Audience: Undergraduate

### **PATH-BIO 559 – VETERINARY GENERAL PATHOLOGY**

2 credits.

General mechanisms of disease at the cellular, tissue, organ, and organismal levels. Cell injury and cell death, neoplasia, inflammation, circulation, and genetics.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe gross and microscopic changes seen in tissues and organs and understand the underlying processes making them appear the way they do

Audience: Undergraduate

2. Identify tissues and organs and summarize the abnormalities present

Audience: Undergraduate

3. Interpret the gross and microscopic changes utilizing the language of pathology by formulating a morphologic diagnosis

Audience: Undergraduate

4. Apply important pathologic concepts and principles to draw conclusions about the pathogenesis of the changes they see

Audience: Undergraduate

5. Integrate clinical, historical, clinicopathologic, imaging results, and pathologic findings and draw conclusions relevant to the disease or process affecting the animal

Audience: Undergraduate

**PATH-BIO 560 – VETERINARY SYSTEMIC PATHOLOGY I**

2 credits.

Morphological manifestations of disease in animals. Diseases and disease processes will be discussed by organ system, stressing important diseases in domestic animals.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe gross and microscopic changes seen in tissues and organs and understand the underlying processes making them appear the way they do

Audience: Undergraduate

2. Identify tissues and organs and summarize the abnormalities present

Audience: Undergraduate

3. Interpret the gross and microscopic changes utilizing the language of pathology by formulating a morphologic diagnosis

Audience: Undergraduate

4. Apply important pathologic concepts and principles to draw conclusions about the pathogenesis of the changes they see

Audience: Undergraduate

5. Integrate clinical, historical, clinicopathologic, imaging results, and pathologic findings and draw conclusions relevant to the disease or process affecting the animal

Audience: Undergraduate

6. Identify what are common, usual, and typical aspects of pathology within each organ system

Audience: Undergraduate

7. Discuss common or important diseases and where appropriate identify specific etiologies associated with them

Audience: Undergraduate

**PATH-BIO 561 – VETERINARY SYSTEMIC PATHOLOGY II**

4 credits.

Morphological manifestations of disease in animals. Diseases and disease processes will be discussed by organ system, stressing important diseases in domestic animals.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe gross and microscopic changes seen in tissues and organs and understand the underlying processes making them appear the way they do

Audience: Undergraduate

2. Identify tissues and organs and summarize the abnormalities present

Audience: Undergraduate

3. Interpret the gross and microscopic changes utilizing the language of pathology by formulating a morphologic diagnosis

Audience: Undergraduate

4. Apply important pathologic concepts and principles to draw conclusions about the pathogenesis of the changes they see

Audience: Undergraduate

5. Integrate clinical, historical, clinicopathologic, imaging results, and pathologic findings and draw conclusions relevant to the disease or process affecting the animal

Audience: Undergraduate

6. Identify what are common, usual, and typical aspects of pathology within each organ system

Audience: Undergraduate

7. Discuss common or important diseases and where appropriate identify specific etiologies associated with them

Audience: Undergraduate

### PATH-BIO 562 – VETERINARY CLINICAL PATHOLOGY

4 credits.

Concepts and techniques of clinical pathology with emphasis on those procedures that are important in the diagnosis of animal diseases.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the principles for routine laboratory tests in hematology, hemostasis, urinalysis, clinical chemistry, endocrinology, and cytology, including the principles of quality control and preanalytical, analytical, and post-analytical variables that may affect test results.

Audience: Undergraduate

2. Demonstrate technical skills in preparing a diagnostic blood smear, performing a complete urinalysis and microhematocrit centrifugation for the measurement of packed cell volume and total protein by refractometry, and microscopically evaluating peripheral blood smears, urine sediments, and cytologic specimens.

Audience: Undergraduate

3. Interpret test results, including microscopic findings, by integrating information from the signalment, history, and physical examination, and organize a complete, but succinct, problem list using correct medical terminology for animal patients.

Audience: Undergraduate

4. Based on the established problem list, identify relevant differential diagnosis(es) or conclusion(s) and suggest appropriate ancillary testing to gather evidence toward a final diagnosis.

Audience: Undergraduate

5. List the essential/supporting evidence for your diagnosis/conclusion and explain the relevant pathophysiologic mechanism(s) using appropriate medical terminology.

Audience: Undergraduate

6. Support the learning of your peers while clarifying and solidifying your own knowledge by working in teams within the laboratory and on course exercises.

Audience: Undergraduate

### PATH-BIO 660 – VETERINARY NECROPSY ROTATION

2 credits.

Provides experience with necropsy procedures in all animal species and in developing interpretive skills by participating in the School of Veterinary Medicine/Veterinary Medical Teaching Hospital diagnostic anatomic pathology service under the guidance of the faculty.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Perform accurate and complete routine gross necropsy procedures, methods, and techniques.

Audience: Undergraduate

2. Describe and interpret gross morphologic lesions and clearly, concisely, and accurately record these in a written report.

Audience: Undergraduate

3. Select and sample tissues for histopathological examination using proper technique.

Audience: Undergraduate

4. Select and sample specimens for ancillary procedures (e.g., cytology, bacteriology, virology, etc.).

Audience: Undergraduate

5. Correlate pathologic changes with clinical, clinicopathological, imaging, and other findings, to better understand and explain disease pathogenesis.

Audience: Undergraduate

6. Differentiate between normal anatomy and anatomic differences (between individuals and between species), and postmortem autolysis, artifactual changes, and true pathological lesions.

Audience: Undergraduate

### PATH-BIO 675 – SPECIAL TOPICS

1-5 credits.

Topics vary.

**Requisites:** Declared in Doctor of Veterinary Medicine

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop competence and professional skills in veterinary medicine

Audience: Undergraduate

2. Explore current topics and trends in veterinary medicine

Audience: Undergraduate

3. Developing breadths of experiences related to veterinary medicine

Audience: Undergraduate

**PATH-BIO 681 – SENIOR HONORS THESIS I**

2-4 credits.

Individual research and study in pathobiological sciences for completing an honors thesis as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Articulate a clear research question or problem and formulate a hypothesis

Audience: Undergraduate

2. Demonstrate technical mastery of a research methodology

Audience: Undergraduate

3. Define and use terminology and concepts specific to their research topic

Audience: Undergraduate

4. Demonstrate competence and confidence in searching for existing research relevant to their project

Audience: Undergraduate

5. Explain how their project adds to knowledge gaps in the field

Audience: Undergraduate

6. Apply problem solving skills to address research hurdles

Audience: Undergraduate

7. Work collaboratively with other researchers in the laboratory (including other trainees, staff and the PI)

Audience: Undergraduate

8. Demonstrate growth in working autonomously over the course of the 681/682 enrollment period

Audience: Undergraduate

9. Explain their research to others in the field and to broader audiences in research presentations

Audience: Undergraduate

10. Articulate the relevance of their research to their professional future and speak to project-specific learning outcomes established with their research instructor and mentor

Audience: Undergraduate

**PATH-BIO 682 – SENIOR HONORS THESIS II**

2-4 credits.

Individual research and study in pathobiological sciences for completing an honors thesis as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate a clear research question or problem and formulate a hypothesis

Audience: Undergraduate

2. Demonstrate technical mastery of a research methodology

Audience: Undergraduate

3. Define and use terminology and concepts specific to their research topic

Audience: Undergraduate

4. Demonstrate competence and confidence in searching for existing research relevant to their project

Audience: Undergraduate

5. Explain how their project adds to knowledge gaps in the field

Audience: Undergraduate

6. Apply problem solving skills to address research hurdles

Audience: Undergraduate

7. Work collaboratively with other researchers in the laboratory (including other trainees, staff and the PI)

Audience: Undergraduate

8. Demonstrate growth in working autonomously over the course of the 681/682 enrollment period

Audience: Undergraduate

9. Explain their research to others in the field and to broader audiences in research presentations

Audience: Undergraduate

10. Articulate the relevance of their research to their professional future and speak to project-specific learning outcomes established with their research instructor and mentor

Audience: Undergraduate

### PATH-BIO 699 – DIRECTED STUDY

1-5 credits.

Projects in the laboratory and/or through library work in specific subject area under the direct guidance of faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply foundational veterinary knowledge and critical thinking to identify problems in veterinary medicine

Audience: Undergraduate

2. Develop professional veterinary medicine skills of interest by performing select techniques and procedures

Audience: Undergraduate

3. Communicate in written and/or verbal reports to veterinary colleagues and supervisors

Audience: Undergraduate

### PATH-BIO/M M & I 750 – HOST-PARASITE RELATIONSHIPS IN VERTEBRATE VIRAL DISEASE

3 credits.

Detailed study of the pathogenesis of vertebrate viral disease, stressing viral invasion, dissemination, mechanisms of disease production, immune pathology, persistence, resistance, and transmission.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of mechanisms involved in pathogenesis of viral infections

Audience: Graduate

2. Obtain experience in critically reading scientific research

Audience: Graduate

3. Enhance scientific presentation skills

Audience: Graduate

4. Design and prepare funding applications for research projects in viral pathogenesis

Audience: Graduate

### PATH-BIO 775 – EXTERNSHIP

1-24 credits.

Offers opportunities for faculty coordinated experience in the veterinary medical profession outside School of Veterinary Medicine.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand real-world applications of foundational veterinary medical knowledge and skills

Audience: Graduate

2. Apply foundational veterinary knowledge and critical thinking to solve real-world problems

Audience: Graduate

3. Perform select techniques and procedures to develop various skills professional in veterinary medicine

Audience: Graduate

### PATH-BIO 799 – PRACTICUM IN VETERINARY SCIENCE TEACHING

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

### **PATH-BIO/COMP BIO 812 – RESEARCH ETHICS AND CAREER DEVELOPMENT**

2 credits.

Provides instruction in principles and concepts of research ethics through presentations and discussion of case studies. Topics pertinent to development of a successful career in research are also included.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the complexities of ethical issues in research and the factors that can influence perceptions of ethical behavior.

Audience: Graduate

2. Develop a framework for making ethical decisions in research.

Audience: Graduate

3. Identify areas to apply best practices in responsible conduct of research to guide decision-making.

Audience: Graduate

4. Explain where to seek guidance for improving scientific communication skills.

Audience: Graduate

5. Develop the ability to effectively convey research results and findings.

Audience: Graduate

6. Recognize the importance of ethical conduct in research.

Audience: Graduate

7. Discuss the potential consequences of unethical behavior in research.

Audience: Graduate

8. Develop a sense of personal responsibility for maintaining ethical standards in research.

Audience: Graduate

9. Recognize the importance of safe research environments.

Audience: Graduate

### **PATH-BIO 930 – ADVANCED SEMINAR**

1 credit.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use mind mapping to create a hierarchal structure to contextualize the projects/aims in your thesis research and design an effective scientific presentation.

Audience: Graduate

2. Apply concepts for effective data display and presentation to create and give a clear and well-organized research seminar presentation.

Audience: Graduate

3. Prepare a graphical abstract that effectively communicates the significance, design, and take-home message of your study or proposed work.

Audience: Graduate

4. List 3 best practices for delivering an effective scientific presentation based on your peer evaluations of presentations delivered by classmates this semester.

Audience: Graduate

5. State 3 things that you do not want to do when giving a talk, based on your experience giving a presentation and your observations of the presentations by others.

Audience: Graduate

### **PATH-BIO 990 – RESEARCH**

1-12 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general pathobiological science principles

Audience: Graduate

2. Conduct independent research using a variety of approaches

Audience: Graduate

3. Think critically to address research challenges

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab

Audience: Graduate

# PATHOLOGY AND LABORATORY MEDICINE (PATH)

## PATH/PATH-BIO 210 – HIV: SEX, SOCIETY AND SCIENCE

3 credits.

HIV kills three million people per year, more than any other infectious disease. We will learn about the transmission, immunology, virology, vaccinology and societal impact of this virus. Six of the world's leading HIV scientists will give guest lectures.

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use science as a tool for understanding the world and solving problems.

Audience: Undergraduate

2. Understand how scientific data, social context, and political decisions impact prevention and treatment of infectious diseases in different community contexts.

Audience: Undergraduate

3. Identify obstacles to implementing effective disease interventions and understand ways to evaluate those interventions.

Audience: Undergraduate

4. Describe the steps of the HIV viral life cycle.

Audience: Undergraduate

5. Discuss how HIV's replication process leads to immune deficiency and AIDS.

Audience: Undergraduate

6. Describe immune responses against viral infection and list reasons why these responses fail to clear HIV infection.

Audience: Undergraduate

7. List reasons why it is challenging to cure HIV infection.

Audience: Undergraduate

8. Discuss approaches for making vaccines against other pathogens and list reasons why it is challenging to apply these approaches to HIV.

Audience: Undergraduate

9. Discuss and evaluate approaches for slowing the spread of HIV in the United States and other countries.

Audience: Undergraduate

10. Describe the processes by which HIV emerged to become a human pathogen.

Audience: Undergraduate

11. Discuss the sources of funding for the global response to HIV/AIDS and evaluate the efficacy of each in achieving its goals.

Audience: Undergraduate

12. Apply the concepts learned in relation to HIV to other emerging and re-emerging pathogens, such as Ebola virus, Zika virus, and/or SARS-CoV-2.

## PATH 399 – INDEPENDENT STUDY

1-4 credits.

Directed study projects for freshmen and sophomores.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify concepts learned in coursework begin to apply to real life situations

Audience: Undergraduate

2. Read and learn to effectively search scientific literature

Audience: Undergraduate

3. Begin to develop critical, analytical, and independent thinking skills

Audience: Undergraduate

## PATH 404 – PATHOPHYSIOLOGIC PRINCIPLES OF HUMAN DISEASES

3 credits.

Provides a basic understanding of the causes, pathophysiology, pathology and clinical manifestations of disease states from a medical perspective.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the pathophysiologic processes highlighted in the course.

Audience: Undergraduate

2. Explain how clinical manifestations, diagnosis, and prognosis of some common conditions are related to underlying pathophysiologic principles.

Audience: Undergraduate

3. Describe how treatments of some common conditions are based on these same pathophysiologic principles.

Audience: Undergraduate

4. Consider how severe consequences of diseases may be prevented by screening, early diagnosis, modification of risk factors, and mitigation of environmental/occupational exposures.

Audience: Undergraduate

5. Establish a vocabulary of medical terms used by healthcare professionals

Audience: Undergraduate

## **PATH/M&ENVTOX/PHM SCI/PHMCOL-M/POP HLTH 626 – TOXICOLOGY II**

3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.

**Requisites:** POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain and identify the effects of toxicants on specific organs within the human body

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset

Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding

Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.

Audience: Graduate

## **PATH 699 – INDEPENDENT STUDY**

1-4 credits.

Directed study projects for juniors and seniors.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations

Audience: Undergraduate

2. Read and effectively search scientific literature

Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skill

Audience: Undergraduate

**PATH 750 – CELLULAR AND MOLECULAR BIOLOGY/PATHOLOGY**

2 credits.

Emphasizes current understanding of molecular and cellular mechanisms. Wherever possible, human diseases are used to illustrate the outcome at the organismal level of defects in these mechanisms. Focuses on different cell types and how cells function. We also discuss how cells talk to themselves and each other. Topics include mechanisms of cell survival and division. Provides an overview of a broad set of cell biology topics to demonstrate the breadth and diversity of cellular functions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain basic mechanisms of cell signaling

Audience: Graduate

2. Describe how vesicles traffic inside of cells

Audience: Graduate

3. Explain the parts of the cell cycle

Audience: Graduate

4. Explain how and why a cell dies by apoptosis

Audience: Graduate

5. Define cell adhesion receptors, lipid rafts, and phosphatases and explain their role in cellular mobility

Audience: Graduate

6. Explain the role of stem cells in cancer biology

Audience: Graduate

7. Describe B and T cell development pathways and the functions of these cells

Audience: Graduate

8. Describe the roles of B and T cells in defending a host from pathogens

Audience: Graduate

**PATH 751 – BIOLOGY OF AGING**

2 credits.

Examines the molecular, cellular, physiological, and clinical aspects of aging beyond basic biology in a biomedical/clinical research setting. Aging and age-related diseases are examined via the combined expertise of basic scientists and clinicians covering a range of topics directly relevant to biology of aging research, including the clinical perspective, the research perspective, and the integration of the two.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the scope of aging research and become familiar with the numerous conditions and disorders for which age is a risk factor.

Audience: Graduate

2. Synthesize the biological and clinical aspects of diseases and disorders of aging.

Audience: Graduate

3. Integrate biology across aging diseases and conditions to identify common factors.

Audience: Graduate

4. Appreciate the novel techniques and approaches at the cutting edge of aging research.

Audience: Graduate

## **PATH 752 – CELLULAR AND MOLECULAR BIOLOGY/PATHOLOGY SEMINAR**

1 credit.

The emphasis is on our current understanding of molecular and cellular mechanisms. Wherever possible, human diseases are used to illustrate the outcome at the organismal level of defects in these mechanisms. Discussions focus on immunology and cancer biology. Topics include mechanisms of cell survival, cell division, signal transduction, gene expression, vesicular transport, autophagy and cell death. Explore a broad set of cell biology topics, in greater detail such that they will have a better understanding of the breadth and diversity of cellular functions by the end of the semester. Learn how to critically evaluate the literature and the rigor of research.

**Requisites:** Concurrent enrollment in PATH 750

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain basic mechanisms of cell signaling

Audience: Graduate

2. Describe how vesicles traffic inside of cells

Audience: Graduate

3. Explain the parts of the cell cycle

Audience: Graduate

4. Explain how and why a cell dies by apoptosis

Audience: Graduate

5. Define cell adhesion receptors, lipid rafts, and phosphatases and explain their role in cellular mobility

Audience: Graduate

6. Explain the role of stem cells in cancer biology

Audience: Graduate

7. Describe B and T cell development pathways and the functions of these cells

Audience: Graduate

8. Describe the roles of B and T cells in defending a host from pathogens

Audience: Graduate

9. Learn how to critically evaluate papers for rigor

Audience: Graduate

10. Learn how to design an experiment

Audience: Graduate

## **PATH 755 – RESPONSIBLE CONDUCT IN RESEARCH: RESEARCH ETHICS, RIGOR, REPRODUCIBILITY AND TRANSPARENCY**

2 credits.

Meets the NIH Institutional Training Grant requirements covering all ten of targeted areas in biomedical research. Subject matter incorporates the following topics for instruction: 1) Conflict of interest - personal, professional, and financial; 2) Policies regarding human subjects, and rigor and reproducibility in clinical research; 3) Policies regarding live vertebrate animal subjects, rigor and reproducibility and transparency in pre-clinical research, and safe laboratory practices; 4) Mentor and mentee responsibilities and relationships; 5) Collaborative research including collaborations with industry; 6) Peer review; 7) Data acquisition and laboratory tools (management, sharing and ownership); 8) Research misconduct and policies for handling misconduct; 9) Responsible authorship and publication; 10) The scientist as a responsible member of society, contemporary ethical issues in biomedical research, and the environmental and societal impacts of scientific research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate proficiency in the Federal, State of Wisconsin, and UW-Madison rules and regulations relevant to the performance of research in the sciences.

Audience: Graduate

2. Explain practices and approaches that can enhance the rigor and reproducibility of their work.

Audience: Graduate

3. Demonstrate problem-solving strategies and how to respond properly after witnessing research misconduct.

Audience: Graduate

**PATH 802 – HISTOPATHOLOGY FOR TRANSLATIONAL SCIENTISTS**

3 credits.

Introduces the pathogenesis of disease via integration of actual autopsy patient cases. Emphasis is placed on understanding the basic mechanisms of disease at the level of cell, organ, and body, as well as the morphologic expression patterns of selected common specific disease processes. Participate in autopsy gross organ conferences as well as microscopic review sessions. Concepts covered in lectures will be applied and reinforced in the interactive autopsy sessions. Observe at least one full autopsy, gaining a three-dimensional understanding of structure and disease.

**Requisites:** Declared in Cellular and Molecular Pathology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gain an appreciation of how disease processes directly impact patients

Audience: Graduate

2. Be able to distinguish the morphologic patterns of normal versus pathologic tissues

Audience: Graduate

3. Be familiar with the pathogenesis of selected common disease processes

Audience: Graduate

4. Recognize how basic laboratory research may be applied to specific disease processes

Audience: Graduate

**PATH 803 – PATHOGENESIS OF MAJOR HUMAN DISEASES**

3 credits.

This course will focus on disease pathogenesis and discussion of the leading disease research model. Throughout the course, we will combine expert clinicians, basic scientists, and literature review on specific major diseases.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an understanding of the basic principles of pathology (inflammation, cell death and degeneration and neoplasia).

Audience: Graduate

2. Discuss clinical features of human diseases that are major causes of global death and disability.

Audience: Graduate

3. Define pathogenesis of human diseases that are major causes of global death and disability.

Audience: Graduate

4. Discuss leading disease in vitro and in vivo research models for major human diseases.

Audience: Graduate

5. Develop an understanding of cutting-edge research techniques to study major human diseases.

Audience: Graduate

### **PATH 807 – IMMUNOPATHOLOGY: THE IMMUNE SYSTEM IN HEALTH AND DISEASE**

2 credits.

Gain fundamental knowledge of immunopathology and molecular immunology medicine, and have an in-depth research experience that combines pathobiological and translational immunology research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand the development and function of the immune response in human disease.

Audience: Graduate

2. Understand malfunctions of immune system like immunodeficiency, autoimmunity & allergies.

Audience: Graduate

3. Learn basic mechanisms by which the immune system protects against infectious disease.

Audience: Graduate

4. Understand how the immune system may be manipulated to facilitate transplantation and treat cancer.

Audience: Graduate

### **PATH 809 – MOLECULAR MECHANISMS OF DISEASE**

2 credits.

Focuses on molecular mechanisms of diseases. Course will focus on four modules: Neuroscience, cancer biology, growth factor/matrix biology, and immunology. Course will consist of a one hour lecture and a one hour group discussion.

**Requisites:** Declared in Cellular and Molecular Pathology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand how to write a proposal (Grant Workmanship).

Audience: Graduate

2. Develop the ability to critically evaluate research papers and grants (Peer Reviewing).

Audience: Graduate

3. Understand how to design an experiment to test a novel hypothesis.

Audience: Graduate

4. Understand and learn how to give a successful talk.

Audience: Graduate

### **PATH 900 – SEMINAR**

0 credits.

Weekly Seminar for graduate students, professional students, medical professionals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain overall breath of knowledge in disease pathogenesis.

Audience: Graduate

2. Provide a platform for student interaction with invited faculty from UW-Madison and other institutions.

Audience: Graduate

3. Develop skills for communicating complex ideas in a clear and understandable manner.

Audience: Graduate

### **PATH 901 – STUDENT SEMINAR / JOURNAL CLUB**

1 credit.

Review of current publications on relevant topics selected by department faculty and trainer.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop skills to discuss research progress with peer group.

Audience: Graduate

2. Develop excellent presentation skills to communicate complex ideas in a clear and understandable manner.

Audience: Graduate

3. Learn how to provide constructive feedback to strengthen peer student's presentation.

Audience: Graduate

4. Articulate research problems, potentials, and limits within the field of study.

Audience: Graduate

5. Formulate ideas, concepts, designs, and techniques beyond the current boundaries of knowledge within the chosen field of study#

Audience: Graduate

**PATH 913 – TECHNIQUES IN VIROLOGY**

4 credits.

Culture-based methods for detecting and quantifying viruses. Describe concepts such as viral load, transmissibility, tissue tropism, host immune responses, and the effectiveness of various antiviral therapies. Perform multiple techniques for working with and quantifying viruses. Compare and contrast various methods of detecting and quantifying viruses.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Demonstrate training-level-appropriate understanding of viruses and host biology.

Audience: Graduate

2. Integrate scientific evidence into clinical practice concepts.

Audience: Graduate

3. Effectively communicate basic science concepts related to infectious diseases, immunology, and virology.

Audience: Graduate

4. Demonstrate the ability to evaluate basic science and clinical literature.

Audience: Graduate

5. Develop an understanding of how basic science experiments are conceived, planned, executed, analyzed, and interpreted.

Audience: Graduate

6. Describe how viruses are propagated and quantified.

Audience: Graduate

7. Describe how viral infections are diagnosed.

Audience: Graduate

8. Describe the nuances and caveats associated with different methods of diagnosis.

Audience: Graduate

**PATH 914 – CLINICAL MICROBIOLOGY: PHENOTYPIC IDENTIFICATION OF COMMON ORGANISMS**

2 credits.

Clinical microbiology lab practice, with a focus on identification of bacteria, fungi, and parasites. Learn techniques in specimen collection, staining, and plating. Gain an understanding of culture media, incubation, isolation, and microscopic and colony characteristics.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand different ways of collecting and transporting specimens

Audience: Graduate

2. List common stains used for direct specimen examination

Audience: Graduate

3. Recall different types of culture media and their uses

Audience: Graduate

4. Explain the purpose of varying incubation conditions

Audience: Graduate

5. Recognize common Gram-positive bacteria based on phenotypic characteristics

Audience: Graduate

6. Recognize common fungi based on phenotypic characteristics

Audience: Graduate

7. Recognize common parasites based on phenotypic characteristics

Audience: Graduate

8. Recognize common Gram-negative bacteria based on phenotypic characteristics

Audience: Graduate

**PATH 915 – CLINICAL MICROBIOLOGY: OVERVIEW OF TECHNOLOGIES AND METHODOLOGIES**

2 credits.

Learn the variety of techniques, methodologies, and instrumentation used in modern clinical microbiology laboratory practice. Gain an understanding of mass spectrometry, NAAT, PCR, sequencing, antigen/antibody detection, antimicrobial susceptibility testing, point-of-care testing, and biomarkers of infection.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize microscopic and phenotypic techniques used for identification

Audience: Graduate

2. Understand MALDI-TOF MS uses, advantages, and limitations

Audience: Graduate

3. Describe NAAT technologies such as PCR and TMA

Audience: Graduate

4. Explain how DNA sequencing works and its role in diagnosis

Audience: Graduate

5. Recognize common uses for antigen and antibody tests

Audience: Graduate

6. List different methods for antimicrobial susceptibility testing

Audience: Graduate

7. Differentiate rapid and POC testing from lab-based testing

Audience: Graduate

8. Discuss methods used for public health and infection control

Audience: Graduate

**PATH 916 – CLINICAL MICROBIOLOGY: ANTIMICROBIAL RESISTANCE AND EMERGING PATHOGENS**

2 credits.

Understand the battle between humans and infectious diseases.

Learn how microbes evade the immune system and develop resistance to antibiotics. Discuss emerging pathogens and multidrug resistant organisms and the techniques used to combat them.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how microorganisms evade the immune system

Audience: Graduate

2. List major antibiotic classes and resistance mechanisms

Audience: Graduate

3. Explain the significance of ESKAPE pathogens

Audience: Graduate

4. Recognize the importance of emerging pathogens

Audience: Graduate

5. Recall techniques used to identify resistant and emerging pathogens

Audience: Graduate

6. Understand the role and antimicrobial stewardship

Audience: Graduate

7. Understand the role of infection prevention and control

Audience: Graduate

8. Explain treatment and eradication strategies

Audience: Graduate

**PATH 920 – GENERAL PATHOLOGY CLERKSHIP**

2-4 credits.

Understand the central role that diagnostic pathology and laboratory testing play in medical care in all specialties. Review your course work in anatomic and clinical Pathology and add to your fund of knowledge. Familiarize yourself with the workings of a busy diagnostic tissue laboratory. Participate in daily "clinical-pathologist" discussions concerning the effects of various pathological conditions as they relate to specific clinical problems. Understand the role of anatomic and clinical pathology as they contribute to the understanding of disease processes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the role of the pathology laboratories and pathologists in patient care

Audience: Graduate

2. Describe the specimen requirements, processing, and workup of patient samples in the pathology laboratory area in which they rotated

Audience: Graduate

3. Demonstrate increased facility with the underlying basic science knowledge required for these areas (eg histology, anatomy, molecular biology, microbiology, etc.)

Audience: Graduate

4. Independently assess patient materials and construct a differential diagnosis of the disease process involved

Audience: Graduate

5. Communicate and collaborate with consultants and/or primary clinical team and other providers to coordinate care

Audience: Graduate

6. Review, interpret and present current literature to support the diagnostic workup

Audience: Graduate

**PATH 921 – TRANSFUSION MEDICINE CUSTOMIZED**

2 credits.

Maximize preparedness for residency by correlating basic science concepts with practical decision-making in clinical transfusion medicine. Tested topics are customized based on the student's specialty interests. Topics include hemostasis, immunology of transfusions, transfusion reactions, red blood cell (RBC) antigens and antibodies, product modifications, lab tests, indications, therapeutic apheresis, blood donation, special patient populations and circumstances such as obstetrics or neonates, and massive transfusion in surgery and trauma.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the basic physiology of hemostasis and how it relates to lab testing and transfusion practice.

Audience: Graduate

2. Explain the basic immunology of red cell antigens, antibodies, and acute and delayed hemolysis.

Audience: Graduate

3. Explain the immunology of ABO blood-typing, antibody screen and identification, and direct antiglobulin test.

Audience: Graduate

4. Explain the pathophysiology and management of transfusion reactions.

Audience: Graduate

5. Explain the basic physiology of and indications for blood products and product modifications.

Audience: Graduate

6. Explain the pathophysiology and management of typical diseases treated by therapeutic apheresis.

Audience: Graduate

7. Explain the basic steps in blood donation and donor screening.

Audience: Graduate

8. Explain the pathophysiology and management of the alloimmunization of pregnancy.

Audience: Graduate

9. Explain the physiology of neonates that lead to special transfusion practices.

Audience: Graduate

10. Explain the pathophysiology of a massive transfusion and the coagulopathy of trauma.

Audience: Graduate

**PATH 922 – LABORATORY MEDICINE CUSTOMIZED**

2 credits.

Learn the basic science principles of common laboratory tests. Apply this knowledge to assignments in which you make clinical judgments and answer common patient questions about lab test interpretations. Customize the curriculum based on your specialty interests.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define and apply the concepts of sensitivity and specificity.

Audience: Graduate

2. Define and apply negative and positive predictive value. Explain how these values are influenced by the prevalence (prior probability) of disease in defined populations (Bayes theorem).

Audience: Graduate

3. Describe how reference intervals are derived and used and the different types of reference intervals including those derived from population distributions, from expert consensus recommendation, or from evidence-based determination of "threshold" values based on a test's predictive value in a clinical algorithm.

Audience: Graduate

4. Explain why 5% percent of laboratory test results from healthy individuals might fall outside a reference range.

Audience: Graduate

5. Explain the concept of variability in repeated measurements, as well as variability within and between individuals.

Audience: Graduate

6. Describe the contributors to analytical uncertainty (precision, accuracy, bias, coefficient of variation) and how the sources of variability relate to clinical interpretation of changes in test results.

Audience: Graduate

7. Discuss the consequences of ordering unnecessary testing.

Audience: Graduate

8. Explain the roles of preanalytical and postanalytical variables in affecting test results and thereby impacting patient care.

Audience: Graduate

9. List common sources of preanalytical errors.

Audience: Graduate

10. Describe the effects of blood-drawing technique on test results.

Audience: Graduate

11. Compare and contrast the use of specimen tubes with various colored tops, as well as other specimen containers, and why they cannot be used interchangeably.

Audience: Graduate

12. Describe the broad categories of situations that may result in test interference such as incomplete tube fill, hemolysis, lipemia, bilirubinemia, cross-reacting and interfering substances.

Audience: Graduate

13. List some important limitations and pitfalls of common lab tests.

Audience: Graduate

**PATH 923 – SICKLE CELL DISEASE AND PUBLIC HEALTH**

2 credits.

Patients with sickle cell disease can present to any medical specialty with manifestations or complications of the disease. Using a disease-focused biopsychosocial approach, the goal is the identification and understanding of barriers to health and the potential opportunities for improvement.

The topics surveyed include: 1) clinical review, 2) community voices, 3) diversity, equity, and inclusion, 4) practical communication skills, 5) actionable examples of quality improvement, 6) health care systems, 7) economics, 8) global health, 9) ethics, and 10) advocacy via intellectual persuasion.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the basic epidemiology, genetics, pathophysiology, diagnosis, clinical manifestations, & treatments for sickle cell disease (SCD).

Audience: Graduate

2. Explain the common stigmas and misconceptions related to SCD, race, racism, pain, and addiction as well as their impacts on health care decision-making.

Audience: Graduate

3. Explain and apply some common practical written and oral communication skills in clinical settings involving the care of individuals with SCD that maximize respect and quality.

Audience: Graduate

4. Focusing patients and populations with SCD, describe how quality improvement tools can be incorporated into the clinical and community settings and how these translate across populations

Audience: Graduate

5. Explain 4 health care systems models of SCD care & how your future practice can contribute.

Audience: Graduate

6. Explain the economic burdens of SCD, reasons why there is a shortage of hematologists, the basic economics of price controls, and different economic policy views.

Audience: Graduate

7. Explain some challenges that affect patients with SCD in different countries, reasons why these challenges exist, and different views on opportunities for improvement.

Audience: Graduate

8. Describe the application of ethical frameworks in influencing policies that impact the health of patients and populations with SCD.

Audience: Graduate

9. Frame a persuasive policy advocacy message that seeks to positively impact health outcomes for individuals with SCD.

Audience: Graduate

**PATH 924 – IMMUNOHEMATOLOGY**

2 credits.

Utilize a case-based learning approach to interpret blood bank test results such as ABO typing data, antibody screens, antibody panels, and direct antiglobulin tests. Identify antibodies to red blood cell and platelet antigens. Demystify the inner workings of the blood bank clinical laboratory. Improve your ability to understand and communicate results from the blood bank.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the basic science principles of pretransfusion testing including ABO/Rh testing, RBC antibody screen, and antibody identification.

Audience: Graduate

2. Identify RBC antibodies from an antibody panel.

Audience: Graduate

3. Demonstrate knowledge of alloimmunization of pregnancy.

Audience: Graduate

4. Demonstrate knowledge of refractoriness to platelet transfusions.

Audience: Graduate

5. Demonstrate knowledge of neonatal alloimmune thrombocytopenia.

Audience: Graduate

6. Communicate interpretations of these results to patients in layman's terms.

Audience: Graduate

**PATH 926 – PATHOLOGY: CLINICAL MICROBIOLOGY-MARSHFIELD**

2-12 credits.

Clinical elective for fourth year medical students.

**Requisites:** Declared in Medicine program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the role of the clinical laboratory and microbiology section in diagnosing infectious diseases and guiding their treatment

Audience: Graduate

2. Describe various methods for identifying infectious agents including culture, mass spectroscopy, and genetic analyses

Audience: Graduate

3. Explain the role of the microbiology laboratory in maintaining antibiotic stewardship and the importance of this endeavor in public health

Audience: Graduate

**PATH 949 – GENETICS THROUGH THE LIFE CYCLE**

4 credits.

The genome impacts human health and disease from the moment of conception throughout growth, development, and aging. This course offers a comprehensive overview of clinical laboratory testing in the fields of medical genetics and public health. Topics include how genetic testing is integrated into patient care, including prenatal genetics, newborn screening, genetic testing in children and adults, and oncology genetics. Students will develop a strong foundational knowledge of basic genetics principles, identify indications for genetic testing, interpret population screening results and the implications for public health, assess the utility of diagnostic testing, and recognize the limitations of genetic testing and clinical laboratory medicine. It is anticipated that students will incorporate these concepts, knowledge, experiences, and evidence in their future clinical practice.

**Requisites:** Declared in Medicine program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate knowledge of fundamental principles of genetics

Audience: Graduate

2. Differentiate a screening test versus a diagnostic test

Audience: Graduate

3. Identify indications for genetic testing

Audience: Graduate

4. Assess the clinical utility of a genetic test

Audience: Graduate

5. State the limitations of genetic tests and clinical laboratory medicine

Audience: Graduate

**PATH 950 – INFECTIOUS DISEASE DETECTIVES**

2 credits.

In much of the world, infection remains the leading cause of disease and death. While medicine has made great strides in the diagnosis and treatment of infection, new and deadly pathogens continue to emerge, and antibiotic resistance continues to grow. No matter what a physician's specialty, understanding principals of infectious disease manifestations, diagnosis and treatment are key.

**Requisites:** Declared in the Medical program with 4th year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify characteristic gross/histologic features seen in various types of infectious disease

Audience: Graduate

2. Demonstrate understanding of the relative merits of various infectious disease diagnostic testing modalities

Audience: Graduate

3. Relate basic concepts of inflammation and mechanisms of infectious disease to potential clinical manifestations

Audience: Graduate

4. Demonstrate understanding of the collaborative relationship between the pathology department and treating physicians in cases of infectious disease

Audience: Graduate

**PATH 960 – PATHOLOGY FOR SURGEONS**

2 credits.

The surgeon-pathologist relationship is an integral aspect of the surgical care process. The intraoperative and postoperative findings of the pathologist confirm that the appropriate course of action was taken, and this information determines what the surgeon will tell the patient and his or her family about the disease entity, prognosis, and recommended next steps. In this basic science selective, future surgeons will have the opportunity to refresh their understanding of essential anatomy and histology, and deepen their knowledge of disease pathophysiology. They will also engage in multiple practical learning activities such as cutting a frozen section, working up a transfusion reaction, staining and interpreting an FNA cytology slide, assisting in prosecting (grossing) surgical pathology and autopsy specimens and following up on the diagnosis/molecular testing/tumor board discussion to enhance their understanding of the pathologist's critical role in managing surgical patients.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Reinforce knowledge of critical human anatomy and improve anatomic dissection skills

Audience: Graduate

2. Compare and contrast the indications, interpretative considerations, and relative merits of cytologic versus tissue diagnosis via core or open biopsy

Audience: Graduate

3. Develop familiarity with basic concepts of molecular testing and how it impacts disease diagnosis, prognosis and choice of targeted therapy

Audience: Graduate

4. Explain the pathophysiology of transfusion reactions and review other potential pitfalls of intraoperative blood product utilization

Audience: Graduate

5. Deepen understanding of disease features and the integral role pathologists play in management of surgical patients

Audience: Graduate

**PATH 962 – THE MOLECULAR BASIS OF HEMATOLOGIC MALIGNANCIES**

2 credits.

Understanding molecular mechanisms of hematologic disease, and developing a foundation in the principles of relevant molecular assays, is critical to providing appropriate patient care. Topics include bases of neoplastic disorders of the hematopoietic and lymphoid systems, how underlying molecular abnormalities contribute to the pathophysiology of these diseases, and the evolving spectrum of molecular and cytogenetic/FISH testing and other ancillary testing (such as flow cytometry), which are often utilized in the work-up of hematopoietic and lymphoid malignancies. Learn about strengths and weaknesses of these technologies, and how pathologists integrate results of molecular testing with the traditional histologic exam to produce accurate diagnoses and drive clinical decision making. Develop an understanding of how knowing the underlying molecular pathology of a hematopoietic or lymphoid malignancy can inform prognosis and guide therapy.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe basic processes underlying normal hematopoiesis and lymphocyte development.

Audience: Graduate

2. Apply basic principles, advantages, and limitations of the most common forms of ancillary testing in hematopathology, including flow cytometry, cytogenetics/FISH, and select molecular assays.

Audience: Graduate

3. Explain types of molecular abnormalities observed in neoplasia and how these abnormalities contribute to neoplastic growth via various cellular pathways.

Audience: Graduate

4. Describe the molecular basis, pathophysiology, and laboratory evaluation of known or suspected myeloid malignancies (including MDS, MPN, MDS/MPN, AML, and systemic mastocytosis)

Audience: Graduate

5. Describe the molecular basis and pathophysiology of clonal hematopoiesis of indeterminate potential (CHIP) and clonal cytopenia of uncertain significance (CCUS), and understand how these entities may complicate the molecular evaluation of suspected myeloid malignancies.

Audience: Graduate

6. Describe the molecular basis, pathophysiology, and laboratory testing of lymphoid malignancies, including lymphoblastic lymphomas/leukemias and B-cell and T-cell lymphomas.

Audience: Graduate

7. Describe the role of precision medicine and the utility of current and evolving targeted therapies in hematolymphoid disorders.

Audience: Graduate

**PATH 963 – WOMEN'S GLOBAL HEALTH: A FOCUS ON WOMEN'S CANCERS AND PUBLIC HEALTH INTERVENTIONS**

2 credits.

Unique opportunity for fourth year medical students to develop an intervention project focused on women's health and cancer prevention, diagnosis, treatment, or awareness globally and locally. Explore how women's health is influenced by both biological and sociocultural factors. Observe components of diagnosis of women's related cancers. Analyze molecular components of cancers used for diagnosis and treatment. Deconstruct the unique diseases that affect women throughout the life cycle and social factors that influence them.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023**Learning Outcomes:** 1. Deconstruct differences in female biology that impact medical/public health research and health outcomes

Audience: Graduate

2. Describe the burden of cancers among women globally and locally

Audience: Graduate

3. Critique scientific literature to assess for inclusion of women's specific issues and/or inclusion of women in outcome analysis

Audience: Graduate

4. Identify solutions to address unique women's health challenges

Audience: Graduate

5. Propose public health interventions that address cancer-related women's health challenges

Audience: Graduate

### **PATH 970 – GENOMICS, PROTEOMICS, AND METABOLOMICS: A DEEP DIVE INTO OMICS DATA ANALYSIS**

2 credits.

Advances in medicine are increasingly being driven by "big data" analyses, including proteomics, genomics, and metabolomics. Basic knowledge of how to analyze these datasets can allow one to generate and test hypotheses that have the potential to transform a field. In this course, students will conduct individual data mining expeditions using a collection of large proteomics and metabolomics data sets. Formulate hypotheses about the interrelationships of molecules and their potential relationship to health, disease, and biological phenotypes. Basic background instruction on "omics" methodologies, heritability studies, and analytical methods will be provided. Provides the basic knowledge to carry out future 'omics analyses; using scientific inquiry to potentially transform the practice of medicine.

**Requisites:** MED SC-M 810, 811, 812 and 813; or Declared in Cellular and Molecular Pathology Graduate Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine and critically evaluate databases for adequacy of data.

Audience: Graduate

2. Demonstrate understanding of biological variability, data scaling, and data normalization schemes

Audience: Graduate

3. Demonstrate a basic understanding of statistical associations using bioinformatics, such as hierarchical clustering and correlation matrices.

Audience: Graduate

4. Demonstrate a basic understanding of analyte pathways using bioinformatics databases such as Uniprot.

Audience: Graduate

5. Demonstrate appropriate consideration of false discovery.

Audience: Graduate

6. Develop hypothetical models of molecular interactions.

Audience: Graduate

7. Synthesize knowledge of molecular pathways and apply this knowledge to potential health and clinical factors.

Audience: Graduate

8. Prepare and defend a hypothetical model of molecular interactions.

Audience: Graduate

9. Demonstrate critical thinking skills and an understanding of the underlying science behind analytical methodologies

Audience: Graduate

### **PATH 990 – RESEARCH**

1-8 credits.

For Grad and medical students desiring advanced pathology; work done under the direction of a senior staff member.

**Requisites:** Declared in Medicine program or Cellular and Molecular Pathology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general principles in the field of pathology and laboratory medicine.

Audience: Graduate

2. Conduct independent research using a variety of approaches.

Audience: Graduate

3. Think critically to address research challenges.

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.

Audience: Graduate

## **PEDIATRICS (PEDIAT)**

### **PEDIAT 699 – INDEPENDENT STUDY**

0-5 credits.

Independent study projects as arranged with faculty or instructional staff.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

**PEDIAT/MED PHYS 705 – WOMEN AND LEADERSHIP: SCIENCE, HEALTH AND ENGINEERING**

2 credits.

Multiple professional and scientific groups have identified the underrepresentation and lack of advancement of women in academia as a national workforce problem. Review evolving perspectives of leadership and how unconscious assumptions about the behaviors and traits of men, women, and leaders impede women's advancement. Emphasizes the implications for women in the fields of science, health and engineering and explore the potential impact on the advancement of knowledge and improvements in health. Provides the opportunity to apply evidence-based perspectives using experiential methods.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Be conversant with several definitions and styles of leadership, as well as with research on how leadership and gender intersect/interact, particularly in an academic context.

Audience: Graduate

2. Reflect on personal leadership goals and skills based on readings, discussion, and online reflection assignments.

Audience: Graduate

3. Demonstrate knowledge of effective evidence-based leadership strategies.

Audience: Graduate

4. Consider the integral link between women leaders and the advancement of women's health.

Audience: Graduate

**PEDIAT 909 – PEDIATRICS INTERNSHIP PREP COURSE (PIPC)**

1 credit.

Use both didactics and simulations to cover high yield topics that a new Pediatric Intern should know to start a Pediatrics Residency. Working with a team of faculty, multi-disciplinary staff, residents, fellows and course directors, review topics such as intravenous fluid management, nutrition, vaccines, newborn care, fever and antibiotic therapy, developmental skills, hematology/oncology emergencies, dermatology, respiratory distress, endocrine emergencies, radiology, and informed consent. Participate in simulations to review medical knowledge, communication skills, and teamwork. Participate in difficult communication cases including obtaining informed consent or talking with parents of patients who choose to decline recommended management options. Practice common pediatric skills including IV placement, umbilical line placement, defibrillation, airway management, lumbar puncture, and suturing.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Communicate effectively with patients, families, and all members of the healthcare team

Audience: Graduate

2. Diagnose and manage common and critical medical conditions

Audience: Graduate

3. Perform duties as first responder to urgent/emergent patient care situations

Audience: Graduate

4. Practice skills including placing PIV/IO, umbilical lines, performing lumbar puncture, suturing, defibrillation, and securing the pediatric airway

Audience: Graduate

5. Simulate difficult conversations with patients/families and variable pediatric scenarios that require teamwork and knowledge of basic resuscitation

Audience: Graduate

### **PEDIAT 910 – INDEPENDENT READING AND RESEARCH IN PEDIATRICS**

1-8 credits.

Independent research under the direct supervision of department of pediatrics faculty. Each students research project is individualized to meet student research goals within context of faculty research needs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research

Audience: Graduate

2. Conduct a thorough literature review of the specific research question

Audience: Graduate

3. Select and apply statistical methodologies appropriate for the proposed analyses

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review

Audience: Graduate

### **PEDIAT 919 – INDIVIDUALIZED CLINICAL ELECTIVE IN PEDIATRICS**

1-4 credits.

Supervised activities include interacting with patients primarily in outpatient setting, participating in all clinical activities and other components of the individualized rotation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 921 – WISCONSIN LEADERSHIP EDUCATION IN NEURODEVELOPMENTAL AND RELATED DISABILITIES (LEND)**  
2 credits.

Participate in an interdisciplinary training program to learn foundational knowledge, skills, and attitudes related to the care of individuals with developmental disabilities. Covers neuromotor development, cognitive development, communication development, psychosocial development, physical health, quality of life, and other topics relevant to the care of individuals with developmental disabilities, as well as Lifecourse Story Team sessions that focus on a family-centered exploration of the experience of a child with a developmental disability and their family. Learn the role of different disciplines and the relevant systems of care for individuals with developmental disabilities. Explore impact of different legal and health policies on individuals with developmental disabilities and their families, as well as the concept of "ableism" and strategies to reduce this.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of the process of diagnosis and management of common developmental disabilities  
Audience: Graduate

2. Identify relevant systems of care for developmental services  
Audience: Graduate

3. Discuss the role of interdisciplinary team in providing care for individuals with developmental disabilities  
Audience: Graduate

4. Demonstrate knowledge of relevant legal and health policies which effect individuals with developmental disabilities  
Audience: Graduate

5. Describe health disparities in individuals with developmental disabilities and strategies to mitigate them  
Audience: Graduate

**PEDIAT 930 – PEDIATRIC NEONATOLOGY ELECTIVE**  
2-4 credits.

Activities include attending deliveries of high-risk infants, admitting and managing a circumscribed select group of patients under the supervision of the attending neonatologist. Daily notes and orders are written and counter-signed by the neonatologist. Weekly rounds are made with social worker/discharge planner. Night call will be taken every fourth night. Attend appropriate perinatal conferences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.  
Audience: Graduate

2. Develop and present a weighted differential diagnosis.  
Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.  
Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities  
Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.  
Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.  
Audience: Graduate

7. Review, interpret and present current literature to support patient care.  
Audience: Graduate

8. Develop clinically relevant questions to advance learning.  
Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.  
Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.  
Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.  
Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.  
Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.  
Audience: Graduate

### **PEDIAT 935 – SURGICAL, NEUROLOGIC, & COMPLEX CARE OF THE NEONATE ELECTIVE**

2-4 credits.

Supervised activities include inpatient management in an intensive care setting and attending all the neonatal division educational sessions, which may include; Neonatology journal club, Multidisciplinary discharge planning rounds, and Individual patient care conferences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

### **PEDIAT 938 – INPATIENT ACTING INTERNSHIP-PEDIATRICS**

4 credits.

Pediatric acting interns will serve as the primary provider for pediatric patients in one of the offered inpatient settings. This includes responsibility for diagnosis and management; communication with patients, families, and other interdisciplinary care providers; and self-directed learning and application of evidence-based medicine. The student will work under the direct supervision of a senior resident, fellows and the pediatric faculty. This rotation will provide the student with the opportunity to function at the intern level and play an active role in inpatient management of inpatient pediatric patients.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history

Audience: Graduate

2. Complete a targeted exam

Audience: Graduate

3. Develop and present a weighted differential diagnosis (EPA 2)

Audience: Graduate

4. Using clinical evidence, select a working diagnosis (EPA 2)

Audience: Graduate

5. Present diagnostic plan including laboratory and imaging modalities

Audience: Graduate

6. Interpret imaging and laboratory findings in the context of patient presentation

Audience: Graduate

7. Write admitting and daily orders (EPA 4)

Audience: Graduate

8. Justify orders based upon working diagnosis and cost-effectiveness (EPA 4)

Audience: Graduate

9. Complete written patient evaluation using standard format

Audience: Graduate

10. Write daily progress notes including assessments and plans using standard format

Audience: Graduate

11. Present initial patient evaluation including assessments and plans

Audience: Graduate

12. Summarize patient's hospital course during rounds and manage day to day care

Audience: Graduate

13. Present current literature to support patient care

Audience: Graduate

14. Based on case load, develop clinically relevant questions to further individual and team learning

Audience: Graduate

15. Give and receive patient handovers (EPA 8)

Audience: Graduate

**PEDIAT 940 – ADOLESCENT MEDICINE ELECTIVE**

2-4 credits.

Supervised activities include interacting with patients in adolescent outpatient clinics, performing histories, physical examinations and managing patients with supervision by our staff. Give a didactic presentation at the end of the rotation on a topic of student's choice as well as write a blog for Writes of Passage. Customize clinic schedule from a menu of opportunities provided by the director.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 941 – PEDIATRIC ALLERGY/IMMUNOLOGY ELECTIVE**

2-4 credits.

Supervised activities include seeing patients in outpatient clinics, observing procedures and attending weekly pediatric allergy conferences. Hands-on clerkship experience in this sub-specialty involves both very common and uncommon diseases in pediatrics in allergy and immunology. Specific topics that are covered include food allergy, asthma, allergic rhinitis, atopic dermatitis, and primary immune deficiency. As these diseases are increasing in prevalence and have broad impacts on child health, this experience is ideal preparation for careers in pediatric and medical specialties, or surgical specialties.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

14. Take an accurate exam and history pertaining to common allergic disorders (e.g. allergic rhinitis, drug allergy, food allergy) and asthma.

Audience: Graduate

**PEDIAT 942 – PEDIATRIC COMPLEX CARE ELECTIVE**

2-4 credits.

Under direct supervision by faculty, participate in medical co-management and care coordination for children with medical complexity. Multifaceted approach to learning about children with medical complexity, with focus on history and exam skills during scheduled maintenance and acute care visits. Pediatric ethics, organizing and maintaining accurate and up-to-date electronic medical records, documentation skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

14. Explore ambiguities in the ethics of caring for children with medical complexity.

Audience: Graduate

15. Demonstrate independent research skills and presentation abilities through a self-directed learning project.

Audience: Graduate

**PEDIAT 943 – PEDIATRIC CARDIOLOGY ELECTIVE**

2-4 credits.

Supervised by house staff and attending physicians activities include attending a variety of outpatient clinics with pediatric cardiologists, inpatient pediatric cardiology rounds and consults with the inpatient service team, observing various scheduled procedures (including echocardiography, ECG, cardiac catheterization, electrophysiology study), attending pediatric cardiology related conferences, presenting cases and teaching topics, and discussing patient cases.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret testing (i.e. ECG and echocardiogram) and communicate results to patients (once reviewed with cardiologist) and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 950 – PEDIATRIC ENDOCRINOLOGY AND DIABETES ELECTIVE**

2-4 credits.

Supervised activities include interacting with patients primarily in outpatient (some inpatient) settings, performing histories and physical examinations and managing patients with supervision by our staff. Group and individual discussions concerning patients seen in both the outpatient and inpatient settings will occur.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 953 – CLINICAL GENETICS ELECTIVE**

2-4 credits.

Supervised activities include interacting with patients primarily in outpatient setting, participating in all clinics, rounds, consults and other components of the service. Active participation in patient evaluations and patient management is another component of this rotation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 956 – PEDIATRIC HEMATOLOGY-ONCOLOGY ELECTIVE**

2-4 credits.

Supervised activities include attending pediatric hematology/oncology clinics, evaluating patients in the clinics and attending the weekly pediatric hematology/oncology conferences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 963 – PEDIATRIC NEPHROLOGY**

2-4 credits.

Provides an in-depth introduction to a variety of kidney diseases, allowing students to build upon their ability to diagnose and treat complex pediatric and adolescent patients. Students will rotate through the American Family Children's Hospital inpatient nephrology service, outpatient nephrology clinic, and the inpatient dialysis unit. Two and four week rotations are available.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PEDIAT 966 – PRIMARY CARE SPORTS MEDICINE ELECTIVE**

2-4 credits.

Supervised activities include interacting with patients and Licensed Athletic Trainers, residents and primary care sports medicine fellow in various outpatient settings and participating in assigned sports medicine clinics. Participating in patient evaluations, patient management and attending the weekly Friday morning sports medicine conference are additional components of this rotation. Other opportunities may include observing or evaluating patients in other clinical situations including the McClain Center UW athlete clinics, high school game coverage, PT clinics, other orthopedic clinics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 967 – PEDIATRIC PULMONOLOGY ELECTIVE**

2-4 credits.

Supervised activities include: attending outpatient clinics, rounding with inpatient attendings, attending weekly didactic and clinical conferences, observation of flexible bronchoscopies and participating in one-on-one tutorials.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 970 – PEDIATRIC RHEUMATOLOGY ELECTIVE**

2-4 credits.

Supervised activities include seeing patients in outpatient clinics, rounding with inpatient attendings, attending weekly pediatric rheumatology conferences, observing procedures and attending one-to-one tutorials.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

Audience: Graduate

**PEDIAT 971 – PEDIATRIC INFECTIOUS DISEASES**

2-4 credits.

Students will round as members of the inpatient Pediatric Infectious Disease consult team. They will perform infectious disease focused history and physical examinations and participate in the development and communication of management recommendations. Students will also attend outpatient infectious disease clinics, case conferences, microbiology rounds and daily pediatric conferences including morning report, problem conference and grand rounds.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PEDIAT 973 – PEDIATRIC GASTROENTEROLOGY**

2-4 credits.

Students will participate in pediatric gastroenterology outpatient clinics, round with inpatient faculty, attend pediatric gastroenterology conferences, attend daily pediatric conferences including morning report, case conferences, and grand rounds. Students will also be able to observe procedures in the operating room. Students will be responsible for a 20 minute case-based presentation at the end of the rotation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PEDIAT 975 – DEVELOPMENTAL PEDIATRICS**

2-4 credits.

An introduction to developmental pediatrics and the care of children with developmental disabilities. Students will rotate through a variety of clinics which will be tailored based on interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PEDIAT 990 – RESEARCH**

1-12 credits.

Research and/or scholarly work (e.g. quality improvement, clinical case reports) supervised by faculty and/or staff member within the Department of Pediatrics with appropriate content expertise. A supervisor and project must be identified prior to requesting enrollment in this course.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## PHARMACEUTICAL SCIENCES (PHM SCI)

### PHM SCI 254 – TINY EARTH GENOMICS - RESEARCHING UNCULTURED ANTIBIOTIC-PRODUCING MICROBES

3 credits.

Collaborate on a research project from the conception of research questions through data analysis and the effective communication of results. Explore the biosynthesis of antibiotics and other small molecules by uncultured bacteria through the analysis of culture-independent DNA sequencing (metagenomics) data, learning about bioinformatics and genomics along the way. Make new discoveries of microbial species and biochemical pathways.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, MICROBIO 101, 303, or BIOCORE 381

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Navigate genomic databases to find required information and data

Audience: Undergraduate

2. Interpret results using available bioinformatic tools

Audience: Undergraduate

3. Formulate a research question and testable hypothesis

Audience: Undergraduate

4. Refute or support a hypothesis using evidence

Audience: Undergraduate

5. Interpret data and draw conclusions

Audience: Undergraduate

6. Communicate research design and results in written and oral forms

Audience: Undergraduate

### PHM SCI 310 – DRUGS AND THEIR ACTIONS

2 credits.

Introduces students to the biological effects of drugs on human health. Emphasis on how drugs, especially those used in diseases of major human health significance, act in the body. Drugs that are abused also will be covered. This course is not intended for medical, nursing, pharmacy, and physician assistant students.

**Requisites:** Not open to students declared in the Nursing, Physician Assistant, or Doctor of Pharmacy programs

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Define basic principles of pharmacology including pharmacokinetics and pharmacodynamics

Audience: Undergraduate

2. Memorize examples of drugs, drug classes, and pharmacology of drugs used to treat various disease states including anxiety, depression, pain, schizophrenia, Alzheimer's disease, cancer, and infectious diseases

Audience: Undergraduate

3. Describe examples of drugs, drug classes, and pharmacology of drugs used for non-medical purposes including alcohol, caffeine, nicotine, barbiturates, amphetamine, marijuana, cocaine, and opiates

Audience: Undergraduate

4. Describe examples of drugs, drug classes, and pharmacology of drugs used as PEDs including anabolic steroids and blood doping drugs

Audience: Undergraduate

**PHM SCI 420 – PHYSICOCHEMICAL PRINCIPLES OF DRUG FORMULATION AND DELIVERY**

3 credits.

Applications of physicochemical principles to pharmaceutical systems.

**Requisites:** Declared in Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. State the major physical and chemical properties of drugs and excipients that influence the performance of drugs and dosage forms.

Audience: Graduate

2. Apply the different expressions for the concentrations and doses of drug products, and convert different expressions for concentrations and doses.

Audience: Graduate

3. Apply thermodynamic principles to important equilibria in pharmaceutical systems, including isotonicity, acid-base equilibrium, binding equilibrium, partition, hygroscopicity, and solubility.

Audience: Graduate

4. Propose procedures to prepare isotonic solutions and buffered solutions.

Audience: Graduate

5. Understand suspensions and colloids and their role in drug formulations

Audience: Graduate

6. Calculate the distribution of drugs between aqueous and lipid phases based on the principle of partition.

Audience: Graduate

7. Identify the different solid phases of the same drug and predict their impact on drug performance.

Audience: Graduate

8. Predict the aqueous solubility of drugs and its dependence on pH, common ions, and solid forms, and understand its impact on drug performance.

Audience: Graduate

9. Predict shelf life and suggest storage conditions from reaction rate constants and orders of reactions.

Audience: Graduate

10. State the major factors that influence the chemical stability of drugs (e.g., temperature, humidity, light, pH, oxygen, and free radicals) and the common reaction mechanisms (e.g., hydrolysis and oxidation), and propose approaches to stabilization and extending the expiration date of drug products (e.g., pH control, antioxidants, and packaging).

Audience: Graduate

**PHM SCI/B M E 430 – BIOLOGICAL INTERACTIONS WITH MATERIALS**

3 credits.

Addresses the range of materials currently being utilized for various biomedical applications, the biological systems governing biomaterial applications, analytical techniques pertinent to biomaterial evaluation, and selected major medical applications in which biomaterials play an important role.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 383) and (CHEM 341 or 343)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate biology, material science, and engineering

Audience: Undergraduate

2. Evaluate the design of materials for specific biomedical applications

Audience: Undergraduate

3. Formulate experimental designs and demonstrate data analyses to assess biological responses to materials

Audience: Undergraduate

4. Describe the clinical utility and limitations of various materials for specific biomedical applications

Audience: Undergraduate

5. Demonstrate practical understanding of biomaterial-based laboratory safety and techniques

Audience: Undergraduate

**PHM SCI 432 – BIOCHEMICAL PRINCIPLES OF DRUG TREATMENT**  
3 credits.

Basic biochemistry as the biochemical basis for drug action. Focus on biopolymers (proteins, nucleic acids) as intended and unintended targets of current drug therapy and the major biochemical pathways in which they operate. Review of protein structure, enzymatic activity, metabolic pathways, membrane biochemistry, mechanism of drug action, DNA mutation and repair.

**Requisites:** Declared in Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Deduce aspects of protein structure and catalysis from kinetics and other data

Audience: Graduate

2. Summarize how nucleic acids are used to store information in living organisms, including the molecular mechanisms for replication and protein expression

Audience: Graduate

3. Apply knowledge of the pathways by which energy is derived from fats and carbohydrates to both the clinical progression of diabetes and its treatment

Audience: Graduate

4. Differentiate between the different methods of biosignaling, in terms of whether energy is required and whether molecules are physically moved through membrane barriers

Audience: Graduate

5. Integrate understanding of biochemical systems and the ways that drugs are able to target them to therapeutic effect

Audience: Graduate

**PHM SCI 490 – SELECTED TOPICS IN PHARMACEUTICAL SCIENCES**

1-4 credits.

Specialized subject matter of current interest to undergraduate and professional students.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**PHM SCI 493 – SELECTED TOPICS IN PHARMACEUTICAL SCIENCES**

1-4 credits.

Specialized subject matter of current interest to graduate students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHM SCI 510 – PHARMACOLOGY PRINCIPLES AND APPLICATIONS**

2 credits.

Underlying science and pharmacological actions of drugs and the biological effects of drugs on human health. Covers drugs used to treat common illnesses and diseases as well as commonly abused drugs.

**Requisites:** Declared in Pharmacology and Toxicology BS. Not open to students with credit for PHM SCI 310.

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain principles of pharmacology

Audience: Undergraduate

2. Apply chemistry and biology knowledge to pharmacokinetics and pharmacodynamics

Audience: Undergraduate

3. Identify types of drugs used to treat various disease states

Audience: Undergraduate

**PHM SCI 521 – PHARMACOLOGY I**

3 credits.

Pharmacological actions of important drugs, including drugs that affect the peripheral and central nervous systems.

**Requisites:** Declared in the Doctor of Pharmacy program with second year standing; or declared in Pharmacology and Toxicology BS, BIOCHEM 508, PATH 404, and (ANAT&PHY 335, 435, or BIOCORE 486)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the neurotransmitters of the central and autonomic nervous systems including their physiologic role, distribution, location, synthesis, storage, release, receptor activation and transmitter inactivation which may serve as sites for drug action

Audience: Undergraduate

2. Describe and differentiate the drug pharmacology of drugs that act in the central and autonomic nervous systems

Audience: Undergraduate

**PHM SCI/PHM COL-M 522 – PHARMACOLOGY II**

3-4 credits.

Pharmacological actions of important drugs, including hematopoietic, thrombolytic, antihyperlipidemic, immunopharmacologic, anticancer, anti-inflammatory, diuretic, antihypertensive, antianginal, and anti-arrhythmic agents, and agents used to treat congestive heart failure.

**Requisites:** PHM SCI 521

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall the names of different drugs, and be able to link these drug names to not only specific uses, but also to more general concepts about physiology, disease, and drug mechanism of action

Audience: Undergraduate

2. Describe and differentiate the pharmacology of drugs that act on organ systems, including the endocrine, gastrointestinal, cardiovascular, renal, hematopoietic, and immune systems

Audience: Undergraduate

**PHM SCI 531 – MEDICINAL CHEMISTRY I**

3 credits.

Basic concepts in the chemistry of small molecule medicinal products. Structure activity of cholinergic, adrenergic, serotonergic and dopaminergic agents, antidepressant, antianxiety drugs, opioids, and antihistamines. Overview of drug metabolism and the clinical effects of metabolic drug interactions and genetic variability in drug metabolism genes.

**Requisites:** PHM SCI 432**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify drugs, their therapeutic use, and side effects based on drug name and structure

Audience: Undergraduate

2. Use pharmacophoric drug models to predict potency, metabolism, or side effects

Audience: Undergraduate

3. Apply mechanisms of drug/xenobiotic biotransformation to parent drugs

Audience: Undergraduate

4. Explain factors affecting drug/xenobiotic metabolism in humans, including both environmental and genetic effects and the resulting clinical implications

Audience: Undergraduate

**PHM SCI 532 – MEDICINAL CHEMISTRY II**

2 credits.

Chemistry of medicinal products, including antihyperlipidemics, glucocorticoids, estrogens, progestins, nonsteroidal anti-inflammatories, antitumor agents, and enzyme inhibitors.

