programs currently admit on-campus students to begin in the fall, spring, and summer. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should consult the School of Education's Undergraduate Admissions (https://
education.wisc.edu/admissions-aid/undergraduate-admissions/) page for updates to eligibility requirements prior to submitting an application.

\section*{APPLICATION PROCEDURES PROSPECTIVE UW-MADISON APPLICANTS}

Prospective applicants to UW-Madison are strongly encouraged to submit a portfolio to the Department of Art for review. Though a portfolio is not required, it does provide the art department an opportunity to make a recommendation on the applicant's behalf to UW-Madison's Office of Admissions and Recruitment. The Office of Admissions and Recruitment makes final determinations regarding the admission status of all applicants. Additional information, including submission guidelines, is available on the How to Apply (https:// art.wisc.edu/undergraduate/undergraduate-application/) page of the art department's website.

\section*{CURRENT UW-MADISON STUDENTS}

On-campus students interested in pursuing the BFA must first apply to the Art-B.S. degree program. A meeting with an undergraduate advisor in the Department of Art is required, and can be scheduled using Starfish, (https:// advising.wisc.edu/facstaff/starfish/starfish-studentresources/) or by contacting the Department of Art at 608-262-1660. Upon successful completion of the BFA portfolio review (see details below), students will complete an application signed by an undergraduate advisor in the Department of Art to move into the BFA program.

\section*{TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information. Note that off-campus transfer students will be held to the UW-Madison admission GPA requirements. BFA candidates cannot transfer directly into the BFA program; instead, they will be admitted to campus as if pursing a B.S.-Art degree (ART classification) and can apply for the BFA program once enrolled on campus. Transfer students are strongly encouraged to meet with the Department of Art advisor prior to coming to campus; call 608-262-1660 to schedule an appointment. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that that the student has
an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1539).

\section*{CRITERIA FOR ADMISSION}
- Previous Art-B.S. or Art-B.S. Graphic Design named option degree program status.
- Cumulative grade point average of at least a 2.5 based on UWMadison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- For the BFA degree and the BFA degree with the Graphic Design named option, successful completion or concurrent enrollment in the following courses:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 102 & Two-Dimensional Design & 3 \\
ART 104 & Three-Dimensional Design & 3 \\
ART 107 & Introduction to Digital Forms & 3 \\
ART 108 & Foundations of Contemporary & 3 \\
& Art & \\
ART 208 & Current Directions in Art & 3 \\
ART 212 & Drawing Methods \& Concepts & 3
\end{tabular}

One course from each of the following. See Requirements section for course options:

2D Studio
3D Studio
4D Studio
Graphics
- For the Graphic Design named option, must have successfully completed ART 102 Two-Dimensional Design and ART 107 Introduction to Digital Forms.
- Minimum 3.0 Art studio course GPA.
- Portfolio review.
- The portfolio must be submitted only after all prerequisite coursework has been completed or during the semester the courses will be completed. The portfolio must contain images of work completed in college art courses. Specific portfolio requirements will be announced prior to scheduled reviews, held near the end of the fall and/or spring semesters. Students not accepted into the BFA program will be encouraged to continue in the B.S.-Art program and will be allowed to present their portfolio for review one additional time.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate
coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) For more information on this rule, see this link (p. 1539).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
- Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

\section*{Complete Liberal Studies Electives (p. 1547) to total 40} Credits.

\section*{PROGRAM STRUCTURE}

The Bachelor of Fine Arts (BFA) degree program in art has four components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- The Foundations Program requires six interrelated studio and aesthetics courses designed to prepare first-year students for further study in studio art and design.
- Aesthetics coursework gives students an opportunity to study both the history of art and contemporary developments in the visual arts.
- Major requirements permit in-depth studies of studio art. After taking courses in the Foundations area, students complete coursework in each of the four studio areas: 2D, 3D, 4D, and Graphics. BFA students are required to reach an advanced level in two studio disciplines.

\section*{ART FOUNDATIONS PROGRAM}

The Art Foundations Program is a series of interrelated studio and lecture courses to be taken by art and art education majors in their first year as preparation for further study in studio art and design. The program addresses the fundamentals of art through investigation of formal, technical and conceptual issues. The drawing, 2D and 3D design, digital media, and art historical lecture classes are designed to expose, broaden, and challenge students' understanding of contemporary art production.

Art Foundations classes are meant to be taken concurrently and the information covered in them is interrelated. Students completing the Foundations Program should enroll in ART 102 Two-Dimensional Design, ART 212 Drawing Methods \& Concepts, and ART 108 Foundations of Contemporary Art for the fall semester and complete ART 104 ThreeDimensional Design, ART 107 Introduction to Digital Forms, and ART 208 Current Directions in Art in the spring.

Most freshman art majors complete their foundations courses through participation in the very popular Contemporary Art and Artists FirstYear Interest Group (FIG), (https://figs.wisc.edu/) which also creates a network of corresponding experiences and a peer community that will continue throughout the program and often beyond graduation. Students in FIGs enjoy studying with instructors dedicated to serving first year students, the opportunity to integrate related ideas from all three classes, and the ready-made opportunities to form support networks and lasting friendships.

Additional information about the Foundations Program (https:// art.wisc.edu/media-disciplines/foundations/) is available on the departmental website.

\section*{AESTHETICS REQUIREMENTS}

The BFA programs require a total of 18 aesthetics credits, including four required courses. The remaining credits will be met by selecting from a list of aesthetics electives. Liberal studies coursework in fine arts and literature can also can count as aesthetics electives. Additional courses may be approved by the art department advisor.

\section*{REQUIRED AESTHETICS COURSES}
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 108 & \begin{tabular}{l} 
Foundations of Contemporary Art \\
(component of the Foundations \\
Program)
\end{tabular} & 3 \\
ART 208 & \begin{tabular}{l} 
Current Directions in Art \\
(component of the Foundations \\
Program)
\end{tabular} & 3 \\
Select two additional courses from the following: \\
ART HIST 201 & \begin{tabular}{l} 
History of Western Art I: From \\
Pyramids to Cathedrals
\end{tabular} \\
ART HIST 202 & \begin{tabular}{l} 
History of Western Art II: From \\
Renaissance to Contemporary \\
ART HIST 205
\end{tabular} & \begin{tabular}{l} 
Global Arts
\end{tabular} \\
ART 438 & \begin{tabular}{l} 
History of Graphic Design and \\
Typography
\end{tabular} & \\
\hline
\end{tabular}

1
If taken prior to summer, 2018, ART 438 may count toward either the aesthetics or studio requirements, but not both. Effective summer, 2018, it may only count toward the aesthetics requirement. This course is designed for students pursuing graphic design.

\section*{AESTHETICS ELECTIVES}

Select from the following to complete the required 18 credits. Liberal studies coursework in fine arts and literature can also double count as aesthetics electives.

\section*{MAJOR REQUIREMENTS}

The requirements listed here are effective for students admitted to the Art or BFA program effective summer, 2016. Students admitted prior to this time can find their major requirements listed in previous editions of the Undergraduate Catalog and on their DARS reports.

Bachelor of Fine Arts (BFA) Program: Complete a minimum of 72 studio credits, including the specific coursework below. The BFA degree requires 126 total credits. Admission to the BFA program requires the completion of (or concurrent enrollment in) ART 102, ART 104, ART 107, ART 108, ART 208, ART 212, and one course in each of the 2D, 3D, 4D and graphics areas. Students must have a 3.0 GPA in their studio coursework to be considered for the BFA program and have attained a minimum of sophomore standing. Successful participation in a portfolio review is also part of the selection process. Application may be made during the semester that the required courses will be completed. See How to Get In (p. 1589) for details about the application process.

Major residency requirement. The BFA program requires that at least 36 credits of major studio coursework be completed in residence at UWMadison.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.

REQUIRED STUDIO FOUNDATIONS COURSES
Complete the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 102 & Two-Dimensional Design & 3 \\
ART 104 & Three-Dimensional Design & 3 \\
ART 107 & Introduction to Digital Forms & 3 \\
ART 212 & Drawing Methods \& Concepts & 3
\end{tabular}

\section*{REQUIRED STUDIO BREADTH COURSES}

Select one course in each of the 2D, 3D, 4D, and Graphics areas. Students will also take ART 508 at least once and complete a 500-level or 600level art studio course in at least two disciplines. BFA candidates are
required to participate in an exhibit and concurrently enroll in a capstone course.

\section*{2D Studio}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 222 & Introduction to Painting & \(3-4\) \\
ART 232 & Life Drawing I & 4 \\
ART 242 & Watercolor I & \(3-4\) \\
ART 302 & Color & 4 \\
ART 312 & Intermediate Drawing I & \(3-4\)
\end{tabular}

\section*{3D Studio}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 214 & Sculpture I & 4 \\
ART 224 & Ceramics I & 4 \\
ART 244 & Art Metal I & \(3-4\) \\
ART 334 & Wood Working & \(3-4\) \\
ART 343 & Metal Fabrication and Welding in & \(3-4\) \\
& Sculpture & \\
ART 354 & Glassworking & 4
\end{tabular}

\section*{4D Studio}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 309 & Digital Art and Code & 4 \\
ART 318 & Introduction to Video, Performance & 4 \\
& \& Installation Art & \\
\hline ART 338 & Service Learning in Art & 2 \\
ART 409 & Digital Fabrication Studio & 4 \\
ART 428 & Digital Imaging Studio & 4 \\
ART 429 & 3D Digital Studio I & 4 \\
ART 470 & Special Topics in 4D Art & \(3-4\) \\
ART 521 & Installations and Environments & 4 \\
ART 531 & Screen Performance & \(3-4\)
\end{tabular}

\section*{Graphics}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 306 & Relief Printmaking & \(3-4\) \\
ART 316 & Lithography & 4 \\
ART 326 & Etching & 4 \\
ART 336 & Serigraphy & \(3-4\) \\
ART 346 & Basic Graphic Design & 4 \\
ART 348 & Introduction to Digital Printmaking & 4 \\
ART 376 & Photography & 4 \\
ART 446 & Artists' Books & 4
\end{tabular}

\section*{Art Colloquium}

Complete the following:

\section*{Code \\ Title}

ART 508

Colloquium in Art (Students are encouraged to enroll in this visiting artist lecture series multiple times)

Credits are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Learn the fundamentals of art and design through investigation of form, technology and concept within a cohort of like-minded and diverse artists and designers.
2. Develop skills in research, creative problem solving, and professional practices.
3. Expand knowledge of historical, thematic, critical, and theoretical issues as a means of strengthening verbal and visual vocabulary.
4. Demonstrate a broad understanding of distinct concepts and practices in two-dimensional media, three-dimensional media, four-dimensional media, printmaking, photography, or graphic design media.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows
all the requirements for completing a degree and, against courses that

\section*{Advanced Studio Requirement}

Complete a 500-level or 600-level Art studio course in two disciplines. ART 508, ART 608, and ART 699 will not fulfill this requirement.

\section*{Exhibit Participation}

BFA students must participate at least once in the department-sponsored exhibit, held in the spring semester. Requires concurrent enrollment in the professional practices/capstone course.

\section*{Professional Practices/Capstone Course}

BFA students must enroll in this course during the required semester of participation in the department-sponsored exhibit. Currently, offered as ART 448 section 10; a unique course number will be forthcoming.

\section*{ELECTIVE STUDIO COURSES}

Select elective studio courses (http://guide.wisc.edu/courses/art/) to reach the minimum of 72 credits.

\section*{AREAS OF CONCENTRATION}

Although a specific emphasis is not required, students may wish to develop an area of interest within the requirements of the BFA program. Concentrations in multi-media, 2D studio, 3D studio, and printmaking are some of the available tracks (https://art.wisc.edu/mediadisciplines/) listed on the art department's website. Students wishing to concentrate in graphic design should declare the Graphic Design Named Option when eligible.

View as listView as grid

\section*{- ART: GRAPHIC DESIGN, BFA (P. 1599)}

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS
These requirements are based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 3.0 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 3.0 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 Bascom Course and ART 338 Service Learning in Art).
- Major Residency: Students must complete at least 36 major credits while enrolled in residence on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 126 credits are required for graduation in the Art-BFA degree program.
5. Demonstrate competency at an advanced level in at least two disciplines of student's choice. (Graphic design named options: one of the two disciplines must be in graphic design.)

\section*{FOUR-YEAR PLAN}

\section*{Bachelor of Fine Arts: Art - Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

A minimum of 126 credits are required. Six credits of liberal studies course work must be aesthetics-related and will count toward both liberal studies and aesthetics requirements.

\section*{ADVISING AND CAREERS}

\section*{ART DEPARTMENT ADVISING}

Students declared in the B.S.-Art or BFA-Art major (including graphic design named options), as well as potential transfers into art, will meet with

\section*{thr}

Advisors are located at 6241 Humanities Building, 455 North Park Street.
Current Art majors can schedule an appointment with Matthew online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/) in MyUW. Certificate students can also use the Starfish app (https://wisc.starfishsolutions.com/starfish-ops/ dl/instructor/serviceCatalog.html?bookmark=connection/109896) to schedule an appointment with Mercedes. Appointments can also be made via email or, by calling 608-262-1660. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Art majors include: animation, ceramics, glassblowing, metal fabrication, graphic and multimedia design, illustration, videography, photography, teaching, and gallery art. Our graduates also work as community arts organizers, user experience designers, medical imagists, technical assistants for major film companies, jewelry designers and fabricators, book designers, and more.

Students develop important skills that employers look for, including:
- Diverse forms of communication, personal expression and connection
- Collaboration
- Creative problem solving
- Adaptability, agility, and the ability to learn new skills quickly
- Resilience
- Passion for their craft
- Empathy

Applied experiences, including paid internships, apprenticeship programs, career treks, and professional networking events, are available to UW Art students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (https://art.wisc.edu/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{ART AND THE WISCONSIN EXPERIENCE}

The UW-Madison Art department provides a wide range of opportunities for students on campus and beyond. Available resources include courses that connect with the community, job opportunities, the chance to show work, and the ability to manage campus student organizations.

Visiting Artists - The Art department is unique in its ability to bring in weekly visiting artists through the Art Colloquium series. A professional national or international artist comes to campus to provide an artist's talk, studio visits, and general conversation about artmaking with students. Individual courses often bring in visiting artists throughout the semester to provide workshops on unique techniques from those who specialize in particular processes.

Career Advising and Internships - The School of Education Career Center (https://careercenter.education.wisc.edu/) has a designated advisor for art students who can provide connections with hourly campus employment, internships, and career options after graduation. The Art department offers courses that focus on internships in the arts and many studios hire hourly workers who learn the basics of maintaining an artist's studio space. The BFA capstone course also provides detailed instruction in writing a resume, cover letter, grant proposals, and residency applications.

Student Organizations - Student organizations are an excellent opportunity for art majors to establish connections with working artists, host workshops for the community, and to raise funds for travel. Fresh Hot Press (printmaking), AIGA (graphic design), Mad Gaffers (glassblowing), and Art for Change (activism) are just a few of the art-related options (https://art.wisc.edu/art-at-uw/student-orgs/). Student organizations are led by undergraduates and graduate students, with several using fundraising throughout the year to attend national conferences. Overall, there are multiple ways for undergraduates to refine their professional and technical skills in relation to their future career goals in the arts through student organizations.

Exhibiting Artwork - It is important for any artist to consistently show their work, and the Art Department does its part to provide this professional development to our students. Undergraduates have the opportunity to reserve one of our three large-scale galleries to install their work for documentation and submission of future exhibitions. Students also work with faculty to submit their pieces into galleries throughout Madison, Milwaukee, and nationally. The Art Department works with students in many ways to help promote their work and develop the skills necessary to establish a thriving career in the world of art.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{ACCREDITATION}

\section*{ACCREDITATION}

National Association of Schools of Art and Design (https://nasad.artsaccredit.org/)

Accreditation status: Accredited. Next accreditation review: 2025-2026.

\section*{ART: GRAPHIC DESIGN, BFA}

\section*{REQUIREMENTS}

As an inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic design courses deliver skills and expertise that are in demand for all graphic design and related communications fields. Students develop abilities to think critically while working seamlessly across disciplines. In current and future iterations of the field, graphic designers must function as the "fusion" between art, business, engineering, research, and science.

Graduates of the Graphic Design named option programs will have experienced a range of forms and media that provide professional preparation, as well as the development of unique intellectual and visual voice. Graduating students will also possess the flexibility to adapt to a changing, unpredictable world where the methods of communication will continuously evolve and expand.

The named option requirements listed here are components of the BFA - Art (https://guide.wisc.edu/undergraduate/education/art/art-bfa/ \#requirementstext) degree requirements.

\section*{AESTHETICS REQUIREMENTS GRAPHIC DESIGN OPTION}

The BFA Graphic Design option program requires a total of 18 aesthetics credits, including four required courses. The remaining credits will be met by selecting from a list of aesthetics electives. Additional aesthetics courses may be approved by the art department advisor.
\begin{tabular}{llr}

\section*{MAJOR REQUIREMENTS GRAPHIC DESIGN OPTION}

Complete a minimum of 72 studio credits, including the specific coursework below. The BFA degree requires 126 credits. At least 36 credits of major studio coursework be completed in residence at UW-Madison.

Art and BFA degree students have priority access to studio courses. Note: Some courses are offered for 3 or 4 credits; it is preferred that the course be taken for 4 credits.
\begin{tabular}{llr} 
REQUIRED STUDIO FOUNDATION COURSES - \\
GRAPHIC DESIGN OPTION & \\
Code & Title & Credits \\
ART 102 & Two-Dimensional Design & 3 \\
ART 104 & Three-Dimensional Design & 3 \\
ART 107 & Introduction to Digital Forms & 3 \\
ART 212 & Drawing Methods \& Concepts & 3
\end{tabular}

\section*{REQUIRED STUDIO BREADTH COURSES GRAPHIC DESIGN OPTION}

Complete one course in each of the Graphic Design, 2D, 3D, and 4D areas. Students will also take ART 508 at least once and complete a 500 -level or 600 -level art studio course in graphic design and also in another discipline.

\section*{Graphic Design}
\begin{tabular}{llr}

ART 525 & Advanced Typography & 4 \\
ART 546 & Graphic Design for Publications & 4 \\
ART 556 & \begin{tabular}{l} 
Graphic Design for Interactive \\
Aedia
\end{tabular} & 4 \\
ART 558 & Product Development for Graphic & 4 \\
ART 563 & Graphic Design for Games & 4 \\
ART 565 & Typeface Design & 4 \\
ART 568 & Motion Typography & 4 \\
ART 575 & User Experience for Graphic Design & 4 \\
\hline ART 656 & Design Portfolio and Professional & 4 \\
ART 663 & Practice & 4
\end{tabular}

\section*{ADVANCED LEVEL COURSE IN A SECOND DISCIPLINE}

BFA-Art Graphic Design option students must plan for and complete an advanced-level (500-600) studio course in a secondary discipline of their choice. Common selections are in digital media, drawing/painting, video, glass, printmaking, and photography.

\section*{ELECTIVE STUDIO COURSES}

Select additional elective studio courses (http://guide.wisc.edu/courses/ art/) to reach the minimum of 72 credits.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS

Requirements are based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 3.0 cumulative grade point average in all major studio coursework.
- Upper-level major coursework: 3.0 cumulative grade point average in all upper-level major coursework (Art courses numbered 214 and above, excluding ART 236 and ART 338).
- Major Residency: Must complete at least 36 credits of major coursework in the UW-Madison Art Department. All graphic design coursework must be completed in residence.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 126 credits must be completed to earn the BFA degree.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{FOUR-YEAR PLAN}

Bachelor of Fine Arts: Art - Graphic Design Named Option

\section*{Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting
your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

A minimum of 126 credits are required. Six credits of liberal studies course work must be aesthetics-related and will count toward both liberal studies and aesthetics requirements.

\section*{GRAPHIC DESIGN, CERTIFICATE}

The Graphic Design Certificate allows students from across campus, regardless of their major or degree program, to engage in a meaningful, rigorous sequence of coursework introducing them to the field of graphic design. Previous college coursework or job experience in art and design is very beneficial, but not required.

An inherently interdisciplinary practice, graphic design plays an important role at every level of contemporary culture. Graphic designers function as the "fusion" between art, business, engineering, research, and science fields. Students intending to pursue a career in graphic design should instead select the Graphic Design named option in either the BS-Art (https://guide.wisc.edu/undergraduate/education/art/art-bs/\#text) or Art BFA (https://guide.wisc.edu/undergraduate/education/art/art-bfa/) degree program. Contact an advisor in the Art Department to explore the major.

Students completing a degree within the College of Letters \& Science should be aware that none of the courses within the Graphic Design certificate count as LAS credits (L\&S). All students should work with their primary academic advisors to assess if the certificate will work within their academic plan.

Students must complete a required foundations course before being able to declare the certificate.
Due to the required sequencing of courses, a minimum of four semesters (excluding summers) are usually necessary to complete the certificate; please plan accordingly.

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

Students intending to complete the Graphic Design certificate can find the declaration form on the School of Education's Certificate Programs page. The declaration for this certificate program can be submitted at any time during the academic year.

\section*{ELIGIBILITY}

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, and who have completed either ART 102 TwoDimensional Design or ART 107 Introduction to Digital Forms with a grade of B or higher, may declare this certificate. University Special students are also eligible to complete this certificate if they started at UW-Madison and graduated before completing the requirements.

Students participating in the Art-B.S., Art Education, or Art-BFA degree programs may not declare this certificate. Auditors are also not eligible.

\section*{REQUIREMENTS}

The Graphic Design Certificate requires a minimum of 18 credits as distributed below. At least 12 credits must be completed in residence in the Art Department. Study abroad credits do not count toward the residency requirement.

Completion of the certificate requires a 2.75 grade point average across all certificate coursework.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{To declare the certificate, complete either course with a grade of \(B\) or better} \\
\hline ART 102 & Two-Dimensional Design (preferred) & 3 \\
\hline ART 107 & Introduction to Digital Forms & 3 \\
\hline \multicolumn{3}{|l|}{After certificate declaration, complete both courses} \\
\hline ART 346 & Basic Graphic Design & 4 \\
\hline ART 438 & History of Graphic Design and Typography & 3 \\
\hline \multicolumn{2}{|l|}{After completing 346 and 438, complete at least 8 additional credits from the following} & 8 \\
\hline ART 458 & Graphic Design for Branding and Identity & \\
\hline ART 463 & Information Graphics & \\
\hline ART 465 & Graphic Design for Packaging & \\
\hline ART 467 & Graphic Design for Posters & \\
\hline ART 525 & Advanced Typography & \\

\hline ART 556 & Graphic Design for Interactive Media & \\
\hline ART 558 & Product Development for Graphic Design & \\
\hline ART 563 & Graphic Design for Games & \\
\hline ART 565 & Typeface Design & \\
\hline ART 568 & Motion Typography & \\
\hline ART 575 & User Experience for Graphic Design & \\
\hline ART 663 & Graphic Design Practicum & \\
\hline
\end{tabular}

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATE}

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

\section*{LEARNING OUTCOMES}
1. Correctly recognize and identify important eras, developments, movements, and theories in historical and contemporary design practice.
2. Recognize, develop and consistently employ the elements and principles of effective graphic design and typography in their own studio work, and will recognize it in the work of other artists.
3. Demonstrate technical and conceptual proficiency and will apply critical thinking skills in order to contextualize their practice in the contemporary design arena.
4. Understand the steps, tools, and skills necessary for participating in professional activities pertaining to graphic design and typography.
5. Develop a strong work ethic driven by both logical and inventive working process.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Art can be found on the department's website (https://art.wisc.edu/).

\section*{CURRICULUM AND INSTRUCTION}

The Department of Curriculum and Instruction is one of the premier research and teaching departments devoted to understanding the complex world of teaching, learning, curriculum, and policy. Faculty pursue a diverse array of research combining experience in schools with expertise drawn from a range of disciplinary fields. This world-class research is the foundation of its work preparing future teachers and the next generation of educational researchers.

Undergraduate degree programs offered by the department include Elementary Education (p. 1618) and Communication Sciences and Disorders (p. 1610). Students interested in Elementary Education can pursue one of five dynamic certification options:
- Kindergarten through Ninth Grade - Students completing this core program option will be certified to teach general education at the grade levels of \(\mathrm{K}-9\) and will also be eligible to teach in a 4 K classroom.
- English as a Second Language (ESL) K-12 (p. 1640) and Kindergarten through Ninth Grade (p. 1627) - A minor in English as a Second Language can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4 K ) and English as a Second Language in grades K-12.
- Early Childhood Education (ECE) (p. 1616) and Kindergarten through Ninth Grade (p. 1627) - A minor in Early Childhood can also be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4 K ) and in Early Childhood (birth through grade 3).
- Kindergarten through Ninth Grade (p. 1627), and Early Childhood Education (p. 1616), and English as a Second Language K-12 (p. 1640) - Students may opt to complete both
the ECE and ESL minors in combination with K-9 certification. Successful students receive certification in all three areas: general education in grades \(\mathrm{K}-9\) (including eligibility for 4 K ), Early Childhood (birth through grade 3), and English as a Second Language in grades K-12.
- Kindergarten through Ninth Grade and Special Education K-12 (Dual Certification) (p. 1742) - Students interested in both Elementary and Special Education should investigate the new Elementary Education and Special Education degree, housed in the department of Rehabilitation Psychology and Special Education. Upon completion, students are certified in general education at the grade levels of K-9 (including eligibility for 4 K ), and Special Education in grades K-12.

Two certificate programs, Arts and Teaching (p. 1606) and Preparing to Teach Abroad (p. 1658), may be completed by undergraduates from across the campus.

\section*{DEGREES/MAJORS/CERTIFICATES}

Undergraduate programs are offered in the areas listed below. Upon successful completion of a program leading to certification, candidates are certified in their respective subject and grade level and become eligible for a Wisconsin teaching license obtained through the Wisconsin Department of Public Instruction.

Note: Students at UW-Madison become certified to teach secondary English, Mathematics, Science, Social Studies, and World Languages only through graduate-level coursework, not as undergraduates. Information about the Master's degree program is available at uwteach.org (https://uwteach.education.wisc.edu/) and the Curriculum and Instruction website. (https://ci.education.wisc.edu)

- Sociology, Minor (p. 1670)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Curriculum and Instruction can be found on the department's website. (http://ci.education.wisc.edu/)

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{ARTS AND TEACHING, CERTIFICATE}

The Certificate in Arts and Teaching is a great opportunity for undergraduate art-makers from all disciplines to incorporate teaching into their professional practice. The teaching artist is a valued professional in a range of learning settings from museums to theatre companies to providing support for school-based arts programs. We are excited to offer undergraduates from across campus the opportunity to learn about theories of teaching and learning, to work alongside future classroom teachers and other arts practitioners, and to get the opportunity to try out teaching artist work in a community-based learning setting.

The program includes two required courses, CURRIC 328 Arts Integration for Teaching and Learning and CURRIC 329 Teaching Artist Practicum, and three electives offering a range of experiences in introductory education and arts practice courses. This program is for all student-artists, those who are majoring in the arts and those who practice their art form in their lives outside of the classroom. While you will not earn a teaching license to teach art in schools, the completion of this certificate will likely make you more competitive for jobs that require teaching experience in the arts, including afterschool programs, museum education, non-profit organizations, and private arts studios.

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the Certificate in Arts and Teaching. Students should meet with the certificate advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the declaration form located on the School of Education's Certificate Programs (https://education.wisc.edu/ academics/certificates/) page.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Certificate in Arts and Teaching requires the following course distribution for a minimum of 15 credits. At least 8 credits must be completed in residence. Students must complete two required courses,

CURRIC 328 and CURRIC 329, one course in Foundations of Teaching and Learning, and two courses in the Arts. Students are encouraged to take Arts courses that will broaden their artistic practice.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

\section*{REQUIRED COURSES}
\begin{tabular}{llr} 
Code & Title & Credits \\
CURRIC 328 & Arts Integration for Teaching and & 3 \\
& Learning & 3
\end{tabular}

\section*{FOUNDATIONS OF TEACHING AND LEARNING}

Select 3 credits from the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline CURRIC 209 & Digital Media and Literacy & 3 \\
\hline CURRIC 305 & Integrating the Teaching of Reading with Other Language Arts & 3 \\
\hline CURRIC 331 & Taking Education Outside of School & 3 \\
\hline CURRIC 364 & Introduction to Education & 3 \\
\hline ED PSYCH 301 & How People Learn & 3 \\
\hline ED PSYCH 320 & Human Development in Infancy and Childhood & 2-3 \\
\hline ED POL 200 & Race, Ethnicity, and Inequality in American Education & 3 \\
\hline ED POL 300 & School and Society & 3 \\
\hline ED POL 450 & Rethinking "After-School" Education & 3 \\

Introduction to Theatre for Cultural and Social Awareness

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate

\section*{LEARNING OUTCOMES}
1. Gain understanding of the theories of teaching and learning that guide informal learning environments
2. Experience a breadth of artistic practice, including those outside a student's primary artistic discipline
3. Develop a framework for arts teaching in informal learning environments
4. Create an arts program for an informal learning environment that integrates theories of teaching and learning with disciplinary arts practice

\section*{BIOLOGY, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with a biology undergraduate advisor (http://biologymajor.wisc.edu/advising/) to discuss course selection and other issues related to this field of study. The Biology Major website (http://biologymajor.wisc.edu/) is also a good resource, providing information about areas of study within biology and upcoming biologyrelated activities on campus. Biology is offered as a major in both the College of Letters \& Science and the College of Agricultural and Life Sciences.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

The biology minor requires a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all biology minor coursework taken on the UW-Madison campus. Biocore sequence coursework may also be used to meet these requirements; consult with an advisor in Education Student Services.

Discipline-related course work is also required, but not calculated into the minor credits or gpa.

\section*{REQUIRED DISCIPLINE-RELATED COURSES}
\begin{tabular}{lll} 
Code & Title & Credits \\
Select a minimum of 6 credits in Mathematics and/or & \\
Statistics, college level, excluding MATH 130-MATH 132 & \\
Select one of the following: & \\
\hline CHEM 103 & General Chemistry I & \\
\& CHEM 104 & and General Chemistry II & \\
CHEM 109 & Advanced General Chemistry & \\
\hline CHEM 115 & Chemical Principles I & \\
\& CHEM 116 & and Chemical Principles II & \\
Select one of the following: & 8-10 \\
\hline PHYSICS 103 & General Physics & \\
\& PHYSICS 104 & and General Physics & \\
PHYSICS 201 & General Physics & \\
\& PHYSICS 202 & and General Physics & \\
\hline PHYSICS 207 & General Physics & \\

\end{tabular}

1
Students earning Advanced Placement (AP) or International Baccalaureate (IB) Biology scores of 4 or above are given credit for BIOLOGY/BOTANY/ZOOLOGY 151 at UW-Madison. This course fulfills the entire 151-152 sequence. Students taking BIOLOGY/BOTANY/ ZOOLOGY 151 coursework at UW-Madison or transfer it from another campus must complete both BIOLOGY/BOTANY/ZOOLOGY 151 and BIOLOGY/BOTANY/ZOOLOGY 152 to complete the 151-152 sequence.

\section*{CHEMISTRY, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Chemistry is housed in the College of Letters \& Science. Students may wish to consult with a chemistry undergraduate advisor (http://www.chem.wisc.edu/content/undergraduate-advising/) to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

\section*{CHEMISTRY MINOR PREREQUISITES}

Note that students must complete prerequisite coursework before enrolling in some courses required for the minor. For example, MATH 222 Calculus and Analytic Geometry 2 and PHYSICS 201 General Physics or PHYSICS 207 General Physics must be completed before taking CHEM 561 Physical Chemistry. Prerequisite coursework may be used to meet liberal studies requirements.

\section*{CHEMISTRY MINOR REQUIREMENTS}

A minimum cumulative grade point average of 2.75 is required, based on all chemistry minor coursework taken on the UW-Madison campus.

Complete at least 22 credits, including the following:
Code Title Credits

\section*{Introductory Chemistry}

Select one of the following:
\begin{tabular}{ll} 
CHEM 103 & General Chemistry I \\
\& CHEM 104 & and General Chemistry II \\
CHEM 109 & Advanced General Chemistry \\
CHEM 115 & Chemical Principles I
\end{tabular}

\section*{Analytical Chemistry}

Select one of the following: 4-5
\begin{tabular}{ll} 
CHEM 327 & Fundamentals of Analytical Science \\
CHEM 329 & Fundamentals of Analytical Science \\
CHEM 116 & Chemical Principles II \\
\& CHEM 115 & and Chemical Principles I
\end{tabular}

Organic Chemistry
Select one of the following options: 7-8
Option 1:
\begin{tabular}{|cl}
\hline CHEM 341 & Elementary Organic Chemistry \\
\hline CHEM 342 & \begin{tabular}{l} 
Elementary Organic Chemistry \\
Laboratory
\end{tabular} \\
BIOCHEM 501 & Introduction to Biochemistry \\
Option 2: & \\
CHEM 343 & Organic Chemistry I \\
CHEM 344 & \begin{tabular}{l} 
Introductory Organic Chemistry \\
Laboratory
\end{tabular} \\
\begin{tabular}{cl} 
CHEM 345 & Organic Chemistry II
\end{tabular} \\
\begin{tabular}{cl} 
Inorganic Chemistry \\
CHEM 311 & Chemistry Across the Periodic Table
\end{tabular} \\
Physical Chemistry & \(\mathbf{4}\) \\
CHEM 561 & Physical Chemistry \\
or CHEM 565 & Biophysical Chemistry
\end{tabular}

\section*{Electives}

Complete Chemistry electives to total 22 credits \({ }^{1}\)
1
CHEM 346 Intermediate Organic Chemistry Laboratory is recommended. BIOCHEM 501 Introduction to Biochemistry, CIV ENGR 500 Water Chemistry, CBE 440 Chemical Engineering Materials, CBE 540 Polymer Science and Technology, are also recommended elective options.

\section*{COMMUNICATION SCIENCES AND DISORDERS, BSE}

\section*{OVERVIEW}

Admissions to the Communication Sciences and Disorders BSE have been suspended as of fall of 2023 and will be discontinued as of fall 2026. If you have any questions, please contact the department.

Note: Applications to the undergraduate Communication Sciences and Disorders program in the School of Education will not be accepted after the summer of 2023. Current students are encouraged to apply prior to this time, and should contact an advisor in the School of Education Student Services office (see Contact Information) to discuss modified eligibility requirements. Students must complete their degree requirements no later than the summer of 2026.

UW-Madison continues to offer a degree in Communication Sciences and Disorders (https://csd.wisc.edu/undergraduate/) through the College of Letters and Science.

The major in communication sciences and disorders provides students with opportunities for study in the areas of speech-language pathology,
audiology, and the normal aspects of speech, hearing, and language. Most students pursue this major because they hope to work as a licensed and certified clinical speech-language pathologist or audiologist, assisting clients with communication impairments arising from acquired neurological conditions, developmental conditions, genetic conditions, or unknown causes. Professional clinical practice follows completion of a master's degree in speech-language pathology, or a Doctor of Audiology degree. Some students pursue the undergraduate major as a foundation for a research career in speech, language or hearing sciences. Others pursue the major as a preliminary step toward advanced training in other professional fields (e.g., medicine, nursing, special education), or as a liberal arts degree that could lead to a variety of different career paths (speech-language pathology assistant, educational assistant, line therapist).

The major in communication sciences and disorders can be completed through the College of Letters \& Science or through the School of Education. Students select one program to follow and should be aware that the two programs differ somewhat in their requirements. Moreover, each program (L\&S and Education) has its own general liberal studies requirements. Students should plan to complete many of these general requirements as well as some courses in communication sciences and disorders during their first and second years on this campus.

The department is accredited in speech-language pathology and in audiology by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA). Therefore, academic courses and clinical practica in the Department of Communication Sciences and Disorders may be applied toward clinical certification by ASHA (speech language pathology or audiology), and toward state licensure.

\section*{HOW TO GET IN}

Admissions to the Communication Sciences and Disorders BSE have been suspended as of fall of 2023 and will be discontinued as of fall 2026. If you have any questions, please contact the department.

\section*{PROGRAM ADMISSION OVERVIEW}

The School of Education's Communication Sciences and Disorders program currently accepts students during both fall and spring semesters. Prospective applicants typically begin taking the three-course "gateway course" sequence (detailed below) as sophomores.

\section*{ENTERING THE SCHOOL OF EDUCATION}

ADMISSION TO THE SCHOOL OF EDUCATION AS A "PRE-PROFESSIONAL" STUDENT
New freshmen and transfer students interested in communication sciences and disorders are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in communication sciences and disorders receive the "pre-professional" classification of PRS.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/). A minimum GPA of 2.5 , based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1612)). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 to schedule an appointment with an advisor.

\section*{TRANSFERSTUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu/) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1539).

\section*{APPLICATION AND ADMISSION}

The communication sciences and disorders degree program currently accepts students during both fall and spring semesters. Requirements and selection criteria may be modified from one application/admission period to the next.

\section*{CRITERIA FOR PROGRAM ADMISSION}

\section*{Eligibility for consideration requires:}
- Fifty-four (54) or more transferable semester credits (junior standing) completed by the end of the semester prior to admission. Students can first apply during the semester that they will be completing 54 or more credits.
- A cumulative grade-point average of at least a 2.75 (on a 4.0 scale) based on all college-level coursework attempted (as modified by the Last 60 Credits Rule; see below). Grade-point averages are calculated from both Madison campus coursework and coursework taken at any other colleges or universities. \({ }^{1}\)
- Completion of the "gateway courses," CS\&D 201 Anatomy and Physiology of Speech Production (3 cr), CS\&D 202 Normal Aspects of Hearing ( 3 cr ), and CS\&D 240 Language Development in Children and Adolescents (3 cr). If any "gateway" courses were taken on another campus, then the first three Communication Sciences and Disorders courses taken at UW-Madison become the "gateway" courses.
- A minimum 3.0 GPA across CS\&D 201, CS\&D 202, and CS\&D 240 the first time these courses are attempted. If any "gateway" course was taken on another campus, students must earn a minimum 3.0 GPA on the first three communication and sciences disorders courses taken at UW-Madison. Note that "gateway" courses may not be repeated for the purpose of raising the student's "gateway" course GPA.
- A cumulative GPA of at least a 3.0 on all major coursework completed to date, excluding CS\&D 110 Introduction to Communicative Disorders.
- Completed program application (see details below).
- Note: In previous years, applicants to teacher education programs were required to submit scores from one of the following exams: ACT, SAT, Praxis I/PPST, Praxis Core, or GRE. Under emergency rules announced by the Wisconsin Department of Public Instruction, no applicants need to submit scores for any exam as a component of their application to this program. The exam requirement was officially removed by the School of Education on November 15, 2017.

1
A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW-Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UWMadison coursework established by their program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{APPLICATION PROCEDURES}

Submit completed program application materials specified on the School of Education's Undergraduate Admissions (http://
www.education.wisc.edu/soe/academics/undergraduate-students/ academic-program-admission/) page. Official transcripts from all other colleges or universities attended are required. Applications cannot be processed unless a complete academic record is presented for consideration.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies \\ Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic}
advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

\section*{Complete Liberal Studies Electives (p. 1547) to total 40} Credits.

\section*{PROGRAM STRUCTURE}

The School of Education undergraduate degree provides students with a conceptual background in the field of communication sciences and disorders and includes five categories of coursework:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Major coursework offers in-depth study of foundations for clinical practice.
- Discipline-related coursework supports the major coursework.
- Education coursework examines many aspects of the educational enterprise, including child development and learning, societal expectations of schools and instruction, and teaching methods.
- Elective coursework is taken to meet the minimum of 120 credits required for the degree.

The School of Education's Bachelor of Science degree in Communication Sciences and Disorders is one path toward eventual clinical practice, though a graduate degree is required for licensure. Thus, students must plan on graduate studies if they intend to pursue Wisconsin State licensure. Not all students eligible for admission to the undergraduate degree program can be accepted to the Master's degree program on this
campus. Many students obtain their undergraduate degrees from UWMadison and complete their Master's degree and licensing requirements at another institution.

\section*{MAJOR REQUIREMENTS}

Complete all the courses listed below. At least 15 credits of upper-level major coursework (courses number 300-699) must be taken in residence on the UW-Madison campus for graduation.

Students must complete the three "gateway" courses-CS\&D 201, CS\&D 202, and CS\&D 240-to be eligible for admission. Prospective applicants typically begin taking the three-course "gateway" sequence as sophomores. A grade point average of 3.0 or better must also be earned across these three courses the first time these courses are attempted.
\begin{tabular}{llr} 
Code & Title & Credits \\
CS\&D 201 & \begin{tabular}{l} 
Anatomy and Physiology of Speech \\
Production
\end{tabular} & 3 \\
CS\&D 202 & Normal Aspects of Hearing & 3 \\
CS\&D 210 & Neural Basis of Communication & 3 \\
CS\&D 240 & \begin{tabular}{l}

Development
\end{tabular} & 3 \\
CS\&D 318 & \begin{tabular}{l} 
Voice, Craniofacial, and Fluency \\
Disorders
\end{tabular} & 3 \\
CS\&D 320 & \begin{tabular}{ll} 
Introduction to Audiology
\end{tabular} & 3 \\
CS\&D 371 & \begin{tabular}{l} 
Pre-Clinical Observation of Children \\
and Adults
\end{tabular} & 3 \\
CS\&D 425 & Auditory Rehabilitation & 3 \\
CS\&D 440 & \begin{tabular}{l} 
Child Language Disorders,
\end{tabular} & 3 \\
& Assessment and Intervention & 3
\end{tabular}

\section*{DISCIPLINE-RELATED COURSEWORK}

The Communication Sciences and Disorders program requires both major and related coursework. Related coursework is mandatory, but not considered part of the major or calculated into the major grade point average. This coursework may be used to satisfy Liberal Studies requirements, if appropriate.

Note: The American Speech-Language-Hearing Association (ASHA) standards now specify that a course in each of the following areas is required for ASHA certification.
- Biological sciences
- Physical sciences (chemistry or physics)
- Statistics
- Social/behavioral sciences
\begin{tabular}{llr}

Additional Education Coursework
Select 3 credits in School of Education electives. Required School of Education courses may not be applied toward this requirement.

\section*{ELECTIVE COURSEWORK}

Select additional coursework to reach the minimum of 120 credits.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS

Requirements below are based on UW-Madison coursework.
- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average in all major coursework
- 2.75 cumulative grade point average in all upper-level (300699) major coursework
- 2.75 cumulative grade point average in all education coursework
- Major Residency. Degree candidates must complete at least 15 credits of upper-level major coursework (300-699) in residence on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus. Practicum work is considered part of the 30 credits.
- 40-Credit Rule. Students may not count more than 40 credits from one department within the 120 degree credits needed for graduation. For example, if 42 credits of coursework have been completed from the Department of Communication Sciences and Disorders, the student will need 122 credits to graduate. CS\&D 110 does not count toward the 40 credits.
- 120 credits required for graduation.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{ADDITIONAL INFORMATION REGARDING CERTIFICATION}

A Master's degree in Speech-Language Pathology (Communication Sciences and Disorders) is required to work as a public school speechlanguage pathologist in Wisconsin, and most states. The Master's degree prepares graduates to function competently and independently in public school programs, hospitals, rehabilitation centers, birth-to-three programs, or clinics. At UW-Madison the Bachelor of Science degree can be earned in the School of Education and the Master's degree is earned in the Department of Communication Sciences and Disorders, part of the College of Letters \& Science. Student teaching and other professional education courses will be taken while earning the Bachelor's and Master's degrees. Not all students who apply for admission can be accepted into the Master's degree program.

For detailed information about the Master's program, see the Communication Sciences \& Disorders Guide page (http://guide.wisc.edu/ graduate/communication-sciences-disorders/communication-sciences-disorders-ms/) and the departmental website (https://csd.wisc.edu/ masters/).

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Ability to successfully integrate subject knowledge and pedagogy knowledge flexibly in authentic situations through field experiences with secondary students under the supervision of highly qualified, experienced teachers and university supervisors.
2. Students will be prepared for recommendation for initial licensure in the state of Wisconsin and beyond in accordance with state standards.

\section*{FOUR-YEAR PLAN}

Communication Sciences and Disorders: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{ADVISING AND CAREERS}

\section*{COMMUNICATION SCIENCES} AND DISORDERS ADVISING

Students must consult with an undergraduate advisor in the Department of Communication Sciences and Disorders (Goodnight Hall, 1975 Willow Drive) as soon as a decision has been made to major in this field. Course sequencing in the major is not flexible-certain courses are requisites to others, and many courses are offered only once a year. Please visit the department's website (https://csd.wisc.edu/undergraduate.htm) for details on advising and advisors.

Students should also consult with advising staff in the School of Education Student Services office, see below. Current students can schedule a Student Services appointment online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.
CAREER ADVISING IN THE SCHOOL OF EDUCATION
The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with real-
world application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the program can be found on the Communication Sciences and Disorders (https:// csd.wisc.edu/directory/) or Curriculum and Instruction (http:// ci.education.wisc.edu/) departmental websites.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{EARLY CHILDHOOD EDUCATION, MINOR}

Students with a special interest in teaching young children should consider this minor, which leads to certification from birth through grade 3.

The Early Childhood Education (ECE) minor was designed to be completed in tandem with the Elementary Education: Kindergarten through Grade 9 (p. 1627) certification program; only students completing the K-9 option may declare this minor.

\section*{HOW TO GET IN}

This minor may be completed only by students admitted to the Kindergarten - Grade 9 (p. 1627) named option of Elementary Education (p. 1618).

\section*{REQUIREMENTS}

Complete the following course work in addition to the degree requirements of Elementary Education. Certification in Early Childhood requires the completion of the Elementary Education degree program.
The three requirements listed here will also fulfill the 6 credits of electives required for Elementary Education.
\begin{tabular}{llr} 
Code & Title & Credits \\
CURRIC 660 & \begin{tabular}{l} 
Foundations of Early Childhood \\
Education
\end{tabular} & 3 \\
CURRIC 663 & \begin{tabular}{l} 
Learning Environments for Initial \\
Education Programs
\end{tabular} & 3 \\
\begin{tabular}{ll} 
Complete 3 credits of Elementary Education K-9 program \\
electives, excluding these two required courses 1
\end{tabular} & 3 \\
\hline
\end{tabular}

\section*{Total Credits}

1
Not required if completing both Early Childhood and English as a Second Language minors.

\section*{EARTH SCIENCE, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (studentservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 24 credits from the following departments: Astronomy (http://guide.wisc.edu/courses/astron/), Atmospheric and Oceanic Sciences (http:// guide.wisc.edu/courses/atm_ocn/), Geoscience (http://guide.wisc.edu/courses/geosci/), and Geography (http:// guide.wisc.edu/courses/geog/). Only Geography courses designated as Physical Science may be used toward the minor requirements. At least 10 credits of the 24 credits must be numbered 200 or above. A minimum 2.75 grade point average is required, based on all UW-Madison coursework included in this minor.

\section*{ECONOMICS, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Economics is housed in the College of Letters \& Science. Students may wish to consult with an economics undergraduate advisor to discuss course selection and other issues related to this field of study. Academic advising (https://econ.wisc.edu/undergraduate/ academic-advising/) is available in Room 7238 of the Social Science Building. Email: econadvise@ssc.wisc.edu. (econadvise@ssc.wisc.edu)

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

The Economics minor requires a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all Economics minor coursework taken on the UW-Madison campus.

