\section*{INTERNATIONAL STUDIES: GLOBAL SECURITY}

\section*{REQUIREMENTS}

\section*{GLOBAL SECURITY OPTION}

In this option, majors explore conditions that challenge the ability of people and societies to survive. Students consider the causes of and solutions to political crises and violent conflicts in interstate, transnational, and domestic settings. Using historical and regional approaches, students develop a better understanding of the dilemmas the state and the global community face when confronted by threats to human rights, peace, and stability.

In addition to the Common Requirements of the International Studies major, complete these requirements specific to the Global Security Option:

\section*{INTERNATIONAL STUDIES: POLITICS AND POLICY IN THE GLOBAL ECONOMY}

\section*{REQUIREMENTS}

\section*{POLITICS AND POLICY IN THE GLOBAL ECONOMY OPTION REQUIREMENTS}

This option offers a multidisciplinary survey of international economic and political institutions and transactions, as well as the policy issues pertaining to international commerce and trade, international finance and monetary relations, international macroeconomic policy coordination, U.S. trade imbalances, aid and development, and related environmental and natural resource problems.

In addition to the Common Requirements of the International Studies major, complete these requirements specific to the Politics and Policy in the Global Economy Option:

POLITICS AND POLICY IN THE GLOBAL ECONOMY CORE

\section*{INTERNATIONAL STUDIES, B.S.}

International studies (IS) is an interdisciplinary major with a broad background in international and transnational political, social, economic, commercial, and environmental affairs, together with a comparative study of politics, economics, security, and culture. The goal is to provide students with the necessary tools to understand global processes in their totality and how they are situated and lived in specific regions. The major provides an integrated program of courses that lays the foundation for professional training in a wide variety of areas. Such a foundation can be invaluable in securing a place in competitive graduate or professional schools, which, in turn, prepare students for government service, or for other careers with an international focus, including those in multinational corporations, international finance, non-governmental organizations, and institutions of teaching and research.

The IS major complements numerous majors across campus. Many students choose to double major or enhance their studies with one or more certificates, such as the global health certificate or those offered by the area studies centers.

This major is interdisciplinary, offering a wealth of options. Careful planning and consultation with the IS advisor is especially important.

\section*{IS MAJORS SPECIALIZE IN ONE OF THREE OPTIONS:}

\section*{Option I: Global Security}

In this option, majors explore conditions that challenge the ability of people and societies to survive. Students consider the causes of and solutions to political crises and violent conflicts in interstate, transnational, and domestic settings. Using historical and regional approaches, students develop a better understanding of the dilemmas the state and the global community face when confronted by threats to human rights, peace, and stability.

\section*{Option II: Politics and Policy in the Global Economy}

This option offers a multidisciplinary survey of international economic and political institutions and transactions, as well as the policy issues pertaining to international commerce and trade, international finance and monetary relations, international macroeconomic policy coordination, US trade imbalances, aid and development, and related environmental and natural resource problems.

\section*{Option III: Culture in the Age of Globalization}

In this option, majors investigate cross-cultural interactions at different levels: local, national, and transnational. Students engage in such issues as cosmopolitanism; international and global flows of images, ideas, and people; questions of identity; changing assumptions of what it means to be indigenous and foreign; globalization and technology; and the impact of globalization on cultures.

\section*{STUDY ABROAD}

International studies and studying abroad are a natural combination. While study abroad is not a requirement for the major, all IS students are strongly encouraged to pursue a significant international experience during the course of the undergraduate career. Whether through a study abroad program, an internship, or service learning, the experience of studying or working in a foreign culture is invaluable. Many courses taken abroad will count toward the IS major. See the IS advisor for specific guidelines. More information about study abroad and internships is available through International Academic Programs (http://www.studyabroad.wisc.edu/).

\section*{HOW TO GET IN}

Students are advised to declare the major by the end of the sophomore year and/or before studying abroad.

To be eligible to declare the international studies major a student must have completed these courses:
\begin{tabular}{llr} 
Code & Title & Credits \\
INTL ST 101 & Introduction to International Studies & \(3-4\) \\
Introductory Economics (complete one): & \(4-8\) \\
\hline ECON 101 & Principles of Microeconomics & \\
\& ECON 102 & and Principles of Macroeconomics &
\end{tabular}

\end{tabular}

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign
Complete the third unit of a foreign language.

\section*{L\&S Breadth Complete:}
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.

Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS OF THE MAJOR}

Students must declare the major, complete the common requirements, and the requirements for one of these options (p.950) within the international studies major:
- Culture in the Age of Globalization
- Global Security
- Politics and Policy in the Global Economy

A student may not declare or earn more than one major option. The major requires 35 credits total. \({ }^{1}\)

\section*{OPTIONS IN THE MAJOR}

View as listView as grid

\section*{INTERNATIONAL STUDIES: CULTURE IN AN AGE OF GLOBALIZATION (P. 914) \\ - INTERNATIONAL STUDIES: GLOBAL SECURITY (P. 925) \\ INTERNATIONAL STUDIES: POLITICS AND POLICY IN THE GLOBAL ECONOMY (P. 936)}

Each option in the major requires \(\mathbf{3 5}\) credits. This is in addition to completing the introductory requirements. Students select one Area Studies course (above), and the option-specific requirements for Core, Issues, and Elective classes. \({ }^{1}\)

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all INTL ST courses and courses approved for the major
- 2.000 GPA on 15 Upper-Level major credits, taken in residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the International Studies Major in consultation with the International Studies advisor(s). They must declare prior to enrollment in their Senior Honors Thesis (typically second semester of junior year).

\section*{REQUIREMENTS FOR HONORS IN THE MAJOR}

To earn Honors in the Major in International Studies, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA in major courses
- Complete 16 upper-level major credits, taken for Honors, with individual grades of \(B\) or better in each course \({ }^{2,3}\)
- Complete a two-semester Senior Honors Thesis, for a total of 6 credits, or two Senior Seminars, with grades of B or better; choose from:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Senior Honors Thesis (2 courses):} \\
\hline AFRICAN 681 \& AFRICAN 682 & Senior Honors Thesis and Senior Honors Thesis & \\
\hline \begin{tabular}{l}

\hline \multicolumn{3}{|l|}{Senior Seminar (2 courses):} \\
\hline INTL ST 601 & Topics in Global Security & \\
\hline INTL ST 602 & Topics in Politics and Policy in the Global Economy & \\
\hline INTL ST 603 & Topics in Culture in the Age of Globalization & \\
\hline
\end{tabular}

\section*{FOOTNOTES}

A maximum four courses from a single SUBJECT may be applied to the 35 credits in the major. This excludes INTL ST courses and courses crosslisted in INTL ST. For example: A student with five POLI SCl courses that could apply to the major will see only four of those courses applying in the International Studies major. (However, if one of those POLI SCI courses is also cross-listed in INTL ST, that course will not count against the limit, and thus, all five POLI SCI courses will apply in the major.) The degree audit (DARS) enforces this limitation.

Though some courses are identified as acceptable for two or more requirements, a course may meet only one requirement within the major. For example, a course that could count in either Option Core or Option Issues will meet only one of those requirements, based on which requirement needs that course to become satisfied. The degree audit (DARS) determines the best scenario.

Major courses designated Intermediate and Advanced level are considered upper-level.

\section*{3}

A maximum of two courses and 8 credits from UW-Madison Study Abroad may apply to this requirement.

thresholds will be placed on academic probation.
\end{tabular}

\section*{EARNING OUTCOMES}
1. (Interdisciplinarity) analyzing contemporary political, economic, security and cultural realities globally from multi-disciplinary perspectives, ideally including humanities, social sciences, humanitarian, and sometimes natural science approaches.
2. (Depth of knowledge) mastering at the undergraduate generalist level major issues related to key themes in International Studies (e.g. culture, global security and political economy) by taking 15 credits in one particular theme area.
3. (Regional (studies) grounding) understanding the social, political, economic and cultural forces and conditions that have given rise to the unity and diversity of a specific region of the world today.
4. (Language knowledge) mastering at the undergraduate generalist level a particular facet of life in one or more region of the world by studying a foreign language to at least the advanced (5th semester) level.
5. (Analytical skills) demonstrating the ability to think critically and analytically, the capacity to write clearly and effectively, and the ability to identify and evaluate research methods and outcomes.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

\section*{INTERNATIONAL STUDIES MAJOR ADVISING STAFF}

International studies majors have a wide variety of academic advising and career resources and support. Academic advising is essential to a successful undergraduate experience. For this reason, the international studies major has a professional advisor, a peer advisor, and a career advisor. We recommend that you meet with your advisor at least once per semester to track progress toward your degree, explore study abroad options, and begin the career exploration process. The IS major offers walk-in advising, advising workshops, and scheduled appointments. Students exploring the IS major should plan to attend an Intro to the IS Major workshop, watch the Intro to the IS Major video, or meet with a peer advisor. To learn more about academic advising information, please visit the IS Major website (https://ismajor.wisc.edu/academic-advising/).

Students should also begin the career advising process early. The international studies major offers a 1 -credit career class designed for sophomores or juniors. Students are strongly encouraged to meet with both the IS career advisor and SuccessWorks at the College of Letters \& Science, and to apply for internship opportunities-both domestically and via International Internship Programs or the Washington DC Internship Program. The IS major also advertises career events across campus that will benefit undergraduate students, hosts career workshops, and has a transition checklist to help students prepare for post-undergraduate life. For more information, please visit our website (https://ismajor.wisc.edu/ career-advising/).

\section*{Molly Donnellan, Academic Advisor}

Csanád Siklós, Ph.D., Academic Advisor
Lindsey Bliefernicht, M.S., Academic Advisor
Joel Clark, Ph.D., Career Advisor

\section*{LETTERS \& SCIENCE CAREER RESOURCES}

The program encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks (https://careers.Is.wisc.edu) at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate
programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

The International Studies Major is directed by Dr. Erica Simmons, Associate Professor of Political Science.

The advisors for the international studies major are Molly Donnellan, Lindsey Bliefernicht, and Dr. Csanád Siklós.

The career advisor is Dr. Joel Clark.
Please visit our website for a list of faculty and instructional staff (https:// ismajor.wisc.edu/people/).

\section*{WISCONSIN EXPERIENCE}

\section*{STUDY ABROAD}

International studies majors are strongly encourage to study abroad. The International Studies Major website (http://www.ismajor.wisc.edu/about/ current-students/study-abroad/) provides information about how to plan your experience abroad.

\section*{INTERNSHIP ABROAD}

International studies majors are strongly encourage to study abroad. Please review information on the International Studies Major website (http://www.ismajor.wisc.edu/about/current-students/ internships/) and the International Internship Program website (http:// internships.international.wisc.edu/) about opporunities.

\section*{UNDERGRADUATE RESEARCH}

The international studies major encourages students to become engaged in undergraduate research. There are numerous programs (https:// teachlearn.provost.wisc.edu/initiatives-and-programs/undergraduateresearch/) that provide research opportunities for undergraduates at UWMadison including:
- Hilldale Undergraduate/Faculty Research Fellowships (https://awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/)
- McNair Scholars (http://grad.wisc.edu/mcnair/)
- Summer Research Programs (https://grad.wisc.edu/diversity/srop/)
- Undergraduate Research Scholars (https://urs.Is.wisc.edu/)
- The Wisconsin Idea Undergraduate Fellowship Program (https:// morgridge.wisc.edu/students/wisconsin-idea-fellowships/)

\section*{RESOURCES AND SCHOLARSHIPS}

For information on scholarships and awards through the IS Major please see our website (https://ismajor.wisc.edu/scholarships-and-grants/) or contact our advisors. IS Majors are also strongly encouraged to contact the Awards Office (https://iris.wisc.edu/funding/) at the Institute for Regional and International Studies to explore multiple international awards and scholarships.

> INTERNATIONAL STUDIES: CULTURE IN AN AGE OF GLOBALIZATION

\section*{REQUIREMENTS}

\section*{CULTURE IN THE AGE OF GLOBALIZATION OPTION REQUIREMENTS}

In this option, majors investigate cross-cultural interactions at different levels: local, national, and transnational. Students engage in such issues as cosmopolitanism; international and global flows of images, ideas, and people; questions of identity; changing assumptions of what it means to be indigenous and foreign; globalization and technology; and the impact of globalization on cultures.

In addition to the Common Requirements of the International Studies major, complete these requirements specific to the Culture in the Age of Globalization Option:

\section*{INTERNATIONAL STUDIES: GLOBAL SECURITY}

\section*{REQUIREMENTS}

\section*{GLOBAL SECURITY OPTION}

In this option, majors explore conditions that challenge the ability of people and societies to survive. Students consider the causes of and solutions to political crises and violent conflicts in interstate, transnational, and domestic settings. Using historical and regional approaches, students develop a better understanding of the dilemmas the state and the global community face when confronted by threats to human rights, peace, and stability.

In addition to the Common Requirements of the International Studies major, complete these requirements specific to the Global Security Option:

\section*{GLOBAL SECURITY OPTION CORE Code Title Credits \\ Complete two courses: \\ ASIAN/ Mapping, Making, and Representing \\ ART HIST 621 Colonial Spaces}
\begin{tabular}{|c|c|}

\title{
INTERNATIONAL STUDIES: POLITICS AND POLICY IN THE GLOBAL ECONOMY
}

\section*{REQUIREMENTS}

\section*{POLITICS AND POLICY IN THE GLOBAL ECONOMY OPTION REQUIREMENTS}

This option offers a multidisciplinary survey of international economic and political institutions and transactions, as well as the policy issues pertaining to international commerce and trade, international finance and monetary relations, international macroeconomic policy coordination, U.S. trade imbalances, aid and development, and related environmental and natural resource problems.

In addition to the Common Requirements of the International Studies major, complete these requirements specific to the Politics and Policy in the Global Economy Option:

\section*{POLITICS AND POLICY IN THE GLOBAL ECONOMY CORE}

\section*{LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES, B.A.}

The Latin American, Caribbean, and Iberian Studies Program is one of the major US centers for research about Latin America. This program is for those who seek a multidisciplinary education on Latin America, the Caribbean, Spain, and Portugal. It offers a wide range of courses in fields such as anthropology, business, economics, geography, history, journalism, music, political science, sociology, Spanish and Portuguese, and indigenous languages such as Yucatec Maya or Quechua.

\section*{HOW TO GET IN}

Students should contact the LACIS undergraduate advisor (https:// lacis.wisc.edu/staff/ripp-sarah/) in order to declare the major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
\begin{tabular}{|c|c|}
\hline \begin{tabular}{l}
Foreign \\
Language
\end{tabular} & \begin{tabular}{l}
- Complete the fourth unit of a foreign language; OR \\
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\end{tabular} \\
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline
\end{tabular}

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & \(\cdot 30\) credits in residence, overall; and \\
Experience & \(\cdot 30\) credits in residence after the 86 th credit.
\end{tabular}

Quality of
Work
- 2.000 in all coursework at UW-Madison
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{Total Credits}

\section*{RESIDENCE AND QUALITY OF WORK}

\footnotetext{
- 2.000 GPA in all LACIS and major courses
- 2.000 GPA on at least 15 credits of upper-level work (courses with intermediate or advanced designation) in the major, in residence
- 15 credits in LACIS, taken on the UW-Madison campus
}

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the LACIS undergraduate advisor.

\section*{HONORS IN THE LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.400 GPA for all major courses
- Complete 18 credits, taken for Honors, with individual grades of B or better, to include:
Code Title Credits

\section*{FOOTNOTES}

1
Can only meet requirements in multiple sections if the topic title is different

Only one Quechua or Yucatec Maya course may be used to meet this requirement (and may not meet both Depth/Interdisciplinary and Language \& Cultural Studies requirement)

3
May meet either the Depth/Interdisciplinary or Language \& Cultural Studies requirement, but not both.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. (Interdisciplinarity) analyzing contemporary political, economic, and cultural realities in the LACIS regions from multi-disciplinary perspectives, ideally including humanities, social sciences and sometimes natural science approaches.
2. (Depth of knowledge) mastering at the undergraduate expert level a particular disciplinary (e.g. history, anthropology etc.) or topical (e.g. poverty, gender, social justice etc.) theme in the LACIS regions by taking five courses in an area of concentration.
3. (Historical and cultural grounding) understanding the historical, political, and cultural forces and conditions that have given rise to the unity and diversity in LACIS regions today.
4. (Language knowledge) mastering at the undergraduate generalist level a particular facet of life in one or more LACIS regions by studying a foreign language to the advanced (3rd year) level and beyond.
5. (Analytical skills) demonstrating the ability to think critically and analytically, the capacity to write clearly and effectively, and the ability to identify and evaluate research methods and outcomes.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved
examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Students should contact Sarah Ripp, the LACIS undergraduate advisor, at skripp@wisc.edu, to determine which courses may satisfy major requirements.

Students are encouraged to seek the assistance of SuccessWorks at the College of Letters \& Science early in their academic career. Take advantage of all the services offered such as mock interviews, resume and cover letter review sessions, career preparation workshops, and so on.

Students interested in international internships should contact the International Internships Program (http:// internships.international.wisc.edu/) office.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

The Latin American, Caribbean, and Iberian Studies (LACIS) teaching staff consists of more than 100 faculty (https://lacis.wisc.edu/people/ affiliated-faculty/) who teach Latin American, Caribbean, and Iberian language and area content courses.

LACIS also has a Steering Committee. (https://lacis.wisc.edu/people/ lacis-steering-committee/)

\section*{WISCONSIN EXPERIENCE}

As a regional center within the Institute for Regional and International Studies, we support and enhance international and global awareness in our student communities and inspire informed thinking about the complexities of our world. We encourage our students to connect to international networks and our regional communities through our program's lecture series, film screenings, and varied outreach events and activities. We encourage our students to study abroad, do international internships, learn foreign languages, and expect them to gain an interdisciplinary grounding in global and regional affairs. We provide resources and expertise on our world area to students, and prospective students, and more broadly to \(\mathrm{K}-12\) teachers and students, post-secondary educators and graduate students, businesses, the media, the military, the community at large, and anyone else who is interested.

\section*{RESOURCES AND SCHOLARSHIPS}

Undergraduate students (from any major or discipline) can apply to receive one-time funds (https://lacis.wisc.edu/funding/forundergraduates/) for internships or volunteer programs in Latin America, the Caribbean, the Iberian Peninsula. Domestic programs will be considered if the work is related to the LACIS field of study. The internships and volunteer programs will be carried out in public institutions, or well-established NGOs. Students from any nationality and citizenship are eligible to apply. Please note that preference is given to declared LACIS majors. Please check with the LACIS undergraduate advisor, Sarah Ripp (https://lacis.wisc.edu/staff/ripp-sara/), about your plans before submitting an application to ensure it meets our criteria. Read postinternship reports from former grant recipients. We also encourage our students to explore funding options available through the Institute for Regional and International Studies (IRIS) Awards Office (https:// iris.wisc.edu/funding/).

> LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES, B.S.

The Latin American, Caribbean, and Iberian Studies Program is one of the major US centers for research about Latin America. This program is for those who seek a multidisciplinary education on Latin America, the Caribbean, Spain, and Portugal. It offers a wide range of courses in fields such as anthropology, business, economics, geography, history, journalism, music, political science, sociology, Spanish and Portuguese, and indigenous languages such as Yucatec Maya or Quechua.

\section*{HOW TO GET IN}

Students should contact the LACIS undergraduate advisor (https:// lacis.wisc.edu/staff/ripp-sarah/) in order to declare the major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language.

Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts
Complete at least 108 credits.
and Science
Coursework

Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

\section*{Total Credits}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all LACIS and major courses
- 2.000 GPA on at least 15 credits of upper-level work (courses with intermediate or advanced designation) in the major, in residence
- 15 credits in LACIS, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the LACIS undergraduate advisor.

HONORS IN THE LATIN AMERICAN, CARIBBEAN, AND IBERIAN STUDIES MAJOR REQUIREMENTS
To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.400 GPA for all major courses
- Complete 18 credits, taken for Honors, with individual grades of B or better, to include:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{2}{|l|}{LACIS Introductory Course, taken for Honors (Complete one course)} & 3-4 \\

\begin{tabular}{ll} 
LACIS 681 & Senior Honors Thesis \\
LACIS 682 & Senior Honors Thesis
\end{tabular}

Additional LACIS courses taken for Honors to achieve 18 credits

\section*{FOOTNOTES}

1
Can only meet requirements in multiple sections if the topic title is different
2
Only one Quechua or Yucatec Maya course may be used to meet this requirement (and may not meet both Depth/Interdisciplinary and Language \& Cultural Studies requirement)

\section*{3}

May meet either the Depth/Interdisciplinary or Language \& Cultural Studies requirement, but not both.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. (Interdisciplinarity) analyzing contemporary political, economic, and cultural realities in the LACIS regions from multi-disciplinary perspectives, ideally including humanities, social sciences and sometimes natural science approaches.
2. (Depth of knowledge) mastering at the undergraduate expert level a particular disciplinary (e.g. history, anthropology etc.) or topical (e.g. poverty, gender, social justice etc.) theme in the LACIS regions by taking five courses in an area of concentration.
3. (Historical and cultural grounding) understanding the historical, political, and cultural forces and conditions that have given rise to the unity and diversity in LACIS regions today.
4. (Language knowledge) mastering at the undergraduate generalist level a particular facet of life in one or more LACIS regions by studying a foreign language to the advanced (3rd year) level and beyond.
5. (Analytical skills) demonstrating the ability to think critically and analytically, the capacity to write clearly and effectively, and the ability to identify and evaluate research methods and outcomes.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{Total Credits 120}

\section*{ADVISING AND CAREERS}

Students should contact Sarah Ripp, the LACIS undergraduate advisor, at skripp@wisc.edu, to determine which courses may satisfy major requirements.

Students are encouraged to seek the assistance of SuccessWorks at the College of Letters \& Science early in their academic career. Take advantage of all the services offered such as mock interviews, resume and cover letter review sessions, career preparation workshops, and so on.

Students interested in international internships should contact the International Internships Program (http:// internships.international.wisc.edu/) office.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

The Latin American, Caribbean, and Iberian Studies (LACIS) teaching staff consists of more than 100 faculty (https://lacis.wisc.edu/people/ affiliated-faculty/) who teach Latin American, Caribbean, and Iberian language and area content courses.
LACIS also has a Steering Committee. (https://lacis.wisc.edu/people/ lacis-steering-committee/)

\section*{RESOURCES AND SCHOLARSHIPS}

Undergraduate students (from any major or discipline) can apply to receive one-time funds (https://lacis.wisc.edu/funding/forundergraduates/) for internships or volunteer programs in Latin America, the Caribbean, the Iberian Peninsula. Domestic programs will be considered if the work is related to the LACIS field of study. The internships and volunteer programs will be carried out in public institutions, or well-established NGOs. Students from any nationality and citizenship are eligible to apply. Please note that preference is given to declared LACIS majors. Please check with the LACIS undergraduate advisor, Sarah Ripp (https://lacis.wisc.edu/staff/ripp-sara/), about your plans before submitting an application to ensure it meets our criteria. Read postinternship reports from former grant recipients. We also encourage our students to explore funding options available through the Institute for Regional and International Studies (IRIS) Awards Office (https:// iris.wisc.edu/funding/).

\section*{MIDDLE EAST STUDIES, CERTIFICATE}

Given the immense importance of the Middle East and North Africa (MENA) region in shaping contemporary world politics, the Middle East Studies certificate is designed to provide an interdisciplinary perspective of the region's history and contemporary dynamics and their representations across the diaspora. The MES certificate offers a unique opportunity for students to develop their interest and knowledge of the MENA region through a wide range of courses taught by UW professors with great expertise in the fields of political science, history, religious studies, sociology/anthropology, art history, literature, and modern languages.

MES certificate will give students a variety of career opportunities in international affairs, public policy, journalism, governmental institutions, education, public heath, humanitarian organizations, economic development, and security, or going on to graduate school and a career in academia.

\section*{HOW TO GET IN}

Students interested in declaring the undergraduate certificate should contact the advisor.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

\section*{RESIDENCE AND QUALITY OF WORK}
- At least 9 certificate credits must be completed in residence.
- Minimum 2.000 GPA on all certificate courses.

\section*{FOOTNOTES}

1
A maximum of 3 credits of Advanced Language may apply to the certificate.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. (Historical and Cultural Grounding) understanding the historical, political, and cultural forces and conditions that have given rise to the unity and diversity in the region today.
2. (Multi-disciplinarity) analyzing contemporary political, economic, and cultural realities in the region from at least two disciplinary perspectives, ideally including humanities, social sciences and sometimes natural science approaches.
3. (Depth of knowledge) mastering at the undergraduate generalist level a particular facet of life in the region by taking courses on a particular sub-region or country, or by studying a regional language, or by taking at least two courses on the region in one discipline.

\section*{ADVISING AND CAREERS}

Advising for the certificate is run by the Institute for Regional and International Studies (https://iris.wisc.edu/) (IRIS). The IRIS Assistant Director for Students and Curriculum advises the certificate and can assist you in developing your plan of study, track progress toward your certificate, explore study abroad and international internship options, and begin the career exploration process. We offer walk-in advising, advising workshops, and scheduled appointments. We strongly encourage students to begin career exploration early on and to make use of the many resources available on campus.

Resources:
- Language and International Directions Advising (http:// www.languages.wisc.edu/languageadvising/) (Language Institute)
- International Internship Program (http:// internships.international.wisc.edu/)

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Steven Brooke, Middle East Studies Program Director Tsela Barr, Assistant Director
Lindsey Bliefernicht, Assistant Director for Students and Curriculum and Advisor

MESP Core Faculty (https://mideast.wisc.edu/core-faculty/) and Staff (https://mideast.wisc.edu/staff/)

\section*{WISCONSIN EXPERIENCE}

As a regional center within the Institute for Regional and International Studies (https://iris.wisc.edu/), we support and enhance international and global awareness in our student communities and inspire informed thinking about the complexities of our world. We encourage our students to connect to international networks and our regional communities through our program's lecture series, film screenings, and varied outreach events and activities. We encourage our students to study abroad, do international internships, and learn foreign languages, and we expect them to gain an interdisciplinary grounding in global and regional affairs.

We provide resources and expertise on our world area to students, and prospective students, and more broadly to \(\mathrm{K}-12\) teachers and students, postsecondary educators and graduate students, businesses, the media, the military, the community at large, and anyone else who is interested.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about funding through the Middle East Studies Program is available on our website (https://mideast.wisc.edu/funding-resources/). We also encourage our students to explore funding options available through the Institute for Regional and International Studies (IRIS) Awards Office (https://iris.wisc.edu/funding/).

> RUSSIAN, EAST EUROPEAN, AND CENTRAL ASIAN STUDIES, CERTIFICATE

The undergraduate certificate program in Russian, East European, and Central Asian studies seeks to provide undergraduate students with area knowledge of the societies and cultures of the peoples of Eastern Europe and Eurasia, drawing on the disciplines of anthropology, communication arts, economics, folklore, geography, history, language and literature, law, political science, and sociology. The certificate can be a valuable addition to a major in business, economics, education, geography, history, international studies, political science, Slavic languages and literature, and other departments.

Applicants must fulfill the UW-Madison requirements for an established major in their school or college and achieve a minimum GPA of 2.500 in all courses they wish to count toward the certificate. Courses may not be taken on a pass/fail basis. At least two years of a Slavic, East European, or Central Asian language are strongly recommended for the certificate, but are not formally required.
(For information on the major in Russian, the major in Polish, and/or the certificate in East Central European Languages, Literatures, and Cultures, see German, Nordic, and Slavic+ (https://gns.wisc.edu/).)

\section*{HOW TO GET IN}

Students interested in declaring the undergraduate certificate should contact the advisor.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

Seven courses are required, at least one from each of the following three groups. \({ }^{1}\)

\section*{INTERDISCIPLINARY COURSES (GROUP 1)}

Complete at least one course:

We also encourage our students to explore funding options available through the Institute for Regional and International Studies (IRIS) Awards Office (https://iris.wisc.edu/funding/).

\section*{SOUTH ASIAN STUDIES, CERTIFICATE}

\section*{SOUTH ASIAN STUDIES CERTIFICATE PROGRAM}

Undergraduates interested in cross-disciplinary study of South Asia (generally defined as the countries of Afghanistan, Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka, and the Tibetan region) may earn a certificate in South Asian studies. The certificate can be a valuable addition to a major in anthropology, archeology, business, communications, economics, education, gender and women's studies, geography, history, international studies, journalism, languages and cultures of Asia, political science, zoology, and other departments. Completion of the certificate provides a concentration in the area through language and/or interdisciplinary training that provides enhanced career opportunities or increased preparation for graduate study.

The certificate in South Asian studies can be partially fulfilled through completion of a study abroad program in South Asia administered by International Academic Programs (http://www.studyabroad.wisc.edu).

\section*{HOW TO GET IN}

Students interested in declaring the undergraduate certificate should contact the undergraduate advisor.

Students declared in the Asian Languages and Cultures: South Asian Studies BA/BS/MAJ are not eligible to declare the South Asian Studies certificate.

REQUIREMENTS

\section*{RESIDENCE \& QUALITY OF WORK}
- Minimum 2.750 GPA on all certificate courses.
- At least 11 certificate credits must be completed in residence.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. (Historical Grounding) understanding the historical, political, and cultural forces and conditions that have given rise to the unity and diversity in the region today.
2. (Multi-disciplinarity) analyzing contemporary political, economic, and cultural realities in the region from at least two disciplinary perspectives, ideally including humanities, social sciences and sometimes natural science approaches.
3. (Depth of knowledge) mastering at the undergraduate generalist level a particular facet of life in the region by taking courses on a particular sub-region or country, or by studying a regional language, or by taking at least two courses on the region in one discipline.

\section*{ADVISING AND CAREERS}

Advising for the certificate is administered by the Institute for Regional and International Studies (IRIS). The IRIS assistant director for students and curriculum can assist you in developing your plan of study for the certificate, track progress towards your certificate, explore study abroad and international internship options, and begin the career exploration process. We offer walk-in advising, advising workshops, and scheduled appointments. We strongly encourage students to begin career exploration early on and to make use of the many resources available on campus.

Contact the certificate advisor (Lindsey Bliefernicht, (608) 262-2630; lindsey.bliefernicht@wisc.edu) to create a plan that includes a wellbalanced selection of area studies and disciplinary courses and for approval of appropriate introductory and capstone seminar courses.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Center for South Asia Advisory Committee: Anthony Cerulli (Director), Sarah Beckham, Uchita Vaid, Jamal Jones, Sumudu Atapattu, Anirban Baishya, Todd Michelson-Ambelang, Felecia Lucht

\section*{WISCONSIN EXPERIENCE}

As a regional center within the Institute for Regional and International Studies, we support and enhance international and global awareness in our student communities and inspire informed thinking about the complexities of our world. We encourage our students to connect to international networks and our regional communities through our program's lecture series, film screenings, and varied outreach events and activities. We encourage our students to study abroad, do international internships, learn foreign languages, and expect them to gain an interdisciplinary grounding in global and regional affairs. We provide resources and expertise on our world area to students, and prospective students, and more broadly to K-12 teachers and students, postsecondary educators and graduate students, businesses, the media, the military, the community at large, and anyone else who is interested.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about resources and scholarships through the Center for South Asia is available from our website (http://southasia.wisc.edu/). Please contact the Center for more information about the South Asian Flagship Languages Initiative (SAFLI), the South Asia Summer Language Institute (SASLI) and the Annual Conference on South Asia. We also strongly encourage our students to explore funding options available
through the Institute for Regional and International Studies (IRIS) Awards Office (https://iris.wisc.edu/funding/).

\section*{SOUTHEAST ASIANSTUDIES, CERTIFICATE}

\section*{CERTIFICATE IN SOUTHEAST ASIAN STUDIES}

The undergraduate certificate in Southeast Asian studies is available to students working toward a baccalaureate degree in any of the University of Wisconsin-Madison schools and colleges. This certificate meets the needs of students choosing to focus on the Southeast Asia region (Brunei, Cambodia, East Timor, Indonesia, Laos, Malaysia, Myanmar/Burma, Philippines, Singapore, Thailand, Vietnam) within their primary major, but not wishing to commit to the more rigorous language and area studies courses required for the B.A. in Asian Languages and Cultures (named option in Southeast Asia). Students select coursework reflecting their interests from classes offered through many university departments, and can work toward a variety of undergraduate majors. Upon earning the certificate, this emphasis is noted on the student's transcript. The certificate is of value to students wishing to demonstrate their knowledge of the Southeast Asian region either to potential employers or to graduate schools.

Students interested in more specialized study of the languages and iterature of East Asia, South Asia, or Southeast Asia should see the Department of Asian Languages and Cultures, the Center for East Asian Studies, or the Center for South Asia. Those interested in the study of languages and cultures of Central Asia should see the Center for Russian, East European, and Central Asian Studies. All questions pertaining to Southeast Asian studies at UW-Madison should be addressed to the Center for Southeast Asian Studies (see box at right).

\section*{HOW TO GET IN}

Students interested in declaring the certificate in Southeast Asian studies should contact the program advisor

Students declared in the Asian Languages and Cultures: Southeast Asian Studies BA/BS/MAJ are not eligible to declare the Southeast Asian Studies certificate.

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 2.000 GPA on all certificate courses
- At least 8 certificate credits must be completed in residence

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. (Historical and Cultural Grounding) understanding the historical political and cultural forces and conditions that have given rise to the unity and diversity in the region today.
2. (Multi-disciplinarity) analyzing contemporary political, economic, and cultural realities in the region from at least two disciplinary perspectives, ideally including humanities, social sciences and sometimes natural science approaches.
3. (Depth of Knowledge) mastering at the undergraduate generalist level a particular facet of life in the region by taking courses on a particular sub-region or country or by studying a regional language or by taking at least two courses on the region in one discipline.

\section*{ADVISING AND CAREERS}

All students interested in this certificate are encouraged to take HISTORY/ ASIAN/GEOG/POLI SCI/SOC 244 Introduction to Southeast Asia: Vietnam to the Philippines.

Southeast Asian language courses can be taken during the academic year (Filipino, Hmong, Indonesian, Thai, and Vietnamese) and all of these plus three others (Burmese, Khmer, and Lao) can be taken at UW-Madison's summer program, the Southeast Asian Studies Summer Institute (http:// seassi.wisc.edu/).

Students interested in the certificate in Southeast Asian studies, should contact the program advisor Michael Cullinane, mmcullin@wisc.edu, 608-263-1755.

\section*{RESOURCES AND SCHOLARSHIPS}

Information about resources, scholarships and funding through the Center for Southeast Asian Studies is available from our website (http:// seasia.wisc.edu/) on the "For Students" and the "Resources" tabs. We also encourage our students to explore funding options available through the Institute for Regional and International Studies (IRIS) Awards Office (https://iris.wisc.edu/funding/).

\section*{INTEGRATED LIBERAL STUDIES}

The mission of Integrated Liberal Studies (https://ils.wisc.edu/) (ILS) is to provide an integrated exploration of the great themes of human inquiry and expression in scientific, literary, political, economic, historical and artistic thought. As an alternative to scattered electives, ILS offers a set of related courses specially tailored to meet the breadth requirements of the College of Letters \& Science. ILS draws exemplary, dynamic faculty from departments across campus to create courses that challenge students with a rigorous program of interdisciplinary study emphasizing critical thinking and judgment rather than passive absorption of information. Although these courses may be taken as single electives, the purpose of the program is to counter the fragmentation of undergraduate education by providing a common ground of learning.

Because ILS courses are interdisciplinary, students are encouraged to make connections between the various subject areas. They study the relations between literature and the arts; science, technology, and philosophy; and political, economic, and social thought. The content of the curriculum has been developed in the belief that historical perspective is required for a full understanding of contemporary issues. Courses numbered 201-206 progress from historical to contemporary topics in each of the three core areas. Those numbered 250 and above cover interdisciplinary special topics in the natural sciences, social sciences, and humanities, including "Magical Realism," "Modern Jewish Thought," and "Machiavelli and His World." ILS also includes a course (ILS 200 Critical Thinking and Expression) in Critical Thinking and Expression to sharpen communication and research skills necessary for college work. This course satisfies the university's Communications B requirement. ILS 400 Capstone Integration Seminar, a senior capstone seminar addressing an interdisciplinary topic, is required in order to complete the ILS certificate.

\section*{INTEGRATED LIBERAL \\ STUDIES, CERTIFICATE}

The mission of Integrated Liberal Studies (https://ils.wisc.edu/) (ILS) is to provide an integrated exploration of the great themes of human inquiry and expression in scientific, literary, political, economic, historical and artistic thought. As an alternative to scattered electives, ILS offers a set of
related courses specially tailored to meet the breadth requirements of the College of Letters \& Science. ILS draws exemplary, dynamic faculty from departments across campus to create courses that challenge students with a rigorous program of interdisciplinary study emphasizing critical thinking and judgment rather than passive absorption of information. Although these courses may be taken as single electives, the purpose of the program is to counter the fragmentation of undergraduate education by providing a common ground of learning.

Because ILS courses are interdisciplinary, students are encouraged to make connections between the various subject areas. They study the relations between literature and the arts; science, technology, and philosophy; and political, economic, and social thought. The content of the curriculum has been developed in the belief that historical perspective is required for a full understanding of contemporary issues. Courses numbered 201-206 progress from historical to contemporary topics in each of the three core areas. Those numbered 250 and above cover interdisciplinary special topics in the natural sciences, social sciences, and humanities, including "Magical Realism," "Modern Jewish Thought," and "Machiavelli and His World." ILS also includes a course (ILS 200 Critical Thinking and Expression) in Critical Thinking and Expression to sharpen communication and research skills necessary for college work. This course satisfies the university's Communications B requirement. ILS 400 Capstone Integration Seminar, a senior capstone seminar addressing an interdisciplinary topic, is required in order to complete the ILS certificate.

\section*{HOW TO GET IN}

\section*{CERTIFICATE DECLARATION REQUIREMENTS}

There are no prerequisites for declaring the Integrated Liberal Studies (ILS) certificate. Students interested in declaring the ILS certificate should contact the ILS Academic Advisor as early as possible to plan the required coursework.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

The certificate in Integrated Liberal Studies consists of two Core ILS courses, one additional ILS course, another non-ILS course from an approved list, and the ILS Capstone Experience seminar.

A total of 15 credits are required, of which 6 are in Core ILS courses, 3 in Integrative Breadth, 3 in Integrative Diversity, and 3 in the Capstone Experience.

\section*{CAPSTONE EXPERIENCE}
Code Title Credits
Complete the ILS Capstone Experience: ..... 3
ILS 400 Capstone Integration Seminar ..... 3
RESIDENCE \& QUALITY OF WORK
- 2.000 GPA with all courses taken on graded basis
- 8 credits in the certificate, in residence

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Identify and explain how people make meaning across times, cultures, media, and disciplines.
2. Critically analyze diverse approaches to how people make meaning in the past and present.
3. Recognize and synthesize diverse types of knowledge and disciplinary approaches to how people make meaning.
4. Formulate new questions about and integrate new approaches to how people make meaning.

\section*{ADVISING AND CAREERS}

\section*{ACADEMIC ADVISING}

The Integrated Liberal Studies (ILS) academic advisor can help you create a meaningful course plan and stay on track as you complete the certificate requirements. We recommend that you connect with the ILS advisor as early as possible. The advisor is available to consult on a variety of topics including: declaring the certificate, course selection, exploring how ILS courses fit with breadth and general education degree requirements, campus resources, and getting the most from your Wisconsin Experience.

\section*{CONTACT INFORMATION}

Laura Bradley
Integrated Liberal Studies Academic Advisor

Isbradley@wisc.edu
201 Meiklejohn House
http://www.ils.wisc.edu

\section*{CAREER INFORMATON}

The Integrated Liberal Studies Program encourages certificate students to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks in the College of Letters \& Science to help you leverage the academic skills learned in your major and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters \& Science graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{AFFILIATED FACULTY}

Richard Avramenko, Professor of Political Science; Director of the Center for the Study of Liberal Democracy

William Aylward, Professor of Classics; Herbert and Evelyn Howe Bascom Professor of Integrated Liberal Studies

Beatriz Botero, Lecturer of Integrated Liberal Studies
Karen Britland, Halls-Bascom Professor of English
Chad Goldberg, Professor of Sociology
Florence C. Hsia, Professor of History of Science; Associate Vice Chancellor for Research in the Arts and Humanities

Dan Kapust, Professor of Political Science, Judith Hicks Stiehm Chair in Political Theory

Devin Kennedy, Assistant Professor of History
Timothy Lindstrom, Lecturer of Environmental Studies; Student Intern Program Manager for the Nelson Institute

Laura McClure, Halls-Bascom Professor of Classical Literature Studies
Grant A. Nelsestuen, Professor of Classics; Director of ILS
Adam Nelson, Professor of Educational Policy Studies and History; Senior Associate Dean for Academic Programs, School of Education

Kristin Phillips-Court, Associate Professor of Italian and Art History
Ulrich Rosenhagen, Lecturer of History; Director of the Center for Religion and Global Citizenry

Michelle Schwarze, Associate Professor of Political Science
Howard Schweber, Professor of Political Science
Basil Tikoff, Professor of Structural Geology and Tectonics
Mike Vanden Heuvel, Professor of Interdisciplinary Theatre Studies
John Zumbrunnen, Professor of Political Science; Vice Provost for Teaching and Learning Administrative Staff

\section*{STAFF}

Laura Bradley, ILS Academic Advisor
Grant Nelsestuen, Director of ILS
Beth Shipman, Program Administrative Manager

\section*{WISCONSIN EXPERIENCE}

\section*{"A SMALL LIBERAL ARTS EXPERIENCE WITHIN A GREAT UNIVERSITY"}

ILS is not only a certificate, but a community on campus. The program strives to create a place where students can take multiple classes with the same group of peers and develop lasting relationships. It's like a FIG (first-year interest group) throughout the entire undergraduate experience.
"The University of Wisconsin needs programs like ILS to give students the indispensable liberal arts experience and I am happy that it was part of my experience here on campus." Brett Tietz (2015 ILS graduate)
"I love that the history and literature I learn in my ILS courses makes me a better conversationalist." Paul Sutherland (2015 ILS graduate)

\begin{abstract}
"I love ILS because there is so much to learn. Through ILS I was able to trace the history of science from natural philosophy all the way up to Newtonian physics, and the impact of science on the contemporary art \& literature. I really enjoyed being able to study the humanities, and the insights these classes have provided me on the interaction between science and culture. The program was a great way for me to study things that I am interested in, but are unrelated to my major, such as astronomy, geology, philosophy, literature, art history, geopolitics." Brad Glasco (2015 ILS graduate)
\end{abstract}

\begin{abstract}
"The main goal of ILS is to get its students to recognize how different subjects of knowledge connect with one another. Our student-led class in our ILS capstone attempted to accomplish this goal through the topic of tattoos. By reading articles and books on tattoos, witnessing a classmate receive a tattoo, interviewing veteran tattoo artists in the field, debating case studies, and discussing stigmas and stereotypes of tattoos, we wove together knowledge from history, psychology, sociology, criminology, philosophy, and art. My views about tattoos, and people who choose to get them, will be forever better informed. I will always remember my classmates and this capstone!" Ryan Fleming (2015 ILS graduate)
\end{abstract}

\footnotetext{
"Virtually every ILS class threatens to fundamentally change the way you see the world." Eric Schmidt, political science major
}
"Some of the best professors on campus teach ILS classes, and they love the program as much as the students! How many other programs offer Aristophanes, Nietzsche and Jon Stewart in the same class?" Jeff Landow, English major

\section*{RESOURCES AND SCHOLARSHIPS}

ILS offers multiple scholarship and award opportunities for declared certificate students.

\section*{MEIKLEJOHN TRAVEL AWARD UPTO \(\$ 1500\)}

Named for Alexander Meiklejohn, founder of the University of Wisconsin Experimental College (1927-32), the forerunner to the ILS program, this prize is intended to help support an ILS student in a university-sponsored or an independent program of education-centered travel or study abroad, taking place during the summer or academic year (or in the United States if the destination is remote from the student's home or the campus).

\section*{POOLEY PRIZE}

UP TO \$2,000 EACH (BASED ON AVAILABLE FUNDS)
Named for Professor Robert Pooley, the first chair of the Integrated Liberal Studies program (1948), this prize is given annually to outstanding ILS students on the basis of:
- academic achievement (GPA of at least 3.0 for the 3 preceding semesters),
- evidence of good character,
- student leadership in the ILS program, including involvement in extracurricular activities, and
- available for travel purposes relating to their ILS courses.

\section*{RUTH KNATZ MEMORIAL PRIZE UP TO \$5,000 (BASED ON AVAILABLE FUNDS)}

Named for Ruth Knatz Gross Wisnewsky and given by her husband, Edward Wisnewsky, this prize will be given only to a truly outstanding student who:
- is majoring in at least one humanities discipline (including history and history of science, but not social science or science); this means you may be double-majoring in one non-humanities major, but the other must be a humanities major,
- gives promise of making a valuable contribution to the humanities,
- has done exemplary work in their ILS courses,
- has achieved junior or senior standing, and
- has signed up for the certificate and plans to complete the ILS certificate program.

\section*{INTECRATIVE BIOLOGY}

\section*{RESEARCH AND EDUCATION}

With 19 faculty and 14 affiliated faculty members from campus, research, and education, the Department of Integrative Biology spans all levels of biological organization (from the molecular level to whole ecosystems and regions), considers a diverse range of taxa (microbes, plants, animals) and systems (terrestrial, aquatic), and addresses a wide array of basic and applied research questions. The Department of Integrative Biology is committed to providing the best training and education in the field of biology for UW-Madison undergraduate and graduate students.

\section*{MAJORS}

As one of the largest departments in the College of Letters \& Science, the Department of Integrative Biology is home to the biology (L\&S), molecular biology, neurobiology, and zoology undergraduate majors. Nearly 2,500 students enroll in our introductory biology courses (BIOLOGY/ ZOOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory; BOTANY/BIOLOGY/ZOOLOGY 151 Introductory Biology/ZOOLOGY 153 Introductory Biology 153 and ZOOLOGY/ BIOLOGY/BOTANY 152 Introductory Biology), and another 1,000 students enroll in a variety of courses in the field of biology.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Biology, B.A. (L\&S) (p. 1018)
- Biology, B.S. (L\&S) (p. 1037)
- Molecular and Cell Biology, B.A. (p. 1054)
- Molecular and Cell Biology, B.S. (p. 1060)
- Neurobiology, B.A. (p. 1066)
- Neurobiology, B.S. (p. 1073)
- Zoology, B.A. (p. 1079)
- Zoology, B.S. (p. 1085)

\section*{PEOPLE}

Please visit the Faculty (https://integrativebiology.wisc.edu/faculty/) and Affiliate Faculty (https://integrativebiology.wisc.edu/affiliatedfaculty/) pages on the Integrative Biology website for information about our faculty and their research areas.

\section*{BIOLOGY, B.A. (L\&S)}

The biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:
1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain preprofessional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists; and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Letters \& Science and the College of Agricultural and Life Sciences.

\section*{HOW TO GET IN}

Students interested in declaring the biology major should set up an appointment to speak with biology academic advisor. Information can be found at advising (http://biologymajor.wisc.edu/advising/).

Students who intend to major in Biology in either the College of Letters and Science (L\&S) or the College of Agricultural and Life Sciences (CALS) may not combine this major ("double major") with the Molecular and Cell Biology Major or the Neurobiology Major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics
Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
Foreign
Language

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
\begin{tabular}{l} 
Liberal Arts \\
and Science
\end{tabular}
Complete at least 108 credits.
Coursework \(\quad\)\begin{tabular}{l} 
Depth of \(\quad\) Complete at least 60 credits at the intermediate or \\
Intermediate/ \\
advanced level.
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S \\ MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, and Additional Lab or Field Research requirements.
Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

In addition to the standard Biology major, there are two Named Options: Biology with a Named Option in Evolutionary Biology and Biology with a Named Option in Plant Biology. Admissions to the Named Option in Plant Biology is suspended as of Fall 2021.

Students may complete only one Biology major/named option and must declare the named option they are pursuing.

\section*{CORE REQUIREMENTS}

\section*{Mathematics and Statistics}
\begin{tabular}{llr} 
Code & Title & Credits \\

\section*{ADDITIONAL LAB OR FIELD RESEARCH}

In addition to the Lab requirement, complete one of the following requirements:
- Complete one additional lab course and at least two credits from categories A-E in the Upper-Level Breadth in the Major course lists, or
- Complete at least two credits of directed study in a biological science discipline, or
- Complete a two-semester thesis in biological science. \({ }^{2}\)

\section*{Approved Directed Study courses}

To have Directed Study count for the Additional Lab/Field Research requirement, students must first complete an Introductory Biology sequence.

\section*{BIOLOGY NAMED OPTIONS}

Instead of completing the requirements above, students may choose to select one of the options below.

View as listView as grid

\section*{- BIOLOGY: EVOLUTIONARY BIOLOGY (P. 1045) \\ - BIOLOGY: PLANT BIOLOGY (P. 1051)}

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all BIOLOGY and major courses
- 2.000 GPA on at least 15 credits of Upper-Level work in the major, in Residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Biology major with permission of the major advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in the major
- Complete 13 credits from Foundation and Upper-Level Breadth in the Major requirements, taken for Honors
- Complete an approved two-semester Senior Honors Thesis for a total of 6 credits

\section*{FOOTNOTES}

\section*{1}

Course also approved for lab credit 2

Foundation and Upper-Level Breadth in the Major are considered UpperLevel for purposes of this requirement.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.

\section*{Residency}

Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Know and understand core concepts that unify the breadth of biological sciences including: evolution; structure and function; information flow, exchange, and storage; pathways for transformations of energy and matter; and systems.
2. Demonstrate practical skills of a professional biologist including: problem\#solving by engaging the process of science; written and verbal proficiency; laboratory skills; quantitative analysis skills; and teamwork skills.
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Four-year Plans for the Biology major are designed to support biological science major exploration and planning your academic career. Your specific program of study could, and probably will, look different. You should customize the Four-Year Plan to fit your unique interests at UWMadison. Consult with your advisor about the best plan for you.

9 Electives

\section*{Total Credits 120}

\section*{1}

Follow the guidance of Math placement scores when choosing a Mathematics and/or Statistics course.

Students may complete one of three Introductory Biology sequences. See the Requirements tab for more information.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Your advisor is here to guide you through the biology major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising appointment, visit UW Undergraduate Advising (https://advising.wisc.edu/soar/ advising-101/).

In the biology major, students are assigned to an adviser according to last name. Please visit us here (http://biologymajor.wisc.edu/advising/) to schedule an advising appointment.

\section*{CAREERS}

The biology major encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students

\section*{PEOPLE}

\section*{ADVISING LEADERSHIP AND STAFF}

Brian Asen
Carley Garvens
Sarah Kuba, Program Director
Brittany Magrady
Damien Parks

\section*{BIOLOGY MAJOR PROGRAM COMMITTEE}
(voting members)
Briana Burton
Joseph Dillard
Stephen Gammie, L\&S Co-Chair
Irwin Goldman, Plant Biology Named Option Representative
Anna Kowalkowski
Sarah Kuba, ex officio
Timothy Paustian, ex officio
Nathaniel Sharp, Evolutionary Biology Named Option Representative
Sharon Thoma, ex officio
Jon Woods
Jae-Hyuk Yu, CALS Co-Chair

\section*{WISCONSIN EXPERIENCE}

\section*{WISCONSIN EXPERIENCE}

The following opportunities can help students connect with other students interested in biology, build relationships with faculty and staff, and contribute to out-of-classroom learning:
- Many study abroad programs offer a plethora of excellent upper level bioscience courses. Students often complete courses abroad that meet upper-level breadth in the major requirements (categories A-E) while others use this opportunity to focus on non-science coursework and explore other topics that interest them. Review the Biology Major advising page (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biology/) on the Study Abroad website to explore international academic programs.
- Students are encouraged to get involved in research in any life science department. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities
can be identified by inquiring directly (https://biology.wisc.edu/ finding-mentor/) with faculty members, reading the Biology Major Newsletter, or announcement on the Student Job Center (https:// jobcenter.wisc.edu/).

\section*{BIOLOGY: EVOLUTIONARY BIOLOGY}

The Evolutionary Biology Option allows biology majors to concentrate their studies in evolution and to have this reflected on their transcript. Since there is no evolutionary biology major available at UW-Madison, this is the only mechanism to indicate specialization in this rapidly growing and popular field. In taking this option students will be able to fulfill their intermediate/advanced biology requirement with courses that emphasize evolutionary biology, ranging from required courses in fundamental evolutionary biology to more advanced optional courses that cover a wide range of evolutionary biology topics. They will also get to take a one-credit seminar course in evolutionary biology.

Who should enroll in this option? Students with broad interest in the biological sciences who want to:
- Prepare for graduate study in evolutionary biology or related fields
- Prepare for professional studies (e.g. medical school, veterinary school, dentistry)
- Concentrate their biological studies in evolutionary biology

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE NAMED OPTION}

Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, Additional Lab or Field Research, and Evolutionary Biology Seminar requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all BIOLOGY and major courses
- 2.000 GPA on at least 15 credits of Upper-Level work in the major, in Residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{FOOTNOTES}

\section*{1}

Course also approved for lab credit
2
Foundation and Upper-Level Breadth in the Major courses are considered Upper-Level for purposes of this requirement.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Four-year Plans for the Biology major are designed to support biological science major exploration and planning your academic career. Your specific program of study could, and probably will, look different. You should customize the Four-Year Plan to fit your unique interests at UWMadison. Consult with your advisor about the best plan for you.

\section*{Total Credits 120}

\section*{1}

Follow the guidance of Math placement scores when choosing a Mathematics and/or Statistics course.
2
Students may complete one of three Introductory Biology sequences. See the Requirements tab for more information.

\section*{BIOLOGY: PLANT BIOLOGY}

\section*{Admissions to the Biology: Plant Biology, B.A. named option have been suspended as of fall 2021 and will be discontinued as of fall 2024. If you have any questions, please contact the department.}

The Plant Biology Named Option allows biology majors to focus their studies on plant science and to have this reflected on their transcript. There are a number of departments at UW-Madison who host plant science-based majors, including agronomy, botany, horticulture, plant pathology, and forest and wildlife ecology. While those specialized majors offer in-depth programs in their disciplines, the Plant Biology Named Option allows students to pursue a course of study within the biology major and explore plant biology at the same time. Students in this option can fulfill their requirements with courses that emphasize various aspects of plant science, including anatomy, physiology, genetics, crop production, disease resistance, and molecular techniques in plant improvement. Students also participate in a one-credit seminar called Frontiers in Plant Science taught by two faculty from plant science departments.

Who should enroll in this option? Students with broad interest in biological sciences who also want to:
- Prepare for graduate work in a plant science field
- Prepare for advanced study or graduate work in a natural or environmental science field
- Concentrate their studies on the biology of plants

REQUIREMENTS

\section*{REQUIREMENTS FOR THE NAMED OPTION}

Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, and Additional Lab or Field Research requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

\end{tabular}

\section*{UPPER-LEVEL BREADTH IN THE MAJOR}

Minimum of 13 credits required and must include one approved lab course. Approved lab courses are indicated by footnote. A course taken to meet the Foundation requirement may not also count as Upper-Level Breadth in the Major.
- Complete at least two credits from either category A or B.
- Complete at least two credits from either category C or D.
- Complete at least two credits from category E.

\section*{ADDITIONAL LAB OR FIELD RESEARCH}

In addition to the Lab requirement, complete one of the following requirements:
- Complete one additional lab course and at least two credits from categories A-E in the Upper-Level Breadth in the Major course lists, or
- Complete at least two credits of directed study in a biological science discipline, or
- Complete a two-semester thesis in biological science.

\section*{Approved Directed Study Courses}

To have Directed Study count for the Additional Lab/Field Research requirement, students must first complete an Introductory Biology sequence.

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all BIOLOGY and major courses
- 2.000 GPA on at least 15 credits of Upper-Level work in the major, in Residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{FOOTNOTES}

\section*{1}

Course also approved for lab credit
2
Foundation and Upper-Level Breadth in the Major courses are considered Upper-Level for purposes of this requirement.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Four-year Plans for the Biology major are designed to support biological science major exploration and planning your academic career. Your specific program of study could, and probably will, look different. You should customize the Four-Year Plan to fit your unique interests at UWMadison. Consult with your advisor about the best plan for you.

\section*{SAMPLE PLANT BIOLOGY OPTION FOURYEAR PLAN}

\section*{Total Credits 120}

1
Follow the guidance of Math placement scores when choosing a Mathematics and/or Statistics course.
2
Students may complete one of three Introductory Biology requirements. See the Requirements tab for more information.

\section*{BIOLOGY, B.S. (L\&S)}

The biology major is designed for students with broad interests in the biological sciences. It is intended primarily to:
1. prepare undergraduates for graduate studies in diverse areas of biology;
2. prepare certain preprofessional students (e.g., medicine, veterinary medicine, dentistry) for advanced study in the health professions;
3. provide a broad exposure to biology for students who want a general science education as biologists; and
4. serve as initial preparation for students who later choose a more specialized major.

The major is offered by the College of Letters \& Science and the College of Agricultural and Life Sciences.

\section*{HOW TO GET IN}

Students interested in declaring the biology major should set up an appointment to speak with biology academic advisor. Information can be found at advising (http://biologymajor.wisc.edu/advising/).

Students who intend to major in Biology in either the College of Letters and Science (L\&S) or the College of Agricultural and Life Sciences (CALS) may not combine this major ("double major") with the Molecular and Cell Biology Major or the Neurobiology Major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCl and STAT subjects counts toward this requirement.
Foreign Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits. and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, and Additional Lab or Field Research requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

In addition to the standard Biology major, there are two Named Options: Biology with a Named Option in Evolutionary Biology and Biology with a Named Option in Plant Biology. Admissions to the Named Option in Plant Biology is suspended as of Fall 2021.

Students may complete only one Biology major/named option and must declare the named option they are pursuing.

\section*{CORE REQUIREMENTS}

Mathematics and Statistics
\begin{tabular}{|c|c|c|}

\section*{ADDITIONAL LAB OR FIELD RESEARCH}

In addition to the Lab requirement, complete one of the following requirements:
- Complete one additional lab course and at least two credits from categories A-E in the Upper-Level Breadth in the Major course lists, or
- Complete at least two credits of directed study in a biological science discipline, or
- Complete a two-semester thesis in biological science. \({ }^{2}\)

\section*{Approved Directed Study courses}

To have Directed Study count for the Additional Lab/Field Research requirement, students must first complete an Introductory Biology sequence.

\section*{BIOLOGY NAMED OPTIONS}

Instead of completing the requirements above, students may choose to select one of the options below.

View as listView as grid

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all BIOLOGY and major courses
- 2.000 GPA on at least 15 credits of Upper-Level work in the major, in Residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Biology major with permission of the major advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in the major
- Complete 13 credits from Foundation and Upper-Level Breadth in the Major requirements, taken for Honors
- Complete an approved two-semester Senior Honors Thesis for a total of 6 credits

\section*{FOOTNOTES}

1
Course also approved for lab credit
2
Foundation and Upper-Level Breadth in the Major are considered UpperLevel for purposes of this requirement.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

\author{
Total Degree
}

To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Know and understand core concepts that unify the breadth of biological sciences including: evolution; structure and function; information flow, exchange, and storage; pathways for transformations of energy and matter; and systems.
2. Demonstrate practical skills of a professional biologist including: problem\#solving by engaging the process of science; written and verbal proficiency; laboratory skills; quantitative analysis skills; and teamwork skills.
3. Graduates will be able to engage and make broader connections to other scientific disciplines and society.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Four-year Plans for the Biology major are designed to support biological science major exploration and planning your academic career. Your specific program of study could, and probably will, look different. You should customize the Four-Year Plan to fit your unique interests at UWMadison. Consult with your advisor about the best plan for you.

\section*{SAMPLE BIOLOGY MAJOR FOUR-YEAR PLAN}

Electives

\section*{Total Credits 120}

1
Follow the guidance of Math placement scores when choosing a Mathematics and/or Statistics course.

2
Students may complete one of three Introductory Biology sequences. See the Requirements tab for more information.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Your advisor is here to guide you through the biology major. We can address your questions and concerns, provide advice, help you create a four-year degree plan that meets your major and professional goals, and connect you to resources. It is important to remember that advising is about the process, and some questions do not have a quick and easy answer. Your advisor will challenge you to self-reflect, to critically think about your goals and strategies, and to develop decision-making skills. For more information about what to expect during your advising appointment, visit UW Undergraduate Advising (https://advising.wisc.edu/soar/ advising-101/).

In the biology major, students are assigned to an adviser according to last name. Please visit us here (http://biologymajor.wisc.edu/advising/) to schedule an advising appointment.

\section*{CAREERS}

The biology major encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{WISCONSIN EXPERIENCE}

\section*{WISCONSIN EXPERIENCE}

The following opportunities can help students connect with other students interested in biology, build relationships with faculty and staff, and contribute to out-of-classroom learning:
- Many study abroad programs offer a plethora of excellent upper level bioscience courses. Students often complete courses abroad that meet upper-level breadth in the major requirements (categories A-E) while others use this opportunity to focus on non-science coursework and explore other topics that interest them. Review the Biology Major advising page (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biology/) on the Study Abroad website to explore international academic programs.
- Students are encouraged to get involved in research in any life science department. Research can be performed for either course credit or pay, depending on the opportunity. Research opportunities
can be identified by inquiring directly (https://biology.wisc.edu/ finding-mentor/) with faculty members, reading the Biology Major Newsletter, or announcement on the Student Job Center (https:// jobcenter.wisc.edu/).

\section*{BIOLOGY: EVOLUTIONARY BIOLOGY}

The Evolutionary Biology Named Option allows biology majors to concentrate their studies in evolution and to have this reflected on their transcript. Since there is no evolutionary biology major available at UWMadison, this is the only mechanism to indicate specialization in this rapidly growing and popular field. In taking this named option, students will be able to fulfill their intermediate/advanced biology requirement with courses that emphasize evolutionary biology, ranging from required courses in fundamental evolutionary biology to more advanced optional courses that cover a wide range of evolutionary biology topics. They will also take a seminar course in evolutionary biology.

Who should enroll in this option? Students with broad interest in the biological sciences who want to:
- Prepare for graduate study in evolutionary biology or related fields
- Prepare for professional studies (e.g. medical school, veterinary school, dentistry)
- Concentrate their biological studies in evolutionary biology

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE NAMED OPTION}

Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, Additional Lab or Field Research, and Evolutionary Biology Seminar requirements. Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

\section*{CORE REQUIREMENTS}

Mathematics and Statistics
\begin{tabular}{llr} 
Code & Title & Credits \\
Complete one of the following: & \(5-10\) \\
MATH 221 & Calculus and Analytic Geometry 1 & \\
\hline MATH 171 & \begin{tabular}{l} 
Calculus with Algebra and \\
\& MATH 217 \\
Trigonometry I \\
and Calculus with Algebra and \\
Trigonometry II
\end{tabular} & 3-4 \\
Complete one of the following: & \\
\hline STAT 240 & \begin{tabular}{l} 
Data Science Modeling I \\
STAT 301
\end{tabular} & \begin{tabular}{l} 
Introduction to Statistical Methods
\end{tabular} \\
\hline STAT 371 & \begin{tabular}{l} 
Introductory Applied Statistics for \\
the Life Sciences
\end{tabular} \\
\hline
\end{tabular}

\section*{EVOLUTIONARY BIOLOGY SEMINAR}

\author{
Code \\ BIOLOGY/ \\ GENETICS 522 \\ Title \\ Communicating Evolutionary Biology \\ \section*{Credits}
}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all BIOLOGY and major courses
- 2.000 GPA on at least 15 credits of Upper-Level work in the major, in Residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{FOOTNOTES}

\section*{1}

Course also approved for lab credit
2
Foundation and Upper-Level Breadth in the Major courses are considered Upper-Level for purposes of this requirement.