**Requisites:** PHM SCI 531**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Explain basic chemical principles as they apply to drug SAR

Audience: Undergraduate

2. Identify drug classes and origin based in part on drug structures

Audience: Undergraduate

3. Recognize the mechanism of drugs that act via enzyme inhibition

Audience: Undergraduate

4. Explain the difficulty of drug design in light of side effects and complexity of possible drug targets

Audience: Undergraduate

5. Apply the knowledge of structural modifications to enhance drug delivery via increased solubility, metabolic stability and bioavailability

Audience: Undergraduate

**PHM SCI 540 – DRUG DELIVERY SYSTEMS FOR PHARMACOTHERAPY**

3 credits.

A series of lectures by experts covering: i) introductory drug development and delivery system development processes; ii) various drug delivery routes (oral, topical, rectal, vaginal, urethral, nasal, and pulmonary); iii) various delivery systems (conventional, ophthalmic, CNS, and recent advances); iv) delivery systems related to biofilms, infection, and vaccines.

**Requisites:** Declared in the Doctor of Pharmacy program with second year standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe theories, approaches, concepts, and current research findings in the area of drug delivery.

Audience: Graduate

2. Apply knowledge of drug development, dissolution, and dosage forms to delivery systems.

Audience: Graduate

3. Identify the characteristics of various common dosage forms and describe/recognize/explain how composition impacts drug release, stability, and bioavailability.

Audience: Graduate

4. Demonstrate, using knowledge of mathematics, chemistry, and biology, concepts of solubility, stability, drug release, dissolution, diffusion, partitioning, dose, absorption, and disposition as related to pharmacology and pharmacokinetics.

Audience: Graduate

5. Demonstrate underlying principles of advanced drug delivery systems which are either entering clinical practice or on the advanced stage in clinical trials/development phase.

Audience: Graduate

6. Identify the rationale for therapeutic use, administration route, formulation, and manufacture of common dosage forms.

Audience: Graduate

7. Utilize proper techniques and skills to be able to advise patients and health care professionals on drug storage, handling, and administration, as well as be able to identify factors that influence bioavailability and related safety issues.

Audience: Graduate

8. Demonstrate professional and ethical responsibility.

Audience: Graduate

**PHM SCI 541 – PHARMACEUTICAL CALCULATIONS, DISPENSING AND COMPOUNDING**

3 credits.

Introductory laboratory course in compounding and dispensing of pharmaceutical dosage forms, including sterile products. Includes practice in interpretation of prescription orders, pharmaceutical calculations, compounding procedures, physical manipulation of drugs and dosage form components, and product packaging and labeling.

**Requisites:** PHM SCI 420

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read and accurately interpret prescription and medication orders

Audience: Undergraduate

2. Correctly identify, interpret and utilize for calculation, the information presented in a written problem, a prescription or medication order, and directions taken from the labeling of a container

Audience: Undergraduate

3. Accurately calculate the quantities needed to compound a dosage form, the dosage of ingredients, and the amount of any drug source required to fulfill the dosing needs of the patient

Audience: Undergraduate

4. Know the dimensions or units of measurements for drugs and chemicals, expressions of quantity and concentration for drug products and preparations, and appropriate methods of expressing doses and dosing regimens for patients

Audience: Undergraduate

5. Perform the accepted techniques used for extemporaneous compounding of non-sterile drug products

Audience: Undergraduate

6. Identify the physical and chemical properties of drugs, pharmaceutical necessities, excipients, and dosage forms, and practice with handling and manipulating them

Audience: Undergraduate

7. Use a variety of pharmacy references for determining appropriate doses and dosage regimens, and drug delivery systems

Audience: Undergraduate

**PHM SCI 542 – PARENTERAL THERAPY AND NUTRITION**

3 credits.

An introduction to parenteral therapy and nutrition focusing on the fundamental properties, calculations involved and the methods to prepare safe and reliable injectable medications for patients.

**Requisites:** PHM SCI 541 and concurrent registration in PHM SCI 540

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Become proficient in solving mathematical problems for determining appropriate dosing of medications, for compounding prescription orders, and for providing safe and accurate drug therapy for patients

Audience: Undergraduate

2. Improve compounding skills and ability to critically analyze prescription and medication orders for compounded drug preparations

Audience: Undergraduate

3. Develop competence in aseptic processing and in dealing with intravenous solutions, IV admixtures, reconstitution of parenterals and total parenteral nutrition solutions

Audience: Undergraduate

4. Utilize pharmacy reference books to determine which references to use for specific problems or questions

Audience: Undergraduate

5. Illustrate practical aspects of compatibility and stability of compounded prescriptions and parenteral products, including the application of scientific principles, legal standards, and use of published literature in assigning beyond-use dates to drug preparations

Audience: Undergraduate

6. Explain the pharmacists' responsibility for handling and dispensing quality pharmaceutical drug products and preparations as promulgated in the USP

Audience: Undergraduate

**PHM SCI 558 – LABORATORY TECHNIQUES IN PHARMACOLOGY AND TOXICOLOGY**

2 credits.

Basic laboratory techniques employed in pharmacological and toxicological research.

**Requisites:** Declared in the Pharmacology and Toxicology undergraduate program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate procedural knowledge of general laboratory skills

Audience: Undergraduate

2. Explain the processes and applications related to science subjects

Audience: Undergraduate

3. Handle basic scientific equipment carefully and correctly

Audience: Undergraduate

4. Demonstrate a scientific understanding of molecular biological concepts

Audience: Undergraduate

5. Coherently convey scientific data and results in a written report

Audience: Undergraduate

6. Define principles of evidence-based data interpretation and scientific integrity

Audience: Undergraduate

**PHM SCI 581 – MOLECULAR AND CELLULAR PRINCIPLES IN PHARMACOLOGY**

4 credits.

In-depth introduction to the molecular and cellular principles of pharmacology. Emphasis on the mechanisms of drug and small molecule action in cells, with a focus on downstream signaling pathways, second messenger systems, protein kinase cascades, and the regulation of gene transcription.

**Requisites:** Declared in Pharmacology and Toxicology BS, BIOCHEM 508, PATH 404, and (ANAT&PHY 335, 435, or BIOCORE 486)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the fundamental principles of drug actions at their target sites (e.g. receptors, enzymes, etc.)

Audience: Undergraduate

2. Recognize the various mechanisms by which drugs can mediate their pharmacological effect.

Audience: Undergraduate

3. Describe how drugs mimic or modify physiological function, including the various actions and clinical uses.

Audience: Undergraduate

4. Describe the major classes of therapeutic drugs that affect the primary systems within the body.

Audience: Undergraduate

5. Choose a relevant experimental system to test experimental hypotheses (e.g. in vitro or in vivo; animal species, etc.)

Audience: Undergraduate

6. Design experiments which are properly controlled and which use appropriate statistical methods of data analysis.

Audience: Undergraduate

### PHM SCI 623 – PHARMACOLOGY III

3 credits.

Pharmacological actions and underlying basic and clinical science of antimicrobial and antiviral drugs. Pharmacology of hormones and other drugs affecting the endocrine system.

**Requisites:** PHM SCI/PHMCOL-M 522

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Classify the physiologic and pathophysiologic features of the human endocrine system and the pancreas

Audience: Undergraduate

2. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases relating to the functions of the endocrine pancreas

Audience: Undergraduate

3. Classify physiologic and pathophysiologic features of the human thyroid gland

Audience: Undergraduate

4. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases relating to the functions of the thyroid gland

Audience: Undergraduate

5. Classify the physiologic and pathophysiologic features of endocrine sex hormones and human reproduction

Audience: Undergraduate

6. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases and/or functions of the human reproductive tract

Audience: Undergraduate

7. Describe the physiologic and pathophysiologic features of Calcium Homeostasis

Audience: Undergraduate

8. Connect the drugs/drug classes to the pharmacology of drugs used to manage diseases relating to imbalances of Calcium Homeostasis

Audience: Undergraduate

### PHM SCI/M&ENVTOX/ONCOLOGY/PHMCOL-M/POP HLTH 625 – TOXICOLOGY I

3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.

**Requisites:** (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the physiology and pathology of toxicology, understanding the basic fundamentals of toxicology and toxic agents

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset

Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example

Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club

Audience: Graduate

## PHM SCI/M&ENVTOX/PATH/PHMCOL-M/POP HLTH 626 – TOXICOLOGY II

3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.

**Requisites:** POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain and identify the effects of toxicants on specific organs within the human body

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset

Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding

Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.

Audience: Graduate

## PHM SCI 679 – PHARMACOLOGY AND TOXICOLOGY SEMINAR

1 credit.

Senior student presentations of independent research or of published papers on a specific topic approved by the course coordinator. Faculty-led seminars on selected topics regarding responsible conduct of research. The course also provides a venue for career talks by Pharmacology and Toxicology alumni and guests working in a variety of professional settings - research, industry (pharmaceutical; biotech; contract research; consumer products; etc.), a variety of healthcare professions, and law.

**Requisites:** Declared in the Pharmacology and Toxicology undergraduate program

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Design and give a verbal scientific presentation that explains the scientific method as it applies to a real-life research project

Audience: Undergraduate

2. Identify and appraise strengths and weaknesses of scientific presentations

Audience: Undergraduate

**PHM SCI 680 – PRINCIPLES OF PHARMACEUTICAL SCIENCES**

3 credits.

Learn about essential components of drug development and cutting-edge research in drug discovery, drug action, and drug delivery. Focus on useful and practical information and essential underpinnings in chemistry, biology, physical chemistry, and engineering.

**Requisites:** (BIOCHEM 508 and declared in Pharmacology and Toxicology BS) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge in a diverse range of drug discovery areas, both from academic and industry settings  
Audience: Both Grad & Undergrad

2. Identify mechanisms of action for major drug targets, with emphasis on receptor proteins that constitute targets for a majority of FDA-approved drugs  
Audience: Both Grad & Undergrad

3. Explain model systems and methods used for discovery of novel drug targets  
Audience: Both Grad & Undergrad

4. Demonstrate knowledge of the basic principles of drug formulation and delivery  
Audience: Both Grad & Undergrad

5. Demonstrate knowledge of the current research in drug delivery  
Audience: Both Grad & Undergrad

6. Apply knowledge to solve related problems in drug discovery  
Audience: Graduate

**PHM SCI 691 – SENIOR THESIS**

2 credits.

Individual study for seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**PHM SCI 692 – SENIOR THESIS**

2 credits.

Individual study for seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**PHM SCI 699 – ADVANCED INDEPENDENT STUDY**

0-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHM SCI 751 – INTRODUCTION TO REGULATORY PRACTICE**

3 credits.

Identifies and examines the key regulatory agencies and practices that govern the highly regulated and diverse pharmaceutical industry. Highlights current and emerging FDA and ICH regulations and guidance documents to successfully navigate meeting with the agencies and to submit required documentation for successful product development.

**Requisites:** Declared in MS Pharmaceutical Sciences or Capstone Certificate in Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the laws and regulations associated with drugs, biologics, and medical devices in the United States.  
Audience: Graduate

2. Justify the importance of regulatory affairs in Life Sciences.  
Audience: Graduate

3. Develop a meeting and communication strategy for interacting with the FDA and submitting appropriate documentation  
Audience: Graduate

4. Analyze the regulations that impact drug and biologics development, dietary supplements, medical devices, and diagnostics.  
Audience: Graduate

5. Analyze and compare nonclinical and clinical product development.  
Audience: Graduate

### PHM SCI 752 – GXP (GOOD PRACTICE): WORKING IN A REGULATED ENVIRONMENT

3 credits.

The pharmaceutical and biopharmaceutical industries have strict documentation and production requirements. Prepares the learner to work in a regulated environment. Explains roles and responsibilities across multiple disciplines and proper documentation practices. Prepares learner for protocol, report creation and audit responses. Discusses specifications, guidances and root-cause analysis.

**Requisites:** Declared in MS Pharmaceutical Sciences or Capstone Certificate in Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the laws, processes, and regulations associated with drugs, biologics, and medical devices in the United States.  
Audience: Graduate

2. Articulate and apply quality based systems in a GxP regulated environment.  
Audience: Graduate

3. Explain and analyze when and how the GxP requirements are applied over the course of the product life cycle.  
Audience: Graduate

4. Identify the key factors in GxP facility and equipment design, qualification, and maintenance.  
Audience: Graduate

5. Identify the key elements required to operate a compliant control laboratory.  
Audience: Graduate

### PHM SCI 753 – PROJECT MANAGEMENT IN DRUG DEVELOPMENT

3 credits.

Key concepts and body of knowledge of Project Management (PM) applied to the specifics of the drug development process. PM theory and language. The life cycle of a project: Initiating, Planning, Executing, Monitoring and Control, and Closing. Predictive, adaptive and hybrid PM frameworks and tools. Project Charter, statement-of-work, scope of work, work-breakdown structure, project network and timelines. Critical path method and earned value analysis to adjust schedules, allocate resources, and implement corrective actions. Risk management in pharmaceutical projects. An overview of documents management and decision-making strategies.

**Requisites:** Declared in MS Pharmaceutical Sciences, Capstone Certificate in Applied Drug Development, or Capstone Certificate in Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the concepts, principles and language of PM and its impact and role in the pharmaceutical industry.  
Audience: Graduate

2. Describe the functions of a Project Manager in general and within the drug development process (pre-clinical and clinical phases).  
Audience: Graduate

3. Compare and contrast different frameworks and tools of PM to make informed decisions on tailoring the PM approach to suit the project needs.  
Audience: Graduate

4. Develop a project charter, statement-of-work, scope of work, work-breakdown structure, a resource-loaded timeline, and a project plan.  
Audience: Graduate

5. Apply the critical path method and earned-value analysis to track progress and forecast outcomes against a project's plan baseline.  
Audience: Graduate

6. Weight proper corrective measures according to earned-value analysis forecast methods, to ensure a project's outcomes and deliverables.  
Audience: Graduate

7. Implement risk identification, mitigation and management strategies during project planning (pre-mortem), life cycle, and project closeout (post-mortem).  
Audience: Graduate

8. Consolidate the PM concepts and principles studied during the course by developing a Project Plan as Final Project.  
Audience: Graduate

**PHM SCI 754 – LIFECYCLE MANAGEMENT OF PHARMACEUTICAL PRODUCTS**

3 credits.

Explores the process of bringing pharmaceutical products to market, particularly as it applies to the scaling up, manufacturing, and maintenance phases that come after FDA approval of a product is obtained. Identifies various factors that impact the life cycle management of pharmaceutical products from development to sustained large-scale distribution, such as: target product profile (TPP), chemistry, manufacturing and controls (CMC), active pharmaceutical ingredient (API) supply chain considerations, raw materials shortages, demand planning/forecasting, and post-approval regulatory considerations.

**Requisites:** Declared in MS Pharmaceutical Sciences: Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the essential features of a well-constructed life cycle management plan for different types of pharmaceutical products (small molecules, biologics, in vitro diagnostics, and medical devices).

Audience: Graduate

2. Define and analyze the elements of a target product profile, including the forces that influence which indications for new products are prioritized during product development.

Audience: Graduate

3. Describe the key considerations involved in developing an accelerated approval strategy, particularly as they apply to Phase 1-4 studies.

Audience: Graduate

4. Predict and evaluate how different market forces and business decisions impact CMC and supply chain logistics.

Audience: Graduate

5. Identify and defend the establishment of systems within a pharmaceutical company to stay in regulatory compliance throughout the entire life cycle of a product, especially as pertaining to the post-approval phases of the product's life cycle.

Audience: Graduate

**PHM SCI 755 – LABORATORY AND INSTRUMENTATION METHODS**

3 credits.

Teaches the theory and application of many common laboratory techniques and instruments used in drug discovery and development. Includes a laboratory component to teach safety and basic techniques necessary for working in a lab. Instruction begins with basic techniques and builds upon these techniques to instruct in proper sample preparation and handling for analysis using a variety of analytical instrumentation.

**Requisites:** Declared in the MS Pharmaceutical Sciences: Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Practice good laboratory techniques including proper handling of instrumentation, aseptic methods, and record keeping

Audience: Graduate

2. Explain the fundamentals of DNA science and be able to isolate genomic DNA and perform allelic discrimination

Audience: Graduate

3. Describe the fundamentals of chromatography and be able to apply them to small molecule analysis

Audience: Graduate

4. Practice routine cell culture techniques including aseptic methods, passaging cells and performing routine toxicity assays

Audience: Graduate

5. Know the different methods to quantify and visualize protein and be able to quantify and visualize proteins in biological samples

Audience: Graduate

6. Recognize the basic mechanisms of cellular toxicity and be able to measure toxic effects of compounds on cells grown in culture

Audience: Graduate

7. Describe the fundamentals of mass spectrometry and be able to apply these to both small molecules and proteins

Audience: Graduate

**PHM SCI 756 – INTRODUCTION TO DATA ANALYSES IN DRUG DEVELOPMENT**

3 credits.

Provides a high-level overview of how data analysis techniques augment the drug discovery and development process. Focuses on project-based skills-building through the application of industry-standard software and use of public databases. Explores best practices for data processing and management to ensure experimental reproducibility. Develops troubleshooting skills through critical evaluation of data analysis results and root cause analysis.

**Requisites:** Declared in MS Pharmaceutical Sciences: Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify relevant software platforms, programming tools, and databases relevant to various drug development tasks.

Audience: Graduate

2. Apply best practices, critical thinking skills, and troubleshooting techniques to data analysis projects.

Audience: Graduate

3. Complete data analysis projects representative of those used in drug target characterization.

Audience: Graduate

4. Analyze large high throughput screening (HTS) datasets to confirm positive hits and identify common issues that arise in these datasets.

Audience: Graduate

5. Perform chemical similarity searches and hits triage by applying industry-standard tools and practices.

Audience: Graduate

6. Conduct physiologically-based pharmacokinetic (PBPK) modeling and simulation projects using industry-standard software packages.

Audience: Graduate

**PHM SCI 757 – INTRODUCTION TO DRUG DEVELOPMENT**

2 credits.

Scientific process of drug development from discovery through clinical trials. Brief history of drug development, along with an overview of drug discovery, preclinical, and clinical activities that take place during development. Application to real-world drug development scenarios and challenges, especially as they apply to development of drugs to treat neurological diseases.

**Requisites:** Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Provide historical context for the modern drug discovery and development process.

Audience: Graduate

2. Describe the high-level goals and activities that take place during discovery, preclinical development, and clinical development and the different functional areas that perform this work.

Audience: Graduate

3. Apply the knowledge learned throughout the course to address specific drug development scenarios.

Audience: Graduate

4. Propose novel strategies to address current drug development challenges.

Audience: Graduate

5. Evaluate scientific literature and regulatory documents to find important information about specific drugs.

Audience: Graduate

**PHM SCI 759 – CURRENT TRENDS IN DRUG DISCOVERY AND DEVELOPMENT**

1 credit.

Provides the experience and skill to find, read and critically analyze scientific and regulatory literature in the field of drug discovery and development.

**Requisites:** Declared in MS Pharmaceutical Sciences or Capstone Certificate in Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Know where to search for appropriate primary literature and guidance documents associated with drug discovery and development

Audience: Graduate

2. Critically analyze primary research literature and guidance documents in the field of drug discovery and development and neuroscience

Audience: Graduate

3. Succinctly and accurately communicate the merits and limitations of primary drug discovery and development research publications and guidance documents

Audience: Graduate

**PHM SCI 760 – SUMMATIVE RESEARCH INTERNSHIP**

3-4 credits.

Summation of core coursework to a real-world project and/or internship experience. Synthesis of knowledge, skills and abilities to demonstrate aptitude for careers in respective industries.

**Requisites:** Declared in MS Pharmaceutical Sciences

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate critical knowledge and in-depth understanding of principles in pharmaceutical sciences and its application in drug development.

Audience: Graduate

2. Identify important research questions, formulate testable hypotheses, design experiments to test those hypotheses and use appropriate statistical methods for analyzing data

Audience: Graduate

3. Conduct research that contributes to the student's field of study

Audience: Graduate

4. Communicate technical knowledge and research results effectively to a range of audiences

Audience: Graduate

5. Apply ethical principles in all work in both independent and collaborative settings

Audience: Graduate

6. Demonstrate comprehension of business principles and the ability to apply them to the pharmaceutical industry

Audience: Graduate

**PHM SCI 761 – INTRODUCTION TO PHARMACOLOGY**

1 credit.

Introduction to basic concepts of drug delivery and action, methods used to study drug action. Includes a brief survey of drugs acting on the cardiovascular system, the central nervous system and other drug targets.

**Requisites:** Declared in MS Pharmaceutical Sciences: Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how different dosage forms of drugs are used to deliver drugs to specific organs and sites of action and how drugs are removed from the body.

Audience: Graduate

2. Identify how drugs interact with specific target receptors to produce physiological responses, including desired and undesired effects.

Audience: Graduate

3. Analyze how microbes such as viruses and bacteria evade drug treatment.

Audience: Graduate

4. Specify how drugs are used to affect the cardiovascular system.

Audience: Graduate

5. Specify how drugs are used to treat disorders of the CNS.

Audience: Graduate

6. Explain how “drugable targets” have been used to create new drugs.

Audience: Graduate

**PHM SCI 762 – THE DRUG DEVELOPMENT PROCESS FROM DISCOVERY TO INVESTIGATIONAL NEW DRUG APPLICATION (IND)**

3 credits.

Overview of the drug development process from discovery to investigational new drug application (IND). Drug discovery (target identification, target validation, and hit-to-lead) preclinical CMC activities, and preclinical pharmacology, pharmacokinetic, and toxicology studies as they apply to both small and large molecule drugs.

**Requisites:** Declared in Pharmaceutical Sciences: Applied Drug Development MS or Capstone Certificate in Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the phases of drug development from target discovery to investigational new drug (IND) submission and the different functional areas involved.

Audience: Graduate

2. Explain how target pharmacology and drug safety are assessed using both in vitro and in vivo preclinical models.

Audience: Graduate

3. Explain the chemistry, manufacturing, and controls (CMC) activities that take place during discovery and preclinical development.

Audience: Graduate

4. Apply the knowledge learned throughout the course to address specific drug development challenges and propose novel solutions.

Audience: Graduate

5. Evaluate how preclinical development might differ between small molecule drugs and protein therapeutics.

Audience: Graduate

6. Create a preclinical drug development strategy for a specific drug modality and disease combination.

Audience: Graduate

**PHM SCI 763 – THE DRUG DEVELOPMENT PROCESS FROM FIH TO BLA/NDA**

3 credits.

Overview of the drug development process from first-in-human (FIH) to submission of a new drug application (NDA) or biologics license application (BLA). Phases of clinical development and the role of biomarkers, companion diagnostics, statistical analysis, and CMC in clinical trials. Both small molecule and protein therapeutics will be addressed.

**Requisites:** Declared in MS Pharmaceutical Sciences: Applied Drug Development or Capstone Certificate in Applied Drug Development

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the phases of drug development from first-in-human (FIH) studies to NDA/BLA submission and the different functional areas involved.

Audience: Graduate

2. Explain the goals, expectations, and objectives for the different phases of clinical development and describe innovative trial design

Audience: Graduate

3. Define a biomarker, a companion diagnostic, and a statistical analysis plan (SAP) and describe the important elements of all three.

Audience: Graduate

4. Explain the chemistry, manufacturing, and controls (CMC) activities that take place during clinical phases of drug development and pre-launch.

Audience: Graduate

5. Apply the knowledge learned throughout the course to address specific drug development challenges and propose novel solutions.

Audience: Graduate

6. Evaluate how clinical trial design and execution might differ between different therapeutic areas and between small molecule drugs and protein therapeutics.

Audience: Graduate

7. Create a clinical development strategy for a specific drug modality and disease combination.

Audience: Graduate

**PHM SCI/CHEM 766 – MOLECULAR RECOGNITION**

2-3 credits.

Origin, nature, classification, and description of intermolecular forces.

The hydrophobic effect. Molecular complexes, binding constants, and their measurements. General principles of self-assembly, molecular recognition, complex formation, host design. Supramolecular systems and their dynamics. Micelles, bilayers, vesicles, biological membranes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHM SCI 768 – PHARMACOKINETICS**

3 credits.

Quantitative aspects of drug absorption, distribution, metabolism, and excretion. Philosophy and applications of pharmacokinetic modeling and its use in clinical practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze and interpret pharmacokinetic profiles following different routes of drug administration and differing dosing regimens

Audience: Graduate

2. Conduct a noncompartmental pharmacokinetic analysis and interpret resulting pharmacokinetic parameter data in context of fundamental pharmacokinetic principles learned

Audience: Graduate

3. Identify the key features of clinical pharmacology studies and how this data will be used to inform drug labeling

Audience: Graduate

4. Describe the importance of a statistical analysis plan and implement key information that should be included

Audience: Graduate

5. Demonstrate their understanding of pharmacokinetic concepts by application to review, analysis, interpretation and reporting from example clinical study data

Audience: Graduate

6. Utilize industry standard software (e.g. Phoenix, R) to review, analyze and report clinical study data

Audience: Graduate

7. Identify regulatory requirements for reporting pharmacokinetic data

Audience: Graduate

8. Describe population pharmacokinetics and physiologically based pharmacokinetic modeling and demonstrate how these approaches may be used in drug development

Audience: Graduate

**PHM SCI 773 – MOLECULAR SOLIDS**

2-3 credits.

Science and technology of molecular solid materials with applications in medicine, food, energetic materials, and organic electronics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify the molecules in molecular solids, including the active pharmaceutical ingredients

Audience: Graduate

2. Use molecular structures to predict solid-state properties

Audience: Graduate

3. Solve crystal structures and use the information to predict the properties of crystals

Audience: Graduate

4. Describe the elemental steps of crystallization and their distinct kinetics and use the information to control a crystallization process

Audience: Graduate

5. Identify, discover and predict crystal polymorphs and predict the effect of polymorphism on material properties, including dissolution and bioavailability

Audience: Graduate

6. Predict aqueous solubility and its dependence on pH, complexing agents, common ions, and solid forms, and understand its impact on drug performance

Audience: Graduate

7. Prevent crystallization and prepare amorphous solids and glasses and describe areas of applications where amorphous materials outperform crystalline materials

Audience: Graduate

8. Design strategies to stabilize molecular solid materials against physical and chemical changes

Audience: Graduate

**PHM SCI 775 – POLYMERIC DRUG DELIVERY**

3 credits.

Introduces synthetic and biological polymers applied for drug targeting and controlled drug release, focusing on injectable drugs, including biologics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Classify polymeric drug delivery systems.

Audience: Graduate

2. Differentiate bioconjugation, complexation and encapsulation.

Audience: Graduate

3. Describe major sterile product requirements.

Audience: Graduate

4. Differentiate major mechanisms of drug release.

Audience: Graduate

5. Relate physicochemical properties to biodistribution, metabolism, and clearance.

Audience: Graduate

6. Predict rates of drug absorption after SC injection.

Audience: Graduate

7. Describe peptide long-acting injectables.

Audience: Graduate

8. Describe antibody-drug conjugates.

Audience: Graduate

**PHM SCI 786 – NATURAL PRODUCT SYNTHESIS, BIOSYNTHESIS AND DRUG DISCOVERY**

3 credits.

Synthesis and biosynthesis of natural products in drug discovery. Topics include: natural products in drug discovery; biosynthetic pathways and synthetic strategies for major natural product classes; and basic bioorganic chemistry and enzyme mechanisms in biosynthesis.

**Requisites:** CHEM 345 and BIOCHEM 508

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHM SCI 931 – PHARMACEUTICAL SCIENCES SEMINAR**

1 credit.

Weekly series that provides exposure to a diverse array of research topics. Students enroll in one of three sections, corresponding to their research core (Drug Action, Drug Discovery, or Drug Delivery). Students in their 2nd year and beyond present their research progress or review literature. The course includes talks from nationally and internationally recognized scientists from academia and industry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate how important research questions are identified, hypotheses are formulated, and experiments are designed to test those hypotheses by attending the research presentations of fellow students and outside invited seminar speakers and will use this knowledge to shape their own research ideas

Audience: Graduate

2. Communicate scientific knowledge and research ideas, methodology, models, and results effectively to a range of audiences by presenting a seminar of their original research (in either 931 or 932) with relevant background information and by incorporating changes to their slide design and/or presentation style as they receive feedback from faculty and students

Audience: Graduate

3. Evaluate how existing principles in pharmaceutical sciences intersect with cutting edge research by asking seminar-specific questions and participating in discussions in civil, constructive ways

Audience: Graduate

**PHM SCI 932 – PHARMACEUTICAL SCIENCES SEMINAR**

1 credit.

Weekly series that provides exposure to a diverse array of research topics. Students enroll in one of three sections, corresponding to their research core (Drug Action, Drug Discovery, or Drug Delivery). Students in their 2nd-year and beyond present their research progress or review literature. The course includes talks from nationally and internationally recognized scientists from academia and industry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate how important research questions are identified, hypotheses are formulated, and experiments are designed to test those hypotheses by attending the research presentations of fellow students and outside invited seminar speakers and will use this knowledge to shape their own research ideas

Audience: Graduate

2. Communicate scientific knowledge and research ideas, methodology, models, and results effectively to a range of audiences by presenting a seminar of their original research (in either 931 or 932) with relevant background information and by incorporating changes to their slide design and/or presentation style as they receive feedback from faculty and students

Audience: Graduate

3. Evaluate how existing principles in pharmaceutical sciences intersect with cutting edge research by asking seminar-specific questions and participating in discussions in civil, constructive ways

Audience: Graduate

**PHM SCI 990 – RESEARCH**

1-12 credits.

Independent research and writing for graduate and students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHM SCI 999 – ADVANCED INDEPENDENT STUDY**

1-12 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PHARMACOLOGY (PHMCOL-M)****PHMCOL-M/PHM SCI 522 – PHARMACOLOGY II**

3-4 credits.

Pharmacological actions of important drugs, including hematopoietic, thrombolytic, antihyperlipidemic, immunopharmacologic, anticancer, anti-inflammatory, diuretic, antihypertensive, antianginal, and anti-arrhythmic agents, and agents used to treat congestive heart failure.

**Requisites:** PHM SCI 521

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall the names of different drugs, and be able to link these drug names to not only specific uses, but also to more general concepts about physiology, disease, and drug mechanism of action

Audience: Undergraduate

2. Describe and differentiate the pharmacology of drugs that act on organ systems, including the endocrine, gastrointestinal, cardiovascular, renal, hematopoietic, and immune systems

Audience: Undergraduate

**PHMCOL-M/B M E/MED PHYS/PHYSICS/RADIOL 619 – MICROSCOPY OF LIFE**

3 credits.

Survey of state of the art microscopic, cellular and molecular imaging techniques, beginning with subcellular microscopy and finishing with whole animal imaging.

**Requisites:** PHYSICS 104, 202, 208, or 248 or PHYSICS/MED PHYS 265

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHMCOL-M/M&ENVTOX/ONCOLOGY/PHM SCI/POP HLTH 625 – TOXICOLOGY I**

3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.

**Requisites:** (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the physiology and pathology of toxicology, understanding the basic fundamentals of toxicology and toxic agents

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset

Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example

Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club

Audience: Graduate

**PHMCOL-M/M&ENVTOX/PATH/PHM SCI/POP HLTH 626 – TOXICOLOGY II**

3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.

**Requisites:** POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain and identify the effects of toxicants on specific organs within the human body

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset

Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding

Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.

Audience: Graduate

**PHMCOL-M 699 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects for juniors and seniors.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations

Audience: Undergraduate

2. Read and effectively search scientific literature

Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

**PHMCOL-M 715 – GRANT WRITING**

1 credit.

Develop a predoctoral fellowship application based on the student's proposed thesis project. Receive input on ideas and writing, both from the instructor and peers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write a cogent specific aims page for a grant proposal.

Audience: Graduate

2. Summarize background information in a coherent and concise manner, highlighting the significance of research being proposed.

Audience: Graduate

3. Outline methodologies to address a specific set of research questions.

Audience: Graduate

4. Read and critique grant proposals written by peers.

Audience: Graduate

5. Design experiments which are properly controlled and which use appropriate statistical methods of data analysis.

Audience: Graduate

**PHMCOL-M 739 – RIGOR, REPRODUCIBILITY AND BECOMING AN EFFECTIVE RESEARCHER**

1 credit.

Focuses on two of the cornerstones of science advancement, which are rigor in designing and performing scientific research and the ability to reproduce biomedical research findings. Emphasizes the application of rigor that ensures robust and unbiased experimental design, methodology, analysis, interpretation, and reporting of results. Highlights topics of particular importance to first year graduate students, including the development of effective presentation skills, communication in a professional setting, and a strong mentor-mentee relationship.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Select a well-controlled experimental design that is appropriate to answer a research question

Audience: Graduate

2. Consider all relevant biological variables to include in the experimental design

Audience: Graduate

3. Authenticate key biological and chemical resources used in experiments

Audience: Graduate

4. Perform statistical analyses appropriate for the experimental design

Audience: Graduate

5. Use transparency in reporting and publishing results, so that others may reproduce and extend the findings

Audience: Graduate

6. Develop skills to cope with the rigors of a graduate education in the pharmacological sciences

Audience: Graduate

**PHMCOL-M 781 – MOLECULAR AND CELLULAR PRINCIPLES IN PHARMACOLOGY**

4 credits.

Provides an in-depth introduction to the molecular and cellular principles of pharmacology. Emphasis is on the mechanisms of drug and small molecule action in cells, with a particular focus on downstream signaling pathways, second messenger systems, protein kinase cascades, and the regulation of gene transcription.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the fundamental principles of drug actions at their target sites (e.g. receptors, enzymes, etc)

Audience: Graduate

2. Understand the various mechanisms by which drugs can mediate their pharmacological effect

Audience: Graduate

3. Describe how drugs mimic or modify physiological function, including the various actions and clinical uses

Audience: Graduate

4. Describe the major classes of therapeutic drugs that affect the primary systems within the body

Audience: Graduate

5. Choose a relevant experimental system to test experimental hypotheses (e.g. in vitro or in vivo; animal species, etc)

Audience: Graduate

6. Design experiments which are properly controlled and which use appropriate statistical methods of data analysis

Audience: Graduate

**PHMCOL-M 875 – SPECIAL TOPICS IN PHARMACOLOGY**

1-3 credits.

Special topics in pharmacology. Topics may vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in pharmacology

Audience: Graduate

**PHMCOL-M 901 – SEMINAR AND JOURNAL CLUB**

1-2 credits.

Students and staff present research reports of current interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Organize and present a research presentation, which includes background information, data slides, conclusions, and future directions

Audience: Graduate

2. Offer constructive feedback to peers on research presentation style and information delivery

Audience: Graduate

3. Design experimental approaches that are properly controlled and use appropriate statistical methods of data analysis

Audience: Graduate

4. Identify relevant experimental systems to test experimental hypotheses (e.g. in vitro or in vivo; animal species, etc)

Audience: Graduate

**PHMCOL-M 990 – RESEARCH**

1-12 credits.

Research facilities of the department available to qualified students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general pharmacology principles

Audience: Graduate

2. Conduct independent research using a variety of approaches

Audience: Graduate

3. Think critically to address research challenges

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab

Audience: Graduate

# PHARMACY (PHARMACY)

## PHARMACY 125 – EXPLORING PHARMACY I

2 credits.

Provides opportunities to integrate and apply introductory concepts and content related to Pharmaceutical Sciences, Social Administrative Pharmacy, and Pharmacy Practice. Students also develop academic and interpersonal skills helpful for success in current and future courses.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe roles, responsibilities, and training of pharmacists to provide care for patients and populations in a variety of practice settings

Audience: Undergraduate

2. Explain the roles of pharmacists related to public health, health literacy and health disparities

Audience: Undergraduate

3. Explain the process of gaining admission into and matriculating through a Doctor of Pharmacy program

Audience: Undergraduate

4. Create a holistic approach for successful transition from high school to college

Audience: Undergraduate

5. Develop connections to peers, student mentors, faculty and staff

Audience: Undergraduate

6. Identify common medical terms and medication names

Audience: Undergraduate

## PHARMACY 126 – EXPLORING PHARMACY II

1 credit.

Expands upon the learning foundations provided in PHARMACY 125.

Additional opportunities to develop pre-professional plans, explore unique pharmacy career opportunities and learn about pharmacy student co-curricular and professional development experiences. Prepare students to successfully participate in the pharmacy admissions process.

**Requisites:** PHARMACY 125

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the pharmacy school admissions process

Audience: Undergraduate

2. Create SMART goals regarding pharmacy admissions, pre-professional development, and unique opportunities in pharmacy practice and pharmacy student co-curricular opportunities

Audience: Undergraduate

3. Create a pharmacy admissions personal statement

Audience: Undergraduate

4. Construct reflections about guest speaker presentations, job shadow experiences, a mock interview, and cultural awareness as it relates to pharmacy careers and patient care

Audience: Undergraduate

5. Analyze a pharmacy organization or pharmacy-focused event

Audience: Undergraduate

6. Revise a pre-pharmacy resume originally developed in PHARMACY 125

Audience: Undergraduate

**PHARMACY 225 – PHARMACY EXPLORATION SEMINAR**

2 credits.

Provides opportunities to explore pharmacy career paths, develop pre-professional plans, learn about pharmacy student co-curricular and professional development experiences, and prepare to successfully participate in the pharmacy admissions process.

**Requisites:** Not open to students with credit for PHARMACY 125 or 126

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe roles, responsibilities, and training of pharmacists to provide care for patients and populations in a variety of practice settings

Audience: Undergraduate

2. Examine the roles of pharmacists related to public health, health literacy, and health disparities

Audience: Undergraduate

3. Explain the holistic student experience throughout the Doctor of Pharmacy program

Audience: Undergraduate

4. Assemble a competitive application for admission into the Doctor of Pharmacy program

Audience: Undergraduate

5. Develop connections to peers, student mentors, faculty and staff

Audience: Undergraduate

6. Identify common medical terms and medication names

Audience: Undergraduate

**PHARMACY 423 – PHARMACY INTEGRATED LEARNING LABORATORY**

1 credit.

Provides an interdivisional foundation for pharmacy students to understand many aspects of pharmacy through a wide variety of activities. Delivers a broad understanding of the pharmacist's public health and patient advocacy role with opportunities to practice basic calculations related to drug formulations in the context of safety, drug stability, and patient care. Fosters development of communication skills with peers and patients and be introduced to patient counseling principles. Includes active participation in a longitudinal group experience with an assigned senior in the community to apply course content.

**Requisites:** Declared in the Doctor of Pharmacy Program with first year standing only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop and enhance oral and written communication skills with patients/clients, peers, and pharmacists. (EO6)

Audience: Graduate

2. Employ interpersonal and intergroup behaviors in order to collaborate effectively in a variety of situations and reflect on teams and teamwork by: a) describing the process of team development and the roles and practices of effective teams and b) reflecting on individual and team performance for performance improvement. (EO7, IPEC TT1 & TT8)

Audience: Graduate

3. While applying the Pharmacists' Patient Care Process, discover aspects of patient-centered care by reflecting on the patient's/client's perspective on health, social, economic and psychological needs. (EO11, EO12, EO13)

Audience: Graduate

4. Apply social and behavioral principles and theories, including empathy, to patient communication. (EO8)

Audience: Graduate

5. Retrieve professional and lay literature in order to acquire information about therapeutic agents (i.e. evidence-based drug information) and to provide health information to patients and the public. (EO1)

Audience: Graduate

6. Identify the pharmacists' role in public health/health promotion activities while increasing awareness of community-based resources and identifying potential causes of health disparities. (EO12, EO13, EO14)

Audience: Graduate

7. Accurately measure and weigh drug products and complete calculations necessary for pharmaceutical preparations and pharmacy practice. (EO5)

Audience: Graduate

8. Complete drug dissolution and drug dilution activities and discuss how various drug properties (e.g. solubility, stability) can impact drug performance. (EO2)

Audience: Graduate

**PHARMACY 434 – PHARMACEUTICAL GENETICS AND IMMUNOLOGY**

2 credits.

Facilitates the understanding and application of the principles of pharmaceutical genetics, immunology, and biotechnology.

**Requisites:** Declared in Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how genotypes relate to human disease.

Audience: Graduate

2. Explain how model organism research underpins our knowledge of human genetic diseases.

Audience: Graduate

3. Describe how genetic/genomic technologies are used in research and can be applied to pharmacy.

Audience: Graduate

4. Explain how pharmacogenomics can identify and be used as markers for drug response.

Audience: Graduate

5. Describe how the immune system both causes and fights disease.

Audience: Graduate

6. Describe how biotechnology can be used to develop and produce drugs.

Audience: Graduate

**PHARMACY 451 – MARGINALIZED POPULATIONS IN HEALTHCARE AND MEDIA**

1 credit.

Provides opportunities for learning about healthcare barriers and facilitators: health disparities; and health outcomes using popular culture movies, and media that portray marginalized communities. Provides opportunities to discuss how their identities influence their view of the movie's theme and how bias may impact care provided in a healthcare setting.

**Requisites:** Declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Critique the portrayal of marginalized communities in the movies regarding health disparities and public health.

Audience: Graduate

2. Describe and differentiate how one's own identity influences the relationship to the community in the movie and how intrinsic biases may impact the care provided to marginalized communities.

Audience: Graduate

3. Analyze how the social determinants of health and systemic racism impact a character's health and wellbeing.

Audience: Graduate

4. Describe and differentiate attitudes and stereotypes concerning marginalized communities and how this may impact a person's individualized clinical and self-care.

Audience: Graduate

**PHARMACY 490 – SELECTED TOPICS IN PHARMACY**

1-2 credits.

Various topics related to the Pharmacy profession.

**Requisites:** Declared in Doctor of Pharmacy program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PHARMACY 563 – DRUG HISTORY: DANGEROUS DRUGS AND MAGIC BULLETS**

2 credits.

A history of medicinal substances and dangerous drugs in wider context, with a focus on gender, race, class, business, and other analytical categories. "Medicines" and "drugs" change over time -- and concepts of risk, danger, legality, and even scientific evidence are elastic. Histories of laws, regulations, and key historical actors, as well as specific drug biographies, will be provided.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Outline the key theoretical issues in history of medicine and drugs.

Audience: Graduate

2. Explain the relationship, including explanatory models of change, between specific medicines and drugs and society.

Audience: Graduate

3. Critically assess the historiographies of the history of medicine.

Audience: Graduate

4. Evaluate the reputations of specific medicines, medicinal substances and drugs.

Audience: Graduate

5. Effectively communicate conclusions regarding the history of medicines and drugs.

Audience: Graduate

6. Apply historical understandings to contemporary issues regarding drug regulation and political conflicts.

Audience: Graduate

**PHARMACY 564 – PSYCHEDELIC HISTORY: SACRED PLANTS, SCIENCE & PSYCHOTHERAPY**

3 credits.

A history of psychedelics in the U.S. and more globally. Read texts that were formative in the development of the history of psychopharmacology, pharmaceuticals, and the "war on drugs." Examine readings that represent different themes, subfields, or areas of research interest within the history of psychedelics (medicine science). Beyond biomedicine, types of analysis include: consumerism, class, ethnicity, gender, and military history. Histories of laws, regulations, and key historical actors, as well as specific drug biographies, will be provided.

**Requisites:** Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Outline the key theoretical issues in the history and historiographical discussions relevant to psychedelics in biomedicine and society.

Audience: Graduate

2. Describe the role of the psychedelics in treatment settings and as part of indigenous and religious rituals.

Audience: Graduate

3. Analyze and present primary and lay literature; apply knowledge to present problems and situations.

Audience: Graduate

4. Critique and construct tools to help shape new understandings of psychedelic historiography

Audience: Graduate

**PHARMACY/ISSUE 608 – SAFETY AND QUALITY IN THE MEDICATION USE SYSTEM**

3 credits.

Addresses the problems of medication errors and quality in health care, problem resolutions, methods of assessment, and intervention implementation and quality management.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize types, sources, and contributors to error within the medication use system.

Audience: Undergraduate

2. Explain the influence of work systems and human factors on the development of safe processes for improving safety within the medication use system.

Audience: Undergraduate

3. Apply tools for identifying, analyzing, and anticipating errors within the medication use system (e.g., error reporting systems, root cause analysis, failure modes and effects analysis) and use these to develop safer processes.

Audience: Undergraduate

4. Describe characteristics of healthcare settings that contribute to improved quality and how pharmacists can influence the characteristics.

Audience: Undergraduate

5. Explain how quality indicators are developed, measured, and monitored in the US healthcare system.

Audience: Undergraduate

6. Describe and apply economic evaluation and pharmacoeconomic principles to evaluate pharmacy programs and drug products.

Audience: Undergraduate

**PHARMACY 612 – LEGAL STRUCTURES FOR CONTROLLED SUBSTANCES**

1 credit.

Discusses federal statutes and regulations related to drug manufacturing, drug distribution, and drug use, with an emphasis on drug scheduling and controlled substances. Describes the governmental framework within which pharmaceutical development is regulated and practiced. Covers statutes and regulations protecting human subjects' privacy and autonomy in research.

**Requisites:** Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and describe the major federal statutes and regulations affecting use of controlled substances

Audience: Graduate

2. Identify potential legal problems in use and handling of controlled substances before they may occur

Audience: Graduate

3. Apply knowledge of the statutes/regulations to various research settings

Audience: Graduate

4. Locate and identify reputable sources of legal information

Audience: Graduate

**PHARMACY 621 – PHARMACOKINETICS**

3 credits.

Introduction to pharmacokinetics. Fundamental principles and specific physical models are discussed. Absorption, distribution, metabolism, and excretion are thoroughly described including applications to pharmacotherapy mostly through a one body compartment model. Biopharmaceuticals and small molecule drugs are discussed based on their specific pharmacokinetics. All pharmacokinetics and pharmacodynamics principles and concepts are further described in depth in terms of their clinical applications with an emphasis on the role of the pharmacy professional.

**Requisites:** Declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the one-compartment pharmacokinetic model as it relates to the IV bolus dose, extravascular dose, constant rate regimens and multiple dose regimens.

Audience: Graduate

2. Describe drug movement through membranes, drug absorption, distribution and elimination.

Audience: Graduate

3. Explain enzyme kinetics, protein binding, and blood flow influences on a drug's pharmacokinetics.

Audience: Graduate

4. Describe integration of drug kinetics with physiology.

Audience: Graduate

5. Discuss drug Pharmacodynamics and its relationship to drug pharmacokinetics.

Audience: Graduate

6. Develop a drug dosing regimen for a medication in a patient with kidney or liver impairment using only the FDA-approved labeling (prescribing information) for a medication.

Audience: Graduate

7. Apply pharmacokinetics and pharmacodynamics to drug regimen modifications based on therapeutic drug monitoring.

Audience: Graduate

**PHARMACY 630 – RURAL PHARMACY PRACTICE**

2 credits.

Explore how public health intersects with healthcare delivery in rural settings through direct engagement with rural communities, practitioners, and themes in rural practice. Apply therapeutic knowledge to fulfill unmet community needs, and thereby enhance delivery of healthcare in rural communities. Create a pharmacy-driven service with the goal of enhancing healthcare delivery in a rural area based on a community assessment, exploration of contemporary rural health care trends, and discussion with current rural health practitioners.

**Requisites:** Declared in the Doctor of Pharmacy Program with third year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the importance of a community-based assessment as a method for exploring community healthcare needs.

Audience: Graduate

2. Explain the essential role that community health departments play in supporting rural communities, as well as the opportunities for pharmacists and community health departments to collaborate in improving healthcare delivery.

Audience: Graduate

3. Identify opportunities to improve rural pharmacy practice through assessment of evidence based resources and literature.

Audience: Graduate

4. Identify challenges in rural healthcare and recommend potential pharmacy practice solutions through dialogue with rural health practitioners and patients.

Audience: Graduate

5. Explore service models and opportunities for interprofessional care in rural communities.

Audience: Graduate

6. Evaluate rural hospital and community pharmacy financial models to identify strategies to remaining financially solvent.

Audience: Graduate

7. Assess pharmacists' leadership opportunities in rural practice and how effective pharmacy leaders can shape the landscape of practice and service opportunities delivered in rural communities.

Audience: Graduate

8. Examine the interplay between public health and epidemiology to design healthcare services to match community needs.

Audience: Graduate

**PHARMACY 632 – NEUROSCIENCE OF PSYCHEDELICS**

3 credits.

Learn about psychiatric disorders and the profound effects of classical psychedelics on neural processes. Assess current hypotheses on their molecular actions and coupling to cellular, network, and behavioral effects, and how they might translate into therapeutic benefit. Explore the intersection of the actions of these agents with current models of the neural basis of perception, cognition, and consciousness.

**Requisites:** PSYCH/ZOOLOGY 523, PSYCH/NEURODPT/NTP 611 or PHARMACY 770. Not open to students with credit for NTP 632.

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe experimental techniques and measurements used to probe changes in neuronal activity and connectivity and identify the major limitations of each method and propose approaches to overcome those limitations

Audience: Graduate

2. Describe experimental techniques and measurements used to probe changes in neuronal activity and connectivity

Audience: Undergraduate

3. Identify the major known classical psychedelic agents in terms of their chemical structure, targets (receptors, cells, brain areas) in the brain, duration of action, and suitability for administration in a clinical setting

Audience: Undergraduate

4. Identify the major known classical psychedelic agents in terms of their chemical structure, targets (receptors, cells, brain areas) in the brain, duration of action, and suitability for administration in a clinical setting and also summarize the signaling pathways underlying cellular actions of psychedelic agents.

Audience: Graduate

5. Demonstrate knowledge of the cell types and brain areas most likely to mediate distinct behavioral effects of psychedelics, and of the experimental support for these hypotheses.

Audience: Undergraduate

6. Demonstrate knowledge of the cell types and brain areas most likely to mediate distinct behavioral effects of psychedelics, and of the experimental support for these hypotheses, and also demonstrate ability to identify gaps in experimental support for these hypotheses and to design experiments to fill those gaps

Audience: Graduate

7. Identify and summarize the major behavioral assays of the psychedelic experience and of psychiatric disorders (e.g. depression scales).

Audience: Undergraduate

8. Identify and summarize the major behavioral assays of the psychedelic experience and of psychiatric disorders (e.g. depression scales), and also identify and summarize the shortcomings of the major behavioral assays of the psychedelic experience and of psychiatric disorders (e.g. depression scales), and demonstrate ability to propose revisions of those scales to address those shortcomings.

Audience: Graduate

9. Identify and summarize clinical applications of psychedelics, and the theories and factors contributing to their therapeutic benefit

**PHARMACY 640 – APPROPRIATE USE OF ABUSED DRUGS**

2 credits.

Discusses the biological and pharmacological basis of dependence of substances of abuse. Teaches the skills required for best practices in prescribing agents of abuse. Drugs of abuse covered include opioids use for acute and chronic pain, in addition to other abused substances such as cannabinoids, psychedelics, amphetamines and related agents. Students will learn appropriate methods of therapeutic tapering and treatment of withdrawal, as well as the treatment of known and unknown agent overdose. Teaches skills in interpreting and responding to findings of urine drug tests and the prescription drug monitoring database.

**Requisites:** PHM SCI 521

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge about the neuro- and psycho-pharmacology of substance dependence.

Audience: Undergraduate

2. Define and distinguish between substance use, misuse, abuse and dependence

Audience: Undergraduate

3. Explain the public health implications of substance misuse

Audience: Undergraduate

4. Identify optimal treatment of patients with chronic, malignant pain

Audience: Undergraduate

5. Describe the best practices for initiating opioids therapy for acute and chronic non-malignant pain

Audience: Undergraduate

6. Design pain medication regimens that include the selection of the appropriate opioid, dose, and titration/de-titration plan

Audience: Undergraduate

7. Describe how and why to switch from one opioid to another

Audience: Undergraduate

8. Develop a medication plan for the management of opioid use disorder in a patient

Audience: Undergraduate

9. Interpret urine drug tests and the Prescription Drug Monitoring Program, and create patient treatment plans based upon these findings

Audience: Undergraduate

10. Understand pharmacology, appropriate use and misuse of CNS stimulants and CNS depressants

Audience: Undergraduate

11. Identify the symptoms of toxicity from overdoses of abused drugs.

Audience: Undergraduate

12. Manage patients admitted with toxicity from overdoses of abused drugs.

Audience: Undergraduate

13. Anticipate the agents of misuse in specific populations as athletes and students.

Audience: Undergraduate

14. Describe alternative, opioid-sparing strategies for treating acute and chronic pain.

Audience: Undergraduate

**PHARMACY 658 – SPECIALTY PHARMACY IN A MODERN HEALTHCARE SETTING**

2 credits.

Introduction to specialty pharmacy, a growing and important segment of the pharmaceutical marketplace. Importance of economic, business and management principles to develop, implement and evaluate specialty pharmacy services within health systems. Modern health system cases about implementation of specialty pharmacy services in clinic and in pharmacy departments to improve patient outcomes from specialty medications and increase volume of specialty medications dispensed.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the core fundamentals of specialty pharmacy including economics, market trends, contracting, and specialty pharmaceutical reimbursement

Audience: Graduate

2. Analyze data demonstrating the impact that specialty pharmacy has on health systems and patient outcomes

Audience: Graduate

3. Analyze case studies of specialty pharmacy topics in modern health care systems

Audience: Graduate

4. Describe current specialty pharmacy accreditation regulations and the application for accreditation status process

Audience: Graduate

5. Describe and analyze the process related to starting a specialty pharmacy program within a health system and the associated considerations

Audience: Graduate

**PHARMACY 671 – PSYCHEDELIC DRUGS IN SCIENCE AND SOCIETY**

2 credits.

Overview of the science behind therapeutic use of psychedelic drugs such as psilocybin and LSD; basic medicinal chemistry of the tryptamine and phenethylamine psychedelics, as well as the neurochemistry and neuropharmacology of their action. Fundamentals of drug development and FDA approval process; Standards of screening and guiding individuals before and during a therapeutic psychedelic session contrasted with the recreational use of these drugs; Appraisal of current clinical research including an objective analysis of risk/benefit for indications such as depression and addiction. History of traditional, ceremonial use of psychedelics, as well as the relationship between recreational use and attempts to regulate and restrict their use. Role of psychedelics in indigenous cultures, impacts of psychedelic tourism and wild-crafting of plants and animals on indigenous peoples. Contrasts in psychedelic treatments to other therapeutic interventions such as mindfulness and meditation.

**Requisites:** Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the roles of psychedelic compounds in the traditional rituals of indigenous peoples, and the impact of psychedelic tourism upon these native societies and their environment.

Audience: Graduate

2. Describe the history and rationale for the regulation and prohibition of these compounds in the past century.

Audience: Graduate

3. Describe the similarities between efforts to decriminalize cannabis and psychedelics, including pros and cons for each position.

Audience: Graduate

4. Describe the path by which psychedelic drugs may be proposed to the FDA for approval drugs, and rescheduled by the DEA.

Audience: Graduate

5. Identify the basic chemical structures of the most common psychedelic tryptamines and phenethylamines, and their usual pharmacologic targets in the brain.

Audience: Graduate

6. Describe and critique examples of the research literature on the human use of psilocybin and LSD for the treatment of diseases such as depression and substance abuse disorders, including proposed metrics of effect.

Audience: Graduate

7. Describe the usual screening, preparation, and care of a subject receiving psilocybin, and the expected skills, training, and role of the attending clinicians.

Audience: Graduate

8. Describe the relationship of psychedelic treatment to other methods of care such as meditation, mindfulness, and cognitive behavioral therapy.

Audience: Graduate

**PHARMACY 674 – CANNABINOIDS IN SCIENCE AND SOCIETY**

2 credits.

Provides an overview of the history, botany, and legal policies of cannabis and examines cannabinoid pharmacology and the most common therapeutic applications. Assessment of cannabinoid therapy with an emphasis on evaluating the risks and benefits of cannabinoid therapy for these conditions, product and dose regimen selection, monitoring and titration.

**Requisites:** Graduate/professional standing or declared in Psychoactive Pharmaceutical Investigation Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the role of the endocannabinoid system in human disease.

Audience: Graduate

2. Identify appropriate cannabinoid use in various disease states.

Audience: Graduate

3. Describe the mechanism of action of THC and CBD on several body systems and disease states.

Audience: Graduate

4. Explain the pharmacology of THC and CBD.

Audience: Graduate

5. Describe common / serious drug interactions and adverse effects of cannabis therapies and methods for preventing or minimizing their occurrence.

Audience: Graduate

6. Analyze and present primary and lay literature regarding cannabinoid therapy.

Audience: Graduate

**PHARMACY/NURSING/PHY ASST/PHY THER/PUBLHLTH 758 – INTERPROFESSIONAL PUBLIC HEALTH LEADERSHIP**

1 credit.

Build skills in collaboration, problem solving, and reflection to approach complex community-based public health problems contribute to becoming a public leader. Explore the six levels of public health leadership through the practices of current and past public health leaders, case studies, and personal experience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Describe the roles and responsibilities of their profession with all participating health professional students, while examining the roles and responsibilities of all other health professions.

Audience: Graduate

2. Compare and contrast the diversity of expertise among participating health professions.

Audience: Graduate

3. Apply their profession's roles and responsibilities to case studies that address complex public health issues.

Audience: Graduate

4. Describe what it means to be part of an interprofessional team and illustrate how the different professions and systems can complement and facilitate one another in addressing public health issues.

Audience: Graduate

5. Apply the principles of public health leadership via reflective exercises, case studies and facilitated discussion.

Audience: Graduate

6. Promote a public health cause or principle through legislative advocacy.

Audience: Graduate

7. Elucidate the importance of reflection as a life-long learning and leadership tool.

Audience: Graduate

**PHARMACY 770 – CNS DRUG DESIGNS, ACTIONS, AND APPLICATIONS I**

2 credits.

Provides a foundational understanding of how chemical features can influence the biological activity of a molecule on molecular targets within the central nervous system (CNS), how alteration of signaling through these targets occurs and leads to physiologically relevant changes, and how major classes of pharmaceuticals acting on the central nervous system are applied in healthcare settings to improve patient outcomes. Integration between concepts arising at the chemical, molecular, cellular, systems, organism, and societal levels will be explored.

**Requisites:** Declared in MS Pharmaceutical Sciences

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify CNS active drug classes and origins of cholinergic and glutamatergic drugs based in part on structural aspects of the molecule

Audience: Graduate

2. List physicochemical properties of drugs that influence their ability to access the CNS

Audience: Graduate

3. Recall anatomical structures and molecular machinery that influences drug access to and efflux from the CNS

Audience: Graduate

4. Describe the major neurotransmitters of the central nervous system, including their physiologic role, distribution, synthesis, storage, and release

Audience: Graduate

5. Recall the principal mechanisms by which receptors affect cellular signaling in the Central Nervous System

Audience: Graduate

6. Compare and contrast the actions of psychoactive pharmaceuticals on cholinergic and glutamatergic signaling within the Central Nervous System

Audience: Graduate

7. Recognize the psychiatric conditions and target symptoms of these conditions that are commonly treated with cholinergic and glutamatergic pharmaceuticals

Audience: Graduate

8. Explain how the use of cholinergic and glutamatergic pharmaceuticals fits in with other non-pharmacologic approaches to clinical care for psychiatric conditions

Audience: Graduate

9. Describe common / serious adverse effects of cholinergic and glutamatergic pharmaceuticals and methods for preventing or minimizing their occurrence

Audience: Graduate

10. Match cholinergic and glutamatergic pharmaceutical agents to the psychiatric conditions they are commonly used to treat

Audience: Graduate

**PHARMACY 771 – CNS DRUG DESIGNS, ACTIONS, AND APPLICATIONS II**

2 credits.

Gain additional understanding of how chemical features can influence the biological activity of a molecule on molecular targets within the central nervous system, how alteration of signaling through these targets occurs and leads to physiologically relevant changes, and how major classes of pharmaceuticals acting on the central nervous system are applied in healthcare settings to improve patient outcomes. Integration between concepts arising at the chemical, molecular, cellular, systems, organism, and societal levels will be explored.

**Requisites:** PHARMACY 770

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify GABAergic, adrenergic, dopaminergic, serotonergic, and opioid drug classes and drug origins based in part on structural aspects of the molecule

Audience: Graduate

2. Compare and contrast the actions of GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceuticals on chemical and electrical signaling within the Central Nervous System

Audience: Graduate

3. Recognize the psychiatric conditions and target symptoms of these conditions that are commonly treated with GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceuticals

Audience: Graduate

4. Describe common / serious adverse effects of GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceuticals and methods for preventing or minimizing their occurrence

Audience: Graduate

5. Match GABAergic, adrenergic, dopaminergic, serotonergic, and opioid pharmaceutical agents to the psychiatric conditions they are commonly used to treat

Audience: Graduate

6. Assess challenges to development and use of psychoactive pharmaceuticals that are either shared across major neurotransmitter systems or unique to specific classes of drugs

Audience: Graduate

## PHARMACY 800 – RESEARCH ETHICS: SCIENTIFIC INTEGRITY AND THE RESPONSIBLE CONDUCT OF RESEARCH

2 credits.

Familiarizes graduate students with basic ethical issues associated with biomedical science research, taught via a case study approach. Content structured to meet NIH and NSF requirements for Responsible Conduct of Research (RCR) training. Students declared in the Pharmacology and Toxicology undergraduate program may enroll via consent of instructor.

**Requisites:** Declared in the Pharmaceutical Sciences PhD, Social and Administrative Sciences in Pharmacy PhD, or in the Pharmacy Master's program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** . Identify, analyze, and explain basic ethical issues and the responsible conduct of biomedical clinical and translational research on topics including but not limited to NIH mandated subjects

Audience: Graduate

. Communicate knowledge about ethical principles in scientific research effectively to a range of audiences

Audience: Graduate

## PHARMACY 801 – BIOETHICS AND SCIENTIFIC INTEGRITY

2 credits.

Explores basic ethical issues associated with biomedical science research, particularly as pertains to the development of drugs and emergent pharmaceutical therapies, such as psychoactive-assisted therapies.

**Requisites:** Declared in MS Pharmaceutical Sciences: Psychoactive Pharmaceutical Investigation or Capstone Certificate in Psychoactive Pharmaceutical Investigation

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe elements of proper scientific conduct and the institutional oversight that regulates scientific conduct

Audience: Graduate

2. Explain how socially responsible scientific practices can be used in scientific and medical research, scientific communication, and intellectual property

Audience: Graduate

3. Identify best practices for clinical research and the necessary elements to ensure patient safety, reliable data, and public benefit

Audience: Graduate

4. Define the different types of intellectual property and how it can both enable and stifle innovation

Audience: Graduate

5. Explain the elements of misconduct in scientific literature and publishing. Give examples of how this misconduct causes harm to both scientific reputations and public health

Audience: Graduate

6. Critique peer reviewed research from the psychedelic field using the ethical issues named in the above outcomes

Audience: Graduate

# PHARMACY PRACTICE (PHM PRAC)

## PHM PRAC 305 – CONSUMER SELF-CARE AND OVER-THE-COUNTER DRUGS

2 credits.

Provides learners with information regarding self-care of common, minor health conditions. Emphasis on: illness prevention, health condition symptoms, guidelines for over-the-counter product use, adverse effects and alcohol/drug interactions of over-the-counter products, when to request professional care.

**Requisites:** Not open to students declared in the Nursing, Physician Assistant, or Doctor of Pharmacy programs

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe signs and symptoms of common health conditions

Audience: Undergraduate

2. Explain guidelines for self-treatment with over-the-counter products

Audience: Undergraduate

3. Describe basic drug action & common side effects of selected over-the-counter products

Audience: Undergraduate

4. Explain appropriate use of nonprescription treatments

Audience: Undergraduate

5. Identify drug and alcohol interactions with over-the-counter products

Audience: Undergraduate

6. Discuss precautions or contraindications (including pregnancy issues) and adverse effects associated with over-the-counter treatments

Audience: Undergraduate

7. Illustrate when to request professional care

Audience: Undergraduate

8. Select appropriate measures to prevent health conditions

Audience: Undergraduate

## PHM PRAC 426 – PHARMACY PRACTICE EXPERIENCE I

1 credit.

Designed to introduce student pharmacists to many aspects of pharmacy practice. Participate in a wide-variety of activities to expose them to the role of the pharmacist and the many patient care opportunities that exist in and out of the community pharmacy practice setting. Observe pharmacists in a community pharmacy. Gain a broad understanding of the pharmacist's public health role. Actively participate in assigned teams in a longitudinal experience with an assigned older adult in the community. All of these experiences will be guided by a modified continuing professional development framework (prepare, plan, do, reflect).

**Requisites:** PHARMACY 423

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and enhance oral and written communication skills with patients/clients, peers, pharmacists, and other healthcare providers.

Audience: Graduate

2. Employ interpersonal and intergroup behaviors in order to collaborate effectively in a variety of situations and reflect on teams and teamwork by: a) describing the process of team development and the roles and practices of effective teams and b) reflecting on individual and team performance for performance improvement.

Audience: Graduate

3. Discover aspects of patient-centered care by reflecting on the patient's/client's perspective on health, social, economic and psychological needs.

Audience: Graduate

4. Apply social and behavioral principles and theories, including empathy, in the design of pharmacist-delivered services.

Audience: Graduate

5. Retrieve professional and lay literature in order to acquire information about therapeutic agents and to provide health information to patients and the public.

Audience: Graduate

6. Observe and participate in public health/health promotion activities in the community in order to identify causes of health disparities and increase awareness of community-based resources.

Audience: Graduate

7. Identify and discuss the various roles pharmacists assume in the health care system, especially their role in managing pharmacy operations and providing patient-centered care using the Pharmacists' Patient Care Process (PPCP).