Students completing the Economics minor must complete at least one semester of calculus. Mathematics coursework may be applied toward the liberal studies requirement.
Code
Introduction to Microeconomics and
Macroeconomics \(\quad\) Credits
```

ECON/ The Economics of Health Care
POP HLTH/
PUB AFFR 548

If needed, additional Economics coursework to reach the minimim of \(\mathbf{2 4}\) credits.

\section*{ELEMENTARY EDUCATION, BSE}

The University of Wisconsin-Madison Elementary Education Program prepares teachers to foster high academic achievement in all students. Schools are places that can both increase equity and perpetuate injustice - ideas our students tackle as they learn to navigate the challenges and joys of teaching. Our graduates become teacher leaders committed to advancing justice through classroom practices, personal interactions, and community engagement. We teach research-based practices that keep teachers growing throughout long careers in education.

Practical, hands-on experience is built into our curriculum. At UWMadison, our students learn to teach through exhilarating coursework, supervised field experiences at multiple grade levels, communitybased experiences, rigorous self-examination, and authentic learning experiences. We are training teachers to recognize, appreciate and value the wide range of gifts diverse students bring to our increasingly multicultural, globally connected, and morally complex world.
"My instructors play a huge role in helping me become the person that I am today. They value who I am as a person and a learner, and through their influences and passion for teaching students of color, I have been inspired to do the same."
- Mai Ya Her, UW-Madison

Elementary Education

\section*{CERTIFICATION OPTIONS}

Students interested in Elementary Education can pursue one of five dynamic certification options that lead to related, yet different, career paths. All certification options are designed to be completed in four semesters after program admission. Students are admitted once a year in the summer and begin a four-semester professional sequence in the fall.
- Kindergarten through Ninth Grade - Students completing this core program option will be certified to teach general education at the grade levels of \(\mathrm{K}-9\) and will also be eligible to teach in a \(4 K\) classroom.
- English as a Second Language (ESL) K-12 (p. 1640) and Kindergarten through Ninth Grade (p. 1627) - A minor in English as a Second Language can be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for \(4 K\) ) and English as a Second Language in grades K-12.
- Early Childhood Education (ECE) (p. 1616) and Kindergarten through Ninth Grade (p. 1627) - A minor in Early Childhood can also be added to the core K-9 program. Students selecting this combination will be certified to teach general education at the grade levels of K-9 (including eligibility for 4 K ) and in Early Childhood Education from birth through Grade 3.
- Kindergarten through Ninth Grade (p. 1627), and Early Childhood Education (p. 1616), and English as a Second Language K-12 (p. 1640) - Students may opt to complete both the ECE and ESL minors in combination with K-9 certification. Successful students receive certification in all three areas: general education in grades K-9 (including eligibility for 4 K ), Early Childhood Education from birth through Grade 3, and English as a Second Language in grades K-12.
- Kindergarten through Ninth Grade and Special Education K-12 (Dual Certification) (p. 1742) - Students interested in both Elementary and Special Education should investigate the new Elementary Education and Special Education degree housed in the Department of Rehabilitation Psychology and Special Education. Upon completion, students are certified in general education at the grade levels of \(\mathrm{K}-9\) (including eligibility for 4 K ), and Special Education in grades K-12.

\section*{THE TEACHER PLEDGE}

The School of Education at UW-Madison currently offers a unique financial opportunity for students in the Elementary Education program called The Teacher Pledge (https://tec.education.wisc.edu/teacher-pledge/). The school pledges to pay the equivalent of in-state tuition and fees for all teacher education students. In return, students pledge to work at a Wisconsin PreK-12 school for three to four years after graduation.

\section*{MADISON COLLEGE TRANSFER AGREEMENT}

Madison College students should also investigate the new transfer agreement (https://tec.education.wisc.edu/become-a-teacher/uw-madison-school-of-education-transfer-agreement/) between Madison College and UW-Madison. Students meeting the requirements of this agreement are guaranteed admission to UW-Madison's School of Education and to Elementary Education.

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

Students are admitted to the program once a year, effective in the summer. Selection is made the previous spring and students begin a foursemester professional sequence in the subsequent fall semester.

\section*{ENTERING THE SCHOOL OF EDUCATION}

\section*{NEW AND CURRENT UW-MADISON STUDENTS}

New freshmen and transfer students interested in Elementary Education are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in Elementary Education receive the "pre-professional" classification of PRE.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/). A
minimum GPA of 2.5, based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. 1620)). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651 or email soeacademicservices@education.wisc.edu.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person, via telephone or online; to schedule, call 608-262-1651 or email soeacademicservices@education.wisc.edu.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1539).

\section*{APPLICATION AND ADMISSION}

Certification to teach Elementary Education requires that a student be admitted into the professional part of the degree program. Admission into the Elementary Education program occurs once a year, effective for summer following selection.

The Elementary Education program faculty selects candidates based on a variety of criteria. In particular they seek individuals who can demonstrate academic competence, multicultural and interpersonal competence, and reflective practices; the program also purposefully cultivates students' capacities in these domains.

\section*{PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS}

Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants should
consult the School of Education's Undergraduate Admissions page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

\section*{To be eligible for admission to the professional program, applicants must:}
- submit completed program application form(s), transcripts, and all other related application materials by the application deadline specified on the School of Education's Undergraduate Admissions page.
- successfully complete at least 40 transferable college-level credits by the end of the fall semester before application.
- complete RP \& SE 300 Individuals with Disabilities by the end of the summer before beginning the professional sequence if applying to the K-9/Special Education Dual Major option.
- While GPA is a factor in the selection process, no minimum is required to apply for program admission. If admitted, students must earn the minimum cumulative GPA for UW-Madison coursework established by the program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

For programs requiring a minimum GPA to apply, two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information regarding this rule is available here (p. 1539).

\section*{PROGRAM ADMISSION SELECTION CRITERIA}

The Elementary Education program admissions procedures are intended to result in an academically qualified student body that is diverse in terms of both academic strengths and life experiences and has a commitment to providing the best possible education to elementary and middle school students. Having students with diverse life experiences, backgrounds and attitudes is critical if faculty are to prepare students to teach in schools that themselves have diverse enrollments. Faculty will accept only those students judged to have the potential to be successful in the academically challenging Elementary Education Program. In making admissions decisions, no factor will outweigh judgment that a particular applicant's credentials, taken as a whole, represent unacceptably high academic risk.

\section*{The Admissions Committee will take the following into consideration when making admissions decisions: Academic Competence \\ The Mission Statement of the Elementary Education Area points to the role that our graduates have in creating academically rigorous classrooms that lead to high academic achievement in all students. For elementary and middle schools to promote academic achievement, elementary and middle school teachers must have demonstrated high levels of success in core disciplines throughout their university studies. Therefore, program faculty expect that}
students admitted to the program will have demonstrated high levels of academic preparation.

\section*{Multicultural and Interpersonal Competencies}

The Elementary Education program's mission is to prepare teachers who are able to promote academic achievement in all elementaryschool and middle-school students. This includes those from diverse races, cultures, language backgrounds, family forms, and sexual orientations, as well as those from diverse economic, gender, and ability groups. The program faculty seek prospective teachers who will demonstrate both commitment to this mission and the prospect of contributing to it. The Admissions Committee will therefore examine the materials from each candidate for evidence of such commitment and prospect.

\section*{Reflective Competence}

To have performed at high academic levels or to have had diverse life experiences is not adequate for admissions purposes unless these are accompanied by evidence that the applicant has been able to reflect on and learn from them. Demonstration of reflective competence is important as it likely contributes to one's interpersonal skills as well as to the qualities such as integrity, social awareness, and cultural sensitiveness that are qualities of a wellrounded human being who will be an excellent elementary or middle school teacher. The ability to reflect on one's life experiences is one factor that will allow the Admissions Committee to look for evidence that our students will be reflective practitioners who evaluate the effects of their assumptions, choices, and actions on others (students, parents, and other professionals in the learning community) and who will actively seek out opportunities to grow professionally.

\section*{CRIMINAL BACKGROUND INVESTIGATION}

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Teacher Education Center, tec@education.wisc.edu, (tec@education.wisc.edu) about the potential impact of this result on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world.

Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies \\ Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.}

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

\section*{Complete Liberal Studies Electives (p. 1547) to total 40 Credits. \\ PROGRAM STRUCTURE \\ Students of Elementary Education:}
- Are exposed to a broad range of academic disciplines through liberal studies course work. The university-wide General Education requirements also encourage this breadth of study.
- Examine schools' relationship to society, the development of children and adolescents, and the processes of learning in their education course work.
- Study teaching methods and gain experience in schools through supervised field placements during their four-semester professional sequence.
- Complete elective coursework to reach the minimum of 120 credits required for the degree.

Practicum experiences provide a school-based setting for students to develop their professional and classroom skills. These experiences generally begin a few weeks after the start of the semester and are approximately nine weeks in length. Students will usually spend three half-days at their assigned schools. Concurrent registration in methods courses provide students with an opportunity to learn about, and then apply, teaching techniques in a classroom.

The full-semester student teaching assignment is the capstone experience of the professional sequence. Through it students expand upon the activities, responsibilities and expectations encountered during the practicum experiences. Student teachers will function as regular staff members in their assigned schools and also attend a seminar on campus one afternoon each week. Student teachers are required to follow the school day, school calendar, vacation days and policies of the school where they work.

\section*{PROGRAM OPTIONS - SELECT ONE \\ View as listView as grid}

\author{
ELEMENTARY EDUCATION: EARLY CHILDHOOD/ENGLISH AS A SECOND LANGUAGE (P. 1626) \\ - ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE (P. 1627) \\ - ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE/SPECIAL EDUCATION KINDERGARTEN - 12TH GRADE DUAL CERTIFICATION (P. 1632) \\ - ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/CONTENT-FOCUSED MINOR (P. 1634) \\ - ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ENGLISH AS A SECOND LANGUAGE (P. 1636) \\ ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/SPECIAL EDUCATION DUAL CERT (P. 1638)
}

\section*{ELECTIVE COURSEWORK}

Complete additional courses as necessary to reach the minimum of 120 credits required for the degree.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS-REQUIRED FOR ALL PROGRAM OPTIONS GRADUATION REQUIREMENTS \\ Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UWMadison. The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW-Madison coursework.}
- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- 2.75 cumulative grade point average in the minor, if required.
- Minimum 120 credits (degree candidates only).
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300-699) in residence on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus. Student teaching and practicum are considered part of the 30 credits.

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (http://guide.wisc.edu/ undergraduate/education/curriculum-instruction/elementary-bse/ \#certificationlicensuretext)

\section*{UNIVERSITY DEGREE REQUIREMENTS}

\footnotetext{
Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

\end{tabular}

\section*{LEARNING OUTCOMES}
1. Create and implement developmentally appropriate and challenging learning experiences that reflect high expectations for every learner, supporting learners to (1) develop deep understanding of content areas and their connections, and (2) apply understanding in meaningful ways.
2. Select and/or create and sequence individually supportive and challenging learning experiences that reflect knowledge of individual learners, curriculum, pedagogies, and relevance to all learners and their families.
3. Use a variety of teaching strategies, and evidence-based technologies and information resources to engage learners in meaningful learning activities that lead to content knowledge, critical thinking, creativity, innovation, self-evaluation, and self-directed learning. Use evidence to continually evaluate the effectiveness of these practices, and adjust these as needed to improve learner outcomes.
4. Collaborate with others to create supportive, inclusive, linguistically responsive, and safe learning environments that help all learners meet high standards and reach their full potential.
5. Choose, modify, and/or create multiple forms of unbiased formative and summative assessments to measure each learner's progress toward instructional goals. Use assessment data gathered to respond to each learner's strengths and needs in relation to short and longterm goals. Reflect on and justify planning decisions and ground one's justifications in knowledge of learners, development, curriculum, pedagogies, and resources.
6. Use studies completed in science and mathematics, social sciences, the humanities, histories, languages, and the arts to inform and deepen their teaching of content areas and meeting learners' needs.

\section*{FOUR-YEAR PLAN}

Refer to the available named options for more information on the fouryear plans.

\section*{ADVISING AND CAREERS}

\section*{ELEMENTARY EDUCATION ADVISING}

\footnotetext{
Students not yet admitted to Elementary Education meet with their assigned advisor in the School of Education Student Services office, see
}
below. Students are assigned an additional departmental advisor when admitted to the professional component of their degree program

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Curriculum and Instruction can be found on the department's website. (http://ci.education.wisc.edu/)

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{ELEMENTARY EDUCATION AND THE WISCONSIN EXPERIENCE}

Field Experiences - Students in the elementary education program have multiple field experiences in PreK-12 schools, culminating in a full-time student teaching experience following the semester of the cooperating school.

Partnering with Community Organizations - The elementary education team partners with area communities to assist with food delivery to families. Students volunteer with Girls on the Run (https:// www.girlsontherunscwi.org/), a program designed to inspire girls of all abilities to embrace their inner strength and to build healthy social, emotional, and physical skills.

Guest Speakers - The department brings in speakers from the Madison Metropolitan School District's Restorative Justice, Welcoming Schools, and Mental Health and Wellness teams. Justice Everett Mitchell speaks to students about disrupting the Preschool to Prison pipeline, and Rudy Bankston has shared his story and his thoughts on teaching for social justice. The elementary education team partners with PBS Wisconsin by inviting guest speakers to share technology and teaching resources.

Seeking Out Community Experiences - We encourage our students to venture outside the classroom and get to know the families and communities of their pupils by attending a community activity such as a worship service or a community potluck. Students spend time in and around the attendance area of their schools to develop an understanding
of the places, people, spaces, and experiences that influence their pupils and consequently are brought to school.

Field Trips - While completing field experiences, students enjoy trips to places in the Madison community, such as the Madison Children's Museum (https://madisonchildrensmuseum.org/), Madison Public Library's Play Lab (https://www.madisonpubliclibrary.org/kids/playlab/), Allen Centennial Garden (https://allencentennialgarden.wisc.edu/), Centro Hispano (https://www.micentro.org/) and the Madison Literacy Network (https://www.litnetwork.org/).

Study Abroad - Our students are encouraged to explore cultures other than their own by participating in one of Curriculum \& Instruction's exciting new study abroad (https://studyabroad.wisc.edu/) programs. The department offered two summer options in 2023, a 3-week summer course entitled, "Diversity and Community in the Galapagos Islands," and a 4-week class, "Social Foundations of Learning in Uganda."

\section*{Additional Certifications, Majors, Minors, and Certificates -} Many students in the K-9 elementary education program also complete programs in other areas of interest. Certification minors in Early Childhood Education and/or English as a Second Language can be combined with the core K-9 program. The most popular additional majors are in Spanish, Environmental Studies, Education Studies, Psychology, and History. Certificates in Educational Policy Studies, Disability Rights and Services, Chican@ and Latin@ Studies and Environmental Studies are very popular, as are minors in Social Studies, English Language Arts, Math, and Science. These options complement the skills and knowledge acquired through elementary education coursework.

Student Clubs and Organizations - Elementary education students have multiple opportunities to participate in related organizations and activities such as Aspiring Educators of Wisconsin (https:// www.facebook.com/AspiringEducatorsUWMadison/) and Game Design and Development (https://games.education.wisc.edu/lab/).

\section*{CERTIFICATION/LICENSURE}

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS}

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Teacher Education Center (https:// tec.education.wisc.edu/current-students/).

\section*{APPLYING FOR A TEACHING LICENSE}

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all
certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

\section*{LICENSING LEVELS}

The following licensing options will be offered at UW-Madison.
- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education. The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Secondary Education program areas will license in their subject area Grades 4 through 12, and also in English as a Second Language Kindergarten through Grade 12.
- World Language Education program areas will license at the Kindergarten through Grade 12 level.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level
- Health and Library Media Specialist both license at the Kindergarten through Grade 12 level.
- Communication Sciences and Disorders (Speech-Language Pathology) will license at the K-12 level.

\section*{WISCONSIN STATE LICENSING}

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \(\$ 125\). An online license application is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/ elo/). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/licensing/ fingerprint/electronic-submission/).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UWMadison teacher certification students, the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW-Madison requires that
1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

\section*{LICENSING OUTSIDE OF WISCONSIN}

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (https://education.uky.edu/accreditation/certification/ states/) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW-Madison certification officer. This form verifies that a stateapproved licensing program has been completed. These forms should be sent to the School of Education Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, lowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming; District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\title{
ELEMENTARY EDUCATION: EARLY CHILDHOOD/ ENGLISH AS A SECOND LANGUAGE
}

Admissions to the Elementary Education: Early Childhood/English as a Second Language, BSE have been suspended as of summer 2023 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

\section*{REQUIREMENTS}

The Early Childhood/English as a Second Language option prepares teachers to work at the preschool and primary levels (approximately birth through age 8). Students are also certified in English as a Second Language at the Early Childhood level. Admitted students begin the foursemester professional sequence in the fall after admission.

The option coursework listed here is one component of the Elementary Education, BSE degree (p. 1620) requirements.

\section*{Environmental Education Requirement}

Select one Environmental Studies (http://guide.wisc.edu/courses/ envir_st/) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

\section*{Environmental Education courses}

\section*{FOUR-YEAR PLAN}

\section*{Elementary Education: Sample Four-Year Plan}

\section*{Early Childhood/English as a Second Language Option}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Total Credits 120

\section*{ELEMENTARY EDUCATION: KINDERGARTEN - 9TH GRADE}

\section*{REQUIREMENTS}

The core program in Elementary Education requires 60 credits of professional coursework in addition to other degree requirements. Students are certified to teach kindergarten through grade 9 (K-9) and can also teach at the 4 K level.

The option coursework listed here is one component of the Elementary Education, BSE degree (https://guide.wisc.edu/undergraduate/ education/curriculum-instruction/elementary-education-bse/ \#requirementstext) requirements.

\section*{PROFESSIONAL SEQUENCE}

The professional coursework was designed to be completed in four semesters, starting in the fall after admission to the program. Each semester of the sequence must be followed sequentially and taken in consecutive semesters unless a modification is approved. Most classes must be taken during specified semesters, while the scheduling of other
requirements is more flexible; some may be completed prior to beginning the sequence.

\section*{School}
or CURRIC 454 Student Teaching in the Middle School
1
May be taken before semester 1 of the professional sequence, including prior to program admission.
2
May be taken any time before semester 4 of the professional sequence, including prior to program admission. Enrollment in either ED POL 300 or ED POL/HISTORY 412 can follow this schedule.

\section*{ELECTIVE COURSES}

The professional sequence includes 6 credits selected from the following options. Additional courses that expand a student's skill set or further a student's knowledge as a future teacher may also be considered to meet this requirement. Contact the Elementary Education Program Manager for approval prior to enrolling in additional courses. The frequency in which the listed courses are offered can vary based on teaching schedules as well as student interest.

\section*{CONTENT AREA MINOR (OPTIONAL REQUIREMENT)}

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, but students will not receive an additional certification in the subject area. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. Choose from the links below for more details about the requirements of each minor.

\section*{Minor Options}
- Biology (p. 1608)
- Chemistry (p. 1610)
- Earth Science (p. 1617)
- Economics (p. 1617)
- English (p. 1642)
- English Language Arts (p. 1640)
- Geography (p. 1644)
- History (p. 1646)
- Mathematics (p. 1654)
- Mathematics and Science Dual (p. 1651)
- Mathematics Specialized (p. 1653)
- Physics (p. 1654)
- Political Science (p. 1655)
- Psychology (p. 1659)
- Science Specialized (p. 1660)
- Social Studies (p. 1660)
- Sociology (p. 1670)

\section*{ADDITIONAL CERTIFICATION OPTIONS IN ELEMENTARY EDUCATION}

Students interested in Early Childhood Education (birth-Grade 3) and/ or English as a Second Language (grades K-12) may earn certification in these areas along with the completion of the K-9 program. It is also possible to combine K-9 Elementary Education with K-12 Special Education certification through the completion of this named option (p. 1632).

The Early Childhood Education (ECE) certification minor (p. 1616) requires an additional 6 credits of required coursework, CURRIC 660 Foundations of Early Childhood Education, CURRIC 663 Learning Environments for Initial Education Programs, and only 3 credits of K-9 electives for a total of 63 credits. The K-9 professional sequence listed above will be modified to accommodate the ECE minor; see the ECE/K-9 Four Year Plan (p. 1629) for this sequence.

\begin{abstract}
The English as a Second Language (ESL) certification minor ( \(p\). 1640) requires an additional 9 credits of required coursework, CURRIC 311 Language Acquisition and Use In and Out of Schools, CURRIC 338 The Language of Schooling, CURRIC 316 ESL/Bilingual Methods, and only 3 credits of K-9 electives for a total of 66 credits. The K-9 professional sequence listed above will be modified to accommodate the ESL minor; see the ESL/K-9 Four Year Plan (p. 1629) for this sequence.
\end{abstract}

\section*{Certification in both Early Childhood Education and English as a}

Second Language requires the completion of the five additional required ECE and ESL courses listed above. These courses will fulfill the entire K-9 electives requirement for a total of 69 credits. The K-9 professional sequence listed above will be modified to accommodate both minors; see the ECE/ESL/K-9 Four Year Plan (p. 1629) for this sequence.

Certification in both K-9 Elementary Education and K-12 Special
Education requires the completion of the Kindergarten - 9th Grade/ Special Education Kindergarten - 12th Grade Dual Certification named option (p. 1632); 70 credits are required.

\section*{FOUR-YEAR PLAN}

\section*{Elementary Education: Sample Four-Year Plans}

These sample four-year graduation plans reflect the certification options available to students completing a degree in Elementary Education. A plan is included for:
- Kindergarten - Grade 9 Certification
- Early Childhood Education/Kindergarten - Grade 9 Certifications
- English as a Second Language/Kindergarten - Grade 9 Certifications
- English as a Second Language/Early Childhood Education/ Kindergarten - Grade 9 Certifications
- Special Education Kindergarten - Grade 12/Kindergarten - Grade 9 Certifications

Four-year plans are designed to guide your course selection throughout your academic career; they do not establish a contractual agreement. Use them along with your DARS report and Course Search and Enroll to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

May be taken before semester 1 of the professional sequence, including prior to program admission.
A minimum of 120 credits is still required to complete the degree.

\section*{CONTENT AREA MINOR (OPTIONAL REQUIREMENT)}

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, but students will not receive an additional certification in the subject area. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. For more details about the requirements of each minor, choose from the links below.

\section*{Minor Options}
- Biology (p. 1608)
- Chemistry (p. 1610)
- Earth Science (p. 1617)
- Economics (p. 1617)
- English (p. 1642)
- English Language Arts (p. 1640)
- Geography (p. 1644)
- History (p. 1646)
- Mathematics (p. 1654)
- Mathematics and Science Dual (p. 1651)
- Mathematics Specialized (p. 1653)
- Physics (p. 1654)
- Political Science (p. 1655)
- Psychology (p. 1659)
- Science Specialized (p. 1660)
- Social Studies (p. 1660)
- Sociology (p. 1670)

\section*{FOUR-YEAR PLAN}

\section*{Elementary Education}

\section*{Kindergarten - 9th Grade/Special Education K-12 Dual Certification}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and Course Search and Enroll to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Total Credits 120}

1
May be taken before semester 1 of the professional sequence, including prior to program admission.
A minimum of 120 credits is still required to complete the degree.

\section*{ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/CONTENTFOCUSED MINOR}

Admissions to the Elementary Education: Middle Childhood through Early Adolescence/Content-Focused Minor have been suspended as of summer 2023 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

REQUIREMENTS

The Middle Childhood-Early Adolescence/Content Focused Minor option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12-13). Admitted students begin the foursemester professional sequence in the fall after admission. Students complete a content area minor that may lead to licensing in that subject.

The option coursework listed here is one component of the Elementary Education, BSE degree (p. 1620) requirements.

\section*{Environmental Education Requirement}

Select one Environmental Studies (http://guide.wisc.edu/courses/ envir_st/) course or from the following list. If appropriate, this course may also be applied toward the liberal studies requirements.

Environmental Education courses
\begin{tabular}{llr} 
Code & Title & Credits \\

\end{tabular}

\section*{Fine Arts}

Select 6 credits of fine arts coursework. These credits may also be applied toward the liberal studies requirement. See a list of fine arts courses under liberal studies (p. 1547).

\section*{Mathematics for Elementary Teachers}
\begin{tabular}{llr} 
Code & Title & Credits \\
CURRIC 319 & Pedagogical Content Knowledge for & 3 \\
& Teaching Elementary Mathematics 1 & \\
CURRIC 320 & Pedagogical Content Knowledge for & 3 \\
& Teaching Elementary Mathematics 2 &
\end{tabular}

1
Students with college-level calculus coursework or advanced placement credit should see the exemption rules (http://www.math.wisc.edu/~lempp/ Exemptionsfor130-32.htm) for this coursework. More detailed information (http://www.math.wisc.edu/~lempp/educ.html) about these courses is available on the math department website.

\section*{Education Coursework}

Code Title Credits
Child and Adolescent Development 3-6
Select one option:
\begin{tabular}{ll} 
ED PSYCH 331 & \begin{tabular}{l} 
Human Development From \\
Childhood Through Adolescence
\end{tabular} \\
ED PSYCH 320 & Human Development in Infancy and \\
\& ED PSYCH 321 & \begin{tabular}{l} 
Childhood \\
and Human Development in
\end{tabular} \\
& Adolescence \({ }^{1}\)
\end{tabular}

Foundations of the Profession
Select 6 credits of coursework numbered below 600 from the Educational Policy Studies department.

Recommended courses include:
ED POL 300 School and Society
\begin{tabular}{ll} 
ED POL/ & History of American Education \\
HISTORY 412 & \\
ED POL 500 & \begin{tabular}{l} 
Topics on Social Issues and \\
Education
\end{tabular}
\end{tabular}

1
With permission, PSYCH 460 Child Development (formerly 560) may be substituted for ED PSYCH 320 Human Development in Infancy and Childhood. Students are strongly encouraged to complete this requirement before program admission.

\section*{Minor Requirement: Elementary Education}

Elementary Education majors choosing the Content Focus option are required to complete a minor area of study that will lead to Wisconsin licensing in English Language Arts, Mathematics, Science or Social Studies. Students can select from the minors listed below or complete the equivalent Letters \& Science major in the subject area. For more details about the requirements of each minor, choose from the links below.
- Biology (p. 1608)
- Chemistry (p. 1610)
- Earth Science (p. 1617)
- Economics (p. 1617)
- English (p. 1642)
- English Language Arts (p. 1640)
- Geography (p. 1644)
- History (p. 1646)
- Mathematics (p. 1654)
- Mathematics and Science Dual (p. 1651)
- Mathematics Specialized (p. 1653)
- Physics (p. 1654)
- Political Science (p. 1655)
- Psychology (p. 1659)
- Science Specialized (p. 1660)
- Social Studies (p. 1660)
- Sociology (p. 1670)

\section*{Professional Sequence}

Admitted students complete a four-semester sequence of professional courses. Effective fall, 2018, admitted students will begin the foursemester professional sequence in the fall after admission instead of the spring semester. Professional sequence coursework listed here may be reordered slightly as part of this transition. Each semester of the sequence must be followed sequentially and taken in consecutive semesters.

\section*{FOUR-YEAR PLAN}

\section*{Elementary Education: Sample Four-Year Plan}

Middle Childhood through Early Adolescence/Content Focused Minor Option

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Note: Courses selected taken to meet liberal studies, Environmental Education and minor requirements may overlap and be applied to more than one requirement. Most minors require 24 credits; the plan reflects this number.

\section*{Freshman}

\section*{ELEMENTARY EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/SPECIAL EDUCATION DUAL CERT}

Admissions to the Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert, BSE have been suspended as of summer 2023 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

\section*{REQUIREMENTS}

The Middle Childhood-Early Adolescence/Dual Elementary and Special Education option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12-13). Students are certified in both Special Education and Elementary Education at the Middle Childhood-Early Adolescence levels. Admitted students begin the four-semester professional sequence in the fall following admission.

The option coursework listed here is one component of the Elementary/ Special Education, BSE degree (p. 1620) requirements.

\section*{RP \& SE 300 Individuals with Disabilities-Admission Prerequisite}

This course must be completed prior to beginning the professional sequence.

\section*{Code \\ Title \\ Credits}

\section*{FOUR-YEAR PLAN}

Elementary Education: Sample Four-Year Plan
Middle Childhood - Early Adolescence/ Special Education Dual Certification Option

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\title{
ENGLISH AS A SECOND LANGUAGE, MINOR
}

Ms. Yang's Class, by Jerry Jordan

Students with a special interest in teaching English language learners should consider this minor, which leads to certification in English as a Second Language (ESL) from kindergarten through grade 12.

The ESL minor was designed to be completed in tandem with the Elementary Education: Kindergarten through Grade 9 (p. 1627) certification program; only students completing the K-9 option may declare this minor

\section*{HOW TO GET IN}

This minor may be completed only by students admitted to the Kindergarten - Grade 9 (p. 1627) named option of Elementary Education (p. 1618).

\section*{REQUIREMENTS}

Complete the following course work in addition to the degree requirements of Elementary Education. Certification in English as a Second Language, Kindergarten through Grade 12 requires the completion of the Elementary Education degree program. The four requirements listed here will also fulfill the 6 credits of electives required for Elementary Education.
\begin{tabular}{llr} 
Code & Title & Credits \\
CURRIC 338 & The Language of Schooling & 3 \\
CURRIC 311 & \begin{tabular}{l} 
Language Acquisition and Use In \\
\\
and Out of Schools
\end{tabular} & 3 \\
CURRIC 316 & ESL/Bilingual Methods & 3 \\
Complete 3 credits of Elementary Education K-9 program \\
electives, excluding these three required courses.
\end{tabular}

Total Credits

\section*{1}

Not required if completing both ESL and Early Childhood minors.

\section*{ENGLISH LANGUAGE ARTS, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to
teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

The English Language Arts minor requires the completion of 24 credits to include the requirements of each group of courses. A minimum cumulative grade point average of 2.75 is required, based on all UW-Madison coursework included in the minor.

The courses listed here will meet the requirements in each category, but additional courses can be considered.

\section*{INTRODUCTORY LITERATURE}

Complete two introductory literature courses. Courses with a Literature breadth designation from many departments-e.g., Comparative Literature, Classics, African Languages and Literature, English, or Theatre -may be selected to meet this requirement.

\section*{INTERNATIONAL LITERATURE}

Select one course from the following:

\section*{ENGLISH, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of English is housed in the College of Letters \& Science. Students may wish to consult with an undergraduate advisor in English (https://english.wisc.edu/undergraduate/undergraduate-advising/) to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

The English minor requires the completion of 24-30 credits to include the coursework listed below. A minimum cumulative grade point average of 2.75 is required, based on all UW-Madison coursework included in the minor.

Note: Six credits of introductory literature must be completed prior to enrolling in coursework required for the English minor. Courses with an Literature breadth designation from many departments-e.g., Comparative Literature, Classical \& Ancient Near Eastern Studies, African Languages and Literature, or Theatre and Drama-may be selected to meet this requirement. Students are encouraged to explore these options, although introductory English department coursework may also be used in this capacity.
\begin{tabular}{llr} 
Code & Title & Credits \\

\hline ENGL 304 & Composition \& Rhetoric In and Beyond the University & \\
\hline Or, select a School of E & in consultation with an advisor in the n Student Services office. & \\
\hline
\end{tabular}

\section*{Additional Credits}

If necessary, select additional coursework to reach the minimum of 24 credits. Introductory literature may be used.

\section*{1}

Students considering a Letters \& Science English major should select a pre-1800, non-Shakespeare literature course.

\section*{2}

Search for Intermediate/Advanced-level courses that are designated as both Literature and Ethnic Studies courses in the enrollment application.

\section*{GAME DESIGN, CERTIFICATE}

\section*{What is game design?}

Game Design is the theory and practice of creating games. We focus on games broadly speaking - puzzles, toys, board games, role-playing, sports, or simply not stepping on the cracks in the sidewalk. Making games offers an opportunity for creative expression, for simulating real-world problems, for positive social change, and for communicating complex ideas about systems and processes.

\section*{What is the Game Design Certificate?}

3 The Game Design Certificate is an interdisciplinary program that gives students from a wide variety of backgrounds the chance to make games. The certificate requires 18-19 credits and is jointly offered by the departments of Curriculum and Instruction, Art, and Computer Sciences. Certificate students work both independently and in small teams to develop a portfolio of board games, video games, and physical spaces. The certificate focuses on creating, testing, and understanding how to design gameplay to be fun and impactful.

\section*{3 What will students gain?}

Students acquire the skills, understanding, and background to create and produce games independently, to develop a body of work, and to gain critical perspectives on games and game design.

\section*{How do I get involved?}

Interested students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, 608-262-1651, or studentservices@wisc.edu (studentservices@education.wisc.edu), to discuss course sequencing, declaring, and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (https://advising.wisc.edu/facstaff/ starfish/starfish-student-resources/) in MyUW.

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

To be eligible to declare the Game Design Certificate, students must complete two courses prior to submitting a certificate declaration. One course is required of all prospective certificate students:
Code
CURRIC 357
Title
Game Design I

\section*{Credits}
3

The second course may be selected by the student from the following options:
\begin{tabular}{llr} 
Code & Title & Credits \\
ART 107 & Introduction to Digital Forms & 3 \\
COMP SCI 200 & Programming I & 3 \\
COMP SCI 220 & Data Science Programming I & 4 \\
COMP SCI 300 & Programming II & 3
\end{tabular}

Students meeting the eligibility criteria who intend to complete the Game Design Certificate may find the declaration form on the School of Education's Certificate Programs (https://education.wisc.edu/academics/ certificates/) page. The declaration for this certificate program can be submitted at any time during the calendar year.

\section*{REQUIREMENTS}

\section*{CERTIFICATE REQUIREMENTS}

The Game Design certificate program includes both required and elective coursework for a minimum of 18 credits. All coursework must be taken for a letter grade. At least 10 credits of the certificate must be earned in residence at UW-Madison.

Students must have an overall 2.5 GPA in Game Design Certificate coursework upon completion of the certificate.
\begin{tabular}{|c|c|c|}

\hline
\end{tabular}

Total Credits

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Utilize the design and technical skills necessary to create games.
2. Discuss the critical and theoretical perspectives necessary to understand the production and reception contexts in/for which they design such games.
```