\section*{BIOLOGY:PLANT BIOLOGY}

Admissions to the Biology: Plant Biology, B.S. named option have been suspended as of fall 2021 and will be discontinued as of fall 2024. If you have any questions, please contact the department.

The Plant Biology Option allows biology majors to focus their studies on plant science and to have this reflected on their transcript. There are a number of departments at UW-Madison who host plant sciencebased majors, including agronomy, botany, horticulture, plant pathology, and forest and wildlife ecology. While those specialized majors offer in-depth programs in their disciplines, the plant biology option allows students to pursue a course of study within the biology major and explore plant biology at the same time. Students in this option can fulfill their requirements with courses that emphasize various aspects of plant science, including anatomy, physiology, genetics, crop production, disease resistance, and molecular techniques in plant improvement. Students also participate in a one-credit seminar called Frontiers in Plant Science taught by two faculty from plant science departments.

Who should enroll in this option? Students with broad interest in biological sciences who also want to:
- Prepare for graduate work in a plant science field
- Prepare for advanced study or graduate work in a natural or environmental science field
- Concentrate their studies on the biology of plants

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE NAMED OPTION}

Students must complete a minimum of 31 credits of Biological Science courses within the Introductory Biology, Foundation Course, Upper-Level Breadth in the Major, and Additional Lab or Field Research requirements.

Unless specifically stated otherwise, courses may not be used to meet multiple requirements of the major.

\section*{ADDITIONAL LAB OR FIELD RESEARCH}

In addition to the Lab requirement, complete one of the following requirements:
- Complete one additional lab course and at least two credits from categories A-E in the Upper-Level Breadth in the Major course lists, or
- Complete at least two credits of directed study in a biological science discipline, or
- Complete a two-semester thesis in biological science.

\section*{Approved Directed Study Courses}

To have Directed Study count for the Additional Lab/Field Research requirement, students must first complete an Introductory Biology sequence.

- 2.000 GPA in all BIOLOGY and major courses
- 2.000 GPA on at least 15 credits of Upper-Level work in the major, in Residence \({ }^{2}\)
- 15 credits in the major, taken on the UW-Madison campus

\section*{FOOTNOTES}

\author{
1 \\ Course also approved for lab credit \\ 2
}

Foundation and Upper-Level Breadth in the Major courses are considered Upper-Level for purposes of this requirement.

\section*{MOLECULAR AND CELL BIOLOGY, B.A.}

\section*{ABOUT THE MAJOR}

Molecular and Cell Biology is the basic science that seeks an understanding of biological processes in terms of the properties and functions of the molecules that make up living cells. The scope of questions addressed in molecular and cell biology ranges from evolution to development to the regulation of gene expression. A career in molecular and cell biology requires a strong background in biology as well as a solid foundation in chemistry, mathematics, and physics.

The Molecular and Cell Biology major has been designed primarily for three groups of students:
1. those who plan to enter a research career in molecular and cell biology or related areas such as biochemistry, genetics, oncology, microbiology, cell biology or developmental biology;
2. pre-professional students who plan to enter either a research or clinical career in medicine, or allied health fields;
3. students who plan to pursue careers in the biotechnology and pharmaceutical science industries.

Students with other interests are also welcome, of course. Career opportunities for students with an undergraduate degree in molecular and cell biology are amazingly diverse. Graduates of the program have gone into patent law, science journalism, forensics, philosophy, nutrition, genetic counseling, veterinary medicine, anthropology, archeology, marine biology, theology, and much more (https:// molecularbiologymajor.wiscweb.wisc.edu/wp-content/uploads/ sites/290/2017/07/What_can_I_do_with_a_MolBio_Major_.pdf).

Major requirements have been set to assure a high degree of proficiency in the various areas specified while still allowing as much flexibility as possible for students to individualize their programs. For the undergraduate interested in life sciences, this major uniquely provides access to the extraordinary scope and strength of biology courses and laboratories on the UW-Madison campus. Each student in the major is assigned a faculty advisor, and it is hoped that students will take advantage of both the staff and faculty advising service available to make a judicious choice of courses, as well as to gain scholarly experience outside the classroom that will further their academic and career goals.

Students who wish to obtain further information about the program or to declare a molecular biology major should contact the student services coordinator. (https://molecularbio.ls.wisc.edu/advising/) Faculty advisors are assigned through the program office and are located in many related departments throughout campus. Molecular and Cell Biology faculty advisors are especially competent to provide counsel regarding the major and career opportunities in molecular biology.

\section*{UNDERGRADUATE RESEARCH}

Undergraduate Molecular and Cell Biology students at UW-Madison are fortunate to have the opportunity to work with some of the world's leading researchers. Many opportunities for laboratory research experience are available on campus for undergraduate students and this type of experiences is strongly encouraged. Such an experience provides students the opportunity to apply what they're learning and complement their knowledge with practical skills. Research experience is highly valued by employers, graduate programs, and professional schools. See the major website (https://molecularbio.Is.wisc.edu/undergraduate-research/) for more information on how to get involved in undergraduate research.

\section*{HOW TO GET IN}

To declare the Molecular and Cell Biology major, students must make an appointment with the Molecular and Cell Biology academic advising manager through Starfish.

Students who intend to major in Molecular and Cell Biology may not combine this major ("double major") with the Biology or Biochemistry majors in either the College of Letters and Science or the College of Agricultural and Life Sciences (CALS).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
- Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
Foreign
- Complete the fourth unit of a foreign language; OR

Language
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth

\footnotetext{
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
}
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison & - 30 credits in residence, overall; and \\
\hline Experience & - 30 credits in residence after the 86th credit. \\
\hline Quality of & - 2.000 in all coursework at UW-Madison \\
\hline Work & - 2.000 in Intermediate/Advanced level coursework at UW-Madison \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR \\ MATHEMATICS, CHEMISTRY \& PHYSICS}

\end{tabular}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all MOL BIOL and major courses
- 2.000 GPA on at least 15 credits of upper-level in the major, taken in residence \({ }^{3}\)
- 15 credits in MOL BIOL, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Molecular Biology and Cell Biology major in consultation with the Molecular and Cell Biology undergraduate advisor.

\section*{HONORS IN THE MOLECULAR AND CELL BIOLOGY MAJOR REQUIREMENTS}

To earn Honors in the Major in Molecular and Cell Biology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all courses accepted in the major
- Complete at least 15 credits of honors courses in the major while in residence at UW-Madison. This requirement can be broken down as indicated below:
- At least 9 credits from the Breadth and Depth course options in the Molecular and Cell Biology major
- Complete two semester Senior Honors Thesis, a piece of original research composition.
\begin{tabular}{llr} 
Code & Title & Credits \\
MOL BIOL 681 & Senior Honors Thesis & 3 \\
MOL BIOL 682 & Senior Honors Thesis & 3 \\
\hline \begin{tabular}{ll} 
Complete one semester of the Molecular Biology senior honors \\
seminar course. \\
Code
\end{tabular} & Title & Credits \\
MOL BIOL 686 & Senior Honors Seminar in & 1 \\
& Molecular Biology &
\end{tabular}

\section*{FOOTNOTES}

1
BIOCORE is a competitive honors program and certificate.
2
Students are encouraged to see their advisor for assistance in choosing depth coursework.
3
Courses accepted in the major that are Intermediate or Advanced are considered upper-level in this major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Integrate the energetic and thermodynamic bases of life, with an emphasis on the molecular mechanisms underlying them
2. Integrate the nature of genetic material and its roles in inheritance, evolution, and cellular function
3. Summarize the fundamental relationship between the structure and function of biological macromolecules
4. Summarize the principles of cell structure, function, and biological dynamics
5. Appraise the molecular mechanisms and quantitative principles in biochemistry/physical chemistry, cellular systems, genetics, and microbiology.
6. Develop skills to communicate scientific information in oral and written form
7. Develop the ability to formulate hypotheses and plan, design, and carry out scientific experiments to test them
8. Developing quantitative reasoning skills and the ability to use quantitative approaches to understand basic principles of life.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{Total Credits 120}

1
INTER-LS 210 L\&S Career Development: Taking Initiative is an option, but not required for students pursuing the Molecular and Cell Biology major.

\section*{ADVISING AND CAREERS}

Students in the major are assigned to a team of advisors composed of a faculty advisor and the major's student services coordinator. See the major's advising page (https://molecularbio.ls.wisc.edu/advising/) for a list of advisors and for the student services coordinator information. The faculty advisor provides guidance specific to the molecular and cell biology discipline through discussions about undergraduate experiences (i.e., research, coursework, internships) that will help prepare students for graduate work or a career after graduation. The student services coordinator provides guidance specific to the discipline, and also helps students with major declarations, course selection, registration, DARS, L\&S degree and major requirements, and tracking progress toward graduation, as well as connecting students with important resources on campus.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students: - INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Committee of Advisors: Ahmad (Dermatology), Amann (Integrative Biology), Fabry (Pathology and Laboratory Medicine), Filutowicz (Bacteriology), Grinblat (Neuroscience), Martin (Biochemistry), McMahon (Civil Engineering and Environmental Engineering), Newmark (Integrative Biology), Otegui (Botany), Raman (Biochemistry), Schuler (Comparative Biosciences)

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{HILLDALE UNDERGRADUATE/FACULTY RESEARCH FELLOWSHIP}

The Hilldale (https://awards.advising.wisc.edu/all-scholarships/ hilldale-undergraduatefaculty-research-fellowship/) Undergraduate/ Faculty Research Fellowships support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Approximately 97-100 Hilldale awards are available each year. The student researcher receives \$3,000, and faculty/staff research advisor receives \(\$ 1,000\) to help offset research costs (e.g., supplies, faculty or student travel related to the project).

\section*{HOLSTROM ENVIRONMENTAL RESEARCH FELLOWSHIP}

The Holstrom Environmental Research Fellowship (https:// awards.advising.wisc.edu/all-scholarships/holstrom-enviromental-research-fellowship/) supports undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Research proposals must have an environmental focus, and applicants must have at least a junior standing at time of application.

\section*{SOPHOMORE RESEARCH FELLOWSHIP}

Funded by grants from the Brittingham Fund and the Kemper K. Knapp Bequest, the Sophomore Research Fellowships (https:// awards.advising.wisc.edu/all-scholarships/sophomore-researchfellowship/) support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Approximately 15 awards are available.

\section*{UNDERGRADUATE RESEARCH SCHOLARS}

The Undergraduate Research Scholars (https://urs.Is.wisc.edu/) (URS) program is dedicated to enhancing the academic experience of UW-Madison students by providing first- and second-year undergraduates with opportunities to earn credit for participating in research and creative work with UW-Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/ artistic presentations. The many benefits of the program are found in the fluid interaction between these activities.

\section*{UNDERGRADUATE SYMPOSIUM}

The annual Undergraduate Symposium (https:// ugradsymposium.wisc.edu/) showcases undergraduate creativity, achievement, research, service-learning, and community-based research from all areas of study at UW-Madison including the humanities, fine arts, biological sciences, physical sciences, and social sciences. This past year nearly 700 students presented, displayed, or performed their work for members of the university, the surrounding community, family, and friends.

\section*{UNIVERSITY BOOK STORE AWARD}

Supported by a generous grant from the University Book Store, (https:// awards.advising.wisc.edu/all-scholarships/university-book-store-award/) this award recognizes undergraduate students who have completed an outstanding independent project, such as a senior thesis, at UW-Madison. Projects in all academic fields are eligible.

\section*{WISCONSIN IDEA FELLOWSHIPS}

Wisconsin Idea Fellowships (https://morgridge.wisc.edu/students/ wisconsin-idea-fellowships/) are awarded annually to undergraduate student projects working toward solving a challenge identified along with local or global community partners. Fellowships are awarded to semesterlong or year-long projects designed by an undergraduate student (or group of students) in collaboration with a community organization and a UW-Madison faculty or academic staff member.

\section*{MOLECULAR AND CELL BIOLOGY, B.S.}

\section*{ABOUT THE MAJOR}

Molecular and Cell Biology is the basic science that seeks an understanding of biological processes in terms of the properties and functions of the molecules that make up living cells. The scope of questions addressed in molecular and cell biology ranges from evolution to development to the regulation of gene expression. A career in molecular and cell biology requires a strong background in biology as well as a solid foundation in chemistry, mathematics, and physics.

The Molecular and Cell Biology major has been designed primarily for three groups of students:
1. those who plan to enter a research career in molecular and cell biology or related areas such as biochemistry, genetics, oncology, microbiology, cell biology or developmental biology;
2. pre-professional students who plan to enter either a research or clinical career in medicine, or allied health fields;
3. students who plan to pursue careers in the biotechnology and pharmaceutical science industries.

Students with other interests are also welcome, of course. Career opportunities for students with an undergraduate degree in molecular and cell biology are amazingly diverse. Graduates of the program have gone into patent law, science journalism, forensics, philosophy, nutrition, genetic counseling, veterinary medicine, anthropology, archeology, marine biology, theology, and much more (https:// molecularbiologymajor.wiscweb.wisc.edu/wp-content/uploads/ sites/290/2017/07/What_can_I_do_with_a_MolBio_Major_.pdf).

Major requirements have been set to assure a high degree of proficiency in the various areas specified while still allowing as much flexibility as possible for students to individualize their programs. For the undergraduate interested in life sciences, this major uniquely provides access to the extraordinary scope and strength of biology courses and laboratories on the UW-Madison campus. Each student in the major is assigned a faculty advisor, and it is hoped that students will take advantage of both the staff and faculty advising service available to make a judicious choice of courses, as well as to gain scholarly experience outside the classroom that will further their academic and career goals.

Students who wish to obtain further information about the program or to declare a molecular biology major should contact the student services coordinator. (https://molecularbio.ls.wisc.edu/advising/) Faculty advisors are assigned through the program office and are located in many related departments throughout campus. Molecular and Cell Biology faculty advisors are especially competent to provide counsel regarding the major and career opportunities in molecular biology.

\section*{UNDERGRADUATE RESEARCH}

Undergraduate Molecular and Cell Biology students at UW-Madison are fortunate to have the opportunity to work with some of the world's leading researchers. Many opportunities for laboratory research experience are available on campus for undergraduate students and this type of experiences is strongly encouraged. Such an experience provides students the opportunity to apply what they're learning and complement their knowledge with practical skills. Research experience is highly valued by employers, graduate programs, and professional schools. See the major website (https://molecularbio.Is.wisc.edu/undergraduate-research/) for more information on how to get involved in undergraduate research.

\section*{HOW TO GET IN}

To declare the Molecular and Cell Biology major, students must make an appointment with the Molecular and Cell Biology academic advising manager through Starfish.

Students who intend to major in Molecular and Cell Biology may not combine this major ("double major") with the Biology or Biochemistry majors in either the College of Letters and Science or the College of Agricultural and Life Sciences (CALS).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language. Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits. and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll} 
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.
\begin{tabular}{|c|c|c|}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all MOL BIOL and major courses
- 2.000 GPA on at least 15 credits of upper-level in the major, taken in residence \({ }^{3}\)
- 15 credits in MOL BIOL, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Molecular Biology and Cell Biology major in consultation with the Molecular and Cell Biology undergraduate advisor.

\section*{HONORS IN THE MOLECULAR AND CELL BIOLOGY MAJOR REQUIREMENTS}

To earn Honors in the Major in Molecular and Cell Biology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 overall university GPA
- Earn a 3.300 GPA for all courses accepted in the major
- Complete at least 15 credits of honors courses in the major while in residence at UW-Madison. This requirement can be broken down as indicated below:
- At least 9 credits from the Breadth and Depth course options in the Molecular and Cell Biology major
- Complete two semester Senior Honors Thesis, a piece of original research composition.
Code Title Credits

MOL BIOL 681 Senior Honors Thesis 3
MOL BIOL 682 Senior Honors Thesis
- Complete one semester of the Molecular Biology senior honors seminar course.

\section*{Code}

MOL BIOL 686

\section*{Title}

Senior Honors Seminar in
Credits

Molecular Biology

\section*{FOOTNOTES}

BIOCORE is a competitive honors program and certificate.

Students are encouraged to see their advisor for assistance in choosing depth coursework.

3

Courses accepted in the major that are Intermediate or Advanced are considered upper-level in this major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Integrate the energetic and thermodynamic bases of life, with an emphasis on the molecular mechanisms underlying them
2. Integrate the nature of genetic material and its roles in inheritance, evolution, and cellular function
3. Summarize the fundamental relationship between the structure and function of biological macromolecules
4. Summarize the principles of cell structure, function, and biological dynamics
5. Appraise the molecular mechanisms and quantitative principles in biochemistry/physical chemistry, cellular systems, genetics, and microbiology.
6. Develop skills to communicate scientific information in oral and written form
7. Develop the ability to formulate hypotheses and plan, design, and carry out scientific experiments to test them
8. Developing quantitative reasoning skills and the ability to use quantitative approaches to understand basic principles of life.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in
athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Total Credits 120

\section*{1}

INTER-LS 210 L\&S Career Development: Taking Initiative is an option, but not required for students pursuing the Molecular and Cell Biology major.

\section*{ADVISING AND CAREERS}

Students in the major are assigned to a team of advisors composed of a faculty advisor and the major's student services coordinator. See the major's advising page (https://molecularbio.ls.wisc.edu/advising/) for a list of advisors and for the student services coordinator information. The faculty advisor provides guidance specific to the molecular and cell biology discipline through discussions about undergraduate experiences
(i.e., research, coursework, internships) that will help prepare students for graduate work or a career after graduation. The student services coordinator provides guidance specific to the discipline, and also helps students with major declarations, course selection, registration, DARS, \(L \& S\) degree and major requirements, and tracking progress toward graduation, as well as connecting students with important resources on campus.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students: - INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Committee of Advisors: Ahmad (Dermatology), Amann (Integrative Biology), Fabry (Pathology and Laboratory Medicine), Filutowicz (Bacteriology), Grinblat (Neuroscience), Martin (Biochemistry), McMahon (Civil Engineering and Environmental Engineering), Newmark (Integrative Biology), Otegui (Botany), Raman (Biochemistry), Schuler (Comparative Biosciences)

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{HILLDALE UNDERGRADUATE/FACULTY RESEARCH FELLOWSHIP}

The Hilldale (https://awards.advising.wisc.edu/all-scholarships/ hilldale-undergraduatefaculty-research-fellowship/) Undergraduate/ Faculty Research Fellowships support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic
staff. Approximately 97-100 Hilldale awards are available each year. The student researcher receives \(\$ 3,000\), and faculty/staff research advisor receives \(\$ 1,000\) to help offset research costs (e.g., supplies, faculty or student travel related to the project).

\section*{HOLSTROM ENVIRONMENTAL RESEARCH FELLOWSHIP}

The Holstrom Environmental Research Fellowship (https:// awards.advising.wisc.edu/all-scholarships/holstrom-enviromental-research-fellowship/) supports undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Research proposals must have an environmental focus, and applicants must have at least a junior standing at time of application.

\section*{SOPHOMORE RESEARCH FELLOWSHIP}

Funded by grants from the Brittingham Fund and the Kemper K. Knapp Bequest, the Sophomore Research Fellowships (https:// awards.advising.wisc.edu/all-scholarships/sophomore-researchfellowship/) support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Approximately 15 awards are available.

\section*{UNDERGRADUATE RESEARCH SCHOLARS}

The Undergraduate Research Scholars (https://urs.Is.wisc.edu/) (URS) program is dedicated to enhancing the academic experience of UW-Madison students by providing first- and second-year undergraduates with opportunities to earn credit for participating in research and creative work with UW-Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/ artistic presentations. The many benefits of the program are found in the fluid interaction between these activities.

\section*{UNDERGRADUATE SYMPOSIUM}

The annual Undergraduate Symposium (https:// ugradsymposium.wisc.edu/) showcases undergraduate creativity, achievement, research, service-learning, and community-based research from all areas of study at UW-Madison including the humanities, fine arts, biological sciences, physical sciences, and social sciences. This past year nearly 700 students presented, displayed, or performed their work for members of the university, the surrounding community, family, and friends.

\section*{UNIVERSITY BOOK STORE AWARD}

Supported by a generous grant from the University Book Store, (https:// awards.advising.wisc.edu/all-scholarships/university-book-store-award/) this award recognizes undergraduate students who have completed an outstanding independent project, such as a senior thesis, at UW-Madison. Projects in all academic fields are eligible.

\section*{WISCONSIN IDEA FELLOWSHIPS}

Wisconsin Idea Fellowships (https://morgridge.wisc.edu/students/ wisconsin-idea-fellowships/) are awarded annually to undergraduate student projects working toward solving a challenge identified along with local or global community partners. Fellowships are awarded to semesterlong or year-long projects designed by an undergraduate student (or group of students) in collaboration with a community organization and a UW-Madison faculty or academic staff member.

\section*{NEUROBIOLOGY, B.A.}

Neuroscience is the scientific study of the central (brain and spinal cord) and peripheral (nerves in body) nervous system. The neurobiology major at UW-Madison will provide a rigorous education in neuroscience principles that will prepare students for health-related careers (physician, physician assistant, veterinarian, dentist, neuroimaging technician, speech-language pathologist, neuropsychologist, drug rehabilitation counselor, physical therapists), academic careers (college and university faculty, research scientists, lab technician, K-12 teachers), and careers in pharmaceutical and biotech industries, venture capital and scientific consulting firms, medical and scientific journals, intellectual property law, neuroscience-related nonprofit organizations and foundations, and government agencies. UW-Madison is one of the leading universities in the world with more than 90 faculty engaged in neuroscience research and undergraduates will have access to this research faculty in formal classroom environments and through undergraduate research opportunities. Please see the Neurobiology Major (https:// neuromajor.wisc.edu) website for more information.

\begin{abstract}
ABOUT THE CURRICULUM
The curriculum is designed to give students a solid foundation in basic biology, chemistry, physics, and mathematics before going on to study neuroscience at the molecular, cellular, systems, and cognitive levels. It is strongly encouraged that students engage in independent research in a neuroscience laboratory on campus. The Neurobiology Major Program Committee is committed to increasing opportunities for all students with interests in neuroscience and helping students accomplish their academic goals at UW-Madison. This major is tailored to attract students from a diverse array of backgrounds. Please see the Neurobiology Major website (https://neuromajor.wisc.edu) for more information.
\end{abstract}

\section*{HOW TO GET IN}

The advisors for the Neurobiology Major (https:// neuromajor.wisc.edu/)are committed to providing students with first-rate guidance through the major to graduation and beyond. Most students are ready to declare a major by the end of the 3rd or 4th semester. If you are interested in declaring the Neurobiology Major, you must first make an appointment to meet with an advisor.

See our website (https://neuromajor.wisc.edu/advising/) to schedule an appointment.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework
Foreign - Complete the fourth unit of a foreign language; OR

Language . Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
Liberal Arts
and Science Complete at least 108 credits.
Quality of
- 2.000 in all coursework at UW-Madison
Work
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

- 2.000 GPA in all major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence \({ }^{4}\)
- 15 credits in in the major, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Neurobiology Major in consultation with the Neurobiology undergraduate advisor(s).

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major in Neurobiology, students must satisfy both the requirements for the major (above) and the following additional requirements:

\footnotetext{
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all major courses
- Complete 14 credits, taken for Honors, with individual grades of B or better, while in residence, to include:
}
- Two courses from PSYCH 454, ZOOLOGY/PSYCH 523, and ZOOLOGY 500
- One course from the Required Neuroscience or Distributed Neuroscience course lists (above), taken for honors credit
- A two-semester Senior Honors Thesis \({ }^{5}\), for a total of 6 credits, from:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \begin{tabular}{l}
BIOCHEM 681 \\
\& BIOCHEM 682
\end{tabular} & Senior Honors Thesis and Senior Honors Thesis & \\
\hline BIOLOGY 681 \& BIOLOGY 682 & Senior Honors Thesis and Senior Honors Thesis & \\

\hline NUTR SCI 681 \& NUTR SCI 682 & Senior Honors Thesis and Senior Honors Thesis & \\
\hline \begin{tabular}{l}
PSYCH 681 \\
\& PSYCH 682
\end{tabular} & Senior Honors Thesis and Senior Honors Thesis & \\
\hline \begin{tabular}{l}
ZOOLOGY 681 \\
\& ZOOLOGY 682
\end{tabular} & Senior Honors Thesis and Senior Honors Thesis & \\
\hline
\end{tabular}

\section*{FOOTNOTES}

1
Students may apply only one DNS course toward the elective requirement 2

Lab courses may also count in the Distributed Neuroscience Coursework above.
3
Only Directed Study courses taken after-and not concurrent with-the completion of an Introductory Biology sequence are accepted in the major.

\section*{4}

Major courses numbered 300-699 are considered upper-level.
5
The Senior Honors Thesis project must be approved by the Neurobiology Major Program Committee at least one month before beginning the first course (681). The project must focus on its relevance to a neurosciencerelated topic. Please see the Neurobiology major website (https:// neuromajor.wisc.edu/) for more information.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Demonstrate understanding of basic concepts in biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate understanding of the ionic basis for the neuronal membrane potential and action potential, and as well as the factors that determine neuronal excitability.
3. Demonstrate understanding of the basic mechanisms for synaptic transmission, neurotransmitter release, postsynaptic effects, and modulation of pre- and postsynaptic mechanisms. Predict how specific physiological and pathological conditions alter neuronal function at the cellular and synaptic levels.
4. Differentiate between examples of neuroplasticity at cellular, systems, and organismal levels.
5. Demonstrate understanding of central and peripheral neuroanatomy, basic functions of brain regions, and well-known neural pathways. Predict how localized disruptions of neuronal function alter behavior, motor function, or perception.
6. Demonstrate understanding of basic principles underlying motor function, sensory function (auditory, visual, touch, taste), emotion, autonomic regulation, and higher order cognitive functions (language, memory, attention, decision-making).
7. Demonstrate how experimental tools in neuroscience are used to address experimental questions, such as intra/extracellular recording, molecular biology techniques, immunohistochemical staining, fluorescent and electron microscopy, genetic manipulation, brain imaging, behavioral testing.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved
examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

The grid below is a suggested plan for finishing your Neurobiology major in 4 years. Please see an advisor for more information, as you may have completed some of the requirements listed.

\end{tabular}

\section*{Total Credits 120}

1
There are several options for fulfilling the introductory biology requirement. See listed Requirements.
2
There are several options for fulfilling the Physics requirement. See listed Requirements.

Students must declare a major by the time they reach 86 credits.

It is recommended that students in the Neurobiology major participate in multiple semesters of research.

\section*{ADVISING AND CAREERS}

\section*{NEUROBIOLOGY MAJOR ADVISING}

The advisors for the neurobiology major are committed to providing students with first-rate guidance through the major and to graduation. The neurobiology major advisors are also dedicated to helping a student focus their future plans after undergraduate study. If you are interested in declaring the neurobiology major, make an appointment to discuss this.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Neurobiology is a major in the Department of Integrative Biology. The faculty in this department are:

Professors: Hardin (chair, jdhardin@wisc.edu), Bement, Blair, Damschen, Gammie, Halloran, Ives, Lee, Newmark, Orrock, Riters, Stanley, Stretton, Turner, and Vander Zanden

Associate Professors Amann, Grinblat, and Jensen
Assistant Professors Dugan, Sharma, Wang, and Weber
Neurobiology Major Steering Committee: Michelle Ciucci (chair, Departments of Communication Disorders and Surgery), Stephen Gammie (Department of Integrative Biology), Vaishali Bakshi (Department of Psychiatry), Darcie Moor (Department of Neuroscience), Yuri Saalmann (Department of Psychology).

\section*{NEUROBIOLOGY, B.S.}

Neuroscience is the scientific study of the central (brain and spinal cord) and peripheral (nerves in body) nervous system. The neurobiology major at UW-Madison will provide a rigorous education in neuroscience principles that will prepare students for health-related careers (physician, physician assistant, veterinarian, dentist, neuroimaging technician, speech-language pathologist, neuropsychologist, drug rehabilitation counselor, physical therapists), academic careers (college and university faculty, research scientists, lab technician, K-12 teachers), and careers in pharmaceutical and biotech industries, venture capital and scientific consulting firms, medical and scientific journals, intellectual property law, neuroscience-related nonprofit organizations and foundations, and government agencies. UW-Madison is one of the leading universities in the world with more than 90 faculty engaged in neuroscience research and undergraduates will have access to this research faculty in formal classroom environments and through undergraduate research opportunities. Please see the Neurobiology Major (https:// neuromajor.wisc.edu) website for more information.

\section*{ABOUT THE CURRICULUM}

The curriculum is designed to give students a solid foundation in basic biology, chemistry, physics, and mathematics before going on to study neuroscience at the molecular, cellular, systems, and cognitive levels. It is strongly encouraged that students engage in independent research in a neuroscience laboratory on campus. The Neurobiology Major Program Committee is committed to increasing opportunities for all students with interests in neuroscience and helping students accomplish their academic
goals at UW-Madison. This major is tailored to attract students from a diverse array of backgrounds. Please see the Neurobiology Major website (https://neuromajor.wisc.edu) for more information.

\section*{HOW TO GET IN}

The advisors for the Neurobiology Major (https:// neuromajor.wisc.edu/)are committed to providing students with first-rate guidance through the major to graduation and beyond. Most students are ready to declare a major by the end of the 3rd or 4th semester. If you are interested in declaring the Neurobiology Major, you must first make an appointment to meet with an advisor.

See our website (https://neuromajor.wisc.edu/advising/) to schedule an appointment.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General •Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of \(3+\) credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR MATH, STATISTICS, CHEMISTRY \& PHYSICS}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence \({ }^{4}\)
- 15 credits in in the major, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Neurobiology Major in consultation with the Neurobiology undergraduate advisor(s).

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major in Neurobiology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all major courses
- Complete 14 credits, taken for Honors, with individual grades of B or better, while in residence, to include:
- Two courses from PSYCH 454, ZOOLOGY/PSYCH 523, and ZOOLOGY 500
- One course from the Required Neuroscience or Distributed Neuroscience course lists (above), taken for honors credit
- A two-semester Senior Honors Thesis \({ }^{5}\), for a total of 6 credits, from:
\begin{tabular}{|c|c|c|}
\hline Code & & Credits \\
\hline \begin{tabular}{l}
BIOCHEM 681 \\
\& BIOCHEM 682
\end{tabular} & Senior Honors Thesis and Senior Honors Thesis & \\
\hline BIOLOGY 681 \& BIOLOGY 682 & Senior Honors Thesis and Senior Honors Thesis & \\
\hline B M E 389 \& B M E 489 & Honors in Research and Honors in Research & \\

\end{tabular} & Senior Honors Thesis and Senior Honors Thesis & \\
\hline
\end{tabular}

\section*{FOOTNOTES}

\section*{1}

Students may apply only one DNS course toward the elective requirement 2

Lab courses may also count in the Distributed Neuroscience Coursework above.
3
Only Directed Study courses taken after-and not concurrent with-the completion of an Introductory Biology sequence are accepted in the major.

\section*{4}

Major courses numbered 300-699 are considered upper-level.
5
The Senior Honors Thesis project must be approved by the Neurobiology Major Program Committee at least one month before beginning the first course (681). The project must focus on its relevance to a neurosciencerelated topic. Please see the Neurobiology major website (https:// neuromajor.wisc.edu/) for more information.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Demonstrate understanding of basic concepts in biology, chemistry, mathematics, statistics, and physics.
2. Demonstrate understanding of the ionic basis for the neuronal membrane potential and action potential, and as well as the factors that determine neuronal excitability.
3. Demonstrate understanding of the basic mechanisms for synaptic transmission, neurotransmitter release, postsynaptic effects, and modulation of pre- and postsynaptic mechanisms. Predict how specific physiological and pathological conditions alter neuronal function at the cellular and synaptic levels.
4. Differentiate between examples of neuroplasticity at cellular, systems, and organismal levels.
5. Demonstrate understanding of central and peripheral neuroanatomy, basic functions of brain regions, and well-known neural pathways.

Predict how localized disruptions of neuronal function alter behavior, motor function, or perception.
6. Demonstrate understanding of basic principles underlying motor function, sensory function (auditory, visual, touch, taste), emotion, autonomic regulation, and higher order cognitive functions (language, memory, attention, decision-making).
7. Demonstrate how experimental tools in neuroscience are used to address experimental questions, such as intra/extracellular recording, molecular biology techniques, immunohistochemical staining, fluorescent and electron microscopy, genetic manipulation, brain imaging, behavioral testing.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

The grid below is a suggested plan for finishing your Neurobiology major in 4 years. Please see an advisor for more information, as you may have completed some of the requirements listed.

\section*{Total Credits 120}

1
There are several options for fulfilling the introductory biology requirement. See listed Requirements.
2
There are several options for fulfilling the Physics requirement. See listed Requirements.

3

Students must declare a major by the time they reach 86 credits.
4
It is recommended that students in the Neurobiology major participate in multiple semesters of research.

\section*{ADVISING AND CAREERS}

\section*{NEUROBIOLOGY MAJOR ADVISING}

The advisors for the neurobiology major are committed to providing students with first-rate guidance through the major and to graduation. The neurobiology major advisors are also dedicated to helping a student focus their future plans after undergraduate study. If you are interested in declaring the neurobiology major, make an appointment to discuss this.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps
students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Neurobiology is a major in the Department of Integrative Biology. The faculty in this department are:

Professors: Hardin (chair, jdhardin@wisc.edu), Bement, Blair, Damschen, Gammie, Halloran, Ives, Lee, Newmark, Orrock, Riters, Stanley, Stretton, Turner, and Vander Zanden

Associate Professors Amann, Grinblat, and Jensen

Assistant Professors Dugan, Sharma, Wang, and Weber
Neurobiology Major Steering Committee: Michelle Ciucci (chair, Departments of Communication Disorders and Surgery), Stephen Gammie (Department of Integrative Biology), Vaishali Bakshi (Department of Psychiatry), Darcie Moor (Department of Neuroscience), Yuri Saalmann (Department of Psychology).

\section*{ZOOLOGY, B.A.}

The zoology major is a gateway to the diverse areas of modern biology. The major can be tailored to prepare students for advanced study and careers in many different areas: health professions and public health; law; life sciences research in university, government, and industrial settings; education including museum, nature center, secondary school, and college teaching; biotechnology; and environmental studies.

Specialized preparation is offered in ecology, systematics, limnology, morphology, molecular biology, cellular biology, developmental biology,
genetics, neurobiology, physiology, evolution, and behavior. Several possible areas, emphasizing different interests, are outlined in the requirements tab. They include ecology, evolution, and behavior; anatomy, physiology, and organismal biology; and cellular, molecular, and developmental biology. The department encourages undergraduate participation in research and offers summer research scholarships to outstanding students.

\section*{GOALS OF THE ZOOLOGY MAJOR}

The zoology major emphasizes critical thinking and conceptual skills that come from an understanding of how scientific information is obtained and evaluated, and of how this information can be applied to societal issues. The major provides a solid foundation in genetic, cellular, physiological, ecological, and evolutionary principles, and in the related disciplines of chemistry, physics, and mathematics. As a result, the major fosters an understanding of biological complexity including the interrelationships among humans and natural systems.

The unique characteristics of the zoology major include:
- broad-based, yet integrated training in wide-ranging areas of biology;
- solid foundation of basic principles and processes in biology;
- flexibility and advising needed to allow students to tailor the major to their specific goals;
- wide range of opportunities for undergraduate involvement in independent research and senior thesis.

\section*{HOW TO GET IN}

All students who are interested in pursuing the zoology major must schedule an appointment with the Zoology Major advisor (https:// integrativebiology.wisc.edu/undergraduate-programs/zoology-major/ zoology-undergraduate-major-advising/). No major declaration forms are required to declare zoology major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.

Foreign
Language

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of
Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll}

& UW-Madison
\end{tabular}
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S \\ MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.
\begin{tabular}{|c|c|c|}
\hline \multicolumn{3}{|l|}{REQUIREMENTS FOR THE MAJOR} \\

\end{tabular}

A maximum of 6 credits of approved non-ZOOLOGY subject courses count toward the 30 credits required for the major. Students can take ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory for the Introductory Biology requirement is recommended for students who complete this sequence.

Only 3 credits of ANAT\&PHY 335 Physiology count toward the 6 credits of approved non-ZOOLOGY subject courses.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all ZOOLOGY and major courses
- 2.000 GPA on 15 Upper Level major credits, taken in Residence \({ }^{1}\)
- 15 credits in ZOOLOGY, or courses that count for the major, taken on the UW-Madison campus

1
ZOOLOGY 299-699, intermediate/advanced BIOCORE, and courses that count toward the major that have an intermediate/advanced designation are considered Upper Level in the major.

\section*{HONORS IN THE ZOOLOGY MAJOR}

To earn Honors in the Major in Zoology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in all courses that count toward the major
- Complete 12 credits, taken for Honors, with individual grades of B or better. Select 6 credits from ZOOLOGY 300-680 or approved non-ZOOLOGY subject courses (above).
- Complete ZOOLOGY 681 and ZOOLOGY 682, for a total of 6 credits. \({ }^{1}\)

1
A written thesis proposal must be approved by the thesis mentor and a department advisor. While most theses are completed during the fall and spring of a student's senior year, other combinations of terms are possible. More information about the proposal process, timing, and grading of a thesis can be found on the Department of Integrative Biology website.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Connect and describe the concepts that make up the structure and function of all living things through the principles of genetics, cellular biology, and physiology.
2. Demonstrate an understanding of the diversity of life through the principles of evolution.
3. Make connections between organisms, their habitats, and systems through the principles of ecology.
4. Make connections between the biological sciences to humans and ecological systems and appreciate the complexity of these systems.
5. Identify, think through, and solve a problem using quantitative reasoning and critical thinking skills.
6. Develop an ability to plan and carry out scientific experiments by obtaining and evaluating scientific information and effectively communicating information through oral and written presentations.
7. Understand current issues in biology and apply scientific knowledge to societal issues.
8. Make connections between self and natural world, and personal responsibility with social issues.
9. Develop a sense of competence in the field of study through research experiences and written and oral communication of findings.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{Freshman}

\section*{Total Credits 120}

1
Students can take ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory for the Introductory Biology requirement is recommended for students who complete this sequence.

Student may also satisfy Introductory Biology with BIOCORE. Consult the advisor for the program regarding this option.

ADVISING AND CAREERS

\section*{ADVISING}

Students are encouraged to consult with a department advisor to construct individual programs appropriate to their own needs. Please use Starfish or call 608-262-2742 to make an appointment with the zoology advisor. iBio Starfish (https://wisc.starfishsolutions.com/starfish-ops/dl/ instructor/serviceCatalog.html?bookmark=connection/78583/schedule)

\section*{DIRECTED STUDY}

The zoology major is an excellent scaffold for students interested in an undergraduate research experience. A maximum of 10 credits of Directed Studies (ZOOLOGY 299, ZOOLOGY 698, ZOOLOGY 699), Senior Thesis (ZOOLOGY 691, ZOOLOGY 692), or Senior Honors Thesis (ZOOLOGY 681, ZOOLOGY 682) will count toward the 30 credits required for the major.

The Department of Integrative Biology offers both ZOOLOGY 299 Directed Studies in Zoology and ZOOLOGY 699 Directed Studies in Zoology. ZOOLOGY 299 is recommended for students before they have completed their introductory biology course sequence, and ZOOLOGY 699 is recommended for students who have completed their introductory biology course sequence. Directed Studies in Zoology are graded on an A to F scale. Students cannot take Directed Studies on a pass/fail basis.

Directed Studies allows students to gain experience in a wide range of research areas in biology and to learn research techniques that are not easily taught in the classroom. Such experiences allow students to make more informed decisions about their future goals and careers.

Before students can enroll in ZOOLOGY 299 or ZOOLOGY 699, they must set up an appointment with a professor/mentor of their choice, and work with the professor/mentor to:
1. Decide the specific number of credits, and
2. Plan the work required to earn those credits.

Such plans can involve reviewing relevant literature in the area, developing a proposal for independent research, and/or conducting an experiment in the mentor's study area.

Students interested in doing in-depth research as undergraduates in an area of interest can elect to do a Senior Thesis or Senior Honors Thesis (see below). Students should contact a department advisor at the beginning of their junior year to explore possible research areas.

\section*{SENIOR THESIS}

Students interested in making a longer-term commitment to a research project may consider undertaking a Senior Thesis. Students should contact a department advisor during their junior year to explore possible research areas in zoology.

Zoology Senior Thesis Requirements:
1. Approval of a department advisor, and
2. Completion of ZOOLOGY 691 and ZOOLOGY 692, a two-semester thesis research sequence, during the senior year ( 6 credits).

It is recommended that candidates for the Senior Thesis take ZOOLOGY 699 during second semester junior year to prepare for the thesis.

\section*{CAREERS}

The Department of Integrative Biology encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science (https://careers.Is.wisc.edu/). L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Please visit the Faculty (https://integrativebiology.wisc.edu/faculty/) and Affiliate Faculty (https://integrativebiology.wisc.edu/affiliatedfaculty/) pages on the Integrative Biology website for information about our faculty and their research areas.

\section*{ZOOLOGY, B.S.}

The zoology major is a gateway to the diverse areas of modern biology. The major can be tailored to prepare students for advanced study and careers in many different areas: health professions and public health; law; life sciences research in university, government, and industrial settings; education including museum, nature center, secondary school, and college teaching; biotechnology; and environmental studies.

Specialized preparation is offered in ecology, systematics, limnology, morphology, molecular biology, cellular biology, developmental biology, genetics, neurobiology, physiology, evolution, and behavior. Several possible areas, emphasizing different interests, are outlined in the requirements tab. They include ecology, evolution, and behavior; anatomy, physiology, and organismal biology; and cellular, molecular, and developmental biology. The department encourages undergraduate participation in research and offers summer research scholarships to outstanding students.

\section*{GOALS OF THE ZOOLOGY MAJOR}

The zoology major emphasizes critical thinking and conceptual skills that come from an understanding of how scientific information is obtained and evaluated, and of how this information can be applied to societal issues. The major provides a solid foundation in genetic, cellular, physiological, ecological, and evolutionary principles, and in the related disciplines of chemistry, physics, and mathematics. As a result, the major fosters an understanding of biological complexity including the interrelationships among humans and natural systems.

The unique characteristics of the zoology major include:
- broad-based, yet integrated training in wide-ranging areas of biology;
- solid foundation of basic principles and processes in biology;
- flexibility and advising needed to allow students to tailor the major to their specific goals;
- wide range of opportunities for undergraduate involvement in independent research and senior thesis.

\section*{HOW TO GET IN}

All students who are interested in pursuing the zoology major must schedule an appointment with the Zoology Major advisor (https:// integrativebiology.wisc.edu/undergraduate-programs/zoology-major/ zoology-undergraduate-major-advising/). No major declaration forms are required to declare zoology major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

\section*{Foreign} Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts and Science
Coursework
Depth of \(\quad\) Complete at least 60 credits at the Intermediate or
Intermediate/ Advanced level.
Advanced

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR MATH, CHEMISTRY \& PHYSICS}

Total Credits 20-25

A maximum of 6 credits of approved non-ZOOLOGY subject courses count toward the 30 credits required for the major. Students can take ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory for the Introductory Biology requirement is recommended for students who complete this sequence.

1
Only 3 credits of ANAT\&PHY 335 Physiology count toward the 6 credits of approved non-ZOOLOGY subject courses.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all ZOOLOGY and major courses
- 2.000 GPA on 15 Upper Level major credits, taken in Residence \({ }^{1}\)
- 15 credits in ZOOLOGY, or courses that count for the major, taken on the UW-Madison campus

1
ZOOLOGY 299-699, intermediate/advanced BIOCORE, and courses that count toward the major that have an intermediate/advanced designation are considered Upper Level in the major.

\section*{HONORS IN THE ZOOLOGY MAJOR}

To earn Honors in the Major in Zoology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in all courses that count toward the major
- Complete 12 credits, taken for Honors, with individual grades of \(B\) or better. Select 6 credits from ZOOLOGY 300-680 or approved non-ZOOLOGY subject courses (above).
- Complete ZOOLOGY 681 and ZOOLOGY 682, for a total of 6 credits. \({ }^{1}\)

1
A written thesis proposal must be approved by the thesis mentor and a department advisor. While most theses are completed during the fall and spring of a student's senior year, other combinations of terms are possible. More information about the proposal process, timing, and grading of a thesis can be found on the Department of Integrative Biology website.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Connect and describe the concepts that make up the structure and function of all living things through the principles of genetics, cellular biology, and physiology.
2. Demonstrate an understanding of the diversity of life through the principles of evolution.
3. Make connections between organisms, their habitats, and systems through the principles of ecology.
4. Make connections between the biological sciences to humans and ecological systems and appreciate the complexity of these systems.
5. Identify, think through, and solve a problem using quantitative reasoning and critical thinking skills.
6. Develop an ability to plan and carry out scientific experiments by obtaining and evaluating scientific information and effectively communicating information through oral and written presentations.
7. Understand current issues in biology and apply scientific knowledge to societal issues.
8. Make connections between self and natural world, and personal responsibility with social issues.
9. Develop a sense of competence in the field of study through research experiences and written and oral communication of findings.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{Total Credits 120}

1
Students can take ZOOLOGY/BIOLOGY 101 Animal Biology and ZOOLOGY/BIOLOGY 102 Animal Biology Laboratory for the Introductory Biology requirement is recommended for students who complete this sequence.

Student may also satisfy Introductory Biology with BIOCORE. Consult the advisor for the program regarding this option.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students are encouraged to consult with a department advisor to construct individual programs appropriate to their own needs. Please use Starfish or call 608-262-2742 to make an appointment with the zoology advisor. iBio Starfish (https://wisc.starfishsolutions.com/starfish-ops/dl/ instructor/serviceCatalog.html?bookmark=connection/78583/schedule)

\section*{DIRECTED STUDY}

The zoology major is an excellent scaffold for students interested in an undergraduate research experience. A maximum of 10 credits of Directed Studies (ZOOLOGY 299, ZOOLOGY 698, ZOOLOGY 699), Senior Thesis (ZOOLOGY 691, ZOOLOGY 692), or Senior Honors Thesis (ZOOLOGY 681, ZOOLOGY 682) will count toward the 30 credits required for the major.

The Department of Integrative Biology offers both ZOOLOGY 299 Directed Studies in Zoology and ZOOLOGY 699 Directed Studies in Zoology. ZOOLOGY 299 is recommended for students before they have completed their introductory biology course sequence, and ZOOLOGY 699 is recommended for students who have completed their introductory biology course sequence. Directed Studies in Zoology are graded on an A to F scale. Students cannot take Directed Studies on a pass/fail basis.

Directed Studies allows students to gain experience in a wide range of research areas in biology and to learn research techniques that are not
easily taught in the classroom. Such experiences allow students to make more informed decisions about their future goals and careers.

Before students can enroll in ZOOLOGY 299 or ZOOLOGY 699, they must set up an appointment with a professor/mentor of their choice, and work with the professor/mentor to:
1. Decide the specific number of credits, and
2. Plan the work required to earn those credits.

Such plans can involve reviewing relevant literature in the area, developing a proposal for independent research, and/or conducting an experiment in the mentor's study area.

Students interested in doing in-depth research as undergraduates in an area of interest can elect to do a Senior Thesis or Senior Honors Thesis (see below). Students should contact a department advisor at the beginning of their junior year to explore possible research areas.

\section*{SENIOR THESIS}

Students interested in making a longer-term commitment to a research project may consider undertaking a Senior Thesis. Students should contact a department advisor during their junior year to explore possible research areas in zoology.

Zoology Senior Thesis Requirements:
1. Approval of a department advisor, and
2. Completion of ZOOLOGY 691 and ZOOLOGY 692, a two-semester thesis research sequence, during the senior year ( 6 credits).

It is recommended that candidates for the Senior Thesis take ZOOLOGY 699 during second semester junior year to prepare for the thesis.

\section*{CAREERS}

The Department of Integrative Biology encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science (https://careers.ls.wisc.edu/). L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Please visit the Faculty (https://integrativebiology.wisc.edu/faculty/) and Affiliate Faculty (https://integrativebiology.wisc.edu/affiliatedfaculty/) pages on the Integrative Biology website for information about our faculty and their research areas.

\section*{LA FOLLETTE SCHOOL OF PUBLIC AFFAIRS}

\section*{DEGREES/MAJORS/CERTIFICATES}
- Health Policy, Certificate (p. 1090)
- Public Policy, Certificate (p. 1093)

\section*{HEALTH POLICY, CERTIFICATE}

The Certificate in Health Policy offered through the La Follette School of Public Affairs prepares undergraduate students to navigate and shape health policy in Wisconsin and in the United States. Coursework covers key concepts and contemporary issues relevant to work within the complex world of U.S. health policy. Courses also build familiarity with analytic methods and approaches used to foster evidence-based health policy, focusing especially on policy levers that influence health equity.

UW-Madison graduates occupy a wide range of professional roles in the health sector, such as health care providers, accountants, IT professionals, small business owners, researchers, human resources specialists, engineers, and advocates. Across these roles, a foundational understanding of health policy has emerged as a key professional competency. Recognizing that leaders in this realm must engage diverse perspectives to successfully address complex issues, required courses are designed to foster interdisciplinary discussion and analysis, and a fieldwork experience will deepen learning in a professional setting.

\section*{HOW TO GET IN}

To declare the Certificate in Health Policy through the La Follette School of Public Affairs, students must:
- Hold UW-Madison sophomore standing or above, and be in good academic standing, according to the rules of your school or college
- Have taken, are enrolled, or have registered for at least one class that meets certificate requirements

The La Follette School accepts Certificate in Health Policy applications from May 1-May 31 and November 1 - November 30 each year. To apply for the Certificate:
- Review Certificate requirements so that you are familiar with the program
- Write a statement of interest that explains how you envision the Certificate in Health Policy applying to 1) context of your major program and 2) your future career
- Submit your application through the application portal, found on this page (https://lafollette.wisc.edu/academics/undergraduate-certificate-in-health-policy/), in May or November
- Contact one of our Academic Advisors (https://lafollette.wisc.edu/ academics/undergraduate-certificate-in-health-policy/\#contact) if you have questions

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

Students must complete a minimum of four courses, one from each area isted below, and a minimum of 12 total credits.

\section*{Total Credits}12
RESIDENCE AND QUALITY OF WORK
- At least 6 certificate credits must be completed in residence.
- Minimum 2.000 GPA on all certificate courses.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{EARNING OUTCOMES}
1. Students will demonstrate understanding of major underpinnings and challenges of contemporary U.S. health policy, and how to approach issues using a public policy lens.
2. Students will gain knowledge and demonstrate application of analytical and methodological tools used in the health sector (e.g., policy writing, analysis, familiarity with data used in health policy and clinical research, and quantitative and qualitative methods used in social policy).
3. Students will demonstrate understanding and application of knowledge regarding a substantive health policy interest of their choice, such as health care policy and innovation, social determinants of health, reproductive health policy, social policy, analysis of health behaviors, and others.
4. Students will gain applied experience in a setting relevant for navigating, interpreting, and contributing to effective health policy throughout their careers.

\section*{ADVISING AND CAREERS}

The La Follette School of Public Affairs welcomes you to reach out to our student services team. Here are some quick steps toward getting what you need. Before getting in touch, be sure to check our web site (https:// lafollette.wisc.edu/academics/undergraduate-certificate-in-healthpolicy/). It is updated regularly and just may hold the answers you seek!
- If you're interested in learning more about the Certificate or would like guidance as a current Certificate student, contact Kelly Otto at klotto@wisc.edu
- If you're unable to get in touch with Kelly, contact Mary Michaud at mdmichaud@wisc.edu
- If you're already a Certificate student, you can connect with Marie Koko, our Career Services Coordinator, about careers and internships: Send her an email at: marie.koko@wisc.edu
- If you have a technical question about your DARS report, enrollment, or other things administrative, connect with David Wright-Racette at wrightracette@lafollette.wisc.edu
- If you're interested in learning more about La Follette's graduate programs in public and international affairs, or joint graduate degree programs (https://lafollette.wisc.edu/academics/) (e.g., MPH/ MPA, JD/MPA, PhD/MPA in neuroscience), contact Mo O'Connor, our graduate advisor: mcoconnor@lafollette.wisc.edu
- If you're an alumnus, parent, or student who is curious about
how to get involved or contribute to the mission of the La Follette School, please contact Associate Director Steve Kulig: skulig@lafollette.wisc.edu

\section*{People}

\section*{Careers}

Health policy issues affect every resident and community in the United States. Because of its complexity, people working in the health sector benefit from understanding specific terminology, issues, and systems involved in policymaking. Through the Certificate in Health Policy, students will build the knowledge base for this work while also gaining skills in quantitative analysis, communication, writing, critical thinking, and problem solving. More and more, employers across the health sector value this combination of skills and insights.

Students interested in health care, advocacy, business, or research will earn a credential highlighting highly sought-after skills that, through the fieldwork component of the certificate, they have applied in the context of real-world practice. Focused on evidence-based health policy and practice, courses help students hone skills to gather data and information from a variety of sources, analyze and synthesize the findings, and communicate key insights using clear, concise communication strategies.

Career development is an integral part of the La Follette School experience, with staff members and alumni eager to support and mentor students with diverse interests. Students benefit from networking opportunities, employer visits, professional development seminars, and other services.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

\section*{WISCONSIN EXPERIENCE}

Empathy and humility. The effects of health policy reach into every corner of life, including access to health care and the rising costs of health benefits. To address complex issues, students in health policy learn to value and engage diverse perspectives and question their own biases and assumptions.

Relentless curiosity. Like peeling an onion, the study of health policy invites learners to uncover layers of data and history to explore root causes of poor health outcomes. Why does a person's zip code predict so much about their health outcomes? Why is U.S. health insurance largely tied to a person's employment status? What drives the high cost of health care, and what are options for reform? For those with an insatiable curiosity, health policy offers endless discoveries and an ever-changing landscape.

Intellectual confidence. In many cases, great leadership emerges when leaders themselves have the confidence to say "I don't know." Public policy studies include deep analysis of the stakeholders in systems, the relationships among those actors, and the incentives that drive behavior. Because of this, students learn to define problems in new ways, ask better questions, and use data to drive insight.

Purposeful action. Health policy has broad implications for the distribution of resources across the public and private sectors. As we learn more about addressing the "upstream" factors that influence health,
students gain insights about how to build more prevention-oriented health policy.

\section*{PUBLIC POLICY, CERTIFICATE}

UW-Madison's Undergraduate Certificate in Public Policy complements existing majors across campus and extends the La Follette School of Public Affairs' mission to training and mentoring the next generation of leaders in their careers and communities.

The certificate program allows undergraduate students to apply a policy perspective to their major course of study and bolsters their skills for success in the workforce or in their graduate school coursework. Students build a strong foundation for careers in government, nonprofit organizations, or the private sector.

The Undergraduate Certificate in Public Policy is ideal for students seeking careers related to key domestic and international issues such as criminal justice, education, energy, environmental studies, finance, transportation, and poverty. It also prepares students to be engaged citizens, ready to use their talents to improve the world around them.

\section*{HOW TO GET IN}

To declare the Undergraduate Certificate in Public Policy, students must:
- Hold UW-Madison sophomore standing or above
- Meet their school or college criteria for good academic standing
- Have taken, are enrolled, or have registered for at least one class that meets certificate requirements

The La Follette School accepts Certificate applications from May 1 May 31 and November \(\mathbf{1}\) - November \(\mathbf{3 0}\) each year. To apply for the Certificate:
- Review Certificate requirements so that you are familiar with the program
- Write a statement of interest that explains how you envision the Certificate in Public Policy applying to 1) context of your major program and 2) your future career
- Submit your application through the application portal, found on this page (https://lafollette.wisc.edu/academics/undergraduate-certificate-in-public-policy/), in May or November
- Contact one of our Academic Advisors (https://lafollette.wisc.edu/ academics/undergraduate-certificate-in-public-policy/\#contact) if you have questions

\section*{RESIDENCE \& QUALITY OF WORK}
- At least 6 credits must be completed in residence
- Minimum 2.000 GPA on all certificate courses

1
Courses taken Pass/Fail do not meet certificate requirements or calculate in the GPA.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Students will demonstrate understanding of major current and past public policy debates, and how to approach questions and research with a public policy lens.
2. Students will gain knowledge and demonstrate application of methodological tools utilized in the public policy arena (e.g., policy memo writing, policy analysis, experience working with administrative data, program evaluation, cost-benefit analysis, performance management).
3. Students will demonstrate understanding and application of knowledge regarding the substantive policy area of interest of their choice (e.g., education, health, social, environmental, science).
4. Students will gain practical professional experience in a public policy work setting.

\section*{ADVISING AND CAREERS}

The La Follette School of Public Affairs welcomes you to reach out to our student services team. Here are some quick steps toward getting what you need. Before getting in touch, be sure to visit our Certificate in Public Policy webpage (https://lafollette.wisc.edu/academics/undergraduate-certificate-in-public-policy/) as many questions you may have may be answered there. It is updated regularly and just may hold the answers you seek!
- If you're interested in learning more about the Certificate or would like guidance as a current Certificate student, contact Kelly Otto at klotto@wisc.edu
- If you're unable to get in touch with Kelly, contact Mary Michaud at mdmichaud@wisc.edu
- If you're already a Certificate student, you can connect with Marie Koko, our Career Services Coordinator, about careers and internships: Send her an email at: marie.koko@wisc.edu
- If you have a technical question about your DARS report, enrollment, or other things administrative, connect with David Wright-Racette at wrightracette@lafollette.wisc.edu
- If you're interested in learning more about La Follette's graduate programs in public and international affairs, contact Mo O'Connor, our graduate advisor: mcoconnor@lafollette.wisc.edu
- If you're an alumnus, parent, or student who is curious about how to get involved or contribute to the mission of the La Follette School, please contact Associate Director Steve Kulig: skulig@lafollette.wisc.edu

\section*{SKILLS \& CAREERS}

Given the increasing complexity in every realm of public policy, students in the public policy certificate program gain skills in quantitative analysis, communication, writing, critical thinking, and problem solving that are in demand by more and more employers in almost every sector.

The certificate program focuses on evidence-based practices and provides students with the skills to gather data and information from various sources, analyze and synthesize the findings, and write a clear and concise report to illustrate the main points.

With the focus on evidence-based practices, the public policy certificate program provides research and data analysis skills that are transferrable to nearly any occupation. Students maximize their electives and earn a
credential that highlights these highly sought-after skills in the context of real-world practice.

Career development is an integral part of the La Follette School experience, with staff members and alumni eager to support and mentor students with diverse interests. Students benefit from networking opportunities, employer visits, professional development seminars, and other services.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{FACULTY}

The undergraduate certificate in public policy gives students access to the La Follette School's award-winning faculty members (https:// lafollette.wisc.edu/faculty-staff/). These interdisciplinary faculty have expertise in social policy, health policy and management, public management, policy analysis, environmental policy, poverty, and government finance.

\section*{LANGUAGE SCIENCES}

Language Sciences at UW-Madison is an interdisciplinary hub for research and collaboration that houses the Linguistics major.

Linguistics is the scientific study of human language. It investigates the common principles underlying all languages, as well as the organization of particular languages. It is expected that undergraduates with a major in linguistics will be able to:
- demonstrate a sound knowledge of the fields of phonetics (articulatory and acoustic properties of speech), phonology (the organization of the sound system of languages), morphology (the structure of words), syntax (the structure of sentences), and semantics (the interpretation of structures);
- demonstrate that they are able to analyze data in all these areas of linguistics;
- apply their linguistic training without prejudice, as expected in any science; and
- apply their analytical abilities beyond the study of linguistics.

Our undergraduate major emphasizes strong foundational training in the core areas of theoretical linguistics. Students also have access to breadth courses in a wide variety of interdisciplinary areas, including first and second language acquisition, language disorders, psycholinguistics, sociolinguistics, historical linguistics, neurolinguistics, philosophy of language, and language endangerment and revitalization. Coursework is also available in the linguistics of specific languages or language families, such as Germanic, Spanish and Romance, Chinese, Japanese, and Native American linguistics.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Linguistics, B.A. (p. 1096)
- Linguistics, B.S. (p. 1101)

\section*{PEOPLE}

Please visit the Language Sciences website (https://langsci.wisc.edu/ faculty-academic-staff/) for a complete list of our faculty and their areas of interest and expertise.

\section*{LINGUISTICS, B.A.}

Language Sciences at UW-Madison is an interdisciplinary hub for research and collaboration that houses the Linguistics major.

Linguistics is the scientific study of human language. It investigates the common principles underlying all languages, as well as the organization of particular languages. It is expected that undergraduates with a major in linguistics will be able to:
- demonstrate a sound knowledge of the fields of phonetics (articulatory and acoustic properties of speech), phonology (the organization of the sound system of languages), morphology (the structure of words), syntax (the structure of sentences), and semantics (the interpretation of structures);
- demonstrate that they are able to analyze data in all these areas of linguistics;
- apply their linguistic training without prejudice, as expected in any science; and

Our undergraduate major emphasizes strong foundational training in the core areas of theoretical linguistics. Students also have access to breadth courses in a wide variety of interdisciplinary areas, including first and second language acquisition, language disorders, psycholinguistics, sociolinguistics, historical linguistics, neurolinguistics, philosophy of language, and language endangerment and revitalization. Coursework is also available in the linguistics of specific languages or language families, such as Germanic, Spanish and Romance, Chinese, Japanese, and Native American linguistics.

\section*{HOW TO GET IN}

Undergraduate students wishing to major in Linguistics should make an appointment with the Linguistics Undergraduate Advisor. Current advisor contact information can be found on the Language Sciences Advising Page (https://langsci.wisc.edu/advising/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
- Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Mathematics & Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework. \\
\hline \begin{tabular}{l}
Foreign \\
Language
\end{tabular} & \begin{tabular}{l}
- Complete the fourth unit of a foreign language; OR \\
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\end{tabular} \\
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline
\end{tabular}

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.

\section*{Advanced}
work
Major Declare and complete at least one major.

Total Credits Complete at least 120 credits.
UW-Madison • 30 credits in residence, overall; and
Experience \(\quad 30\) credits in residence after the 86th credit.

\section*{Quality of}

Work
- 2.000 in all coursework at UW-Madison
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR LANGUAGE}
\begin{tabular}{lrr} 
Code \(\quad\) Title & Credits \\
Complete the fourth unit or higher in a foreign language, & \(0-16\) \\
by course or by examination & \\

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Linguistics Undergraduate Advisor (http://guide.wisc.edu/undergraduate/ letters-science/linguistics/linguistics-ba/\#advisingandcareerstext).

\section*{HONORS IN THE LINGUISTICS MAJOR: REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA for all LINGUIS courses, and all courses accepted in the major
- Complete two LINGUIS courses, taken for Honors, with concurrent 1credit enrollment in LINGUIS 481 Junior Honors Tutorial, LINGUIS 482 Junior Honors Tutorial, or LINGUIS 583 Senior Honors Tutorial, for a total of 2 additional credits. A grade of B or better must be earned in each course taken for honors.
- Complete a two-semester Senior Honors Thesis in LINGUIS 681 Honors Seminar-Senior Thesis and LINGUIS 682 Honors SeminarSenior Thesis, leading to submission of an acceptable paper, for a total of 6 credits. A grade of B or better must be earned in the thesis project.

Note that Honors tutorial credits and the Senior Honors Thesis do not count toward the 30 credits required for the major in linguistics.

\section*{FOOTNOTES}

Except LINGUIS 481, LINGUIS 482, LINGUIS 583,
LINGUIS 681, LINGUIS 682.
2
Intermediate and Advanced level LINGUIS
courses, LINGUIS 340, LINGUIS 373 and some elective courses from other subjects are upper-level in the major (see list).