Audience: Graduate

8. Display professional attitudes, habits, and values in accordance with ethical and social guidelines.

Audience: Graduate

**PHM PRAC 438 – NONPRESCRIPTION MEDICATIONS AND SELF-CARE**

2 credits.

Develop knowledge and skills needed to perform triage and make self-care and therapeutic recommendations for self-limiting health conditions commonly encountered in pharmacy practice.

**Requisites:** Declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss accessibility, affordability, trust, and empowerment regarding nonprescription products

Audience: Graduate

2. Employ the QuEST SCHOLAR-MAC triage process and the Pharmacists' Patient Care Process to self-care cases and consultations

Audience: Graduate

3. Recognize and respect patient experiences, cultural influences, health disparities, and social identity aspects during self-care cases and consultations

Audience: Graduate

4. Discuss laws and liability related to nonprescription products and self-care consultations

Audience: Graduate

5. Identify signs and symptoms of each health condition covered in this course

Audience: Graduate

6. Discuss exclusions for self-care related to each health condition covered in this course

Audience: Graduate

7. Differentiate self-care aspects given unique characteristics of the person being evaluated/advised (such as pediatrics, pregnancy & lactation, and older adults)

Audience: Graduate

8. Classify individual nonprescription medications into distinct medication classes based on therapeutic use

Audience: Graduate

9. Choose appropriate nonprescription medications and non-drug/general care measures for cases/situations

Audience: Graduate

10. Explain common adverse effects and drug interactions for nonprescription medications and methods for managing them

Audience: Graduate

11. Construct treatment plans, including key education points, for self-care of each health condition covered in this course

Audience: Graduate

**PHM PRAC 461 – PATHWAYS IN PHARMACY PRACTICE**

1 credit.

Introduction to, and exploration of, contemporary pharmacy practice settings and interprofessional practice, including opportunities for career advancement.

**Requisites:** Declared in Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe multiple pathways in contemporary pharmacy practice.

Audience: Graduate

2. Demonstrate knowledge of interprofessional teamwork and articulate its importance to pharmacy practice.

Audience: Graduate

3. Evaluate curricular options available to customize educational pathways.

Audience: Graduate

4. Evaluate co- and extra-curricular options available to advance post-graduation employment/training goals

Audience: Graduate

**PHM PRAC 462 – PROFESSIONAL DEVELOPMENT AND ENGAGEMENT I- DEVELOPING YOUR PROFESSIONAL IDENTITY**

1 credit.

Develop professional identity and become more engaged with the profession of pharmacy. Explore personal values, skills, and strengths and identify their implications for patient care and professional practice. Engage in continuous professional and interprofessional development to provide patient care that is safe and equitable. Prepare for future introductory pharmacy practice experiences.

**Requisites:** PHM PRAC 461**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify personal strengths and discuss the application of these strengths within contemporary pharmacy practice.  
Audience: Graduate

2. Recognize how personal identity, beliefs, attitudes, and biases may impact patient care and professional practice.  
Audience: Graduate

3. Differentiate individual role within an interprofessional team and demonstrate effective team communication and collaboration skills.  
Audience: Graduate

4. Explain the four components of continuous professional development and use these steps to create two SMART learning goals for completion during spring semester.  
Audience: Graduate

5. Identify areas of interest related to professional engagement and professional or patient advocacy; complete related co-curricular activities for reflection on personal and professional growth.  
Audience: Graduate

6. Describe emotional intelligence and demonstrate effective communication skills with peers and faculty to build professional relationships.  
Audience: Graduate

7. Describe experiential requirements and course policies in preparation for upcoming IPPE experiences.  
Audience: Graduate

8. Demonstrate reflective behaviors and goal settings for academic and professional growth.  
Audience: Graduate

**PHM PRAC 464 – PROFESSIONAL DEVELOPMENT AND ENGAGEMENT III: PROMOTING PROFESSIONAL ENGAGEMENT**

1 credit.

Develop professional identity and become more engaged with the profession of pharmacy. Demonstrate behaviors that regulate personal emotions and support well-being. Engage in continuous professional and interprofessional development to provide patient care that is safe and equitable. Prepare for future introductory pharmacy practice experiences.

**Requisites:** PHM PRAC 463**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the concepts of professional engagement, advocacy, resiliency, and burnout.

Audience: Graduate

2. Demonstrate behaviors that regulate personal emotions and exhibit student professionalism.  
Audience: Graduate

3. Identify areas of interest related to professional engagement and professional or patient advocacy; complete related co-curricular activities for reflection on personal and professional growth.  
Audience: Graduate

4. Engage diverse professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific health and healthcare needs of patients and populations.  
Audience: Graduate

5. Use the full scope of knowledge, skills, and abilities of professionals from health and other fields to provide care that is safe, timely, efficient, and equitable.  
Audience: Graduate

6. Engage in continuous professional and interprofessional development to enhance team performance and collaboration.  
Audience: Graduate

7. Describe experiential requirements and course policies in preparation for upcoming IPPE experiences.  
Audience: Graduate

8. Demonstrate reflective behaviors and goal settings for academic and professional growth.  
Audience: Graduate

### PHM PRAC 465 – PROFESSIONAL DEVELOPMENT AND ENGAGEMENT IV- EMBRACING CONTINUOUS PROFESSIONAL DEVELOPMENT

1 credit.

Develop professional identity and become more engaged with the profession of pharmacy. Engage in continuous professional and interprofessional development to provide patient care that is safe and equitable; utilize appropriate published evidence to answer clinical questions; and prepare for advanced pharmacy practice experiences.

**Requisites:** PHM PRAC 464

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Retrieve and interpret primary, secondary, and tertiary sources to answer a clinical question.

Audience: Graduate

2. Identify areas of interest related to professional engagement and professional or patient advocacy; complete related co-curricular activities for reflection on personal and professional growth.

Audience: Graduate

3. Summarize areas of financial planning for pharmacists to anticipate future goals and management decisions related to personal and professional finances.

Audience: Graduate

4. Engage diverse professionals who complement one's own professional expertise, as well as associated resources, to develop strategies to meet specific health and healthcare needs of patients and populations. (IPEC Roles and Responsibilities Core Competency 2.3).

Audience: Graduate

5. Describe experiential requirements and course policies in preparation for the APPE year.

Audience: Graduate

6. Demonstrate reflective behaviors and goal settings for academic and professional growth.

Audience: Graduate

### PHM PRAC/MEDICINE/NURSING/SOC WORK 467 – INTERPROFESSIONAL COLLABORATIVE PRACTICE IN HIV CARE

1 credit.

Gain foundational knowledge and skills in interprofessional collaborative practice and HIV care. Explore the roles of medicine, nursing, pharmacy, and social work in the HIV care continuum. Discuss quality team-based care as a member of an interprofessional student team.

**Requisites:** Declared in Nursing BSN (Traditional, Collaborative, Accelerated), Social Work BSW, Medicine MD, Pharmacy PharmD, or Social Work MSW.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history and epidemiology of the HIV epidemic.

Audience: Both Grad & Undergrad

2. Define Interprofessional Collaborative Practice (ICP) and describe the characteristics of effective ICP.

Audience: Both Grad & Undergrad

3. Describe the natural history of HIV disease with and without antiretroviral therapy (ART).

Audience: Both Grad & Undergrad

4. Discuss US Dept of Health and Human Services guidelines and recommendations for prevention, screening, diagnosis, treatment, and management of HIV infection and HIV-related diseases in the United States.

Audience: Both Grad & Undergrad

5. Describe the HIV care continuum including testing, entry and retention in care, and treatment including associated stigma and discrimination as barriers.

Audience: Both Grad & Undergrad

6. Discuss dimensions of wellness (emotional, environmental, financial, intellectual, occupational, physical, social and spiritual).

Audience: Both Grad & Undergrad

7. Identify potential co-morbid conditions in the HIV infected population.

Audience: Both Grad & Undergrad

8. Discuss stigma and discrimination as barriers to prevention, care, and treatment.

Audience: Both Grad & Undergrad

9. Discuss the history of the Ryan White Care Act and other federal and state policies and their current importance in HIV prevention and HIV care.

Audience: Both Grad & Undergrad

10. Identify HIV care needs and common health issues among high risk and vulnerable populations.

Audience: Both Grad & Undergrad

11. Develop a plan of care for an HIV positive individual as part of an interprofessional team.

Audience: Both Grad & Undergrad

12. Develop skills working with mixed teams including undergraduate students

Audience: Graduate

13. Demonstrate higher level skills in identifying and resolving barriers to

**PHM PRAC 468 – INTRODUCTION TO PHARMACY INFORMATICS**

1 credit.

Introduction to Pharmacy Informatics, the scientific field that utilizes a systems approach to medication-related data and information, including its acquisition, storage, analysis, and dissemination, in the delivery of optimal medication-related patient care and health outcomes.

**Requisites:** Declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define the basic terminology used in health informatics

Audience: Graduate

2. Describe the benefits and current constraints in using information and communication technology in healthcare

Audience: Graduate

3. Identify the reasons for the systemic processing of data, information, and knowledge in healthcare

Audience: Graduate

**PHM PRAC 469 – HEALTH EQUITY & SOCIAL JUSTICE FOR HEALTHCARE PROVIDERS**

2 credits.

Social justice seminar focusing on diversity, equity, inclusion, and leadership in the health professions. Focus on historical and contemporary issues in the healthcare system and equip students to develop the awareness, skills, and applied behaviors to impact healthcare inequities at the micro and macro level.

**Requisites:** Nursing BSN (Traditional, Accelerated or Collaborative), senior standing and declared in Health Promotion and Health Equity BS, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of social identities and cultural differences of self and others.

Audience: Both Grad & Undergrad

2. Gain intercultural competencies in personal and professional environments

Audience: Both Grad & Undergrad

3. Continue to develop and hone skills in critical thinking and interpersonal communication

Audience: Both Grad & Undergrad

4. Identify root causes of health disparities and develop skills and behaviors to help decrease them

Audience: Both Grad & Undergrad

5. Increase awareness of how social identities impact relationships to the healthcare system, access to health care, and patient/provider interactions

Audience: Both Grad & Undergrad

6. Integrate multiple definitions of health and health care into our professional philosophies

Audience: Both Grad & Undergrad

7. Reinforce leadership skills and develop opportunities for informal mentoring/support.

Audience: Graduate

### PHM PRAC 471 – EXPLORING PHARMACY PEER MENTOR SEMINAR

1 credit.

A mentoring, leadership and facilitation class for pharmacy student peer mentors who are assisting instructors of the Exploring Pharmacy courses

**Requisites:** Declared in Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate familiarity with college student development theory and how it applies to pre-pharmacy students

Audience: Graduate

2. Develop group facilitation, leadership, and mentoring skills

Audience: Graduate

3. Describe how peer mentoring supports personal and professional development

Audience: Graduate

4. Employ effective interpersonal communication skills

Audience: Graduate

5. Demonstrate the ability to provide verbal and written feedback on student work

Audience: Graduate

### PHM PRAC 490 – SELECTED TOPICS IN PHARMACY PRACTICE

1-4 credits.

Specialized Pharmacy subject matter of current interest to undergraduate and professional students.

**Requisites:** Declared in Doctor of Pharmacy program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### PHM PRAC 526 – PHARMACY PRACTICE EXPERIENCES II

1 credit.

The second experience of a three-year Introductory Pharmacy Practice Experiences (IPPEs) sequence. Provides opportunities to integrate learning from prior didactic courses such as The Role of the Pharmacist in the Public Health System, Managing Pharmacy Systems for Patient Care, current pharmacotherapy courses, and a previous community IPPE, into observation and discussion of the provision of patient care. Participate in a wide-variety of activities to expose them to the role of the pharmacist and patient care opportunities that exist in and out of the pharmacy practice setting. Focus on the provision of care in an institutional setting along with a variety of pharmacy practice settings which fall under an elective category. Continued exposure to the Pharmacist Patient Care Process (PPCP), which is a framework for providing patient care in a pharmacy practice setting.

**Requisites:** PHM PRAC 426

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers.

Audience: Graduate

2. Retrieve professional and lay literature in order to acquire information about therapeutic agents and to provide health information to patients, other health professionals and the public.

Audience: Graduate

3. Explore sources of information that can lead to appropriate clinical decision making (i.e. medical records, laboratory reports, and institutional policies and procedures).

Audience: Graduate

4. Display professional attitudes, habits, and values in accordance with ethical and social guidelines.

Audience: Graduate

5. Identify examples of bias in the healthcare setting and how they contribute to the quality of care provided to a patient.

Audience: Graduate

6. Develop an understanding of the pharmacist's role on the healthcare team and the complexities involved in interdisciplinary communications.

Audience: Graduate

7. Identify and discuss the various roles pharmacists assume in the health care system, especially their role in providing patient-centered care using the Pharmacist Patient Care Process (PPCP).

Audience: Graduate

**PHM PRAC 550 – FLUID AND ELECTROLYTE THERAPY**

2 credits.

Clinical management of disorders of fluid, electrolytes, and acid-base in patients with normal and abnormal homeostatic mechanisms. Also included is parenteral nutritional support.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the physiological processes that normally maintain fluid and electrolyte homeostasis

Audience: Undergraduate

2. Explain how disease processes result in a failure of homeostasis, leading to fluid and electrolyte imbalances, and the clinical manifestations of the imbalances

Audience: Undergraduate

3. Connect how basic concepts from chemistry, biochemistry, physical chemistry, physiology, and pathophysiology can be applied directly to the management of fluid and electrolyte disorders

Audience: Undergraduate

4. Utilize information from a patient's history, symptoms, physical and laboratory findings to evaluate the type of imbalance, the magnitude of the imbalance, and the urgency of the problem

Audience: Undergraduate

5. Propose treatment strategies that will stabilize urgent problems, utilize homeostatic mechanisms, correct imbalances, and avoid complications

Audience: Undergraduate

6. Review primary literature and authoritative review articles to obtain the most current ideas regarding optimal treatment of the disorders

Audience: Undergraduate

**PHM PRAC 553 – INTEGRATED PHARMACOTHERAPY SKILLS I**

1 credit.

Learn pharmacotherapeutic skills necessary to develop competence as a pharmacist to assume the responsibility to improve therapeutic patient outcomes related to medication use. Skills will include patient communication, identification and resolution of drug related problems, and documentation.

**Requisites:** Declared in Doctor of Pharmacy program with second year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients

Audience: Undergraduate

2. Perform steps of the pharmacists' patient care process (PPCP): collect, assess, plan, implement, and follow-up through documentation, communication, and collaboration in a patient-centered and efficient manner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards

Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient care as a member of an interprofessional team

Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence

Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society

Audience: Undergraduate

**PHM PRAC 554 – INTEGRATED PHARMACOTHERAPY SKILLS II**

1 credit.

Learn pharmacotherapeutic skills necessary to develop competence as a pharmacist to assume the responsibility to improve therapeutic patient outcomes related to medication use. Skills will include patient and provider communication, identification and resolution of drug related problems, and documentation.

**Requisites:** PHM PRAC 553 and 555

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients

Audience: Undergraduate

2. Perform steps of the pharmacist patient care process (PPCP): collect, assess, plan, implement, and follow-up through collaboration, communication, and documentation in a patient-centered and efficient manner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards

Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient-centered care as a member of an interprofessional team

Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence

Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society

Audience: Undergraduate

**PHM PRAC 555 – PHARMACOTHERAPY I**

3 credits.

Clinical application of medications in the management of various neurologic and psychiatric disease states. Assessment and therapeutic monitoring of drug therapy with emphasis on the concepts of drug selection, monitoring of drug effect and titration of regimen. Also incorporates issues regarding pharmacokinetics/dynamics, drug interactions, pharmacy practice, and patient education.

**Requisites:** Declared in the Doctor of Pharmacy program with second year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize the target symptoms of mental health and neurologic conditions commonly encountered in pharmacy practice including epilepsy, headache, multiple sclerosis, Parkinson's disease, depression, anxiety, bipolar disorder, schizophrenia, sleep disorders, and dementia.

Audience: Graduate

2. Classify individual psychotropic and neurologic medications into distinct medication classes based on mechanism of action and therapeutic use (i.e. antiepileptic drugs, selective serotonin reuptake inhibitors, tricyclic antidepressants, second-generation antipsychotics, benzodiazepine, dopaminergic agents, etc).

Audience: Graduate

3. Devise key education points that should be communicated to a patient prescribed a psychotropic or neurologic medication (including indication, administration/dosing, monitoring for safety and efficacy, interactions).

Audience: Graduate

4. Describe common/serious adverse effects of psychotropic and neurologic medications and methods for preventing and/or minimizing occurrence.

Audience: Graduate

5. Identify clinically relevant interactions between psychotropic and neurologic medications and other medications, substances, foods, and disease states.

Audience: Graduate

6. Create a treatment plan to minimize an individual patient's risk of experiencing poor outcomes related to psychotropic and neurologic medication interactions.

Audience: Graduate

7. Select a first-line medication regimen (including specific agent, formulation, dose and frequency) for an individual patient, targeted at treating a specific mental health or neurologic condition.

Audience: Graduate

8. Develop a monitoring plan (including timeframe and monitoring parameters) for an individual patient newly starting or restarting a psychotropic or neurologic medication.

Audience: Graduate

9. Formulate key questions or strategies to assess psychotropic or neurologic medication response in an individual patient.

Audience: Graduate

10. Provide a recommendation to adjust a psychotropic or neurologic medication regimen based on individual patient response.

Audience: Graduate

**PHM PRAC 556 – PHARMACOTHERAPY II**

3 credits.

Clinical application of medications in the management of various disease states. Assessment and therapeutic monitoring of disease states and drug therapy using the concepts of pharmacokinetics/dynamics, drug interactions, pharmacy practice and patient counseling. Topics include cardiovascular and pulmonary therapeutics.

**Requisites:** PHM PRAC 553 and 555

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define the goals of treatment - both overall and related to individual patient cases

Audience: Undergraduate

2. Design a therapeutic regimen consisting of both non-drug and drug elements appropriate for individual patients. In selecting drug therapy, consider the patient's age, disease, clinical condition/severity of illness, concomitant diseases and medications

Audience: Undergraduate

3. Select the initial dosing regimen and plan a dose titration scheme not exceeding maximal recommended doses (unless such excess is warranted)

Audience: Undergraduate

4. Provide the patient and health care personnel with information on the nature, likelihood and management of relevant (likely or severe) adverse effects

Audience: Undergraduate

5. Design a treatment monitoring plan incorporating symptoms, physical assessment, diagnostic test and laboratory findings as needed to document patient response and possible drug-related problems. Identify monitoring parameters, including endpoints/goals, timing and follow-up

Audience: Undergraduate

6. Explain the disease process, purpose of drug therapy, and other information pertinent to patient education in lay terms

Audience: Undergraduate

**PHM PRAC 559 – INTRODUCTION TO ANTIMICROBIAL PHARMACOTHERAPY**

1 credit.

Preparation for antimicrobial exposure and monitoring during internships to ensure safe and effective patient use of antimicrobials. Exposure to antibiotic-related drug information questions in the community and institution settings and review of primary literature to respond to these questions.

**Requisites:** Declared in Doctor of Pharmacy program with second year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Assess an antibiotic prescription in outpatient and inpatient settings for safety and efficacy based on patient-specific criteria.

Audience: Graduate

2. Identify components of a safe and effective antibiotic patient consultation.

Audience: Graduate

3. Recognize when a patient with an infection should be referred to a provider for evaluation.

Audience: Graduate

4. Monitor a patient's response to an antimicrobial.

Audience: Graduate

5. Demonstrate understanding of common infections.

Audience: Graduate

6. Identify first-line antimicrobials for common infections.

Audience: Graduate

7. Demonstrate competence in utilization of antimicrobial resources available through responding to drug information questions in the inpatient out outpatient settings.

Audience: Graduate

**PHM PRAC 560 – SEMINARS IN ANTIMICROBIAL STEWARDSHIP**

2 credits.

Gain foundational knowledge of the societal implications of antimicrobial resistance and the basic tenets of antimicrobial stewardship in multiple practice settings. Apply these tenets by developing antimicrobial stewardship intervention(s) and design measurement of associated outcomes.

**Requisites:** Declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the benefits of antimicrobial stewardship

Audience: Graduate

2. Describe how antimicrobial use in humans, agriculture, and animals contribute to the development of antimicrobial resistance.

Audience: Graduate

3. Discuss strategies to improve antimicrobial prescribing in outpatient, inpatient, and long-term care settings

Audience: Graduate

4. Describe components of an Antimicrobial Stewardship Program.

Audience: Graduate

5. Discuss how technology such as rapid diagnostics and electronic decision support tools can support stewardship initiatives and improve patient care.

Audience: Graduate

6. Apply Centers for Disease Control and Prevention Core Elements for a Stewardship Program to propose the development of a program in an inpatient, outpatient, or long-term care setting.

Audience: Graduate

7. Identify state-, national-, and international initiatives to improve patient outcomes related to inappropriate antimicrobial use.

Audience: Graduate

8. Design an educational antimicrobial stewardship intervention and outcomes measurements as a part of a team.

Audience: Graduate

9. Present a proposed policy or procedure to a mock Pharmacy and Therapeutics Committee as a part of a team.

Audience: Graduate

**PHM PRAC 570 – DRUG LITERATURE EVALUATION**

3 credits.

Fundamentals of drug literature and statistical evaluation to enable students to make decisions regarding the clinical use of drugs in their practice.

**Requisites:** Declared in Doctor of Pharmacy program with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Determine the strengths and weaknesses of clinical trials and observational research

Audience: Undergraduate

2. Analyze a guideline recommendation given a cited clinical trial

Audience: Undergraduate

3. Interpret the statistics presented in published literature

Audience: Undergraduate

4. Report the results of clinical trials in a coherent and articulate fashion using written communication

Audience: Undergraduate

**PHM PRAC/NURSING 605 – PHARMACOTHERAPEUTICS FOR ADVANCED PRACTICE NURSES**

3 credits.

Pharmacotherapeutics content and application for advanced practice nursing. Emphasis on selection of appropriate therapeutics, development of clinical decision-making skills, and examination of legal, ethical, and safety issues in prescribing medications.

**Requisites:** Declared in a School of Nursing graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Select appropriate therapeutics for specific acute and chronic health conditions using an evidenced based approach.

Audience: Graduate

2. Develop the clinical decision making skills necessary to individualize prescribing to meet patient's needs and resources.

Audience: Graduate

3. Examine the appropriate rules for issuing safe prescriptions and minimize errors.

Audience: Graduate

4. Describe the legal and ethical ramifications of prescribing medications.

Audience: Graduate

**PHM PRAC 610 – LEADERSHIP IN HEALTH-SYSTEM PHARMACY**

2 credits.

Designed to expose students to personal leadership qualities essential to operate efficiently within an integrated health care delivery system and advance the profession and practice of pharmacy. Students will gain a foundation to become future pharmacy leaders through an understanding of pharmacy's continual evolution in the changing health care environment.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Develop personal and practice-related leadership skills

Audience: Undergraduate

2. Apply health system management techniques

Audience: Undergraduate

3. Utilize skills needed to create, promote, and market the pharmacist's role within integrated health systems

Audience: Undergraduate

4. Provide a foundation for students/practitioners to become future pharmacy leaders through an understanding of our profession's role in the evolving health care environment

Audience: Undergraduate

5. Expose personal leadership qualities essential to operate effectively within an integrated health care delivery system and advance the profession and practice of pharmacy

Audience: Undergraduate

6. Develop skills in the following areas: project management, decision making, productivity management, quality methodologies, organizational design and behavior, and strategic planning

Audience: Undergraduate

7. Develop administrative acumen within the principles of human resource management, financial management, and pharmacy/health care reimbursement

Audience: Undergraduate

**PHM PRAC 611 – MEDICAL IMAGING FOR PHARMACISTS**

2 credits.

An overview of the imaging modalities offered in a Hospital Radiology Department. Completion of this course will help students understand the concepts of radiation, how it is used, and some of the tests and medications a patient may encounter when in the Radiology Department of a hospital.

**Requisites:** Declared in Doctor of Pharmacy program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the components of a nuclear pharmacy practice site

Audience: Undergraduate

2. Identify the most common types of radiation used in radiology and describe their physical characteristics

Audience: Undergraduate

3. Explain how radiation affects the human body and how regulatory agencies have set standards for protection

Audience: Undergraduate

4. Identify common imaging modalities in radiology

Audience: Undergraduate

5. Empathize with patients undergoing radiology procedures

Audience: Undergraduate

**PHM PRAC 612 – RADIOPHARMACEUTICALS**

2 credits.

A survey of the clinical diagnostic and therapeutic use of radioactive pharmaceuticals. Included is a review of nuclear physics, radiation biology, radiation chemistry, regulatory issues, and radiation safety, as these areas relate to the synthesis, formulation, dispensing, and administration of radiopharmaceuticals.

**Requisites:** PHM PRAC 611

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the knowledge learned in Medical Imaging 611 to explain the biological effects of radiation used clinically with FDA approved radiopharmaceuticals

Audience: Undergraduate

2. Identify common production methods for common radionuclides

Audience: Undergraduate

3. Explain the common indications of FDA approved radiopharmaceuticals in clinical Radiology

Audience: Undergraduate

4. Describe the pharmacokinetics and biodistribution of common radiopharmaceuticals

Audience: Undergraduate

**PHM PRAC 617 – HEALTH SYSTEM PHARMACY DATA ANALYSIS AND INFORMATICS**

2 credits.

Weekly lectures will familiarize the student with pharmacy information systems and the use of data and data processing systems for decision support. Students will complete a data analysis and report project to drive a decision in the hospital.

**Requisites:** Graduate standing or declared in the Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate how EHR systems store data, and how they impact patient care

Audience: Undergraduate

2. Elaborate on medication use systems and core components of pharmacy informatics

Audience: Undergraduate

3. Design and present solutions using analytical tools to effectively analyze and visualize data

Audience: Undergraduate

4. Communicate effectively with informatics teams and healthcare providers

Audience: Undergraduate

**PHM PRAC 625 – PHARMACY PRACTICE EXPERIENCES III**

2 credits.

Integrates didactic learning with active participation in a wide-variety of patient-care activities under the supervision of a pharmacist preceptor including medication reconciliation, patient consultation, complex medication reviews, documentation, therapeutic drug monitoring and calculations. Continued exposure to the Pharmacist Patient Care Process (PPCP), which is a framework for providing patient care in a pharmacy practice setting.

**Requisites:** PHM PRAC 526

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers

Audience: Graduate

2. Retrieve and interpret primary, secondary, and tertiary sources to answer clinical questions encountered by patients and other healthcare providers

Audience: Graduate

3. Identify, assess, and provide recommendations to patients and other healthcare providers to resolve medication- and health-related problems using the Pharmacist Patient Care Process

Audience: Graduate

4. Design or modify dosage regimens using pharmacokinetic data, plasma concentration, and factors that alter them

Audience: Graduate

5. Educate patients and caregivers on the safe and effective use of medications while considering the patient's perspective on health, social, economic, and psychological needs

Audience: Graduate

6. Observe and participate in pharmacy operations including accurate dispensing and preparation of a medication

Audience: Graduate

7. Apply legal principles to perform professional activities as a pharmacy intern

Audience: Graduate

8. Display professional attitudes, habits, and values in accordance with ethical and social guidelines

Audience: Graduate

9. Develop individualized goals and reflect on experiences through structured learning activities and assignments

Audience: Graduate

**PHM PRAC 626 – PHARMACY PRACTICE EXPERIENCES IV**

2 credits.

Integrates didactic learning with active participation in a wide-variety of patient-care activities under the supervision of a pharmacist preceptor including medication reconciliation, patient consultation, complex medication reviews, documentation, therapeutic drug monitoring and calculations. Continued exposure to the Pharmacist Patient Care Process (PPCP), which is a framework for providing patient care in a pharmacy practice setting.

**Requisites:** PHM PRAC 625

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and enhance oral and written communication skills with patients, pharmacists, and other healthcare providers

Audience: Graduate

2. Retrieve and interpret primary, secondary, and tertiary sources to answer clinical questions encountered by patients and other healthcare providers

Audience: Graduate

3. Identify, assess, and provide recommendations to patients and other healthcare providers to resolve medication- and health-related problems using the Pharmacist Patient Care Process

Audience: Graduate

4. Design or modify dosage regimens using pharmacokinetic data, plasma concentration, and factors that alter them

Audience: Graduate

5. Educate patients and caregivers on the safe and effective use of medications while considering the patient's perspective on health, social, economic, and psychological needs

Audience: Graduate

6. Observe and participate in public health activities in the community to address and promote health and wellness and increase awareness of community-based resources

Audience: Graduate

7. Select a marginalized population within the community and complete structured learning activity to identify factors that may impact the health of that population

Audience: Graduate

8. Observe and participate in pharmacy operations including accurate dispensing and preparation of a medication

Audience: Graduate

9. Apply legal principles to perform professional activities as a pharmacy intern

Audience: Graduate

10. Display professional attitudes, habits, and values in accordance with ethical and social guidelines

Audience: Graduate

11. Develop individualized goals and reflect on experiences through structured learning activities and assignments

Audience: Graduate

**PHM PRAC 628 – PRACTICE INNOVATION I**

1 credit.

Application of foundational knowledge of project management to hands-on experiences planning positive change within the health care system. Students will learn to think strategically, to critically assess a problem, identify solutions, and implement change. Students will integrate concepts in their practice area of interest with the project management skills learned in this course.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Serve as strategic decision makers able to effectively organize and prioritize needs within a health care organization to produce meaningful results

Audience: Graduate

2. Engage as agents for pharmacy practice advancement through successful project development, management, and assessment

Audience: Graduate

3. Articulate project management essentials inspired by the Project Management Institute, with application to unique areas of pharmacy practice

Audience: Graduate

4. Collaborate with project stakeholders to identify a problem in pharmacy practice, define end goals, and strategize solutions

Audience: Graduate

5. Utilize project management principles to develop a project plan, manage stakeholders, and lead meetings to develop, measure, and implement meaningful change

Audience: Graduate

**PHM PRAC 629 – PRACTICE INNOVATION II**

1 credit.

Expand upon the knowledge gained in Practice Innovation I to produce positive change within the health care system. Students will integrate concepts in their practice area of interest with the project management skills learned placing special emphasis on project implementation, measurement, and articulation of results.

**Requisites:** PHM PRAC 628

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Serve as strategic decision makers able to effectively organize and prioritize needs within a health care organization to produce meaningful results

Audience: Graduate

2. Engage as agents for pharmacy practice advancement through successful project development, management, and assessment

Audience: Graduate

3. Articulate project management essentials inspired by the Project Management Institute, with application to unique areas of pharmacy practice

Audience: Graduate

4. Collaborate with project stakeholders to identify a problem in pharmacy practice, define end goals, and strategize solutions

Audience: Graduate

5. Utilize project management principles to develop a project plan, manage stakeholders, and lead meetings to develop, measure, and implement meaningful change

Audience: Graduate

**PHM PRAC 650 – COMPREHENSIVE IMMUNIZATION DELIVERY**

1 credit.

Addresses vaccine-preventable diseases and the implementation of pharmacy-based immunization delivery programs.

**Requisites:** Declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply the principles of immunization

Audience: Graduate

2. Recommend vaccinations for patients based on their ages, concurrent illnesses or conditions, and lifestyle

Audience: Graduate

3. Describe how to implement and maintain a pharmacy-based immunization service

Audience: Graduate

4. Develop vaccine administration skills

Audience: Graduate

**PHM PRAC 653 – INTEGRATED PHARMACOTHERAPY SKILLS III**

1 credit.

Learn and build upon pharmacotherapeutic skills necessary to develop competence as a pharmacist to assume the responsibility to improve therapeutic patient outcomes related to medication use. Skills will include patient and healthcare provider communication, identification and resolution of drug related problems, documentation, and complex problem solving skills.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients

Audience: Undergraduate

2. Perform steps of the pharmacists' patient care process (PPCP): collect, assess, plan, implement, and follow-up through documentation, communication, and collaboration in a patient-centered and efficient manner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards

Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient care as a member of an interprofessional team

Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence

Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society

Audience: Undergraduate

**PHM PRAC 654 – INTEGRATED PHARMACOTHERAPY SKILLS IV**

1 credit.

Learn and build upon pharmacotherapeutic skills necessary to develop competence as a pharmacist to assume the responsibility to improve therapeutic patient outcomes related to medication use. The course will focus on building complex problem solving skills including the integration of patient and provider communication, documentation, and evaluation of integrated patient cases with a secondary focus on patient profile reviews and comprehensive medication review and assessment.

**Requisites:** PHM PRAC 653 and 655

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use therapeutic decision-making skills and drug information to apply clinical knowledge to address drug-related problems and promote health improvement, wellness, and disease prevention in cooperation with individual patients

Audience: Undergraduate

2. Perform steps of the pharmacists' patient care process (PPCP): collect, assess, plan, implement, and follow-up through documentation, communication, and collaboration in a patient-centered and efficient manner as consistent with the University of Wisconsin – Madison School of Pharmacy's technical standards

Audience: Undergraduate

3. Acquire the necessary skills and experience to provide patient care as a member of an interprofessional team

Audience: Undergraduate

4. Begin to develop skills and commitment for life-long learning in order to maintain professional competence

Audience: Undergraduate

5. Demonstrate professionalism by exhibiting behaviors and values that are consistent with the trust given to the profession by patients, other health care providers, and society

Audience: Undergraduate

**PHM PRAC 655 – PHARMACOTHERAPY III**

3 credits.

Clinical application of medications in the management of various disease states. Assessment and therapeutic monitoring of disease states and drug therapy using the concepts of pharmacokinetics/dynamics, drug interactions, pharmacy practice and patient counseling. Topics include various renal, endocrine, gastrointestinal, rheumatologic and immunologic disease therapeutics.

**Requisites:** PHM PRAC 554 and 556

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define the goals of treatment - both overall and related to individual patient cases

Audience: Undergraduate

2. Design a therapeutic regimen consisting of both non-drug and drug elements appropriate for individual patients. In selecting drug therapy, consider the patient's age, disease, clinical condition/severity of illness, concomitant diseases and medications

Audience: Undergraduate

3. Select the initial dosing regimen and plan a dose titration scheme not exceeding maximal recommended doses (unless such excess is warranted)

Audience: Undergraduate

4. Provide the patient and health care personnel with information on the nature, likelihood and management of relevant (likely or severe) adverse effects

Audience: Undergraduate

5. Design a treatment monitoring plan incorporating symptoms, physical assessment, diagnostic test and laboratory findings as needed to document patient response and possible drug-related problems. Identify monitoring parameters, including endpoints/goals, timing and follow-up

Audience: Undergraduate

6. Explain the disease process, purpose of drug therapy, and other information pertinent to patient education in lay terms

Audience: Undergraduate

**PHM PRAC 656 – PHARMACOTHERAPY IV**

3-4 credits.

Clinical application of medications in the management of various disease states. Assessment and therapeutic monitoring of disease states and drug therapy using the concepts of pharmacokinetics/dynamics, drug interactions, pharmacy practice and patient counseling. Topics include various oncology and infectious disease therapeutics. A one credit elective option will be offered to students and involves academic leadership skill development. Student leaders will lead discussion activities which involve clinical cases, scientific literature review, oncology literature discussions.

**Requisites:** PHM PRAC 653, 655 and PHM SCI 623

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use patient and laboratory evidence to design initial regimens and tailor regimens based on patient monitoring and guidelines for specific infections

Audience: Undergraduate

2. Examine patients' antimicrobial regimens to minimize potential adverse events and drug-drug interactions

Audience: Undergraduate

3. Demonstrate the basic biology, microbiology and epidemiology of microorganism and antimicrobial spectra to apply to patients with infectious diseases

Audience: Undergraduate

4. Implement appropriate antimicrobial stewardship principles for safe and effective antimicrobial use in patients and populations

Audience: Undergraduate

5. Design a therapeutic regimen consisting of both non-drug and drug elements appropriate for individual cancer patients receiving a specified antineoplastic drug therapy regimen. In selecting drug therapy, consider the patient's age, disease, clinical condition/severity of illness, concomitant diseases and medications

Audience: Undergraduate

6. Describe current recommendations for decreasing the risk of developing cancer

Audience: Undergraduate

7. Describe current recommendations for cancer screening, including physical examinations, serology, and genetic screening

Audience: Undergraduate

8. Describe factors that affect the pharmacokinetics of antineoplastic chemotherapy, and the extent to which monitoring renal, hepatic, or drug concentrations can be used to titrate or empirically adjust the drug regimen

Audience: Undergraduate

9. Describe how cytotoxic medications should be prepared and how they should be safely disposed in the inpatient and outpatient environment

Audience: Undergraduate

10. Describe how reimbursement issues affect the selection of drug and administration of the drug in the outpatient and inpatient environment, and how pharmacy services can facilitate access to the intended therapy

Audience: Undergraduate

**PHM PRAC 657 – SEMINARS IN PEDIATRIC PHARMACOTHERAPY**

2 credits.

Addresses the selection, dosing, and monitoring of drugs in children from birth to adolescence. Drugs in pregnancy and lactation are also addressed. The course combines lecture, small group work, and discussion.

**Requisites:** PHM PRAC 656 or concurrent enrollment

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the differences in development of drug distribution and elimination in children from birth to adulthood.

Audience: Undergraduate

2. Use the available literature to recommend a dose of drug for a child based upon age, weight, and organ function.

Audience: Undergraduate

3. Describe peri-partum diagnostic and therapeutic interventions to prevent or treat infections or to delay or stimulate delivery.

Audience: Undergraduate

4. Describe how the prevention and treatment of diabetes may differ between children and adults.

Audience: Undergraduate

5. Describe drugs and doses used for sedation and analgesia in children

Audience: Undergraduate

6. Describe risk factors and common treatment approaches for fluid and electrolyte repletion in children.

Audience: Undergraduate

7. Describe the nature of treatments for pediatric-predominant cancers, including ways in which chemotherapy or other treatment-related toxicities can be minimized.

Audience: Undergraduate

8. Interact with the faculty as an opportunity to learn more about pediatric pharmacy, and various pediatric residency opportunities (several of the presenters are pediatric specialty residents).

Audience: Undergraduate

**PHM PRAC 659 – INFECTIOUS DISEASES PHARMACOTHERAPY IN THE ACUTE CARE SETTING**

1 credit.

Antimicrobial Stewardship has emerged as an important component of patient care in both inpatient and outpatient settings. Pharmacists can play an essential role in Antimicrobial Stewardship through application of knowledge in pharmacology, therapeutics, pharmacokinetics, microbiology, and biotechnology, most often expressed in the acute care setting, where patient health status and therapeutic decision making are ongoing. Addresses the ever-changing skill set required for pharmacists to understand therapeutic options and make effective interventions in the care of infected patients. Emphasis is placed on new treatment modalities as well as challenging the status quo of conventional management principles.

**Requisites:** PHM PRAC 655

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply knowledge of concepts presented in the required Infectious Diseases Pharmacotherapy course to foster skills required in conducting an antimicrobial stewardship program.

Audience: Graduate

2. Apply principles of antimicrobial pharmacology and clinical management of diseases in patients treated in a hospital setting that are not covered in required coursework, at a point in the curriculum when students are near the start of clinical rotations.

Audience: Graduate

3. Recognize topics subject to dynamic changes and that may not be reflected in currently published guidelines.

Audience: Graduate

4. Enhance ability to evaluate published literature in infectious diseases.

Audience: Graduate

5. Apply algorithmic strategies to drug selection, dosing, and monitoring.

Audience: Graduate

6. Generate solutions for patient-specific care via case-based discussion.

Audience: Graduate

**PHM PRAC 668 – SEMINARS IN CRITICAL CARE**

2 credits.

Addresses the pharmacotherapeutic management of various critical care conditions. Guest lectures, primary literature review, patient case discussions, student-led presentations, and small group work will be utilized.

**Requisites:** PHM PRAC 550, 555, 556, and 655

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically evaluate published clinical research and apply evidence-based medicine to individual patients

Audience: Graduate

2. Design a therapeutic regimen consisting of both non-drug and drug therapy that is appropriate for an individual patient based on clinical condition (severity of illness), concomitant diseases and medications

Audience: Graduate

3. Analyze medication orders and determine appropriateness for an individual patient

Audience: Graduate

**PHM PRAC 670 – VETERINARY THERAPEUTICS**

1-2 credits.

Presentation and discussion of topics that involve the therapeutic management of disease states of companion, food, and exotic animals. Emphasis is placed upon the principles of drug regulations, drug therapy, toxicology, and available commercial products.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHM PRAC 671 – INTRODUCTION TO ACADEMIC PHARMACY I**

2 credits.

Introduces students to pharmacy faculty responsibilities. Students will participate in a variety of activities to expose them to the role of the pharmacy educator and will actively participate in the education of DPH-1 or DPH-2 students.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Discuss a variety of remote and face-to-face instructional methodologies and assessment strategies

Audience: Undergraduate

2. Evaluate the merits and pitfalls of manuscripts in the area of teaching and learning

Audience: Undergraduate

3. Create and co-lead a group journal club discussion on an educational journal

Audience: Undergraduate

4. Develop and deliver an education-based topic discussion within the context of pharmacy education

Audience: Undergraduate

5. Design, evaluate, and/or analyze a pharmacy-related educational activity in conjunction with your mentor

Audience: Undergraduate

6. Report and critique a student-teaching interaction

Audience: Undergraduate

7. Demonstrate collaborative interpersonal and intergroup behaviors effective in various teaching situations

Audience: Undergraduate

**PHM PRAC 673 – SEMINARS IN GLOBAL HEALTH PHARMACY**

1 credit.

Explores the contribution of pharmacy and pharmacists to global health initiatives. Topics will be selected and presented by course faculty and students.

**Requisites:** Declared in Doctor of Pharmacy program

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Explain and interpret the Sustainable Development Goals from a healthcare professional/pharmacist perspective

Audience: Undergraduate

2. Explain the Global Pharmacy Practice Standards and compare these standards to actual practice around the world

Audience: Undergraduate

3. Identify ways that international organizations are working to improve pharmacy practice and education globally

Audience: Undergraduate

4. Compare and contrast issues raised in the classroom from an international and domestic perspective

Audience: Undergraduate

5. Identify and important topic related to this course, retrieve appropriate literature, post relevant readings in advance for class, and present a seminar (lecture and discussion) on the topic

Audience: Undergraduate

**PHM PRAC/NURSING 674 – SEMINARS IN INTERPROFESSIONAL MENTAL HEALTH CARE**

2 credits.

Addresses the team-based and patient-centered care of persons with mental health conditions. A special focus will be put on the management of psychotropic medication regimens. A combination of lecture, discussion, and small group work will be utilized.

**Requisites:** PHM PRAC 555

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Assess an individual person and his/her psychotropic medication regimen to identify potential and actual drug related problems

Audience: Undergraduate

2. Develop and recommend an appropriate therapeutic regimen consisting of both non-drug and drug therapy recommendations to facilitate optimal care and outcomes for an individual person

Audience: Undergraduate

3. Design an appropriate monitoring plan in collaboration with the person you are serving in order to appropriately evaluate the individual person's treatment plan

Audience: Undergraduate

4. Apply evidence-based care to practice by critically reviewing current published clinical research and guidelines

Audience: Undergraduate

5. Support persons in successfully navigating the wider mental health care system

Audience: Undergraduate

6. Apply ethical and legal concepts and processes in the analysis of clinical situations

Audience: Undergraduate

**PHM PRAC 677 – SEMINARS IN CARDIOLOGY**

2 credits.

Seminars, primary literature review, and patient case discussions on selected cardiovascular conditions, including: ACS, HF, valvular disease, cardiac devices, hemodynamic monitoring, heart transplantation, arrhythmias, ACLS, pulmonary arterial hypertension, stroke, and metabolic syndrome.

**Requisites:** Declared in Doctor of Pharmacy program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically review published clinical research so as to apply evidence based medicine principles to future practice

Audience: Undergraduate

2. Describe clinical applications of patient care from the perspectives of other disciplines

Audience: Undergraduate

3. Design a therapeutic regimen consisting of both non-drug and drug therapy that is appropriate for an individual patient based on clinical condition (severity of illness), concomitant diseases and medications

Audience: Undergraduate

**PHM PRAC 678 – SEMINARS IN ONCOLOGY**

1 credit.

Addresses practical issues surrounding the optimization of medication use in the treatment of patients with cancer. Practical solutions to the everyday challenges of providing exceptional clinical oncology care in a safe, fiscally responsible manner to optimize clinical outcomes of patients with cancer. Included subjects range across clinical, operational, and practice management issues that affect oncology pharmacy practice. These subjects include: pharmacogenomics, cell therapies, oncology research, survivorship, oral chemotherapy management, hazardous drug handling, value of cancer care, specialty pharmacy and Risk Evaluation and Mitigation Strategy (REMS) processes, and transitions of care. Although focused on oncology patients, offers practical exposure to issues confronting the care of patients with other types of diseases.

**Requisites:** Declared in the Doctor of Pharmacy Program with third year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the steps needed to safely provide parenteral cytotoxic agents to an inpatient or outpatient (clinic) setting.

Audience: Graduate

2. Describe how to address patient access to oncology medications, including management of drug shortages.

Audience: Graduate

3. Describe how to seek financial or product support for patients prescribed expensive medications.

Audience: Graduate

4. Demonstrate how to converse and support patients and/or caregivers struggling with a diagnosis of incurable or terminal disease.

Audience: Graduate

5. Describe how to develop a de novo clinical pharmacy service in an oncology clinic.

Audience: Graduate

**PHM PRAC 679 – ADVANCED DIABETES MANAGEMENT**

2 credits.

Enhanced education on diabetes topics; current approaches to the medical management of patients with diabetes including the pharmacist's role in diabetes education and coaching/case management.

**Requisites:** PHM PRAC 655 or (NURSING 312 and NURSING 422)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe interprofessional roles and responsibilities of various health care providers in delivering care to people with diabetes

Audience: Undergraduate

2. Discuss economic, ethnic, racial and age diversity aspects related to health care for people living with diabetes

Audience: Undergraduate

3. Construct assessments and plans for diabetes case studies including lifestyle considerations, medications, medication delivery devices, and diabetes complications

Audience: Undergraduate

4. Discuss issues and experiences faced by people living with diabetes

Audience: Undergraduate

5. Critique media reports related to diabetes

Audience: Undergraduate

6. Communicate diabetes-related topics through oral presentation and discussion facilitation

Audience: Undergraduate

**PHM PRAC 691 – SENIOR THESIS**

2 credits.

Individual study for seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**PHM PRAC 692 – SENIOR THESIS**

2 credits.

Individual study for seniors completing theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**PHM PRAC 699 – ADVANCED INDEPENDENT STUDY**

0-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHM PRAC 740 – ACUTE PHARMACEUTICAL CARE CLERKSHIP**

1-6 credits.

Integrates prior didactic course work in pharmacotherapy, pathophysiology, and drug literature evaluation into the provision of pharmaceutical care to hospitalized patients. Participate in the provision of direct pharmaceutical care, by monitoring drug therapy, providing patient counseling, and providing drug information and pharmacokinetic dosing recommendations for patients. Gain experience and insight into health education by interacting with other health professionals and health-professions students.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Effectively, reliably, and accurately acquire and document a best possible medication history from hospitalized patients.

Audience: Graduate

2. Effectively, reliably, and accurately provide medication consultation to hospitalized patients.

Audience: Graduate

3. Effectively and systematically apply the 5 phases of the Pharmacists Patient Care Process (PPCP) to the care of the hospitalized patient.

Audience: Graduate

4. Demonstrate the ability to prioritize the patient's drug and medical-related problems.

Audience: Graduate

5. Document the care of the hospitalized patient using the PPCP model.

Audience: Graduate

6. Provide a timely, thorough, and accurate response to drug information inquiries that demonstrates critical thinking, problem solving skills, and communication skills.

Audience: Graduate

7. Formally present a patient case by following a systematic presentation framework (rubric) in order to demonstrate the ability to identify relevant patient information, organize the information, critically appraise the treatment of the patient, and cogently present the information to an audience

Audience: Graduate

8. Participate as a contributing member of an interprofessional healthcare team in evidence-based therapeutic decision-making.

Audience: Graduate

9. Recommend appropriate medication dosing utilizing practical pharmacokinetic principles.

Audience: Graduate

10. Explain and document the pharmacy's role in medical emergencies and the indications, doses and administration guidelines for medications found in the institution's emergency box (cart).

Audience: Graduate

11. Provide care to a diverse patient population.

Audience: Graduate

12. Report medication errors

Audience: Graduate

## PHM PRAC 741 – AMBULATORY PHARMACEUTICAL CARE CLERKSHIP

1-6 credits.

Integrates prior course work in pharmacotherapy, pathophysiology, and drug literature evaluation into the provision of pharmaceutical care to ambulatory patients. Activities include conducting patient interviews and assessments, providing drug information to patients and health professionals, and monitoring drug therapy in ambulatory settings.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Patient-centered care –provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities).

Audience: Graduate

2. Medication use systems management –manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.

Audience: Graduate

3. Health and wellness –design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness.

Audience: Graduate

4. Population-based care –describe how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices.

Audience: Graduate

## PHM PRAC 742 – HEALTH-SYSTEM PHARMACY PRACTICE CLERKSHIP

1-6 credits.

Integrates prior didactic course work into the provision of care and the development and delivery of services for hospitalized patients. Exposure to the five pillars of the medication use system (prescribing, transcribing, dispensing, administering, monitoring), plus procurement/storage along with the hospital services and processes that support them. Includes exposure to hospital-based services/programs/committees such as investigational drugs, Pharmacy and Therapeutics, quality/performance improvement (MUE), technologies, and personnel management. Exposure to best-practices, regulatory, legal, and accreditation standards/requirements that influence the quality and delivery of care to hospitalized patients.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Participate in and critically assess the medication use system including drug procurement, safe storage, management of drug shortages, disposal of hazardous waste, product preparation, prescribing, transcribing, dispensing, administering and monitoring of medication use with an emphasis on safety, quality improvement, and best practices.

Audience: Graduate

2. Safely and effectively participate in the medication dispensing and drug distribution systems.

Audience: Graduate

3. Observe and where appropriate actively apply principles of sterile technique and participate in the preparation of sterile products.

Audience: Graduate

4. Observe and assess the use of technologies used to distribute and administer medications to patients.

Audience: Graduate

5. Participate in medication use evaluation, therapeutic protocol development, and development of clinical drug use guidelines as aspects of drug formulary management.

Audience: Graduate

6. Observe and critically assess the activities of specialty services (committees) such as P and T, IRB, Infection control, etc and report on their observations.

Audience: Graduate

7. Participate in pharmacy management meetings and self-reflect on personal strengths and challenges of being a pharmacy manager.

Audience: Graduate

8. Apply the principles of continuing professional development through reflection, completion of a personal learning plan and the activity tracker.

Audience: Graduate

**PHM PRAC 743 – COMMUNITY PHARMACY PRACTICE CLERKSHIP**

1-6 credits.

Develops the skills and judgment necessary to apply the knowledge gained in the basic and clinical sciences to specific patient care situations. In addition, demonstrates the philosophy that clinical (APPE) and distributive pharmaceutical services should be patient oriented and integrated in contemporary ambulatory practice.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Patient-centered care –provide patient-centered care as the medication expert using the pharmacist’s patient care process (collect, assess, plan, implement, monitor, evaluate, and document).

Audience: Graduate

2. Medication use systems management –manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems

Audience: Graduate

3. Health and wellness –design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness.

Audience: Graduate

4. Population-based care –describe how population-based care influences patient-centered care and the development of practice guidelines and evidence-based best practices.

Audience: Graduate

**PHM PRAC/NURSING/SOC WORK 746 – INTERDISCIPLINARY CARE OF CHILDREN WITH SPECIAL HEALTH CARE NEEDS**

3 credits.

Interdisciplinary team care of children with special health care needs across the trajectory of illness presented within the context of family, culture, social determinants of health, community, and healthcare policy. Students introduced to interdisciplinary, collaborative, family-centered team care.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the interdisciplinary team approach to the care of the child with a chronic illness from the perspective of a child with a chronic illness and their family, community care providers, and each of the disciplines involved, including the student’s own.

Audience: Graduate

2. Demonstrate an understanding of issues relating to larger social and cultural context for the care of children with chronic illness.

Audience: Graduate

3. Identify and assess healthcare delivery systems and financing for children with chronic illness.

Audience: Graduate

4. Describe ways to advocate for pediatric patients with chronic disease and their families at an individual level and a policy level.

Audience: Graduate

**PHM PRAC 760 – ELECTIVE PHARMACY PRACTICE CLERKSHIP**

1-6 credits.

Experiential course that integrates prior course work in pharmacotherapy, pathophysiology, and drug literature evaluation into the provision of pharmaceutical care to ambulatory patients. Students will conduct patient interviews and assessments, provide drug information to patients and health professionals, and monitor drug therapy in ambulatory settings.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Provide patient care in cooperation with patients and members of an interprofessional health care team based on sound therapeutic principles and evidence-based data, considering legal, ethical, social, cultural, economic and professional issues, emerging technologies and evolving biomedical, pharmaceutical, social/behavioral/administrative and clinical sciences that may impact therapeutic outcomes

Audience: Graduate

2. Manage and use resources of the health care system, in cooperation with patients, prescribers, other health care providers, and administrative and supportive personnel, to promote health; to provide, assess, and coordinate safe, accurate, and time-sensitive medication distribution; and to improve therapeutic outcomes of medication use

Audience: Graduate

3. Promote health improvement, wellness, and disease prevention in cooperation with patients, communities, at-risk populations, and other members of an interprofessional team of health care providers

Audience: Graduate

**PHM PRAC 761 – INTERNATIONAL PHARMACY CLERKSHIP**

1-6 credits.

Gain immersive pharmacy practice experience in a different country.

Learn about global health, medication use, health systems, and pharmacy practice with a health equity lens.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe social, political, environmental, and economic factors that may contribute to health and the burden of disease in the country the student is visiting (host country).

Audience: Graduate

2. Describe the prevalence of communicable and noncommunicable diseases in the host country and health disparities within the host country.

Audience: Graduate

3. Explain the medication use system in the host country.

Audience: Graduate

4. Identify similarities and differences in pharmacy patient care services, interprofessional collaboration, and drug information resources in the host country compared to student's home country.

Audience: Graduate

5. Compare and contrast public (government) and private health systems and funding sources in the host country.

Audience: Graduate

6. Assess the strengths and opportunities for pharmacy patient care services in the host country.

Audience: Graduate

**PHM PRAC 764 – VETERINARY PHARMACY CLERKSHIP**

1-6 credits.

Practical experience in a veterinary medicine environment with emphasis on the drug treatment of diseases in animals.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Provide patient care collaborating with clients/ animal owners, veterinarians, veterinary technicians and other members of the veterinary healthcare team.

Audience: Graduate

2. Manage and use resources of the healthcare system to ensure appropriate medication therapy for veterinary patients.

Audience: Graduate

3. Develop proficiency with medication order fulfillment.

Audience: Graduate

**PHM PRAC 769 – CLINICAL RESEARCH AND PHARMACY INVESTIGATION CLERKSHIP**

1-6 credits.

Gain experience with clinical and translational research in a mentored situation. Learn study design, laboratory techniques, statistical analysis, manuscript preparation, and ethical principles of research.

**Requisites:** Declared in Doctor of Pharmacy program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe different study designs and methods

Audience: Graduate

2. Review and apply statistical tests

Audience: Graduate

3. Apply laboratory techniques

Audience: Graduate

4. Prepare and write a manuscript

Audience: Graduate

**PHM PRAC 961 – GRADUATE SEMINAR IN HEALTH-SYSTEM PHARMACY**

1 credit.

Specialized subject matter of current interest to graduate students in the MS Pharmacy Administration program.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PHM PRAC 962 – GRADUATE SEMINAR IN HEALTH-SYSTEM PHARMACY**

1 credit.

Specialized subject matter of current interest to graduate students in the MS Pharmacy Administration program.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHM PRAC 999 – ADVANCED INDEPENDENT STUDY**

1-12 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOSOPHY (PHILOS)****PHILOS 101 – INTRODUCTION TO PHILOSOPHY**

3-4 credits.

Introduction to various philosophical questions and to the strategies that philosophers use to address these.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHILOS 104 – SPECIAL TOPICS IN PHILOSOPHY FOR FRESHMEN**

3 credits.

Selected topics addressing various philosophical questions and to the strategies that philosophers use to address these.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHILOS 106 – STUDY ABROAD IN PHILOSOPHY**

2-4 credits.

Treatment of a topic in philosophy in a course offered at a university outside the United States.

**Requisites:** None

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 1999

**PHILOS 141 – THE MEANING OF LIFE**

3-4 credits.

Introduces the subject of philosophy through a question that is familiar to nearly every person: What is the meaning of life? This question will be approached through reading both classical philosophical works and the works of contemporary philosophers.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHILOS 206 – STUDY ABROAD IN PHILOSOPHY**

2-4 credits.

Treatment of a topic in philosophy in a course offered at a university outside the United States.

**Requisites:** None**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2001**PHILOS 210 – REASON IN COMMUNICATION**

3-4 credits.

Argument in familiar contexts; emphasis upon developing critical skills in comprehending, evaluating, and engaging in contemporary forms of reasoning, with special attention to the uses of argument in mass communication media.

**Requisites:** MATH 96 or placement into MATH 141**Course Designation:** Gen Ed – Quantitative Reasoning Part A

Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHILOS 211 – ELEMENTARY LOGIC**

3-4 credits.

The formal characteristics of logical truth and inference.

**Requisites:** Sophomore standing and satisfied Quantitative Reasoning (QR) A requirement**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Ability to think critically about arguments.

Audience: Undergraduate

**PHILOS 241 – INTRODUCTORY ETHICS**

3-4 credits.

Nature of moral problems and of ethical theory, varieties of moral skepticism, practical ethics and the evaluation of social institutions.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHILOS 243 – ETHICS IN BUSINESS**

3-4 credits.

Case studies of moral issues in business; types or reasons appealed to for settlement.

**Requisites:** Sophomore standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHILOS 244 – INTRODUCTORY ARTIFICIAL INTELLIGENCE (AI) AND DATA ETHICS**

3-4 credits.

Introduction to contemporary moral and political issues in Artificial Intelligence (AI) and Data Ethics, integrating urgent problems, controversies, and continuously updated case studies. Introduces basic technical concepts such as the bias/variance tradeoff, the reference class problem, and inductive risk. Covers topics such as data and privacy, the impacts of automation on society, and the use of algorithms in medicine and criminal law.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Critically evaluate ethical arguments in relation to data and artificial intelligence (AI).

Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically by identifying explicit and implicit background assumptions, and by understanding which conclusions necessarily follow from them.

Audience: Undergraduate

3. Discuss controversial ethical and social questions respectfully and with the aim of uncovering the truth.

Audience: Undergraduate

4. Identify and evaluate the ethical, legal, and political implications of artificial intelligence (AI), as well as their historical and societal context.

Audience: Undergraduate

### PHILOS 304 – TOPICS IN PHILOSOPHY: HUMANITIES

3-4 credits.

Examination of selected topics in philosophy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### PHILOS 320 – PHILOSOPHY OF SCIENCE

3-4 credits.

Focus on various central questions in philosophy of science, potentially including topics from the history of philosophy of science as well as topics important to contemporary philosophy of science. Topics might include: What is science? How does scientific explanation work? How do scientists generate and use evidence? What is the relationship between science and social or political values? What are the aims of science? May also include discussion of specific subdisciplines of philosophy of science, such as philosophy of biology, philosophy of physics, philosophy of medicine, and more.

**Requisites:** Sophomore standing. Not open to students with credit for PHILOS 220.

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Think critically about philosophical and scientific arguments.

Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.

Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.

Audience: Undergraduate

4. Explain several central concepts in science and philosophy of science, such as explanation, confirmation, underdetermination, objectivity, (anti)realism, scientific revolutions, pluralism, reductionism, models, measurement, data, research ethics

Audience: Undergraduate

5. Reflect on their own society's relationship to science or scientific advancements

Audience: Undergraduate

6. Synthesize and understand multiple perspectives in philosophy of science or other science studies disciplines (e.g., history and sociology of science)

Audience: Undergraduate

### PHILOS 340 – 19TH CENTURY PHILOSOPHY: IDEALISM AND ITS CRITICS

3 credits.

Examine debates about the legacy of idealism by discussing some of their most familiar interlocutors - Hegel, Nietzsche, Marx - as well as interlocutors who were obscured from history.

**Requisites:** 3 credits in PHILOS

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand major nineteenth-century debates about epistemology, metaphysics, and ethics.

Audience: Undergraduate

2. Make persuasive philosophical arguments.

Audience: Undergraduate

3. Interpret complex texts accurately and analyze them logically.

Audience: Undergraduate

4. Practice interpretative charity and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas.

Audience: Undergraduate

### PHILOS 341 – CONTEMPORARY MORAL ISSUES

3-4 credits.

A philosophical study of some of the major moral issues in contemporary society, such as those concerning abortion, euthanasia, punishment, property, politics, sex, nuclear disarmament, and world hunger.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHILOS/MED HIST 344 – FOOD ETHICS**

3 credits.

There are many ethical issues related to food production, distribution, consumption, and policy, including animal welfare, animal rights, vegetarianism and veganism, environmental impact, treatment of workers, prospects for agricultural reform, ethical responsibilities of corporate and industry actors, and labeling issues surrounding the use of genetically engineered foods. Some are more theoretical, such as which individuals affected by agriculture deserve direct moral consideration. Other are more practical, such as how to feed a growing global population. We will begin with a brief survey of ethical theories and methods of ethical reasoning, and then explore, from both personal and policy perspectives, several food ethics issues. Among the aims of the course are the goals of helping you think critically about the ethically relevant impacts of your own food choices and improving your understanding of ethical issues implicated in food systems.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**Learning Outcomes:** 1. Think critically about arguments.

Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.

Audience: Undergraduate

3. Think critically about ethical issues.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of modern food systems.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of human and environmental harms arising from modern food systems.

Audience: Undergraduate

**PHILOS 430 – HISTORY OF ANCIENT PHILOSOPHY**

3-4 credits.

Various philosophers from the presocratics to the Stoics and Epicureans; particular emphasis on Plato and Aristotle.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHILOS 432 – HISTORY OF MODERN PHILOSOPHY**

3-4 credits.

Covers various philosophers from the 17th century through early 20th century.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHILOS 440 – EXISTENTIALISM**

3-4 credits.

Feeling like life is absurd, that existence is meaningless? Worried that you aren't living authentically? Then a course in Existentialism is just what you need. Study the classic texts of this intellectual movement that expressed despondency about Western civilization, its decadence, and its values. Along the way you'll meet the likes of Kierkegaard, Nietzsche, Heidegger, Sartre, Camus, and De Beauvoir.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**PHILOS/ENVIR ST 441 – ENVIRONMENTAL ETHICS**

3-4 credits.

Adequacy of ethical theories in handling such wrongs as harm to the land, to posterity, to endangered species, and to the ecosystem itself. Exploration of the view that not all moral wrongs involve harm to humans. Inquiry into the notion of the quality of life and the ethics of the "lifeboat" situation.

**Requisites:** Junior standing**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHILOS/JEWISH 442 – MORAL PHILOSOPHY AND THE HOLOCAUST**

3 credits.

Selected moral and philosophical issues raised by the Holocaust such as when and whom to rescue; includes issues arising after the annihilation such as forgiveness and reconciliation.

**Requisites:** Sophomore standing or 3 Credits in PHILOS**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**PHILOS 454 – CLASSICAL PHILOSOPHERS**

3 credits.

One or more classical philosophers, movements, or problems selected for intensive study.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOS/RELIG ST 501 – PHILOSOPHY OF RELIGION**

3-4 credits.

Analysis of religious experience and activity, and examination of principal religious ideas in light of modern psychology, philosophy, science, and anthropology.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHILOS 503 – THEORY OF KNOWLEDGE**

3 credits.

A survey of problems concerning the nature, sources, and limits of human knowledge, including such topics as scepticism, the concept of knowledge, sensory perception, evidence, justified belief, induction.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHILOS 504 – SPECIAL TOPICS IN THE THEORY OF KNOWLEDGE**

3 credits.

One or more special topics in the Theory of Knowledge or one or more major theories of knowledge. Variable content.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Humanities Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOS/MED HIST 505 – JUSTICE AND HEALTH CARE**

3 credits.

Examines ethical issues in the distribution, financing, and delivery of health care (primarily in the United States). Explores key issues in U.S. health policy and forms the empirical foundation for the rest of the class. Engages in ongoing debates in moral and political philosophy over putative entitlements to health and health care. Investigates the nature, justifiability, and methods of health care rationing (including bedside rationing by doctors) and the myriad issues implicated by the near-universally shared goal of health care cost containment.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Understand the conversation about justice and health care as an enterprise incorporating moral philosophy, bioethics, and evidence-based social science

Audience: Both Grad & Undergrad

2. Identify and clarify diverse moral norms and principles that underlie diverse convictions about justice and health care

Audience: Both Grad & Undergrad

3. Subject these norms and principles to dispassionate critical reasoning aimed at evaluating the force of underlying reasons for and against them

Audience: Both Grad & Undergrad

4. Write clear and concise essays subjecting issues concerning justice and health to dispassionate ethical analysis

Audience: Both Grad & Undergrad

5. Write a clear and concise 15-page essay arguing for a novel thesis concerning justice and health.

Audience: Graduate

**PHILOS 506 – STUDY ABROAD IN PHILOSOPHY**

2-4 credits.