PEOPLE

```

Information about faculty, staff, and other contributions to the Certificate in Game Design can be found on the Game Lab's website (https:// games.education.wisc.edu/).

\section*{GEOGRAPHY, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to
teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Geography (https://geography.wisc.edu/) is housed in the College of Letters \& Science. Students may wish to consult with academic advisor Joel Gruley, jgruley@wisc.edu, 144 Science Hall, 262-4438, to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

The Geography minor requires a minimum of 24 credits to include GEOG 342 and the required course distribution listed below. Each course may be counted in only one of the groups. Coursework must include at least two upper-level courses, numbered 300-699.

A minimum cumulative grade point average of 2.75 is required, based on all geography minor coursework taken on the UW-Madison campus.

\section*{REQUIRED COURSE}

\section*{Code}

GEOG 342

\section*{Title}

Geography of Wisconsin (Or an acceptable substitute selected in consultation with the undergraduate advisor in the Department of Geography. This course may be also used to fulfill the requirement in Area Studies and Global Systems)

\section*{COURSE DISTRIBUTION REQUIREMENTS}

Complete one course from each of the six groups:

\section*{PHYSICAL GEOGRAPHY: EARTH SYSTEMS AND ENVIRONMENTAL PROCESSES}

Courses address the locational arrangements of earth phenomena and their interaction as physical systems.

\section*{Physical Geography: Earth Systems and Environmental Processes course options}

\section*{Code}

History of the Civil Rights Movement 3

\section*{ELECTIVES}

Complete additional coursework, if necessary, to reach the minimum of 24 credits. It is recommended that students completing the history minor take a one-year continuous course in American history (e.g., HISTORY 101 Amer Hist to the Civil War Era, the Origin \& Growth of the U S and HISTORY 102 American History, Civil War Era to the Present).

\section*{MATHEMATICS AND SCIENCE DUAL, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

\section*{Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.}

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

This minor is intended for Elementary Education majors wishing to enhance their content preparation in mathematics and science. It is particularly suitable for Elementary Education majors who intend to teach mathematics and science in the middle school.

A minimum cumulative grade point average of 2.75 is required, based on all minor coursework taken on the UW-Madison campus.

\section*{MATHEMATICS COMPONENT}

Students will contact a Student Services advisor or the Elementary Education Program Manager (see Contact Information) to choose a 12 credit group of mathematics courses that will
1. Deepen their understanding of the reasoning, problem solving strategies, models, mathematical tools, structures, and principles, which underlie core elementary mathematics topics relevant to K-12 math education and related to fractions and rational numbers, proportional reasoning, measurement, algebraic thinking, Geometry and Measurement, and Algebra and Functions.
2. Develop the important mathematical practices, or habits of mind, that can support the learning of mathematics.

\section*{SCIENCE COMPONENT}

The aim of the science component of this minor is for students to understand science as an intellectual activity. The goals of science and the diverse means by which scientific knowledge is generated and validated should be at the core of the science portion of this minor. Upon its completion, students should have had opportunities to understand some of the most powerful organizing ideas in the various scientific disciplines as well as how those ideas have been and are generated. Such an understanding should provide students with the fundamental tools and outlook necessary to teach the variety of science content typically taught in middle schools.

The committee that developed this science component has indicated that the primary purpose for the minor should be consistent with the goals of a liberal or general education, thus viewing the minor as an extension of the current liberal studies requirement. In addition to the 9 credits of science required for the liberal studies requirement, students completing this minor must also take 9 credits in science for the math-science dual minor. With these \(\mathbf{1 8}\) credits it is possible to provide a minimal level of breadth and depth of science coursework. This minor is also expected to provide Elementary Education program students with a background in the sciences that are most commonly taught at the middle school level.

Complete the following requirements:
- At least 18 credits from the courses listed below. Additional courses can be considered; please consult with an advisor in the School of Education Student Services office, 139 Education Building.
- One course in each of three of the four science areas of biology, chemistry, physics, and earth and space science from the approved list, below. Integrated Liberal Studies 153 does not count in any of the areas, but can count toward the 18 credit total.
- At least 6 credits of coursework from the courses listed below that are not marked with an asterisk (*). Courses with the asterisk are considered to be introductory level courses.

The following courses are approved for inclusion in the science component of the math/science minor:

\end{tabular}

\section*{MATHEMATICS, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Mathematics is housed in the College of Letters \& Science. Students may wish to consult with an undergraduate advisor in the department to discuss course selection and other issues related to this field of study. The current list of advisors and the schedule of the office hours can be found at the departmental advising page (https:// www.math.wisc.edu/undergraduate/advising/).

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 28 credits. A minimum cumulative grade point average of 2.75 is required, based on all UW-Madison coursework included in the minor.

Elementary Education students may also wish to consider the Specialized Mathematics minor, which exchanges some of the higher-level mathematics courses for a broader range of coursework in mathematics, computer sciences, and statistics. A mathematics/science dual minor option is also available.

The first 13 credits of the mathematics minor involves calculus-level coursework. Students may need to complete prerequisite courseworke.g., MATH 112 Algebra, MATH 113 Trigonometry-to reach this proficiency level. These preparatory courses may be used to meet the liberal studies requirement, but may not be applied toward the credits required for the mathematics minor.
\begin{tabular}{llr} 
Code & Title & Credits \\
MATH 221 & Calculus and Analytic Geometry 1 & 5 \\
MATH 222 & Calculus and Analytic Geometry 2 & 4 \\
MATH 234 & Calculus--Functions of Several & 4 \\
MATH 340 & Variables & \\
& Elementary Matrix and Linear & 3 \\
STAT 301 & Algebra & \\
MATH 441 & Introduction to Statistical Methods & 3 \\
MATH 461 & Introduction to Modern Algebra & 3 \\
\hline & College Geometry I & 3
\end{tabular}

Because of prerequisites and scheduling issues, the sequencing of this coursework requires careful planning to be completed in a timely fashion. Students are encouraged to consult with an advisor regarding the appropriate sequencing of these courses.

\section*{PHYSICS, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Physics (https://www.physics.wisc.edu/) is housed in the College of Letters \& Science. Students may wish to consult with
an undergraduate advisor in the physics department to discuss course selection and other issues related to this field of study.

To meet with a physics advisor, email physics-advisors@wisc.edu.
Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 22 credits. A minimum cumulative grade point average of 2.75 is required, based on all Physics minor coursework taken on the UW-Madison campus.

PHYSICS 201 & General Physics \\
PHYSICS 207 & General Physics \\
PHYSICS 247 & A Modern Introduction to Physics \({ }^{1}\) \\
E M A 201 & Statics \\
\& E M A 202 & and Dynamics \\
E M A 201 & Statics \\
\& M E 240 & and Dynamics
\end{tabular}

Select one of the following Second Introductory Courses:
\begin{tabular}{ll} 
PHYSICS 202 & General Physics \\
PHYSICS 208 & General Physics \\
PHYSICS 248 & A Modern Introduction to Physics
\end{tabular}

Select one of the following Third Introductory
Courses:
\begin{tabular}{ll} 
PHYSICS 249 & A Modern Introduction to Physics \\
PHYSICS 205 & Modern Physics for Engineers \\
PHYSICS/ & Introduction to Solid State \\
E C E 235 & Electronics \\
PHYSICS 241 & Introduction to Modern Physics
\end{tabular}

1
Any combination of courses can be used to satisfy the three introductory course requirements, but students may not transfer into the PHYSICS 247, PHYSICS 248, PHYSICS 249 sequence from another introductory sequence.

\section*{ADDITIONAL COURSE REQUIREMENTS}

Code
PHYSICS 307

Title
Intermediate Laboratory-Mechanics and Modern Physics
\begin{tabular}{lll} 
PHYSICS 311 & Mechanics & 3 \\
PHYSICS 321 & Electric Circuits and Electronics & 4
\end{tabular}

Select physics electives, if necessary, to total 22 credits

\section*{POLITICAL SCIENCE, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Political Science is housed in the College of Letters \& Science. Students may wish to consult with an undergraduate advisor (https://polisci.wisc.edu/advising-and-major-information/\#advising) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall, \(\mathbf{2 0 2 2}\) program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

5 This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all political science minor coursework taken on the UW-Madison campus.

\section*{REQUIRED COURSES}
\(\left.\begin{array}{llr}\text { Code } & \text { Title } & \text { Credits } \\ \begin{array}{l}\text { Complete any Political } \\ \text { (one course) }\end{array} & 3-4 \\ \text { POLI SCl 205 } & \text { Introduction to State Government } \\ \text { or POLI SCI 405 } & \text { State Government and Public Policy }\end{array}\right] 3-4\)

\section*{ELECTIVES}

Complete additional coursework, if necessary, to reach the minimum of 24 credits.

\section*{PREPARING TO TEACH \\ ABROAD, CERTIFICATE}

The Curriculum and Global Studies area encompasses multiple research programs in order to consider the politics of knowledge and the paradoxes of inclusions that exclude in curriculum, pedagogy, and teacher education. While encompassing diverse lines of inquiry, scholarship in this area engages in postfoundational approaches, giving critical attention to coloniality, differences, racialization, and beyond Western cosmologies. The research occurs at the interstices of historicizing methods related to political sociology and comparative philosophy, among others.

The affinity of the curriculum studies and global studies derives from the transnational nature of the faculty's work and reflects the significant number of international scholars and students affiliated with the area.

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the Certificate in Preparing to Teach Abroad. To declare the certificate, students should meet with the Certificate advisor and then visit the School of Education's Certificate Programs (https://education.wisc.edu/ academics/certificates/) page to complete the declaration form.

\section*{REQUIREMENTS}

The Certificate in Preparing to Teach Abroad requires the following course distribution for a minimum of 15 credits. At least 8 credits must be completed in residence. Students must complete two required courses, CURRIC 366 and CURRIC 418, 6 credits of electives, and a required capstone course, CURRIC 419.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

\section*{REQUIRED COURSES}

\section*{ELECTIVES}

The 6 credits of electives can be taken concurrently with required certificate classes. Students can choose to concentrate their electives on the following themes, but are not required to do so. In selecting courses we will encourage students to consider courses both relevant to the areas of interest, but also issues raised in the certificate's required courses. Course selection can be guided in consultation with the certificate advisor.

\section*{FOCUS ON SCHOOL OF EDUCATIONORIENTED TOPICS}

Courses in this section include special education, bilingual education, educational psychology and educational policy studies.

\end{tabular}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Analyze issues of coloniality, power, and difference as they relate to teaching, learning, and curriculum in non-US settings.
2. Examine key cultural, social, and historical relationships to educational knowledges before entering a pedagogical space abroad.
3. Identify curriculum and teaching practices that produce difference and exclusions, focusing on the intersection of transnational and local contexts.
4. Develop culturally responsive practices and pedagogies focused on teaching abroad.
5. Use experiential knowledge of practicum teaching to reflect on pedagogical practices and contextual differences in non-US contexts.

\section*{PSYCHOLOGY, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Psychology (https://psych.wisc.edu/) is housed in the College of Letters \& Science. Students interested in completing an additional major in psychology may wish to consult with an undergraduate advisor (https://psych.wisc.edu/undergraduate-program/advising/) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission. The Wisconsin Department of Public

Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 26 credits. A minimum cumulative grade point average of 2.75 is required, based on all Psychology minor coursework taken at UW-Madison. Students wishing to complete an additional major in Psychology through the College of Letters \& Science must also complete supporting coursework in introductory biology; see Requirements for the Major (p. 1325).
\begin{tabular}{llr}

\end{tabular}

Select additional coursework, if necessary, to reach the minimum of 26 credits

\section*{SCIENCE SPECIALIZED, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/starfish-studentresources/) in MyUW. Appointments can also be made through email
at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 22 credits selected from one or more of the following areas. Courses must be taken from the departments indicated. A minimum 2.75 grade point average is required, based on all UW-Madison coursework included in this minor.
- Biology: Departments of Botany (http://guide.wisc.edu/courses/ botany/), Zoology (http://guide.wisc.edu/courses/zoology/), and Bacteriology (http://guide.wisc.edu/courses/microbio/) (Microbiology course listings)
- Chemistry: Departments of Chemistry (http://guide.wisc.edu/ courses/chem/) and Biochemistry (http://guide.wisc.edu/courses/ biochem/)
- Physics: Department of Physics (http://guide.wisc.edu/courses/ physics/)
- Earth Science: Departments of Astronomy (http://guide.wisc.edu/ courses/astron/), Geography (http://guide.wisc.edu/courses/ geog/) (Physical Geography courses designated as Physical Science only), Geoscience (http://guide.wisc.edu/courses/geosci/), and Atmospheric and Oceanic Sciences (http://guide.wisc.edu/courses/ atm_ocn/).

At least 10 of the 22 credits must be numbered 200 and above.

\section*{SOCIAL STUDIES, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

Students may wish to consult with an advisor in the School of Education Student Services office, 139 Education Building, to discuss course selection and other issues related to this field of study. Current students can schedule a Student Services appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/
starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

\section*{REQUIREMENTS}

Complete 24 credits to include the requirements listed below. A minimum 2.75 grade point average is required, based on all UW-Madison course work included in the Social Studies minor. The courses listed here will meet this requirement, but additional courses may be considered. Confer with an advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, 608-262-1651, for consideration of additional courses.

Some courses may be listed in multiple categories, but can count in only one.

\section*{ELECTIVES}

Choose additional electives to reach the minimum of 24 credits. Electives must be chosen from the courses listed above or from the departments of Economics (http://guide.wisc.edu/courses/econ/), Geography (http:// guide.wisc.edu/courses/geog/), History (http://guide.wisc.edu/courses/ history/), Political Science (http://guide.wisc.edu/courses/poli_sci/), Psychology (http://guide.wisc.edu/courses/psych/) and Sociology (http:// guide.wisc.edu/courses/soc/).

\section*{RECOMMENDED COURSE OPTIONS}

It is strongly recommended to take at least one of the following non-Western interdisciplinary courses while meeting the minor requirements.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \[
\begin{aligned}
& \text { GEOG/ASIAN/ } \\
& \text { HISTORY/POLI SCI/ } \\
& \text { SOC } 244
\end{aligned}
\] & Introduction to Southeast Asia: Vietnam to the Philippines & 4 \\
\hline ASIAN 252 & Contemporary Indian Society & 4 \\
\hline GEOG/AFROAMER/ ANTHRO/C\&E SOC/ HISTORY/LACIS/ POLISCI/SOC/ SPANISH 260 & Latin America: An Introduction & 3-4 \\
\hline GEOG/AFRICAN/ AFROAMER/ ANTHRO/HISTORY/ POLISCI/SOC 277 & Africa: An Introductory Survey & 4 \\
\hline \begin{tabular}{l}
HISTORY/ASIAN/ \\
POLISCI 255
\end{tabular} & Introduction to East Asian Civilizations & 3-4 \\
\hline HISTORY/GNS 265 & An Introduction to Central Asia: From the Silk Route to Afghanistan & 3 \\
\hline
\end{tabular}

\section*{SOCIOLOGY, MINOR}

This minor may only be completed by students admitted to Elementary Education options leading to certification in K-9 or Middle Childhood through Early Adolescence. A minor is not required to complete the K-9 certification program, but students may elect to complete one.

Minors provide a depth of study in a particular area of interest and also inform classroom instruction. The completion of a minor is required to teach middle school in some states and may benefit students particularly interested in teaching at this level.

The Department of Sociology (https://sociology.wisc.edu) is housed in the College of Letters \& Science. Students may wish to consult with the undergraduate advisor (https://sociology.wisc.edu/undergraduate-program/academic-advising/) in the department to discuss course selection and other issues related to this field of study.

Upon completion, the subject area of the minor will be posted on the UW-Madison transcript. Students will not receive an additional certification or license in the subject area as was possible prior to fall 2022 program admission. The Wisconsin Department of Public Instruction does not offer content licenses in association with the K-9 educator license.

\section*{HOW TO GET IN}

This minor may only be declared by students completing Elementary Education certification in either K-9 or Middle-Childhood-through-EarlyAdolescence. The declaration form is located on the School of Education's Undergraduate Admissions page and can be submitted at any time after admission into the program.

\section*{REQUIREMENTS}

Complete a minimum of 24 credits. A minimum cumulative grade point average of 2.75 is required, based on all sociology minor coursework taken on the UW-Madison campus.

\section*{FOUNDATIONAL CORE COURSES INTRODUCTION}

Select one of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
SOC/C\&E SOC 210 & Survey of Sociology & \(3-4\) \\
SOC/C\&E SOC 211 & The Sociological Enterprise & 3 \\
SOC 181 & Honors Introductory Seminar-The & \(3-4\) \\
& Sociological Enterprise
\end{tabular}

\section*{RESEARCH METHODS AND STATISTICS}

Students may take methods and statistics in the same semester. If students take methods and statistics in different semesters, it is recommended that methods be taken before statistics. This will provide a better entry point to the methods and materials of the field.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Research Methods} \\
\hline SOC/C\&E SOC 357 & Methods of Sociological Inquiry & 3-4 \\

\section*{ELECTIVES}

Additional coursework, if needed, to reach the minimum of 24 credits.

\section*{DANCE}

Students who pursue an undergraduate degree in dance gain an indepth understanding and mastery of dance as an art form and an area of scholarly inquiry. Dance courses focus on the study of various dance techniques and movement practices, dance repertory, performance, improvisation, composition, movement analysis, body studies, dance history, dance and politics, dance and identity, and dance writing. Dance courses at the University of Wisconsin-Madison stress personal creativity, individual growth, strong technical training, and historical, theoretical, and interdisciplinary knowledge.

Two undergraduate options are offered in dance. The Bachelor of Fine Arts - Dance (p. 1680) (BFA) undergraduate degree program in dance is for students with a strong interest and aptitude in dance and/or professional dance theater. The Bachelor of Science-Dance (https:// guide.wisc.edu/undergraduate/education/dance/dance-bs/) option is designed for students who wish to combine their interest in dance with other fields of study, or to prepare for graduate work in dance studies or related disciplines. The BFA requires a minimum of 85 major credits, including public presentations of original work, while the B.S. degree requires a minimum of 57 major credits. Students are admitted to the degree program in dance by audition (https://dance.wisc.edu/admissions-and-aid/).

The Department of Dance also offers four certificate programs open to students across the campus: the general certificate in Dance (p. 1686), a
certificate in Pilates (p. 1688), a certificate in Dance/Movement Therapy (p. 1687), and a certificate in Dance Studies (p. 1672),

Introductory dance courses are open to all university students. Dance technique courses at the 200 level and above are also open to students with the prerequisite skill level, which is determined by placement auditions typically held during the first week of classes.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Dance Studies, Certificate (p. 1672)
- Dance, B.S. (p. 1674)
- Dance, BFA (p. 1680)
- Dance, Certificate (p. 1686)
- Introductory Studies in Dance/Movement Therapy, Certificate (p. 1687)
- Pilates, Certificate (p. 1688)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (http:// dance.wisc.edu).

\section*{DANCE STUDIES, CERTIFICATE}

The Dance Studies Certificate is a 14 -credit certificate program for any undergraduate student interested in the exploration of dance from an interdisciplinary, academic approach -- to understand its political, social and historical significance. The certificate is designed to enhance a student's main area of study, and provide knowledge and skills in the analysis, interpretation, and contextualization of dance and movement in society and culture.

Courses in writing, body studies, history and theory will prepare students to integrate the physical and theoretical knowledge of dance in written, oral, and embodied forms. Coursework for this certificate will fulfill the Comm B requirement, Ethnic Studies requirement and some Humanities and Social Science breadth requirements. Students pursuing degrees in the School of Education can also satisfy their Global Perspectives requirement with this coursework.

This program is designed for students in a broad range of disciplines including the arts, humanities, and social sciences. Students who wish to integrate dance research into their existing degree program, those considering graduate study in Dance Studies or a related field in the arts and humanities, including Art History, Theatre Studies, Performance Studies, or Cultural Studies, will benefit from this program.

This certificate program is flexible and can be completed primarily through summer coursework. Students can opt to complete the majority of the courses online, primarily in the summers, or through a mix of online and inperson courses in the summers and academic year.

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the Dance Studies Certificate. BS, BFA, and Certificate candidates in Dance are eligible for the Dance Studies Certificate as long as there is zero overlap of coursework. Undergraduate students in good academic standing may declare this certificate. University Special students who started as an undergraduate at UW-Madison, but graduated before completing the requirements are also eligible for this certificate.

Students should meet with the Dance Studies Certificate Advisor to discuss their intention to pursue the certificate. Appointments may be arranged via email. To declare the certificate, students must also complete the application form location on the School of Education's Certificate Programs (https://education.wisc.edu/academics/certificates/) page.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Dance Studies Certificate requires the following course distribution for a minimum of 14 credits. At least 7 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

\section*{FOUNDATIONAL COURSE}

All students are required to complete the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 200 & Writing the Moving Body & 3
\end{tabular}

\section*{BODY STUDIES}

Select 2 credits from the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline DANCE 110 & Workshop in Dance Activity & 1-2 \\
\hline DANCE 101 & Ballroom Dance I & 1 \\
\hline DANCE 102 & Ballroom Dance II & 1 \\
\hline DANCE 103 & Modern Jazz Dance & 1 \\
\hline DANCE 105 & Ballet I & 1 \\
\hline DANCE 106 & Ballet II & 1 \\
\hline DANCE 107 & Contemporary Dance I & 1 \\
\hline DANCE 108 & Contemporary Dance II & 1 \\
\hline DANCE 115 & Hip-Hop Dance Technique and Theory 1 & 1-2 \\

Code & Title & Credits \\
DANCE/ & Asian American Movement & 3 \\
ASIAN AM 121 & & \\
DANCE/ & Cultural Cross Currents: West & 3 \\
AFROAMER/ & African Dance/Music in the & \\
MUSIC 318 & Americas
\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

\section*{LEARNING OUTCOMES}
1. Gain understanding of the main approaches and methodologies of the field of dance studies as an academic approach to dance with an interdisciplinary focus.
2. Engage with dance as a site through which cultural, social, and political identities are constructed, manifested, and negotiated.
3. Analyze dance in relation to the social, cultural, and historical circumstances in which it is embedded.
4. Integrate physical and theoretical knowledge of dance in written, oral, and embodied forms.

\section*{DANCE, B.S.}

Students pursuing an undergraduate degree in dance gain in-depth knowledge of dance as an art form and an area of scholarly inquiry. The degree provides a foundation for eventual careers in professional dance, dance teaching in K-12 and higher education, dance entrepreneurship, dance/movement therapy, Pilates, the health and fitness industry, arts administration, as well as many other fields.

The Bachelor of Science (B.S.) degree in Dance requires a minimum of 57 major credits and is designed for students who wish to pursue a degree in dance and another major or degree program in a second area of interest.

A dance degree at UW-Madison offers opportunities to:
- Study with a world-class faculty, with excellent teacher-student ratios.
- Perform frequently in faculty and student-choreographed works, in state-of-the-art facilities.
- Pursue an additional major or degree in a second area of interest.
- Experience an interdisciplinary, rigorous approach that connects dance to the arts and humanities, as well as the social, biological, physical, and biological social sciences.
- Earn scholarship and award funding for study in the academic year and summer, including departmental awards for honors study.
- Work with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, Sean Curran, Danielle Russo, Carrie Hanson, Joe Goode, Susan Marshall, Kun-Yang Lin, and Tim Miller, Abdel Salaam/Forces of Nature.
- Train intensively in choreography to create solo and group works for performance.

An audition is required to declare a dance degree. Auditions are held in November and February.

The Dance department also offers four certificates: a general certificate in Dance (p. 1686), a certificate in Dance Studies (p. 1672), (p. 1672) a certificate in Dance/Movement Therapy (p. 1687), and a certificate in Pilates (p. 1688).

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the Dance department website (http://www.dance.wisc.edu/dance/admissions/how-to-apply/) for more detailed information about the audition process.

\section*{ENTERING THE SCHOOL OF EDUCATION}

\section*{NEW AND CURRENT UW-MADISON STUDENTS}

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/) to the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor in the School of Education Student Services office. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with a Student

Services advisor in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1539).

\section*{ADMISSION AND APPLICATION} CRITERIA FOR ADMISSION
Requirements and selection criteria may be modified from one application/admission period to the next.

Eligibility for consideration:
- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale). \({ }^{1}\)
- Students who have transferred to and are currently enrolled in UW-Madison coursework must have a cumulative grade point average of at least a 2.5 on the UW-Madison campus, as modified by the Last 60 Credits Rule.
- Submission of all required application materials, including the dance program application and any required transcripts.

1
A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW-Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UWMadison coursework established by their program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General • Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic
advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The B.S. degree in dance has four components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Discipline-related coursework provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- Major requirements offer an in-depth study of dance.
- Elective credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

\section*{DISCIPLINE-RELATED REQUIREMENTS}
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 200 & Writing the Moving Body & 3 \\
\hline DANCE 560 & Current Topics in Dance: Workshop & 2 \\
& (Anatomy for Dancers ) & \\
or ANAT\&PHY & 338 Human Anatomy Laboratory &
\end{tabular}

\section*{MAJOR REQUIREMENTS}

Complete a minimum of 57 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW-Madison campus.

New first-year Dance-B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, 3-5 credits, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 World Dance Cultures: Traditional to Contemporary is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

DANCE TECHNIQUE AND THEORY

\section*{Contemporary Dance Technique and Theory}

Select a minimum of 14 credits from the following; 6 credits must be numbered 211 or higher.
\begin{tabular}{lllr} 
Code & Title & Credits \\
DANCE 111 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory I
\end{tabular} & \(1-3\) \\
DANCE 112 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory II
\end{tabular} & \(1-3\) \\
DANCE 211 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory III
\end{tabular} & \(1-3\) \\
DANCE 212 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory IV
\end{tabular} & \(1-3\) \\
DANCE 311 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory V
\end{tabular} & \(1-3\) \\
DANCE 312 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory VI
\end{tabular} & \(1-3\) \\
& \begin{tabular}{ll} 
Che
\end{tabular} &
\end{tabular}

\section*{Ballet Technique}

Select a minimum of 8 credits from the following; 4 credits must be numbered 225 or higher:
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 125 & Ballet Technique I & \(1-2\) \\
DANCE 126 & Ballet Technique I-B & \(1-2\) \\
DANCE 225 & Ballet Technique II & \(1-2\) \\
DANCE 226 & Ballet Technique II-B & \(1-2\) \\
\hline DANCE 325 & Ballet Technique III & \(1-2\) \\
DANCE 326 & Ballet Technique III-B & \(1-2\)
\end{tabular}

\section*{Additional Techniques}

Select a minimum of 2 credits. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop in Dance Activity or DANCE 560 Current Topics in Dance: Workshop. Jazz and Ballroom courses do not count toward this requirement.
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 110 & Workshop in Dance Activity (Hip & \(1-2\) \\
& Hop) & \\
DANCE 110 & Workshop in Dance Activity (Tai Ji) & \(1-2\) \\
\hline DANCE 116 & Workshop in World Dance & 2 \\
DANCE 118 & African Dance & 1
\end{tabular}
\begin{tabular}{|c|c|c|}
\hline \begin{tabular}{l}
DANCE/ \\
ASIAN AM 121
\end{tabular} & Asian American Movement & 3 \\
\hline \begin{tabular}{l}
DANCE/ \\
THEATRE 218
\end{tabular} & African Dance Performance & 2 \\
\hline DANCE/ AFROAMER/ MUSIC 318 & Cultural Cross Currents: West African Dance/Music in the Americas & 3 \\
\hline DANCE/FOLKLORE/ THEATRE 321 & Javanese Performance & 2 \\
\hline DANCE/FOLKLORE/ THEATRE 421 & Javanese Performance Repertory & 2 \\
\hline
\end{tabular}

\section*{ADDITIONAL REQUIRED COURSES}
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 131 & Somatic Theory and Practices & 2 \\
\hline DANCE 140 & Dance Production & 2 \\
\hline DANCE 156 & \begin{tabular}{l}

Dance from the Renaissance \\
through the 192Os
\end{tabular} & 3
\end{tabular}
\begin{tabular}{|c|c|c|}
\hline \multicolumn{2}{|l|}{Design - Complete one of:} & 3-4 \\
\hline DANCE/ART 341 & Sound Design for the Performing and Visual Arts & \\
\hline DANCE 345 & Video Design for the Performing and Visual Arts & \\
\hline ART 318 & Introduction to Video, Performance \& Installation Art & \\
\hline ART 518 & Artist's Video & \\
\hline ART 531 & Screen Performance & \\
\hline DANCE 355 & Dance Composition II & 2 \\
\hline DANCE 365 & Dance History II: Directions and Issues of Contemporary Dance & 3 \\
\hline DANCE 462 & Senior Seminar & 3 \\
\hline DANCE 463 & Senior Project & 1-2 \\
\hline \multicolumn{2}{|l|}{Select 3 credits from the following:} & 3 \\
\hline DANCE 451 & Dance Repertory Theater & \\
\hline DANCE 452 & Dance Repertory Theater & \\
\hline
\end{tabular}

\section*{ELECTIVE COURSEWORK}

Complete additional coursework, if necessary, to reach the minimum of 124 credits. DANCE 165 World Dance Cultures: Traditional to Contemporary is recommended and will meet the Global Perspectives requirement in liberal studies.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS GRADUATION REQUIREMENTS \\ Requirements below are based on UW-Madison coursework. \\ - 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539). \\ - 2.75 cumulative grade point average in all major coursework \\ - 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses. \\ - Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW-Madison campus. \\ - Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination. \\ - A minimum of 124 credits are required for graduation.}

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
\(\left.\begin{array}{ll}\text { Residency } & \begin{array}{l}\text { Degree candidates are required to earn a minimum of } \\

\section*{LEARNING OUTCOMES}
1. (Body Studies and Dance Technique) Demonstration of proficiency in the physical practice of dance.
2. (Writing and Critical Thinking) Examination of global approaches in dance, in historical, cultural, and theoretical contexts.
3. (Making and Sharing Dances) Utilization of tools of craft to engage in critical and creative investigations and assessment.

\section*{FOUR-YEAR PLAN}

\section*{Bachelor of Science: Dance - Sample Four Year Plan}

This sample four-year graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Your actual course of study will be influenced by factors such as when you are eligible to enroll in 200-level technique classes, casting decisions, and summer course selections. Use this plan along with your DARS report, the Guide, and the Course Search and Enroll app to create a sequence of classes that also reflect your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop this personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

New first-year Dance-B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 (http:// guide.wisc.edu/search/?P=DANCE\%20111) Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 (http://guide.wisc.edu/ search/?P=DANCE\%20125) Ballet Technique I, and DANCE 162 (http:// guide.wisc.edu/search/?P=DANCE\%20162) First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique.

This degree requires a minimum of 124 credits. Contemporary dance technique and theory classes beyond the minimum requirement are strongly recommended and included in this plan as electives. Bachelor of Science - Dance students must present their senior projects in an approved public forum.

\section*{Total Credits 124}

\section*{ADVISING AND CAREERS}

\section*{DANCE DEPARTMENT ADVISING}

All dance degree students receive targeted advising through the department's undergraduate advisor, Karen McShane-Hellenbrand (http:// dance.wisc.edu/dance/people/instructional-staff/karen-mcshanehellenbrand/). Dance Department advising is designed to assist students in choosing classes and evaluating their degree path. This is particularly critical for students pursuing a dance degree and an additional degree program or major.

Students may also meet with advisors in the School of Education Student Services office regarding other course requirements and concerns, see below. Current students can schedule an appointment with a School of Education advisor online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Dance majors include: professional dance, production, dance education in \(\mathrm{K}-12\) and higher education, dance entrepreneurship, and dance/movement therapy. Our graduates also work in the health and fitness industry, Pilates, arts administration, dance advocacy, as well as many other fields.

Students develop important skills that employers look for including:
- Diverse forms of communication, personal expression and connection
- Collaboration
- Creative problem solving/critical thinking
- Adaptability, versatility, and improvisation
- Resilience; ability to receive and provide feedback
- Discipline and accountability

Applied experiences, including paid internships, apprenticeship programs, career treks, and professional networking events, are available to UW Dance students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website. (http:// dance.wisc.edu/)

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{ACCREDITATION}

\section*{ACCREDITATION}

National Association of Schools of Dance (https://nasd.arts-accredit.org/)
Accreditation status: Accredited. Next accreditation review: 2018-2019, site visit postponed until Spring 2022 due to COVID-19, final report forthcoming.

\section*{DANCE, BFA}

Students pursuing a BFA in dance gain in-depth knowledge of dance as an art form and an area of scholarly inquiry. The degree prepares students for careers in professional dance, provides a foundation for teaching in K-12 and higher education, dance entrepreneurship, dance/movement therapy, Pilates, the health and fitness industry, arts administration, as well as many other fields.

The Bachelor of Fine Arts (BFA) in Dance requires a minimum of 85 major credits, and is designed for students who wish to spend more time preparing for a professional career in dance.

A dance degree at UW-Madison offers opportunities to:
- Study with a world-class faculty, with excellent teacher-student ratios.
- Perform frequently in faculty and student-choreographed works, in state-of-the-art facilities.
- Experience an interdisciplinary approach that connects dance to the arts and humanities, as well as the social, biological, physical, and biological social sciences.
- Earn scholarship and award funding for study in the academic year and summer, including departmental awards for honors study.
- Work with nationally and internationally renowned guest artists and master class instructors, such as the Bill T. Jones/Arnie Zane Dance Company, Pilobolus, Meredith Monk, Elizabeth Streb, David Parsons, Sean Curran, Danielle Russo, Carrie Hanson, Joe

Goode, Susan Marshall, Kun-Yang Lin, and Tim Miller, Abdel Salaam/Forces of Nature.
- Train intensively in choreography to create solo and group works for performance.

An audition is required to declare a dance degree. Auditions are held in November and February.

The Dance Department also offers four certificates: a general certificate in Dance (https://guide.wisc.edu/undergraduate/education/dance/ dance-certificate/), a certificate in Dance Studies (p. 1672), a certificate in Dance/Movement Therapy (https://guide.wisc.edu/undergraduate/ education/dance/introductory-studies-dance-movement-therapycertificate/), and a certificate in Pilates (https://guide.wisc.edu/ undergraduate/education/dance/pilates-certificate/).

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

All students wishing to major in dance must complete a performance audition to be admitted to the program. Consult the Dance department website (http://www.dance.wisc.edu/dance/admissions/how-to-apply/) for more detailed information about the audition process.

\section*{ENTERING THE SCHOOL OF EDUCATION}

\section*{NEW AND CURRENT UW-MADISON} STUDENTS

On-campus students wishing to be admitted to one of the dance program options must audition and also have earned a minimum 2.5 grade point average. On-campus students should obtain and submit a signed Professional Program Application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/), to the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, at any time during the academic year. The application must be signed by the appropriate dance department advisor.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information.

Prospective transfer students should meet as early as possible with a dance department advisor and with an advisor in the School of Education Student Services office. Coursework taken at another institution may need to be evaluated by a faculty or staff member in dance. Transfer students must audition to be admitted to one of the dance program options. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with a School of Education advisor in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1539).

\section*{ADMISSION AND APPLICATION} CRITERIA FOR ADMISSION
Requirements and selection criteria may be modified from one application/admission period to the next. Eligibility for consideration:
- The dance department currently admits students to its programs only through a performance audition.
- Cumulative grade point average of at least a 2.50 (on a 4.00 scale). \({ }^{1}\)
- On-campus transfer students must have a cumulative grade point average of at least a 2.5 on the UW-Madison campus, as modified by the Last 60 Credits Rule.
- Submission of all required application materials, including the dance program application and any required transcripts.

1
A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW-Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UWMadison coursework established by their program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted"
coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAMSTRUCTURE}

The BFA degree in Dance has four components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Discipline-related coursework provides an interdisciplinary foundation contributing to the performance and understanding of this art form.
- Major requirements offer an in-depth study of dance.
- Elective credits allow students to pursue areas of interest and complete the minimum number of credits required for the degree.

\section*{DISCIPLINE-RELATED REQUIREMENTS}
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 200 & Writing the Moving Body & 3 \\
DANCE 560 & Current Topics in Dance: Workshop & 2 \\
& (Anatomy for Dancers) & \\
or ANAT\&PHY 338 Human Anatomy Laboratory
\end{tabular}

\section*{MAJOR REQUIREMENTS}

Complete a minimum of 85 credits. At least 15 upper-level major Dance credits (numbered 300 and above) must be taken in residence on the UW-Madison campus.

New first-year Dance-B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 Ballet Technique I, and DANCE 162 First Year Workshop for a total of 11 credits. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique. Dance majors are assured enrollment in these courses. DANCE 165 World Dance Cultures: Traditional to Contemporary is also strongly recommended for the first semester; this course will meet the Global Perspectives requirement in liberal studies.

\section*{DANCE TECHNIQUE AND THEORY}

\section*{Contemporary Dance Technique and Theory}

Select a minimum of 18 credits from the following; at least 9 credits must be from DANCE 311 Contemporary Dance Technique and Theory V or DANCE 312 Contemporary Dance Technique and Theory VI . Note: 100- and 200-level technique classes must be taken for 3 credits; 300 and 400 level may be taken for 2 credits.
\begin{tabular}{|cl|}
\hline \multicolumn{1}{l}{\begin{tabular}{l} 
Code \\

\hline DANCE 462 & Senior Seminar & 3 \\
\hline DANCE 463 & Senior Project & \(1-2\) \\
\hline
\end{tabular}

\section*{PUBLIC PRESENTATIONS}

BFA students must create one solo and one group piece (trio or larger) after the completion of DANCE 255 Movement Composition for the Performing and Visual Arts. These works must be submitted for faculty approval and publicly presented in concert. Senior projects must be presented in an approved public forum.

\section*{ELECTIVE CREDITS}

Complete additional coursework, if necessary, to reach the minimum of 125 credits. DANCE 165 World Dance Cultures: Traditional to Contemporary is recommended and will meet the Global Perspectives requirement in liberal studies.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS GRADUATION REQUIREMENTS \\ Requirements are based on UW-Madison coursework.}
- 2.75 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average in all major coursework
- 2.50 cumulative grade point average in all upper-level major coursework. Dance courses numbered 300 and above are considered to be upper-level courses.
- Major Residency. Students must complete a minimum of 15 upper-level major credits on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- A minimum of 125 credits are required for graduation.

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such
as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. (Body Studies and Dance Technique) Demonstration of proficiency in the physical practice of dance.
2. (Writing and Critical Thinking) Examination of global approaches in dance, in historical, cultural, and theoretical contexts.
3. (Making and Sharing Dances) Utilization of tools of craft to engage in critical and creative investigations and assessment.

\section*{FOUR-YEAR PLAN}

Dance: Bachelor of Fine Arts - Sample Four Year Plan
This sample four-year graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Your actual course of study will be influenced by factors such as when you are eligible to enroll in 200 and 300-level technique classes, casting decisions, and summer course selections. Use this plan along with your DARS report, the Guide, and the Course Search and Enroll app to create a sequence of classes that also reflect your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop this personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise
your plan several times during your academic career here, based on your activities and changing academic interests.

New first-year Dance-B.S. and BFA students should expect to register for three 100-level foundational major courses: DANCE 111 (http:// guide.wisc.edu/search/?P=DANCE\%20111) Contemporary Dance Technique and Theory I, 5 credits, DANCE 125 (http://guide.wisc.edu/ search/?P=DANCE\%20125) Ballet Technique I, and DANCE 162 (http:// guide.wisc.edu/search/?P=DANCE\%20162) First Year Workshop. These courses are taken by all dance majors in their first year, regardless of previous dance training and experience. The classes prepare students for advanced study in dance and movement technique.

This degree requires a minimum of 125 credits, although additional contemporary dance technique and theory courses are strongly recommended. This plan includes 7 credits beyond the minimum requirement in this area. BFA Dance students must create one Solo and one Group piece (trio or larger) after completion of 255 . These works must be faculty approved for public presentation.

\section*{Total Credits 132}

\section*{1}

Some Dance department courses meet both the ethnic studies and additional techniques requirements. If this option is selected, a threecredit liberal studies course must be completed this semester.

\section*{ADVISING AND CAREERS}

\section*{DANCE DEPARTMENT ADVISING}

All dance degree students receive targeted advising through the department's undergraduate advisor, Karen McShane-Hellenbrand (http:// dance.wisc.edu/dance/people/instructional-staff/karen-mcshanehellenbrand/). Dance Department advising is designed to assist students in choosing classes and evaluating their degree path. This is particularly critical for students pursuing a dance degree and an additional degree program or major.

Students may also meet with advisors in the School of Education Student Services office regarding other course requirements and concerns,
see below. Current students can schedule an appointment with a School of Education advisor online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Dance majors include: professional dance, production, dance education in K-12 and higher education, dance entrepreneurship, and dance/movement therapy. Our graduates also work in the health and fitness industry, Pilates, arts administration, dance advocacy, as well as many other fields.

Students develop important skills that employers look for including:
- Diverse forms of communication, personal expression and connection
- Collaboration
- Creative problem solving/critical thinking
- Adaptability, versatility, and improvisation
- Resilience; ability to receive and provide feedback
- Discipline and accountability

Applied experiences, including paid internships, apprenticeship programs, career treks, and professional networking events, are available to UW Dance students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the
Department of Dance can be found on the department's website. (http:// dance.wisc.edu/)

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{ACCREDITATION}

\section*{ACCREDITATION}

National Association of Schools of Dance (https://nasd.arts-accredit.org/)
Accreditation status: Accredited. Next accreditation review: 2018-2019, site visit postponed until Spring 2023 due to COVID-19, final report forthcoming.

\section*{DANCE, CERTIFICATE}

The Dance Certificate is a 19-credit program, open to all students. Students who pursue a Dance Certificate often have a background in dance, but may not be seeking a degree in dance. Others are beginning dance students.

The program provides a foundation in contemporary dance practice and theory, as well as offering opportunities in a variety of movement, somatic, and creative practice courses including contemporary dance, ballet,
movement analysis, improvisation, dance composition, as well as dance history. The certificate also offers students the flexibility of choosing among a wide variety of courses that may interest them, including hiphop, African, Tai Ji, among others. Students may also participate in performance opportunities if they have an interest in performance.

\section*{HOW TO GET IN}

Undergraduate students in good academic standing, with a cumulative GPA of 2.50 or higher, may declare this certificate.

Students must meet with the dance certificate advisor to discuss their intention to pursue the certificate. Students will enroll in two semesters of dance technique and apply for admission to the Dance Certificate at the end of the second semester. Students intending to pursue the Dance Certificate should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/certificates/) page to complete the declaration form.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Dance Certificate requires the following course distribution for a minimum of 19 credits.

\section*{CONTEMPORARY DANCE TECHNIQUE AND THEORY}

Select 6 credits from the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 111 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory I
\end{tabular} & \(1-3\) \\
DANCE 112 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory II
\end{tabular} & \(1-3\) \\
DANCE 211 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory III
\end{tabular} & \(1-3\) \\
DANCE 212 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory IV
\end{tabular} & \(1-3\) \\
DANCE 311 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory V
\end{tabular} & \(1-3\) \\
DANCE 312 & \begin{tabular}{l} 
Contemporary Dance Technique and \\
Theory VI
\end{tabular} & \(1-3\)
\end{tabular}

\section*{BALLET TECHNIQUE}

Select 2 credits from the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 125 & Ballet Technique I & \(1-2\) \\
\hline DANCE 126 & Ballet Technique I-B & \(1-2\) \\
\hline DANCE 225 & Ballet Technique II & \(1-2\) \\
DANCE 226 & Ballet Technique II-B & \(1-2\) \\
DANCE 325 & Ballet Technique III & \(1-2\) \\
DANCE 326 & Ballet Technique III-B & \(1-2\)
\end{tabular}

\section*{ADDITIONAL TECHNIQUES}

Select 2 credits from the following. Students may also select from Additional Techniques workshops listed under DANCE 110 Workshop
in Dance Activity or DANCE 560 Current Topics in Dance: Workshop
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline DANCE 110 & Workshop in Dance Activity (Hip Hop) & 1-2 \\
\hline DANCE 110 & Workshop in Dance Activity (Tai Ji) & 1-2 \\
\hline DANCE 116 & Workshop in World Dance & 2 \\
\hline DANCE 118 & African Dance & 1 \\
\hline \begin{tabular}{l}
DANCE/ \\
ASIAN AM 121
\end{tabular} & Asian American Movement & 3 \\
\hline \begin{tabular}{l}
DANCE/ \\
THEATRE 218
\end{tabular} & African Dance Performance & 2 \\
\hline DANCE/ AFROAMER/ MUSIC 318 & Cultural Cross Currents: West African Dance/Music in the Americas & 3 \\
\hline DANCE/FOLKLORE/ THEATRE 321 & Javanese Performance & 2 \\
\hline DANCE/FOLKLORE/ THEATRE 421 & Javanese Performance Repertory & 2 \\
\hline \multicolumn{3}{|l|}{ADDITIONAL REQUIRED COURSES} \\
\hline Code & Title & Credits \\
\hline DANCE 131 & Somatic Theory and Practices & 2 \\
\hline or DANCE 157 & Introduction to Movement Analysis & \\
\hline DANCE 156 & Movement as Material Through Improvisation & 2 \\
\hline DANCE 255 & Movement Composition for the Performing and Visual Arts & 2 \\
\hline DANCE 265 & Dance History I: Western Theatrical Dance from the Renaissance through the 1920s & 3 \\
\hline or DANCE 365 & Dance History II: Directions and Issues of Contemporary Dance & \\
\hline
\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate technical specificity, musicality and artistic confidence in ballet and contemporary dance techniques through sequenced skill level progressions.
2. Recognize, identify and embody a wide range of somatic theories and practices and produce work investigating its impacts and uses in contemporary dance as practice.
3. Demonstrate an intermediate level of contemporary dance literacy and artistry.
4. Develop and practice vocabulary and methodology for analyzing and discussing dance in performance and historical contexts and begin to respond critically and thoughtfully to dance scholarship.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (http:// dance.wisc.edu).

\section*{INTRODUCTORY STUDIES IN DANCE/MOVEMENT THERAPY, CERTIFICATE}

Dance/movement therapy (DMT) is one of the creative arts therapies. It is a form of psychotherapy that uses movement, both creative and functional, as well as words, to help people-those who are generally healthy as well as those dealing with emotional, mental, or physical problems-to regain a sense of wholeness by experiencing the fundamental unity of body, mind, and spirit. The dance therapy certificate introduces students to the fascinating nonverbal aspects of human communication and its applications to a wide range of other fields such as social work, teaching, occupational therapy, physical therapy, and communication disorders.

Students will also be introduced to the use of movement in the fields of violence prevention, behavior management, and social skills development from a movement or body/mind perspective. Students who complete this certificate are prepared to attend graduate school in the field of dance/ movement therapy, a requirement for the professional practice in this field, or to use embodied practices in related fields. In addition, students develop a repertoire of strategies to help cope with the stress and anxiety inherent in college life and develop insights into their own body/mind connections.

This certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (https:// guide.wisc.edu/nondegree/).

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

Prospective certificate students should meet with the Dance/Movement Therapy Certificate advisor to discuss their intentions to pursue the certificate. Enroll in the first- or second-semester dance/movement therapy course:
- DANCE 231 Introduction to Dance/Movement Therapy or
- DANCE 232 Introduction to Dynamics of Dance Therapy.

Application is usually made directly after the completion of Introduction to Dynamics of Dance Therapy. Students intending to pursue the Dance/Movement Therapy Certificate should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/ certificates/) page to complete the declaration form.

\section*{REQUIREMENTS}

\section*{CERTIFICATE COURSE REQUIREMENTS}

The DMT certificate requires a minimum of 19 credits.

\section*{SUPPORTIVE DISCIPLINARY COURSEWORK}

Choose a course (3-credit minimum) from the following departments: Counseling Psychology (http://guide.wisc.edu/courses/coun_psy/), Educational Psychology (http://guide.wisc.edu/courses/ed_psych/), Psychology (http://guide.wisc.edu/courses/psych/), Rehabilitation Psychology and Special Education (http://guide.wisc.edu/courses/ rp_se/).

\section*{DANCE DEPARTMENT COURSEWORK}

\section*{Code}

DANCE 131
DANCE 156

DANCE 157
DANCE 231

DANCE 232

DANCE 331
DANCE 431

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

\section*{LEARNING OUTCOMES}
1. (Body Studies) Gain skill in expressing through movement and understanding its connection to emotion.
2. Develop literacy about the field of Dance/Movement Therapy.
3. Practice and practical work in movement analysis as a tool for Dance/ Movement Therapy.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (http:// dance.wisc.edu).

\section*{PILATES, CERTIFICATE}

The Pilates certificate is a 20-credit program that includes coursework in the classic Pilates mat and equipment repertoire, current teaching
methods, and functional anatomy. The certificate prepares students to teach Pilates in a studio setting, and also creates a practical foundation for those who wish to pursue graduate work in movement-based fields.

This certificate program is open to all interested students, and is often pursued by students working toward degrees in dance, kinesiology, athletic training, physical therapy, occupational therapy, or other health/fitness fields.

The curriculum can be completed in 2 years. Upon completion, students are encouraged to sit for the Pilates Method Alliance certification exam to earn their credentials as nationally certified Pilates teachers.

This certificate is also available to individuals who have already completed a Bachelor's degree; see the Nondegree/Visiting Student Guide (http:// guide.wisc.edu/nondegree/).

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

Students should meet with the Pilates certificate advisor to discuss their intention to pursue the certificate. Appointments may be arranged

\section*{CERTIFICATE COURSE REQUIREMENTS}

The Pilates certificate requires a minimum of 20 credits. Collette Stewart is the advisor for the Pilates certificate, stewart1@wisc.edu; interested students should contact her for an advising appointment.
\begin{tabular}{llr} 
Code & Title & Credits \\
DANCE 135 & Pilates Mat I & 1 \\
DANCE 136 & Pilates Equipment I & 2 \\
DANCE 235 & Pilates Mat II & 1 \\
DANCE 236 & Pilates Equipment II & 2 \\
DANCE 237 & Pilates Studio I & 3 \\
DANCE 330 & Functional Anatomy for Movement & 2 \\
DANCE 337 & Practices & 3 \\
DANCE 375 & Pilates Studio II & 1 \\
\hline DANCE 376 & Pilates Teaching Methods & 2 \\
DANCE 476 & Pilates Teaching I & 3
\end{tabular}

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

\section*{LEARNING OUTCOMES}
1. (Pilates Practice - Strength, Focus, Movement Efficiency) Demonstrate proficiency in Pilates exercises, including fundamental exercises and beginner through advanced mat and equipment work. Students will show significant improvement in body awareness, physical skill and strength, and efficient movement patterning.
2. (Pilates Teaching - Safety, Clarity, Communication) Confidently teach one-on-one and group Pilates classes, effectively communicating physical and conceptual ideas about the body to a variety of learning styles, body types and physical backgrounds.
3. (Anatomical Approaches to Pilates) Integrate current anatomical research into practice and teaching, using a variety of somatic approaches to embodying healthy anatomical function.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Dance can be found on the department's website (http:// dance.wisc.edu).

\section*{EDUCATION - SCHOOL-WIDE}

DEGREES/MAJORS/CERTIFICATES
- Individual Major, BSE (p. 1689)

\section*{INDIVIDUAL MAJOR, BSE}

The individual major provides undergraduates with an opportunity to develop a unique course of study; one that is interdepartmental and not reflected in existing degree programs. Completion of the individual major does not lead to a professional license or certification, although graduates may be interested in pursuing alternative educational careers or graduate work. Graduates earn a B.S.-Education degree.

\section*{HOW TO GET IN}

\section*{ADMISSION ELIGIBILITY REQUIREMENTS}

To be eligible, applicants must:
- earn a 2.75 cumulative GPA on the UW-Madison campus. \({ }^{1}\)
- complete a minimum of 54 credits
- receive approval of major program proposal submitted by the applicant.

1
For alternative calculation of cumulative GPA, see Last 60 Credits Rule.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to the program. GPAs will be calculated using
- all transferable college-level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{APPLICATION PROCEDURES}

Once a committee of three persons has been chosen in accord with the guidelines and required courses have been selected, students should proceed as follows:
- Submit an Individual Major in Education proposal form (http:// www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/).
- Submit the program plan and narrative with the transfer application for associate dean's approval. The three-member committee must sign the proposal in the spaces indicated. Failure to submit a program narrative will void the transfer.

Once an application form has been submitted, changes must be approved by both the chair of the committee and the associate dean. Changes must be recorded on the program plan. If more than two program changes are made, a new application form must be filed by the student.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Bachelor of Science (B.S.) degree program with an individual major has three components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Major requirements permit in-depth study of a unique area within the School of Education. Students create their own, interdepartmental major following the guidelines established by the school. When completed, the title of the individual major is listed on the student's transcript.
- Elective credits make it possible to pursue additional areas of interest and are necessary to reach the minimum of 120 credits required for the degree.

\section*{REQUIREMENTS OF THE INDIVIDUAL MAJOR DEVELOPMENT OF THE MAJOR}

Students must have an area of interest that they wish to develop into a 36-42 credit formalized program of study, or major. Advisors in Education Student Services, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss students' interests and help frame the written narrative required of the major. Current students can schedule an appointment with an advisor online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW.

Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. A program title cannot duplicate the existing title of any program at UW-Madison.

\section*{SELECTION OF MAJOR COURSEWORK}

Select courses that support the program narrative, in consultation with the major advisor; see below. All courses in the major must be from
School of Education course offerings. All credits in the major must be completed after admission into the program (IME classification).

Additional requirements regarding the major are:
- To ensure depth and breadth of study, no more than two-thirds of the total credits in a major can be taken from any one department (i.e., if a major is 36 credits, no more than 24 credits can be in one department).
- A sequential development of courses must be planned in consultation with the major advisor and committee, and must be approved by the committee. The course sequence must include beginning through advanced levels of work as prescribed by the credit distribution.
- At least 20 of the IME credits must be at the intermediate or advanced levels (generally numbered 300 or above, but this varies in some departments).
- Courses in the School of Education completed prior to admission to the IME classification may not be used toward satisfaction of the 3642 credits in the major without the faculty committee and associate
dean's approval. The credits may count toward the 120 credits required for graduation.
- Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UW-Madison campus.
- An individual major which essentially parallels an existing departmental major will not be accepted.
- Directed study credits (e.g. 399, 699) are acceptable, but each course must be accompanied by a statement that includes a description of the focus of study, the requirements for successful completion of the credits, and a discussion of the applicability of content to the proposed individual major. Usually no more than 3 credits of Independent Study will be allowed. Approval of the associate dean is required in order to exceed three credits.
- Students must complete prerequisites for all courses and, in some departments, may be required to complete foundational courses.

\section*{SELECTING THE ADVISORY COMMITTEE AND MAJOR ADVISOR}

The applicant must create a three-member committee to oversee his or her work. Only assistant, associate, and full professors may serve on the committee; individuals holding such titles as Lecturer or Instructor cannot serve in this capacity. One of the committee members will be selected by the student to be the major advisor. The major advisor must be from a department within the School of Education and from the department in which the majority of courses for the individual major will be taken, i.e., the core area of study. The second faculty member must be from the same department as the major advisor/committee chair. The third faculty member must be from another department in the School of Education in which courses will be taken for the individual major. The associate dean serves as ex officio to the three-member committee and gives final approval to all programs and any exceptions.

\section*{ELECTIVE CREDITS}

Elective credits make it possible to pursue additional areas of interest. Many students, for example, use their elective credits to complete an additional major from the College of Letters \& Science. Some use this second major to complement their individual major, while others select second majors that are completely unrelated to their first. Elective credits are necessary to reach the minimum of 120 credits required for the degree.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS}

GRADUATION REQUIREMENTS
Graduation requirements are based on UW-Madison coursework. Graduation GPA requirements may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average.
- 2.75 cumulative grade point average across all major coursework
- 2.75 cumulative grade point average across all upper-level (numbered 300 and above) major coursework
- Degree candidates must complete at least 120 total credits.
- Major residency. Degree candidates must complete at least 15 credits of upper-level major coursework in residence on the UWMadison campus.
- Senior residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{FOUR-YEAR PLAN}

\section*{Individual Major: Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report and the Course Guide to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide
for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Development of the Major}

Students must have an area of interest that they wish to develop into a 36-42 credit formalized program of study, or major. Advisors in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651, can discuss your interests and help frame the written narrative required of the major. Current students can schedule an appointment with an advisor online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW.

Applicants must develop a narrative describing the proposed course of study and its related career goals. Information should be included which will enable a faculty committee to identify the relationship among the proposed program of study, a general interest in education, and career goals. All courses in the major must be from School of Education course offerings and all credits in the major must be completed after admission into the major (IME classification). The title of the major cannot duplicate the existing title of any other major or program at UW-Madison. Consult the Guide for more information on creating an individual major and its requirements.

At least 15 credits of major course work must be upper-level (numbered 300 and above) and taken in residence.

\section*{ADVISING AND CAREERS}

\section*{ADVISING FOR THE INDIVIDUAL MAJOR}

Students interested in the Individual Major should first consult with an advisor in the School of Education Student Services office, see below. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/starfish-studentresources/) in MyUW. Eventually, a committee to oversee the major will be formed and also provide advising in the major.

\section*{SCHOOL OF EDUCATION ADVISING \\ 3 ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{EDUCATIONAL POLICY STUDIES}

The Department of Educational Policy Studies offers many courses for undergraduate students, including courses in the history, sociology, anthropology, economics, and philosophy of education, comparative and international education, and educational equity. Courses emphasize the impact of educational programs and policies on equity, justice, and wellbeing. The department has strong ties with institutions and scholars in other countries.

The Department of Educational Policy Studies offers an undergraduate Bachelor of Science degree program in Education Studies (https:// guide.wisc.edu/undergraduate/education/educational-policy-studies/ education-studies-bs/). This program is designed to meet the needs of a growing number of undergraduate students who are interested in working in domestic and/or global educational policy and practice.

The Department features four certificate programs.
- The popular Educational Policy Studies (EPS) Certificate (https://guide.wisc.edu/undergraduate/education/educational-policy-studies/educational-policy-studies-certificate/) formalizes a student's interest in education policy, generally.
- The Social Justice and Education Certificate (https:// guide.wisc.edu/undergraduate/education/educational-policy-studies/social-justice-education-certificate/) provides students with a foundational understanding of the social, political, and
economic inequities that shape our schools and broader society, as well as the ways in which educators, students, administrators, parents, and community members have sought to interrupt these inequities (historically and in the contemporary period).
- The Global Languages, Cultures, and Education Certificate (https://guide.wisc.edu/undergraduate/education/educational-policy-studies/global-cultures-languages-educationcertificate/) courses examine the relationships among cultural diversity, social inequality, and language and literacy. They provide students with skills to work globally, within and beyond schools, in the fields of language policy, planning, and programming and culture, communication, and education.
- The International Education and Development Certificate (https://guide.wisc.edu/undergraduate/education/educational-policy-studies/international-development-educationcertificate/) investigates the complex issues that shape international educational policies, programming, and practices as they address challenges such as poverty, inequality, forced migration, sustainability, colonialism, and human rights. Students explore careers in international development education and global service with governmental and non-governmental organizations, educational institutions, and community development organizations.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Education Studies, B.S. (p. 1693)
- Educational Policy Studies, Certificate (p. 1700)
- Global Cultures, Languages, and Education, Certificate (p. 1701)
- International Development and Education, Certificate (p. 1710)
- Social Justice and Education, Certificate (p. 1712)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (http://eps.education.wisc.edu/)

\section*{EDUCATIONSTUDIES, B.S.}

The Education Studies degree program addresses urgent questions related to domestic and global education policy and practice. Majors become thought leaders who engage critically and ethically in educational policy debates and practice. While pursuing Education Studies, students (https://eps.education.wisc.edu/current-students/student-profiles/) can expect to:
- focus on the relationships among education, inequality, and social justice
- investigate at the local, national, and global levels, the connections between education and other policy areas, including housing, healthcare, migration, justice, political reforms, economic development, and foreign policy
- explore contemporary educational debates from early childhood through K-12, higher education, and the workforce
- engage in community-based learning, study abroad and study away, career development, internships, and research experiences related to education studies
- compete for grants (https://eps.education.wisc.edu/about/ student-awards/) for research or applied work and awards (https://eps.education.wisc.edu/about/student-awards/) in writing, research, and community-engaged scholarship
- acquire qualitative, quantitative, and historical research skills to study current issues in education policy and apply knowledge to practice

Through coursework, projects, advising, and independent studies, the Education Studies major prepares students for work in educational settings such as:
- Governmental agencies
- Non-governmental organizations (both domestic and international)
- Think tanks and policy institutes
- Community organizations
- Corporate, community, and non-traditional educational spaces

Graduates might serve as education and policy analysts, education specialists, policy researchers, program directors, youth workers, or in other positions of institutional leadership. They will also be well prepared to work in government, education, and social justice-related organizations, or to pursue advanced studies in education or educational policy at the master's and doctoral level.

Graduates will receive a Bachelor of Science degree in Education Studies from the School of Education. This program does not lead to teacher certification, but it can enhance and complement teacher preparation programs. Students interested in gaining teaching licenses after graduation should connect with the School of Education Student Services office or the School of Education Career Center (https:// careercenter.education.wisc.edu/) offices on campus to discuss their options.

Students interested in pursuing this major are encouraged to consult with advising staff at the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, 608-262-1651 or studentservices@education.wisc.edu. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW.

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

The Education Studies major may be completed either as the primary major or as an additional ("double") major.

\section*{PRIMARY MAJOR IN EDUCATION STUDIES}

Undergraduate students interested in completing the Bachelor of Science-Education Studies degree program will fulfill the School of Education's liberal studies, and other degree requirements in addition to the 30 credits required for the Education Studies major.

\section*{ADDITIONAL MAJOR IN EDUCATION STUDIES}

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Education Studies as an additional major. Students completing Education Studies as an additional
major do not need to complete the School of Education's liberal studies and other degree requirements. For application information, go directly to the Additional Major in Education Studies (p. 1695) section below.

\section*{ENTERING THE SCHOOL OF EDUCATION NEW AND CURRENT UW-MADISON STUDENTS}

Incoming freshmen enter directly into the Bachelor of Science-Education Studies degree program upon admission to UW-Madison; list Education Studies as the intended major. No additional application to Education Studies is required. See UW-Madison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information.

All other on-campus students will submit an application following a meeting with an advisor in the School of Education Student Services office. Call 608-262-1651 to schedule an appointment; current students can also schedule an appointment online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-studentresources/) in MyUW.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Transfer students must be admissible to the university to enroll in a School of Education degree program. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information. Transfer students enter directly into the Bachelor of Science-Education Studies degree program upon admission to UW-Madison; list Education Studies as the intended major. No additional application to Education Studies is required. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective students who already hold an undergraduate degree must be admissible to the university to enroll in a School of Education degree program. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information.

Applicants must also meet the following criteria for admission as a second undergraduate degree candidate in the School of Education. Candidates must:
- be seeking a new major that is substantially different from their previous degree work;
- need to complete at least 15 upper-level credits in the new major;
- need to complete at least 30 credits beyond their previous coursework.

When admitted, second degree candidates enter directly into the Bachelor of Science-Education Studies degree program. No additional application to Education Studies is required.

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of
their application to UW-Madison. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

\section*{APPLICATION AND ADMISSION}

While new first year students and off-campus transfers are admitted directly to the Bachelor of Science-Education Studies degree program, all other current UW-Madison students seeking to enter the B.S.Education Studies degree program must apply for admission to the program. Requirements and selection criteria may be modified from one application/admission period to the next. Potential applicants must consult with an advisor in the School of Education Student Services office prior to submitting an application. Call 608-262-1651 to schedule an appointment; current students can also schedule an appointment with an advisor online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW.

\section*{CRITERIA FOR ADMISSION}

Eligibility for admission consideration to Bachelor of Science-Education Studies degree:
- Cumulative grade point average of at least a 2.5 based on UWMadison campus coursework, as modified by the Last 60 Credits Rule described below. Note: Students declaring Education Studies as an additional major are not held to this requirement.
- Submission of all required application materials, including program application and transcripts.

\section*{Last 60 Credits Rule}

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

\section*{The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539). \\ ADDITIONAL MAJOR IN EDUCATION STUDIES}

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Education Studies as an additional major. Students wishing to declare the additional major must visit an advisor in the School of Education Student Services office to complete the declaration form; call 608-262-1651 or schedule an appointment with an advisor online through the Starfish app (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW. The declaration must also be approved by the student's home school/ college.

An additional major in Education Studies only requires the completion of the 30 credit major. Students do not need to complete the School of Education's liberal studies and other degree requirements for the additional major. Applicants are not held to the 2.5 cumulative GPA required of students completing the Education Studies degree program.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Education Studies program has three primary components:
- Liberal studies and general education courses that expose students to a broad range of academic disciplines.
- Major coursework in education studies, including core course, depth, and breadth requirements. Students choose either a U.S. or Global concentration.
- Elective credits to pursue individual areas of interest. Education Studies majors are encouraged to consider completing complementary coursework in the College of Letters \& Science, possibly including an additional major. The structure of the Education Studies degree program makes it possible to complete an additional major and still graduate in four years.

\section*{MAJOR REQUIREMENTS}

The Education Studies major requires 30 credits, to include core courses ( 9 credits), depth requirements ( 12 credits) and breadth requirements ( 9 credits). Students will select either a U.S. concentration or Global Concentration to fulfill the depth requirement of the major.

\section*{CORE COURSES, 9 CREDITS}

\hline ED PSYCH 506 & Contemporary Issues in Educational Psychology & 3 \\
\hline ED PSYCH 541 & Applied Behavior Analysis in Classrooms & 3 \\
\hline ELPA 640 & Legal Rights and Responsibilities for Teachers & 1-3 \\
\hline
\end{tabular}

NTER-LS 300
Topics in Teaching and Learning in the Letters, Arts, and Sciences (Understanding and Improving Instruction topic only; other topics require approval)

\section*{ELECTIVE CREDITS}

Complete additional credits to complete the minimum of 120 required for the degree. Education Studies majors are encouraged to consider completing complementary coursework in the College of Letters \& Science, possibly including an additional major. The structure of the Education Studies degree program makes it possible to complete an additional major and still graduate in four years.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS \\ GRADUATION REQUIREMENTS}

Based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.
- 2.5 cumulative grade point average in all upper-level major coursework ("upper-level" defined as numbered 300 and above).
- Major Residency: Students must complete at least 15 credits of upper-level major coursework in residence on the UW-Madison campus.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation.

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Formulate research-based arguments on topics in education policy using academic literature, including both primary and secondary sources.
2. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.
3. Examine education policy from multiple theoretical perspectives (e.g., ethical/philosophical, economic/political, etc.).
4. Learn to use different historical and/or qualitative social-science methods to answer major questions in education policy research, both contemporary and enduring.
5. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

\section*{FOUR-YEAR PLAN}

\section*{Education Studies: Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

ADVISING AND CAREERS

\section*{EDUCATION STUDIES ADVISING}

Students are advised by staff from the School of Education Student Services office (Room 139 Education Building) at SOAR and during the
regular academic year, see below. Admitted students are also assigned a departmental advisor.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Education Studies majors include: policy analysis, educational technology, youth and community programming, evaluation and research, training and other out-of-classroom educator roles both domestically and abroad. Our graduates also work in higher education, at think tanks, in government agencies as well as many other fields.

Students develop important skills that employers look for including:
- Diverse forms of communication (writing, presentation skills)
- Collaboration
- Critical thinking/analytical skills
- Turning information into action - advocacy/influence
- Diversity, equity, and inclusion
- Curriculum development and pedagogy

Applied experiences, including paid internships, career treks, and professional networking events, are available to UW Education Studies students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (http://eps.education.wisc.edu/)

\section*{WISCONSIN EXPERIENCE}

This is just placeholder text.

\section*{EDUCATION STUDIES AND THE WISCONSIN EXPERIENCE}

Education Studies (ES) coursework is enhanced by supplemental activities-in and beyond the classroom-that extend what students are learning in course texts and discussions.

Guest Speakers - Many Educational Policy Studies (EPS) courses include guest speakers such as prominent educational scholars from universities across the globe, local educational leaders from communitybased organizations and school districts, and educational policymakers.
The Department of Educational Policy Studies also hosts three speaker series each year that highlight cutting-edge research, ES alumni, career panels, an annual conference that addresses new developments in education (https://eps.education.wisc.edu/about/conferences/), and examples of how educational research can be used to inform policy and practice.

Additional Majors and Certificates - Many Education Studies students pursue a second major and/or certificates that complement the skills and knowledge they're gaining via their ES coursework and experiences.

Volunteer and Leadership Experiences - It is common for
Education Studies students to be involved in volunteer and leadership experiences on campus and/or within the broader community. Education Studies students have the opportunity to take Community-based Learning (CBL) courses in EPS that enable them to integrate what
they're learning in the classroom with what they're learning through their volunteerism in local educational spaces, such as schools, the United Way (https://www.unitedwaydanecounty.org/), Centro Hispano (https://www.micentro.org/), Goodman Center (https:// www.goodmancenter.org/), and other organizations.

Career Development and Internships - Our department encourages career development beyond our classrooms by offering courses such as ED POL 202: Careers in Education that helps prepare ES majors to pursue careers post-graduation and ED POL 203: Internship In Education which allows students to earn credit for education-affiliated internships.

Leadership and Mentoring - ES majors also have the opportunity to develop leadership skills through programs like the ES Ambassadors Program, in which students advise EPS faculty and staff and help recruit new students via their course presentations and participation in departmental events. Incoming and transferring Education Studies majors are invited to partake in our Education Studies Buddy program where they will be paired with a Junior or Senior Education Studies major for guidance and mentorship.

Awards - The ES program also has a number of awards (https:// eps.education.wisc.edu/about/student-awards/) that recognize excellence in undergraduate research, writing, and community engagement: the Outstanding Research in Education Studies Award, the Outstanding Paper in Educational Studies Award, and the Eric Flanagan Community-Engaged Scholarship Award.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{EDUCATIONAL POLICY STUDIES, CERTIFICATE}

The Educational Policy Studies Certificate was designed specifically for undergraduate students from across the campus. The certificate features multidisciplinary courses in the history, sociology, anthropology, economics, and philosophy of education, comparative and international education, and educational equity. Courses in policy analysis emphasize the socio-economic context and implications of policy decisions on equity, justice, and well-being. The completion of this certificate highlights a student's interest in the multiple dimensions of educational studies.

Students interested in pursuing this certificate are encouraged to consult with advising staff in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/starfish-studentresources/) in MyUW. Appointments can also be made through email, studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

The EPS certificate is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (https://guide.wisc.edu/nondegree/).

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

All current UW-Madison undergraduates are eligible to complete the Certificate in Educational Policy Studies. Students must complete at least one Educational Policy Studies (ED POL) (http://guide.wisc.edu/ courses/ed_pol/) course with a grade of B or better prior to declaring the certificate program. Students intending to complete the Educational Policy Studies Certificate should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/certificates/) page to complete the declaration form.

Students pursuing the Education Studies major, the Certificate in International Development and Education, the Certificate in Global Cultures, Languages, and Education, and/or the Certificate in Social Justice and Education, are not eligible to complete the Educational Policy Studies certificate.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Certificate in Educational Policy Studies requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.
- Complete a minimum of four Educational Policy Studies courses (https://guide.wisc.edu/courses/ed_pol/) (12 credits).
- Students must take at least one of the following courses:
\begin{tabular}{llr} 
Code & Title & Credits \\
ED POL 240 & Comparative Education & 3 \\
ED POL 300 & School and Society & 3 \\
ED POL/ & History of American Education & 3
\end{tabular}

HISTORY 412
- At least two courses must be numbered 300 or above.

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

\section*{LEARNING OUTCOMES}
1. Demonstrate an understanding of the social, cultural, and/or historical contexts of education policy.
2. Examine education policy from multiple theoretical perspectives (e.g., ethical/philosophical, economic/political, etc.).
3. Analyze education policy issues from diverse perspectives related to race, class, and/or gender, and other forms of social difference.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Educational Policy Studies can be found on the department's website. (http://eps.education.wisc.edu/)

> GLOBAL CULTURES, LANGUAGES, AND EDUCATION, CERTIFICATE

The Certificate in Global Cultures, Languages, and Education (GCLE) educates students about global cultural, sociolinguistic, literacy and language policy and planning perspectives.

The courses in the certificate explore key questions about the relationships among cultural diversity, social inequality, and language. They provide students with skills to work globally, within and beyond schools, in the field of culture, communication, and education.

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the Certificate in Global Cultures, Languages, and Education. To declare the certificate, students should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/certificates/) page to complete the declaration form.

Students pursing the Education Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in Global Cultures, Languages, and Education.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Certificate in Global Cultures, Languages, and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence.

Completion of the certificate requires a minimum GPA of 2.0 in certificate coursework.

\section*{LANGUAGE, CULTURE AND SCHOOLING \\ Select two of the following courses ( 6 credits):}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate an understanding of the social, cultural, and historical contexts of global language policy and linguistic and cultural practices.
2. Reflect on one's own position and the positions of others in global political, social, and institutional structures and the possibilities for growth and change for oneself and others.
3. Analyze information about culture and communication from diverse perspectives.
4. Formulate arguments on global topics in language, culture, and education using academic literature and theoretical frameworks, identifying and integrating diverse sources of information.
5. Collaborate and communicate ideas, reflections, and research effectively with people from a range of perspectives, cultures, and backgrounds.
6. Use practice to inform theory and research and theory and research to reflect on and modify practice.

\section*{INTERNATIONAL DEVELOPMENT AND EDUCATION, CERTIFICATE}

The Certificate in International Development and Education develops global education leaders who understand the complex issues that shape international education and are prepared to engage in transforming policy and practice. Students in this certificate explore a range of topics, including: poverty, inequity, sustainability, colonial relations, human rights, health disparities, and governance. Students will engage in self-reflection and analysis about who they are in relation to international development efforts and learn about new international education innovations that center collaboration and partnership.

Graduates of the certificate program will develop an understanding of the fields of international educational development and change. They can choose elective courses to deepen their research, evaluation, management, curriculum planning, and/or pedagogical skills to engage in reflexive, culturally-sensitive and sustainable approaches to improving education development policy, practice, and outcomes.

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the Certificate in International Development and Education. Students intending to complete this certificate should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/ certificates/) page to complete the declaration form.

Students pursuing the Education Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in International Development and Education.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Certificate in International Development and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence.

Completion of the certificate requires a minimum GPA of 2. 0 in certificate coursework.

\section*{CORE COURSE}

This course (3 credits) provides a foundational overview of the field of International Development Education and should be taken as early as possible.

\section*{Code \\ ED POL 260 \\ Title \\ Introduction to International Education Development \\ ED POL GLOBAL EDUCATION AND DEVELOPMENT ELECTIVES}

Credits

Select two courses from the following options (6 credits). These topical courses allow students to explore a key theme (e.g., human rights, climate change, poverty and inequality, health) in International Development Education in greater depth, or to deepen their understanding of the field of International and Comparative Education.
\begin{tabular}{llr} 
Code & Title & Credits \\

\hline
\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate an understanding of the global contexts of colonialism, US post-war imperialism, bi-/multi-lateralism, and capitalism that shape the international development and international education fields, as well as key debates and trends in the field.
2. Reflect on experiences, resources, and national positions and the positions of others engaged in the field of international development education; recognize the consequences of this positionality on one's own understanding of the concepts of human development and
wellbeing and of the desire to improve and develop other places and people; and critically examine possibilities for growth and change.
3. Analyze information about international development and education (as theory and as practice) from diverse disciplinary, methodological, and epistemological perspectives.
4. Evaluate multiple theories of change and effectively apply appropriate theories of change to key international development problems.
5. Formulate arguments on topics in international development and education by evaluating and then drawing from academic and practitioner literatures, and identifying and integrating diverse sources of information.
6. Communicate ideas, reflections, and research on international development and education effectively to people from a range of perspectives, cultures, backgrounds, and roles in the field of international development (e.g., policymakers, program officers, community members, Peace Corps volunteers, Fulbright, etc.).

\section*{SOCIAL JUSTICE AND EDUCATION, CERTIFICATE}

The Certificate in Social Justice and Education examines equity in educational policy and practice. It provides students with a foundational understanding of the social inequities that shape education and broader society. Students also learn how educators, students, administrators, parents, and community members have effectively responded to these inequities.

This certificate prepares UW-Madison students to critically analyze the role education policies and practices play in broader social inequalities and social justice efforts. Students connect course concepts and ideas to both their own lives as well as to historical and contemporary social and educational issues in education (in the U.S. and/or globally).

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the Certificate in Social Justice and Education. Students intending to complete this certificate should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/certificates/) page to complete the declaration form.

Students pursuing the Education Studies major or the Certificate in Educational Policy Studies are not eligible to complete the Certificate in Social Justice and Education.

\section*{REQUIREMENTS}

\section*{COURSE REQUIREMENTS}

The Certificate in Social Justice and Education requires the following course distribution for a minimum of 12 credits. At least 6 credits must be completed in residence. Completion of the certificate requires a minimum GPA of 2. 0 in certificate coursework.

All students are required to take ED POL 212 Education for Social Justice, a core course that provides students with foundational knowledge about social justice in education that they can build from and connect to their other coursework and assignments as part of the Certificate.

Students are also required to take three other courses that have a central focus on social justice in education, with two of the three courses in Educational Policy Studies. These courses meet most or all of the certificate's Learning Outcomes, and enable students to tailor the certificate to their specific topical and disciplinary areas of interest (e.g. historical perspectives on social justice and education, social justice and education in the U.S., comparative/global studies of social justice and education).

\section*{REQUIRED COURSE}

\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate an understanding of how education, and education policy and practice specifically, has been used as a tool for both social justice and the (re)production of inequality in the United States and/ or globally.
2. Identify and describe the social inequities that shape education and broader society, as well as how various social actors (e.g. educators, students, administrators, parents, and community members) have responded to these inequities through their social justice efforts.
3. Draw from theory and research to analyze issues of social justice in education.
4. Demonstrate an ability to apply critical thinking skills to the study of inequities in education, by recognizing and questioning knowledge claims and their own assumptions and preconceived notions.

\section*{EDUCATIONAL \\ PSYCHOLOGY}

Although the department does not offer an undergraduate major, students from across the campus may take undergraduate courses from this department, ranked \#2 in the nation by U.S. News \& World Report. Courses are offered in each of the main content areas: human development, learning sciences, and quantitative methods. The department also offers courses specific to teacher education programs.

The Education and Educational Services (p. 1713) certificate may be completed by undergraduate students from across the campus. This certificate provides a cohesive set of courses for students interested in the many aspects of education, but who choose not to major in education while completing their undergraduate degree. Students interested in child development, neuroscience and the process of learning, or educationrelated policies, for example, may wish to complement their current major with this substantive program in education.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Education and Educational Services, Certificate (p. 1713)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Educational Psychology can be found on the department's website (http://www.education.wisc.edu/edpsych/). (https:// edpsych.education.wisc.edu/)

\section*{EDUCATION AND \\ EDUCATIONAL SERVICES, CERTIFICATE}

Education is a topic of widespread interest to UW-Madison students and is one of the hotly contested subjects in today's politics and society. The Education and Educational Services (EES) Certificate Program provides a cohesive set of courses for undergraduate students interested in the many aspects of education, but who choose not to major in education during their undergraduate degree.

Students interested in child development, neuroscience and the process of learning, or education-related policies, for example, may wish to complement their current major with this substantive program in education. The certificate also provides grounding and learning experiences that will increase access to careers in education. Students completing the certificate may be considering future plans to:
- Enter a post-baccalaureate teacher education program.
- Pursue a graduate program focused on educational services, including programs such as counseling psychology, school psychology, and rehabilitation psychology.
- Complete advanced work in educational psychology or educational administration.
- Begin a career in teaching and learning settings and practices outside the K-12 education system.

This 15-credit certificate program offers a variety of course options that can be customized to each student's area of interest. It is also available to individuals who have already completed a bachelor's degree; see the Nondegree/Visiting Student Guide (http://guide.wisc.edu/nondegree/).

In addition to reading the information here, students may wish to consult the department's website (https://edpsych.education.wisc.edu/ academics/ees-certificate/) or email the EES administrator (ees@education.wisc.edu).

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

Students intending to pursue the Education and Educational Services Certificate should visit the School of Education's Certificate Programs (https://education.wisc.edu/academics/certificates/) page to complete the declaration form. The declaration for this certificate program can be submitted at any time during the calendar year.

Please note: Students completing a course of study designed to lead to teacher certification are not eligible to complete the EES certificate. This also includes School of Education degree students pursuing the education studies or communication sciences and disorders majors. Other students
completing a major within the School of Education are limited to 6 credits of overlap between their major and the certificate; that is, no more than 6 credits of coursework used to satisfy requirements for a major within the School of Education may also be counted toward completion of the EES certificate.

\section*{REQUIREMENTS}

Requirements of this 15-credit certificate program include both Foundation and Focus coursework. All coursework must be taken for a letter grade (not credit/no-credit or pass/fail) and students must earn at least a C grade in each course of the certificate. At least 12 credits of the certificate must be earned in residence at UW-Madison.

There is no formal prerequisite structure to the certificate, although students will generally be expected to take CURRIC 240 Critical Aspects of Teaching, Schooling, and Education first, followed by the two remaining Foundation courses and then the two Focus courses.

1
Students may also substitute up to 3 credits of independent study with faculty from the departments of Coun Psy, Curric, ELPA, Ed Pol, Ed Psych or RP\&SE. Independent study work with faculty from other School of Education departments may be considered; contact an advisor in the School of Education Student Services office.

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate may be completed within the context of an undergraduate degree or as a Special student after an undergraduate degree has been awarded from any institution. The certificate may be completed in its entirety while enrolled as a Special student. Candidates are encouraged to contact the certificate coordinator to discuss course enrollment and the sequencing of certificate requirements.

\section*{LEARNING OUTCOMES}
1. Understand how learning environments and pedagogical practices for students are grounded in concepts and interpretive frameworks provided by disciplines that study human development and learning. Understand both typical and atypical development in relation to education.
2. Understand basic cognitive, social, emotional, and biological bases of teaching and learning.
3. Understand how issues of race, class, gender, cultural, sexual orientation, immigrant status, language background, and disability status interact with various educational contexts to affect learning and its outcomes.
4. Understand how local, state, national, and global social and political contexts differentially affect schooling and its outcomes for students both typical and atypical development in relation to education.
5. Understand the multiple contexts in which education occurs.
6. Understand historical, political, and cultural influences on education and educational institutions.
7. Understand supportive services available to learners in educational contexts and institutions.
8. Be familiar with some of the issues and controversies surrounding the selection of concepts taught, the assumptions associated with content choices, tools of inquiry, and ways of reasoning.
9. Be an informed consumer of educational research and policy prescriptions.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Educational Psychology can be found on the department's website (http://www.education.wisc.edu/edpsych/). (https:// edpsych.education.wisc.edu/)

\section*{KINESIOLOGY}

The study of movement, physical activity, and exercise has the potential to dramatically impact health and quality of life. Department programs focus on the scientific study of movement behavior, anatomy and physiology, research in kinesiology and fundamentals of exercise, and application to health, physical education, and functional performance. The department's ultimate goal is to enhance human health, productivity, and quality of life.

The B.S. degree in Kinesiology (p. 1723) prepares students for graduate or professional study, and the B.S. degree in Physical Education (p. 1731) prepares teacher education students to teach physical education in elementary and secondary schools.

A collaborative B.S. degree program in Health Promotion and Health Equity (http://guide.wisc.edu/undergraduate/education/kinesiology/ health-promo-health-equity-bs/) is broadly designed to provide students with the skills and perspectives to facilitate healthy practices at the individual and societal levels.

Two certificates in Athletic Healthcare (p. 1715) and Promoting Activity for Diverse Abilities (p. 1739) may be completed by students pursuing kinesiology and other majors on campus.

The department also offers health theory, strength and conditioning, and leadership courses to improve understanding, appreciation, and use of the body in movement and sports. Once the kinesiology students have enrolled, kinesiology classes are open to all university students.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Athletic Healthcare, Certificate (p. 1715)
- Health Education, Minor (p. 1716)
- Health Promotion and Health Equity, B.S. (p. 1717)
- Kinesiology, B.S. (p. 1723)
- Physical Education, B.S. (p. 1731)
- Promoting Activity for Diverse Abilities, Certificate (p. 1739)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (https:// kinesiology.education.wisc.edu/)

\section*{ATHLETIC HEALTHCARE, CERTIFICATE}

The Certificate in Athletic Healthcare provides a structured undergraduate offering for students with an interest in healthcare for active populations. Students acquire specialized knowledge related to the fields of healthcare, sports medicine, and physically active populations.

The combination of required core courses and elective options makes this certificate appealing to students from a wide array of backgrounds and majors. Students can select elective courses that will be applicable to a variety of career interests; substitutions for the core courses are not allowed.

This program is intended to provide students with meaningful learning experiences and ultimately an advantage in pursuing advanced or professional degrees in a variety of health-related fields.

\section*{HOW TO GET IN}

\section*{DECLARATION PROCESS}

Students must complete KINES 127 Introduction to Athletic Healthcare to apply to the certificate program. Students intending to complete the Athletic Healthcare certificate will find the declaration form on the School of Education's Certificate Programs (https://education.wisc.edu/ academics/certificates/) page. The declaration for this certificate program can be submitted at any time during the calendar year.

Students completing a Bachelor of Science degree in Athletic Training may not complete the Certificate in Athletic Healthcare.

REQUIREMENTS

Requirements of this minimum 14-credit certificate program include both required and elective coursework. All coursework must be taken for a letter grade. Certificate students must earn a minimum grade point average of 2.5 on required certificate coursework. At least 8 credits must be earned in residence at UW-Madison.

\section*{CORE COURSES}

Complete all of the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
KINES 127 & Introduction to Athletic Healthcare & 2 \\
\hline KINES 227 & \begin{tabular}{l} 
Introduction to Clinical Anatomy of \\
Human Movement
\end{tabular} & 2 \\
KINES 387 & \begin{tabular}{l} 
The Young Athlete: Considerations \\
for Exercise, Medicine, and Activity
\end{tabular} & 2 \\
KINES 487 & \begin{tabular}{l} 
Athletic Healthcare: Contemporary \\
Perspectives
\end{tabular} & 3
\end{tabular}

\section*{BREADTH ELECTIVE COURSES}

Complete a minimum of 5 credits from the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline C\&E SOC/SOC 533 & Public Health in Rural \& Urban Communities & 3 \\
\hline HDFS 262 & Development of the Young Child (was 362 prior to fall, 2023) & 3 \\
\hline HDFS 263 & Development from Adolescence to Old Age (was 363 prior to fall, 2023) & 3 \\
\hline KINES 140 & Science and Practice of Resistance Training & 2 \\
\hline KINES 150 & Foundations of Health Behavior and Health Equity & 3 \\
\hline KINES 555 & Sports Science \& Athlete Monitoring & 3 \\
\hline NURSING/ S\&A PHM/ SOC WORK 105 & Health Care Systems: Interdisciplinary Approach & 2 \\
\hline POP HLTH 370 & Introduction to Public Health: Local to Global Perspectives & 3 \\
\hline
\end{tabular}
\begin{tabular}{llr} 
RP \& SE 125 & \begin{tabular}{l} 
Health and Rehabilitation \\
Professions
\end{tabular} & 3 \\
RP \& SE 310 & Positive Psychology and Well Being & 3 \\
PSYCH 405 & Abnormal Psychology & \(3-4\)
\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Define Athletic Healthcare and identify components of the healthcare system commonly used in athletic healthcare.
2. Differentiate specific roles of healthcare professions that comprise a interdisciplinary healthcare team.
3. Identify the impact of public health policy on clinical practice in athletic healthcare.
4. Develop practical skills and knowledge that are commonly utilized in an athletic healthcare clinical setting.

\section*{HEALTH EDUCATION, MINOR}

Health education is a subject equally important, or even more important, than other subject areas. It is critical to students' education and development, and is a foundation for their success in all endeavors in school and life.

The Health Education minor at UW-Madison prepares individuals to teach health as a separate course or as an integral part of other subject areas. Students are also trained to assist school administrators and teaching staff in developing a broad school health program, engaging many aspects of the school and community at large.

The curriculum for the Health Education minor is varied. At its foundation lies health-related content. Building on that foundation, students are taught a skills-based approach to teaching health, which empowers youth in schools to make wise health-related decisions. Student teaching in a middle school or high school health classroom is the culmination of the Health Education minor.

We are committed to providing quality health instruction to our students, and ultimately to developing health-literate students in schools. To that end, the Health Education minor includes:
- Standards-based curriculum
- Skills-based approach to teaching health education
- Placements in urban/suburban/rural, inclusive, and multicultural settings
- Small class sizes and advising groups
- Instruction within the nationally ranked UW-Madison School of Education

Students in physical education teacher education or teachers already licensed to teach at an appropriate level in Wisconsin are eligible to complete the Health Education minor.

Graduates are eligible to apply for a Wisconsin teaching license in Health at the Kindergarten through Grade 12 level.

\section*{HOW TO GET IN}

Upon admission into their teacher education degree program in the School of Education, students should meet immediately with the Health minor coordinator to develop a course completion schedule.

Students should meet with the Pre-Declaration Physical Education Advisor to declare the Health Education minor; see Contact Information for details.

\section*{REQUIREMENTS}

Complete a minimum of 23 credits to include all coursework below. A minimum 2.75 GPA is required, based on all UW-Madison coursework included in the minor requirements.

Students may wish to consult with the Health minor coordinator or advising staff in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall, 608-262-1651.

Upon acceptance into a major program in the School of Education, students should meet immediately with the Health minor coordinator to work out a schedule for required courses.

\section*{CORE REQUIREMENTS (23-24 CREDITS)}
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline KINES 116 & First Aid and Basic Life Support \({ }^{1}\) & 2 \\
\hline ANAT\&PHY 235 or ANAT\&PHY 335 & Human Physiology and Health Physiology & 4 \\
\hline KINES 501 & Theory-Based Health Education and Health Promotion Programs & 3 \\
\hline KINES 547 & Skills for Health: Methods and Practicum of Teaching Health & 3 \\
\hline SOC WORK 453 & Substance Use Disorders & 3 \\
\hline Take one of the followi & & 3-4 \\
\hline SOC/PSYCH 160 & Human Sexuality: Social and Psychological Issues & \\
\hline PSYCH/SOC 453 & Human Sexuality & \\
\hline ED POL/ CURRIC 677 & \begin{tabular}{l}
Education, Health and Sexuality: \\
Global Perspectives and Policies
\end{tabular} & \\
\hline KINES 566 & Promoting Health in the Community & 3 \\
\hline KINES 568 & Student Teaching in Health Education \({ }^{2}\) & 2 \\
\hline
\end{tabular}

\section*{Total Credits}

Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid AND either American Red Cross Basic Life Support or American Red Cross CPR/AED for Professional Rescuers.

If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.
Documentation of current certification must be presented to the Health Education program advisor. If the certification equivalent is used, the minor will require 24 credits.

\section*{2}

Eligibility for student teaching requires the completion of all courses required for the minor with a minimum GPA of 2.75 . Students must also meet the content knowledge requirements for Health Education. A meeting with the Health minor coordinator is required before submitting a student teaching application. Students should bring a current transcript to this meeting. Special arrangements can be made for teachers seeking add-on certification in Health Education.

\section*{HEALTH PROMOTION AND HEALTH EQUITY, B.S.}

The Health Promotion and Health Equity (HPHE) major was created through a collaborative effort across the departments of Counseling Psychology, Kinesiology, and Rehabilitation Psychology and Special Education in the School of Education. The Department of Kinesiology is the home of this major; its mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

The core courses ( 31 credits) form the main content of the major and include: conceptual and theoretical foundations of health; awareness of multiple determinants of physical and psychological health; program planning, administration, and evaluation; and working effectively with underserved populations (e.g., persons with disability; low-income groups; racial and ethnic minority populations).

The elective curriculum ( 9 credits) will allow students to tailor the major in the direction of their personal interests (Physical Activity and Public Health; Chronic Illness, Disability and Health; Health Equity, Mental Health and Well-Being; Social Determinants of Health; Health Sciences).

The program is broadly designed to provide students with the skills and perspectives to facilitate healthy practices at the individual and societal levels. Students will learn about the theoretical, programmatic and empirical foundations of health promotion and health equity interventions and be taught to demonstrate competence in evaluating strengths and weaknesses in health promotion programs.

The coursework will prepare students for emerging career opportunities as health educators within community health organizations, hospitals, mental health centers, clinics, schools and universities, businesses and non-profits, governmental health offices, and various other public healthrelated professions.

\section*{HOW TO GET IN}

\section*{ADMISSION OVERVIEW}

Students interested in Health Promotion and Health Equity may complete this major in two ways: (1) by entering the School of Education to complete a Bachelor of Science degree with a major in Health Promotion and Health Equity, or (2) adding the Health Promotion and Health Equity major as an additional major while completing another degree and major on campus. Students selecting the second option should review the Additional Major in Health Promotion and Health Equity (p. 1718) section below.

\section*{ENTERING THE SCHOOL OF EDUCATION \\ NEW AND CURRENT UW-MADISON STUDENTS}

New freshmen and off-campus transfers interested in completing the Bachelor of Science degree with the Health Promotion and Health Equity major are admitted directly to the School of Education and the major upon admission to UWMadison. Current UW-Madison students wishing to transfer to the School of Education to complete an undergraduate degree with this major must meet with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the university to enroll in a School of Education degree program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information. Prospective transfer students are advised to meet with an advisor in the School of Education Student Services office in person or by telephone in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person or via telephone; to schedule, call 608-262-1651.

Applicants who already hold an undergraduate degree are admitted to the School of Education as a candidate for a second degree upon completion of the admission process. Second degree students are seeking a second degree that is unrelated to their first degree. More information is available here (p. 1539) under the Students with a Previous Degree heading.

\section*{APPLICATION AND ADMISSION}

New freshmen and off-campus transfers are admitted directly to the Bachelor of Science-Health Promotion and Health Equity degree program. Current UW-Madison students must consult with an advisor in the School of Education Student Services office
(608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major.

Note: Requirements and selection criteria may be modified from one application/admission period to the next.

\section*{CRITERIA FOR ADMISSION}

Eligibility for admission consideration to the Bachelor of Science-Health Promotion and Health Equity degree:
- Cumulative grade point average of at least a 2.5 based on UWMadison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Filing of all required paperwork and other application materials, including program application and transcripts.

\section*{Last 60 Credits Rule}

Two grade point averages may be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{ADDITIONAL MAJOR IN HEALTH PROMOTION AND HEALTH EQUITY}

Undergraduate students from all schools and colleges on campus may declare Health Promotion and Health Equity as an additional major.

Students wishing to declare the additional major must meet with an advisor in the School of Education Student Services office (608-262-1651) or with the Health Promotion and Health Equity advisor (hphe@education.wisc.edu), to transfer and declare the major. The declaration must also be approved by the student's home school/college.

Students completing Health Promotion and Health Equity as an additional major do not need to complete the School of Education's liberal studies and other degree requirements unless their primary major is also in the School of Education.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies \\ Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.}

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Bachelor of Science (B.S.) degree program in Heath Promotion and Health Equity has three primary components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Major requirements provide an opportunity to study the interrelated areas of physical health, mental health, and disability.
- Additional electives to reach the minimum of 120 degree credits. These credits allow students to pursue additional health-related courses, enroll in course work required for admission to graduate-level programs or develop other areas of interest. Health Promotion and Health Equity majors may also use these elective credits to complete an additional major to augment their interest in health or to explore a completely different subject.

\section*{MAJOR REQUIREMENTS}

Complete a minimum of 40 credits with a 2.5 gpa across all major course work. At least 15 credits of upper-level major course work (courses numbered 300 and above) must be taken in residence with a minimum 2.5 grade point average.

\section*{REQUIRED HEALTH PROMOTION CORE, 31 CREDITS}

\end{tabular}

\section*{GPA AND OTHER GRADUATION REQUIREMENTS GRADUATION REQUIREMENTS}

These requirements are based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- Cumulative major grade point average: 2.5 cumulative grade point average in all major course work.
- Upper-level major course work: 2.5 cumulative grade point average in all upper-level (courses numbered 300 and above) major course work.
- Major Residency: Students must complete at least 15 upper level major credits while enrolled in residence on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits: A minimum of 120 credits are required for graduation in the Health Promotion and Health Equity degree program.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Recognize concepts and theories related to health promotion and health equity.
2. Relate the role of social factors in facilitating or hindering health.
3. Evaluate the strengths and weaknesses of health behavior and health equity interventions.
4. Identify links between physiological and psychological health.
5. Interpret and communicate the interaction between personal and environmental determinants of health and well-being.
6. Draw from personal and professional identities to develop socially just practices and to lead effectively within their communities of practice.

\section*{FOUR-YEAR PLAN}

\section*{Health Promotion and Health Equity: Sample Four-Year Plan}

This sample four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Freshman}
\begin{tabular}{|c|c|c|c|}

\end{tabular}

\section*{15}

\section*{Total Credits 120}

Note: The HP \& HE major requires 9 credits of elective course work. A number of the course options, e.g., RP \& SE 100, RP \& SE 121 RP \& SE 125; COUN PSY 225, COUN PSY 230; KINES 100, KINES 123; PSYCH 202; NUTR SCI 132, can be taken during the freshmen and sophomore years.

\section*{ADVISING AND CAREERS}

\section*{HEALTH PROMOTION AND HEALTH EQUITY ADVISING}

Students are collaboratively advised by advising staff in the School of Education Student Services office and in the department. Students not yet declared in Health Promotion and Health Equity meet with advising staff in the Student Services office, see below, or the departmental advisor. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for HPHE majors include: community health and wellness education, health policy analysis, public health advocacy, and direct individual client care supporting physical, mental, and social wellness. Our graduates work in community health organizations, hospitals/clinics, mental health centers, schools and universities, businesses and non-profits, governmental health offices, and various other public health-related professions.

Students develop important skills that employers look for including:
- Communication
- Critical thinking/analytical skills
- Collaboration and teamwork
- Client-centeredness/empathy
- Influencing in support of diversity, equity, and inclusion at individual, community, and systemic levels
- Planning and organizational skills

Applied experiences, including paid internships, career treks, and professional networking events, are available to UW Health Promotion and Health Equity students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Health Promotion and Health Equity major can be found on the departmental websites of Counseling Psychology (https:// counselingpsych.education.wisc.edu/), Kinesiology (https:// kinesiology.education.wisc.edu/), and Rehabilitation Psychology and Special Education. (https://rpse.education.wisc.edu/)

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\title{
HEALTH PROMOTION AND HEALTH EQUITY (HPHE) AND THE WISCONSIN EXPERIENCE
}

\author{
Community Based Activities
}

HPHE students have an opportunity to become involved in the Fit Families (https://education.wisc.edu/news/capital-times-spotlights-uw-madisons-luis-columna-and-fit-families-program/) program, developed by Dr. Luis Columna. Fit Families is a physical activity program that brings together children with disabilities, their parents, college students and in-service professionals in related fields such as adapted physical education, special education, orientation \& mobility, psychology, physical education, and exercise science.

Students also participate in programs run through the Wisconsin Area Health Education Centers (AHEC), such as the Community Health Internship Program (https://ahec.wisc.edu/chip/).

\section*{HPHE majors have crafted their Wisconsin Experience in some of the following ways:}
- A student majoring in HPHE is the event coordinator of a new student organization, the HPHE Learning Community. This individual is also part of a research team that codes conversations about the health and well-being of Latino children and is a teaching assistant for the Waisman Early Childhood Program.
- An HPHE student developed a passionate interest in social justice-based public health after interning at Milwaukee's Gerald Ignace Indian Health Center and the Philippine Cultural and Civic Center Foundation. They are currently working with the Wisconsin Division of Public Health as an enteric disease research analyst and beginning research on Asian American health under Dr. Dorothy Edwards and the NIH's All of Us (https://allofus.wisc.edu/? elqTrackld=38719B11F064F2937F31EA8EC23D7CFB\&elq=c21876c This semester they will continue participating on the Asian Pacific Islander Desi American (APIDA) Heritage Month Planning Committee, the Kinesiology department's Equity Climate, and Diversity Committee, and has joined the HPHE Learning Community's Spring, 2023 cohort.
- Another one of our students is combining HPHE with the Gender and Women's Studies Certificate. This student has spent time as a research and communications intern of the Social Media Adolescent Health Research Team (SMAHRT) and presented at two national conferences. They also assumed the role of a fellow in the Undergraduate Research Scholars Program of the College of Letters \& Science, facilitating conversations among undergraduate students in a weekly seminar. Previously, they worked as an intern lead for the Technology and Mental Wellness Program Youth Advisory Board, and internationally as a volunteer at the Galway Autism Partnership (GAP) in Galway, Ireland.
- An HPHE student with certificates in environmental studies, French, and global health is part of a team working on developing an evidence-based physical activity program for adolescents. Last summer was spent teaching in a low-income neighborhood.
- While also completing the Certificate in Disability Rights and Services, this student serves as the co-president of the HPHE Learning Community and helped to found the organization. They work as a social media and marketing assistant for two

UW-affiliated organizations and as a peer advisor with the Cross College Advising Service.
- A student majoring in HPHE and working toward certificates in environmental studies and global health is the treasurer of the HPHE Learning Community student organization and has been elected to serve in a financial position for the Slow Food Club on campus.

\section*{CERTIFICATION/LICENSURE}

The National Commission for Health Education Credentialing (NCHEC) offers a Certified Health Education Specialist (CHES) exam. The HPHE program coordinators are currently working with NCHEC to insure that students completing the HPHE major requirements are qualified to take the CHES exam. Students in the HPHE program will be informed when this assurance has been received from NCHEC.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{KINESIOLOGY, B.S.}

The Kinesiology department's mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life.

Students in this major take coursework grounded in the basic sciences (e.g., physiology, anatomy, biology) and in kinesiology. Kinesiology core courses examine how the body responds to physical activity, the role of physiology and psychological factors in exercise, mechanics driving
 the lifespan, and the role of physical activity in the health of the U.S. population.

The curriculum includes coursework, laboratory research opportunities, and hands-on learning experiences. In addition, at least 11 credits of electives in exercise and movement science are required, giving students some flexibility to tailor the program to their specific interests. Examples of elective topics include strength and conditioning, leadership, health theory, and advanced courses in exercise physiology, exercise psychology, and biomechanics.

Kinesiology is a pre-professional program. This means that our students are well prepared for subsequent graduate or professional training in different health-related disciplines. The degree also prepares students for graduate programs in kinesiology and athletic training. Kinesiology graduates also pursue entry-level careers in a wide variety of professions, including those in the area of fitness.

\section*{Graduating seniors have reported starting the following jobs:}
club coach, programming administrator, medical scribe, AmeriCorps, rehabilitation aide, personal trainer, research assistant/specialist, physical therapy aide, nursing home caregiver, nanny, group exercise instructor, certified nursing assistant, medical device sales, strength and conditioning internship, United Cerebral Palsy inclusion facilitator, financial counselor,

EKG tech, behavioral technician, project manager, ranch worker, wellbeing intern, glacier guide.

Graduating seniors have reported acceptance into the following graduate programs: Doctor of Physical Therapy, Master of Public Health, Doctor of Medicine, Chiropractic School, Clinical Exercise Physiology, Biomedical Engineering, Master in Physician Assistant Studies, Doctor of Occupational Therapy, Master of Science in Exercise Science, Master of Science in Applied Sport and Exercise Psychology, Dentistry.

HOW TO GET IN

\section*{KINESIOLOGY DECLARATION OVERVIEW}

Incoming freshmen typically enter UW-Madison as Pre-Kinesiology students (PKN), spend the first two years completing liberal studies, general education, and Kinesiology prerequisite requirements, and declare the Kinesiology major during their sophomore year for the final two years on campus.

On-campus students starting at UW-Madison in other majors can move to Pre-Kinesiology by completing a Pre-Professional Declaration (http:// www.education.wisc.edu/soe/academics/undergraduate-students/ academic-program-admission/). A GPA of 2.75, based on all UW-Madison coursework or the last 60 credits (p. 1539), is required to transfer into Pre-Kinesiology. It is not necessary to be a Pre-Kinesiology student before declaring Kinesiology.

\section*{ELIGIBILITY TO DECLARE KINESIOLOGY}

Kinesiology currently accepts declarations once a year, from December 1st through February 1st. The on-campus declaration form is located on the School of Education's Undergraduate Admissions (http:// www.education.wisc.edu/soe/academics/undergraduate-students/ academic-program-admission/) page, along with information about the declaration period, deadline, and current eligibility requirements. Students should consult this site prior to submitting a declaration as this information may be modified from one declaration period to the next.

Off-campus students wishing to transfer directly into Kinesiology should complete the on-campus declaration and must also be admitted to UWMadison. See Transfer Students and Students with a Bachelor's Degree, below.

\section*{ELIGIBILITY REQUIREMENTS:}
- Complete the following prerequisite coursework by the end of the spring semester of the declaration year:
\begin{tabular}{llr}
\begin{tabular}{ll} 
Code & Title
\end{tabular} & Credits \\
Biology Sequence
\end{tabular}\(\quad\)\begin{tabular}{l} 
Complete one of the following Biology sequences:
\end{tabular}
\& BIOLOGY/
ZOOLOGY 102

1
Students who take BIOLOGY/BOTANY/ZOOLOGY 151 at UW-Madison or transfer it from another campus must also take BIOLOGY/BOTANY/ ZOOLOGY 152 to complete the Biology sequence.
2
Students awarded credit for BIOLOGY/BOTANY/ZOOLOGY 151 via an AP or IB Biology exam score of 4 or 5 have completed the entire Biology sequence.
- Students may complete no more than three of the prerequisite courses during the spring semester of the declaration year. For this purpose CHEM 109 satisfies the full general chemistry requirement and constitutes one course. BIOLOGY/ ZOOLOGY 101 and BIOLOGY/ZOOLOGY 102 are counted as two courses in determining eligibility for the program.
- Earn a minimum 2.75 cumulative GPA or a 2.75 cumulative GPA based on the Last 60 Credits Rule by the end of the fall semester of the declaration year. \({ }^{3}\)

\section*{3}

Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare Kinesiology. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1539).

Students will be provisionally admitted in the spring, pending the completion of all prerequisite courses and GPA requirements by the end of the spring semester.

\section*{TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE}

Transfer students and second degree candidates (students who already hold a Bachelor's degree) must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (http://www.admissions.wisc.edu) for campus application information.

Students wishing to transfer directly into Kinesiology should complete both the on-campus Kinesiology declaration and the UW-Madison application. All eligibility requirements must be met. Other transfer and second degree candidates will be admitted to UW-Madison with the PreKinesiology designation.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second undergraduate degree is awarded upon its completion; more information is available here (p. 1539).

Off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

\section*{ADVISING AFTER DECLARATION}

The Kinesiology department holds mandatory spring orientation sessions for new majors, led by a departmental advisor. The sequencing of coursework and enrollment in Kinesiology courses are addressed at these meetings. Students will be authorized to enroll in Kinesiology courses after the orientation meetings are completed.

After declaration, advising about the major will be provided by the Department of Kinesiology. Majors are required to meet with the departmental advisor at least once per semester. All questions about School of Education and university requirements should be referred to an advisor in the School of Education Student Services office.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Kinesiology program has five components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Science core coursework offers in-depth study of the basic sciences and mathematics.
- Kinesiology core courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- Advanced coursework in Kinesiology requires at least 11 credits of Kinesiology electives, thus giving students some flexibility to tailor the program to their specific interests.
- Elective classes are generally related to the student's area of study and are taken to reach the minimum of 120 credits.

\section*{SCIENCE CORE}
\begin{tabular}{|c|c|c|}

\hline KINES 600 & Advanced Exercise Psychology \\
\(\mathbf{1}\) & \\
KINES 116, KINES 119 and KINES 350 may be taken prior to admission into \\
the professional part of the undergraduate program.
\end{tabular}

2
Students may exempt from KINES 116 First Aid and Basic Life Support by completing American Red Cross First Aid AND either American Red Cross Basic Life Support or American Red Cross CPR/AED for Professional Rescuers.
If a student wishes to request that a different course (or courses) be considered, contact the Department of Kinesiology undergraduate office PRIOR to enrolling.

Criminal background investigations may be conducted for some students, based on the site of the practicum assignment. The cooperating agency to which the student has been assigned will determine if a background check is necessary.

\section*{ADVANCED COURSEWORK IN KINESIOLOGY}

This requirement was previously listed under the Exercise and Movement Science option; (p. 1731) it has not changed.

Select a minimum of 11 credits from the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline KINES 250 & Sedentary Behavior in the U.S. and Abroad & 3 \\
\hline KINES 312 & Technology for Physical Activity and Health Professionals & 2 \\
\hline KINES 325 & Group Development and Behavior Management & 3 \\

\hline KINES 615 & Laboratory Techniques in Exercise Physiology & 2 \\
\hline KINES 618 & Biomechanics & 2-3 \\
\hline
\end{tabular}

\section*{ELECTIVE COURSEWORK}

Select additional courses to reach the minimum of 120 credits.

\section*{CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY}

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus coursework. Consult the School of Education's Academic

Policies and Procedures (p. 1539) for additional information about the Continuation requirement.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS

These requirements are based on UW-Madison coursework.
- Must earn a minimum 2.50 cumulative grade point average. Graduation GPA may be modified by the Last 60 Credits Rule (p. 1539).
- Major residency: Students must complete a minimum of 15 credits from the Department of Kinesiology while enrolled on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Must complete a minimum of 120 credits.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
\(\left.\begin{array}{ll}\text { Residency } & \begin{array}{l}\text { Degree candidates are required to earn a minimum of } \\
30 \text { credits in residence at UW-Madison. "In residence" } \\

\end{tabular}

\section*{EARNING OUTCOMES}
1. (Knowledge) Define and explain major concepts across the breadth of kinesiology.
2. (Application) Apply their knowledge related to movement and physical activity techniques and approaches in clinical and applied settings to enhance human health and quality of life.
3. (Critical Thinking) Demonstrate competence in the scientific research process, which includes the ability to consume, analyze, interpret and critically review scientific literature.
4. (Communication) Develop appropriate styles of written and oral communication to use both within and outside of the scientific community.

\section*{FOUR-YEAR PLAN}

\section*{Kinesiology: Sample Four-Year Plans}

A four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Two plans are presented below. The first is for students testing into
MATH 112 Algebra, followed by a plan for students testing into MATH 211 Calculus or MATH 221 Calculus and Analytic Geometry 1.

\section*{For Students Testing Into MATH 112 Algebra}

\section*{Freshman}
\begin{tabular}{|c|c|c|}
\hline Fall & Credits Spring & Credits \\
\hline Communication A (fall or spring semester) & 3 Communication A (fall or spring semester) & 3 \\
\hline MATH 112 (also meets Quantitative Reasoning A) & 3 KINES 119 & 2 \\
\hline Liberal Studies course work & \[
\begin{aligned}
& \text { 9-12 BIOLOGY/ } \\
& \text { ZOOLOGY } 101
\end{aligned}
\] & 3 \\
\hline & CHEM 103 & 4 \\
\hline & Ethnic Studies & 3 \\
\hline
\end{tabular}
\begin{tabular}{|c|c|c|c|}
\hline & & Liberal Studies course work & 0-3 \\
\hline & & 5 & 15 \\
\hline \multicolumn{4}{|l|}{Sophomore} \\
\hline Fall & Credits & Spring & Credits \\
\hline BIOLOGY/ ZOOLOGY 102 & & 2 PHYSICS 103 & 4 \\
\hline CHEM 104 & & 5 STAT 371 or PSYCH 210 (also meets Quantitative Reasoning B) & 3 \\
\hline MATH 113 & & 3 KINES 116 & 2 \\

\hline
\end{tabular}

\section*{Total Credits 120}

\section*{1}

A total of 11 credits of Advanced Kines Electives are required. Elective course options are 2-3 credits.

\section*{ADVISING AND CAREERS}

\section*{KINESIOLOGY ADVISING}

Students not yet admitted to Kinesiology meet with an advisor in the School of Education Student Services office, see below. Once admitted to the professional program, students are also advised in the Department of Kinesiology.

\section*{SCHOOL OF EDUCATION ADVISING \\ ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers

\section*{- Professional networking}
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Kinesiology majors include: fitness instructor, personal trainer, exercise physiologist, research assistant/specialist, physical therapy aide, health and wellness manager, performance enhancement and management, certified nursing assistant, medical device salesperson, strength and conditioning coach, programming administrator, and project manager. Our graduates also pursue graduate studies in physical therapy, public health, medicine, exercise science, athletic training, occupational therapy, and more.

Students develop important skills that employers look for, including:
- Communication
- Collaboration
- Critical thinking/analytical skills
- Supporting diverse populations with diverse needs
- Application of theory to practice
- Influencing and motivation

Applied experiences, including paid internships, practicum experiences, career treks, and professional networking events, are available to UW Kinesiology students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website. (https:// kinesiology.education.wisc.edu/)

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in
venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{KINESIOLOGY AND THE WISCONSIN EXPERIENCE}

Research in the Kinesiology Department - Students are serving as Research Assistants in the labs of Professors Cook, Ausderau, Andreae, Schrage, Barnes, and Mason, and also in the Promotion of Health Equity \& Adapted Physical Activity (PHEAPA) lab. Kinesiology students may apply for the American Physiological Society Summer Undergraduate Research Fellowship.

Participation in Departmental Activities - Undergraduate students are members of the Equity, Climate, Diversity and Undergraduate Studies Committees, are peer learning facilitators in ANAT\&PHY 335 and 337, and participate in the KinEqT Mentorship Program.

The peer learning facilitators hold study groups for current Kines students either in ANAT\&PHY 335 or 337. These students have a weekly meeting with the instructional staff to cover common challenges in the content and to go over the plan for the study groups, including community building, active learning, and peer facilitation strategies. This is not a tutoring session, but a peer-led facilitation of learning by asking questions and helping the students work with the material in new ways.

The new KinEqT mentorship program is organized by graduate students to help undergraduate students connect and build community in the Department. The program helps facilitate mentorship and\#access to\#resources-both academic and professional-between graduate and undergraduate students with underrepresented racial, disability, social class and gender identities, especially those who are\#underrepresented\#within the UW-Madison Department of Kinesiology.

Related Student Organizations - Sports Medicine \& Athletic Healthcare Club, Pre-PT club, Kinesiology Club, Students for Rare, an organization that promotes activism for individuals suffering from rare diseases, and Letters of Love, writing positive letters for children in hospitals.

Study Abroad Courses - In the summer of 2023 the Department of Kinesiology offered two new study abroad courses in Portugal and Costa Rica.
- Movement as Medicine in Portugal examines the connection between sedentary behavior and health outcomes in Portugal. Participants review definitions and rates of sedentary behavior, physical activity and physical inactivity in the U.S. and across the globe. While in Lisbon, participants hear from local experts and members of the healthcare and educational systems about how physical activity is viewed and promoted across the population. Side trips to relevant cultural local places contribute to the full picture of health in Portugal. An overnight trip to Porto and two additional day trips provide additional opportunities to learn more about local culture and history.
- Team Building in Costa Rica was designed to enhance the group development skills of its participants while engaging in activities such as white-water rafting, ziplining and hiking. It combined a very successful kinesiology course, Kinesiology 325 Group Development and Behavior Management, with a unique cultural opportunity in Costa Rica. Each day provides opportunities to not only explore the Pura Vida (Pure Life)
of Costa Rica, but also to engage in personal reflection. Participants experience the process of growing together as a community and develop skills to create lasting communities in their personal and professional lives. Students earn credit for Kines 325 , a required course in the physical education program.

Volunteering - Students have volunteered to work with Ballroom Basics for Balance (BB4B), GiGi's Playhouse, and helped out in adapted fitness, assisted living, and pro bono clinic settings.

Paid Work Experiences Related to Kinesiology - Current Kines students have found employment in some of the following areas: Physical Therapy Aide, University Health Services Student Health Technician - SH/GYN Clinic, Nuclear Cardiac Stress Testing Intern, UnityPoint Health, Nursing Care Partner, Recreation \& Wellbeing, Nicholas Recreation Center Member Services Supervisor, Badger Sports Camps, UWMadison, Cardiac Rehab Intern SSM St Mary's Hospital Center of Wellness, Personal Caregiver, Home Health Aide.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{KINESIOLOGY: EXERCISE \& MOVEMENT SCIENCE}

\section*{Admissions to the Kinesiology: Exercise \& Movement Science, B.S. have been suspended as of fall 2022 and will be discontinued as of fall 2025. If you have any questions, please contact the department.}

Due to the suspension and discontinuation of the Exercise and Movement Science option, the courses listed on this Requirements tab have merged with the other Kinesiology, B.S. Degree (p. 1725) requirements; see the Kinesiology Core and Advanced Kinesiology Electives. The Kinesiology degree requirements have not changed with the elimination of this option.

\section*{REQUIREMENTS}

Due to the suspension and discontinuation of the Exercise and Movement Science option the courses listed here have merged with the other Kinesiology, B.S. Degree (p. 1725) requirements; see the Kinesiology Core and Advanced Kinesiology Electives. The Kinesiology degree requirements have not changed with the elimination of this option.

\section*{PHYSICAL EDUCATION, B.S.}

Now more than ever, our society is focusing on health. The UW-Madison physical education program is committed to developing professionals who will provide the best movement experiences possible. Improvements in physical education experiences can inspire increased physical activity, with the potential to benefit the health of millions of people.

The Bachelor of Science degree in Physical Education prepares individuals for careers in a variety of areas. At the heart of the degree is the physical education teacher education program, which has been preparing excellent physical educators since 1911. The Bachelor of Science degree in Physical Education is the key to obtaining physical education teaching positions in Wisconsin, other states, and internationally. Graduates of the program have received state-level awards for their teaching accomplishments.

A degree in physical education also readies individuals for other career paths. Some graduates have pursued teaching positions outside of school settings. Other graduates of the program have successful careers in many positions unrelated to teaching. Program alumni are well represented in the areas of coaching and officiating, recreation, fitness, healthcare and sport management. A few alumni are coaching at the NCAA Division I level or working for the U.S. Olympic Committee or the Cincinnati Bengals.

The careers of some of our physical education alumni are highlighted here (https://kinesiology.education.wisc.edu/academics/undergraduate-programs/bs-in-physical-education/alumni-of-pete/).

We are committed to transforming physical education into a powerful experience in which students develop physical, mental, and social skills for life. To that end, our program includes the following elements:
- A standards-based curriculum
- A cutting-edge conceptual approach to teaching physical education
- "Hands-on" guided teaching
- Culturally responsive teaching techniques in urban, inclusive, and multicultural settings
- Social and emotional learning that incorporates community building and behavior management
- Appropriate and sequential motor skill development

Physical education students also benefit from:
- Nationally and state recognized faculty and staff members
- Certification options in Adapted Physical Education and Health Education
- Small class sizes and advising groups
- A strong science and technology based curriculum
- Instruction within the nationally ranked UW-Madison School of Education

Physical education students have the opportunity for professional growth as they earn their degree. Students have given presentations at professional conferences and are currently serving in leadership positions for Wisconsin Health and Physical Education or the Society of Health and Physical Educators Midwest District.

Graduates are eligible to apply for a Wisconsin Physical Education license at the Kindergarten through Grade 12 level. Students intending to teach in Wisconsin may be eligible for the Teacher Pledge (https:// tec.education.wisc.edu/teacher-pledge/), an opt-in loan forgiveness program for teacher education students.

\section*{HOW TO GET IN}

\section*{PHYSICAL EDUCATION DECLARATION OVERVIEW}

Students interested in a degree in Physical Education can enter UWMadison with a Pre-Physical Education classification. They spend their initial semesters completing liberal studies, general education, and science core requirements.

UW-Madison students who started in another major can move to PrePhysical Education by completing a Pre-Professional Declaration (http:// www.education.wisc.edu/soe/academics/undergraduate-students/ academic-program-admission/). A GPA of 2.75, based on all UW-Madison coursework or the last 60 credits (p. 1539), is required to transfer into Pre-Physical Education.

It is not necessary to be a Pre-Physical Education student before declaring the Bachelor of Science in Physical Education.

\section*{DECLARING BACHELOR OF SCIENCE IN PHYSICAL EDUCATION (BSPE) ON-CAMPUSSTUDENTS}

On-campus students may declare the Bachelor of Science in Physical Education degree at any time, provided they have met the following requirements:
- Have second-year academic standing.
- Earned a minimum 2.75 cumulative GPA ( 4.00 scale) on all college work attempted, or a 2.75 on the last 60 credits (https://guide.wisc.edu/undergraduate/education/ \#policiesandregulationstext).
- Have met with a Physical Education or School of Education Student Services advisor who will submit the declaration form; see Contact Information for details.

1
Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare Physical Education. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.75 each semester after declaration. More information on this rule is available here (p. 1539).

\section*{OFF-CAMPUS TRANSFERS TO UW-MADISON}

Off-campus students wishing to transfer to UW-Madison and declare the Bachelor of Science in Physical Education degree must be admitted to UW-Madison. Admission to the university has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (http://www.admissions.wisc.edu/) for application information. Students also need to meet with a Physical Education or School of Education Student Services advisor, who will determine if the following eligibility requirements to declare the BSPE degree have been met:
- Have second year academic standing.
- Earned a minimum 2.75 cumulative GPA ( 4.00 scale) on all college work attempted or 2.75 on the last 60 credits (https://guide.wisc.edu/undergraduate/education/ \#policiesandregulationstext).

See Contact Information for details. The advisor will submit the declaration form if the student has met the eligibility requirements. Transfer students who do not meet the declaration eligibility requirements may be admitted to UW-Madison with the Pre-Physical Education classification.

\section*{STUDENTS WITH A PREVIOUS UNDERGRADUATE DEGREE}

Students who already hold a Bachelor's degree and wish to become certified to teach Physical Education must be admitted to UW-Madison. Admission to the university has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (http:// www.admissions.wisc.edu) for university application information.

Students need to meet with a Physical Education or School of Education Student Services advisor who will (1) review the student's eligibility to declare the BSPE degree, and (2) discuss their admission status, see below. Eligibility requires that a student has:
- Earned a minimum 2.75 cumulative GPA ( 4.00 scale) on all college work attempted or 2.75 on the last 60 credits (https://guide.wisc.edu/undergraduate/education/ \#policiesandregulationstext).

See Contact Information for details. The advisor will submit the declaration form if the student has met the eligibility requirement.

An applicant with a previous undergraduate degree will be admitted to Physical Education as a second degree candidate or as a School of Education "Special Student," depending on their academic background. Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first degree. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1539).

Admission as an Education Special Student indicates that the applicant wishes to pursue teacher certification in Physical Education and studied it extensively during their initial degree. An individual enrolls in Physical Education as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

All returning students are strongly advised to meet with an advisor in the School of Education Student Services office before applying for admission to UW-Madison. Consultations with advisors are available in person, virtually, or via telephone; email studentservices@education.wisc.edu (soeacademicservices@education.wisc.edu) or call 608-262-1651 to schedule an appointment.

\section*{BACKGROUND CHECKS}

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.}

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Physical Education program has six components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Science Core coursework offers in-depth study of the basic sciences and mathematics.
- Kinesiology Core courses look at how the body responds and adapts to exercise, the role of psychological factors in sports and exercise, mechanics applied to biological systems, and how movement is controlled, learned, and developed over the life span.
- The Physical Education requirements focus on advanced study in Physical Education pedagogy, including teaching methods coursework and field experiences in the schools.
- Education coursework includes an examination of the school's relationship to our society and also of the processes by which students grow and learn.
- Elective coursework is taken to reach the minimum of 120 credits required for the degree.

While not required, teaching certifications in Adapted Physical Education and Health Education are also offered. See Additional Certification Options (p. 1735), below.

\section*{SCIENCE AND KINESIOLOGY CORE COURSES}

With the exception of KINES 116 First Aid and Basic Life Support and KINES 121 Foundations of Physical Education, Kinesiology coursework must
be taken after admission into the professional part of the undergraduate program.
\begin{tabular}{llr} 
Code & Title & Credits \\
MATH 112 & Algebra & 3 \\
\hline CHEM 108 & Chemistry in Our World & 5 \\
or CHEM 103 & General Chemistry I & \\
ANAT\&PHY 337 & Human Anatomy & 3 \\
\hline ANAT\&PHY 235 & Human Physiology and Health & 4 \\
\hline KINES 116 & First Aid and Basic Life Support & \\
\hline KINES 308 & Biomechanics of Physical Activity & 2 \\
\hline KINES 314 & Physiology of Exercise & 2 \\
\hline KINES 361 & Motor Learning and Performance & 4 \\
\hline \(\mathbf{1}\) & & 3 \\
\hline Students may exempt from KINES 116 First Aid and Basic Life Support by \\
completing American Red Cross First Aid AND either American Red Cross \\
Basic Life Support or American Red Cross CPR/AED for Professional \\
Rescuers, enroll here. (https://www.redcross.org/take-a-class/) \\
If a student wishes to request that a different course (or courses) be \\
considered, contact the Department of Kinesiology undergraduate office \\
PRIOR to enrolling. &
\end{tabular}

\section*{PHYSICAL EDUCATION COURSES}

Effective for Fall, 2023 program admission.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline KINES 121 & Foundations of Physical Education & 2 \\
\hline KINES 315 & Assessment and Research in Physical Activity Pedagogy & 3 \\
\hline KINES 316 & Adapted Physical Activity & 3 \\
\hline KINES 325 & Group Development and Behavior Management & 3 \\
\hline KINES 327 & Current Topics in Outdoor Pursuits & 1 \\
\hline KINES 353 & Health and Physical Education in a Multicultural Society & 3 \\
\hline KINES 372 & Methods and Practicum of Teaching PK-12 Educational Games and Fitness & 3 \\
\hline KINES 373 & Methods and Practicum of Teaching 6-12 Physical Education & 4 \\
\hline KINES/CURRIC 478 & Elementary School Physical Education Student Teaching & 6 \\
\hline KINES/CURRIC 479 & Middle School or High School Physical Education Student Teaching & 6 \\
\hline
\end{tabular}

\section*{PROFESSIONAL EDUCATION COURSES}