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Familiarity with data from a wide range of languages from different language families.
2. Ability to respond to biased views of language in their communities.
3. Knowledge in all core areas of linguistics: Phonetics, phonology, morphology, syntax, and semantics.
4. Sound grasp of linguistic concepts.
5. Sound grasp of linguistic methodology.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

\section*{UNDERGRADUATE ADVISING}

Rebecca Shields, Undergraduate Advisor

\author{
166 Van Hise Hall \\ rashields@wisc.edu
}

Contact the undergraduate advisor (https://langsci.wisc.edu/advising/) via email or using the Starfish app to set up an appointment. The advisor is happy to meet with students who want to learn more about the major, careers in linguistics, linguistics course selection, and opportunities for participation in research in language sciences. A meeting with the advisor is required to declare the major.

\section*{LETTERS \& SCIENCE CAREER SERVICES}

Language Sciences encourages our majors to begin working on their career exploration and preparation soon after declaring their major. Our career advisor also partners with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)

\section*{LINGUISTICS, B.S.}

Language Sciences at UW-Madison is an interdisciplinary hub for research and collaboration that houses the Linguistics major.

Linguistics is the scientific study of human language. It investigates the common principles underlying all languages, as well as the organization of particular languages. It is expected that undergraduates with a major in linguistics will be able to:
- demonstrate a sound knowledge of the fields of phonetics (articulatory and acoustic properties of speech), phonology (the organization of the sound system of languages), morphology (the structure of words), syntax (the structure of sentences), and semantics (the interpretation of structures);
- demonstrate that they are able to analyze data in all these areas of linguistics;
- apply their linguistic training without prejudice, as expected in any science; and
- apply their analytical abilities beyond the study of linguistics.

Our undergraduate major emphasizes strong foundational training in the core areas of theoretical linguistics. Students also have access to breadth courses in a wide variety of interdisciplinary areas, including first and second language acquisition, language disorders, psycholinguistics, sociolinguistics, historical linguistics, neurolinguistics, philosophy of language, and language endangerment and revitalization. Coursework is also available in the linguistics of specific languages or language families, such as Germanic, Spanish and Romance, Chinese, Japanese, and Native American linguistics.

\section*{HOW TO GET IN}

Undergraduate students wishing to major in Linguistics should make an appointment with the Linguistics Undergraduate Advisor. Current advisor contact information can be found on the Language Sciences Advising Page (https://langsci.wisc.edu/advising/).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

\section*{Foreign} Language
L\&S Breadth
Complete the third unit of a foreign language.

Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts
and Science
Coursework

Complete at least 108 credits.

Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll} 
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR LANGUAGE \\ Code Title \\ Credits \\ Complete the fourth unit or higher in a foreign language, 0-16 by course or by examination}

\section*{Total Credits}

\section*{LINGUISTICS}

Students pursuing the linguistics major must complete 30 credits as follows:
\begin{tabular}{|c|c|c|}

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Linguistics Undergraduate Advisor (http://guide.wisc.edu/undergraduate/ letters-science/linguistics/linguistics-ba/\#advisingandcareerstext).

\section*{HONORS IN THE LINGUISTICS MAJOR: REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA for all LINGUIS courses, and all courses accepted in the major
- Complete two LINGUIS courses, taken for Honors, with concurrent 1credit enrollment in LINGUIS 481 Junior Honors Tutorial, LINGUIS 482 Junior Honors Tutorial, or LINGUIS 583 Senior Honors Tutorial, for a total of 2 additional credits. A grade of B or better must be earned in each course taken for honors.
- Complete a two-semester Senior Honors Thesis in LINGUIS 681 Honors Seminar-Senior Thesis and LINGUIS 682 Honors SeminarSenior Thesis, leading to submission of an acceptable paper, for a total of 6 credits. A grade of B or better must be earned in the thesis project.

Note that Honors tutorial credits and the Senior Honors Thesis do not count toward the 30 credits required for the major in linguistics.

\section*{FOOTNOTES}

Except LINGUIS 481, LINGUIS 482, LINGUIS 583, LINGUIS 681, LINGUIS 682.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits.
\end{tabular} \\
& \begin{tabular}{l} 
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence"
\end{tabular} \\
& \begin{tabular}{l} 
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Familiarity with data from a wide range of languages from different language families.
2. Ability to respond to biased views of language in their communities.
3. Knowledge in all core areas of linguistics: Phonetics, phonology, morphology, syntax, and semantics.
4. Sound grasp of linguistic concepts.
5. Sound grasp of linguistic methodology.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

\section*{UNDERGRADUATE ADVISING}

Rebecca Shields, Undergraduate Advisor
1166 Van Hise Hall
rashields@wisc.edu
Contact the undergraduate advisor (https://langsci.wisc.edu/advising/) via email or using the Starfish app to set up an appointment. The advisor is happy to meet with students who want to learn more about the major, careers in linguistics, linguistics course selection, and opportunities for
participation in research in language sciences. A meeting with the advisor is required to declare the major.

\section*{LETTERS \& SCIENCE CAREER SERVICES}

Language Sciences encourages our majors to begin working on their career exploration and preparation soon after declaring their major. Our career advisor also partners with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Please visit the Language Sciences website (https://langsci.wisc.edu/ faculty-academic-staff/) for a complete list of our faculty and their areas of interest and expertise.

\section*{LETTERS \& SCIENCE -COLLEGE-WIDE}

\section*{DEGREES/MAJORS/CERTIFICATES}
- Applied Social Science, BLS (p. 1105)
- Biochemistry, B.A. (L\&S) (p. 1108)
- Biochemistry, B.S. (L\&S) (p. 1117)
- College of Letters \& Science Honors in the Liberal Arts (p. 1126)

- Microbiology, B.S. (L\&S) (p. 1138)

\section*{APPLIED SOCIAL SCIENCE, BLS}

The Major in Applied Social Science (MASS) is completed with the Bachelor of Liberal Studies (BLS) degree. The BLS and MASS are offered fully online and are ideal for returning students with some college credit. UW-Madison Online programs are designed with adult students in mind; they give students the flexibility to earn their degree while still meeting obligations at work and home.

Students in the MASS program will learn about how Social and Behavioral Science apply to their own lives and the world around them. BLS and MASS students will learn about world language study and global issues; understanding and engaging with diverse communities; ethical communication; and broader social issues that shape current events. Applied Social Sciences explores systematic and evidence-based study of the social world, encompassing all of the political, economic, legal, technological and cultural ideas, structures and processes that humans create to live together as a society. Social science data, methods, and theories help students understand how social life works to help social life work better.

Applied study across the social sciences, combined with integrated study of the liberal arts and sciences, is an ideal framework for identifying issues, questions, and opportunities that are important to humans, groups, institutions, and society. Students in this program will improve their skills as communicators, and as knowledgeable participants in a civil and just society. They will increase their skills and develop their abilities to create and support more effective and equitable solutions to social problems.

For more information, visit the UW-Madison Online admissions website or email a UW-Madison Online enrollment coach. They are here to help you navigate the application process.

\section*{HOW TO GET IN}

Only students admitted to the BLS degree may declare this major. Students new to UW-Madison apply to the Bachelor of Liberal Studies program through UW-Madison Online (https://online.wisc.edu/apply/). UW-Madison Online undergraduate programs are for those applying as transfer students (i.e., those transferring at least 12 college credits).

For more information, email a UW-Madison Online enrollment coach (uwmadison@online.wisc.edu).

Reentry students who have previously attended the University of Wisconsin-Madison may also be considered for the Bachelor of Liberal Studies. Reentry students considering applying should email a UWMadison Online academic and career advisor (advisors@online.wisc.edu) for more information.

\section*{CURRENT STUDENTS}

Students currently enrolled in an on-campus degree program are not eligible to transfer into this UW-Madison Online degree program or to combine this major with an in-person degree.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all major courses
- 15 upper-level credits, taken in residence \({ }^{1}\)
- 15 credit in the major, taken on campus

\section*{FOOTNOTES}

1
Upper-level courses in the major are course with the Intermediate or Advanced level designation

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Recognize, reason with, and combine multiple forms of qualitative and quantitative information and data that are common to the social sciences, from diverse perspectives and sources.
2. Critically evaluate and analyze information using a variety of methods common to the social sciences, informed by diverse perspectives.
3. Approach complex social, interpersonal, and institutional issues and opportunities for innovation from multiple perspectives, understanding them in a variety of contexts and from different cultural lenses.
4. Use tools and techniques common to the social sciences to combine their rigorous analysis of relevant evidence to develop and defend creative insights and effective solutions concerning these important issues.
5. Based on an understanding of the varied ways in which people experience social life and social institutions, students will collaborate
and communicate proposed solutions effectively and ethically with people from a range of perspectives, cultures, and backgrounds.

\section*{FOUR-YEAR PLAN}

This program is designed for transfer students, most of whom will enroll on a part-time basis. As such, there is not a four-year plan for this program. Please refer to the Requirements tab for more information about the curriculum and program plan.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Each UW-Madison Online student is assigned an academic and career (AC) advisor (https://oss.wisc.edu/about-us/).

\section*{Contact Information}

Office of Online Student Success
oss@advising.wisc.edu
Ingraham Hall
155 Observatory Drive
Madison, WI 53706

\section*{CAREERS}

Completion of the BLS+MASS complements many career paths. Coursework designed around a liberal arts education provides students with critical thinking, qualitative and quantitative analysis, and communication skills needed in all industries. A focused study of social sciences helps graduates understand how:
- The social world can be understood and explored in a structured and guided way.
- The tools used in the study of the social world can help identify issues that need attention, and problems that could be solved.

Active engagement in the career development process is a vital component of a student's personal growth in college and future success as a lifelong learner, professional, and global citizen. AC advisors help prepare students for life post-graduation through individual and group advising.

\section*{PEOPLE}

\section*{BLS+MASS PROGRAM COMMITTEE}

Derek Bean, Faculty Associate (Statistics)
Nina Valeo Cooke, Director of Curricular \& Student Services (Gender \& Women's Studies)
Greg Downey, Professor of Journalism and of Information Studies, Associate Dean for the Social Sciences Founding Chair
Amy Gangl, Director of Undergraduate Studies, Instructor (Political Science)
Melanie Jones, Undergraduate Program Coordinator (Psychology) Rick Keyser, Senior Lecturer (Legal Studies)
Lyn Macgregor, Academic Advisor \& Curriculum Planner (Sociology)
Sara McKinnon, Associate Professor (Communication Arts)
James Messina, Associate Professor (Philosophy)
Kris Olds, Professor (Geography)
Greg Pac, Senior Lecturer (Economics)
Rajiv Rao, Associate Professor (Language Sciences)

Hernando Rojas, Professor (School of Journalism and Mass Communication)
Dorothea Salo, Distinguished Faculty Associate (The Information School)
Rebecca Shields, Instructional Administrator (Language Sciences)
Michelle Szabo, Academic Department Manager (Geoscience)
Benedek Valko, Professor (Mathematics)
David Zimmerman, Professor (English)

\section*{EX OFFICIO}

Kimbrin Cornelius, Assistant Dean for Teaching \& Learning Administration and Interim L\&S OUD Coordinator
Elaine M. Klein, Associate Dean (Academic Planning)
Christopher Lee, Assistant Dean and Director, Academic Deans Services Shirin Malekpour, Associate Dean (Teaching \& Learning Administration)

\section*{BIOCHEMISTRY, B.A. (L\&S)}

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal, or population-level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

\section*{HOW TO GET IN}

Students may declare the major via an appointment with the undergraduate advisor at any time.

The Biochemistry major is offered through either CALS or the College of Letters \& Science (L\&S). Students interested in the differences or transferring between CALS and L\&S should meet with the advisor to discuss this in more detail.

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences (CALS) have the option to declare biochemistry at SOAR. Students may otherwise declare after they have begun their undergraduate studies.

Students who intend to major in Biochemistry may not combine this major ("double major") with the Molecular and Cell Biology major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
\begin{tabular}{|c|c|}
\hline \begin{tabular}{l}
Foreign \\
Language
\end{tabular} & \begin{tabular}{l}
- Complete the fourth unit of a foreign language; OR \\
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\end{tabular} \\
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline
\end{tabular}

Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & \(\cdot 30\) credits in residence, overall; and \\
Experience & \(\cdot 30\) credits in residence after the 86 th credit.
\end{tabular}

Quality of
Work
- 2.000 in all coursework at UW-Madison
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR \\ MATHEMATICS}

Mathematics Requirements
Code
Title
Credits
Complete one of the following options:
\begin{tabular}{|c|c|c|}
\hline MATH 221 \& MATH 222 & Calculus and Analytic Geometry 1 and Calculus and Analytic Geometry 2 & 9 \\
\hline \begin{tabular}{l}
MATH 171 \\
\& MATH 217 \\
\& MATH 222

general and analytical chemistry \\
requirements)
\end{tabular} & 5
\end{tabular}

\section*{Physical Chemistry}
\(\left.\begin{array}{llr}\text { Code } & \text { Title } & \text { Credits } \\ \text { Complete one: } & \text { Biophysical Chemistry } \\ \text { (recommended) }\end{array}\right)\)

\section*{BIOLOGY}

Students must complete either Option A (introductory + upper-level biology), or Option B (Biocore), for 16 total credits of biological science coursework.

Option A
Option A Introductory Biology Code Title
Complete one of the following introductory biology options:
BIOLOGY/BOTANY/ Introductory Biology
ZOOLOGY 151 and Introductory Biology
\& BIOLOGY/ (recommended)
BOTANY/
ZOOLOGY 152
BIOLOGY/
ZOOLOGY 101
\& BIOLOGY/
ZOOLOGY 102
\& BOTANY/
BIOLOGY 130

\section*{AND Option A Upper-Level Biology}

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits-more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the course list below. To see courses offered in specific upcoming semesters, please see the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/ advanced-biology-courses-undergraduate-program/).

Important: A course may not double count in both the "UpperLevel Biology" and the "Biochemistry" requirements for the major. Biochemistry courses on this list can count only for "Upper-Level Biology" if they are above-and-beyond what is needed to fulfill the "Biochemistry" portion of the major. For example, if students have taken BIOCHEM 501 (http://guide.wisc.edu/search/?P=BIOCHEM \%20501), they will need one advanced biochemistry elective to fulfill

Credits

Animal Biology 10
and Animal Biology Laboratory
and General Botany
10

> the Biochemistry requirement, and then any additional biochemistry courses taken can count for Upper-Level Biology.

\end{tabular}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all BIOCHEM and major courses
- 2.000 GPA on at least 15 upper-level major credits in Residence. 2
- 15 credits in BIOCHEM, taken on campus

Students should consult with their advisor to discuss options if they have credit for PHYSICS 103 (http:// guide.wisc.edu/search/?P=PHYSICS \%20103) and PHYSICS 104 (http://guide.wisc.edu/search/?P=PHYSICS \%20104).
2
Major courses numbered 300-699 are considered Upper-Level in the major for purposes of this requirement.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Biochemistry Major in consultation with their Biochemistry undergraduate advisor. To be admitted to Honors in the Major in Biochemistry, students must have declared a major in Biochemistry and have a 3.300 overall university GPA.

\section*{HONORS IN THE MAJOR IN BIOCHEMISTRY: REQUIREMENTS}

To earn Honors in the Major in Biochemistry, students must satisfy the requirements for the major (above) as well as the following requirements. All courses used for Honors in the Major requirements must receive "B" or better grades to fulfill requirements.
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all BIOCHEM courses, and all courses accepted in the major
- Complete BIOCHEM 507 and BIOCHEM 508 for Honors
- Complete a two-semester Senior Honors Thesis for 6 credits total
- Complete at least 14 credits of any combination of the following coursework:
- Honors courses that would fulfill the Biology or Biochemistry requirements in the major (see above)
- Statistics coursework (does not need to be taken for Honors): STAT 301, STAT 371, or STAT/B M I 541
- Biochemistry elective coursework beyond the major requirements (does not need to be taken for Honors): NUTR SCI/ BIOCHEM 510, BIOCHEM 550, BIOCHEM 570 M M \& I/ BIOCHEM 575, BIOCHEM 601, MATH/B M I/BIOCHEM/ BMOLCHEM 609, MICROBIO/BIOCHEM/GENETICS 612, MD GENET/BIOCHEM/GENETICS 620, BOTANY/ BIOCHEM 621, BIOCHEM 625, BIOCHEM/PHMCOL-M/ ZOOLOGY 630, BIOCHEM/NUTR SCI 645
- Honors coursework in MATH, CHEM, or PHYSICS, from the list below:

Math
\begin{tabular}{llr} 
Code & Title & Credits \\
MATH 275 & Topics in Calculus I & 5 \\
MATH 276 & Topics in Calculus II & 5 \\
MATH 341 & Linear Algebra & 3
\end{tabular}

PHYSICS 241 & Introduction to Modern Physics & 3 \\
PHYSICS 247 & A Modern Introduction to Physics & 5 \\
\hline PHYSICS 248 & A Modern Introduction to Physics & 5 \\
PHYSICS 249 & A Modern Introduction to Physics & 4
\end{tabular}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Identify the fundamental biochemical principles that underlie all biological processes.
2. Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
3. Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
4. Demonstrate professional and ethical responsibility in scientific research.
5. Design and conduct quantitative experiments and/or interpret data to address a scientific question.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.
\begin{tabular}{lcr} 
SAMPLE BIOCHEMISTRY FOUR-YEAR PLAN \\
Freshman & & \\
Fall & Credits & Spring \\
CHEM 103 or 109 & \(4-5\) CHEM 104 (if needed) & 5 \\
MATH 221 & 5 MATH 222 & 4 \\

\hline Electives & & 2 Electives & 2 \\
\hline \multirow[t]{2}{*}{BIOCHEM 691 or 681 (if needed) \({ }^{3}\)} & & 3 BIOCHEM 692 or 682 (if needed) & 3 \\
\hline & & 15 & 15 \\
\hline
\end{tabular}

Total Credits 120
1
First-year students interested in exploring the major can enroll in BIOCHEM 100.
2
Students may wish to consider pursuing the Biology Core Curriculum (Biocore) Honors certificate. For more details about how BIOCORE coursework can help them meet requirements for this major, see the Requirements page (https://guide.wisc.edu/undergraduate/letters-science/college-wide/biochemistry-bs/\#requirementstext). Students should consult with their advisor to identify the biological science sequence that best suits their academic and personal goals.

\section*{3}

Senior Thesis, Directed Study, or work experience in laboratory are recommended, but are not required for the major. However, a Senior Honors Thesis is required to earn Honors in the Major.

\section*{ADVISING AND CAREERS}

\section*{HOW TO SEEK ADVISING}
- To schedule an appointment with the advisor, use Starfish (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/).
- Send an email with brief questions to biochemmicrobioadvisor@wisc.edu.
- Drop-in advising hours for quick (10-15 minute) questions, on a first-come, first-serve basis, are posted on the Biochemistry / Microbiology Undergraduate Advising Hub website (https:// biochemmicrobio.wisc.edu/) each semester.

\section*{CAREER EXAMPLES}
- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+
employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{ACADEMIC ADVISORS}

Biochemistry \& Microbiology Undergraduate Advising Hub (https:// biochemmicrobio.wisc.edu/advising/)
For more information, see the Department of Bacteriology directory (https://bact.wisc.edu/people.php).

\section*{WISCONSIN EXPERIENCE}

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:
- The American Society for Biochemistry and Molecular Biology (ASBMB) UW-Madison Student Chapter (https://win.wisc.edu/ organization/ASBMB/) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
- Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biochemistry/) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistryrelated departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (https://biochem.wisc.edu/undergraduate_program/research-opportunities-undergraduate-program/) and the advisors can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

\section*{BIOCHEMISTRY, B.S. (L\&S)}

Biochemistry is a very broad science that studies the molecules and chemistry of life. Biochemistry focuses on the structure, properties, and interactions of molecules such as proteins, nucleic acids, sugars and lipids. Biochemistry's aim is to understand how these molecules participate in the processes that support the various functions of the living cell. These studies are therefore essential for understanding disease and finding cures, for improving agriculture and the production of food and biofuels, and to produce innovation in biotechnology.

Whereas other biological science majors may focus on cellular, organismal, or population-level biology, biochemistry focuses on processes that occur at the molecular to cellular levels. Therefore, this major has a greater focus on basic and quantitative sciences, such as math and, particularly, on chemistry.

Biochemistry graduates go on to a variety of careers in science and science-related fields. The major is designed to fit the needs of the student who wishes to achieve bachelor's-level training as well as those planning to pursue graduate or professional study. The degree serves as an excellent background for medical school or veterinary school admission, as well as for graduate study in biochemistry or other allied fields (biology, bacteriology, genetics, molecular biology, or oncology).

\section*{HOW TO GET IN}

Students may declare the major via an appointment with the undergraduate advisor at any time.

The Biochemistry major is offered through either CALS or the College of Letters \& Science (L\&S). Students interested in the differences or transferring between CALS and L\&S should meet with the advisor to discuss this in more detail.

Students who attend Student Orientation, Advising, and Registration (SOAR) with the College of Agricultural and Life Sciences (CALS) have the option to declare biochemistry at SOAR. Students may otherwise declare after they have begun their undergraduate studies.

Students who intend to major in Biochemistry may not combine this major ("double major") with the Molecular and Cell Biology major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language.

Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll} 
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR MATHEMATICS}

Mathematics Requirements

\section*{AND Option A Upper-Level Biology}

At least 6 credits of upper-level biological science coursework are required (to achieve 16 total credits-more than 6 credits may be required if introductory biology totals less than 10 credits due to transfer credits). Select from the course list below. To see courses offered in specific upcoming semesters, please see the Biochemistry website (https://biochem.wisc.edu/undergraduate_program/ advanced-biology-courses-undergraduate-program/).

Important: A course may not double count in both the "UpperLevel Biology" and the "Biochemistry" requirements for the major. Biochemistry courses on this list can count only for "Upper-Level Biology" if they are above-and-beyond what is needed to fulfill the "Biochemistry" portion of the major. For example, if students have taken BIOCHEM 501 (http://guide.wisc.edu/search/?P=BIOCHEM \%20501), they will need one advanced biochemistry elective to fulfill the Biochemistry requirement, and then any additional biochemistry courses taken can count for Upper-Level Biology.

\section*{Option B (Biocore)}

\section*{Option B (Biocore)}

Biocore is an honors-level, integrated sequence of lecture and lab courses that covers introductory and intermediate biology topics. Students must apply and be accepted to the program to take BIOCORE classes.
\begin{tabular}{lll} 
Code & Title & Credits \\
Complete these lecture courses: & \\
BIOCORE 381 & Evolution, Ecology, and Genetics & 3 \\
BIOCORE 383 & Cellular Biology & 3 \\
BIOCORE 485 & Principles of Physiology & 3 \\
BIOCORE 587 & Biological Interactions & 3 \\
Complete two of these lab classes: & 4 \\
\multicolumn{2}{l}{ BIOCORE 382 } & Evolution, Ecology, and Genetics \\
& Laboratory & \\
BIOCORE 384 & Cellular Biology Laboratory & \\
\hline BIOCORE 486 & Principles of Physiology Laboratory & \\
\hline
\end{tabular}

\section*{Total Credits}

\section*{PHYSICS (CALCULUS-BASED)}

\section*{Physics Requirements}
Code Title Credits

Complete one of the following options: \({ }^{1}\)
PHYSICS 207 General Physics
\& PHYSICS 208 and General Physics

PHYSICS 201 General Physics

\section*{\& PHYSICS 202 and General Physics}

\section*{BIOCHEMISTRY}

One set of introductory coursework and the capstone course are required, for a total of three BIOCHEM courses.

\section*{Introductory Courses}
Code Title Credits

Select one of the following options:
BIOCHEM 507 General Biochemistry 1 6-7
\& BIOCHEM 508 and General Biochemistry II
(recommended)

\section*{OR}
BIOCHEM 501 Introduction to Biochemistry 3

And one of the following advanced biochemistry electives:
BIOCHEM/ Nutritional Biochemistry and

NUTR SCI 510 Metabolism
BIOCHEM 550 Principles of Human Disease and Biotechnology
\begin{tabular}{|c|c|}

\hline BIOCHEM/ NUTR SCI 645 & Molecular Control of Metabolism and Metabolic Disease \\
\hline
\end{tabular}

All courses used for Honors in the Major requirements must receive "B" or better grades to fulfill requirements.
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all BIOCHEM courses, and all courses accepted in the major
- Complete BIOCHEM 507 and BIOCHEM 508 for Honors
- Complete a two-semester Senior Honors Thesis for 6 credits total
- Complete at least 14 credits of any combination of the following coursework:
- Honors courses that would fulfill the Biology or Biochemistry requirements in the major (see above)
- Statistics coursework (does not need to be taken for Honors): STAT 301, STAT 371, or STAT/B M I 541
- Biochemistry elective coursework beyond the major requirements (does not need to be taken for Honors): NUTR SCI/ BIOCHEM 510, BIOCHEM 550, BIOCHEM 570 M M \& I/ BIOCHEM 575, BIOCHEM 601, MATH/B M I/BIOCHEM/ BMOLCHEM 609, MICROBIO/BIOCHEM/GENETICS 612, MD GENET/BIOCHEM/GENETICS 620, BOTANY/ BIOCHEM 621, BIOCHEM 625, BIOCHEM/PHMCOL-M/ ZOOLOGY 630, BIOCHEM/NUTR SCI 645
- Honors coursework in MATH, CHEM, or PHYSICS, from the list below:

\section*{Capstone \\ \begin{tabular}{llr} 
Code & Title & Credits \\
BIOCHEM 551 & Biochemical Methods & 4 \\
\hline Total Credits & & 4
\end{tabular}}

MATH 542 & Modern Algebra & 3
\end{tabular}

1
Students should consult with their advisor to discuss options if they have credit for PHYSICS 103 (http://guide.wisc.edu/search/?P=PHYSICS \%20103) and PHYSICS 104 (http://guide.wisc.edu/search/?P=PHYSICS \%20104).
2
Major courses numbered 300-699 are considered Upper-Level in the major for purposes of this requirement.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Biochemistry Major in consultation with their Biochemistry undergraduate advisor. To be admitted to Honors in the Major in Biochemistry, students must have declared a major in Biochemistry and have a 3.300 overall university GPA.

\section*{HONORS IN THE MAJOR IN BIOCHEMISTRY: REQUIREMENTS}

To earn Honors in the Major in Biochemistry, students must satisfy the requirements for the major (above) as well as the following requirements.

\section*{Chemistry}

Code
\begin{tabular}{lll} 
CHEM 109 & Advanced General Chemistry & 5 \\
CHEM 115 & Chemical Principles I & 5 \\
\hline CHEM 116 & Chemical Principles II & 5 \\
\hline CHEM 343 & Organic Chemistry I & 3 \\
\hline CHEM 345 & Organic Chemistry II & 3 \\
CHEM 344 & Introductory Organic Chemistry & 2 \\
& Laboratory & 4 \\
CHEM 329 & Fundamentals of Analytical Science & 3 \\
CHEM 547 & Advanced Organic Chemistry & 3 \\
\hline CHEM 561 & Physical Chemistry & 4 \\
CHEM 565 & Biophysical Chemistry & 1 \\
CHEM 563 & Physical Chemistry Laboratory I & 3 \\
CHEM 562 & Physical Chemistry & 1
\end{tabular}
\begin{tabular}{llr} 
Physics & & \\
Code & Title & Credits \\
PHYSICS 201 & General Physics & 5 \\
PHYSICS 202 & General Physics & 5 \\
PHYSICS 207 & General Physics & 5 \\
PHYSICS 208 & General Physics & 5 \\
PHYSICS 241 & Introduction to Modern Physics & 3 \\
PHYSICS 247 & A Modern Introduction to Physics & 5 \\
PHYSICS 248 & A Modern Introduction to Physics & 5 \\
PHYSICS 249 & A Modern Introduction to Physics & 4
\end{tabular}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Identify the fundamental biochemical principles that underlie all biological processes.
2. Communicate biochemical knowledge in both written reports and oral presentations to scientists and non-scientists.
3. Evaluate how biochemistry relates to other scientific disciplines and to contemporary issues in our society.
4. Demonstrate professional and ethical responsibility in scientific research.
5. Design and conduct quantitative experiments and/or interpret data to address a scientific question.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to
accommodate these experiences. Students will likely revise their own fouryear plan several times during college.
\begin{tabular}{|c|c|c|c|}

\section*{Total Credits 120}

1
First-year students interested in exploring the major can enroll in BIOCHEM 100.
2
Students may wish to consider pursuing the Biology Core Curriculum (Biocore) Honors certificate. For more details about how BIOCORE coursework can help them meet requirements for this major, see the Requirements page (https://guide.wisc.edu/undergraduate/letters-science/college-wide/biochemistry-bs/\#requirementstext). Students should consult with their advisor to identify the biological science sequence that best suits their academic and personal goals.

3
Senior Thesis, Directed Study, or work experience in laboratory are recommended, but are not required for the major. However, a Senior Honors Thesis is required to earn Honors in the Major.

\section*{ADVISING AND CAREERS}

\section*{HOW TO SEEK ADVISING}
- To schedule an appointment with the advisor, use Starfish (https:// advising.wisc.edu/facstaff/starfish/starfish-student-resources/).
- Send an email with brief questions to biochemmicrobioadvisor@wisc.edu.
- Drop-in advising hours for quick (10-15 minute) questions, on a first-come, first-serve basis, are posted on the Biochemistry / Microbiology Undergraduate Advising Hub website (https:// biochemmicrobio.wisc.edu/) each semester.

\section*{CAREER EXAMPLES}
- Take your skills to a rewarding career in product development, quality control, hospitals, biotechnology, university labs, pharmaceuticals, forensics, and more. Possibilities at top organizations and leading companies include positions such as protein purification scientist, lab manager, medical scribe, clinical research coordinator, and food safety and quality chemist.
- Pursue a professional degree in medical, dental, or veterinary school, using your background in biochemistry to aid your admission and success.
- Build on your research experience and continue graduate studies in biochemistry or a related field to shape a career in academia as a professor or in industry.
- Use your science background to inform patent law, science policy and ethics, sales and marketing for science and technology companies, scientific article publishing, and related fields.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{ACADEMIC ADVISORS}

Biochemistry \& Microbiology Undergraduate Advising Hub (https:// biochemmicrobio.wisc.edu/advising/)
For more information, see the Department of Bacteriology directory (https://bact.wisc.edu/people.php).

\section*{WISCONSIN EXPERIENCE}

The following opportunities can help students connect with other students interested in biochemistry, build relationships with faculty and staff, and contribute to out-of-classroom learning:
- The American Society for Biochemistry and Molecular Biology (ASBMB) UW-Madison Student Chapter (https://win.wisc.edu/ organization/ASBMB/) is a student organization for students interested in biochemistry. ASBMB provides information about careers and job opportunities, how to get involved in research, and volunteer and outreach opportunities.
- Several biochemistry faculty members offer experiential study abroad programs, where students can immerse themselves in research or global health field experiences. Students can review the Biochemistry Major Advising Page (https://studyabroad.wisc.edu/academics/major-advising-pages-maps/biochemistry/) on the International Academic Programs website for information on these and other programs, as well as requirements that can typically be fulfilled abroad and things to consider when fitting study abroad into an academic plan.
- Students are encouraged to get involved in research, whether in the biochemistry department or through other life science or chemistryrelated departments. Research can be performed for either course credit or pay, depending on the opportunity. The Biochemistry website (https://biochem.wisc.edu/undergraduate_program/research-opportunities-undergraduate-program/) and the advisors can provide more information on finding research opportunities. Summer funding awards for research are available through the department.

\section*{COLLEGE OF LETTERS \& SCIENCE HONORS IN THE LIBERAL ARTS}

The College of Letters \& Science Honors Program seeks to provide students with a small, liberal arts college experience within this large university. The Honors Program is home to more than 1,200 motivated, curious and high-achieving students, all pursuing one of three degree tracks: Honors in the Liberal Arts, Honors in the Major, or Comprehensive Honors-the highest undergraduate degree awarded by the college. In addition to an enhanced curriculum that offers small, faculty-led courses, the program also offers academic advising services; grants, scholarships, and awards; and many professional development and co-curricular opportunities. Events, term-specific deadlines, course descriptions for the upcoming semester and much more can be found on the L\&S Honors Program website (http://honors.ls.wisc.edu/). We welcome inquiries via phone at 608-262-2984. The L\&S Honors Program is located in the historic Washburn Observatory at 1401 Observatory Drive in Madison, WI 53706.

\section*{HOW TO GET IN}

To become a candidate for the Honors in the Liberal Arts degree, a student must apply directly to the L\&S Honors Program. Students may apply at any point in their undergraduate careers provided they meet the eligibility requirements described below.

All students admitted to the university and to the College of Letters \& Science are invited to apply to be considered for admission to the Honors Program to pursue the Honors in the Liberal Arts degree. Interested students can apply via an online application form. L\&S admitted students receive an invitation message by email that contains the URL to the online application. Admission to the program is competitive, and space is limited.

Continuing and transfer students with a cumulative grade point average of 3.300 or above who are currently enrolled at UW-Madison or who are transferring to UW-Madison from another college or university may apply to the L\&S Honors Program at any time. Applications are available from the Honors Program website (http://honors.Is.wisc.edu/) and admission decisions are usually made within three weeks of submission of the completed application and supporting materials. While continuing or transfer students having 60 or more credits at the time of application to the Honors Program are eligible to participate in the Honors in the Liberal Arts (HLA) degree track, they are encouraged to consider Honors in the Major (HM) as an option, since they may find it difficult to complete the HLA degree requirements if beginning that program in the junior or senior year.

\section*{REQUIREMENTS}

Honors in the Liberal Arts is often the primary focus for most first- and second-year Honors students. It requires students earn Honors credits in a breadth of disciplines and is meant to enrich and enhance a student's academic experience outside of the major. Students who complete this curriculum develop strong skills in communication, critical thinking and complex problem solving, which will serve them well regardless of career path. The specific requirements for the HLA degree are:
- completion of the L\&S general degree requirements
- a University GPA of 3.300 or higher at the time of graduation
- completion of at least 24 credits in Honors courses with grades of \(B\) or better, of which:
- at least 15 credits must be in courses with the Honors Only or Accelerated Honors designation
- 6 of the credits must be courses designated as Humanities
- 6 of the credits must be courses designated as Social Science
- 6 of the credits must be courses designated as Biological, Physical, or Natural Science

Honors may be earned in any L\&S undergraduate degree (Bachelor of Arts; Bachelor of Science; Bachelor of Science-Applied Mathematics, Engineering, and Physics; Bachelor of Arts-Journalism or Bachelor of Science-Journalism; Bachelor of Landscape Architecture; Bachelor of Music; and Bachelor of Social Work). For students who complete the requirements, Honors will appear on diplomas and transcripts (for example, B.A. with Honors in the Liberal Arts or B.S. with Honors in the Major).

\section*{ADVISING AND CAREERS}

The University of Wisconsin-Madison can seem overwhelming because of its size and the complexity of its policies and procedures. Academic advisors help students get (and maintain) their bearings on campus. The L\&S Honors Program (https://honors.ls.wisc.edu/academic-advising/) has a team of specially trained academic and peer advisors who accompany and support Honors candidates as they pursue diverse educational and
co-curricular experiences compatible with their long-term goals. Advising occurs through a variety of formats including small group workshops, individual appointments, drop-in hours and email. Additional information is available on the Honors Program website (http://honors.Is.wisc.edu/).

The L\&S Honors Program encourages our students to begin working on their career exploration and preparation soon after arriving on campus. We partner with the L\&S SuccessWorks office to help students leverage the academic skills learned in your major(s) and liberal arts degree, explore and try out different career paths, participate in internships, prepare for the job search and/or graduate school applications, and network with professionals in the field (alumni and employers).

Letters \& Science graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, regardless of major or career goals.

\section*{PEOPLE}

Honors Program Director: Dr. Jenny Saffran, Chair of L\&S Faculty Honors Committee and Professor of Psychology

Associate Director for Admissions and Research: Dr. Matt Kohlstedt
Associate Director for Advising and Curriculum: Christine Evans
Program Administrator: Erin Warner
Academic Advisors: Lisa Blum, Pete Keys

\section*{INDIVIDUAL MAJOR, B.A.}

The Individual Major (IM) within the College of Letters \& Science is a method of fulfilling the depth requirement for students whose interests bridge existing departments and disciplines in ways not accommodated by an existing major or interdisciplinary program. The individual major must consist of a coherent pattern of courses in more than one department or recognized interdisciplinary program in the College of Letters \& Science and must be approved by a faculty committee consisting of faculty from appropriate faculty from the College of Letters \& Science.

Getting approval to pursue an individual major is never guaranteed.
Thus, students should discuss alternative majors with their academic advisors and be willing to pursue them. Students interested in learning more about the individual major should contact L\&S Undergraduate Academic Deans' Services at 608-262-0617 in 101 Ingraham Hall and set up an individual appointment with the coordinator for the individual major prior to starting this process.

\section*{HOW TO GET IN}

\section*{ELIGIBILITY}

Any undergraduate student working toward an L\&S degree with a minimum University (cumulative, on all courses) grade point average of 2.000 may elect to develop an individual major. (Students earning degrees in other undergraduate schools and colleges on the UW-Madison campus are not eligible to pursue an individual major within Letters \& Science.) The individual major must receive approval during the second-semester of the sophomore year or first semester of junior year to ensure that they can complete the major within four years. All students are required to earn
at least \(\mathbf{3 0}\) degree credits after the term in which approval is given. A student may complete only one individual major.

\section*{APPLYING FOR AN INDIVIDUAL MAJOR}

Applications for the individual major are accepted up to Friday of the fourth week of classes in the fall and spring semesters only. Applications received after that deadline will be reviewed during the following term. Individual major applications are not reviewed during the summer.

The application must include all items outlined below:
1. The Individual Major application form;
2. A cover letter from the student to the Faculty Committee on Individual Majors describing the area of interest, explaining why the academic goals of the individual major cannot be achieved through an existing major or combination of majors and certificates, and discussing the individual major's applicability to future goals and plans;
3. A list of courses that will be included in the major along with a narrative explaining how the courses included on the list apply to the proposed individual major program (NOTE: students can use a maximum of two (2) courses completed prior to getting the Individual Major approved as part of their list of courses);
4. A letter of recommendation and support for the proposal from the individual major advisor; and
5. The student's current student record (unofficial transcript).

Additional supporting materials may also be included. Students must submit the original completed application with all supporting documentation in an electronic format to the individual major coordinator by the deadline.

Each individual major application is reviewed by a committee of three faculty members from the College of Letters \& Science, each representing a department related to the proposed major. The faculty committee evaluates the proposal for coherence, appropriate breadth and depth, and similarity to existing majors. The committee may approve the proposal as submitted, recommend modifications, reject the proposal altogether, or reject it with an invitation to revise and resubmit in a later semester. The committee's decision is final. Committee approval is necessary for the student to declare the individual major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86 th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR DEVELOPING AN INDIVIDUAL MAJOR}

Any undergraduate student working toward completing an undergraduate degree in the College of Letters \& Science with a minimum University GPA of 2.000 may apply to develop an individual major. (Students earning degrees in other undergraduate schools and colleges on the UW-Madison campus are not eligible to pursue an Individual Major within Letters \& Science.) This major must receive approval during the second-term of the sophomore/second year or first term of junior/third year. Students in the individual major are required to earn at least 30 degree credits after the term in which approval is given. A student may complete only one individual major.

Developing an Individual Major. The student takes primary responsibility for developing an individual major proposal. A well-written proposal must meet the requirements and rigor for a major in the College of Letters \& Science; therefore, a proposal must be more than a list of courses that are similar in content area or subject matter. The student proposing an individual major must also demonstrate that the proposed individual major is not currently available as an option in any of the L\&S majors or certificate programs.

Students interested in the individual major should consult with the individual major coordinator as part of the process of defining the theme or topic for the individual major. The coordinator will provide information and feedback about the construction of the major and how it might relate to other majors in the college as well.

Once a theme or topic has been identified, the student must find a tenured faculty member in the College of Letters \& Science who is willing to serve as the individual major adviser. This designated faculty advisor will:
- assist the student in constructing the individual major proposal by defining the relevant themes, learning objectives, and rationale for the major and by sharpening presentation of the student's individual major proposal;
- assist in the review and selection of courses for the major plan included in the proposal;
- advise the student in course selection after the proposal is approved and, in consultation with the individual major coordinator, track progress toward completion of the major.

As soon as the topic and the advisor (i.e., a tenured faculty member in an L\&S academic department) are known, the student should meet with the individual major coordinator within L\&S Academic Deans' Services by calling 608-262-0617 to set up a meeting. The purpose of this meeting is to review the details of individual major requirements and to review procedures.

Applying for an Individual Major. Applications for the individual major are accepted up to Friday of the fourth week of classes in the fall and spring semesters. Applications received after that deadline will be
reviewed during the following term. Individual major applications are not reviewed during the summer.

The application must include:
1. the Individual Major application form (https:// Issaa.wiscweb.wisc.edu/wp-content/uploads/sites/144/2018/02/ Individual_Major_General_Application_Information.pdf);
2. A cover letter from the student to the Faculty Committee on Individual Majors describing the area of interest, explaining why the academic goals of the individual major cannot be achieved through an existing major or combination of majors and certificates, and discussing the individual major's applicability to future goals and plans;
3. A list of courses that will be included in the major along with a narrative explaining how the courses included on the list apply to the proposed individual major program (NOTE: students can use a maximum of two (2) courses completed prior to getting the Individual Major approved as part of their list of courses);
4. A letter of recommendation and support for the proposal from the individual major advisor; and
5. The student's current student record (unofficial transcript).

Additional supporting materials may also be included. Students must submit the original completed application with all supporting documentation in an electronic format to the individual major coordinator by the deadline.

Each individual major application is reviewed by a committee of three faculty members from the College of Letters \& Science, each representing a department related to the proposed major. The faculty committee evaluates the proposal for coherence, appropriate breadth and depth, and similarity to existing majors. The committee may approve the proposal as submitted, recommend modifications, reject the proposal altogether, or reject it with an invitation to revise and resubmit in a later semester. The
committee's decision is final. Committee approval is necessary for the student to declare the individual major.

\section*{INDIVIDUAL MAJOR WITH HONORS}

Students may propose to complete an Individual Major with Honors by appending an Honors in the Major proposal to their regular individual major proposal.

\section*{HONORS IN THE INDIVIDUAL MAJOR: REQUIREMENTS}

To earn Honors in the Individual Major, students must:
- Complete 36 credits toward the individual major
- Complete 20 credits, taken for Honors, with individual grades of B or better, toward the individual major, to include a two-semester Senior Honors Thesis for a total of 6 credits.

For additional information about pursuing Honors, see Honors in the Major website (https://honors.ls.wisc.edu/currentstudents/hmreqs/).

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{FOUR-YEAR PLAN}

Due to the nature of the Individual Major (IM), the following Four-Year Plan is meant solely as a guide. Students are expected to start the application process for the IM at the end of their 2nd year or the beginning of their 3rd year due to the application process and the need to have their proposal reviewed by a faculty committee. Once/if a student is approved to pursue an Individual Major, the student will then discuss their Four-
Year Plan with their IM advisor. All undergraduate students in L\&S must declare an L\&S major by the time they have \(\mathbf{8 6}\) degree credits (which includes any credits they are currently enrolled in).

\section*{First Year}
\begin{tabular}{lcr}

\hline
\end{tabular}

\section*{Total Credits 120-124}

\section*{ADVISING AND CAREERS}

Students interested in learning more about the L\&S Individual Major (IM) should contact L\&S Undergraduate Academic Deans' Services at 608-262-0617 in 101 Ingraham Hall and set up an individual appointment with the coordinator for the Individual Major prior to starting this process.
The purpose of this meeting is solely to review the details of individual major requirements, go over procedures, and determine whether an individual major is a viable option based on the student's academic interest and the resources available within the College of Letters \& Science.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{INDIVIDUAL MAJOR, B.S.}

The Individual Major (IM) within the College of Letters \& Science is a method of fulfilling the depth requirement for students whose interests bridge existing departments and disciplines in ways not accommodated by an existing major or interdisciplinary program. - Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of \(3+\) credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline
\end{tabular} \begin{tabular}{ll} 
Foreign \\
Language
\end{tabular}\(\quad\)\begin{tabular}{ll} 
Complete the third unit of a foreign language.
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR DEVELOPING AN INDIVIDUAL MAJOR}

Any undergraduate student working toward completing an undergraduate degree in the College of Letters \& Science with a minimum University GPA of 2.000 may apply to develop an individual major. (Students earning degrees in other undergraduate schools and colleges on the UW-Madison campus are not eligible to pursue an Individual Major within Letters \& Science.) This major must receive approval during the second-term of the sophomore/second year or first term of junior/third year. Students in the individual major are required to earn at least \(\mathbf{3 0}\) degree credits after the term in which approval is given. A student may complete only one individual major.

Developing an Individual Major. The student takes primary responsibility for developing an individual major proposal. A well-written proposal must meet the requirements and rigor for a major in the College of Letters \& Science; therefore, a proposal must be more than a list of courses that are similar in content area or subject matter. The student proposing an individual major must also demonstrate that the proposed individual major is not currently available as an option in any of the L\&S majors or certificate programs.

Students interested in the individual major should consult with the individual major coordinator as part of the process of defining the theme or topic for the individual major. The coordinator will provide information and feedback about the construction of the major and how it might relate to other majors in the college as well.

Once a theme or topic has been identified, the student must find a tenured faculty member in the College of Letters \& Science who is willing to serve as the individual major adviser. This designated faculty advisor will:
- assist the student in constructing the individual major proposal by defining the relevant themes, learning objectives, and rationale for the major and by sharpening presentation of the student's individual major proposal;
- assist in the review and selection of courses for the major plan included in the proposal;
- advise the student in course selection after the proposal is approved and, in consultation with the individual major coordinator, track progress toward completion of the major.

As soon as the topic and the advisor (i.e., a tenured faculty member in an L\&S academic department) are known, the student should meet with the individual major coordinator within L\&S Academic Deans' Services by calling 608-262-0617 to set up a meeting. The purpose of this meeting is to review the details of individual major requirements and to review procedures.

> Applying for an Individual Major. Applications for the individual major are accepted up to Friday of the fourth week of classes in the fall and spring semesters. Applications received after that deadline will be reviewed during the following term. Individual major applications are not reviewed during the summer.

The application must include:
1. the Individual Major application form (https:// Issaa.wiscweb.wisc.edu/wp-content/uploads/sites/144/2018/02/ Individual_Major_General_Application_Information.pdf);
2. A cover letter from the student to the Faculty Committee on Individual Majors describing the area of interest, explaining why the academic goals of the individual major cannot be achieved through an existing major or combination of majors and certificates, and discussing the individual major's applicability to future goals and plans;
3. A list of courses that will be included in the major along with a narrative explaining how the courses included on the list apply to the proposed individual major program (NOTE: students can use a maximum of two (2) courses completed prior to getting the Individual Major approved as part of their list of courses);
4. A letter of recommendation and support for the proposal from the individual major advisor; and
5. The student's current student record (unofficial transcript).

Additional supporting materials may also be included. Students must submit the original completed application with all supporting documentation in an electronic format to the individual major coordinator by the deadline.

Each individual major application is reviewed by a committee of three faculty members from the College of Letters \& Science, each representing a department related to the proposed major. The faculty committee evaluates the proposal for coherence, appropriate breadth and depth, and similarity to existing majors. The committee may approve the proposal as submitted, recommend modifications, reject the proposal altogether, or reject it with an invitation to revise and resubmit in a later semester. The
committee's decision is final. Committee approval is necessary for the student to declare the individual major.

\section*{INDIVIDUAL MAJOR WITH HONORS}

Students may propose to complete an Individual Major with Honors by appending an Honors in the Major proposal to their regular individual major proposal.

\section*{HONORS IN THE INDIVIDUAL MAJOR: REQUIREMENTS}

To earn Honors in the Individual Major, students must:
- Complete 36 credits toward the individual major
- Complete 20 credits, taken for Honors, with individual grades of B or better, toward the individual major, to include a two-semester Senior Honors Thesis for a total of 6 credits.

For additional information about pursuing Honors, see Honors in the Major website (https://honors.ls.wisc.edu/currentstudents/hmreqs/).

\section*{UNIVERSITY DEGREE REQUIREMENTS}

\footnotetext{
Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
}
\(\left.\begin{array}{ll}\text { Residency } & \begin{array}{l}\text { Degree candidates are required to earn a minimum of } \\

Work
\end{tabular} \begin{tabular}{l} 
point average specified by the school, college, or academic \\
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum \\
thresholds will be placed on academic probation.
\end{tabular} \\
\end{tabular}

\section*{FOUR-YEAR PLAN}

Due to the nature of the Individual Major (IM), the following Four-Year Plan is meant solely as a guide. Students are expected to start the application process for the IM at the end of their \(2 n d\) year or the beginning of their 3rd year due to the application process and the need to have their proposal reviewed by a faculty committee. Once/if a student is approved to pursue an Individual Major, the student will then discuss their FourYear Plan with their IM advisor. All undergraduate students in L\&S must declare an L\&S major by the time they have 86 degree credits (which includes any credits they are currently enrolled in).

\section*{First Year}
\begin{tabular}{|c|c|c|c|}
\hline Fall & Credits & ts Spring & Credits \\
\hline Communication-A (complete during your first year) & & 3 Ethnic Studies (complete within your first 60 credits) & 3 \\

\section*{ADVISING AND CAREERS}

Students interested in learning more about the L\&S Individual Major (IM) should contact L\&S Undergraduate Academic Deans' Services at 608-262-0617 in 101 Ingraham Hall and set up an individual appointment with the coordinator for the Individual Major prior to starting this process.
The purpose of this meeting is solely to review the details of individual major requirements, go over procedures, and determine whether an individual major is a viable option based on the student's academic interest and the resources available within the College of Letters \& Science.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{MICROBIOLOGY, B.A. (L\&S)}

Admissions to the Microbiology [B.A. or B.S. (L\&S)] has been suspended as of fall 2023, and the program will be discontinued as of fall 2027. Students interested in Microbiology can contact the Microbiology major advisors (academicaffairs@cals.wisc.edu) to discuss the College of Agricultural and Life Sciences Microbiology major. For other questions, please contact CALS Academic Affairs (academicaffairs@cals.wisc.edu).

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation, bioenergy, food safety, antibiotic resistance, biotechnology, and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development, and other issues of national concern.

The microbiology major, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes, and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques-gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in pharmaceutical firms, biotechnology firms, university laboratories, and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

\section*{HOW TO GET IN}
advisors (biochemmicrobio-advisor@wisc.edu) to discuss the College of Agricultural and Life Sciences Microbiology major. For other questions, please contact CALS Academic Affairs (academicaffairs@cals.wisc.edu).

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics
Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B(Q R-B)\) coursework.

Foreign Language
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\begin{tabular}{|c|c|}
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all MICROBIO courses and courses approved for the major
- 2.000 GPA on 15 upper-level major credits, in residence \({ }^{1}\)
- 15 credits of MICROBIO or courses counting toward the major, taken on campus

1
MICROBIO 300 through 699 count as upper level in the major, excluding MICROBIO 303 and MICROBIO 304. Intermediate- and advanced-level courses outside of MICROBIO that count for the major are also considered upper level.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Microbiology Major in consultation with the Microbiology undergraduate advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major in Microbiology, students must satisfy both the requirements for the major (above) and the following requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all courses accepted in the major
- MICROBIO 681 and MICROBIO 682 for a total of 6 credits
- 9 credits of Honors course work (with grade B or better) from:
\begin{tabular}{llr} 
Code & Title & Credits \\

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Total Degree & To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. \\
\hline Residency & Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs. \\
\hline Quality of Work & Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation. \\
\hline
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology.
2. Apply the scientific method to questions. Formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving.
4. Access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Learn about and demonstrate personal and professional ethics.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Current UW-Madison students should use Starfish to schedule an appointment with an advisor in the Biochemistry \& Microbiology Undergraduate Advising Hub (http://biochemmicrobio.wisc.edu/).

Prospective / future UW-Madison students should send an email to the Biochemistry \& Microbiology Undergraduate Advising Hub (biochemmicrobio-advisor@wisc.edu) to set up an appointment, which can be conducted in person or via phone call.

Read about and explore possible microbiology careers at the American Society for Microbiology (https://www.asm.org/Careers/Career-
Planning/) website.
Learn more about health-related careers through the
ExploreHealthCareers.org (https://explorehealthcareers.org/) website.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{Academic Advisors}

Biochemistry \& Microbiology Undergraduate Advising Hub (https:// biochemmicrobio.wisc.edu/advising/)

For more information, see the Department of Bacteriology directory (https://bact.wisc.edu/people.php).

\section*{MICROBIOLOGY, B.S. (L\&S)}

Admissions to the Microbiology [B.A. or B.S. (L\&S)] has been suspended as of fall 2023, and the program will be discontinued as of fall 2027. Students interested in Microbiology can contact the Microbiology major advisors (academicaffairs@cals.wisc.edu) to discuss the College of Agricultural and Life Sciences Microbiology major. For other questions, please contact CALS Academic Affairs (academicaffairs@cals.wisc.edu).

Microbiology, the study of microorganisms, helps us understand our world and solve major problems. Microorganisms, or microbes, were the first life forms on earth and influence our lives and our planet in innumerable ways. The field of microbiology is constantly expanding as we learn more about the role of microbes in infectious disease, environmental remediation bioenergy, food safety, antibiotic resistance, biotechnology, and much more. Communities of microbes (or "microbiomes") are critically important in human health, global warming, agricultural yield, criminal justice, economic development, and other issues of national concern.

The microbiology major, offered by the Department of Bacteriology, is a rigorous path of study, providing a curriculum packed with deep knowledge on broad aspects of microbiology and emphasizing modern laboratory skills. The core courses focus on the diversity, genetics, biochemistry, and physiology of microorganisms. A variety of elective courses provide the opportunity to study environmental microbiology, food microbiology, microbial pathogenesis, immunology, virology, microbiomes, and microbial biotechnology, as well as advanced topics in microbial genetics and physiology. In the instructional laboratory courses, students learn beginning through advanced laboratory techniques-gaining the type of hands-on experiences with modern equipment that employers and graduate schools seek. Additionally, students can conduct mentored and independent research projects in faculty laboratories.

The bachelor's degree provides a strong background in the biological sciences for students planning to enter medical, dental, veterinary or other professional schools, as well as those planning graduate studies in any branch of microbiology or other biological sciences such as biochemistry, pathology, and molecular or cell biology.

Students who end their training with a bachelor's degree are well-prepared for a variety of career opportunities, including laboratory positions in
pharmaceutical firms, biotechnology firms, university laboratories, and government laboratories. They also work as specialists in industrial quality testing and control, and as regulatory workers in government agencies and public health laboratories. Exposure to the scientific process as well as training in microbiology allows microbiology graduates to enter fields as diverse as business, technical service, sales, and technical writing.

\section*{HOW TO GET IN}

Admissions to the Microbiology [B.A. or B.S. (L\&S)] has been suspended as of fall 2023, and the program will be discontinued as of fall 2027. Students interested in Microbiology can contact the microbiology major advisors (biochemmicrobio-advisor@wisc.edu) to discuss the College of Agricultural and Life Sciences Microbiology major. \section*{REQUIREMENTS}

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

Foreign Complete the third unit of a foreign language.
Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or
Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit.
\end{tabular}
\begin{tabular}{ll} 
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{REQUIREMENTS FOR THE MAJOR}
\begin{tabular}{|c|c|c|}
\hline Code Mathematics & Title & Credits \\
\hline Complete one o & ollowing: & 5-10 \\
\hline \begin{tabular}{l}
MATH 171 \\

\section*{Total Credits}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all MICROBIO courses and courses approved for the major
- 2.000 GPA on 15 upper-level major credits, in residence \({ }^{1}\)
- 15 credits of MICROBIO or courses counting toward the major, taken on campus

1
MICROBIO 300 through 699 count as upper level in the major, excluding MICROBIO 303 and MICROBIO 304. Intermediate- and advanced-level courses outside of MICROBIO that count for the major are also considered upper level.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Microbiology Major in consultation with the Microbiology undergraduate advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major in Microbiology, students must satisfy both the requirements for the major (above) and the following requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all courses accepted in the major
- MICROBIO 681 and MICROBIO 682 for a total of 6 credits
- 9 credits of Honors course work (with grade B or better) from:
\begin{tabular}{llr} 
Code & Title & Credits \\
MICROBIO 303 & Biology of Microorganisms & 3 \\
MICROBIO 304 & \begin{tabular}{l} 
Biology of Microorganisms \\
Laboratory
\end{tabular} & 2 \\
MICROBIO 330 & Host-Parasite Interactions & 3 \\
MICROBIO/ & Environmental Microbiology & 3 \\

\end{tabular} & General Virology-Multiplication of Viruses & 3 \\
\hline MICROBIO/ BMOLCHEM 668 & Microbiology at Atomic Resolution & 3 \\
\hline
\end{tabular}

\section*{UNIVERSITY DEGREE REQUIREMENTS}

\section*{LEARNING OUTCOMES}
1. Develop a fundamental understanding of the principles of microbiology and the necessary skills for a professional career in microbiology.
2. Apply the scientific method to questions. Formulate a hypothesis, gather data, and analyze that data to assess the degree to which their work supports the hypothesis.
3. Demonstrate proficiency in the techniques used in microbiology and an ability to critically analyze data and integrate ideas for problem solving.
4. Access the primary and secondary literature and, in combination with their own findings, effectively communicate their ideas both orally and in written form.
5. Learn about and demonstrate personal and professional ethics.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in
athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{SAMPLE MICROBIOLOGY FOUR-YEAR PLAN}

\section*{MATHEMATICS}

Mathematics bridges the humanities and the sciences. Its position among the humanities is based on the study of mathematics as one of the liberal arts for more than two thousand years. The natural sciences have invariably turned to mathematics for techniques needed to explore the consequences of scientific theories. In the last few decades social scientists have increasingly found higher mathematics of value in their training and research. Still an expanding subject, mathematics is a part of more new and challenging frontiers than at any time in its long historywith many new fields, from data science to quantum computing, requiring new techniques and inspiring ideas for exploration.

Graduating math majors have obtained employment in a variety of jobs in business, industry, and governmental agencies and also have obtained teaching positions at the secondary school level (such teaching positions normally require teaching certification). Others have continued their education at the graduate level in mathematics and other fields. Departments in a variety of fields which use mathematics, including some in the social and biological sciences as well as in engineering and the physical sciences, are interested in attracting math majors into their graduate programs. Math Ph.D.'s obtain academic positions at the college and university level and nonacademic positions entailing consulting and research. The math major requirements are flexible enough to allow preparation for various goals, interests, and careers.

Students interested in mathematics might also consider the related degree program in applied mathematics, engineering and physics (p. 1144).

\section*{APPLIED MATHEMATICS, ENGINEERING, AND PHYSICS, B.S. AMEP}

This four-year degree program in the interdisciplinary physical sciences offers a strong foundation in related areas of engineering sciences, mathematics, and physics for professional work in the field of industrial research and technology. It also provides a foundation for graduate degree work in applied mathematics, engineering sciences, and physics.

The AMEP program is an excellent choice for the student with broad interests in mathematics, physics, and engineering. AMEP emphasizes an integrated mathematics and physics curriculum and strives to achieve an optimum balance of breadth and depth in the physical sciences within the confines of a four-year degree.

\section*{HOW TO GET IN}

\section*{DECLARATION REQUIREMENTS}

Because admission into AMEP is internal to UW-Madison, a student must be admitted to UW-Madison or already be a UW-Madison student to join AMEP.

The general expectation for admission to the AMEP program is completion of the introductory calculus and physics sequences with appropriate success. Specifically a student must have
- Completed MATH 221, MATH 222, and MATH 234 with at least a 2.75 GPA.
- MATH 375 and MATH 376 (together) may be substituted for MATH 234.
- Completed PHYSICS 247, PHYSICS 248, PHYSICS 249 with at least a 2.75 GPA.
- For alternate Introductory Physics courses, see the full program description.

Students who do not meet the above qualifications (transfer students, freshmen with advanced standings, etc.) may be admitted to the program on a probationary basis. However, such students who do not eventually meet the above admission requirement or maintain a 2.0 GPA in quality of work program requirements in their first term at UW-Madison may be reassigned to a standard BA or BS degree.

Finally, students who have accrued 86 or more credits will be admitted to the AMEP program only if
- the student has above a 2.0 in both the general and upper level quality of work requirement (see the full program requirements),
- the student has fewer than 60 outstanding credits needed to complete then degree.

\section*{DECLARING APPLIED MATHEMATICS, ENGINEERING, AND PHYSICS UNDERGRADUATE DEGREE PROGRAM (AMEP)}

Any student who is interested in the AMEP program should meet with a program advisor as soon as possible. The advisor will help the student negotiate pre-AMEP status and eventually assist in declaration for the program. In general, this should be an AMEP MATH faculty advisor.

Advising information can be found in the Advising and Careers (https:// guide.wisc.edu/undergraduate/letters-science/mathematics/applied-mathematics-engineering-physics-bs-amep/\#advisingandcareerstext) tab.

For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE-APPLIED MATHEMATICS, ENGINEERING, AND PHYSICS (B.S.-AMEP)}

Students pursuing a Bachelor of Science-Applied Mathematics, Engineering, and Physics degree in the College of Letters \& Science must complete all of the requirements below. The B.S.-AMEP is a special degree program; it is not considered a major. The B.S.-AMEP degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

\section*{BACHELOR OF SCIENCE - AMEP DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Foreign Complete the second unit of a foreign language.
Language
Liberal Arts Complete a minimum of 20 credits in Liberal Arts and and Science Science (LAS) coursework outside the physical and Requirement mathematical sciences, including:
- at least of 12 credits of Humanities and/or Social Science, including at least 6 credits in Humanities and at least 3 credits of Social Science
- a maximum of 8 credits of Biological Science
- additional eligible coursework to reach 20 total credits.

Courses that carry the Physical Science breadth designation, or are listed (or cross-listed) in the MATH or COMP SCI subjects, are not eligible.
Total Credits Complete at least 125 credits.
UW-Madison Complete both:
Experience \(\cdot 30\) credits in residence, overall, and
- 30 credits in residence after the 90th credit.

Quality of
- 2.000 in all coursework at UW-Madison

Work

\section*{REQUIREMENTS FOR THE PROGRAM}

A total of at least 125 credits with a minimum GPA of 2.000 is required for this degree plan. Of these credits, at least 82 must be devoted to Mathematics, Physics, Engineering, and Chemistry requirements; 20 must be devoted to University General Education requirements; and the balance may be from electives.
\begin{tabular}{l} 
Code Title \\
FOUNDATION: Mathematics \\
Single Variable Calculus. Completed with credit for both \\

COMP SCI 514
Bachelor of Science General Education Requirements 20
Electives to Reach 125 Credits 6-23
Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 2.000 GPA in AMEP program courses. \({ }^{7}\)
- Minimum 2.000 GPA and 15 upper-level AMEP program credits, taken in residence. \({ }^{7,8}\)
- 15 credits in AMEP program courses, taken on the UW-Madison campus. \({ }^{7}\)

\section*{HONORS IN THE MAJOR}

Honors in the Major is not available in Applied Mathematics, Engineering, and Physics.

\section*{FOOTNOTES}

\section*{1}

MATH 375 may also be used to fulfill the Linear Algebra requirement below. MATH 376 may be used to fulfill the Diferential Equations requirement below.

\section*{2}

MATH 320 fulfills both the Linear Algebra and Differential Equations requirement. AMEP students are encouraged to consider the honors version of the course which is taught by AMEP faculty.
3
A default plan may include MATH 415, MATH/STAT 431, and MATH/ COMP SCI 514.