Treatment of a topic in philosophy in a course offered at a university outside the United States.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2001

**PHILOS 511 – SYMBOLIC LOGIC**

3 credits.

Propositional and predicate logic, with emphasis on metatheory; independence of rules and completeness theorems; discussion of technical and philosophical limitations of classical logic.

**Requisites:** PHILOS 211**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**PHILOS 512 – METHODS OF LOGIC**

3 credits.

Selected topics in philosophical logic and in the various applications of logic to philosophical problems. Variable content.

**Requisites:** PHILOS 211**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**PHILOS/MED HIST 515 – PUBLIC HEALTH ETHICS**

3 credits.

Focuses on ethical issues implicated in a population-level approach to disease prevention and health promotion. Explores prominent theoretical approaches to public health ethics and engages with several ethical tensions. Example issues include: the use of coercive or intrusive public health; the justification of paternalistic measures in societies; the extent to which societies should hold individuals responsible for their health conditions; the need to decide who receives life-saving treatment or vaccination; and climate changes and intergenerational justice; ethical issues in international pharmaceutical research.

**Requisites:** Junior standing**Course Designation:** Breadth – Humanities Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022**Learning Outcomes:** 1. Understand the conversation about public health ethics as an enterprise incorporating moral philosophy, bioethics, and evidence-based social science.

Audience: Both Grad &amp; Undergrad

2. Identify and clarify diverse moral norms and principles that underlie diverse convictions about public health ethics.

Audience: Both Grad &amp; Undergrad

3. Subject these norms and principles to dispassionate critical reasoning aimed at evaluating the force of underlying reasons for and against them.

Audience: Both Grad &amp; Undergrad

4. Write clear and concise essays subjecting issues of public health ethics to dispassionate ethical analysis.

Audience: Both Grad &amp; Undergrad

5. Write a clear and concise 15-page essay arguing for a novel thesis concerning public health ethics.

Audience: Graduate

**PHILOS 516 – LANGUAGE AND MEANING**

3 credits.

The nature and function of language, theories of meaning, semantic and syntactic paradoxes, proper names, private languages, rules, and linguistic relativity.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**PHILOS 520 – PHILOSOPHY OF THE NATURAL SCIENCES**

3 credits.

Nature and functions of science; the logic of scientific method; clarification of such concepts as cause, law, theory, probability, determinism, teleology.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHILOS 522 – SPECIAL TOPIC**

3 credits.

Selected from logic of theory construction, theoretical entities, models, applied mathematics, nature of laws, conventionalism, probability, etc. Variable content.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**PHILOS/ENVIR ST 523 – PHILOSOPHICAL PROBLEMS OF THE BIOLOGICAL SCIENCES**

3 credits.

Problems raised by genetics, evolutionary theory, and taxonomy: patterns of explanatory force and dispensability of teleology; objectivity of taxonomy.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**PHILOS/ECON 524 – PHILOSOPHY AND ECONOMICS**

3 credits.

Economics examined from the viewpoint of the philosophy of science. Normative and positive aspects of economic theory. Deterministic and statistical explanation. Arrow impossibility theorem. Radical economics.

**Requisites:** Sophomore standing and 3 credits of PHILOS or ECON

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHILOS 530 – FREEDOM FATE AND CHOICE**

3 credits.

An examination of the philosophical problems associated with free will.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**PHILOS/MED HIST 534 – ETHICS AND THE BRAIN**

3 credits.

In-depth analysis of ethical issues arising from the practices and advances of brain science in clinical, research, legal, and consumer contexts. Includes a foundation in ethical theory and philosophical methodology.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Gain knowledge about neurological and neuroscientific technologies and practices.

Audience: Both Grad & Undergrad

2. Gain understanding of major ethical theories and approaches.

Audience: Both Grad & Undergrad

3. Learn to employ philosophical methodology.

Audience: Both Grad & Undergrad

4. Utilize ethical theories and approaches, and philosophical methodologies to critically interrogate the ethical dimensions of the brain sciences.

Audience: Both Grad & Undergrad

5. Develop the skill of writing rigorous, analytical philosophical papers.

Audience: Graduate

6. Expand research beyond material learned in class to incorporate outside scientific and philosophical work.

Audience: Graduate

### **PHILOS/ED POL 540 – EGALITARIANISM AND EDUCATIONAL JUSTICE**

3 credits.

Examines significant disagreements about educational justice—about the very concept of educational justice; about the most plausible substantive account of educational justice and the way that an ideal of equality bears on it; and about what kinds of policies the most plausible account of educational justice would require in circumstances like our own. Introduces tools that contemporary moral and political philosophers use to investigate those questions. Understand and evaluate efforts to resolve those questions.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the structure of, and the differences among, major accounts of educational justice that have been defended in the literature on the philosophy of education

Audience: Both Grad & Undergrad

2. Examine the educational policies that different accounts of educational justice would favor, and evaluate existing educational policies by the standards of different accounts of educational justice

Audience: Both Grad & Undergrad

3. Construct and evaluate complex normative—moral and political—arguments about the concept of educational justice, the most plausible account of educational justice, and the practical implications of accounts of educational justice

Audience: Both Grad & Undergrad

4. Construct and defend novel versions, objections, and assessments of egalitarian theories of educational justice for educational policy and practice by conducting original philosophical research.

Audience: Graduate

### **PHILOS 541 – MODERN ETHICAL THEORIES**

3 credits.

Ethical theories and problems as discussed in the late nineteenth and twentieth centuries.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PHILOS 543 – SPECIAL TOPICS IN ETHICS**

3 credits.

Intensive study of ethical theory, or of one or more ethical theories or moral philosophers of the present or modern period. Variable content.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **PHILOS/ED POL 545 – PHILOSOPHICAL CONCEPTIONS OF TEACHING AND LEARNING**

3 credits.

Examination and analysis of conceptions of teaching and learning in classical philosophical works and in contemporary literature in the philosophy of education.

**Requisites:** Junior standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **PHILOS 549 – GREAT MORAL PHILOSOPHERS**

3 credits.

Major themes of moral philosophy, from Plato and Aristotle to Bentham and Mill, with critical study of outstanding works.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PHILOS/ED POL 550 – PHILOSOPHY OF MORAL EDUCATION**

3 credits.

Critical examination of classical and contemporary conceptions of moral education.

**Requisites:** Junior standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PHILOS 551 – PHILOSOPHY OF MIND**

3 credits.

Nature of mind (mental states such as thinking and feeling) and its relation to physical states, with emphasis on recent advances in philosophy and psychology.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHILOS 553 – AESTHETICS**

3 credits.

Analysis of current philosophies of art and of criticism.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Humanities

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2016**PHILOS 555 – POLITICAL PHILOSOPHY**

3 credits.

Philosophical doctrines involved in justification of political decisions; analysis of some fundamental concepts, e.g. the common good, authority, justice, natural law, natural rights.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**PHILOS/GEN&WS 556 – TOPICS IN FEMINISM AND PHILOSOPHY**

3 credits.

Topics from historical and contemporary feminist thought; attention to one or more feminist philosophers, historical movements, philosophical frameworks, or sets of philosophically related issues.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Think critically about arguments.

Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.

Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.

Audience: Undergraduate

4. Express familiarity with central concepts in feminist philosophy.

Audience: Undergraduate

**PHILOS 557 – ISSUES IN SOCIAL PHILOSOPHY**

3 credits.

Specific topics in social and political philosophy such as war and peace, property and industry, individualism and collectivism, freedom and justice.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**PHILOS/MED HIST 558 – ETHICAL ISSUES IN HEALTH CARE**

3 credits.

Ethical issues apparently created by new biomedical technologies, such as genetic screening, prenatal diagnosis, prolongation of life, treatment of severe birth defects, in vitro fertilization, behavior modification, psychosurgery, and transplantation.

**Requisites:** Junior standing**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Gain knowledge about ethical issues in healthcare

Audience: Both Grad &amp; Undergrad

2. Communicate precisely and concisely in both writing and speech

Audience: Both Grad &amp; Undergrad

3. Think critically about arguments related to ethical issues in health care with the aim of uncovering the truth

Audience: Both Grad &amp; Undergrad

4. Practice interpretive charity and intellectual honesty, which includes appropriate attribution to others of their ideas, and recognition and frankness about the limitations of one's own ideas

Audience: Both Grad &amp; Undergrad

5. Independently locate and engage with the latest relevant empirical and philosophical research relevant to evaluating ethical issues in health care

Audience: Graduate

6. Exhibit substantial synthetic and analytic abilities in considering the ethical dimensions of ethical issues in health care

Audience: Graduate

**PHILOS 560 – METAPHYSICS**

3 credits.

Major problems in metaphysics, such as: existence, universals and particulars, space and time, individuals, categories, substance and attribute, necessity.

**Requisites:** Junior standing or 3 Credits in PHILOS**Course Designation:** Breadth – Either Humanities or Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**PHILOS 562 – SPECIAL TOPICS IN METAPHYSICS**

3 credits.

An intensive study of one or more topics such as: existence, universals and particulars, space and time, individuals, individuation, categories, substance and attribute, necessity, events and processes.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOS/C&E SOC/MED HIST 565 – THE ETHICS OF MODERN BIOTECHNOLOGY**

3 credits.

An in-depth study of a selection of ethical issues arising from the application of modern biotechnology to microorganisms, plants, non-human animals, and human beings. We will aim at a discussion that is informed by empirical research and by work done in ethical theory, political philosophy, and other relevant disciplines, and whose character is rigorous, clear, nuanced, and unbiased.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Think critically about arguments.

Audience: Both Grad & Undergrad

2. Communicate precisely and concisely in both writing and speech.

Audience: Both Grad & Undergrad

3. Exchange reasons about controversial matters respectfully and with the aim of uncovering the truth.

Audience: Both Grad & Undergrad

4. Practice interpretive charity and intellectual honesty, which includes appropriate attribute to others of their ideas, and recognition and frankness about the limitations of one's own ideas.

Audience: Both Grad & Undergrad

5. Independently locate and engage with the latest relevant empirical and philosophical research.

Audience: Graduate

6. Exhibit substantial synthetic and analytic abilities by considering how an application of modern biotechnology ethically compares to the status quo and to other possible alternatives.

Audience: Graduate

**PHILOS 566 – PHILOSOPHY OF ACTION**

3 credits.

Human beings, and perhaps other kinds of creatures, are agents: we can make things happen. We do things intentionally, guide our behavior in light of our reasons, exhibit self-control, and plan for the future. What is it to be an agent, and what makes an event an intentional action? As Wittgenstein put the question, "What is left over if I subtract the fact that my arm goes up from the fact that I raise my arm?" Emphasis on contemporary readings, including Donald Davidson and G.E.M. Anscombe.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**PHILOS 567 – TOPICS IN CONTEMPORARY PHILOSOPHY**

3 credits.

One or more specific topics in contemporary philosophy bridging two or more areas such as epistemology, metaphysics, philosophy of mind, philosophy of language, or moral philosophy.

**Requisites:** Junior standing and completion of 3 credits in PHILOS

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Think critically about arguments.

Audience: Undergraduate

2. Interpret complex texts accurately and analyze them logically.

Audience: Undergraduate

3. Communicate precisely and concisely in both writing and speech.

Audience: Undergraduate

**PHILOS/MATH 571 – MATHEMATICAL LOGIC**

3 credits.

Basics of logic and mathematical proofs; propositional logic; first order logic; undecidability.

**Requisites:** (MATH 234 or 375), (MATH 320, 340, 341, or 375), and (MATH 341, 375, 421, 467, or 521), or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recall and state the formal definitions of the first-order logic and their properties used in formal logic (e.g., truth assignments, syntax, semantics, theories, models, etc.).

Audience: Both Grad & Undergrad

2. Use such definitions to argue certain objects do or do not have the condition or property (e.g., decidability, compactness, undecidability, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of logic. (e.g., Soundness and Completeness Theorems, the Compactness Theorem, Gödel's Incompleteness Theorem, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Use concepts from logic in the context of larger arguments (e.g., nonstandard models of arithmetic, etc.).

Audience: Both Grad & Undergrad

5. Prove or disprove statements related to the above definitions, properties, and theorems using techniques of mathematical argument (direct methods, indirect methods, constructing examples and counterexamples, induction, etc.).

Audience: Both Grad & Undergrad

6. Convey arguments using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

7. Identify applications of course content in areas of modern research.

Audience: Graduate

**PHILOS 599 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOS 681 – SENIOR HONORS THESIS**

1-3 credits.

Individual mentored study for seniors completing theses for honors in the major, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOS 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for honors in the major, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHILOS 691 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**PHILOS 692 – SENIOR THESIS**

3 credits.

Individual mentored study for seniors completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**PHILOS 698 – DIRECTED STUDY**

2-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**PHILOS 699 – DIRECTED STUDY**

2-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**PHILOS 701 – READING SEMINAR**

3 credits.

An examination of select topics in philosophy.

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHILOS 799 – DIRECTED STUDY**

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHILOS 830 – ADVANCED HISTORY OF PHILOSOPHY**

3 credits.

Seminar on the history of philosophy focusing on a period or figure(s).

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHILOS 835 – ADVANCED HISTORY OF PHILOSOPHY**

3 credits.

Seminar on the history of philosophy focusing on a period or figure(s).

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHILOS 902 – PROSEMINAR IN PHILOSOPHY**

3 credits.

Survey of various texts with an emphasis on close reading and developing writing skills.

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHILOS 903 – SEMINAR: EPISTEMOLOGY**

3 credits.

Seminar on epistemology.

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHILOS 904 – TEACHING PHILOSOPHY**

1 credit.

Focuses on the conceptual and ethical recognition of the importance of good teaching, and skills and knowledge drawn from up-to-date pedagogical research. Engages with complex questions about the purposes of higher education and your role in it to better understand your own beliefs, attitudes, and values regarding higher education. Use best practices in teaching and learning in a low-stakes environment to practice and receive feedback on your performance of those skills.

**Requisites:** Declared in a Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Design curriculum for undergraduate courses in their areas of expertise and competence.

Audience: Graduate

2. Foster ethical and professional conduct.

Audience: Graduate

3. Demonstrate high quality undergraduate instruction in their areas of expertise and competence.

Audience: Graduate

**PHILOS 911 – SEMINAR-LOGIC**

3 credits.

Seminar on logic.

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHILOS 916 – SEMINAR-PHILOSOPHY OF LANGUAGE**

3 credits.

Seminar on philosophy of language.

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**PHILOS 920 – SEMINAR-PHILOSOPHY OF SCIENCE: CAUSATION, EXPLANATION & PROBABILITY**

3 credits.

Seminar on philosophy of science.

**Requisites:** Declared in Philosophy graduate program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

### PHILOS 941 – SEMINAR-ETHICS

3 credits.

Seminar on ethics.

**Requisites:** Declared in Philosophy graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### PHILOS 951 – SEMINAR-PHILOSOPHY OF MIND

3 credits.

Seminar on philosophy of mind.

**Requisites:** Declared in Philosophy graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### PHILOS 955 – SEMINAR SOCIAL AND POLITICAL PHILOSOPHY

3 credits.

Seminar on social and political philosophy.

**Requisites:** Declared in Philosophy graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

### PHILOS 960 – METAPHYSICS SEMINAR

3 credits.

Seminar on metaphysics.

**Requisites:** Declared in Philosophy graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

### PHILOS 990 – RESEARCH AND THESIS

2-9 credits.

Individual mentored study for graduate students completing theses, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### PHILOS 999 – INDEPENDENT WORK

2-9 credits.

Individual mentored study for graduate students, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## PHYSICAL THERAPY (PHY THER)

### PHY THER 500 – FUNCTIONAL NEUROANATOMY FOR PHYSICAL THERAPY

3 credits.

Development, structure, regions and function of the nervous system are covered with the purpose of providing insight into the clinical treatment of common neurological conditions. General principles of the development, connectivity and blood supply of both the central and peripheral nervous system (spinal cord, brainstem, and above the brainstem) are taught.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize the main structures and functions within the major divisions of the nervous system (brain and spinal cord), peripheral and autonomic nervous systems.

Audience: Graduate

2. Describe how regions of the nervous system interact to perform specific functions.

Audience: Graduate

3. Describe the functional consequences of damage to the nervous system (e.g., as in ischemic stroke syndromes).

Audience: Graduate

4. Determine the location of neural damage through a synthesis of signs and symptoms of the functional neuroanatomy.

Audience: Graduate

5. Describe the neural underpinnings of symptoms encountered and addressed through the practice of physical therapy.

Audience: Graduate

### PHY THER 501 – ANATOMICAL APPLICATIONS IN PHYSICAL THERAPY

3 credits.

Application of anatomy and palpatory skills in a clinically-oriented environment. Focus is on applied anatomy, kinesiology, posture, movement analysis, medical terminology.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 512 – PRINCIPLES OF PROFESSIONAL PRACTICE AND ADMINISTRATION**

3 credits.

Ethics, organization and administration of physical therapy departments. Planning and correlation of hospital and community health services. Study background, organization and responsibilities of health care team members in hospital services and programs.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHY THER 521 – PHYSICAL AGENTS**

2 credits.

The scientific rationale for and the clinical application of thermal, electrical, and mechanical agents in physical therapy practice.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHY THER 523 – CARDIOVASCULAR AND PULMONARY ASPECTS OF PHYSICAL THERAPY TREATMENT**

3 credits.

Covers: 1) methods used in physical therapy (PT) management of cardiovascular and pulmonary disease, 2) influence of coexisting cardiovascular and pulmonary dysfunction on PT treatment for other primary diagnoses, and 3) screening for occult cardiovascular and pulmonary disease.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHY THER 527 – FOUNDATIONS OF PHYSICAL THERAPY: EXAMINATION AND EVALUATION**

4 credits.

Lab-based course that introduces history taking and physical examination skills germane to assessment of patients with orthopedic and neurologic diagnoses in inpatient and outpatient settings. Introduces clinical decision-making and documentation skills with a focus on examination tests and measures. Labs involve the psychomotor application of exam skills. Outside activities with community partners are an integral part of the course.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHY THER 534 – FOUNDATIONS OF PHYSICAL THERAPY INTERVENTION**

4 credits.

Examination for exercise design, implementation, and progression. Range of motion, flexibility, joint mobilization, balance/gait training, proprioceptive neuromuscular facilitation, balance, coordination, agility training, body mechanics, postural stabilization, resistive and endurance training, aquatic therapy, relaxation, manual traction, massage. Scientific rationale for treatment interventions.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHY THER 538 – INTRODUCTION TO THE PHYSICAL THERAPY PROFESSION AND PROFESSIONALISM**

1 credit.

Professional attitudes, beliefs, behaviors relevant to physical therapy practice through the Guide to Physical Therapist Practice, APTA history, Generic Abilities, APTA Code of Ethics, APTA Core Values, PT roles and practice settings, professional autonomy, health care teams, professional learning opportunities.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHY THER 539 – PHYSICAL THERAPY EDUCATION AND LIFESPAN LEARNING ISSUES**

1 credit.

Instructional design, learning theories and styles throughout the lifespan, literacy issues, professional presentations and posters, the physical therapist as educator, professional behaviors and emotional preparation for the clinic.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**PHY THER 540 – PSYCHOSOCIAL ASPECTS OF HEALTH CARE**

1 credit.

Professional attitudes, beliefs and behaviors relevant to physical therapy practice. Communication issues related to caregiving, multidisciplinary teams, conflict management, body image, psychosocial aspects of aging, stages of loss, collaborative care, and family-centered care.

**Requisites:** Declared in Doctor of Physical Therapy program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**PHY THER 541 – ISSUES OF CULTURE AND DIVERSITY IN HEALTH CARE**

1 credit.

Students will explore their own backgrounds and will learn constructs of cultural competency; cultural beliefs and practices; impact of diversity issues such as SES, sexual preference, disability, educational level, ethnicity and race; and the culture of medicine.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY THER 542 – MEDICAL ETHICS, JURISPRUDENCE, AND HEALTH CARE REGULATIONS**

1 credit.

Provides an introduction to medical ethics and jurisprudence as they apply to physical therapy. Includes information on health care regulatory agencies and health care regulations.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 543 – PROFESSIONAL PRACTICE ISSUES IN PHYSICAL THERAPY**

1 credit.

The final of six seminar courses, this course will present issues that will assist the physical therapist student transition into the profession during and following their final clinical internships.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 627 – CLINICAL DECISION-MAKING: TISSUE MECHANICS AND ADAPTATIONS**

3 credits.

Addresses the cardiovascular, pulmonary, neuromuscular and connective tissue properties and adaptations that influence human movement through the lifespan. Through an understanding of the system integration, gain an appreciation of the physiological complexities underlying human movement.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY THER 628 – CLINICAL DECISION MAKING: NEUROMUSCULAR MECHANICS AND CONTROL**

4 credits.

Addresses the mechanics and control of the neuromuscular and skeletal systems as they relate to human movement. Neural control of movement is discussed in detail with specific emphasis on theories underlying recruitment of muscle in health and disease.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 635 – MOTOR DONTROL DYSFUNCTION : EXAMINATION, DIAGNOSIS, AND MANAGEMENT I**

5 credits.

Application of motor control and motor learning principles to the examination, diagnosis, and management of people with movement disorders stemming from CNS pathology. Emphasis on neurological interventions across the lifespan.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY THER 636 – MOTOR CONTROL DYSFUNCTION: EXAMINATION, DIAGNOSIS, AND MANAGEMENT II**

5 credits.

Application of motor control and motor learning principles to the examination, diagnosis, and management of people with movement disorders from spinal cord injuries, PNS dysfunction and progressive disorders of the CNS.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 640 – SCIENTIFIC INQUIRY IN PHYSICAL THERAPY**

3 credits.

Focuses on critical evaluation of research findings, a fundamental component of evidence-based practice. Examples from the rehabilitation literature are used to illustrate principles of measurement theory, research design, statistical analysis, and scientific inference.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 641 – CURRENT ISSUES IN REHABILITATION**

1 credit.

Focuses on critical evaluation of published research relevant to physical therapy. In seminar format, present the results of original research, and lead discussions of the strengths, weaknesses, and underlying theory of the research.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PHY THER 642 – RESEARCH PRACTICUM**

1-3 credits.

An in-depth training in various aspects of research (e.g., literature review, understanding of study methodology, data collection, data reduction and analysis, dissemination of findings). Work independently under the supervision of a faculty member from the UW Doctor of Physical Therapy program and will participate in an on-going project for the semester.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHY THER 643 – CURRENT ISSUES IN REHABILITATION RESEARCH II**

1 credit.

Focuses on critical evaluation of published research relevant to physical therapy. In seminar format, present the results of original research, and lead discussions of the strengths, weaknesses, and underlying theory of the research.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 664 – CLINICAL MEDICINE I**

5 credits.

Modules in medical screening, pharmacological principles, diagnostic imaging, laboratory testing, psychological disorders, ENT, endocrinology, dermatology, and geriatrics are presented in the context of pathophysiology, differential diagnosis, prevention, and management. Lectures provided by physicians, physician assistants and physical therapists. Case studies are utilized for development of clinical problem solving skills.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY THER 665 – CLINICAL MEDICINE II**

4 credits.

Common pathological processes, risk factors, clinical manifestations, and pathogenesis of disease for the cardiovascular, pulmonary, hematology, neurology, gastrointestinal, urological, gynecological, musculoskeletal, and rheumatological systems. Medical tests and treatments including medications, diagnostic imaging, and pharmacology principles will also be covered.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHY THER 668 – HEALTH PROMOTION AND WELLNESS**

2 credits.

Physical, psychological, spiritual, social, emotional, intellectual and vocational aspects of wellness. The physical therapist's role in primary, secondary and tertiary prevention; health promotion, and individual and community screening activities for wellness/fitness; and safety and environmental considerations for health and wellness.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 675 – OTHOTICS: APPLICATIONS IN PHYSICAL THERAPY PRACTICE**

2 credits.

Provides the the cognitive, affective and psychomotor skills for efficacious examination/evaluation and treatment of patients with conditions requiring orthotic, protective and supportive devices. Specific orthotic topics include: material technology; biomechanics of orthoses; orthotic design and fabrication principles, lower limb orthoses (LLO); spinal orthoses (SO); upper limb orthoses (ULO); and wheelchair seating and propulsion. Provides the foundation for clinical applications in the musculoskeletal (PHY THER 676/677) and neuromuscular clinical tracts (PHY THER 635/636).

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 676 – MUSCULOSKELETAL DYSFUNCTION : EXAMINATION, DIAGNOSIS, & MANAGEMENT I**

5 credits.

Provides the physical therapy student with the cognitive, affective, and psychomotor knowledge for effective examination, evaluation, diagnosis and management of patients/clients of all ages with various musculoskeletal dysfunctions related specifically to the spine.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY THER 677 – MUSCULOSKELETAL DYSFUNCTION :  
EXAMINATION, DIAGNOSIS, & MANAGEMENT II**

5 credits.

Provides the physical therapy student with the cognitive, affective, and psychomotor knowledge for effective examination, evaluation, diagnosis and management of patients/clients of all ages with various musculoskeletal dysfunctions related specifically to the extremities.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 678 – PHYSICAL THERAPY MANAGEMENT OF  
INTEGUMENT CONDITIONS**

1 credit.

Provides the cognitive, affective and psychomotor skills for efficacious examination/evaluation and treatment of specific integument system conditions. Topics include the management of patients/clients with wounds, burn, frostbite, insensate and/or diseased integument. Functional training in self-care and home management including activities of daily living and instrumental activities of daily living, as well as in the context of patients with specific integument conditions. Specific wound topics include: infection control in the health care environment, classification of wounds, examination and physical therapy and medical management of persons with wounds. Specific burn topics include: epidemiology of thermal injuries; classification of burn depth; determination of percentage burn; physiological effects of burn by body system; interdisciplinary medical management and physical therapy management for persons with burns/frostbite.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 679 – PROSTHETICS: APPLICATIONS IN PHYSICAL  
THERAPY PRACTICE**

1 credit.

Provides the cognitive, affective and psychomotor skills for efficacious examination/evaluation and treatment of patients/clients with amputation. Course topics include the management of patients/clients with congenital and/or acquired amputation and its subsequent prosthetic management. Functional training in self-care and home management including activities of daily living (ADLs) and instrumental activities of daily living (IADLs), as well as functional training in work (job/school/play) are covered in the context of patients with limb loss.

**Requisites:** PHY THER 676 and PHY THER 677

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 700 – CLINICAL INTERNSHIP I**

2 credits.

80-hour physical therapy internship in a pre-determined clinical environment.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 701 – CLINICAL INTERNSHIP II**

4 credits.

160-hour physical therapy internship in a predetermined clinical environment.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 702 – CLINICAL INTERNSHIP III**

9 credits.

Nine-week physical therapy internship in a pre-determined clinical environment.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY THER 703 – CLINICAL INTERNSHIP IV**

9 credits.

Nine-week physical therapy internship in a pre-determined clinical environment.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY THER 704 – CLINICAL INTERNSHIP V**

4-9 credits.

Physical therapy internship in a pre-determined clinical environment.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 1 number of completions

**Last Taught:** Fall 2024

**PHY THER 705 – CLINICAL INTERNSHIP VI**

9 credits.

Nine-week physical therapy internship in a pre-determined clinical environment.

**Requisites:** Declared in Doctor of Physical Therapy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY THER 706 – CLINICAL INTERNSHIP VII**

5 credits.

Learning experiences in a clinical setting under the direct guidance of a physical therapist (Clinical Instructor). Ability to perform physical therapy examinations of body structures and functions, and other evaluations, interventions, and outcomes assessed by evaluative tools, such as the Clinical Performance Instrument (CPI).

**Requisites:** PHY THER 679**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate critical thinking skills by applying clinical decision-making solutions while on their clinical experiences and assessing the appropriateness of their solutions.

Audience: Graduate

2. Apply concrete coursework (didactic) knowledge in an unfamiliar clinical environment and self-assess as well as receive assessment and feedback from the Clinical Instructor.

Audience: Graduate

3. Evaluate information received from the patient examination and establish a diagnosis, prognosis, and intervention with minimal to no assistance from the Clinical Instructor (CI) in simple to somewhat complex cases.

Audience: Graduate

4. Evaluate information received from the patient examination and establish a diagnosis, prognosis, and intervention with complex tasks with minimal to no guidance from the CI.

Audience: Graduate

5. Display professional behaviors commonly seen in a practicing physical therapist.

Audience: Graduate

6. Adapt psychomotor skills to any clinical situation and value feedback given from the CI regarding strategies to improve this.

Audience: Graduate

7. Internalize and verify values of professional behavior demonstrated by the CI and other clinicians.

Audience: Graduate

**PHY THER/NURSING/PHARMACY/PHY ASST/PUBLHLTH 758 – INTERPROFESSIONAL PUBLIC HEALTH LEADERSHIP**

1 credit.

Build skills in collaboration, problem solving, and reflection to approach complex community-based public health problems contribute to becoming a public leader. Explore the six levels of public health leadership through the practices of current and past public health leaders, case studies, and personal experience.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**Learning Outcomes:** 1. Describe the roles and responsibilities of their profession with all participating health professional students, while examining the roles and responsibilities of all other health professions.

Audience: Graduate

2. Compare and contrast the diversity of expertise among participating health professions.

Audience: Graduate

3. Apply their profession's roles and responsibilities to case studies that address complex public health issues.

Audience: Graduate

4. Describe what it means to be part of an interprofessional team and illustrate how the different professions and systems can complement and facilitate one another in addressing public health issues.

Audience: Graduate

5. Apply the principles of public health leadership via reflective exercises, case studies and facilitated discussion.

Audience: Graduate

6. Promote a public health cause or principle through legislative advocacy.

Audience: Graduate

7. Elucidate the importance of reflection as a life-long learning and leadership tool.

Audience: Graduate

**PHY THER 799 – INDEPENDENT STUDY**

1-3 credits.

Course content is designed specifically for the individual student.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

# PHYSICIAN ASSISTANT PROGRAM (PHY ASST)

## PHY ASST 550 – FUNDAMENTALS OF CLINICAL MEDICINE

3 credits.

Introduces information fundamental to understanding clinical medicine principles. Topics addressed include select areas of physiology-pathophysiology, pharmacology, laboratory medicine, and common systemic disease processes. There will also be instruction relative to cognitively approaching the patient.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## PHY ASST 601 – CLINICAL MEDICINE I

5 credits.

Covers the knowledge and skills required to diagnose and treat patient health problems. Topics include genomics, neurology, psychiatry, hematology/oncology, endocrinology, ophthalmology, otorhinolaryngology, and dermatology.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PHY ASST 602 – CLINICAL MEDICINE II

6 credits.

Covers the knowledge and skills required to diagnose and treat patient health problems. Topics addressed include cardiology, pulmonology, nephrology/urology, gastroenterology, rheumatology, geriatrics, and family medicine.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PHY ASST 603 – PEDIATRICS

2 credits.

Examines important aspects of primary care pediatrics including assessment of the child patient, preventive health, and pediatric diseases and conditions. The student will also learn examination techniques specific to the pediatric population.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PHY ASST 610 – CLINICAL PREVENTION AND COMMUNITY PRACTICE I

1 credit.

Addresses the concepts of prevention and population health. Multiple topics will be explored including but not limited to: Health Information Literacy, Immunizations, Nutrition, Exercise, Communication and Counseling Skills, and Integrative Medicine.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PHY ASST 611 – CLINICAL PREVENTION AND COMMUNITY PRACTICE II

1 credit.

Addresses the concepts of prevention and population health and explores the topics of: health systems/policy, and community aspects of practice. Case examples and community-oriented learning experiences will be incorporated into the course.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PHY ASST 616 – PROFESSIONAL SEMINAR I

1 credit.

Emphasizes an understanding of basic research methodology, project development, collaborative research, and project evaluation.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## PHY ASST 617 – PROFESSIONAL SEMINAR II

1 credit.

Emphasizes medical ethics as well as fundamental principles of evidence-based medicine. Research and statistical concepts are taught within the framework of epidemiologic study to develop skills in evaluating and interpreting the medical literature.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PHY ASST 618 – PROFESSIONAL SEMINAR III

1 credit.

Emphasizes an understanding of basic research methodology, project development, collaborative research, and project evaluation.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PHY ASST 619 – HISTORY AND PHYSICAL EXAMINATION FOR PHYSICIAN ASSISTANTS

4 credits.

Provides the primary care physician assistants with the knowledge and physical exam skills to evaluate patients in a variety of settings. Normal and pathological physical findings are discussed. Master interview skills and physical exam skills applicable to all patients. Selected physical exam techniques are emphasized.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## PHY ASST 620 – ADVANCED PATIENT EVALUATION I

1 credit.

Advanced physical examination and patient evaluation techniques with an emphasis on the musculoskeletal system; selected physical exam procedures in the complete evaluation of patients; advanced medical interviewing skills.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY ASST 621 – ADVANCED PATIENT EVALUATION IN THE PRIMARY CARE SETTING II**

1 credit.

Instruction in advanced skills in history and physical examination including comprehensive patient history and physical examination, focused history with related male genitalia and rectal exams, and focused history with female breast and pelvic exams.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY ASST 629 – APPLIED HUMAN ANATOMY FOR PHYSICIAN ASSISTANTS**

7 credits.

Gross human anatomy involving complete dissection of the human body. Major topic areas: Thorax; abdomen and pelvis; head and neck; limbs. Focus on anatomical organization of the trunk, head and neck, and limbs. Application of functional anatomical information to clinical practice/problems. Practice in teamwork and teaching.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the anatomical organization of the trunk, head and neck, and limbs.

Audience: Graduate

2. Apply functional anatomical information to clinical practice/problems.

Audience: Graduate

3. Demonstrate teaching skills and the ability to work effectively in a team.

Audience: Graduate

**PHY ASST 630 – WOMEN'S HEALTH FOR PHYSICIAN ASSISTANTS**

3 credits.

Provides a theoretical and clinical background for the assessment, diagnosis and management of problems in obstetrics and gynecology.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY ASST 640 – CLINICAL PHARMACOLOGY I**

2 credits.

Emphasizes pharmacotherapeutics relative to disease processes of the neurologic, psychiatric, hematologic/oncologic, ophthalmologic, otolaryngologic, endocrinologic, and dermatologic systems. Antimicrobial and pain management principles will also be addressed.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY ASST 641 – CLINICAL PHARMACOLOGY II**

2 credits.

Emphasizes pharmacotherapeutics relative to disease processes of the cardiovascular, pulmonary, renal, urologic, gastrointestinal, and rheumatologic systems. Other topics addressed include geriatric pharmacology, pharmacoeconomics, complementary and alternative medicines, and treatment of sexually transmitted infections.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY ASST 648 – EMERGENCY MEDICINE**

2 credits.

Fundamental concepts related to the provision of emergency medical care and urgent ambulatory care.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY ASST 650 – DIAGNOSTIC METHODS I**

2 credits.

Primary focus is laboratory medicine assessments and ECG interpretation with additional content in imaging modalities, utilization of survey tools, screening assessments, as well as selected specialized examination techniques.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY ASST 651 – DIAGNOSTIC METHODS II**

3 credits.

Primary focus is laboratory medicine assessments, heart sounds interpretation, and imaging modalities.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY ASST 660 – CLINICAL SKILLS LABORATORY**

1 credit.

Hands-on clinical skill laboratory that includes: dermatologic procedures, splinting, casting, suturing, IV access, venipuncture, injections, joint aspiration/injection, and advanced cardiac life support (ACLS).

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY ASST 662 – PREPARATION FOR INTERDISCIPLINARY HEALTH CARE IN BELIZE**

1 credit.

Preparation for PHY ASST 663. Examination of important and ever-changing topics related to global healthcare. Focus on the more remote, indigenous populations of Belize, their current healthcare system and their access-to-care. Content relates to historical, social, economic and cultural perspectives of the under-served Belizean populations, as well as medical-related topics from an interdisciplinary perspective. Activities and self-study exercises include team-building and self-reflection exercises. Specific topics will include; Belize anthropology, health care in a resource limiting setting, human trafficking, cervical cancer, etc.

**Requisites:** Declared in Physician Assistant, Nursing Practice DNP, or Pharmacy Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate understanding of the historical, societal, economic and cultural perspectives and values of the Belizean population and unique problems that affect this population

Audience: Graduate

2. Demonstrate knowledge of diagnoses and interventions utilized by professionals who work in global, rural, underserved villages in remote areas of Belize

Audience: Graduate

3. Apply their profession's roles and responsibilities to cases that address complex medical and public health issues

Audience: Graduate

4. Compare and contrast the diversity of expertise and skills among participating interprofessional disciplines in a resource-limited setting

Audience: Graduate

5. Describe what it means to be a part of an interdisciplinary team and illustrate how the different professions and systems can complement and facilitate one another in addressing health care needs of an underserved population

Audience: Graduate

6. Explain and apply health inequalities from a global perspective via reflective exercises and facilitated discussion

Audience: Graduate

**PHY ASST 663 – INTERDISCIPLINARY FIELD EXPERIENCE IN RURAL BELIZE**

1 credit.

One-week service-learning field experience in rural Belize. Provide health care to the more remote, indigenous populations of Belize. Must have a valid passport that does not expire 6 months past your Belize field experience dates.

**Requisites:** PHY ASST 662

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate history and physical exam skills with a culturally sensitive approach that permits accurate diagnostic evaluation  
Audience: Graduate

2. Identify predominant cross-cultural and underserved issues in primary care, and appreciate how this knowledge can be utilized in the practice of medicine in the participants' home country

Audience: Graduate

3. Recognize and implement cost-effective approaches to providing health care in a resource-limited setting

Audience: Graduate

4. Demonstrate interdisciplinary team work (communication, negotiation, respect for group dynamics, and conflict resolution) and describe how an interdisciplinary approach to care contributes to improved patient outcomes

Audience: Graduate

5. Examine Belizean culture through rural connections, community interactions, and guided cultural excursions. Discuss this relationship to the concept of Global to Local

Audience: Graduate

6. Discuss the structure of the health care system in Belize from the role of the traditional medicinal healer to the community health worker and primary health care physician

Audience: Graduate

**PHY ASST 670 – FUNDAMENTALS OF SURGERY**

1 credit.

An introduction to the role of the physician assistant in surgery, fundamental principles of pre-, intra- and post-operative surgical care, operating room aseptic technique, and common strategies to avoid and to treat surgical complications.

**Requisites:** Declared in Physician Assistant program

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY ASST 699 – INDEPENDENT STUDY**

1-3 credits.

Directed study projects as arranged with instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHY ASST 716 – PROFESSIONAL SEMINAR IV**

1 credit.

Emphasis will be on placed on refining the capstone project and writing an initial paper draft. Also includes instructional content on professional issues in preparation for clinical experiences and clinical practice.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY ASST 717 – PROFESSIONAL SEMINAR AND CAPSTONE I**

1 credit.

Emphasis will be placed on completion of capstone projects with preparations for oral and poster presentation of the projects. Also includes instructional content on professional issues in preparation for certification and clinical practice.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHY ASST 718 – PROFESSIONAL SEMINAR AND CAPSTONE II**

1 credit.

Emphasis will be placed on preparing poster and lecture presentation for completed capstone projects. Also includes instructional content on professional issues in preparation for certification and clinical practice.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHY ASST 729 – PHYSICIAN ASSISTANT PRECEPTORSHIP: SURGERY**

8 credits.

A 2 month intensive clinical learning experience with an emphasis in surgery and taking place in a variety of off-campus clinical settings under the direction of a supervising physician preceptor.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHY ASST 739 – PHYSICIAN ASSISTANT PRECEPTORSHIP: FAMILY MEDICINE**

8 credits.

A 2 month intensive clinical learning experience with an emphasis in family medicine and taking place in a variety of off-campus clinical settings under the direction of a supervising physician preceptor.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHY ASST 749 – PHYSICIAN ASSISTANT PRECEPTORSHIP: INTERNAL MEDICINE**

8 credits.

A 2 month intensive clinical learning experience with an emphasis in internal medicine and taking place in a variety of off-campus clinical settings under the direction of a supervising physician preceptor.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHY ASST/NURSING/PHARMACY/PHY THER/PUBLHLTH 758 – INTERPROFESSIONAL PUBLIC HEALTH LEADERSHIP**

1 credit.

Build skills in collaboration, problem solving, and reflection to approach complex community-based public health problems contribute to becoming a public leader. Explore the six levels of public health leadership through the practices of current and past public health leaders, case studies, and personal experience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Describe the roles and responsibilities of their profession with all participating health professional students, while examining the roles and responsibilities of all other health professions. Audience: Graduate

2. Compare and contrast the diversity of expertise among participating health professions.

Audience: Graduate

3. Apply their profession's roles and responsibilities to case studies that address complex public health issues.

Audience: Graduate

4. Describe what it means to be part of an interprofessional team and illustrate how the different professions and systems can complement and facilitate one another in addressing public health issues.

Audience: Graduate

5. Apply the principles of public health leadership via reflective exercises, case studies and facilitated discussion.

Audience: Graduate

6. Promote a public health cause or principle through legislative advocacy.

Audience: Graduate

7. Elucidate the importance of reflection as a life-long learning and leadership tool.

Audience: Graduate

**PHY ASST 759 – PHYSICIAN ASSISTANT PRECEPTORSHIP: EMERGENCY MEDICINE**

8 credits.

A 2 month intensive clinical learning experience with an emphasis in emergency medicine and taking place in a variety of off-campus clinical settings under the direction of a supervising physician preceptor.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY ASST 769 – PHYSICIAN ASSISTANT PRECEPTORSHIP: ELECTIVE**

8 credits.

A 2 month intensive clinical learning experience with an emphasis in an elective specialty discipline and taking place in a variety of off-campus clinical settings under the direction of a supervising physician preceptor. Elective specialty disciplines include but are not limited to family medicine, internal medicine, emergency medicine, general surgery, cardiothoracic surgery, orthopedic surgery, ENT, dermatology, pediatrics, women's health and psychiatry/behavioral health.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHY ASST 787 – SEMINAR ON INTEGRATING PUBLIC HEALTH INTO PA PRACTICE**

1 credit.

Provides direction to Physician Assistant (PA) Path of Distinction (PoD) students for the PoD capstone project and to provide an overview of public health, some of its current issues and tools to help become engaged in the communities in which clinical experiences and practice takes place.

**Requisites:** Declared in Physician Assistant program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PHYSICS (PHYSICS)

**PHYSICS 103 – GENERAL PHYSICS**

4 credits.

Introduction to physics at the non-calculus level. Principles of mechanics, heat, and waves, with applications to a number of different fields. Not recommended for students in the physical sciences and engineering.

**Requisites:** MATH 112, 113, 114, 171, placement into MATH 211 or 221, or special student standing. Not open to students with credit for PHYSICS 201, 207, or 247.

**Course Designation:** Gen Ed - Quantitative Reasoning Part B Breadth - Physical Sci. Counts toward the Natural Sci req Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHYSICS 104 – GENERAL PHYSICS**

4 credits.

Continuation of PHYSICS 103. Principles of electricity and magnetism, light, optics, and modern physics, with applications to a number of different fields. Not recommended for students in the physical sciences and engineering.

**Requisites:** PHYSICS 103, 201, 207, 247, E M A 201 or special student standing. Not open to students with credit for PHYSICS 202, 208, or 248.

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHYSICS 106 – PHYSICS OF SPORTS**

3 credits.

A tenth of a second, a single inch, or a slightly different angle can make all the difference in a sporting event. Application of physical principles to competitive sport, leading to a better understanding of performances in such sports as track and field, cycling, archery, golf, football and basketball.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for PHYSICS 103, 201, 207, or 247.

**Course Designation:** Gen Ed - Quantitative Reasoning Part B Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how sport performance is governed by universal physical principles.

Audience: Undergraduate

2. Solve problems relevant to sport performance proficiently regarding both quantitative and qualitative applications of these physical principles.

Audience: Undergraduate

3. Explain the significance of sport-related measurements and observations made in the presence of statistical and systematic uncertainties.

Audience: Undergraduate

4. Communicate effectively with scientific peers and the public regarding physical principles and measurements and observations relevant to sport performance.

Audience: Undergraduate

5. Be able to continue to educate themselves regarding the physical principles relevant to sport performance after completion of the course.

Audience: Undergraduate

**PHYSICS 107 – THE IDEAS OF MODERN PHYSICS**

3 credits.

The twentieth-century physical world picture and its origins. Selected topics in classical physics, relativity, and the quantum theory with emphasis on the meaning of basic concepts and their broader implications, rather than practical applications.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement or special student standing

**Course Designation:** Gen Ed - Quantitative Reasoning Part B Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 109 – PHYSICS IN THE ARTS**

3 credits.

The nature of sound and sound perception; fundamentals of harmony, musical scales, and musical instruments. Studies of light including lenses, photography, color perception, and color mixing.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement or special student standing. Not open to students with credit for PHYSICS 371.

**Course Designation:** Gen Ed - Quantitative Reasoning Part B Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 115 – ENERGY AND CLIMATE**

3 credits.

Introduction to energy, focusing on energy sources and their impacts on humans and the environment, particularly through climate change. Develop basic physics skills to form opinions on energy-related issues affecting the world as well as your own use of energy. Apply the physical principles of mechanics, heat, electricity, and atomic nuclei to various energy sources (fossil fuels, renewables, and nuclear) and their impacts.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for PHYSICS 103, 201, 207, or 247.

**Course Designation:** Gen Ed - Quantitative Reasoning Part B Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Qualitatively describe and quantitatively analyze the physics behind energy technologies and their impacts, including climate change

Audience: Undergraduate

2. Apply foundational physics concepts to solve quantitative problems regarding energy use in society

Audience: Undergraduate

3. Critically assess and discuss current issues in energy and climate, and how these issues are reported in the news

Audience: Undergraduate

**PHYSICS 120 – SPECIAL TOPICS IN PHYSICS**

1-3 credits.

Explores topics in Physics at the elementary undergraduate level.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Learning Outcomes:** 1. Use physics concepts to explain the physical phenomena related to the topic of this course.

Audience: Undergraduate

2. Apply algebraic models of physics theories.

Audience: Undergraduate

3. Identify physical principles in the context of the student experience.

Audience: Undergraduate

**PHYSICS 198 – DIRECTED STUDY**

1-3 credits.

Introductory-level mentored research project in physics.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**PHYSICS 199 – DIRECTED STUDY**

1-3 credits.

Introductory-level mentored research project in physics.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**PHYSICS 201 – GENERAL PHYSICS**

5 credits.

Calculus-based introduction to physics intended for engineering students.

Mechanics: kinematics, statics, dynamics; energy and momentum.

**Requisites:** MATH 217 or 221. Not open to students with credit for PHYSICS 207 or 247.**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHYSICS 202 – GENERAL PHYSICS**

5 credits.

Calculus-based introduction to physics intended for engineering students. Electricity, magnetism, light, and sound.

**Requisites:** (PHYSICS 103, 201, 207, 247, or E M A 201) and (MATH 217 or 221). Not open to students with credit for PHYSICS 208 or 248.**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**PHYSICS 205 – MODERN PHYSICS FOR ENGINEERS**

3 credits.

Introduction to atomic, solid state, and nuclear physics.

**Requisites:** PHYSICS 202, 208 or 248. Not open to students with credit for PHYSICS 241, 244, or 249.**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021**PHYSICS 206 – SPECIAL TOPICS IN PHYSICS**

1-5 credits.

Special topics in physics at the intermediate undergraduate level.

**Requisites:** (PHYSICS 103, 201, 207 or 247) and (MATH 217 or 221)**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2022**PHYSICS 207 – GENERAL PHYSICS**

5 credits.

Calculus-based introduction to physics intended for students majoring in biological sciences. Mechanics: kinematics, statics, dynamics; energy and momentum. Heat and sound.

**Requisites:** MATH 217 or 221. Not open to students with credit for PHYSICS 201 or 247.**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**PHYSICS 208 – GENERAL PHYSICS**

5 credits.

Continuation of PHYSICS 207: calculus-based introduction to physics intended for students majoring in biological sciences. Electricity, magnetism, light, and modern physics.

**Requisites:** PHYSICS 201, 207, 247, E M A 201, or (PHYSICS 103 and MATH 217 or 221). Not open to students with credit for PHYSICS 202 or 248.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS/E C E 235 – INTRODUCTION TO SOLID STATE ELECTRONICS**

3 credits.

An introduction to the physical principles underlying solid-state electronic and photonic devices, including elements of quantum mechanics, crystal structure, semiconductor band theory, carrier statistics, and band diagrams. Offers examples of modern semiconductor structures. Prior experience with MATLAB [such as E C E 203] is strongly encouraged but not required.

**Requisites:** MATH 222 and (PHYSICS 202, 208, or 248), or member of Engineering Guest Students

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 241 – INTRODUCTION TO MODERN PHYSICS**

3 credits.

Kinetic theory; relativity; experimental origin of quantum theory; atomic structure and spectral lines; topics in solid state, nuclear and particle physics.

**Requisites:** (PHYSICS 202, 208, or 248) and MATH 222. Not open to students with credit for PHYSICS 205, 244, or 249.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PHYSICS 247 – A MODERN INTRODUCTION TO PHYSICS**

5 credits.

Calculus-based introduction to physics intended for Physics, AMEP, and Astronomy-Physics majors. Mechanics, waves, thermodynamics and statistical mechanics, topics in modern physics; with computation. A more mathematically rigorous and in-depth introduction to physics than the other introductory physics sequences.

**Requisites:** MATH 222 or concurrent enrollment

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 248 – A MODERN INTRODUCTION TO PHYSICS**

5 credits.

Continuation of PHYSICS 247. Electromagnetism, circuits, optics, additional topics in modern physics; with computation.

**Requisites:** PHYSICS 247 and (MATH 234 or concurrent enrollment or MATH 376 or concurrent enrollment)

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 249 – A MODERN INTRODUCTION TO PHYSICS**

4 credits.

Continuation of PHYSICS 248. Modern physics: introduction to quantum mechanics, topics from nuclear and particle physics, condensed matter physics, and atomic physics. Three lectures and one discussion per week.

**Requisites:** PHYSICS 248

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS/MED PHYS 265 – INTRODUCTION TO MEDICAL PHYSICS**

2 credits.

A general interest survey that introduces the principles and applications of medical physics. Topics include biomechanics, energy usage and temperature regulation, pressure, sound and hearing, ultrasound, electricity in the body, optics and the eye, ionizing radiation in diagnosis and therapy, radiobiology, and nuclear medicine.

**Requisites:** PHYSICS 104, 202, 208, or 248

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply physics concepts, such as force, energy, and pressure, to the study of human physiology

Audience: Undergraduate

2. Describe the relevance of physics concepts to the etiology of major disease, such as heart failure, sudden cardiac death, obstructive lung disease, and nerve conduction disorders

Audience: Undergraduate

3. Explain the principles of medical imaging based on x-rays, gamma rays, sound, and other physical phenomena

Audience: Undergraduate

4. Understand the principles of radiobiology that underlie radiation sickness and radiation therapy

Audience: Undergraduate

**PHYSICS 298 – DIRECTED STUDY**

1-3 credits.

Intermediate-level mentored research project in physics.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2021**PHYSICS 299 – DIRECTED STUDY**

1-3 credits.

Intermediate-level mentored research project in physics.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHYSICS 301 – PHYSICS TODAY**

1 credit.

A series of weekly presentations and discussions of current research topics in physics, by scientists directly involved in those studies. Provides undergraduates with access to the topics and excitement of the research frontier in a manner not possible in normal subject courses.

**Requisites:** PHYSICS 202 or concurrent enrollment, PHYSICS 208 or concurrent enrollment, or PHYSICS 248 or concurrent enrollment**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHYSICS 307 – INTERMEDIATE LABORATORY-MECHANICS AND MODERN PHYSICS**

2 credits.

Experiments in modern physics, with discussion of statistical uncertainties and error analysis. Propagation of error. Available labs include gamma-ray spectroscopy, X-ray physics and diffraction, blackbody radiation, and Cavendish measurement of the gravitational constant G.

**Requisites:** PHYSICS 202, 208, 248 or graduate/professional standing.**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Learn how to keep a lab notebook, a laboratory skill essential to the study of physics.

Audience: Undergraduate

2. Perform quantitative measurements of physical phenomena, and understand the statistical significance of observations made in the presence of statistical and systematic uncertainties.

Audience: Undergraduate

3. Become proficient in using common research-grade laboratory equipment.

Audience: Undergraduate

4. Understand basic physical principles, as revealed in laboratory experiments.

Audience: Undergraduate

5. Gain an appreciation for, and an understanding of, scientific method.

Audience: Undergraduate

**PHYSICS 311 – MECHANICS**

3 credits.

Origin and development of classical mechanics; mathematical techniques, especially vector analysis; conservation laws and their relation to symmetry principles; brief introduction to orbit theory and rigid-body dynamics; accelerated coordinate systems; introduction to the generalized-coordinate formalisms of Lagrange and Hamilton.

**Requisites:** (PHYSICS 202, 208, or 248) and (MATH 234, 321, or 376), or graduate/professional standing**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**PHYSICS 321 – ELECTRIC CIRCUITS AND ELECTRONICS**

4 credits.

Direct current circuits, circuit theorems, alternating current circuits, transients, non-sinusoidal sources, Fourier analysis, characteristics of semiconductor devices, typical electronic circuits, feedback, non-linear circuits; digital and logic circuits.

**Requisites:** PHYSICS 202, 208, 248 or graduate/professional standing.

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHYSICS 322 – ELECTROMAGNETIC FIELDS**

3 credits.

Electrostatic fields, capacitance, multi-pole expansion, dielectric theory; magnetostatics; electromagnetic induction; magnetic properties of matter; Maxwell's equations and electromagnetic waves; relativity and electromagnetism. Experiments for this course are covered in PHYSICS 308.

**Requisites:** (PHYSICS 202, 208 or 248) and (MATH 234, 321 or 376), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 323 – ELECTROMAGNETIC FIELDS**

3 credits.

Special relativity, electromagnetic momentum, electromagnetic waves: propagation, interference, scattering, reflection and refraction at a dielectric interface, waves in a conductor. Wave packets and group velocity, dispersion. Waveguides and transmission lines. Retarded potentials. Radiation.

**Requisites:** PHYSICS 322 or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Be able to use the principles of special relativity to transform electric and magnetic fields between reference frames.

Audience: Undergraduate

2. Be able to use the Maxwell stress tensor to calculate electromagnetic forces and momentum density.

Audience: Undergraduate

3. Be able to calculate the properties of electromagnetic waves reflecting from surfaces.

Audience: Undergraduate

4. Be able to calculate the characteristics of guided waves.

Audience: Undergraduate

5. Be able to use electromagnetic principles to calculate the propagation of electromagnetic waves in conductors.

Audience: Undergraduate

6. Be able to calculate radiation patterns from dynamic charges and currents.

Audience: Undergraduate

7. Be able to use the principles of retardation to calculate Liénard-Wiechert potentials, and from them calculate radiation fields

Audience: Undergraduate

**PHYSICS 325 – OPTICS**

4 credits.

Classical and modern optics, including imaging, polarization optics, optical telescopes, optical microscopes, interference and interferometers, optical fibers and fiber-optic communication, optical resonators, lasers, optical modulators, introduction to quantum and nonlinear optics. Concepts covered in lecture reinforced by weekly laboratory experiments.

**Requisites:** (PHYSICS 202, 208, or 248) and (PHYSICS 322 or concurrent enrollment), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Be able design and analyze an imaging instrument involving two or more optical elements including mirrors and lenses.

Audience: Undergraduate

2. Be able to quantitatively analyze images obtained from an optical microscope using physics calculation software.

Audience: Undergraduate

3. Be able to design, construct, and evaluate an optical telescope.

Audience: Undergraduate

4. Be able to use the principles of Fourier optics and interference to design and analyze interferometric instruments, including a Michelson interferometer and a grating spectrometer, and use these instruments to characterize light sources

Audience: Undergraduate

5. Be able to apply the fundamental properties of electromagnetic waves to determine the behavior of fiber optic combinations

Audience: Undergraduate

6. Be able to calculate parameters of a functioning laser, and design, align, and operate a diode pumped solid-state laser.

Audience: Undergraduate

7. Be able to apply the principles of refraction modulation to calculate the behavior of acousto-optic and electro-optic modulators.

Audience: Undergraduate

**PHYSICS 361 – MACHINE LEARNING IN PHYSICS**

3 credits.

A detailed introduction to the use of machine learning techniques in physics. Topics will include basics of probability theory and statistics, basics of function fitting and parameter inference, basics of optimization, and machine learning techniques. A selection of physics topics that are particularly amenable to analysis using machine learning will be discussed. These might include processing collider data, classifying astronomical images, solving the Ising model, parameter estimation from physics data sets, learning physical probability distributions, finding string theory compactifications, and finding symbolic physical laws.

**Requisites:** MATH 234 and (PHYSICS 104, 202, 208, or 248), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the conceptual foundations of machine learning and its application to physics problems. Be able to describe accurately and quantitatively the benefits of machine learning over other methods.

Audience: Undergraduate

2. Master the techniques of supervised and unsupervised machine learning, and neural networks. Be able to apply this knowledge to identification and classification of physical events, and the analysis of data.

Audience: Undergraduate

3. Become familiar with the programming techniques and common tools used in machine learning. Learn how to construct a working program and to recognize and solve problems that may arise in a large piece of code.

Audience: Undergraduate

4. Grasp the big picture behind a project that involves machine learning. Be able to articulate the goals, and the project, and where it fits into the overall scientific context.

Audience: Undergraduate

5. Understand how novel machine learning developments from the last years can be used to solve physics problems that were previously intractable.

Audience: Undergraduate

**PHYSICS 371 – ACOUSTICS FOR MUSICIANS**

3 credits.

Intended for music students who wish to learn about physical basis of sound, sound perception, musical scales, musical instruments, and room acoustics.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Physical Sci. Counts toward the Natural Sci req  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**PHYSICS 406 – SPECIAL TOPICS IN PHYSICS**

1-4 credits.

Special topics in physics at the advanced undergraduate level.

**Requisites:** PHYSICS 205, 241, 244, 249, or PHYSICS/E C E 235

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PHYSICS 407 – ADVANCED LABORATORY**

2-4 credits.

Advanced experiments in classical and modern physics. Possible experiments include beta decay, muon lifetime, nuclear magnetic resonance, Stern-Gerlach atomic beam, Mossbauer scattering, velocity of light, Zeeman effect, and Compton scattering. Techniques for the statistical analysis of experimental data and keeping a proper research lab notebook are emphasized. Two (four) credit students will typically perform four (eight) experiments.

**Requisites:** PHYSICS 307

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 415 – THERMAL PHYSICS**

3 credits.

An introduction to thermodynamics and statistical mechanics from a physics perspective. Thermodynamics, phase equilibrium, kinetic theory of gases, classical and quantum statistical mechanics.

**Requisites:** (PHYSICS 205, 241, 249, or PHYSICS/E C E 235) and PHYSICS 311, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. use aspects of probability and statistics to describe the basic thermodynamic properties of macroscopic systems, and interactions between systems

Audience: Undergraduate

2. use the principles of statistical analysis to explain equilibrium between systems, and thermodynamic reservoirs

Audience: Undergraduate

3. use macroscopic system parameters to calculate general properties of homogeneous systems using Maxwell relations

Audience: Undergraduate

4. explain and use the canonical distribution to calculate the properties of systems in contact with a heat reservoir

Audience: Undergraduate

5. use the partition function approach to calculate properties of systems.

Audience: Undergraduate

6. calculate the properties of systems undergoing phase transitions

Audience: Undergraduate

7. use quantum statistics to calculate the properties of non-interacting quantum systems

Audience: Undergraduate

**PHYSICS 448 – ATOMIC AND QUANTUM PHYSICS**

3 credits.

Review of atomic and other quantum phenomena and special relativity; introduction to quantum mechanics treating the more advanced topics of atomic physics and applications to molecular, solid state, nuclear, and elementary particle physics and quantum statistics.

**Requisites:** (PHYSICS 205, 241, 244, 249, or PHYSICS/E C E 235) and PHYSICS 311 and 322, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHYSICS 449 – ATOMIC AND QUANTUM PHYSICS**

3 credits.

Continuation of PHYSICS 448. Review of atomic and other quantum phenomena and special relativity; introduction to quantum mechanics treating the more advanced topics of atomic physics and applications to molecular, solid state, nuclear, and elementary particle physics and quantum statistics.

**Requisites:** PHYSICS 448 or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 498 – DIRECTED STUDY**

1-3 credits.

Advanced-level mentored research project in physics.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**PHYSICS 499 – DIRECTED STUDY**

1-3 credits.

Advanced-level mentored research project in physics.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHYSICS/B M E/H ONCOL/MED PHYS 501 – RADIATION PHYSICS AND DOSIMETRY**

3 credits.

Interactions and energy deposition by ionizing radiation in matter; concepts, quantities and units in radiological physics; principles and methods of radiation dosimetry.

**Requisites:** (PHYSICS 323, 449 and MATH 320) or graduate/professional standing or declared in Medical Physics VISP

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use the physics of microscopic structures of nucleus, nuclear decay, electronic structure of atoms to calculate nuclear decay lifespan and solid state energy band structure  
Audience: Both Grad & Undergrad

2. Calculate the radiation power spectrum for an accelerating charge particle under different physical conditions  
Audience: Both Grad & Undergrad

3. Calculate cross-sections for the following interaction processes between photons and matter: Rayleigh scattering, photoelectric effect, Compton scattering, and pair production  
Audience: Both Grad & Undergrad

4. Calculate the scattering cross-section of Coulomb scattering and energy transfer cross-section in collisions processes and radiative energy loss processes  
Audience: Both Grad & Undergrad

5. Calculate radiation dose for both external photon beams, neutron beams, and charged particle beams  
Audience: Both Grad & Undergrad

6. Identify open research topics in radiation imaging, radiation therapy, and radiation protection fields  
Audience: Graduate

**PHYSICS/E C E/N E 525 – INTRODUCTION TO PLASMAS**

3 credits.

Basic description of plasmas: collective phenomena and sheaths, collisional processes, single particle motions, fluid models, equilibria, waves, electromagnetic properties, instabilities, and introduction to kinetic theory and nonlinear processes. Examples from fusion, astrophysical and materials processing plasmas.

**Requisites:** (E C E 320 or PHYSICS 322), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS/E C E/N E 527 – PLASMA CONFINEMENT AND HEATING**

3 credits.

Principles of magnetic confinement and heating of plasmas for controlled thermonuclear fusion: magnetic field structures, single particle orbits, equilibrium, stability, collisions, transport, heating, modeling and diagnostics. Discussion of current leading confinement concepts: tokamaks, tandem mirrors, stellarators, reversed field pinches, etc.

**Requisites:** E C E/N E/PHYSICS 525, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 531 – INTRODUCTION TO QUANTUM MECHANICS**

3 credits.

Historical background and experimental basis of quantum mechanics; de Broglie waves, correspondence principle, uncertainty principle, Schrodinger equation, hydrogen atom, electron spin, Pauli principle; applications of wave mechanics.

**Requisites:** (PHYSICS 205, 241, 244, 249, or PHYSICS/E C E 235) and PHYSICS 311 and 322, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Master the concept of the wavefunction  
Audience: Both Grad & Undergrad

2. Perform statistical analysis using operator algebra  
Audience: Graduate

3. Understand the energy levels of the hydrogen atom  
Audience: Both Grad & Undergrad

4. Obtain the mathematical skills necessary to solve the 3-dimensional wave equation  
Audience: Graduate

5. Acquire the skills necessary to apply various types of perturbation theory  
Audience: Both Grad & Undergrad

6. Use the variational principle including taking advantage of symmetry  
Audience: Graduate

7. Understand the necessary mathematical apparatus of scattering theory  
Audience: Both Grad & Undergrad

8. Discuss and explain fully the logical foundations of quantum mechanics  
Audience: Both Grad & Undergrad

### PHYSICS 535 – INTRODUCTION TO PARTICLE PHYSICS

3 credits.

Review of quantum physics; introduction to particles, antiparticles and fundamental interactions; detectors and accelerators; symmetries and conservation laws; electroweak and color interactions of quarks and leptons; unification theories.

**Requisites:** PHYSICS 448 or concurrent enrollment, PHYSICS 531 or concurrent enrollment, or graduate/professional or special student standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### PHYSICS 545 – INTRODUCTION TO ATOMIC STRUCTURE

3 credits.

Nuclear atom; hydrogen atom; Bohr-Sommerfeld model, wave model, electron spin, description of quantum electron spin, description of quantum electrodynamic effects; external fields; many-electron atoms; central field, Pauli principle, multiplets, periodic table, x-ray spectra, vector coupling, systematics of ground states; nuclear effects in atomic spectra; interaction with coherent radiation, optical forces, laser cooling and trapping.

**Requisites:** PHYSICS 448 or concurrent enrollment, PHYSICS 531 or concurrent enrollment, or graduate/professional or special student standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Master the concept of the Bohr Atom

Audience: Both Grad & Undergrad

2. Fully understand the orbitals of the hydrogen atom, including how to calculate their explicit forms

Audience: Both Grad & Undergrad

3. Prove and apply the Wigner-Eckart Theorem

Audience: Graduate

4. Become familiar with the phenomenology of multi-electron atoms

Audience: Both Grad & Undergrad

5. Calculate lifetimes and linewidths from first principles

Audience: Graduate

6. Determine quantum states and their properties in the presence of external fields

Audience: Both Grad & Undergrad

7. Categorize and explain the different types of atom traps

Audience: Both Grad & Undergrad

8. Perform density-matrix calculations to quantitatively measure entanglement and decoherence

Audience: Graduate

**PHYSICS 551 – SOLID STATE PHYSICS**

3 credits.