```

\section*{ADDITIONAL CERTIFICATION OPTIONS}

Physical Education students are encouraged to increase their content knowledge and teaching capabilities through additional training. Although not required, teaching certifications are available in Health Education and Adapted Physical Education. Students may pursue more than one additional certification.

\section*{HEALTH EDUCATION MINOR, 23-24 CREDITS.}

Contact Cindy Kuhrasch, cnkuhrasch@wisc.edu, for additional information about the Health Education minor (p. 1716).

\section*{ADAPTED PHYSICAL EDUCATION, 15 CREDITS.}

Certification in Adapted Physical Education requires the coursework listed below. Contact Cindy Kuhrasch, cnkuhrasch@wisc.edu, 608-262-4348, for additional information regarding this certification.
Code Title Credits
\begin{tabular}{llc}

\hline CS\&D 424 & Abnormal Psychology
\end{tabular}

\section*{CONTINUATION REQUIREMENT: DEPARTMENT OF KINESIOLOGY}

All students admitted to undergraduate programs in the Department of Kinesiology, including Physical Education, must maintain a cumulative grade point average (GPA) of at least 2.75, based on all UW-Madison campus course work. Consult the School of Education's Academic Policies and Procedures (p. ) for additional information about the continuation requirement.

\title{
GPA AND OTHER GRADUATION REQUIREMENTS
} GRADUATION REQUIREMENTS

Based on UW-Madison coursework.
- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- A minimum of 120 credits.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300-699) in residence on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus. Student teaching and practicum are considered part of the 30 credits.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The
endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure (p. 1739)

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Standard 1: Scientific Foundational Knowledge. Physical education candidates demonstrate an understanding of scientific foundations for the delivery of an effective preK-12 physical education program.
2. Standard 2: Physical Education Foundational Knowledge. Physical education candidates demonstrate an understanding of theoretical foundations for the delivery of an effective preK-12 physical education program.
3. Standard 3: Physical Education Content Knowledge. Physical education candidates understand physical education content, concepts and skills associated with the development of a physically educated student.
4. Standard 4: Planning for Instruction. Physical education candidates plan developmentally appropriate learning experiences aligned with local, state and/or SHAPE America National Standards and GradeLevel Outcomes for K-12 Physical Education.
5. Standard 5: Instructional Delivery and Management. Physical education candidates engage students in meaningful learning experiences through effective use of pedagogical skills. They use communication, feedback, and instructional and managerial skills to enhance student learning.
6. Standard 6: Assessment of Student Learning. Physical education candidates select and implement appropriate assessments to monitor students' progress and guide decision making related to instruction and learning that do not marginalize students.
7. Standard 7: Technology. Physical education candidates select and implement a variety of technologies to enhance learning, as well as personal and professional productivity.
8. Standard 8: Social-Emotional Learning and Trauma Based Practices. Physical education candidates understand and utilize a variety of practices critical to SEL and positive mental health outcomes.
9. Standard 9: Professional Responsibility. Physical education candidates demonstrate behaviors essential to becoming effective professionals.

\section*{FOUR-YEAR PLAN}

Physical Education - Sample Four-Year Plan

This sample four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with your academic advisor(s) to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Freshman}

\section*{Total Credits 120}

\section*{ADVISING AND CAREERS}

\section*{PHYSICAL EDUCATION ADVISING}

Prospective off-campus and on-campus physical education students will meet with Dan Timm in the Department of Kinesiology. Students considering physical education should schedule an appointment with Dr. Timm, dtimm@education.wisc.edu, or call 608-262-0259, as soon as possible. Pre-declaration advising is conducted by the Department of Kinesiology and staff in the School of Education Student Services office, see below.

Students with either a pre-certification (PED) or certification (BSPE) classification are required to meet with their department advisor at least once per semester. Mandatory advising meetings are conducted every semester, just before enrollment begins for the following semester.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Kinesiology can be found on the department's website (https://kinesiology.education.wisc.edu/people/). (https:// kinesiology.education.wisc.edu/)

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in
venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{PHYSICAL EDUCATION AND THE WISCONSIN EXPERIENCE ON-CAMPUS ACTIVITIES AND EXPERIENCES}

Smartphone App Development - Physical education staff and students recently partnered with experts in the academic technology department to create a smartphone app, "EnCourage." The app provides hundreds of team-building activities for use by teachers, coaches, and anyone trying to develop teamwork with groups. Its development was one of the School of Education Innovation Projects, "Social and Emotional Learning in Physical Education."

\section*{Participation in the Virginia Horne Henry PE History Project -}

Current students met with physical education alumni to share stories, learn about the rich program history, and establish new traditions to enhance the program.

\section*{Partnering with the Campus Recreation Program to Train}

Officials - Students in Kinesiology 373 Methods and Practicum of 6-12
Physical Education developed training modules for the RecWell employees (UW students) who serve as officials for the intramural sports.

UW-Madison Science Expeditions Presentation - Students and staff in the physical education program set up a station at this campus-wide open house where students could test the speed of their overhand throw, receive feedback from the physical education students, and increase their throwing speed.

Youth Coaches Workshop - Through PLACE, physical education students helped to design a summer workshop to help area youth coaches incorporate teamwork into their practice sessions.

Guest Speakers - Past guest speakers in physical education classes have included Brett Fuller, retired Health and Physical Education Curriculum Director for Milwaukee Public Schools, and Chris Munson, an enrolled member of the Oneida Nation

\section*{OFF-CAMPUS ACTIVITIES AND EXPERIENCE}

Team Building Activities - In Kinesiology 325 Group Development and Behavior Management students develop and plan team-building activities The students then visit a local elementary school to teach these activities and help students develop positive social and emotional skills.

Teaching in Area Schools - Students in physical education methods courses provide physical education and social skill development in area schools.

\section*{Partnering with Boys and Girls Club of Dane County - Physical} education students and staff provide training on the implementation of social and emotional learning for after-school staff.

\section*{Boys and Girls Clubs of Dane County Thanksgiving Baskets -}

Students from the physical education program create games that students can play in their homes over the Thanksgiving holiday. The activities are included in the Thanksgiving baskets that are delivered to over 500 homes in the Dane county area. In addition, students visit the boys and girls club sites, put together the baskets, and hand them out on the day before Thanksgiving. Who wouldn't want to play "Reverse Pig Trash Ball?"

Volunteering - Students are volunteering with the Adapted Sports Program at Sun Prairie Area School District, providing assistance in numerous capacities.

Multicultural Field Experience - As part of Kines 353 Health and Physical Education in a Multicultural Society, students complete the Multicultural Field Experience in which they work with individuals from a cultural background different than their background. Placements for the MFE have included assisting teachers in school health or physical education classes, or volunteering with an after-school program through Madison School and Community Recreation or a community organization.

\section*{ADDITIONAL ACTIVITIES AND ACCOMPLISHMENTS}

Student Organizations and Memberships - Students have organized the local PE Club on campus and have memberships with Wisconsin Health and Physical Education.

Additional Certifications - In addition to the Physical Education major, most students also complete the Adapted Physical Education Concentration and/or the Health Education Minor.

Leadership Positions - One of our students is currently serving as the Future Professionals Vice President-Elect with Wisconsin Health and Physical Education; another student is the Future Professionals representative on the Leadership Council for the Midwest District of the Society of Health and Physical Educators.

Professional Presentations and Workshops - Students have given presentations at the Wisconsin Health and Physical Education Convention, the Best Practices in Health and Physical Education Conference, and the UW-Madison Undergraduate Symposium. Another student was involved with the Our Wisconsin inclusion education program at UW-Madison.

EsTEam First Year Teacher Program - Physical education staff partner with selected first-year alums to help them incorporate social and emotional learning across their physical education curriculum.

\section*{STUDY ABROAD COURSES}

In the summer of 2023 the Department of Kinesiology offered two new study abroad courses in Costa Rica and Portugal.
- Team Building in Costa Rica was designed to enhance the group development skills of its participants while engaging in activities such as white-water rafting, ziplining and hiking. It combined a very successful kinesiology course, Kinesiology 325- Group Development and Behavior Management, with a unique cultural opportunity in Costa Rica. Each day provides opportunities to not only explore the Pura Vida (Pure Life) of Costa Rica, but also to engage in personal reflection. Participants experience the process of growing together as a community and develop skills to create lasting communities in their personal and professional lives. Students earn credit for Kines 325, a required course in the physical education program.
- Movement as Medicine in Portugal examines the connection between sedentary behavior and health outcomes in Portugal. Participants review definitions and rates of sedentary behavior, physical activity and physical inactivity in the U.S. and across the globe. While in Lisbon, participants hear from local experts and members of the healthcare and educational systems about how physical activity is viewed and promoted across the population. Side trips to relevant cultural local places contribute to the full picture of health in Portugal. An overnight trip to Porto and two
additional day trips provide additional opportunities to learn more about local culture and history.

\section*{CERTIFICATION/LICENSURE}

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS}

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Teacher Education Center (https:// tec.education.wisc.edu/current-students/).

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: \\ Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, lowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\title{
PROMOTING ACTIVITY FOR DIVERSE ABILITIES, CERTIFICATE
}

Are you looking for a great way to gain knowledge and hands-on experience that prepares you for a career in the fields of healthcare, education, fitness, public health, and corporate wellness? Are you interested in enhancing your graduate school application in any of the aforementioned fields?

If you answered "yes," the Promoting Activity for Diverse Abilities (PADA) Certificate-offered through the Department of Kinesiology -is the perfect blend of coursework and experiential learning. The Kinesiology Department's mission is to research, teach, and apply knowledge related to movement, exercise, and human occupation with the ultimate goal of enhancing human health, productivity, and quality of life. Students who have completed the PADA Certificate go on to graduate programs and careers in occupational or physical therapy, speech language pathology, genetics counseling, nursing, medicine, special education, adapted physical activity, clinical exercise physiology, physical activity epidemiology, athletic training, public health, and many other exciting and challenging fields.

With a combination of coursework and opportunities to gain hands-on experience working directly with individuals with disabilities, this certificate will prepare you with the specialized knowledge and skills to safely promote and develop physical activities to improve the health, wellness, and functioning of individuals with a wide range of diverse abilities. You will be able to address inclusive activities aimed to improve general activities of daily living, functional fitness, posture, mobility, breathing, nutrition, and falls prevention, as well as adapted sports, fitness and recreation.

Coursework (16-18 credits) in this certificate is made up of a core that includes the topics of anatomy, disability, specialized program planning, and hands-on practica in the UW's Adapted Fitness Program (https:// kinesiology.education.wisc.edu/academics/certificates/adapted-fitness-and-personal-training/). One of the UW's most sought-after volunteer experiences, the Kinesiology Department's Adapted Fitness Program, located in the heart of campus, offers fitness training and physical activities to community-dwelling clients with a wide variety of permanent and temporary disabilities from heritable disorders, chronic and neurological diseases, and accidental traumas. Students who pursue the PADA certificate receive priority placement for volunteer positions. Elective options for the certificate will also give you some flexibility to tailor the certificate to your specific educational and career interests. Examples of elective topics include dance therapy, communicative disorders, health behavior and diversity in special education.

\section*{HOW TO GET IN}

The SoE's Undergraduate Academic Advising Services will administer the process that students will use to declare enrollment in the certificate. Students declaring in the Certificate must have a minimum grade point average of 2.50 to be eligible for the certificate to align with the School of Education's requirement for good academic standing. Students intending to complete the Promoting Activity for Diverse Abilities Certificate should visit the School of Education's Certificate Programs (https://
education.wisc.edu/academics/certificates/) page to complete the declaration form.

Students declared in the Physical Education BS may not declare the Certificate in Promoting Activity for Diverse Abilities.

\section*{REQUIREMENTS}

Students must complete 16-18 total credits. The 9-10 credits of core courses will provide the foundation content and instruction needed to be successful in subsequent certificate courses and will provide an upperlevel course focusing on application and mastering knowledge. Students will also complete 7-8 credits of breadth elective courses that span the departments of Kinesiology, Rehabilitation Psychology and Special Education, Dance, and Communication Sciences and Disorders. Breadth courses give students from a wide array of backgrounds and majors to select courses that will be applicable to a variety of diverse career interests or the students will also have the ability to choose courses in a more narrowed and detailed focus. Allowing for a set of focused elective choices or range of elective topic areas will be a benefit and a draw to students pursuing a variety of career paths.

Certificate students must earn a minimum grade point average of 2.5 on required certificate coursework. At least 8 credits must be taken in residence.

\section*{CORE COURSES}

Complete \(9-10\) credits from the following:
\begin{tabular}{llr} 
Code & Title & Credits \\
KINES 225 & Practicum in Promoting Activity for & 1 \\
& Diverse Abilities & \\
KINES 227 & Introduction to Clinical Anatomy of & 2 \\
or ANAT\&PHY 337 & Human Movement & \\
KINES 516 & Physical Activity for Diverse Abilities & 3 \\
RP \& SE 300 & Individuals with Disabilities & 3
\end{tabular}

BREADTH ELECTIVE COURSES
Complete \(7-8\) credits from the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multirow[t]{2}{*}{CS\&D 110} & Introduction to Communicative & 3 \\
\hline & Disorders & \\
\hline CS\&D 210 & Neural Basis of Communication & 3 \\
\hline CS\&D 424 & Sign Language I & 2 \\
\hline \multirow[t]{2}{*}{DANCE 231} & Introduction to Dance/Movement & 2 \\
\hline & Therapy & \\
\hline \multirow[t]{2}{*}{DANCE 232} & Introduction to Dynamics of Dance & 2 \\
\hline & Therapy & \\
\hline DANCE 331 & Dynamics of Dance Therapy & 3 \\

\hline & Health Equity & \\
\hline KINES 360 & Lifespan Motor Development & 3 \\
\hline \multirow[t]{2}{*}{KINES 540} & Diversity in Health and Physical & 3 \\
\hline & Activity Settings & \\
\hline RP \& SE 330 & Behavior Analysis: Applications to & 3 \\
\hline & Persons with Disabilities & \\
\hline
\end{tabular}
\begin{tabular}{lll} 
RP \& SE 466 & Diversity in Special Education & 3 \\
RP \& SE 560 & \begin{tabular}{l} 
Psychosocial Aspects of Chronic \\
Illness and Disability
\end{tabular} & 3
\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{EARNING OUTCOMES}
1. Demonstrate the ability to increase healthy behaviors and safe activities for persons with diverse abilities
2. Obtain the skills and knowledge to encourage, empower, and prescribe activity for people who exhibit a wide array of disabling conditions.
3. Identify, create and expand opportunities where larger organizations can create more accessible physical activity programs for those who exhibit diverse abilities.
4. Develop practical skills and knowledge to modify and or adapt activities to minimize the effects of disabling conditions and maximize healthy movement opportunities.

\section*{REHABILITATION PSYCHOLOGY AND SPECIAL EDUCATION}

The Department of Rehabilitation Psychology and Special Education is the only department solely committed to improving the lives of people with disabilities, as well as their families. The department uniquely prepares students to support and advocate for the full societal inclusion of people with disabilities across the lifespan. Special education and rehabilitation psychology are intrinsically related, both in basic objectives and in professional education and research. Instruction and research emphasize educational and behavioral assessment, treatment, and inclusion of children, as well as counseling, assessment, case management, advocacy, and job placement with adults to facilitate improved personal, social, and vocational adjustment.

Targeted populations encompassed by the department's programs include adults and children with physical, emotional, intellectual and/or learning disabilities, traumatic brain injuries, substance use disorders, and persons involved with the criminal justice system.

Three undergraduate programs are currently available:
- A pre-professional undergraduate program in Rehabilitation Psychology (p. 1750).
- Special Education (p. 1756), with certification options for three age groups:
- Kindergarten-Grade 12 (p. 1769)
- Birth-Grade 3 (p. 1763)
- Birth-Grade 12 (p. 1764)
- Elementary Education and Special Education (p. 1742) - leading to a certification in Special Education (K-12) and Elementary

Education (K-9). This program is offered jointly with the Department of Curriculum and Instruction.

The department also offers a Disability Rights and Services Certificate (p. 1741) that may be completed by students pursuing other majors on campus.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Disability Rights and Services, Certificate (p. 1741)
- Elementary Education and Special Education, BSE (p. 1742)
- Rehabilitation Psychology, B.S. (p. 1750)
- Special Education, BSE (p. 1756)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website. (http://rpse.education.wisc.edu/)

\section*{DISABILITY RIGHTS AND SERVICES, CERTIFICATE}

A primary mission of the Department of Rehabilitation Psychology and Special Education is to improve the lives of individuals with disabilities. The Disability Rights and Services Certificate provides undergraduates across the broader campus with knowledge, skills, and dispositions to contribute to the department's mission. Students completing the certificate will become advocates for equity and inclusion of individuals with disabilities within their own major programs of study and future careers.

Two required courses, RP \& SE 100 Disability and Society and RP \& SE 300 Individuals with Disabilities, address broad themes of disability, equity, and diversity that can be applied to a variety of other disciplines and majors. The certificate also allows students to individualize the certificate by selecting six credits of elective courses from an array of options. These choice courses relate to education, health, social sciences, psychology, and sociology. In this way students can make the certificate more complementary to their major program of study.

\section*{HOW TO GET IN}

Students intending to complete the Disability Rights and Services Certificate will find the declaration form on the School of Education's Certificate Programs (https://education.wisc.edu/academics/ certificates/) page. The declaration for this certificate program can be submitted at any time during the calendar year.

Please note, students completing a major in Rehabilitation Psychology, Special Education, or Elementary Education and Special Education are not eligible to complete this certificate.

\section*{REQUIREMENTS}

Complete a minimum of 12 credits to include at least 6 credits in residence. Completion of the certificate requires a minimum GPA of 2.5 in certificate coursework.

\section*{Code}

\end{tabular}

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Identify and analyze societal barriers and supports that affect the lives of people with disabilities.
2. Explore the societal aspects of disabilities, including the culture of disabilities, attitudes toward persons with disabilities, and quality of life issues.
3. Evaluate current approaches, advocacy efforts, and proposed solutions for overcoming barriers experiences by people with disabilities.
4. Use disability as a lens through which to examine broader aspects of history and culture, including power, discrimination, social stigma, social and political activism, media representations, re-appropriation, identity, intersectionality, education, work, and design.

> ELEMENTARY EDUCATION AND SPECIAL EDUCATION, BSE

The Elementary Education and Special Education (EESE) program is a unique opportunity for students to pursue licensure in both Elementary Education and Special Education. Successful graduates of the program are certified in general education at the grade levels of \(\mathrm{K}-9\) (including eligibility for 4K), and Special Education in grades K-12 (through age 21). Students graduate to a wide range of opportunities in both general and special education classrooms.

The Department of Rehabilitation Psychology and Special Education has a long-standing mission of preparing future leaders who actively improve the lives of people with disabilities. The EESE program is designed to prepare future educators who will promote equity, inclusivity and accessibility within both general and special education classrooms. Graduates of this program are equipped to create inclusive learning environments where they will holistically identify and address biases and barriers to learning, and strive to meet the needs of all students.

The Elementary Education and Special Education program is a rigorous four-semester course sequence that includes coursework, practicum and student teaching experiences. Courses include teaching methods in general education classrooms, implementing instructional strategies for helping students with a variety of abilities succeed, creating individualized education programs, as well as assessing learning needs in all core academic areas.

In addition to coursework, students will have hands-on practical experiences in both general and special education classrooms across a range of ages. Students are placed in one general education practicum and student teaching placement along with one special education practicum and student teaching placement, providing them with all the practical experience they need to successfully teach in a K-9 general education classroom or K-12 special education classroom. Students will learn to effectively work with a diverse student population and to create learning environments that foster academic success and social-emotional development for all students.

\section*{THE TEACHER PLEDGE}

The School of Education at UW-Madison currently offers a unique financial opportunity for students in the Elementary Education and Special Education program called The Teacher Pledge (https:// tec.education.wisc.edu/teacher-pledge/). The school pledges to pay the equivalent of in-state tuition and fees for all teacher education students. In return, students pledge to work at a Wisconsin PreK-12 school for three to four years after graduation.

\section*{HOW TO GET IN}

\section*{ELEMENTARY EDUCATION AND SPECIAL EDUCATION (EESE)}

Undergraduate students generally apply to the professional part of the Elementary Education and Special Education (EESE) degree program in their sophomore year. Selection is made during the spring semester. Currently, students are admitted to the program once a year, effective for
the summer following selection. Once admitted, students typically spend four full semesters completing their remaining coursework.

\section*{ENTERING THE SCHOOL OF EDUCATION \\ NEW AND CURRENT UW-MADISON STUDENTS}

New freshmen interested in EESE are admitted directly to the School of Education with a "pre-professional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in EESE receive the "preprofessional" classification of PSR.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/). A minimum GPA of 2.5 , based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. )). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at soeacademicservices@education.wisc.edu, (soeacademicservices@education.wisc.edu) by calling 608-262-1651, or in person

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the University to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu/) for application information.

Students wishing to enter directly into EESE should complete both the on-campus program application and the UW-Madison application. All eligibility requirements must be met. Transfers who do not meet the program eligibility criteria will be admitted to UWMadison with the Pre-Elementary Education and Special Education designation of PSR and apply to EESE at a later time

Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application. Appointments are available in person, virtually, or via telephone; call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Applicants who already hold a Bachelor's degree must be admissible to the University to enroll in a School of Education program.