4
A default plan might inlcude courses slected from
PHYSICS 307, PHYSICS 321, PHYSICS 325, PHYSICS 415, PHYSICS 448, and PHYSICS 449.

5
Work with an AMEP Engineering advisor to construct a progressive and cohesive sequence of courses. We recommend you begin enrolling in engineering courses at or near the completion of your MATH and PHYSICS core requirements.

\section*{6}

Course used to fulfill this requirement need not be distinct from courses used to fulfill Mathematics, Physics, and Engineering requirements in AMEP.

\section*{7}

This includes only those courses which may be used to fulfill Mathematics, Physics, Engineering, Chemistry, Laboratory, and Computational requirements described in the tables above.

\section*{8}

A course numbered 300 or above is considered upper level in the program.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. State, explain and apply principal theorems and techniques of applied mathematics, including (but not limited to) the subject areas of vector and complex calculus, linear algebra, and differential equations.
2. State, explain and apply theory and methods of classical and modern physics such as mechanics (classical, statistical, quantum), electricity, magnetism, thermodynamics, radiation and atomic physics.
3. Develop strategies to synthesize applied mathematics and physical sciences to address engineering problems, with emphasis on problems of current interest.
4. Design and conduct experiments to explore hypotheses regarding science and/or technology and/or engineering problems, and will use mathematics to help interpret experimental results.
5. Work in multidisciplinary groups of mathematicians, physical scientists, and engineers to formulate and solve STEM problems, which includes the creation and evaluation of models for natural phenomena.
6. Through written and oral presentations, students will communicate technical/scientific ideas and results to experts and non-experts.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{|c|c|c|c|}
\hline Fall & Credits & Spring & Credits \\

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers ( 3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{MATHEMATICS, B.A.}

Mathematics bridges the humanities and the sciences. Its position among the humanities is based on the study of mathematics as one of the liberal arts for more than two thousand years. The natural sciences have invariably turned to mathematics for techniques needed to explore the consequences of scientific theories. In the last few decades social scientists have increasingly found higher mathematics of value in their training and research. Still an expanding subject, mathematics is a part of more new and challenging frontiers than at any time in its long historywith many new fields, from data science to quantum computing, requiring new techniques and inspiring ideas for exploration.

Graduating math majors have obtained employment in a variety of jobs in business, industry, and governmental agencies and also have obtained teaching positions at the secondary school level (such teaching positions normally require teaching certification). Others have continued their education at the graduate level in mathematics and other fields. Departments in a variety of fields which use mathematics, including some in the social and biological sciences as well as in engineering and the physical sciences, are interested in attracting math majors into their graduate programs. Math Ph.D.'s obtain academic positions at the college and university level and nonacademic positions entailing consulting and research. The math major requirements are flexible enough to allow preparation for various goals, interests, and careers.

Students interested in mathematics might also consider the related degree program in applied mathematics, engineering and physics (p. 1144).

\section*{HOW TO GET IN}

\section*{DECLARATION}

To declare a major in mathematics, a student must have completed the sequence MATH 221, MATH 222, and MATH 234, or the sequence MATH 375 and MATH 376, with a 2.500 GPA or better. Major advisors may waive this requirement for students with alternative coursework and experiences (e.g., transfer students). Students should meet with a math advisor before declaring in order to discuss course selection and major plan. Advising information can be found in the Advising and Careers (https://guide.wisc.edu/undergraduate/letters-science/mathematics/mathematics-bs/\#advisingandcareerstext) link.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}

Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of
one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.

Foreign
Language
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

The mathematics major requirements include exposure to at least two areas of advanced mathematics. The program is ideal for any student who has a broad interest in mathematics both pure and applied, and functions well as a standalone or complementary program.

The mathematics major requires 7 distinct courses for at least 21 credits as described below. Note that at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: seven courses and at least 21 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320, or MATH 376), and Intro Probability (MATH/STAT 309, MATH 331, or MATH/STAT 431).

\section*{MATHEMATICS MAJOR REQUIREMENTS}

At least seven MATH courses for at least \(\mathbf{2 1}\) credits are required for the major as follows \({ }^{1}\) :

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all MATH and major courses.
- 2.000 GPA on 15 upper-level major credits, taken in residence. \({ }^{5}\)
- 15 credits in MATH, taken on the UW-Madison campus.

\section*{NAMED OPTIONS}

View as listView as grid

\section*{- MATHEMATICS: MATHEMATICS FOR DATA SCIENCE (P. 1156) \\ - MATHEMATICS: MATHEMATICS FOR ECONOMICS AND FINANCE (P. 1158) \\ - MATHEMATICS: MATHEMATICS FOR PROGRAMMING AND COMPUTING (P. 1160) \\ - MATHEMATICS: MATHEMATICS FOR SECONDARY EDUCATION (P. 1163) \\ - MATHEMATICS: MATHEMATICS FOR STATISTICAL ANALYSIS AND RISK ASSESSMENT (P. 1164) \\ - MATHEMATICS: MATHEMATICS FOR THE PHYSICAL AND BIOLOGICAL SCIENCES (P. 1167)}

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Mathematics Honors advisor (https://www.math.wisc.edu/undergraduate/ advising/); this should be done by the start of the junior year. Honors in the major is not available in any Named Option program.

\section*{HONORS IN THE MATHEMATICS MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the mathematics major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all MATH courses, and all courses accepted in the major
- Complete the following courses, with individual grades of B or better:
\begin{tabular}{ll} 
Code & Title \\
MATH 521 & Analysis I \\
\& MATH 522 & and Analysis II (Taken for Honors) \({ }^{6}\) \\
MATH 541 & \begin{tabular}{l} 
Modern Algebra \\
\& MATH 542
\end{tabular} \\
\begin{tabular}{l} 
and Modern Algebra (Taken for \\
\(H_{0 n o r s) ~}^{6}\)
\end{tabular}
\end{tabular}

Select at least two more courses from MATH 500 through MATH/E C E 641. These course must be taken for honors. The following will usually be one of the courses: \({ }^{7}\)

\section*{MATH 551 Elementary Topology}

Select one of these Capstone projects:
\begin{tabular}{ll} 
MATH 681 & Senior Honors Thesis \\
\& MATH 682 & \begin{tabular}{l} 
and Senior Honors Thesis (For a \\
total of 6 credits)
\end{tabular}
\end{tabular}
or
A sequence of two upper-level mathematics courses deemed acceptable by the Mathematics Honors advisor 7

\section*{FOOTNOTES}

1
A course may only apply once toward the courses/credits required for the major. Thus, a course used to meet the Analysis, Topology and Algebra requirement may not also be used to meet the requirement for MATH 500-699 requirement and a course used to meet the MATH 500-699 requirement may not also be used in the Additional Math requirement.

2

Only one of these courses will be used to fulfill minimum course/credit requirements for the major: MATH 320, MATH 340, MATH 341, MATH 375

3
At most one course in Introductory Probability may be used to fulfill the course/credit requirements for the major: MATH/STAT 309 and MATH/ STAT 431.
4
At most one course in Elementary Differential Equations may be used to fulfill the course/credit requirements for the major: MATH 319, MATH 320, MATH 376.

MATH courses numbered 307-699 are considered upper level in the major.
6
At least one of the two sequences
(MATH 521-MATH 522 or MATH 541-MATH 542) must be completed prior to enrolling in the Capstone project.
7
Chosen in consultation with the Mathematics Honors advisor.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits. \\
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{EARNING OUTCOMES}
1. State, explain, and apply the principal results, definitions, and theorems of a wide collection of mathematical areas including at least one area of advanced undergraduate mathematics.
2. Construct and evaluate mathematical proofs and arguments.
3. Acquire a diverse set of skills and strategies in mathematical reasoning/problem solving.
4. Use mathematics to model and analyze phenomena in other disciplines.
5. Write, explain, and present mathematics to both experts and non-experts.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\hline Elective & & 3 Elective & 3 \\
\hline Elective & & 3 Elective & 3 \\
\hline
\end{tabular}

Elective
3 Elective

\section*{Total Credits 120}

1
Math majors will naturally complete Quantitative Reasoning requirements with the introductory calculus courses required to declare the major.

\section*{2}

Declaration of the Mathematics major requires a 2.500 cumulative GPA across the introductory calculus sequence. Students that are unable to establish a GPA for any courses in the introductory calculus sequence are encouraged to speak with a math major advisor as soon as possible.

3
An intermediate level math course is any numbered above 306 excluding MATH 320, MATH 340, or MATH 341, or MATH/CURRIC 471.
4
An advanced level MATH course is any numbered above 500.

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

Historically, students who have successfully complete a three year undergraduate degree with a major in Mathematics have the following qualifications: a minimum of 29 advanced standing credits, which include completion of the following with either course credit or via placement examination:
- MATH 221 and MATH 222
- Communication Part A
- 3-4 units of foreign language

Therefore the plan below assumes these requirements, but none other. When considering the plan below, students should note the following:
- Advanced standing credits may satisfy Ethnic Studies, Communication Part B, and/or Letters \& Science Breadth degree requirements which are listed in the plan. In this case, students should adjust their plan by reorganizing the remaining degree requirements using the following priorities: 1) Ethnic Studies and Communication Part B (obligatory in the first year); 2) Physical, Biological, and Social Science Breadth (which may be prerequisites for more advanced electives); 3) Humanities and Literature. Remaining schedule space should be considered electives.
- At least 26 of the non-MATH credits must be at the Intermediate or Advanced level.
- Consider using the elective space in the plan as follows: additional major or certificate, career readiness, graduate school preparation, and other personal interests.
\begin{tabular}{|c|c|c|c|}
\hline \multicolumn{4}{|l|}{First Year} \\
\hline Fall & Credits & Spring & Credits \\
\hline MATH 234 & & 4 MATH Linear Algebra & 3 \\
\hline Ethnic Studies & & 3 Intermediate MATH & 3 \\
\hline Communication B & & 3 Physical Science Breadth & 3 \\
\hline Biological Science Breadth & & 3 Biological Science Breadth & 3 \\
\hline Physical Science Breadth & & 3 Foreign Language (if needed for the B.A.) or Elective & 3 \\
\hline
\end{tabular}

\section*{Second Year}
\begin{tabular}{llc} 
Fall & Credits & Spring \\
Intermediate MATH & 3 Advanced MATH & Credits \\
Advanced MATH & 3 Intermediate MATH & 3 \\
Literature Breadth & 3 Literature Breadth & 3 \\
Social Science Breadth & 3 Social Science Breadth & 3 \\
Elective (Intermediate or & 3 Elective (Intermediate or & 3 \\
Advanced level) & Advanced level) & 3 \\
\hline
\end{tabular}

\section*{Third Year}
\begin{tabular}{lcr} 
Fall & Credits & Spring \\
Advanced MATH & \begin{tabular}{c} 
3 Humanities Breadth \\
(Intermediate or
\end{tabular} & Credits
\end{tabular}

15

\section*{Total Credits 91}

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students who are interested in the math major should visit a faculty advisor. Information about current advisor availability is on the Math advising page (https://www.math.wisc.edu/undergraduate/advising/).

For advice on college algebra, pre-calculus, and calculus, see the placement advising pages (https://www.math.wisc.edu/ undergraduate/placement/) of the department.

\section*{TRANSITION COURSES}

All majors are required to complete at least one of the following. It is suggested that majors (and those interested in the major) complete such a course as soon in their academic career as possible.
\begin{tabular}{ll} 
Code & Title
\end{tabular} Credits

\section*{GRADUATE STUDY}

Students preparing for graduate work in mathematics should take the following courses:
\begin{tabular}{llr} 
Code & Title & Credits \\
MATH 341 & Linear Algebra & 3 \\
or MATH 375 & Topics in Multi-Variable Calculus and Linear & \\
& Algebra & \\
MATH 521 & Analysis I & 3 \\
MATH 522 & Analysis II & 3 \\
MATH 541 & Modern Algebra & 3 \\
MATH 542 & Modern Algebra & 3 \\
MATH 551 & Elementary Topology & 3 \\
or MATH 561 & Differential Geometry &
\end{tabular}

Select at least two other courses at the 500 level or higher
Students who plan to enter a mathematics Ph.D. program should acquire a reading knowledge of at least one foreign language as early as possible. For mathematics study, the most useful languages are French, German, and Russian.

\section*{CAREERS}

In recent years graduating math majors have obtained employment in a variety of jobs in business, industry, and governmental agencies and also have obtained teaching positions at the secondary school level (such teaching positions normally require teaching certification). Others have continued their education at the graduate level in mathematics and other fields. Departments in a variety of fields which use mathematics, including the social and biological sciences as well as in engineering and the physical sciences, are interested in attracting math majors into their graduate programs. Math Ph.D.'s obtain academic positions at the college and university level and nonacademic positions entailing consulting and research. The math major requirements are flexible enough to allow preparation for various goals.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{RESOURCES AND SCHOLARSHIPS}

The Department of Mathematics offers scholarships, awards, and prizes (https://math.wisc.edu/undergraduate/awards/) to declared math majors. The majority of award opportunities are available in the fall semester with applications typically open midway through the semester. Spring awards are smaller in number and also open midway through the semester.

Awards vary in scope and criteria. Some awards are open to students who exhibit financial need, while others are granted to students based on academic merit. Other awards are related to undergraduate research. Awards may be open to specific student populations, such as:
- Underrepresented students of color
- Self-identified women
- Graduating majors
- Early-career majors

Declared math majors are encouraged to apply for any awards in which they meet the qualifications.

\section*{MATHEMATICS: \\ MATHEMATICS FOR DATA SCIENCE}

The mathematics named option programs allow students to develop a deep understanding of how the subject relates to other areas of human inquiry. The requirements for these programs feature mathematics courses with topics inspired by and commonly applied to problems in these associated fields. Though often paired with a second major in a related area, these programs function well alone and are suited to any mathematics student with a variety of interests. Students interested in a named option program are recommended to meet with an advisor to navigate the various plans and courses available to them. Advising information can be found on the BA or BS pages (p. 1154).

The named options do not support honors in the major.

\section*{REQUIREMENTS}

The Mathematics for Data Science program requires 10 distinct courses for at least 30 credits as described below. Note that while some courses may be used to fulfill more than one requirement it is still considered only a single course and may only contribute once to the total course count.
Finally, at most only one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: requirements: minimum of ten courses and at least 30 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

\section*{Code \\ Title}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA on all MATH courses and courses eligible for the major. \({ }^{4}\)
- 2.000 GPA on at least 15 credits of upper level credit in the major. \({ }^{5}\)
- 15 credits in MATH in the major taken on the UW-Madison campus. \({ }^{6}\)

\section*{FOOTNOTES}

1
Elective courses must be distinct from those used to fulfill the above requirements.
2
Courses below may have prerequisites outside of this program.
3
MATH courses must be distinct from any used to fulfill an above requirement.

4
This includes any course with a MATH prefix (or crosslisted with MATH) regardless of its appearance in the tables above and any non-MATH class explicitly listed in the tables above.

\section*{5}

This includes any MATH course (including those crosslisted with MATH) numbered 307 and above, regardless of its appearance in the tables above, as well as only those non-MATH classes which appear in the tables above and have the advanced LAS attribute.
6
This includes any MATH course (and those crosslisted with MATH) numbered 307 and above.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence: 1) Calculus, 2) Linear Algebra, 3) Required Intermediate level course, 4) Additional intermediate level courses as needed, 5) Required advanced level course, 6) Additional advanced level courses.

\section*{MATHEMATICS: \\ MATHEMATICS FOR ECONOMICS AND FINANCE}

The mathematics named option programs allow students to develop a deep understanding of how the subject relates to other areas of human inquiry. The requirements for these programs feature mathematics courses with topics inspired by and commonly applied to problems in these associated fields. Though often paired with a second major in a related area, these programs function well alone and are suited to any mathematics student with a variety of interests. Students interested in a named option program are recommended to meet with an advisor to navigate the various plans and courses available to them. Advising information can be found on the BA or BS pages (p. 1154).

The named options do not support honors in the major.

\section*{REQUIREMENTS}

The Mathematics Major with Economics and Finance focus requires 10 distinct courses for at least 30 credits as described below. Note that while some courses may be used to fulfill more than one requirement
it is still considered only a single course and may only contribute once to the total course count. Finally, at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: minimum of ten courses and at least 30 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA on all MATH courses and courses eligible for the major. \({ }^{3}\)
- 2.000 GPA on at least 15 credits of upper level credit in the major. \({ }^{4}\)
- 15 credits in MATH in the major taken on the UW-Madison campus. \({ }^{5}\)

\section*{FOOTNOTES}

1
Some courses which follow may have prerequisites outside of the courses approved for this named option.

2
Any MATH course from the elective list above may be used in lieu of any of the following courses.

3
This includes any MATH courses (and those cross-listed with MATH) regardless of appearing in the tables above as well as only those nonMATH courses which are explicitly listed in the tables above.

\section*{4}

This includes any MATH courses (and those cross-listed with MATH) numbered 307 and above, regardless of appearing in the tables above, as well as only those non-MATH course explicitly listed in the tables above which carry the advanced LAS designation.

This includes any MATH courses (and courses cross-listed with MATH) numbered 307 and above regardless of appearing in the tables above.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence: 1) Calculus, 2) Linear Algebra, 3) Required Intermediate level course, 4) Additional intermediate level courses as needed, 5) Required advanced level course, 6) Additional advanced level courses.

\section*{Freshman}

\section*{MATHEMATICS: MATHEMATICS FOR SECONDARY EDUCATION}

The mathematics named option programs allow students to develop a deep understanding of how the subject relates to other areas of human inquiry. The requirements for these programs feature mathematics courses with topics inspired by and commonly applied to problems in these associated fields. Though often paired with a second major in a related area, these programs function well alone and are suited to any mathematics student with a variety of interests. Students interested in a named option program are recommended to meet with an advisor to navigate the various plans and courses available to them. Advising information can be found on the BA or BS pages (p. 1154).

The named options do not support honors in the major.

\section*{REQUIREMENTS}

The Mathematics Major for Secondary Education named option requires at least 8 distinct courses for at least 24 credits as described below. While a single courses may be used to fulfill more than one requirement, it will only contribute once to the total course/credit count. Finally, at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: minimum of 8 courses and at least 24 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA on all MATH courses and courses eligible for the major. \({ }^{5}\)
- 2.000 GPA on at least 15 credits of upper level credit in the major. \({ }^{6}\)
- 15 credits in MATH in the major taken on the UW-Madison campus. \({ }^{7}\)

\section*{FOOTNOTES}

1
Students taking STAT 312 to satisfy the Statistics requirement will not be able to use this course towards the six courses/18 credits of MATH courses.

2
This course must be distinct from the advanced mathematics requirement. 3

The courses which follow may have prerequisites outside of this program.
4
Any MATH course from the elective list above may be used in lieu of any of the following courses.

\section*{5}

This includes any course with a MATH prefix (or cross-listed with MATH) regardless of its appearance in the tables above and any non-MATH course explicitly listed in the tables above.
6
This includes any MATH course (including those crosslisted with MATH) which are numbered 307 and above, regardless of its appearance in the tables above, as well as only those non-MATH course which appear in the tables above and have the advanced LAS attribute.

This includes any MATH course (and those crosslisted with MATH) numbered 307 and above.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence: 1) Calculus, 2) Linear Algebra, 3) Required Intermediate level course, 4) Additional intermediate level courses as needed, 5) Required advanced level course, 6) Additional advanced level courses.

\section*{Total Credits 120}

\section*{1}

Students should declare their major upon the successful completion of this course

> MATHEMATICS: MATHEMATICS FOR THE PHYSICAL AND BIOLOGICAL SCIENCES

The mathematics named option programs allow students to develop a deep understanding of how the subject relates to other areas of human inquiry. The requirements for these programs feature mathematics courses with topics inspired by and commonly applied to problems in these associated fields. Though often paired with a second major in a related area, these programs function well alone and are suited to any mathematics student with a variety of interests. Students interested in a named option program are recommended to meet with an advisor to navigate the various plans and courses available to them. Advising information can be found on the BA or BS pages (p. 1154).

The named options do not support honors in the major.

\section*{REQUIREMENTS}

The Mathematics for the Physical and Biological Sciences program requires 10 distinct courses for at least 30 credits as described below. While a single courses may be used to fulfill more than one requirement, it will only contribute once to the total course count. Finally, at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: minimum of ten courses and at least 30 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

\section*{Total Credits 120}

\section*{FOOTNOTES}

1
Students should declare their major upon the successful completion of this course
training and research. Still an expanding subject, mathematics is a part of more new and challenging frontiers than at any time in its long historywith many new fields, from data science to quantum computing, requiring new techniques and inspiring ideas for exploration.

Graduating math majors have obtained employment in a variety of jobs in business, industry, and governmental agencies and also have obtained teaching positions at the secondary school level (such teaching positions normally require teaching certification). Others have continued their education at the graduate level in mathematics and other fields. Departments in a variety of fields which use mathematics, including some in the social and biological sciences as well as in engineering and the physical sciences, are interested in attracting math majors into their graduate programs. Math Ph.D.'s obtain academic positions at the college and university level and nonacademic positions entailing consulting and research. The math major requirements are flexible enough to allow preparation for various goals, interests, and careers.

Students interested in mathematics might also consider the related degree program in applied mathematics, engineering and physics (p. 1144)

\section*{HOW TO GET IN}

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL \\ EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the
requirements listed below. Consult your advisor for assistance, as needed. Various schools and colleges will have requirements in addition to the
requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General For additional information, see the university Undergrad
Education Requirements (p. 32) section of the Guide.

\section*{DECLARATION}

To declare a major in mathematics, a student must have completed the sequence MATH 221, MATH 222, and MATH 234, or the sequence MATH 375 and MATH 376, with a 2.500 GPA or better. Major advisors may waive this requirement for students with alternative coursework and experiences (e.g., transfer students). Students should meet with a math advisor before declaring in order to discuss course selection and major plan. Advising information can be found in the required to fulf a min

\section*{MATHEMATICS, B.S.}

Mathematics bridges the humanities and the sciences. Its position among the humanities is based on the study of mathematics as one of the liberal arts for more than two thousand years. The natural sciences have invariably turned to mathematics for techniques needed to explore the consequences of scientific theories. In the last few decades social scientists have increasingly found higher mathematics of value in their

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part Brequirements.

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT
subjects counts toward this requirement.
Foreign Complete the third unit of a foreign language.

Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll}

Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}\(\$ l\)
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the
major requirements. They do not need to complete the L\&S Degree Requirements above.

The mathematics major requirements include exposure to at least two areas of advanced mathematics. The program is ideal for any student who has a broad interest in mathematics both pure and applied, and functions well as a standalone or complementary program.

The mathematics major requires 7 distinct courses for at least 21 credits as described below. Note that at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: seven courses and at least 21 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320, or MATH 376), and Intro Probability (MATH/STAT 309, MATH 331, or MATH/STAT 431).

\section*{MATHEMATICS MAJOR REQUIREMENTS}

At least seven MATH courses for at least 21 credits are required for the major as follows \({ }^{1}\) :

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all MATH and major courses.
- 2.000 GPA on 15 upper-level major credits, taken in residence. \({ }^{5}\)
- 15 credits in MATH, taken on the UW-Madison campus.

\section*{NAMED OPTIONS}

View as listView as grid
- MATHEMATICS: MATHEMATICS FOR DATA
SCIENCE (P. 1156)
- MATHEMATICS: MATHEMATICS FOR
ECONOMICS AND FINANCE (P. 1158)
- MATHEMATICS: MATHEMATICS FOR
PROGRAMMING AND COMPUTING (P. 1160)
- MATHEMATICS: MATHEMATICS FOR SECONDARY EDUCATION (P. 1163)
- MATHEMATICS: MATHEMATICS FOR STATISTICAL ANALYSIS AND RISK ASSESSMENT (P. 1164)
- MATHEMATICS: MATHEMATICS FOR THE PHYSICAL AND BIOLOGICAL SCIENCES (P. 1167)

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Mathematics Honors advisor (https://www.math.wisc.edu/undergraduate/ advising/); this should be done by the start of the junior year. Honors in the major is not available in any Named Option program.

\section*{HONORS IN THE MATHEMATICS MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the mathematics major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA for all MATH courses, and all courses accepted in the major
- Complete the following courses, with individual grades of B or better:

\section*{Code}

MATH 521
\& MATH 522

\section*{Title}

Analysis I
and Analysis II (Taken for Honors) \({ }^{6}\)
\begin{tabular}{ll} 
MATH 541 & Modern Algebra \\
\& MATH 542 & \begin{tabular}{l} 
and Modern Algebra (Taken for \\
Honors) \(^{6}\)
\end{tabular}
\end{tabular}

Select at least two more courses from MATH 500 through MATH/E C E 641. These course must be taken for honors. The following will usually be one of the courses: \({ }^{7}\)
\begin{tabular}{ll} 
MATH 551 & Elementary Topology \\
Select one of these Capstone projects: \\
MATH 681 & Senior Honors Thesis \\
\& MATH 682 & \begin{tabular}{l} 
and Senior Honors Thesis (For a \\
total of 6 credits)
\end{tabular}
\end{tabular}
or
A sequence of two upper-level mathematics courses
deemed acceptable by the Mathematics Honors advisor 7

\section*{FOOTNOTES}

1
A course may only apply once toward the courses/credits required for the major. Thus, a course used to meet the Analysis, Topology and Algebra requirement may not also be used to meet the requirement for MATH 500-699 requirement and a course used to meet the MATH 500-699 requirement may not also be used in the Additional Math requirement. 2

Only one of these courses will be used to fulfill minimum course/credit requirements for the major: MATH 320, MATH 340, MATH 341, MATH 375

3
At most one course in Introductory Probability may be used to fulfill the course/credit requirements for the major: MATH/STAT 309 and MATH/ STAT 431.

4
At most one course in Elementary Differential Equations may be used to fulfill the course/credit requirements for the major: MATH 319, MATH 320, MATH 376.

5
MATH courses numbered 307-699 are considered upper level in the major.
6
At least one of the two sequences
(MATH 521-MATH 522 or MATH 541-MATH 542) must be completed prior to enrolling in the Capstone project.

7
Chosen in consultation with the Mathematics Honors advisor.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
\(\left.\begin{array}{ll}\text { Residency } & \begin{array}{l}\text { Degree candidates are required to earn a minimum of } \\
\\
30 \text { credits in residence at UW-Madison. "In residence" } \\
\text { means on the UW-Madison campus with an undergraduate } \\
\text { degree classification. "In residence" credit also includes }\end{array} \\
& \text { UW-Madison courses offered in distance or online formats } \\
\text { and credits earned in UW-Madison Study Abroad/Study }\end{array}\right\}\)\begin{tabular}{ll} 
Away programs.
\end{tabular}

\section*{LEARNING OUTCOMES}
1. State, explain, and apply the principal results, definitions, and theorems of a wide collection of mathematical areas including at least one area of advanced undergraduate mathematics.
2. Construct and evaluate mathematical proofs and arguments.
3. Acquire a diverse set of skills and strategies in mathematical reasoning/problem solving.
4. Use mathematics to model and analyze phenomena in other disciplines.
5. Write, explain, and present mathematics to both experts and non-experts.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\hline \multicolumn{4}{|l|}{DEPARTMENTAL EXPECTATIONS} \\
\hline \multicolumn{4}{|l|}{Historically, students who have successfully complete a three year undergraduate degree with a major in Mathematics have the following qualifications: a minimum of 29 advanced standing credits, which include} \\
\hline
\end{tabular}

\section*{Senior}

Total Credits 120

Math majors will naturally complete Quantitative Reasoning requirements with the introductory calculus courses required to declare the major. across the introductory calculus sequence. Students that are unable to establish a GPA for any courses in the introductory calculus sequence are encouraged to speak with a math major advisor as soon as possible.

3
An intermediate level math course is any numbered above 306 excluding MATH 320, MATH 340, or MATH 341, or MATH/CURRIC 471.

\section*{THREE-YEAR PLAN}

\section*{SAMPLETHREE-YEAR} Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early graduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

Historically, students who have successfully complete a three year qualifications: a minimum of 29 advanced standing credits, which include
completion of the following with either course credit or via placement examination
- MATH 221 and MATH 222
- Communication Part A
- 3-4 units of foreign language

Therefore the plan below assumes these requirements, but none other When considering the plan below, students should note the following:
- Advanced standing credits may satisfy Ethnic Studies, Communication Part B, and/or Letters \& Science Breadth degree requirements which are listed in the plan. In this case, students should adjust their plan by reorganizing the remaining degree requirements using the following priorities: 1) Ethnic Studies and Communication Part B (obligatory in the first year); 2) Physical, Biological, and Social Science Breadth (which may be prerequisites for more advanced electives);
3) Humanities and Literature. Remaining schedule space should be considered electives.
- At least 26 of the non-MATH credits must be at the Intermediate or Advanced level.
- Consider using the elective space in the plan as follows: additional major or certificate, career readiness, graduate school preparation, and other personal interests.
\begin{tabular}{|c|c|c|c|}
\hline \multicolumn{4}{|l|}{First Year} \\
\hline Fall & Credits & Spring & Credits \\
\hline MATH 234 & & 4 MATH Linear Algebra & 3 \\
\hline Ethnic Studies & & 3 Intermediate MATH & 3 \\
\hline Communication B & & 3 Physical Science Breadth & 3 \\
\hline Biological Science Breadth & & 3 Biological Science Breadth & 3 \\
\hline Physical Science Breadth & & 3 Foreign Language (if needed for the B.A.) or Elective & 3 \\
\hline
\end{tabular}

\section*{Second Year}
\begin{tabular}{lll} 
Fall & Credits & Spring
\end{tabular} Credits \begin{tabular}{ll} 
Intermediate MATH & 3 Advanced MATH
\end{tabular}

\section*{Third Year}
Fall Credits Spring Credits

Advanced MATH
3 Humanities Breadth (Intermediate or Advanced level)
Social Science Breadth
3 Social Science Breadth (Intermediate or Advanced level)
Humanities Breadth

3 Elective (Intermediate or Advanced level)
Elective (Intermediate or 6
Advanced level)

Advanced level)
15
15
Total Credits 91

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students who are interested in the math major should visit a faculty advisor. Information about current advisor availability is on the Math advising page (https://www.math.wisc.edu/undergraduate/advising/).

For advice on college algebra, pre-calculus, and calculus, see the placement advising pages (https://www.math.wisc.edu/ undergraduate/placement/) of the department.

\section*{TRANSITION COURSES}

All majors are required to complete at least one of the following. It is suggested that majors (and those interested in the major) complete such a course as soon in their academic career as possible.
\begin{tabular}{ll}
\begin{tabular}{l} 
Code \\
MATH 341
\end{tabular} & Title \\
MATH 321 & Linear Algebra \\
\& MATH 322 & \begin{tabular}{l} 
Applied Mathematical Analysis \\
and Applied Mathematical Analysis
\end{tabular} \\
\hline MATH 375 & \begin{tabular}{l} 
Topics in Multi-Variable Calculus and \\
Linear Algebra
\end{tabular} \\
\hline MATH 421 & \begin{tabular}{l} 
The Theory of Single Variable \\
Calculus
\end{tabular} \\
\hline MATH 467 & Introduction to Number Theory \\
GRADUATE STUD
\end{tabular}

Students preparing for graduate work in mathematics should take the following courses:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline MATH 341 or MATH 375 & \begin{tabular}{l}
Linear Algebra \\
Topics in Multi-Variable \\
Algebra
\end{tabular} & 3 \\
\hline MATH 521 & Analysis I & 3 \\
\hline MATH 522 & Analysis II & 3 \\
\hline MATH 541 & Modern Algebra & 3 \\
\hline MATH 542 & Modern Algebra & 3 \\
\hline \[
\begin{aligned}
& \text { MATH } 551 \\
& \quad \text { or MATH } 561
\end{aligned}
\] & \begin{tabular}{l}
Elementary Topology \\
Differential Geometry
\end{tabular} & 3 \\
\hline \multicolumn{3}{|l|}{Select at least two other courses at the 500 level or higher} \\
\hline \multicolumn{3}{|l|}{Students who plan to enter a mathematics Ph.D. program should acquire a reading knowledge of at least one foreign language as early as possible. For mathematics study, the most useful languages are French, German, and Russian.} \\
\hline
\end{tabular}

In recent years graduating math majors have obtained employment in a variety of jobs in business, industry, and governmental agencies and also have obtained teaching positions at the secondary school level
(such teaching positions normally require teaching certification). Others have continued their education at the graduate level in mathematics and other fields. Departments in a variety of fields which use mathematics, including the social and biological sciences as well as in engineering and the physical sciences, are interested in attracting math majors into their graduate programs. Math Ph.D.'s obtain academic positions at the college and university level and nonacademic positions entailing consulting and research. The math major requirements are flexible enough to allow preparation for various goals.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{RESOURCES AND SCHOLARSHIPS}

The Department of Mathematics offers scholarships, awards, and prizes (https://math.wisc.edu/undergraduate/awards/) to declared math majors. The majority of award opportunities are available in the fall semester with applications typically open midway through the semester. Spring awards are smaller in number and also open midway through the semester.

Awards vary in scope and criteria. Some awards are open to students who exhibit financial need, while others are granted to students based on academic merit. Other awards are related to undergraduate research. Awards may be open to specific student populations, such as:
- Underrepresented students of color
- Self-identified women
- Graduating majors
- Early-career majors

Declared math majors are encouraged to apply for any awards in which they meet the qualifications.

\section*{MATHEMATICS: \\ MATHEMATICS FOR DATA SCIENCE}

\section*{REQUIREMENTS}

The Mathematics for Data Science program requires 10 distinct courses for at least 30 credits as described below. Note that while some courses may be used to fulfill more than one requirement it is still considered only a single course and may only contribute once to the total course count.
Finally, at most only one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: requirements: minimum of ten courses and at least 30 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA on all MATH courses and courses eligible for the major. \({ }^{4}\)
- 2.000 GPA on at least 15 credits of upper level credit in the major. \({ }^{5}\)
- 15 credits in MATH in the major taken on the UW-Madison campus. \({ }^{6}\)

\section*{FOOTNOTES}

1
Elective courses must be distinct from those used to fulfill the above requirements.
2
Courses below may have prerequisites outside of this program.
3
MATH courses must be distinct from any used to fulfill an above requirement.

4
This includes any course with a MATH prefix (or crosslisted with MATH) regardless of its appearance in the tables above and any non-MATH class explicitly listed in the tables above.

\section*{5}

This includes any MATH course (including those crosslisted with MATH) numbered 307 and above, regardless of its appearance in the tables above, as well as only those non-MATH classes which appear in the tables above and have the advanced LAS attribute.

\section*{6}

This includes any MATH course (and those crosslisted with MATH) numbered 307 and above.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence: 1) Calculus, 2) Linear Algebra, 3) Required Intermediate level course, 4) Additional intermediate level courses as needed, 5) Required advanced level course, 6) Additional advanced level courses.

> MATHEMATICS FOR
> STATISTICAL ANALYSIS AND RISK ASSESSMENT

\section*{REQUIREMENTS}

The Mathematics for Statistical Analysis and Risk Assessment program requires 10 distinct courses for at least 30 credits as described below. Note that while some courses may be used to fulfill more than one requirement it is still considered only a single course and may only contribute once to the total course count. Finally, at most one course from each of the following groupings may be used to fulfill the minimum course and credit requirement (i.e.: minimum of ten courses and at least 30 credits): Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375), Intro Differential Equations (MATH 319, MATH 320 or MATH 376), and Intro Probability (MATH/STAT 309 or MATH/STAT 431).

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA on all MATH courses and courses eligible for the major. \({ }^{5}\)
- 2.000 GPA on at least 15 credits of upper level credit in the major. \({ }^{6}\)
- 15 credits in MATH in the major taken on the UW-Madison campus. \({ }^{7}\)

\section*{FOOTNOTES}

\section*{1}

Students taking STAT 312 to satisfy the Statistics requirement will not be able to use this course towards the six courses/ 18 credits of MATH courses.

\section*{2}

This course must be distinct from the advanced mathematics requirement.
3
The courses which follow may have prerequisites outside of this program.

Any MATH course from the elective list above may be used in lieu of any of the following courses

This includes any course with a MATH prefix (or cross-listed with MATH) regardless of its appearance in the tables above and any non-MATH course explicitly listed in the tables above.

This includes any MATH course (including those crosslisted with MATH) which are numbered 307 and above, regardless of its appearance in the tables above, as well as only those non-MATH course which appear in the tables above and have the advanced LAS attribute.

\section*{7}

This includes any MATH course (and those crosslisted with MATH) numbered 307 and above.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence: 1) Calculus, 2) Linear Algebra, 3) Required Intermediate level course, 4) Additional intermediate level courses as needed, 5) Required advanced level course, 6) Additional advanced level courses.

- 2.000 GPA for all MATH courses and courses eligible for the major. \({ }^{3}\)
- 2.000 GPA on at least 15 credits of upper level credit in the major. \({ }^{4}\)
- 15 credits in MATH in the major taken on the UW-Madison campus. \({ }^{5}\)

\section*{FOOTNOTES}

1
Courses listed in the tables below may have prerequisites outside of the program requirements.
2
Any MATH course from the elective list above may be used in lieu of any of the following courses.

\section*{3}

This includes any course with the MATH prefix (or cross-listed with MATH) regardless of appearing in the tables above as well as only those nonMATH courses which appear in the tables above.

\section*{4}

This includes any MATH courses (or courses cross-listed with MATH) numbered 307 and above, regardless of appearing in the tables above, as well as any non-MATH course listed in the tables above which carries the advanced LAS designation.

\section*{5}

This includes any course with the MATH prefix (or cross-listed with MATH) numbered 307 and above.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

In general, your four year plan in mathematics should be organized along the following sequence: 1) Calculus, 2) Linear Algebra, 3) Required Intermediate level course, 4) Additional intermediate level courses as needed, 5) Required advanced level course, 6) Additional advanced level courses.

\section*{Freshman}
\begin{tabular}{|c|c|c|c|}
\hline Fall & Credits & Spring & Credits \\
\hline MATH 221 & & 5 MATH 222 & 4 \\
\hline Literature Breadth & & 3 Literature Breadth & 3 \\

\end{tabular}

\section*{Total Credits 120}

\section*{FOOTNOTES}

\section*{1}

Students should declare their major upon the successful completion of this course

\section*{MATHEMATICS, CERTIFICATE}

The primary purpose of the mathematics certificate is to serve those students who wish to enhance their content knowledge in mathematics but are unable to complete the requirements of a second major.

\section*{HOW TO GET IN}

Students must meet with a math advisor in order to declare and to discuss course selection. Math advisor information is provided at the math advising page (http://www.math.wisc.edu/undergraduate/advising/).

\section*{REQUIREMENTS}

The certificate requires a minimum of 12 credits. Note that at most one course from each of the following groupings may be used to fulfill the minimum credit requirement: Intro Linear Algebra (MATH 320, MATH 340, MATH 341, MATH 375 ), Intro Differential Equations (MATH 319, MATH 320, MATH 376), and Intro Probability (MATH/STAT 309, MATH 331, MATH/STAT 431).
\begin{tabular}{|c|c|}
\hline Code Title & Credits \\
\hline Requirements \({ }^{\mathbf{1 , 2}}\) & \\
\hline 3 credits MATH 400-699 & 3 \\
\hline 9 credits from MATH 307-699 & 9 \\
\hline Total Credits & 12 \\
\hline Footnotes & \\
\hline 1 & \\
\hline Excluding MATH/CURRIC 471. & \\
\hline 2 & \\
\hline \begin{tabular}{l}
At most one (1) course each from these groups may apply: \\
- Linear Algebra: MATH 320, MATH 340, MATH 341, MATH 375 \\
- Differential Equations: MATH 319, MATH 320, MATH 376 \\
- Probability: MATH/STAT 309, MATH 331 MATH/STAT 431
\end{tabular} & \\
\hline
\end{tabular}

\section*{RESIDENCE \& QUALITY OF WORK}
- At least 9 certificate credits must be completed in residence.
- Minimum 2.000 GPA on all certificate courses.

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

\section*{LEARNING OUTCOMES}
1. State, explain, and apply the principal results, definitions, and theorems of a wide collection of mathematical areas.
2. Acquire a diverse set of skills and strategies in mathematical reasoning/problem solving.
3. Use mathematics to model and analyze problems in other disciplines.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students who are interested in the math major should visit a faculty advisor. Information about current advisor availability is on the Math advising page (https://www.math.wisc.edu/undergraduate/advising/).

For advice on college algebra, pre-calculus, and calculus, see the placement advising pages (https://www.math.wisc.edu/ undergraduate/placement/) of the department.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{MEAD WITTER SCHOOL OF MUSIC \\ VALUES AND EDUCATIONAL PRIORITIES}

\author{
At the Mead Witter School of Music
}
- we teach by example offering participatory, mentor-driven education;
- we provide individualized instruction and flexible curricula that encourage students to find their own musical pathways;
- we foster musical excellence and high academic standards;
- our faculty exhibit the best of their respective fields, are deeply engaged in artistic scholarship and research, and are committed to teaching at all levels;
- we whole-heartedly embrace the Wisconsin Idea;
- our department is a dynamic educational community, part of a large and vibrant research university within a city that values and supports the arts.

The Mead Witter School of Music enriches students' educational experience by hosting guest artists and scholars for master classes, recitals, colloquia, seminars, and festivals. Its performing organizations and ensembles perform more than 350 recitals and concerts every year, making a significant contribution to the cultural life of the university and the wider Madison community. Facilities specifically designed for music study and performance offer excellent resources for students to pursue their interests.

In addition to a thriving undergraduate student body, music students have the advantage of working side-by-side with master's-level and doctorallevel music students. Working collegially in class and studio, making music together on stage and off, and building professional relationships across program boundaries all enable the sharing of expertise, experience, and perspectives and add immeasurably to every student's development.

The music degree programs are demanding and require care in taking courses in the proper sequence. Graduation could be delayed if a course is not taken in the appropriate semester. Refer to the Requirements tab for details on the coursework and sequences of study in specific majors.

Mead Witter School of Music views its goals and objectives as complementary to those of the University of Wisconsin-Madison, which include "to provide an environment in which faculty and students can discover, examine critically, preserve and transmit the knowledge, wisdom and values that will help ensure the survival of the present and future generations with improvement in the quality of life."

The University of Wisconsin-Madison School of Music is accredited by the National Association of Schools of Music (NASM), and has been an institutional member of NASM since 1966.

\section*{PEOPLE AND FACILITIES}

The greatest asset of Mead Witter School of Music is its people-staff, faculty, and students-who are daily immersed in learning, building, researching, writing, and making music. Mentoring is the core of our teaching, manifest in one-on-one applied instruction as well as in small-group coaching and classes. Undergraduate students will build professional relationships with many faculty, form friendships with peers across the boundaries of degree programs, and collaborate with staff in addressing the practical matters of academic study. Extensive information on faculty, including biographies, is available here.

The Mosse Humanities Building, built in 1969, houses most of the music classrooms, rehearsal rooms, faculty studios, and 111 practice rooms. Most recitals and concerts take place in one of three performance spaces: Mills Concert Hall, Morphy Recital Hall, and Eastman Organ Recital Hall. The school's extensive collection of instruments, both common and unusual, is available to both faculty and students. Music Hall with its clock tower, built in 1879, is a campus landmark. Renovated in 1985, it is the home of the opera program. The new Hamel Music Center includes a concert hall, a recital hall, and a large ensemble rehearsal space.

Memorial Library is the home of the Mills Music Library, which offers extensive research and circulating collections, attractive study space, and personal staff assistance with research. Music materials on campus number over half a million, ranging from scores and sheet music to archival collections and historic audio recordings. Through Mills Music Library and other UW-Madison libraries, students have access to a wide range of online research databases as well as millions of articles, books, and streaming media. All genres of music are represented, with notably strong collections in Americana and ethnic music. Nationally known special collections include the Tams-Witmark Collection, a treasury of early American musical theater materials, and the Wisconsin Music Archives.

\section*{CHOOSING A MUSIC MAJOR}

Mead Witter School of Music offers several degree programs at the undergraduate level. The bachelor of arts and bachelor of science curricula are liberal arts majors in the College of Letters \& Science and are excellent programs for students interested in exploring the wide array of course offerings in the college or in two or more major areas of study. The bachelor of music curriculum is a professional degree in music, with 75 percent of total coursework within the Mead Witter School of Music. Students in this program are looking for depth in performance study along with a large complement of other musical studies at advanced level. Both programs may provide a foundation for graduate study and sometimes for a career in music. We encourage conversations with Mead Witter School of Music professors at any point during your first two years as a music major to learn as much as possible about options that are available to you.

\section*{GRADES AND ADVISING}

Mead Witter School of Music is a department of the UW-Madison College of Letters \& Science. Information on the grading system and academic procedures is available in the College of Letters \& Science section and the opening section of this Guide.

The undergraduate advisor of the School of Music serves as the advisor for every music major. The advisor maintains records and assists students in determining an appropriate course schedule each semester.

\section*{MUSIC COURSES FOR NONMUSIC MAJORS}

A variety of courses in music theory, music history and literature, as well as orchestra, chorus, band, and some ensembles, are open to students from other departments, schools, and colleges. Students should review the specific regulations of their degree program to determine whether music courses can fulfill breadth requirements. The Course Guide (http:// public.my.wisc.edu/portal/render.userLayoutRootNode.uP) indicates music courses that are open to nonmusic majors.

Music performance courses are generally filled by music majors. Fundamentals courses (007-036) are for instrumental music education majors only. Class Piano (101-104) is for music majors only. Basic courses require the ability to read music and to pass a prepared audition; in addition, Basic Guitar requires previous experience with classical guitar. Students outside the School of Music may audition to be on a waiting list for group or individual voice study with a teaching assistant (MUS PERF 143 Introduction to Performance: Voice or MUS PERF 144 Vocal Instruction for Non-Voice Majors). Contact the course instructor for more information about course requirements and admission criteria. The School of Music offers private music lessons (not for university credit and with separate costs) for non-music majors through the Community Music Lessons (http://www.music.wisc.edu/CML/) program.

Regulation of music courses available for degree credit varies among the divisions of the university. Students should consult their major department for specific advice.

Courses open to non-music majors that satisfy the university's humanities breadth requirements:
\begin{tabular}{llr} 
Code & Title & Credits \\

\end{tabular}

\section*{SPECIAL STUDENTS}

Persons who are interested in courses offered by the School of Music but who are not working toward a UW-Madison degree should contact the Division of Continuing Studies, 21 North Park Street, Madison, WI 53715; 608-263-6960. Enrollment is limited in music courses, and priority is given to UW-Madison undergraduate degree candidates.

\section*{DEGREES/MAJORS/CERTIFICATES}

\section*{UNDERGRADUATE DEGREE PROGRAMS}

Mead Witter School of Music offers four principal degree options for the music major. Each requires a performance audition for admission. Continuation to upper-level study in these programs is contingent upon faculty approval and upon specific GPA minimums in several categories. Refer to the Requirements tab in each program description for details.

Bachelor of Music: Performance, with concentration in Brass, Composition, Guitar, Harp, Jazz Studies, Organ, Percussion, Piano, Strings, Voice, or Woodwinds.

Bachelor of Music: Music Education, with certification in General and Instrumental Music (Early Childhood through Adolescence), or General and Vocal Music (Early Childhood through Adolescence).

Bachelor of Arts or Bachelor of Science, with a music major: options in performance, history, theory, or an individualized music curriculum. The individualized music curriculum can be designed with an emphasis in composition or jazz studies. The history and theory options are under review and may be changed. During this time, the School of Music is not admitting new students to these options.
- Music, B.A. (p. 1196)
- Music, B.S. (p. 1209)
- Music: Education, B.M. (p. 1222)
- Music: Performance, B.M. (p. 1231)

\section*{PEOPLE}

Faculty: Professors Cook (director), Calderón, Chisholm, Di Sanza, Dobbs, Doing, Dominguez, Fischer, Fulmer, Hetzler, Hyer, Johnson, Karp, Perry, Rowe, Schwendinger, Taylor, Teeple, Thimmig, Vallon, Wallmann; Associate Professors Butler, Farah, Grabois, Nelson, Ronis; Assistant Professors Chana, Flowers, Laurenz, Lee, Sans, Weinstein-Reimann; Marching Band Director Pompey; Teaching Faculty Curry, Gladstone, Gonzalez, Koester, Pompey, Purdue, Rottmayer, Weinholts, Wohn; Faculty Associate Rich; Lecturers Lee, McCullough, Mok, Patenaude, Tran, Waldo; Teaching Specialists Hammes, Ross

The faculty of the Mead Witter School of Music is a distinguished group of educators, performing musicians, and active scholars. The backgrounds of performance faculty include rich experiences as professional musicians, researchers, recording artists, and entrepreneurs. Faculty in music education have particular insight into their field as a result of their backgrounds as school educators, performers, and scholars. In areas such as music theory and musicology, the musical community has high regard for the past and current contributions to the study of musical theory, historical perspectives on music, the role of music in societies around
the world, and the unique contributions of American musicians. Teaching is a priority for the faculty, who are readily accessible to students for advice and support. Faculty, staff, and students cooperate in extraordinary ways with joint ventures that reach across disciplines both in research or instruction.

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{OFFICE OF STUDENT FINANCIAL AID}

Prospective music students should contact the Office of Student Financial Aid (https://financialaid.wisc.edu/) (333 East Campus Mall \#9701, Madison, WI 53715-1382; 608-262-3060) to obtain information about grants and loans when returning the application for admission.

\section*{SCHOOL OF MUSIC SCHOLARSHIPS}

Some funds are available for scholarships awarded by the School of Music to outstanding applicants. It is always advisable to complete the Free Application for Federal Student Aid (FAFSA) and submit it to the Office of Student Financial Aid. Application materials will serve as support for music scholarship consideration.

Scholarship applicants must audition in person and must take the Theory Placement Examination on the audition day in order to be considered for an award. After the audition and review of materials, the associate director will notify each applicant about the scholarship decision. Accompanying each award notification will be a Letter of Commitment, to be signed and returned to the School of Music. Criteria used for awarding scholarships are:
1. Quality of the performance audition
2. High school and/or college academic record
3. Letters of recommendation

Most Mead Witter School of Music scholarships are awarded for a fouryear period. The music faculty reviews every scholarship award each semester and expects that each student on scholarship will maintain satisfactory progress toward completing the music major and degree requirements, continue to make significant contributions in performing organizations or accompanying, and maintain a minimum 3.000 grade point average. Please see the Mead Witter School of Music website (http://www.music.wisc.edu) for more information regarding music scholarships.

Nationally known special collections include the Tams-Witmark Collection, a treasury of early American musical theater materials, and the Wisconsin Music Archives.

\section*{CHOOSING A MUSIC MAJOR}

Mead Witter School of Music offers several degree programs at the undergraduate level. The bachelor of arts and bachelor of science curricula are liberal arts majors in the College of Letters \& Science and are excellent programs for students interested in exploring the wide array of course offerings in the college or in two or more major areas of study. In these programs music courses comprise one-third of a student's work toward the degree. By comparison, the bachelor of music curriculum, a professional degree in music, requires 75 percent of total coursework within the Mead Witter School of Music. Students in this program are looking for depth in performance study along with a large complement of other musical studies at advanced level. A number of alumni from both B.A. and B.S. have completed two majors at UW-Madison. Both of these programs may provide a foundation for graduate study and sometimes for a career in music. We encourage conversations with Mead Witter School of Music professors at any point during your first two years as a music major to learn as much as possible about options that are available to you.

\section*{GRADES AND ADVISING}

Mead Witter School of Music is a department of the UW-Madison College of Letters \& Science. Information on the grading system and academic procedures/policies is available in the College of Letters \& Science section of this Guide under the policies and regulations (http://guide.wisc.edu/ undergraduate/letters-science/\#policiesandregulationstext) tab.

The undergraduate advisor of the Mead Witter School of Music serves as the advisor for every music major. The advisor maintains records and assists students in determining an appropriate course schedule each semester.

\section*{HOW TO GET IN}

\section*{ADMISSION PROCEDURES}

To be admitted to the Mead Witter School of Music a student needs to apply to and be admitted by both UW-Madison and the Mead Witter School of Music:
- Prospective (new or transfer) and re-entry students should apply to UW-Madison through the Office of Admissions and Recruitment (https://admissions.wisc.edu/).
- All students must also complete an application and pass an audition. See the Mead Witter School of Music website (https://music.wisc.edu/ undergraduate-admissions/) for more information. Questions about the Music application and audition process should be directed to the Music Undergraduate Audition and Admissions Coordinator (admissions@music.wisc.edu).

\section*{DECLARING A MUSIC MAJOR}

Students admitted to UW-Madison and the Mead Witter School of Music will be declared in their music major or music degree program.

All students must make satisfactory progress, as described below, to continue in their major or degree program. Students not meeting these requirements should meet with the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) to discuss their options for continuing in the Mead Witter School of Music.

\section*{MUSIC MAJOR CONTINUATION REQUIREMENTS}

Students must meet all of the requirements below to continue in the program. Students not meeting any one of these requirements will be removed from the program and must choose a new major. Contact the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) for consideration of extenuating circumstances or if the student is considering a leave of absence (such as family emergency, personal wellness, study abroad, or approved accommodations)

\section*{(1) ENROLLMENT REQUIREMENTS}
- Enroll every fall and spring semester in a course that meets the Performance Study Requirements, until that requirement is completed.
- Enroll in MUSIC 121 and MUSIC 171 to begin the music theory/history sequence in the first possible fall semester after declaration.

\section*{(2) PERFORMANCE STUDY JURY AND PROGRESS REPORT}

At least once a year, students must pass a performance jury with their major instrument. The purpose of this jury will be to evaluate performance study progress and to set goals for the coming year. Students who do not pass will receive guidance about making improvements and a warning letter and will have a semester to work with their professor to make improvements needed to remain in the program.

\section*{(3) PROGRESSION TO 400-LEVEL PERFORMANCE STUDY}

At the end of the fourth semester of enrollment in Performance Study, students will be evaluated for permission to advance to 400-level performance study. Students who do not meet progression requirements to advance to 400-level performance study may be given an additional semester to meet those requirements.

\section*{(4) MEET GPA REQUIREMENTS IN THREE} AREAS:
- 2.000 overall cumulative GPA
- 2.000 cumulative GPA in all MUSIC and MUSIC PERFORMANCE courses
- 2.000 cumulative GPA in music theory (MUSIC 121, MUSIC 171, MUSIC 122, MUSIC 172, MUSIC 221, MUSIC 221 and MUSIC 271) and music history ( MUSIC 211 and MUSIC 212)

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
Foreign
- Complete the fourth unit of a foreign language; OR

Language
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\begin{tabular}{|c|c|}
\hline L\&S Breadth & - 12 credits of Humanities, which must include 6 credits of literature; and \\
\hline & - 12 credits of Social Science; and \\
\hline & - 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course. \\
\hline
\end{tabular}
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison & - 30 credits in residence, overall; and \\
\hline Experience & - 30 credits in residence after the 86th credit. \\
\hline Quality of & - 2.000 in all coursework at UW-Madison \\
\hline Work & - 2.000 in Intermediate/Advanced level coursework at UW-Madison \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{Requirements for the Major}

Students who do not declare a Named Option must complete the requirements below.

View as listView as grid

\section*{- MUSIC: PERFORMANCE (P. 1206)}

Student must work with a School of Music faculty member to create a cohesive plan to meet requirements; the plan must be approved by the appropriate faculty area committee(s) and by the Curriculum Committee.

\section*{PERFORMANCE STUDY - THREE SEMESTERS IN ONE OF THE FOLLOWING AREAS:}
\begin{tabular}{|c|c|c|}

\end{tabular}

\section*{2}

A maximum of 16 credits can be taken from courses numbered below 100. 3

Students who complete MUSIC 122, MUSIC 221, or MUSIC 222 without having taken the earlier courses in the theory sequence, or who achieve advanced placement in theory through department examination, may not be required to complete the prerequisite courses in the theory sequence. However, no retroactive course credit will be granted. All students must complete at least 42 credits in Mead Witter School of Music coursework.

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all MUSIC, MUS PERF and other courses counting in the major
- 2.000 GPA on 15 upper-level major credits in the major, taken in Residence (see below)
- 15 credits in MUSIC or MUS PERF, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

To participate in the Honors in the Major program, students must:
- Notify the School of Music undergraduate advisor of their intention to become a candidate for Honors in the Major. This will usually occur in the sophomore year.
- Present a minimum cumulative GPA of 3.300 in all courses taken at UW-Madison and maintain this average throughout the degree.
- Present a minimum 3.500 GPA in all music coursework
- Engage a faculty member and plan 12 credits of honors curriculum coursework; submit this plan to the undergraduate music advisor.
- Prior to beginning work on the Senior Honors Thesis sequence, confirm a faculty advisor for this sequence (who may be the same person as for the 12 credits above) and submit a prospectus outlining in detail the planned work including (a) the topic, (b) plans for research, and (c) a clear substantive written component, although it may also include oral and/or performance components. The faculty advisor must sign the prospectus indicating approval.

To complete and earn Honors in any Music major, students must satisfy the requirements for the major and these additional requirements:
- Earn a minimum 3.300 University GPA
- Earn a minimum 3.500 GPA in the major
- MUSIC 681-MUSIC 682 for a total of 6 credits
- 12 credits of Honors coursework in music: 6 of the 12 credits must be at the 300 level or higher and only 6 credits can be taken in any one of the three music areas of theory, history, and performance.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Demonstrate technical proficiency in the major performance medium.
2. Demonstrate the ability to learn independently and collaboratively.
3. Integrate knowledge across domains of music research and applied studies.
4. Demonstrate artistry, creativity, and discipline in preparation and performance.
5. Employ an advanced vocabulary to discuss music verbally and in writing.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Student must work with a School of Music faculty member to create a cohesive plan to meet requirements; the plan must be approved by the appropriate faculty area committee(s) and by the Curriculum Committee.

\section*{ADVISING AND CAREERS}

\section*{UNDERGRADUATE ADVISING}

\section*{Advisor: Todd Reck}

Office: 3561G Humanities Building
Email: ugradadvisor@music.wisc.edu
Office phone: (608) 263-1918
If you wish to schedule an advising appointment, please note the following:
- Online access to schedule advising appointments is restricted to students who applied to, auditioned for, and have been admitted to the Mead Witter School of Music.
- Students considering applying to the School of Music should contact our undergraduate admissions coordinator, Jared Jellison, at admissions@music.wisc.edu or (608) 263-5986.

\section*{INDIVIDUAL ACADEMIC ADVISING}

Current music majors can schedule an appointment with Todd via Starfish, which can be accessed via your MyUW student portal. If uncertain how to use Starfish, please see https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/

Appointments can also be made by phone at 608-263-1918.

\section*{BE PREPARED FOR YOUR ADVISING APPOINTMENT \\ Please bring the following to your appointment:}
- Any questions you have about requirements, extracurricular opportunities, study abroad, or whatever is on your mind.
- A pen and paper for note taking.
- Any form you may need signed. Be sure you have filled out all pertinent information and have read the form/document thoroughly.

\section*{WHAT TO EXPECT FROM AN ACADEMIC ADVISING APPOINTMENT}

Academic advisors help students learn and understand their degree and major requirements. Programs in the Mead Witter School of Music are highly sequential, and some required courses are offered only once each year. Many of our undergraduates are interested in earning an additional major and/or certificate; with careful planning each semester, this is possible. Advisors often can explain some of the differences between courses that meet the same degree requirement. For students considering study abroad, it's a good idea to begin exploring programs early in your degree and work with your advisor to determine the program length (semester/summer/year) that will best fit your needs and interests.

It is recommended that you see an advisor at least once a semester to plan your courses and check progress toward degree completion. Students sometimes need clarification of degree requirements, particularly if they are considering switching to a different major/degree program within the School of Music.

\section*{GENERAL CONTACT INFORMATION:}

Mead Witter School of Music
3561 Mosse Humanities Building
455 North Park Street
Madison, WI 53706-1483

\section*{SCHOOL OF EDUCATION CAREER CENTER}

Need assistance with preparing for your next step after college? Want to explore career options linked to Music Education major? Want help beginning your job search and don't know where to start? Need assistance with your résumé, cover letter, or interviewing skills? Want to connect with potential employers?

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Faculty: Professors Cook (director), Calderón, Chisholm, Di Sanza, Dobbs, Doing, Dominguez, Fischer, Fulmer, Hetzler, Hyer, Johnson, Karp, Perry, Rowe, Schwendinger, Taylor, Teeple, Thimmig, Vallon, Wallmann; Associate Professors Butler, Farah, Grabois, Nelson, Ronis; Assistant Professors Chana, Flowers, Laurenz, Lee, Sans, Weinstein-Reimann; Marching Band Director Pompey; Teaching Faculty Curry, Gladstone, Gonzalez, Koester, Pompey, Purdue, Rottmayer, Weinholts, Wohn; Faculty Associate Rich; Lecturers Lee, McCullough, Mok, Patenaude, Tran, Waldo; Teaching Specialists Hammes, Ross

The faculty of the Mead Witter School of Music is a distinguished group of educators, performing musicians, and active scholars. The backgrounds of performance faculty include rich experiences as professional musicians, researchers, recording artists, and entrepreneurs. Faculty in music education have particular insight into their field as a result of their backgrounds as school educators, performers, and scholars. In areas such as music theory and musicology, the musical community has high regard for the past and current contributions to the study of musical theory, historical perspectives on music, the role of music in societies around the world, and the unique contributions of American musicians. Teaching is a priority for the faculty, who are readily accessible to students for advice and support. Faculty, staff, and students cooperate in extraordinary ways with joint ventures that reach across disciplines both in research or instruction.

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{OFFICE OF STUDENT FINANCIAL AID}

Prospective music students should contact the Office of Student Financial Aid (https://financialaid.wisc.edu/) (333 East Campus Mall \#9701, Madison, WI 53715-1382; 608-262-3060) to obtain information about grants and loans when returning the application for admission.

\section*{SCHOOL OF MUSIC SCHOLARSHIPS}

Some funds are available for scholarships awarded by the School of Music to outstanding applicants. It is always advisable to complete the Free Application for Federal Student Aid (FAFSA) and submit it to the Office of Student Financial Aid. Application materials will serve as support for music scholarship consideration.

Scholarship applicants must audition in person and must take the Theory Placement Examination on the audition day in order to be considered for an award. After the audition and review of materials, the associate director will notify each applicant about the scholarship decision. Accompanying each award notification will be a Letter of Commitment, to be signed and returned to the School of Music. Criteria used for awarding scholarships are:
1. Quality of the performance audition
2. High school and/or college academic record
3. Letters of recommendation

Most Mead Witter School of Music scholarships are awarded for a fouryear period. The music faculty reviews every scholarship award each
semester and expects that each student on scholarship will maintain satisfactory progress toward completing the music major and degree requirements, continue to make significant contributions in performing organizations or accompanying, and maintain a minimum 3.000 grade point average. Please see the Mead Witter School of Music website (http://www.music.wisc.edu) for more information regarding music scholarships.

\section*{ACCREDITATION}

\section*{ACCREDITATION}

National Association of Schools of Music (https://nasm.arts-accredit.org)

Accreditation status: Accredited. Next accreditation review: 2022-2023

\section*{3}

A maximum of 16 credits can be taken from courses numbered below 100 .
4
The same requirements for Residence \& Quality of Work apply to the Performance Option. The same Honors in the Major requirements apply, as well.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{MUSIC, B.S. \\ values anv evocarional priortites \\ At the Mead Witter School of Music \\ - we teach by example offering participatory, mentor-driven education; \\ - we provide individualized instruction and flexible curricula that encourage students to find their own musical pathways; \\ - we foster musical excellence and high academic standards; \\ - our faculty exhibit the best of their respective fields, are deeply engaged in artistic scholarship and research, and are committed to teaching at all levels; \\ - we whole-heartedly embrace the Wisconsin Idea; \\ - our department is a dynamic educational community, part of a large and vibrant research university within a city that values and supports the arts.}

The Mead Witter School of Music enriches students' educational experience by hosting guest artists and scholars for master classes, recitals, colloquia, seminars, and festivals. Its performing organizations and ensembles perform more than 350 recitals and concerts every year, making a significant contribution to the cultural life of the university and the wider Madison community. Facilities specifically designed for music study and performance offer excellent resources for students to pursue their interests.