Mechanical, thermal, electric, and magnetic properties of solids; band theory; semiconductors; crystal imperfections.

**Requisites:** PHYSICS 205, 241, 244, 249, 448, 531, PHYSICS/E C E 235, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Utilize ideas of atomic bonding to understand crystal lattice structures and reciprocal space

Audience: Both Grad & Undergrad

2. Use the reciprocal lattice to determine complex x-ray diffraction patterns

Audience: Graduate

3. Become familiar with the calculation of simple phonon dispersion relations and use them to determine lattice thermal properties

Audience: Both Grad & Undergrad

4. Master the electronic properties of metals in the quantum free-electron model and distinguish insulators, metals, and semiconductors

Audience: Both Grad & Undergrad

5. Obtain the ability to calculate general band structures in the nearly-free electronic and tight-binding approximations

Audience: Graduate

6. Analyze and calculate properties of bulk semiconductors and semiconductor junctions

Audience: Both Grad & Undergrad

7. Describe quantitatively ordered systems such as ferroelectrics, ferromagnets and superconductors

Audience: Both Grad & Undergrad

8. Understand the physics of superconducting junctions

Audience: Graduate

**PHYSICS 603 – WORKSHOP IN COLLEGE PHYSICS TEACHING**

1-2 credits.

Discussion, practice, and occasional lectures on various aspects of the teaching of physics. Course planning; course materials; lecture, demonstration, and discussion techniques; laboratory; problem solving; examinations, grading, and evaluation. Problems arising in the teaching of physics; levels of difficulty, differences in talents and backgrounds; methods of presentation of various specific topics.

**Requisites:** PHYSICS 311 and 322

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**PHYSICS/B M E/MED PHYS/PHMCOL-M/RADIOL 619 – MICROSCOPY OF LIFE**

3 credits.

Survey of state of the art microscopic, cellular and molecular imaging techniques, beginning with subcellular microscopy and finishing with whole animal imaging.

**Requisites:** PHYSICS 104, 202, 208, or 248 or PHYSICS/MED PHYS 265

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PHYSICS 623 – ELECTRONIC AIDS TO MEASUREMENT**

4 credits.

Fundamentals of electronics, electronic elements, basic circuits; combinations of these into measuring instruments.

**Requisites:** (PHYSICS 202, 208, or 248) and (MATH 234 or 376), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS 625 – APPLIED OPTICS**

4 credits.

Optical methods in research and technology. Reflection, refraction, absorption, scattering. Imaging. Sources and sensors. Schlieren methods. Interferometry. Instrumental spectroscopy. Fourier optics, image processing, holography. Laser technology, Gaussian beams, nonlinear optics.

**Requisites:** PHYSICS 322 or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### PHYSICS 681 – SENIOR HONORS THESIS

3 credits.

Mentored individual research and study for students completing Physics Honors in the Major.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### PHYSICS 682 – SENIOR HONORS THESIS

3 credits.

Mentored individual research and study for students completing Physics Honors in the Major.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### PHYSICS/MED PHYS 688 – RADIATION PRODUCTION AND DETECTION

4 credits.

Physics of ionizing radiation production and detection in medical science; ionization chambers, solid-state detectors, charged and neutral particles for external beam radiotherapy, radionuclides activated with accelerators for diagnostic and therapeutic applications, radiochemistry, and X-ray tube physics.

**Requisites:** PHYSICS/B M E/H ONCOL/MED PHYS 501

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Achieve competence in experimental measurement methods of radiation dose

Audience: Both Grad & Undergrad

2. Develop a functional understanding of the principles and operation of the major types of ionizing radiation detectors used in modern medical physics including ion chambers, scintillators, semiconductors, chemical detectors, and calorimeters.

Audience: Both Grad & Undergrad

3. Apply fundamental atomic and nuclear physics and chemistry to radiation production using charged and neutral particles with accelerators and reactors, especially in the context of radionuclide production for diagnostic and therapeutic medical applications.

Audience: Both Grad & Undergrad

4. Develop an understanding of the principles and operation of medical electron linear accelerators for radiation therapy.

Audience: Both Grad & Undergrad

5. Apply physics and engineering concepts to understand the basic hardware configuration of an x-ray tube, the production of electrons by thermionic emission, the acceleration of electrons to a target material, and the physical interactions in the target resulting in x-rays.

Audience: Both Grad & Undergrad

6. Apply what has been learned to their current research project.

Audience: Graduate

### PHYSICS 691 – SENIOR THESIS

2-3 credits.

Mentored individual research and study for students completing a thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PHYSICS 692 – SENIOR THESIS**

2-3 credits.

Mentored individual research and study for students completing a thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PHYSICS 701 – GRADUATE INTRODUCTORY SEMINARS**

1 credit.

Designed to give new students an introduction to the broad range of modern research going on at UW Physics, and to help students find research opportunities in the department. Each week, faculty from each major research area will present their research in a seminar setting. The research areas will include selected topics both in theory and experiment from biophysics; atomic, molecular, and optical physics; plasma; condensed matter; quantum information and computation; high energy and nuclear physics; particle physics, astrophysics, and cosmology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gains a broad awareness of the status of contemporary research in physics

Audience: Graduate

2. Learns to engage and communicate with other research professionals

Audience: Graduate

3. Learn how to work with the scientific literature

Audience: Graduate

4. Learn professional standards for the responsible conduct of research

Audience: Graduate

5. Learn responsibilities of authors and co-authors and acceptable authorship practices

Audience: Graduate

**PHYSICS 707 – QUANTUM COMPUTING LABORATORY**

4 credits.

Provides an intensive introduction to the experimental techniques of quantum computing. Students will do 8 experiments chosen from: Bell violation with entangled photons, Stern-Gerlach, Pulsed NMR, Optical pumping of Rb, Nanofabrication, Fiber optics communication, Diode pumped YAG laser, and Acousto-optic modulator.

**Requisites:** PHYSICS 709 and (PHYSICS 531 or 731)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Master fundamental techniques in experimental physics of quantum computing. This includes, but is not limited to: calibration and operation of devices to measure electromagnetic signals, particle detection, lasers and other optical equipment.

Audience: Graduate

2. Be able to analyze experimental data. This involves physical interpretation and judgment of data quality. Understand error analysis and how to extract signals from noisy data.

Audience: Graduate

3. Become familiar with all the requirements involved in the presentation of scientific data at an international level. Be able to achieve logical structure, clarity of expression and convincing narrative from introduction to conclusion.

Audience: Graduate

4. Acquire the skill of keeping a good lab notebook. This will include concision and accuracy of description and clear writing, particularly for mathematical arguments.

Audience: Graduate

**PHYSICS 709 – INTRODUCTION TO QUANTUM COMPUTING**

3 credits.

A detailed introduction to quantum computation and quantum information processing. Basic topics of quantum mechanics that are most relevant to quantum computing, particularly measurement theory. Specialized topics such as entanglement, other measures of quantum correlation and the Bell inequalities. Classical and quantum information theory, classical and quantum complexity theory. Qubits, quantum gates, quantum circuits. Teleportation, quantum dense coding, quantum cryptography. Quantum algorithms: Deutsch, Simon, Shor, Grover, and adiabatic algorithms. Basic quantum error correction: 5-qubit, Steane and Shor codes. Completion of one undergraduate course in quantum mechanics recommended, such as PHYSICS 448 or 531.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the conceptual foundations of quantum computing and its relation to classical computing. Be able to describe accurately and quantitatively the differences in their capacities.

Audience: Graduate

2. Master the formalism of many-qubit quantum mechanics, including Pauli matrices, commutation relations and repeated unitary transformations. Be able to apply this knowledge to quantum gates, quantum circuits and quantum algorithms.

Audience: Graduate

3. Become familiar with the differences between quantum correlations and classical correlations at a conceptual level. Use this knowledge to be able to analyze experiments on Bell inequalities.

Audience: Graduate

4. Understand the motivation for quantum error correction. Be able to follow and verify error-correction protocols.

Audience: Graduate

**PHYSICS 711 – THEORETICAL PHYSICS-DYNAMICS**

3 credits.

Lagrange's equations, Principle of Least Action, orbits and scattering, kinematics of rotation, rigid body dynamics, small oscillations, special relativistic dynamics, Hamiltonian formulation, canonical transformations, Hamilton-Jacobi theory, canonical perturbation theory, chaos, continuum mechanics, introduction to general relativity.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHYSICS 715 – STATISTICAL MECHANICS**

3 credits.

Statistical foundations, Liouville's theorem, ensembles, classical and quantum distribution functions, entropy and temperature, connection with thermodynamics, partition functions, quantum gases, non-ideal gases, phase transitions and critical phenomena, non-equilibrium problems, Boltzmann equation and the H-theorem, transport properties, connections with quantum field theory, applications of statistical mechanics to selected problems.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHYSICS 716 – STATISTICAL MECHANICS II**

3 credits.

Symmetries and symmetry breaking, phase transitions, mean field theory, critical exponents, scaling hypothesis, renormalization group, diagrammatic expansion, epsilon-expansion, exact solution of the 2d Ising model. Boltzmann kinetic equation, H-theorem, Fokker-Planck and Langevin equations, Born-Markov master equation, Lindblad superoperators, classical and quantum noise, theory of amplifiers.

**Requisites:** PHYSICS 715 and 731**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2017**PHYSICS 717 – RELATIVITY**

3 credits.

Special and general theories of relativity, relativistic electrodynamics, cosmology, unified field theories.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHYSICS 721 – THEORETICAL PHYSICS-ELECTRODYNAMICS**

3 credits.

Electrostatics, magnetostatics, Green functions, boundary value problems, macroscopic media, Maxwell's equations, the stress tensor and conservation laws, electromagnetic waves, wave propagation, dispersion, waveguides, radiation, multipole expansions, diffraction and scattering, special relativity, covariance of Maxwell's equations, Lienard-Wiechert potentials, radiation by accelerated charges. Knowledge of electrodynamics (such as PHYSICS 322) strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

### PHYSICS/E C E/N E 724 – WAVES AND INSTABILITIES IN PLASMAS

3 credits.

Waves in a cold plasma, wave-plasma interactions, waves in a hot plasma, Landau damping, cyclotron damping, magneto-hydrodynamic equilibria and instabilities, microinstabilities, introduction to nonlinear processes, and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### PHYSICS/E C E/N E 725 – PLASMA KINETIC THEORY AND RADIATION PROCESSES

3 credits.

Coulomb Collisions, Boltzmann equation, Fokker-Planck methods, dynamical friction, neoclassical diffusion, collision operators radiation processes and experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### PHYSICS/E C E/N E 726 – PLASMA MAGNETOHYDRODYNAMICS

3 credits.

MHD equations and validity in hot plasmas; magnetic structure and magnetic flux coordinates; equilibrium in various configurations; stability formulation, energy principle, classification of instabilities; ideal and resistive instability in various configurations, evolution of nonlinear tearing modes; force-free equilibria, helicity, MHD dynamo; experimental applications. Basic knowledge of plasmas [such as PHYSICS/E C E/N E 525] and advanced electromagnetics [such as PHYSICS 721 or E C E 740] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### PHYSICS 731 – QUANTUM MECHANICS

3 credits.

Schrodinger equation, operator theory, matrix mechanics, transformation theory, Heisenberg representation, orbital angular momentum, bound-state problems, scattering theory, stationary perturbation theory, degenerate systems, time-dependent perturbation theory, Born approximation, other approximation methods. Knowledge of quantum mechanics and atomic physics (such as PHYSICS 449 or 531) strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### PHYSICS 732 – QUANTUM MECHANICS

3 credits.

Interaction of electromagnetic radiation with matter, quantization of the electromagnetic field, spontaneous transitions, identical particles and spin, addition of angular momenta, tensor operators, complex atoms, Hartree approximation, molecules, Dirac equation, relativistic effects in atoms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### PHYSICS 735 – PARTICLE PHYSICS

3 credits.

Structure of elementary particles, quarks and gluons, introduction to calculational techniques of particle interactions (Feynman diagrams), constituent models of electroweak and strong interactions and associated phenomenological techniques. Knowledge of introductory particle physics and quantum mechanics (such as PHYSICS 535) strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### PHYSICS 736 – EXPERIMENTAL METHODS IN NUCLEAR-, PARTICLE-, AND ASTROPHYSICS

3 credits.

Interaction of particles with matter; detector techniques at colliding beam machines, in nuclear and particle physics, astrophysics, and cosmology; experimental strategies in detector design; principles of simulation and Monte Carlo methods, error analysis and statistical techniques in data analysis. Knowledge of introductory particle physics (such as PHYSICS 535) strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### PHYSICS/E C E 746 – QUANTUM ELECTRONICS

3 credits.

Elementary aspects of Lagrange theory of fields and field quantization; Bose, Fermi and Pauli operators; interaction of fields; quantum theory of damping and fluctuations; applications to lasers, nonlinear optics, and quantum optics. Knowledge of lasers [such as PHYSICS 546] and graduate-level electromagnetics [such as E C E 740 or PHYSICS 721] strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PHYSICS/E C E 748 – LINEAR WAVES**

3 credits.

General considerations of linear wave phenomena; one dimensional waves; two and three dimensional waves; wave equations with constant coefficients; inhomogenous media; random media. Lagrangian and Hamiltonian formulations; asymptotic methods. Knowledge of electromagnetics [such as E C E 320 or PHYSICS 321], mechanics [such as M E 340], or vibrations [such as M E 440] strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHYSICS/E C E/N E 749 – COHERENT GENERATION AND PARTICLE BEAMS**

3 credits.

Fundamental theory and recent advances in coherent radiation charged particle beam sources (microwave to X-ray wavelengths) including free electron lasers, wiggler/wave-particle dynamics, Cerenkov masers, gyrotrons, coherent gain and efficiency, spontaneous emission, beam sources and quality, related accelerator concepts experimental results and applications.

**Requisites:** E C E 740**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHYSICS 751 – ADVANCED SOLID STATE PHYSICS**

3 credits.

Lattice dynamics; band theory; Fermi surfaces; electrodynamics of metals; optical properties; transport properties. Knowledge of introductory solid state physics (such as PHYSICS 551) strongly encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHYSICS 763 – QUBIT TUNE-UP AND PROGRAMMING**

3 credits.

Explore the development of quantum computers using specific hardware platforms, such as superconducting qubits. Walk through the entire process from a fabricated device to a functional quantum computer, focusing on qubit tune-up and the DiVincenzo criteria. Implement state preparation and measurement, single and two-qubit gates, and apply quantum characterization, verification, and validation (QCVV) techniques to diagnose and mitigate errors. Utilize quantum computer simulators and real quantum devices when available, leveraging current experimental data analysis methods to understand how to build scalable and reliable quantum systems. Knowledge of quantum mechanics [such as PHYSICS 531] required.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the physics underlying a specific qubit hardware.

Audience: Graduate

2. Describe and implement qubit state preparation and measurement (SPAM).

Audience: Graduate

3. Characterize and implement single and two-qubit gates.

Audience: Graduate

4. Define and implement quantum characterization, verification, and validation (QCVV) techniques to diagnose errors in quantum hardware.

Audience: Graduate

5. Utilize data analysis techniques necessary for developing quantum computers.

Audience: Graduate

### PHYSICS 765 – QUANTUM ALGORITHMS AND ERROR CORRECTION

3 credits.

Dive into the quantum computing stack by starting with real-world applications and progressing through the essential components needed for fault-tolerant quantum computers. Learn about key areas such as quantum algorithms, and advanced quantum error correction. Explore algorithms for scientific applications, including quantum phase estimation and the HHL algorithm, and examine the derivation, trade-offs, and implementation of sophisticated error correction techniques. Learn to analyze and estimate the full-stack quantum resources required for novel quantum algorithms by utilizing classical computational tools, in order to develop and evaluate scalable, high-utility quantum computing solutions.

**Requisites:** PHYSICS 709

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Summarize how to estimate quantum resources, starting from a high-utility application, through quantum algorithms, error correcting codes, and physical qubit parameters.

Audience: Graduate

2. Discuss quantum algorithms for scientific applications, including quantum phase estimation, time-stepping schemes (Trotterization, qubitization), initial state preparation, and the HHL algorithm.

Audience: Graduate

3. Describe advanced quantum error correction codes, their derivation, trade-offs between different codes, physical overheads, decoders, and threshold calculations.

Audience: Graduate

4. Use and develop classical computational tools to study various aspects of quantum computers.

Audience: Graduate

### PHYSICS 772 – HIGH ENERGY ASTROPHYSICS

3 credits.

Interactions among the particles, fields, and radiation of interstellar and intergalactic space. Gamma-ray, x-ray, and cosmic ray production, propagation, and detection. Knowledge of electrodynamics (such as PHYSICS 322) strongly encouraged.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### PHYSICS 779 – ADVANCED QUANTUM COMPUTING

3 credits.

Explores applications of quantum theory to both the hardware and the software that underpin modern quantum information technology. Advanced quantum circuit theory: Clifford group and Gottesman-Knill theorem, Mathematica code. Decoherence: density matrices, probability distributions, T1 and T2. Advanced error correction: master equation, Kraus operators, fault tolerance, quantum tomography. Hardware: Trapped ions, Paul traps, sideband cooling, CZ and MS gates, neutral atoms, superconductors, quantum dots.

**Requisites:** PHYSICS 531 or 731

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand how to construct and analyze a quantum circuit. Be able to simulate using Mathematica.

Audience: Graduate

2. Master the formalism of decoherence of quantum computers. Be able to apply this knowledge for different noise models.

Audience: Graduate

3. Advance knowledge of error correction beyond simple 5- and 7-qubit codes. Understand connection to classical error correction methods.

Audience: Graduate

4. Be able to explain and compare all the major technologies in use today for quantum information processing. Grasp the physics behind each, including speed and resistance to decoherence.

Audience: Graduate

### PHYSICS 799 – INDEPENDENT STUDY

1-3 credits.

Graduate-level mentored research project in physics.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### PHYSICS 801 – SPECIAL TOPICS IN THEORETICAL PHYSICS

1-3 credits.

Selected topics in theoretical physics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PHYSICS 805 – SPECIAL TOPICS IN PHYSICS**

1-3 credits.

Special topics in physics at the graduate level.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHYSICS 831 – ADVANCED QUANTUM MECHANICS**

3 credits.

Quantum theory of free and interacting fields, formal scattering theory, dispersion theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PHYSICS 832 – ADVANCED QUANTUM MECHANICS**

3 credits.

Continuation of PHYSICS 831. Quantum theory of free and interacting fields, formal scattering theory, dispersion theory.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PHYSICS 835 – COLLIDER PHYSICS PHENOMENOLOGY**

2-3 credits.

Standard model. Application to  $e^+e^-$ , proton-antiproton, pp, and ep colliders. Jets. Weak boson, heavy-quark, and Higgs boson production and decay. Quarkonia. Neutral B meson mixing. Grand unification. Supersymmetry.**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2021**PHYSICS/E C E 848 – NONLINEAR WAVES**

3 credits.

General considerations of nonlinear wave phenomena; nonlinear hyperbolic waves; nonlinear dispersion; nonlinear geometrical optics; Whitham's variational theory; nonlinear and parametric instabilities; solitary waves; inverse scattering method. Knowledge of electromagnetics [such as E C E 320 or PHYSICS 321] or mechanics [such as M E 340] encouraged.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**PHYSICS 900 – COLLOQUIUM**

0-1 credits.

Lectures by staff and visitors.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHYSICS/ASTRON 910 – SEMINAR IN ASTROPHYSICS**

0-1 credits.

Current topics in astrophysics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHYSICS/E C E/N E 922 – SEMINAR IN PLASMA PHYSICS**

0-1 credits.

Current topics in plasma physics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**PHYSICS 990 – RESEARCH**

1-12 credits.

Research supervised by individual faculty members.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Evaluates or synthesizes information pertaining to questions or challenges in physics.

Audience: Graduate

2. Engages appropriately and communicates clearly with other research professionals in physics.

Audience: Graduate

3. Formulates and plans original research.

Audience: Graduate

4. Creates research, scholarship, or performance that makes a substantive contribution to the field of physics.

Audience: Graduate

## PHYSIOLOGY (PHYSIOL)

### PHYSIOL 699 – INDEPENDENT WORK

1-4 credits.

Directed study projects for juniors and seniors.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations

Audience: Undergraduate

2. Read and effectively search scientific literature

Audience: Undergraduate

3. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

### PHYSIOL 901 – SEMINAR

1 credit.

Students, faculty, and staff present research reports of current interest.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

### PHYSIOL 990 – RESEARCH

1-9 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Exhibit a broad understanding of general physiology principles.

Audience: Graduate

2. Conduct independent research using a variety of approaches.

Audience: Graduate

3. Think critically to address research challenges.

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis lab.

Audience: Graduate

## PLANT PATHOLOGY (PL PATH)

### PL PATH/BOTANY 123 – PLANTS, PARASITES, AND PEOPLE

3 credits.

Explores the interaction between society and plant-associated microbes.

Topics include: the Irish potato famine, pesticides in current agriculture, role of economics and consumer preference in crop disease management and the release of genetically engineered organisms.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PL PATH/ZOOLOGY 154 – TINY EARTH: ANTIBIOTIC DISCOVERY RESEARCH**

2 credits.

Learn basic methodology in scientific research and discovery, including laboratory techniques, quantitative reasoning, scientific communication, and collaboration. Gain hands-on laboratory experience working with microbes to test original hypotheses concerning the discovery of potential antibiotic compounds while addressing the world's antibiotic resistance crisis by contributing data to the global "Tiny Earth" network of researchers to advance potential drug development. Tiny Earth seeks to encourage students to pursue careers in science through real-world, applied research experiences and aims to address a worldwide health threat of the diminishing supply of effective antibiotics by "student-sourcing antibiotic discovery." Concurrent enrollment in BIOLOGY/BOTANY/ZOOLOGY 152 is required for permission to enroll.

**Requisites:** Consent of instructor**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate basic knowledge of microbes and antibiotic resistance by (1) sufficiently explaining the process of natural selection with the accurate use of terminology, (2) describing morphological and physiological variation in bacteria and how this relates to bacterial taxonomy, and (3) summarizing mechanisms of the spread of antibiotic resistance genes across the microbial world.

Audience: Undergraduate

2. Demonstrate scientific competency as shown by their ability to (1) propose an original research question and hypothesis, (2) develop a biological rationale for the hypothesis, (3) select appropriate protocols to test the hypothesis, and (4) perform the research collaboratively with group members in a cordial and respectful way.

Audience: Undergraduate

3. Demonstrate proper techniques in basic micro- and molecular biology by (1) pipetting fluids with volume accuracy, (2) plating microbes via spread, patch, and streak methods, (3) using proper sterile technique, and (4) performing protocols for polymerase chain reaction (PCR), gel electrophoresis, and BLAST analysis for DNA amplification and sequencing.

Audience: Undergraduate

4. Demonstrate quantitative reasoning as shown by their ability to (1) select an appropriate statistical analysis for a given data set and research question, (2) carry out the statistical analysis using a vetted program (e.g. online statistical calculator tool such as Vassarstats.com), and (3) accurately interpret and the translate the results into a meaningful statement.

Audience: Undergraduate

5. Demonstrate scientific communication as shown by their ability to (1) clearly express a hypothesis, general methodology, and results in formal writing, (2) accurately visualize numerical results in the form of graph, (3) satisfactorily deliver aspects of the research project and findings via oral presentation and scientific poster presentation.

Audience: Undergraduate

**PL PATH/PLANTSCI 261 – SUSTAINABLE TURFGRASS USE AND MANAGEMENT**

2 credits.

Sustainable use and management of turfgrass landscapes in urban and suburban environments, including home lawns, golf courses, and sports fields. Focus is on creating sustainable and attractive turfgrass landscapes through proper species selection, use of slow-release or organic fertilizer practices, and minimizing the use of pesticides and supplemental irrigation.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe how turf is used in urban and suburban communities

Audience: Undergraduate

2. Identify the positive environmental impacts of using turfgrass

Audience: Undergraduate

3. Identify the negative environmental impacts of turfgrass management

Audience: Undergraduate

4. Identify the 3 major pest groups in turfgrass and describe sustainable management strategies for each

Audience: Undergraduate

**PL PATH/PLANTSCI 262 – TURFGRASS MANAGEMENT LABORATORY**

1 credit.

Hands-on turf establishment, cool- and warm-season grass, seed and weed identification, chemical application, and turf cultivation techniques and equipment use, plus field trips to major league sport facilities and golf courses.

**Requisites:** PL PATH/PLANTSCI 261 or concurrent enrollment**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify the species of turfgrass commonly used in Wisconsin and the conditions they are most suited to.

Audience: Undergraduate

2. Describe management strategies that can be implemented to increase the sustainability of turfgrass management.

Audience: Undergraduate

3. List the most common pests observed on Wisconsin turfgrass and describe strategies for their sustainable management.

Audience: Undergraduate

4. Calculate the amount of seed needed to properly establish a turfgrass site, the amount of fertilizer needed to adequately fertilize turfgrass, and the concentration of pesticides needed to suppress common turfgrass pests.

Audience: Undergraduate

**PL PATH 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work for Honors students under direct guidance of a faculty member in an area of Plant Pathology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2000

**PL PATH 299 – INDEPENDENT STUDY**

1-3 credits.

Research work for students under direct guidance of a faculty member in an area of Plant Pathology. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PL PATH 300 – INTRODUCTION TO PLANT PATHOLOGY**

4 credits.

Economic importance, symptoms, causes, and methods of control of representative plant diseases.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, or BIOCORE 381) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PL PATH 311 – GLOBAL FOOD SECURITY**

3 credits.

Isn't having enough food a basic human right? Exploration of the drivers of food insecurity: barriers to food production (pests, land availability, climate), barriers to food availability (politics, price, biofuels), and a greater need due to population growth. Examination of solutions to food insecurity.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Locate, evaluate, and use credible information resources relevant to global food insecurity

Audience: Undergraduate

2. Analyze and interpret scientific evidence

Audience: Undergraduate

3. Compare and contrast information from multiple perspectives to gain a more comprehensive understanding of global food insecurity

Audience: Undergraduate

4. Demonstrate teamwork and interpersonal skills

Audience: Undergraduate

5. Analyze the barriers to food security

Audience: Undergraduate

6. Evaluate proposed solutions to food insecurity

Audience: Undergraduate

7. Apply logic-based rhetoric to communicate effectively in written and oral formats

Audience: Undergraduate

8. Demonstrate understanding of scientific reasoning, and determine when scientific information supports a given conclusion.

Audience: Undergraduate

**PL PATH 315 – PLANT MICROBIOMES**

4 credits.

Explore plant associated microbial communities (the plant microbiome), methods used to study them, and how we can use them to improve plant and ecosystem health in the face of challenges to agricultural and natural systems. Examples will be drawn from annual crop, grassland, and forested ecosystems. Use current molecular, bioinformatic, and statistical approaches to characterize rhizosphere microbiomes from samples collected as part of on-going research projects.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 101 and 102, BOTANY/BIOLOGY 130, or BIOCORE 381) and (STAT 301 or 371), or Graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PL PATH/BOTANY 332 – FUNGI**

4 credits.

Growth, development, variability and dispersal of saprophytic, parasitic, and symbiotic fungi, with a consideration of their ecological and economic significance. Develop skills in microscopy with live fungal materials.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PL PATH/BOTANY 333 – BIOLOGY OF THE FUNGI**

2 credits.

Growth, development, variability and dispersal of saprophytic, parasitic, and symbiotic fungi, with a consideration of their ecological and economic significance.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Will have a detailed knowledge of the biodiversity of Fungi, and organisms traditionally included in mycology courses, including but not limited to systematics, life cycles, genetics, pathology, ecology.

Audience: Both Grad & Undergrad

2. Apply knowledge of Fungi and fungal-like organisms for use in agriculture and industry.

Audience: Both Grad & Undergrad

3. Communicate about fungi in either an outreach or professional capacity.

Audience: Graduate

### **PL PATH/A A E/PLANTSCI 367 – INTRODUCTION TO ORGANIC AGRICULTURE: PRODUCTION, MARKETS, AND POLICY**

3 credits.

Provides an in-depth understanding of the history of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health.

**Requisites:** ENVIR ST/AGROECOL/C&E SOC/ENTOM 103, AGRONOMY 100, HORT 120, PLANTSCI 110, BOTANY/PL PATH 123, SOC/C&E SOC 222, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.

Audience: Both Grad & Undergrad

2. Explore the biological, ecological, and agricultural underpinnings of organic production systems.

Audience: Both Grad & Undergrad

3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.

Audience: Both Grad & Undergrad

4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives.

Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of organic farming and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Both Grad & Undergrad

7. Develop the capacity to evaluate sustainability and resilience outcomes of organic and other agricultural production and processing systems using interdisciplinary methods.

Audience: Graduate

### **PL PATH 375 – SPECIAL TOPICS**

1-4 credits.

Subjects of current interest to undergrads.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

### **PL PATH 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a faculty or instructional academic staff member in Plant Pathology and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Workplace – Workplace Experience Course

**Repeatable for Credit:** Yes, for 8 number of completions

**Last Taught:** Spring 2020

### **PL PATH 400 – STUDY ABROAD IN PLANT PATHOLOGY**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

### **PL PATH 499 – INDEPENDENT STUDY IN ORGANIC AGRICULTURE**

2 credits.

Provide students research and/or hands-on experiences within the organic sector in order to gain scientific knowledge and/or an in-depth understanding of the research and science of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health. Declared in the Certificate in Organic Agriculture

**Requisites:** Consent of instructor

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply knowledge of organic production through experiential opportunities within local, national and/or international communities.

Audience: Undergraduate

2. Research and/or develop innovations that integrate the biological, ecological, social, and economic concepts of organic agriculture into scientific or practical applications supporting organic farmers, industry participants, and/or consumers.

Audience: Undergraduate

**PL PATH/BOTANY/ENTOM 505 – PLANT-MICROBE INTERACTIONS: MOLECULAR AND ECOLOGICAL ASPECTS**

3 credits.

Molecular and ecological aspects of the interactions between plants and microorganisms. Explores many of the themes, from genetic to integrative, of modern biology, and illustrates how study of plant-microbe interactions contributes to understanding of fundamental plant science.

**Requisites:** MICROBIO 303, GENETICS 466, 468, BIOCHEM 501, 508, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PL PATH 517 – PLANT DISEASE RESISTANCE**

2-3 credits.

Host resistance in plant disease control. Conceptual and applied aspects of resistance: how it works, why it sometimes fails, and the traditional and modern techniques used for evaluating host resistance and incorporating resistance factors into new plant varieties.

**Requisites:** PL PATH 300, GENETICS 466, 468, PLANTSCI 338 or AGRONOMY 338 prior to Fall 2025, PLANTSCI 501 or AGRONOMY 501 prior to Fall 2025, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PL PATH 559 – DISEASES OF ECONOMIC PLANTS**

3 credits.

Symptoms, epidemiology and control of diseases of crop plants; emphasis on disease diagnosis.

**Requisites:** (PL PATH 300 and 332), or graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**PL PATH/BOTANY 563 – PHYLOGENETIC ANALYSIS OF MOLECULAR DATA**

3 credits.

Theory and practice of phylogenetic inference from DNA sequence data.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, or BIOCORE 381) and (STAT 240, 301, 324, or 371) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain in details all the steps in the pipeline for phylogenetic inference and how different data and model choices affect the inference outcomes

Audience: Both Grad & Undergrad

2. Plan and produce reproducible scripts with the analysis of real biological data

Audience: Both Grad & Undergrad

3. Justify the data and model choices made for the data analysis

Audience: Both Grad & Undergrad

4. Interpret the results of the most widely used phylogenetic methods in biological terms

Audience: Both Grad & Undergrad

5. Orally present the results of phylogenomic data analyses based on the best scientific and reproducibility practices

Audience: Graduate

**PL PATH 590 – CAPSTONE IN PLANT PATHOLOGY**

1-4 credits.

Synthesizing research-based capstone experience in Plant Pathology.

Develop problem-solving skills, be exposed to multidisciplinary approaches, develop teamwork and interpersonal skills, develop information resources, consider societal, economic, ethical, scientific and professional aspects of the field, and prepare and present written and/or oral reports.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PL PATH 602 – ECOLOGY, EPIDEMIOLOGY AND CONTROL OF PLANT DISEASES**

3 credits.

Environmental factors in the development and spread of diseases, pathogen variability, genetics of disease resistance, and principles of disease control.

**Requisites:** PL PATH 300, (MATH 217 or 221), and (STAT 301, 371, or F&W ECOL/STAT 571), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PL PATH 622 – PLANT-BACTERIAL INTERACTIONS**

2-3 credits.

Physiology, genetics, taxonomy, and ecology of bacterial pathogens, epiphytes, and symbionts of plants.

**Requisites:** MICROBIO 303 and (GENETICS 466, 468, BIOCHEM 501, or 508) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**PL PATH/M M & I/ONCOLOGY 640 – GENERAL VIROLOGY-MULTIPLICATION OF VIRUSES**

3 credits.

The structure, multiplication, genetics, pathology and control of animal and plant viruses.

**Requisites:** (GENETICS 466 or 467) and (BIOCHEM 501 or 508) or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the major classes of viruses infecting animals and plants, and summarize their basic replication strategies.

Audience: Both Grad & Undergrad

2. Identify the major innate and adaptive antiviral immunity mechanisms of animals and plants, and examples of viral countermeasures against these.

Audience: Both Grad & Undergrad

3. Summarize the burdens and threats of viruses to public health, agriculture, etc.

Audience: Both Grad & Undergrad

4. Identify the major approaches and challenges to virus control at the single organism and host population levels, including why viruses are generally harder to control than bacteria, and major steps in developing new antiviral agents.

Audience: Both Grad & Undergrad

5. Illustrate beneficial uses of viruses and their genes in research, biotechnology and medicine.

Audience: Both Grad & Undergrad

6. Design and evaluate basic experiments to address specific questions in virology.

Audience: Both Grad & Undergrad

7. Read and evaluate primary literature papers in virology.

Audience: Graduate

### **PL PATH/BOTANY/GENETICS/M M & I 655 – BIOLOGY AND GENETICS OF FUNGI**

3 credits.

Fungal genetics, genomics, and physiology using plant pathogenic fungi and the genetic models *Aspergillus nidulans* and *Neurospora crassa* as model systems to explore the current knowledge of fungal genetics and plant/fungal interactions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a basic understanding of fungal biology and genetics

Audience: Graduate

2. Analyze current research topics in fungal genetics/biology

Audience: Graduate

3. Identify members of the fungal research community

Audience: Graduate

4. Write and critique research grants

Audience: Graduate

5. Critique and discuss peer reviewed manuscripts

Audience: Graduate

6. Develop and deliver oral presentations (research paper and own research)

Audience: Graduate

7. Improve communication skills (oral and written)

Audience: Graduate

### **PL PATH 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for undergraduate students in an Honors program completing a thesis in the area of Plant Pathology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### **PL PATH 682 – SENIOR HONORS THESIS**

2-4 credits.

Second semester of individual study for undergraduate students in an Honors program completing a thesis in the area of Plant Pathology, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### **PL PATH 699 – SPECIAL PROBLEMS**

1-5 credits.

Individual advanced work in an area of Plant Pathology under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **PL PATH 799 – PRACTICUM IN PLANT PATHOLOGY TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PL PATH 875 – SPECIAL TOPICS**

1-4 credits.

Topics of current interest to Grad students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **PL PATH 923 – SEMINAR**

1 credit.

Seminar series on topics related to plant pathology

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **PL PATH/BOTANY 930 – SEMINAR-MYCOLOGY**

1 credit.

Topics, recent advances literature in the area of Mycology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **PL PATH 990 – RESEARCH**

1-9 credits.

Independent laboratory research in preparation of a graduate thesis under supervision of a faculty member

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# PLANT SCIENCE (PLANTSCI)

## PLANTSCI 110 – INTRODUCTION TO PLANT SCIENCE AND TECHNOLOGY

4 credits.

Introduces the basic principles of plant science and technology as they apply to cultivated plants. Topics include the historical and economic importance of plants for food, feed, and fiber; origin, classification, and geographic distribution; plant breeding; growth, development, and physiology; agroecosystems and practices; field and greenhouse production; integrated pest management; and marketing practices. Discuss and apply associated technologies (e.g. gene editing, remote sensing, unmanned aerial vehicles).

**Requisites:** None

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Define and describe plant anatomy and morphology from subcellular through whole plant organization  
Audience: Undergraduate

2. Define and describe the basic principles of plant growth and development including photosynthesis, respiration, transpiration, plant growth regulators, reproduction and genetics  
Audience: Undergraduate

3. Articulate how the environment and management practices affect plant growth and development  
Audience: Undergraduate

4. Illustrate how cutting-edge technologies are being used to address modern agricultural challenges  
Audience: Undergraduate

5. Locate and use reputable resources to communicate scientific knowledge about plants in written and oral formats  
Audience: Undergraduate

6. Identify areas of interest and potential opportunities for career development in plant science and technology  
Audience: Undergraduate

## PLANTSCI 121 – COLLOQUIUM IN PLANT SCIENCE AND TECHNOLOGY

1 credit.

Overview of regional, national and international areas of importance to various plant science industries. Discuss current plant science related topics of special interest.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe what education and training is needed for various careers in horticulture and plant sciences.

Audience: Undergraduate

2. Discuss current plant science topics and be able to find scientific, unbiased sources of information.

Audience: Undergraduate

3. Identify opportunities for career development in the plant sciences and horticulture.

Audience: Undergraduate

4. Discuss the numerous ways that plant science and horticulture can help to reduce climate change effects for a sustainable future.

Audience: Undergraduate

## PLANTSCI 227 – PROPAGATION OF HORTICULTURAL PLANTS

3 credits.

Methods of propagation of herbaceous and woody plants, fundamental anatomical and physiological principles underlying sexual and asexual propagation of plants.

**Requisites:** Sophomore standing and (BOTANY 100, BOTANY/BIOLOGY 130, or ZOOLOGY/BIOLOGY/BOTANY 152)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the science behind the major types of asexual and sexual propagation methods

Audience: Undergraduate

2. Perform the major types of asexual and sexual propagation methods  
Audience: Undergraduate

3. Describe the role of research in plant propagation  
Audience: Undergraduate

4. Identify appropriate plant propagation reference materials available for developing propagation protocols  
Audience: Undergraduate

5. Provide expertise in plant propagation for possible future employment in commercial operations  
Audience: Undergraduate

**PLANTSCI 230 – WINES AND VINES OF THE WORLD**

2 credits.

An introduction to grape production and wine culture. Learn the science of growing grapes, wine-making, and wine appreciation. Topics include cultural history and geography of the world's grape-producing regions, principles of plant anatomy and physiology, biochemistry of wine production, wine producing regions of the world and wine styles, and sensory evaluation of wines. Includes a wine tasting discussion to explore the sensory attributes of the wines and production practices specific to the wine production regions to be covered. Students must be 21 years of age by the start of class to enroll.

**Requisites:** Consent of instructor

**Course Designation:** Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the basic chemistry and biology concepts pertaining to viticulture and winemaking

Audience: Undergraduate

2. Explain general concepts of sustainable grape production and the winemaking process

Audience: Undergraduate

3. Discuss the history and social dimensions of wines from around the world and their relation to culture

Audience: Undergraduate

4. Implement tasting strategies to characterize wine from different regions of the world

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenges of worldwide grape production

Audience: Undergraduate

6. Analyze sustainability issues and/or practices in viticulture using a systems-based approach

Audience: Undergraduate

**PLANTSCI 234 – HERBACEOUS ORNAMENTAL PLANT IDENTIFICATION, CULTURE, AND USE**

4 credits.

Field identification, landscape characteristics, uses, environmental requirements, and adaptability of herbaceous ornamental plants. Topics include annual flowers, herbaceous perennials and ornamental grasses, groundcovers, bulbs and containerized outdoor tropical plants.

**Requisites:** Sophomore standing and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BOTANY 100)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use basic taxonomic tools needed for plant identification, including classification, vegetative and reproductive morphology, and nomenclature of cultivated plants

Audience: Undergraduate

2. Recognize many herbaceous plants, both native and exotic, by family, species (genus and specific epithet), variety, cultivar, and sometimes trademark

Audience: Undergraduate

3. Discuss herbaceous plant identification, distribution, ornamental characteristics as well as undesirable features, culture, adaptability, and uses

Audience: Undergraduate

4. Select herbaceous plants for specific purposes and site conditions

Audience: Undergraduate

5. Identify appropriate reference material and guides for identifying herbaceous plants

Audience: Undergraduate

**PLANTSCI 240 – THE SCIENCE OF CANNABIS**

1 credit.

An overview of the history, legality, regulation, anatomy and botany, agronomic and horticultural practices, and end-use potential of industrial hemp. Focus on sustainable agricultural production and processing of industrial hemp for food, fiber, and cannabinoids. Gain real world insight into this rapidly expanding area. Hands-on experience growing, propagating and pollinating hemp.

**Requisites:** None**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Define the past and present status of legality of hemp in Wisconsin, the United States, and in the world.

Audience: Undergraduate

2. Acquire a basic comprehension of hemp anatomy, physiology and genetics.

Audience: Undergraduate

3. Describe best practices for growing, harvesting, and processing industrial hemp for grain, fiber, and cannabinoid production.

Audience: Undergraduate

4. Discuss the pros, cons, and viability of at least 10 hemp-derived products in the U.S.

Audience: Undergraduate

5. Explain the social, economic, and environmental dimensions of the sustainability challenges of cannabis production

Audience: Undergraduate

6. Apply sustainability principles and frameworks to addressing the challenge of producing cannabis derived products

Audience: Undergraduate

**PLANTSCI/PL PATH 261 – SUSTAINABLE TURFGRASS USE AND MANAGEMENT**

2 credits.

Sustainable use and management of turfgrass landscapes in urban and suburban environments, including home lawns, golf courses, and sports fields. Focus is on creating sustainable and attractive turfgrass landscapes through proper species selection, use of slow-release or organic fertilizer practices, and minimizing the use of pesticides and supplemental irrigation.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe how turf is used in urban and suburban communities

Audience: Undergraduate

2. Identify the positive environmental impacts of using turfgrass

Audience: Undergraduate

3. Identify the negative environmental impacts of turfgrass management

Audience: Undergraduate

4. Identify the 3 major pest groups in turfgrass and describe sustainable management strategies for each

Audience: Undergraduate

**PLANTSCI/PL PATH 262 – TURFGRASS MANAGEMENT LABORATORY**

1 credit.

Hands-on turf establishment, cool- and warm-season grass, seed and weed identification, chemical application, and turf cultivation techniques and equipment use, plus field trips to major league sport facilities and golf courses.

**Requisites:** PL PATH/PLANTSCI 261 or concurrent enrollment**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify the species of turfgrass commonly used in Wisconsin and the conditions they are most suited to.

Audience: Undergraduate

2. Describe management strategies that can be implemented to increase the sustainability of turfgrass management.

Audience: Undergraduate

3. List the most common pests observed on Wisconsin turfgrass and describe strategies for their sustainable management.

Audience: Undergraduate

4. Calculate the amount of seed needed to properly establish a turfgrass site, the amount of fertilizer needed to adequately fertilize turfgrass, and the concentration of pesticides needed to suppress common turfgrass pests.

Audience: Undergraduate

### PLANTSCI/LAND ARC 263 – WOODY LANDSCAPE PLANT IDENTIFICATION, CULTURE, AND USE

4 credits.

Field identification, landscape characteristics, uses, environmental requirements, and adaptability of woody ornamental plants; their autumn and winter characteristics. Topics include trees, shrubs, evergreens, vines and woody groundcovers.

**Requisites:** Sophomore standing and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BOTANY 100)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Use basic taxonomic tools needed for plant identification, including classification, vegetative and reproductive morphology, and nomenclature of cultivated plants

Audience: Undergraduate

2. Recognize many woody ornamental trees, shrubs, groundcovers, and vines, both native and exotic, by family, species (genus and specific epithet), variety, cultivar, and sometimes trademark

Audience: Undergraduate

3. Discuss woody landscape plant identification, distribution, ornamental characteristics as well as undesirable features, culture, adaptability, and uses

Audience: Undergraduate

4. Select woody landscape plants for specific purposes and site conditions

Audience: Undergraduate

5. Identify appropriate reference material and guides for identifying woody landscape plants

Audience: Undergraduate

### PLANTSCI 289 – HONORS INDEPENDENT STUDY

1-2 credits.

Research work under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Develop critical, analytical and independent thinking skills through a scientific research project.

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving in a scientific research project.

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies through a research project.

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.

Audience: Undergraduate

### PLANTSCI 299 – INDEPENDENT STUDY

1-3 credits.

Research work under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical and independent thinking skills through a scientific research project.

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving in a scientific research project.

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies through a research project.

Audience: Undergraduate

4. Effectively communicate scientific findings in an oral and/or written format.

Audience: Undergraduate

**PLANTSCI 300 – CROPPING SYSTEMS**

3 credits.

Agronomic cropping systems of the Midwest: environmental impacts, productivity, and profitability. Cropping system diversification and sustainable agriculture. An agroecological approach, the application of ecological concepts and principles for the improvement of cropping systems is emphasized. Specific topics include agricultural intensification, agroecosystem structure and function, aspects of technology adoption, soil erosion and conservation, tillage systems, weed ecology and management, nutrient dynamics and management, water quality, crop rotation, and cropping system diversification.

**Requisites:** AGRONOMY 100, HORT 120, PLANTSCI 110, ENVIR ST/ AGROECOL/C&E SOC/ENTOM 103, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the dynamic history and unique characteristics of agriculture

Audience: Both Grad & Undergrad

2. Identify factors that drive change and those that constrain change in cropping systems

Audience: Both Grad & Undergrad

3. Use an agroecological approach to better understand and improve cropping systems

Audience: Both Grad & Undergrad

4. Explain key components of cropping systems and their impact on agroecosystem services and sustainability

Audience: Both Grad & Undergrad

5. Evaluate new and emerging approaches to crop management in the context of sustainability and potential tradeoffs

Audience: Both Grad & Undergrad

6. Develop a comprehensive grant research proposal that effectively addresses a topic pertinent to sustainability of cropping systems

Audience: Graduate

**PLANTSCI 302 – FORAGE MANAGEMENT AND UTILIZATION**

3 credits.

Establishment, management, harvesting and utilization of forage crops for use as hay, pasture and silage. Emphasis on cool season perennial grasses and legumes.

**Requisites:** Junior standing and (DY SCI/AN SCI 101, ZOOLOGY/ BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, AGRONOMY 100, PLANTSCI 110, or BIOCORE 381) or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Explain the importance of forages in Wisconsin, USA, and the world

Audience: Both Grad & Undergrad

2. Identify forage species commonly grown and know the environmental conditions to which each is best adapted

Audience: Both Grad & Undergrad

3. Identify an alfalfa variety or corn silage hybrid best suited for a specific environment

Audience: Both Grad & Undergrad

4. Describe how legumes and grasses grow, and regrow, after harvest or grazing

Audience: Both Grad & Undergrad

5. Recommend practices to optimize establishment, growth, persistence, and nutritive value of forages

Audience: Both Grad & Undergrad

6. Evaluate how the environment impacts forage persistence, production, and quality

Audience: Both Grad & Undergrad

7. Develop optimal harvest strategies based on farming operation goals

Audience: Both Grad & Undergrad

8. Explain the principles of preserving forage crops (hay or silage) and direct grazing

Audience: Both Grad & Undergrad

9. Recognize major pests (diseases, insects, and weeds) that affect alfalfa production and best management practices for control

Audience: Both Grad & Undergrad

10. Communicate effectively ideas in written reports and oral presentations

Audience: Both Grad & Undergrad

11. Understand and summarize current topics in forages research

Audience: Graduate

**PLANTSCI 310 – PLANT SCIENCE AND TECHNOLOGY IN CROPPING SYSTEMS**

4 credits.

Explores the application of plant science and current technologies in both field and controlled environments to enhance crop production. Analyzes the impacts of these technologies on agroecosystem structure and function, examining the trade-offs that affect productivity, profitability, environmental sustainability, and social outcomes.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, PLANTSCI 110, HORT 120, AGRONOMY 100, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Critically assess state-of-the-art technologies in plant science, productivity, and utilization

Audience: Undergraduate

2. Evaluate technology impacts on agroecosystem structure and function specifically productivity, profitability, environmental, and social outcomes

Audience: Undergraduate

3. Articulate trade-offs associated with technology adoption, technology avoidance, and system choices

Audience: Undergraduate

4. Effectively apply and communicate knowledge about plant science and use of technologies in crop production

Audience: Undergraduate

5. Evaluate the potential applications of state-of-the-art plant science technologies in their current or proposed research, considering the practical implications, benefits, and challenges of integrating these technologies into their work

Audience: Graduate

**PLANTSCI 320 – ENVIRONMENT OF CULTIVATED PLANTS**

3 credits.

An exploration of major environmental factors that regulate plant growth and development – temperature, water availability, light, and carbon dioxide. Patterns are studied temporally at the daily, seasonal (yearly), and long-term (climate) time scales, geographically at the local and global scales, and contextually in natural, agricultural, and controlled environment conditions. Includes effects of environmental conditions on plant growth and development, including adaptive mechanisms to stress conditions at the physiological level.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, AGRONOMY 100, HORT 120, PLANTSCI 110, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain effects of major environmental factors on plant growth and development

Audience: Both Grad & Undergrad

2. Examine plant responses to identify effects of different weather or climate components

Audience: Both Grad & Undergrad

3. Reflect on how changes in climate will affect plants at their current distribution

Audience: Both Grad & Undergrad

4. Explain how development stages in plants are effective integrators of climate data

Audience: Both Grad & Undergrad

5. Evaluate the role of environmental variables in plant growth and development in general and specific primary literature

Audience: Graduate

### **PLANTSCI 333 – SURVEY OF CONTROLLED ENVIRONMENT FOOD PRODUCTION**

2 credits.

Survey of the basic principles and concepts of the biology of plants and their application to cultivation of food crops in controlled environments. Integrates topics including: organic systems, sustainability, urban agriculture, and socioecological factors.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and apply concepts from biological and physical sciences to growing plants in controlled environments with an emphasis on application in organic systems.

Audience: Undergraduate

2. Investigate the effects of controlled environments on plant growth and evaluate the results.

Audience: Undergraduate

3. Select crops and cultivars appropriate for growing in controlled environments, indoors and outdoors.

Audience: Undergraduate

4. Discuss the scientific principles behind food safety, sanitation, organic practices, and good agricultural practices in controlled environments.

Audience: Undergraduate

5. Apply sustainability principles and/or frameworks to addressing the challenge of food production in controlled environments, specifically their application in urban food systems.

Audience: Undergraduate

6. Describe the social, economic, and environmental dimensions of controlled environment agriculture and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

### **PLANTSCI 334 – GREENHOUSE CULTIVATION**

2 credits.

Principles of selection, production, handling, use of fruits, vegetables, flowers, and foliage plants grown indoors.

**Requisites:** BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, AGRONOMY 100, PLANTSCI 110, or HORT 120

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key aspects of the greenhouse industry and the methods and principals of growth in controlled environments

Audience: Undergraduate

2. Develop critical thinking skills and apply scientific concepts related to growing plants in controlled environments

Audience: Undergraduate

### **PLANTSCI 335 – GREENHOUSE CULTIVATION LAB**

1 credit.

Provides a hands-on experience in and understanding of greenhouse cultivation.

**Requisites:** PLANTSCI 334 or concurrent registration

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the skills, techniques, and practices used in greenhouse cultivation.

Audience: Undergraduate

**PLANTSCI 338 – PLANT BREEDING AND BIOTECHNOLOGY**

3 credits.

Principles of crop plant improvement are discussed in the context of genetics, plant biology, plant breeding, plant biotechnology, and world food, feed, and raw material needs.

**Requisites:** BIOLOGY/BOTANY 130, GENETICS 466, 467, BIOCORE 381, or (ZOOLOGY/BIOLOGY/BOTANY 151 and 152 or concurrent enrollment in ZOOLOGY/BIOLOGY/BOTANY 152)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the basic principles of plant breeding

Audience: Both Grad & Undergrad

2. Describe and analyze different plant breeding systems and methods

Audience: Both Grad & Undergrad

3. Identify, formulate, and solve breeding problems using appropriate information and approaches

Audience: Both Grad & Undergrad

4. Discuss the professional and ethical responsibility of plant breeding activities

Audience: Both Grad & Undergrad

5. Synthesize knowledge to propose improvements to breeding systems and write clear and concise technical reports and research articles

Audience: Both Grad & Undergrad

6. Discuss the significance of current research in the field of plant breeding

Audience: Both Grad & Undergrad

7. Critically assess and compare various breeding strategies

Audience: Both Grad & Undergrad

8. Evaluate advanced breeding strategies and technologies as presented in scientific literature (e.g. use of genomic tools in breeding, CRISPR, speed breeding strategies, and use of AI in breeding among others)

Audience: Graduate

**PLANTSCI 340 – PLANT GENOME ENGINEERING AND EDITING**

3 credits.

Presents an overview of the techniques, biology and underlying theory of plant tissue culture, genetic engineering and genome editing. Overviews of research and commercial applications, and issues/challenges in the area of plant biotechnology are also covered.

**Requisites:** (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 152, ZOOLOGY/BIOLOGY 102, or BIOCORE 381) and (CHEM 104, 109, or 116), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recall and summarize the general principles, practices and application of plant cell and tissue culture, and genetic engineering and gene editing in science, agriculture and industry.

Audience: Both Grad & Undergrad

2. Apply experimental design and analysis of plant biotechnology experiments.

Audience: Both Grad & Undergrad

3. Illustrate representative plant cell culture and bioengineering techniques.

Audience: Both Grad & Undergrad

4. Recall biosafety and regulatory requirements for conducting research involving cell culture, microbes and recombinant DNA.

Audience: Both Grad & Undergrad

5. Understand issues and challenges encountered in the areas of in vitro culture and plant biotechnology

Audience: Both Grad & Undergrad

6. Demonstrate understanding, application and synthesis of concepts learned in the course through completion of a review paper on approved topics relating to plant biotechnology

Audience: Graduate

**PLANTSCI 350 – PLANTS AND HUMAN WELLBEING**

2 credits.

Plants provide not only the foundation of food, clothing, and shelter essential for human existence, but also some of the key raw materials for transcendence and abstraction through music, art, and spirituality. Since antiquity, we have co-evolved with plants and their derivative products, with each exerting a domesticating force on the other. It is, for example, impossible to think of our modern life without its plant-based accompaniments in the form of cotton, sugar, bread, coffee, and wood. Yet they are so ubiquitous we may forget they all derive from plants discovered, domesticated, bred, and farmed for millennia in a never-ending pursuit to improve our wellbeing. Major points of intersection between plants and human wellbeing will be explored from a horticultural point of view by highlighting a plant or group of plants that represent a primary commodity or resource through which humans have pursued their own aims and explore effects and impacts on human society.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Acquire, integrate and apply knowledge of how plants and plant materials impact human wellbeing through readings, discussions, lectures, and examination of plant materials and their products

Audience: Undergraduate

2. Develop the ability to discuss scientific topics in small groups and answer questions about how these topics intersect with human wellbeing and public policy.

Audience: Undergraduate

3. Explain the social, economic, and environmental dimensions of the sustainability challenge associated with the production of plant-based materials for needs and wants associated with human wellbeing.

Audience: Undergraduate

4. Understand how the biological aspects of plants and plant materials dictate how these crops will be used by different cultures for specific aspects of wellbeing

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of production of plant materials for the needs and wants of human wellbeing

Audience: Undergraduate

6. Understand how plants and plant materials are intertwined with both wellbeing and un-wellbeing in modern human societies, and explore this interaction through discussions, reflections, and lecture material.

Audience: Undergraduate

**PLANTSCI 351 – A DEEPER LOOK AT PLANTS AND HUMAN WELLBEING**

1 credit.

Plants are essential for human wellbeing, yet they are often manipulated in ways that contribute significantly to human and environmental detriment. Provides an opportunity to consider the scientific, social, economic, and public policy implications of plants or groups of plants and dive deeply into those subjects for a variety of crops that are essential for human societies.

**Requisites:** Concurrent enrollment in PLANTSCI 350**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Acquire, integrate and apply knowledge of how plants and plant materials impact human wellbeing through readings, discussions, lectures, and examination of plant materials and their products.

Audience: Undergraduate

2. Develop the ability to discuss scientific topics in small groups and answer questions about how these topics intersect with human wellbeing and public policy.

Audience: Undergraduate

3. Explain the social, economic, and environmental dimensions of the sustainability challenge associated with the production of plant-based materials for needs and wants associated with human wellbeing.

Audience: Undergraduate

4. Understand how the biological aspects of plants and plant materials dictate how these crops will be used by different cultures for specific aspects of wellbeing

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of production of plant materials for the needs and wants of human wellbeing

Audience: Undergraduate

6. Understand how plants and plant materials are intertwined with both wellbeing and un-wellbeing in modern human societies, and explore this interaction through discussions, reflections, and lecture material.

Audience: Undergraduate

**PLANTSCI 360 – GENETICALLY MODIFIED CROPS: SCIENCE, REGULATION & CONTROVERSY**

2 credits.

Explores how and why genetically modified (GM) crops are created and their regulation at the federal and state level. Learn about the impacts of GM crops and critically evaluate arguments both for and against their use. Introduction to the complex economic, cultural, and political issues surrounding GM crops.

**Requisites:** ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, GENETICS 466, or GENETICS 467

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain how genetically modified crops are made and compare genetic engineering with other plant breeding methods.

Audience: Undergraduate

2. Describe the US coordinated framework for the regulation of biotechnology and labeling laws.

Audience: Undergraduate

3. Discuss the potential risks and benefits of genetically modified crops for agriculture, the environment, and human health.

Audience: Undergraduate

4. Analyze different perspectives on controversial topics related to genetically modified organisms.

Audience: Undergraduate

**PLANTSCI/A A E/PL PATH 367 – INTRODUCTION TO ORGANIC AGRICULTURE: PRODUCTION, MARKETS, AND POLICY**

3 credits.

Provides an in-depth understanding of the history of organic agriculture, its production, processing, marketing, and social dimensions, and its impact on environmental, community, and human health.

**Requisites:** ENVIR ST/AGROECOL/C&E SOC/ENTOM 103, AGRONOMY 100, HORT 120, PLANTSCI 110, BOTANY/PL PATH 123, SOC/C&E SOC 222, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history of current organic systems and how it influences the way that organic farms and industries work.

Audience: Both Grad & Undergrad

2. Explore the biological, ecological, and agricultural underpinnings of organic production systems.

Audience: Both Grad & Undergrad

3. Examine how organic systems, social initiatives, and regulations are developed and how they shape business activities, community development efforts, and human and environmental health outcomes.

Audience: Both Grad & Undergrad

4. Evaluate the benefits and limitations of organic systems, social initiatives, and regulations from environmental, social, economic, and racial justice perspectives.

Audience: Both Grad & Undergrad

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Both Grad & Undergrad

6. Describe the social, economic, and environmental dimensions of organic farming and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Both Grad & Undergrad

7. Develop the capacity to evaluate sustainability and resilience outcomes of organic and other agricultural production and processing systems using interdisciplinary methods.

Audience: Graduate

**PLANTSCI 370 – WORLD VEGETABLE CROPS**

3 credits.

An overview of the importance of fresh and processed vegetables worldwide. Vegetable origin, history, classification, culture, marketing, physiology, genetics, handling, quality, significance in world cultures and diets.

**Requisites:** HORT 120, AGRONOMY 100, PLANTSCI 110, BOTANY/ BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Integrate and apply knowledge of vegetable plants to worldwide consumption and production of vegetable crops  
Audience: Undergraduate

2. Discuss the diversity of vegetable plants consumed around the world with particular attention to how vegetable plant families are used in different world regions  
Audience: Undergraduate

3. Explain how the biological aspects of vegetable plants, including their physiology and genetics, dictate how these crops will be produced in different world regions  
Audience: Undergraduate

4. Describe the nutritional profile, culinary characteristics, and important metabolites that are found in vegetable plants for defensive and attractant purposes  
Audience: Undergraduate

**PLANTSCI 372 – SEMINAR IN ORGANIC AGRICULTURE**

1 credit.

Faculty, regional professionals, local organic farmers, and students present and discuss topics relevant to history, marketing, economics, production, and social context of organic and sustainable agriculture.

**Requisites:** None

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the work activities, career attributes, challenges, and preparation for employment described by practitioners in organic agricultural systems.

Audience: Undergraduate

2. Identify personal interests and potential career paths within organic agriculture based on knowledge of the skills required and day-to-day work described by current practitioners.

Audience: Undergraduate

3. Demonstrate verbal and written workplace communication skills through resume-building, interviews, presentations, and networking.

Audience: Undergraduate

4. Describe the formal and informal professional development used by organic system practitioners.

Audience: Undergraduate

5. Design, plan, and implement an event to deepen the knowledge of a select audience around one or more areas of organic agricultural systems.

Audience: Undergraduate

**PLANTSCI 375 – SPECIAL TOPICS**

1-4 credits.

Special topics on issues relevant to plant sciences.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain concepts relating to a special topic outlined in the title

Audience: Undergraduate

**PLANTSCI 376 – TROPICAL HORTICULTURAL SYSTEMS**

2 credits.

Highlights the connections between tropical plants and society. Topics include multidisciplinary reflections on the biology of tropical plants, as well as an overview of different production systems and some of the social and environmental problems associated with the utilization of tropical plants in the context of local and global markets. Provides the opportunity to demonstrate comparative skills with respect to local and international challenges posed by the topics we address in class. Illustrates connections between horticulture and conservation, food security, nutrition, and global health.

**Requisites:** Junior standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate interdisciplinary skills, intercultural knowledge, and global competencies through the understanding of the relationships between tropical plants and different cultures.

Audience: Undergraduate

2. Recognize social, economic, and environmental issues related to sustainable food production in tropical ecosystems and find suitable methods to address them

Audience: Undergraduate

3. Discuss the unique challenges to food security and sustainability in tropical ecosystems under the pressure of climate change

Audience: Undergraduate

4. Develop a critical perspective and creative thinking regarding the production and consumption of tropical horticultural products, and how they relate to nutrition, food security, health and wellbeing, sustainable cropping practices and community development

Audience: Undergraduate

5. Recognize the importance of green spaces, conservation of biodiversity, traditional knowledge, intellectual property rights, and equitable sharing of benefits derived from the use of tropical plants

Audience: Undergraduate

6. Apply written and public speaking skills through critical explorations of tropical food systems

Audience: Undergraduate

**PLANTSCI 378 – TROPICAL HORTICULTURAL SYSTEMS  
INTERNATIONAL FIELD STUDY**

2 credits.

Visit diverse agricultural systems, such as small farms, large-scale operations, market growers, industrial export businesses, agronomic centers, botanical gardens, herbaria, germplasm banks, and nature preserves in a tropical country in Central America. Provides an opportunity to develop a holistic appreciation of horticulture by highlighting the interactions between plants and society. Reflect on the role of plants in our daily lives and the effects that our daily choices have on the environment, human health, conflicts, poverty, and development. Discuss some of the social, scientific and environmental challenges that conventional, sustainable and organic horticulture practices face in the production, marketing, and use of tropical crops. Enrollment in a UW-Madison resident study abroad program; requires completion of PLANTSCI 376.

**Requisites:** None**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify social, economic, and environmental issues related to tropical horticulture and find suitable methods to address them.

Audience: Undergraduate

2. Analyze diverse methods of tropical plant production and their correlation with nutrition, health, sustainable agricultural practices, and community development.

Audience: Undergraduate

3. Develop a critical perspective and creative thinking regarding the production and consumption of horticultural products, and how this can impact the livelihoods of small and large-scale producers and consumers in different parts of the world, particularly in tropical regions.

Audience: Undergraduate

4. Cultivate interdisciplinary skills, cultural awareness, and global competencies through the understanding of the ecological and socio-economic impacts of tropical crops in both Costa Rica and in the US.

Audience: Undergraduate

### PLANTSCI 380 – INDIGENOUS FOODWAYS: FOOD AND SEED SOVEREIGNTY

2 credits.

Indigenous foods of North America are a vital component of modern agricultural and food systems. Indigenous foods and foodways will be examined from interdisciplinary historical, legal, biological, and social perspectives. Historic indigenous foodways of the present-day upper Midwestern United States and the impact on food and seed sovereignty of settler colonialism and subsequent agricultural practices and policies will be explored. Current efforts to re-claim agricultural traditions and foodways to improve public health, economic opportunity, and food and seed sovereignty will be covered, including the right to healthy and culturally appropriate food produced through ecologically sound and sustainable methods, to define one's own food and agriculture systems, and to control the mechanisms and policies that govern food distribution. Hands-on activities are featured; previous examples include cooking with indigenous foods, ice fishing, and tapping maple trees for syrup.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate an understanding of the history, culture, and perspectives of Native American Nations in the Upper Midwest in relation to food and seed sovereignty

Audience: Both Grad & Undergrad

2. Explain the legal frameworks facing indigenous communities and how they interact with federal and state policies to influence food sovereignty  
Audience: Both Grad & Undergrad

3. Research, analyze, discuss and present on the history and use of a particular plant or animal; demonstrate knowledge of scientific concepts surrounding this plant or animal  
Audience: Both Grad & Undergrad

4. Identify and analyze approaches that might be used to improve food and seed sovereignty  
Audience: Both Grad & Undergrad

5. Describe the social, economic, and environmental dimensions of growing and producing indigenous crops and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course  
Audience: Both Grad & Undergrad

6. Analyze the causes of and solutions for the sustainability challenge of improving food sovereignty in tribal communities in the US  
Audience: Both Grad & Undergrad

7. Develop a capstone project based on course materials  
Audience: Graduate

### PLANTSCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION

1-8 credits.