Admission to the campus has its own application, admission process, and application deadlines; see UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu/) for application information.

Students wishing to enter directly into EESE should complete both the on-campus program application and the UW-Madison application. All eligibility requirements must be met. Applicants who do not meet the program eligibility criteria will be admitted to UWMadison with a Pre-Elementary Education and Special Education designation and apply to the program at a later time.

An applicant with a previous undergraduate degree will be admitted to EESE as a second degree candidate or as a School of Education "Special Student," depending on their academic background.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second degree is awarded upon its completion; more information is available here (p. 1539). Most applicants to EESE will be second degree candidates.

Admission as an Education Special Student indicates that the student has an interest in pursuing teacher certification in EESE and studied this subject area extensively during their initial degree. A student enrolls in EESE as a Special Student to complete the requirements that were not taken during the first degree; these are assessed on a case by case basis. Another degree is not awarded for this "certification only" coursework.

All off-campus students are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu or call 608-262-1651 to schedule an appointment.

\section*{APPLICATION AND ADMISSION}

Certification to teach Elementary Education and Special Education requires that a student be admitted into the professional part of the degree program. The School of Education admits students into the EESE program once a year, effective for summer following selection. In recent years the program has been able to accommodate all qualified applicants.

\section*{PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS}

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Undergraduate Admissions (http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

\section*{To be eligible for admission to the professional program, applicants must:}
- complete at least 40 transferable college-level credits by the end of the fall semester before application.
- successfully complete RP \& SE 300 Individuals with Disabilities ( 3 cr ) by the end of the summer semester of the application year.
- earn a minimum 2.5 grade point average (GPA) on a 4.0 scale on all transferable college-level coursework attempted. \({ }^{1}\)
- submit all program application form(s), transcripts, and other related application materials by the application deadline specified on the School of Education's Undergraduate Admissions (http:// www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/) page.

1
A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW-Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UWMadison coursework established by their program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility for program consideration. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{PROGRAM SELECTION CRITERIA}

The faculty will review all completed applications that meet eligibility criteria. When reviewing an application, the faculty want to learn as much about the applicant as possible and will make every effort to take into account the whole person. Applicants are encouraged to provide, in writing, whatever they would want to share in a face-to-face interview.

The selection committee members will consider several factors when selecting students for the program. Although the grade point average (GPA) is considered an important indicator of success, it is not the only basis on which applicants will be selected for admission. Trends in the applicant's grades, difficulty of course load, and outside work load will be considered (see factors 1, 2, and 3 below).

\section*{In addition to the GPA, faculty will consider the following factors:}
- College grading and course selection pattern.

Transcripts will be examined individually. Account will be taken whether an applicant has clearly followed an unusually easy or difficult pattern of courses or if the GPA reflects a poor grade in an exceptionally difficult subject area.
- Trends of college grades. An applicant who started very poorly or showed a decline in their early phases of college, but performed strongly in later college years, may be judged more favorably than another with the same GPA but level or declining record.
- Diversity of experience or background. Work/life experience, college activity, political activity, and other experiences or background that adds a diverse perspective to the Elementary Education and Special Education student body may work in the applicant's favor. Volunteer or paid work with people with disabilities will be taken into account in the selection process. Volunteer or paid work with people from a background different than the applicant's may also be taken into account in the selection process.
- Writing sample (Statement of Purpose). Application materials must include an essay in which the applicant gives reasons for becoming an elementary education and special education teacher. Writing is so important in the professional life of teachers and in the teacher education program that the quality of the applicant's writing will be taken into account in making admissions decisions.
- Letters of recommendation. Recommendation letters will play an important role in helping the selection committee judge the applicant's prospects for academic success in the program. Careful, thoughtful letters from mentors, teachers, or employers will provide information about the applicant's intellect, imagination, or prospects for becoming a successful teacher. Working with people with disabilities will be taken into account in the selection process. Working with people from a background different than the applicant's may also be taken into account in the selection process.
- Other factors. The program's quest for diversity leads the selection committee to take into account fully qualified applicants from under-represented groups. Race, ethnicity, cultural, geographic background, and economic disadvantage are among the factors that will be considered, taking into account the needs of the schools. A full-time or extra heavy part-time work load will be considered a factor in close cases.

\section*{BACKGROUND CHECKS}

Pursuant to State of Wisconsin law PI 34.018(2), the School of Education is required to administer a background check on all students entering teacher education programs. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety, or education of PK-12 pupils. Local school districts frequently conduct background checks on teacher education students prior to the start of their in-classroom field work, and the Department of Public Instruction (DPI) will also conduct a background check on each applicant for a Wisconsin educator license.

Students should be aware that background checks may be initiated by other agencies or organizations when they are seeking employment or a professional license. School administrators have the authority to determine the appropriateness of a student placement and may choose not to permit a placement based on a student's background check results.

An individual who has been deemed ineligible to participate in field or clinical experiences based on the results of their background check may
not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center, tec@education.wisc.edu.

Note: Students cannot complete the Certificate in Disability Rights and Services in conjunction with this program.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits

\section*{Education}
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\footnotetext{
The School of Education's Liberal Studies
Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic
}
advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Elementary Education and Special Education program has four primary components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Professional education coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn.
- Core Requirements offer an in-depth study of Elementary Education and Special Education, including a four-semester professional sequence of teaching methods coursework and field experience in schools. This sequence is designed so that students can complete the program in four years.
- Elective coursework is taken to reach the required minimum of 120 credits.

The Elementary Education and Special Education major requires 70 credits of professional coursework in addition to other degree requirements. RP \& SE 300 Individuals with Disabilities must also be completed prior to beginning the professional sequence.

\section*{INDIVIDUALS WITH DISABILITIES PREREQUISITE FOR PROGRAM ADMISSION}

This course must be completed by the end of the summer of the application year, before beginning the professional course sequence.
Code
Title
Credits

3

\section*{PROFESSIONAL SEQUENCE}

The professional coursework was designed to be completed in four semesters, starting in the fall after admission to the program. Each semester of the sequence must be followed sequentially and taken in consecutive semesters unless a modification is approved. Most classes must be taken during specified semesters, while other requirements may be completed prior to beginning the sequence.

otal Credits
1
May be taken before semester 1 of the professional sequence, including prior to program admission.
A minimum of 120 credits is still required to complete the degree.

\section*{CONTENT AREA MINOR (OPTIONAL REQUIREMENT)}

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, but students will not receive an additional certification in the subject area. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. See the links below for the requirements of each minor.

\section*{Minor Options}
- Biology (p. 1608)
- Chemistry (p. 1610)
- Earth Science (p. 1617)
- Economics (p. 1617)
- English (p. 1642)
- English Language Arts (p. 1640)
- Geography (p. 1644)
- History (p. 1646)
- Mathematics (p. 1654)
- Mathematics and Science Dual (p. 1651)
- Mathematics Specialized (p. 1653)
- Physics (p. 1654)
- Political Science (p. 1655)
- Psychology (p. 1659)
- Science Specialized (p. 1660)
- Social Studies (p. 1660)
- Sociology (p. 1670)

\section*{ELECTIVE COURSEWORK}

Complete additional courses as necessary to reach the minimum of 120 credits required for the degree.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS

Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UWMadison. The State of Wisconsin requires that anyone wishing to teach
in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW-Madison coursework.
- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- 2.75 cumulative grade point average in the minor, if required.
- Minimum 120 credits (degree candidates only).
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300-699) in residence on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus. Student teaching and practicum are considered part of the 30 credits.

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. t creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department
of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (http://guide.wisc.edu/ undergraduate/education/curriculum-instruction/elementary-bse/ \#certificationlicensuretext)

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Use knowledge of learners and human development to create responsive, inclusive, and respectful learning activities and environments that maximize learners' cognitive, linguistic, social, emotional, and physical development.
2. Use knowledge of learners, contexts, disciplines, pedagogies, and standards to plan and adjust developmentally appropriate and challenging learning activities and assessments.
3. Use knowledge of learners, contexts, disciples, pedagogies, and standards to implement planned and unplanned developmentally appropriate, challenging, and learner-responsive learning activities and maintain safe, inclusive, and respectful learning environments.
4. Create and implement meaningful assessments and use assessment results to inform instruction, communicate with parents and others, and provide feedback to learners to guide their future performance and learning.
5. Exhibit professionalism and adhere to ethical practices as they continue their own development and collaborate with others to improve their profession, school communities, and outcomes for students and families.
6. Use studies completed in science and mathematics, social sciences, the humanities, histories, languages, and the arts to inform and deepen their teaching of content areas and meeting learners' needs.

\section*{FOUR-YEAR PLAN}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a
contractual agreement. Use it along with your DARS report and Course Search and Enroll to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{Freshman}

\section*{Total Credits 120}

1
May be taken before semester 1 of the professional sequence, including prior to program admission.
A minimum of 120 credits is still required to complete the degree.

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to Elementary Education and Special Education can be found on the websites of the Department of Rehabilitation Psychology and Special Education (https:// rpse.education.wisc.edu/) and the Department of Curriculum and Instruction (https://ci.education.wisc.edu/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{ELEMENTARY EDUCATION AND SPECIAL EDUCATION (EESE) AND THE WISCONSIN EXPERIENCE COMMUNITY-BASED LEARNING}

RP \& SE 300 Individuals with Disabilities includes a field-based experience where students engage in work that directly or indirectly supports a person with a disability. Hundreds of student each year are placed in a wide variety of placement sites (https://docs.google.com/document/ d/1gXUjnpcFCgJdWTMVyLFIRTQCE4s9ipFsXYtz_K50oCM/edit/? usp=sharing) in the Madison area. This experience allows students to gain first-hand knowledge of the contributions of, and services provided to, individuals with disabilities within the community.

\section*{GUEST SPEAKERS}

RP \& SE 300 also brings the community into the classroom. A number of guest speakers from the community provide insight regarding the range of experiences people with disabilities have while conducting their daily lives. Students also learn about the variety of community organizations engaged in the support of, and advocacy for, people with disabilities.

A wide variety of guest speakers attend practicum and student teaching seminars, including school district personnel, parents and family members, teachers, and individuals with disabilities.

\section*{FIELD EXPERIENCES}

Students in the EESE program have multiple field experiences in \(\mathrm{K}-12\) schools, culminating in a full-time student teaching experience following the semester of the cooperating school.

\section*{PARTNERING WITH COMMUNITY ORGANIZATIONS}

The EESE team partners with area communities to assist with food delivery to families. Students volunteer with organizations such as Special Olympics, Camp Kesem, and Girls on the Run, a program designed to inspire girls of all abilities to embrace their inner strength and to build healthy social, emotional, and physical skills.

\section*{GETTING TO KNOW THE COMMUNITY}

A Community Based Asset Mapping exercise asks students to explore the strengths and assets of the communities in which their field placement school resides. Time is spent in and around the attendance area of their schools to develop an understanding of the places, people, spaces, and experiences that influence their pupils and consequently are brought to school. Students are encouraged to venture outside the classroom and get to know the families and communities of their pupils by attending a community activity such as a worship service or a community potluck.

\section*{FIELD TRIPS}

While completing field experiences, students enjoy trips to places in the Madison community, such as the Madison Children's Museum, Madison Public Library's Play Lab, Allen Botanical Gardens, Centro Hispano and the Madison Literacy Network.

\section*{STUDY ABROAD}

Our students are encouraged to explore cultures other than their own by studying abroad. If a semester or year-long program isn't possible, the School of Education has recently developed some exciting new study abroad opportunities where a single class is taken in the summer.

\section*{CLUBS AND ORGANIZATIONS}

EESE students have multiple opportunities to participate in related campus organizations such as Aspiring Educators of Wisconsin and Game Design and Development.

\section*{CERTIFICATION/LICENSURE}

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS}

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Teacher Education Center (https:// tec.education.wisc.edu/current-students/).

\section*{APPLYING FOR A TEACHING LICENSE}

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department
of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements.

\section*{LICENSING LEVELS}

The following licensing options will be offered at UW-Madison.
- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level, Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education. The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Secondary Education program areas will license in their subject area Grades 4 through 12, and also in English as a Second Language Kindergarten through Grade 12.
- World Language Education program areas will license at the Kindergarten through Grade 12 level.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level
- Health and Library Media Specialist both license at the Kindergarten through Grade 12 level.
- Communication Sciences and Disorders (Speech-Language Pathology) will license at the K-12 level.

\section*{WISCONSIN STATE LICENSING}

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \(\$ 125\). An online license application is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/ elo/). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/licensing/ fingerprint/electronic-submission/).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UWMadison teacher certification students, the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW-Madison requires that
1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing.

\section*{LICENSING OUTSIDE OF WISCONSIN}

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (https://education.uky.edu/accreditation/certification/ states/) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW-Madison certification officer. This form verifies that a stateapproved licensing program has been completed. These forms should be sent to the School of Education Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: \\ Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{REHABILITATION \\ PSYCHOLOGY, B.S.}

Rehabilitation Psychology is the academic home to students interested in the health or helping professions. Rehab Psych students enjoy working with people with disabilities or individuals who experience barriers in accomplishing personal goals; they gravitate toward psychology and other coursework in the social sciences.

In this major students learn how to promote and support the independence and full inclusion of people with disabilities in employment and the community. Students in the major examine various types of disabilities and other short-term or long-term barriers including physical, mental, intellectual, emotional, and developmental disabilities. Graduates are prepared to provide quality entry-level general services in a variety of community settings, including advocacy, behavioral support, independent living, and supported employment.

The majority of students go on to complete graduate programs in rehabilitation counseling, mental health counseling, occupational therapy, physical therapy, nursing, special education, social work, and other human services and health professions.

The culminating experience in the degree program is the communitybased internship. Students complete six credits of internship, a minimum of 240 hours, working with agencies that serve individuals with disabilities. Students often find full-time employment at their internship site after completing their degree. Graduates receive a Bachelor of Science degree with a major in Rehabilitation Psychology.

Visit the departmental website (http://rpse.education.wisc.edu/) to view the program handbook (https://rpse.education.wisc.edu/currentstudents/forms/), learn more about internship opportunities and guidelines, and what students have to say (https://www.youtube.com/ watch/?list=PL9F9013685146C73A\&v=ZuOu1MOjvB4\&feature=youtu.be) about the program.
"I chose to pursue rehabilitation psychology as I want to become an occupational therapist one day. This major allowed me to meet requirements for graduate programs while also furthering my passion to be a part of the human service field. I had a lot of opportunities to go out into the community and make a difference in people's lives." Aneta Glowacz, Rehab Psych B.S. graduate 2020

\section*{HOW TO GET IN}

\section*{REHABILITATION PSYCHOLOGY DECLARATION}

New first-year students and off-campus transfers are admitted directly to the Bachelor of Science-Rehabilitation Psychology degree program.

On-campus students starting at UW-Madison in other majors can declare Rehabilitation Psychology at any time of the year, and at any point in their academic career. First-semester students who have not established a GPA at UW-Madison may declare Rehabilitation Psychology.

Students are strongly encouraged to meet with the department's undergraduate program coordinator or an advisor in the School of Education Student Services office before declaring Rehabilitation Psychology. See the Overview (https://guide.wisc.edu/undergraduate/
education/rehabilitation-psychology-special-education/rehabilitation-psychology-bse/) page for contact information.

\section*{ELIGIBILITY TO DECLARE REHABILITATION PSYCHOLOGY}

The on-campus declaration form is located on the School of Education's Undergraduate Admissions (http://www.education.wisc.edu/soe/ academics/undergraduate-students/academic-program-admission/) page, along with other information about current eligibility requirements and deadlines to declare (if any). Students should consult this site prior to submitting a declaration as this information may be modified from one year to the next.

Off-campus students wishing to transfer directly into Rehabilitation Psychology must be admitted to UW-Madison. See Transfer Students and Students with a Bachelor's Degree, below.

Students may not complete both Rehabilitation Psychology and the Certificate in Disability Rights and Services.

\section*{ELIGIBILITY REQUIREMENTS:}
- Earn a minimum 2.50 cumulative GPA based on all college coursework attempted or a 2.50 last 60 credits GPA by the end of the term prior to the declaration semester. This GPA must be maintained at the end of the declaration semester. \({ }^{1}\)

1
Last 60 Credits Rule - Two grade point averages may be calculated to determine a candidate's eligibility to declare. A GPA may be calculated using (1) UW-Madison and all other all transferable college level coursework attempted and (2) the last 60 credits attempted. The higher GPA of these two calculations will be used for determining eligibility. Once declared, students must earn a semester GPA of 2.50 each semester after declaration. More information on this rule is available here (p. 1539).

\section*{TRANSFER STUDENTS AND STUDENTS WITH A PREVIOUS DEGREE}

Transfer students and second degree candidates (students who already hold a Bachelor's degree) must be admitted to UW-Madison to enroll in a School of Education program. Admission to the campus has its own application, admission process, and application deadlines; see Office of Admissions and Recruitment (http://www.admissions.wisc.edu) for campus application information.

Second degree candidates in the School of Education are changing their academic direction and wish to complete a degree that is unrelated to their first. A large number of credits are usually required to complete the new degree requirements and a second undergraduate degree is awarded upon its completion; more information is available here (p. 1539).

All off-campus students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their declaration. Consultations with advisors are available in person, virtually, or via telephone; email soeacademicservices@education.wisc.edu (soeacademicservices@education.wisc.edu) or call 608-262-1651 to schedule an appointment.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Bachelor of Science (B.S.) degree program in Rehabilitation Psychology has four components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Related coursework comes from departments related to Rehabilitation Psychology—Psychology, Educational Psychology, Sociology, Social Work, and Gender and Women's Studies.
- Rehabilitation Psychology coursework offers an in-depth study of working with people with disabilities, including multiple opportunities for supervised field experience. In addition, at least 12 credits of electives in Rehabilitation Psychology are required, giving students some flexibility to tailor the program to their specific interests.
- Elective coursework is taken to meet the minimum of 120 credits required for the degree.

\section*{RELATED COURSE REQUIREMENTS \\ PSYCHOLOGY/EDUCATIONAL PSYCHOLOGY}

Complete 12 credits selected from Educational Psychology (http:// guide.wisc.edu/courses/ed_psych/) and/or Psychology (http:// guide.wisc.edu/courses/psych/) to include PSYCH 405 Abnormal Psychology.

\section*{SOCIOLOGY/SOCIAL WORK/GENDER AND WOMEN'SSTUDIES}

Complete 6 credits selected from Sociology (http://guide.wisc.edu/ courses/soc/), Social Work (http://guide.wisc.edu/courses/soc_work/), and/or Gender and Women's Studies (https://guide.wisc.edu/courses/ gen_ws/). Recommended areas include social disorganization, deviant behavior, alcohol and other drug abuse, community development, and issues in social welfare.

\section*{REHABILITATION PSYCHOLOGY COURSE REQUIREMENTS DIDACTIC CORE \\ Complete the following 21 credits:}

\section*{Code}

RP \& SE 125
\begin{tabular}{llr} 
RP \& SE 316 & \begin{tabular}{l} 
Health Promotion for Individuals \\
with Disability and Chronic Illness
\end{tabular} & 3 \\
RP \& SE 325 & \begin{tabular}{l}

Special Education (Maximum 3 \\
additional internship credits allowed \\
in electives)
\end{tabular} & \begin{tabular}{l} 
Special Topics (Related topics only - \\
approval required)
\end{tabular}
\end{tabular}

\section*{ELECTIVE COURSEWORK}

Complete additional coursework to reach the minimum of 120 credits.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS \\ GRADUATION REQUIREMENTS}

Based on UW-Madison coursework.
- 2.50 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.50 cumulative grade point average in all major coursework. This GPA includes all coursework from the RP \& SE department and COUN PSY 655.
- Major Residency. The rehabilitation psychology program requires that students complete 15 credits of the Didactic Core and Supervised Field Experience coursework while in residence on the UW-Madison campus.
- Senior Residency. Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total Credits. A minimum of 120 degree credits are required for graduation.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options,
research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

\begin{abstract}
Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.
\end{abstract}

\section*{EARNING OUTCOMES}
1. Analyze complex social issues using skills gained through the study of communication, quantitative reasoning, humanities, social sciences, natural sciences, ethnic studies, history and global issues.
2. Apply knowledge of models and concepts of disability and chronic illness to education, employment, rehabilitation, and healthcare services.
3. Identify basic theories in the field of psychology and recognize the importance of theoretical foundations in psychology for the study of rehabilitation, disability, and health.
4. Develop knowledge of the health and human services delivery systems and demonstrate pre-professional skills in communication, teamwork, problem solving, and ethical issues through engagement with the healthcare and rehabilitation services professional community.
5. Demonstrate the knowledge and skills necessary for graduate study in a variety of health and human service fields related to disability and rehabilitation or for entry-level positions in disability and related human services agencies.

\section*{FOUR-YEAR PLAN}

\section*{Rehabilitation Psychology: Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic
advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

\section*{ADVISING AND CAREERS}

\section*{REHABILITATION PSYCHOLOGY ADVISING \\ Students not yet admitted to Rehabilitation Psychology meet with their assigned advisor in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, see below. Students are assigned an additional faculty advisor when admitted to the professional component of their degree program.}

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Rehabilitation Psychology majors include: adaptive fitness; rehabilitation services (social, mental, behavioral and physical); disability education, policy or advocacy; community health and wellness; independent living; supported employment; and correctional services. Our graduates also pursue graduate degrees in rehabilitation counseling, mental health counseling, occupational therapy, physical therapy, nursing, special education, social work, and other human services and health professions.

Students develop important skills that employers look for including:
- Communication
- Critical thinking/analytical skills
- Collaboration and teamwork
- Client-centeredness/empathy
- Influencing in support of diversity, equity, and inclusion at individual, community, and systemic levels

Applied experiences, including community-based internships, career treks, and professional networking events, are available to UW Rehabilitation Psychology students.

\section*{ADDITIONAL RESOURCES}

Students interested in graduate study may also want to consult the following resources:
- Center for Pre-Health Advising (https://prehealth.wisc.edu/)
- M.S. in Clinical Rehabilitation Psychology (https:// rpse.education.wisc.edu/academics/graduate-programs/ master-of-science-m-s-in-rehabilitation-counseling/)
- Occupational Therapy at UW-Madison (https:// kinesiology.education.wisc.edu/elotd/)
- Physical Therapy at UW-Madison (http://www.med.wisc.edu/ physical-therapy-program/main/48437/)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website (https://rpse.education.wisc.edu/fac-staff/).

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin
Experience (https://wisconsinexperience.wisc.edu/about/), combines
learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{REHABILITATION PSYCHOLOGY AND THE WISCONSIN EXPERIENCE}

Undergraduate Research - More than a dozen students are working with professors and graduate students on research in rehabilitation psychology. Several are leading their own research with faculty support, and many students presented at the spring Undergraduate Research Symposium.

Community-Based Learning - RP \& SE 300 Individuals with Disabilities includes a field-based experience where students engage in work that directly or indirectly supports a person with a disability. Hundreds of student each year are placed in a wide variety of placement sites (https://docs.google.com/document/ d/1gXUjnpcFCgJdWTMVyLFIRTQCE4s9ipFsXYtz_K50oCM/edit/? usp=sharing) in the Madison area. This experience allows students to gain first-hand knowledge of the contributions of, and services provided to, individuals with disabilities within the community.

Guest Speakers - RP \& SE 300 also brings the community into the classroom. A number of guest speakers from the community provide insight regarding the range of experiences people with disabilities have while conducting their daily lives. Students also learn about the variety of community organizations engaged in the support of, and advocacy for, people with disabilities.

Internships - All RPS students participate in 240 hours of internship in the community, a real strength of the program. Students are placed in a wide variety of sites (https://rpse.education.wisc.edu/current-students/ rehabilitation-psychology-internships/) that reflect their areas of interest.

Clubs and Organizations - Our students are active participants in many clubs and organizations, including Special Olympics and Camp Kesem.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{SPECIAL EDUCATION, BSE}

Special Education is the academic home to many students who enjoy working with children and youth, especially children and youth with disabilities. Special Education graduates enter a high-need field with an almost 100\% job placement rate, with graduates finding employment in Wisconsin and across the country.

Students admitted to Special Education will have four certification options. Each of these options can be completed within a four-semester professional sequence that includes coursework, field experiences, and starts each fall.

\section*{CERTIFICATION OPTIONS}

\section*{Special Education Cross-Categorical K-12}

The program prepares educators to serve as resources and advocates for persons with disabilities and their families. This includes being a leader, collaborating with others, and working creatively within and outside schools to create inclusive educational experiences to improve the quality of life for individuals with disabilities and their families.

Graduates are prepared to work effectively across disability categories, including intellectual and developmental disabilities, learning disabilities, and emotional/behavioral disorders. The program emphasizes coursework and experiences in elementary, middle, and high schools with students who have a wide range of abilities, including students with severe disabilities.

Elementary Education K-9 and Special Education K-12 (p. 1742)
The Elementary Education and Special Education teacher certification program prepares educators who foster high academic achievement in all children-particularly students of color, students from minoritized racial, cultural, linguistic and socioeconomic backgrounds, as well as students with disabilities. The program helps students become leaders who collaborate and work creatively within and outside schools to foster inclusive educational experiences for all pupils, including those with disabilities. Program graduates understand the important role that families play in supporting students' development and achievement.

This program emphasizes collaboration, with training in both Elementary and Special Education program areas. It focuses on inclusion and gaining a strong background in working with students across disability categories, including learning disabilities, emotional/behavioral disorders, and other high incidence disabilities.

Graduates receive a Bachelor of Science degree in Education and will be eligible to receive an Elementary Education license in grades K-9 and a Special Education license in grades K-12.

\section*{Early Childhood Special Education (ECSE)}

Graduates will be certified in ECSE, ages birth-grade 3. This program prepares early intervention and early childhood special education professionals to serve young children ages birth through eight years who have, or are at-risk for, developmental delays and disabilities, as well as the families of these children. Graduates may work in a variety of settings including, but not limited to: Early Head Start, Head Start, licensed childcare centers, 4 K programs, and grades kindergarten-grade 3.

Early Childhood Special Education and Special Education CrossCategorical K-12

This option will prepare educators to support the needs of students with disabilities from birth through Grade 12. Students will be certified in both ECSE and Special Education Cross-Categorical K-12.

\section*{THE TEACHER PLEDGE}

The School of Education at UW-Madison currently offers a unique financial opportunity for students in Special Education programs called The Teacher Pledge (https://tec.education.wisc.edu/teacher-pledge/). The school pledges to pay the equivalent of in-state tuition and fees for all teacher education students. In return, students pledge to work at a Wisconsin PreK-12 school for three to four years after graduation.

\section*{MADISON COLLEGE TRANSFER AGREEMENT}

Madison College students should also investigate the transfer agreement (https://tec.education.wisc.edu/become-a-teacher/uw-madison-school-of-education-transfer-agreement/) between Madison College and UWMadison. Students meeting the requirements of this agreement are guaranteed admission to UW-Madison's School of Education and to Special Education.

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

Undergraduate students generally apply to the professional part of the Special Education degree program in their sophomore year. Selection is made during the spring semester. Currently, students are admitted to the program once a year, effective for the summer following selection. Once admitted, students typically spend four semesters completing their remaining coursework.

Information about application procedures for the Elementary-Special Education dual teacher certification option is available in the Elementary Education (p. 1618) section of the Guide.

\section*{ENTERING THE SCHOOL OF EDUCATION}

\section*{NEW AND CURRENT UW-MADISON STUDENTS}

New freshmen and transfer students interested in special education are admitted directly to the School of Education with a "preprofessional" classification. This classification indicates that a student is interested in a program offered by the school, but has not applied and been admitted to the professional program. Students interested in special education receive the "pre-professional" classification of PSR.

On-campus students wishing to be admitted to the school while working on eligibility requirements and application can apply for admission to the school by completing a Pre-Professional Application (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/). A minimum GPA of 2.5, based on UW-Madison coursework, is required to transfer into the school. This GPA may be modified by the Last 60 Credits rule (detailed below (p. )). It is not necessary to be a "pre-professional" student before applying to a professional program.

It is strongly recommended that students interested in a School of Education program meet with an academic advisor in the School of Education Student Services office, 139 Education Building, 1000 Bascom Mall. Students may call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Applicants not already enrolled on the UW-Madison campus must be admissible to the University to enroll in a School of Education program. Admission to UW-Madison requires a separate application and admission process. See UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu/) for application information. Prospective transfer students are strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment with an advisor.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective applicants who already hold an undergraduate degree are strongly encouraged to meet with an advisor in the School of Education Student Services office in advance of their application. Consultations with advisors are available in person, by telephone or online; call 608-262-1651 or email soeacademicservices@education.wisc.edu to schedule an appointment.

Applicants who already hold an undergraduate degree are admitted to the School of Education as either an Education Special student or a second degree student, depending on their interests and academic background. Admission as an Education Special student indicates that the student has an interest in pursuing certification in a subject area studied during the initial degree; another degree is not awarded for this "certification only" coursework. Second degree students are seeking a second, unrelated degree from the School of Education, which may, or may not, include teacher certification. Candidates for limited enrollment programs must meet all admission eligibility requirements for the program and must compete with the eligible applicants for program admission. More information is available here (p. 1539).

\section*{APPLICATION AND ADMISSION}

Certification to teach special education requires that a student be admitted into the professional part of the degree program. The School of Education admits students into the special education program one a year, effective for summer following selection. In recent years the program has been able to accommodate all qualified applicants.

\section*{PROGRAM ADMISSION ELIGIBILITY REQUIREMENTS}

Requirements and selection criteria may be modified from one application/admission period to the next. Any changes to these criteria may occur up until the application period begins. Potential applicants should consult the School of Education's Undergraduate Admissions (http://www.education.wisc.edu/soe/academics/undergraduate-students/academic-program-admission/) page for application deadlines and detailed information regarding current eligibility requirements and selection criteria prior to submitting an application.

\section*{To be eligible for admission to the professional program, applicants must:}
- complete at least 40 transferable college-level credits by the end of the fall semester before application.
- successfully complete RP \& SE 300 Individuals with Disabilities ( 3 cr ) by the end of the summer semester of the application year.
- earn a minimum 2.5 grade point average (GPA) on a 4.0 scale on all transferable college-level coursework attempted. \({ }^{1}\)
- submit all program application form(s), transcripts, and other related application materials by the application deadline specified on the School of Education's Undergraduate Admissions (http://www.education.wisc.edu/soe/academics/ undergraduate-students/academic-program-admission/) page.

1
A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW-Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UWMadison coursework established by their program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility for program consideration. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{PROGRAM SELECTION CRITERIA}

The special education faculty will review all completed applications that meet eligibility criteria. When reviewing an application, special education faculty want to learn as much about the applicant as possible and will make every effort to take into account the whole person. Applicants are encouraged to provide, in writing, whatever they would want to share in a face-to-face interview.

The selection committee members will consider several factors when selecting students for the program. Although the grade point average (GPA) is considered an important indicator of success, it is not the only basis on which applicants will be selected for admission. Trends in the applicant's grades, difficulty of course load, and outside work load will be considered (see factors 1, 2, and 3 below).

\section*{In addition to the GPA, faculty will consider the following factors:}
- College grading and course selection pattern. Transcripts will be examined individually. Account will be taken whether an applicant has clearly followed an unusually easy or difficult pattern of courses or if the GPA reflects a poor grade in an exceptionally difficult subject area.
- Trends of college grades. An applicant who started very poorly or showed a decline in their early phases of college, but performed strongly in later college years, may be judged more favorably than another with the same GPA but level or declining record.
- Diversity of experience or background. Work/life experience, college activity, political activity, and other experiences or background that adds a diverse perspective to the special education student body may work in the applicant's favor. Volunteer or paid work with people with disabilities will be taken into account in the selection process. Volunteer or paid work with people from a background different than the applicant's may also be taken into account in the selection process.
- Writing sample (Statement of Purpose). Application materials must include an essay in which the applicant gives reasons for becoming a special education teacher. Writing is so important in the professional life of teachers and in the teacher education program that the quality of the applicant's writing will be taken into account in making admissions decisions.
- Letters of recommendation. Recommendation letters will play an important role in helping the selection committee judge the applicant's prospects for academic success in the program. Careful, thoughtful letters from mentors, teachers, or employers will provide information about the applicant's intellect, imagination, or prospects for becoming a successful teacher. Working with people with disabilities will be taken into account in the selection process. Working with people from a background different than the applicant's may also be taken into account in the selection process.
- Other factors. The program's quest for diversity leads the selection committee to take into account fully qualified applicants from under-represented groups. Race, ethnicity, cultural, geographic background, and economic disadvantage are among the factors that will be considered, taking into account the needs of the schools. A full-time or extra heavy part-time work load will be considered a factor in close cases.

\section*{CRIMINAL BACKGROUND INVESTIGATION}

The Department of Public Instruction (DPI) is required by law to conduct a background check on each applicant for a Wisconsin educator license. This check is intended to determine if the applicant has engaged in any behavior that endangers the health, welfare, safety or education of PK-12 pupils. Local school districts also will conduct criminal background checks routinely on teacher education students prior to the start of in-classroom field work. Admitted applicants to any teacher education program who have a positive background check should confer with the Academic Dean's Office (Room 139 Education, 1000 Bascom Mall) about the potential impact of this on field placements and licensure.

An individual who is deemed ineligible to participate in field or clinical experiences based on the results of their background check may not be able to complete the requirements for their degree or certification. Students with questions about these processes should contact the Teacher Education Center.

Note: Students cannot complete the Certificate in Disability Rights and Services in conjunction with this program.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.}

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Special Education program has four primary components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Professional education coursework includes an examination of the schools' relationship to our society and the processes by which students grow and learn.
- Core Requirements offer an in-depth study of Special Education, including a four-semester professional sequence of teaching methods coursework and field experience in schools. This sequence is designed so that students can complete the program in four years.
- Elective coursework is taken to reach the required minimum of 120 credits.

\section*{SPECIAL EDUCATION OPTIONS SELECT ONE}

View as listView as grid
- SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION BIRTH - GRADE 3, BSE (P. 1763)
- SPECIAL EDUCATION: EARLY CHILDHOOD SPECIAL EDUCATION/SPECIAL EDUCATION DUAL CERTIFICATION BIRTH-GRADE 12, BSE (P. 1764)
- SPECIAL EDUCATION: KINDERGARTEN - 9TH GRADE/SPECIAL EDUCATION KINDERGARTEN - 12TH GRADE DUAL CERTIFICATION, BSE (P. 1766)
- SPECIAL EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ ELEMENTARY EDUCATION DUAL CERT, BSE (P. 1767)
- SPECIAL EDUCATION: SPECIAL EDUCATION CROSS CATEGORICAL K-12, BSE (P. 1769)

\section*{ELECTIVE COURSEWORK}

Complete additional coursework to reach the minimum of 120 credits.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS} GRADUATION REQUIREMENTS
Students must complete all requirements and also obtain the endorsement of the program faculty advisor(s) to receive certification through UW-Madison. The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Requirements below are based on UW-Madison coursework.
- 2.75 cumulative grade point average. This may be modified by the Last 60 Credits Rule (p. 1539).
- 2.75 cumulative grade point average across all professional education courses (excluding practicum and student teaching).
- 2.75 cumulative grade point average in the major.
- Minimum 120 credits (degree candidates only). Most students will need more than the minimum to complete all requirements.
- Major residency: Degree candidates must complete at least 15 credits of upper-level major coursework (numbered 300-699) in residence on the UW-Madison campus.
- Senior residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus. Student teaching and practicum are considered part of the 30 credits.

\section*{DEGREE AUDIT (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the
academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. Many of these requirements are embedded within the program's requirements and require no additional attention. The endorsement of the program coordinator/faculty is also required to receive certification through UW-Madison.

The State of Wisconsin requires that anyone wishing to teach in a public K-12 setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license.

Detailed information about certification requirements and applying for a license is available under Certification/Licensure. (p. 1762)

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency
Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. (Professionalism) Adhere to professional ethical standards and conduct her or himself in a courteous and professional manner.
2. (Collaboration and Communication) Collaborate and effectively communicate with students their families, other educators, related service providers and members of the community to address the needs of students with disabilities.
3. (Assessment) Collect information on student backgrounds, learning characteristics and achievement that can be used to determine students' present level of performance and guide instruction.
4. (Special Education Evaluation and Individualized Educational Planning) To the maximum possible the teacher candidate will participate in the Educational Evaluation and Individualized Educational Planning process.
5. (Instructional Planning) Plan instruction that meets the needs of students, is consistent with State and local standards and provides access to the general education curriculum.
6. (Instructional Presentations) Present lessons and units of instruction that gain and maintain student attention and are consistent with students' interests and IEP goals.
7. (Classroom Management) Create and maintain a safe, positive and supportive learning environment that is conducive to learning and the mental health of the students.

\section*{FOUR-YEAR PLAN}

Refer to the available named options for more information on the fouryear plans.

\section*{ADVISING AND CAREERS}

\section*{SPECIAL EDUCATION PROGRAM ADVISING}

Students not yet admitted to special education meet with their assigned advisor in the School of Education Student Services office, Room 139 Education Building, 1000 Bascom Mall, see below. Students are assigned an additional faculty advisor when admitted to the professional component of their degree program.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting
them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available.

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

\section*{ADDITIONAL RESOURCES}

Students interested in special education may also want to consult the following resources:
- Read about the relationship between Special Education and regular education programs.
- Watch a Video describing the work of Special Educators.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Rehabilitation Psychology and Special Education can be found on the department's website (https://rpse.education.wisc.edu/rpse/people/ faculty/). (http://rpse.education.wisc.edu/)

\section*{WISCONSIN EXPERIENCE}

\section*{THE WISCONSIN EXPERIENCE}

UW-Madison's vision for the total student experience, the Wisconsin Experience (https://wisconsinexperience.wisc.edu/about/), combines learning in and out of the classroom. Tied to the Wisconsin Idea (https:// www.wisc.edu/wisconsin-idea/) and steeped in long-standing institutional values-the commitment to the truth, shared participation in decisionmaking, and service to local and global communities-the Wisconsin Experience describes how students develop and integrate these core values across their educational experience.

UW-Madison encourages students to mindfully engage in four core concepts throughout their time on campus: Empathy \& Humility, Relentless Curiosity, Intellectual Confidence, and Purposeful Action (https://wisconsinexperience.wisc.edu/intellectual-confidence/).

Since its inception the School of Education has embraced the concepts of the Wisconsin Experience, providing opportunities for students to learn in venues beyond the traditional classroom. Our students also independently seek out related activities and experiences, thus creating their own unique Wisconsin Experience.

\section*{SPECIAL EDUCATION AND THE WISCONSIN EXPERIENCE}

\section*{Community-Based Learning - RP \& SE 300 Individuals with}

Disabilities includes a field-based experience where students engage in work that directly or indirectly supports a person with a disability. Hundreds of student each year are placed in a wide variety of placement sites (https://docs.google.com/document/ d/1gXUjnpcFCgJdWTMVyLFIRTQCE4s9ipFsXYtz_K50oCM/edit/? usp=sharing) in the Madison area. This experience allows students to gain first-hand knowledge of the contributions of, and services provided to, individuals with disabilities within the community.

Guest Speakers - RP \& SE 300 also brings the community into the classroom. A number of guest speakers from the community provide insight regarding the range of experiences people with disabilities have while conducting their daily lives. Students also learn about the variety of community organizations engaged in the support of, and advocacy for, people with disabilities.

A wide variety of guest speakers attend Special Education's practicum and student teaching seminars. This can include school district personnel, parents and family members, teachers, and individuals with disabilities.

Field Experiences - Students in our teacher education programs have multiple field experiences in local schools during their professional sequence. A Community Based Asset Mapping exercise asks students to explore the strengths and assets of the communities in which their field placement school resides.

Clubs and Organizations - Our students are active participants in many clubs and organizations, including Special Olympics, Aspiring Educators, and Camp Kesem.

\section*{CERTIFICATION/LICENSURE}

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS}

Students interested in certification must, in addition to completing UW-Madison's program requirements, also complete Wisconsin statutory requirements related to teacher education and certification requirements established by the Wisconsin Department of Public Instruction. Students must complete all requirements and also obtain the endorsement of the program faculty to receive certification through UW-Madison. For additional certification requirements and information about applying for a license, see the Teacher Education Center (https:// tec.education.wisc.edu/current-students/).

\section*{APPLYING FOR A TEACHING LICENSE}

The State of Wisconsin requires that anyone wishing to teach in a public \(\mathrm{K}-12\) setting hold a valid teaching license issued through the Department of Public Instruction. In addition to completing a certification program, students must submit a separate application for this license. Students intending to complete a teacher certification program should monitor program requirements carefully. The Wisconsin Department of Public Instruction (DPI) periodically implements regulations that affect all certification programs; teacher certification candidates are responsible for having up-to-date information about certification requirements

\section*{LICENSING LEVELS}

The following licensing options will be offered at UW-Madison.
- The core Elementary Education licensing level will be Kindergarten through Grade 9. Early Childhood, and English as a Second Language Kindergarten through Grade 12, can be added to the K-9 option.
- Special Education will offer licensing at the Early Childhood level Kindergarten through Grade 12 level, and a program option that licenses in both Early Childhood Special Education and K-12 Special Education. The new Elementary Education and Special Education degree certifies students in both Special Education Kindergarten through Grade 12 and Elementary Education Kindergarten through Grade 9.
- Secondary Education program areas will license in their subject area Grades 4 through 12, and also in English as a Second Language Kindergarten through Grade 12.
- World Language Education program areas will license at the Kindergarten through Grade 12 level.
- Students in special fields such as Art, Music, and Physical Education will be licensed at the Kindergarten through Grade 12 level
- Health and Library Media Specialist both license at the Kindergarten through Grade 12 level.
- Communication Sciences and Disorders (Speech-Language Pathology) will license at the K-12 level.

\section*{WISCONSIN STATE LICENSING}

The State of Wisconsin issues an initial teaching license to certified teachers. The current fee is \(\$ 125\). An online license application is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/ elo/). A background check will also be conducted by DPI. Information about fingerprint submission, when necessary, is available through the Department of Public Instruction (http://dpi.wi.gov/tepdl/licensing/ fingerprint/electronic-submission/).

Before applying for a license, DPI requires the electronic submission of "Endorsed Candidate for Licensure" (ECL) data by the certifying officer of the institution where the teacher preparation was completed. For UWMadison teacher certification students, the endorsement will come from the School of Education, L139 Education Building, 1000 Bascom Mall. Once this information has been submitted to DPI, students are notified by email that they may begin the application online.

Before endorsing a student, UW-Madison requires that
1. all certification requirements are met;
2. student teaching (following the school district calendar) is completed;
3. final grades are posted and reviewed;
4. the degree is "posted" by the registrar's office (one to four weeks after graduation); and
5. a recommendation for certification is received from the program faculty.

The Wisconsin Department of Public Instruction may require an additional 6 to 8 weeks for license processing

\section*{LICENSING OUTSIDE OF WISCONSIN}

To apply for a license in a state other than Wisconsin, first check out the application requirements of that state. The University of Kentucky has a website (https://education.uky.edu/accreditation/certification/ states/) that provides links to teacher licensing agencies in all 50 states, the District of Columbia, and Puerto Rico.

Many states have a verification form that needs to be signed by a UW-Madison certification officer. This form verifies that a stateapproved licensing program has been completed. These forms should be sent to the School of Education Teacher Education Center at L139 Education Building, 1000 Bascom Mall, Madison, WI 53706, or by email (educatorlicensing@education.wisc.edu) to be completed. You must complete your personal information on the form before sending it to the Teacher Education Center. If the form requests information about practicum and student teaching assignments (names of schools, grade levels, dates, etc.), this information must also be completed before sending the form to the Teacher Education Center.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

Wisconsin

\section*{The requirements of this program do not meet Certification/Licensure in the following states: \\ Not applicable \\ The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, lowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{REQUIREMENTS}

The Early Childhood Special Education option will prepare students to work as educators and early interventionists for children with disabilities from birth through grade 3.

\section*{PREREQUISITE FOR PROGRAM ADMISSION}

This course must be completed by the end of the summer of the application year and is calculated into the major gpa required for graduation.

\section*{FOUR-YEAR PLAN}

\section*{Special Education: Early Childhood Special Education Option}

\section*{Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

May be taken before semester 1 of the professional sequence, including prior to program admission.
A minimum of 120 credits is still required to complete the degree.

\section*{CONTENT AREA MINOR (OPTIONAL REQUIREMENT)}

Students may elect to complete a minor in one of the following content areas. Minors provide a depth of study in a particular area of interest and also inform classroom instruction. Upon completion, the minor will be posted on the UW-Madison transcript, but students will not receive an additional certification in the subject area. The Wisconsin Department of Public Instruction no longer offers content licenses in association with the K-9 educator license.

The completion of a minor is required to teach middle school licensing in some states and may benefit students particularly interested in teaching at this level. See the links below for the requirements of each minor.

\section*{Minor Options}
- Biology (p. 1608)
- Chemistry (p. 1610)
- Earth Science (p. 1617)
- Economics (p. 1617)
- English (p. 1642)
- English Language Arts (p. 1640)
- Geography (p. 1644)
- History (p. 1646)
- Mathematics (p. 1654)
- Mathematics and Science Dual (p. 1651)
- Mathematics Specialized (p. 1653)

\section*{SPECIAL EDUCATION: MIDDLE CHILDHOOD THROUGH EARLY ADOLESCENCE/ ELEMENTARY EDUCATION DUAL CERT, BSE}

Admissions to the Special Education: Middle Childhood through Early Adolescence/Elementary Education Dual Cert, BSE have been suspended as of fall 2023 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

\section*{REQUIREMENTS}

The Middle Childhood-Early Adolescence/Dual Elementary and Special Education option prepares teachers to work in intermediate and middle school settings (approximately ages 6 through 12-13). Students are certified in both Special Education and Elementary Education at the Middle Childhood-Early Adolescence levels. Admitted students begin the four-semester professional sequence in the fall following admission.

The option coursework listed here is one component of the Elementary/ Special Education, BSE degree (p. 1620) requirements.

\section*{FOUR-YEAR PLAN}

\section*{SPECIAL EDUCATION: SPECIAL EDUCATION CROSS CATEGORICAL K-12, BSE}

\section*{REQUIREMENTS}

Students in the Special Education Cross Categorical K-12 option will seek licensure to work with students in elementary and secondary schools (kindergarten through grade 12.) Admitted students begin a foursemester professional sequence in the fall following admission.

The option coursework listed here is one component of the Special Education, BSE degree (https://guide.wisc.edu/undergraduate/ education/rehabilitation-psychology-special-education/special-education-bse/) requirements

\section*{PROFESSIONAL EDUCATION REQUIREMENTS}

\section*{Individuals with Disabilities}

This course is a prerequisite for admission to the Special Education program. It must be completed by the end of the summer of the application year.

\section*{Code}

RP \& SE 300

\section*{Development (Minimum of 3 credits)}

May be taken prior to program admission.
\begin{tabular}{|c|c|c|}

\section*{CORE REQUIREMENTS (INCLUDES PROFESSIONAL SEQUENCE)}

RP \& SE 300 Individuals with Disabilities is a prerequisite for admission to the Special Education program. This course must be completed by the end of the summer of the application year and is calculated into the major gpa required for graduation.

\section*{SPECIAL EDUCATION PROFESSIONAL SEQUENCE}

Students complete a four-semester sequence of professional courses after admission to the program. The professional methods courses and clinical (field) experiences must be followed sequentially and taken in consecutive semesters unless a modification is approved. Class schedules for the professional sequence courses are determined in advance.

\section*{FOUR-YEAR PLAN}

Special Education: Special Education Cross Categorical K-12 option

\section*{Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your
placement scores, incoming credits, and individual interests. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements.

If you are interested in completing a study abroad semester, please meet with Kayla Armstrong prior to starting the professional sequence and review the study abroad section of the planning document (https:// uwmadison.box.com/s/kcids3uopuacgj5c2qtc8qke6ii6ods8/). Study abroad semesters are usually completed during the fall semester of a student's senior year

\section*{Freshman}

\section*{Total Credits 120}

1
Course may be taken prior to scheduled semester, including prior to program admission. A minimum of 120 credits is required to complete the degree.

\section*{THEATRE AND DRAMA}

A degree in Theatre and Drama from the University of Wisconsin-Madison opens doors to a wide range of careers. Our alumni are successful in theatre, film, television, gaming, production management, development, design, education, and all aspects of the entertainment industry. Our faculty are active theatre professionals who bring current and practical knowledge into the classrooms and productions. Our department is well known for the individual attention, mentoring, and commitment we give our students.

Through mainstage, open-stage, and student-produced works, the Department of Theatre and Drama provides students with excellent opportunities to apply the skills and techniques learned in the classroom within fully staged productions.

Theatre and Drama majors will complete a Bachelor of Science degree in Theatre and Drama ( \(p .1773\) ) through the School of Education. Majors may informally select areas of emphasis such as design, stage management, directing, acting, or theatre technology. Students whose primary interest is acting may pursue the Acting Option (p. 1777). An audition is required prior to acceptance to the Acting Option, and is held each semester. Students should see the department advisor for more information on the Acting Option.

Non-majors who wish to extend their familiarity with theatre in theory and practice are encouraged to enroll in department courses and participate in productions. The Certificate in Theatre (p.1778) allows students from across campus, regardless of their major or degree program, to engage in a structured, meaningful theatre-related experience. The department has hosted students from many disciplines-such as law, business, medicine, art, dance, science, and social work-who wish to develop effective communication skills, enhance problem-solving abilities, and cultivate visual acumen.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Theatre and Drama, B.S. (p. 1771)
- Theatre, Certificate (p. 1778)

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website (http:// theatre.wisc.edu/).

\section*{THEATRE AND DRAMA, B.S.}

\section*{HOW TO GET IN}

\section*{PROGRAM ADMISSION OVERVIEW}

The Theatre and Drama major may be completed either as the primary major or as an additional ("double") major.

\section*{PRIMARY MAJOR IN THEATRE AND DRAMA}

Undergraduate students interested in completing the Bachelor of Science-Theatre and Drama degree program will fulfill the School of Education's liberal studies and other degree requirements in addition to the 43 credits required for the Theatre and Drama major.

\section*{ADDITIONAL MAJOR IN THEATRE AND DRAMA}

Undergraduate students from all schools and colleges on campus (including the School of Education) may declare Theatre and Drama as an additional major. Students completing Theatre and Drama as an additional major do not need to complete the School of Education's liberal studies and other degree requirements. For application information, go directly to the Additional Major in Theatre and Drama (p. 1772) section below.

\section*{ENTERING THE SCHOOL OF EDUCATION}

\section*{NEW AND CURRENT UW-MADISON STUDENTS}

Incoming freshmen enter directly into the Bachelor of Science-Theatre and Drama degree program upon admission to UW-Madison; list Theatre and Drama as the intended major. No additional application to Theatre and Drama is required.

See UW-Madison Office of Admissions and Recruitment (http://admissions.wisc.edu/) for application information.

All other on-campus students will submit an application following a meeting with the department's academic advisor.

\section*{PROSPECTIVE TRANSFER STUDENTS}

Transfer students must be admissible to the university to enroll in a School of Education degree program. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information. Transfer students enter directly into the Bachelor of Science-Theatre and Drama degree program upon admission to UW-Madison; list Theatre and Drama as the intended major. No additional application to Theatre and Drama is required. Prospective transfer students are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective transfer students are also strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{STUDENTS WITH A PREVIOUS DEGREE}

Prospective students who already hold an undergraduate degree must be admissible to the university to enroll in a School of Education degree program. See UWMadison Office of Admissions and Recruitment (http:// admissions.wisc.edu/) for application information.

Applicants must also meet the following criteria for admission as a second undergraduate degree candidate in the School of Education. Candidates must:
- be seeking a new major that is substantially different from their previous degree work;
- need to complete at least 15 upper-level credits in the new major;
- need to complete at least 30 credits beyond their previous coursework.

When admitted, second degree candidates enter directly into the Bachelor of Science-Theatre and Drama degree program. No additional application to Theatre and Drama is required.

Prospective students who already hold an undergraduate degree are strongly encouraged to meet with the Department of Theatre and Drama academic advisor before coming to campus. Coursework taken at another institution may need to be evaluated by the department academic advisor or a faculty member in the Department of Theatre and Drama. Prospective second degree candidates are also strongly advised to meet with an advisor in the School of Education Student Services office in advance of their application; to schedule, call 608-262-1651.

\section*{APPLICATION AND ADMISSION}

While new freshmen and off-campus transfers are admitted directly to the B.S.-Theatre and Drama degree program, all other current UWMadison students seeking to enter the B.S.-Theatre and Drama program
must apply for admission to the program. Students must make an appointment with the departmental advisor to complete the declaration form. Requirements and selection criteria may be modified from one application/admission period to the next.

\section*{CRITERIA FOR ADMISSION}

Eligibility for admission consideration to B.S.-Theatre and Drama:
- Cumulative grade-point average on all transferable college-level coursework of at least a 2.50 (on a 4.00 scale). \({ }^{1}\)
- Cumulative grade point average of at least a 2.5 based on UWMadison campus coursework, as modified by the Last 60 Credits Rule (detailed below).
- Submission of all required application materials, including program application and transcripts.

1
A comprehensive cumulative GPA of all college-level, transferrable coursework attempted on both the UW-Madison campus coursework and coursework taken at any other colleges or universities may be calculated for the exclusive purpose of establishing an applicant's eligibility for consideration. Both the comprehensive cumulative GPA and the comprehensive cumulative GPA based on a student's last 60 credits may be calculated. See Last 60 Credits Rule (detailed below). If admitted, students must earn the minimum cumulative GPA for UWMadison coursework established by their program and the School of Education each semester after admission.

\section*{Last 60 Credits Rule}

Two grade point averages will be calculated to determine candidates' eligibility to programs. GPAs will be calculated using
- all transferable college level coursework attempted, and
- the last 60 credits attempted.

The higher GPA of these two will be used for purposes of determining eligibility. If fewer than 60 credits have been attempted, all credits will be used to calculate the GPA. Graded graduate coursework will also be used in all GPA calculations. ("Attempted" coursework indicates coursework for which a grade has been earned.) More information on this rule is available here (p. 1539).

\section*{ADDITIONAL MAJOR IN THEATRE \& DRAMA}

Undergraduate students from all schools and colleges on campus (including Education) may declare Theatre and Drama as an additional major. Students wishing to declare the additional major must make an appointment with the departmental advisor to complete the declaration form. The declaration must also be approved by the student's home school/college.

Please note that the requirements of the additional major must be completed before or concurrently with the degree program and primary major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF EDUCATION LIBERAL STUDIES REQUIREMENTS}

All students are required to complete a minimum of 40 credits of Liberal Studies (p. 1547) coursework. This requirement provides an opportunity to do some academic exploration beyond the scope of the major. Students take courses in areas of particular interest and also have an opportunity to sample the wide selection of courses offered across the university. Coursework is required in humanities, social studies, science, and cultural and historical studies. Some elective coursework is also needed to reach the required number of credits.

\section*{The School of Education's Liberal Studies}

Requirements automatically satisfy most of the University General Education Requirements outlined above, including ethnic studies, humanities/literature, social studies, and science. Students pursuing most School of Education degree programs may also complete Communication Part B, Quantitative Reasoning Part A, and Quantitative Reasoning Part B through courses required by their degree program. If a student cannot complete a General Education Requirement within the curriculum of their chosen School of Education program, academic advisors can offer suggestions for courses that meet the requirement and augment the student's primary area of study.

A basic outline of the liberal studies is included below. Students must consult the detailed version of the requirements (p. 1547) for information about course selection and approved course options.

\section*{Humanities, 9 credits}

All students must complete a minimum of 9 credits to include:
- Literature
- Fine Arts
- Humanities Electives

\section*{Social Studies (Social Science)}

All students must complete a minimum of 9 credits. Teacher certification programs and Kinesiology have unique requirements in this category.

\section*{Science}

All students must complete a minimum of 9 credits to include:
- Biological Science
- Physical Science
- Laboratory Science
- Science Electives

\section*{Cultural and Historical Studies}

All students must complete three requirements ( 9 credits) met by separate courses. Any of these courses can also be used to meet the Humanities or Social Studies (Social Sciences) requirements if it has the relevant breadth designation.
- Ethnic Studies
- U.S./European History
- Global Perspectives

Complete Liberal Studies Electives (p. 1547) to total 40 Credits.

\section*{PROGRAM STRUCTURE}

The Bachelor of Science (B.S.) degree program in Theatre and Drama has three primary components:
- Liberal studies courses expose students to a broad range of academic disciplines. The university-wide General Education requirements also encourage this breadth of study.
- Major requirements permit in-depth studies of theatre and drama.
- Additional electives to reach the minimum of 120 degree credits. These credits allow students to pursue individual areas of interest, such as a second major or additional theatre and drama credits. Many B.S.Theatre and Drama students complete an additional major from the College of Letters \& Science. Some use this major to complement their theatre preparation, while others select majors that reflect interests completely unrelated to theatre.