In addition to a thriving undergraduate student body, music students have the advantage of working side-by-side with master's-level and doctorallevel music students. Working collegially in class and studio, making music together on stage and off, and building professional relationships across program boundaries all enable the sharing of expertise, experience, and perspectives and add immeasurably to every student's development.

The music degree programs are demanding and require care in taking courses in the proper sequence. Graduation could be delayed if a course is not taken in the appropriate semester. Refer to the Requirements tab for details on the coursework and sequences of study in specific majors.

Mead Witter School of Music views its goals and objectives as complementary to those of the University of Wisconsin-Madison, which include "to provide an environment in which faculty and students can discover, examine critically, preserve and transmit the knowledge, wisdom and values that will help ensure the survival of the present and future generations with improvement in the quality of life."

The University of Wisconsin-Madison School of Music is accredited by the National Association of Schools of Music (NASM), and has been an institutional member of NASM since 1966.

\section*{PEOPLE AND FACILITIES}

The greatest asset of Mead Witter School of Music is its people-staff, faculty, and students-who are daily immersed in learning, building, researching, writing, and making music. Mentoring is the core of our teaching, manifest in one-on-one applied instruction as well as in small-group coaching and classes. Undergraduate students will build
professional relationships with many faculty, form friendships with peers across the boundaries of degree programs, and collaborate with staff in addressing the practical matters of academic study. Extensive information on faculty, including biographies, is available here (https:// www.music.wisc.edu/faculty/).

The Mosse Humanities Building, built in 1969, houses most of the music classrooms, rehearsal rooms, faculty studios, and 111 practice rooms. Most recitals and concerts take place in one of three performance spaces: Mills Concert Hall, Morphy Recital Hall, and Eastman Organ Recital Hall. The school's extensive collection of instruments, both common and unusual, is available to both faculty and students. Music Hall with its clock tower, built in 1879, is a campus landmark. Renovated in 1985, it is the home of the opera program. The new Hamel Music Center includes a concert hall, a recital hall, and a large ensemble rehearsal space.

Memorial Library is the home of the Mills Music Library, which offers extensive research and circulating collections, attractive study space, and personal staff assistance with research. Music materials on campus number over half a million, ranging from scores and sheet music to archival collections and historic audio recordings. Through Mills Music Library and other UW-Madison libraries, students have access to a wide range of online research databases as well as millions of articles, books, and streaming media. All genres of music are represented, with notably strong collections in Americana and ethnic music. Nationally known special collections include the Tams-Witmark Collection, a treasury of early American musical theater materials, and the Wisconsin Music Archives.

\section*{CHOOSING A MUSIC MAJOR}

Mead Witter School of Music offers several degree programs at the undergraduate level. The bachelor of arts and bachelor of science curricula are liberal arts majors in the College of Letters \& Science and are excellent programs for students interested in exploring the wide array of course offerings in the college or in two or more major areas of study. In these programs music courses comprise one-third of a student's work toward the degree. By comparison, the bachelor of music curriculum, a professional degree in music, requires 75 percent of total coursework within the Mead Witter School of Music. Students in this program are looking for depth in performance study along with a large complement of other musical studies at advanced level. A number of alumni from both B.A. and B.S. have completed two majors at UW-Madison. Both of these programs may provide a foundation for graduate study and sometimes for a career in music. We encourage conversations with Mead Witter School of Music professors at any point during your first two years as a music major to learn as much as possible about options that are available to you.

\section*{GRADES AND ADVISING}

Mead Witter School of Music is a department of the UW-Madison College of Letters \& Science. Information on the grading system and academic procedures/policies is available in the College of Letters \& Science section of this Guide under the policies and regulations (http://guide.wisc.edu/ undergraduate/letters-science/\#policiesandregulationstext) tab.

The undergraduate advisor of the Mead Witter School of Music serves as the advisor for every music major. The advisor maintains records and assists students in determining an appropriate course schedule each semester.

\section*{HOW TO GET IN}

\section*{ADMISSION PROCEDURES}

To be admitted to the Mead Witter School of Music a student needs to apply to and be admitted by both UW-Madison and the Mead Witter School of Music:
- Prospective (new or transfer) and re-entry students should apply to UW-Madison through the Office of Admissions and Recruitment (https://admissions.wisc.edu/).
- All students must also complete an application and pass an audition. See the Mead Witter School of Music website (https://music.wisc.edu/ undergraduate-admissions/) for more information. Questions about the Music application and audition process should be directed to the Music Undergraduate Audition and Admissions Coordinator (admissions@music.wisc.edu).

\section*{DECLARING A MUSIC MAJOR}

Students admitted to UW-Madison and the Mead Witter School of Music will be declared in their music major or music degree program. All students must make satisfactory progress, as described below, to continue in their major or degree program. Students not meeting these requirements should meet with the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) to discuss their options for continuing in the Mead Witter School of Music.

\section*{MUSIC MAJOR CONTINUATION REQUIREMENTS}

Students must meet all of the requirements below to continue in the program. Students not meeting any one of these requirements will be removed from the program and must choose a new major. Contact the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) for consideration of extenuating circumstances or if the student is considering a leave of absence (such as family emergency, personal wellness, study abroad, or approved accommodations)

\section*{(1) ENROLLMENT REQUIREMENTS}
- Enroll every fall and spring semester in a course that meets the Performance Study Requirements, until that requirement is completed.
- Enroll in MUSIC 121 and MUSIC 171 to begin the music theory/history sequence in the first possible fall semester after declaration.

\section*{(2) PERFORMANCE STUDY JURY AND PROGRESS REPORT}

At least once a year, students must pass a performance jury with their major instrument. The purpose of this jury will be to evaluate performance study progress and to set goals for the coming year. Students who do not pass will receive guidance about making improvements and a warning letter and will have a semester to work with their professor to make improvements needed to remain in the program.

\section*{(3) PROGRESSION TO 400-LEVEL PERFORMANCE STUDY}

At the end of the fourth semester of enrollment in Performance Study, students will be evaluated for permission to advance to 400-level performance study. Students who do not meet progression requirements to advance to 400-level performance study may be given an additional semester to meet those requirements.

\section*{(4) MEET GPA REQUIREMENTS IN THREE AREAS:}
- 2.000 overall cumulative GPA
- 2.000 cumulative GPA in all MUSIC and MUSIC PERFORMANCE courses
- 2.000 cumulative GPA in music theory (MUSIC 121, MUSIC 171, MUSIC 122, MUSIC 172, MUSIC 221, MUSIC 221 and MUSIC 271) and music history ( MUSIC 211 and MUSIC 212)

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of

Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of \(3+\) credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{Requirements for the Major}

Students who do not declare a Named Option must complete the requirements below.

View as listView as grid

\section*{- MUSIC: PERFORMANCE (P. 1206)}

Student must work with a School of Music faculty member to create a cohesive plan to meet requirements; the plan must be approved by the appropriate faculty area committee(s) and by the Curriculum Committee.

2
A maximum of 16 credits can be taken from courses numbered below 100. 3

Students who complete MUSIC 122, MUSIC 221, or MUSIC 222 without having taken the earlier courses in the theory sequence, or who achieve advanced placement in theory through department examination, may not be required to complete the prerequisite courses in the theory sequence. However, no retroactive course credit will be granted. All students must complete at least 42 credits in Mead Witter School of Music coursework.

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all MUSIC, MUS PERF and other courses counting in the major
- 2.000 GPA on 15 upper-level major credits in the major, taken in Residence (see below)
- 15 credits in MUSIC or MUS PERF, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

To participate in the Honors in the Major program, students must:
- Notify the School of Music undergraduate advisor of their intention to become a candidate for Honors in the Major. This will usually occur in the sophomore year.
- Present a minimum cumulative GPA of 3.300 in all courses taken at UW-Madison and maintain this average throughout the degree.
- Present a minimum 3.500 GPA in all music coursework
- Engage a faculty member and plan 12 credits of honors curriculum coursework; submit this plan to the undergraduate music advisor.
- Prior to beginning work on the Senior Honors Thesis sequence, confirm a faculty advisor for this sequence (who may be the same person as for the 12 credits above) and submit a prospectus outlining in detail the planned work including (a) the topic, (b) plans for research, and (c) a clear substantive written component, although it may also include oral and/or
performance components. The faculty advisor must sign the prospectus indicating approval.

To complete and earn Honors in any Music major, students must satisfy the requirements for the major and these additional requirements:
- Earn a minimum 3.300 University GPA
- Earn a minimum 3.500 GPA in the major
- MUSIC 681-MUSIC 682 for a total of 6 credits
- 12 credits of Honors coursework in music: 6 of the 12 credits must be at the 300 level or higher and only 6 credits can be taken in any one of the three music areas of theory, history, and performance.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Demonstrate technical proficiency in the major performance medium.
2. Demonstrate the ability to learn independently and collaboratively.
3. Integrate knowledge across domains of music research and applied studies.
4. Demonstrate artistry, creativity, and discipline in preparation and performance.
5. Employ an advanced vocabulary to discuss music verbally and in writing.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to
accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Student must work with a School of Music faculty member to create a cohesive plan to meet requirements; the plan must be approved by the appropriate faculty area committee(s) and by the Curriculum Committee.

ADVISING AND CAREERS

\section*{UNDERGRADUATE ADVISING}

Office: 3561G Humanities Building
Email: ugradadvisor@music.wisc.edu
Office phone: (608) 263-1918

\section*{If you wish to schedule an advising appointment, please note the following:}
- Online access to schedule advising appointments is restricted to students who applied to, auditioned for, and have been admitted to the Mead Witter School of Music.
- Students considering applying to the School of Music should contact our undergraduate admissions coordinator, Jared Jellison, at admissions@music.wisc.edu or (608) 263-5986.

\section*{INDIVIDUAL ACADEMIC ADVISING}

Current music majors can schedule an appointment with Todd via Starfish, which can be accessed via your MyUW student portal. If uncertain how to use Starfish, please see https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/

Appointments can also be made by phone at 608-263-1918.

\section*{BE PREPARED FOR YOUR ADVISING APPOINTMENT}

Please bring the following to your appointment:
- Any questions you have about requirements, extracurricular opportunities, study abroad, or whatever is on your mind.
- A pen and paper for note taking.
- Any form you may need signed. Be sure you have filled out all pertinent information and have read the form/document thoroughly.

\section*{WHAT TO EXPECT FROM AN ACADEMIC ADVISING APPOINTMENT}

Academic advisors help students learn and understand their degree and major requirements. Programs in the Mead Witter School of Music are highly sequential, and some required courses are offered only once each year. Many of our undergraduates are interested in earning an additional major and/or certificate; with careful planning each semester, this is possible. Advisors often can explain some of the differences between courses that meet the same degree requirement. For students considering study abroad, it's a good idea to begin exploring programs early in your degree and work with your advisor to determine the program length (semester/summer/year) that will best fit your needs and interests.

It is recommended that you see an advisor at least once a semester to plan your courses and check progress toward degree completion. Students sometimes need clarification of degree requirements, particularly if they are considering switching to a different major/degree program within the School of Music.

\section*{GENERAL CONTACT INFORMATION:}

Mead Witter School of Music

\section*{SCHOOL OF EDUCATION CAREER CENTER}

Need assistance with preparing for your next step after college? Want to explore career options linked to Music Education major? Want help beginning your job search and don't know where to start? Need assistance with your résumé, cover letter, or interviewing skills? Want to connect with potential employers?

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Faculty: Professors Cook (director), Calderón, Chisholm, Di Sanza, Dobbs, Doing, Dominguez, Fischer, Fulmer, Hetzler, Hyer, Johnson, Karp, Perry, Rowe, Schwendinger, Taylor, Teeple, Thimmig, Vallon, Wallmann; Associate Professors Butler, Farah, Grabois, Nelson, Ronis; Assistant Professors Chana, Flowers, Laurenz, Lee, Sans, Weinstein-Reimann; Marching Band Director Pompey; Teaching Faculty Curry, Gladstone, Gonzalez, Koester, Pompey, Purdue, Rottmayer, Weinholts, Wohn; Faculty Associate Rich; Lecturers Lee, McCullough, Mok, Patenaude, Tran, Waldo; Teaching Specialists Hammes, Ross

The faculty of the Mead Witter School of Music is a distinguished group of educators, performing musicians, and active scholars. The backgrounds of performance faculty include rich experiences as professional musicians, researchers, recording artists, and entrepreneurs. Faculty in music education have particular insight into their field as a result of their backgrounds as school educators, performers, and scholars. In areas such as music theory and musicology, the musical community has high regard for the past and current contributions to the study of musical theory, historical perspectives on music, the role of music in societies around the world, and the unique contributions of American musicians. Teaching is a priority for the faculty, who are readily accessible to students for advice and support. Faculty, staff, and students cooperate in extraordinary ways with joint ventures that reach across disciplines both in research or instruction.

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{OFFICE OF STUDENT FINANCIAL AID}

Prospective music students should contact the Office of Student Financial Aid (https://financialaid.wisc.edu/) (333 East Campus Mall \#9701, Madison, WI 53715-1382; 608-262-3060) to obtain information about grants and loans when returning the application for admission.

\section*{SCHOOL OF MUSIC SCHOLARSHIPS}

Some funds are available for scholarships awarded by the School of Music to outstanding applicants. It is always advisable to complete the Free

Application for Federal Student Aid (FAFSA) and submit it to the Office of Student Financial Aid. Application materials will serve as support for music scholarship consideration.

\section*{Scholarship applicants must audition in person and must take the Theory Placement Examination on the audition day in order to be considered for an award. After the audition and review of materials, the associate director will notify each applicant about the scholarship decision. Accompanying each award notification will be a Letter of Commitment, to be signed and returned to the School of Music. Criteria used for awarding scholarships are:}
1. Quality of the performance audition
2. High school and/or college academic record
3. Letters of recommendation

Most Mead Witter School of Music scholarships are awarded for a fouryear period. The music faculty reviews every scholarship award each semester and expects that each student on scholarship will maintain satisfactory progress toward completing the music major and degree requirements, continue to make significant contributions in performing organizations or accompanying, and maintain a minimum 3.000 grade point average. Please see the Mead Witter School of Music website (http://www.music.wisc.edu) for more information regarding music scholarships.

The same requirements for Residence \& Quality of Work apply to the Performance Option. The same Honors in the Major requirements apply, as well.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{MUSIC: EDUCATION, B.M.}

\section*{VALUES AND EDUCATIONAL PRIORITIES}

At the Mead Witter School of Music
- we teach by example, offering participatory, mentor-driven education;
- we provide individualized instruction and flexible curricula that encourage students to find their own musical pathways;
- we foster musical excellence and high academic standards;
- our faculty exhibit the best of their respective fields, are deeply engaged in artistic scholarship and research, and are committed to teaching at all levels;
- we whole-heartedly embrace the Wisconsin Idea;
- we have created a dynamic educational community, part of a large and vibrant research university within a city that values and supports the arts.

The Mead Witter School of Music enriches students' educational experience by hosting guest artists and scholars for master classes, recitals, colloquia, seminars, and festivals. Its performing organizations and ensembles perform more than 350 recitals and concerts every year, making a significant contribution to the cultural life of the university and the wider Madison community. Facilities specifically designed for music study and performance offer excellent resources for students to pursue their interests.

In addition to a thriving undergraduate student body, B.M.: Music Education students have the advantage of working side-by-side with students in master's-level and doctoral-level music programs. Working collegially in class and studio, making music together on stage and off, and building professional relationships across program boundaries all enable the sharing of expertise, experience, and perspectives and add immeasurably to every student's development.

The music degree programs are demanding and require care in taking courses in the proper sequence. Graduation can be delayed if a course is not taken in the appropriate semester. Refer to the Requirements and Four-Year Plan tabs for more details.

\section*{THE MUSIC EDUCATION UNDERGRADUATE MAJOR}

The undergraduate music education major offers two options: a specialty in Instrumental Music and a specialty in Choral Music. Students choose one of the options and will, upon completion, be certified to teach in all areas at the Early-Childhood-through-Adolescence level. Music Education is a program offered jointly by the School of Music and the School of Education. The Bachelor of Music: Education degree is conferred by the College of Letters \& Science; teacher certification is earned through the School of Education.

Recent revisions to the music education curricula accomplish several important goals:
- Enable broad teaching certification for music instruction in Wisconsin's elementary and secondary schools (K-12). Students may specialize in vocal or instrumental music, but all students successfully completing the program will qualify for music certification.
- Explore the relationships between popular culture and music education. Graduates will be prepared to teach multiple forms of musical literacy, not just the traditional band, orchestra, and choral curriculum.
- Expand the number of musical styles studied in the curriculum. Students also participate in performance ensembles that reflect the diverse array of musical activities in today's schools.
- Offer an introductory music education class to sophomores prior to admission into the program.
- Provide instruction and experiences so that graduates can teach in culturally responsive ways.
- Increase performance collaboration between students in the instrumental and vocal tracks.
- Create an interdisciplinary program by including a core set of courses for all music education students.
- Enable potential completion of the undergraduate degree in four years, including the final semester of student teaching.

Although these programs are designed with the goal of preparing teachers to work in K-12 schools, the programs also provide a good preparation for individuals seeking careers in continuing education or music educationrelated fields.

The student's principal performance area should be consistent with the chosen major option. One or more additional performance areas may be required. Prospective music education majors must audition and be accepted into any additional performance areas at the music major level (200 level) of performance study prior to beginning the methods and practicum sequence. Mead Witter School of Music cannot guarantee admission to additional performance areas, nor can it guarantee that appropriate substitute coursework will be available. During the time a student is enrolled in degree work, all performance study is expected to take place at UW-Madison.

\section*{HOW TO GET IN}

\section*{ADMISSION TO THE BACHELOR OF MUSIC: EDUCATION PROGRAM}

To be admitted to the Mead Witter School of Music a student needs to apply to and be admitted by both UW-Madison and the Mead Witter School of Music:
- Prospective (new or transfer) and re-entry students should apply to UW-Madison through the Office of Admissions and Recruitment (https://admissions.wisc.edu/).
- All students must also complete an application and pass an audition. See the Mead Witter School of Music website (https://music.wisc.edu/ undergraduate-admissions/) for more information. Questions about the Music application and audition process should be directed to the Music Undergraduate Audition and Admissions Coordinator (admissions@music.wisc.edu).

\section*{DECLARE THE MUSIC EDUCATION PROGRAM}

Students admitted to UW-Madison and the Mead Witter School of Music will be declared in their music major or music degree program. All students must make satisfactory progress, as described below, to continue in their major or degree program. Students not meeting these requirements should meet with the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) to discuss their options for continuing in the Mead Witter School of Music.

\section*{MUSIC EDUCATION CONTINUATION REQUIREMENTS}

Students must meet all of the requirements below to continue in the program. Students not meeting any one of these requirements will be removed from the program and must choose a new major. Contact the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) for consideration of extenuating circumstances or if the student is considering a leave of absence (such as family emergency, personal wellness, study abroad, or approved accommodations)

\section*{(1) ENROLLMENT REQUIREMENTS}
- Enroll every fall and spring semester in a course that meets the Performance Study Requirements, until that requirement is completed.
- Enroll in MUSIC 121 \& MUSIC 171 to begin the music theory/history sequence in the first possible fall semester after declaration.

\section*{(2) PERFORMANCE STUDY JURY AND PROGRESS REPORT}

At least once a year, students must pass a performance jury with their major instrument. The purpose of this jury will be to evaluate performance study progress and to set goals for the coming year. Students who do not pass will receive guidance about making improvements and a warning
letter and will have a semester to work with their professor to make improvements needed to remain in the program.

\section*{(3) PROGRESSION TO 400-LEVEL PERFORMANCE STUDY}

At the end of the fourth semester of enrollment in Performance Study, students will be evaluated for permission to advance to 400-level performance study. Students who do not meet progression requirements to advance to 400-level performance study may be given an additional semester to meet those requirements.

\section*{(4) MEET GPA REQUIREMENTS IN THREE AREAS:}
- 2.750 overall cumulative GPA
- 3.000 cumulative GPA in all MUSIC and MUSIC PERFORMANCE courses
- 2.500 cumulative GPA in music theory (MUSIC 121, MUSIC 171, MUSIC 122, MUSIC 172, MUSIC 221, MUSIC 271, MUSIC 222, and MUSIC 272) and music history (MUSIC 211 and MUSIC 212)

\section*{(5) MUSIC EDUCATION TEACHER EDUCATION PROGRAM (METEP) APPLICATION, AUDITION, AND BACKGROUND CHECK}

While enrolled in MUSIC/CURRIC 300, students declared in Music Education will be required to:
- Complete the METEP application
- Pass a music education audition
- Pass a criminal background check
- Students must meet all of these requirements before enrolling in field placement (MUSIC/CURRIC 337, MUSIC/CURRIC 409 and MUSIC/ CURRIC 410).

Note: Students declared in the Bachelor of Music: Education are not eligible to declare Music: Performance, or the Music major.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF MUSIC}

The Mead Witter School of Music (MWSoM) is a professional school within the College of Letters \& Science (L\&S). The College confers the Bachelor of Music degree for two distinct programs within the MWSoM: B.M.Performance and B.M.-Education.

Students pursuing a Bachelor of Music degree in the College of Letters \& Science must complete all of the requirements below. The B.M. is a special degree program; it is not considered a major. The B.M. degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

\section*{BACHELOR OF MUSIC - DEGREE REQUIREMENTS}

Total Credits64
ELECTIVES FOR THE DEGREE TO REACH 120 CREDITS

In addition to the requirements for the program, students need to earn additional free elective credit to total 120 credits to graduate.

\section*{FURTHER DETAILS ON CERTIFICATION REQUIREMENTS}

Some specific expectations for teaching licensure must be met while taking coursework.
- Multicultural Education and Human Relations: 50 hours of field experience are satisfied for music education students who successfully complete the required two semesters of CURRIC/MUSIC 337
Practicum in Teaching Music.
- Conflict Resolution Workshop: this non-credit bearing requirement is taught/fulfilled in CURRIC/MUSIC 300 Principles of Music Education.
- American Indian Studies and Education (Wis. Act 31): There are a variety of ways to earn certification. Consult with the MWSOM undergraduate advisor.
- Teacher Performance Assessment conducted by METEP faculty during student teaching semester.

\section*{NAMED OPTIONS}

View as listView as grid

\section*{- MUSIC: EDUCATION: CHORAL/GENERAL, B.M. (P. 1229)}
- MUSIC: EDUCATION: INSTRUMENTAL/ GENERAL, B.M. (P. 1230)

\section*{CHOOSING A MUSIC EDUCATION OPTION}

The music education major consists of two main options, both leading to certification at both the elementary and secondary levels. Students choose to complete the certification option in either General and Instrumental Music or General and Choral Music. The Bachelor of Music: Education degree requires a minimum of 120 credits. The Undergraduate Advisor, supported by the music education faculty, can advise you on which option is most suited to your goals. Information on how to apply to the Music Education program can be found under the "How to Get \(\ln\) " tab.

\section*{RESIDENCE \& QUALITY OF WORK}
- Minimum 2.000 GPA in all MUSIC, MUS PERF, and program courses
- Minimum 2.000 GPA on at least 15 credits of upper-level work in the program, in residence
- 15 credits in MUSIC and/or MUS PERF, taken on the UW-Madison campus

\section*{UPPER-LEVEL COURSES}

The following courses are approved for upper-level credit in both options of the Bachelor of Music: Education program:
\begin{tabular}{llr} 
Music & & \\
Code & Title & Credits \\
MUSIC 40 & Wind Ensemble & 1 \\
MUSIC 41 & Concert Band & 1 \\
MUSIC 50 & Concert Choir & 1 \\

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

In addition to completing UW-Madison's program requirements, students must also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. For additional certification requirements and information about applying for a license, see Teacher Education Center (https:// tec.education.wisc.edu/).

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Demonstrate proficiency in foundational concepts of Pre-K-12 music education: planning, delivering, and assessing music learning experiences to a diverse population of learners.
2. Demonstrate the ability to integrate knowledge in music learning and teaching to bring novel, musical perspectives and solutions to challenging social, musical, and technological challenges in Pre-K-12 music settings.
3. Demonstrate the ability to think critically, musically, and creatively as a music educator to synthesize, analyze, and integrate ideas for decision-making and problem-solving in the best interest of a diverse student population.
4. Demonstrate the ability to communicate effectively with multiple and diverse constituencies (students, parents, colleagues, community) to share knowledge, values, and beliefs regarding music learning and teaching.
5. Develop and demonstrate the professionalism required as a music educator in the field of music education: acting ethically, allowing space for diverse views, recognizing and reducing bias in one's own thinking, and contributing to the profession as a whole.

\section*{FOUR-YEAR PLAN}

\section*{ADVISING AND CAREERS}

\section*{UNDERGRADUATE ADVISING}

\section*{Advisor:Todd Reck}

Office: 3561G Humanities Building
Email: ugradadvisor@music.wisc.edu
Office phone: (608) 263-1918
If you wish to schedule an advising appointment, please note the following:
- Online access to schedule advising appointments is restricted to students who applied to, auditioned for, and have been admitted to the Mead Witter School of Music.
- Students considering applying to the School of Music should contact our undergraduate admissions coordinator, Jared Jellison, at admissions@music.wisc.edu or (608) 263-5986.

\section*{INDIVIDUAL ACADEMIC ADVISING}

Current music majors can schedule an appointment with Todd via Starfish, which can be accessed via your MyUW student portal. If uncertain how to use Starfish, please see https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/

Appointments can also be made by phone at 608-263-1918.

\section*{BE PREPARED FOR YOUR ADVISING APPOINTMENT}

Please bring the following to your appointment:
- Any questions you have about requirements, extracurricular opportunities, study abroad, or whatever is on your mind.

\footnotetext{
- A pen and paper for note taking.
}
- Any form you may need signed. Be sure you have filled out all pertinent information and have read the form/document thoroughly.

\section*{WHAT TO EXPECT FROM AN ACADEMIC ADVISING APPOINTMENT}

Academic advisors help students learn and understand their degree and major requirements. Programs in the Mead Witter School of Music are highly sequential, and some required courses are offered only once each year. Many of our undergraduates are interested in earning an additional major and/or certificate; with careful planning each semester, this is possible. Advisors often can explain some of the differences between courses that meet the same degree requirement. For students considering study abroad, it's a good idea to begin exploring programs early in your degree and work with your advisor to determine the program length (semester/summer/year) that will best fit your needs and interests.

It is recommended that you see an advisor at least once a semester to plan your courses and check progress toward degree completion. Students sometimes need clarification of degree requirements, particularly if they are considering switching to a different major/degree program within the School of Music.

\section*{GENERAL CONTACT INFORMATION:}

Mead Witter School of Music

\section*{PEOPLE}

Faculty: Professors Cook (director), Calderón, Chisholm, Di Sanza, Dobbs, Doing, Dominguez, Fischer, Fulmer, Hetzler, Hyer, Johnson, Karp, Perry, Rowe, Schwendinger, Taylor, Teeple, Thimmig, Vallon, Wallmann; Associate Professors Butler, Farah, Grabois, Nelson, Ronis; Assistant Professors Chana, Flowers, Laurenz, Lee, Sans, Weinstein-Reimann; Marching Band Director Pompey; Teaching Faculty Curry, Gladstone, Gonzalez, Koester, Pompey, Purdue, Rottmayer, Weinholts, Wohn; Faculty Associate Rich; Lecturers Lee, McCullough, Mok, Patenaude, Tran, Waldo; Teaching Specialists Hammes, Ross

The faculty of the Mead Witter School of Music is a distinguished group of educators, performing musicians, and active scholars. The backgrounds of performance faculty include rich experiences as professional musicians, researchers, recording artists, and entrepreneurs. Faculty in music education have particular insight into their field as a result of their backgrounds as school educators, performers, and scholars. In areas such as music theory and musicology, the musical community has high regard for the past and current contributions to the study of musical theory, historical perspectives on music, the role of music in societies around
the world, and the unique contributions of American musicians. Teaching is a priority for the faculty, who are readily accessible to students for advice and support. Faculty, staff, and students cooperate in extraordinary ways with joint ventures that reach across disciplines both in research or instruction.

\section*{CERTIFICATION/LICENSURE}

\section*{ADDITIONAL CERTIFICATION REQUIREMENTS AND APPLYING FOR A LICENSE}

Student interested in certification must, in addition to completing UWMadison's program requirements, also complete Wisconsin statutory requirements and certification requirements established by the Wisconsin Department of Public Instruction. For additional certification requirements and information about applying for a license, see Teacher Education Center (https://tec.education.wisc.edu/).

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California,
Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North
Dakota, Oklahoma, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, West Virginia, Vermont, Washington, Wyoming, District of Columbia, Guam, Northern Mariana Islands, U.S. Virgin Islands, American Samoa, Puerto Rico

\section*{ACCREDITATION}

\section*{ACCREDITATION}

National Association of Schools of Music (https://nasm.arts-accredit.org)
Accreditation status: Accredited. Next accreditation review: 2022-2023.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{MUSIC: PERFORMANCE, B.M. VALUES AND EDUCATIONAL PRIORITIES}

At the Mead Witter School of Music
- we teach by example offering participatory, mentor-driven education;
- we provide individualized instruction and flexible curricula that encourage students to find their own musical pathways;
- we foster musical excellence and high academic standards;
- our faculty exhibit the best of their respective fields, are deeply engaged in artistic scholarship and research, and are committed to teaching at all levels;
- we whole-heartedly embrace the Wisconsin Idea;
- our department is a dynamic educational community, part of a large and vibrant research university within a city that values and supports the arts.

The Mead Witter School of Music enriches students' educational experience by hosting guest artists and scholars for master classes, recitals, colloquia, seminars, and festivals. Its performing organizations and ensembles perform more than 350 recitals and concerts every year, making a significant contribution to the cultural life of the university and the wider Madison community. Facilities specifically designed for music study and performance offer excellent resources for students to pursue their interests.

In addition to a thriving undergraduate student body, B.M.: Music Performance students have the advantage of working side-by-side with students in master's-level and doctoral-level music programs. Working collegially in class and studio, making music together on stage and off, and building professional relationships across program boundaries all enable the sharing of expertise, experience, and perspectives and add immeasurably to every student's development.

Majors in this program have professional interests in solo performance, chamber music performance, orchestra or wind ensemble performance, studio teaching (private or in a college or university), church music, conducting, music technology or production, opera or musical theater, or many combinations of these. Some students may consider this program as preparation for graduate study in music, arts administration, and other areas. The faculty has designed the curricula to include extensive course work in music ( 90 credits) while also meeting all UW-Madison General Education Requirements including Communication Parts A and 2 B, Quantitative Reasoning Parts A and B, Natural Science, Social Science, and Ethnic Studies.

The music degree programs are demanding and require care in taking courses in the proper sequence. Though the programs have been designed to enable completion in four years, graduation could be delayed if courses are not taken in the appropriate sequence. Refer to the Requirements and Four-Year Plan tabs for more details.

\section*{PEOPLE AND FACILITIES}

The greatest asset of Mead Witter School of Music is its people-staff, faculty, and students-who are daily immersed in learning, building, researching, writing, and making music. Mentoring is the core of our teaching, manifest in one-on-one applied instruction as well as in small-group coaching and classes. Undergraduate students will build professional relationships with many faculty, form friendships with peers across the boundaries of degree programs, and collaborate with staff in addressing the practical matters of academic study. Extensive information on faculty, including biographies, is available here.

The Mosse Humanities Building, built in 1969, houses most of the music classrooms, rehearsal rooms, faculty studios, and 111 practice rooms. Most recitals and concerts take place in one of three performance spaces: Mills Concert Hall, Morphy Recital Hall, and Eastman Organ Recital Hall. The school's extensive collection of instruments, both common and unusual, is available to both faculty and students. Music Hall with its clock tower, built in 1879, is a campus landmark. Renovated in 1985, it is the home of the opera program. The Hamel Music Center opened in fall 2019 and includes Mead Witter Foundation Concert Hall, Collins Recital Hall, Sing Man \& Florence Lee/Annette Kauffman Rehearsal Hall, and a professional recording studio.

Memorial Library is the home of the Mills Music Library, which offers extensive research and circulating collections, attractive study space, and personal staff assistance with research. Music materials on campus number over half a million, ranging from scores and sheet music to archival collections and historic audio recordings. Through Mills Music Library and other UW-Madison libraries, students have access to a wide range of online research databases as well as millions of articles, books, and streaming media. All genres of music are represented, with notably strong collections in Americana and ethnic music. Nationally known special collections include the Tams-Witmark Collection, a treasury of early American musical theater materials, and the Wisconsin Music Archives.

\section*{HOW TO GET IN}

\section*{ADMISSION TO THE BACHELOR OF MUSIC: PERFORMANCE PROGRAM}

To be admitted to the Mead Witter School of Music a student needs to apply to and be admitted by both UW-Madison and the Mead Witter School of Music:
- Prospective (new or transfer) and re-entry students should apply to UW-Madison through the Office of Admissions and Recruitment (https://admissions.wisc.edu/).

All students must also complete an application and pass an audition. See the Mead Witter School of Music website (https://music.wisc.edu/ undergraduate-admissions/) for more information. Questions about the Music application and audition process should be directed to the Music Undergraduate Audition and Admissions Coordinator (admissions@music.wisc.edu).

Note: Students declared in the Bachelor of Music: Performance are not eligible to declare Music: Education, or the Music major.

\section*{DECLARING THE BACHELOR OF MUSIC: PERFORMANCE PROGRAM}

Students admitted to UW-Madison and the Mead Witter School of Music will be declared in their music major or music degree program. All students must make satisfactory progress, as described below, to continue in their major or degree program. Students not meeting these requirements should meet with the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) to discuss their options for continuing in the Mead Witter School of Music.

\section*{BACHELOR OF MUSIC: PERFORMANCE PROGRAM CONTINUATION REQUIREMENTS}

Students must meet all of the requirements below to continue in the program. Students not meeting any one of these requirements will be removed from the program and must choose a new major. Contact the Undergraduate Music Advisor (ugradadvisor@music.wisc.edu) for consideration of extenuating circumstances or if the student is considering a leave of absence (such as family emergency, personal wellness, study abroad, or approved accommodations)

\section*{(1) ENROLLMENT REQUIREMENTS}
- Enroll every fall and spring semester in a course that meets the Performance Study Requirements, until that requirement is completed.
- Enroll in MUSIC 121 \& MUSIC 171 to begin the music theory/history sequence in the first possible fall semester after declaration.

\section*{(2) PERFORMANCE STUDY JURY AND PROGRESS REPORT}

At least once a year, students must pass a performance jury with their major instrument. The purpose of this jury will be to evaluate performance study progress and to set goals for the coming year. Students who do not pass will receive guidance about making improvements and a warning letter and will have a semester to work with their professor to make improvements needed to remain in the program.

\section*{(3) PROGRESSION TO FOUR CREDIT PERFORMANCE STUDY}

At the end of the second semester of enrollment in Performance Study, students will be evaluated for permission to advance to four credit performance study. Students who do not meet progression requirements to advance to four credit performance study may be given an additional semester to meet those requirements.

\section*{(4) PROGRESSION TO 400-LEVEL PERFORMANCE STUDY}

At the end of the fourth semester of enrollment in Performance Study, students will be evaluated for permission to advance to 400-level performance study. Students who do not meet progression requirements to advance to 400-level performance study may be given an additional semester to meet those requirements.

\section*{(5) MEET GPA REQUIREMENTS IN THREE AREAS:}
- 2.750 overall cumulative GPA
- 3.000 cumulative GPA in all MUSIC and MUSIC PERFORMANCE courses
- 2.500 cumulative GPA in music theory (MUSIC 121, MUSIC 171, MUSIC 122, MUSIC 172, MUSIC 221, MUSIC 271, MUSIC 222, and MUSIC 272) and music history (MUSIC 211 and MUSIC 212)

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General • Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE BREADTH AND DEGREE REQUIREMENTS: BACHELOR OF MUSIC}

The Mead Witter School of Music (MWSoM) is a professional school within the College of Letters \& Science (L\&S). The College confers the Bachelor of Music degree for two distinct programs within the MWSoM: B.M.Performance and B.M.-Education.

Students pursuing a Bachelor of Music degree in the College of Letters \& Science must complete all of the requirements below. The B.M. is a special degree program; it is not considered a major. The B.M. degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

\section*{BACHELOR OF MUSIC - DEGREE REQUIREMENTS}

\section*{NAMED OPTIONS}

Students must select one of the following named options:
View as listView as grid
> - MUSIC: PERFORMANCE: BRASS, PERCUSSION, WOODWINDS, B.M. (P. 1239)
> - MUSIC: PERFORMANCE: COMPOSITION, B.M. (P. 1240)
> - MUSIC: PERFORMANCE: GUITAR, B.M. (P. 1242)
> - MUSIC: PERFORMANCE: JAZZ, B.M. (P. 1243)
> - MUSIC: PERFORMANCE: ORGAN, B.M. (P. 1244)
> - MUSIC: PERFORMANCE: PIANO, B.M. (P. 1245)
> - MUSIC: PERFORMANCE: STRINGS, B.M. (P. 1246)
> - MUSIC: PERFORMANCE: VOICE, B.M. (P. 1247)

\section*{DEGREE PROGRESS}

Upon admission as a Music major, all students begin applied study at the 200-level on the major instrument or voice. In the second or third year each student's progress is assessed by the faculty of the relevant performance area. If that assessment indicates that the student is ready, the faculty recommends the student for advanced-level (400-level) study. With a recommendation from the faculty at the end of the second year, and provided the student meets all GPA requirements and completes the first- and second-year courses in music theory and music history, the student may formally declare for the Bachelor of Music: Performance degree.

The minimum GPA requirements that must be met before declaring are as follows:
- Minimum 2.500 GPA in Musica Practica and in music history courses
- Minimum 3.000 GPA in all MUSIC courses
- Minimum 2.750 University GPA (all UW-Madison coursework)

\section*{RESIDENCE \& QUALITY OF WORK}
- Minimum 2.000 GPA in all MUSIC, MUS PERF, and program courses
- Minimum 2.000 GPA on at least 15 credits of upper-level work in the program, in residence
- 15 credits in MUSIC and/or MUSIC PERF, taken on the UW-Madison campus

\section*{UPPER-LEVEL COURSES}

The following courses are approved for upper-level credit in all options of the Bachelor of Music: Performance program:
\begin{tabular}{|c|c|c|}
\hline Music & & \\
\hline Code & Title & Credits \\
\hline MUSIC 40 & Wind Ensemble & 1 \\
\hline MUSIC 41 & Concert Band & 1 \\
\hline MUSIC 50 & Concert Choir & 1 \\

\section*{HONORS IN THE MAJOR}

To earn Honors in any music major, students must satisfy the requirements below as well as all other requirements for their music degree and major:
- 6 credits of MUSIC 681 Senior Honors Thesis-MUSIC 682 Senior Honors Thesis
- 12 credits of honors coursework in music: 6 of the 12 credits must be at the 300 level or higher and only 6 credits can be taken in any one of the three music areas of theory, history, and performance.

To participate in the Honors in the Major program, students must:
- Notify the School of Music undergraduate advisor of their intention to become a candidate for Honors in the Major. This will usually occur in the sophomore year.
- Present a minimum cumulative GPA of 3.300 in all courses taken at UW-Madison and maintain this average throughout the degree.
- Present a minimum 3.500 GPA in all music coursework and maintain a minimum 3.500 GPA in all music honors coursework.
- Engage a faculty member who will collaborate in planning the 12 credits of honors curriculum coursework; submit this plan to the undergraduate advisor. The course plan may change as students progress through their work.
- Prior to beginning work on the MUSIC 681-MUSIC 682 Senior Honors Thesis sequence, confirm a faculty advisor for this sequence (who may be the same person as for the 12 credits above) and submit a prospectus outlining in detail the planned work including (a) the topic, (b) plans for research, and (c) a clear substantive written component, although it may also include oral and/or performance components. The faculty advisor must sign the prospectus indicating approval.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Develop advanced levels of proficiency in solo, chamber and ensemble performance sufficient to enter music professions or graduate programs.
2. Understand, synthesize and apply foundational concepts of musical study in theory, history and pedagogy.
3. Demonstrate the ability to learn independently and to integrate knowledge across domains of research and applied studies.
4. Communicate verbally, in writing and through public performance, musical ideas and concepts.
5. Demonstrate ability to work collaboratively and professionally in multiple settings.

\section*{FOUR-YEAR PLAN}

Please see the Named Options pages for 4-year plan information.

\section*{ADVISING AND CAREERS}

\section*{UNDERGRADUATE ADVISING}

\section*{Advisor: Todd Reck}

Office: 3561G Humanities Building
Email: ugradadvisor@music.wisc.edu
Office phone: (608) 263-1918

\section*{If you wish to schedule an advising appointment, please note the following:}
- Online access to schedule advising appointments is restricted to students who applied to, auditioned for, and have been admitted to the Mead Witter School of Music.
- Students considering applying to the School of Music should contact our undergraduate admissions coordinator, Jared Jellison, at admissions@music.wisc.edu or (608) 263-5986.

\section*{INDIVIDUAL ACADEMIC ADVISING}

Current music majors can schedule an appointment with Todd via Starfish, which can be accessed via your MyUW student portal. If uncertain how to use Starfish, please see https://advising.wisc.edu/facstaff/starfish/ starfish-student-resources/

Appointments can also be made by phone at 608-263-1918.

\section*{BE PREPARED FOR YOUR ADVISING APPOINTMENT}

Please bring the following to your appointment:
- Any questions you have about requirements, extracurricular opportunities, study abroad, or whatever is on your mind.
- A pen and paper for note taking.
- Any form you may need signed. Be sure you have filled out all pertinent information and have read the form/document thoroughly.

\section*{WHAT TO EXPECT FROM AN ACADEMIC ADVISING APPOINTMENT}

Academic advisors help students learn and understand their degree and major requirements. Programs in the Mead Witter School of Music are highly sequential, and some required courses are offered only once each year. Many of our undergraduates are interested in earning an additional major and/or certificate; with careful planning each semester, this is possible. Advisors often can explain some of the differences between courses that meet the same degree requirement. For students considering study abroad, it's a good idea to begin exploring programs early in your degree and work with your advisor to determine the program length (semester/summer/year) that will best fit your needs and interests.

It is recommended that you see an advisor at least once a semester to plan your courses and check progress toward degree completion. Students sometimes need clarification of degree requirements, particularly if they are considering switching to a different major/degree program within the School of Music.

\section*{GENERAL CONTACT INFORMATION:}

Mead Witter School of Music
3561 Mosse Humanities Building
455 North Park Street
Madison, WI 53706-1483
(608) 263-1900
music@music.wisc.edu

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Faculty: Professors Cook (director), Calderón, Chisholm, Di Sanza, Dobbs, Doing, Dominguez, Fischer, Fulmer, Hetzler, Hyer, Johnson, Karp, Perry, Rowe, Schwendinger, Taylor, Teeple, Thimmig, Vallon, Wallmann; Associate Professors Butler, Farah, Grabois, Nelson, Ronis; Assistant Professors Chana, Flowers, Laurenz, Lee, Sans, Weinstein-Reimann; Marching Band Director Pompey; Teaching Faculty Curry, Gladstone, Gonzalez, Koester, Pompey, Purdue, Rottmayer, Weinholts, Wohn; Faculty Associate Rich; Lecturers Lee, McCullough, Mok, Patenaude, Tran, Waldo; Teaching Specialists Hammes, Ross

The faculty of the Mead Witter School of Music is a distinguished group of educators, performing musicians, and active scholars. The backgrounds of performance faculty include rich experiences as professional musicians, researchers, recording artists, and entrepreneurs. Faculty in music education have particular insight into their field as a result of their backgrounds as school educators, performers, and scholars. In areas such as music theory and musicology, the musical community has high regard for the past and current contributions to the study of musical theory, historical perspectives on music, the role of music in societies around the world, and the unique contributions of American musicians. Teaching is a priority for the faculty, who are readily accessible to students for advice and support. Faculty, staff, and students cooperate in extraordinary
ways with joint ventures that reach across disciplines both in research or instruction.

\section*{ACCREDITATION}

\section*{ACCREDITATION}

National Association of Schools of Music (https://nasm.arts-accredit.org)
Accreditation status: Accredited. Next accreditation review: 2022-2023.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{MOSSE/WEINSTEIN CENTER FOR JEWISH STUDIES}

Founded in 1991, the Mosse/Weinstein Center for Jewish Studies brings together a variety of disciplines to study and interpret Jewish and ancient Israelite history, religion, literature, politics, society, and culture. The center offers a broad selection of courses at all levels, which are cross-listed with other departments, including Classical and Near Eastern Studies, English, Gender and Women's Studies, German/Nordic/Slavic Studies, History, Music, Philosophy, Political Science, Religious Studies, and Sociology.

The Jewish Studies major offers students an in-depth study of 3,500 years of Jewish civilization. The program is interdisciplinary in nature and aims to provide students with a broadly based, rigorous liberal arts education in the field. While learning about Jewish history, religion, language, and culture, students also develop skills in critical thinking, reading, writing, and research-skills that are valuable to a range of career paths.

Lipton Assistant Professor of Jewish Literature and Thought zilbergerts@wisc.edu

\section*{JEWISH STUDIES, B.A.}

From history to political science, sociology to music and the arts, Jewish Studies is a vibrant, interdisciplinary program that allows you to explore Jewish civilization from a variety of perspectives. We encourage all students to consider a Jewish Studies major (https://cjs.wisc.edu/major-in-jewish-studies/) or certificate (https://cjs.wisc.edu/certificate-in-jewish-studies/), regardless of your background or previous study.

As a student in Jewish Studies, you will study the intellectual and cultural values of Jews, their religious beliefs and practices, languages, literary creativity, and participation in the larger societies in which they live. You will sharpen your ability to think critically, read closely, and write effectively. And while learning how Jews have lived, survived, and sometimes flourished, you will gain a deeper comprehension of their rich, varied culture and the world they inhabit.

Since Jewish Studies is an interdisciplinary field, many students simultaneously pursue majors or certificates in other departments, including Art, Education, Geography, History, Music, Political Science, Religious Studies, and Sociology. Given the broad history and geography of the Jewish experience, Jewish Studies also pairs well with programs like African Studies, Classical and Near Eastern Studies, European Studies,

German/Nordic/Slavic Studies, and Middle Eastern Studies. For the same reason, many of Jewish Studies courses fulfill General Education requirements, including Humanities and Literature, Ethnic Studies, Foreign Language, and Communications Part B. To sample the variety of Jewish Studies offerings, check out our current and recent courses (https:// cjs.wisc.edu/courses/).

Building on a strong foundation in the humanities and social sciences, you may go on to pursue a variety of career paths, such as education, library and information sciences, finance and international trade, journalism and mass media, social work, and the nonprofit sector. Our graduates are also well prepared to apply for law school, graduate school, or rabbinical studies.

Questions? Contact the undergraduate advisor (https://cjs.wisc.edu/ advising/).

\section*{HOW TO GET IN}

\section*{ENROLLMENT GUIDANCE}

Students with prior language study or experience as a speaker of Modern Hebrew should contact the Undergraduate Advisor in the Mosse/ Weinstein Center for Jewish Studies for enrollment guidance.

\section*{DECLARING THE MAJOR}

Prospective majors in Jewish Studies should make an appointment with the undergraduate advisor (undergrad-adviser@cjs.wisc.edu) to discuss requirements and courses.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.
\begin{tabular}{ll} 
General & - Breadth-Humanities/Literature/Arts: 6 credits \\
Education & - Breadth-Natural Science: 4 to 6 credits, consisting of \\
one 4- or 5-credit course with a laboratory component; \\
& or two courses providing a total of 6 credits
\end{tabular}

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
\begin{tabular}{ll} 
Foreign & - Complete the fourth unit of a foreign language; OR \\
Language & Complete the third unit of a foreign language and the \\
& second unit of an additional foreign language.
\end{tabular}

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

The Jewish Studies major requires 10 courses, totaling at least 29 credits, in 5 areas: 1) one Gateway Course; 2) two courses in Literature, Philosophy, and the Arts; 3) two courses in History and Social Science; 4) four courses in Modern Hebrew; and 5) the Core Seminar. Each course may count toward only one required area

\section*{GATEWAY COURSE}

\hline
\end{tabular}

\section*{CORE SEMINAR}

Complete the Core Seminar.

\section*{Code Title Credits \\ JEWISH 350 \\ What Is Jewish Studies?}

\section*{NOTE ON DIRECTED STUDY}

With prior consent of the undergraduate advisor in Jewish studies and the relevant instructor, students may use one Directed Study course (JEWISH 699) to satisfy a requirement for the major.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all JEWISH courses and all courses accepted in the major
- 2.000 GPA on 15 upper-level major credits, taken in residence. Upperlevel work includes all Intermediate or Advanced level courses in the Jewish Studies major.
- 15 credits in JEWISH, taken on campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Jewish Studies undergraduate advisor.

\section*{HONORS IN THE JEWISH STUDIES MAJOR: REQUIREMENTS}

To earn Honors in the Major students must satisfy both the requirements for the major and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA for all JEWISH courses, and all courses accepted in the major
- Complete at least two courses, taken for Honors, in the major, with grades of \(B\) or better in each
- Complete a two-semester Senior Honors Thesis, a piece of original research composition, in JEWISH 681 and JEWISH 682, for a total of 6 credits.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation

\section*{EARNING OUTCOMES}
1. Proficiency in reading, writing, understanding, and conversing in Hebrew or another approved Jewish language, attained through four semesters of study
2. Ability to read Jewish texts closely and to write original, coherent, and compelling arguments that push beyond summary to analysis
3. Knowledge of Jewish civilization, culture, and society in both the past and the present
4. Development, pursuit, and presentation of original research in Jewish studies culminating in a substantive academic paper that utilizes and cites appropriate sources
5. Appreciation for diverse worldviews and value systems, including an understanding of interactions between Jews and non-Jews within the context of minority-majority relationships in Wisconsin, in the United States, and across the globe

FOUR-YEAR PLAN

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner,
and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Like other liberal arts majors, a degree in Jewish Studies can prepare one for a variety of career paths. Graduates in Jewish Studies have followed a variety of different career paths, including law, medicine, education, finance, social work, and the nonprofit sector. Jewish Studies students are also well prepared to apply for graduate studies in fields such as law, education, business, and social work, as well as prime candidates for rabbinical or cantorial school, theological studies, and advanced levels of Jewish Studies. For more information, please reach out to academic advising (https://cjs.wisc.edu/advising/)

The Mosse/Weinstein Center for Jewish Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences

\section*{JEWISH STUDIES, B.S.}

From history to political science, sociology to music and the arts, Jewish Studies is a vibrant, interdisciplinary program that allows you to explore Jewish civilization from a variety of perspectives. We encourage all students to consider a Jewish Studies major (https://cjs.wisc.edu/major-in-jewish-studies/) or certificate (https://cjs.wisc.edu/certificate-in-jewish-studies/), regardless of your background or previous study.

As a student in Jewish Studies, you will study the intellectual and cultural values of Jews, their religious beliefs and practices, languages, literary creativity, and participation in the larger societies in which they live. You will sharpen your ability to think critically, read closely, and write effectively. And while learning how Jews have lived, survived, and sometimes flourished, you will gain a deeper comprehension of their rich, varied culture and the world they inhabit.

Since Jewish Studies is an interdisciplinary field, many students simultaneously pursue majors or certificates in other departments, including Art, Education, Geography, History, Music, Political Science, Religious Studies, and Sociology. Given the broad historical and geographical of the Jewish experience, Jewish Studies also pairs well with programs like African Studies, Classical and Near Eastern Studies, European Studies, German/Nordic/Slavic Studies, and Middle Eastern Studies. For the same reason, many of Jewish Studies courses fulfill General Education requirements, including Humanities and Literature, Ethnic Studies, Foreign Language, and Communications Part B. To get a sense of the variety of our offerings, check out our current and recent courses (https://cjs.wisc.edu/courses/).

Building on a strong foundation in the humanities and social sciences, you may go on to pursue a variety of career paths, such as education, library and information sciences, finance and international trade, journalism and mass media, social work, and the nonprofit sector. Our graduates are
also well prepared to apply for law school, graduate school, or rabbinical studies.

Questions? Contact undergraduate advisor Gwen Walker: undergradadviser@cjs.wisc.edu.

\section*{HOW TO GET IN}

\section*{ENROLLMENT GUIDANCE}

Students with prior language study or experience as a speaker of Modern Hebrew should contact the Undergraduate Advisor in the Mosse/
Weinstein Center for Jewish Studies for enrollment guidance.

\section*{DECLARING THE MAJOR}

Prospective majors in Jewish Studies should make an appointment with the undergraduate advisor (undergrad-adviser@cjs.wisc.edu) to discuss requirements and courses.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

\section*{General}
- Breadth-Humanities/Literature/Arts: 6 credits

Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.
\begin{tabular}{ll} 
Foreign & Complete the third unit of a foreign language. \\
Language
\end{tabular} \begin{tabular}{ll} 
L\&S Breadth & \begin{tabular}{l} 
Complete: \\
\\
\\
\\
\\
credits of Literature; and
\end{tabular}
\end{tabular} credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll} 
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

The Jewish Studies major requires 10 courses, totaling at least 29 credits, in 5 areas: 1) one Gateway Course; 2) two courses in Literature, Philosophy, and the Arts; 3) two courses in History and Social Science;
4) four courses in Modern Hebrew; and 5) the Core Seminar. Each course may count toward only one required area.

\section*{GATEWAY COURSE}

Complete one Gateway Course.
\begin{tabular}{lc}

\hline
\end{tabular}

\section*{CORE SEMINAR}

Complete the Core Seminar.
\begin{tabular}{lll} 
Code & Title & Credits \\
JEWISH 350 & What Is Jewish Studies? &
\end{tabular}

\section*{NOTE ON DIRECTED STUDY}

With prior consent of the undergraduate advisor in Jewish studies and the relevant instructor, students may use one Directed Study course (JEWISH 699) to satisfy a requirement for the major.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all JEWISH courses and all courses accepted in the major
- 2.000 GPA on 15 upper-level major credits, taken in residence. Upperlevel work includes all Intermediate or Advanced level courses in the Jewish Studies major.
- 15 credits in JEWISH, taken on campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Jewish Studies undergraduate advisor.

\section*{HONORS IN THE JEWISH STUDIES MAJOR: REQUIREMENTS}

To earn Honors in the Major students must satisfy both the requirements for the major and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.500 GPA for all JEWISH courses, and all courses accepted in the major
- Complete at least two courses, taken for Honors, in the major, with grades of B or better in each
- Complete a two-semester Senior Honors Thesis, a piece of original research composition, in JEWISH 681 and JEWISH 682, for a total of 6 credits.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits.
\end{tabular} \\
& \begin{tabular}{l} 
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate
\end{tabular} \\
& \begin{tabular}{l} 
degree classification. "In residence" credit also includes \\
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
& \begin{tabular}{l} 
whresholds will be placed on academic probation.
\end{tabular} \\
thren
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Proficiency in reading, writing, understanding, and conversing in Hebrew or another approved Jewish language, attained through four semesters of study
2. Ability to read Jewish texts closely and to write original, coherent, and compelling arguments that push beyond summary to analysis
3. Knowledge of Jewish civilization, culture, and society in both the past and the present
4. Development, pursuit, and presentation of original research in Jewish studies culminating in a substantive academic paper that utilizes and cites appropriate sources
5. Appreciation for diverse worldviews and value systems, including an understanding of interactions between Jews and non-Jews within the context of minority-majority relationships in Wisconsin, in the United States, and across the globe

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Like other liberal arts majors, a degree in Jewish Studies can prepare one for a variety of career paths. Graduates in Jewish Studies have followed a variety of different career paths, including law, medicine, education, finance, social work, and the nonprofit sector. Jewish Studies students
are also well prepared to apply for graduate studies in fields such as law, education, business, and social work, as well as prime candidates for rabbinical or cantorial school, theological studies, and advanced levels of Jewish Studies. For more information, please reach out to academic advising (https://cjs.wisc.edu/advising/).

The Mosse/Weinstein Center for Jewish Studies encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

\section*{JEWISH STUDIES, \\ CERTIFICATE}

From history to political science, sociology to music and the arts, Jewish Studies is a vibrant, interdisciplinary program that allows you to explore Jewish civilization from a variety of perspectives. We encourage all students to consider a Jewish Studies major (https://cjs.wisc.edu/major-in-jewish-studies/) or certificate (https://cjs.wisc.edu/certificate-in-jewish-studies/), regardless of your background or previous study.

As a student in Jewish Studies, you will study the intellectual and cultural values of Jews, their religious beliefs and practices, languages, literary creativity, and participation in the larger societies in which they live. You will sharpen your ability to think critically, read closely, and write effectively. And while learning how Jews have lived, survived, and sometimes flourished, you will gain a deeper comprehension of their rich, varied culture and the world they inhabit.

Since Jewish Studies is an interdisciplinary field, many students simultaneously pursue majors or certificates in other departments, including Art, Education, Geography, History, Music, Political Science, Religious Studies, and Sociology. Given the broad history and geography of the Jewish experience, Jewish Studies also pairs well with programs like African Studies, Classical and Near Eastern Studies, European Studies, German/Nordic/Slavic Studies, and Middle Eastern Studies. For the same reason, many of Jewish Studies courses fulfill General Education requirements, including Humanities and Literature, Ethnic Studies, Foreign Language, and Communications Part B. To get a sense of the variety of our offerings, check out our current and recent courses (https:// cjs.wisc.edu/courses/).

Building on a strong foundation in the humanities and social sciences, you may go on to pursue a variety of career paths, such as education, library and information sciences, finance and international trade, journalism and mass media, social work, and the nonprofit sector. Our graduates are also well prepared to apply for law school, graduate school, or rabbinical studies.

Questions? Contact undergraduate advisor Gwen Walker: undergradadviser@cjs.wisc.edu.

\section*{HOW TO GET IN}

Students interested in a certificate in Jewish Studies should make an appointment with the undergraduate advisor (undergradadviser@cjs.wisc.edu) to discuss requirements and courses.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

The Jewish Studies certificate requires 5 courses, totaling at least 15 credits, in 4 areas: 1) one course in Literature, Philosophy, or the Arts; 2) one course in History or Social Science; 3) one course in Pre-Modern Jewish History, Culture, or Literature; and 4) two courses in an approved Jewish language. Each course may count toward only one required area.

\section*{LANGUAGE REQUIREMENT}

Complete two courses in one of the following approved Jewish languages at the appropriate level.

\section*{NOTE ON DIRECTED STUDY}

With prior consent of the undergraduate advisor in Jewish Studies and the relevant instructor, students may use one Directed Study course (JEWISH 699 (https://guide.wisc.edu/search/?P=JEWISH\%20699)) to satisfy a requirement for the certificate.

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 2.000 GPA in all JEWISH courses and courses approved for the certificate
- 11 credits, counting toward the certificate, taken in residence

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. At least two semesters of reading, understanding and conversing in Hebrew or another approved Jewish language.
2. Honed critical abilities in close reading, interpretation, and written analysis of ancient and modern Jewish texts.
3. Expanded knowledge of Jewish history, culture, philosophy, arts, religious practice, and politics in both the past and present.
4. Disposition of increased appreciation for diverse world views, value systems and interactions between Jews and non-Jews, minorities and majorities, in Wisconsin, the US, and across the globe.

\section*{ADVISING AND CAREERS}

Jewish studies can prepare one for a variety of career paths. Graduates in Jewish studies have followed a variety of different career paths, including law, medicine, education, finance, social work, and the nonprofit sector. Jewish studies students are also well prepared to apply for graduate studies in fields such as law, education, business, and social work, as well as prime candidates for rabbinical or cantorial school, theological studies, and advanced levels of Jewish studies.

The Mosse/Weinstein Center for Jewish Studies encourages students to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career
skills from their very first semester/term at UW all the way through graduation and beyond

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

Lipton Assistant Professor of Jewish Literature and Thought zilbergerts@wisc.edu

\section*{PHILOSOPHY}

Philosophy involves reflection upon and understanding of all phases of human activity. Philosophy especially directs itself to the nature of
knowledge and the most basic concepts of human understanding and value: morality, society, art and aesthetic experience, as well as science, politics, and religion. Philosophy is thus closely involved with other disciplines because, as human activities and quests for knowledge, they and their findings provide the material for philosophical inquiry. The courses offered by the department are designed to help students develop their own capacities to reflect intelligently on questions of fundamental and lasting significance. The philosophy major is intended to meet the needs of four types of students:
- those who wish to use philosophy as the organizing core of a liberal education;
- those who desire to study philosophy in preparation for graduate work in some other field, such as law, government, or theology;
- those who plan to major jointly in philosophy and one of the social and natural sciences or humanities; and
- those who have a professional interest in philosophy and intend to do graduate work in the subject.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Philosophy, B.A. (p. 1263)
- Philosophy, B.S. (p. 1267)

\section*{PEOPLE}

Professors Brighouse, Clatterbuck, Fletcher, Gibson, Goodrich, Gottlieb, Loets, Kelleher, Mackay, Masrour, Messina, Nadler, Roberts, ShaferLandau, Shapiro, Sidelle, Southgate, Steinberg, Streiffer, Titelbaum, Vranas, Whittle, Zimmerman

- those who plan to major jointly in philosophy and one of the social and natural sciences or humanities; and
- those who have a professional interest in philosophy and intend to do graduate work in the subject.

\section*{HOW TO GET IN}

Students should inform the Philosophy department of their intention to major by meeting with the Undergraduate Advisor.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B(Q R-B)\) coursework.

Foreign
Language
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth • 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86 th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all PHILOS courses and courses that count for the major
- 2.000 GPA on 15 upper-level credits in the major, taken in residence \({ }^{1}\)
- 15 credits in PHILOS, taken on campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Philosophy Major in consultation with the Philosophy undergraduate advisor.

\section*{HONORS IN THE PHILOSOPHY MAJOR: REQUIREMENTS}

To earn Honors in the Major in Philosophy, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Minimum 3.300 University GPA
- Minimum a 3.500 GPA for all PHILOS and major courses
- One additional course from either the Metaphysics and Epistemology or Value Theory categories with a grade of B or better
- PHILOS 681 (for \(1-3\) credits) and PHILOS 682 (for 3 credits) with a grade of \(A B\) or better. \({ }^{2}\)

\section*{FOOTNOTES}

\section*{1}

Courses between PHILOS 400-699 are considered upper-level in the major.

2
Students will not be permitted to write a Senior Honors Thesis unless they have taken at least one advanced course on the topic on which they will be writing. Credits earned by writing a Senior Honors Thesis will not count toward the 27 minimum credits required for the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree
To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Ability to think critically about arguments.
2. Ability to interpret complex texts accurately and analyze them logically.
3. Ability to communicate precisely and concisely in both writing and speech.
4. Familiarity with the history of Western philosophy and the major debates withing that tradition.
5. Ability to be engaged citizens who think carefully and well about their responsibilities to others.
6. Ability to exchange reasons about controversial matters respectfully and with the aim of uncovering the truth.
7. Interpretative charity and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}

Total Credits 120

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

The Department of Philosophy encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. Philosophy majors develop important and widely marketable skills, like the ability to think critically, communicate clearly, and solve complex problems. This means that having a major in philosophy provides excellent preparation for a variety of careers. See major declaration (https:// philosophy.wisc.edu/undergraduate-program-2/major-declaration/) for more information.