Internship under guidance of a faculty or instructional academic staff member in Plant and Agroecosystem Sciences and internship site supervisor. Students are responsible for arranging the work and credits with the faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Workplace – Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to authentic professional situations

Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry  
Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations  
Audience: Undergraduate

### PLANTSCI 400 – STUDY ABROAD IN PLANT SCIENCES

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Demonstrate understanding of concepts described in course syllabus

Audience: Undergraduate

### PLANTSCI 501 – PRINCIPLES OF PLANT BREEDING

3 credits.

Principles involved in breeding and maintaining economic crops; factors affecting the choice of breeding methods; alternative approaches through hybridization and selection.

**Requisites:** (GENETICS 466, 467, PLANTSCI 338, or HORT 338 prior to Fall 2025) and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify key biological and quantitative principles behind the science of plant breeding.

Audience: Both Grad & Undergrad

2. Recognize how genetic variation is generated and how other sources of variation can affect phenotypes.

Audience: Both Grad & Undergrad

3. Describe how crops were domesticated, and how germplasm can be deployed by plant breeders to improve crops.

Audience: Both Grad & Undergrad

4. Apply scientific theories, concepts, reasoning, and quantitative and qualitative approaches to understand and solve problems in plant breeding and plant genetics.

Audience: Both Grad & Undergrad

5. Use terminology accurately and effectively in describing plant breeding phenomena and processes.

Audience: Both Grad & Undergrad

6. Evaluate and discuss relevant scientific concepts.

Audience: Both Grad & Undergrad

7. Relate scientific information found in primary scientific literature to key issues and concepts in plant breeding.

Audience: Graduate

### PLANTSCI 502 – TECHNIQUES OF PLANT BREEDING

1 credit.

Introduction to a wide array of laboratory and field techniques used in breeding and maintaining economically important crops.

**Requisites:** (GENETICS 466, 467, PLANTSCI 338, or HORT 338 prior to Fall 2025) and (BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Define different approaches, techniques, and ideas in plant breeding from a practical and theoretical point of view by interacting with plant breeders who breed a wide range of crops.

Audience: Both Grad & Undergrad

2. Identify why certain techniques are used in certain situations, and what options might exist for plant breeders to pursue particular breeding objectives.

Audience: Both Grad & Undergrad

3. Describe why a particular crop is bred in a certain way, and be able to articulate why the crop's biology or key traits are best served by these approaches.

Audience: Both Grad & Undergrad

4. Explain how improved germplasm and cultivars are developed and released by plant breeders.

Audience: Both Grad & Undergrad

5. Use terminology accurately and effectively in describing plant breeding problems and solutions.

Audience: Both Grad & Undergrad

6. Read, evaluate, and discuss scientific concepts.

Audience: Both Grad & Undergrad

7. Relate scientific information found in primary scientific literature to key issues and concepts in plant breeding.

Audience: Graduate

**PLANTSCI 510 – SENIOR CAPSTONE EXPERIENCE**

2 credits.

Apply classroom learning to problems of societal relevance. Integrate diverse bodies of knowledge to identify and evaluate contemporary issues relevant to plant scientists.

**Requisites:** PLANTSCI 110, 310, and senior standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate existing knowledge of plant science and technology with current research to evaluate key contemporary issues in the field of plant and agroecosystem sciences.

Audience: Undergraduate

2. Synthesize plant science information, predictions, insights, and hypotheses into effective forms of written and oral communication.

Audience: Undergraduate

3. Evaluate plant sciences information from a broad range of sources.

Audience: Undergraduate

4. Discuss societal, economic, ethical, scientific, and social issues relevant to plant scientists

Audience: Undergraduate

**PLANTSCI/ATM OCN 532 – ENVIRONMENTAL BIOPHYSICS**

3 credits.

Plant-environment interactions with particular reference to energy exchanges and water relations. Models are used to provide a quantitative synthesis of information from plant physiology, soil physics, and micrometeorology with some consideration of plant-pest interactions.

**Requisites:** (BIOLOGY/BOTANY 130, ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381) and (MATH 211, 217, or 221) and (PHYSICS 103, 201, 207, or 247), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply numerical models that describe radiation fluxes in natural environments and account for latitude and longitude, time of day and year, sun angle, direct and diffuse solar radiation, and radiative properties of natural surfaces

Audience: Both Grad & Undergrad

2. Apply numerical models that describe how soil and air temperatures vary across a continuum of temporal scales (from hourly to annual) and are impacted by varied physical environments

Audience: Both Grad & Undergrad

3. Calculate growing degree-days using different numerical models and demonstrate knowledge about phenological development of plants and insects

Audience: Both Grad & Undergrad

4. Apply numerical models that represent wind speed within and above vegetative canopies and account for atmospheric turbulence

Audience: Both Grad & Undergrad

5. Calculate heat and mass (water, carbon dioxide) transport between organisms, soils, plant canopies, and the atmosphere using numerical models that represent conductance, diffusion, convective transport of heat, infiltration of water and drainage in soil, evaporation, and transpiration

Audience: Both Grad & Undergrad

6. Apply numerical modeling to calculate transmission and interception of direct, diffuse, and scattered solar radiation in plant canopies

Audience: Both Grad & Undergrad

7. Demonstrate knowledge about different numerical approaches to calculate evapotranspiration and photosynthesis of plants from the leaf to canopy level

Audience: Both Grad & Undergrad

8. Demonstrate basic knowledge about environmental biophysics through application of numerical equations and/or a model to a scientific question developed in close collaboration with the course instructor

Audience: Undergraduate

9. Demonstrate advanced knowledge about environmental biophysics through the independent development of a research project that produces new information

Audience: Graduate

**PLANTSCI 550 – MOLECULAR APPROACHES FOR CROP IMPROVEMENT**

3 credits.

Survey and exploration of the molecular methods used by plant scientists to develop improved crop plants. Topics include CRISPR, T-DNA transformation, RNAi, gene editing systems, and molecular techniques for crop improvement.

**Requisites:** (BIOCHEM 501 or 507) and (GENETICS 466 or 467); or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically read scientific journal articles.

Audience: Both Grad & Undergrad

2. Evaluate and discuss scientific results as reported in journal articles.

Audience: Both Grad & Undergrad

3. Describe how discoveries in basic science lead to practical developments that drive crop improvement.

Audience: Both Grad & Undergrad

4. Describe the following molecular methods: Genome Sequencing, plant transformation, Gene Silencing, CRISPR-Cas9 genome editing, base-editors, and other genome manipulation methods based on CRISPR-Cas9.

Audience: Both Grad & Undergrad

5. Utilize the following bioinformatics tools: BLAST searching, EFP Browser, and gRNA design tools transformation, Gene Silencing, and CRISPR-based gene editing.

Audience: Both Grad & Undergrad

6. Demonstrate communication skills to multiple audiences.

Audience: Both Grad & Undergrad

7. Develop critical thinking skills to design experiments and peer review of scientific papers.

Audience: Graduate

**PLANTSCI/GENETICS 615 – GENETIC MAPPING**

3 credits.

Computing-intensive preparation for genetic mapping research, including linkage analysis and QTL mapping in designed crosses; linkage disequilibrium and association analysis (GWAS).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare the principles and applicability of linkage vs association mapping

Audience: Graduate

2. Describe how population and model parameters affect statistical power

Audience: Graduate

3. Construct genetic linkage maps and discover QTL in designed crosses

Audience: Graduate

4. Conduct genome-wide association analyses and interpret the results

Audience: Graduate

**PLANTSCI 681 – SENIOR HONORS THESIS**

2–4 credits.

Individual study and research for students completing theses under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.

Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.

Audience: Undergraduate

3. Carry out analysis of data related to the testable hypotheses.

Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.

Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.

Audience: Undergraduate

**PLANTSCI 682 – SENIOR HONORS THESIS**

2-4 credits.

Individual study and research for students completing theses under direct guidance of a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program. Continuation of PLANTSCI 681

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2009

**Learning Outcomes:** 1. Investigate a topic in conjunction with other investigators to develop a deep understanding of a research problem.  
Audience: Undergraduate

2. Identify a research problem and develop a set of testable hypotheses.  
Audience: Undergraduate

3. Carry out analysis of data related to the testable hypotheses.  
Audience: Undergraduate

4. Communicate the results of investigations via written and/or oral means to an appropriate audience.  
Audience: Undergraduate

5. Write an honors thesis that contains an abstract, background, a demonstration of research skills, analysis of the research question, and a summary of the impact of the work.  
Audience: Undergraduate

**PLANTSCI 699 – SPECIAL PROBLEMS**

1-4 credits.

Independent research guided by a Plant and Agroecosystem Sciences faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate a clear research question or problem and formulate a hypothesis.  
Audience: Undergraduate

2. Identify appropriate research methodologies and collect sound scientific data.  
Audience: Undergraduate

3. Apply critical thinking skills to interpret laboratory data and apply problem solving skills to constructively address research setbacks.  
Audience: Undergraduate

4. Practice research ethics and responsible conduct in research.  
Audience: Undergraduate

5. Communicate scientific ideas and results verbally and in written form effectively.  
Audience: Undergraduate

**PLANTSCI 720 – PHYSIOLOGY OF PLANT PRODUCTION**

3 credits.

Examines the role of physiological processes in agricultural plant production, including the effects of primary productivity, water relations, mineral nutrition, and temperature responses. Plasticity and adaptation (through breeding) to different agricultural environments are studied.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the role of plant physiology and how its adaptation and plasticity are important for plant production  
Audience: Graduate

2. Evaluate primary literature on the use of physiological concepts in issues related to agricultural production  
Audience: Graduate

3. Design experiments that test hypotheses related to the physiology of agricultural plants  
Audience: Graduate

4. Analyze the potential impacts of climatic changes on production systems based on limitations of plant physiology  
Audience: Graduate

### PLANTSCI 771 – EXPERIMENTAL DESIGN AND ANALYSIS

2 credits.

Review of methods for controlling error in research experiments; review and in-depth development of factorial treatment designs; theory, analysis, and examples of advanced experimental designs for plant and animal research.

**Requisites:** F&W ECOL/STAT 572 or concurrent enrollment or AN SCI 865 or concurrent enrollment

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the importance of experimental design in research.

Audience: Graduate

2. Plan and execute a proper basic experimental design, critically evaluate personal limitations, and actively seek assistance when necessary.

Audience: Graduate

3. Use proper experimental design and analysis tools for most agricultural situations.

Audience: Graduate

4. Explain experimental design in the context of agricultural experimentation.

Audience: Graduate

### PLANTSCI 772 – APPLICATIONS IN ANOVA AND MIXED MODELS

2 credits.

Development of models, programs, inferences, and interpretations of analysis of variance in biological research; mixed models and their development; choosing the correct inference range; variance and covariance analyses; repeated measures; dealing with missing data.

**Requisites:** (F&W ECOL/STAT 572 or concurrent enrollment or AN SCI 865 or concurrent enrollment) and (PLANTSCI 771 or concurrent enrollment)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the importance of experimental design in research.

Audience: Graduate

2. Plan and execute a proper advanced experimental design.

Audience: Graduate

3. Use proper experimental design and analysis tools for most advanced agricultural experiments.

Audience: Graduate

4. Explain the theory and concepts of mixed models as well as applications of mixed models in biological research settings.

Audience: Graduate

### PLANTSCI 799 – PRACTICUM IN PLANT SCIENCES TEACHING

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate learning goals for the practicum in cooperation with supervising instructor

Audience: Graduate

2. Prepare and/or implement lesson plans for a class period, week, or module of the class

Audience: Graduate

3. Deliver course content and/or facilitate discussion

Audience: Graduate

4. Identify pedagogical strengths and opportunities for growth based on classroom assessment and/or feedback

Audience: Graduate

### PLANTSCI 811 – BIOMETRICAL PROCEDURES IN PLANT BREEDING

3 credits.

Understanding and application of quantitative genetic theory and other molecular and analytical tools as it relates to plant breeding.

**Requisites:** Graduate/professional standing and F&W ECOL/STAT 572 or AN SCI 865

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe quantitative genetics principles, including heritability, repeatability, and resemblance between relatives, and the application of these concepts to assess genetic variation and trait inheritance in plant populations.

Audience: Graduate

2. Analyze phenotypic datasets and interpreting results, particularly in relation to variance partitioning and resource allocation in plant breeding.

Audience: Graduate

3. Identify the impact of genotype-by-environment ( $G \times E$ ) interactions and environmental stability on breeding outcomes, and the application of this knowledge to optimize breeding strategies.

Audience: Graduate

4. Analyze and interpret genotype-phenotype association tools to identify the genetic basis of traits and refine breeding approaches across plant populations.

Audience: Graduate

5. Communicate complex biometrical and genetic concepts, through effective scientific writing and presentations, clearly conveying research findings and upholding principles of scientific integrity.

Audience: Graduate

### PLANTSCI 812 – SELECTION THEORY FOR QUANTITATIVE TRAITS IN PLANTS

2 credits.

Discuss advanced topics in selection theory and the utilization of molecular markers in selection.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply the breeder's equation to design and evaluate selection schemes

Audience: Graduate

2. Explain Best Linear Unbiased Prediction (BLUP) and its application to selection

Audience: Graduate

3. Analyze multi-environment trial data to make genomic predictions

Audience: Graduate

4. Identify resource allocation tradeoffs and strategies for long-term genetic gain

Audience: Graduate

### PLANTSCI 875 – SPECIAL TOPICS

1-4 credits.

Special topics on issues relevant to plant sciences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain concepts relating to a special topic outlined in the title

Audience: Graduate

### PLANTSCI 920 – SEMINAR IN PLANT SCIENCE AND TECHNOLOGY

1 credit.

Presentations in plant science and technology to prepare for professional conferences, outreach meetings and clientele interactions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate effectively through oral presentations, discussion and writing

Audience: Graduate

2. Translate scientific information into outreach materials for agricultural stakeholder audiences

Audience: Graduate

3. Evaluate the effectiveness of oral and written scientific communication

Audience: Graduate

### PLANTSCI 957 – SEMINAR IN PLANT BREEDING AND PLANT GENETICS

1 credit.

Current research in plant breeding and plant genetics. Explore cutting-edge research methods and findings. Develop and refine scientific presentation skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present current research in plant breeding and genetics clearly and effectively, including appropriate visuals and following the structure of a scientific seminar

Audience: Graduate

2. Deliver constructive feedback on peers' research and presentations, fostering a collaborative and supportive academic environment

Audience: Graduate

3. Discuss current research in plant breeding and genetics, identifying strengths, weaknesses, and areas for further research

Audience: Graduate

### PLANTSCI 990 – RESEARCH

1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate graduate-level research skills and techniques

Audience: Graduate

2. Address research challenges using a broad range of theories, research methods, and approaches to scientific inquiry

Audience: Graduate

3. Formulate and design new approaches that extend plant science and technology research beyond its current boundaries

Audience: Graduate

## POLITICAL SCIENCE (POLI SCI)

### POLI SCI 104 – INTRODUCTION TO AMERICAN POLITICS AND GOVERNMENT

3-4 credits.

Basic institutions and processes of American government. The role of constitutional structures, parties, interest groups and elections in the system; policy formation and policy content.

**Requisites:** Not open to students who have taken POLI SCI 184 or POLI SCI 404

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Familiarize students with American political institutions.

Audience: Undergraduate

2. Prepare students to take upper-level classes in American politics.

Audience: Undergraduate

3. Get students interested in American politics.

Audience: Undergraduate

4. Analyze issues and policies in U.S. politics.

Audience: Undergraduate

**POLI SCI 120 – INTRODUCTION TO COMPARATIVE POLITICS**

4 credits.

Introduction to Comparative Politics, one of the four sub-fields in Political Science, which involves the comparative analysis of political institutions, processes, and outcomes at the national level. Examines how to usefully compare politics in a variety of countries and makes comparisons explicit and systematic in order to determine how governments work, how power is organized and contested at the national level, and how regular people can participate and pursue their interests in different political settings. Includes key concepts, theories, methods, issues, and language.

**Requisites:** Not open to students with credit for POLI SCI 182 (or POLI SCI 186 prior to Fall 2017)

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Learn about some basic theoretical and methodological problems in the study of politics (concepts, theories, issues).

Audience: Undergraduate

2. Learn about the “real” world and how to explain it.

Audience: Undergraduate

3. Identify interesting questions about politics in different countries.

Audience: Undergraduate

4. Identify differences and similarities, and what both tell us about what we are studying.

Audience: Undergraduate

5. Understand and compare different forms of democratic and non-democratic rule.

Audience: Undergraduate

6. Become familiar with the language of political science.

Audience: Undergraduate

7. Apply the concepts of political science to analyze (and evaluate) political events in a variety of settings.

Audience: Undergraduate

**POLI SCI 140 – INTRODUCTION TO INTERNATIONAL RELATIONS**

3-4 credits.

Covers the major issues in international relations since the end of World War II including: the causes of war; civil wars and ethnic conflict; economic development; international trade; exchange rates and international monetary relations; international capital flows and financial crises; foreign direct investment; globalization and the environment; the UN, the IMF, World Bank, WTO, and other international organizations; and international law and human rights. The focus is on states' relations with each other and the factors determining the nature and outcomes of these international interactions. The course seeks to develop analytical tools for thinking about important questions in world politics regardless of the countries or issues involved, to examine international affairs in a systematic way. Students who have taken POLI SCI 103 prior to Fall 2017 may not enroll in this course.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand major historical and contemporary events in world politics.

Audience: Undergraduate

2. Analyze current world events through the lens of the major theories of international relations.

Audience: Undergraduate

3. Know how different approaches to the question of economic development emphasize different policy solutions.

Audience: Undergraduate

4. Understand the analytical theories explaining the expansion of trade and globalization.

Audience: Undergraduate

5. Understand and be able to analyze the controversies surrounding the major international financial institutions, specifically the World Bank and the International Monetary Fund.

Audience: Undergraduate

6. Understand the operation of the global exchange rate system and how state choices concerning monetary policy impact international financial flows.

Audience: Undergraduate

7. Understand the ways in which globalization both empowers and limits state leaders to conduct foreign economic policy.

Audience: Undergraduate

**POLI SCI 160 – INTRODUCTION TO POLITICAL THEORY**

3–4 credits.

Exploration of core problems of political life, such as the nature and limits of obligation, the concept of justice and its political implications, and the relationship between equality and liberty, through a selection of ancient and modern sources. Not open to students with credit for POLI SCI 209 prior to fall 2017

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and explain arguments made about important political concepts by selected thinkers in the history of political thought.

Audience: Undergraduate

2. Assess political and ethical theories.

Audience: Undergraduate

3. Analyze contemporary political arguments through course concepts.

Audience: Undergraduate

4. Develop skills of critical reasoning, reading, and analysis.

Audience: Undergraduate

**POLI SCI 170 – RESEARCH METHODS IN POLITICAL SCIENCE**

3–4 credits.

Introduction to political science as a discipline that focuses on the development of research questions, research designs, and the quantitative and qualitative tools commonly used to implement research designs.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze relations among individuals, domestic society, political institutions, and states.

Audience: Undergraduate

2. Explain important concepts in research design and methodology.

Audience: Undergraduate

3. Assess political science theories.

Audience: Undergraduate

4. Understand and assess the quality of empirical work in political science research.

Audience: Undergraduate

5. Apply course concepts to analysis of contemporary political debates.

Audience: Undergraduate

**POLI SCI 182 – INTRODUCTION TO COMPARATIVE POLITICS (HONORS)**

3 credits.

Introduction to Comparative Politics, one of the four sub-fields in Political Science, which involves the comparative analysis of political institutions, processes, and outcomes at the national level. Examines how to usefully compare politics in a variety of countries and makes comparisons explicit and systematic in order to determine how governments work, how power is organized and contested at the national level, and how people can participate and pursue their interests in different political settings. Includes key concepts, theories, methods, and country case studies.

**Requisites:** Declared in an Honors program. Not open to students with credit for POLI SCI 120

**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gain knowledge about politics in different countries, including differences in democratic and non-democratic rule, differences in political institutions, economic policies, social cleavages, and salient contemporary political issues across countries.

Audience: Undergraduate

2. Learn about concepts and theories from political science used in the study of politics in different countries.

Audience: Undergraduate

3. Learn about different methodological approaches in studying politics, including how to develop a casual research question, and how comparisons of cases can be useful for testing theories.

Audience: Undergraduate

4. Develop research and writing skills by working throughout the semester on a research paper.

Audience: Undergraduate

5. Develop communication and presentation skills by engaging in class discussion and presenting research at the end of the semester.

Audience: Undergraduate

**POLI SCI 199 – DIRECTED STUDY**

2 credits.

Directed study projects for freshmen and sophomores as arranged with a faculty member; students should have completed at least one course in POLI SCI.

**Requisites:** Consent of instructor**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2020

**POLI SCI 201 – SPECIAL TOPICS IN POLITICAL SCIENCE**

3 credits.

An experimental topics course that introduces students to compelling recent events and to the current research of political scientists. This course can be repeated by students, but not with the same content.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**POLI SCI 202 – PREPARATION FOR THE WISCONSIN IN WASHINGTON PROGRAM**

1 credit.

This course will prepare students to participate in the Wisconsin in Washington Internship Semester. The course focuses on internship searches, applications, and decisions on where to work. The course also sets academic, professional and personal goals for the upcoming term in DC. Students will also identify a tentative public policy topic that they will initiate this term and research and complete during the semester in DC. The course will spend time on reviewing general and DC-specific standards of professional conduct. Successful completion of this course is required for final admission to the Wisconsin in Washington Program.

**Requisites:** None**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019**POLI SCI 205 – INTRODUCTION TO STATE GOVERNMENT**

3-4 credits.

Basic institutions and processes of state government in the United States; the role of parties, pressure groups, and elections in the system; the policy process, its outputs and outcomes; the role of states in the federal system, and the diversity of state politics and policy.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Examine the origins of federalism in the U.S. context and the relationship between the national and state governments.  
Audience: Undergraduate

2. Explore the policies and programs administered by the states, as well as the major influences on state politics  
Audience: Undergraduate

3. Understand the similarities and differences between the U.S. Constitution and the state constitutions.  
Audience: Undergraduate

**POLI SCI 206 – INTRODUCTION TO POLITICAL PSYCHOLOGY**

3-4 credits.

Examines the psychological aspects of the political behavior of individuals--whether elites, activists or members of general publics--and their consequent political behaviors in various groups and institutional contexts. Not open to students with credit for POLI SCI 267 prior to fall 2017

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Examine historical and contemporary perspectives in political psychology.

Audience: Undergraduate

2. Study the psychology of political attitudes, especially as it pertains to social groups and values.

Audience: Undergraduate

3. Examine the psychological aspects of the political behavior of individuals in group and institutional contexts.

Audience: Undergraduate

**POLI SCI/LEGAL ST 217 – LAW, POLITICS AND SOCIETY**

3-4 credits.

Introduction to the legal process. Examination of the various concepts of law, the perennial problems of the law, legal reasoning, and the nature and function of law and the courts.

**Requisites:** Freshman or sophomore standing only**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Increase knowledge about the components of the U.S. legal system.

Audience: Undergraduate

2. Understand how disputes evolve in the context of the U.S. legal system.

Audience: Undergraduate

3. Improve ability to synthesize social science readings and formulate arguments in written and oral form.

Audience: Undergraduate

4. Improve oral advocacy skills through active classroom discussion.

Audience: Undergraduate

**POLI SCI/CHICLA 231 – POLITICS IN MULTI-CULTURAL SOCIETIES**

3-4 credits.

Race, ethnicity, and religion as political factors; cultural pluralism, politics, and policy in the United States and selected other multi-cultural politics.

**Requisites:** Freshman or sophomore standing only

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate how events of the past gave rise to racial and ethnic hierarchies in the United States today and how those hierarchies manifest themselves in politics.

Audience: Undergraduate

2. Recognize and question assumptions about race and ethnicity that are embedded in discussions of U.S. politics.

Audience: Undergraduate

3. Apply concepts raised in class to life in a multi-cultural society.

Audience: Undergraduate

4. Describe the ways that racial and ethnic worldviews are shaped and how they change.

Audience: Undergraduate

**POLI SCI/ASIAN/GEOG/HISTORY/SOC 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES**

4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.

Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.

Audience: Undergraduate

**POLI SCI/GEOG/HISTORY/SLAVIC 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI/GEOG/HISTORY/SLAVIC 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**POLI SCI/ASIAN/HISTORY 255 – INTRODUCTION TO EAST ASIAN CIVILIZATIONS**

3-4 credits.

Multidisciplinary and historical perspectives on the East Asian civilizations of China, Japan, Korea, Tibet and Mongolia from prehistory to the present, including developments in philosophy, economy, governance, social structure, kinship, geography, etc.

**Requisites:** None

**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**POLI SCI/C&E SOC/HISTORY/SOC 259 – FORWARD? THE WISCONSIN IDEA, PAST AND PRESENT**

1-3 credits.

Engage in ongoing reflection and dialogue on the Wisconsin Idea and how it informs the mission of the University of Wisconsin. Consider the Wisconsin Idea as it has developed since its beginnings, with a focus on what it means today and what it can mean in the future.

**Requisites:** Junior or senior standing only

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Listen respectfully to different opinions, respond rationally rather than emotionally, make reasoned arguments.

Audience: Undergraduate

2. Respond to another point of view with research and substantive comments or questions, present and support your own position, and thus engage in a wider conversation.

Audience: Undergraduate

3. Consider a specific question ("What makes an idea a Wisconsin Idea...?") and present a reasoned argument supporting the conclusion. (1-credit students)

Audience: Undergraduate

4. Deeply analyze an argument and respond by applying it to the student's own educational strengths and weaknesses. (3-credit students)

Audience: Undergraduate

5. Use course content to explain a controversial issue and suggest a course of action to address it, stating reasons, and anticipating counterarguments. (3-credit students)

Audience: Undergraduate

**POLI SCI/AFROAMER/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/SOC/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION**

3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**POLI SCI/CHICLA/HISTORY/LACIS 268 – THE U.S. & LATIN AMERICA FROM THE COLONIAL ERA TO THE PRESENT: A CRITICAL SURVEY**

3 credits.

A critical examination of US-Latin American relations from the colonial era to the present, tracing the emergence and evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America. Primary attention will be focused on US relations with Mexico, Central America and the Caribbean, but other Latin American countries will figure prominently during certain episodes.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Critically examine US-Latin American relations from the colonial era to the present.

Audience: Undergraduate

2. Examine tracing the evolution of the United States as a hemispheric and global power and its political and economic impact on Latin America.

Audience: Undergraduate

3. Discuss US relations with Mexico, Central America and the Caribbean.

Audience: Undergraduate

### **POLI SCI 270 – UNDERSTANDING POLITICAL NUMBERS**

3-4 credits.

How numbers and statistics are used in electoral strategies, political debates and legal proceedings. Presents basic tools of analysis and how to use them. Not open to students with credit for POLI SCI 218 prior to fall 2017

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically read and interpret quantitative content of many articles in the quantitative social sciences.

Audience: Undergraduate

2. Conduct, interpret, and communicate results from analysis using statistical tests and regression.

Audience: Undergraduate

3. Explain the limitations of observational data for making causal claims, and begin to use existing strategies for attempting to make causal claims from observational data.

Audience: Undergraduate

4. Write basic clean, reusable, and reliable R code.

Audience: Undergraduate

5. Feel empowered working with data.

Audience: Undergraduate

### **POLI SCI 272 – INTRODUCTION TO PUBLIC POLICY**

3-4 credits.

Major issues of public policy in such fields as economic management, welfare, education, health, energy and the environment. How public problems develop, approaches to policy-making, why programs succeed and fail. Not open to students with credit for POLI SCI 219 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the provisions of the United States Constitution most related to the development and execution of public policy in the United States.

Audience: Undergraduate

2. Understand the difference between federalism and the allocation of authorities between state, county, and municipal governments.

Audience: Undergraduate

3. Learn to define and frame problems as an essential first step in the development of public policy.

Audience: Undergraduate

4. Learn to develop, analyze, and advocate policy alternatives.

Audience: Undergraduate

5. Learn how to write a policy memo.

Audience: Undergraduate

6. Learn about executive, administrative, legislative, judicial, and other governmental authorities and their respective roles in making public policy.

Audience: Undergraduate

7. Understand the role of politics in policy development.

Audience: Undergraduate

8. Learn various approaches to policy analysis.

Audience: Undergraduate

9. Learn about various tools and functions available to public policy-makers.

Audience: Undergraduate

**POLI SCI 274 – POLITICAL CHOICE AND STRATEGY**

3-4 credits.

An introduction to decision analysis, strategic interaction, and voting systems and their manipulation. Examines a wide range of institutions for making social choices and the opportunities for the exercise of political strategy.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore a rational-choice approach to studying politics -- also called formal political theory.

Audience: Undergraduate

2. Examine how multiple people can make a social choice.

Audience: Undergraduate

3. Examine how various voting rules and types of preferences can lead to different outcomes under certain circumstances, and the implications of that for democracy.

Audience: Undergraduate

4. Explore collective action in politics and examine how people can cooperate to achieve common goals.

Audience: Undergraduate

**POLI SCI/AFRICAN/AFROAMER/ANTHRO/GEOP/HISTORY/  
SOC 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**POLI SCI/AFRICAN/AFROAMER/HISTORY 297 – AFRICAN AND  
AFRICAN-AMERICAN LINKAGES: AN INTRODUCTION**

4 credits.

Analysis of retention of African elements in African-American oral, written, and material culture. Social, cultural, and political issues regarding race, self-definition, and self-determination in both Africa and North America will be examined.

**Requisites:** None

**Course Designation:** Ethnic St – Counts toward Ethnic Studies  
requirement

Breadth – Either Humanities or Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**Learning Outcomes:** 1. Analyze the retention of African elements in African-American oral, written, and material culture.

Audience: Undergraduate

2. Explore social, cultural, and political issues regarding race in both Africa and North America.

Audience: Undergraduate

3. Examine self-determination in both Africa and North America.

Audience: Undergraduate

### **POLI SCI/CHICLA 302 – MEXICAN-AMERICAN POLITICS**

3-4 credits.

This class examines the major problems and issues in Mexican-American politics since World War II. An emphasis will be placed on the ways in which race, class and culture have structured politics for the Mexican origin people. Not open to students with credit for POLI SCI 464 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an analytical framework for understanding the political dynamics of multi-cultural societies.

Audience: Undergraduate

2. Understand how the dynamics of race, class, and ethnicity shape Mexican American politics and Latino politics.

Audience: Undergraduate

3. Examine the historical conflict between Mexican and Anglo Americans.

Audience: Undergraduate

4. Understand the politics of cultural pluralism in the United States.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 304 – THE POLITICAL ECONOMY OF RACE IN THE UNITED STATES**

3-4 credits.

Race in relation to American economic development. Problems of racial minorities in the American political and economic system. Not open to students with credit for POLI SCI 462 prior to fall 2017

**Requisites:** POLI SCI 104, POLI SCI 184, LEGAL ST/POLI SCI 217, CHICLA 201, or AFROAMER 151

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **POLI SCI 305 – ELECTIONS AND VOTING BEHAVIOR**

3-4 credits.

Psychological and social components of voting behavior, current electoral trends, role of voters in the governing process. Not open to students with credit for POLI SCI 467 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a theoretical and empirical understanding of how individuals make voting decisions.

Audience: Undergraduate

2. Be able to analyze factors that affect the results of particular elections.

Audience: Undergraduate

3. Interpret surveys and election data to analyze how specific variables affect voters.

Audience: Undergraduate

4. Develop a basis for evaluating the health of the U.S. electoral system.

Audience: Undergraduate

### **POLI SCI 306 – AMERICAN POLITICAL PARTIES**

3-4 credits.

Examination of the electoral, organizational, and governmental roles of political parties at the national and state levels in the U.S. Emphasis on changes in response to historical and contemporary circumstances.

**Requisites:** POLI SCI 104 or 184

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the past, present, and future of the U.S. party system

Audience: Undergraduate

2. Consider the advantages and disadvantages of various party nomination systems.

Audience: Undergraduate

3. Understand the electoral, organizational, and governmental roles of political parties at national and state levels.

Audience: Undergraduate

**POLI SCI 311 – UNITED STATES CONGRESS**

3-4 credits.

Principles, procedures and problems of the legislative process of the United States Congress. Not open to students with credit for POLI SCI 426

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth – Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand how Congress works, and how laws are really made today.

Audience: Undergraduate

2. Explain how Congress can serve as a check on presidential and judicial power.

Audience: Undergraduate

3. Analyze what motivates members of Congress.

Audience: Undergraduate

4. Explain how legislative rules affect policy outcomes.

Audience: Undergraduate

5. Explore why money matters in Congress.

Audience: Undergraduate

**POLI SCI 314 – CRIMINAL LAW AND JUSTICE**

3-4 credits.

Substantive and procedural aspects of criminal law, including the purposes of criminal justice, specific crimes, criminal responsibility and punishment, legal concepts of proof, and 4th, 5th, and 6th Amendment issues. The case approach is used. Not open to students with credit for POLI SCI 452 prior to fall 2017

**Requisites:** Sophomore standing and a course in POLI SCI or SOC

**Course Designation:** Breadth – Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Discuss the substantive and procedural aspects of criminal law.

Audience: Undergraduate

2. Explore the purposes of criminal justice.

Audience: Undergraduate

3. Examine criminal responsibility and punishment and legal concepts of proof.

Audience: Undergraduate

4. Analyze the 4th, 5th, and 6th Amendment issues.

Audience: Undergraduate

**POLI SCI 315 – LEGISLATIVE INTERNSHIP**

3 credits.

Practical experience in a legislative office. Policy research. Readings in legislative process.

**Requisites:** Consent of instructor

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Workplace – Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop an understanding of work-life at the internship and what a career in the field entails.

Audience: Undergraduate

2. Build substantive knowledge about political science by linking internship experiences to classwork and critically evaluating these relationships.

Audience: Undergraduate

3. Encourage students to think about life after college by networking with other professionals, understanding the qualifications necessary to be successful in the job market, and learning how to effectively convey skills.

Audience: Undergraduate

**POLI SCI 316 – CAREERS IN POLITICAL SCIENCE**

1 credit.

Facilitates transitions from undergraduate academic learning related to Political Science to meaningful and rewarding professional opportunities including jobs, paid internships, graduate study, and post-graduate fellowships. Building on core coursework in Political Science and related disciplines, addresses how to utilize existing academic learning and completed readings and assignments, extra-curricular activities, student research, for-pay work, internships, and interaction with alumni and other personal networks to further develop career options. Also provides practical ways to explore and pursue a wide range of career pathways related to Political Science. Develop essential professional development materials and self-promotional skills.

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore and inventory individual strengths, competencies and positive professional attributes, and practice how to articulate and promote those strengths, competencies and attributes in writing (e.g., resumes, cover letters) and verbally (e.g., elevator statements), and through professional branding through online presence (e.g., LinkedIn, Handshake, ePortfolios);  
Audience: Undergraduate

2. Utilize assigned readings, internet resources, social media, networking opportunities, and career interviews to gather specific information about career pathways, jobs and other professional opportunities related to Political Science and related career sectors including government, nonprofits, and for-profit entities;  
Audience: Undergraduate

3. Cultivate, organize and utilize professional network relationships, including among UW and Political Science alumni, that can be instrumental in promoting further academic and early career success;  
Audience: Undergraduate

4. Review and practice recommended job and related interview techniques, including behavioral-based interviewing, and become more confident in adjusting to varying interview formats and questions;  
Audience: Undergraduate

5. Review current research and job sector trends involving salary expectations and negotiations, benefits packages, and evolving in-person and remote work expectations, and apply the newest research and trends in prospective job application and interview processes;  
Audience: Undergraduate

6. Identify, analyze, reflect upon and discuss contemporary issues involving employee/ professional diversity, equity, and inclusion among differing career pathways and job sectors, and within varied workplace cultures, as additional considerations in future career decisions.  
Audience: Undergraduate

**POLI SCI 320 – GOVERNMENTS AND POLITICS OF THE MIDDLE EAST AND NORTH AFRICA**

3-4 credits.

An introduction to the most pertinent themes to the study of politics and governance in the Middle East. Main topics to be covered: political economy of the region; link between Islam, culture and democracy; the politics of authoritarianism; and political Islam.

**Requisites:** Sophomore standing, POLI SCI 104 or 140**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Develop a concrete understanding of the history and politics of the Middle East and North Africa (MENA).

Audience: Undergraduate

2. Apply comparative politics' theories and frameworks toward understanding the current events and the complexities of MENA's politics and governance structures  
Audience: Undergraduate

3. Apply critical and analytical skills to different, even contradictory, points of views and contemporary debates relating to MENA politics and ongoing conflicts.  
Audience: Undergraduate

4. Demonstrate the ability to write in several forms and present written ideas and arguments for audiences with diverse interests and backgrounds.  
Audience: Undergraduate

**POLI SCI 323 – ISLAM AND WORLD POLITICS**

3-4 credits.

Examines the multifaceted nature of political Islam in the contemporary world. Starting with the basic tenants of Islam, and key concepts and theoretical understandings of the relationships between Islam and politics, the course builds on the approaches developed in the first part of the course examining how Islam has influenced politics differently in various parts of the world including the Middle East, Southeast Asia, and South Asia. Students will familiarize themselves with theoretical debates about the roles of Islam in politics; analyze the impact of Islam on politics in the contemporary world; and gain empirical knowledge about how Islam functions differently in various countries.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**Learning Outcomes:** 1. Understand theoretical debates about the roles of Islam in politics.

Audience: Undergraduate

2. Analyze the impact of Islam on politics in the contemporary world.

Audience: Undergraduate

3. Gain empirical knowledge about how Islam functions differently in various countries.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 324 – CHINESE POLITICS**

3-4 credits.

Examine three questions about Chinese politics through a comparative perspective. First, what functions do formal institutions such as the political party, legislature, courts, and bureaucracy serve in an authoritarian regime? Second, what are the political forces that lay a good foundation for China to successfully transition from a planning economy to a robust market economy and sustain high-speed growth for more than four decades? Finally, how does the Chinese government deal with pressing social problems and threats to its authoritarian leadership in this new era?

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Develop an understanding of major political institutions and governance challenges of China today.

Audience: Both Grad &amp; Undergrad

2. Evaluate evidence for China's economic reform and develop the ability to analyze other policy changes.

Audience: Both Grad &amp; Undergrad

3. Communicate effectively through written reports and discussion.

Audience: Both Grad &amp; Undergrad

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI/INTL ST 325 – SOCIAL MOVEMENTS AND REVOLUTIONS IN LATIN AMERICA**

3-4 credits.

An introduction to the major empirical and theoretical themes in the study of social movements and politics in Latin America. While it is impossible to cover every theoretical approach or Latin American case during the semester, the course should give students the tools to begin to think critically about where and why people engage in collective action. We will develop and hone these tools through thinking about Latin American cases, paying specific attention to revolutions, social movements, and riots. The course is designed in three parts. It begins by exposing students to the dominant theoretical paradigms in the study of contentious politics as well as some prominent critiques. The course then turns to empirical themes in Latin American revolutions, challenging students to use and question the theoretical tools to which they have already been exposed. The final part of the course looks to social movements in Latin America. Cases will focus on challenges to dictatorships, identity-based movements, and resistance to globalization.

**Requisites:** Sophomore standing and (POLI SCI 120, 140 or INTL ST 101) or (POLI SCI 103 or 106 taken prior to Fall 2017)**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

### **POLI SCI 328 – POLITICS OF EAST AND SOUTHEAST ASIA**

3-4 credits.

Asia is a vibrant region politically and economically, and is very important to the United States for international security and economic stability. Given its importance, this course provides broad and essential knowledge about Asian nations with a particular focus on China, South Korea, North Korea, Indonesia, Thailand, and the Philippines. Country studies are intended to introduce major issues in comparative politics such as democratization, elections, economic development, security, religion and politics. This course will enable students to (1) gain an empirical and analytical understanding of the political dynamics of the region; (2) think comparatively within the regime and across the developing world more generally; and (3) address and debate theoretical questions in political science through Asian politics materials.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Gain an empirical knowledge about the political dynamics of the region.

Audience: Undergraduate

2. Analyze comparatively within the region and across the developing world more generally.

Audience: Undergraduate

3. Address and debate theoretical questions in political science through Asian politics materials.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 329 – AFRICAN POLITICS**

3-4 credits.

Process of rapid political change in contemporary Africa with special emphasis on the emergence of new states. Not open to students with credit for POLI SCI 660 prior to fall 2017

**Requisites:** Sophomore standing and POLI SCI 120, 182, or SOC/AFRICAN/AFROAMER/ANTHRO/GEOG/HISTORY/POLI SCI 277 (or POLI SCI 106 or 186 taken prior to Fall 2017)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Examine the complex social, economic and political issues and problems confronting contemporary Africa.

Audience: Undergraduate

2. Critically examine previously held beliefs about the way Africa works and become critical consumers of news coverage of Africa.

Audience: Undergraduate

3. Explain the process of rapid political change in contemporary Africa and the emergence of new states.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 330 – POLITICAL ECONOMY OF DEVELOPMENT**

3-4 credits.

An introduction to the political economy of development. Why are some countries more economically developed than others? To help answer this question, examine leading theories of economic development. In light of these theories, then examine the development experiences of three major regions of the world. Consider a series of issues about development, including the effect of ethnic diversity, corruption, natural resources, and women's empowerment on economic development. Conclude with an examination of the effects of international interactions—via trade, foreign aid, migration, and war—on economic development.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2024**Learning Outcomes:** 1. Address the question of why some countries are rich and others poor.

Audience: Undergraduate

2. Examine leading theories of economic development.

Audience: Undergraduate

3. Discuss the development experiences of three of the world's major regions.

Audience: Undergraduate

4. Consider selected issues—including ethnic diversity, corruption, natural resources, and women's empowerment—in economic development.

Audience: Undergraduate

5. Understand the effects of interactions between nations—via trade, foreign aid, migration and war—on economic development.

Audience: Undergraduate

**POLI SCI 332 – GERMAN POLITICS**

3-4 credits.

A broad overview of politics in Germany, Europe's politically and economically most powerful country. Several broad themes are covered: political institutions, electoral system and elections, parties and party system, interest representation, political participation, political economy, the legacies of Germany's past, social policy, European and foreign policy, and current and future challenges. Learn to relate the German experience to broader issues, problems, and concepts used in the comparative study of domestic politics.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Analyze politics in Germany, Europe's politically and economically most powerful country.

Audience: Undergraduate

2. Examine German political institutions and the electoral system.

Audience: Undergraduate

3. Relate the German experience to broader issues, problems, and concepts used in the comparative study of domestic politics.

Audience: Undergraduate

**POLI SCI 334 – RUSSIAN POLITICS**

3-4 credits.

Theory and practice of Russian States, emphasis on politics, economic and institutional developments since 1991. Not open to students with credit for POLI SCI 633 prior to fall 2017

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Increase knowledge of the trajectory of political life in Russia from 1917 through the present.

Audience: Undergraduate

2. Learn the theoretical and institutional underpinnings of democracy, markets and the rule of law, and how to structure an argument as to the presence or absence of these institutions.

Audience: Undergraduate

3. Improve oral advocacy skills through classroom discussion.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 335 – SOCIAL IDENTITIES**

3 credits.

An introduction to theories and empirical work on social identities, focusing in particular on definitions and measurement. It has three main goals: First, examine various definitions of social identities and different types of identities (ethnicity, race, nationality, gender, class, and religion). Second, look at techniques and strategies that have been developed to measure identities (content and discourse analysis, surveys, interviews and ethnography, censuses). Third, examine empirical works on identities from a variety of geographical areas and methodological perspectives.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Demonstrate their understanding of major theories of social identity, types of social identities, and ways of measuring social identities.

Audience: Undergraduate

2. Utilize the techniques of content analysis, interviews, and surveys to measure social identities.

Audience: Undergraduate

3. Apply knowledge of social identities to a research question, including outlining a research plan and conducting original data collection.

Audience: Undergraduate

4. Evaluate evidence to answer their research question, and contextualize results with respect to existing published work.

Audience: Undergraduate

5. Write up a research paper and communicate the results in an oral presentation with slides.

Audience: Undergraduate

**POLI SCI 336 – DEMOCRACY (AND ITS UNCERTAIN FUTURE)**

4 credits.

Democracy has come under stress, both at home and across the world. The global decline of democracy has accelerated over the past decade, and levels of democracy enjoyed by the average global citizen today are down to levels last found around 1990. The promise of democracy's inevitable ascent and dominance after the end of the Cold War has proven shortlived. Examines the state and future of a political system we tend to take for granted but should not. Starts with a brief overview of the evolution of the concept of democracy over time. Examines the relationship between democracy and economic development, culture, identity, and religion. Considers and compares core democratic institutions. Investigates current challenges to democracy and democratization and offers an overview of the state of democracy across different world regions.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Learn about leading definitions, classifications, and measurements of democracy

Audience: Undergraduate

2. Understand the determinants of democracy

Audience: Undergraduate

3. Examine democratic political systems and institutions, how they function, and how they relate to each other

Audience: Undergraduate

4. Become familiar with rising threats to democracy and the prospect of autocratization

Audience: Undergraduate

5. Compare different democratic systems systematically

Audience: Undergraduate

6. Understand and choose proper evidence/sources to support an argument

Audience: Undergraduate

### **POLI SCI 338 – THE CIVIL-MILITARY PARADOX IN U.S. POLITICS AND SOCIETY**

3 credits.

Protecting a democratic nation from foreign threats often requires that nation to create a powerful military. Yet the creation of a powerful military may undermine the democracy that it is designed to protect. How do, and how should, democracies manage the paradoxical relationship between civilian authority and military institutions. Explores civilian and military perspectives in U.S. civil-military relations; address issues such as the use of military advice by civilian leaders, military challenges to civil authority, and tensions generated by shared responsibility for national security between the executive, legislative, and judicial branches. Studies how civil-military relations impact wider American society by examining the garrison state hypothesis; debates centered upon the draft versus an all-volunteer force; issues of equity and inclusion; and current concerns regarding a civil-military "gap."

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a critical understanding of the Civil Military Paradox and the complex web of relationships that link the American public, civil authority, and the U.S. armed forces. Articulate an appreciation for why the paradox and civil-military relationships are important.

Audience: Both Grad & Undergrad

2. Demonstrate how civil-military relations (CMR) impact our personal, professional, and civic lives.

Audience: Both Grad & Undergrad

3. Comprehend and apply the vocabulary and theoretical concepts that inform our understanding of civil-military relations.

Audience: Both Grad & Undergrad

4. Explain how big ideas, historical experiences, and wider trends shape civil-military relations in the United States. These considerations include: (a.)the U.S. Constitution(b.)national culture (core assumptions, values, and beliefs)(c.) public sentiment(d.)partisan political debates (e.)the domestic and international environments (political, security, economic, social)(f.)issues of equity/inclusion

Audience: Both Grad & Undergrad

5. Address critical issues and debates related to civil-military relations in U.S. politics and society—past, present, and future.

Audience: Both Grad & Undergrad

6. Demonstrate how to think critically and write effectively. Respond to contemporary civil-military issues by developing recommendations for action. Support these recommendations with properly interpreted evidence and sound argument.

Audience: Undergraduate

7. Produce research and analysis that deepens our understanding of the issues, theory, and/or practice of civil-military relations

Audience: Graduate

### **POLI SCI 339 – NON-DEMOCRACIES**

3 credits.

Studies the varieties and characteristics of non-democratic regimes from around the world: how they form, why they endure, and when they collapse, engaging along the way with theories of electoral behavior, political psychology, political violence, popular mobilization, and democratization.

**Requisites:** POLI SCI 120 or 182

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify key types of non-democratic regimes and their characteristics.

Audience: Undergraduate

2. Identify why these regimes resist pressures to democratize.

Audience: Undergraduate

3. Identify the key legacies of non-democratic regimes.

Audience: Undergraduate

### **POLI SCI 340 – THE EUROPEAN UNION: POLITICS AND POLITICAL ECONOMY**

3-4 credits.

Introduction to the politics, political economy, history, and theory of European integration. Topics include the workings of EU institutions and law, the effect of the EU on national politics and economies, economic politics and policy-making in the EU, the EU as an actor in the world economy.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Examine the history and theory of European integration.

Audience: Undergraduate

2. Explore the workings of EU institutions and law.

Audience: Undergraduate

3. Examine the effect of the EU on national politics and economy, economic politics and policy-making in the EU.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI/JEWISH 341 – ISRAELI POLITICS AND SOCIETY**

3-4 credits.

Examines the issues currently facing Israeli society and the ongoing debates in Israeli politics. Provides historical background and analytical understanding of contemporary Israeli politics. Attention will be paid to political history, institutions, economic development, coalition formation, ethnic politics, and religious-secular divisions as they are manifested in Israeli politics.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Learn about Israeli politics, history, and culture.

Audience: Undergraduate

2. Apply political science concepts and theories to understand Israeli politics and society.

Audience: Undergraduate

3. Understand who the main actors are in Israeli politics.

Audience: Undergraduate

4. Understand the main social and political cleavages in Israel.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 342 – STATE-BUILDING: HOW STATES ARE FORMED, FUNCTION, AND INFLUENCE SOCIETY**

3-4 credits.

Exploration of state-building: examining how states are formed, how they develop and maintain political power, and the ways in which they shape society. Draw on insights from political science, but also economics, history, and anthropology, to learn about the processes of state formation, the importance of state capacity, and the state's role in war, governance, and social justice. Topics will include the relationship between the state and issues like the environment, gender, and identity, highlighting both the challenges and opportunities states face in a rapidly changing world. Analysis of historical and contemporary examples from various political systems yields insights into the state's role as both a force for order and a driver of social change. Lectures, discussions, and case studies, will lead to a deeper understanding of the state's central role in global politics and everyday life.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and describe key theories and historical processes involved in state formation, including the roles of conflict, economy, and ideology.

Audience: Undergraduate

2. Examine how states develop and maintain capacity, manage resources, and exert authority, including the factors that contribute to strong versus weak states.

Audience: Undergraduate

3. Use comparative analysis to understand differences in state-building processes across historical and cultural contexts, developing a critical perspective on the state's evolving role globally.

Audience: Undergraduate

**POLI SCI 343 – THEORIES OF INTERNATIONAL SECURITY**

3-4 credits.

Role of alliances in contemporary and historical international political systems. Purpose of alliance formation; reasons for their dissolution; relationship of alliance activity with international war and with political integration. Role of alliances in future international systems. Not open to students with credit for POLI SCI 367 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to Fall 2017)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the role of alliances in contemporary and historical international political systems.

Audience: Undergraduate

2. Explain the purpose of alliance formation and reasons for their dissolution.

Audience: Undergraduate

3. Critically evaluate the role of alliances in future international systems.

Audience: Undergraduate

**POLI SCI 344 – THE RUSSIAN WAR ON UKRAINE: CAUSES AND CONSEQUENCES**

3 credits.

Examines causes and consequences of the Russian invasion and war on Ukraine. Analyzes the war using concepts in comparative politics (e.g., regime type, national identity, and domestic politics in Ukraine and Russia) and international relations (e.g., international security, institutions and norms, sanctions and trade, migration and human rights).

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and explain political science work relevant to Russia's invasion of Ukraine.

Audience: Undergraduate

2. Critically assess how prior political science work does or does not help explain outcomes related to the Russian war in Ukraine.

Audience: Undergraduate

3. Engage and participate in discussion with peers, instructors, and the public on the topic of Russia's invasion of Ukraine

Audience: Undergraduate

4. Write an original research paper that analyzes political science theory in light of empirical data on the Russian war in Ukraine, and present the findings of the paper to the class.

Audience: Undergraduate

**POLI SCI 345 – CONFLICT RESOLUTION**

3-4 credits.

Every war comes to an end, but some end sooner than others. This course analyzes why and how conflicts come to an end, discussion relevant theories of conflict and conflict resolution, and important cases. Not open to students with credit for POLI SCI 378 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**POLI SCI 346 – CHINA IN WORLD POLITICS**

3-4 credits.

Chinese foreign policy as seen from Beijing--the need for national security, the desire for revolution; and the impact of China on the rest of the world.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**POLI SCI 347 – TERRORISM**

3 credits.

Examines the causes of terrorism, goals and strategies pursued by terrorist groups, the consequences of terrorism, and counterterrorism policies adopted by governments. Not open to students with credit for POLI SCI 319 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 104, 120, 140, 182, 184, INTL ST 101 or LEGAL ST/POLI SCI 217) or (POLI SCI 103, 106, or 186 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**POLI SCI 348 – ANALYSIS OF INTERNATIONAL RELATIONS**

3-4 credits.

Focuses on how to analyze problems in international politics by the use of game theory. Examples include governments making choices about the size of their military forces, barriers to trade, or international agreements on environmental issues. Analysts study strategic interaction using both informal and mathematical methods. Provides a good introduction to the basics of game theory -- a tool useful in many different settings -- as well as an introduction to the study of world politics. From the perspective of quantitative reasoning, one of the most important set of lessons center on the logic of strategic interaction and the notion of equilibrium. Along with basic game theory students will also be introduced to the pragmatic use of mathematical tools including algebra, set theory, functions, and probability theory. Not open to students with credit for POLI SCI 376 prior to fall 2017

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to Fall 2017)

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the logic of strategic interaction.

Audience: Undergraduate

2. Master the basics of non-cooperative game theory.

Audience: Undergraduate

3. Be able to apply the logic of strategic interaction to international politics.

Audience: Undergraduate

4. Master the algebra necessary to solve games with complete and incomplete information.

Audience: Undergraduate

5. Master the algebra necessary to solve both one-time and iterated games.

Audience: Undergraduate

6. Understand the logic of signaling games.

Audience: Undergraduate

**POLI SCI 349 – GLOBAL ACCESS TO JUSTICE**

3 credits.

Lawyers are present in all countries, but their roles vary tremendously. In some countries, lawyers are greatly respected and are seen as making an important contribution by representing their clients and participating in the political process. In other countries, lawyers are viewed as less essential, perhaps even as a nuisance. Study lawyers in many different countries in an effort to explain the variation in their status and the consequent impact on citizens' access to justice.

**Requisites:** POLI SCI 120, 140, or sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and compare the role of lawyers in the U.S. and other countries.

Audience: Undergraduate

2. Contrast the role of lawyers in democratic and authoritarian political systems.

Audience: Undergraduate

3. Synthesize social science readings and formulate arguments in written and oral form.

Audience: Undergraduate

4. Improve oral advocacy skills through active classroom discussion.

Audience: Undergraduate

**POLI SCI 350 – INTERNATIONAL POLITICAL ECONOMY**

3-4 credits.

Analyzes the interaction of politics and economics in the international arena, both historically and in the contemporary era of globalization. Focuses on international trade, monetary, and financial relations in both developed and developing economies. Not open to students with credit for POLI SCI 371 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply basic knowledge of historical events in international political economy.

Audience: Undergraduate

2. Understand how international economic flows affect and constrain domestic policymakers.

Audience: Undergraduate

3. Discuss international trade, monetary, and financial relations in both developed and developing economies.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI/LEGAL ST 352 – TRANSITIONAL JUSTICE IN WORLD POLITICS**

3-4 credits.

Provides an introduction to the study of transitional justice (TJ), or how institutions – local, domestic, and international – address the legacies of human rights abuses. Explore several key questions motivating the study of transitional justice: Why do societies pursue accountability for past repression in general? How do transitioning societies go about these pursuits? What effects might TJ policies have on prospects for democracy, rule of law, and future human rights abuses? Special attention to how local and global politics interact to influence both the development and the effects of different transitional justice policies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the history and political foundations of transitional justice

Audience: Undergraduate

2. Describe and differentiate between transitional justice mechanisms at the international, domestic, and local level

Audience: Undergraduate

3. Explain the role of different international and domestic actors in designing and implementing transitional justice

Audience: Undergraduate

4. Analyze and evaluate the implications of different transitional justice mechanisms for democracy, peace, and stability

Audience: Undergraduate

**POLI SCI 354 – INTERNATIONAL INSTITUTIONS AND WORLD ORDER**

3-4 credits.

The study of international cooperation and the analysis of regional, functional, and universal regimes and institutions. Not open to students with credit for POLI SCI 337 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the existing logics, theories, concepts, and functions of international institutions.

Audience: Undergraduate

2. Analyze the political and legal dimensions of international organizations.

Audience: Undergraduate

3. Think critically and theoretically about the dynamic roles of international institutions in world politics that impose consequences on countries and citizens of the world.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI/CHICLA/HISTORY/LACIS 355 – LABOR IN THE AMERICAS: US & MEXICO IN COMPARATIVE & HISTORICAL PERSPECTIVE**

3 credits.

Provides a critical examination of the history of labor and working people in the Americas, from the colonial era to the present. It focuses on the experience of the United States and Mexico, offering a comparative perspective on their distinct but also shared (and increasingly linked) histories. The seminar proceeds chronologically, highlighting major episodes in the evolution of labor systems in the two countries, beginning with the colonial labor systems implemented by the Spanish and British empires following the European conquest of the Western Hemisphere. Among other topics, we will examine the pivotal role of slavery and other forms of forced labor, the impact of the industrial revolution, the emergence and expansion of corporate capitalism and the labor unrest it provoked in the post-civil war U.S., the role of labor in the Mexican Revolution and its aftermath, the impact of the Great Depression and labor incorporation on the post-WWII social and political order of both countries, the breakdown of that order and the move to neo-liberalism in the 1970s and 1980s, and the emergence of an increasingly integrated North American production system and its consequences for labor and working people on both sides of the US-Mexico border.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**POLI SCI 356 – PRINCIPLES OF INTERNATIONAL LAW**

3-4 credits.

A survey course that focuses on interactions among the primary entities in the international system; namely, states, inter- governmental and non-governmental organizations, and other international actors governed by international law. The study of international relations and international law is absolutely critical to understanding contemporary politics, both domestic and foreign. This course addresses both structural and substantive issues related to international law. In other words, it should provide basic tools for understanding the way in which international law works, as well as introduce substantive issues of interest to students of world politics. The course will place special emphasis on the role of international organizations in the international legal system, and special attention will be paid to the European Union as an international actor within this system of law. Not open to students with credit for POLI SCI 316 prior to fall 2017

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Explain why international law exists.

Audience: Undergraduate

2. Provide a clear explanation of the different sources of international law, the various means of resolving international legal disputes, and how US courts approach questions of international law.

Audience: Undergraduate

3. Explain why different types of international problems are best addressed by different types of legal structures, and how this accounts for variation in the shape of international law across issue areas.

Audience: Undergraduate

4. Demonstrate comfort engaging with a variety of different primary sources (e.g. judicial cases, treaties).

Audience: Undergraduate

5. Demonstrate the ability to identify the key facts in a given fact pattern, identify relevant provisions of international law, and apply these legal principles to these facts to build a legal argument.

Audience: Undergraduate

6. Make an argument about whether international law is successful at achieving its goals.

Audience: Undergraduate

7. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 358 – STATES IN THE WORLD: COMPARATIVE FOREIGN POLICY**

3-4 credits.

How do states make foreign policy decisions? What kinds of factors most influence states' international behavior on security, economic, and humanitarian questions? What explains the foreign policies of different states? Develop skills in analyzing foreign policy from a social scientific standpoint. Examine the logic of theories and evaluate the evidence for and against different explanations for how states behave internationally. Develop knowledge of specific countries and foreign policy topics.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Analyze the influence of domestic factors on the formulation and execution of foreign policy in different countries.

Audience: Undergraduate

2. Compare and contrast the foreign policies of multiple countries, identifying commonalities, differences, and trends.

Audience: Undergraduate

3. Apply key theories and concepts to analyze and predict the behavior of states in the international system.

Audience: Undergraduate

4. Conduct independent research on a specific foreign policy issue and/or country, utilizing relevant academic literature and primary sources.

Audience: Undergraduate

5. Effectively communicate insights into comparative foreign policy through written assignments, presentations, and class discussions.

Audience: Undergraduate

6. Engage in constructive debates and discussions on global affairs, drawing on the knowledge gained in the course.

Audience: Undergraduate

### **POLI SCI 359 – AMERICAN FOREIGN POLICY**

3-4 credits.

This course undertakes a historical and analytical approach to U.S. foreign policy since World War II. The course is divided into three main topics: U.S. Foreign Policy since World War II and the evolution of U.S. policy and the impetus behind important foreign policy choices; The people and institutions and processes that guide foreign policy formation and implementation; And the more salient foreign policy challenges facing the U.S. in the 21st century including how the US has responded to the attacks of September 11, 2001, the effectiveness of foreign aid policy.

**Requisites:** Sophomore standing and (POLI SCI 104, 140, 184 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Obtain a better understanding of U.S. foreign policy.

Audience: Undergraduate

2. Examine current foreign policy issues U.S. policymakers must address.

Audience: Undergraduate

3. Understand institutional arrangements complicate the policy process.

Audience: Undergraduate

4. Explore how particular issue areas challenge decision makers.

Audience: Undergraduate

5. Examine what general theoretical statements can be made about foreign policy.

Audience: Undergraduate

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 360 – HISTORY OF AMERICAN POLITICAL THOUGHT**

3-4 credits.

The intellectual origins and evolution of American political thought as seen through the lens of leading politicians, novelists and social critics from the Puritans to the Civil War; consideration of the central tensions of American political thought from a contemporary perspective. Not open to students with credit for POLI SCI 565 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Examine the intellectual origins and evolution of American political thought.

Audience: Undergraduate

2. Explore American political thought as seen through the lens of leading politicians, novelists and social critics from the Puritans to the Civil War.

Audience: Undergraduate

3. Analyze the central tensions of American political thought from a contemporary perspective.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 361 – CONTEMPORARY AMERICAN POLITICAL THOUGHT**

3-4 credits.

This course considers central themes and controversies in American political thinking during the 20th and early 21st centuries. Topics include the development of liberalism from the Progressive Era to the New Deal to the Great Society and beyond; the emergence of new strands of conservatism after World War II and the tensions between those strands; challenges by excluded and marginalized groups to the traditional social and political order; and the revival of concerns about "community" in America. As a topic of study, "American Political Thought" combines philosophy, political theory, history, and practical politics. The course covers a wide variety of texts, ranging from philosophical treatises to newspaper articles, from presidential addresses to works of social science with ultimate goal to become more knowledgeable and more critical students of the American political experience. Not open to students with credit for POLI SCI 566 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to Fall 2017)

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explore American Political Thought from the progressive era to the present day.

Audience: Undergraduate

2. Discuss the progressives; New Deal liberalism; and different strands of conservatism after World War II.

Audience: Undergraduate

3. Examine communitarianism; multiculturalism; and recent political rhetoric.

Audience: Undergraduate

4. Analyze issues of race, gender and class in the 1960s.

Audience: Undergraduate

### **POLI SCI/CLASSICS/HISTORY 362 – ATHENIAN DEMOCRACY**

3 credits.

Explores key issues in the ideology and practice of Athenian democracy. Examines democratic values, institutions, rhetoric, and sociology in order to provide the basic tools to understand democracy in its ancient context. Engages with a variety of source material (literary, archaeological, epigraphic) in order to develop multiple skills of interpretation. Some questions examined include: What are the key features of Athenian democracy, how did it change over time, and how did it differ from modern democracy? How did the Athenians justify and critique this political system? How did they reconcile citizen egalitarianism with social inequalities of wealth, gender, and status? To what extent were women, foreigners, slaves, or the poor included or excluded from politics? Was Athenian democracy a robust political system or a system in crisis?

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and use appropriately the specific terminology (names, places, concepts) related to Athenian democracy

Audience: Undergraduate

2. Discuss with appropriate methodological awareness conflicting views expressed in modern scholarship

Audience: Undergraduate

3. Analyze problems relating to the reconstruction of historical concepts in the ancient world with reference to relevant source material

Audience: Undergraduate

4. Critically read and engage with complex academic texts (both ancient sources and modern literature)

Audience: Undergraduate

5. Present knowledge, ideas, and analysis orally (in classroom discussion) and in written formats

Audience: Undergraduate

### **POLI SCI 363 – LITERATURE AND POLITICS**

3–4 credits.

Interactions between literature and politics, and the role of literature more generally in the functioning of the political systems. Not open to students with credit for POLI SCI 570 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand how literary writing affects political consciousness.

Audience: Undergraduate

2. Explore how literary works represent and negotiate political questions in writing.

Audience: Undergraduate

3. Encourage students of literature to read and think politically.

Audience: Undergraduate

### **POLI SCI 364 – CHRISTIAN POLITICAL THOUGHT**

3–4 credits.

Exploration of key themes, developments, and figures in Christian political and ethical traditions.

**Requisites:** Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to Fall 2017)

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify the major political thinkers who developed the Christian tradition.

Audience: Undergraduate

2. Identify and summarize the important philosophical concepts of Christian political thought.

Audience: Undergraduate

3. Comprehend the influence of Christianity in our political ideas and institutions.

Audience: Undergraduate

4. Evaluate how Christian ideas influence current debates on law, constitutionalism, morality, religion, political ideology, and public policy.