\section*{MAJOR REQUIREMENTS}

Effective Fall, 2018
Complete a minimum of 43 credits. At least 15 credits of upper-level major coursework (courses designated intermediate or advanced, and/ or courses at the 300 level or above) must be taken in residence with a minimum 2.5 grade point average.
\begin{tabular}{llr} 
Code & Title & Credits \\

\end{tabular}} \\
\hline
\end{tabular}

\section*{REQUIREMENTS FOR THE ACTING OPTION}

View as listView as grid

\section*{- THEATRE AND DRAMA: ACTING (P. 1777)}

\section*{HONORS IN THE MAJOR}

Students completing the requirements for Honors in the Major engage in valuable preparation for graduate and professional training and learn worthwhile skills that will benefit them in the workplace.

Those students interested in earning Honors in Theatre and Drama should declare their intention to graduate with Honors in the Major at the end of their sophomore year or the beginning of their junior year. The department advisor must be consulted to determine the best way to fulfill the honors requirements and how to make the most out of the experience.

Honors in Theatre and Drama is earned by satisfying both the requirements for the major and these additional requirements:
- Maintain a minimum GPA of 3.5 in major courses and an overall GPA of at least 3.3 in all courses taken at UW-Madison at the time of graduation.
- Complete one of the following courses:
\begin{tabular}{llr} 
Code & Title & Credits \\
THEATRE 500 & The Business of the Business & 3 \\
\hline THEATRE 501 & The Business of Acting & 3 \\
M HR 320 & \begin{tabular}{l} 
New Ventures in Business, the Arts \\
and Social Entrepreneurship
\end{tabular} \\
& \\
- Complete the following two-semester senior honors thesis for a total \\
of sic credits. Students must procure a mentor to supervise these two \\
courses and their honors thesis project. This thesis may be a written \\
research thesis, an original work of art, a performance, or other project \\
determined by the student and his/her mentor. All senior honors \\
theses will culminate in an open presentation of their work.
\end{tabular}
\begin{tabular}{llr} 
Code & Title & Credits \\
THEATRE 681 & Senior Honors Thesis & 3 \\
\hline THEATRE 682 & Senior Honors Thesis & 3
\end{tabular}

Students should be aware that some courses are not offered on a regular basis (some are offered every other year, some based on student enrollment in the department, and some based on current staffing.). Please contact the department advisor for information on specific courses and course equivalence.

\section*{GPA AND OTHER GRADUATION REQUIREMENTS GRADUATION REQUIREMENTS}

Based on UW-Madison coursework.
- 2.5 minimum cumulative grade point average. This may be modified by the Last 60 Credits Rule.
- 2.5 cumulative major grade point average.
- 2.5 cumulative grade point average in all upper-level major coursework. Upper-level coursework is defined as all intermediate and advanced coursework, and/or at the 300 level or above.
- Major Residency: Students must complete a minimum of 15 credits of upper-level coursework in the major in residence on the UW-Madison campus. Upper-level coursework is defined as all intermediate and advanced coursework, and/or at the 300 level or above.
- Senior Residency: Degree candidates must complete their last 30 credits in residence on the UW-Madison campus, excluding retroactive credits and credits granted by examination.
- Total credits: A minimum of 120 credits are required for graduation in the B.S.-Theatre and Drama degree program.

\section*{DEGREE AUDIT REPORTING SYSTEM (DARS)}

UW-Madison uses "DARS" to document a student's progress toward the completion of their degree, including any additional majors and certificates. A DARS (Degree Audit Reporting System) report shows all the requirements for completing a degree and, against courses that are planned or completed, shows the requirements that have been met, and those that are unmet. A report can offer suggestions about courses that may be taken to meet specific requirements and can assist in the
academic planning and enrollment process. Students can access a DARS report in the Course Search \& Enroll app or Student Center via My UW.

DARS also has a "what-if" function. This feature makes it possible to request a DARS report as if pursuing another program, major or certificate. It is an excellent tool if considering a new or additional area of study. School of Education students in a pre-professional classification such as Pre-Elementary (PRE), or Pre-Kinesiology should request a "what if" DARS report of their professional program of interest.

More information on how to request a DARS report is available on the registrar's website (https://registrar.wisc.edu/dars-student/).

DARS is not intended to replace student contact with academic advisers. It creates more time in an advising appointment to discuss course options, research opportunities, graduate school, or issues of personal interest or concern to students.

DARS is used as the document of record for degree program, major and certificate completion in the School of Education.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits. \\
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{EARNING OUTCOMES}
1. Demonstrate the ability to evaluate the art and craft of theatre both critically and conceptually.
2. Demonstrate the ability to interpret and analyze a script as an integral part of the theatrical process.
3. Demonstrate knowledge of theatrical history and literature.
4. Demonstrate competence in effective communication through vocal dynamics, movement, and the sharing of ideas.
5. Demonstrate the ability to problem-solve creatively and generously collaborate as theatre artists.

FOUR-YEAR PLAN

Theatre and Drama: Sample Four-Year Plan

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

\section*{ADVISING AND CAREERS}

\section*{THEATRE AND DRAMA DEPARTMENTAL ADVISING}

Prospective off-campus and on-campus B.S.-Theatre and Drama students will meet with department academic advisor Jim Stauffer, Department of Theatre and Drama, 6004 Vilas Communications Hall, 821 University Ave, (main office) 608-263-2329, jbstauffer@wisc.edu. Students are also strongly encouraged to confer with an advisor in the School of Education Student Services office on a regular basis, see below.

\section*{SCHOOL OF EDUCATION ADVISING}

\section*{ACADEMIC ADVISING IN THE SCHOOL OF EDUCATION}

Dedicated to supporting and promoting student success, Academic Advisors (https://education.wisc.edu/academics/undergrad-majors/ academic-advising/) are here to assist students with the adjustment to college, understanding their degree and career goals, and connecting them to resources. Advisors support prospective and current School of Education students in all programs through:
- course selection
- mentoring and advocacy for underrepresented and international students
- understanding degree requirements and progression
- interpreting academic policies
- helping students recognize their strengths and suggesting ways to expand their skills
- expanding learning through activities such as study abroad, volunteering/work/internship, and by assuming leadership roles

To schedule an appointment: Current students can schedule an appointment online through the Starfish app (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/) in MyUW. Appointments can also be made through email at studentservices@education.wisc.edu, by calling 608-262-1651, or in person.

\section*{CAREER ADVISING IN THE SCHOOL OF EDUCATION}

The School of Education Career Center provides students with the knowledge needed for connecting their classroom experiences with realworld application to develop skills needed to navigate the ever-changing
world of work. Through individual appointments, events, courses, and online resources, the Career Center provides students and alumni with the tools needed to be successful in their career development.

Career and Internship Advisors are prepared to help students with:
- Exploration of career and academic pathways
- Resumes
- Cover letters
- Job/Internship search
- Interview preparation
- Mock interviews
- Graduate school search, applications and decisions
- Negotiating job or internship offers
- Professional networking
- Connecting with employers

Students are encouraged to meet with their Career and Internship Advisor early in their college experience to take full advantage of the resources and support available

To make an appointment: log into Starfish (https:// wisc.starfishsolutions.com/starfish-ops/) from the MyUW dashboard.

For more information, visit the School of Education Career Center website (https://careercenter.education.wisc.edu/) or reach out at careercenter@education.wisc.edu.

Potential careers for Theatre and Drama majors include: theatrical or on-camera acting, stage management, design or technical production, directing, arts administration, youth theater education, or playwriting. Our graduates work in local, regional and national theaters, businesses, nonprofits, community agencies, as well as many other fields.

Students develop important skills that employers look for including:
- Diverse forms of communication, personal expression and connection
- Collaboration
- Creative problem solving/critical thinking
- Advancing creative concepts into action
- Adaptability, versatility, and improvisation
- Resilience; ability to receive and provide feedback
- Dedication and attention to quality
- Time management and respect for deadlines

Applied experiences, including paid internships, apprenticeship programs, career treks, and professional networking events, are available to UW Theatre \& Drama students.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website. (http:// theatre.wisc.edu/)

\section*{RESOURCES AND SCHOLARSHIPS}

Information about scholarships, academic and career advising, study abroad opportunities, student diversity services, and other resources
for students in the School of Education can be found on the school's Resources (p. 1560) page.

\section*{THEATRE AND DRAMA: ACTING}

\section*{REQUIREMENTS}

Theatre and Drama majors with a primary interest in acting may audition for the Acting Option. This highly-structured program of study offers students a deeper practical knowledge and experience of the skills required to pursue professional work as an actor and/or advanced studies in theatre. These students are highly mentored and will benefit from personalized performance reviews with the acting faculty at the end of each semester.

Admission is by audition only; auditions are announced at the midpoint of each semester. Students must have taken THEATRE 140 Voice 1: Effective Communication, THEATRE 150 Acting I: Introduction to Acting, THEATRE 367 Script Analysis and be enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before auditioning for the option. Students who qualify for the Acting Option are expected to audition for University Theatre productions and play as cast. This named option will be formally documented on the student's official transcript. The option coursework listed here is one component of the B.S. Theatre and Drama (http://guide.wisc.edu/undergraduate/education/theatre-drama/ theatre-drama-bs/\#requirementstext) degree requirements.

\section*{Effective Spring, 2019}

Complete a minimum of 45 credits to include the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Required Courses} \\
\hline THEATRE 140 & Voice 1: Effective Communication & 3 \\
\hline THEATRE 240 & Intermediate Voice Training & 3 \\
\hline THEATRE 150 & Acting I: Introduction to Acting & 3 \\
\hline THEATRE 250 & Fundamentals of Acting & 3 \\
\hline THEATRE 350 & Acting Realism & 3 \\
\hline THEATRE 162 & Backstage Experience & 1 \\
\hline THEATRE/ENGL 120 & Introduction to Theatre and Dramatic Literature & 3 \\

\hline
\end{tabular}

\section*{FOUR-YEAR PLAN}

\section*{Theatre and Drama Major: Acting Option}

\section*{Sample Four-Year Plan}

This four-year sample graduation plan is designed to guide your course selection throughout your academic career; it does not establish a contractual agreement. Use it along with your DARS report, the Guide, and the Course Search and Enroll app to create a four-year plan reflecting your placement scores, incoming credits, and individual interests. Consult with an academic advisor to develop a personalized plan of study and refer to the Guide for a complete list of requirements. You will likely revise your plan several times during your academic career here, based on your activities and changing academic interests.

Admission to the Acting Option is by audition only; auditions are announced at the midpoint of each semester. Students must have taken THEATRE 140 Voice 1: Effective Communication, THEATRE 150 Acting I: Introduction to Acting, THEATRE 367 Script Analysis, and be enrolled in or have successfully completed THEATRE 250 Fundamentals of Acting before auditioning for the option. Students who qualify for the Acting Option are expected to audition for University Theatre productions and play as cast.

Total Credits 120

1
THEATRE/ENGL 120 Introduction to Theatre and Dramatic Literature is a requirement of the Theatre and Drama major: Acting Option. The 4credit option also satisfies the General Education Communication Part B requirement. If the 4 -credit option is selected, it may not be available until after the sophomore year. Either the 3 or 4 credit option of will meet the Theatre and Drama major requirement.

\section*{THEATRE, CERTIFICATE}

The Certificate in Theatre may be completed by any University of Wisconsin-Madison undergraduate student who is not a declared Theatre major. This certificate program offers students the ability to develop knowledge and skills in an area of theatre discipline.

Theatre is a collaborative art form with many varied disciplines and talents working together to create a unified piece of art. The Certificate in Theatre is designed to be flexible enough for a student to pursue an individualized focus of study in an area of their interest. For example, a student may pursue an acting focus, a technical theatre focus, a costuming focus, a scenic design focus, or a stage management focus. Or, a student may meet with the theatre advisor to create a custom focus that supplements and bolsters their primary degree path.

\section*{HOW TO GET IN}

All current UW-Madison undergraduates are eligible to complete the certificate, with the exception of students completing the Theatre and Drama major.

To declare the certificate, students must meet with the theatre and drama department advisor to discuss focus paths and to complete the theatre certificate declaration form. Contact Jim Stauffer at jbstauffer@wisc.edu, (jbstauffer@wisc.edu) 608-263-2329 (main office), 6004 Vilas Communications Hall, 821 University Ave. Madison, WI 53706.

\section*{REQUIREMENTS}

The Certificate in Theatre requires a minimum of 16 credits, with at least 8 credits taken in residence. Completion of the certificate requires a minimum GPA of 2.5 in certificate coursework.

\section*{Code Title Credits}

1
Students may request to take similar courses in other departments to fulfill this requirement.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate basic proficiency in one or more areas of theatre study.
2. Demonstrate understanding of basic theatre concepts and methodology.

\section*{PEOPLE}

Information about faculty, staff, and other contributors to the Department of Theatre and Drama can be found on the department's website (http:// theatre.wisc.edu/).

\section*{SCHOOL OF HUMAN ECOLOGY}

The School of Human Ecology (SoHE) at UW-Madison is a place where faculty and advisors work closely with students to prepare them for careers that improve the quality of people's lives. Our majors are community and nonprofit leadership, human development and family studies, interior architecture, personal finance, retailing and consumer behavior, and textiles and fashion design. Each program provides a solid curriculum of practical skills that lead students to exciting professions, a better understanding of people and our world, and a bachelor of science undergraduate degree.

SoHE is located in Nancy Nicholas Hall, a beautiful and newly renovated building that provides first-class, cutting-edge classrooms and studio spaces. Within these walls we connect students to their passions, helping them discover exciting careers and opportunities to make a meaningful impact on individuals, families, and communities. Faculty, students, and staff are dedicated to providing students with solid and meaningful education through coursework, internships, travel, student organizations, community involvement, research, and scholarship.

Learn more about SoHE and its majors at sohe.wisc.edu (https:// sohe.wisc.edu/).

\section*{PEOPLE}

Visit the School of Human Ecology faculty and staff directory (https:// humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/).

\section*{ENTERING THE SCHOOL}

\section*{APPLYING TO UW-MADISON}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Students who indicate interest in a SoHE major on their UW-Madison application will be admitted to the SoHE program or pre-program of choice upon admittance to the university. In addition, students may indicate interest in a SoHE major when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{VISITING CAMPUS AND SOHE}

SoHE holds monthly visit events for prospective students and their families and guests.

View and register (https://www.admissions.wisc.edu/visitbucky/ events.php?etypeid=22) for an upcoming visit event.

If you are unable to attend one of these dates, please contact the SoHE Advising and Career Center at 608-262-2608 or advising@sohe.wisc.edu to schedule an appointment.

\section*{CURRENT UW-MADISON STUDENTS DECLARATION}
- First-semester students may declare SoHE majors.
- All students with fewer than 60 earned GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

\section*{APPLICATION}
- All other students must apply through a competitive application process.

The best way for interested students to learn more about declaring or applying a major is to visit SoHE's advising webpage (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{REENTERING STUDENTS}

Students previously enrolled at the university who have not attended for a semester or more must complete a reentry application as outlined
by the UW-Madison Office of Admissions and Recruitment (http:// www.admissions.wisc.edu). Students who were enrolled in a School of Human Ecology program before their absence from UW-Madison will be readmitted to that program, provided they were in good academic standing when they left (i.e., not on probation, strict probation, or dropped by the university). Reentry applicants who were dropped by the university are asked to submit supplemental application materials. Instructions for the supplemental application are sent after the student has submitted the online reentry application.

Students who were previously enrolled in another UW-Madison school or college will not be admitted directly to a School of Human Ecology program. They must apply for reentry to the university with another school or college-usually the school or college in which they were previously enrolled. Once readmitted to the university, students may apply to the desired SoHE program through the application process for that program. For information about the school's programs and application processes, see Applying to Human Ecology as an On-Campus Student (http:// admissions.wisc.edu/apply-as-a-reentry-student/).

It is recommended that students who have been readmitted to a School of Human Ecology program schedule an appointment with an academic advisor in the Advising \& Career Center.

\section*{WISCONSIN EXPERIENCE}

\section*{INTERNSHIPS}

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising \& Career Center (https://go.wisc.edu/ acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (https:// advising.humanecology.wisc.edu/careers/internship-requirement/).

\section*{STUDENT ORGANIZATIONS}

School of Human Ecology student organizations include:
- Apparel and Textile Association (ATA)
- Badger\$ense Financial Life Skills
- Community \& Nonprofit Leaders (CNPL) of UW-Madison
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (https://go.wisc.edu/ sohestudentorganizations/).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (https://win.wisc.edu/).

\section*{POLICIES AND REGULATIONS}

\section*{ACADEMIC ACTIONS}

\section*{GRADING AND INCOMPLETES}

The School of Human Ecology follows UW-Madison letter grade and notation standards. Please see Valid Grades (https://registrar.wisc.edu/ valid-grades/) for notation definitions and standard regulations.

Incompletes. Incomplete grades may be granted when a documented illness or other substantial hardship causes the student to be unable to take final exams or complete a limited portion of the course assignments. To be eligible for an Incomplete, a student must 1) be earning a passing grade in the course until near the end of the semester, 2) request the Incomplete option before final grades are posted, and 3) have an agreed upon plan with the instructor for completing the remaining work and the deadlines for submitting the final work. Instructors have the discretion to determine whether an Incomplete is warranted.

If assigned a grade of Incomplete (I), for Human Ecology students, the work must be completed and graded no later than the last day of classes in the next fall or spring semester enrolled at UW-Madison (exclusive of summer term). Instructors have the authority to set an earlier deadline for finishing up an incomplete. If not resolved by the last class day, the grade will lapse to a Failure (F). An Extended Incomplete (EI) may be granted to allow additional time (past the last class day) with documentation of extenuating circumstances. An Extended Incomplete must be resolved within the following semester enrolled after granted or the grade will lapse to a Failure (F). Incompletes incurred during the summer session must also be completed no later than the close of the next semester in residence under the same rules. Students are ineligible for the dean's list for the semester in which a grade of Incomplete is submitted.

\section*{ACADEMIC STANDING, PROBATION, AND DROPPED STATUS}
- Good Academic Standing. Students are in good academic standing if their cumulative and most recent term (Fall, Spring, Summer) GPA are at least a 2.000. First-term students without a UW-Madison GPA are also in Good Academic Standing.
- Probation. A student with no previous action who earns a term GPA between 1.000 and 1.999 will be placed on probation.
- Continued Probation. A student on probation (or continued probation) whose cumulative GPA remains below 2.000 and whose term GPA is 2.000 or above will be placed on continued probation.
- Strict Probation. A student previously in Good Academic Standing with a current term GPA below 1.000 will be placed on strict probation. A student on probation whose term GPA is between 1.500 and 1.999 will be placed on strict probation.
- Continued Strict Probation. A student on strict probation or continued strict probation whose cumulative GPA remains below 2.000 but whose term GPA is 2.000 or above will be placed on continued strict probation.
- Academic Dropped. A student on probation whose term GPA is less than 1.500 or on strict probation whose term GPA is less than 2.000 will be dropped from the University for one year.

\section*{READMISSION AFTER ACADEMIC DROPPED STATUS}

The purpose of an academic drop is to prevent students from further damaging their academic record and incurring tuition costs while not successfully earning credits. The expectation is for students to spend the year away from campus to reflect on and resolve the issues that resulted in their poor academic performance. Students who were academically dropped from the university are eligible for readmission consideration after one full calendar year. Students dropped for a third time will not be readmitted.

To reenter the university after one full year, a student must apply for readmission to the School of Human Ecology and for reentry to the university. A student is never guaranteed readmission after being dropped. Readmission is most likely if the student has addressed the issues that contributed to being dropped from the university and has a plan and resources to support a successful return.

To apply for readmission to SoHE and the University of WisconsinMadison after being dropped, a student must follow these steps:
1. Complete the SoHE Readmission Request Form (https:// uwmadison.co1.qualtrics.com/jfe/form/SV_8AI4WZBMjVSyMFD/).

To ensure readmission consideration, follow these deadlines:
- Summer or Fall Term-Apply by March 1
- Spring Term-Apply by October 1
2. Complete the university reentry application (https:// admissions.wisc.edu/apply-as-a-reentry-student/).
3. Schedule an appointment with a SoHE academic advisor by calling 608-262-2608 or emailing advising@sohe.wisc.edu.
- Be prepared to discuss your activities while away from UW, including steps taken to address the circumstances that led to being dropped from UW and transcripts from other institutions that you may have attended while away.
- Use this advising appointment to: (re)establish a relationship with your academic advisor, review your enrollment plan for the term you intend to return, and review your degree completion plan.

The SoHE academic advisor will forward the Readmission Form, supporting documentation, and enrollment plan to SoHE Academic Deans' Services for review. An Academic Dean may choose to meet with students and establish enrollment expectations prior to a readmission decision. Students will be notified by writing of readmission decisions. Students who are granted permission for re-entry will be readmitted on strict academic probation to the School of Human Ecology.

\section*{DECLARING MULTIPLE MAJORS}

School of Human Ecology undergraduates can declare an additional undergraduate major in the College of Letters \& Science, and a limited number of majors in the School of Education and College of Agriculture and Life Sciences. This is not a second degree. The additional major is noted on the student's transcript if all requirements of the second major are completed. School of Human Ecology (SoHE) students must plan
to finish all additional academic programs concurrently with their SoHE degree.

\section*{EARNING DUAL DEGREES}

Completing two degrees simultaneously (also referred to as Dual Degrees) is when a student completes two bachelor's degree programs and will receive two undergraduate degrees, as opposed to multiple transcript majors. Students interested in completing dual degrees should consult with their academic advisor early in their academic career and complete a four-year plan to understand the feasibility of completing requirements for both degrees. Earning a dual degree requires students to:
1. Earn an additional 30 credits specific to the second major,
2. Earn a minimum of 150 degree credits to graduate,
3. Complete all curriculum requirements for both degrees,
4. Ensure the two programs are substantially different from each other,
5. Complete course work in both programs simultaneously
6. Complete the Dual Degree Policy Request form (https://uwmadison.co1.qualtrics.com/jfe/form/ SV_8AI4WZBMjVSyMFD/) and secure Dean's permission

Students are responsible for any rules or regulations that could potentially impose additional financial responsibilities as a result of pursuing dual degrees. Please note that some campus schools and colleges do not permit dual degrees for their students, thus preventing Human Ecology degree combinations with degrees in these schools and colleges.

If the two degrees to be earned are within the School of Human
Ecology, before the start of the senior year in residence, students must meet the criteria for admission to both programs, secure academic dean and department approval to enroll, and the two degree programs' curriculum must differ substantially (for instance, Personal Finance and Consumer Behavior \& Marketplace Studies do not differ to the extent that it would take an additional 30 credits to complete the second degree; therefore, earning both degrees simultaneously will not be allowed).

If the two degrees to be earned are from two different schools/ colleges at UW-Madison, admission into the other school/college shall be based on the admission criteria for that school/college. Written admission/Dean's approval to the other school/college must be obtained before pursuing Human Ecology approval.

\section*{RESIDENCY REQUIREMENT}

The university requires that the last 30 credits be earned in residence at UW-Madison for students to be recommended for a degree, unless the student's major program requires completion of the degree at a cooperative institution. Students in their senior year must meet with their academic advisor and Deans' Services to secure permission before taking any degree required credits (including elective credits and credits and non-UW-Madison approved/not affiliated study abroad programs) at another institution.

\section*{CREDIT OVERLOAD}

A full-time student credit load is 12 to 18 credits, with the most typical credit load being 15 to 16 credits per fall/spring semester. A student wishing to enroll in more than 18 credits in a fall/spring semester or 12 credits in the summer must complete a Credit Overload Request (https:// uwmadison.co1.qualtrics.com/jfe/form/SV_8AI4WZBMjVSyMFD/) to obtain dean's approval. These credit limits are inclusive of credits enrolled
in at another institution, which may result in credits not being accepted at UW-Madison if approval is not secured in advance. Students should speak with their academic advisor prior to requesting a credit overload to ensure the overload is necessary and understand the workload and financial implications. Credit overload approvals will be based on prior academic performance and necessity.

\section*{PASS/FAIL}

The privilege of electing courses on a pass/fail basis is extended to undergraduate students in the school. Students who are in good academic standing (not on probation) may elect one course on the pass/fail basis per term. The summer sessions collectively count as one term. A course taken pass/fail must be an elective. A student may not take a required course or a prerequisite to a required course under this privilege. \(A\) maximum of 16 pass/fail credits may be counted toward a B.S. degree from the School of Human Ecology. Courses taken pass/fail will count toward degree credits but will be excluded in the computation of grade point average and honors.

Requests to take a course under the pass/fail privilege are initiated through the Course Change Request in the MyUW (http://my.wisc.edu) Student Center and must be elected by the noted enrollment Dates and Deadlines (https://registrar.wisc.edu/dates/). After making the request in MyUW, the request is routed to the Advising \& Career Center for approval or further communication.

The registrar will convert final grades submitted by the instructor, who is not informed of the student's pass/fail status, to an \(S\) (pass) for grades \(A\), \(A B, B, B C\) or \(C\), and to a \(U\) (fail) for a grade of \(D\) or \(F\). The grade is excluded from the GPA.

\section*{CONCURRENT ENROLLMENT}

Human Ecology students may enroll in a class(es) at another institution while being enrolled at UW-Madison without special permission, but must follow the credit limit and credit overload policies (https:// registrar.wisc.edu/credit-load-and-ranges/). Students should consult with their academic advisor, Course Equivalency Service (https:// registrar.wisc.edu/course-equivalency-service/), or Transferology (https:// kb.wisc.edu/registrar/page.php?id=122108) to confirm the course will transfer to UW-Madison prior to enrolling. Upon completion of the non-UW-Madison courses, students must submit their transcripts with final grades to the Admissions Office (https://registrar.wisc.edu/transfer-your-credit-to-uw-madison/) for evaluation.
- Concurrent Enrollment at UW-Extension/UW Independent Learning: Students concurrently enrolling in UW-Extension/ UW Independent Learning (https://uwex.wisconsin.edu/ aas/uwex_landing_pages/aas-il-paid_search/? lead_source=PaidSearchGoogle\&kw=uw\%2Oindependent \%2Olearning\&_bt=618815558309\&_bm=e\&gclid=CjwKCAiAnZCdBhBmEiw/ _uPEHB9qU50pgIRWR4DvbmHCYbBFy5qwSxoCvaAQAvD_BwE) courses should see more information or speak with an academic advisor.
- Studying Abroad and Concurrent Enrollment: Students studying abroad through International Academic Programs (IAP) (https://studyabroad.wisc.edu/) must contact IAP regarding restrictions and tuition rules to concurrent enrollment and the UW Independent Learning waiver. See more information (https://advising.humanecology.wisc.edu/academics/studentresources/) or speak with an academic advisor.

\section*{APPEALS \\ LATE DROP, WITHDRAWAL, OR MEDICAL WITHDRAWAL PETITIONS}

SoHE students are expected to follow the Dates and Deadlines (https:// registrar.wisc.edu/dates/) for adding and dropping courses outlined by the Office of the Registrar. Students considering a change in their enrollment are expected to speak with their academic advisor and take action before published university deadlines.
- LATE DROP - A course drop is when a student decides to discontinue in one (or more) courses, while continuing with at least one course in a term. A late drop appeal is when a student is requesting an exception to the drop deadline. It is only in rare non-academic circumstances outside of a student's control that exceptions to the drop deadline policy (https://registrar.wisc.edu/dates/) are approved, and never simply to avoid a poor grade. Students who face significant, unforeseeable circumstances outside of their control that negatively impact their ability to successfully complete a course(s), should schedule an appointment with their academic advisor or SoHE Deans' Services (deansservices@sohe.wisc.edu), AND complete the Late Add/ Drop Petition form (https://uwmadison.co1.qualtrics.com/jfe/ form/SV_8AI4WZBMjVSyMFD/).
- WITHDRAWAL (non-medical) - Students who do not wish to continue taking classes and drop all of their courses in a term are withdrawing/canceling their enrollment and must follow the Steps to Withdraw (https://kb.wisc.edu/registrar/25601/). Students may choose to withdraw for a variety of personal or financial reasons without dean's permission when processed by the university deadline. Students may be required to complete the Reentry Form (https://admissions.wisc.edu/apply-as-a-reentry-student/) to enroll in a future semester.
- MEDICAL WITHDRAWAL - Students who wish to withdraw as a result of a serious or unexpected physical or mental health condition, a serious or unexpected physical or mental health condition of an immediate family member who requires the student's care, or the death of an immediate family member that completely precludes the student from actively participating as a student can request a partial tuition refund according to the Medical Withdrawal process (https://registrar.wisc.edu/ medical-withdrawal/). Students requesting a medical withdrawal and refund must complete the Steps to Withdraw (https:// kb.wisc.edu/registrar/25601/), meet with SoHE Deans' Services (deansservices@sohe.wisc.edu), and provide required documentation within one year of the semester enrolled. Approval will be granted on a case-by-case basis.

A Drop (DR) or Withdrawal (W) transcript notation after the enrollment deadline is a national standard across universities and colleges to indicate when a student makes an enrollment change after the start of the semester, which has no negative impact on a student's academic record. Because students may drop courses for a wide variety of reasons, future employers and graduate/professional programs do not scrutinize or make any assumptions about the merits of a "DR" or "W". It is simply a notation that students have made an enrollment change after the deadline.

\section*{APPEAL OF A SOHE GRADE}

A student who believes a grade received in a SoHE course was an error or not consistent with guidelines outlined in the syllabus or campus standards has the right to appeal the grade.
1. The student must first discuss the grade dispute with the instructor of the course.
2. If the student and instructor cannot come to an agreement, the student will provide a formal written grade appeal to the SoHE Deans' Services. The written appeal must include: the class, instructor, grade received, date and conclusion of meeting with instructor, the specific reason(s) for appealing the grade, and telephone number where they can be reached for follow-up. Send to SoHE Deans' Services. (deansservices@sohe.wisc.edu)
3. The department chair will perform the due diligence necessary (including, but not limited to, meeting with the instructor and student) to assess the merits of the appeal and will provide a decision in writing to the assistant dean.
4. Should the student wish to further appeal the decision, the SoHE Undergraduate Program Council will perform the due diligence necessary (which may include, but not limited to, meeting with the instructor and department chair and/or student) to assess the merits of the appeal and will provide a decision in writing to the assistant dean.
5. The SoHE Undergraduate Program Council appeals decision is final.

\section*{APPEAL OF DENIAL OF ADMISSION TO A SOHE UNDERGRADUATE MAJOR/ CERTIFICATE}

This appeal process is for students who were denied admission to a SoHE undergraduate program. Students who feel they have a compelling reason to appeal their admissions decision may do so in writing by the deadline indicated in the admission letter. Appeals must satisfy one of the following factors to be considered:
- The student believes a factual error was self-reported on the application or made by the admissions committee during review of the application.
- There is new information regarding academic or non-academic extenuating circumstances.

While admission appeals satisfying the above conditions will be reviewed by the admissions committee, it is important to understand that simply meeting these criteria in no way guarantees acceptance into the program.

\section*{Filing an Appeal}
1. The student will file a letter of program admission appeal to SoHE Dean's Services (deansservices@sohe.wisc.edu), stating the facts of the situation based on one or both of the conditions listed above and include the student's telephone number where they can be reached for follow-up. Any additional documentation or supporting evidence should be titled and attached to the letter of appeal. The deadline by which a student must file an appeal will be written in the denial letter for the undergraduate program in question. For a situation where grades/credits were not posted to a student's record prior to applying to the program, the student record must be complete with grades and credits on the official UW-Madison record by the time the appeal is filed to be considered.
2. The Academic Dean will forward the appeal to the appropriate departmental admissions committee. The admissions committee will
perform the due diligence necessary to assess the merits of the new information for the appeal.
3. The Academic Dean will communicate the decision to both the student and departmental admissions committee in writing.
4. Should the student wish to further appeal the decision in the case of extenuating circumstances, the Academic Dean will forward the appeal to the SoHE Undergraduate Program Council (UPC). The UPC will perform the due diligence necessary (which may include, but not limited to, meeting with the admissions committee, department chair, and/or student) to assess the merits of the appeal.
5. The Academic Dean will communicate the decision to the student and the admissions committee in writing. The SoHE Undergraduate Program Council's (UPC) decision is final.

\section*{APPEAL OF BEING DROPPED FROM UWMADISON FOR ONE YEAR}

SoHE students who are dropped from the university based on academic performance are permitted to appeal for readmission consideration immediately after being dropped. Students with documentation of special circumstances outside their control, evidence that these circumstances have changed, and realistic strategies in place to improve their academic performance have the greatest likelihood of a successful appeal. Students who do not appeal before the deadline must wait at least one full calendar year before being eligible for readmission consideration.

\section*{Filing An Appeal}
1. Students wishing to appeal their dropped status must meet with SoDE Dean's Services ( deansservices@sohe.wisc.edu) and complete the Dropped Status Appeal Form (https://uwmadison.qualtrics.com/SE/? SID=SV_6Lv7QPa3P6Ay7mR) prior to the deadline outlined in their dropped status notification. An Academic Dean will explore with the student the purpose of the drop process, circumstances that led to the drop, and provide guidance on writing the appeal.
2. The Dean will submit the appeal, academic transcript, and additional background information to the SoHE Undergraduate Program Council (UPC) for review. UPC will make a decision regarding the appeal before the beginning of the next term.
3. The Academic Dean will communicate the appeal decision to the student in writing. If the appeal is granted, the student will be readmitted to the university on strict probation. If the appeal is not granted, the dropped status is upheld, all courses will be administratively dropped, and the student is eligible for readmission consideration one full calendar year after the dropped date.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SOHE GENERAL EDUCATION REQUIREMENTS}

Seven undergraduate majors are available in the school. There are common general education requirements for all SoHE majors, but these are reflected differently in each program. Please review each major requirement page for the specific general education courses needed for the degree.
 studies, Scandinavian studies.

\section*{REQUIREMENTS FOR GRADUATION}

The bachelor of science (B.S.) degrees granted by the School of Human Ecology require a minimum total of 120 credits, with a minimum of 25 credits in the school. To remain in good academic standing, students must maintain a minimum GPA of 2.0. A 2.0 cumulative GPA must be earned by the end of the senior year in order to be recommended for a B.S. degree.

The School of Human Ecology will graduate a student at the end of the semester (spring, summer, or fall) in which all SoHE major requirements are complete. Graduation will not be postponed for incomplete additional major(s), certificate program (s), specialization(s), study abroad, or honors program(s). It is the student's responsibility to prepare for graduation and to ensure that all graduation requirements have been met. Students expecting to graduate and/or participate in commencement exercises should declare their intent through the My UW Student Center in accordance with campus deadlines.

\section*{RESOURCES}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/ acc_office/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{HONORS}

\section*{DEAN'S HONOR LIST}

At the end of each semester the names of all students with a grade point average of 3.75 or higher in at least 12 graded credits for that semester will be included on the Dean's Honor List. A notation of "Dean's Honor List" will be entered on the student's transcript.

\section*{GRADUATION WITH DISTINCTION}
"Graduation with Distinction" will appear on the transcripts of students who have earned a cumulative grade point average that places them within the top 20 percent of students graduating that term in their school or college with 60 credits or more at the University of Wisconsin-Madison.

Students in the top 5 percent will receive the designation "Graduation with Highest Distinction." The Office of the Registrar determines whether students have met these criteria. Notations citing graduation distinction will be made on the transcript.

\section*{HONORS PROGRAM}

The School of Human Ecology Honors Program provides an opportunity for students to pursue coursework in greater depth than is possible in regular courses. The honors program is a school-wide program open to students regardless of major. Honors program members are eligible to enroll in courses offered for honors-only credit, to participate in campuswide activities for honors program students, and to apply for special research-funding opportunities. Upon completion of the honors program requirements and degree requirements, the student will receive an honors degree from the School of Human Ecology. The transcript for a SoHE honors student who does not complete all honors degree requirements will have the honors designation next to honors courses completed.

For additional information about the Honors Program including admission, requirements, credits, and honors thesis, contact the SoHE Advising \& Career Center (https://advising.humanecology.wisc.edu/).

\section*{CIVIL SOCIETY AND COMMUNITY STUDIES}

The Department of Civil Society and Community Studies offers a bachelor of science degree in Community and Nonprofit Leadership and a Ph.D. in Human Ecology: Civil Society and Community Research. The Community and Nonprofit Leadership major prepares its graduates for careers in community and nonprofit settings, graduate school, and post-baccalaureate service-oriented programs. Academic requirements include specialized emphases in human ecology; general studies in humanities, social sciences, and natural sciences; and coursework focused on community impact and social change processes. Students may also engage in complementary coursework, undergraduate certificates, or additional undergraduate majors.

\section*{DEGREES/MAJORS/CERTIFICATES}

\title{
COMMUNITY AND NONPROFIT LEADERSHIP, B.S.
}

Through academic study, community engagement, and applied research, Community and Nonprofit Leadership (CNPL) undergraduate students develop into competent, caring professionals interested in communitybased change and the expanding nonprofit sector. In smaller, inclusive, project-based courses, CNPL students collaborate with each other and community partners, gaining practical experience and making a difference through their coursework. The CNPL bachelor of science degree prepares its graduates for careers in community and nonprofit settings, graduate school (in law, policy, community health, etc.), and post-baccalaureate service-oriented programs (such as Peace Corps, AmeriCorps, City Year, etc.), enabling them to create, lead, and support innovative communitybased initiatives that change lives and make the world a better place. Their work and advanced study address human, family, and civil society issues such as: food and environmental justice, homelessness and rights to housing, health equity, gender equality, racial justice, community and leadership development, community organizing, advocacy, and more.

CNPL majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

\section*{HOW TO GET IN}

\section*{PROSPECTIVE UW-MADISON STUDENTS}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Students who indicate interest in the community and nonprofit leadership (CNPL) major on their UW-Madison application will be admitted to the CNPL major upon admittance to the university. In addition, students may indicate interest in CNPL when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{CURRENT UW-MADISON STUDENTS}

\section*{Declaration}
- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

\section*{Application}
- All other students must apply through a competitive application process.

The best way for interested students to receive advising or additional information is by meeting with a SoHE advisor (https://sohe.wisc.edu/ students/applying-to-sohe/bass/).

Visit On-campus Student Application (https://sohe.wisc.edu/prospective-students/prospective-students/applying-human-ecology/) for application information and deadlines.

\end{tabular}

Total Credits

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. (Ecological perspectives on community and society) Articulate and apply an ecological perspective at discrete levels of analysis (individual, group, community, and society).
2. (Civic literacy and the public sphere) Assess the major trends in civil society recognizing the influence and interconnectedness across the major sectors of society and exhibit strong capacity for sustained, high impact participation in civic life.
3. (Identity, diversity, and social justice) Recognize well-being and social justice as relational and position, applying these principles in community organizing and empowerment.
4. (Organizational management and professional development) Demonstrate entry-level knowledge and skills relevant to nonprofit and community organizations and exhibit the practices of a lifelong learner.
5. (Research, analysis, and communication) Vet and/or generate high quality data, perform relevant analyses, and share results with target audiences using oral, written, and visual communication techniques.
6. (Leadership, ethics, and well-being) Recognize the value of being a reflective, ethical leader who cultivates others' strengths and leadership capabilities, while exhibiting self-care and care for others.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for Community \& Nonprofit Leadership. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{WISCONSIN EXPERIENCE}

\section*{INTERNSHIPS}

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing ( \(54+\) credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising \& Career Center (https://go.wisc.edu/ acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (https:// advising.humanecology.wisc.edu/careers/internship-requirement/).

\section*{STUDENT ORGANIZATIONS}

School of Human Ecology student organizations include:
- Apparel and Textile Association (ATA)
- Badger\$ense Financial Life Skills
- Community \& Nonprofit Leaders (CNPL) of UW-Madison
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (https://go.wisc.edu/ sohestudentorganizations/).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (https:// win.wisc.edu/).

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{ADVISING \& CAREER CENTER}

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{CONSUMERSCIENCE}

The Department of Consumer Science studies interactions among consumers, business, and government in order to advance the wellbeing of consumers, families, and communities. The department is multidisciplinary, including study in economics, finance, sociology, psychology, marketing, and public affairs. The Department of Consumer Science offers multiple undergraduate degree programs both on-campus and online. Consumer Behavior \& Marketplace Studies and Personal Finance are both on-campus programs. Consumer Finance \& Financial planning and Consumer Marketplace Studies are both offered online as a part of the Online Undergraduate Degree program. All programs focus broadly on the economic well-being of consumers and society. The department also
offers M.S. and Ph.D. degrees in human ecology: consumer behavior and family economics.

CONSUMER BEHAVIOR AND MARKETPLACE STUDIES,
B.S.

\section*{CONSUMER BEHAVIOR \& MARKETPLACE STUDIES}

Consumer Behavior \& Marketplace Studies leverages technology and research to understand and improve the global customer experience. This bachelor of science degree blends business and analytics with creativity, trend tracking, and technology. Students develop the skills to work in an industry that powers economies and offers ample employment opportunities, including online retailing and social commerce professions. Our experienced faculty guide students through an inspiring and flexible curriculum that prepares them for careers in a dynamic and globallyfocused industry.

Explore the world of commerce and technology from a people-first perspective. As a Consumer Behavior \& Marketplace Studies major students will learn to research, improve, and better understand the global customer experience with the support and guidance of SoHE faculty, a team of industry experts and researchers. Coursework integrates analytics and statistics with retailing, consumer science, and business courses.

SoHE's Consumer Behavior \& Marketplace Studies graduates work for diverse and rapidly growing retailing companies around the globe. Technology and management jobs have been in high demand for several years and are only expected to continue their rapid growth.

Consumer Behavior \& Marketplace Studies majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

\section*{HOW TO GET IN}

\section*{PROSPECTIVE UW-MADISON STUDENTS}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Students who indicate interest in the consumer behavior and marketplace studies major on their UW-Madison application will be admitted to the consumer behavior and marketplace studies major upon admittance to the university. In addition, students may indicate interest in consumer behavior and marketplace studies when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{CURRENT UW-MADISON STUDENTS}

\section*{Declaration}
- Students in their first year of enrollment at UW-Madison (i.e. their first two fall/spring semesters) may declare the major, as long as they meet the following criteria:
- Minimum 2.75 GPA
- Not on academic probation

\section*{Application}
- All other students (who do not meet the declaration criteria above) must apply through a competitive application process

The best way for interested students to learn more about declaring or applying to a major is to visit SoHE's advising webpage (https:// advising.humanecology.wisc.edu/academics/apply/).

REQUIREMENTS

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{Electives}

Select electives to bring degree credit total to 120
Total Credits
35-36

1
CNSR SCI 250 Retail Leadership Symposium may be repeated for up to three credits. Credits in addition to the one required credit will be counted as elective credits.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of the global retail industry and how retailers can enhance consumer well-being.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for Consumer Behavior and Marketplace Studies. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

Please note there are several prerequisites required for course sequencing within the major. View prerequisites by clicking on the course links in the plan below. Some examples include:
- Statistics course and Excel proficiency for CNSR SCI 201 Consumer Insights
- Accounting and Excel proficiency for CNSR SCI 564 Retail Financial Analysis
- CNSR SCI 657 Consumer Behavior for CNSR SCI 555 Consumer Design Strategies \& Evaluation

\section*{CONSUMER FINANCE AND FINANCIAL PLANNING, B.S.}

This program provides an opportunity for students to complete the B.S. Consumer Finance and Financial Planning degree at a distance. This option is ideal for returning students with some college credits who would like to complete the program in a flexible online format, with no on-campus attendance required. This program is interdisciplinary with an emphasis on financial management and the economic well-being of individuals and families. Topics include financial counseling, coaching, wealth management, financial product development, financial technology, and consumer behavior. Completion of the program and one additional elective course will make graduates eligible to sit for the Certified Financial

Planner® \({ }^{\circledR}\) (CFP) exam, which SoHE students pass well above the national average.

\section*{HOW TO GET IN}

Students applying to the BS in Consumer Finance and Financial Planning program apply through UW-Madison Online (https://online.wisc.edu/). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UWMadison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (https://online.wisc.edu/ apply/).

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Invoke interdisciplinary and collaborative approaches to understand the interactions between individuals and their social and environmental contexts.
2. Demonstrate the ability to harness, analyze and interpret relevant data for making real world decisions.
3. Acquire professional and life skills related to workplace communication, teamwork, active listening and adapting to technology.
4. Demonstrate an understanding of consumer financial behavior and the role of income, savings, credit, planning, and benefits.

\section*{FOUR-YEAR PLAN}

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the Requirements tab for more information about the curriculum and program plan.

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING}

Each UW-Madison Online student is assigned an academic and career (AC) advisor (https://online.wisc.edu/academic-career-coach/). The AC advisor will support the academic and personal success of each student by partnering with SoHE advisors in the Student Academic Affairs \& Career Development Office (SAA), to assist students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience. To find out about other ways

UW Madison's campus supports their online learners visit the Academic Support Services page. (https://oss.wisc.edu/support-services/)

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors (https:// online.wisc.edu/academic-career-advisor/) help prepare students for life post-graduation through individual and group advising. The Office of Online Student Success (OSS) (https://oss.wisc.edu/) also provides a number of career resources (https://oss.wisc.edu/resumes/) for online learners.

\section*{PEOPLE}

For more information, visit the School of Human Ecology Consumer Science (https://humanecology.wisc.edu/staff/sohe-department/consumer-science/)faculty and staff directory (https:// humanecology.wisc.edu/staff/sohe-department/consumer-science/).

\section*{CERTIFICATION/LICENSURE}

Completion of the BS in Consumer Finance and Financial Planning and one additional elective course will make graduates eligible to sit for the Certified Financial Planner® (CFP) exam.

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NCSARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{The requirements of this program do not meet Certification/Licensure in the following states: Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

> CONSUMER MARKETPLACE STUDIES, B.S.

Consumer Marketplace Studies provides an opportunity for students to complete their degree at a distance. This option is ideal for returning students with some college credits who would like to complete their undergraduate degree in a flexible online format, with no on-campus attendance required. Program emphasis is on researching, understanding, and improving the global customer experience. Topics include retailing, consumer behavior, and consumer research and analysis. Graduates will be prepared to meet industry demand for employees with strong analytic and decision-making skills, who can redefine the way companies empathize and engage with their customers.

\section*{HOW TO GET IN}

Students applying to the BS in Consumer Marketplace Studies program apply through UW-Madison Online (https://online.wisc.edu/). UWMadison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits). UW-Madison re-entry students may also be considered. For more information, visit the UW-Madison Online admissions website (https://online.wisc.edu/ apply/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF HUMAN ECOLOGY REQUIREMENTS}

\section*{PERSONAL FINANCE, B.S.}

The bachelor of science in personal finance looks at economics from a people perspective, developing financial experts who can help individuals and families live more secure lives. Graduates of personal finance are prepared to work in financial product development, financial technology, and consumer behavior.

\section*{Personal Finance: Financial Planning (p. 1802)}

Within the personal finance program, students may choose to complete the financial planning option. This financial planning option is registered
with the Certified Financial Planner \({ }^{\oplus}\) Board of Standards. The coursework is interdisciplinary with an emphasis on financial management and the economic well-being of individuals and families. The financial planning option is the more traditional personal finance program leading to careers in counseling, coaching, and wealth management. Graduates of the financial planning option leave fully prepared to sit for the prestigious Certified Financial Planner \({ }^{\ominus}\) exam, which SoHE students pass well above the national average.

All on-campus personal finance majors complete a required internship before graduating, allowing them to pursue their own personal interests and to develop a strong portfolio of skills and references that will propel them to launch successful careers.

\section*{HOW TO GET IN}

\section*{PROSPECTIVE UW-MADISON STUDENTS}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Students who indicate interest in the personal finance major on their UWMadison application will be admitted to the personal finance major upon admittance to the university. In addition, students may indicate interest in personal finance when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{CURRENT UW-MADISON STUDENTS}

\section*{Declaration}
- Students in their first year of enrollment at UW-Madison (i.e. their first two fall/spring semesters) may declare the major, as long as they meet the following criteria:
- Minimum 2.75 GPA
- Not on academic probation

\section*{Application}
- All other students (who do not meet the declaration criteria above) must apply through a competitive application process

The best way for interested students to learn more about declaring or applying to a major is to visit SoHE's advising webpage (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{REQUIREMENTS}

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they
identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{PEOPLE}

For more information, visit the School of Human Ecology Consumer Science (https://humanecology.wisc.edu/staff/sohe-department/consumer-science/)faculty and staff directory (https:// humanecology.wisc.edu/staff/sohe-department/consumer-science/).

\section*{WISCONSIN EXPERIENCE}

\section*{INTERNSHIPS}

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising \& Career Center (https://go.wisc.edu/ acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (https:// advising.humanecology.wisc.edu/careers/internship-requirement/).

\section*{STUDENT ORGANIZATIONS}

School of Human Ecology student organizations include:
- Apparel and Textile Association (ATA)
- Badger\$ense Financial Life Skills
- Community \& Nonprofit Leaders (CNPL) of UW-Madison
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (https://go.wisc.edu/ sohestudentorganizations/).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (https://win.wisc.edu/).

\section*{CERTIFICATION/LICENSURE}

PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NCSARA)

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, lowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming District of Columbia; American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{The requirements of this program do not meet Certification/Licensure in the following states: Not applicable}

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:
Not applicable
RESOURCES AND SCHOLARSHIPS

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/ acc_office/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/)

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{Total Credits 120-123}

\section*{PEOPLE}

For more information, visit the School of Human Ecology Consumer Science (https://humanecology.wisc.edu/staff/sohe-department/consumer-science/)faculty and staff directory (https:// humanecology.wisc.edu/staff/sohe-department/consumer-science/).

\section*{DESIGNSTUDIES}

Design Studies offers multidisciplinary education in design and research of interior design environments and textiles and apparel design, through participation in formal classroom instruction and ongoing research and scholarly endeavors. Students benefit from a broad-based program and faculty specializing in areas such as design visualization, environment and behavior studies, history of interiors and textiles, interior architecture, material culture, textile and apparel design, and textile science.

Two undergraduate degree majors are offered: interior architecture, and textiles and fashion design. The department also offers multiple undergraduate certificates in design strategy, material cultures studies, and textiles and design. There is also a human ecology: design studies graduate program, offering M.S., MFA, and Ph.D. degrees.

Student internships in both undergraduate majors augment campus course offerings, providing students with unique learning opportunities in their chosen fields. Design studies majors have access to design resources: studios, a computer laboratory equipped to support design work; textile laboratories including a testing room; an interior architecture resource
room, the Design Gallery, the Helen Louise Allen Textile Collection, and the Ruth Ketterer Harris Library. In addition, a strong collaborative environment exists for students and faculty interaction with other departments, institutes, and museums on the campus and other design programs within the state and country.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Design Strategy, Certificate (p. 1804)
- Interior Architecture, B.S. (p. 1806)
- Material Culture Studies, Certificate (p. 1810)
- Textiles and Design, Certificate (p. 1813)
- Textiles and Fashion Design, B.S. (p. 1815)

\section*{PEOPLE}

For more information, visit the School of Human Ecology Design
Studies faculty and staff directory (https://humanecology.wisc.edu/staff/ sohe-department/design-studies/).

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/ acc_office/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically
late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{DESIGNSTRATEGY, CERTIFICATE}

\section*{WHAT IS IT ABOUT?}

Housed in the School of Human Ecology, this eighteen-credit certificate in Design Strategy provides undergraduate students from all majors with a hands-on, interdisciplinary approach to problem solving for strategic change. Through applying Design Thinking techniques and exploring the interconnections between people, built, natural, and financial environments, students will learn to put ideas into action and develop forward-thinking approaches to a variety of issues.

\section*{WHAT IS DESIGN STRATEGY?}

Design Strategy is a successful approach to problem solving with a focus on quality of life and sustainable futures. It begins with asking 'better' questions as a way to understand the root of the problem and why it is an issue. It is an empathetic, human-centered perspective that uses Design Thinking and draws from historical precedence and current research from a variety of fields to help solve complex and persistent problems.

\section*{WHAT WILL STUDENTS GAIN?}

Students acquire concrete methodologies which enable them to apply what they have learned in their degree studies in a way that goes beyond the theoretical emphasis of most degree programs. Rather than adding additional expertise and knowledge in a particular field, this certificate gives students ways to apply what they have learned in their majors to real world problems; in the process, they become confident and creative forward thinkers, who are able to work in interdisciplinary teams.

\section*{HOW TO GET IN}

All undergraduate students in good academic standing are eligible to apply for the Certificate in Design Strategy. Connect with an Academic Advisor for application information and the October and February deadlines.

\section*{Total Credits}

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Develop and understand empathy mindsets through the practice of observation, interviewing skills, and other related techniques.
2. Recognize that theories, knowledge, and concepts intrinsic to the practice of design are relevant to informing new approaches to addressing topics that are difficult to formulate using traditional theories.
3. Incorporate methods that rely on team work, communication, and collaborative activity.
4. Examine a wide range of problems confronting society by looking at them in context, in order to uncover their roots, visualize their interconnections, and identify their interdependencies.
5. Become collaborative, divergent thinkers, able to generate and visually communicate multiple ideas.

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{PEOPLE}

\section*{INTERIOR ARCHITECTURE, B.S.}

The undergraduate major in interior architecture is a four-year professional program accredited by the Council for Interior Design Accreditation (CIDA) and leading to the Bachelor of Science degree in Interior Architecture. The program develops students' creativity in the design and planning of interior spaces by emphasizing the process and communication of design. Students learn to integrate the art of design with the social sciences concerning the interaction of people and their environment, the history of design, and the physical sciences relating to the effects of materials on the physical health and comfort of inhabitants. Insight into professional practice is enhanced through internship experiences.

Faculty maintain scholarly programs of study in design and research that form the basis of the graduate program and enrich the undergraduate program through coursework, design review, and student mentoring.

Course content helps students develop verbal and visual communication skills with exposure to both residential and commercial interiors. In addition, courses in art history, history of interiors, engineering, and art are required. A final portfolio is required before graduation. Studio spaces for student use, a resource center containing catalogs and samples, plus a lighting demonstration area and computer laboratory provide physical support for the interior architecture curriculum.

\section*{HOW TO GET IN}

\section*{PROSPECTIVE UW-MADISON STUDENTS}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Freshmen should declare their intention to pursue the interior architecture (IA) major when they apply for admission to UW-Madison. In addition, students may indicate interest in the IA major when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{CURRENT UW-MADISON STUDENTS PHASE ONE: DESIGN CORE}

A 2.75 minimum cumulative GPA is required for declaring the pre-interior architecture major (Phase One). Eligible students should meet with an advisor to declare as early in their academic career as possible.

Transfer students may take longer to complete their degree than students entering the program as freshmen, as they too must complete both Phase One and Phase Two, which contain specialized courses that must be taken sequentially.

\section*{Fall Coursework}

Students must complete DS 120 and DS 221. Upon completion, students will be evaluated and ranked based on classroom performance and engagement.

\section*{Spring Coursework}

Students must complete DS 220 and DS 140. In the case that student interest for spring courses exceeds course capacity, student ranking in fall courses (DS 120 and DS 221) and academic performance will be used to determine priority enrollment in the required spring courses. Enrollment in spring courses is not guaranteed and may be limited by permission based on class rankings and academic performance.

After completing DS 120 and DS 221, and while enrolled in DS 220 and DS 140, students may apply for admission to Phase Two: Professional Course Sequence. The selective application process for Phase Two admissions will open during the latter half of the spring semester and decisions will be made once the spring coursework is completed.

\section*{PHASE TWO: PROFESSIONAL COURSE SEQUENCE}

Advancement into Phase Two is competitive and involves a holistic application process each spring. Evaluation for acceptance into the professional course sequence depends on rankings in the Phase One coursework (DS 120, 221, 220, and 140), cumulative GPA, and engagement within the major.

There are typically 32 available spots each application cycle. This is an industry standard to ensure appropriate student to faculty ratio.

After completing Phase One of the program and upon acceptance into Phase Two, all IA students must purchase a laptop computer based on minimum hardware specification and software licenses determined by the department and updated regularly. Students also have the option, but are
not required, to purchase a laptop computer before completion of Phase One of the program.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Grounded in the history and theory relevant to the built environment and human behavior.
2. Intellectual skills for inquiry, creative thinking, and critical analysis.
3. Professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
4. Apply the design process to identify and explore complex problems and generate creative solutions that optimize the human experience within the interior environment. This includes the ability to apply research and the principles and theories of Design to their solutions.
5. Apply their knowledge of building materials and systems, building construction, and industry specific codes, standards and guidelines in order to enhance the health, safety, welfare and performance of building occupants.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for Interior Architecture. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{Total Credits 120-122}

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{PEOPLE}

For more information, visit the School of Human Ecology Design Studies faculty and staff directory (https://humanecology.wisc.edu/staff/ sohe-department/design-studies/).

\section*{WISCONSIN EXPERIENCE}

\section*{INTERNSHIPS}

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum
of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising \& Career Center (https://go.wisc.edu/ acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (https:// advising.humanecology.wisc.edu/careers/internship-requirement/).

\section*{STUDENT ORGANIZATIONS}

School of Human Ecology student organizations include:
- Apparel and Textile Association (ATA)
- Badger\$ense Financial Life Skills
- Community \& Nonprofit Leaders (CNPL) of UW-Madison
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (https://go.wisc.edu/ sohestudentorganizations/).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (https://win.wisc.edu/).