Studying philosophy can also help you get into graduate school. Philosophy majors excel on standardized tests like the GRE, GMAT, and LSAT. They rank first among all majors on the verbal and the analytical section of the GRE. Philosophy majors also tend to do better than just about any other major on the LSAT. With a mean score of just over 157, they are second only to physics majors. When it comes to the GMAT, philosophy majors rank in the top five of all majors, and they consistently

3 have higher scores than business majors (including management, finance, accounting, and marketing majors).

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Professors Brighouse, Clatterbuck, Fletcher, Gibson, Goodrich, Gottlieb, Loets, Kelleher, Mackay, Masrour, Messina, Nadler, Roberts, ShaferLandau, Shapiro, Sidelle, Southgate, Steinberg, Streiffer, Titelbaum, Vranas, Whittle, Zimmerman

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{UNDERGRADUATE SCHOLARSHIPS}

The Department of Philosophy has received generous support in order to fund two scholarships each academic year.

The Charles Manthey Winter Philosophy Scholarship is given to a major in philosophy who will graduate within the next four terms of the award and who has at least a 3.5 grade point average over the past two terms, and who can demonstrate financial need.

The Colonel Jerome Ellis Goodrich, USMC (retired), Scholarship is awarded to an undergraduate major in philosophy with academic merit and financial need, and who is a US citizen.

Applications for these scholarships are typically due in early April and winners are honored at our annual Awards Banquet in May.

We also have an annual paper prize called the Temkin Undergraduate
Essay Prize in Value Theory. This prize recognizes an outstanding essay in value theory, where this is construed quite broadly to include topics in political philosophy, philosophy of law, metaethics, applied ethics, etc. Essays are typically submitted in early April and the winner is also honored at our Awards Banquet.

If you have any questions about these scholarships or essay prize, you may send an email to frontoffice@philosophy.wisc.edu.

\section*{PHILOSOPHY, B.S.}

Philosophy involves reflection upon and understanding of all phases of human activity. Philosophy especially directs itself to the nature of knowledge and the most basic concepts of human understanding and value: morality, society, art and aesthetic experience, as well as science, politics, and religion. Philosophy is thus closely involved with other disciplines because, as human activities and quests for knowledge, they and their findings provide the material for philosophical inquiry. The courses offered by the department are designed to help students develop their own capacities to reflect intelligently on questions of fundamental and lasting significance. The philosophy major is intended to meet the needs of four types of students:
- those who wish to use philosophy as the organizing core of a liberal education;
- those who desire to study philosophy in preparation for graduate work in some other field, such as law, government, or theology;
- those who plan to major jointly in philosophy and one of the social and natural sciences or humanities; and
- those who have a professional interest in philosophy and intend to do graduate work in the subject.

\section*{HOW TO GET IN}

Students should inform the Philosophy department of their intention to major by meeting with the Undergraduate Advisor.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed.

For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS} \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)
Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCl and STAT subjects counts toward this requirement.
Foreign Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or Intermediate/ Advanced level.
Advanced
Coursework
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall, and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.
\begin{tabular}{llr}

PHILOS 549 & Great Moral Philosophers & 3
\end{tabular}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all PHILOS courses and courses that count for the major
- 2.000 GPA on 15 upper-level credits in the major, taken in residence
- 15 credits in PHILOS, taken on campus

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Philosophy Major in consultation with the Philosophy undergraduate advisor.

\section*{HONORS IN THE PHILOSOPHY MAJOR: REQUIREMENTS}

To earn Honors in the Major in Philosophy, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Minimum 3.300 University GPA
- Minimum a 3.500 GPA for all PHILOS and major courses
- One additional course from either the Metaphysics and Epistemology or Value Theory categories with a grade of B or better
- PHILOS 681 (for 1-3 credits) and PHILOS 682 (for 3 credits) with a grade of \(A B\) or better. \({ }^{2}\)

\section*{FOOTNOTES}

1
Courses between PHILOS 400-699 are considered upper-level in the major.

2
Students will not be permitted to write a Senior Honors Thesis unless they have taken at least one advanced course on the topic on which they will be writing. Credits earned by writing a Senior Honors Thesis will not count toward the 27 minimum credits required for the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Total Degree & To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. \\
\hline Residency & Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs. \\
\hline Quality of Work & Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation. \\
\hline
\end{tabular}

\section*{EARNING OUTCOMES}
1. Ability to think critically about arguments.
2. Ability to interpret complex texts accurately and analyze them logically.
3. Ability to communicate precisely and concisely in both writing and speech.
4. Familiarity with the history of Western philosophy and the major debates withing that tradition.
5. Ability to be engaged citizens who think carefully and well about their responsibilities to others.
6. Ability to exchange reasons about controversial matters respectfully and with the aim of uncovering the truth.
7. Interpretative charity and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{|c|c|c|c|}
\hline Fall & Credits & s Spring & Credits \\
\hline Communications A & & 3 Ethnic Sudies & 3 \\
\hline PHILOS 101 & & 3-4 Foreign Language (if needed) & 4 \\
\hline PHILOS 210 & & 3-4 I/A MATH, STAT or COMP SCI (for B.S. degree) & 3 \\
\hline Physical Science Breadth & & 3 PHILOS 241 & 3-4 \\

\hline & \(\mathbf{1 5}\) & \(\mathbf{1 5}\) \\
\hline
\end{tabular}

\section*{Total Credits 120}

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

The Department of Philosophy encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. Philosophy majors develop important and widely marketable skills, like the ability to think critically, communicate clearly, and solve complex problems. This means that having a major in philosophy provides excellent preparation for a variety of careers. See major declaration (https:// philosophy.wisc.edu/undergraduate-program-2/major-declaration/) for more information.

Studying philosophy can also help you get into graduate school. Philosophy majors excel on standardized tests like the GRE, GMAT, and LSAT. They rank first among all majors on the verbal and the analytical section of the GRE. Philosophy majors also tend to do better than just about any other major on the LSAT. With a mean score of just over 157, they are second only to physics majors. When it comes to the GMAT, philosophy majors rank in the top five of all majors, and they consistently have higher scores than business majors (including management, finance, accounting, and marketing majors).

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Professors Brighouse, Clatterbuck, Fletcher, Gibson, Goodrich, Gottlieb, Loets, Kelleher, Mackay, Masrour, Messina, Nadler, Roberts, ShaferLandau, Shapiro, Sidelle, Southgate, Steinberg, Streiffer, Titelbaum, Vranas, Whittle, Zimmerman

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{UNDERGRADUATE SCHOLARSHIPS}

The Department of Philosophy has received generous support in order to fund two scholarships each academic year.

The Charles Manthey Winter Philosophy Scholarship is given to a major in philosophy who will graduate within the next four terms of the award and who has at least a 3.5 grade point average over the past two terms, and who can demonstrate financial need.

The Colonel Jerome Ellis Goodrich, USMC (retired), Scholarship is awarded to an undergraduate major in philosophy with academic merit and financial need, and who is a US citizen.

Applications for these scholarships are typically due in early April and winners are honored at our annual Awards Banquet in May.

We also have an annual paper prize called the Temkin Undergraduate
Essay Prize in Value Theory. This prize recognizes an outstanding essay in value theory, where this is construed quite broadly to include topics in political philosophy, philosophy of law, metaethics, applied ethics, etc. Essays are typically submitted in early April and the winner is also honored at our Awards Banquet.

If you have any questions about these scholarships or essay prize, you may send an email to frontoffice@philosophy.wisc.edu.

\section*{PHYSICS}

The Department of Physics has a long history of providing students with a great educational experience. The department awarded its first Ph.D. in 1899. Since then, physics students have earned degrees in virtually every area of physics, and the department's faculty has played key roles in a myriad of important research efforts.

Physics is the science of the properties of matter, radiation, and energy in all forms. As such, it is the most fundamental of the sciences. It provides the underlying framework for the other physical sciences and engineering and for understanding physical processes in biological and environmental sciences.

\section*{CHOOSE TO BE A PHYSICS} MAJOR

\section*{WHY STUDY PHYSICS?}
- Intellectual Satisfaction. First, and foremost, physics satisfies our deep desire to understand how the universe works. Physics is interesting.
- Intellectual Challenge. By striving for fundamental understanding, the physicist accepts the challenge to move past a merely descriptive approach of our world and probes deeply into how and why it works.
- Physics Produces New Technology. Today's esoteric physics research will become tomorrow's technological advances.
- Technical Expertise. Physicists exploit forefront technologies in their pursuits.
- Flexibility. In a fast-paced and changing world, it is much more important to have a broad substantive education than to be trained in a specific skill. We teach people how to think, and how to apply and extend what they know to new types of problems.
- Physics is Analytical and Quantitative. People who can reason analytically and quantitatively are essential for the success of almost any pursuit.

A degree in physics helps prepare students for employment in industry, research, government, and academia. A bachelor's degree from the undergraduate physics program will provide an overall view of both classical and modern physics along with problem-solving ability and the flexibility to continue learning.

Your education can:
- Prepare you for employment in industrial or governmental laboratories.
- Prepare you for graduate studies for master's or doctoral degrees in experimental or theoretical physics.
- Provide a broad background for further work in other sciences, such as materials sciences, aerospace, astronomy, computer science, geophysics, meteorology, radiology, medicine, biophysics, engineering, and environmental studies.
- Provide a science-oriented liberal education. This training can be useful in some areas of business administration, law, or other fields where a basic knowledge of science is useful.
- Provide part of the preparation you need to teach physics. To teach physics in high school, you will also take education courses to become certified. You will need a doctoral degree to become a college or university professor.

\section*{OTHER PROGRAMS}

\section*{AMEP}

A program in applied mathematics, engineering and physics (AMEP)
(p. 1144) is described in its own section of the Guide.

\section*{Astronomy-Physics}

Students interested in an astronomy-physics major should contact the astronomy department (p. 490).

\section*{Education-Physics}

A student working toward the Bachelor of Science-Education degree may major or minor in physics. Interested students should contact the School of Education (p. 1536). Upon request, the physics department will assign an advisor.

\section*{Medical Physics}

A suggested curriculum for students interested in graduate study in medical physics is available in the medical physics (https:// www.medphysics.wisc.edu/) department office.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Physics, B.A. (p. 1272)
- Physics, B.S. (p. 1280)
- Physics, Certificate (p. 1288)

\section*{PHYSICS, B.A.}

\section*{WELCOME TO THE UW-MADISON DEPARTMENT OF PHYSICS}

We have a long history of providing our students with a great educational experience. Our physics department awarded its first Ph.D. in 1899. Since then, our students have earned degrees in virtually every area of physics, and our faculty have played key roles in a myriad of important research efforts.

Physics is the science of the properties of matter, radiation, and energy in all forms. As such, it is the most fundamental of the sciences. It provides the underlying framework for the other physical sciences and engineering and for understanding physical processes in biological and environmental sciences.

\section*{CHOOSE TO BE A PHYSICS MAJOR}

\section*{WHY STUDY PHYSICS?}
- Intellectual Satisfaction. First, and foremost, physics satisfies our deep desire to understand how the universe works. Physics is interesting.
- Intellectual Challenge. By striving for fundamental understanding, the physicist accepts the challenge to move past a merely descriptive approach of our world and probes deeply into how and why it works.
- Physics Produces New Technology. Today's esoteric physics research will become tomorrow's technological advances.
- Technical Expertise. Physicists exploit forefront technologies in their pursuits.
- Flexibility. In a fast-paced and changing world, it is much more important to have a broad substantive education than to be trained in a specific skill. We teach people how to think, and how to apply and extend what they know to new types of problems.
- Physics is Analytical and Quantitative. People who can reason analytically and quantitatively are essential for the success of almost any pursuit.

The undergraduate physics program will provide an overall view of both classical and modern physics with the flexibility to continue learning in fields that interest you. It will also help you develop skills in analysis, problem-solving, and quantitative reasoning that will aid you in whatever career you pursue after graduation.

\section*{Your education can:}
- Prepare you for employment in industrial or governmental laboratories.
- Prepare you for graduate studies for master's or doctoral degrees in experimental or theoretical physics.
- Provide a broad background for further work in other sciences, such as materials sciences, aerospace, astronomy, computer science, geophysics, meteorology, radiology, medicine, biophysics, engineering, and environmental studies.
- Provide a science-oriented liberal education. This training can be useful in some areas of business administration, law, or other fields where a basic knowledge of science is useful.
- Provide part of the preparation you need to teach physics. To teach physics in high school, you will also take education courses to become certified. You will need a doctoral degree to become a college or university professor.

Interested in the undergraduate physics program? Check out the physics undergraduate page (https://www.physics.wisc.edu/academics/ undergrads/) or browse the Undergraduate Physics Majors Handbook (https://www.physics.wisc.edu/undergrads/handbook.pdf).

\section*{OTHER PROGRAMS}

\section*{AMEP}

A program in applied mathematics, engineering and physics (AMEP) (p. 1144) is described in its own section of the Guide.

\section*{Astronomy-Physics}

Students interested in an astronomy-physics major should contact the astronomy department (p. 490).

\section*{Education-Physics}

A student working toward the Bachelor of Science-Education degree may major or minor in physics. Interested students should contact the School of Education (p. 1536). Upon request, the physics department will assign an advisor.

\section*{Medical Physics}

A suggested curriculum for students interested in graduate study in medical physics is available on the medical physics webpage (https://www.medphysics.wisc.edu/graduate-program/admissions/ \#requirements).

\section*{HOW TO GET IN}

\section*{TO DECLARE A PHYSICS MAJOR}

Students should discuss declaration with one of the undergraduate advisors (p. 1276) as early as possible and bring a What-If DARS for the Physics major to their meeting.

To be eligible to declare the major, students must have a combined MATH and PHYSICS GPA of at least a 2.500. Eligible students can declare the physics major anytime by completing the department's major declaration form (https://www.physics.wisc.edu/sites/default/files/ Physics\%20Declaration\%20Form.pdf) and having it signed by a physics undergraduate advisor.

There are additional steps to declaring Physics as an Additional Major. Section C of the major declaration form (https://www.physics.wisc.edu/ sites/default/files/Physics\%20Declaration\%20Form.pdf) has important information about this process. Students should consult the Guide page
of their home school or college for more information about declaring an Additional Major in L\&S.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B(Q R-B)\) coursework.
Foreign
Language
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
\begin{tabular}{|c|c|}
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison & - 30 credits in residence, overall; and \\
\hline Experience & - 30 credits in residence after the 86 th credit. \\
\hline Quality of & - 2.000 in all coursework at UW-Madison \\
\hline Work & - 2.000 in Intermediate/Advanced level coursework at UW-Madison \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

The physics major requires 35 credits from the following:
\begin{tabular}{llr}
\hline \begin{tabular}{l} 
Code \\
Introductory Physics
\end{tabular} & \multicolumn{1}{c}{\begin{tabular}{l} 
Title
\end{tabular}} & Credits \\
\hline First Introductory Course (complete one):
\end{tabular}
\begin{tabular}{ll} 
PHYSICS/ & Introduction to Solid State \\
E C E 235 & \begin{tabular}{l} 
Electronics (not recommended for \\
majors)
\end{tabular} \\
PHYSICS 241 & Introduction to Modern Physics

PHYSICS 531 Introduction to Quantum Mechanics
Laboratory
Full registerted credit per course:
PHYSICS 307 Intermediate Laboratory-Mechanics and Modern Physics
PHYSICS 407 Advanced Laboratory
Two credits apply from each of the following:
PHYSICS 321 Electric Circuits and Electronics \({ }^{6}\)
PHYSICS 325 Optics \({ }^{6}\)
PHYSICS 623 Electronic Aids to Measurement \({ }^{6}\)
PHYSICS 625 Applied Optics \({ }^{6}\)
N E \(427 \quad\) Nuclear Instrumentation Laboratory 7

NE \(428 \quad\) Nuclear Reactor Laboratory \({ }^{7}\)
One credit applies from each of the following:
E C E 305 Semiconductor Properties Laboratory \({ }^{7}\)
E C E 313 Optoelectronics Lab \({ }^{7}\)
Advanced Physics Electives 0-4
Total Credits

\section*{1}

The introductory course sequence consists of three courses: PHYSICS 247/PHYSICS 248/PHYSICS 249 in the honors sequence recommended for prospective physics majors, PHYSICS 201/PHYSICS 202/PHYSICS 205 is recommend for engineers, and PHYSICS 207/PHYSICS 208/PHYSICS 241 is intended for life sciences and chemistry majors, and is a suitable alternative for physics majors. Although the department recommends following one of these sequences, students are allowed to mix them, with the exception that transfers into the PHYSICS 247/PHYSICS 248/PHYSICS 249 honors sequence are not permitted.

2
Both courses must be taken and together count 5 credits toward the 35 required for the major. These credits can be counted toward the 35 required for the major only if these courses are used to satisfy this requirement.

3
All three of E C E 220 and E C E 320 and E C E 420 must be taken, and together count 3 credits toward the 35 required for the major. These credits can be counted toward the 35 required for the major only if these courses are used to satisfy this requirement.

\section*{4}

PHYSICS 415 is strongly recommend as the course to satisfy the Thermal Physics Requirement, except for students pursuing additional majors in physics.

\section*{5}

Both courses CHEM 561 and CHEM 562 must be taken and together count 3 credits toward the 35 required for the major. These credits can be counted toward the 35 required for the major only if these courses are used to satisfy this requirement.

6

All four credits for each course count toward 35-credit total.

\section*{7}

For non-PHYSICS courses, students will receive only the credit applied as lab toward the 35-credit requirement

8
It is recommended that the student's program include the seminar PHYSICS 301 Physics Today.

\section*{RESIDENCE AND QUALITY OF WORK IN THE MAJOR}
- 2.000 GPA in all PHYSICS and all major courses
- 2.000 on at least 15 credits in Upper Level work, taken in residence \({ }^{9}\)
- 15 credits in PHYSICS, taken on campus

\section*{9}

Courses that meet the Core and Laboratory requirements, and Advanced level PHYSICS courses, count as upper-level in the major.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with their major advisor and the Honors Program.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in all PHYSICS and all major courses
- 12 credits of Honors PHYSICS courses with grades of B or better, to include:
- PHYSICS 681 - PHYSICS 682, for a total of 6 credits
- 3 additional credits of Advanced level PHYSICS for Honors, with a grade of \(B\) or better
- 3 credits at any level in PHYSICS for Honors, with a grade of B or better

\section*{DISTINCTION IN THE MAJOR}

Distinction in the Major requires no declaration, and is awarded at the time of graduation. Students may not receive Distinction and Honors in the same major. To receive Distinction in the Major, students must have met the following requirements and notify a departmental advisor:
- 3.300 University GPA
- 3.300 GPA in all PHYSICS and all major courses
- 6 additional credits in Advanced level PHYSICS beyond the minimum required for the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Understand basic physical principles.
2. Solve problems proficiently using both quantitative and qualitative applications of these physical principles.
3. Appreciate the excitement of physics and be acquainted with a wide range of research areas in physics.
4. Know how to perform quantitative measurements of physical phenomena and understand the statistical significance of observations made in the presence of statistical and systematic uncertainties.
5. Be prepared for graduate study and/or careers in STEM fields.
6. Communicate effectively with scientific peers and the public, both orally and in writing.
7. Understand their own learning processes and be able to continue to educate themselves after graduation.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Students should arrange a meeting with a departmental advisor as soon as they are even thinking about a physics major. It is important to get major advising as early as possible.

This is one of many paths through the physics major. For other possibilities and details on math preparation and sequence of courses, see the

Advising and Careers page (https://guide.wisc.edu/undergraduate/ letters-science/physics/physics-bs/\#advisingandcareerstext).

\section*{ADVISING AND CAREERS}

\section*{PHYSICS UNDERGRADUATE ADVISORS}

\section*{Evan Heintz}

Professor Tulika Bose
Professor Deniz Yavuz

\section*{SCHEDULING AN ADVISING APPOINTMENT WITH A PHYSICS MAJOR ADVISOR:}

To meet with a Physics major advisor, you may either email physicsadvisors@wisc.edu or contact one of them directly.

\section*{PHYSICS AMEP ADVISORS}

\section*{Professor Cary Forest}

Professor Robert McDermott

Professor Thad Walker

Professor Deniz Yavuz

\section*{SCHEDULING AN ADVISING APPOINTMENT WITH AN AMEP ADVISOR:}

Applied Math Engineering Physics (AMEP) students may email AMEPadvisors@wisc.edu. If you already have an assigned AMEP advisor in the physics department, please contact them directly.

\section*{ADVISING FOR SOAR STUDENTS}

Email physics-advisors@wisc.edu or AMEP-advisors@wisc.edu, depending on your interests. Include contact information and your availability.

\begin{abstract}
The Department of Physics encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.
\end{abstract}

Additional Resources:
- Link to physics department student jobs and research opportunities (https://www.physics.wisc.edu/academics/undergrads/news/)

\section*{ADVISORY INFORMATION}

\section*{Mathematics}

There are specific math courses listed as prerequisites for our Physics courses. Depending on your interest in math (some Physics majors also major in Math as well), the courses you select may be different. A typical math sequence is: MATH 221, MATH 222, MATH 234, MATH 319, MATH 340, MATH 321, MATH 322. MATH 320 is an alternative course majors may pursue instead of taking both MATH 319 and MATH 340. Please consult with an advisor when choosing your Mathematics courses, particularly before deciding on one of the honors sequences in Math. We do not recommend the honors sequences for physics majors unless you are considering a second major in Math.

MATH 221 Calculus and Analytic Geometry 1: MATH 221 is a prerequisite to PHYSICS 247, PHYSICS 207, and PHYSICS 201.

MATH 222 Calculus and Analytic Geometry 2: MATH 222 is also a prerequisite for PHYSICS 247 but can be taken concurrently.

MATH 234 Calculus--Functions of Several Variables: MATH 234 is a prerequisite for PHYSICS 248 but can be taken concurrently. It is typically taken to complete the sequence MATH 221/MATH 222/MATH 234.

MATH 319 Techniques in Ordinary Differential Equations: Techniques for solving and approximating solutions to ordinary differential equations. You are strongly advised to take MATH 319 and MATH 340, or MATH 320 before PHYSICS 311 Mechanics.

MATH 340 Elementary Matrix and Linear Algebra: This course is a bridge between concrete and abstract math. The next step for students interested in more abstract math is MATH 521/MATH 522. MATH 340 is particularly useful for PHYSICS 311 and later for quantum mechanics and we strongly suggest taking it or MATH 320.

MATH 320 Linear Algebra and Differential Equations: This course combines topics from MATH 319 and MATH 340. It is adequate for the rest of our undergraduate physics curriculum but is not recommended for those planning on continuing to graduate school. There is an accelerated honors section that thoroughly covers all of the material in MATH 319 and MATH 340. It is more challenging but is a good way to fit in both topics if you are unable to take MATH 319/MATH 340 before you take PHYSICS 311.

MATH 321 Applied Mathematical Analysis: Techniques for solving problems in the physical sciences, engineering, and applied mathematics, using advanced calculus and analytic function theory. It is recommended that MATH 321 be taken before taking PHYSICS 322. MATH 321 is highly recommended for physics majors but requires a significant time commitment.

MATH 322 Applied Mathematical Analysis: Techniques for solving partial differential equations, with an emphasis on practical problems in the physical sciences. Also covers special functions, Fourier Transformations, etc. MATH 321 and MATH 322 are recommended for those planning to continue on to graduate school in Physics.

\section*{Chemistry}

A college course in chemistry is useful for all physics students, but not required.

\section*{Computing}

Students should become familiar with scientific programming. The most useful languages are Python followed by C or \(\mathrm{C}++\). The computer sciences department offers introductory courses. The Division of Information Technology (DoIT) also offers short courses to introduce programming.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{WISCONSIN EXPERIENCE}

\section*{PHYSICS UNDERGRADUATE COLLOQUIUM}

There is a weekly series of talks in the spring semester called "Physics Today," at which a topic of local research is described by one of the physics faculty. These are open and may be attended by anyone. They can also be taken as a course, PHYSICS 301 Physics Today. See the Course Guide for location and time.

\section*{THE PHYSICS CLUB}

The University Physical Society (UPS)-also known as the Physics Club-is a student organization for people interested in physics and related fields.

\section*{WHAT DOES THE PHYSICS CLUB DO?}

The Physics Club organizes events such as seminars, tours, trips, and socials for its members. Physics Club volunteers also offer free drop-in tutoring to students in introductory physics and astronomy classes. In addition, we maintain subscriptions to science related magazines such as Scientific American, Astronomy, and Physics Today, which are kept in the club's room located at 2328 Chamberlin Hall. Every Friday afternoon, we meet with the physics colloquium speaker to learn about the process of becoming a scientist. In addition, UPS sponsors a variety of other events. For example, in the past, we have taken took a field trip to Fermilab, sponsored a racquetball tournament, and have frequently gathered for social events such as ice skating, movie night, and bowling.

\section*{WHY SHOULD YOU JOIN THE PHYSICS CLUB?}

By joining the Physics Club you'll be meeting many physics majors, who are, in general, really cool people to hang out with. If you are thinking about declaring a physics major, this is the place to come for helpful advice about taking classes and finding an undergraduate job in the physics department. If you join, you can get access to the Physics Club room, 2328 Chamberlin Hall. Joining also adds you to the club email list, so you can be notified about club sponsored events.

\section*{PERKS OF BEING A PHYSICS CLUB MEMBER}

When you join the Physics Club, you get access to an excellent room, 2328 Chamberlin Hall. This room contains a refrigerator, reference shelves of textbooks, couch, tables, and chairs, a phone, blackboards, and a microwave. We have a several computers in the room. You can get your
own key to the room and visit at your leisure, and stay as long as you like.
Plus, you get the added bonus of knowing people who are in your classes.

\section*{University Physical Society}

2328 Chamberlin Hall
email: ups.officers@gmail.com

\section*{To Join:}

Drop by Room 2328 Chamberlin Hall and pick up a membership form. Turn in a completed form with your annual dues to a UPS club officer.

\section*{GENDER MINORITIES AND WOMEN IN PHYSICS}

Gender Minorities and Women in Physics (GMaWiP) is a student organization open to undergraduates for the support and promotion of gender minorities and women in physics at UW-Madison. GMaWiP works to provide both professional development and support for women and gender minorities in physics at every step in their careers by taking concrete actions through the following methods:
1. Career Development
2. Mentorship
3. Fellowship
4. Outreach

In addition, they provide advocacy for other minorities in physics, including, but not limited to students of color, students with disability status, low-income students, and LGBT+ students. The group also hosts social events throughout the year aimed at building a sense of community among the members.

\section*{GREAT IDEAS}

GMaWiP also hosts a bi-weekly GREAT IDEAS (Group for Reading, Educating, And Talking about Inclusion, Diversity, Equity, \& Advocacy in Science) seminar. GREAT IDEAS is a multimedia reading group dedicated to amplifying the experiences of underrepresented groups in science and academia in order to become better advocates for our peers. GREAT IDEAS is open to everyone, and all are welcome and encouraged to engage with the material and contribute to the discussions.

\section*{UNDERGRADUATE MENTORSHIP PROGRAM}

GMaWiP also provides a mentorship program for undergraduate students. This program connects the undergraduate with a graduate student who will advise and mentor the undergraduate as they work to obtain their degree. If you are interested in this mentorship program or are interested in getting involved with GMaWiP, please fill out this contact form (https:// gmawip.physics.wisc.edu/?page_id=72).

\section*{PHYSICS LEARNING CENTER}

The Physics Learning Center: Striving to help all students succeed in Physics
- Do you enjoy Physics?
- Are you patient?
- Do you like to teach?
-Would you like to help other undergraduate students?
The Physics Learning Center (PLC) has job opportunities for physics undergraduates as Peer Mentor Tutors (PMT). The PLC is looking
for PMTs who have a desire to help others learn physics and have an enthusiasm for learning new ways to solve physics problems.

The PLC provides supplemental instruction and a supportive learning environment to students in large challenging introductory physics courses. They include algebra-based Physics 103-104 and calculus-based 207-208 that are requisites for many STEM majors and pre-health professional pathways. The majority of students in these classes are not physics majors.

PMTs lead a learning team twice a week helping students build a conceptual framework to solve a variety of physics problems. The PLC strives to create a supportive learning environment to help students gain skills, increase confidence, and meet potential study partners.

Peer Mentor Tutors receive extensive training in teaching Physics and in general pedagogy. Tutors meet with a PLC staff member each week to discuss strategies for teaching course content, including how to useteaching materials that stress conceptual understanding. In addition, PMTs from all courses meet as a group for a weekly teaching seminar to discuss issues such as group dynamics, techniques for actively involving students in learning, helping students to prepare for exams, raising awareness of diversity in student experiences, resources on campus, etc .

Our Peer Mentor Tutors report that they greatly enjoy working with their students. In the process, they strengthen their own foundation in Physics and presentation skills. They also tell us that teaching Physics helps to review for the Graduate Record Exam and to prepare for post-graduate teaching in middle/high school or as a University teaching assistant .

PMTs are a mix of students majoring in physics, astrophysics, secondary science education, and engineering as well as from other majors. This is a paid position taking about eight hours per week that includes learning team time, content and pedagogy meetings, reviews before exams, and time to prepare for teaching.

To find out more about the PLC Peer Mentor Tutor Program, please contact us. The PLC is located in Chamberlin 2337/2338.

\section*{Physics Learning Center}

\section*{RESOURCES AND SCHOLARSHIPS}

The Physics Department is very happy to offer a number of awards for undergraduate and graduate students in physics each year. Many of these awards have been made possible through very generous donations by alumni and friends of the Department.

A list of all the undergraduate and graduate awards can be found on the physics website (https://www.physics.wisc.edu/department/awards/ apply/).

\section*{APPLICATION PROCESS}

\section*{Eligibility}
- Must be enrolled as a full-time student at UW-Madison in both semesters of the Academic Year
- Must be a physics major (some awards also include astronomy majors)

Applicants will be judged by the Student Awards Committee. You may apply for a specific award below however the Committee will consider all eligible applications for relevant awards. The Committee will review your transcript.

The call for applications is often sent out near the end of fall semester with the deadline for applications often falling slightly after the beginning of spring semester. The awards decisions will be made by the Awards Committee soon thereafter. Awardees will be notified and asked to attend the Physics Awards Banquet to be held at the end of the spring semester.

\section*{TO APPLY}

Once the call for applications has been sent out, each applicant is to submit the following (in PDF) by the deadline via WiSH (https:// wisc.academicworks.com/):
- Resume/CV
- Statement of current research/teaching activity and future plans as a physics major (one page)
- Letter of recommendation from a faculty or staff member (one page)
- On-line application system will automatically prompt letter writer to submit letter
- If indicated below, a statement of need (one page)

\section*{For More information}

Please visit the Department of Physics Awards webpage (https:// www.physics.wisc.edu/awards/) or contact the Department of Physics info@physics.wisc.edu

\section*{PHYSICS, B.S.}

The Department of Physics has a long history of providing students with a great educational experience. The department awarded its first Ph.D. in 1899. Since then, physics students have earned degrees in virtually every area of physics, and the department's faculty has played key roles in a myriad of important research efforts.

Physics is the science of the properties of matter, radiation, and energy in all forms. As such, it is the most fundamental of the sciences. It provides the underlying framework for the other physical sciences and engineering and for understanding physical processes in biological and environmental sciences.

\section*{CHOOSE TO BE A PHYSICS MAJOR \\ WHY STUDY PHYSICS?}
- Intellectual Satisfaction. First, and foremost, physics satisfies our deep desire to understand how the universe works. Physics is interesting.
- Intellectual Challenge. By striving for fundamental understanding, the physicist accepts the challenge to move past a merely descriptive approach of our world and probes deeply into how and why it works.
- Physics Produces New Technology. Today's esoteric physics research will become tomorrow's technological advances.
- Technical Expertise. Physicists exploit forefront technologies in their pursuits.
- Flexibility. In a fast-paced and changing world, it is much more important to have a broad substantive education than to be trained in a specific skill. We teach people how to think, and how to apply and extend what they know to new types of problems.
- Physics is Analytical and Quantitative. People who can reason analytically and quantitatively are essential for the success of almost any pursuit.

A degree in physics helps prepare students for employment in industry, research, government, and academia. A bachelor's degree from the undergraduate physics program will provide an overall view of both classical and modern physics along with problem-solving ability and the flexibility to continue learning.

Your education can:
- Prepare you for employment in industrial or governmental laboratories.
- Prepare you for graduate studies for master's or doctoral degrees in experimental or theoretical physics.
- Provide a broad background for further work in other sciences, such as materials sciences, aerospace, astronomy, computer science, geophysics, meteorology, radiology, medicine, biophysics, engineering, and environmental studies.
- Provide a science-oriented liberal education. This training can be useful in some areas of business administration, law, or other fields where a basic knowledge of science is useful.
- Provide part of the preparation you need to teach physics. To teach physics in high school, you will also take education courses to become certified. You will need a doctoral degree to become a college or university professor.

\section*{OTHER PROGRAMS}

AMEP
A program in applied mathematics, engineering and physics (AMEP) (p. 1144) is described in its own section of the Guide.

\section*{Astronomy-Physics}

Students interested in an astronomy-physics major should contact the astronomy department (p. 490).

\section*{Education-Physics}

A student working toward the Bachelor of Science-Education degree may major or minor in physics. Interested students should contact the School of Education (p. 1536). Upon request, the physics department will assign an advisor.

\section*{Medical Physics}

A suggested curriculum for students interested in graduate study in medical physics is available in the medical physics (https:// www.medphysics.wisc.edu/) department office.

\section*{HOW TO GET IN}

\section*{TO DECLARE A PHYSICS MAJOR}

Students should discuss declaration with one of the undergraduate advisors (p. 1276) as early as possible and bring a What-If DARS for the Physics major to their meeting.

To be eligible to declare the major, students must have a combined MATH and PHYSICS GPA of at least a 2.500. Eligible students can declare the physics major anytime by completing the department's major declaration form (https://www.physics.wisc.edu/sites/default/files/ Physics\%20Declaration\%20Form.pdf) and having it signed by a physics undergraduate advisor.

There are additional steps to declaring Physics as an Additional Major. Section C of the major declaration form (https://www.physics.wisc.edu/ sites/default/files/Physics\%20Declaration\%20Form.pdf) has important information about this process. Students should consult the Guide page of their home school or college for more information about declaring an Additional Major in L\&S.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of

Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of 3+ credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

The physics major requires 35 credits from the following:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{3}{|l|}{Introductory Physics \({ }^{1}\)} \\
\hline \multicolumn{2}{|l|}{First Introductory Course (complete one): \({ }^{1}\)} & 5 \\
\hline PHYSICS 247 & A Modern Introduction to Physics (recommended) & \\
\hline PHYSICS 207 & General Physics & \\
\hline PHYSICS 201 & General Physics & \\
\hline \[
\begin{aligned}
& \text { E M A } 201 \\
& \& \text { E M A } 202
\end{aligned}
\] & Statics and Dynamics \({ }^{2}\) & \\
\hline \[
\begin{aligned}
& \text { E M A } 201 \\
& \& \text { M E } 240
\end{aligned}
\] & Statics and Dynamics \({ }^{2}\) & \\
\hline \multicolumn{2}{|l|}{Second Introductory Course (complete one):} & 5 \\
\hline PHYSICS 248 & A Modern Introduction to Physics (recommended) & \\
\hline
\end{tabular}
\begin{tabular}{|c|c|c|}
\hline PHYSICS 208 & General Physics & \\
\hline PHYSICS 202 & General Physics & \\
\hline \multicolumn{2}{|l|}{Third Introductory Course (complete one):} & 3-4 \\
\hline PHYSICS 249 & A Modern Introduction to Physics (recommended) & \\
\hline PHYSICS 205 & Modern Physics for Engineers (not recommended for majors) & \\
\hline \begin{tabular}{l}
PHYSICS/ \\
ECE 235
\end{tabular} & Introduction to Solid State Electronics (not recommended for majors) & \\
\hline PHYSICS 241 & Introduction to Modern Physics & \\
\hline \multicolumn{3}{|l|}{Intermediate Mechanics} \\
\hline PHYSICS 311 & Mechanics & 3 \\
\hline \multicolumn{2}{|l|}{Electromagnetism (complete one):} & 3-9 \\
\hline PHYSICS 322 & Electromagnetic Fields & \\
\hline \[
\begin{aligned}
& \text { E C E } 220 \\
& \text { \& E C E } 320 \\
& \text { \& E C E } 420
\end{aligned}
\] & Electrodynamics I and Electrodynamics II and Electromagnetic Wave Transmission \({ }^{3}\) & \\
\hline \multicolumn{2}{|l|}{Thermal Physics (complete one):} & 3-6 \\
\hline PHYSICS 415 & Thermal Physics \({ }^{4}\) & \\
\hline CHEM 561 \& CHEM 562 & Physical Chemistry and Physical Chemistry \({ }^{5}\) & \\
\hline M E 361 & Thermodynamics & \\
\hline \multicolumn{2}{|l|}{Quantum Mechanics (complete one):} & 3-6 \\
\hline \begin{tabular}{l}
PHYSICS 448 \\
\& PHYSICS 449
\end{tabular} & Atomic and Quantum Physics and Atomic and Quantum Physics & \\
\hline PHYSICS 531 & Introduction to Quantum Mechanics & \\
\hline \multicolumn{2}{|l|}{Laboratory} & 6 \\
\hline \multicolumn{3}{|l|}{Full registerted credit per course:} \\
\hline PHYSICS 307 & Intermediate Laboratory-Mechanics and Modern Physics & \\
\hline PHYSICS 407 & Advanced Laboratory & \\
\hline \multicolumn{3}{|l|}{Two credits apply from each of the following:} \\
\hline PHYSICS 321 & Electric Circuits and Electronics \({ }^{6}\) & \\
\hline PHYSICS 325 & Optics \({ }^{6}\) & \\
\hline PHYSICS 623 & Electronic Aids to Measurement \({ }^{6}\) & \\
\hline PHYSICS 625 & Applied Optics \({ }^{6}\) & \\
\hline N E 427 & Nuclear Instrumentation Laboratory 7 & \\
\hline N E 428 & Nuclear Reactor Laboratory \({ }^{7}\) & \\
\hline \multicolumn{3}{|l|}{One credit applies from each of the following:} \\
\hline E C E 305 & Semiconductor Properties Laboratory \({ }^{7}\) & \\
\hline E C E 313 & Optoelectronics Lab \({ }^{7}\) & \\
\hline \multicolumn{2}{|l|}{Advanced Physics Electives} & 0-4 \\
\hline \multicolumn{2}{|l|}{Total Credits} & 35 \\
\hline
\end{tabular}

1
The introductory course sequence consists of three courses: PHYSICS 247/PHYSICS 248/PHYSICS 249 in the honors sequence recommended for prospective physics majors, PHYSICS 201/PHYSICS 202/PHYSICS 205 is recommend for engineers, and PHYSICS 207/PHYSICS 208/PHYSICS 241 is intended for life sciences and chemistry majors, and is a suitable alternative for physics majors. Although the department recommends following one of these sequences, students are allowed to mix them, with the exception that transfers into the PHYSICS 247/PHYSICS 248/PHYSICS 249 honors sequence are not permitted.

\section*{2}

Both courses must be taken and together count 5 credits toward the 35 required for the major. These credits can be counted toward the 35 required for the major only if these courses are used to satisfy this requirement.
3
All three of E C E 220 and E C E 320 and E C E 420 must be taken, and together count 3 credits toward the 35 required for the major. These credits can be counted toward the 35 required for the major only if these courses are used to satisfy this requirement.
4
PHYSICS 415 is strongly recommend as the course to satisfy the Thermal Physics Requirement, except for students pursuing additional majors in physics.
5
Both courses CHEM 561 and CHEM 562 must be taken and together count 3 credits toward the 35 required for the major. These credits can be counted toward the 35 required for the major only if these courses are used to satisfy this requirement.

\section*{6}

All four credits for each course count toward 35-credit total.
7
For non-PHYSICS courses, students will receive only the credit applied as lab toward the 35-credit requirement.
\begin{tabular}{llr} 
ADVANCED PHYSICS ELECTIVE COURSES \\
Code & Title & Credits \\
PHYSICS 301 & Physics Today (recommended)
\end{tabular}
\begin{tabular}{llr} 
PHYSICS/B M E/ & Radiation Physics and Dosimetry & 3 \\
H ONCOL/ & & \\
MED PHYS 501 & & 3 \\
PHYSICS/E C E/ & Introduction to Plasmas & \\
N E 525 & & 3 \\
PHYSICS/E C E/ & Plasma Confinement and Heating & \\
N E 527 & & 3 \\
PHYSICS 531 & Introduction to Quantum Mechanics & 3 \\
PHYSICS 535 & Introduction to Particle Physics & 3 \\
PHYSICS 545 & Introduction to Atomic Structure & \(2-3\) \\
PHYSICS/E C E 546 & Lasers & 3 \\
PHYSICS 551 & Solid State Physics & 4 \\
PHYSICS 623 & Electronic Aids to Measurement & 4 \\
PHYSICS 625 & Applied Optics & 3 \\
PHYSICS 681 & Senior Honors Thesis & 3 \\
PHYSICS 682 & Senior Honors Thesis & \(2-3\) \\
PHYSICS 691 & Senior Thesis & \(2-3\)
\end{tabular}

8
It is recommended that the student's program include the seminar PHYSICS 301 Physics Today.

\section*{RESIDENCE AND QUALITY OF WORK IN THE MAJOR}
-2.000 GPA in all PHYSICS and all major courses
- 2.000 on at least 15 credits in Upper Level work, taken in residence \({ }^{9}\)
- 15 credits in PHYSICS, taken on campus

9
Courses that meet the Core and Laboratory requirements, and Advanced level PHYSICS courses, count as upper-level in the major.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with their major advisor and the Honors Program.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in all PHYSICS and all major courses
- 12 credits of Honors PHYSICS courses with grades of B or better, to include:
- PHYSICS 681 - PHYSICS 682, for a total of 6 credits
- 3 additional credits of Advanced level PHYSICS for Honors, with a grade of \(B\) or better
- 3 credits at any level in PHYSICS for Honors, with a grade of B or better

\section*{DISTINCTION IN THE MAJOR}

Distinction in the Major requires no declaration, and is awarded at the time of graduation. Students may not receive Distinction and Honors in the
same major. To receive Distinction in the Major, students must have met the following requirements and notify a departmental advisor:
- 3.300 University GPA
- 3.300 GPA in all PHYSICS and all major courses
- 6 additional credits in Advanced level PHYSICS beyond the minimum required for the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Understand basic physical principles.
2. Solve problems proficiently using both quantitative and qualitative applications of these physical principles.
3. Appreciate the excitement of physics and be acquainted with a wide range of research areas in physics.
4. Know how to perform quantitative measurements of physical phenomena and understand the statistical significance of observations made in the presence of statistical and systematic uncertainties.
5. Be prepared for graduate study and/or careers in STEM fields.
6. Communicate effectively with scientific peers and the public, both orally and in writing.
7. Understand their own learning processes and be able to continue to educate themselves after graduation.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to
accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Students should arrange a meeting with a departmental advisor as soon as they are even thinking about a physics major. It is important to get major advising as early as possible.

This is one of many paths through the physics major. For other possibilities and details on math preparation and sequence of courses, see the Advising and Careers page (https://guide.wisc.edu/undergraduate/ letters-science/physics/physics-bs/\#advisingandcareerstext).

First Year
\begin{tabular}{|c|c|c|c|}
\hline Fall & Credits & Spring & Credits \\
\hline PHYSICS 247 (Physics & & 5 PHYSICS 248 (Physics & 5 \\
\hline First Introductory & & Second Introductory & \\
\hline Course) & & Course) & \\
\hline MATH 234 & & 4 MATH 319 & 3 \\
\hline Communication A & & 3 MATH 340 & 3 \\
\hline Foreign Language (if needed) & & 4 Ethnic Studies & 3 \\
\hline & & 16 & 14 \\
\hline
\end{tabular}

Second Year

\section*{Total Credits 120}

\title{
PHYSICS UNDERGRADUATE ADVISORS
}

\section*{Evan Heintz}

Professor Tulika Bose

\section*{Professor Deniz Yavuz}

SCHEDULING AN ADVISING APPOINTMENT WITH A PHYSICS MAJOR ADVISOR:
To meet with a Physics major advisor, you may either email physicsadvisors@wisc.edu or contact one of them directly.

\section*{PHYSICS AMEP ADVISORS}

\section*{Professor Cary Forest}

Professor Robert McDermott

Professor Thad Walker

Professor Deniz Yavuz

\section*{SCHEDULING AN ADVISING APPOINTMENT WITH AN AMEP ADVISOR:}

Applied Math Engineering Physics (AMEP) students may email AMEPadvisors@wisc.edu. If you already have an assigned AMEP advisor in the physics department, please contact them directly.

\section*{ADVISING FOR SOAR STUDENTS}

Email physics-advisors@wisc.edu or AMEP-advisors@wisc.edu, depending on your interests. Include contact information and your availability.

\begin{abstract}
The Department of Physics encourages our majors to begin working on their career exploration and preparation soon after arriving on campus. We partner with SuccessWorks at the College of Letters \& Science. L\&S graduates are in high demand by employers and graduate programs. It is important to us that our students are career ready at the time of graduation, and we are committed to your success.
\end{abstract}

Additional Resources:
- Link to physics department student jobs and research opportunities (https://www.physics.wisc.edu/academics/undergrads/news/)

\section*{ADVISORY INFORMATION}

\section*{Mathematics}

There are specific math courses listed as prerequisites for our Physics courses. Depending on your interest in math (some Physics majors also major in Math as well), the courses you select may be different. A typical math sequence is: MATH 221, MATH 222, MATH 234, MATH 319, MATH 340, MATH 321, MATH 322. MATH 320 is an alternative course majors may pursue instead of taking both MATH 319 and MATH 340. Please consult with an advisor when choosing your Mathematics courses, particularly before deciding on one of the honors
sequences in Math. We do not recommend the honors sequences for physics majors unless you are considering a second major in Math.

MATH 221 Calculus and Analytic Geometry 1: MATH 221 is a prerequisite to PHYSICS 247, PHYSICS 207, and PHYSICS 201.

MATH 222 Calculus and Analytic Geometry 2: MATH 222 is also a prerequisite for PHYSICS 247 but can be taken concurrently.

MATH 234 Calculus--Functions of Several Variables: MATH 234 is a prerequisite for PHYSICS 248 but can be taken concurrently. It is typically taken to complete the sequence MATH 221/MATH 222/MATH 234.

MATH 319 Techniques in Ordinary Differential Equations: Techniques for solving and approximating solutions to ordinary differential equations. You are strongly advised to take MATH 319 and MATH 340, or MATH 320 before PHYSICS 311 Mechanics.

MATH 340 Elementary Matrix and Linear Algebra: This course is a bridge between concrete and abstract math. The next step for students interested in more abstract math is MATH 521/MATH 522. MATH 340 is particularly useful for PHYSICS 311 and later for quantum mechanics and we strongly suggest taking it or MATH 320.

MATH 320 Linear Algebra and Differential Equations: This course combines topics from MATH 319 and MATH 340. It is adequate for the rest of our undergraduate physics curriculum but is not recommended for those planning on continuing to graduate school. There is an accelerated honors section that thoroughly covers all of the material in MATH 319 and MATH 340. It is more challenging but is a good way to fit in both topics if you are unable to take MATH 319/MATH 340 before you take PHYSICS 311.

MATH 321 Applied Mathematical Analysis: Techniques for solving problems in the physical sciences, engineering, and applied mathematics, using advanced calculus and analytic function theory. It is recommended that MATH 321 be taken before taking PHYSICS 322. MATH 321 is highly recommended for physics majors but requires a significant time commitment.

MATH 322 Applied Mathematical Analysis: Techniques for solving partial differential equations, with an emphasis on practical problems in the physical sciences. Also covers special functions, Fourier Transformations, etc. MATH 321 and MATH 322 are recommended for those planning to continue on to graduate school in Physics.

\section*{Chemistry}

A college course in chemistry is useful for all physics students, but not required.

\section*{Computing}

Students should become familiar with scientific programming. The most useful languages are Python followed by C or \(\mathrm{C}++\). The computer sciences department offers introductory courses. The Division of Information Technology (DoIT) also offers short courses to introduce programming.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{WISCONSIN EXPERIENCE}

\section*{PHYSICS UNDERGRADUATE COLLOQUIUM}

There is a weekly series of talks in the spring semester called "Physics Today," at which a topic of local research is described by one of the physics faculty. These are open and may be attended by anyone. They can also be taken as a course, PHYSICS 301 Physics Today. See the Course Guide for location and time.

\section*{THE PHYSICS CLUB}

The University Physical Society (UPS)-also known as the Physics Club-is a student organization for people interested in physics and related fields.

\section*{WHAT DOES THE PHYSICS CLUB DO?}

The Physics Club organizes events such as seminars, tours, trips, and socials for its members. Physics Club volunteers also offer free drop-in tutoring to students in introductory physics and astronomy classes. In addition, we maintain subscriptions to science related magazines such as Scientific American, Astronomy, and Physics Today, which are kept in the club's room located at 2328 Chamberlin Hall. Every Friday afternoon, we meet with the physics colloquium speaker to learn about the process of becoming a scientist. In addition, UPS sponsors a variety of other events. For example, in the past, we have taken took a field trip to Fermilab, sponsored a racquetball tournament, and have frequently gathered for social events such as ice skating, movie night, and bowling.

\section*{WHY SHOULD YOU JOIN THE PHYSICS CLUB?}

By joining the Physics Club you'll be meeting many physics majors, who are, in general, really cool people to hang out with. If you are thinking about declaring a physics major, this is the place to come for helpful advice about taking classes and finding an undergraduate job in the physics department. If you join, you can get access to the Physics Club room, 2328 Chamberlin Hall. Joining also adds you to the club email list, so you can be notified about club sponsored events.

\section*{PERKS OF BEING A PHYSICS CLUB MEMBER}

When you join the Physics Club, you get access to an excellent room, 2328 Chamberlin Hall. This room contains a refrigerator, reference shelves of textbooks, couch, tables, and chairs, a phone, blackboards, and a microwave. We have a several computers in the room. You can get your own key to the room and visit at your leisure, and stay as long as you like. Plus, you get the added bonus of knowing people who are in your classes.

\section*{University Physical Society}

2328 Chamberlin Hall
email: ups.officers@gmail.com

\section*{To Join:}

Drop by Room 2328 Chamberlin Hall and pick up a membership form. Turn in a completed form with your annual dues to a UPS club officer.

\section*{GENDER MINORITIES AND WOMEN IN PHYSICS}

Gender Minorities and Women in Physics (GMaWiP) is a student organization open to undergraduates for the support and promotion of gender minorities and women in physics at UW-Madison. GMaWiP works to provide both professional development and support for women and gender minorities in physics at every step in their careers by taking concrete actions through the following methods:
1. Career Development
2. Mentorship
3. Fellowship
4. Outreach

In addition, they provide advocacy for other minorities in physics, including, but not limited to students of color, students with disability status, low-income students, and LGBT+ students. The group also hosts social events throughout the year aimed at building a sense of community among the members.

\section*{GREAT IDEAS}

GMaWiP also hosts a bi-weekly GREAT IDEAS (Group for Reading, Educating, And Talking about Inclusion, Diversity, Equity, \& Advocacy in Science) seminar. GREAT IDEAS is a multimedia reading group dedicated to amplifying the experiences of underrepresented groups in science and academia in order to become better advocates for our peers. GREAT IDEAS is open to everyone, and all are welcome and encouraged to engage with the material and contribute to the discussions.

\section*{UNDERGRADUATE MENTORSHIP PROGRAM}

GMaWiP also provides a mentorship program for undergraduate students. This program connects the undergraduate with a graduate student who will advise and mentor the undergraduate as they work to obtain their degree. If you are interested in this mentorship program or are interested
in getting involved with GMaWiP, please fill out this contact form (https:// gmawip.physics.wisc.edu/?page_id=72).

\section*{PHYSICS LEARNING CENTER}

The Physics Learning Center: Striving to help all students succeed in Physics
- Do you enjoy Physics?
- Are you patient?
- Do you like to teach?
-Would you like to help other undergraduate students?
The Physics Learning Center (PLC) has job opportunities for physics undergraduates as Peer Mentor Tutors (PMT). The PLC is looking for PMTs who have a desire to help others learn physics and have an enthusiasm for learning new ways to solve physics problems.

The PLC provides supplemental instruction and a supportive learning environment to students in large challenging introductory physics courses. They include algebra-based Physics 103-104 and calculus-based 207-208 that are requisites for many STEM majors and pre-health professional pathways. The majority of students in these classes are not physics majors.

PMTs lead a learning team twice a week helping students build a conceptual framework to solve a variety of physics problems. The PLC strives to create a supportive learning environment to help students gain skills, increase confidence, and meet potential study partners .

Peer Mentor Tutors receive extensive training in teaching Physics and in general pedagogy. Tutors meet with a PLC staff member each week to discuss strategies for teaching course content, including how to useteaching materials that stress conceptual understanding. In addition, PMTs from all courses meet as a group for a weekly teaching seminar to discuss issues such as group dynamics, techniques for actively involving students in learning, helping students to prepare for exams, raising awareness of diversity in student experiences, resources on campus, etc.

Our Peer Mentor Tutors report that they greatly enjoy working with their students. In the process, they strengthen their own foundation in Physics and presentation skills. They also tell us that teaching Physics helps to review for the Graduate Record Exam and to prepare for post-graduate teaching in middle/high school or as a University teaching assistant .

PMTs are a mix of students majoring in physics, astrophysics, secondary science education, and engineering as well as from other majors. This is a paid position taking about eight hours per week that includes learning team time, content and pedagogy meetings, reviews before exams, and time to prepare for teaching.

To find out more about the PLC Peer Mentor Tutor Program, please contact us. The PLC is located in Chamberlin 2337/2338.

\section*{RESOURCES AND SCHOLARSHIPS}

The Physics Department is very happy to offer a number of awards for undergraduate and graduate students in physics each year. Many of these awards have been made possible through very generous donations by alumni and friends of the Department.

A list of all the undergraduate and graduate awards can be found on the physics website (https://www.physics.wisc.edu/department/awards/ apply/).

\section*{APPLICATION PROCESS}

\section*{Eligibility}
- Must be enrolled as a full-time student at UW-Madison in both semesters of the Academic Year
- Must be a physics major (some awards also include astronomy majors)

Applicants will be judged by the Student Awards Committee. You may apply for a specific award below however the Committee will consider all eligible applications for relevant awards. The Committee will review your transcript.

The call for applications is often sent out near the end of fall semester with the deadline for applications often falling slightly after the beginning of spring semester. The awards decisions will be made by the Awards Committee soon thereafter. Awardees will be notified and asked to attend the Physics Awards Banquet to be held at the end of the spring semester.

\section*{TO APPLY}

Once the call for applications has been sent out, each applicant is to submit the following (in PDF) by the deadline via WiSH (https:// wisc.academicworks.com/):
- Resume/CV
- Statement of current research/teaching activity and future plans as a physics major (one page)
- Letter of recommendation from a faculty or staff member (one page)
- On-line application system will automatically prompt letter writer to submit letter
- If indicated below, a statement of need (one page)

\section*{For More information}

Please visit the Department of Physics Awards webpage (https:// www.physics.wisc.edu/awards/) or contact the Department of Physics info@physics.wisc.edu

\section*{PHYSICS, CERTIFICATE}

The department offers an undergraduate certificate in physics. An understanding of the physical universe informs many disciplines. The study of physics is essential to understanding nature and to advancing technology in the coming century. A certificate in physics increases the opportunities for students to become better informed on technological issues at the local, state, national, and international levels.

The certificate is designed to serve undergraduates majoring in biology, chemistry, mathematics, engineering, education and other fields who wish to extend their study of physics beyond what may be required or recommended for their major without completing the full L\&S physics major requirements

\section*{HOW TO GET IN}

To declare a certificate in physics, students must fill out a major/certificate declaration form. An undergraduate physics advisor must sign the form. The form to declare the certificate can be obtained at the Physics departmental office. All undergraduate students are eligible to declare the certificate, except those declared in the following majors: Physics, Astronomy-Physics, and Applied Mathematics, Engineering, and Physics (AMEP).

\section*{REQUIREMENTS}

\section*{CERTIFICATE REQUIREMENTS}

The physics certificate requires 18 credits of Intermediate or Advanced level undergraduate PHYSICS courses, with the following restrictions:
- At least 9 of the credits must be in residence.
- At most one course from each of the three semesters of an introductory sequence can be counted.
- At most 3 credits of directed study can be counted
- Only graded courses may be used toward the certificate
- A minimum grade point average of 2.000 is required in all certificate courses.
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{2}{|l|}{First Introductory Course (complete only one):} & 5 \\

\hline
\end{tabular}

Total Credits18

1

A maximum of 5 credits from E M A 201, E M A 202 and M E 240 count toward the 18 credits required for the certificate.

2

Students may not transfer into the PHYSICS 247 - PHYSICS 248 PHYSICS 249 sequence from another introductory sequence.

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Understand basic physical principles.
2. Solve problems proficiently using both quantitative and qualitative applications of these physical principles.
3. Know how to perform quantitative measurements of physical phenomena and understand the statistical significance of observations made in the presence of statistical and systematic uncertainties.
4. Be prepared for graduate study and/or careers in STEM fields.
5. Communicate effectively with scientific peers and the public, both orally and in writing.

\section*{ADVISING AND CAREERS}

\section*{PHYSICS UNDERGRADUATE ADVISORS}

Professor Tulika Bose
Professor Jan Egedal

\section*{Professor Deniz Yavuz}

\section*{SCHEDULING AN ADVISING APPOINTMENT WITH A PHYSICS MAJOR ADVISOR:}

To meet with a Physics major advisor, you may either email physicsadvisors@wisc.edu or contact them directly.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PLANNING AND LANDSCAPE ARCHITECTURE}

The Department of Planning and Landscape Architecture offers two undergraduate programs. One is a professional landscape design and planning program, fully accredited by the American Society of Landscape Architects, and leads to the Bachelor of Landscape Architecture special degree within the College of Letters \& Science. The other program introduces the field of landscape studies and leads to either a Bachelor of Arts or a Bachelor of Science degree with a major in Landscape and Urban Studies.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Integrative Design of Built and Natural Environments, Certificate (p. 1292)
- Landscape and Urban Studies, B.A. (p. 1294)
- Landscape and Urban Studies, B.S. (p. 1299)
- Landscape Architecture, BLA (p. 1304)

> INTEGRATIVE DESIGN OF BUILT AND NATURAL ENVIRONMENTS, CERTIFICATE

The Certificate in Integrative Design of Built and Natural Environments, offered through the Department of Planning and Landscape Architecture, is focused around an exciting trans-disciplinary design approach that relies on design processes and thinking and integrates spatial data technologies to effectively and efficiently inventory, represent, analyze, evaluate, and communicate planning and design alternatives for landscapes, cities, and regions. Proactively co-designing and co-producing healthy places comprehends, plans, and acts on social and environmental information and, therefore, a diverse suite of elective courses addresses social and environmental considerations through stakeholder engagement, environmental justice, policy, conservation, and management. Required courses will apply spatial technologies (GIS, Geodesign) to enable collaborations among the design professions (landscape architects, planners, engineers, and scientists and humanists from various disciplines), and community members. This collaborative process will help prepare you to work in interdisciplinary teams and to appreciate diverse perspectives and values while addressing complex problems.

\section*{HOW TO GET IN}

Undergraduate students from across campus are encouraged to consider completing the Certificate. To declare the Certificate in Integrative Design of Built and Natural Environments through the Department of Planning and Landscape Architecture, students must have completed at least one class that meets Certificate requirements, or be enrolled in at least one class in the current or upcoming semester that meets Certificate requirements. Students pursuing the program are encouraged to declare as early as possible so that they can best align the coursework with their interests. Students can declare the program by scheduling an appointment with the Department of Planning and Landscape Architecture Undergraduate Academic Advising Manager, or by filling out the online declaration form on the Department of Planning and Landscape Architecture website.

Students declared in the certificate should plan to complete the program before, or alongside, their degree and major requirements, as they are not able to extend their time on campus to complete a certificate.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

Students are required to a minimum of 14 credits to include one introductory course, one methods and applications course, and elective courses.

\section*{Total Credits}

\section*{PASS/FAIL COURSES}

Courses taken on a pass/fail basis will not count toward the certificate.

\section*{RESIDENCE AND QUALITY OF WORK}
- At least 8 certificate credits must be completed in residence
- Minimum 3.000 GPA on all certificate courses

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Demonstrate an understanding of the frameworks and processes involved in integrative design of built and natural environments
2. Understand and demonstrate how to use techniques and research from biological, physical sciences, and social sciences in design, planning, and management contexts to create frameworks and designs
3. Select and evaluate geospatial technologies appropriate for a variety of design, planning, and management contexts
4. Understand and evaluate the role of stakeholder values and ethics in design frameworks relative to design, planning, and management of the built environment within social and natural systems

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

We encourage you to reach out to Debi Griffin, our undergraduate academic advising manager, if you're interested in learning more about the Certificate or would like guidance as a current Certificate student. You can make an appointment via Starfish (https://wisc.starfishsolutions.com/ starfish-ops/dl/instructor/serviceCatalog.html) or email Debi (dagriffin@wisc.edu)

\section*{CAREERS}

The interdisciplinary education provided through the Certificate in Integrative Design of the Built and Natural Environment will make graduates highly sought after by employers in local government, landscape and urban design, environmental science, management, and policy.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

\section*{LANDSCAPE AND URBAN STUDIES, B.A.}

Are you interested in climate justice? Are you interested in inclusive economic development and social justice? Do you want to preserve the beauty in cities and create ecologically sustainable cities? Those are some of the goals you can learn to achieve when you major Landscape and Urban Studies. You will learn to integrate the biological, physical, and social sciences; humanities; arts; and technology to develop the skills that will help you play an important role in creating a more inclusive and sustainable future.

The major provides students opportunities to specialize in several directions: Culture, Health and Community; Restoration and Ecological Design; and Urban Studies. The major also provides students opportunities to explore the design and planning professions. Students who graduate from the major are prepared for starting positions in public or private agencies that oversee conservation, land management, cultural landscape conservation, and planning or for continuing on to graduate school, in particular, professionally accredited programs in Landscape Architecture, Planning, or Environmental Studies. This is the major for people who care about the natural world and human creation by understanding cultural and natural resource protection, green infrastructure, social equity, and policy, and more.

\section*{HOW TO GET IN}

Students who intend to declare their major in Landscape and Urban Studies are encouraged to schedule an appointment with the Undergraduate Advisor in the Department of Planning and Landscape Architecture.

Students who attend SOAR (Student Orientation, Advising, and Registration) session with the College of Letters and Science have the option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
\begin{tabular}{|c|c|}
\hline Foreign & - Complete the \\
\hline Language & - Complete the third unit of a foreign language and the second unit of an additional foreign language. \\
\hline L\&S Breadth & \begin{tabular}{l}
- 12 credits of Humanities, which must include 6 credits of literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.
\end{tabular} \\
\hline
\end{tabular}

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll} 
UW-Madison & \\
Experience & • 30 credits in residence, overall; and \\
Quality of & • 2.000 in all coursework at UW-Madison residence after the 86 th credit. \\
Work & • 2.000 in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Students interested in the major are required to complete a set of introductory courses, breadth in the major under three categories: Biological and Physical Environment, Social and Cultural Studies and Technology and 15 credits of electives (see an Advisor and the Advising tab for recommended focused elective sets).