Audience: Undergraduate

### **POLI SCI/ILS/ITALIAN/LITTRANS 365 – MACHIAVELLI AND HIS WORLD**

3 credits.

Introduces students to the major works of Machiavelli through the close reading of his writings in cultural and historical contexts. Discussion and targeted writing assignments will aim at cultivating in students 1) a broad understanding of Machiavelli's principal intellectual attitudes, 2) a deeper understanding of his literary sensibility, and 3) the ability to articulate controversies and complexities surrounding his thought.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop a broad understanding of Machiavelli's principal intellectual attitudes.

Audience: Undergraduate

2. Cultivate a deep understanding of Machiavelli's literary sensibility.

Audience: Undergraduate

3. Articulate controversies and complexities surrounding Machiavelli's political thought.

Audience: Undergraduate

**POLI SCI 366 – CONTINENTAL POLITICAL THOUGHT**

3-4 credits.

Continental political theory is a tradition of thought usually distinguished from 'Anglo-American political theory' and originally associated with French and German writers in the 19th and early 20th century. What it means for humans to be free and what the requirements of a free society are the questions that motivate Continental political thought. Topics include: what it means for humans to live freely; the nature of reason and language; the relationship between politics, reason and culture; the political effects of language and technology; and the competing models of political freedom that result. Covers leading European political theories from the 18th through the 21st centuries and their application to contemporary questions of democratic theory.

**Requisites:** POLI SCI 160**Course Designation:** Breadth – Humanities

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate familiarity with the major European political theorists since the 18th century through written essays, quizzes and class discussion.

Audience: Undergraduate

2. Practice critical reading and writing skills through analysis of sophisticated philosophical texts in written essays.

Audience: Undergraduate

3. Identify and categorize the vocabulary and content of contemporary political theory debates through quizzes and written essays.

Audience: Undergraduate

4. Analyze and assess the theoretical roots of contemporary political conflicts in written essays.

Audience: Undergraduate

5. Assess and compare the arguments for and against different kinds of political systems in written essays and class discussions.

Audience: Undergraduate

**POLI SCI 370 – ISLAM AND POLITICS**

3-4 credits.

In the early twentieth century, a series of movements arose in the Middle East and South Asia, calling Muslims to return to Islam. Today, leaders and members of such groups –now known as Islamists –insist that one cannot live a fully Islamic life in the absence of an Islamic state. How and why did these movements come to focus on building an Islamic state? How do they pursue this goal?

**Requisites:** Sophomore standing or 3 Credits in HISTORY or POLI SCI**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify major concepts related to Islam and politics.

Audience: Undergraduate

2. Understand the historical development, major debates, and contemporary manifestations of Islam and politics.

Audience: Undergraduate

3. Become familiar with major historical and contemporary research into Islam and politics.

Audience: Undergraduate

**POLI SCI/JOURN/URB R PL 373 – INTRODUCTION TO SURVEY RESEARCH**

3-4 credits.

Theory and practice of survey research; questionnaire design, sampling, data visualization, statistical analysis.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate and construct logical arguments about political phenomena and evaluate those arguments using survey research

Audience: Undergraduate

2. Explain the theoretical components of survey research

Audience: Undergraduate

3. Interpret survey results in general with a particular focus on political polling

Audience: Undergraduate

4. Design and assess political surveys, including questionnaire design, question wording, survey mode, sample size, nonresponse, survey experiments, standard error, and margin of error

Audience: Undergraduate

5. Demonstrate statistical analysis skills in the context of political surveys including: hypothesis testing, confidence intervals, difference of means tests, data visualization and linear regression

Audience: Undergraduate

6. Recognize ethical issues in survey research

Audience: Undergraduate

7. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 377 – NUCLEAR WEAPONS AND WORLD POLITICS**

3-4 credits.

Covers the origins of nuclear weapons, the reasons states seek them, the strategies developed for their use, the consequences of their development, and efforts to control and reverse their spread.

**Requisites:** Sophomore standing and (POLI SCI 140 or INTL ST 101) or (POLI SCI 103 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand how nuclear weapons are made and what states have them.

Audience: Undergraduate

2. Examine why some states develop nuclear weapons and others do not.

Audience: Undergraduate

3. Examine whether nuclear weapons make war more or less likely between states.

Audience: Undergraduate

4. Explore what strategies states develop for the potential use of nuclear weapons and why.

Audience: Undergraduate

5. Understand the history and debates surrounding efforts to control the spread of nuclear weapons, including prominent arms control treaties.

Audience: Undergraduate

6. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 390 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: INTERNATIONAL RELATIONS**

1-4 credits.

An umbrella course for variable credit international relations courses taken on study abroad programs.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**POLI SCI 400 – TOPICS IN POLITICAL SCIENCE**

1-4 credits.

An umbrella course for variable credit topic courses, such as summer forum, intensive summer courses, half-semester courses, etc.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**POLI SCI 401 – SELECTED TOPICS IN POLITICAL SCIENCE**

3-4 credits.

A topics course for the exploration of current issues in Political Science.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 402 – WISCONSIN IN WASHINGTON INTERNSHIP COURSE**

4 credits.

This course offers the opportunity to apply many things learned in the classroom to the professional world and to apply things learned in the professional world to a student's liberal arts education. Interning will introduce students to the professional world of political organizations giving them the chance to enhance professional skills, build a network of contacts, and explore possible career choices. This class stresses active reflection, self-assessment, and the honing of critical thinking and writing. The internship course builds structure with written assignments, activities, reflections, and readings to help students to make the most of their internships. Analytical work in this course will allow students to systematically analyze the workplace in ways that help them recognize prevailing office dynamics, adapt to accepted organizational standards, and to identify opportunities to be a more effective colleague. The course will ask students to analyze their current experiences and to relate them to their past learning and future possibilities.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**POLI SCI 405 – STATE GOVERNMENT AND PUBLIC POLICY**

3-4 credits.

The structure of state government and the politics of public policy-making in the fifty states.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI 408 – THE AMERICAN PRESIDENCY**

3-4 credits.

The President as chief administrative leader, political leader, foreign policy initiator, commander-in-chief, and head of state.

**Requisites:** Sophomore standing and (POLI SCI 104 or 184)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine fundamental questions about the President's role as formal head of the executive branch of government and head of state, and as the focal point of public attention.

Audience: Undergraduate

2. Explore the sources of presidential power.

Audience: Undergraduate

3. Understand the factors that explain how presidents are elected.

Audience: Undergraduate

4. Examine how presidents govern.

Audience: Undergraduate

### **POLI SCI 411 – THE AMERICAN CONSTITUTION : POWERS AND STRUCTURES OF GOVERNMENT**

4 credits.

This course undertakes an historical examination of the development of American constitutional thinking about powers and structures of government from the founding era to the present day. Issue that are considered include separation of powers, executive war powers, the powers of Congress, judicial review and the role of courts, and federalism. The course focuses on the development of constitutional law, constitutional politics, and American political development.

**Requisites:** Sophomore standing and (POLI SCI 104 or 184)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the historical development of American constitutionalism.

Audience: Undergraduate

2. Develop a broad knowledge of the historical constitutionalism and modern and historical constitutional debates.

Audience: Undergraduate

3. Explore how legal rules define constitutional rights and liberties, and how different ways of thinking about those rules prevailed during different historical periods.

Audience: Undergraduate

4. Recognize that in different periods, different approaches of interpreting and applying the Constitution have appeared or have been dominant, and these approaches often cut across doctrinal subject areas.

Audience: Undergraduate

### **POLI SCI 412 – THE AMERICAN CONSTITUTION: RIGHTS AND CIVIL LIBERTIES**

4 credits.

This course undertakes an historical examination of the development of American constitutional thinking about individual rights and civil liberties from the founding era to the present day. Issue that are considered include freedoms guaranteed by the original Articles, the Bill of Rights, and the Civil War Amendments (XIII, XIV, and XV) as these issues appear in constitutional law, constitutional politics, and social and economic developments. The role of the federal courts, the nature and operation of principles of federalism, and the authority of Congress to protect constitutionally guaranteed rights are also major topics of consideration.

**Requisites:** Sophomore standing and (POLI SCI 104 or 184)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Examine the historical development of American constitutional thinking about individual rights and civil liberties from the founding era to the present day.

Audience: Undergraduate

2. Examine freedoms guaranteed by the original Articles, the Bill of Rights, and the Civil War Amendments (XIII, XIV, and XV) as these issues appear in constitutional law, constitutional politics, and social and economic developments.

Audience: Undergraduate

3. Understand the role of the federal courts, the nature and operation of principles of federalism, and the authority of Congress to protect constitutionally guaranteed rights.

Audience: Undergraduate

### **POLI SCI 414 – THE SUPREME COURT AS A POLITICAL INSTITUTION**

3 credits.

This course uses a social science approach to analyze theories of judicial decision making and to learn how law is made in a political context. Students will understand how the Supreme Court and justices operate in an interdependent political environment.

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze theories of judicial decision making.

Audience: Undergraduate

2. Understand how the Supreme Court and justices operate in a political environment.

Audience: Undergraduate

3. Explain how law is made in a political context.

Audience: Undergraduate

### **POLI SCI 416 – COMMUNITY POWER AND GRASS ROOTS POLITICS**

3 credits.

Introduces students involved in volunteer or community activism in the Madison area to the literature on political power and community organizing. Conduct field research and write an analysis of activities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand scholarly debates over the character and significance of political organizations and social movements.

Audience: Undergraduate

2. Analyze a local political organization or social movement.

Audience: Undergraduate

3. Examine social movement politics.

Audience: Undergraduate

### **POLI SCI 417 – THE AMERICAN JUDICIAL SYSTEM**

3-4 credits.

Structure, process, and personnel of American courts; emphasis on the governmental and political consequences of court decisions for public policy-making.

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the functioning of the American judicial system.

Audience: Undergraduate

2. Examine how courts interact with each other and with other branches of government.

Audience: Undergraduate

3. Understand the structure and function of the American court system and its historical development.

Audience: Undergraduate

4. Understand how court decision-making factors influence judicial outcomes.

Audience: Undergraduate

### **POLI SCI/PUB AFFR 419 – ADMINISTRATIVE LAW**

3-4 credits.

Delegation of powers, elements of fair administrative procedure, judicial control over administrative determination. Not open to students with credit for POLI SCI 420 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Examine the role that federal administrative agencies play in the U.S. political and legal system.

Audience: Undergraduate

2. Investigate the institutional context and ideological character of administrative law and agency practices.

Audience: Undergraduate

3. Examine classic debates over the origins of regulation.

Audience: Undergraduate

4. Understand competing legal philosophies about democratic administrative regulation.

Audience: Undergraduate

5. Examine political struggles to control the bureaucracy.

Audience: Undergraduate

6. Understand how agencies use adjudication and rulemaking to effectuate their policies.

Audience: Undergraduate

## **POLI SCI/CHICLA/HISTORY 422 – LATINO HISTORY AND POLITICS**

3 credits.

Students will examine the historical, social, political, economic, and cultural experiences and conditions of Latinos, one of the largest US racial/ethnic minority groups. Course focus is on people who trace their origins to Mexico, the Caribbean, and countries of Latin America.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2015

**Learning Outcomes:** 1. Discuss the complexity of the Latino population and divergent political agendas of various subgroups.

Audience: Undergraduate

2. Develop an understanding of the historical origins of how Latino social/political movements have emerged and changed.

Audience: Undergraduate

3. Evaluate the role of movements and activists in policy reform and social/political change.

Audience: Undergraduate

4. Examine the impact of the Latino vote on contemporary politics.

Audience: Undergraduate

5. Explore contemporary policy issues affecting the Latino population.

Audience: Undergraduate

## **POLI SCI 425 – THE POLITICAL PSYCHOLOGY OF POLARIZATION**

3 credits.

The content encourages critical thinking about societies and the larger global community through readings and assessments that explore questions about individual and community behaviors, group dynamics, and the rise of populist authoritarian appeals and policies in the United States and globally. It emphasizes the importance of understanding several psychological theoretical approaches and diverse research methods in political science. Additionally, it involves synthesizing and applying social science concepts from psychology, economics, political science, and sociology, requiring a multifaceted perspective on the issues examined.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Synthesize insights from psychological, political, and sociological perspectives to develop a nuanced understanding of polarization as a concept.

Audience: Undergraduate

2. Examine the role of individual and group identity in explaining political behavior and polarization in the US and around the world.

Audience: Undergraduate

3. Analyze the political and psychological origins and evolution of political, cultural, and economic divides in modern America, using evidence from primary and secondary sources.

Audience: Undergraduate

4. Compare and contrast the intersections of liberalism and conservatism, as well as the impact of extremism, on the American political landscape.

Audience: Undergraduate

5. Examine the shifting media environment and its role in reinforcing or mitigating partisan divides.

Audience: Undergraduate

6. Synthesize insights from psychological, political, and sociological perspectives to develop a nuanced understanding of polarization as a concept.

Audience: Undergraduate

7. Create a reflective analysis or research project that articulates a clear and evidence-based perspective on the state of polarization in the United States today.

Audience: Undergraduate

### **POLI SCI/GEN&WS 429 – GENDER AND POLITICS IN COMPARATIVE PERSPECTIVE**

3-4 credits.

Examines the gendered nature of political institutions around the world, including implications of women's exclusions from public life in a global context; the obstacles to women's greater participation; how women have gained greater voice in political leadership in some countries; and the differences women make in the political arena. Not open to students with credit for POLI SCI 643 prior to fall 2017

**Requisites:** Sophomore standing; not open to special students

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **POLI SCI/INTL ST 431 – CONTENTIOUS POLITICS**

3-4 credits.

Social movements, revolutions, and riots continually shape and re-shape the world around us. The course will evaluate and apply dominant theoretical approaches to understanding contention through careful attention to empirical cases throughout the world.

**Requisites:** Sophomore standing and POLI SCI 140 or INTL ST 101 (or POLI SCI 103 taken prior to fall 2017) or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Examine how social movements, revolutions, and riots continually shape and re-shape the world around us.

Audience: Undergraduate

2. Evaluate and apply dominant theoretical approaches to understanding contention in politics.

Audience: Undergraduate

3. Study empirical cases of contentious politics throughout the world.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI/RELIG ST 433 – RELIGION AND POLITICS**

3-4 credits.

Explores the relationships and interactions between religion and politics from a comparative perspective. Discuss the appropriate relationship between religion and state. Investigate the implications of the various ways in which the religion-state relationship have been involved in political conflict. Building on this, turn to several of the current issues in religion and politics asking: Why is religion apparently more important than ever despite an increasingly secular world? What is religious nationalism? What is fundamentalism? How can we explain the similarities and differences between religious fundamentalist movements across the globe? How should democratic states cope with the emergence of fundamentalist movements? In order to begin answering these questions, integrate the theoretical frameworks we develop with explorations of the historical and local context of relevant case-studies from around the world.

**Requisites:** Sophomore standing and (POLI SCI 140, 120, RELIG ST 101, 102, 103, or INTL ST 101) or (POLI SCI 103 or 106 prior to fall 2017)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Examine the relationships and interactions between religion and politics from a comparative perspective.

Audience: Undergraduate

2. Analyze the appropriate relationship between religion and state.

Audience: Undergraduate

3. Discuss the implications of the various ways in which the religion-state relationship have been involved in political conflict.

Audience: Undergraduate

**POLI SCI/INTL ST 434 – THE POLITICS OF HUMAN RIGHTS**

3-4 credits.

Examines the origins and development of human rights in international politics. The course discusses what human rights are, international human rights movements, the international search for justice after mass crimes, and international humanitarian intervention. Not open to students with credit for POLI SCI 317 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze the meaning of human rights in international politics.

Audience: Undergraduate

2. Examine the origins and development of human rights in international politics.

Audience: Undergraduate

3. Explore international human rights movements.

Audience: Undergraduate

4. Discuss the international search for justice after mass crimes.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI/GEN&WS 435 – POLITICS OF GENDER AND WOMEN'S RIGHTS IN THE MIDDLE EAST**

3 credits.

Explores the intertwined relationship between gender and politics in contemporary Middle East and North Africa. Situates the region's historical, socio-political, and cultural context that have particularly contributed to shaping the current discourse on gender in the Arab World. Explores – both theoretically and empirically – the role of Arab women in influencing the political processes across the Middle East. Examines real-world examples of Middle Eastern women from different parts of the region who have succeeded to challenge the status quo and push for genuine change.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a concrete understanding of the history and politics of the Middle East and North Africa (MENA) and the ways they shape gender power relations across the region.

Audience: Both Grad & Undergrad

2. Apply comparative politics frameworks and feminist theories toward understanding patterns of female political participation and better understand current events and complexities of the region's politics and governance structures.

Audience: Both Grad & Undergrad

3. Sharpen critical and analytical skills through exposure to different, even contradictory, points of views and contemporary debates relating to the role of women in shaping MENA's politics post-Arab uprisings.

Audience: Both Grad & Undergrad

4. Develop and present ideas and arguments to audience with diverse interests and backgrounds.

Audience: Both Grad & Undergrad

5. Apply pertinent theoretical and empirical evidence necessary to make critical and analytical arguments about gender and politics in comparative perspective.

Audience: Graduate

**POLI SCI 437 – NATIONALISM AND ETHNIC CONFLICT**

3-4 credits.

Nationalist conflict and ethnic contestation remain major components of global politics. Drawing on cases from around the world, this course explores why this is the case. In the process, we will address a number of crucial questions: What are nations and ethnic groups? Where do they come from? Why do they pick particular territories? How do they define who can be part of the group? Why are they so successful in mobilizing people to kill and be killed? In the course of answering these questions, the course investigates the interactions between nations and states, religion and nationalism, globalization, citizenship and minority rights, and the causes and solutions for national and ethnic conflict.

**Requisites:** Sophomore standing and (POLI SCI 120 or 182) or (POLI SCI 106 or 186 prior to fall 2017)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**POLI SCI/INTL ST 439 – THE COMPARATIVE STUDY OF GENOCIDE**

3-4 credits.

Examines the phenomenon of genocide in the modern world. The class covers the concept of genocide, theories of why genocide occurs, and particular cases in the 20th and 21st centuries. Not open to students with credit for POLI SCI 318 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2021

**Learning Outcomes:** 1. Examine genocide in the modern world.

Audience: Undergraduate

2. Study theories of why genocide occurs.

Audience: Undergraduate

3. Examine particular cases in the 20th and 21st centuries.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**POLI SCI 442 – HONORS SEMINAR ON STATE-BUILDING**

3 credits.

In-depth exploration of the origins, functions, and societal impacts of states from a global and historical perspective. Engage critically with theories of state formation, state capacity, and governance, analyzing how states are created, sustained, and challenged across various contexts. Special attention will be given to the role of states in shaping and responding to war, environmental challenges, and social dynamics. Draws on interdisciplinary sources from political science, history, economics, and anthropology. Develop and defend nuanced arguments on the state's role as an agent of both stability and change.

**Requisites:** Satisfied Quantitative Reasoning (QR) A Requirement, junior standing, and declared in an Honors program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Evaluate and critique major theories of state formation, state capacity, and governance, identifying their strengths, limitations, and applicability across different historical and cultural contexts.

Audience: Undergraduate

2. Integrate perspectives from political science, history, economics, and anthropology to understand the multifaceted role of the state in societal development and change.

Audience: Undergraduate

3. Conduct comparative analyses of state structures, capacities, and policies, drawing on diverse case studies to identify patterns, variations, and underlying factors in state development and function.

Audience: Undergraduate

4. Synthesize course concepts and empirical evidence to construct and defend original, evidence-based arguments on the state's role in society, demonstrating advanced critical thinking and academic writing skills.

Audience: Undergraduate

**POLI SCI/LEGAL ST 445 – LEGAL WRITING, FROM COUNSELOR TO ADVOCATE**

3 credits.

Introduction to legal reasoning, writing, and research. Draft memos and briefs based on fictional case files and independent legal research, simulating the practice of law. Topics include precedent, sources of law, reading and interpreting legal texts, objective legal analysis, persuasion, and oral argument.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Read legal sources critically and accurately to identify relevant information.

Audience: Undergraduate

2. Recognize the weight and significance of legal authorities within the American legal system.

Audience: Undergraduate

3. Analyze and synthesize legal authorities to explain and formulate controlling rules.

Audience: Undergraduate

4. Apply legal rules to a set of facts—both to predict legal consequences and to advocate for a preferred result.

Audience: Undergraduate

5. Use research strategies to find controlling and persuasive legal authority.

Audience: Undergraduate

6. Write clearly and concisely about the law in different professional contexts, including objective office memoranda and persuasive legal briefs.

Audience: Undergraduate

7. Articulate legal analyses and argue legal positions via oral communication and advocacy.

Audience: Undergraduate

**POLI SCI/ECON/ENVIR ST/URB R PL 449 – GOVERNMENT AND NATURAL RESOURCES**

3-4 credits.

Problems of public policy and administration for development and use of natural resources.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**POLI SCI 460 – TOPICS IN POLITICAL PHILOSOPHY**

3-4 credits.

Investigation at an advanced level of selected problems in political philosophy.

**Requisites:** Sophomore standing and (POLI SCI 160 or ILS 205) or (POLI SCI 209 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 461 – INTERDISCIPLINARY SEMINAR IN POLITICAL ECONOMY, PHILOSOPHY, & POLITICS**

3 credits.

An interdisciplinary seminar focusing on current policy debates designed to incorporate concepts and approaches from philosophy, political science, and economics.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize concepts and arguments from philosophy, politics, and economics.

Audience: Undergraduate

2. Apply concepts and arguments from philosophy, politics, and economics.

Audience: Undergraduate

3. Engage in written work incorporating an array of primary and secondary sources.

Audience: Undergraduate

**POLI SCI/ILS 463 – DECEPTION AND POLITICS**

3-4 credits.

Deception and truth telling as matters of fundamental political concern. Writers ranging from Plato to John Rawls have grappled with the problem of deception and truth-telling in politics. Flattery, hypocrisy, lying as a matter of state, lying as a matter of policy: philosophical explorations of these and related phenomena are the central focus.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore deception – and truth telling – as matters of fundamental political concern.

Audience: Undergraduate

2. Examine flattery, hypocrisy, lying as a matter of state, and lying as a matter of policy: philosophical explorations of these and related phenomena are at the center of this course.

Audience: Undergraduate

3. Explore writers ranging from Plato to John Rawls and how they have grappled with the problem of deception and truth-telling in politics.

Audience: Undergraduate

**POLI SCI/GEN&WS 469 – WOMEN AND POLITICS**

3-4 credits.

Changing political roles, status, attitudes, and behaviors of women in contemporary society and of the political implications of changing female/male relationships.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Introduce students to concepts of sex, gender and sexuality and how they have been fundamental to the shape and function of political institutions, laws, and policies.

Audience: Undergraduate

2. Understand how women have participated in politics despite severe legal and political restrictions.

Audience: Undergraduate

3. Understand how social policies and institutional rules inhibit women's influence and participation.

Audience: Undergraduate

4. Explore how the media cover female candidates.

Audience: Undergraduate

5. Examine what barriers inhibit female candidates from running for office.

Audience: Undergraduate

**POLI SCI 470 – THE FIRST AMENDMENT**

3-4 credits.

An examination of the basic principles, purposes, and assumptions of First Amendment cases and literature, with attention to both historical and contemporary controversies.

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI 481 – HONORS SEMINAR ON RACE AND POLITICS IN THE UNITED STATES**

3 credits.

This course examines the sources and policy implications of racial division in American politics by analyzing a range of issues, such as affirmative action in the workplace and in higher education, the use of black majority districts as a means of enhancing representation of minority interests in Congress, differences in public opinion between whites and blacks, and issues concerning multi-racial and ethnic tensions. We will examine the historical background of race relations and the current policy debates, with a focus on trying to find common-ground solutions. The goal of this seminar is to stimulate critical thinking on this important issue, causing students to think about race and politics in new ways.

**Requisites:** Junior standing and declared in an Honors program

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the sources and policy implications of racial division in American politics by analyzing a range of issues, such as affirmative action in the workplace and in higher education.

Audience: Undergraduate

2. Examine the historical background of race relations and the current policy debates.

Audience: Undergraduate

3. Explore differences in public opinion between whites and blacks, and issues concerning multi-racial and ethnic tensions.

Audience: Undergraduate

**POLI SCI 490 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: AMERICAN GOVERNMENT**

1-4 credits.

An umbrella course for variable credit American government courses taken on study abroad programs.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**POLI SCI 511 – CAMPAIGN FINANCE**

3-4 credits.

Examination of campaign finance, including: the philosophical rationale behind campaign finance regulations, the history of regulatory frameworks, the influence of campaign contributions on decision making, campaign finance laws in other countries, and reform proposals. Not open to students with credit for POLI SCI 466 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and articulate the major philosophical and constitutional rationales and arguments for a more (or less) restrictive regulatory framework for campaign finance.

Audience: Undergraduate

2. Identify the connections between regulatory structures and the political consequences (both intended and unintended) of those structures.

Audience: Undergraduate

3. Understand the history of campaign finance regulation, the causes of major changes, and the current regulatory structure.

Audience: Undergraduate

4. Understand the jurisprudence and major Supreme Court decisions that have set the terms of campaign finance regulation.

Audience: Undergraduate

5. Connect controversies over campaign finance regulation to broader themes in American politics.

Audience: Undergraduate

**POLI SCI 515 – PUBLIC OPINION**

3-4 credits.

Formation of opinions within and among the political publics; their role in the development and practice of governmental policy. Not open to students with credit for POLI SCI 473 prior to fall 2017

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **POLI SCI/AFROAMER 519 – AFRICAN AMERICAN POLITICAL THEORY**

3-4 credits.

Explores a range of theories that African Americans have drawn upon to cope with and ameliorate their political circumstances in the United States within the specific parameters of political theory.

**Requisites:** Sophomore standing and (POLI SCI 160 or AFROAMER 151) or (POLI SCI 209 taken prior to fall 2017) or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze how African American thinkers simultaneously reflect and complicate liberal, conservative, nationalist, and materialist political thought.

Audience: Undergraduate

2. Examine how African American thinkers understand sexism in African American political thought and racism in feminist thought.

Audience: Undergraduate

3. Interrogate contemporary debates in African American political theory including, but not limited to, the parameters of effective black leadership.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 529 – ARAB-ISRAELI CONFLICT**

3-4 credits.

Examines the political, social, and economic aspects of the evolution of the Arab-Israeli conflict over time, and the theoretical and policy issues it raises. Not open to students with credit for POLI SCI 631 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 120, 140, 182 or INTL ST 101) or (POLI SCI 103, 106, or 186 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate an in-depth understanding of the Arab-Israeli conflict and its evolution over time.

Audience: Undergraduate

2. Develop an appreciation of the complexities and dynamism of this conflict through an examination of its origins, the actors involved, and the key historical and political factors that have shaped it.

Audience: Undergraduate

3. Examine the political, social, and economic aspects of the evolution of the Arab-Israeli conflict.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 590 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: POLITICAL THEORY**

1-4 credits.

An umbrella course for variable credit political theory courses taken on study abroad programs.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

### **POLI SCI 601 – PROSEMINAR: TOPICS IN POLITICAL SCIENCE**

3 credits.

Intensive study and research in selected problems within the constituent fields of political science.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**POLI SCI 602 – WISCONSIN IN WASHINGTON ADVANCED PUBLIC POLICY COURSE**

4 credits.

The public policy process is structured argument and decision making within institutional contexts. This class introduces students to analytic frameworks for thinking about various aspects of this process. We do not study a single context or policy, but, rather, seek to understand how policies might succeed (or fail) in one context or another. The principal framework is institutional analysis, or the way in which formal and informal rules shape policies and their outcomes. Students will learn to perform institutional analysis as well as write a memorandum presenting such an analysis to a policymaker. Students will align their final projects to their personal and professional activities and/or their internship. The course will help students understand how policies can achieve durable impact, and how progress made through policies can be defended amid institutional pitfalls.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Analyze frameworks for thinking about various aspects of the policy making process.

Audience: Undergraduate

2. Discuss the ways in which formal and informal rules shape policies and their outcomes.

Audience: Undergraduate

3. Perform institutional analysis as well as write a memorandum presenting such an analysis to a policymaker.

Audience: Undergraduate

**POLI SCI 635 – COMPARATIVE POLITICS OF SPORT**

3-4 credits.

Covers the political economy, political culture, and the politics of identity (nationalism, race, ethnicity, social class, religion, and gender) that is usually associated with sport at both the highest and lowest levels of competition. Not open to students with credit for POLI SCI 616 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 120 or 182) or (POLI SCI 106 or 186 taken prior to fall 2017) or graduate standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Examine the political economy of sport in a global context.

Audience: Undergraduate

2. Study the political culture of sport.

Audience: Undergraduate

3. Discuss the politics of identity (nationalism, race, ethnicity, social class, religion, and gender) that is usually associated with sport.

Audience: Undergraduate

4. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 659 – POLITICS AND SOCIETY: CONTEMPORARY EASTERN EUROPE**

3-4 credits.

Comparative analysis of the countries of contemporary Eastern Europe, including issues of democratization, economic transition, and social change; political crises and institutional adjustments; interactions between regimes and domestic social forces; prospect for future systemic change.

**Requisites:** Sophomore standing and (POLI SCI 120 or 182) or (POLI SCI 106 or 186 taken prior to fall 2017) or graduate standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Analyze issues of democratization, economic transition, and social change in contemporary Eastern Europe.

Audience: Undergraduate

2. Examine political crises and institutional adjustments in Eastern Europe.

Audience: Undergraduate

3. Discuss interactions between regimes and domestic social forces.

Audience: Undergraduate

4. Analyze prospect for future systemic change.

Audience: Undergraduate

5. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

### **POLI SCI 681 – SENIOR HONORS THESIS**

3-4 credits.

Honors in the major in Political Science thesis research and writing.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **POLI SCI 682 – SENIOR HONORS THESIS**

3-4 credits.

Honors in the Major in Political Science thesis research and writing (continuation of POLI SCI 681).

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **POLI SCI 683 – SENIOR HONORS THESIS SEMINAR**

3 credits.

A class for honors students writing their senior honors thesis within a seminar format. Focus is on conceptualization, research design, writing of the thesis, and relevant issues of political science. Only senior majors writing honor thesis.

**Requisites:** Junior standing and declared in an Honors program

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **POLI SCI 684 – SENIOR HONORS THESIS SEMINAR**

3 credits.

A class for honors students writing their senior honors thesis within a seminar format. Focus is on conceptualization, research design, writing of the thesis, and relevant issues of political science. Continuation of 683. Seniors only.

**Requisites:** POLI SCI 683, senior standing only, and declared in an Honors program

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **POLI SCI 690 – STUDY ABROAD TOPICS IN POLITICAL SCIENCE: COMPARATIVE POLITICS**

1-4 credits.

An umbrella course for variable credit comparative politics courses taken on study abroad programs.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2001

### **POLI SCI 691 – SENIOR THESIS**

3 credits.

For students writing a thesis in consultation with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **POLI SCI 692 – SENIOR THESIS**

3 credits.

For students writing a thesis in consultation with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **POLI SCI 698 – DIRECTED STUDY**

1-4 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **POLI SCI 699 – DIRECTED STUDY**

1-4 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **POLI SCI 799 – DIRECTED STUDY**

1-4 credits.

Directed Study restricted to graduate students. Intended for master's level students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

### **POLI SCI 800 – POLITICAL SCIENCE AS A DISCIPLINE AND PROFESSION**

1 credit.

Describes and evaluates major approaches used in political science. Explores issues related to professional development and political science careers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate an understanding of political science as a discipline and profession.

Audience: Graduate

2. Recognize major approaches used in the discipline of political science and the "hidden curriculum" of the profession.

Audience: Graduate

3. Identify a broad cross-section of the faculty and their research in the political science department.

Audience: Graduate

### **POLI SCI 801 – DISSERTATION PROPOSAL RESEARCH AND WRITING SEMINAR**

3 credits.

Provides structured support and mentorship for political science dissertation proposal writing. Includes topics such as defining relevant research questions, incorporating existing scholarship, developing a theory and research design and drafting a full prospectus.

**Requisites:** Declared in Political Science doctoral program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Fully form their dissertation committee.

Audience: Graduate

2. Produce a draft of their dissertation prospectus.

Audience: Graduate

### **POLI SCI/FRENCH/GERMAN/HISTORY/SOC 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR**

3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **POLI SCI 811 – INTRODUCTION TO STATISTICAL COMPUTING IN POLITICAL SCIENCE**

1-3 credits.

Introduction to the issues of statistical computing in political science using statistical packages such as STATA and R with emphasis on developing sound practices for organizing data, protocols, and results in empirical research. Not open to students with credit for POLI SCI 553 prior to fall 2017

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### **POLI SCI 812 – INTRODUCTION TO STATISTICAL METHODS IN POLITICAL SCIENCE**

4 credits.

Introductory statistics course for Ph.D. students. Emphasis on probability theory, inference, and the foundations of multivariate least squares and maximum likelihood.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically read, interpret and replicate the quantitative content of many articles in the quantitative social sciences  
Audience: Graduate

2. Conduct, interpret, and communicate results from analysis using multiple regression  
Audience: Graduate

3. Explain the limitations of observational data for making causal claims, and begin to use existing strategies for attempting to make causal claims from observational data  
Audience: Graduate

4. Write clean, reusable, and reliable R code  
Audience: Graduate

5. Feel empowered working with data  
Audience: Graduate

### **POLI SCI 813 – MULTIVARIABLE STATISTICAL INFERENCE FOR POLITICAL RESEARCH**

3 credits.

Extensive treatment of multiple regression and its variants.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **POLI SCI 814 – SOCIAL IDENTITIES: DEFINITION AND MEASUREMENT**

3 credits.

Analyzes the concept of social identities with a focus on definition, comparison, and measurement. Explores a range of theories as well as methodological techniques for measurement. Examines classic works on race, ethnic, national, class, gender, and religious identities.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### **POLI SCI 817 – EMPIRICAL METHODS OF POLITICAL INQUIRY**

3 credits.

Acquaints students with a wide variety of research methods used to analyze political phenomena, emphasizing both quantitative and qualitative approaches.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **POLI SCI 818 – MAXIMUM LIKELIHOOD ESTIMATION**

3 credits.

Develops the theory of maximum likelihood estimation and applies it to models for discrete and limited dependent variables common to political and social science data.

**Requisites:** POLI SCI 812 and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **POLI SCI 820 – EXPERIMENTAL METHODS**

3 credits.

Experimental methods in the social sciences, with specific application to political science. Covers the logic of experimentation and how experiments can be used to investigate social phenomena. Interpret, design, execute and analyze experiments.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Explain important concepts and arguments made by prominent scholars in causal inference and experimental methods  
Audience: Graduate

2. Design, analyze and field experiments suited to your own particular research question  
Audience: Graduate

3. Understand and explain the ethical debates that surround experimental research  
Audience: Graduate

4. Assess varied types of experimental designs on several dimensions  
Audience: Graduate

5. Apply course concepts to analysis of current research and contemporary social scientific debates  
Audience: Graduate

**POLI SCI 821 – MASS POLITICAL BEHAVIOR**

3 credits.

An empirical analysis of the role of mass publics in political life and the factors which determine the formation and expression of political beliefs and attitudes.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**POLI SCI 825 – RACE AND POLITICS IN THE UNITED STATES**

3 credits.

Analysis of the role of race, class and ethnicity in the political process. Evaluation of theories from political science, economics and sociology. Topics may include policy analysis, political organizations, immigration, political behavior and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**POLI SCI 826 – THE LEGISLATIVE PROCESS**

3 credits.

Analysis of legislative process and the role of the legislature in the political system, emphasizing current research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**POLI SCI 828 – THE CONTEMPORARY PRESIDENCY: ISSUES AND APPROACHES**

3 credits.

Current topics of research interest on the American presidency. Alternative approaches and methods for the study of the presidency.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**POLI SCI/JOURN 829 – POLITICAL COMMUNICATION**

3 credits.

This course examines the role of communication in American politics. Topics covered include the communication of politics (e.g., communication by politics elites, effects of mass media and interpersonal communication on political attitudes) as well as the politics of communications (regulation of political communication, policy issues, etc.).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**POLI SCI/CLASSICS 834 – ROMAN POLITICAL THOUGHT**

3 credits.

In depth study of key works of Roman political thought, along with recent and classic scholarship in political theory, history, philosophy, classics, and literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Master the state of existing research on Roman political thought through the study of primary and secondary sources.

Audience: Graduate

2. Develop expertise in methods of political inquiry, specifically the study of the history of political thought.

Audience: Graduate

3. Design, conduct, and complete original research dealing with Roman political thought.

Audience: Graduate

4. Communicate effectively, in both speech and writing, complex concepts and arguments related to Roman political thought to multiple audiences.

Audience: Graduate

**POLI SCI/A A E 835 – GAME THEORY AND POLITICAL ANALYSIS**

3 credits.

An introduction to the tools of game theoretic analysis, with reference to the use of game theory in political science. Intended for those desiring a basic familiarity with the theory, and for those planning further work in formal modeling.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI 836 – FORMAL MODELS OF DOMESTIC POLITICS**

3 credits.

Provides an overview of formal, i.e., game-theoretic, models of domestic politics. This course builds directly upon the material presented in Political Science 835.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### **POLI SCI 837 – FORMAL MODELS OF INTERNATIONAL RELATIONS**

3 credits.

Provides an overview of the formal theory literature in international relations, including international security and international political economy.

**Requisites:** POLI SCI/A A E 835

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### **POLI SCI 839 – FIELD SEMINAR IN POLITICAL THEORY**

3 credits.

An overview of approaches to interpreting, teaching, and writing about political theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze different understandings of political theory as a subfield of political science

Audience: Graduate

2. Analyze different methods and schools of studying political theory

Audience: Graduate

3. Analyze different approaches to teaching works of political thought

Audience: Graduate

### **POLI SCI 840 – COMPARATIVE POLITICAL ECONOMY**

3 credits.

Survey of field of comparative political economy and in-depth study of political economy of democratic and non-democratic capitalist systems. Key themes include: business and labor relations, globalization and its impact on domestic political economies, rise of emergent powers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **POLI SCI 843 – THE POLITICAL ECONOMY OF DEVELOPMENT**

3 credits.

We examine why some countries are rich, and others are poor. Selected topics include the role of institutions, regime type, corruption, the resource curse, ethnic differences and state capacity. We focus on the cutting edge of the empirical literature on development, and pay close attention to measurement and causal inference.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop theoretically grounded and testable hypotheses about the political economy of development.

Audience: Graduate

2. Formulate and implement clear research designs to evaluate hypotheses.

Audience: Graduate

### **POLI SCI 844 – DEMOCRATIC IMPERFECTIONS**

3 credits.

Democracies frequently depart from their ideal type. We focus on select problems with democracy, and examine their causes and effects, and remedies for them. Topics vary from year-to-year, and include inequalities in political representation and participation, a lack of accountability and ethnic voting.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Develop theoretically grounded and testable hypotheses about the causes and effects of, and remedies for, inequalities in political representation and participation.

Audience: Graduate

2. Formulate and implement clear research designs to evaluate hypotheses.

Audience: Graduate

### **POLI SCI 846 – RACIAL AND ETHNIC DIVERSITY: CAUSES AND EFFECTS**

3 credits.

Focuses on the causes and effects of racial and ethnic diversity in a range of contexts across different countries. Includes the following topics: 1) definitions of diversity and how ethnic and racial diversity is measured; 2) the causes of diversity including migrations and state actions such as ethnic cleansing and colonialism, and later processes of immigration and segregation; 3) the effects of diversity or segregation, including on social relations, conflict, public good provision, and political behavior; and the effects of ethnic and racial diversity in organizations; and 4) considers ways of increasing diversity including affirmative action and quotas, and the effectiveness of diversity training. Readings will include cases studies from different countries and different time periods and will include a range of different racial and ethnic groups around the world.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Gain an understanding of the meaning and measurement of racial and ethnic diversity.

Audience: Graduate

2. Become familiar with the social science literature on the causes and effects of ethnic and racial diversity and segregation.

Audience: Graduate

3. Identify and learn about research methods used in the study of racial and ethnic diversity.

Audience: Graduate

4. Develop critical reading, writing, collaboration, and presentation skills.

Audience: Graduate

### **POLI SCI 850 – RELIGION AND POLITICS**

3 credits.

Examines the meanings of, and interactions between, religion and politics in comparative politics, international relations, and American politics.

Explores the impact religion has on wide range of politically relevant outcomes and the mechanisms through which religion shapes those outcomes. Provides an overview of the main theoretical, conceptual, and empirical studies of religion and politics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Comprehension of selected theories related to religion and politics

Audience: Graduate

2. Critical assessment of theories related to religion and politics

Audience: Graduate

3. Application of theories related to religion and politics to general questions in political science

Audience: Graduate

**POLI SCI 851 – CONTENTIOUS POLITICS**

3 credits.

Why do people mobilize outside of routine political channels or institutions to pursue political change? How do we explain moments when people take to the streets or take up arms to accomplish their political goals? At the heart of these questions is one that has long formed a core of social science inquiry: how do scholars explain collective action, particularly in the face of often serious risks. Examine these questions through exploring leading theoretical themes in the study of social movements, revolutions, and riots. Explore how a variety of factors affect the where's, why's and how's of movement dynamics.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Learning Outcomes:** 1. Understand, analyze, explain, and critique theoretical approaches to contention.

Audience: Graduate

2. Understand, analyze, explain, and critique explanations for the emergence of social mobilizations, including revolutions and riots.

Audience: Graduate

3. Understand, analyze, explain, and critique explanations for a variety of dynamics of contention.

Audience: Graduate

4. Explain the role of culture and emotions as well as social and political structures in processes of contention.

Audience: Graduate

5. Understand and critique various methodological approaches to studying contention including which methods are best suited for which questions.

Audience: Graduate

6. Apply methodological and theoretical approaches to contention through independent research.

Audience: Graduate

**POLI SCI 853 – COMPARATIVE POLITICAL INSTITUTIONS**

3 credits.

Comparative theoretical and empirical analysis of political institutions, including electoral systems, legislatures, executives, executive-legislative relationships, political parties, party systems, federalism, economic governance, and link between institutions and internationalization.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**POLI SCI 854 – NATIONALISM AND ETHNIC CONFLICT**

3 credits.

Comparative analysis of nationalism, national identity, and ethnicity and their impact on domestic and international conflict. Examines relationship between nationality, citizenship, and minority rights; territoriality and identity, contemporary religious nationalism; relationship between globalization and nationalism.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2022**POLI SCI 856 – FIELD SEMINAR IN COMPARATIVE POLITICS**

3 credits.

Introduction to leading concepts and theories in the field of comparative politics, including those relating to states, nations, regimes and development. Includes work on many different regions and countries employing a range of research strategies and methodologies.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Understand, analyze and evaluate concepts and theories in Comparative Politics

Audience: Graduate

2. Identify and understand research methods and strategies and their implications

Audience: Graduate

3. Identify political science publication norms in top journals and university presses

Audience: Graduate

4. Develop critical reading, writing, collaboration, and presentation skills

Audience: Graduate

5. Become acquainted with UW-Madison faculty in Comparative Politics

Audience: Graduate

**POLI SCI 857 – INTERNATIONAL RELATIONS THEORIES**

3 credits.

Analysis of the major theories on the functioning of the international political system and the behavior of nations within it.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**POLI SCI 862 – STATE AND SOCIETY IN COMPARATIVE PERSPECTIVE**

3 credits.

Reviews a range of approaches that focus on civil society, social movements, ethnic and religious based mobilization, as well as gender and class based approaches to state-society relations.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI 864 – INTERNATIONAL POLITICAL ECONOMY**

3 credits.

Analysis of key classical and contemporary theories in international political economy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**POLI SCI/ENVIR ST/PUB AFFR 866 – GLOBAL ENVIRONMENTAL GOVERNANCE**

3 credits.

In-depth examination of the political and policy challenges posed by global environmental degradation. Analysis of international institutions for managing the global environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**POLI SCI/PUB AFFR 871 – PUBLIC PROGRAM EVALUATION**

3 credits.

Compares the conceptual, statistical, and ethical issues of experimental, quasi-experimental and non-experimental designs for program evaluation. Definitions of outcomes, sample size issues, statistical biases in measuring causal effects of programs, and the reliability of findings will be emphasized using case studies selected from current public programs.

**Requisites:** PUB AFFR 818

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**POLI SCI 873 – AMERICAN POLITICAL PARTIES**

3 credits.

Reviews major approaches to analyzing political parties and understanding their developmental changes. Examines the parties in operation and the relationship of parties to the state and society.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI/PUB AFFR/URB R PL 874 – POLICY-MAKING PROCESS**

3 credits.

Examines the political, social, and economic contexts that shape and are shaped by policy making processes. Though the focus is on the US, international comparisons will be made, and students are encouraged to think about the American context through comparative and international perspectives. Familiarizes students with dominant theories and models of policymaking process and policy change, starting with the model of the policy cycle. Focuses in on key topics and issues in policy making, specifically, agenda setting, implementation, and the relationships between policymaking and democracy. Reflects on contemporary and emerging issues and dilemmas of the politics of policy making.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify important contextual aspects of policy making processes, of dominant theories, models and conceptual frameworks of policy processes, and of key issues and topics in policy making.

Audience: Graduate

2. Critically analyze theories and evidence presented in readings and describe debates, past and present, surrounding public policy making processes.

Audience: Graduate

3. Read and comprehend academic research, data, and writing as well as journalistic writings on relevant issues of public policy processes and politics.

Audience: Graduate

4. Communicate summaries and analyses of topics, issues and key readings in class discussions, presentations, and writing assignments. Use clear written language and draw on theories, concepts, and evidence to support their arguments and ideas.

Audience: Graduate

5. Maintain fidelity to objective social science-based research methods.

Audience: Graduate

6. Prepare a high-quality presentation and communicate effectively as a speaker.

Audience: Graduate

**POLI SCI/PUB AFFR/URB R PL 878 – PUBLIC MANAGEMENT**

3 credits.

Role of administration in American government; problems of organization, bureaucracy and control; public policy as the output of the administrative process.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POLI SCI/PUB AFFR 885 – ADVANCED PUBLIC MANAGEMENT: CRAFT, CONSTRAINTS AND ACCOUNTABILITY**

3 credits.

Examines how managers in public and not-for-profit agencies can secure and utilize legal authority, human resources, and funds to accomplish organizational goals. Includes strategies for establishing and maintaining effective external relations and for working through other organizations to accomplish objectives.

**Requisites:** URB R PL/POLI SCI/PUB AFFR 878

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**POLI SCI 900 – TOPICS IN POLITICAL SCIENCE**

1-3 credits.

An umbrella course for variable credit topic courses, such as colloquia series, workshops, intensive summer courses, half-semester courses, etc.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 904 – SEMINAR-AMERICAN POLITICS**

3 credits.

In-depth examination of selected topics on American politics and governmental institutions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 917 – TIME SERIES ANALYSIS**

3 credits.

This course introduces students to time series methods and applications, including ARMA models, error corrections models and reduced form specifications. Course also discusses co-integration and fractional integration.

**Requisites:** POLI SCI 812 and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**POLI SCI 919 – SEMINAR-ADVANCED METHODOLOGY**

3 credits.

Design of research and adaptation of advanced methods to solve particular methodological problems in original analyses of political data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 930 – SEMINAR IN MODERN POLITICAL THOUGHT**

3 credits.

Exploration of themes from modern political thought.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explain important concepts and arguments made by thinkers in the history of modern political thought

Audience: Graduate

2. Analyze modern political and ethical theories

Audience: Graduate

3. Assess political and ethical theories made by thinkers in the history of modern political thought

Audience: Graduate

4. Apply course concepts to analysis of contemporary political and ethical debates

Audience: Graduate

**POLI SCI 931 – SEMINAR-POLITICAL THEORY**

3 credits.

Analysis of and research on problems of theorizing in and about political life.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **POLI SCI 932 – SEMINAR IN EARLY MODERN POLITICAL THEORY**

3 credits.

Study of selected topics or themes in early modern (c. 1500-1750 CE) political thought.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Master the state of existing research on a topic in early modern political theory through the study of primary and secondary sources.

Audience: Graduate

2. Develop expertise in methods of political inquiry, specifically the study of the history of political thought.

Audience: Graduate

3. Design, conduct, and complete original research dealing with early modern political theory.

Audience: Graduate

4. Communicate effectively, in both speech and writing, complex concepts and arguments related to early modern political theory to multiple audiences.

Audience: Graduate

### **POLI SCI/GEN&WS 933 – FEMINIST POLITICAL THEORY**

3 credits.

Focuses on how specific schools of feminist thought redefine the political, spanning historical and contemporary feminist political theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### **POLI SCI 935 – SEMINAR IN CONTEMPORARY POLITICAL THEORY**

3 credits.

Exploration of themes in contemporary political theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explain important concepts and arguments made by thinkers in the history of political thought

Audience: Graduate

2. Analyze political and ethical theories, both historical and contemporary

Audience: Graduate

3. Assess political and ethical theories made by thinkers in the history of political thought

Audience: Graduate

4. Apply course concepts to analysis of contemporary political and ethical debates

Audience: Graduate

### **POLI SCI 936 – SEMINAR IN CONTINENTAL POLITICAL THOUGHT**

3 credits.

Exploration of themes central to study of continental political thought.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain important concepts and arguments made by thinkers in continental political thought

Audience: Graduate

2. Analyze continental political and ethical theories, both historical and contemporary

Audience: Graduate

3. Assess political and ethical theories made by continental thinkers

Audience: Graduate

4. Apply course concepts to analysis of contemporary political and ethical debates

Audience: Graduate

### **POLI SCI 937 – SEMINAR IN LEGAL AND CONSTITUTIONAL THEORY**

3 credits.

Exploration of themes in legal and/or constitutional theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explain important concepts and arguments in legal and/or constitutional theory

Audience: Graduate

2. Analyze legal and/or constitutional theories.

Audience: Graduate

3. Assess legal and/or constitutional theories.

Audience: Graduate

4. Apply course concepts to analysis of contemporary legal and/or constitutional debates.

Audience: Graduate

### **POLI SCI 940 – DOMESTIC POLITICS OF INTERNATIONAL RELATIONS**

3 credits.

Examines how domestic institutions and processes influence the international system. Also examines how international forces influence domestic politics in the areas of foreign policy, international political economy and security.

**Requisites:** POLI SCI 857

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **POLI SCI 945 – SEMINAR-NATIONAL SECURITY AFFAIRS**

3 credits.

Contemporary military strategy, the interaction of military and political factors in international politics, and the processes and content of defense policies, with emphasis on the United States.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

### **POLI SCI 948 – SEMINAR: TOPICS IN COMPARATIVE POLITICS**

3 credits.

Research seminar on specific topics in comparative politics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **POLI SCI 950 – PSYCHOLOGICAL APPROACHES TO INTERNATIONAL RELATIONS**

3 credits.

Designed around substantive topic areas, including reputation, personality, and emotions. Covers the broad patterns of scholarship in political psychology over the last 50 years. The larger methodological issues around political psychology and International Relations (IR) (how do you study this? what tradeoffs do the various approaches entail?) will form a backdrop to most of our discussions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain important concepts and arguments made by prominent scholars in political psychology and international relations

Audience: Graduate

2. Assess a variety of research designs on several dimensions

Audience: Graduate

3. Apply course concepts to analysis of current research and contemporary social scientific debates

Audience: Graduate

### **POLI SCI 959 – SEMINAR-INTERNATIONAL ORGANIZATION**

3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **POLI SCI 960 – SEMINAR-INTERNATIONAL RELATIONS**

3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

### **POLI SCI/AAE/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/PORTUG/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**POLI SCI/AFRICAN/ANTHRO/ECON/GEOG/HISTORY 983 – INTERDEPARTMENTAL SEMINAR IN AFRICAN STUDIES TOPICS**  
3 credits.

Interdisciplinary inquiry in African societies and cultures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop in-depth knowledge in a sub-field of specialization within African studies

Audience: Graduate

2. Acquire and demonstrate understanding of major theories, approaches, concepts, currently informing African studies

Audience: Graduate

3. Understand your process of learning and possess the capacity to intentionally seek, evaluate, and learn from information, and to recognize and reduce bias in thinking.

Audience: Graduate

4. Gain firm knowledge of existing research in African studies

Audience: Graduate

5. Develop and improve speaking, readings, listening, and writing skills

Audience: Graduate

6. Write and speak across disciplinary boundaries

Audience: Graduate

7. Analyze texts from various theoretical and critical perspectives

Audience: Graduate

**POLI SCI 986 – POLITICAL THEORY WORKSHOP**  
1-3 credits.

Presentation and evaluation of political theory research in progress by members of the workshop and invited speakers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 987 – COMPARATIVE POLITICS COLLOQUIUM**  
1-3 credits.

Presentation and evaluation of comparative politics research in progress by members of the workshop and invited speakers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**POLI SCI 988 – INTERNATIONAL RELATIONS COLLOQUIUM**  
1-3 credits.

Presentation and evaluation of International Relations research in progress by members of the workshop and invited speakers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain important concepts and arguments made by prominent scholars in political psychology and international relations

Audience: Graduate

2. Assess a variety of research designs on several dimensions

Audience: Graduate

3. Apply course concepts to analysis of current research and contemporary social scientific debates

Audience: Graduate

4. Provide apt, concise and helpful feedback to works in progress

Audience: Graduate

**POLI SCI 989 – AMERICAN POLITICS WORKSHOP**  
1 credit.

Presentation and evaluation of American politics research in progress by members of the workshop and invited speakers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. gain an awareness of cutting-edge research in American politics

Audience: Graduate

2. learn and practice how to constructively critique research in American politics

Audience: Graduate

3. gain experience in how to present research in professional settings

Audience: Graduate

4. practice how to receive constructive criticism and engage with criticism of one's work

Audience: Graduate

**POLI SCI 990 – RESEARCH AND THESIS**  
1-3 credits.

Under the direction of faculty.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**POLI SCI 999 – INDEPENDENT WORK**

2-3 credits.

Under the direction of a staff member.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## POPULATION HEALTH SCIENCES (POP HLTH)

**POP HLTH/C&E SOC 370 – INTRODUCTION TO PUBLIC HEALTH**

3 credits.

Introduction to the principles of public health. Using local and global health problems as examples, introduces epidemiology, evidence-based public health practice, evaluation, and communication. Covers the major subject domains of public health including infectious and chronic disease, environmental health, injuries and accidents, and health care systems. Key theoretical models and empirical approaches of public health are discussed.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Either Social Science or Natural Science Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Define public health and its core functions

Audience: Undergraduate

2. Describe the difference between individual- and population-based strategies for improving health, including primary, secondary, and tertiary prevention approaches

Audience: Undergraduate

3. Describe major causes and trends in morbidity and mortality in the U.S. and globally

Audience: Undergraduate

4. Demonstrate knowledge of the 5-step public health approach (define the problem, find the causes, develop effective programs, implement programs, and evaluate impact)

Audience: Undergraduate

5. Describe the challenges and opportunities for evidence-based public health practice, focusing on health equity and social justice

Audience: Undergraduate

**POP HLTH/B M I 451 – INTRODUCTION TO SAS PROGRAMMING FOR POPULATION HEALTH**

2 credits.

Use of the SAS programming language for the management and analysis of biomedical data.

**Requisites:** Declared in the Population Health, Epidemiology or Clinical Investigation graduate program.**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Create and modify SAS datasets using programming structures within the SAS Data Step (e.g. Do loops, If/Then/Else, Functions, and Arrays).

Audience: Graduate

2. Utilize various SAS Procedures to explore SAS datasets, to summarize information in SAS datasets, and to perform basic statistical analyses.

Audience: Graduate

3. Recognize common SAS program errors, identify strategies for debugging SAS programs, and implement general techniques to check and verify your coding.

Audience: Graduate

### POP HLTH/ENVIR ST 471 – INTRODUCTION TO ENVIRONMENTAL HEALTH

3 credits.

Impact of environmental problems on human health; biological hazards to human health from air and water pollution; radiation; pesticides; noise; problems related to food, occupation and environment of the work place; accidents. Physical and chemical factors involved.

**Requisites:** Junior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the principles and practice of environmental health.

Audience: Undergraduate

2. Describe environmental health and its history as a crucial aspect of the history of public health

Audience: Undergraduate

3. Describe the U.S. and world health status and issues as background framework to environmental health.

Audience: Undergraduate

4. Describe a brief introduction to the public health research methodologies including epidemiology and toxicology.

Audience: Undergraduate

5. Describe crucial infectious and non-infectious disease principles as necessary to understand issues in environmental health.

Audience: Undergraduate

### POP HLTH/ENVIR ST 502 – AIR POLLUTION AND HUMAN HEALTH

3 credits.

Toxicologic, controlled and epidemiologic studies on major air pollutants. Overview of study methods, lung physiology and pathology; air pollution sources, types, meteorology, sampling methods, controls and regulations.

**Requisites:** Junior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the health science of air pollution's effect on human health.

Audience: Both Grad & Undergrad

2. Describe air pollution and its history as a crucial aspect of the history of environmental health.

Audience: Both Grad & Undergrad

3. Describe the U.S. and world health status and issues from air pollution.

Audience: Both Grad & Undergrad

4. Describe a brief introduction to the public health research methodologies and science including epidemiology and toxicology, risk assessment and the lungs.

Audience: Both Grad & Undergrad

5. Describe the detailed scientific and policy information on indoor and outdoor air pollutants.

Audience: Both Grad & Undergrad

6. Describe the science and policy solutions for air pollution and human health issues.

Audience: Graduate

### POP HLTH/ECON/PUB AFFR 548 – THE ECONOMICS OF HEALTH CARE

3–4 credits.

Analysis of the health care industry. Markets for hospitals and physicians' care, markets for health manpower, and the role of health insurance.

**Requisites:** ECON 301, ECON 311, or PUB AFFR 880

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### POP HLTH/B M I 551 – INTRODUCTION TO BIOSTATISTICS FOR POPULATION HEALTH

4 credits.

Designed for population health researcher. Topics include descriptive statistics, elementary probability, probability distributions, one- and two-sample normal inference (point estimation, hypothesis testing, confidence intervals), power and sample size calculations, one- and two-sample binomial inference, underlying assumptions and diagnostic work.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and recognize statistical and probability terminology, symbols, definitions, and formulas

Audience: Graduate

2. Explain the meaning, assumptions, and interrelationships of statistical and probability concepts and formulas

Audience: Graduate

3. Execute probability and statistical calculations from information provided

Audience: Graduate

4. State assumptions, conclusions and interpretation in terms of statistical and probability computations

Audience: Graduate

### POP HLTH/B M I 552 – REGRESSION METHODS FOR POPULATION HEALTH

3 credits.

Introduction to the primary statistical tools used in epidemiology and health services research; multiple linear regression, logistic regression and survival analysis.

**Requisites:** STAT/B M I 541 or POP HLTH/B M I 551

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. State the assumptions underlying linear, logistic, survival and Poisson regression models, recognize and address violations of those assumptions, and estimate and interpret regression models to answer epidemiologic and public health research questions.

Audience: Graduate

2. Critique uses of linear, logistic, survival and Poisson regression models in the epidemiologic and public health literature.

Audience: Graduate

3. Translate epidemiologic concepts into statistical modeling assumptions, and explain statistical modeling assumptions in epidemiologic terms.

Audience: Graduate

4. Recognize applications that require methods beyond their expertise, and identify resources to learn about more advanced techniques.

Audience: Graduate

### POP HLTH/HIST SCI/MED HIST 553 – INTERNATIONAL HEALTH AND GLOBAL SOCIETY

3 credits.

Major problems in international health from 1750 to the present. Focus on disease epidemiology and ecology; political economy of health; migration; quarantine; race, ethnicity, and health care; international health research; cross-cultural healing; mental and maternal health; growth of international health organizations.

**Requisites:** Junior standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Recognize the utility of humanistic methods for the study of modern international health

Audience: Undergraduate

2. Develop critical thinking skills through techniques of close reading and written analysis

Audience: Undergraduate

3. Understand essential developments in the evolving relationship between global history, politics, and public health on a global scale.

Audience: Undergraduate

**POP HLTH/NUTR SCI 621 – INTRODUCTION TO NUTRITIONAL EPIDEMIOLOGY**

1 credit.

Techniques used to evaluate relationships of diet to health and disease in human populations; integration of knowledge gained with results of animal and clinical studies toward understanding dietary risk or protective factors for disease. Includes advanced diet assessment and basic epidemiologic approaches.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625 – TOXICOLOGY I**

3 credits.

Basic principles of toxicology and biochemical mechanisms of toxicity in mammalian species and man. Correlation between morphological and functional changes caused by toxicants in different organs of the body.

**Requisites:** (BIOCHEM 501 or 508) and (ANAT&PHY 335, 435, or (BIOCORE 485 and 486)) and PATH 404; or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the physiology and pathology of toxicology, understanding the basic fundamentals of toxicology and toxic agents

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and breakdown of toxicants using a given dataset

Audience: Both Grad & Undergrad

3. Recognize various experimental models to obtain scientific results

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Critique an example of toxicology in media and develop a presentation of this example

Audience: Both Grad & Undergrad

6. Explore new areas to assist in career development via journal club

Audience: Graduate

**POP HLTH/M&ENVTOX/PATH/PHM SCI/PHMCOL-M 626 – TOXICOLOGY II**

3 credits.

Survey of the basic methods and fundamental biochemical mechanisms of toxicity. Toxicity in mammalian organ systems, techniques for evaluating toxicity, as well as mechanisms of species specificity, and environmental interactions (with toxicant examples) are presented.

**Requisites:** POP HLTH/M&ENVTOX/ONCOLOGY/PHM SCI/PHMCOL-M 625

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain and identify the effects of toxicants on specific organs within the human body

Audience: Both Grad & Undergrad

2. Demonstrate metabolism and reactions of toxicants within organ systems using a given dataset

Audience: Both Grad & Undergrad

3. Classify different means of risk assessment and the conceptual rationale behind these methods

Audience: Both Grad & Undergrad

4. Implement knowledge to design experiments applicable to one's own research

Audience: Both Grad & Undergrad

5. Relate specific organ concepts with conceptual examples from M&ENVTOX 625 to enhance scientific understanding

Audience: Undergraduate

6. Appraise concepts to research to identify future research concepts.

Audience: Graduate

## POP HLTH/GENETICS/MD GENET 636 – PUBLIC HEALTH GENOMICS

1 credit.

Provides an introduction to public health genomics through a review of fundamental principles of genetics, the use of genetic information in clinical and research settings, and its implications for disease management and prevention, and health promotion. Explores policies that guide public health and discusses current ethical, legal, and social implications of these policies.

**Requisites:** (Junior standing and ZOOLOGY/BIOLOGY/BOTANY 151) or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the impact of genetics on clinical care and public health practice

Audience: Both Grad & Undergrad

2. Critically discuss genetic/genomic policies and the relevant ethical, legal, and social implications (ELSI) of these policies

Audience: Both Grad & Undergrad

3. Read, summarize, critique, and relate current news articles to key concepts in public health genomics

Audience: Graduate

## POP HLTH 640 – FOUNDATIONS IN GLOBAL HEALTH PRACTICE

1 credit.

An interdisciplinary course designed to prepare students for specific global health field experiences.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2021

**Learning Outcomes:** 1. Define and describe the evolution of foundational concepts related to of global health - including tropical medical, international health, global public health, one health and planetary health.

Audience: Both Grad & Undergrad

2. Describe and review global health competencies and develop a personalized assessment and roadmap identifying current skills and skill levels and goals for acquiring additional desired competencies needed to carry out research and implement programs in a global context.

Audience: Both Grad & Undergrad

3. Identify and use information from inter-disciplinary sources, including quantitative and qualitative data, as well as historical and cultural information, to gain a place-based understanding of the health status and health care system, as well as the overall socio-cultural context in which the project takes place.

Audience: Both Grad & Undergrad

4. Carry out topical place-based study (retrospective or prospective) individually, or in pairs or small groups.

Audience: Graduate

## POP HLTH 644 – INTERDISCIPLINARY PERSPECTIVES ON GLOBAL HEALTH AND DISEASE

1 credit.

Addresses a variety of global health topics through study of a specific country. Consider health data, health systems, historical and cultural information, and concepts of cultural competence and cultural humility.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Explain the global burden of diseases, the health transition, and the triple burden of disease as it relates to the country/region studies

Audience: Both Grad & Undergrad

2. Describe how country-specific environmental, cultural, economic, and social factors influence health.

Audience: Both Grad & Undergrad

3. Review the structure of the health system in the country studied, the role of primary health care, public health, and non-governmental organizations in the health sector.

Audience: Both Grad & Undergrad

4. Explore public health approaches for maintaining health and preventing and treating illness in community settings, including surveillance, diagnostic activities, and interventions. This should include basic health needs such as maternal and child health and nutrition, as well as transnational health challenges such as avian flu, HIV/AIDS and other acute and chronic emerging issues.

Audience: Both Grad & Undergrad

5. Utilize principles and strategies for interdisciplinary team work (communication, negotiation, respect for group dynamics, and conflict resolution).

Audience: Both Grad & Undergrad

6. Explore concepts related to cultural competence and cultural humility, as well participatory community approaches to health.

Audience: Both Grad & Undergrad

7. Examine ethical issues related to global health.

Audience: Both Grad & Undergrad

8. Describe diseases commonly found in the country studied and explain the etiology, epidemiology, clinical presentation in humans and animals, public health implications, and prevention and treatment strategies.