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/ acc_office/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

Council for Interior Design Accreditation (https://accredit-id.org/)
Accreditation status: Accredited. Next accreditation review: 2023

\section*{MATERIAL CULTURE STUDIES, CERTIFICATE}

The certificate in material culture studies has two interrelated goals. First, students will become acquainted with the field of material culture studies and its methodologies. They will learn what kinds of objects are considered in the study of material culture (from small, intimate artifacts of daily life to large cultural landscapes) and how scholars and professionals from different fields and in different contexts enlist material culture in their research and activities. They will gain an appreciation for the information artifacts can provide. They will learn the kinds of questions that can be asked of objects and the kind of information that artifacts can show us. They will become familiar with (and able to distinguish between) descriptive and interpretive components of material culture study, and gain an awareness of the variety of methods. Second, students will gain an appreciation for the ways that "things" help us to connect to the world and see it in a new way, and the ways "things" give meaning to our lives and the lives of those around us.

\section*{HOW TO GET IN}

All undergraduate students in good academic standing are eligible to apply for the Material Culture Studies Certificate. Connect with an Academic Advisor for application information and the October and February deadlines.
*Note for students who are thinking about declaring the Material Culture Certificate as well as the Art History Certificate: Undergraduate students may request permission to complete both the Material Culture certificate and the Art History certificate but only one course may overlap between the two certificates. Please consult with an Academic Advisor with any questions.

\section*{REQUIREMENTS}

\section*{CERTIFICATE REQUIREMENTS}

The Material Culture Studies Certificate Program requires that students complete \(\mathbf{1 3}\) credits, which includes the two core courses and two elective courses from the list below. An internship/practicum experience is recommended, but not required.

Please note: Students who are thinking about declaring the Art History Certificate as well as the Material Culture Certificate: Undergraduate students may request permission to complete both the Art History Certificate and the Material Culture Certificate but only one course may overlap between the two certificates. Please consult with an Academic Advisor with any questions.

\section*{GOAL OF CERTIFICATE REQUIREMENTS}

The goal of the certificate requirements is to provide students with a set of interdisciplinary skills, including the development of visual literacy, and an understanding of specific methods and theories of material culture analysis as they are most often practiced. A student might select electives to specialize in a particular geographic area of study or type of object, or to provide maximum depth in a certain period of time.

\hline Prerequisite: no pr faculty members f the field of materi topics within it. Fa and fields are invit current literature. & quisites. Course is rotated among teams of two the core material culture staff. The course explores ulture, introducing the range of approaches and \(y\), staff, and professionals from different disciplines o discuss their work and perspective, and discuss \\
\hline
\end{tabular} rent literature.

2
The intent of this requirement is to have an intensive small-size seminar to teach the methods used by material culture scholars, a set of tools for analysis, hands-on training and more familiarity with material culture theories, themes and objects.
3
Choices should be clustered around a focus. For example, one strategy is to take a range of courses related to a specific geographic area, specialization, or time period. Other students may choose to pursue a cluster of courses that emphasizes nationally emerging specializations within the field of material culture including courses related to museums/ exhibitions, historic preservation, archival technology, or product design. Students should work with a material culture faculty member to develop this focus. Other courses can be selected as electives from traditional disciplinary approaches and content, but must be approved by the chair of the Material Culture Advisory Committee. Students must work closely with both their advisor within their home major and an advisor among material culture advisors to assure that both major and certificate requirements are fulfilled.

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Acquisition of skills to describe and analyze objects of multiple types, scales and media that constitute the material world across time and space.
2. Understanding of the complex and multiple ways that objects and people relate in both the past and in the present using transdisciplinary perspectives.
3. Ability to interpret and otherwise make meaning from objects using methods and theories from multiple disciplines including but not limited to art history, archaeology, anthropology, design, folklore/ folklife studies, geography, history, literary studies, landscape history, and science studies.
4. Discernment of the importance of materiality and making in the production and shaping of culture.
6. Demonstration of particular skills for object-based research projects, as well as online and in-person exhibitions, using objects and collections to prepare students for careers that include positions in museums, archives, and other professional contexts.
7. Coherent presentation of ideas in multiple media (oral, visual, digital, and written).

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/scheduling/).

Note for students who are thinking about declaring the material culture certificate as well as the art history certificate: undergraduate students may request permission to complete both the material culture certificate and the art history certificate but only one course can overlap between the two certificates. Please consult with the Art History undergraduate advisor, Teddy Kaul (ejkaul@wisc.edu), with any questions related to the art history certificate.

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{CAREERS: WHAT CAN MATERIAL CULTURE DO FOR YOU? LIFEPRACTICE AND CAREERS}

Interdisciplinary practice is central to material culture analysis. Significant engagement with material culture can have a noteworthy positive effect on students from a wide range of majors in their preparation for future careers. Understanding principles of design, analyzing the cultural meaning of physical objects, and gaining knowledge of varied systems of making, distributing, and using artifacts and consumer goods throughout
history are all broadly applicable learning outcomes. The curricula of the \(21^{\text {st }}\) century often place extra value on science and technology, to the detriment of the study of the arts and humanities. The Material Culture Program helps integrate these and other disparate spheres into a university education. One undergraduate student summed it thus

I ended up being able to use what I learned in material culture for my research in human computer interaction and design. I think having a background in material culture strengthened my skills as a user experience designer (which is what I will be doing at Intel after graduation).

Erica Lewis, 2016
Undergraduate certificate student
Engineering/Materials Design
Other material culture certificate holders have gone on to careers in museums, galleries, historic sites, historic preservation, digital media, design practice, universities, and business. Another former student comments:

Having worked in museums large and small, in education, exhibition design and development, collections, and interpretation-I draw on my background in Material Culture on a daily basis. As a historian, the practice of reading and contextualizing objects as primary sources is essential. But even more than an academic approach, the empathy one develops when learning to understand the world through the stuff of daily life is invaluable to the interdisciplinary collaboration of today's workplace.

Anna Altschwager, 2004
Assistant Director, Guest Experience
Old World Wisconsin

\section*{TEXTILES AND DESIGN, CERTIFICATE}

The certificate in textiles and design allows students from any major to gain a fundamental understanding of the creative and innovative application of textiles and visual design. By nature, textiles are interdisciplinary, weaving together art, commerce, history, culture, technology, material culture, and science. Students will develop artistic and technical skills valuable for both pursuing a professional career in the textile industry and nurturing personal creative interests.

The certificate in textiles and design is an opportunity for students from a variety of disciplines to engage in an in-depth exploration of textiles. Studio courses cultivate a rich understanding of the physical and creative interaction of materials, techniques, and concepts: pattern, networks, woven structures, flexible materials, the interaction of multiples, tactility, color, and imagery. Students have the opportunity to be creative in design studios, using both low-tech handmade techniques and complex high-tech computer-generated systems.

The courses offered in this 12-credit certificate are broad and varied, allowing students to personalize course groupings to best enhance their major and area of interest.

\section*{HOW TO GET IN}

All undergraduate are eligible for certificate declaration, except students pursuing textiles and fashion design major. Connect with an Academic Advisor (https://advising.humanecology.wisc.edu/) for application information.

Other courses from either Science and Culture or Studio

Total Credits

Students must earn a minimum 2.000 GPA on required certificate coursework. Completed courses listed within the certificate curriculum, whether or not they meet a specific requirement, are included in the calculation of the GPA.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate understanding of fiber properties, structure, techniques and construction.
2. Analyze historical, cultural, economic, technological and/or societal role of textiles.
3. Students will develop a sensitivity and awareness of material properties through hands-on learning.
4. Gain understanding of the creative process by envisioning and implementing original projects.

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{TEXTILES AND FASHION \\ DESIGN, B.S.}

Textiles and Fashion Design (TFD) is a unique hybrid program that combines a deep understanding of materials and techniques with an academic base of history, science, and contemporary design. The heart of the major lies in the hands-on studio courses where students learn to weave, dye, print, construct, pattern, illustrate, design, and innovate. Going beyond technique, TFD faculty encourage students to intuitively make, analyze and revise, leading to discovery and creative problem solving. Special topics focus on environmental, economic, and cultural sustainability as well as technology and non-traditional entrepreneurship.

Coursework in the TFD program is enhanced by visiting lecturers, special projects with industry partners, and the on-site Helen Louise Allen Textile Collection. Upper-level students in the major are given the opportunity to professionally show their work to a public audience in the fall annual student showcase and the spring fashion show.

Our award-winning students are both highly creative and superb craftspeople engaged in addressing real-world problems and offering sustainable solutions.

\section*{TFD}

Our bachelor of science degree (B.S.) in textiles and fashion design (TFD) highlights craft technique as a pathway to creative practice and prepares students for an exciting creative career in design. Studies can focus primarily in textiles or in fashion, but students are encouraged
to experiment in both areas. The program emphasizes interdisciplinary partnerships and encourages learning by doing in studios, outreach projects, and sustainable practices.

Through capstone and thesis experiences in the final year, students are given time and mentoring to create and present their own unique body of work.

\section*{TFD-FIT}

For those leaning toward an industry career, our program gives students the option to apply to spend their senior year at Fashion Institute of Technology (http://www.fitnyc.edu/) (FIT) in New York City, the hub of the textile and fashion trade. The FIT experience provides students with industry specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted by FIT, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Footwear \& Accessories Design, Communication Design Foundation, Advertising and Marketing Communications, Fashion Business Management, Textile Development and Marketing

Upon graduation, students who attend FIT are awarded a bachelor of science (B.S.) degree from the University of Wisconsin-Madison in textiles and fashion design with a named option in FIT. A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. FIT students also earn an associate of applied science (A.A.S) degree from FIT. Students attending FIT who are considered Wisconsin nonresidents continue to pay out-of-state tuition, even if they reside in the state of New York.

\section*{HOW TO GETIN}

\section*{PROSPECTIVE UW-MADISON STUDENTS}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Freshmen should declare their intention to pursue the textiles and fashion design (TFD) major when they apply for admission to UW-Madison. In addition, students may indicate interest in the TFD major when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{CURRENT UW-MADISON STUDENTS}

\section*{Declaration}
- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

\section*{Application}

All other students must apply through a competitive application process.

For transfer students, sequential courses and courses taught only once a year should be taken into account when calculating time toward completion of the degree, as graduation time may be extended.

Students intending to complete their final year of study at the Fashion Institute of Technology (FIT) must complete an additional application. Only students with a 3.0 or higher GPA in December of their third year in the program are eligible to apply for admission to FIT.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF HUMAN ECOLOGY REQUIREMENTS}

All Textiles and Fashion Design students complete the School of Human Ecology requirements listed below. Then, students complete the Textiles and Fashion Design requirements OR the Textiles and Fashion Design-FIT requirements.
\begin{tabular}{lc} 
Code & Title \\
Arts and Humanities & Credits \\
Literature & 3 \\
\hline Humanities & 6 \\
Social Science & 9 \\
\hline Physical, Biological and Natural Science & 9 \\
Human Ecology Breadth & 3
\end{tabular}

\footnotetext{

\section*{TEXTILES AND FASHION DESIGN: FIT OPTION}

View as listView as grid

\section*{- TEXTILES AND FASHION DESIGN: FIT (FASHION INSTITUTE OF TECHNOLOGY) (P. 1819)}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Have grounding in the history and theory relevant to the human ecological perspective.
2. Have intellectual skills for inquiry, creative thinking, and critical analysis.
3. Have professional skills that prepare them for applying what they have learned to create new knowledge and solve problems in a real world setting.
4. Textiles and Fashion Design students will have the ability to move beyond technique, taking creative risks to develop conceptually cohesive work through advanced knowledge of materials, processes, and an understanding of design principles.
5. Textiles and Fashion Design students will have the ability to participate in professional discussions and critique that are informed by foundational knowledge of fashion and/or textile history, theory, and science.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for Textiles \& Fashion Design. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{PEOPLE}

For more information, visit the School of Human Ecology Design
Studies faculty and staff directory (https://humanecology.wisc.edu/staff/ sohe-department/design-studies/).

\section*{WISCONSIN EXPERIENCE}

\section*{INTERNSHIPS}

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3 -credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising \& Career Center (https://go.wisc.edu/ acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (https:// advising.humanecology.wisc.edu/careers/internship-requirement/).

\section*{STUDENT ORGANIZATIONS}

School of Human Ecology student organizations include:
- Apparel and Textile Association (ATA)
- Badger\$ense Financial Life Skills
- Community \& Nonprofit Leaders (CNPL) of UW-Madison
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (https://go.wisc.edu/ sohestudentorganizations/).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (https:// win.wisc.edu/).

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they
identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/ acc_office/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

> TEXTILES AND FASHION DESIGN: FIT (FASHION INSTITUTE OF TECHNOLOGY)

For those leaning toward an industry career, the textiles and fashion design program gives students the option to apply to spend their senior year at Fashion Institute of Technology (http://www.fitnyc.edu/) (FIT) in New York City, the hub of the textile and fashion trade. The FIT experience provides students with industry specific skills which, when paired with the creative liberal arts background, makes our graduates highly desirable and often recruited by industry leaders. Students apply to FIT in their junior year. If accepted by FIT, they participate in a visiting student program in one area of focus: Fashion Design, Textile Surface Design, Footwear \& Accessories Design, Communication Design Foundation, Advertising and Marketing Communications, Fashion Business Management, Textile Development and Marketing.

Upon graduation, students who attend FIT are awarded a bachelor of science (B.S.) degree from the University of Wisconsin-Madison in textiles and fashion design with a named option in FIT. A named option is a formally documented sub-major within an academic major program. Named options appear on the transcript with degree conferral. FIT students also earn an associate of applied science (A.A.S) degree from FIT. Students attending FIT who are considered Wisconsin nonresidents
continue to pay out-of-state tuition, even if they reside in the state of New York.

\section*{REQUIREMENTS}

Core requirements for the named option are below. Students should follow the curriculum requirements in place at the time they entered the major. This requirement list should be used in combination with a DARS report.

\section*{HUMAN DEVELOPMENT AND FAMILY STUDIES}

The Department of Human Development and Family Studies (HDFS) serves undergraduate and graduate students by offering a bachelor of science in human development and family studies and a Ph.D. in human ecology: human development and family studies. Students and faculty in HDFS are dedicated to improving the quality of life for children, adolescents, and adults by discovering, integrating, applying and disseminating knowledge about lifespan human development, relationships, families, and communities, all in their larger social contexts.

The application of human ecological and interdisciplinary perspectives to solve societal problems and strengthen the well-being of children, adults, and families is a distinctive feature of the department.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment
are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{HUMAN DEVELOPMENT AND FAMILY STUDIES, B.S.}
- Major Overview (p. 1820)
- Certified Family Life Educator (CFLE) (p. 1820)
- Infant Mental Health (IMH) (p. 1820)

The undergraduate major in human development and family studies (HDFS) offers specialized courses in human development from infancy through old age, couples and family relationships, research methods, policymaking, parent-child relations, family health and well-being, parent education and support, and ethnic and cultural diversity in families. In addition to coursework, all students engage in a 150-hour, semester-long internship or high-impact learning experience in a professional setting related to their major and career goals. These settings include community mental health programs, early childhood education, legislative offices, health care agencies, research labs, criminal justice systems, child and family life education, and community-based social justice programs.

The major prepares students for careers in human and family service organizations and for graduate or professional school in a variety of fields including health care, education, family law, counseling, occupational therapy, program evaluation, physical therapy, case management, and the child life profession.

\section*{CERTIFIED FAMILY LIFE EDUCATOR (CFLE)}

The National Council on Family Relations (NCFR) provides the Certified Family Life Educator (CFLE) credential, which is recognized in the U.S. and Canada for Family Life Education professions.

The program encourages applications from professionals who have preparation and experience in Family Life Education settings, including formal teaching, research/scholarship, community education, public information and education, curriculum and resource development, health care, military family support, and ministry. CFLEs have a minimum of a bachelor's degree, and many have advanced degrees.

Certification (https://www.ncfr.org/cfle-certification/becomecertified/) must include graduating from HDFS, which is a CFLE-approved program here at UW-Madison.

Students seeking this designation must complete the following courses: HDFS 262, 263, 425, 471, 474, 501: Skills for Helping Professions, 516, 517, 535, 601, 650, CNSR SCI 273, PSYCH/SOC 453 OR GEN\&WS 103.

For additional information, please contact SoHE's Advising \& Career Center (https://sohe.wisc.edu/students/advising/) or Polina Levchenko (https://humanecology.wisc.edu/staff/levchenko-polina/), HDFS Faculty Associate.

\section*{INFANT MENTAL HEALTH (IMH)}

The HDFS course concentration in IMH focuses on promoting the social emotional development of children age 0-6 years within the family and community context. It is designed to be compatible with IMH Endorsement by the Wisconsin Alliance for Infant Mental Health (WI-AIMH)-entry level Infant Family Associate Endorsement (https:// wiaimh.org/endorsement/).

Please note that one must be a member of the organization and apply for endorsement with references in addition to completing the B.S. in HDFS with course requirements and guidelines (https://www.allianceaimh.org/ endorsement-requirements-guidelines/) specified below.

Competency areas:
1. Theoretical foundations
- Any course in HDFS Learning Outcome 1 AND
- HDFS 471 in Learning Outcome 3 AND
- HDFS 663 OR HDFS 650 in Learning Outcome 5
2. Law, regulation, and agency policy
- HDFS 535 in Learning Outcome 4
3. Systems expertise
- HDFS 469 in Learning Outcome 4 OR
- HDFS 516 AND 517 in Learning Outcome
4. Direct service skill
- HDFS 663 in Learning Outcome 5 AND
- Relevant internship (HDFS 601) and HDFS Professional

Development sequence
5. Working with others
- Any course in Learning Outcome 2 AND
- HDFS 601
6. Communicating
- Comm A and Comm B requirements for HDFS major
7. Thinking
- Any Research Methods Course in Learning Outcome 6 AND
- Quant A and Quant B requirements for HDFS major AND
- HDFS 663 in Learning Outcome 5

For additional information, please contact SoHE's Advising \& Career Center (https://sohe.wisc.edu/students/advising/) or Julie PoehlmannTynan (https://humanecology.wisc.edu/staff/poehlmann-tynan-julie/), Professor in HDFS.

\section*{HOW TO GET IN}

\section*{PROSPECTIVE UW-MADISON STUDENTS}

All prospective UW-Madison students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

Students who indicate an interest in human development and family studies (HDFS) on their UW-Madison application will be admitted to the program upon admittance to the university. In addition, students may indicate interest the HDFS major when registering for Student Orientation, Advising, and Registration (SOAR).

\section*{CURRENT UW-MADISON STUDENTS}

\section*{Declaration}
- First-semester students may declare SoHE majors.
- All students with fewer than 60 GPA credits, a minimal 2.75 cumulative GPA, and not on probation in their current school/college may declare SoHE majors.

\section*{Application}
- All other students must apply through a competitive application process.

The best way for interested students to learn more about declaring or applying to a major is to visit SoHE's advising webpage (https:// advising.humanecology.wisc.edu/academics/apply/). Additional questions may be addressed by scheduling to meet with an academic advisor (https://advising.humanecology.wisc.edu/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{Electives}

Select courses to bring degree credit total to 120
Total Credits

\section*{1}

Examples include service learning course, second internship or research experience, study abroad experience, select upper-level HDFS courses, or undergraduate teaching assistantship experience.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Knowledge of lifespan human development (including cognitive, social, and emotional development and individual differences) in social and ecological contexts.
2. Knowledge of family and community diversity.
3. Knowledge of internal family processes, including parenting and parent-child relations, couples, and family relationships across generations and family health and wellbeing.
4. Ability to consider and evaluate how children, adults, and individual families affect and are affected by policies, media, or other social institutions.
5. Knowledge about the effective and ethical practice of assessment, prevention, intervention, or outreach for individuals and families.
6. Ability to understand, evaluate, and ethically conduct social science research.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan for Human Development and Family Studies. We encourage all students to consult with their academic advisor to develop an individualized plan that meets their specific needs.

\section*{ADVISING AND CAREERS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https:// advising.humanecology.wisc.edu/academics/apply/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through individual and group advising and integration of career readiness throughout our curriculum.

3 To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{PEOPLE}

For more information, visit the School of Human Ecology Human Development and Family Studies faculty and staff directory. (https:// humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/sohedepartment/hdfs/)

\section*{WISCONSIN EXPERIENCE}

\section*{INTERNSHIPS}

Internships are a vital part of student career development and a highly valued component of the undergraduate curriculum in the School of Human Ecology. High-quality internships foster student development by bringing theories and classroom-based learning to life in real-world settings. In addition, internships give students the opportunity to explore careers related to their major, gain relevant experience in their field(s) of interest, and develop a better understanding of what is expected in a workplace by performing the tasks of a professional in that field.

For SoHE majors, internships are a requirement of our undergraduate curriculum. Students must have at least a junior standing (54+ credits) in order to pursue a 3-credit internship and must complete a minimum of 150 hours at the internship site. To be eligible, an internship must be educational in nature, directly relate to a student's major and career goals, and be approved by the Advising \& Career Center (https://go.wisc.edu/ acc_office/).

For some SoHE majors, additional course prerequisites may be required. For more information, visit SoHE Internships (https:// advising.humanecology.wisc.edu/careers/internship-requirement/).

\section*{STUDENT ORGANIZATIONS}

School of Human Ecology student organizations include:
- Apparel and Textile Association (ATA)
- Badger\$ense Financial Life Skills
- Community \& Nonprofit Leaders (CNPL) of UW-Madison
- Financial Occupations Club for University Students (FOCUS)
- Interior Design Organization (IDO)
- Phi Upsilon Omicron (National Honor Society in Family and Consumer Sciences)
- Student Retail Association (SRA)

For more information about registering as a SoHE student organization, please visit SoHE Student Organizations (https://go.wisc.edu/ sohestudentorganizations/).

Learn more about UW-Madison registered student organizations through the Wisconsin Involvement Network (https://win.wisc.edu/).

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. \section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{HUMAN ECOLOGY -SCHOOL-WIDE}

\section*{DEGREES/MAJORS/CERTIFICATES}
- Individual Major, B.S. (p. 1824)
- School of Human Ecology Honors (p. 1826)

\section*{INDIVIDUAL MAJOR, B.S.}

The individual major is a program for undergraduate students who want to fulfill a specific academic goal that is not easily attained through a major in one or more departments. The major must meet a course of study that involves at least two departments and be targeted at a specific problem or academic interest identified by the student. A student proposal must be submitted and approved by the SoHE Undergraduate Program Council. Students are encouraged to begin working with faculty and advisors in the Advising \& Career Center by the end of the sophomore year. Thirty credits must be earned in residence after the term in which the proposal is approved. The major will be guided by a committee of at least three faculty members (with no more than two faculty members from one department).

Individual majors are intended to create a unique program of study that otherwise does not exist on this campus individually or in a combination of majors and certificate programs. Students should carefully explore
all University of Wisconsin-Madison majors and certificate programs before pursuing an individual major. A proposal that essentially parallels an existing SoHE or campus major will not be approved.

Graduates of the individual major earn a bachelor of science in human ecology. The major will match the approved proposal title, which must have a human ecology focus.

\section*{HOW TO GET IN}

\section*{ELIGIBILITY}

Students must be in good academic standing and have a minimum cumulative GPA of 3.5 to be considered for an individual major. Any interested student should have completed at least two semesters (a minimum of 24 credits) in residence before submitting an application. Ideally, proposals will be made by the end of sophomore year or the beginning of junior year.

\section*{PROPOSING AN INDIVIDUAL MAJOR}

After discussing their proposed plan with a SoHE advisor and ensuring they meet the application qualifications, students will begin building a faculty committee and developing a proposal. An individual major must be composed of at least two different SoHE academic departments. If a third department is selected, it may be from in or outside of SoHE. Students should develop a one-page abstract to share with faculty as they work to build their committee. Once the committee is formed, the student will select one committee member as the major advisor. The major advisor must be from the SoHE department in which the majority of courses for the program will be taken. The student will work with the faculty committee to develop the proposal and select all required courses for the individual major, the majority of which must be completed in SoHE. The student will then submit a formal proposal to the SoHE Advising \& Career Center to be forwarded for action to the SoHE Undergraduate Program Council, which meets throughout the academic year.

Please contact the SoHE Advising \& Career Center for the complete individual major proposal instructions.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{INDIVIDUAL MAJOR REQUIREMENTS}

The student will work with the faculty committee to develop the individual major proposal and select all required courses, the majority of which must be completed in SoHE. If the Individual Major is approved by the SoHE Undergraduate Program Council, the student will complete all required courses as outlined with the faculty committee.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits.
\end{tabular} \\
& \begin{tabular}{l} 
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\

\end{tabular} \\
& \begin{tabular}{l} 
degree classification. "In residence" credit also includes \\
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic \\
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{FOUR-YEAR PLAN}

There is no standard four-year plan for the Individual Major.

\section*{ADVISING AND CAREERS}

Students interested in pursuing an individual major should first meet with a SoHE academic advisor to ensure program eligibility and to discuss their area of interest and rationale. Appointments should be made by contacting the SoHE Advising \& Career Center at 608-262-2608.

\section*{PEOPLE}

Visit the School of Human Ecology faculty and staff directory (https:// humanecology.wisc.edu/staff/uw_staff_type/faculty-staff/).

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{ADVISING \& CAREER CENTER}

The Advising \& Career Center (ACC) fosters undergraduate students' personal, academic, and professional development. Through advising, academic planning, and career education, we support students as they navigate the college experience-from exploring our majors as prospective students to becoming SoHE alumni.

\section*{ACADEMIC ADVISING}

Each SoHE student is assigned to an academic advisor in the Advising \& Career Center. SoHE academic advisors support academic and personal success by partnering with current and prospective SoHE students as they identify and clarify their educational goals, develop meaningful academic plans, and pursue their own Wisconsin Experience.

To explore academic advising resources or schedule an appointment with a SoHE academic advisor, visit Advising in SoHE (https://go.wisc.edu/ acc_office/).

\section*{CAREER DEVELOPMENT}

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. SoHE career advisors help prepare students for life post-graduation through advising and integration of career readiness throughout our curriculum.

To explore career development resources or schedule an appointment with a SoHE career advisor, visit Career Development (https:// advising.humanecology.wisc.edu/careers/scheduling/).

\section*{SCHOLARSHIPS AND OTHER FINANCIAL RESOURCES}

The School of Human Ecology awards many merit and need-based scholarships each year. The deadline to apply for scholarships is typically late January. To be eligible for these awards, scholarship recipients must be registered as full-time SoHE students.

Students who experience emergency financial situations may inquire about the availability of short-term loans through the SoHE Advising \& Career Center. In addition, university scholarships, loans, and employment are available through the Office of Student Financial Aid (https:// financialaid.wisc.edu/) (333 East Campus Mall; 608-262-3060).

\section*{SCHOOL OF HUMAN ECOLOGY HONORS}

The School of Human Ecology Honors Program provides an opportunity for students to pursue coursework in greater depth than is possible in regular courses. The honors program is a school-wide program open to students regardless of major. Honors program members are eligible to enroll in courses offered for honors-only credit, to participate in campus wide activities for honors program students, and to apply for special research-funding opportunities. Upon completion of the honors program requirements and degree requirements, the student will receive an honors degree from the School of Human Ecology. The transcript for a SoHE honors student who does not complete all honors degree requirements will have the honors designation next to honors courses completed.

\section*{HOW TO GET IN}

Students interested in pursuing the School of Human Ecology Honors Programs should first meet with an academic advisor in the Advising \& Career Center. Admission decisions are made by a faculty committee in the appropriate SoHE department and will take into consideration the eligibility criteria listed below and the strength of the written application.
- Freshmen. Admission as a newly enrolled freshman requires a 3.3 grade point average or high school class ranking in the top 10\% and a composite ACT score of 27 or a combined SAT score of 1100.
- Continuing Students. Admission of currently enrolled students requires a minimum 3.3 grade point average. Students, both transfer and those currently enrolled in SoHE, may apply for entrance to the Honors Program in any semester of their undergraduate career after the 3.3 minimum grade point average has been established.

\section*{REQUIREMENTS}

In addition to the School of Human Ecology degree requirements, honors program students must:
- Complete a total of at least 24 honors credits, with at least 12 of the honors credits obtained in Human Ecology coursework.
- Maintain a minimum grade point average of 3.3 in all UW-Madison courses to continue in the honors program.
- Receive a grade of B or above in a course to receive honors credit for that course.
- Complete an honors thesis for at least three, but no more than six, senior honors thesis credits. Students are strongly recommended to consider registering for two semesters of senior honors thesis credits for adequate time to plan and complete the senior honors thesis. Senior honors thesis credits may count toward the 12 credits minimum of Human Ecology honors credits.

\section*{SCHOOL OF NURSING}

The School of Nursing (https://nursing.wisc.edu/), established in 1924, is the leading nursing research institution in Wisconsin and a crucial part of the state's health care system.

The school offers a full array of degree programs enrolling more than 1,000 students-the bachelor of science in nursing (BSN), the doctor of nursing practice (DNP), and the doctor of philosophy in nursing (Ph.D.), along with several graduate-level certificate programs.

At the undergraduate level, degree options include the Traditional BSN, a four-year degree program; the Accelerated BSN, a 12-month program for second-degree candidates; and the RN to BSN (BSN@Home) program, for registered nurses who hold an associate's degree in nursing and wish to earn the baccalaureate degree. Options exist for honors study in the major, as well as joint programs whereby students can earn the master of public health along with the BSN or transition directly to the Ph.D. program via the Early Entry Ph.D. Option.

Student life pairs the educational and social resources of a large, worldclass university with a supportive environment at the school. Students receive comprehensive support services related to advising, program planning, clinical placements, career services, financial aid, and postgraduation credentialing.

World-renowned facilities for clinical practice and research are available in and around Madison. These include University of Wisconsin Hospital and Clinics, American Family Children's Hospital, UW Carbone Cancer Center and William S. Middleton Memorial Veterans Hospital; hospitals and clinics in urban and rural settings; nursing homes; day-care centers; and public health agencies. The university's location in Wisconsin's capital offers additional opportunities in state government and policy making.

On campus, Signe Skott Cooper Hall, the School of Nursing's new facility, has state-of-the-art classrooms, simulation labs, meeting and research facilities, and social gathering spaces in an environment dedicated to the health and wellness of students, faculty, staff and the communities and populations we serve.

The school's mission is to develop leaders for the profession and society -we make discoveries, enhance systems, and improve health through research, education, and practice.

\section*{ENTERING THE SCHOOL}

\section*{ADMISSION TO UW-MADISON}

All prospective UW-Madison nursing students must apply through the central Office of Admissions and Recruitment (https:// www.admissions.wisc.edu/).

\section*{PRE-NURSING FRESHMEN}

Students who indicate interest in the nursing major on their UW-Madison application will be admitted to the School of Nursing as pre-nursing (PRN) students. In addition, students may indicate interest in the nursing major when registering for Student Orientation, Advising, and Registration (SOAR). The School of Nursing is the academic home for pre-nursing students, providing orientation, academic advising, academic support, etc., while students complete nursing prerequisite courses and general education requirements in preparation to apply to the nursing major. Most pre-nursing students apply to the nursing major midway through their sophomore year to enter the two-year Traditional BSN program as juniors.

\section*{PRE-NURSING TRANSFERS}

Students may transfer into UW-Madison as pre-nursing students. As with pre-nursing freshmen, transfer students have an academic home in the School of Nursing as they work to complete prerequisites and general education requirements in preparation to apply to the two-year Traditional BSN program.

\section*{SECOND-DEGREE CANDIDATES}

Students seeking to earn a second degree in nursing can apply directly to either the Traditional BSN program or the Accelerated BSN program upon completing necessary admission requirements (see details below). Second-degree candidates must be admitted directly into the nursing program; they cannot enter UW-Madison as pre-nursing students.

\section*{ADMISSION TO THE NURSING PROGRAM \\ TRADITIONAL BSN}

As students complete the requirements to be eligible to apply to the nursing program, they apply to the two-year Traditional BSN program. To be eligible to apply, students must complete the necessary prerequisite courses and have the minimum 2.75 cumulative and prerequisite GPAs; complete details on the Traditional BSN admission requirements and application process can be found on the Traditional BSN admission page (p. 1836) of this Guide.

\section*{ACCELERATED BSN FORSECOND-DEGREE CANDIDATES}

Second-degree candidates can apply for the Accelerated BSN program. This is a 12-month intensive baccalaureate program that offers the quickest route to licensure as a registered nurse (RN) for students who have already completed a bachelor's degree or graduate degree in a non-nursing discipline. Students must complete nursing prerequisite courses and the university General Education Requirements, and have the minimum GPAs, to be eligible to apply. Complete details on the accelerated BSN admission requirements and application process can be found on the Accelerated BSN admission page (p. 1841) of this Guide.

\section*{RN TO BSN (BSN@HOME)}

Registered nurses who have an associate's degree or diploma in nursing can apply to enter the BSN@Home program to earn their bachelor's degree in nursing (BSN). There are GPA minimums and course requirements necessary for admission eligibility. These details are included on the BSN@Home admission page (p. 1845) of this Guide.

\section*{CURRENT UW-MADISON STUDENTS}

Students with at least a 2.75 cumulative and nursing prerequisite GPA may transfer into the School of Nursing as pre-nursing (PRN) students. Students who are not in the School of Nursing may also apply for the Traditional BSN program without being pre-nursing students. Transfer requests (i.e., classification changes) must be made before the twelfth week of the semester in order to be applied to that semester. Requests made after the twelfth week will take effect at the start of the following semester. For more information and to request a classification change to PRN, students should contact the nursing Office of Academic Affairs at 608-263-5202 or academic.affairs@nursing.wisc.edu.

\section*{POLICIES AND REGULATIONS}

The students, faculty, administration, and staff of the School of Nursing are part of the University of Wisconsin-Madison's academic community, and as such, are subject to the policies, rules, and regulations of the university. In addition, the school and its respective programs may, as deemed necessary, develop their own policies and procedures to augment those of the university. Following are the specific School of Nursing policies and regulations that expand upon or differ from the policies of the university as a whole.

\section*{ACADEMIC STATUS}

\section*{Academic Actions (Warning, Probation, Drop)}

Every student (pre-nursing and nursing) is expected to maintain at least a 2.5 GPA on all work carried, whether passed or not, in each semester or summer session. Students who maintain this average are considered in good academic standing. Failure to earn this minimum GPA will result in the academic action of warning, probation, or dropped (academically dismissed). Students must be in good academic standing in order to be eligible for graduation.

\section*{If not on warning and:}
1. Earns a GPA in a semester or summer session of \(1.75-2.49=\) warning
2. Earns a GPA in a semester or summer session of less than \(1.75=\) probation

\section*{If on warning and:}
1. Earns a GPA in a semester or summer session of 1.75-2.49 = probation
2. Earns a GPA in a semester or summer session of less than \(1.75=\) dropped from the program

\section*{If on probation and:}
1. Earns a GPA in a semester or summer session of 2.5 or above but cumulative GPA remains under 2.5 = continued probation
2. Earns a GPA in a semester or summer session of less than 2.5 or a nursing cumulative GPA below 2.5 = dropped from the program

In addition to the academic actions detailed above, nursing (NUR) students are placed on probation if they:
1. Earn a grade of \(F\) or NC in any nursing course, and/or
2. Earn a nursing cumulative GPA below 2.5

Any student on academic action will automatically be cleared of action status when the semester GPA is 2.5 or above and the cumulative GPA is 2.5 or above; and if NUR or NCP (i.e., BSN@Home) classification, the nursing cumulative GPA is at least 2.5 or above.

\section*{Dean's Honor List}

The purpose of the Dean's Honor List is to recognize superior academic achievement of undergraduate students. Students must achieve a minimum GPA of 3.75 on a semester load of not fewer than 12 credits in order to be placed on the Dean's Honor List. A notation of Dean's Honor List will appear on the student's grade report and transcript. Students who earn a semester GPA of 3.25-3.74 on 12 or more credits will receive a congratulatory statement on their end-of-semester grade report form.

\section*{English as a Second Language}

All nursing students must be proficient in English to provide safe patient care and to be successful academically. Students facing challenges in these areas may be referred by self-identification, a faculty member, or advisor to support services. Although limited English proficiency in itself is not a reason for dismissal, it can interfere with a student's ability to complete course requirements, leading to failure to progress or meet program requirements.

\section*{Good Academic Standing}

To be in good academic standing, students must maintain:
- a cumulative GPA of 2.5 or above, and
- a cumulative GPA of 2.5 or above on all nursing courses completed, and
- a GPA of 2.5 or above in the semester just completed

\section*{Graduating with Distinction}

Graduation with Distinction will be noted on the transcript of students who earned 60 or more credits at UW-Madison and a GPA that places them in the top 20 percent of those graduating from the School of Nursing that term.

\section*{Satisfactory Academic Progress}

The time required to complete the program depends on the sequence of courses, plan of study, and placement availability in nursing courses. Students may complete the program in four years; however, additional semesters or summer sessions may be needed to fulfill requirements. If requirements for the degree have not been completed within five years after admission to the nursing major, the student's academic record will
be reviewed by the Office of Academic Affairs to establish additional requirements, if appropriate.

\section*{PROGRESSION REQUIREMENTS}

Students must successfully complete all courses for each term before proceeding to the next term. Successful course completion in the School of Nursing requires students to earn a grade of \(C\) or \(\mathrm{Credit} / C R\) (in the clinical course that are offered on a Credit/No Credit basis) in each required nursing (N\#) course. Any student who earns a grade below \(C\) or does not receive credit for a clinical course must repeat the course and earn a \(C\) or higher (or CR in a clinical course) in order to progress in the program. Because nursing courses are not offered every semester, a student who does not successfully complete one or more courses during a term will fall off standard progression and will complete a modified program plan with an extended time to degree.

\section*{APPEALS, GRIEVANCES AND PETITIONS}

\section*{Student Appeals and Grievance Procedures}

Students who feel that they have been treated unfairly have the right to question this treatment and receive prompt hearing of the grievance. Before instituting an appeal or grievance, students should discuss their particular situations with an appropriate staff member, e.g., faculty member, assistant dean, associate dean, or adviser.

\section*{Section One: Appeals}

Appeals are limited to requests to continue in the curriculum after being dropped from the program for academic reasons.

\section*{Procedure \\ Filing Appeal}

Undergraduate Student: A written appeal must be filed with the Assistant Dean for Academic Programs within 10 working days of the date of the letter notifying the student of the decision to discontinue the student in the program, or the right to appeal is waived. The appellant (student) must submit to the Assistant Dean the following information:
1. A written statement addressed to the Chairperson of the appropriate appeals committee specifying:
- Precise grounds on which the appeal is based.
- Circumstances associated with the need to appeal.
- Arguments supporting the appeal.
- Description of proposed remedial actions to be taken to improve the student's academic performance.
2. The appellant may also submit letters of support from persons knowledgeable about the appellant's current and/or past academic work and/or other matters related to the appellant's academic performance. Any such letters must be submitted to the Assistant Dean by the same deadline.

\section*{Appeals Committee}

Undergraduate Student: For the purposes of hearing the appeal, the Assistant Dean will arrange an appeals committee that consists of at least three School of Nursing faculty members from the Undergraduate Admissions and Progression Committee. The Assistant Dean will collect the information relative to the appellant's academic situation and forward the information to the Appeals Committee.

Appeals Committee Meeting
- Within 15 working days of the filing of the appeal, the Appeals Committee will schedule a meeting date for the purposes of hearing the appeal.
- Appellant must appear before the Appeals Committee to present the appeal. Appellant may have a support person accompany him or her to the meeting with the Appeals Committee. Appellant must address the Appeals Committee under all circumstances. Appellant's chosen support person is limited to providing advice and support to appellant. No fewer than three working days prior to the meeting with the Appeals Committee, the appellant shall identify to the Committee the individual's appellant wishes to be present at the meeting for the purpose of providing the Appeals Committee with information about the appeal.

The Appeals Committee is authorized to decide the appeal and is responsible for the following:
1. Reviewing all data presented by the Appellant and others.
2. Discussing the argument presented by Appellant and inviting Appellant to contribute to the discussion.
3. Limiting statements of appellant and other individuals where information being presented is irrelevant, unduly repetitious, or disrespectful.
- Deciding the appeal and providing a written decision, including the reasons therefore, to the Appellant and the appropriate Assistant Dean within 15 working days of the Appeals Committee meeting. The written decision shall identify and include where appropriate:
- Appellant's stated reason for the appeal
- Action taken by the Appeals Committee
- Stipulations and recommendations for appellant's continuation in program (where appeal granted)
- Rationale for decision
- Names of individuals present at the hearing
- Notice of appellant's right to appeal the Appeals Committee decision to the Associate Dean for Academic Affairs.
4. If the appeal is granted, the Appeals Committee will discuss with the Appellant any stipulations (binding) and recommendations (nonbinding) for continuation in the program.

\section*{Review of Appeals Committee Decision}
1. A written request for review of the Appeals Committee Decision by the Dean of the School of Nursing or the Dean's designee must be submitted to the Associate Dean for Academic Affairs within 20 working days of the date of notification of the Committee's initial decision.
The request must state the specific grounds for appeal which are limited to:
- School policies were incorrectly applied;
- Decision is contrary to state or federal law;
- Proper appeal procedures were not followed; or
- Unfounded, arbitrary, or irrelevant assumptions of fact regarding the appellant's performance were made by the Appeals Committee. Appellant must also identify the specific aspects of the Committee decision that he or she believes meet the criteria cited as a basis for appeal.

The Dean of the Dean's designee may meet with the appellant to discuss the request for review.
a. Copies of the information submitted to the Appeals Committee and the Appeals Committee decision shall be provided to the Dean or the Dean's designee for review. Only facts and information presented to the Appeals Committee may be introduced to and considered by the Dean or the Dean's designee.
b. The burden of proof shall be on the student to demonstrate by a preponderance of the evidence that the Appeals Committee's decision was the result of one or more of the above bases for appeal.
c. The Dean or the Dean's designee shall notify Appellant and the Appeals Committee in writing within 30 working days of receipt of the request for review of the Appeals Committee decision or the appellant's meeting with the Dean's or Dean's designee, whichever is later, stating the action on the appeal and the grounds for the action taken.
d. The decision by the Dean or the Dean's designee on review is final.

\section*{Section Two: Grievances Informal Resolution}

Any student in the School of Nursing who believes that he or she has been treated inequitably is encouraged to resolve the matter informally. The student should first talk with the person or group at whom the grievance is directed in an attempt to resolve the issue informally. The student may contact the Associate Dean for Academic Affairs for assistance in resolving the matter informally. The student may also contact the following groups for assistance in reaching an informal resolution and/ or information regarding other possible formal procedures to resolve the matter
1. Contact the UW-Madison Equity and Diversity Resource Center for information and assistance regarding discrimination or disability issues.
2. Contact the Dean of Students for information about resources for addressing student concerns.

\section*{School of Nursing Grievance Procedure:}

The grievance procedure is available to resolve student concerns regarding inequitable treatment that have not been satisfactorily resolved through the informal resolution process or where the student believes that informal resolution would not be productive. The grievance procedure is described below. Through the grievance process, the student may be accompanied by a support person. The use of this grievance procedure shall not prevent the student from seeking redress through another administrative or legal process.
1. To initiate the formal grievance procedure, the student must submit his or her grievance, in writing, to the Associate Dean for Academic Affairs.
2. The written grievance shall include:
- a statement that the student wishes a review of the situation by a Grievance Committee;
- the identification of the person or group at whom the grievance is directed;
- the specifics of the perceived inequitable treatment;
- evidence in support of the student's belief that he or she has been treated inequitably; and
- the outcome or resolution desired by the student.
3. A grievance must be initiated no later than 20 calendar days from the time the student knew or could reasonably have been expected to have known of the circumstances giving rise to the grievance. Initiation of the informal procedure described above within the 20-day period will extend the deadline for initiating the grievance to 40 calendar days from the time the student knew or could reasonably have been expected to have known of the circumstances giving rise to the grievance.
4. Within 30 calendar days after receiving the grievance, the Associate Dean for Academic Affairs shall arrange for a committee meeting. The Committee may request a written response from the person or group at whom the grievance is directed, may ask for additional information from any or all parties involved, may request that the parties involved appear before the Committee, and/or may take other steps in attempting to resolve the grievance.
5. Within 60 calendar days after receiving the grievance from the Associate Dean for Academic Affairs, the Committee shall send a written report of the Committee's recommendations to the Associate Dean for Academic Affairs. The student will also receive a copy of the report. The report shall include notice to the student of his or her right to appeal the Committee's recommendation to the Dean of the School of Nursing.
6. A student wishing to appeal the Committee's recommendation to the Dean of the School of Nursing must submit a written appeal to the Dean within 10 calendar days of the date of the Committee's report. The request must state the specific bases for appeal and identify the specific aspects of the Committee's recommendation that he or she believes are the subject of the bases for appeal. Where an appeal is filed with the Dean, a copy of the Committee's report shall be provided to the Dean for review. Only facts presented to the Committee may be introduced to and considered by the Dean. The Dean shall notify the appellant and the Committee in writing within 30 calendar days of receiving the written appeal stating the action on the appeal and the grounds for the action taken.

\section*{Section Three: Course Grade Appeals Process}

If a student believes \(s / h e\) has been awarded a grade for a course that does not adequately represent her/his performance in the course, they should speak with the course faculty member in an effort to attempt to resolve the issue informally. This must be done within 10 working days of receipt of the grade. During this informal process both student and faculty may consult with the Associate Dean for Academic Affairs to seek resolution of the issue.

If the student remains dissatisfied with the grade, the student has the option to initiate the formal Grievance procedure. To do this, the student must submit the grievance, in writing, to the Associate Dean for Academic Affairs within 10 working days. The Associate Dean will appoint a committee to hear the grievance. The decision of the committee is final. There is no further appeal.

\section*{Petition for Special Consideration}

Nursing students may use the Petition for Special Consideration (https:// uwmadison.co1.qualtrics.com/jfe/form/SV_07Y6YZUOYXJnQ2O/) to request an alternative or exception to an academic rule, regulation, procedure, or requirement.

\section*{CLINICAL/EXPERIENTIAL LEARNING COURSES}

All nursing students are required to complete credit hours in the clinical setting under the supervision of a nursing professional. In the School of Nursing, the term experiential learning is used to describe the clinical course experience. These clinical experiences support the mission of the School of Nursing, integrating practice and coursework, to provide a comprehensive nursing education. There are some policies specific to experiential learning courses:

\section*{Compliance Requirements}

The School of Nursing is committed to ensuring all nursing students are compliant with national and state guidelines for personnel providing nursing care, as well as additional/specific requirements mandated by the school's clinical affiliates as set forth in the clinical affiliation agreements. Therefore all nursing students are required to be in full adherence to the school's compliance program while enrolled in the nursing program. The school's compliance program includes immunizations, trainings, and a background check. Students will be held accountable for complying with the clinical eligibility requirements prior to entering the program and throughout their program of study. All students are required to keep their compliance documents up to date as an essential part of their professional responsibility for patient safety. Review the Nursing Student Compliance Program (https://students.nursing.wisc.edu/clinicals-compliance/ compliance/) for complete details.

\section*{Clinical Placements}

Students are assigned to clinical placement sites based on the faculty's selection of clinical sites specific to the learning objectives of the course, site characteristics, and availability. Students need to be prepared to travel up to 90 miles from the School of Nursing and have varied schedules including evenings, nights and weekends. Clinical shifts may be 4-12 hours long. The School of Nursing secures clinical placements for all students who are eligible. Students are not asked to nor allowed to arrange their own clinical placements.

\section*{Clinical Hour Completion Within the Term/Rotation}

Experiential learning/clinical work required for School of Nursing courses must be completed during the term or session of enrollment. These official terms and dates are when the faculty have effort allocated to course instruction and also when our clinical partners have agreed to engage with students in clinical rotations. Per the university's Academic Calendar (https://secfac.wisc.edu/academic-calendar/), there are three terms each academic year: fall, spring, and summer. Each term has an official date instruction begins and last class day. In addition, some clinical courses are broken down into shorter rotations within a term, typically an eight-week session. Clinical work and clinical hours must be completed between these term/session/rotation dates. It is not an option to start clinical work prior to the first day of instruction or to complete clinical work after the last day. Exceptions may be made in the case of extenuating circumstances or if a student is assigned an Incomplete grade for the course. Any requests for an exception to this policy should be directed to the course instructor who will review the request with the Director of Clinical Practica to determine its appropriateness and feasibility.

\section*{Transportation}

The School of Nursing recognizes that students need educational experiences beyond those available in hospitals in Madison, Wisconsin. In answer to this educational need, and in order to secure enough clinical sites for all students, the school places its students in a variety of venues in and beyond Madison. This includes ambulatory sites, clinics, rehabilitation centers, home health agencies, geriatric facilities, school
districts, nursing homes, etc. This gives our students comprehensive exposure to a broad range of patients, illness, and care. Nursing students are responsible for arranging their own transportation to and from their clinical sites. First-year clinicals are accessible by public transportation from Signe Skott Cooper Hall and other points in Madison. Secondyear clinicals require travel to and from an agency, as well as to and from homes, schools, and other sites. Locales may be up to 90 miles from Madison. Therefore, second-year nursing students are required to have (1) a valid driver's license, and (2) individual access to a car. Students are responsible for all transportation costs incurred, including gas and parking fees. Students with extenuating circumstances that have an impact on their clinical transportation options (e.g., driving/ medical restrictions) should use the Petition for Special Consideration (https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/ sites/222/2017/07/petition-spec-consideration-ug.pdf) to request an accommodation or exception to the transportation policy. The petition must be submitted on/by March 1 for clinical placements during the next fall term and on/by November 1 for the next spring term placements. These deadlines are firm, as a petition must be reviewed in advance of clinical assignments. There is no guarantee the school will be able to honor such requests/conditions, and exceptions are granted in very rare circumstances.

\section*{Uniforms}

Nursing students are required to purchase the approved School of Nursing uniform. The uniform consists of a white top and navy pants. The white top, embroidered with the School of Nursing logo, is available in two styles and the pants will be available in three styles. Lab coats embroidered with the school logo are also required and are worn when students are on their clinical units doing clinical preparation and during most community clinical experiences. In addition to the uniform requirements, there are also professional appearance guidelines (https://students.nursing.wisc.edu/ clinicals-compliance/clinical-information/) for students.

\section*{Unsafe Clinical Performance}

A student who demonstrates unsafe nursing practice that jeopardizes the client's or family's physical or emotional welfare may be dismissed at any time from the clinical area. Unsafe clinical practice is defined as any behavior determined by faculty or a preceptor to be actually or potentially detrimental to the client or to the healthcare agency. Unsafe clinical practice can include behaviors related to physical or mental health problems; use of alcohol, drugs, or chemicals; lack of preparation for clinical; or deficits in problem-solving skills. Reports of unsafe clinical performance will be routed through the course professor and/or the course coordinator to the Associate Dean for Academic Affairs who will work with the faculty and student to determine the appropriate outcome, which may include immediate removal from the course (i.e., administrative drop) and subsequent implications for academic progression.

\section*{Student Invasive Procedures}

During clinical laboratory classes, experiential learning sessions, and/ or or at any other time, students may not practice invasive procedures on themselves, other students, faculty, preceptors, staff, and/or any other unauthorized individuals. This includes, but is not limited to, any invasive procedures that require needles, syringes, and/or intravenous supplies; nasogastric tube insertion; catheterization; etc. During some non-invasive experiences, such as physical assessment, listening to a heartbeat, or taking a blood pressure, students may be asked to act as practice participants. If a student has any objection to providing this experience, they should notify the instructor immediately so that an alternate experience can be provided.

\section*{COURSES AND ENROLLMENT}

\section*{Enrollment}

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf).

\section*{Attendance}

The School of Nursing expects that students recognize they have entered a profession in which their commitment to full participation in the learning environment is an essential component of what will become a style of life-long learning. Regular class attendance is a student obligation and students are responsible for all the work of all educational activities. Students should not expect to be excused from required coursework for personal/family events, work obligations, or because of non-compliance with School of Nursing or clinical agency health and onboarding requirements. In extraordinary circumstances, an absence may be granted at the discretion of the course instructor. This might include an absence due to personal crisis, military or civic obligation, authorized university activity, religious observances, or health concerns that affect the student's ability to safely care for patients. In most cases, students will be required to provide documentation regarding the absence.

\section*{Didactic Course Attendance}

In most didactic courses, attendance and/or participation are factored into the grading process. Absences may place students in jeopardy of not meeting course learning outcomes and thus successfully completing the course. If this occurs, the instructor will consult with the Undergraduate Program Director and/or the Assistant Dean for Academic Affairs to determine the appropriate course of action, which may include being removed (i.e., administratively dropped) from the course. Students should review each course syllabus for specific policies related to absences in that course and make-up experiences, if applicable.

\section*{Experiential Learning Attendance}

It is the expectation that students attend all Experiential Learning activities as clinical learning is essential to the completion of the nursing program. If a student must miss an Experiential Learning session due to an extraordinary circumstance, a decision as to whether the student will make up the experience/hours will be based on the student's progress in meeting course learning outcomes. The instructor, in consultation with the Course Coordinator (if applicable), will determine if the absence will be made up and the nature of the make-up experience. The instructor/ Course Coordinator will consult with the Undergraduate Program Director and/or the Assistant Dean for Academic Affairs in situations where absence is placing the student's success in the course at risk. A student who misses more than 7.5 percent of Supervised Experiential Learning hours, as specified in the course syllabus, for any reason will be removed (i.e., administratively dropped) from the course for as the result of not being able to meet course learning outcomes. Students should review each course syllabus for specific policies related to absences in that course and make-up experiences/hours, if applicable.

\section*{Credit/No Credit Courses}

Some courses are designated as being offered on a Credit/No Credit basis. The transcript for the course will indicate either CR (meaning the student earned credits for the course) or \(N\) (meaning the the student did
not earn any credit for the class). Students may not take such courses on any other basis.

\section*{Concurrent Registration and Enrollment}

In some rare circumstances, and only with prior approval of the academic dean, students may enroll to earn degree credit concurrently at UWMadison and any other accredited postsecondary school, including the UW-Extension. Requests for approval should be made prior to the end of the second week of classes of the semester in which dual registration is desired. Courses must be completed during the semester in which concurrent enrollment is allowed. To request permission for concurrent enrollment, submit the Petition for Special Consideration (http:// academic.son.wisc.edu/studentnet/forms/petition-spec-considerationug.pdf).

\section*{Drop Notation}

The Drop (DR) notation appears on students' records if they drop a class or classes after the last day to drop courses or withdraw without a DR or W grade notation appearing on students' transcripts. For the specific deadline for dropping classes so a DR will not appear on a student's records, see Deadlines at a Glance (http://www.registrar.wisc.edu/ spring_deadlines_at_a_glance.htm) on the Office of the Registrar website. Please note that the School of Nursing does not backdate drops to erase them from a student's academic records or extend the drop deadline so that the DR will not appear.

\section*{Dropping a Nursing Course}

A student who drops a nursing (N\#) course may reenroll in the course when space is available. A student who drops a nursing course a second time is not eligible for the course a third time.

\section*{Independent Study}

Students are responsible for identifying their area of interest or question, establishing objectives for their learning experience, and developing a learning contract with the faculty member. All independent study requires the consent of the instructor. Approval forms are available on the forms page (https://students.nursing.wisc.edu/policies-forms/forms/) within the School of Nursing Student Site.

\section*{Registration Changes}

The Office of the Registrar publishes university deadlines for adding and dropping individual courses, withdrawing (from all courses), and selection options such as pass/fail and audit. Changing enrollment can have consequences for academic standing, tuition, progress toward degree, etc. Students are strongly encouraged to consult with an academic advisor or the academic dean in the School of Nursing prior to initial enrollment and before making any changes to enrollment. Exceptions to or extensions of the university deadlines may only be requested via the Petition for Special Consideration (http://academic.son.wisc.edu/studentnet/forms/petition-spec-consideration-ug.pdf).

\section*{Reentry}

Any student who leaves the School of Nursing and wishes to return after an absence of one semester or more must file a reentry application with the UW-Madison Office of Admissions and Recruitment. Permission to reenter is dependent on program capacity, previous academic standing, and length of absence. Immediate placement in required nursing courses is not assured. Students seeking reentry to the baccalaureate program who have left on academic action must be reviewed by the Office of Academic Affairs. If readmission is granted, academic requirements may be specified to insure currency in nursing knowledge and skills prior to enrolling in clinical nursing courses. These requirements may include remediation and/ or repetition of courses, depending on academic standing or length of
time since leaving the program. The remaining program will be planned as considered best for the student and according to the current curriculum.

\section*{Retaking Courses}

Each individual required nursing course may be repeated only once with a maximum of two repeated courses in the curriculum. Students who do not successfully complete a course after two attempts or who must repeat more than two different courses will be dis-enrolled from the nursing program. A course for which a student earned a grade below \(C\) (or NC in a clinical course) must be repeated within the next two semesters in residence. All grades earned will be used in calculating the student's cumulative and nursing grade point averages, but credits will be counted only once toward the minimum nursing and degree credit requirements.

Didactic/Theory Courses: Undergraduate students may repeat any required didactic/theory course once without special permission.

Clinical Courses: To repeat a clinical course, an appeal must be made to the Associate Dean for Academic Affairs who will determine if the appeal merits approval. Upon a successful appeal, a student may repeat a clinical course based upon course schedule and program capacity.