Landscape and Urban Studies majors must complete at least 48 credits in the major, including the following:
\begin{tabular}{llr} 
INTRODUCTORY COURSES & \\
Code & Title & Credits \\
LAND ARC 211 & Shaping the Built Environment & 3 \\

Away programs.
\end{tabular} \\
Work \begin{tabular}{l} 
Undergraduate students must maintain the minimum grade \\
point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
& \begin{tabular}{l} 
thresholds will be placed on academic probation.
\end{tabular} \\
&
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Demonstrate competence and critical judgment in creatively applying the intellectual and technical skills necessary for site and landscapescale natural and cultural resource conservation, planning, and management; these skills include cultural, historical and landscape literacy, data collection and analysis, spatial and temporal analysis, multidisciplinary problem-solving approaches and communication skills.
2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.
3. Understand, apply and evaluate the principles, theories and research findings underlying at least one of the following advising pathways, Ecological Restoration and Design; Culture, Health, and Community; and Urban Studies.
4. Integrate social, cultural, ecological and technological dimensions in solving design and planning problems concerning the conservation or management of sustainable natural and cultural landscapes.
5. Be able to perform as a member of a public, private or non-profits office or agency in the fields represented within the department.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to
accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Students enrolled in the major Landscape and Urban Studies have three opportunities for advising:
1. Our undergraduate coordinator (https://dpla.wisc.edu/staff/debigriffin/) can assist with general questions about registration, student assistance, and progress in meeting major requirements.
2. All students entering the program may choose a faculty advisor (see People/Instructors) to assist with guidance specific to the curriculum (e.g. coursework, internships, research) and career opportunities.
3. The College of Letters \& Science offers advice on career paths, networking, and job search preparation (see below).

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{Instructors}

Professors: David Bart, Sam Dennis Jr., Ken Genskow, Evelyn Howell, James LaGro, Dave Marcouiller, Alfonso Morales, Brian Ohm, Kurt Paulsen

Associate Professor: Carey McAndrews
Assistant Professors: Edna Ledesma, Revel Sims
Distinguished Faculty Associate: Shawn Kelly
Faculty Associate: Eric Schuchardt
Assistant Faculty Associate: Edward Bosewell
Senior Lecturers: Doug Hadley, James Steiner
Lecturers: Jacob Blue, Nathan Larson
Earth Partnership Program

Director: Cheryl Bauer Armstrong
Outreach Specialists: Claire Bjork, Maria Moreno

\section*{Academic Advising}

Undergraduate Academic Advising Manager: Deborah Griffin

\section*{Administrative Staff}

Department Administrator:
Financial Specialist: Tori Cooper
IT Support Specialist: Rob De Roos
Department Chair: Alfonso Morales

\section*{WISCONSIN EXPERIENCE}

The Wisconsin Experience combines learning in and out of the classroom, helping students develop intellectual and personal growth. The Landscape and Urban Studies major mixes traditional learning with community-based learning in and out of the classroom. Students are encouraged to take opportunities that supplement classroom learning by engaging in research, study abroad, internships, student clubs, and community interactions. The major engages students in exploring people-place, culture-nature phenomena and how they might, in their professional and personal lives, apply continuous learning to the planning of environments that benefit people, cultures, and the environment at the local, state, national, and global levels.

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{Wisconsin Scholarship Hub (WiSH)}

This scholarship (http://scholarships.wisc.edu/Scholarships/schlrDetails/? scholld=4101) provides amounts ranging from \$2,000 to \$5,000 each to help students participate in a first-time internship opportunity that is unpaid or provides a limited stipend.

\section*{HILLDALE UNDERGRADUATE/FACULTY RESEARCH FELLOWSHIP}

The Hilldale Undergraduate/Faculty Research Fellowships (https:// awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/)support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Approximately 97-100 Hilldale awards are available each year. The student researcher receives \$3,000, and faculty/staff research advisor receives \(\$ 1,000\) to help offset research costs (e.g., supplies, faculty or student travel related to the project).

\section*{HOLSTROM ENVIRONMENTAL SCHOLARSHIPS}

The Holstrom Environmental Scholarships (https:// go.wisc.edu/550x41/) support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Research proposals must have an environmental focus, and applicants must have at least junior standing at time of application.

\section*{UNDERGRADUATE SYMPOSIUM}

The annual Undergraduate Symposium (https://
ugradsymposium.wisc.edu/) showcases undergraduate creativity,
achievement, research, service-learning and community-based research from all areas of study at UW-Madison including the humanities, fine arts, biological sciences, physical sciences, and social sciences.

\section*{UNDERGRADUATE RESEARCH SCHOLARS}

The Undergraduate Research Scholars (https://urs.Is.wisc.edu/)program (URS) is dedicated to enhancing the academic experience of UWMadison students by providing first- and second-year undergraduates with opportunities to earn credit for participating in the research and creative work with UW-Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities.

\section*{WISCONSIN IDEA FELLOWSHIPS}

Wisconsin Idea Fellowships (https://morgridge.wisc.edu/students/ wisconsin-idea-fellowships/) are awarded annually to undergraduate student projects working towards solving a challenge identified along with local or global community partner. Fellowships are awarded to semesterlong or year-long projects designed by an undergraduate student (or group of students) in collaboration with a community organization and a UW-Madison faculty or academic staff member.

\section*{LANDSCAPE AND URBAN STUDIES, B.S.}

Are you interested in climate justice? Are you interested in inclusive economic development and social justice? Do you want to preserve the beauty in cities and create ecologically sustainable cities? Those are some of the goals you can learn to achieve when you major Landscape and Urban Studies. You will learn to integrate the biological, physical, and social sciences; humanities; arts; and technology to develop the skills that will help you play an important role in creating a more inclusive and sustainable future.

The major provides students opportunities to specialize in several directions: Culture, Health and Community; Restoration and Ecological Design; and Urban Studies. The major also provides students opportunities to explore the design and planning professions. Students who graduate from the major are prepared for starting positions in public or private agencies that oversee conservation, land management, cultural landscape conservation, and planning or for continuing on to graduate school, in particular, professionally accredited programs in Landscape Architecture, Planning, or Environmental Studies. This is the major for people who care about the natural world and human creation by understanding cultural and natural resource protection, green infrastructure, social equity, and policy, and more.

\section*{HOW TO GET IN}

Students who intend to declare their major in Landscape and Urban Studies are encouraged to schedule an appointment with the Undergraduate Advisor in the Department of Planning and Landscape Architecture.

Students who attend SOAR (Student Orientation, Advising, and Registration) session with the College of Letters and Science have the
option to declare this major at SOAR. Students may otherwise declare after they have begun their undergraduate studies.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}

Mathematics Complete two courses of 3+ credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement.

Foreign Language
L\&S Breadth Complete:
- 12 credits of Humanities, which must include at least 6 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.

Total Credits

\section*{RESIDENCE \& QUALITY OF WORK}
- 2.000 GPA in all LAND ARC and URB R PL courses and courses that count toward the major
- 2.000 GPA on 15 upper-level credits, taken in Residence
- 15 combined credits in LAND ARC and URB PL , taken on the UW-Madison campus

1

See an Advisor and the Advising tab for recommended focused elective sets

2
Intermediate and Advanced level courses accepted in the major are Upper Level

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Demonstrate competence and critical judgment in creatively applying the intellectual and technical skills necessary for site and landscapescale natural and cultural resource conservation, planning, and management; these skills include cultural, historical and landscape literacy, data collection and analysis, spatial and temporal analysis, multidisciplinary problem-solving approaches and communication skills.
2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.
3. Understand, apply and evaluate the principles, theories and research findings underlying at least one of the following advising pathways, Ecological Restoration and Design; Culture, Health, and Community; and Urban Studies.
4. Integrate social, cultural, ecological and technological dimensions in solving design and planning problems concerning the conservation or management of sustainable natural and cultural landscapes.
5. Be able to perform as a member of a public, private or non-profits office or agency in the fields represented within the department.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Students enrolled in the major Landscape and Urban Studies have 3 opportunities for advising:
1. Our undergraduate coordinator (https://dpla.wisc.edu/staff/debigriffin/) can assist with general questions about registration, student assistance and progress in meeting major requirements.
2. All students entering the program may choose a faculty advisor (see People/Instructors) to assist with guidance specific to the curriculum (e.g. coursework, internships, research) and career opportunities.
3. The College of Letters and Science offers advice on career paths, networking, and job search preparation (see below).

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{Instructors}

Professors: David Bart, Sam Dennis Jr., Ken Genskow, Evelyn Howell, James LaGro, Dave Marcouiller, Alfonso Morales, Brian Ohm, Kurt Paulsen

Associate Professor: Carey McAndrews
Assistant Professors: Edna Ledesma, Revel Sims
Distinguished Faculty Associate: Shawn Kelly
Faculty Associate: Eric Schuchardt
Assistant Faculty Associate: Edward Bosewell
Senior Lecturers: Doug Hadley, James Steiner
Lecturers: Jacob Blue, Nathan Larson

\section*{Earth Partnership Program}

Director: Cheryl Bauer Armstrong
Outreach Specialists: Claire Bjork, Maria Moreno

\section*{Academic Advising}

Undergraduate Academic Advising Manager: Deborah Griffin

\section*{Administrative Staff}

Department Administrator:
Financial Specialist: Tori Cooper
IT Support Specialist: Rob De Roos
Department Chair: Alfonso Morales

\section*{WISCONSIN EXPERIENCE}

The Wisconsin Experience combines learning in and out of the classroom, helping students develop intellectual and personal growth. The Landscape and Urban Studies major mixes traditional learning with community-based learning in and out of the classroom. Students are encouraged to take opportunities that supplement classroom learning by engaging in research, study abroad, internships, student clubs, and community interactions. The major engages students in exploring people-place, culture-nature phenomena and how they might, in their professional and personal lives, apply continuous learning to the planning of environments that benefit people, cultures, and the environment at the local, state, national, and global levels.

\section*{RESOURCES AND SCHOLARSHIPS}

\section*{Wisconsin Scholarship Hub (WiSH)}

This scholarship (http://scholarships.wisc.edu/Scholarships/schlrDetails/? scholld=4101) provides amounts ranging from \(\$ 2,000\) to \(\$ 5,000\) each to help students participate in a first-time internship opportunity that is unpaid or provides a limited stipend.

\section*{HILLDALE UNDERGRADUATE/FACULTY RESEARCH FELLOWSHIP}

The Hilldale Undergraduate/Faculty Research Fellowships (https:// awards.advising.wisc.edu/all-scholarships/hilldale-undergraduatefaculty-research-fellowship/)support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Approximately 97-100 Hilldale awards are available each year. The student researcher receives \(\$ 3,000\), and faculty/staff research advisor receives \(\$ 1,000\) to help offset research costs (e.g., supplies, faculty or student travel related to the project).

\section*{HOLSTROM ENVIRONMENTAL SCHOLARSHIPS}

The Holstrom Environmental Scholarships (https:// go.wisc.edu/550x41/) support undergraduate research done in collaboration with UW-Madison faculty or research/instructional academic staff. Research proposals must have an environmental focus, and applicants must have at least a junior standing at time of application.

\section*{UNDERGRADUATE SYMPOSIUM}

The annual Undergraduate Symposium (https:// ugradsymposium.wisc.edu/) showcases undergraduate creativity, achievement, research, service-learning, and community-based research from all areas of study at UW-Madison including the humanities, fine arts, biological sciences, physical sciences, and social sciences.

\section*{UNDERGRADUATE RESEARCH SCHOLARS}

The Undergraduate Research Scholars (https://urs.Is.wisc.edu/)program (URS) is dedicated to enhancing the academic experience of UWMadison students by providing first- and second-year undergraduates with opportunities to earn credit for participating in the research and creative work with UW-Madison faculty and staff. The program has been designed to include partnerships between students and mentors, seminars on research-relevant issues, and practice in research/artistic presentations. The many benefits of the program are found in the fluid interaction between these activities.

\section*{WISCONSIN IDEA FELLOWSHIPS}

Wisconsin Idea Fellowships (https://morgridge.wisc.edu/students/ wisconsin-idea-fellowships/) are awarded annually to undergraduate student projects working toward solving a challenge identified along with a local or global community partner. Fellowships are awarded to semesterlong or year-long projects designed by an undergraduate student (or group of students) in collaboration with a community organization and a UW-Madison faculty or academic staff member.

\section*{LANDSCAPE \\ ARCHITECTURE, BLA}

Students who enjoy art, science, technology, problem-solving, and design should consider a career in landscape architecture. Graduates in landscape architecture influence the design and management of cities, parks, and open spaces. They often advise park managers, citizen groups, landowners, and state agencies. Landscape architects design public and private outdoor spaces, restore and help preserve natural areas, develop and implement regional planning and public policy, and revitalize urban neighborhoods. The professional Bachleor of Landscape Architecture (BLA) degree program focuses on form-giving design, design implementation, and professional practice. Emphasis is placed on
principles of design theory and process; problem solving in relationship to human needs and aspirations, environmental awareness and stewardship; and on the development of technical proficiencies required of professional practice. Students learn site analysis, graphic communication, design synthesis, construction technology, and the social and environmental factors that are part of design.

The BLA degree program provides professional education accredited by the American Society of Landscape Architects (ASLA) (https:// www.asla.org/AccreditationLAAB.aspx). Students completing the requirements for this program are granted a BLA degree. Completion of this program is the first step in becoming a licensed landscape architect.

Please note that students completing the BLA degree cannot pursue an additional major, however, students may work towards and complete certificates.

\section*{HOW TO GET IN}

Admission to the professional program during the sophomore year, or in the second year of the degree plan, is on a competitive basis.

Students completing the requirements for this program are awarded a BLA degree. Because the BLA is an integrated degree program, it cannot be added as an additional major ("double major") by students pursuing other degree programs. Students who are admitted to and complete the BLA degree may not declare or be awarded additional majors in combination with the BLA degree. However, BLA students are permitted to complete certificate programs.
1. Eligibility for Consideration into the Landscape Architecture Accredited Professional Program. Eligibility for consideration into the Landscape Architecture Accredited Professional Program depends on fulfillment of these requirements: students apply for formal admission to the program during the spring semester of each academic year. Selections are made only once a year for the fall semester. The first round of selections takes place in early summer. All students will be notified of their status at least two weeks before the start of the fall semester. Students who plan to complete their prerequisite courses during the summer session must so indicate on their application. The department will admit up to a maximum of 22 students, as resources permit. Selection will be based on a letter of intent, written by the applicant, which will address their reasons for entering the major, submission of portfolio, and on grades earned in the following two prerequisite courses: LAND ARC 250 AND LAND ARC 210 or LAND ARC 366.
2. AND the applicant must have completed a minimum of 24 credit hours. University GPA will be considered.
For more information on the professional design degree program and the application process please go to this link (https://dpla.wisc.edu/).
3. Selection Policies. On-campus selections for admission will be made as soon as possible after spring semester grades are received.
4. Notification of Status. Applicants who have completed their prerequisite courses at the end of spring semester will be notified of their status between June 1 and July 1 of each year for fall semester admission. Decisions on those applicants completing prerequisites during summer session will be made as soon as grades are received.
5. Appeal Procedures. An appeal to the department's curriculum committee may be presented to clarify an error of fact or extenuating circumstances.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General
Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS AND SCIENCE DEGREE REQUIREMENTS: BACHELOR OF LANDSCAPE ARCHITECTURE (BLA)
Students pursuing a Bachelor of Landscape Architecture degree in the College of Letters \& Science must complete all of the requirements below. The BLA is a special degree program; it is not considered a major. The BLA degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

\section*{BACHELOR OF LANDSCAPE ARCHITECTURE DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework.
Foreign Complete the third unit of a foreign language.
Language
L\&S Breadth Complete:
- 12 credits of Humanities, including at least 3 credits of Literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include 6 credits in Biological Science and 6 credits in Physical Science.
Liberal Arts \(\quad\) Complete at least 108 credits.
\& Science
Coursework

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all LAND ARC courses and courses that count toward the BLA program
- 2.000 GPA on 15 Upper Level credits, taken in Residence \({ }^{1}\)
- 15 credits in LAND ARC, taken on the UW-Madison campus

\section*{FOOTNOTES}

1
LAND ARC and major courses numbered 500-699 are Upper Level.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{EARNING OUTCOMES}
1. Demonstrate competence and critical judgement in applying intellectual and technical skills necessary for site and landscape-scale design, in particular skills of problem-solving using site inventory/ analysis; spatial/temporal analysis; programming; synthesis; oral,
written, and visual communication; construction implementation; and post-occupancy evaluation.
2. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members to identify and solve complicated landscape design and planning problems.
3. Understand, apply, and evaluate the principles, theories, and recent research findings in the discipline of landscape architecture.
4. Integrate humanistic, scientific, legal, political, economic, social, ecological, and technological dimensions in solving novel design and planning problems concerning the betterment of rural and urban natural and cultural landscapes.
5. Understand, analyze, and apply design and planning theories and principles to urban and rural landscapes to benefit human living conditions.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

Students are assigned to a faculty advisor once they are admitted to the major. Prospective students should contact the undergraduate academic coordinator, Debi Griffin (dagriffin@wisc.edu) for more information.

The BLA degree program provides professional education accredited by the the Landscape Architecture Accreditation Board (LAAB) (https:// www.asla.org/AccreditationLAAB.aspx).

Completion of this program is the first step in becoming a licensed landscape architect through the Council of Landscape Architectural Registration Boards (CLARB) (https://www.clarb.org/)

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.

Landscape Architecture Accreditation Board (https://www.asla.org/ AccreditationLAAB.aspx)

Accreditation status: Accredited. Next accreditation review: 2025.

\section*{POLITICAL SCIENCE}

There are many definitions of political science. But whether a definition focuses on the analysis of governmental structures, or influences on voter choice, or the relationship between national governments, or the best form of government, at base, political science is about the systematic study of power. Whether power is exercised formally, as is the case between government and the individual, or informally, as is the case between individuals, it is the systematic study of power relationships that provides the subject matter for the discipline. Majors in political science obtain not only an understanding of the workings of government, but they also develop important skills in critical thinking and analysis. These skills make them ideal candidates for careers in law; in government at the state, national, and international levels; in business; in journalism; and in politics.

> POLITICAL ECONOMY, PHILOSOPHY, AND POLITICS, CERTIFICATE

Why enroll in the political economy, philosophy, and politics certificate?
The political economy, philosophy, and politics (PEPP) certificate is rooted in a core insight: social, economic, and political problems have ethical, political, and economic dimensions. While the first program (politics, philosophy, and economics, or PPE) formally combining these three approaches was created at Oxford University in 1920, it drew on a tradition of inquiry that brought the three perspectives together. Since its creation at Oxford, similar programs have been created at a wide range of the world's leading universities.

If we move from the insight behind the program to what it means in practice, we can see that understanding, for example, immigration requires understanding it from political, economic, and ethical perspectives. In short, understanding the pressing political, economic, or philosophical problems of the day entails seeing them from a perspective that brings together all three disciplines. As a result, the PEPP curriculum brings together faculty and coursework from three different academic departments: Economics, Philosophy, and Political Science. This crossdisciplinary curriculum is important not just for intellectual development, but also for fostering the habits of mind central to democratic citizenship.

Students who enroll in the PEPP certificate will thus take coursework from political science, economics, and philosophy, and the certificate program will culminate in a small-enrollment, research- and writingoriented capstone seminar, POLI SCI 461. Combining breadth across the three disciplines with depth within two of the three, the PEPP certificate is a rigorous and exciting opportunity for cross-disciplinary study.

\section*{HOW TO GET IN}

Students can declare the program via the online declaration form. (https:// polisci.wisc.edu/pepp-certificate/)

\section*{ELECTIVE DEPTH COURSE}

Take one (1) additional course (3 credits) from the list of courses above in either Economics (p. 1308) or Philosophy (p. 1308).

CAPSTONE SEMINAR

\section*{Code}

Title
Credits
POLI SCI 461
Interdisciplinary Seminar in Political Economy, Philosophy, \& Politics

1
Courses taken Pass/Fail do not count

\section*{RESIDENCY AND QUALITY OF WORK}
- Minimum 2.000 GPA in all certificate courses
- At least 9 certificate credits must be completed in residence

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Knowing key concepts and arguments from economics, philosophy, and political science.
2. Synthesizing key arguments and concepts from philosophy, political science, and economics.
3. Applying arguments and concepts from philosophy, political science, and economics to contemporary policy or scholarly debates.

\section*{ADVISING AND CAREERS}

Cassie Chulick - Undergraduate Advisor, 303 North Hall
Amy Gangl - Undergraduate Advisor, 302 North Hall
Rachel Margolies - Undergraduate Advisor, 301 North Hall
Appointments scheduled with Starfish (https://advising.wisc.edu/facstaff/ starfish/starfish-student-resources/)

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Faculty Director: Daniel Kapust (https://polisci.wisc.edu/people/faculty/ daniel-kapust/), Associate Professor, Political Science

Program Core Faculty with Departmental Affiliation:
- Jim Walker, Professor, Economics
- Maria Muniagurria, Economics
- Daniel Hausman, Professor, Philosophy
- Harry Brighouse, Professor, Philosophy.
- Daniel Kapust, Associate Professor, Political Science
- Helen Kinsella, Associate Professor, Political Science
- Howard Schweber, Professor, Political Science
- John Zumbrunnen, Professor, Political Science
- Genevieve Rousseliere, Assistant Professor, Political Science
- Michelle Schwarze, Assistant Professor, Political Science
- Richard Avramenko, Associate Professor, Political Science

\section*{Advising:}
- Cassie Chulick, Undergraduate Advisor, Political Science
- Amy Gangl, Director of Undergraduate Studies
- Rachel Margolies, Undergraduate Coordinator

\section*{POLITICAL SCIENCE, B.A.}

\section*{WHY STUDY POLITICAL SCIENCE?}

There are many definitions of political science. But whether a definition focuses on the analysis of governmental structures, or influences on voter choice, or the relationship between national governments, or the best form of government, at base, political science is about the systematic study of power. Whether power is exercised formally, as is the case between government and the individual, or informally, as is the case between individuals, it is the systematic study of power relationships that provides the subject matter for the discipline. Majors in political science obtain not only an understanding of the workings of government, but they also develop important skills in critical thinking and analysis. These skills make them ideal candidates for careers in law; in government at the state, national, and international levels; in business; in journalism; and in politics.

\section*{WHAT CAREERS DO POLITICAL SCIENCE MAJORS PURSUE?}

Poli Sci majors learn quickly, work well in teams, and have basic understanding of the policy process and the operations of government. Poli Sci majors understand that for every endeavor, no matter how important, there is a mountain of ordinary grunt work that has to be done. Poli Sci majors can be counted on to do the foot-work, put in the facetime, and endure the slog necessary of everything of consequence.

Poli Sci majors go on to work in all levels of government. Local and state governments have a direct impact on the quality of life of all Americans. Courses on state and urban government, public policy, administrative law, and public administration are especially valuable. Quantitative and statistical skills developed in these courses and applied in the internships many of our students do provide a powerful combination.

Poli Sci majors go on to work in a wide range of International careers, in business, Foreign Service, and non-governmental organizations. Political Science offers a wide variety of courses in comparative politics, international relations and organizations, public policy, political development, and interest group politics. These courses in combination with economics, statistics, computer science, and international trade.

Poli Sci majors pursue careers in campaign management, political polling, national political committees, and consulting. They will have taken multiple courses in the American political system, comparative political parties, elections, public opinion, and voting behavior; as well as committing themselves to developing their writing and data analysis. There are over half a million campaigns in the United States annually, and while entry level jobs have long hours, low pay, and enormous demands, they are places where you can 'cut your political teeth'. Local campaigns lead to statewide
or national campaigns, and then perhaps to consulting and polling if that strikes your interest.

Poli Sci majors have also traditionally gone into law. Some lawyers are litigators while others are employed by corporations, government, and other organizations. Political Science track fits nicely for students seeking law degrees as official credentials to 'practice law' and those students who seek a law degree as an additional 'tool' to make positive impacts in their professional areas of interest. Some individuals with legal training work in other areas such as corporate or public management. The department offers a wide variety of political theory, constitutional law, and public policy courses that will help you explore the interaction between law, politics, and society.

\section*{HOW TO GET IN}

Students in the College of Letters \& Science can declare Political Science by completing a form on the department website (https://polisci.wisc.edu/ advising-and-major-information/).

Students in other schools and colleges interested in adding the Political Science major to their primary degree program need an online form signed by the Political Science advisor in order to obtain permission from their home school/college to add the additional major.

Students declared in the Political Science certificate may not be declared in the Political Science major at the same time. Students who do wish to declare this major must first cancel their declaration in the certificate.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General •Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework
Foreign - Complete the fourth unit of a foreign language; OR
Language
- Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one \(3+\) credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
Major Declare and complete at least one major.
Total Credits Complete at least 120 credits.
UW-Madison • 30 credits in residence, overall; and
Experience
- 30 credits in residence after the 86th credit.

Quality of
- 2.000 in all coursework at UW-Madison

Work
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

30 credits are required in the following areas:

Total Credits

\section*{ELECTIVES}

Additional POLI SCI courses to attain 30 credits in the major. \({ }^{2}\)

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all POLI SCI courses and courses that count toward the major
- 2.000 GPA on 15 upper-level credits in the major, taken in
residence \({ }^{3}\)
- 15 credits in POLI SCI, taken on campus

\section*{HONORS IN THE MAJOR}

To declare Honors in the Major, students must have at least one POLI SCI course for Honors, at least a 3.300 University GPA, and meet with the major advisor to discuss the requirements.

To earn Honors in the Major, students must satisfy the requirements for the major (above) and these additional requirements:
- Earn a 3.300 or higher University GPA
- Earn 3.500 GPA or higher in all POLI SCI courses
- Complete at least 15 credits in POLI SCI for Honors to include: \({ }^{4}\)
Code Title Credits

Complete one of these Thesis sequences: 6
\(\left.\begin{array}{llr}\text { POLI SCI } 681 & \text { Senior Honors Thesis } \\ \text { \& POLI SCI } 682 & \text { and Senior Honors Thesis }\end{array}\right)\)

\section*{FOOTNOTES}

1
Courses may only meet one Distribution area. A course may meet both a Distribution and the Research Methods requirement, but will only be applied once toward the 30 credits required in the major.

\section*{2}

No more than 6 total credits of Directed Study (POLI SCI 199, POLI SCI 698, POLI SCI 699) and Internship (POLI SCI 315) may count in the major.
3
POLI SCI courses numbered 300 and higher count as upper-level in the major.

4

A grade of \(B\) or higher is required to earn Honors credit.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Develop an understanding of and appreciation for the methods and approaches of diverse subfields in Political Science--\#American Politics, Comparative Politics, International Relations, and Political Theory--\#and their relevance to important theoretical and pragmatic questions.
2. Analyze different forms and practices of governance both democratic and non\#democratic.
3. Argue effectively and defend propositions with intellectual integrity, while considering a range of alternative points of view and evidence.
4. Analyze relations among individuals, civil society, political institutions, and states.
5. Analyze the motivations and consequences of political decision\# making and activities.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{Total Credits 120}

1

Students wishing to write a senior thesis (with or without Honors) should apply in the spring of their third year.

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{Credits}

\section*{DEPARTMENTAL EXPECTATIONS}

Students planning to graduate within three years with a Political Science major should enter the University with a minimum of 18 advanced standing credits, and have satisfied the following requirements with course credit or via placement examination:
- Communication Part A
- Quantitative Reasoning Part A
- 18 credits of any elective coursework
- 3-4 units of foreign language

Students missing one or more of these requirements upon entering the University should talk to their advisor about completing coursework over Summer terms to stay on track for a three year timeline.

\hline
\end{tabular}

\section*{Total Credits 101-102}

Students wishing to write a senior thesis (with or without Honors) should apply in the spring of their second year.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

The Department of Political Science has academic advisors who are available to meet with you to offer guidance on:
- Course selection
- Program planning
- Internship opportunities
- Study abroad programs
- Scholarship opportunities
- Student research interests
- Transfer and study abroad credits

Information about scheduling appointments can be found here (https:// polisci.wisc.edu/advising-and-major-information/\#advising). Please note
that no advising appointments are scheduled via email.

\section*{ENROLLMENT INFORMATION}

Political science majors who wish to enroll in the following course(s) must obtain prior consent/authorization:
- Directed Study
- Thesis
- Proseminars (varies by specific course; check footnotes in the class schedule)
- Specific Topic
- Other advanced-level coursework with consent of the instructor in lieu of other required courses

Information and course descriptions are posted on the department website prior to each enrollment period. POLI SCI 315 Legislative Internship is available by application only. Specific deadlines will be announced each semester. Students with a classification making them ineligible for certain courses due to retroactive or AP credits may see the instructor for possible permission to enroll on a space available basis. Students who wish to enroll in a course that is closed may use the online wait list available through the Student Center in MyUW. The number of credits for variable credit courses is determined by course format and contact periods for a specific semester as noted in the class schedule. For graduate programs, see the Graduate section of this Guide.

\section*{CAREER ADVISING L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career
skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Please see the Faculty (https://polisci.wisc.edu/faculty-2/) and Administration and Staff (https://polisci.wisc.edu/administration-staff/) sections of the Political Science website.

\section*{POLITICAL SCIENCE, B.S.}

\section*{WHY STUDY POLITICAL SCIENCE?}

There are many definitions of political science. But whether a definition focuses on the analysis of governmental structures, or influences on voter choice, or the relationship between national governments, or the best form of government, at base, political science is about the systematic study of power. Whether power is exercised formally, as is the case between government and the individual, or informally, as is the case between individuals, it is the systematic study of power relationships that provides the subject matter for the discipline. Majors in political science obtain not only an understanding of the workings of government, but they also develop important skills in critical thinking and analysis. These skills make them ideal candidates for careers in law; in government at the state, national, and international levels; in business; in journalism; and in politics.

\section*{WHAT CAREERS DO POLITICAL SCIENCE MAJORS PURSUE?}

Poli Sci majors learn quickly, work well in teams, and have basic understanding of the policy process and the operations of government. Poli Sci majors understand that for every endeavor, no matter how important, there is a mountain of ordinary grunt work that has to be done. Poli Sci majors can be counted on to do the foot-work, put in the facetime, and endure the slog necessary of everything of consequence.

Poli Sci majors go on to work in all levels of government. Local and state governments have a direct impact on the quality of life of all Americans. Courses on state and urban government, public policy, administrative law, and public administration are especially valuable. Quantitative and statistical skills developed in these courses and applied in the internships many of our students do provide a powerful combination.

Poli Sci majors go on to work in a wide range of International careers, in business, Foreign Service, and non-governmental organizations. Political Science offers a wide variety of courses in comparative politics, international relations and organizations, public policy, political development, and interest group politics. These courses in combination with economics, statistics, computer science, and international trade.

Poli Sci majors pursue careers in campaign management, political polling, national political committees, and consulting. They will have taken multiple courses in the American political system, comparative political parties, elections, public opinion, and voting behavior; as well as committing themselves to developing their writing and data analysis. There are over half a million campaigns in the United States annually, and while entry level jobs have long hours, low pay, and enormous demands, they are places where you can 'cut your political teeth'. Local campaigns lead to statewide or national campaigns, and then perhaps to consulting and polling if that strikes your interest.

Poli Sci majors have also traditionally gone into law. Some lawyers are litigators while others are employed by corporations, government, and other organizations. Political Science track fits nicely for students seeking law degrees as official credentials to 'practice law' and those students who seek a law degree as an additional 'tool' to make positive impacts in their professional areas of interest. Some individuals with legal training work in other areas such as corporate or public management. The department offers a wide variety of political theory, constitutional law, and public policy courses that will help you explore the interaction between law, politics, and society.

\section*{HOW TO GET IN}

Students in the College of Letters \& Science can declare Political Science by completing a form on the department website (https://polisci.wisc.edu/ advising-and-major-information/).

Students in other schools and colleges interested in adding the Political Science major to their primary degree program need an online form signed by the Political Science advisor in order to obtain permission from their home school/college to add the additional major.

Students declared in the Political Science certificate may not be declared in the Political Science major at the same time. Students who do wish to declare this major must first cancel their declaration in the certificate.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic
values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Mathematics & Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCl and STAT subjects counts toward this requirement. \\
\hline \begin{tabular}{l}
Foreign \\
Language
\end{tabular} & Complete the third unit of a foreign language. \\
\hline L\&S Breadth & \begin{tabular}{l}
Complete: \\
- 12 credits of Humanities, which must include at least 6 credits of Literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
\end{tabular} \\
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced Coursework & Complete at least 60 credits at the Intermediate or Advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
Complete both: \\
- 30 credits in residence, overall, and \\
- 30 credits in residence after the 86th credit.
\end{tabular} \\
\hline
\end{tabular}
\begin{tabular}{ll} 
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

30 credits are required in the following areas:

\section*{ELECTIVES}

Additional POLI SCI courses to attain 30 credits in the major. \({ }^{2}\)

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all POLI SCI courses and courses that count toward the major
- 2.000 GPA on 15 upper-level credits in the major, taken in residence \({ }^{3}\)
- 15 credits in POLI SCI, taken on campus

\section*{HONORS IN THE MAJOR}

To declare Honors in the Major, students must have at least one POLI SCI course for Honors, at least a 3.300 University GPA, and meet with the major advisor to discuss the requirements.

To earn Honors in the Major, students must satisfy the requirements for the major (above) and these additional requirements:
- Earn a 3.300 or higher University GPA
- Earn 3.500 GPA or higher in all POLI SCI courses
- Complete at least 15 credits in POLI SCI for Honors to include: \({ }^{4}\)
Code Title Credits

Complete one of these Thesis sequences:
\begin{tabular}{ll}

\section*{FOOTNOTES}

1
Courses may only meet one Distribution area. A course may meet both a Distribution and the Research Methods requirement, but will only be applied once toward the 30 credits required in the major.

\section*{2}

No more than 6 total credits of Directed Study
(POLI SCI 199, POLI SCI 698, POLI SCI 699) and Internship (POLI SCI 315) may count in the major.
3
POLI SCI courses numbered 300 and higher count as upper-level in the major.

4
A grade of B or higher is required to earn Honors credit.

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Total Degree & \begin{tabular}{l} 
To receive a bachelor's degree from UW-Madison, \\
students must earn a minimum of 120 degree credits. \\
The requirements for some programs may exceed 120 \\
degree credits. Students should consult with their college \\
or department advisor for information on specific credit \\
requirements.
\end{tabular} \\
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence"
\end{tabular} \\
& \begin{tabular}{l} 
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l}

point average specified by the school, college, or academic
\end{tabular} \\
& \begin{tabular}{l} 
program to remain in good academic standing. Students
\end{tabular} \\
whose academic performance drops below these minimum
\end{tabular}

\section*{LEARNING OUTCOMES}
1. Develop an understanding of and appreciation for the methods and approaches of diverse subfields in Political Science--\#American Politics, Comparative Politics, International Relations, and Political Theory--\#and their relevance to important theoretical and pragmatic questions.
2. Analyze different forms and practices of governance both democratic and non\#democratic.
3. Argue effectively and defend propositions with intellectual integrity, while considering a range of alternative points of view and evidence.
4. Analyze relations among individuals, civil society, political institutions, and states.
5. Analyze the motivations and consequences of political decision\# making and activities.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}

\hline
\end{tabular}

\section*{Total Credits 120}

1
Students wishing to write a senior thesis (with or without Honors) should apply in the spring of their third year.

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

Students planning to graduate within three years with a Political Science major should enter the University with a minimum of 18 advanced standing credits, and have satisfied the following requirements with course credit or via placement examination:
- Communication Part A
- Quantitative Reasoning Part A
- 18 credits of any elective coursework
- 3-4 units of foreign language

Students missing one or more of these requirements upon entering the University should talk to their advisor about completing coursework over Summer terms to stay on track for a three year timeline.

\section*{Total Credits 101-102}

1
Students wishing to write a senior thesis (with or without Honors) should apply in the spring of their second year.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

The Department of Political Science has academic advisors who are available to meet with you to offer guidance on:
- Course selection
- Program planning
- Internship opportunities
- Study abroad programs
- Scholarship opportunities
- Student research interests
- Transfer and study abroad credits

Information about scheduling appointments can be found here (https:// polisci.wisc.edu/advising-and-major-information/\#advising). Please note
that no advising appointments are scheduled via email.

\section*{ENROLLMENT INFORMATION}

Political science majors who wish to enroll in the following course(s) must obtain prior consent/authorization:
- Directed Study
- Thesis
- Proseminars (varies by specific course; check footnotes in the class schedule)
- Specific Topic
- Other advanced-level coursework with consent of the instructor in lieu of other required courses

Information and course descriptions are posted on the department website prior to each enrollment period. POLI SCI 315 Legislative Internship is available by application only. Specific deadlines will be announced each semester. Students with a classification making them ineligible for certain courses due to retroactive or AP credits may see the instructor for possible permission to enroll on a space available basis. Students who wish to enroll in a course that is closed may use the online wait list available through the Student Center in MyUW. The number of
credits for variable credit courses is determined by course format and contact periods for a specific semester as noted in the class schedule. For graduate programs, see the Graduate section of this Guide.

\section*{CAREER ADVISING}

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Please see the Faculty (https://polisci.wisc.edu/faculty-2/) and Administration and Staff (https://polisci.wisc.edu/administration-staff/) sections of the Political Science website.

\section*{POLITICAL SCIENCE, CERTIFICATE}

There are many definitions of political science. But whether a definition focuses on the analysis of governmental structures, or influences on voter choice, or the relationship between national governments, or the best form of government, at base, political science is about the systematic study of power. Whether power is exercised formally, as is the case between government and the individual, or informally, as is the case between individuals, it is the systematic study of power relationships that provides the subject matter for the discipline. Students who pursue a certificate in political science obtain not only an understanding of the
workings of government, but they also develop important skills in critical thinking and analysis. These skills make them ideal candidates for careers in law; in government at the state, national, and international levels; in business; in journalism; and in politics.

\section*{HOW TO GET IN}

\section*{DECLARING THE CERTIFICATE}

There are no pre-requisites for declaring the Political Science certificate Students can declare at any time on the our website (https:// polisci.wisc.edu/politicalsciencecertificate/\#requirements-anddeclaration). Political science majors are not eligible to declare the Political Science certificate.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

Only 4 credits of Introductory requirement coursework will count in the certificate. Students must take at least one 3 credit Reading and Writing in Political Science course. Students may take more than one Reading and Writing in Political Science course to meet the certificate requirements; additional Reading and Writing in Political Science courses after the first count toward the required Intermediate and Advanced level Elective courses.
\begin{tabular}{|c|c|c|}

\end{tabular}

Total Credits

\section*{RESIDENCE AND QUALITY OF WORK}
- Minimum 2.000 GPA in all certificate courses
- At least 12 certificate credits must be completed on campus

\section*{CERTIFICATE COMPLETION REQUIREMENT}

This undergraduate certificate must be completed concurrently with the student's undergraduate degree. Students cannot delay degree completion to complete the certificate.

\section*{LEARNING OUTCOMES}
1. Develop an understanding of and appreciation for the methods and approaches in Political Science and their relevance to important theoretical and pragmatic questions.
2. Analyze different forms and practices of governance both democratic and non\#democratic.
3. Argue effectively and defend propositions with intellectual integrity, while considering a range of alternative points of view and evidence.
4. Analyze relations among individuals, civil society, political institutions, and states.
5. Analyze the motivations and consequences of political decision\# making and activities.

\section*{ADVISING AND CAREERS}

\begin{abstract}
ADVISING
Students who are declared or interested in the political science certificate have numerous advising resources available to them. The political science advising team is composed of professional and peer advisors who are excited to talk with students about everything from academic planning to professional development for future careers. Information on the political advising team, how to contact an advisor and how to schedule an appointment hours can be found on this website (https://polisci.wisc.edu/ politicalsciencecertificate/).
\end{abstract}

\section*{INTERNSHIPS}

The Department of Political Science recognizes the importance of internships in helping students develop professional skills and explore potential career paths. Positions can vary depending on availability and students' interests, but recent sponsors have included the WI State Legislature, the Office of the Governor, Sierra Club, and numerous non-profit, media, lobbyist and policy organizations in Wisconsin and throughout the country. Please see our internship board (https:// polisci.wisc.edu/internship-board/) for examples of the wide array of opportunities. Political Science certificate students can also get academic credit in conjunction with an internship by taking Poli Sci 315.

\section*{ALUMNI MENTORING}

Like internships, networking can be a valuable tool in opening professional doors and learning more about the professional value of the political certificate. The department often matches students with alumni mentors drawn from our Board of Visitors (https://polisci.wisc.edu/board-ofvisitors/) and other graduates who can help them get started building a professional network, answer questions about a specific field, provide guidance in applying for jobs or preparing for interviews, and provide general career advice.

\section*{PSYCHOLOGY}

The Psychology major is one of the largest majors in the College of Letters \& Science, focusing on several areas in the field of Psychological Science: biological, clinical, cognition \& cognitive neuroscience, perception, developmental, and social \& personality.

The mission of the undergraduate program in psychology is to provide students with opportunities to:
- learn about the multiple content areas of scientific psychology
- develop the ability to think critically and quantitatively
- enhance communication skills in the classroom and in writing
- prepare for the most rigorous graduate and professional programs
- apply the science of psychology to the well-being of citizens of Wisconsin and the global community

Some students will go to graduate school and become the next generation of psychological scientists and educators who will create and disseminate new knowledge. Others will choose careers in other areas, including but not limited to business, medicine, law, education, and counseling. Through its strong interdisciplinary connections with the natural sciences, social sciences, humanities, and medical sciences, scientific psychology is positioned well to influence critical issues for society. Because all courses in psychology emphasize critical thinking and the analysis of research, the Undergraduate Program prepares students to take on the challenges of and fully participate in an increasingly complex, multicultural world.

\section*{DEGREES/MAJORS/CERTIFICATES}

Associate Professors: Green, Lupyan, Saalmann, Walsh
Assistant Professors: Austerweil, Li, Schloss, Ward
Instructional Staff: Addington, Caldwell, Coffey, Gallimore, Henriques, Jones, Konz, Reinholtz, Van Rybroek, Winston

\section*{PSYCHOLOGY, B.A.}

The Psychology major is one of the largest majors in the College of Letters \& Science, focusing on several areas in the field of Psychological Science: biological, clinical, cognition \& cognitive neuroscience, perception, developmental, and social \& personality.

The mission of the undergraduate program in psychology is to provide students with opportunities to:
- learn about the multiple content areas of scientific psychology
- develop the ability to think critically and quantitatively
- enhance communication skills in the classroom and in writing
- prepare for the most rigorous graduate and professional programs
- apply the science of psychology to the well-being of citizens of Wisconsin and the global community

Some students will go to graduate school and become the next generation of psychological scientists and educators who will create and disseminate new knowledge. Others will choose careers in other areas, including but not limited to business, medicine, law, education, and counseling. Through its strong interdisciplinary connections with the natural sciences, social sciences, humanities, and medical sciences, scientific psychology is positioned well to influence critical issues for society. Because all courses in psychology emphasize critical thinking and the analysis of research, the Undergraduate Program prepares students to take on the challenges of and fully participate in an increasingly complex, multicultural world.

\section*{HOW TO GET IN}

Students who successfully complete PSYCH 202 (or equivalent) with a grade of \(C\) or better are eligible to declare the major. \({ }^{1}\)

Please refer to the Department website for instructions on how to declare the major (https://psych.wisc.edu/undergraduate-program/major/ \#declare-the-major).

1
Equivalents include a score of 4 or higher on the IB Psychology exam or or a score of 4 or 5 on the AP Psychology exam.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \\ \& SCIENCE DEGREE \\ REQUIREMENTS: BACHELOR OF ARTS (B.A.)}

Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning \(A(Q R-A)\) and Quantitative Reasoning \(B(Q R-B)\) coursework.

Foreign
Language

L\&S Breadth
都
- Complete the fourth unit of a foreign language; OR
- Complete the third unit of a foreign language and the second unit of an additional foreign language.
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits. and Science Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
Major Declare and complete at least one major.
Total Credits Complete at least 120 credits.
UW-Madison • 30 credits in residence, overall; and
Experience \(\quad 30\) credits in residence after the 86 th credit.
Quality of
- 2.000 in all coursework at UW-Madison

Work • 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

The major requires the completion of the six categories below (Foundation, Biology, Breadth, Depth, Capstone and Electives) and a minimum of 30 credits in PSYCH (https://guide.wisc.edu/courses/ psych/).

\section*{FOUNDATION}

Foundation courses provide a grounding in basic psychological facts and an understanding of the methodologies used to produce those facts. Foundation courses are required with grades of C or better in each course;
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{2}{|l|}{Introductory Psychology-one course: \({ }^{1}\)} & 3-4 \\
\hline PSYCH 202 & Introduction to Psychology & \\
\hline \multicolumn{2}{|l|}{Statistics-one course:} & 3 \\
\hline PSYCH 210 & Basic Statistics for Psychology & \\
\hline STAT 302 & Accelerated Introduction to Statistical Methods & \\
\hline STAT 324 & Introductory Applied Statistics for Engineers & \\
\hline STAT 371 & Introductory Applied Statistics for the Life Sciences & \\
\hline
\end{tabular}

Research Methods-one course: 4
PSYCH 225 Research Methods

\section*{BIOLOGY}

Foundational knowledge in biology is critical to the study of psychological science and the understanding of human and animal behavior, as well as the brain sciences.

\section*{Code \\ Title \\ Credits}

Introductory Biology-complete one of three tracks: \({ }^{\mathbf{2}}\)
\begin{tabular}{llc} 
BIOLOGY/ & Animal Biology & 3 \\
ZOOLOGY 101 & & 5 \\
BIOLOGY/BOTANY/ & Introductory Biology & \\
ZOOLOGY 151 & & 6 \\
\(\left.\begin{array}{ll}\text { BIOCORE 381 } & \text { Evolution, Ecology, and Genetics } \\
\text { \& BIOCORE 383 } & \begin{array}{l}\text { and Cellular Biology }\end{array}\end{array}\right)\).
\end{tabular}

\section*{BREADTH}

Breadth courses familiarize students with the breadth of psychology in the following area groups: Biological, Clinical, Cognitive \& Perceptual Science, Development, and Social \& Personality. Complete one course from three different area groups for a total of three courses:
\begin{tabular}{llr} 
Biological & & \\
Code & Title & Credits \\
PSYCH 449 & Animal Behavior & \(3-4\) \\
PSYCH 450 & Primates and Us: Insights into \\
& Human Biology and Behavior & 3 \\
PSYCH 454 & Behavioral Neuroscience & \(3-4\) \\
PSYCH/ & Neurobiology & 3 \\
ZOOLOGY 523 & &
\end{tabular}
\begin{tabular}{llr} 
Clinical & & \\
Code & Title & Credits \\
PSYCH 401 & Psychology, Law, and Social Policy & 3 \\
PSYCH 405 & Abnormal Psychology & \(3-4\)
\end{tabular}
\begin{tabular}{llr} 
Cognitive and Perceptual Sciences & \\
Code & Title & Credits \\
PSYCH 406 & Psychology of Perception & \(3-4\) \\
PSYCH 413 & Language, Mind, and Brain & \(3-4\) \\
PSYCH 414 & Cognitive Psychology & \(3-4\)
\end{tabular}

\section*{Developmental}

Code
PSYCH/SOC 453
PSYCH \(460 \quad\) Child Development
- 3-4

Social and Personality
Code Title Credits

PSYCH 403 Psychology of Personality 3
PSYCH 428 Introduction to Cultural Psychology 3-4
PSYCH 456 Social Psychology 3-4
PSYCH/ Psychology of Women and Gender

Title
Credits
Human Sexuality 3-4

PSYCH 464 Adult Development and Aging
3

GEN\&WS 522

\section*{DEPTH}

Depth courses allow students to engage in depth with material in specific content areas in psychology. Depth courses include both a lecture component and a required discussion/lab section for all students, and they help students develop a deeper understanding of particular areas of psychology. Two courses are required:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline PSYCH 501 & Depth Topic in Social Science (multiple separate topics offered each semester) & 4 \\
\hline PSYCH 502 & Cognitive Development & 4 \\
\hline PSYCH 503 & Social Development & 4 \\
\hline PSYCH 505 & Depth Topic in Biological Science & 4 \\
\hline PSYCH 508 & Psychology of Human Emotions: From Biology to Culture & 4 \\
\hline PSYCH 510 & Critical Issues in Child Psychopathology & 4 \\
\hline PSYCH 513 & Hormones, Brain, and Behavior & 4 \\
\hline PSYCH 520 & How We Read: The Science of Reading and Its Educational Implications & 4 \\
\hline PSYCH 521 & The Structure of Human Thought: Concepts, Language and Culture & 4 \\
\hline PSYCH 525 & Cognition in Health and Society & 4 \\
\hline PSYCH 526 & The Criminal Mind: Forensic and Psychobiological Perspectives & 4 \\
\hline PSYCH 532 & Psychological Effects of the Internet & 4 \\
\hline
\end{tabular}

\section*{CAPSTONE}

Capstone courses allow students to explore current research in psychology in a seminar setting. One course is required:
Code Title Credits

PSYCH 601
\begin{tabular}{llc} 
PSYCH 602 & \begin{tabular}{l} 
Intermediate Statistics for \\
Psychology
\end{tabular} & 3 \\
\hline PSYCH 603 & Epigenetics and the Brain & 3 \\
PSYCH 606 & Hormones and Behavior & 3 \\
\hline PSYCH 607 & Introduction to Psychotherapy & 3 \\
PSYCH 612 & Neuropharmacology & 3
\end{tabular}

\section*{ELECTIVES}

In addition to completion of the courses required above, students must complete at least \(\mathbf{3}\) additional credits in PSYCH (https://guide.wisc.edu/ courses/psych/) at the 300-level and above. Students may complete any additional PSYCH course(s), including courses from: the Breadth, Depth, or Capstone areas, or directed/independent study and mentored research.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all PSYCH and major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence \({ }^{3}\)
- 15 credits in PSYCH, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may apply for Honors in the Psychology Major in consultation with the psychology undergraduate advisor(s). Decisions on admission to the Honors in the Major in Psychology program are made on a rolling basis throughout the year by a committee of psychology faculty. Overall, criteria emphasize demonstrated ability and commitment to becoming a first-rate scholar. Performance in coursework at the university, particularly Honors courses in psychology and related fields, is among the criteria for admission. Consistent with the philosophy that there is more to honors scholarship than distinguished grades, commitment to excellence in the science of psychology, evidence of broad scholarship (including mathematics and sciences), and evidence of involvement within the university and the broader community enhance students' credentials.

\section*{HONORS IN THE PSYCHOLOGY MAJOR REQUIREMENTS}

To earn Honors in the Major in Psychology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in all PSYCH and major courses
- Complete the following courses with Honors and a grade of B or higher:
- PSYCH 380 (Junior year) or two semesters of PSYCH 686 Senior Thesis Seminar in Psychology (requires Fall and Spring enrollment)
- Three Psychology Breadth and/or Depth courses OR Two Psychology Breadth and/or Depth courses and one of the following: PSYCH 210 Basic Statistics for Psychology or PSYCH 225 Research Methods
- A two-semester Senior Honors Thesis
in PSYCH 681 and PSYCH 682 for a total of 6 credits.

\section*{FOOTNOTES \\ 1 \\ A score of 4 or higher on the IB Psychology exam or a score of 4 or 5 on the AP Psychology exam. \\ 2}

A score of 4 or better on the IB Biology exam, or a score of 4 or 5 on the AP Biology exam will satisfy the Introductory Biology requirement.
3
PSYCH 300-699 are upper-level in the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

\author{
Total Degree
}

To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency
Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic
program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Gain an appreciation for the contributions that psychology is making to our understanding of human and animal behavior.
2. Learn to analyze and construct arguments, define and solve problems, and understand and apply scientific reasoning.
3. Learn to communicate their ideas in a clear, organized, and compelling way.
4. Gain a specific understanding of how to use data and research methodology in their critical thinking.
5. Acquire an appreciation of and respect for individual differences and diversity of experiences and background.
6. Acquire the statistical and research skills used in the behavioral sciences.
7. Have the opportunity to evaluate the diverse professional opportunities in psychology.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based
on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{|c|c|c|}

1
Other courses satisfy the Biology requirement for this major. Consult the Requirements page and adjust your plan accordingly.

\section*{2}

Or accepted Statistics course (STAT 302, STAT 324, or STAT 371); We recommend a Psych Breadth course before completing the statistics requirement.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

All current UW-Madison undergraduate students interested in the psychology major are welcome to schedule an advising appointment with a psychology advisor. Advising appointments can be made through the Starfish scheduling tool. Please visit psych.wisc.edu (http://psych.wisc.edu/) -> undergraduate program -> schedule an advising appointment.

3 For more information about psychology advising visit psych.wisc.edu (http://psych.wisc.edu/) -> undergraduate program - > advising.

Are you a prospective student? The Department of Psychology welcomes prospective students to attend our Information Sessions held throughout the year. Please visit the Office of Admissions' Visit Bucky website (https://www.admissions.wisc.edu/visitbucky/) for information on dates and times of our Psychology Major Information Sessions.

\section*{CAREERS}

Students who major in Psychology enter a wide variety of careers, both with and without education beyond a Bachelor's degree. The American Psychological Association (APA) with the Center for Workforce Studies (CWS) has recent statistics on What do you do with a Psychology degree? CWS Data Tool: Careers in Psychology (https://www.apa.org/workforce/ data-tools/careers-psychology/).

There are several campus resources to guide students in their career search. Undecided students who are unsure about their desired major/ career are encouraged to visit the Career Exploration Center (https:// cec.ccas.wisc.edu/). The SuccessWorks at the College of Letters \& Science (https://successworks.wisc.edu/) offers a variety of opportunities ranging from career assessment, resume writing, interviewing techniques, internships, graduate school, and more.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{FACULTY AND INSTRUCTIONAL STAFF}

Professors: Berridge (chair), Abramson, Alibali, Auger, Bennett, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Goldsmith, Gooding, Harackiewicz, Hyde, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Ryff, Saffran, Seidenberg, Shutts

Associate Professors: Green, Lupyan, Saalmann, Walsh
Assistant Professors: Austerweil, Li, Schloss, Ward
Instructional Staff: Addington, Caldwell, Coffey, Gallimore, Henriques, Jones, Konz, Reinholtz, Van Rybroek, Winston

\section*{PSYCHOLOGY, B.S.}

The Psychology major is one of the largest majors in the College of Letters \& Science, focusing on several areas in the field of Psychological Science: biological, clinical, cognition \& cognitive neuroscience, perception, developmental, and social \& personality.

The mission of the undergraduate program in psychology is to provide students with opportunities to:
- learn about the multiple content areas of scientific psychology
- develop the ability to think critically and quantitatively
- enhance communication skills in the classroom and in writing
- prepare for the most rigorous graduate and professional programs
- apply the science of psychology to the well-being of citizens of Wisconsin and the global community

Some students will go to graduate school and become the next generation of psychological scientists and educators who will create and disseminate new knowledge. Others will choose careers in other areas, including but not limited to business, medicine, law, education, and counseling. Through its strong interdisciplinary connections with the natural sciences, social sciences, humanities, and medical sciences, scientific psychology is positioned well to influence critical issues for society. Because all courses in psychology emphasize critical thinking and the analysis of research, the

Undergraduate Program prepares students to take on the challenges of and fully participate in an increasingly complex, multicultural world.

\section*{HOW TO GET IN}

Students who successfully complete PSYCH 202 (or equivalent) with a grade of \(C\) or better are eligible to declare the major. \({ }^{1}\)

Please refer to the Department website for instructions on how to declare the major (https://psych.wisc.edu/undergraduate-program/major/ \#declare-the-major).

1
Equivalents include a score of 4 or higher on the IB Psychology exam or or a score of 4 or 5 on the AP Psychology exam.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education - Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of 3+ credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCl and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline Foreign & Complete the third unit of a foreign language. \\
Language
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

The major requires the completion of the six categories below (Foundation, Biology, Breadth, Depth, Capstone and Electives) and a minimum of 30 credits in PSYCH (https://guide.wisc.edu/courses/ psych/).

\section*{FOUNDATION}

Foundation courses provide a grounding in basic psychological facts and an understanding of the methodologies used to produce those
facts. Foundation courses are required with grades of C or better in each course;
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{2}{|l|}{Introductory Psychology-one course: \({ }^{1}\)} & 3-4 \\
\hline PSYCH 202 & Introduction to Psychology & \\
\hline Statistics-on & & 3 \\
\hline PSYCH 210 & Basic Statistics for Psychology & \\
\hline STAT 302 & Accelerated Introduction to Statistical Methods & \\
\hline STAT 324 & Introductory Applied Statistics for Engineers & \\
\hline
\end{tabular}

STAT 371 Introductory Applied Statistics for the Life Sciences

Research Methods-one course:

\section*{PSYCH 225 Research Methods}

\section*{BIOLOGY}

Foundational knowledge in biology is critical to the study of psychological science and the understanding of human and animal behavior, as well as the brain sciences.

Code Title Credits
Introductory Biology-complete one of three tracks: \({ }^{2}\)
BIOLOGY/ Animal Biology 3

ZOOLOGY 101
BIOLOGY/BOTANY/ Introductory Biology
ZOOLOGY 151
BIOCORE 381 Evolution, Ecology, and Genetics 6
\& BIOCORE 383 and Cellular Biology

\section*{BREADTH}

Breadth courses familiarize students with the breadth of psychology in the following area groups: Biological, Clinical, Cognitive \& Perceptual Science, Development, and Social \& Personality. Complete one course from three different area groups for a total of three courses:

\section*{Biological}
\begin{tabular}{llr} 
Code & Title & Credits \\
PSYCH 449 & Animal Behavior & \(3-4\) \\
PSYCH 450 & Primates and Us: Insights into & 3 \\
& Human Biology and Behavior & \\
PSYCH 454 & Behavioral Neuroscience & \(3-4\) \\
PSYCH/ & Neurobiology & 3 \\
ZOOLOGY 523 & &
\end{tabular}

\section*{Clinical}
\begin{tabular}{llr} 
Code & Title & Credits \\
PSYCH 401 & Psychology, Law, and Social Policy & 3 \\
PSYCH 405 & Abnormal Psychology & \(3-4\)
\end{tabular}

\section*{Cognitive and Perceptual Sciences}
\begin{tabular}{llr} 
Code & Title & Credits \\
PSYCH 406 & Psychology of Perception & \(3-4\) \\
PSYCH 413 & Language, Mind, and Brain & \(3-4\) \\
PSYCH 414 & Cognitive Psychology & \(3-4\)
\end{tabular}

\section*{Developmental}
Code Title Credits
PSYCH/SOC 453 Human Sexuality 4
PSYCH 460 Child Development 3-4
PSYCH 464 Adult Development and Aging 3
\begin{tabular}{llr} 
Social and Personality & Credits \\
Code & Title & 3 \\
PSYCH 403 & Psychology of Personality & \(3-4\) \\
PSYCH 428 & Introduction to Cultural Psychology & \(3-4\)
\end{tabular}
PSYCH/ Psychology of Women and Gender
GEN\&WS \(522 \quad 3\)
DEPTH
Depth courses allow students to engage in depth with material in specific
content areas in psychology. Depth courses include both a lecture
component and a required discussion/lab section for all students, and
they help students develop a deeper understanding of particular areas of
psychology. Two courses are required:
psychology. Two courses are required:
\begin{tabular}{llr} 
Code & Title & Credits \\
PSYCH 501 & \begin{tabular}{l} 
Depth Topic in Social Science \\
(multiple separate topics offered \\
each semester)
\end{tabular} & 4 \\
& Cognitive Development & 4 \\
PSYCH 502 & Social Development & 4 \\
PSYCH 503 & Depth Topic in Biological Science & 4 \\
PSYCH 505 & \begin{tabular}{l} 
Psychology of Human Emotions: \\
PSYCH 508 \\
\\
From Biology to Culture
\end{tabular} & 4 \\
PSYCH 510 & \begin{tabular}{l} 
Critical Issues in Child
\end{tabular} \\
\hline Psychopathology
\end{tabular}

\section*{CAPSTONE}

Capstone courses allow students to explore current research in psychology in a seminar setting. One course is required:
\begin{tabular}{llr} 
Code & Title & Credits \\
PSYCH 601 & \begin{tabular}{l} 
Current Topics in Psychology (many \\
separate topics each semester)
\end{tabular} & 3 \\
PSYCH 602 & \begin{tabular}{l} 
Intermediate Statistics for \\
Psychology
\end{tabular} & 3 \\
PSYCH 603 & Epigenetics and the Brain & 3 \\
PSYCH 606 & Hormones and Behavior & 3 \\
PSYCH 607 & Introduction to Psychotherapy & 3 \\
PSYCH 612 & Neuropharmacology & 3
\end{tabular}

\section*{ELECTIVES}

In addition to completion of the courses required above, students must complete at least \(\mathbf{3}\) additional credits in PSYCH (https://guide.wisc.edu/ courses/psych/) at the 300-level and above. Students may complete any additional PSYCH course(s), including courses from: the Breadth, Depth, or Capstone areas, or directed/independent study and mentored research.

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all PSYCH and major courses
- 2.000 GPA on 15 upper-level major credits, taken in residence \({ }^{3}\)
- 15 credits in PSYCH, taken on the UW-Madison campus

\section*{HONORS IN THE MAJOR}

Students may apply for Honors in the Psychology Major in consultation with the psychology undergraduate advisor(s). Decisions on admission to the Honors in the Major in Psychology program are made on a rolling basis throughout the year by a committee of psychology faculty. Overall, criteria emphasize demonstrated ability and commitment to becoming a first-rate scholar. Performance in coursework at the university, particularly Honors courses in psychology and related fields, is among the criteria for admission. Consistent with the philosophy that there is more to honors scholarship than distinguished grades, commitment to excellence in the science of psychology, evidence of broad scholarship (including mathematics and sciences), and evidence of involvement within the university and the broader community enhance students' credentials.

\section*{HONORS IN THE PSYCHOLOGY MAJOR REQUIREMENTS}

To earn Honors in the Major in Psychology, students must satisfy both the requirements for the major (above) and the following additional requirements:
- Earn a 3.300 University GPA
- Earn a 3.300 GPA in all PSYCH and major courses
- Complete the following courses with Honors and a grade of B or higher:
- PSYCH 380 (Junior year) or two semesters of PSYCH 686 Senior Thesis Seminar in Psychology (requires Fall and Spring enrollment)
- Three Psychology Breadth and/or Depth courses OR Two Psychology Breadth and/or Depth courses and one of the following: PSYCH 210 Basic Statistics for Psychology or PSYCH 225 Research Methods
- A two-semester Senior Honors Thesis in PSYCH 681 and PSYCH 682 for a total of 6 credits.

\section*{FOOTNOTES}

\footnotetext{
1
}

A score of 4 or higher on the IB Psychology exam or a score of 4 or 5 on the AP Psychology exam.

2

A score of 4 or better on the IB Biology exam, or a score of 4 or 5 on the AP Biology exam will satisfy the Introductory Biology requirement.

PSYCH 300-699 are upper-level in the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Gain an appreciation for the contributions that psychology is making to our understanding of human and animal behavior.
2. Learn to analyze and construct arguments, define and solve problems, and understand and apply scientific reasoning.
3. Learn to communicate their ideas in a clear, organized, and compelling way.
4. Gain a specific understanding of how to use data and research methodology in their critical thinking.
5. Acquire an appreciation of and respect for individual differences and diversity of experiences and background.
6. Acquire the statistical and research skills used in the behavioral sciences.
7. Have the opportunity to evaluate the diverse professional opportunities in psychology.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{First Year}
\begin{tabular}{|c|c|c|c|}

\hline
\end{tabular}

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

\begin{abstract}
All current UW-Madison undergraduate students interested in the psychology major are welcome to schedule an advising appointment with a psychology advisor. Advising appointments can be made through the Starfish scheduling tool. Please visit psych.wisc.edu (http://psych.wisc.edu/) -> undergraduate program -> schedule an advising appointment.
\end{abstract}

For more information about psychology advising visit psych.wisc.edu (http://psych.wisc.edu/) -> undergraduate program - > advising.

Are you a prospective student? The Department of Psychology welcomes prospective students to attend our Information Sessions held throughout the year. Please visit the Office of Admissions' Visit Bucky website (https://www.admissions.wisc.edu/visitbucky/) for information on dates and times of our Psychology Major Information Sessions.

\section*{CAREERS}

Students who major in Psychology enter a wide variety of careers, both with and without education beyond a Bachelor's degree. The American Psychological Association (APA) with the Center for Workforce Studies (CWS) has recent statistics on What do you do with a Psychology degree? CWS Data Tool: Careers in Psychology (https://www.apa.org/workforce/ data-tools/careers-psychology/).

There are several campus resources to guide students in their career search. Undecided students who are unsure about their desired major/ career are encouraged to visit the Career Exploration Center (https:// cec.ccas.wisc.edu/). The SuccessWorks at the College of Letters \& Science (https://successworks.wisc.edu/) offers a variety of opportunities ranging from career assessment, resume writing, interviewing techniques, internships, graduate school, and more.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.ls.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

\section*{FACULTY AND INSTRUCTIONAL STAFF}

Professors: Berridge (chair), Abramson, Alibali, Auger, Bennett, Berridge, Brauer, Coe, Curtin, Davidson, Devine, Gernsbacher, Goldsmith, Gooding, Harackiewicz, Hyde, MacDonald, Marler, Niedenthal, Pollak, Postle, Rogers, Ryff, Saffran, Seidenberg, Shutts

Assistant Professors: Austerweil, Li, Schloss, Ward
Instructional Staff: Addington, Caldwell, Coffey, Gallimore, Henriques, Jones, Konz, Reinholtz, Van Rybroek, Winston

\section*{RELIGIOUS STUDIES}

Religious studies is an academic discipline that looks at religious phenomena worldwide from a variety of angles in order to understand the many roles that religion plays in human life. To this end, students of religion learn to use a variety of theoretical analyses and methods. These include historical methods to understand how religions develop in time; critical literary methods to understand religious ideas; aesthetic methods to understand religious art and material culture; social-scientific methods to understand the relationship between religion, society and culture. Religious studies can also engage a variety of professional disciplines in analysis of how religion functions in economic, educational or political contexts, healthcare and scientific research, to name some examples.

Some ways of studying religion emphasize understanding religions on their own terms, other ways use comparative methods to discern differences and similarities between religions. Students of religion also study ways that people use religious resources to make meaning outside the boundaries of religious institutions and identities. Above all, the field of religious studies requires a willingness to explore different ways of interpreting human life and diligent effort to develop understanding of how religious ideas, symbols, rituals and spaces serve as resources for people in a variety of contexts as they make sense of and live out their lives in the world. Thus, religious studies provides important preparation for thinking, communicating and functioning professionally and personally in a complex, multidimensional world.

\section*{COURSES}

Because religious studies is an interdisciplinary program drawing upon many departments, some courses may have prerequisites in their home departments that must be fulfilled even though the prerequisites
themselves have no bearing on progress within the religious studies major. Students are responsible for ensuring that they have met all the prerequisites to enter a course before they enroll in it. The current list of courses can be found in the Religious Studies course list page (http:// guide.wisc.edu/courses/relig_st/) in the Guide.

\section*{DEGREES/MAJORS/CERTIFICATES}

\section*{COURSES}

Because religious studies is an interdisciplinary program drawing upon many departments, some courses may have prerequisites in their home departments that must be fulfilled even though the prerequisites themselves have no bearing on progress within the religious studies major. Students are responsible for ensuring that they have met all the prerequisites to enter a course before they enroll in it. The current list of courses can be found in the Religious Studies course list page (http:// guide.wisc.edu/courses/relig_st/) in the Guide.

\section*{HOW TO GET IN}

Students who wish to declare their intention to major in religious studies must meet with the undergraduate advisor during regular office hours or by making an appointment. Students are encouraged to do this early in their academic careers in order to plan for successful completion and take advantage of opportunities such as Honors, special research, internship, service learning, or study abroad opportunities in associate with the major or certificate.

Students declared in the Religious Studies certificate may not be declared in the Religious Studies major at the same time. Students who do wish to declare this major must first cancel their declaration in the certificate.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.
COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.

\begin{tabular}{|c|c|}
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced work & Complete at least 60 credits at the intermediate or advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
- 30 credits in residence, overall; and \\
- 30 credits in residence after the 86 th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Students must complete 30 credits in Religious Studies course work, to include:
\begin{tabular}{|c|c|c|}

Courses counting as upper-level in the major are any RELIG ST courses at the Intermediate or Advanced level.

\section*{HONORS IN THE MAJOR}

Students may declare Honors in the Major in consultation with the Religious Studies undergraduate advisor.

\section*{HONORS IN THE MAJOR REQUIREMENTS}

To earn Honors in the Major, students must satisfy both the requirements for the major (above) and these additional requirements:
- Minimum 3.300 University GPA
- Minimum 3.500 GPA in all RELIG ST and all major courses
- Complete 12 credits, taken for Honors, with individual grades of \(B\) or better, to include:
- RELIG ST 600
- RELIG ST 681 and RELIG ST 682 for at least 6 credits.
- 3 additional credits of Intermediate or Advanced level RELIG ST and major courses

\section*{UNIVERSITY DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Total Degree & To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements. \\
\hline Residency & Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs. \\
\hline Quality of Work & Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation. \\
\hline
\end{tabular}

\section*{EEARNING OUTCOMES}
1. Proficiency in close reading, interpretation, and written and oral analysis.
2. Proficiency in accessing, appraising, and utilizing a variety of resources and methods for research across disciplinary lines.
3. Proficiency in categorizing, analyzing and comparing diverse systems of value and belief in a variety of contexts.
4. Global and local religious literacy; identifying, evaluating, and interpreting the interrelationships and impact of religious worldviews and communities in Wisconsin, the United States and globally.
5. Ability to conduct and present sustained research on primary sources using methodologies/analysis of religious studies culminating in the senior capstone project.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Dr. Corrie Norman is the undergraduate advisor and Honors in the Major advisor. Contact her by email at cenorman@wisc.edu to meet with her. Students are encouraged to meet with Dr. Norman early in their academic careers in order to plan for successful completion and take advantage of opportunities such as Honors, special research, internship, service learning or study abroad opportunities in associate with the major or certificate.

\section*{CAREERS}

Religious studies engages a variety of professional disciplines and provides important preparation for thinking, communicating and functioning professionally in a complex, multi-dimensional world.

Religious studies sponsors workshops and other career exploration vehicles, often in collaboration with SuccessWorks at the College of Letters \& Science, to aid students in articulating the value of religious studies for their career preparation. Student-developed capstone projects in religious studies often make specific connections to experiential learning and career preparation in a range of fields. Talk with Dr. Norman about possibilities for combining internships and other forms of preprofessional training with the major and certificate.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{RELIGIOUS STUDIES, B.S.}

Religious studies is an academic discipline that looks at religious phenomena worldwide from a variety of angles in order to understand the many roles that religion plays in human life. To this end, students of religion learn to use a variety of theoretical analyses and methods. These include historical methods to understand how religions develop in time; critical literary methods to understand religious ideas; aesthetic methods to understand religious art and material culture; social-scientific methods to understand the relationship between religion, society and culture. Religious studies can also engage a variety of professional disciplines in analysis of how religion functions in economic, educational or political contexts, healthcare and scientific research, to name some examples.

Some ways of studying religion emphasize understanding religions on their own terms, other ways use comparative methods to discern differences and similarities between religions. Students of religion also study ways that people use religious resources to make meaning outside the boundaries of religious institutions and identities. Above all, the field of religious studies requires a willingness to explore different ways of interpreting human life and diligent effort to develop understanding of how religious ideas, symbols, rituals and spaces serve as resources for people in a variety of contexts as they make sense of and live out their lives in the world. Thus, religious studies provides important preparation for thinking, communicating and functioning professionally and personally in a complex, multidimensional world.

\section*{COURSES}

Because religious studies is an interdisciplinary program drawing upon many departments, some courses may have prerequisites in their home departments that must be fulfilled even though the prerequisites themselves have no bearing on progress within the religious studies major. Students are responsible for ensuring that they have met all the prerequisites to enter a course before they enroll in it. The current list of courses can be found in the Religious Studies course list page (http:// guide.wisc.edu/courses/relig_st/) in the Guide.

\section*{HOW TO GET IN}

Students who wish to declare their intention to major in religious studies must meet with the undergraduate advisor during regular office hours or by making an appointment. Students are encouraged to do this early in their academic careers in order to plan for successful completion and take advantage of opportunities such as Honors, special research, internship, service learning, or study abroad opportunities in associate with the major or certificate.

Students declared in the Religious Studies certificate may not be declared in the Religious Studies major at the same time. Students who do wish to declare this major must first cancel their declaration in the certificate.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General •Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{ll} 
Mathematics & \begin{tabular}{l} 
Complete two courses of \(3+\) credits at the Intermediate or \\
Advanced level in MATH, COMP SCI, or STAT subjects. A \\
maximum of one course in each of COMP SCI and STAT \\
subjects counts toward this requirement.
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Students must complete 30 credits in Religious Studies course work, to include:

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Dr. Corrie Norman is the undergraduate advisor and Honors in the Major advisor. Contact her by email at cenorman@wisc.edu to meet with her. Students are encouraged to meet with Dr. Norman early in their academic careers in order to plan for successful completion and take advantage of opportunities such as Honors, special research, internship, service learning or study abroad opportunities in associate with the major or certificate.

\section*{CAREERS}

Religious studies engages a variety of professional disciplines and provides important preparation for thinking, communicating and functioning professionally in a complex, multi-dimensional world.

Religious studies sponsors workshops and other career exploration vehicles, often in collaboration with SuccessWorks at the College of Letters \& Science, to aid students in articulating the value of religious studies for their career preparation. Student-developed capstone projects in religious studies often make specific connections to experiential learning and career preparation in a range of fields. Talk with Dr. Norman about possibilities for combining internships and other forms of preprofessional training with the major and certificate.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or
graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{RELIGIOUSSTUDIES, CERTIFICATE}

Religious studies is an academic discipline that looks at religious phenomena worldwide from a variety of angles in order to understand the many roles that religion plays in human life. To this end, students of
religion learn to use a variety of theoretical analyses and methods. These include historical methods to understand how religions develop in time; critical literary methods to understand religious ideas; aesthetic methods to understand religious art and material culture; social-scientific methods to understand the relationship between religion, society and culture. Religious studies can also engage a variety of professional disciplines in analysis of how religion functions in economic, educational or political contexts, healthcare and scientific research, to name some examples.

Some ways of studying religion emphasize understanding religions on their own terms, other ways use comparative methods to discern differences and similarities between religions. Students of religion also study ways that people use religious resources to make meaning outside the boundaries of religious institutions and identities. Above all, the field of religious studies requires a willingness to explore different ways of interpreting human life and diligent effort to develop understanding of how religious ideas, symbols, rituals and spaces serve as resources for people in a variety of contexts as they make sense of and live out their lives in the world. Thus, religious studies provides important preparation for thinking, communicating and functioning professionally and personally in a complex, multidimensional world.

\section*{COURSES}

Because religious studies is an interdisciplinary program drawing upon many departments, some courses may have prerequisites in their home departments that must be fulfilled even though the prerequisites themselves have no bearing on progress within the religious studies major. Students are responsible for ensuring that they have met all the prerequisites to enter a course before they enroll in it. The current list of courses can be found in the Religious Studies course list page (http:// guide.wisc.edu/courses/relig_st/) in the Guide.

\section*{HOW TO GET IN}

Students who wish to declare their intention to major or earn a certificate in religious studies must meet with the undergraduate advisor during regular office hours or by making an appointment. Students are encouraged to do this early in their academic careers in order to plan for successful completion and take advantage of opportunities such as Honors, special research, internship, service learning, or study abroad opportunities in associate with the major or certificate.

Dr. Corrie Norman is the undergraduate advisor and Honors in the Major advisor. Contact her by email at cenorman@wisc.edu.

Students pursuing the Religious Studies Certificate may not be declared in the Religious Studies major at the same time. Students who do wish to declare this major must first cancel their declaration in the Religious Studies Certificate.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE IN RELIGIOUS STUDIES}

A certificate in religious studies is available to all undergraduates and special students studying at UW-Madison. To earn the certificate, students must complete 15 credits from:
\begin{tabular}{|c|c|c|}
\hline Code & Title & Credits \\
\hline \multicolumn{2}{|l|}{Gateway Courses, Select one of the following:} & 3 \\
\hline RELIG ST 101 & Religion in Global Perspective & \\
\hline RELIG ST 102 & Exploring Religion in Sickness and Health & \\
\hline RELIG ST 103 & Exploring Religion and Sexuality & \\
\hline RELIG ST/ FOLKLORE 104 & Sacred Places and Journeys & \\
\hline RELIG ST 105 & Religion and Popular Culture-Local and Global & \\
\hline \multicolumn{3}{|l|}{Capstone Course:} \\
\hline RELIG ST 600 & Religion in Critical Perspective & 3 \\
\hline Additional Courses: & & 9 \\
\hline \multicolumn{3}{|l|}{Select an additional 9 credits in RELIG ST courses to bring total credits to at least 15 credits. To view additional courses, follow the link below to the Religious Studies course list page in the Guide.} \\
\hline \multicolumn{3}{|l|}{Religious Studies course offerings (http:// guide.wisc.edu/courses/relig_st/)} \\
\hline
\end{tabular}

Total Credits

\section*{RESIDENCE \& QUALITY OF WORK}
- Minimum 2.000 GPA in all RELIG ST and certificate courses.
- At least 9 credits for the certificate must be earned in residence.

\section*{UNDERGRADUATE/SPECIAL STUDENT CERTIFICATES}

This certificate is intended to be completed in the context of an undergraduate degree and for those seeking this certificate that is preferred. For students who have substantially completed this certificate at UW-Madison and may need one or two courses to complete the certificate, they may do so immediately after completion of the bachelor's degree by enrolling in the course as a University Special (nondegree) student. The certificate must be completed within a year of completion of the bachelor's degree. Students should keep in mind that University Special students have the last registration priority and that may limit availability of desired courses. Financial aid is not available when enrolled as a University Special student to complete an undergraduate certificate.

\section*{_EARNING OUTCOMES}
1. Proficiency in close reading, interpretation, and written and oral analysis.
2. Proficiency in accessing, appraising, and utilizing a variety of resources and methods for research across disciplinary lines.
3. Proficiency in categorizing, analyzing and comparing diverse systems of value and belief in a variety of contexts.
4. Global and local religious literacy; identifying, evaluating, and interpreting the interrelationships and impact of religious worldviews and communities in Wisconsin, the United States and globally.

\section*{SANDRA ROSENBAUM SCHOOL OF SOCIAL WORK}

Social work's special contribution rests on an established body of knowledge, values and skills pertinent to understanding human relationships and the interaction between people as individuals, in families, groups, organizations, and communities.

Undergraduates in the Sandra Rosenbaum School of Social Work receive a liberal arts education in the social and behavioral sciences and their application to human problems that prepares them to be informed citizens involved in human services or social welfare problems and policies Students take courses in a variety of social sciences to enable them to view social welfare in its broad social, economic, and political contexts.

Social work courses offer a theoretical understanding of social problems and an introduction to practice methods used by social workers. The curriculum covers areas such as aging, family and child welfare, poverty, mental health, developmental disabilities, substance use disorders, diversity, race and ethnicity, criminal justice, oppression and social, economic and environmental justice, and at-risk populations.

\section*{MISSION}

The mission of the UW-Madison Sandra Rosenbaum School of Social Work is to enhance human well-being and promote human rights
and social and economic justice to achieve an equitable, healthy, and productive society. The school aims to:
- Create, advance, strengthen, and integrate interdisciplinary knowledge for students and the profession through research, scholarship, teaching, and practice.
- Educate students to become highly-skilled, culturally-competent and ethical practitioners who will provide effective leadership for the profession of social work within the State of Wisconsin, nationally, and internationally.
- Promote change at levels ranging from the individual to national and international policy, including empowering communities and populations that are disadvantaged and developing humane service delivery systems.
- Create and disseminate knowledge regarding the prevention and amelioration of social problems.

\section*{UNDERGRADUATE DEGREE PROGRAMS}

The Sandra Rosenbaum School of Social Work offers a bachelor of social work (BSW) degree or a bachelor of arts (B.A.) or bachelor of science (B.S.) degree with a major in social welfare. The BSW and the social welfare major prepare students for further academic study or for employment in selected human service arenas. The BSW prepares students as beginning-level professional social workers. The social welfare major offers an overview of current social problems.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Social Welfare, B.A. (p. 1345)
- Social Welfare, B.S. (p. 1353)
- Social Work, BSW (p. 1360)

\section*{PEOPLE}

Professors: Lawrence M. Berger, MSW, Ph.D.; Marah H. Curtis, MSW, Ph.D.; Katherine Magnuson, Ph.D.; Stephanie A. Robert, MSW, Ph.D. (School director); Tracy Schroepfer, MSW, Ph.D., Kristen Slack, A.M., Ph.D.

Associate Professors: Lauren Bishop, Ph.D.; Tally Moses, MSW, Ph.D.; Tova Walsh, MSW, Ph.D.; Marci Ybarra, MSW, Ph.D.

Assistant Professors: Pajarita Charles, MPA, MSW, Ph.D.; Lara Gerassi, MSW, Ph.D.; LB Klein, MSW, Ph.D.; Jooyoung Kong, MSW, Ph.D.; Jessica Pac, Ph.D.; Alejandra Ros Pilarz, Ph.D.; Tawandra Rowell-Cunsolo, Ph.D.

Clinical Professor: Audrey Conn, MSSW, APSW; Ellen Smith, MSSW
Clinical Associate Professors: Laura Dresser, MSW, Ph.D.; Alice Egan, MSSW, APSW; Amanda Ngola, MSW, LCSW; Lynette Studer, MSSW, Ph.D.; Angela Willits, MSW, LCSW

A complete list of all faculty and staff in the school is available on the School of Social Work Directory (https://socwork.wisc.edu/directory/).

\section*{SOCIAL WELFARE, B.A.}

The Sandra Rosenbaum School of Social Work core mission is to enhance human well-being and promote human rights and social and economic
justice for people who are disadvantaged to achieve an equitable, healthy, and productive society. At a time when the intersection of increased attention on racial injustice and the COVID-19 pandemic, which is disproportionately impacting people of color, social work seeks to actively confront racism.

Undergraduates in the Sandra Rosenbaum School of Social Work receive a liberal arts education in the social and behavioral sciences and their application to human problems that prepares them to be informed citizens involved in human services or social welfare problems and policies. Students majoring in social welfare leverage their understanding of the historical context of social work and the systems and policies that underlie our society, and learn strategies to address social, racial, economic, and environmental justice and political contexts. Students take courses in a variety of social sciences to enable them to view social welfare in its broad social, economic, and political contexts. The social welfare major offers an overview of current social problems and prepares students for further academic study or for employment in selected human service arenas.

Social work's special contribution rests on an established body of knowledge, values, and skills pertinent to understanding human relationships and the interaction between people as individuals, in families, groups, organizations, and communities. Social work courses offer a theoretical understanding of social problems and an introduction to practice methods used by social workers. The curriculum covers areas such as aging, family and child welfare, poverty, mental health, developmental disabilities, substance use disorders, diversity, race and ethnicity, criminal justice, oppression and social, economic and environmental justice, and atrisk populations.

Graduates of the Social Welfare major go on to work at non-profit organizations, and federal, state, and local governments. Many alums go on to complete graduate degrees in Social Work, Counseling, Sociology, Psychology, Gender and Women's Studies, and Law, among other degrees in the Social Sciences and beyond.

The School's main undergraduate Guide page (https://guide.wisc.edu/ undergraduate/letters-science/social-work/) provides a broader overview of the School and its mission.

\section*{CERTIFICATE PROGRAMS}

Students in social welfare major and BSW program often choose from a variety of certificate programs (https://www.wisc.edu/academics/ certificates/) available. Common certificates include: African American Studies, American Indian Studies, Business, Chicano/a and Latino/a Studies, Criminal Justice Certificate, Gender \& Women Studies, Global Health, LGBTQ Studies, South Asian Studies and South East Asian Studies, among others.

\section*{HOW TO GET IN}

Students can declare the social welfare major as early as the freshman year as long as they are enrolled in SOC WORK 205 and/ or SOC WORK 206. To declare the major, students should make an appointment (https://socwork.wisc.edu/students/advising/) and meet with one of the social welfare academic advisors at the School of Social Work.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General - Breadth-Humanities/Literature/Arts: 6 credits
Education
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF ARTS (B.A.)
Students pursuing a bachelor of arts degree in the College of Letters \& Science must complete all of the requirements below. The College of Letters \& Science allows this major to be paired with either a bachelor of arts or a bachelor of science curriculum.

\section*{BACHELOR OF ARTS DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning B (QR-B) coursework.
Foreign - Complete the fourth unit of a foreign language; OR

Language - Complete the third unit of a foreign language and the second unit of an additional foreign language.

L\&S Breadth
- 12 credits of Humanities, which must include 6 credits of literature; and
- 12 credits of Social Science; and
- 12 credits of Natural Science, which must include one 3+ credit Biological Science course and one 3+ credit Physical Science course.

Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the intermediate or Intermediate/ advanced level.
Advanced
work
\begin{tabular}{ll} 
Major & Declare and complete at least one major. \\
Total Credits & Complete at least 120 credits. \\
UW-Madison & \(\cdot 30\) credits in residence, overall; and \\
Experience & \(\cdot 30\) credits in residence after the 86 th credit.
\end{tabular}

Quality of
Work
- 2.000 in all coursework at UW-Madison
- 2.000 in Intermediate/Advanced level coursework at UW-Madison

\section*{NON-L\&SSTUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Complete a minimum of 32 credits, to be attained via the requirements detailed below.
\begin{tabular}{llr} 
SOCIAL WELFARE POLICY \& SERVICES \\
Code & Title & \\
\begin{tabular}{ll} 
Complete both:
\end{tabular} & Credits \\
SOC WORK 205 & \begin{tabular}{l} 
Introduction to the Field of Social \\
Work
\end{tabular} & 4 \\
SOC WORK 206 & Introduction to Social Policy & 4
\end{tabular}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all SOC WORK and all major courses
- 2.000 GPA on 15 upper-level major credits taken in residence \({ }^{4}\)
- 15 credits in SOC WORK, taken on the UW-Madison campus

\section*{FOOTNOTES}

1
Social Science Concentration courses listed are a selected list of eligible courses. Consult with a Social Work advisor for other exceptions or additions to the list.

2
Students with an interest in a particular area of study may develop a plan of independent work with the assistance of an interested Social Work faculty member. They may obtain information about instructors and their areas of interest from the School of Social Work website. Consent of instructor is required for the noted course offerings in independent work. 3

No more than 3 credits of SOC WORK 699 may be used to meet this requirement.

\section*{4}

PSYCH 225, SOC/C\&E SOC 357, STAT 301, STAT 371, PSYCH 210, and SOC/C\&E SOC 360, and all SOC WORK courses designated as Intermediate or Advanced level count as upper-level in the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.

Quality of Work

Undergraduate students must maintain the minimum grade point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Identify foundational aspects of the US social welfare system and the history of the social work profession.
2. Recognize human differences and how social welfare systems interact with these differences to shape opportunities and outcomes for individuals, groups, and communities.
3. Demonstrate an ability to critically evaluate research with respect to its relevance, quality, and utility for addressing social welfare issues.
4. Synthesize and communicate knowledge relevant to social welfare issues.
5. Practice self-awareness of one's values, beliefs, and biases regarding the causes and consequences of social welfare issues.
6. Connect awareness of self, systems and social welfare knowledge to promote human dignity and justice.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Social Welfare majors are encouraged to gain social service experience through volunteer work. See the Social Work advisors or contact the Morgridge Center for Public Service (http://www.morgridge.wisc.edu/), 263-2432, for information on volunteering.

Students wishing to apply to the Bachelor of Social Work (BSW) program must do so in spring of Junior year.

\hline
\end{tabular}

\section*{Total Credits 120}

1
Note: SOC WORK 100 is a pre-major elective course that can be taken in the first year, if offered; it is not required for the major.
2
Take two Intermediate or Advanced level courses from one of the following social science departments: Afro-American Studies, American Indian Studies, Anthropology, Asian American Studies, Chicana/o and Latina/ - Studies, Economics, Gender and Women's Studies, Political Science, Psychology, Sociology.

3
SOC WORK 650 is often available in the summer. Check with an Advisor
4 for course availability and how summer courses might fit into your schedule.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students interested in either the social welfare major or bachelor of social work meet with the social work advisors to discuss degree requirements; exploring career paths; declare the major; and confer on student issues and concerns. Advisors are an excellent resource for information about campus and community services. Students should see an advisor at least once each semester to review academic progress. Advising appointments are made through the school's website (https://socwork.wisc.edu/ students/advising/\#advising-appointments). Social work faculty members are available for advice about coursework, research, and the social work profession in general.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Professors: Lawrence M. Berger, MSW, Ph.D.; Marah H. Curtis, MSW, Ph.D.; Katherine Magnuson, Ph.D.; Stephanie A. Robert, MSW, Ph.D. (School director); Tracy Schroepfer, MSW, Ph.D., Kristen Slack, A.M., Ph.D.

Associate Professors: Lauren Bishop, Ph.D.; Tally Moses, MSW, Ph.D.; Tova Walsh, MSW, Ph.D.; Marci Ybarra, MSW, Ph.D.

Assistant Professors: Pajarita Charles, MPA, MSW, Ph.D.; Lara Gerassi, MSW, Ph.D.; LB Klein, MSW, Ph.D.; Jooyoung Kong, MSW, Ph.D.; Jessica Pac, Ph.D.; Alejandra Ros Pilarz, Ph.D.; Tawandra Rowell-Cunsolo, Ph.D.

Clinical Professor: Audrey Conn, MSSW, APSW; Ellen Smith, MSSW
Clinical Associate Professors: Laura Dresser, MSW, Ph.D.; Alice Egan, MSSW, APSW; Amanda Ngola, MSW, LCSW; Lynette Studer, MSSW, Ph.D.; Angela Willits, MSW, LCSW

A complete list of all faculty and staff in the school is available on the School of Social Work Directory (https://socwork.wisc.edu/directory/).

\section*{SOCIAL WELFARE, B.S.}

The Sandra Rosenbaum School of Social Work core mission is to enhance human well-being and promote human rights and social and economic justice for people who are disadvantaged to achieve an equitable, healthy, and productive society. At a time when the intersection of increased attention on racial injustice and the COVID-19 pandemic, which is disproportionately impacting people of color, social work seeks to actively confront racism.

Undergraduates in the Sandra Rosenbaum School of Social Work receive a liberal arts education in the social and behavioral sciences and their application to human problems that prepares them to be informed citizens involved in human services or social welfare problems and policies. Students majoring in social welfare leverage their understanding of the historical context of social work and the systems and policies that underlie our society, and learn strategies to address social, racial, economic, and environmental justice and political contexts. Students take courses in a variety of social sciences to enable them to view social welfare in its broad social, economic, and political contexts. The social welfare major offers an overview of current social problems and prepares students for further academic study or for employment in selected human service arenas.

Social work's special contribution rests on an established body of knowledge, values, and skills pertinent to understanding human relationships and the interaction between people as individuals, in families, groups, organizations, and communities. Social work courses offer a theoretical understanding of social problems and an introduction to practice methods used by social workers. The curriculum covers areas such as aging, family and child welfare, poverty, mental health, developmental disabilities, substance use disorders, diversity, race and ethnicity, criminal justice, oppression and social, economic and environmental justice, and atrisk populations.

Graduates of the Social Welfare major go on to work at non-profit organizations, and federal, state, and local governments. Many alums go on to complete graduate degrees in Social Work, Counseling, Sociology, Psychology, Gender and Women's Studies, and Law, among other degrees in the Social Sciences and beyond.

The School's main undergraduate Guide page (https://guide.wisc.edu/ undergraduate/letters-science/social-work/) provides a broader overview of the School and its mission.

\section*{CERTIFICATE PROGRAMS}

Students in social welfare major and BSW program often choose from a variety of certificate programs (https://www.wisc.edu/academics/ certificates/) available. Common certificates include: African American Studies, American Indian Studies, Business, Chicano/a and Latino/a Studies, Criminal Justice Certificate, Gender \& Women Studies, Global Health, LGBTQ Studies, South Asian Studies and South East Asian Studies, among others.

\section*{HOW TO GET IN}

Students can declare the social welfare major as early as the freshman year as long as they are enrolled in SOC WORK 205 and/ or SOC WORK 206. To declare the major, students should make an appointment (https://socwork.wisc.edu/students/advising/) and meet with one of the social welfare academic advisors at the School of Social Work.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SCIENCE (B.S.)}

Students pursuing a Bachelor of Science degree in the College of Letters \& Science must complete all of the requirements below. The College of

Letters \& Science allows this major to be paired with either the Bachelor of Arts or the Bachelor of Science degree requirements.

\section*{BACHELOR OF SCIENCE DEGREE REQUIREMENTS}
\begin{tabular}{|c|c|}
\hline Mathematics & Complete two courses of \(3+\) credits at the Intermediate or Advanced level in MATH, COMP SCI, or STAT subjects. A maximum of one course in each of COMP SCI and STAT subjects counts toward this requirement. \\
\hline \begin{tabular}{l}
Foreign \\
Language
\end{tabular} & Complete the third unit of a foreign language. \\
\hline L\&S Breadth & \begin{tabular}{l}
Complete: \\
- 12 credits of Humanities, which must include at least 6 credits of Literature; and \\
- 12 credits of Social Science; and \\
- 12 credits of Natural Science, which must include 6 credits of Biological Science and 6 credits of Physical Science.
\end{tabular} \\
\hline Liberal Arts and Science Coursework & Complete at least 108 credits. \\
\hline Depth of Intermediate/ Advanced Coursework & Complete at least 60 credits at the Intermediate or Advanced level. \\
\hline Major & Declare and complete at least one major. \\
\hline Total Credits & Complete at least 120 credits. \\
\hline UW-Madison Experience & \begin{tabular}{l}
Complete both: \\
- 30 credits in residence, overall, and \\
- 30 credits in residence after the 86th credit.
\end{tabular} \\
\hline Quality of Work & \begin{tabular}{l}
- 2.000 in all coursework at UW-Madison \\
- 2.000 in Intermediate/Advanced level coursework at UW-Madison
\end{tabular} \\
\hline
\end{tabular}

\section*{NON-L\&S STUDENTS PURSUING AN L\&S MAJOR}

Non-L\&S students who have permission from their school/college to pursue an additional major within L\&S only need to fulfill the major requirements. They do not need to complete the L\&S Degree Requirements above.

\section*{REQUIREMENTS FOR THE MAJOR}

Complete a minimum of 32 credits, to be attained via the requirements detailed below.
\begin{tabular}{llr} 
SOCIAL WELFARE POLICY \& SERVICES & \\
\begin{tabular}{ll} 
Code \\
Complete both:
\end{tabular} & Title & Credits \\
SOC WORK 205 & \begin{tabular}{l} 
Introduction to the Field of Social
\end{tabular} \\
\begin{tabular}{ll} 
Work
\end{tabular} & 4 \\
SOC WORK 206 & Introduction to Social Policy & 4
\end{tabular}

\section*{SOCIAL SCIENCE CONCENTRATION}

Complete two Intermediate or Advanced level courses from one of the following social science concentration areas available from ten departments:
\begin{tabular}{|c|c|c|}
\hline \multicolumn{3}{|l|}{Afro-American Studies} \\
\hline Code & Title & Credits \\
\hline AFROAMER 303 & Blacks, Film, and Society & 3 \\
\hline AFROAMER/ HISTORY 321 & Afro-American History Since 1900 & 3-4 \\

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all SOC WORK and all major courses
- 2.000 GPA on 15 upper-level major credits taken in residence \({ }^{4}\)
- 15 credits in SOC WORK, taken on the UW-Madison campus

\section*{FOOTNOTES}

1
Social Science Concentration courses listed are a selected list of eligible courses. Consult with a Social Work advisor for other exceptions or additions to the list.

Students with an interest in a particular area of study may develop a plan of independent work with the assistance of an interested Social Work faculty member. They may obtain information about instructors and their areas of interest from the School of Social Work website. Consent of instructor is required for the noted course offerings in independent work. 3

No more than 3 credits of SOC WORK 699 may be used to meet this requirement.

\section*{4}

PSYCH 225, SOC/C\&E SOC 357, STAT 301, STAT 371, PSYCH 210, and SOC/C\&E SOC 360, and all SOC WORK courses designated as Intermediate or Advanced level count as upper-level in the major.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
Residency Degree candidates are required to earn a minimum of 30 credits in residence at UW-Madison. "In residence" means on the UW-Madison campus with an undergraduate degree classification. "In residence" credit also includes UW-Madison courses offered in distance or online formats and credits earned in UW-Madison Study Abroad/Study Away programs.
Quality of Undergraduate students must maintain the minimum grade Work point average specified by the school, college, or academic program to remain in good academic standing. Students whose academic performance drops below these minimum thresholds will be placed on academic probation.

\section*{LEARNING OUTCOMES}
1. Identify foundational aspects of the US social welfare system and the history of the social work profession.
2. Recognize human differences and how social welfare systems interact with these differences to shape opportunities and outcomes for individuals, groups, and communities.
3. Demonstrate an ability to critically evaluate research with respect to its relevance, quality, and utility for addressing social welfare issues.
4. Synthesize and communicate knowledge relevant to social welfare issues.
5. Practice self-awareness of one's values, beliefs, and biases regarding the causes and consequences of social welfare issues.
6. Connect awareness of self, systems and social welfare knowledge to promote human dignity and justice.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner,
and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Social Welfare majors are encouraged to gain social service experience through volunteer work. See the Social Work advisors or contact the Morgridge Center for Public Service (http://www.morgridge.wisc.edu/), 263-2432, for information on volunteering.

Students wishing to apply to the Bachelor of Social Work (BSW) program must do so in spring of Junior year.

\section*{Total Credits 120}

1
Note: SOC WORK 100 is a pre-major elective course that can be taken in the first year, if offered; it is not required for the major.
2
Take two Intermediate or Advanced level courses from one of the following social science departments: Afro-American Studies, American Indian Studies, Anthropology, Asian American Studies, Chicana/o and Latina/ o Studies, Economics, Gender and Women's Studies, Political Science, Psychology, Sociology.

\section*{3}

SOC WORK 650 is often available in the summer. Check with an Advisor for course availability and how summer courses might fit into your schedule.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students interested in either the social welfare major or bachelor of social work meet with the social work advisors to discuss degree requirements; exploring career paths; declare the major; and confer on student issues and concerns. Advisors are an excellent resource for information about campus and community services. Students should see an advisor at least once each semester to review academic progress. Advising appointments are made through the school's website (https://socwork.wisc.edu/ students/advising/\#advising-appointments). Social work faculty members are available for advice about coursework, research, and the social work profession in general.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students:
- INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Professors: Lawrence M. Berger, MSW, Ph.D.; Marah H. Curtis, MSW, Ph.D.; Katherine Magnuson, Ph.D.; Stephanie A. Robert, MSW, Ph.D. (School director); Tracy Schroepfer, MSW, Ph.D., Kristen Slack, A.M., Ph.D.

Associate Professors: Lauren Bishop, Ph.D.; Tally Moses, MSW, Ph.D.; Tova Walsh, MSW, Ph.D.; Marci Ybarra, MSW, Ph.D.

Assistant Professors: Pajarita Charles, MPA, MSW, Ph.D.; Lara Gerassi, MSW, Ph.D.; LB Klein, MSW, Ph.D.; Jooyoung Kong, MSW, Ph.D.; Jessica Pac, Ph.D.; Alejandra Ros Pilarz, Ph.D.; Tawandra Rowell-Cunsolo, Ph.D.

Clinical Professor: Audrey Conn, MSSW, APSW; Ellen Smith, MSSW
Clinical Associate Professors: Laura Dresser, MSW, Ph.D.; Alice Egan, MSSW, APSW; Amanda Ngola, MSW, LCSW; Lynette Studer, MSSW, Ph.D.; Angela Willits, MSW, LCSW

A complete list of all faculty and staff in the school is available on the School of Social Work Directory (https://socwork.wisc.edu/directory/).

\section*{SOCIAL WORK, BSW}

Undergraduates in the Sandra Rosenbaum School of Social Work receive a liberal arts education in the social and behavioral sciences and their application to human problems that prepares them to be informed citizens involved in human services or social welfare problems and policies. Students take courses in a variety of social sciences to enable them to view social welfare in its broad social, economic, and political contexts. The Bachelor in Social Work (BSW) Program prepares students as beginninglevel professional social workers.

Social work's special contribution rests on an established body of knowledge, values, and skills pertinent to understanding human relationships and the interaction between people as individuals, in families, groups, organizations, and communities. Social work courses offer a theoretical understanding of social problems and an introduction to practice methods used by social workers. The curriculum covers such areas
as aging, family and child welfare, poverty, mental health, developmental disabilities, substance use disorders, diversity, race and ethnicity, criminal justice, oppression and social, economic and environmental justice, and atrisk populations.

\section*{BSW PROGRAM MISSION AND GOALS}

The School's main undergraduate Guide page (https://guide.wisc.edu/ undergraduate/letters-science/social-work/) provides a broader overview of the School and its mission.

Guided by the core values of the social work profession and grounded in the generalist practice framework, the BSW program mission is to provide social work education that will nurture competent, ethical entrylevel social work professionals committed to scientific inquiry, evidencebased practice, respect for human diversity, the promotion of human and community well-being, human rights, and social, economic and environmental justice. Read more about the BSW Program Mission and Goals (https://socwork.wisc.edu/about/mission/).

\section*{CERTIFICATE PROGRAMS}

Students in social welfare major and BSW program often choose from a variety of certificate programs (https://www.wisc.edu/academics/ certificates/) available. Common certificates include: African American Studies, American Indian Studies, Business, Chicano/a and Latino/a Studies, Criminal Justice Certificate, Gender \& Women Studies, Global Health, LGBTQ Studies, South Asian Studies and South East Asian Studies, among others.

\section*{MSW ADVANCED STANDING}

BSW students may be considered for advanced standing if they apply and are accepted to one of the MSW Programs. Advanced standing qualifies a student to exempt out of all, or part, of their generalist year. For more information, please refer to the Prospective Graduate Students page (https://socwork.wisc.edu/students/prospective-graduate-students/) on the School of Social Work website.

\section*{HOW TO GET IN}

Students enter the Bachelor of Social Work program by first declaring the Social Welfare major (https://guide.wisc.edu/undergraduate/letters-science/social-work/social-welfare-ba/\#howtogetintext). Later, if a student applies to and is accepted into the Bachelor of Social Work (BSW) program, their degree program is changed to BSW. In the spring of the junior year, students apply for admission to the BSW program for their senior year.

Students in the BSW program must be in the College of Letters \& Sciences. Applicants may be enrolled in another School or College, but must transfer to Letters \& Sciences if they are accepted into the BSW program and choose to pursue the degree.

\section*{DECLARING THE SOCIAL WELFARE MAJOR}

\footnotetext{
See the Social Welfare How to Get In (https://guide.wisc.edu/ undergraduate/letters-science/social-work/social-welfare-ba/ \#howtogetintext) page for information about declaring the Social Welfare major. This must be done prior to applying to the BSW Program.
}

\section*{ADMISSION TO THE BSW PROGRAM}

In the spring of the junior year, students who meet the following eligibility criteria apply for admission to the Bachelor of Social Work (BSW) program:
- SOC WORK 205 and SOC WORK 206 completed;
- Declared in the Social Welfare major;
- Statistics completed (or concurrent enrollment) \({ }^{1}\);
- Second-semester junior status (minimum of 71 credits completed); and
- Minimum of 2.500 cumulative GPA from all colleges attended \({ }^{2}\).

Admission to the Bachelor of Social Work program is based on assessment of the applicant's background, preparation and experience for practice in the field of social work. Approximately 45 students are admitted to the BSW program each year. Applicants must refer to the School of Social Work BSW Application website (https://socwork.wisc.edu/ admissions/bsw-application/) to apply, for deadline information, and further application instructions.

\section*{NOTES}

\section*{1}

Refer to the Statistics and Research list in the Requirements tab for eligible statistics courses.

\section*{2}

Only grades from all post-secondary institutions that have transferred credits to UW-Madison are reviewed. The credits earned at UW-Madison and those transferred to UW-Madison will be computed into the minimum 2.500 GPA required for admission using the GPA calculation method found on the back of each institution's transcript. See admissions instructions (https://socwork.wisc.edu/admissions/bsw-application/) for more details about including transcripts.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}

All undergraduate students at the University of Wisconsin-Madison are required to fulfill a minimum set of common university general education requirements to ensure that every graduate acquires the essential core of an undergraduate education. This core establishes a foundation for living a productive life, being a citizen of the world, appreciating aesthetic values, and engaging in lifelong learning in a continually changing world. Various schools and colleges will have requirements in addition to the requirements listed below. Consult your advisor for assistance, as needed. For additional information, see the university Undergraduate General Education Requirements (p. 32) section of the Guide.

General Education
- Breadth-Humanities/Literature/Arts: 6 credits
- Breadth-Natural Science: 4 to 6 credits, consisting of one 4- or 5-credit course with a laboratory component; or two courses providing a total of 6 credits
- Breadth-Social Studies: 3 credits
- Communication Part A \& Part B *
- Ethnic Studies *
- Quantitative Reasoning Part A \& Part B *
* The mortarboard symbol appears before the title of any course that fulfills one of the Communication Part A or Part B, Ethnic Studies, or Quantitative Reasoning Part A or Part B requirements.

\section*{COLLEGE OF LETTERS \& SCIENCE DEGREE REQUIREMENTS: BACHELOR OF SOCIAL WORK (BSW)}

The Sandra Rosenbaum School of Social Work is a professional school within the College of Letters \& Sciences (L\&S). The College confers the BSW degree.

Students pursuing a Bachelor of Social Work degree in the College of Letters \& Science must complete all of the requirements below. The BSW is a special degree program; it is not considered a major. The BSW degree is not available to students who intend to earn a degree outside the College of Letters \& Science.

\section*{BACHELOR OF SOCIAL WORK DEGREE REQUIREMENTS}

Mathematics Complete the University General Education Requirements for Quantitative Reasoning A (QR-A) and Quantitative Reasoning \(B\) (QR-B) coursework. Students complete Quantitative Reasoning B within the requirements of the BSW degree program.
Language Complete either:
- the fourth unit of one language; or
- the complete the third unit of one language and the second unit of one additional language.
Breadth in the Complete:
Degree \(\quad 12\) credits of Humanities, including at least 6 credits of Literature breadth; and
- 12 credits of Social Science breadth; and
- 12 credits of Natural Science breadth, which must include one 3+ credit course in Biological Science breadth and one \(3+\) credit course in Physical Science breadth.
Ethnic Complete at least 6 credits of coursework with the Ethnic Studies Studies designation.
Liberal Arts Complete at least 108 credits.
and Science
Coursework
Depth of Complete at least 60 credits at the Intermediate or
Intermediate/ Advanced level.
Advanced
Coursework
Major
Gain admission to and complete the Bachelor of Social Work degree program.
\begin{tabular}{ll}
\hline Total Credits & Complete at least 120 credits. \\
\begin{tabular}{ll} 
UW-Madison & Complete both: \\
Experience & \(\cdot 30\) credits in residence, overall; and \\
& \(\cdot 30\) credits in residence after the 86 th credit. \\
Quality of & \(\cdot 2.000\) in all coursework at UW-Madison \\
Work & \(\cdot 2.000\) in Intermediate/Advanced level coursework at \\
& UW-Madison
\end{tabular}
\end{tabular}

\section*{REQUIREMENTS FOR THE PROGRAM}

Complete a minimum of 47 credits, to be attained via the requirements detailed below.

\section*{SOCIAL WELFARE POLICY \& SERVICES}
Code Title Credits

\section*{Complete both:}

\section*{RESIDENCE AND QUALITY OF WORK}
- 2.000 GPA in all SOC WORK courses and all major courses
- Minimum 2.000 GPA on 15 upper-level major credits, taken in residence \({ }^{4}\)
- 15 credits in SOC WORK, taken on campus

\section*{FOOTNOTES}

1
Social Science Concentration courses listed are a selected list of eligible courses. Consult with a Social Work advisor for other exceptions or additions to the list.

2
BSW students take two semesters (16 hours per week-256 hours/ semester) of field education during their senior year (SOC WORK 400 fall semester, SOC WORK 401 spring semester).

\section*{3}

Students with an interest in a particular area of study may develop a plan of independent work with the assistance of an interested Social Work faculty member. They may obtain information about instructors and their areas of interest from the School of Social Work website (https:// socwork.wisc.edu/directory/). Consent of instructor is required for the noted course offerings in independent work.
4
PSYCH 225, SOC/C\&E SOC 357, STAT 301, STAT 371, PSYCH 210, SOC/ C\&E SOC 360, and all SOC WORK courses designated as Intermediate or Advanced count as upper-level in the major.
5
Please refer to the Advising and Careers tab (https://guide.wisc.edu/ undergraduate/letters-science/social-work/social-work-bsw/ \#advisingandcareerstext) for more information on field education placements.

\section*{6}

No more than 3 credits of SOC WORK 699 Directed Study may be used toward fulfillment of this requirement.

\section*{UNIVERSITY DEGREE REQUIREMENTS}

Total Degree To receive a bachelor's degree from UW-Madison, students must earn a minimum of 120 degree credits. The requirements for some programs may exceed 120 degree credits. Students should consult with their college or department advisor for information on specific credit requirements.
\begin{tabular}{ll} 
Residency & \begin{tabular}{l} 
Degree candidates are required to earn a minimum of \\
30 credits in residence at UW-Madison. "In residence" \\
means on the UW-Madison campus with an undergraduate \\
degree classification. "In residence" credit also includes
\end{tabular} \\
& \begin{tabular}{l} 
UW-Madison courses offered in distance or online formats \\
and credits earned in UW-Madison Study Abroad/Study
\end{tabular} \\
Quality of & \begin{tabular}{l} 
Away programs.
\end{tabular} \\
Undergraduate students must maintain the minimum grade \\
Work & \begin{tabular}{l} 
point average specified by the school, college, or academic \\
program to remain in good academic standing. Students \\
whose academic performance drops below these minimum
\end{tabular} \\
thresholds will be placed on academic probation.
\end{tabular}

\section*{LEARNING OUTCOMES}

Engage diversity and difference in practice.
2. Advance human rights and social, economic and environmental justice.
3. Engage in practice-informed research and research informed practice.
4. Engage in policy practice.
5. Engage with individuals, families, groups, organizations, and communities.
6. Assess individuals, families, groups, organizations, and communities.
7. Intervene with individuals, families, groups, organizations, and communities.
8. Evaluate practice with individuals, families, groups, organizations, and communities.
9. Demonstrate ethical and professional behavior.

\section*{FOUR-YEAR PLAN}

\section*{SAMPLE FOUR-YEAR PLAN}

This Sample Four-Year Plan is a tool to assist students and their advisor(s). Students should use it-along with their DARS report, the Degree Planner, and Course Search \& Enroll tools-to make their own four-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests. As students become involved in athletics, honors, research, student organizations, study abroad, volunteer experiences, and/or work, they might adjust the order of their courses to accommodate these experiences. Students will likely revise their own fouryear plan several times during college.

Students wishing to apply to the Bachelor of Social Work (BSW) program (https://socwork.wisc.edu/admissions/bsw-application/) must do so in spring of Junior year.

\section*{First Year}

\hline
\end{tabular}

\section*{Total Credits 120}

Note: SOC WORK 100 is a pre-major elective course that can be taken in the first year, if offered; it is not required for the major.

1
The College encourages students to take INTER-LS 210 in their second year (or anytime); it is recommended but not required.

2

SOC WORK 640 counts towards the BSW ethnic studies requirement, providing three of the six credits needed.

\section*{3}

SOC WORK 612 and SOC WORK 650 are often available in the summer. Check with an Advisor regarding availability and how summer courses might fit into your schedule.

\section*{THREE-YEAR PLAN}

\section*{SAMPLE THREE-YEAR PLAN}

This Sample Three-Year Plan is a tool to assist students and their advisor(s). Students should use it -along with their DARS report, the Degree Planner, and Course Search \& Enroll tools - to make their own three-year plan based on their placement scores, credit for transferred courses and approved examinations, and individual interests.

Three-year plans may vary considerably from student to student, depending on their individual preparation and circumstances. Students interested in graduating in three years should meet with an advisor as early as possible to discuss feasibility, appropriate course sequencing, postgraduation plans (careers, graduate school, etc.), and opportunities they might forgo in pursuit of a three-year graduation plan.

\section*{DEPARTMENTAL EXPECTATIONS}

Students planning to graduate within three years from the Bachelor of Social Work program should enter the University with a minimum of 30 advanced standing credits, and have satisfied the following requirements with course credit or via placement examination:
- Communication Part A
- Quantitative Reasoning Part A
- 18 combined credits of Humanities, Social Science, and Natural Science coursework
- 3-4 units of language

Students wishing to apply to the Bachelor of Social Work (BSW) program (https://socwork.wisc.edu/admissions/bsw-application/) must do so in spring of Junior year.

\section*{First Year}
 in retroactive credit or to
reach 4 units)

\hline
\end{tabular}

\section*{Total Credits 90}

1
SOC WORK 640 counts towards the BSW ethnic studies requirement, providing three of the six credits needed.
2
SOC WORK 612 and SOC WORK 650 are often available in the summer. Check with an Advisor regarding availability and how summer courses might fit into your schedule.

\section*{ADVISING AND CAREERS}

\section*{ADVISING}

Students interested in either the social welfare major or bachelor of social work meet with the social work advisors to discuss degree requirements; career opportunities; complete the major declaration; and confer on student issues and concerns. Advisors are an excellent resource for information about campus and community services. Students should see an advisor at least once each semester to review academic progress. Advising appointments are made through the school's website (https:// socwork.wisc.edu/students/advising/\#advising-appointments) or by calling 263-3660. Social work faculty members are available for advice about course work, research, and the social work profession in general.

\section*{BSW ETHNIC STUDIES REQUIREMENT}

The BSW degree program requires six ethnic studies credits. The BSW degree's minimum 47 credits assumes that three credits of the six-credit ethnic studies degree requirement will be met through SOC WORK 640, with the other three credits met as part of the Social Work electives, the Social Science Concentration, or other electives.

\section*{FIELD EDUCATION}

The director of field education makes final unit placement decisions and field instructors make final agency-placement decisions.

The types of agencies working with the field education program are varied. Field units are organized around a social problem area or a field of practice. Each unit has a range of field placement agencies and settings appropriate to its theme. The emphasis for undergraduate placements
is on applying the knowledge and skills of generalist social work practice with systems of all sizes. The focus is on learning and applying analytic and interventive skills within an ethically based, problem-focused approach.

Social work students should be advised that the Wisconsin Caregiver Law requires a Wisconsin background check (Caregiver Check and Wisconsin
4 Criminal History) for all potential field-education students prior to the field placement. More information regarding this process is available at Field Education (https://socwork.wisc.edu/programs/field-education/) on the social work website.

For more information about field units, the agencies they work with, and field course expectations see the Field Education Handbook (https:// socwork.wisc.edu/students/resources/\#bsw-students). Field unit availability may vary from year to year.

\section*{L\&S CAREER RESOURCES}

Every L\&S major opens a world of possibilities. SuccessWorks (https:// successworks.wisc.edu/) at the College of Letters \& Science helps students turn the academic skills learned in their major, certificates, and other coursework into fulfilling lives after graduation, whether that means jobs, public service, graduate school or other career pursuits.

In addition to providing basic support like resume reviews and interview practice, SuccessWorks offers ways to explore interests and build career skills from their very first semester/term at UW all the way through graduation and beyond.

Students can explore careers in one-on-one advising, try out different career paths, complete internships, prepare for the job search and/or graduate school applications, and connect with supportive alumni and even employers in the fields that inspire them.
- SuccessWorks (https://careers.Is.wisc.edu/)
- Set up a career advising appointment (https://successworks.wisc.edu/ make-an-appointment/)
- Enroll in a Career Course (https://successworks.wisc.edu/careercourses/) - a great idea for first- and second-year students: - INTER-LS 210 L\&S Career Development: Taking Initiative (1 credit)
- INTER-LS 215 Communicating About Careers (3 credits, fulfills Comm B General Education Requirement)
- Learn about internships and internship funding (https:// successworks.wisc.edu/finding-a-job-or-internship/)
- INTER-LS 260 Internship in the Liberal Arts and Sciences
- Activate your Handshake account (https://successworks.wisc.edu/ handshake/) to apply for jobs and internships from 200,000+ employers recruiting UW-Madison students
- Learn about the impact SuccessWorks has on students' lives (https:// successworks.wisc.edu/about/mission/)

\section*{PEOPLE}

Professors: Lawrence M. Berger, MSW, Ph.D.; Marah H. Curtis, MSW, Ph.D.; Katherine Magnuson, Ph.D.; Stephanie A. Robert, MSW, Ph.D. (School director); Tracy Schroepfer, MSW, Ph.D., Kristen Slack, A.M., Ph.D.

\section*{CERTIFICATION/LICENSURE}

\section*{CERTIFICATION/LICENSURE}

Association of Social Work Boards (https://www.aswb.org/) BSW exam pass rates.

Many students pursuing a BSW will go on to earn a Master in Social Work, which does not require taking the bachelor's level exam. As such, the number of students taking the exam is not high enough, making it easy to identify individual results. Thus, no data is available from ASWB for UWMadison attempts.
\begin{tabular}{|ccc|}
\hline \(\begin{array}{c}\text { Year of } \\
\text { Exam }\end{array}\) & \multicolumn{2}{c|}{\(\begin{array}{c}\text { UW-Madison } \\
\text { Graduates: } \\
\text { All Attempts }\end{array}\)} \\
Nationa \\
Altempt
\end{tabular}\(]\)

\section*{PROFESSIONAL CERTIFICATION/LICENSURE DISCLOSURE (NC-SARA)}

The United States Department of Education requires institutions that provide distance education to disclose information for programs leading to professional certification or licensure about whether each program meets state educational requirements for initial licensure or certification. Following is this disclosure information for this program:

\section*{The requirements of this program meet Certification/ Licensure in the following states: \\ Illinois, Wisconsin}

\section*{The requirements of this program do not meet Certification/Licensure in the following states: \\ Not applicable}

\section*{The requirements of this program have not been determined if they meet Certification/Licensure in the following states:}

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wyoming, District of Columbia, American Samoa, Guam, Northern Mariana Islands, Puerto Rico, U.S. Virgin Islands

\section*{ACCREDITATION}

\section*{ACCREDITATION}

Council on Social Work Education (https://www.cswe.org/Accreditation/)
Accreditation status: Accredited. Next accreditation review: 2028.

\section*{SCHOOL OF JOURNALISM AND MASS COMMUNICATION}

The School of Journalism and Mass Communication (SJMC), founded in 1905, offers professional education within the context of the liberal arts degree of the College of Letters \& Science. The student earns the journalism bachelor of arts (JBA) or journalism bachelor of science (JBS) degree upon completion of the journalism program. Students are required to complete at least one of the two tracks described below.

The school seeks to provide students with both a broad cultural base for future careers and the competence to do professional work immediately after graduation. Of the 120 credits required for graduation, at least 21 must be in the social sciences/humanities-for example, economics, history, psychology, political science, sociology. In addition to skills courses, students are required to take courses in conceptual subjects such as law and history of mass communication, public opinion, international communication and communication theory. The student approaches mass communication as science, art, and service while relating it to many facets of society.

\section*{PRACTICAL EXPERIENCE: ORGANIZATIONS}

The school encourages students to gain practical experience through part-time jobs and internships. Student media include (but are not limited to) The Daily Cardinal, the Badger Herald (http:// www.badgerherald.com), WSUM radio (http://wsum.wisc.edu) and the Wisconsin Union Directorate Publications (https://union.wisc.edu/ get-involved/wud/publications/). Student organizations related to the school and major include (but are not limited to) the Public Relations Student Society of America (PRSSA), the Advertising Club, the Society of Professional Journalists (SPJ) and the Association for Women in Communication (AWC). Professionals from the media and related fields
appear often in classes and meet with students in professional student organizations.

\section*{INTERNSHIPS}

Students planning careers as media professionals are encouraged to hold one or more internships in the area of their academic specialization(s).
Declared journalism majors or prospective journalism majors with no other declared major may earn course credit for internships that relate to their professional tracks. As part of their degree programs, students may earn a maximum of 3 credits of JOURN 697 Internship during their undergraduate careers. Students may only earn one credit of JOURN 697 per semester, but may repeat the credit up to three times. Students who want to earn degree credit for their internships should consult with career advisor Pam Garcia-Rivera before they accept an internship. Students must enroll in JOURN 697 at the time they hold the internship.

JOURN 697 does not count as part of the 30 minimum journalism credits required for graduation. Students who wish to enroll in JOURN 697 should see Pam Garcia-Rivera for authorization to enroll.

\section*{JOB INFORMATION SERVICE}

The school provides a job listing service at this link (http:// journalism.wisc.edu/career-services/current-listings/) on its website; please direct questions to Pam Garcia-Rivera.

Current students and recent alumni are encouraged to meet with the undergraduate career advisor to discuss career and internship opportunities. Students may consult the school website (http:// journalism.wisc.edu/career-services/) or with the undergraduate career advisor for specific information.

\section*{DEGREES/MAJORS/CERTIFICATES}
- Digital Media Analytics, Certificate (p. 1371)
- Journalism, JBA (p. 1372)
- Journalism, JBS (p. 1376)
- Sports Communication, Certificate (p. 1380)

\section*{PEOPLE}

Professors Baughman, Blum, Downey, Drechsel, Dunwoody, Fair, Friedland, Gunther, McLeod, Mitchell, Rojas, D. Shah, H. Shah (director), Vaughn

Associate Professors Kim, Riddle, Robinson
Assistant Professors Culver, Graves, Hull, Palmer, Steenson, Wagner, Wells

\section*{DIGITAL MEDIA ANALYTICS, CERTIFICATE}

The Certificate in Digital Media Analytics is a 12 -credit program that equips students with data analysis skills and a theoretical understanding of how digital media function in contemporary society, particularly within journalism, strategic communication, and mass media contexts. This certificate program prepares students for successful careers in data journalism, data-driven strategic communication (e.g., advertising, public relations, communication campaigns), and data-informed sports communication. The program serves both Journalism majors (as an
elective sequence) and non-Journalism majors (offering training and credentials in digital media analytics to facilitate entry into media-related industries).

\section*{HOW TO GET IN}

The Certificate in Digital Media Analytics will be open to any University of Wisconsin-Madison undergraduate student with a minimum 2.000 University GPA. Students may declare or cancel the certificate at any time by filling out a declaration form available from the SJMC advisor and administrative staff.

\section*{REQUIREMENTS}

\section*{REQUIREMENTS FOR THE CERTIFICATE}

The certificate requires a minimum of 12 credits.

\section*{RESIDENCE AND QUALITY OF WORK}
- At least 7 certificate credits must be completed in residence.
- Minimum 2.000 GPA on all certificate courses.

\section*{LEARNING OUTCOMES}
1. Apply fundamental data science concepts and skills to improve the critical understanding of the roles of evolving digital media in journalism, mass communication, strategic communication, and sports communication.
2. Effectively and ethically use digital media to communicate complex data and results to a broad and diverse range of stakeholders.
3. Strategically, creatively and critically use digital media and analytics for compelling data-driven storytelling.
4. Develop an understanding of the key perspectives on the social and media contexts in which digital media operate.
5. Develop effective practices to advance inclusion and social justice in media professions and communication research.

\section*{ADVISING AND CAREERS}

Sandra Kubat is the undergraduate advisor for the Certificate in Digital Media Analytics program. Students are encouraged to meet with Sandra when they have questions about the courses and requirements for the certificate. Contact her by email at skubat@wisc.edu.

The Certificate in Digital Media Analytics encourages students to get involved in related internships and career-building courses related to digital media analytics. Students seeking assistance in securing internships and/or planning their careers should contact Pamela Garcia-Rivera, Media, Information and Communication Career Advisor. Contact her by email at pgarciariver@wisc.edu.

The student approaches mass communication as science, art, and service while relating it to many facets of society.

\section*{PRACTICAL EXPERIENCE: ORGANIZATIONS}

The school encourages students to gain practical experience through part-time jobs and internships. Student media include (but are not limited to) The Daily Cardinal, the Badger Herald (http:// www.badgerherald.com), WSUM radio (http://wsum.wisc.edu) and the Wisconsin Union Directorate Publications (https://union.wisc.edu/ get-involved/wud/publications/). Student organizations related to the school and major include (but are not limited to) the Public Relations Student Society of America (PRSSA), the Advertising Club, the Society of Professional Journalists (SPJ) and the Association for Women in Communication (AWC). Professionals from the media and related fields appear often in classes and meet with students in professional student organizations.

\section*{INTERNSHIPS}

Students planning careers as media professionals are encouraged to hold one or more internships in the area of their academic specialization(s).
Declared journalism majors or prospective Journalism majors with no other declared major may earn course credit for internships that relate to their professional tracks. As part of their degree programs, students may earn a maximum of 3 credits of JOURN 697 Internship during their undergraduate careers. Students may earn only one credit of JOURN 697 per semester, but may repeat the credit up to three times. Students who wish to earn degree credit for their internships should consult with
career advisor Pam Garcia-Rivera before they accept an internship. Students must enroll in JOURN 697 at the time they hold the internship. Students who wish to enroll in JOURN 697 should see Pam Garcia-Rivera for authorization to enroll.

\section*{HOW TO GET IN}

\section*{ADMISSION TO THE JOURNALISM DEGREE PROGRAM}

Students who wish to declare themselves as degree candidates in journalism must submit an application to the School of Journalism and Mass Communication (SJMC). Applications are accepted each fall and spring semester for admission the following semester. Prospective degree candidates must present to the school a record of academic achievement, writing ability and extracurricular participation that indicate a probability of success in some field of communication.

In order to apply for admission to the school, students must have met the following requirements:
- A minimum of 24 credits completed by the end of the semester in which they apply, including transfer credits but excluding AP and retroactive language credits.
- Completion of JOURN 201 by the end of the semester in which they apply. Students may have no more than 16 credits in Journalism courses taken at UW-Madison when applying for admission.

Transfer students must be enrolled for at least one semester at UW-Madison before applying for admission to the SJMC (their first semester may be in progress at the time they submit their application). Students transferring journalism course credit from other colleges and universities should check their record of transferred credit with the SJMC undergraduate academic advisor. The academic advisor is available for consultation at most SOAR orientation sessions for transfer students.

The number of students to be admitted in a given semester is subject to change based on the school's capacity to provide adequate access to required courses. Admissions decisions are based on the entire application, with particular emphasis on academic performance and writing ability. Specific guidelines for submitting the application portfolio are available online at this link (http://journalism.wisc.edu/undergraduate/ admissions/the-application/) or in SJMC academic advising. The academic advisor conducts one-hour information sessions for applicants each semester, with dates and times listed on the application; these sessions are highly recommended and provide more information for applicants than is possible in a one-on-one advising meeting.

After admission to the school, the student's classification will be changed to JBA or JBS to reflect this change in status.

\section*{REQUIREMENTS}

\section*{UNIVERSITY GENERAL EDUCATION REQUIREMENTS}