\section*{Withdrawal}

A nursing student who finds it necessary to withdraw during a semester or summer session must talk with an academic advisor and complete the withdrawal process. Failure to do so may result in a recording of failure for all courses. Any student may withdraw from the program without grades being recorded during the first 12 weeks of a semester. After the 12 th week, a student may withdraw only with the permission of the Office of Academic Affairs.

\section*{CREDITS}

\section*{30-Credit residence requirement}

Students must complete at least 30 credits at UW-Madison. Baccalaureate students must complete at least 15 credits in nursing courses from the School of Nursing, including one required clinical nursing course at the 400 level or above.

\section*{Credit Load}

A full-time program is 12 to 18 credits for a semester. Students who wish to carry more than 18 credits per semester must obtain permission from the Office of Academic Affairs. Students will be assessed additional tuition per credit on all credits carried over 18.

\section*{Retrocredits}

The School of Nursing grants retroactive foreign language credit to students for foreign language skill developed in high school or elsewhere. To earn retroactive credits for language, students must enroll in a higher level language course at UW-Madison before the end of the first two semesters in residence. Transfer students must enroll in the course on the UW-Madison campus before they earn 30 degree credits (including credits transferred from other campuses but not including AP, CLEP, IB, or retro credits in another language). Students must earn a grade of \(B\) or better. If these conditions are met, retroactive credits should appear automatically on a student's transcript by the beginning of the following semester. Students will receive credit for the UW course completed and for all lower level courses in that language up to 16 retroactive credits maximum. These retroactive language credits may be used to meet degree requirements of the college or department, but may not be used to meet humanities requirements. They will be counted as electives only.

\section*{DEGREES}

\section*{Second Undergraduate Degree}

Second undergraduate degree candidates are considered for admission to both the pre-nursing and nursing classifications. Students who apply as second undergraduate program candidates must meet the admission and transfer grade point requirements of the university in place at the time they apply for admission. If admitted, an action is taken granting permission to pursue a second degree.

\section*{Second Major}

Students may request permission to pursue a second major along with the nursing degree. Students must complete the nursing school's Petition for Special Consideration (https://nursingstudentnet.wiscweb.wisc.edu/wp-content/uploads/sites/222/2017/07/petition-spec-consideration-ug.pdf) to make the request.

\section*{GRADES}

\section*{Grading Scale}

The school has a standard grading scale in nursing courses that are graded A-F, as noted below. Some Experiential Learning (i.e., clinical) courses are graded Credit/No Credit.

A: 94-100
AB: 88-93.99
B: 82-87.99
BC: 76-81.99
C: 70-75.99
D: 65-69.99
F: <65

\section*{Incompletes}

An incomplete may be reported for a student who has carried a subject with a passing grade until near the end of the semester and then, because of illness or other unusual and substantiated cause beyond the student's control, is unable to take or complete the final examination or is unable to complete some limited amount of term work. An Incomplete is not given to a student who stays away from a final examination except as indicated above. In the absence of substantiated cause, the grade shall be F. Even with such proof, if the student's work has convinced the instructor that s/he cannot pass the course, the grade shall be F. Any Incomplete taken by a School of Nursing student must be completed by the end of the student's next semester of residence (specifically, by the last day of classes), excluding summer sessions. If the work is not completed by this deadline, the Incomplete will lapse into a Failure unless the time limit has been extended in writing by the Office of Academic Affairs.

\section*{Minimum Grade Requirement}

Students must earn a grade of \(C\) (2.0) or higher in each required nursing (N\#) course, including didactic/theory and clinical courses. Students must receive credit (CR) in any clinical course that is offered on a Credit/ No Credit basis. Any student who earns a grade below \(C\) or does not receive credit for a clinical course must repeat the course and earn a C or higher (or CR in a clinical course) in order to progress in the program in accordance with subsequent course prerequisites.

\section*{Pass/Fail}

The total number of ungraded credits (i.e., pass/fail) applied to graduation requirements may not exceed 24 . Students who plan graduate study are advised to consult with graduate studies departments to determine acceptance of credits taken under the pass/fail option. Students eligible for the pass/fail privilege are continuing students with NUR, NCP (BSN@Home), or PRN classifications who have a minimum 2.5 cumulative GPA on all courses completed and have no end-of-semester academic
actions on their current record. Newly admitted students in these classifications are also eligible for the pass/fail privilege. Only one course can be carried on pass/fail basis during each semester or summer session; or 3 or 4 credits of 1 -credit modular courses. No required courses may be carried under the pass/fail option. The registrar's office will convert final letter grades reported by the student's instructor to an \(S\) (pass) grade if the letter grade is \(C\) or higher or to a \(U\) (fail) if the final letter grade is below \(C\). Course credits in which a student obtains a \(U\) grade cannot be counted toward the minimum of 124 credits required for graduation. Students interested in the pass/fail option must contact their nursing academic advisor to determine eligibility.

\section*{PROFESSIONAL STANDARDS}

Students in the School of Nursing must demonstrate patterns of professional behavior that 1) follow the legal and ethical codes of nursing; 2) demonstrate intellectual honesty and a strong sense of personal integrity; 3) show exemplary moral and ethical character; 4) display a responsible, civil attitude towards patients, fellow healthcare workers, classmates, faculty, and staff; 5) show respect for the human rights of individuals; and 6) demonstrate appropriate action to ensure the safety of clients, self, and others. Professional behavior is expected in the classroom, clinical settings, learning activities, and in any additional circumstances where a student represents the university or the School of Nursing. Students whose behavior does not comply with these professional standards will receive sanctions that may include but are not limited to a lower or failing grade in a course, immediate removal from a course (i.e., administrative drop), or dismissal from the nursing program.

\section*{RESOURCES}

\section*{SIGNE SKOTT COOPER HALL}

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \(\$ 53.3\) million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence-high-tech and hightouch methods and practices that result in better patient outcomes and greater satisfaction with care.

\section*{ADVISING AND STUDENT SERVICES}

OFFICE OF ACADEMIC AFFAIRS
The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

\section*{ACADEMIC ADVISING}

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (https://students.nursing.wisc.edu/undergraduate-menu/undergraduate-
advising/). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

\section*{CAREER ADVISING}

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

\section*{ACADEMIC SUPPORT SERVICES}

Career \& Student Success (https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/) Academic Support has a mission to develop the next generation of nurse leaders by providing holistic, culturally congruent student support across four dimensions: academic support, leadership and connection, career development, and wellness throughout the student experience. Students can gather with other likeminded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

\section*{STUDENT ORGANIZATIONS}

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

\section*{FINANCIAL AID AND SCHOLARSHIPS}

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (http:// scholarships.wisc.edu/Scholarships/).

\section*{HONORS}

\section*{HONORS PROGRAM}

The School of Nursing offers an Honors Program for those high-ability students seeking early research involvement with a faculty mentor. Students who successfully complete the Honors Program graduate with distinguished academic performance and receive a Bachelor of Science in Nursing (BSN) with Honors. In addition, students of the Honors Program acquire an enriched view of nursing science.

Each student in the Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Interested students apply for admission to the Honors Program during their first semester in the two-year Traditional BSN program. Admission to the Honors Program is based on past academic work, a short essay, and a letter of reference.

Review the Honors Program (https://students.nursing.wisc.edu/ undergraduate-menu/undergraduate-program/) page of the Student Site for complete details.

- Nursing, BSN (Collaborative Program) (p. 1845)
- School of Nursing Honors (p. 1849)

\section*{NURSING, BSN}

The bachelor of science in nursing (BSN) degree program prepares individuals for careers in professional nursing in hospitals and other health care agencies. This traditional BSN program provides a foundation for progressing to positions of increased responsibility, leadership, and continued education in graduate programs. Upon successful completion of the program, students receive a bachelor of science in nursing degree from the UW-Madison School of Nursing.

The curriculum includes courses in nursing as well as in liberal arts and sciences. Most students enter UW-Madison as pre-nursing students and spend their first two years completing nursing prerequisite and general education courses. Students then apply midway through their sophomore year to enter the nursing program as juniors. From there, the two-year nursing component includes lectures, laboratory, and clinical courses. Nursing courses emphasize clinical decision-making and the application of theoretical knowledge. Clinical experiences can be up to 90 miles from Madison and may include ambulatory sites, clinics, hospitals, rehabilitation centers, home health agencies, geriatric facilities, school districts, nursing homes, policy centers, etc. This range of sites and opportunities gives students comprehensive exposure to a broad range of patients, illness, and care in both clinical patient and community health settings. Elective courses in general education and in nursing permit students to pursue individual interests.

\section*{HOW TO GET IN}

Admission to the nursing major is competitive and determined by a comprehensive review of each student's academic preparation and performance, leadership, extracurricular activities and service, health care experience and background, diversity in experience and background, and the quality of application statements/essays.

Upper Division admission is the standard route into the Traditional BSN nursing program. In this model, students enter UW-Madison as pre-nursing students (PRN), they spend the first two years completing general education requirements and nursing prerequisites, and then apply for admission to the nursing program for the final two years on campus. Students may also apply to transfer directly into the Traditional BSN campus from another institution, upon completing the admission requirements.

Admission is highly competitive and based on factors including academic performance, pattern and trend of grades, courses taken, leadership roles, extracurricular activities, experiences related to health care, and experiences or background in diverse cultural, social, and geographic settings. Approximately half the students who apply for admission are admitted. The application deadline is February 1 to enter the nursing program the following fall.

To be considered for the Traditional BSN program, students must, at the time of application:
1. be in progress to complete at least 54 degree credits of collegelevel course work by the end of the spring semester;
2. have a minimum cumulative college GPA of 2.75 (based on a 4.0 scale) at the end of the fall semester and again at the end of the spring semester;
3. have completed or have in progress four of the following seven prerequisite courses by the end of the fall semester, and be enrolled to complete all seven by the end of the spring semester; and
4. have a minimum combined prerequisite GPA of 2.75 and earn at least a C (2.0) in each of the individual seven prerequisite courses.

The seven prerequisite courses are:
1. Chemistry w/ Lab
2. Microbiology
3. Human Anatomy
4. Human Physiology
5. Psychology (introductory)
6. Sociology (introductory)
7. Human Growth and Development

Students transferring to the University of Wisconsin-Madison, as well as students who already have a bachelor's degree and wish to earn a second degree in nursing, also apply to the Traditional BSN program via the Upper Division Admission option. More information on the admission process and requirements for transfer students and second-degree students is available on the School of Nursing website (https://nursing.wisc.edu/ undergraduate/bsn/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.
\begin{tabular}{ll} 
General & - Breadth-Humanities/Literature/Arts: 6 credits \\
Education & - Breadth-Natural Science: 4 to 6 credits, consisting of \\
& one 4- or 5-credit course with a laboratory component; \\
& or two courses providing a total of 6 credits
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.
8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

\section*{FOUR-YEAR PLAN}

This is a sample four-year plan. There are many potential variations of this plan, especially in the freshman/sophomore pre-nursing years. All students are strongly encouraged to consult with their academic advisor to develop an individualized plan that meets their specific needs. The degree requires a total of 120 credits minimum.

\section*{Total Credits 114-131}

\section*{ADVISING AND CAREERS}

The School of Nursing provides dedicated, professional academic and career advising to undergraduate students in their pre-nursing and nursing years. As one of the smaller schools on campus, the school is able to offer
a great deal of personal attention and individualized academic and career advising.

\section*{ACADEMIC ADVISING}

All pre-nursing and nursing students are assigned an academic advisor based on the students last name. Generally speaking, freshmen receive advising in small-group sessions. Once students enter their sophomore year, they move to one-on-one advising appointments with their assigned advisor. Detailed information on the school's academic advising system and staff (https://students.nursing.wisc.edu/undergraduate-menu/ undergraduate-advising/) are available on the school's student intranet, called the Student Site. Questions about advising can also be directed to the Office of Academic Affairs at 608-263-5202.

\section*{CAREER ADVISING}

The school offers career advising services to provide resources and strategies for career planning and placement. This includes workshops and job/internship fairs, resume review, job search resources, and licensure information. In addition, the school offers a 1-credit seminar N590 Introduction to Career Development in Nursing.

\section*{CERTIFICATION/LICENSURE}

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

\section*{CERTIFICATION/LICENSURE}

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Oklahoma, Ohio, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands

\section*{The requirements of this program do not meet Certification/Licensure in the following states: California, New York}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Pennsylvania, Vermont, Washington, American Samoa, Puerto Rico

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{SIGNE SKOTT COOPER HALL}

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \(\$ 53.3\) million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence-high-tech and hightouch methods and practices that result in better patient outcomes and greater satisfaction with care.

\section*{ADVISING AND STUDENT SERVICES \\ OFFICE OF ACADEMIC AFFAIRS}

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

\section*{ACADEMIC ADVISING}

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and
to help them develop meaningful plans to ensure academic success. Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (https://students.nursing.wisc.edu/undergraduate-menu/undergraduateadvising/). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

\section*{CAREER ADVISING}

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

\section*{ACADEMIC SUPPORT SERVICES}

Career \& Student Success (https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/) Academic Support has a mission to develop the next generation of nurse leaders by providing holistic, culturally congruent student support across four dimensions: academic support, leadership and connection, career development, and wellness throughout the student experience. Students can gather with other likeminded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

\section*{STUDENT ORGANIZATIONS}

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community service, and academic achievement, as well as foster connections between faculty, staff, and students.

\section*{FINANCIAL AID AND SCHOLARSHIPS}

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (http:// scholarships.wisc.edu/Scholarships/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

Commission on Collegiate Nursing Education (http:// www.aacnnursing.org/CCNE/)

Accreditation status: Next accreditation review: 2029-2030.

\section*{NURSING, BSN (ACCELERATED PROGRAM)}

Students who already have a bachelor's degree or higher and are interested in making a career change to nursing can apply to enter this fast-track professional program to earn the bachelor of science in nursing (BSN) in just 12 months.

It is an intense, rigorous program with students completing approximately 1 credit a week, for a total of 49 credits over 12 months. This equates to an average of 50 classroom-based, clinical, and out-of-class hours each week.

Tuition is a flat rate of \(\$ 45,000\) for Wisconsin residents (including reciprocity for MN residents), \$60,000 for nonresidents, plus fees and other program-related expenses.

\section*{HOW TO GET IN}

\section*{SCHOOL OF NURSING REQUIREMENTS}

Following are the requirements to be eligible to apply for the Accelerated BSN program:
- Bachelor's degree in a non-nursing field from an accredited institution, completed by the program start date. Students anticipating spring graduation can apply the prior fall; proof of timely progress is required.
- Admission to UW-Madison as a post-undergraduate degree-seeking student (separate application required)
- Minimum college-level cumulative GPA of 2.75
- Completion of the prerequisites listed below with a grade of \(C\) or better in each course and a minimum combined GPA of 2.75. The first four prerequisites (science courses) must be completed by the application deadline and within seven years of the program start date. All prerequisites must be complete before the program start date. Prerequisite equivalency information is available on the BSN Prerequisite Course Equivalencies (https://nursing.wisc.edu/ undergraduate/course-equivalencies/) page.
a. Chemistry w/Lab
b. Microbiology
c. Human Anatomy
d. Human Physiology
e. Psychology (introductory)
f. Sociology (introductory)
g. Human Growth and Development

Note: Anatomy and physiology may be satisfied by one semester of anatomy and one semester of physiology or by A\&P I and II. With the latter option, students must complete both courses at the same institution.

\section*{UW-MADISON GENERAL EDUCATION REQUIREMENTS}

Applicants must also complete the following university-wide General Education Requirements (http://gened.wisc.edu/Req.htm). At least two must be completed by the application deadline, and all prerequisites must be completed before the program start date.
1. Communications Part A: Literacy Proficiency
2. Communications Part B: Comm-B requirement is waived for students pursuing the Accelerated BSN degree only.
3. Quantitative Reasoning Part A: QR Proficiency
4. Quantitative Reasoning Part B: Enhanced QR Proficiency
5. Ethnic Studies

\section*{APPLICATION DATES AND DEADLINES}

The program requires two applications: one to UW-Madison, plus a supplemental application to the School of Nursing for the Accelerated BSN program. Both applications open September 1 and the deadline is October 1. In-person interviews occur in November. Admission decisions are released in December and students must submit their intent to enroll by March 1.

\section*{TRANSFER CREDIT EVALUATION AND PROOF OF ENROLLMENT}

An unofficial transfer credit evaluation to check for completion of the nursing prerequisite courses and the university's General Education Requirements will be completed by the School of Nursing prior to the decision release date. Admission is contingent upon official verification by the UW-Madison Office of Admissions and Recruitment.

Applicants will be required to submit proof of enrollment at the time of application for any prerequisites not yet completed. If enrollment has not opened for a particular course, students will be asked to submit a statement of intent to register that lists the course, institution, dates of instruction, and enrollment date.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{SCHOOL OF NURSING REQUIREMENTS}

The Accelerated bachelor of science in nursing (BSN) degree is a 49credit curriculum comprised of 17 didactic and experiential learning (i.e., clinical) nursing courses. The program builds on the coursework Accelerated BSN students completed in their prior undergraduate and/ or graduate degree(s) and the prerequisite coursework, including the university's General Education Requirements, completed in preparation for admission to the program.

\section*{MAJOR REQUIREMENTS}

During the 12 -months in the Accelerated BSN program, students complete 49 credits of required nursing coursework, including classroombased active learning courses and experiential learning courses in the clinical environment. This nursing coursework will include Pathology and Pharmacology.

Total Credits

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Promote health and manage illness by providing safe, client-centered, culturally congruent care across the lifespan in a variety of health care settings.
2. Employ professional nursing leadership concepts to address patient care and system needs to promote quality health care outcomes and health equity for all.
3. Make effective use of technology for patient care, education, and management of health information.
4. Understand the roles and scope of practice of disciplines of the health care team and practice as an effective, collaborating member of the interprofessional team.
5. Use knowledge sources effectively to provide evidence-based care.
6. Identify health disparities and advocate for basic essential health services for all.
7. Allocate health care resources to maximize the health care benefit to clients, families, and community.
8. Assume fiscal and ethical responsibility for clinical practice.
9. Function as a member of the nursing profession within the community and the world.

\section*{FOUR-YEAR PLAN}

The Accelerated BSN program is for second-degree candidates and is a 49 -credit program completed over 12 months. There is not a four-year plan for this program. Please refer to the Requirements (p. 1841) tab for more about the curriculum and program plan.

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING}

The Office of Academic Affairs provides comprehensive academic advising services to students in the Accelerated BSN program.

\section*{CAREER ADVISING}

The school offers career advising services to provide resources and strategies for career planning and placement. This includes workshops and job/internship fairs, resume review, job search resources, and licensure information. Visit Career Advising and Student Success (https:// students.nursing.wisc.edu/career-advising/career/) for more information.

\section*{CERTIFICATION/LICENSURE}

Earning the bachelor of science in nursing degree is the first step toward becoming a Registered Nurse. Graduates must also take and and pass the National Council Licensure Exam (NCLEX-RN) to receive their nursing license and begin their careers as nurses in hospitals, community health and mental health agencies, industrial health centers, nursing homes, family planning centers, crisis care centers, and beyond. A nursing license gives an individual permission to practice nursing, granted by the state where he or she met the requirements.

The School of Nursing works with students as they complete graduation requirements and the two-step process to register for the NCLEX. Specifically the school verifies graduation and assists students as they register for the exam. Most students take the NCLEX within three months of graduation. More than 90 percent of School of Nursing graduates pass the NCLEX on first attempt.

\section*{CERTIFICATION/LICENSURE}

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands
The requirements of this program do not meet Certification/Licensure in the following states: California, New York

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Pennsylvania, Vermont, Washington, American Samoa, Puerto Rico

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{SIGNE SKOTT COOPER HALL}

In fall 2014, the School of Nursing moved to the new Signe Skott Cooper Hall. This \(\$ 53.3\) million nursing building features world-class technology and innovative educational spaces that will allow the nursing school to address health care's new standard of excellence-high-tech and hightouch methods and practices that result in better patient outcomes and greater satisfaction with care.

\section*{ADVISING AND STUDENT SERVICES \\ OFFICE OF ACADEMIC AFFAIRS}

The Office of Academic Affairs is the undergraduate dean's office for the School of Nursing. Staff members interpret school regulations, policies, and program requirements; make exceptions around requirements and deadlines; advise prospective and current students; monitor students having academic difficulties; coordinate compliance; facilitate the program's admissions process; and maintain the official files of students in the school.

\section*{ACADEMIC ADVISING}

Academic advising is an essential component of undergraduate education. The primary advising mission in the School of Nursing is to help students identify and clarify their academic pathways and educational goals, and to help them develop meaningful plans to ensure academic success.
Advising is an ongoing, caring, and collaborative relationship between advisor and student that provides meaning, guidance, and support throughout the educational process. Every pre-nursing (PRN) and nursing (NUR) student is assigned a professional advisor in the nursing school (https://students.nursing.wisc.edu/undergraduate-menu/undergraduateadvising/). Advising is offered in individual appointments, group advising, and graduation checks for seniors.

\section*{CAREER ADVISING}

In addition to professional academic advisors, the School of Nursing has career advising available to help students prepare for a successful career in nursing. Services include resume and job search assistance, online job postings, information sessions, and nursing career fairs.

\section*{ACADEMIC SUPPORT SERVICES}

Career \& Student Success (https://students.nursing.wisc.edu/support-assistance/nursing-learning-center/) Academic Support has a mission to develop the next generation of nurse leaders by providing holistic, culturally congruent student support across four dimensions: academic support, leadership and connection, career development, and wellness throughout the student experience. Students can gather with other likeminded, focused, and enthusiastic students to improve not only their understanding of the course material but of their own learning styles. Sessions are designed to assist pre-nursing and nursing students in weekly small-group study formats. Current courses supported include anatomy, physiology, pharmacology, and pathology, as well as courses in the nursing curriculum. Workshops and other sessions help students with test preparation, study skills, time management, etc.

\section*{STUDENT ORGANIZATIONS}

The School of Nursing encourages and supports students to pursue their interests and form social networks. In addition to numerous associations available to students on the broader campus (including the Aspiring Nurses Association [ANA] for pre-nursing students), there are a number of student-run groups established specifically for current nursing students. These include the Student Nurses' Association, the Multicultural Student Nurses' Organization, the Nurse's Christian Fellowship, the Global Health Interest Group, the Holistic Nursing Group, the Perinatal Interest Group, and the Student Geriatric Interest Group. The purpose of these groups is to give students the opportunity to enhance their experiences related to professional development, social circles, political action, community
service, and academic achievement, as well as foster connections between faculty, staff, and students.

\section*{FINANCIAL AID AND SCHOLARSHIPS}

The School of Nursing awards more than \$400,000 in scholarships each year to admitted undergraduate nursing students. Awards are based on both academic merit and financial need. Students are invited to apply to nursing specific scholarships, as well as campus-wide or non-nursing scholarships, through the Wisconsin Scholarship Hub or WiSH (http:// scholarships.wisc.edu/Scholarships/).

\section*{ACCREDITATION}

\section*{ACCREDITATION}

Commission on Collegiate Nursing Education (http:// www.aacnnursing.org/CCNE/)

Accreditation status: Accredited. Next accreditation review: 2029-2030.

\section*{NURSING, BSN (COLLABORATIVE PROGRAM)}

\section*{BSN@HOME}

The RN to BSN program, called the BSN@Home (http://bsnathome.com/) program, is for Registered Nurses who already have an associate's degree or diploma in nursing and wish to earn the bachelor of science in nursing degree.

The curriculum is designed for working adults. Almost all required coursework is completed online. Students can complete the program in as little as a year and a half.

The BSN@Home program is cooperatively administered by six campuses in the University of Wisconsin System: UW-Madison, UW-Eau Claire, UW-Green Bay, UW-Milwaukee, UW-Oshkosh and UW-Stevens Point. Students typically select their home institution based on proximity. All BSN@Home students are required to complete the same core nursing curriculum, but specific admission and degree requirements vary among campuses.

\section*{HOW TO GET IN}

\section*{ELIGIBILITY REQUIREMENTS}
- Associate's degree in nursing (ADN) or diploma in nursing from an accredited nursing program. Students with an ADN (or equivalent degree) through an international institution are eligible for admission consideration if they have completed the following required coursework. International Nurse Admission Requirements can be downloaded from this page.
- Overall GPA of 2.5 on 4.0 scale
- RN license
- Resident of Wisconsin, upper peninsula of Michigan, and/or contiguous counties in Illinois, lowa or Minnesota
- Meets university transfer admission requirements (https:// www.admissions.wisc.edu/apply/transfer/requirements.php) at UWMadison. Factors considered in admission decisions include:
- Cumulative grade point average (GPA): While the average GPA of admitted transfers is a 3.4, UW-Madison will consider prospective BSN@Home if they have a cumulative GPA of at least 2.5 with steady grade trends and patterns. GPA calculations will include all grades received for repeated courses; the initial grade, as well as grades received in second and subsequent attempts will be included in the GPA calculation.
- College-Level Course Preparation: Students must have completed at least 24 transferable (https:// www.admissions.wisc.edu/apply/transfer/transfer_credit.php) (college-level) non-nursing credits in addition to the nursing classes they completed in their ADN or nursing piploma program.
- High School Record: Regardless of the number of college credits earned, the high school transcript is required and must show proof of graduation.
- Required Courses: Students must have completed one year each of high school algebra, plane geometry, and collegepreparatory math, and two high school years or two college semesters of a single foreign language. Requirements may vary if students graduated high school 1991 or prior. Contact the Office of Admissions and Recruitment (https://www.admissions.wisc.edu/ contact.php) with specific questions about academic background.

\section*{TO APPLY}

\section*{ADMISSIONS TIMELINE}

Students can begin the program in either spring or fall.
- Fall term application due: February 1
- Spring term application due: October 1

\section*{REVIEW OF APPLICATIONS}

Applications are reviewed by the UW-Madison Office of Admissions and Recruitment. Students will be evaluated on both high school and college records. Admission to the program is selective.

\section*{TO APPLY}

Complete the UW System Application for Admission (https:// apply.wisconsin.edu/):
- Intended campus: UW-Madison
- Intended major: BSN@Home/Nursing Collaborative Program

For this program, there is no supplemental application submitted to the School of Nursing.

\section*{UW-MADISON REENTRY ADMISSION}

Students who have previously attended UW-Madison as degreeseeking students are eligible to apply to the BSN@Home program by submitting a Reentry Application (https://www.admissions.wisc.edu/apply/ reentry/). Second-degree candidate should select BSN@Home/Nursing Collaborative Program as the intended major. Students who have not previously earned an undergraduate degree through UW-Madison will be readmitted to their previous classification (e.g., Letters \& Science). If readmitted to the previous classification, students should email (bsnadmit@son.wisc.edu) the School of Nursing to request consideration for admission to the BSN@Home program.

Reentry applications will be evaluated by the UW-Madison Office of Admissions and Recruitment. While the Reentry Admissions (https:// www.admissions.wisc.edu/apply/reentry/) site lists university-wide application deadlines, students should submit the application by the following dates to ensure access to open nursing courses:
- Summer term: February 1
- Fall semester: March 1
- Spring semester: October 1

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
- Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

\section*{RN TO BSN(BSN@HOME) MAJOR REQUIREMENTS}

Students may transfer up to \(\mathbf{9 0}\) credits of coursework taken elsewhere (from a two-year or a four-year institution). A total of 120 credits is required for the Nursing, BSN (Collaborative).
\begin{tabular}{lrr} 
Code \(\quad\) Title & Credits \\
Science \({ }^{1}\) & \(12-13\) \\
Humanities and Social Science \(^{1}\) & 22 \\
Nursing Transfer Credits \(^{2}\) & \(\mathbf{2 4 - 3 0}\) \\
BSN@Home Coursework & \(\mathbf{2 4}\) \\
Electives & \(31-38\) \\
\hline Total Credits & \(\mathbf{1 2 0}\)
\end{tabular}

1
The entirety of this requirement group may be fulfilled by transfer credit.

2
Students who earned an ADN from a Wisconsin Technical College may transfer 30 credits. All others receive 24 credits.

\section*{SCIENCE}

All requirements may be transferred from a two-year or four-year institution (12-13 credits).
\begin{tabular}{llr}

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, lowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands

The requirements of this program do not meet Certification/Licensure in the following states: California, New York

The requirements of this program have not been determined if they meet Certification/Licensure in the following states:
Pennsylvania, Vermont, Washington, American Samoa, Puerto Rico

\section*{ACCREDITATION}

\section*{ACCREDITATION}

Commission on Collegiate Nursing Education (http:// www.aacnnursing.org/CCNE/)

\title{
SCHOOL OF NURSING HONORS
}

\section*{HOW TO GET IN}

All Traditional BSN students may apply to the Nursing Honors Program. The application process occurs during the first fall of enrollment in the nursing program. Admission to the Nursing Honors Program is based on academic performance and one essay.

\section*{REQUIREMENTS}

Each student in the Nursing Honors Program has an active role in identifying a faculty mentor. Once a student is assigned a faculty mentor, the mentor will help the student understand the research process and provide research-related resources. The mentor will also assist with identification and implementation of a senior honors thesis.

Honors students enroll in NURSING 679 Nursing Honors Research Seminar during the spring term of the first year of enrollment in the nursing program. They complete 1-2 credits of the NURSING 681 Senior Honors Thesis/NURSING 682 Senior Honors Thesis course during both the fall and spring of the second year. Honors students also take the required NURSING 442 Health Systems, Policy, and Economics during the spring of the second year.

\section*{SCHOOL OF PHARMACY}

If you are interested in becoming a pharmacist, a PharmD (Doctor of Pharmacy) degree is needed. PharmD degrees do not require a bachelor's degree first, but you do need to complete a set of college prerequisite courses and a specific number of college credits to apply to the PharmD degree program.
- For more information on the PharmD degree and program, visit the PharmD section of the Guide (http://guide.wisc.edu/pharmacy/ pharmacy-school-wide/pharmacy-dph/).
- If you are a current UW-Madison undergraduate student or a prospective UW-Madison undergraduate student, and interested in entering the PharmD program in the future, visit our UW-Madison student pre-pharmacy website (https://students.pharmacy.wisc.edu/ student-services/sop-advising/pre-pharmacy-uwmadison/) for more information on resources and pre-pharmacy advising available to you.
- For prerequisite and admissions information for all other students, visit the PharmD admissions website (https://pharmacy.wisc.edu/ academics/pharmd/admissions/).

If you are interested in a pharmacy or biomedical sciences-related career that does not require a pharmacist license, consider checking out our BS in Pharmacology and Toxicology program below.

\section*{BS IN PHARMACOLOGY AND TOXICOLOGY}

The BS in Pharmacology and Toxicology (PharmTox) focuses on the biomedical sciences. Pharmacology is concerned with the properties,
effects, and mechanisms of action of drugs, and with the interactions between chemical agents and biological systems. Toxicology, the science of poisons, combines the elements of biology and chemistry with those of many other disciplines to help us understand the harmful effects of chemicals on living organisms.

A major challenge for the pharmacologist is to determine how drugs act. This can be carried out at the subcellular and molecular level, the cellular level, the tissue level, the organ level, or the whole-animal level. Pharmacologists also are concerned with the development of new drugs that produce fewer side effects while curing disease, and provide more effective and/or more rapid treatment of disease in humans or animals.

Toxicologists find scientifically sound answers to questions about chemicals that may potentially threaten our health, about pesticides in the food we eat, pollutants in the air we breath, chemicals in the water we drink, and toxic waste sites near our homes. Some toxicologists are concerned with determining the cellular mechanisms by which drugs and chemicals produce toxic effects. Many are involved in subspecialty areas in toxicology research, such as reproductive and developmental toxicology, neurotoxicology, immunotoxicology, and inhalation toxicology. Researchers in these areas utilize both laboratory animals and in vitro systems to examine the cellular, biochemical, and molecular processes underlying toxic responses.

\section*{BS IN PHARMACEUTICAL SCIENCES}

The BS in Pharmaceutical Sciences is not a major, but is an internal degree granted to current Doctor of Pharmacy (PharmD) students after they complete at least one year of the PharmD program. In order to qualify for the BS in Pharmaceutical Sciences, students must have attended UWMadison as an undergraduate prior to entering the School of Pharmacy and must meet all degree requirements.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Pharmaceutical Sciences, B.S. (p. 1850)
- Pharmacology and Toxicology, B.S. (p. 1852)

\section*{ENTERING THE SCHOOL}

Admission to either the B.S. in Pharmacology and Toxicology or the Doctor of Pharmacy program is selective and competitive, and requires specific prerequisite coursework as well as a complete admissions application. Completion of required prerequisite coursework does not guarantee admission. Each applicant's admission credentials are considered not only on their own merit, but also in comparison with the credentials of other applicants.

For detailed information on prerequisites and the application for the B.S. in Pharmacology and Toxicology (PharmTox), see the major's "How to Get In" tab in the (http://guide.wisc.edu/undergraduate/pharmacy/pharmacy/ pharmacology-toxicology-bs/\#howtogetintext)Guide.

Information about the required elements of the application and prerequisites for the Pharm.D. (Doctor of Pharmacy) program can be found on the School of Pharmacy website (https://pharmacy.wisc.edu/ programs/pharmd/admissions/).

Most pre-pharmacy students are admitted to UW-Madison as College of Letters \& Science students with an intention to pursue a School of Pharmacy program (PharmTox undergraduate degree and/or the professional Pharm.D. program). While our School of Pharmacy does not directly admit students from high school, we do offer comprehensive academic, admissions, and career advising to students who have expressed an interest either of these programs. Please refer to the Resources (https://guide.wisc.edu/undergraduate/pharmacy/ \#resourcestext) section to start exploring available resources and opportunities available for pre-School of Pharmacy students at UWMadison.

\section*{POLICIES AND REGULATIONS}

\section*{BACHELOR OF SCIENCE - PHARMACOLOGY AND TOXICOLOGY POLICIES}

For a list of Pharmacology and Toxicology (PharmTox) undergraduate policies, including academic standing and probation policies, please visit the PharmTox Policy Handbook (https://students.pharmacy.wisc.edu/ pharm-tox-handbook/).

\section*{RESOURCES}

\section*{ACADEMIC ADVISING}

If you're a current UW-Madison undergraduate student, you have access to dedicated, structured pre-pharmacy advising at the School of Pharmacy. Please choose the School of Pharmacy as your advising group option when you make your SOAR reservation in April. We're here to help you with:
- Career paths related to pharmacy, pharmacology, and toxicology
- Understanding prerequisites and developing a plan for completion
- Accessing courses and guidance on how to sequence classes
- PharmD and PharmTox curriculum and degree options
- Admissions selection criteria
- Application process and components

Who is a pre-pharmacy student? A pre-pharmacy student is anyone who is taking the courses necessary to be considered for admission to the Doctor of Pharmacy (PharmD) professional program and/or the BS in Pharmacology and Toxicology (PharmTox) at the UW-Madison School of Pharmacy. Completion of prerequisite coursework does not guarantee admission as admission is selective and competitive.

How do I get started with pre-pharmacy advising? Schedule your pre-pharmacy advising appointment using the Starfish app (https:// wisc.starfishsolutions.com/starfish-ops/) in MyUW. Search for "Kendra Gurnee" to meet with the pre-PharmTox advisor or "Amy Zwaska" to meet with the pre-PharmD advisor. Any UW-Madison student with any major or no major can access our dedicated pre-pharmacy advising services at the School of Pharmacy. Individual appointments are typically scheduled for 30 minutes.

If you experience any trouble with the scheduling process:
- You can get help with Starfish here (https://advising.wisc.edu/ facstaff/starfish/starfish-student-resources/).
- You can also contact the School of Pharmacy Student and Academic Affairs Office at 608-262-6234 to set up your advising appointment.

Due to the selective nature of the PharmD and PharmTox admissions processes, interested students are encouraged to meet with School of Pharmacy advisors early and often to explore our programs and get valuable guidance about prerequisites, selection criteria, application timeline/procedures, and career opportunities. We recommend that you meet with your pre-pharmacy advisor at least once per semester.

For more information on preparing for and applying to our programs, visit our admissions resources for PharmD (https://pharmacy.wisc.edu/ academics/pharmd/admissions/) and PharmTox (https:// pharmacy.wisc.edu/academics/pharm-tox/admissions/).

\section*{FINANCIAL AID}

Students who seek financial assistance should contact the UW-Madison Office of Student Financial Aid (https://financialaid.wisc.edu/) for financial aid applications and information about scholarships, loans, grants, workstudy programs, and student employment.

\section*{SCHOOL OF PHARMACY SCHOLARSHIPS}

The School of Pharmacy awards a variety of scholarships each year to admitted PharmTox and PharmD students. Awards are based on both academic merit and financial need. Students are invited to apply to School of Pharmacy-specific scholarships, as well as campus-wide or nonPharmacy scholarships, through the Wisconsin Scholarship Hub (https:// wisc.academicworks.com/).

\section*{STUDENT ORGANIZATIONS}

Students will find many organizations of interest, both in the School and across the UW-Madison campus. The School of Pharmacy student organizations website (https://students.pharmacy.wisc.edu/student-life/student-organizations/) has a comprehensive listing of student organizations and groups that are affiliated with the School.

\section*{FACILITIES}

The School of Pharmacy is located in Rennebohm Hall on the west side of campus, near University Hospital and Clinics and Health Sciences Learning Center. The School of Pharmacy provides students and faculty with the finest possible physical environment for professional pharmacy and for research in pharmaceutical fields of study.

\section*{SCHOOL OF PHARMACY}

DEGREES/MAJORS/CERTIFICATES
- Pharmaceutical Sciences, B.S. (p. 1850)
- Pharmacology and Toxicology, B.S. (p. 1852)

\section*{PHARMACEUTICAL SCIENCES, B.S.}

The BS in Pharmaceutical Sciences is not a major, but is a milestone degree granted to current Doctor of Pharmacy (PharmD) students while
working toward the PharmD degree. In order to qualify for the BS in Pharmaceutical Sciences, students must have attended UW-Madison prior to entering the School of Pharmacy, and must meet all degree requirements. More detailed information about this degree may be found on the school website (https://pharmacy.wisc.edu/programs/pharmd/ curriculum/bs-ps/).

Information about our Doctor of Pharmacy program (PharmD) can be found at https://pharmacy.wisc.edu/programs/pharmd/. The PharmD is required to be eligible to take the North American Pharmacist Licensure Examination (NAPLEX) and be registered and licensed as a pharmacist.

Students interested in pursuing an undergraduate degree offered by the School of Pharmacy may want to investigate the BS Pharmacology and Toxicology ( p .1852 ) program. This interdisciplinary major in the biomedical sciences can serve as a foundation for further education in graduate or professional degree programs, or for entry-level scientific employment.

\section*{HOW TO GET IN}

The B.S. in Pharmaceutical Sciences is a non-admitting milestone degree. Students earn this credential once degree requirements have been met while working toward their Doctor of Pharmacy (Pharm.D.) degree. For more information on how to apply, see the Doctor of Pharmacy Program's Admissions (https://pharmacy.wisc.edu/academics/pharmd/admissions/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General • Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

\section*{MAJOR REQUIREMENTS}

The bachelor's degree will be awarded once all Pharmaceutical Sciences major requirements are met, as well as the University General Education Requirements and other coursework totaling at least 120 credits.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline PHM SCI 420 & \begin{tabular}{l}
Physicochemical Principles of Drug \\
Formulation and Delivery
\end{tabular} & 3 \\
\hline PHM SCI 432 & Pharmaceutical Biochemistry & 4 \\
\hline PHARMACY 423 & Pharmacy Integrated Learning Laboratory & 1 \\
\hline PHM PRAC 438 & Nonprescription Medications and Self-Care & 2 \\
\hline PHM PRAC 461 & Pathways in Pharmacy Practice & 1 \\
\hline PHM PRAC 650 & Comprehensive Immunization Delivery & 1 \\
\hline S\&A PHM 411 & Pharmacy in the Health Care System & 3 \\
\hline PHM SCI 531 & Medicinal Chemistry I & 3 \\
\hline PHM SCI 541 & Pharmaceutical Calculations, Dispensing and Compounding & 3 \\
\hline PHARMACY 434 & Pharmaceutical Genetics and Immunology & 2 \\
\hline PHARMACY 621 & Pharmacokinetics & 3 \\
\hline PHM PRAC 426 & Pharmacy Practice Experience I & 1 \\
\hline PHM PRAC 462 & Professional Development and Engagement I- Developing Your Professional Identity & 1 \\
\hline S\&A PHM 414 & Social and Behavioral Aspects of Pharmacy Practice & 3 \\
\hline Total Credits & & 31 \\
\hline
\end{tabular}

\section*{ADDITIONAL NOTES}

Foreign language coursework can count towards the "Humanities/ Literature/Arts" gen ed requirement.

AP, IB, retro-credits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the elective credit requirement.

Students must also complete coursework appropriate for admissions to the PharmD program

\section*{QUALITY OF WORK}

Students must have a minimum 2.000 cumulative grade point average.

School of Pharmacy academic policies (regarding matters such as academic and professional conduct, academic progress/probation, honor roll, pass/fail registration, and independent study coursework) are found in the PharmD student policy handbook.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work

\section*{PHARMACOLOGY AND TOXICOLOGY, B.S.}

Pharmacology and Toxicology (PharmTox) is an undergraduate major offered through the School of Pharmacy; successful completion of program requirements results in earning the Bachelor of SciencePharmacology and Toxicology degree. Pharmacology and toxicology are related biomedical science disciplines. Pharmacology is the study of the sites, properties, effects, and mechanisms of drug action-the interactions of chemicals with biological systems. Toxicology addresses adverse effects of chemicals on humans and animals and includes exposure assessment, hazard identification, dose response assessment, and risk characterization. Both subjects integrate multiple scientific disciplines and rely on cutting-edge biotechnological approaches to gain insight into drug and toxicant action at the molecular level. Though the degree is titled "Pharmacology and Toxicology," the program's curriculum is multidisciplinary across various biomedical sciences.

The PharmTox degree/major has a selective and competitive admissions process, requiring completion of 60 college credits and specific prerequisite coursework. These typically take two academic years (freshman and sophomore years) to complete. Prerequisite coursework can be done at UW-Madison or at most accredited colleges and universities (see this website (https://pharmacy.wisc.edu/programs/ pharm-tox/admissions/transfers/) for course equivalencies from other universities). Questions about course equivalencies from other colleges or universities can also be addressed with the PharmTox advisor.

At UW-Madison, pre-PharmTox students are usually in either the College of Letters \& Science or the College of Agricultural and Life Sciences during their freshman and sophomore years while taking prerequisite coursework and preparing to apply to the major. Students can request to be assigned to the PharmTox advisor during this time, in addition to having a primary academic advisor in their current school. It is important to stay in contact with the PharmTox advisor to remain up-to-date with admission requirements and program changes. Applications are typically due in February, with students being admitted to the major and beginning core coursework in fall of the following year (typically junior year). The core major curriculum typically requires two years to complete (junior and senior years).

For those interested in becoming a licensed pharmacist, information about our Doctor of Pharmacy program (PharmD) can be found at https:// pharmacy.wisc.edu/programs/pharmd/. The PharmD is required to be eligible to take the North American Pharmacist Licensure Examination (NAPLEX) and be registered and licensed as a pharmacist.

\section*{HOW TO GET IN}

See the School of Pharmacy Academic and Admission Policies (p. 1849).

\section*{APPLICATION}

Application to the BS in Pharmacology and Toxicology is required as the program's size is limited. Students (both at UW-Madison and at other institutions) typically apply to the program by the beginning of February in their sophomore year for subsequent fall semester admission; students are not admitted at any other time of the year. (Note that potential transfer students must also apply to UW-Madison itself (https:// www.admissions.wisc.edu/apply/transfer/deadlines.php)). Students
are notified by the end of March regarding their admission status. Applications and current due dates can be found on our website (https:// pharmacy.wisc.edu/programs/pharm-tox/admissions/).

\section*{PREREQUISITES}

To be eligible to apply, students must complete the following courses by the end of the summer semester prior to entering the program. Potential transfer students from a wide variety of regional institutions can find course equivalents (from their current university/college) on this School of Pharmacy webpage (https://pharmacy.wisc.edu/programs/pharm-tox/ admissions/transfers/equivalencies/).

- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{OVERVIEW OF REQUIREMENTS}

The Pharmacology and Toxicology BS degree requires the following groups of coursework:
- University General Education requirements (above - those that are also prerequisite requirements will be completed before entering the program; remaining gen ed requirements can be completed at any time prior to graduation)
- Prerequisite requirements (completed prior to admittance/entrance to the program)
- Pharmacology and Toxicology major requirements (mostly completed after entering the program, though some courses can be completed earlier)

The PharmTox degree does not require any additional breadth courses beyond the University General Education requirements. Foreign language coursework can count towards the "Humanities/Literature/Arts" gen ed requirement.

School of Pharmacy academic policies (regarding matters such as academic and professional conduct, academic progress/probation, honor roll, pass/fail registration, and independent study coursework) are found in the PharmTox student policy handbook (https://pharmacy.wisc.edu/ student-resources/).

\section*{COMMUNICATION}

The UW-Madison Communication Part A requirement must be fulfilled.

\section*{SOCIALSCIENCE}

Any course that qualifies as social science (S or Z ) credit, 3 credits required.

\section*{OTHER COLLEGE COURSES}

Sixty (60) credits must be completed by the end of the summer semester prior to entering the program. AP, IB, retrocredits, and credit-granting transfer coursework from other institutions (including coursework completed while in high school) all count toward the 60 credits.

\section*{PHARMACOLOGY AND TOXICOLOGY MAJOR REQUIREMENTS}

Students must take most of their major-level coursework in very specific semesters in order to graduate within four semesters of starting the program, due to prerequisites and fall or spring-only courses - see four year plans (p. 1857) for course sequences. It may be possible to take some major-level courses earlier if prerequisites are met; consult the advisor. The five credits of elective coursework, statistics, genetics, and physics requirements can be completed at any time, including prior to admission to the program. The directed/independent study requirement must be performed after matriculation into the program (i.e. the first fall semester officially declared in the major or any semester thereafter).

\section*{DIRECTED/INDEPENDENT STUDY (699), 2 CREDITS}

Must be completed after matriculation into the major (i.e. the first fall semester officially declared in the major or any semester thereafter) and have prior approval to meet PharmTox major requirements. Students should not wait until the final semester to try to fulfill this requirement, as it can be difficult to find a research opportunity close to graduation. The research-based directed/independent study (typically a course numbered 699) must be in a biological, chemical, or biomedical sciences department, and can include laboratory-based research, library or literature-based research, or clinical research. Experiences such as peer mentoring or teaching assistance, even if a 699 course is used for credit, cannot fulfill this requirement.

\section*{PHYSICSI AND II}
Code Title

Select one of the following options (consult with advisor on recommended sequences):

\section*{1}

Students need to take PHM SCI 679 in both their first and second years in the major in spring semesters (typically junior and senior years); the course is repeatable for degree credit.

\section*{ELECTIVES IN THE MAJOR}

Students must complete at least 5 elective credits in the pharmacology and toxicology major from the below list. Electives in the pharmacology and toxicology major are available within the School of Pharmacy and in many departments. It is suggested that students select electives in consultation with their advisor. Another option for fulfilling a portion or all of these 5 credits are additional directed/independent study (699) credits beyond the minimum 2 credits required for the major. Additional 699 credits must be approved by the PharmTox program to count towards the elective requirement if they are not done under the same principle investigator that was approved for the original two credits required.

Pharmaceutical Sciences/Pharmacy
\(\left.\begin{array}{llr}\text { Code } & \text { Title } & \text { Credits } \\ \text { PHM SCI 420 } & \text { Physicochemical Principles of Drug } & 3 \\ & \text { Formulation and Delivery } & \\ \text { PHM SCI/B M E } & \text { 430 } & \text { Biological Interactions with Materials }\end{array}\right] 3\)

\section*{Anatomy \& Physiology}
Code Title Credits

Human Anatomy
ANAT\&PHY \(338 \quad\) Human Anatomy Laboratory 2

\section*{QUALITY OF WORK REQUIREMENTS AND PASS/FAIL}

Students must have a 2.000 cumulative grade point average at the time of graduation in order to earn a Pharmacology and Toxicology BS degree.

No course that is used for Pharmacology and Toxicology degree requirements may be taken as pass/fail and must be taken for a letter grade (AP, IB, or other test credits or placement exemptions are excluded from this requirement). This includes all prerequisite coursework, major requirements, and University General Education requirements.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Total Degree & To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. \\
\hline Residency & Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs. \\
\hline Quality of Work & Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation. \\
\hline
\end{tabular}

\section*{EARNING OUTCOMES}
1. Demonstrate a knowledge and understanding of the supportive biomedical fields
2. Demonstrate a knowledge and understanding of Pharmacology.
3. Demonstrate a knowledge and understanding of Toxicology.
4. Understand scientific principles of laboratory design and presentation of scientific data.

\section*{FOUR-YEAR PLAN}

A minimum of 120 credits is required to earn the BS in Pharmacology and Toxicology. Below are sample four-year plans for the Pharmacology and Toxicology major, incorporating both prerequisites and major coursework. They focus on science coursework sequencing and do not take into account factors such as AP or advance standing credits, additional summer courses, study abroad, or preparing for standardized tests like the MCAT or PCAT.

It is critical that you talk with your advisor about your tentative plan for course sequences and prerequisites, which courses are offered fall vs. spring vs. summer, etc.

\section*{EXAMPLE PLAN: CHEM 103/104}

1
PHM SCI/PHMCOL-M 521 Pharmacology I and PHM SCI 623
Pharmacology III are taken concurrently/in the same semester; PharmTox students can take PHM SCI 623 Pharmacology III before taking PHM SCI/ PHMCOL-M 522 Pharmacology II.

\section*{THREE-YEAR PLAN}

Below is a sample 3 year plan for the Pharmacology and Toxicology major, incorporating prerequisites, major coursework, and universitywide breadth and general education requirements. Students interested in graduating in three years should meet with the PharmTox academic advisor early and often to discuss feasibility, appropriate course
sequencing, post-graduation plans (careers, graduate school, etc.), and other considerations.

While there are many advantages to attending four years of college, including making the most of research and study abroad opportunities, exploring alternative majors, completing additional majors and certificates, developing skills and interests through student groups, and personal growth, students may have various reasons for wanting to graduate in three years, and the PharmTox advisor will work with students to help them prioritize their goals.

This example plan assumes that students will:
- Enter their first year at UW-Madison with at least 25 advanced standing credits (to be able to meet the PharmTox application prerequisite of 60 credits by the start of their second year), including equivalency credit for Introductory Biology (ZOOLOGY/BIOLOGY/ BOTANY 151). Entering with fewer credits would require more credits in the fall, spring, and/or summer terms in the first year than in the example plan.
- Place into or are eligible to enroll in MATH 221 for first semester.
- Apply to the PharmTox major during their first year for admission for fall of their second year and have all prerequisite coursework complete by the end of the summer term after the first year.
- Enroll in enough credits each term to earn 120 total credits. Some terms may require more or less credits than the example plan, depending on the number of advanced standing credits a student brings in.

Summer coursework will be required after the first year for students without chemistry advanced standing credits, in order to complete general and organic chemistry before the start of the second year. Other summer coursework is not necessarily required, but may be helpful to alleviate credit loads and course combinations in fall or spring terms.

\section*{First Year}
\begin{tabular}{|c|c|c|c|}
\hline Fall & Creditspring & Creditsummer & Credits \\
\hline MATH 221 & 5 CHEM 343 & 3 CHEM 345 & 3 \\

\end{tabular}

\section*{Total Credits 94-102}

\section*{1}

PHM SCI/PHMCOL-M 521 Pharmacology I and PHM SCI 623
Pharmacology III are taken concurrently/in the same semester; PharmTox students can take PHM SCI 623 Pharmacology III before taking PHMCOLM/PHM SCI 522 Pharmacology II.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Pre-PharmTox students are often in the College of Letters \& Science or the College of Agricultural and Life Sciences during their freshman and sophomore years while they are taking prerequisite coursework and preparing to apply to the major. Students can request to be assigned to the PharmTox advisor during this time, in addition to having a primary academic advisor in their current school/college, and are welcome to meet with the PharmTox advisor at any time.

The PharmTox advisor advises both current undergraduates and prospective high school/transfer students interested in learning more about the major. Appointments may be scheduled by calling (608) 262-6234 (for prospective high school/transfer students) or scheduled online via Starfish (https://wisc.starfishsolutions.com/starfish-ops/) (for current students). Advising is also available at SOAR for incoming students and includes curriculum planning and introductions to enrollment tools. The advisor can connect prospective undergraduate students with upperclassmen and alumni with similar interests. Once admitted to the major, students will have the PharmTox advisor assigned as their primary academic advisor.

\section*{CAREERS}

Students completing the program will be well qualified to pursue entry-level scientific career employment (https://pharmacy.wisc.edu/ programs/pharm-tox/careers-in-pharm-tox/) in industry (e.g., biomedical; biotechnology; consumer products; contract research organizations; regulatory affairs; pharmaceutical), in academic basic science and clinical research laboratories, or in various agencies of government focused on science, health, or the environment. The program's depth and breadth has proved to be an excellent foundation for graduate work in pharmacology, toxicology, or other related biomedical sciences, as well
as for medical school, veterinary medicine, and other health professions schools (e.g., pharmacy, dental, optometry, public health). For students who tailor their general education and elective coursework appropriately, the Pharmacology and Toxicology program can also uniquely launch students into scientific writing, business or regulatory positions, environmental positions, or law school. As future professionals aware of the pharmacological and toxicological sciences, pharmacology and toxicology graduates are well poised to make meaningful improvements in human and animal health.

Statistical information about immediate post-degree work or advanced degree attainment for alumni in the last decade may be found on the School website (https://pharmacy.wisc.edu/programs/pharm-tox/ student-outcomes/). Due in part to its small size, the program has strong connections with its 400+ alumni who are located across the country and the globe. The PharmTox advisor can help students connect with alumni to explore careers and learn about employers.

Available career resources:
- The PharmTox advisor can assist with resume building, interview preparation, and career exploration, and also gives all PharmTox students access to a virtual career center via Canvas.
- Many L\&S and CALS career workshops and fairs are open to all students, including PharmTox students. The Career Exploration Center (https://cec.ccas.wisc.edu/) (CEC) is also available to students who are in the early stages of career exploration, especially those who have lots of ideas or no ideas yet.
- Current students can join the Pharmacology and Toxicology Linkedln group (https://www.linkedin.com/groups/12266662/) to network with fellow students and alumni.
- Handshake (https://app.joinhandshake.com/auth/?auth=648) features employer job postings specifically available to UW-Madison students, and is a great place to browse for internships and full-time jobs. Students can also post resumes and allow employers to contact them regarding potential employment.
- The Center for Prehealth Advising (http://www.prehealth.wisc.edu) assists students with preparing for and applying to professional healthcare programs, including medicine, physical therapy, physician assistant, dentistry, and more.

\section*{PEOPLE}

\section*{FACULTY DIRECTOR}

Johnson, Jeffrey (Professor, Pharmaceutical Sciences)

\section*{ACADEMIC STAFF AFFILIATED WITH PROGRAM}

Gurnee, Kendra (Program Manager and Advisor)
Kopacek, Karen (Associate Dean for Student Affairs)
de Villiers, Melgardt (Vice Dean and Associate Dean for Academic Affairs)

Gitter, Christopher (Alumnus)
Gurnee, Kendra (Advisor and Program Coordinator)
Hong, Seungpyo (Professor, Pharmaceutical Sciences)
Johnson, Jeffrey (Professor, Pharmaceutical Sciences)
Vezina, Chad (Associate Professor, Comparative Biosciences)
de Villiers, Melgardt (Vice Dean and Associate Dean for Academic Affairs)

\section*{WISCONSIN EXPERIENCE}

The following opportunities can help students connect with other students interested in pharmacology, toxicology, and other biomedical sciences, build relationships with faculty and staff, and contribute to out-ofclassroom learning:
- The program's small size and cohort-based model makes it easy to arrange study groups, tutoring, and social events, and funds can be requested to support these activities.
- Students have access to a student commons, group study rooms, lockers, and a variety of gathering spaces in Rennebohm Hall. Ebling Library, located adjacent to Rennebohm Hall in the Health Sciences Learning Center, serves the School of Pharmacy student body, in addition to that of students from medicine, veterinary medicine, and nursing.
- The School of Pharmacy hosts a variety of student organizations (https://pharmacy.wisc.edu/student-organizations/), several of which are available to PharmTox students. Junior and senior class presidents are elected each year and represent each cohort by providing feedback, as well as serve on various School of Pharmacy committees to represent the PharmTox program.
- Students are required to participate in a scientific research experience for at least one semester after being admitted to the major, though continued research involvement before and after admission to the major is highly encouraged. The Biocommons website (http:// biology.wisc.edu/finding-mentor/) has step-by-step information on how to find a research opportunity, and students can also speak with the advisor for additional guidance.
- Study abroad is definitely possible, although a winter session, spring break, or summer session experience fits most easily with the PharmTox curriculum. Visit the Study Abroad Major Advising Page for PharmTox (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/pharmacology-and-toxicology/) to learn more.
- One to two travel awards are given annually to allow seniors to attend a national conference in the field of pharmacology and toxicology, and funding is often available to facilitate travel for interested students to regional conferences near Madison.
- The annual PharmD/PharmTox Research Symposium provides students with an opportunity to present their research projects each spring.