Audience: Graduate

## POP HLTH 650 – SPECIAL TOPICS

1-6 credits.

Variable content course.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

## POP HLTH/B M I 651 – ADVANCED REGRESSION METHODS FOR POPULATION HEALTH

3 credits.

Extension of regression analysis to observational data with unequal variance, unequal sampling and propensity weights, clusters and longitudinal measurements, using different variance structures, mixed linear models, generalized linear models and GEE. Matrix notation will be introduced and underlying mathematical and statistical principles will be explained. Examples use data sets from ongoing population health research.

**Requisites:** POP HLTH/B M I 552

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Extend the knowledge of regression analysis beyond ordinary linear models

Audience: Graduate

2. Describe the features of correlated data and their implications in drawing inference

Audience: Graduate

3. Construct proper linear and generalized linear models for longitudinal and clustered data

Audience: Graduate

4. Describe the assumptions needed for estimation and inference

Audience: Graduate

5. Implement the inference procedures to solve real-world problems using statistical packages such as SAS and R

Audience: Graduate

6. Use diagnostic tools to assess model fit

Audience: Graduate

7. Interpret and present the analytic results to answer substantive questions

Audience: Graduate

### POP HLTH/B M I 694 – APPLIED BIOMEDICAL INFORMATICS & REAL-WORLD DATA FOR PRECISION MEDICINE & POPULATION HEALTH

2 credits.

Provides an introduction to key concepts, methods, and tools of biomedical and health informatics used in precision medicine and population health, with emphasis on collection, management, and analysis of real-world data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate understanding of biomedical informatics concepts, methods, and tools used in precision medicine and population health.

Audience: Graduate

2. Demonstrate understanding of real-world data (patient-generated, clinical, and genomic) and data standards used in biomedical research.

Audience: Graduate

3. Demonstrate understanding of FAIR Guiding Principles for scientific data management and stewardship.

Audience: Graduate

4. Demonstrate understanding of regulations for using protected health information (PHI) data in health research, and ability to recognize potential ethical and compliance issues.

Audience: Graduate

### POP HLTH 699 – INDEPENDENT READING

1-5 credits.

To gain additional information on specific research problems or advanced training in the areas covered by department staff.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply concepts learned in coursework to real life situations

Audience: Both Grad & Undergrad

2. Read and effectively search scientific literature

Audience: Both Grad & Undergrad

3. Develop critical, analytical, and independent thinking skills

Audience: Graduate

### POP HLTH/I SY E 703 – QUALITY OF HEALTH CARE: EVALUATION AND ASSURANCE

1-3 credits.

Implementation, oversight, and management of quality-oriented activities in health care settings. Overview of current and historical activities, approaches, and issues confronting health care related to quality assessment, assurance, and improvement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Understand and communicate the conceptualization and measurement of quality of healthcare and patient safety.

Audience: Graduate

2. Illustrate basic concepts and methods in quality improvement as applied to current issues in healthcare.

Audience: Graduate

3. Demonstrate an understanding of the diverse perspectives that can be used to address quality and safety issues in different healthcare organizations.

Audience: Graduate

**POP HLTH/MEDICINE/NURSING 705 – SEMINAR IN INTERDISCIPLINARY CLINICAL RESEARCH EVIDENCE**

2-3 credits.

Exploration of interdisciplinary clinical research questions including strategies for assessing the evidence and methodology for conducting various types of literature reviews. Emphasizes an interdisciplinary perspective.

**Requisites:** SOC/POP HLTH 797 and STAT/B M I 542

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop an answerable clinical research question.  
Audience: Graduate

2. Search relevant scientific literature using several electronic databases and other sources of evidence (published and unpublished) across disciplines.  
Audience: Graduate

3. Manage sources of evidence with reference management software.  
Audience: Graduate

4. Critically review published clinical research on a chosen topic.  
Audience: Graduate

5. Develop a search strategy and conduct a systematic review or other form of evidence review.  
Audience: Graduate

6. Present a planned or actual evidence review to interdisciplinary peers.  
Audience: Graduate

7. Describe the implications for translation of the proposed evidence review from an interdisciplinary perspective.  
Audience: Graduate

**POP HLTH 709 – TRANSLATIONAL AND OUTCOMES RESEARCH IN HEALTH AND HEALTH CARE**

3 credits.

Seeks to review the conceptualization of translational and outcomes research in health and health care settings; to illustrate basic concepts and methods in research as applied to current issues in health and health care settings; and to understand the diverse perspectives that can be used to inform translational and outcomes research in different organizations, including those based within communities.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and communicate the conceptualization of translational and outcomes research in health and health care.  
Audience: Graduate

2. Illustrate basic concepts and methods in translational and outcomes research as applied to current issues in health and health care through creating a proposed study.  
Audience: Graduate

3. Demonstrate an understanding of the diverse perspectives on health and health care that can be used to inform translational and outcomes research in different organizations, including those within community settings.  
Audience: Graduate

**POP HLTH 712 – INTEGRATING MEDICINE AND PUBLIC HEALTH**

1 credit.

Provides an introduction to public health and opportunities to meet and discuss key concepts with an exciting variety of physician leaders who have integrated medicine public health in their careers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the scope of public health activities practiced by physicians today.

Audience: Graduate

2. Identify common themes in the career paths of physicians who have integrated medicine and public health.

Audience: Graduate

3. Describe common approaches that physicians use to improve the health of the public, including communication, advocacy, professionalism, and systems-based approaches.

Audience: Graduate

4. Identify opportunities for further work in public health with physicians with diverse backgrounds.

Audience: Graduate

5. Create your own plan for a “path of distinction” in public health

Audience: Graduate

**POP HLTH 713 – EPIDEMIOLOGY OF HIV/AIDS**

1 credit.

Provides an overview of the AIDS pandemic in the United States and worldwide. Topics covered include a review of the epidemiology of AIDS, the natural history of HIV disease, strategies to prevent and treat HIV, and local and global health impact with a focus on historically significant milestones as well as promising current and future research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2019

**Learning Outcomes:** 1. Describe the changing epidemiology and impact of HIV/AIDS in the U.S. and worldwide

Audience: Graduate

2. List co-factors of and strategies to prevent HIV transmission

Audience: Graduate

3. Identify how HIV progresses to AIDS and strategies to manage HIV disease

Audience: Graduate

4. Describe current and future areas of research that aim to prevent transmission of HIV

Audience: Graduate

**POP HLTH 718 – PRINCIPLES OF GLOBAL HEALTH CARE SYSTEMS**

2 credits.

Addresses and analyzes differences in health status and methods of organizing and providing health services in countries with varying levels of development and types of socio-political systems. Develops an understanding of the various avenues of international cooperation in health.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Describe differences in systems of providing health services among countries at different levels of development and with varying socio-political systems.

Audience: Graduate

2. Critically analyze selected global health issues, such as: health and human rights, health disparities, and the global health workforce

Audience: Graduate

3. Describe the role of major health organizations.

Audience: Graduate

4. Examine and clarify values and ethics in global health issues.

Audience: Graduate

**POP HLTH 721 – CONSPIRACIES IN PUBLIC HEALTH**

2 credits.

Skepticism and conspiracism can be barriers to successful implementation of public health and medical interventions such as vaccination, fluoridation of water, and HIV treatment. Conversations between people with opposing viewpoints, whether face-to-face or via social media, often devolve to disparagement and dismissal. Awareness of or experience with such exchanges causes us to avoid tackling such "hot button" topics with friends, colleagues, and members of our communities. While it is all too easy to believe people who adopt conspiracy theories to be members of the fringe, research has shown that medical conspiracy theories are widely known, broadly endorsed, and highly predictive of many common health behaviors. Prepares health professionals to educate communities about important public health and medical interventions.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Describe popular and less popular conspiracy theories related to biomedical and public health interventions and their origins.

Audience: Graduate

2. Explain the psychological and psychosocial basis of conspiracy theory adoption and perpetuation.

Audience: Graduate

3. Implement techniques to change individual and public opinion and behaviors related to public health and medical interventions.

Audience: Graduate

**POP HLTH 728 – CLIMATE CHANGE MEDICINE**

2 credits.

Climate change threatens human health through multiple exposure pathways, from heatwaves, storms and air pollution episodes, to influences on infectious diseases, nutrition and mental health. Gain thorough and up to date review of these health links and learn present strategies for preparedness and prevention. Medical students will be introduced to a "Health in all Policies" approach that is essential to optimize the potential for medical interventions to address the health risks from climate change, as well as potential health benefits from mitigating the root causes of climate change.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate key concepts in environmental health risk assessment.

Audience: Graduate

2. Recognize the linkages between climate change and human health and well-being, as well as exposure pathways through which impacts occur.

Audience: Graduate

3. Learn and recognize the value in using a "Health in all Policies" approach to prevention.

Audience: Graduate

4. Recognize the main ways that actions to mitigate climate change has offer large benefits to health, especially in reducing chronic diseases

Audience: Graduate

5. Develop effective risk communication strategies related to climate change and health.

Audience: Graduate

6. Demonstrate ability to construct a Message Box to effectively prepare for interviews with the media, and to write an effective Op-Ed.

Audience: Graduate

**POP HLTH 729 – PREPAREDNESS IN PUBLIC HEALTH**

2 credits.

Provides an overview of various types of public health emergencies and disasters including the organizations and disciplines that prepare and respond to natural and unnatural emergencies. Gain an understanding of how public health officials, public health practitioners, state and local health department staff, health care personnel and emergency responders plan for and respond to public health emergencies. The role of the physician will specifically be explored.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Describe involved organizations and disciplines as well as current methods for disaster planning, preparedness and response; public health threats and contingency plans.

Audience: Graduate

2. Examine the impacts of emergencies and disasters to our systems, health and society.

Audience: Graduate

3. Describe the role of the physician as provider and partner in disaster planning, preparedness and response.

Audience: Graduate

4. Incorporate reflection and self-assessment regarding ethical challenges and considerations in public health emergency and response.

Audience: Graduate

**POP HLTH/ENVIR ST 739 – CLIMATE CHANGE, HUMAN AND PLANETARY HEALTH**

2 credits.

Provide tools to identify and address real-world global environmental health issues, stemming from climate change, habitat destruction leading to disease spillover events, food insecurity, and urban design.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize unique environmental public health challenges posed by climate change.

Audience: Graduate

2. Define the planetary boundaries and describe their links to human health.

Audience: Graduate

3. Define and Understand the Planetary Health framework and principles for systems-based approaches to risk management and health promotion.

Audience: Graduate

4. Learn and apply a Health in All Policies strategy to demonstrate the value of more comprehensive, cross-sector disease prevention programs.

Audience: Graduate

5. Critically analyze the linkages between physical and ecological conditions with human health and well-being, as well as exposure pathways through which impacts occur.

Audience: Graduate

6. Develop and exhibit effective risk and/or science communication strategies related to environmental health.

Audience: Graduate

### POP HLTH 750 – CANCER EPIDEMIOLOGY

2 credits.

Covers current knowledge on cancer occurrence and control in human populations. Design and analysis approaches appropriate for cancer epidemiology will also be discussed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify the unequal burden of cancer among populations and variations across time and geography.

Audience: Graduate

2. Describe the distinctive features of the biology of cancer and carcinogenesis that have implications for epidemiologic research.

Audience: Graduate

3. Demonstrate knowledge about the major determinants for several common and emerging cancer sites, both for risk and survivorship.

Audience: Graduate

4. Critique epidemiologic study designs for strengths and weaknesses in answering research questions related to cancer risk and survivorship.

Audience: Graduate

### POP HLTH 752 – PRINCIPLES OF POPULATION HEALTH: DETERMINANTS OF HEALTH AND HEALTH DISPARITIES

2 credits.

An introduction to the field of "Population Health Science" - the multidisciplinary study of why populations are healthy (or not) and how our limited resources can be allocated across the multiple determinants of health to improve population health.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply principles of population health sciences to understand the multiple determinants of health and what it means for such determinants to produce health and health disparities.

Audience: Graduate

2. Apply principles of population health sciences to understand the optimal allocation of resources across health determinants for the improvement of health and reduction of health disparities and to understand how such resource allocation relates to fundamental economic principles.

Audience: Graduate

3. Apply principles of population health sciences to understand the roles of socioeconomic status, behavior, medical care, and community on the production of health at individual and population levels and to appreciate the broad range of social determinants of health.

Audience: Graduate

4. Demonstrate understanding of the different ways in which individual health and population health are conceived and measured, and how particular subpopulations often have special health considerations.

Audience: Graduate

**POP HLTH 753 – PRINCIPLES OF POPULATION HEALTH:  
POPULATION HEALTH AND HEALTHCARE SYSTEMS**

2 credits.

Considers the roles of healthcare systems in improving population health, focusing on the importance of considering healthcare as one among multiple determinants of health.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply principles of population health sciences to understand the major dilemmas and tradeoffs involved in attempts to improve healthcare delivery, utilization, outcomes, and quality.

Audience: Graduate

2. Apply principles of population health sciences to understand the role of health care as one of many determinants of population health

Audience: Graduate

3. Apply principles of population health sciences to understand how efficient delivery of healthcare services is hindered by different forms of market failure and how the attainment of value-based cost-effective health care depends on the reimbursement and insurance incentives designed to encourage it.

Audience: Graduate

4. Demonstrate understanding of policy and program evaluation and its role in research dissemination, and understanding of the use and misuse of data in the development of evidence health policy.

Audience: Graduate

**POP HLTH 784 – PUBLIC HEALTH SURVEILLANCE AND  
ANALYTICS**

3 credits.

Learn applied techniques for community health assessment and surveillance. Population health data (including census, natality, mortality, hospital discharge, behavioral risk factor) are retrieved for analysis and interpretation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Understand the purpose and role of monitoring population health.

Audience: Graduate

2. Name, describe in detail and use some of the existing data systems that are used to monitor population health in Wisconsin, the U.S. and globally.

Audience: Graduate

3. Understand and use methods for gathering and analyzing existing population health data.

Audience: Graduate

4. Complete and present a final project and brief report to monitor a health priority.

Audience: Graduate

**POP HLTH/M&ENVTOX 789 – PRINCIPLES OF ENVIRONMENTAL HEALTH: A SYSTEMS THINKING APPROACH**

3 credits.

Provides an overview of the field of environmental health, using a systems thinking approach. Systems thinking recognizes that environmental health problem solving is complex and that solutions in one area may have positive or negative impacts on other areas. An introduction to the history of environmental health within the field of public health from the local to the federal and global level. Introduces multiple disciplines, methods and approaches to numerous environmental health topics. Includes introduction to methods and tools necessary for assessing human health risks from a variety of environmental hazards and exposures found in air, land, and water with a focus on physical and chemical risks. Additional details regarding specific hazard, exposure and health outcome data and their relationship to environmental health risk assessment, environmental health decision-making and management form a public health practice perspective will be discussed.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**Learning Outcomes:** 1. Summarize the history of environmental health sciences as a crucial aspect of public health and environmental justice.

Audience: Graduate

2. Discuss and predict why a systems thinking approach is appropriate for addressing environmental health problems and environmental justice.

Audience: Graduate

3. Explain differences in types and classes of environmental hazards (e.g., metals), their sources (e.g. air pollution, land use), how people are exposed and health effects.

Audience: Graduate

4. Understand core principles in toxicology (e.g., toxicokinetics, dose-response) pertain to the environmental health sciences.

Audience: Graduate

5. Analyze an environmental health issue using an environmental health sciences and systems thinking framework and make policy recommendations.

Audience: Graduate

**POP HLTH/KINES 791 – PHYSICAL ACTIVITY EPIDEMIOLOGY**

3 credits.

Recommendations for and surveillance of physical activity in the U.S., and associations with health and disease at the population level. Emphasis on measurement techniques, study design and research considerations.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify the strengths and weaknesses of epidemiological study designs and critical issues in the analysis of physical activity-related research.

Audience: Graduate

2. Compare and contrast the specific measurement tools used in physical activity surveillance and research and identify the errors associated with these tools.

Audience: Graduate

3. Identify current public health recommendations for physical activity and describe how they have evolved.

Audience: Graduate

4. Describe the contemporary trends in physical activity in the United States and know how they have been measured.

Audience: Graduate

5. Identify the relationships between physical activity and various health conditions/diseases.

Audience: Graduate

6. Review and analyze the epidemiologic evidence for a link between physical activity and a specified outcome of interest (e.g. physical activity and depression), and present a review of the evidence

Audience: Graduate

**POP HLTH 794 – BIOLOGICAL BASIS OF POPULATION HEALTH**

2 credits.

Covers the physiology, biology and biochemistry of selected disease processes deemed to be important in population health sciences by virtue of their clinical significance including incidence, mortality and morbidity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Present the biological principles needed to understand the basic physiological/anatomical/histological/biochemical processes of a normal human.

Audience: Graduate

2. Present the biological principles needed to understand the basic mechanisms of disease processes involving infection, cancer and toxic substances.

Audience: Graduate

3. Exercise the skills needed to be familiar with the terminology pertinent to the above processes.

Audience: Graduate

4. Exercise the skills needed to be able to find, access and understand literature pertinent to the above processes.

Audience: Graduate

5. Foster an increased level of comfort in the communication of these health care professionals in training and clinicians and basic scientists.

Audience: Graduate

**POP HLTH 795 – PRINCIPLES OF POPULATION HEALTH SCIENCES**

1-3 credits.

Introduction to multiple determinants of health including medical care, socioeconomic status, the physical environment and individual behavior, and their interactions. Also covered will be the definition and measurement of population health, economic concepts in population health, and ethical and managerial issues in population health improvement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate basic understanding and application of principles of Population Health Sciences in characterizing the multiple determinants of health and the optimal allocation of resources across those determinants for the improvement of health and reduction of disparities

Audience: Graduate

2. Demonstrate basic understanding and application, at a basic level, of the principles of microeconomic theory relating to human and institutional decisions in the allocation of scarce resources for the production of health at individual, system and population levels

Audience: Graduate

3. Demonstrate basic understanding of the role of socioeconomic status, behavior, and community on the production of health at individual and population levels

Audience: Graduate

4. Demonstrate basic understanding of the historical and current financing and provision of health care services in the United States and its shaping by the political and policy processes

Audience: Graduate

5. Demonstrate basic understanding and application of the principles of health measurement and its role in the design of health services, policy, intervention and evaluation

Audience: Graduate

6. Demonstrate basic understanding of policy and program evaluation and its role in research dissemination

Audience: Graduate

## POP HLTH 796 – INTRODUCTION TO HEALTH SERVICES RESEARCH

3 credits.

Introduces students to a variety of perspectives, substantive areas and methodological approaches to health services research that provide the foundation for understanding the structure, process and outcomes of the U.S. health care system.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the broad aims and the major content areas of health services research.

Audience: Graduate

2. Identify a study's research questions, hypotheses, theoretical framework, study design, methodological approaches, and conclusions.

Audience: Graduate

3. Identify the strengths and limitations of prominent experimental and quasi-experimental designs as implemented in HSR, the assumptions each relies upon, and specific methods to assess plausibility of each assumption.

Audience: Graduate

4. Assess, and identify feasible methods to improve, the internal and external validity of a specific research study.

Audience: Graduate

5. Gain facility with key methods of professional communication about health services research studies (conference presentation, discussion, and referee report).

Audience: Graduate

## POP HLTH/SOC 797 – INTRODUCTION TO EPIDEMIOLOGY

3 credits.

Design, implementation and interpretation of epidemiologic studies; emphasis on methodologic problems in the measurement of disease frequency, natural history and risk factors.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Calculate and interpret measures of health used to characterize morbidity and mortality in populations.

Audience: Graduate

2. Identify features of epidemiologic study designs, their strengths and limitations, and measures of association used to determine the relation between exposures and outcomes of interest.

Audience: Graduate

3. Describe major sources of bias and confounding in epidemiologic research, and how they can be addressed.

Audience: Graduate

4. Evaluate causal inferences between risk factors and health.

Audience: Graduate

5. Identify and interpret the presence of interaction between multiple risk factors in relation to an outcome.

Audience: Graduate

**POP HLTH 798 – EPIDEMIOLOGIC METHODS**

3 credits.

The main emphasis is the design and interpretation of epidemiologic studies. Includes hands-on experience in the evaluation of epidemiologic evidence, the analysis of epidemiologic data, and the discussion of strategies aimed to improve study validity and efficiency.

**Requisites:** SOC/POP HLTH 797

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Select, calculate and interpret measures of frequency and measures of effect used in different types of epidemiologic studies

Audience: Graduate

2. Demonstrate understanding of the rationale behind the design of epidemiologic studies

Audience: Graduate

3. Identify sources and types of bias in epidemiologic studies

Audience: Graduate

4. Explain common strategies to prevent and correct for bias in epidemiologic studies

Audience: Graduate

5. Evaluate the validity and extrapolability of results from epidemiologic studies

Audience: Graduate

**POP HLTH 801 – EPIDEMIOLOGY OF INFECTIOUS DISEASES**

2 credits.

Introduces basic methods to studying the epidemiology of infectious diseases and reviews infectious diseases of major public health importance. Covers the basics of microbiology, immunology, and laboratory-based methods and the principles of disease surveillance, outbreak investigation, mathematical models of disease transmission, and prevention strategies. The etiology, epidemiology, prevention, and treatment of ancient, modern, and emerging infectious diseases will be examined.

**Requisites:** SOC/POP HLTH 797

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how factors related to the host, organism, and environment interrelate to cause and mitigate the spread of infectious diseases.

Audience: Graduate

2. Apply the tools of infectious disease epidemiology that are used in surveillance, outbreak investigation, and research studies.

Audience: Graduate

3. Characterize the impact of infectious diseases on populations and communities locally and globally.

Audience: Graduate

**POP HLTH 805 – ADVANCED EPIDEMIOLOGY: CAUSAL INFERENCE IN EPIDEMIOLOGICAL STUDIES**

3 credits.

Focuses on the use of viewpoints and design/analytical tools to render possible the estimation of causal effects in epidemiologic studies. Students learn about the rationale and use of study designs/analytic tools that build upon but are substantially different from the most common approaches used in epidemiologic research (experimental studies, case-control studies, and cohort studies).

**Requisites:** SOC/POP HLTH 797 and POP HLTH 798

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a good understanding of the main features of the counterfactual model as a base for causal inferences in epidemiological research.

Audience: Graduate

2. Identify assumptions needed for causal inference and assess whether they are sufficient to allow the estimation of causal effects from available data.

Audience: Graduate

3. Understand and use design and analytic strategies that help in the estimation of causal effects.

Audience: Graduate

4. Demonstrate a good understanding of the main features of the counterfactual model as a base for causal inferences in epidemiological research.

Audience: Graduate

5. Identify assumptions needed for causal inference and assess whether they are sufficient to allow the estimation of causal effects from available data.

Audience: Graduate

6. Understand and use design and analytic strategies that help in the estimation of causal effects.

Audience: Graduate

**POP HLTH 806 – ADVANCED EPIDEMIOLOGY: PRACTICE OF EPIDEMIOLOGY**

3 credits.

Apply and extend methodologic knowledge learned in prior courses in the Population Health Sciences epidemiology methods sequence to selected key activities of a practicing epidemiologic researcher, including: study implementation; scientific writing and presentation; manuscript and grant peer-reviewing; measurement validation, simulation studies and sensitivity analyses; and, commonly-used epidemiology field instruments and methods.

**Requisites:** SOC/POP HLTH 797 and POP HLTH 798

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Participate in a multi-disciplinary team to design and implement epidemiology studies

Audience: Graduate

2. Design and interpret epidemiology validation studies

Audience: Graduate

3. Identify commonly-used epidemiology field instruments and methods for assessing a wide range of specific health factors

Audience: Graduate

4. Write clear and concise research articles

Audience: Graduate

5. Contribute to scientific dissemination as peer reviewers

Audience: Graduate

**POP HLTH 810 – EPIDEMIOLOGY AND GLOBAL ONE HEALTH**

2 credits.

Examines the intersection of human, animal, and environmental health within the context of the Anthropocene. Drawing on the One Health framework, explore how globalization, ecological change, and human activity contribute to health disparities, the emergence of infectious diseases, and shifts in global public health priorities. Explore the epidemiology of infectious diseases, health determinants across diverse populations, and the ecological, social, and economic factors that facilitate disease transmission and emergence. Engage with case studies on zoonotic diseases, historical and modern pandemics, and management responses to infectious disease outbreaks. Integrates perspectives from veterinary science, human medicine, public health, ecology, entomology, and epidemiology, emphasizing the need for cross-disciplinary approaches to address complex, modern global health issues.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Utilize global health data to identify public health disparities, monitor trends in emerging infectious diseases (EIDs), and assess the ecological and environmental conditions that promote disease emergence, particularly under the forces of climate change and demographic shifts.

Audience: Graduate

2. Define and apply key concepts related to EIDs (e.g., hosts, vectors, reservoirs, and transmission cycles), differentiate between EIDs and endemic diseases, and use epidemiological principles to improve population health and reduce disparities

Audience: Graduate

3. Quantitatively and qualitatively assess past infectious disease outbreaks (e.g., Zika, Ebola, West Nile virus, and malaria) to understand successes and failures in management, intervention strategies, and quantitative models of disease transmission, including R<sub>0</sub> and compartmental modeling.

Audience: Graduate

4. Examine the roles of public health, veterinary, and agricultural agencies in managing and preventing EIDs and propose strategies to address the impacts of global environmental changes on disease emergence through interdisciplinary collaboration.

Audience: Graduate

5. Investigate ethical and practical considerations in global health research, with a focus on One Health principles, and explore how interdisciplinary approaches can address emerging public health challenges in the Anthropocene.

Audience: Graduate

**POP HLTH 819 – SOCIAL NETWORK ANALYSIS AND HEALTH**

3 credits.

Provides an overview and synthesis of research utilizing social network analysis in relation to health, drawing on studies by sociologists, economists, computer scientists, physicians and health services researchers. Enables students to understand how social network data are collected and processed; how to calculate appropriate network measures; how to apply statistical modeling of social network effects on health behavior. Surveys social network studies related to substance use, smoking, contraception, AIDS, obesity and many other health conditions. Also looks at the social networks of health organizations in relation to patient outcomes. Prior coursework in data analysis and statistical methods is recommended.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Formulate research questions relevant to social network analysis.

Audience: Graduate

2. Describe the sources, advantages, and disadvantages of alternative types of social network data.

Audience: Graduate

3. Describe a social network and compare attributes across different social networks.

Audience: Graduate

4. Describe theoretical and empirical issues in current research on social network analysis and health.

Audience: Graduate

**POP HLTH 820 – GRADUATE RESEARCH SEMINAR**

1 credit.

Presentations by graduate students, professors, public health professionals and experts designed to cover the depth and breadth of research in the field of population health.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Gain skills in making professional presentations

Audience: Graduate

2. Gain skills in commenting on other scholars' work

Audience: Graduate

3. Describe the importance of Individual Development Plans (IDPs)

Audience: Graduate

### POP HLTH 830 – GRANT WRITING FOR POPULATION HEALTH SCIENCES

2 credits.

Write an R36/F30/F31-style grant proposal related to Population Health Sciences that can be the starting point for an external grant submission or a preliminary exam proposal. Present developing proposal and provide oral feedback to peers. Review and critique written proposals from peers.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Write a draft of the Specific Aims page for an NIH R36 dissertation award or F30/F31 predoctoral fellowship.

Audience: Graduate

2. Write a draft of the Significance sub-section of the Research Strategy for an NIH R36 dissertation award or F30/F31 predoctoral fellowship.

Audience: Graduate

3. Write a draft of the Approach sub-section of the Research Strategy for an NIH R36 award or F30/F31 predoctoral fellowship.

Audience: Graduate

4. Demonstrate the ability to receive critical feedback and iteratively improve written drafts of grant application sections in response to that feedback.

Audience: Graduate

5. Demonstrate the ability to provide written and oral constructive and critical feedback to peers about their research ideas and draft grant application sections.

Audience: Graduate

### POP HLTH 847 – CARDIOVASCULAR EPIDEMIOLOGY

2 credits.

Discussion of the population distribution, health impact, risk factors, treatment, and prevention of cardiovascular diseases.

**Requisites:** SOC/POP HLTH 797

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Describe the major types of cardiovascular disease and their distributions in the population.

Audience: Graduate

2. Describe the general pathophysiology underlying each major type of cardiovascular disease.

Audience: Graduate

3. Identify the primary risk factors for each major type of cardiovascular disease.

Audience: Graduate

4. Describe how each major type of cardiovascular disease is assessed in clinical practice and in epidemiological studies.

Audience: Graduate

5. Describe the major epidemiological studies that have provided the foundation of knowledge in this field.

Audience: Graduate

### POP HLTH/ECON 848 – HEALTH ECONOMICS

1-3 credits.

Health economics issues including demand, supply and pricing, market structure, medical malpractice, technological change, value of life, role of insurance, and other aspects of uncertainty.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the breadth of themes in health economics, organized under three main topic areas (the production of health; the value of health and health care; and the use of evidence to make decisions in health and healthcare contexts), and to develop appropriate analytical and methodological skills

Audience: Graduate

2. Enhance analytical and writing skills by producing several short papers

Audience: Graduate

3. Enhance scholarly oral presentation skills

Audience: Graduate

**POP HLTH/AN SCI/GENETICS 849 – GENOMIC EPIDEMIOLOGY**

2 credits.

An introduction to genomic epidemiology, including a general overview of genetics and Mendelian and complex inheritance, as well as various elements of study design, such as participant ascertainment; phenotype definition; biologic sample selection; genotyping, sequencing, and quality control; measurement of covariates; and choice of analytic methods. Briefly covers original study designs; focuses on current study designs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Evaluate and discuss genetic/genomic epidemiological literature.

Audience: Graduate

2. Design simple genetic/genomic epidemiological studies.

Audience: Graduate

3. Identify and apply appropriate tests of association between genetic variants and both qualitative and quantitative outcomes using either unrelated individuals or families.

Audience: Graduate

4. Summarize and interpret the results of genetic/genomic tests of association.

Audience: Graduate

**POP HLTH/I SY E 875 – COST EFFECTIVENESS ANALYSIS IN HEALTH AND HEALTHCARE**

3 credits.

Basic ideas and tools of cost effectiveness analysis as applied in evaluating medical technologies. Addresses special problems and methods in assessing diagnostic technologies, including ROC analysis, and in measuring health for technology assessment. Uses "classical" and current journal literature.

**Requisites:** SOC/POP HLTH 797 and POP HLTH/B M I 552

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply basic concepts of economic analysis to the assessment of medical technologies and healthcare interventions more broadly

Audience: Graduate

2. Examine health outcomes on a range from objective measures of physical systems to subjective preference-based measures of health utility and describe the benefits and limitations of using quality-adjusted life years (QALYs) as a health outcome measure

Audience: Graduate

3. Explain why we seek to obtain estimates of the "opportunity cost" of using health care resources, describe the process of "costing" in economic assessments of medical technologies and identify useful sources of information for obtaining cost information (and their limitations)

Audience: Graduate

4. Describe how primary data from randomized controlled trials and observational studies can be designed to assess medical technologies and explain the advantages and disadvantages of different designs in terms of their internal and external validity and decision-relevance

Audience: Graduate

5. Describe how evidence from secondary data can be integrated using meta-analysis and decision-analytic modeling methods to assess medical technologies and demonstrate basic ability to design and execute simple decision tree and Markov models for cost-effectiveness analysis

Audience: Graduate

### POP HLTH 876 – MEASURING HEALTH OUTCOMES

3 credits.

Provides a comprehensive understanding of health outcome measures, including generic health status measures, disease-specific measures, and consumer reports of the quality of care.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Understand key measurement issues involved in health, healthcare quality, and health policy

Audience: Graduate

2. Appreciate and describe the application of these measurement issues to practical problems and research

Audience: Graduate

3. Appreciate and describe the importance of concise oral and written scholarly communication through several writing exercises and oral presentations

Audience: Graduate

### POP HLTH/A A E/ENVIR ST/PUB AFFR 881 – BENEFIT-COST ANALYSIS

3 credits.

Presents the welfare economics underpinnings for evaluating the social benefits and costs of government activities. Issues such as uncertainty, the social discount rate, and welfare weights will be discussed; case studies from the environmental, social policy, and agricultural areas will be studied.

**Requisites:** Graduate/professional standing and (PUB AFFR 818 and 880), or POP HLTH/I SY E 875, or A A E 635

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the basic mechanics of performing a Cost Benefit Analysis, including methods for valuing costs and benefits, aggregating over time, and analyzing uncertainties.

Audience: Graduate

2. Evaluate the strengths and weaknesses of different CBAs and propose strategies to address any shortcomings.

Audience: Graduate

3. Debate the advantages and limitations of CBA for public policy and compare it to other approaches.

Audience: Graduate

4. Create a CBA for a real-world client from beginning to end, including scoping, background research, valuation of costs and benefits, uncertainty analysis, and interpretation.

Audience: Graduate

### POP HLTH 890 – SUBSTANCE USE RESEARCH: PREVALENCE, POLICY, TREATMENT

3 credits.

Provides an overview of substance use health services research topics, study designs, data sources, and sufficient knowledge of one substantive topic to support the development of a research proposal.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe trends in substance use in the United States.

Audience: Graduate

2. Demonstrate understanding of the U.S. health care infrastructure to treat and mitigate the harms associated with substance use.

Audience: Graduate

3. Describe clinical, health systems, and policy interventions to prevent, treat, and mitigate the harms associated with substance use, and evidence of their effectiveness.

Audience: Graduate

4. Summarize strengths and limitations of datasets available for substance use health services research

Audience: Graduate

5. Formulate a substance use health services research question and summarize the relevant evidence in a concise literature review.

Audience: Graduate

### POP HLTH 904 – SPECIAL TOPICS IN EPIDEMIOLOGY

1-3 credits.

In-depth focus on current areas of epidemiologic investigation. Each semester one or more modules (e.g., cardiovascular, cancer, infectious diseases, women's health, international, etc.) will be offered.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Apply, analyze, and evaluate advanced theories, concepts, and methods in epidemiology

Audience: Graduate

**POP HLTH 915 – INTERNATIONAL HEALTH SYSTEMS AND POLICY**

2 credits.

Designed as an independent study with four modules: International Health System Performance; Health Systems in the Context of Global Health Needs; Health Systems in High Income Countries; and the Politics of Health System Development and Reform.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Evaluate the contributions of health care to population health outcomes

Audience: Graduate

2. Identify a set of broad criteria to evaluate health system performance

Audience: Graduate

3. Evaluate the current performance of the U.S. health care system in comparison with other national health systems

Audience: Graduate

4. Identify the key challenges in global health governance

Audience: Graduate

5. Analyze the social values and political interests that shape health systems development and reform efforts

Audience: Graduate

6. Explain how action outside the health sector is essential for preventing noncommunicable diseases, reducing health care costs, and improving population health and well-being

Audience: Graduate

**POP HLTH 917 – GENERAL PREVENTIVE MEDICINE AND PUBLIC HEALTH ELECTIVE**

4 credits.

Introduction to the role of physicians working in various fields of general preventive medicine and public health. Engage with preventive medicine faculty and residents to learn foundational knowledge and skills central to the discipline. Opportunity to select a health issue in Wisconsin and work on a short term project to describe, analyze or address the issue.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the steps that are necessary to complete a public health investigation

Audience: Graduate

2. Describe the importance of engaging appropriate stakeholders in completing a public health investigation

Audience: Graduate

3. Effectively communicate findings to public health and healthcare audiences

Audience: Graduate

4. Discuss the role of applied and academic public health in maintaining the health of a community

Audience: Graduate

**POP HLTH 918 – ENVIRONMENTAL HEALTH AND ADVOCACY**

2 credits.

Unique opportunity to gain insight into the role of environmental toxins while honing skills to advocate for patients and vulnerable populations. Learn to take environmental histories and understand how environmental medicine is applied in the clinical setting and community. Use the socio-ecological model to frame advocacy. Gain practical experience through online didactic lectures, reading materials, class discussion, reflections and a class presentation

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Describe how various categories of environmental toxicants (including carcinogens, mutagens, teratogens, neurotoxins, and endocrine disrupters) affect human health

Audience: Graduate

2. Demonstrate skill in taking a robust patient history by understanding the potential toxicants in a patient's environment

Audience: Graduate

3. Practice risk communication strategies, simulating patient and population encounters

Audience: Graduate

4. Describe why certain populations, including children, pregnant women, the elderly and marginalized populations are more vulnerable to environmental exposure

Audience: Graduate

5. Discuss the role and approaches to engaging key stakeholders in environmental justice issues, including consumer/advocacy groups, community organizations, governmental organizations, corporations, and various industries/professions

Audience: Graduate

6. Identify credible evidence and appraise scientific literature to address both patient and population-level environmental health issues

Audience: Graduate

7. Identify the positive and negative impact of various public policies on environmental justice

Audience: Graduate

8. Discuss opportunities for physician advocacy across the social ecological framework to address environmental issues incorporating a systems-thinking lens

Audience: Graduate

**POP HLTH/KINES 955 – SEMINAR - PHYSICAL ACTIVITY EPIDEMIOLOGY**

1 credit.

Current research developments in physical activity epidemiology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Name and explain the basic concepts of physical activity epidemiology, including study designs, public health guidelines, surveillance, and physical activity measures

Audience: Graduate

2. Critically evaluate current research on physical activity and health topics

Audience: Graduate

3. Prepare a presentation and lead a group in an in-depth discussion of the methods, interpretation, and implications of recent scientific articles

Audience: Graduate

**POP HLTH 990 – RESEARCH**

1-8 credits.

Research supervised by individual faculty members.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit a broad understanding of general population health sciences (including population health and epidemiology principles.

Audience: Graduate

2. Conduct independent research using a variety of approaches.

Audience: Graduate

3. Think critically to address research challenges.

Audience: Graduate

4. Exhibit and foster professional and ethical conduct in their research.

Audience: Graduate

5. Collaborate with other investigators within or outside the thesis/dissertation lab.

Audience: Graduate

# PORTUGUESE (SPANISH AND PORTUGUESE) (PORTUG)

## PORTUG 101 – FIRST SEMESTER PORTUGUESE

4 credits.

First-semester elementary-level Portuguese language practice: grammar, conversation, and reading. Requires no previous knowledge of Portuguese.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PORTUG 102 – SECOND SEMESTER PORTUGUESE

4 credits.

Second-semester elementary-level Portuguese language practice: grammar, conversation, and reading.

**Requisites:** PORTUG 101

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PORTUG 201 – THIRD SEMESTER PORTUGUESE

4 credits.

First-semester intermediate-level Portuguese language review: readings, culture, and patterns of conversation.

**Requisites:** PORTUG 102 or 301

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PORTUG 202 – FOURTH SEMESTER PORTUGUESE

4 credits.

Second-semester intermediate-level Portuguese language review: readings, culture, and patterns of conversation.

**Requisites:** PORTUG 201

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

## PORTUG 221 – INTRODUCTION TO LUSO-BRAZILIAN LITERATURES

4 credits.

Reading, discussion, and literary history of the sixteenth, nineteenth, and twentieth centuries.

**Requisites:** PORTUG 202

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PORTUG 225 – THIRD YEAR CONVERSATION AND COMPOSITION

3 credits.

First-semester Intermediate High intensive practice in reading, writing, and grammar.

**Requisites:** PORTUG 202

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

## PORTUG 226 – THIRD YEAR CONVERSATION AND COMPOSITION

3 credits.

Second-semester Intermediate High intensive practice in reading, writing, and grammar.

**Requisites:** PORTUG 202 or 225

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## PORTUG 299 – DIRECTED STUDY

1-3 credits.

Directed study projects for freshmen and sophomores as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2004

## PORTUG 301 – INTENSIVE PORTUGUESE

4 credits.

Grammar, conversation, and reading. Equivalent of PORTUG 101 and 102.

**Requisites:** SPANISH 226, FRENCH 228, or ITALIAN 311. Not open to students with credit for PORTUG 101 and 102

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **PORTUG 302 – INTENSIVE PORTUGUESE**

4 credits.

Equivalent of the third and fourth college semesters of Portuguese. Readings, culture, and patterns of conversation.

**Requisites:** PORTUG 102 or 301. Not open to students with credit for PORTUG 201 and 202

**Course Designation:** Frgn Lang - 4th semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **PORTUG 311 – FOURTH YEAR COMPOSITION AND CONVERSATION**

3 credits.

Fourth-year first-semester advanced oral practice and writing.

**Requisites:** PORTUG 202, 225, 226, or 301

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **PORTUG 312 – FOURTH YEAR COMPOSITION AND CONVERSATION**

3 credits.

Fourth-year second-semester advanced oral practice and writing.

**Requisites:** PORTUG 202, 225, 226, or 301

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **PORTUG 330 – HISTORY OF THE PORTUGUESE LANGUAGE**

3 credits.

Introduction to the linguistic sources and the historical and political factors that contributed to the formation of Portuguese and the current status of Portuguese in the world today.

**Requisites:** PORTUG 225 or 226

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### **PORTUG 361 – PORTUGUESE CIVILIZATION**

3 credits.

Cultural evolution from the medieval period through the twentieth century. Conducted in English.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### **PORTUG 362 – BRAZILIAN CIVILIZATION**

3 credits.

Cultural evolution of Brazil from 1500 through the present. Conducted in English.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### **PORTUG 411 – SURVEY OF PORTUGUESE LITERATURE BEFORE 1825**

3 credits.

Advanced survey of Portuguese literature from 1140 to 1825.

**Requisites:** PORTUG 221 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2017

### **PORTUG/FRENCH/ITALIAN/SPANISH 429 – INTRODUCTION TO THE ROMANCE LANGUAGES**

3 credits.

Introduction to structural similarities and differences apparent in major Romance languages (French, Italian, Portuguese, Spanish) and to their historical developments, with reference to basic linguistic features of each language: phonology, morphology, syntax, and lexicon.

**Requisites:** SPANISH 226, FRENCH 228, ITALIAN 311, or PORTUG 226

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **PORTUG/GEN&WS 450 – BRAZILLIAN WOMEN WRITERS**

3 credits.

A survey of representative writing by contemporary Brazilian women writers in relation to representations of nationality, race, class, ethnicity, gender and sexualities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**PORTUG/AFRICAN 451 – LUSOPHONE AFRICAN LITERATURE**

3 credits.

Chronological and thematic survey of major trends, authors, and works of Lusophone Africa since 1936.

**Requisites:** PORTUG 221 and 312

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**PORTUG/GEN&WS 460 – CARMEN MIRANDA**

3 credits.

Examines the work, representation and interpretation of Carmen Miranda from her early days as a radio star in Brazil to a film actress and entertainer in Hollywood in the 1940s and 50s.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**PORTUG 467 – SURVEY OF PORTUGUESE LITERATURE SINCE 1825**

3 credits.

Advanced survey of Portuguese literature since 1825.

**Requisites:** PORTUG 221 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**PORTUG 468 – SURVEY OF BRAZILIAN LITERATURE SINCE 1890**

3 credits.

Advanced survey of Brazilian literature since 1890.

**Requisites:** PORTUG 221 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**PORTUG 573 – TOPICS IN PORTUGUESE: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison resident study abroad program that has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program required.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2001

**PORTUG 640 – TOPICS IN LUSO-BRAZILIAN LITERATURE**

3 credits.

Examination of a variety of literary genres or periods in relation to Portuguese-speaking countries.

**Requisites:** PORTUG 221 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop written and analytical skills in Portuguese and integrate these skills to exchange and assess ideas effectively and with advanced accuracy in written and spoken Portuguese.

Audience: Both Grad & Undergrad

2. Demonstrate familiarity with and apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation.

Audience: Undergraduate

3. Demonstrate familiarity with and apply basic methods of literary analysis, including interpretation of written texts and other forms of artistic/cultural creation in and of themselves and in the context of contemporary Portuguese Memory Studies.

Audience: Graduate

**PORTUG 642 – TOPICS IN LUSO-BRAZILIAN CULTURE**

3 credits.

Examines a variety of cultural topics in relation to Portuguese-speaking countries.

**Requisites:** PORTUG 225, 226, 311, 312 or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### PORTUG 681 – SENIOR HONORS THESIS

3 credits.

First-semester independent study with the goal of completing the preliminary research to write a senior honors thesis in Portuguese.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

### PORTUG 682 – SENIOR HONORS THESIS

3 credits.

Second-semester independent study with the goal of completing the preliminary research to write a senior honors thesis in Portuguese.

Continuation of PORTUG 681.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

### PORTUG 699 – DIRECTED STUDY

1-6 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### PORTUG 751 – SEMINAR: BRAZILIAN LITERATURE

3 credits.

Seminar focusing on literature, literary criticism, culture, or theory relevant to Brazilian Literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

### PORTUG 772 – SEMINAR: PORTUGUESE LITERATURE

3 credits.

Seminar focusing on literature, literary criticism, culture, or theory relevant to Portuguese Literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

### PORTUG 899 – INDEPENDENT READING

1-3 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### PORTUG/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/ POLI SCI/SOC/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### PORTUG 990 – THESIS

1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## PSYCHIATRY (PSYCHIAT)

### PSYCHIAT 699 – INDEPENDENT STUDY

0-5 credits.

Self-directed work under the supervision and guidance of a faculty member or instructional staff, and often in conjunction with a day-to-day mentor that is a graduate student or postdoc researcher in the faculty member's or instructor's group. Students normally participate in aspects of ongoing research projects.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Participate in the development, implementation, analysis, or dissemination of a research study in basic or clinical neuroscience.

Audience: Undergraduate

**PSYCHIAT 712 – FOUNDATIONS IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH: DEV, SCREENING, ASSESSMENT AND DIAG**

3 credits.

Provides a comprehensive understanding of the underpinnings of Infant, Early Childhood and Family Mental Health. Learn about pregnancy, transition to parenthood and typical/atypical development and attachment relationships. Become familiar with reliable and valid screening and assessment tools of social, emotional, cognitive, communication, motor and regulatory capacities in infants and young children in the context of their caregiving relationships; developmentally appropriate diagnostic nosologies; methods of conceptualizing risk and protective factors; and planning for therapeutic interventions that build on strengths and address vulnerabilities. Unique features include assessment of early parent-child relationships and the use of video replay to engage parents in assessing their relationship with their child and the benefit of faculty from multiple departments at UW and luminary national guest instructors.

**Requisites:** Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify concepts of Parent-Infant/Early Childhood Mental Health informed by developmental neuroscience, developmental psychology, attachment theory, trauma research, systems theory and the Diversity-Informed Tenets for Work with Infants, Children and Families to support the social and emotional functioning of young children and families as demonstrated by the Pre/Post Content Assessment

Audience: Graduate

2. Develop skills in observation of social-emotional and communication development in infants and young children (birth to 6 years) and the affective and behavioral quality of parent-child relationships as demonstrated by the Parent-Child Early Relationship and Developmental Assessment Assignment

Audience: Graduate

3. Apply specialized knowledge and skills related to family engagement; assessment of the parent-child relationship, sensory profile, child development, social-emotional functioning and mental health; diagnostic and case conceptualization; and service planning aligned with nationally recognized competencies demonstrated by the Parent-Child Early Relationship and Developmental Assessment Assignment

Audience: Graduate

4. Identify and apply strategies to support the development of parental reflective functioning as demonstrated by the Parent-Child Early Relationship and Developmental Assessment Assignment

Audience: Graduate

5. Deepen awareness of the needs of underserved populations of young children and families when there are concerns about parenting capacities or increased psychosocial stressors due to trauma, poverty, historical and systemic racism, oppression, health care disparities and mental health as demonstrated by Pre/Post Content Assessment

Audience: Graduate

**PSYCHIAT 713 – SEMINAR IN REFLECTIVE PRACTICES AND MINDFULNESS IN INFANT, EARLY CHILDHOOD & FAMILY MENTAL HEALTH I**

2 credits.

Provides a foundation in reflective practices through discussion of cases, infant and family observations and mindfulness experiences as applied to students' work with infants, young children and families. Explore and experience ways in which reflective practices may be applied to parent-infant/early childhood mental health. Learn mindfulness strategies for developing self-awareness and regulation that may be brought to their work with families of infants and young children. In small Reflective Mentoring Groups, students will experience both descriptive and in-vivo examples of reflective practice through case based presentations, deeper introspection and supportive discussion to increase clarity and engagement in work with families of young children. Consider boundaries and ethical decision making related to the dilemmas faced by professionals working with families during the perinatal period and in early childhood, especially those in high risk and challenging circumstances.

**Requisites:** Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply skills in informal and formal Mindfulness and Self-Compassion Practices as demonstrated by active participation in the Mindfulness Class and recording of regular practice with Mindfulness Practice Logs

Audience: Graduate

2. Contribute to reflective space through deep listening, mindful pauses, self-awareness, journaling and reflective questions as demonstrated in the larger class and small Reflective Mentoring Group participation

Audience: Graduate

3. Become more mindful, observant, and reflective and identify and appreciate the parallel process in their work with infants, young children and families as demonstrated by case presentations and discussion in the small Reflective Mentoring Groups, Infant Observation journaling and discussion as well as the Five-Facet Mindfulness Questionnaire pre/post assessment

Audience: Graduate

4. Increase awareness of one's own cultural lens, social location and implicit bias and how this relates to their work as demonstrated by reading discussions, case discussions, Infant Observation journaling and discussion

Audience: Graduate

5. Increase compassion for self and others in their work as demonstrated by The Compassion Scale pre/post assessment

Audience: Graduate

**PSYCHIAT 714 – CONSULTATION IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH: ADVANCED CLINICAL PRACTICE I**  
1 credit.

This small group and individualized course offers students an opportunity to reflect upon their work with mothers and partners in the prenatal and postpartum period, infants, young children and their families. Course faculty and a senior, clinical consultant will guide students in exploring their individual responses to the literature, course content and issues raised in their work including personal experience and reactions as well reflecting on the parallel process. The intent is to support the student's professional development in ways that broaden and deepen the effectiveness of their work.

**Requisites:** Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify parallel process and ways in which this may guide their work, as demonstrated during individual consultation sessions

Audience: Graduate

2. Consider and hold multiple perspectives (e.g. parent(s), child, other family members or providers) as demonstrated during individual consultation sessions

Audience: Graduate

3. Identify what is arising in oneself in the work and increase capacity for reflection and self-regulation as demonstrated during discussions in individual consultation sessions

Audience: Graduate

4. Enhance knowledge and skills for conducting clinical assessments with children birth to six years in the context of their primary caregiving relationships, using the Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood, developing case conceptualization and treatment planning as demonstrated through case discussions during individual consultations

Audience: Graduate

5. Use evidence-based therapeutic interventions with infants and young children evidencing emotional and/or behavioral disturbances and their parents as demonstrated through case discussions during individual consultation sessions

Audience: Graduate

6. Identify strategies for self-care in their work as shared during individual consultation sessions

Audience: Graduate

**PSYCHIAT 715 – THERAPEUTIC INTERVENTIONS, PRACTICES AND POLICY IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH**  
3 credits.

Offers students the opportunity to apply knowledge of Infant, Early Childhood and Family Mental Health concepts, assessment and diagnosis to planning and implementation of relationship-based and individual treatment approaches as well as to program development and policy. Students will be introduced to best practices and evidence based multi-disciplinary treatment approaches to address a range of presenting issues, settings, and cultural contexts for vulnerable children who are evidencing social, emotional, behavioral or attentional disturbances and parents with psychiatric disorders. Implications for informing policy across systems of care will be addressed. During the course of the semester, students will benefit from invited state and national speakers and guest faculty and instructors from the UW speaking on their areas of expertise.

**Requisites:** Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct supportive and therapeutic interventions with young children and their parent to reduce the impact of early-life trauma, loss, relational concerns, developmental delays, historical and systemic racism, poverty, medical conditions, mental health concerns and/or other adversities dependent on their scope of practice as demonstrated by the description provided in the Intervention Assignment

Audience: Graduate

2. Provide evidence based or promising supportive or therapeutic interventions that are culturally sensitive, trauma-informed, relationship-based, reflective, mindful and aligned with national standards as demonstrated by the Newborn Behavioral Observation System (NBO) Recording Forms, NBO Parent Questionnaires and Integrative Final Project Abstract and PowerPoint Presentation

Audience: Graduate

3. Develop confidence and competence in screening and intervention for Perinatal Mood and Anxiety Disorders and consideration of other parental mental health disorders and substance abuse disorders as demonstrated by practice and reflection in the course screening and discussion roleplay activity using the Edinburgh Postnatal Depression Scale (EPDS)

Audience: Graduate

4. Develop observational skills and ability to come alongside families during the postnatal period to engage them in looking together at their newborn's amazing capacities, behavior as communication and unique personhood to promote parental attunement and strengthen parent-infant relationships as demonstrated by the Newborn Behavioral Observations System Recording Forms and Parent Questionnaires

Audience: Graduate

5. Increase awareness of ethical considerations in working with persons during the perinatal period and in work with very young children and their families as demonstrated by case-based ethical decision-making activities and class participation

Audience: Graduate

**PSYCHIAT 716 – SEMINAR IN REFLECTIVE PRACTICES AND MINDFULNESS IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH II**

2 credits.

Continued advancement in reflective practices through case discussion, infant and family observations, mindfulness and self-compassion experiences as applied to their work with infants, young children and families. Additional strategies and in-depth opportunities for introspection and self-awareness. Discussion of relationship-based therapeutic consultation and interventions and attention to the parallel process between the nature of their relationship with a parent and the parent's relationship with their child. Focus will be on underserved populations and contribution of maternal depression, substance abuse disorders and trauma on the parent-child relationship and the child's development. Complex ethical decision making and policy issues will be addressed. Inclusion of a self-assessment process that will support students in appraising their competencies and readiness to apply for the WI Alliance for Infant Mental Health Endorsement.

**Requisites:** Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply more advanced skills in informal and formal Mindfulness and Self-Compassion Practices as demonstrated by active participation in the Mindfulness Class and recording of regular practice with Mindfulness Practice Logs  
Audience: Graduate

2. Facilitate reflective space through deeper listening, self-awareness, mindful pauses, journaling and reflective questions as demonstrated in the larger class and small Reflective Mentoring Group participation  
Audience: Graduate

3. Become increasingly mindful, observant, and reflective and identify and appreciate the parallel process in their work with infants, young children and families as demonstrated by case presentations and discussion in the small Reflective Mentoring Groups, Infant Observation journaling and discussion as well as the Five-Facet Mindfulness Scale pre/post assessment  
Audience: Graduate

4. Continue to develop cultural humility and sensitivity and reflect on one's own cultural lens, social location and implicit bias in their work as demonstrated by Case Presentations and discussion and Infant Observation journaling and discussion  
Audience: Graduate

5. Continue to increase compassion for self and others in their work as demonstrated by The Compassion Scale pre/post assessment  
Audience: Graduate

**PSYCHIAT 717 – CONSULTATION IN INFANT, EARLY CHILDHOOD AND FAMILY MENTAL HEALTH: ADVANCED CLINICAL PRACTICE II**

1 credit.

This small group and individualized course offers students an opportunity to reflect upon their work with mothers and partners in the prenatal and postpartum period, infants, young children and their families. Course faculty and a senior, clinical consultant will guide students in exploring their individual responses to the literature, course content and issues raised in their work including personal experience and reactions as well reflecting on the parallel process. The intent is to support the student's professional development in ways that broaden and deepen the effectiveness of their work.

**Requisites:** Declared in Infant, Early Childhood, and Family Mental Health Capstone Certificate

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use diagnostic nosologies for infants and young children and their parents, as demonstrated during case discussions in individual consultation sessions  
Audience: Graduate

2. Expand use of evidence-based and promising therapeutic interventions with infants and young children evidencing emotional and/or behavioral disturbances and their parents as demonstrated through case discussions during individual consultation session  
Audience: Graduate

3. Apply skills for evaluation and treatment of Perinatal Mood and Anxiety Disorders, other parental mental health disorders and substance use disorders as demonstrated during individual consultation sessions  
Audience: Graduate

4. Describe and have the skills to provide Infant/Early Childhood Mental Health Consultation, as demonstrated through discussion during individual consultation sessions  
Audience: Graduate

5. Increase self-awareness, reflective capacity and self-care strategies, as shared during individual consultation meetings  
Audience: Graduate

**PSYCHIAT 901 – SPORTS PSYCHIATRY: IMPROVING THE MENTAL HEALTH OF ATHLETES AT THE INDIVIDUAL AND SYSTEMS LEVELS**

2 credits.

Improve skills in providing psychiatric health care to athlete populations. Sports psychiatry as a sub-specialty within psychiatry focuses on diagnosis and treatment of psychiatric illness in athletes. While utilization of psychological approaches to enhance performance can be part of the work of the sports psychiatrist, the emphasis is more on addressing actual mental illness in this population. Sports psychiatry may also involve the use of exercise as a therapeutic or preventative intervention for mental illness. Sports psychiatry typically focuses on mental health care for individual athletes, but systems-wide initiatives (e.g., at the level of the team or university) are also often important.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate understanding of the epidemiology of, risk factors for, and unique manifestations of a variety of psychiatric disorders and psychosocial stressors in athletes.

Audience: Graduate

2. Compare mechanisms of how treatments for psychiatric disorders in athletes may be similar to and different from treatments for psychiatric disorders in the general population.

Audience: Graduate

3. Distinguish between individual level treatments as well as system wide interventions to address mental illness in athletes.

Audience: Graduate

4. Demonstrate skill accessing the medical literature on a variety of topics related to sports psychiatry.

Audience: Graduate

**PSYCHIAT 902 – THE BASIC SCIENCE OF SLEEP AND CONSCIOUSNESS**

2 credits.

Sleep occupies a third of our life, and is found in all animal species. Loss of sleep has both acute and long-term negative consequences on the brain and the body. Still, why we sleep remains unclear, and hypotheses on the role of sleep for synaptic homeostasis, learning and memory, cardiovascular and metabolic health, are being tested in humans and animal models. Learn how the sleeping brain can either support vivid conscious experiences (dreaming) or not (deep slow wave sleep); brain structures involved in wake and sleep; how sleep pressure increases during waking; effects of sleep deprivation; causes of narcolepsy and other sleep disorders. How to study sleep in genetic models like flies; electron microscopy to assess effects of sleep loss on synapses; enhancement of sleep slow waves in humans; development and testing of theoretical models; methods to assess levels of consciousness in humans. During time at the WI Sleep Clinic, learn how sleep disorders are diagnosed and treated.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**Learning Outcomes:** 1. Explain definitions used for sleep and wake

Audience: Graduate

2. Detail the brain structures and systems involved in the control of sleep and wake

Audience: Graduate

3. Explain recent evidence linking sleep, memory, and synaptic plasticity

Audience: Graduate

4. Identify animal models used to study sleep

Audience: Graduate

5. Explain molecular and genetic approaches to the study of sleep

Audience: Graduate

6. Explain how sleep affects cardiovascular, metabolic, and cognitive functions

Audience: Graduate

7. Explain the importance of sleep for the individual and society, including negative consequences of sleep deprivation and some sleep disorders

Audience: Graduate

8. Detail the brain structures crucial to support consciousness

Audience: Graduate

9. Describe how dreaming research can advance consciousness research

Audience: Graduate

10. Explain theoretical approaches to study consciousness and how they can lead to new ways of assessing consciousness in healthy and patient populations

Audience: Graduate

11. Present recent studies on sleep and consciousness research (selected for daily assigned readings) at journal clubs

Audience: Graduate

12. Describe how to design a sleep/dreaming/consciousness experiment and recognize possible confounding factors

Audience: Graduate

**PSYCHIAT 910 – PSYCHIATRY INDEPENDENT READING AND RESEARCH ELECTIVE**

1-12 credits.

Independent exposure to research methodology as it pertains to psychiatry and/or affective neuroscience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Individualized outcomes to be developed by student and faculty supervisor. See Appendix B below.

Audience: Graduate

**PSYCHIAT 919 – PSYCHIATRY INDIVIDUALIZED CLINICAL ELECTIVE**

1-12 credits.

Develop a customized experience with relevant faculty not offered by our already established electives.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Review, interpret and present current literature to support patient care

Audience: Graduate

2. Develop clinically relevant questions to advance learning

Audience: Graduate

3. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

**PSYCHIAT 921 – BEHAVIORAL HEALTH CLINICAL ELECTIVE**

1-12 credits.

Behavioral medicine clinical patient care, under faculty supervision. All members of the department interact with the student who is typically assigned primarily to one member, depending upon the student's interests. Spend time with the Psychiatric Unit nursing staff to learn how the Unit itself is used as a treatment modality.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of behavioral medicine as it is practiced in a multi-specialty group setting

Audience: Graduate

2. Demonstrate knowledge and performance of clinical interviews and mental status exams, in formulating diagnoses and planning treatment and disposition

Audience: Graduate

3. Demonstrate knowledge of psychiatric practice with children, adolescents, and adults, covering a wide range of diagnoses and treatment methods

Audience: Graduate

**PSYCHIAT 922 – PSYCHIATRY CONSULTATION AND LIAISON  
ADVANCED CLINICAL EXPERIENCE**

4 credits.

Psychiatric assessment of patients admitted to University Hospital medical and surgical floors (including burn unit, trauma service and transplant services). Emergency psychiatric assessment through consultation to the University Hospital emergency department.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Assess suicide risk and levels of psychiatric care.  
Audience: Graduate

2. Assess and manage mood, psychotic, and neurobehavioral disorders in the hospitalized setting.  
Audience: Graduate

3. Independently perform a hypothesis-driven history and mental status examination.  
Audience: Graduate

4. Develop and present a weighted differential diagnosis.  
Audience: Graduate

5. Present a diagnostic and/or treatment plan  
Audience: Graduate

6. Plan and implement biopsychosocial treatment plans for patients with psychiatric illness.  
Audience: Graduate

7. Complete written documentation.  
Audience: Graduate

8. Assist with safety planning for patients presenting with suicide risk factors.  
Audience: Graduate

9. Communicate independently with patients, families, physicians, and non-physician team members.  
Audience: Graduate

10. Provide psycho-education to patients and their families.  
Audience: Graduate

11. Assist in coordinating care with other providers.  
Audience: Graduate

**PSYCHIAT 925 – COMMUNITY PSYCHIATRY ELECTIVE**

2-4 credits.

Immersive experience in community mental health while embedded within a community support team, either at Gateway or Community Treatment Alternatives (CTA). Gateway is an assertive community treatment team serving Dane County residents who have severe mental illness and substance abuse issues. CTA is an assertive community treatment team that works exclusively with adults involved in the criminal justice system. Patients must be either diverted from the Dane County Jail or be conditionally released after being found "not guilty by reason of mental disease or defect" (NGI).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 6 number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Define "recovery" in the context of schizophrenia.  
Audience: Graduate

2. Describe the assertive community treatment (ACT) model of caring for people with severe, persistent mental illness.  
Audience: Graduate

3. List three ways that community support teams can assist people with schizophrenia.  
Audience: Graduate

4. Explain how a community support team functions, including how roles are shared and how influence is felt within teams.  
Audience: Graduate

5. Demonstrate cultural sensitivity and humility in care of people with severe, persistent mental illness in the community.  
Audience: Graduate

**PSYCHIAT 930 – PSYCHIATRY GERIATRIC CLINICAL ELECTIVE**

1-12 credits.

Care of older adults with mental illness, including late-life depression and anxiety, suicidality, dementia, and substance use disorders. Under the supervision of clinicians with extensive experience in the care of older adults, help care for patients in inpatient, outpatient and long-term care settings. Have the opportunity to experience public health approaches to improving the mental health of older adults, for example, by attending caregiver support groups.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of impact of mental illness on the quality of life and functioning of older adults and their caregivers.

Audience: Graduate

2. Describe the pathophysiology, clinical presentation and course, and treatment of late-life depression and anxiety.

Audience: Graduate

3. Describe suicide risk assessment in older adults.

Audience: Graduate

4. List the behavioral and psychological symptoms of dementia.

Audience: Graduate

5. Explain the geriatric psychopharmacology principle of "start low, go slow."

Audience: Graduate

**PSYCHIAT 931 – DEMENTIA AND PUBLIC HEALTH**

2-4 credits.

Clinical care of persons living with dementia and their caregivers.

Public health approaches to assisting persons living with dementia in the community via Wisconsin Alzheimer's Institute. Assessment and management of dementia, including behavioral and psychological symptoms.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define mild cognitive impairment and dementia  
Audience: Graduate

2. Contrast cognitive changes found in normal aging with dementia

Audience: Graduate

3. Describe the pathophysiology, risk factors, and presentation of the most common causes of dementia

Audience: Graduate

4. List the expected clinical findings at each stage of dementia

Audience: Graduate

5. List potentially reversible causes of dementia

Audience: Graduate

6. Contrast dementia with delirium

Audience: Graduate

7. Describe how a psychiatric interview should be modified when assessing a patient for dementia

Audience: Graduate

8. List what questions are important to ask when interviewing a patient for dementia

Audience: Graduate

9. Summarize when to use cognitive screening tools

Audience: Graduate

10. List available bedside cognitive screening tools

Audience: Graduate

11. Describe when a full neuropsychological eval may be indicated

Audience: Graduate

12. Develop a treatment plan for persons living with dementia

Audience: Graduate

13. List medications that have been FDA-approved for treatment of dementia, including risks and benefits

Audience: Graduate

14. List evidence-based psychosocial and educational interventions for persons living with dementia and their caregivers

Audience: Graduate

15. Explain how persons living with dementia and their family members can plan for the future

Audience: Graduate

16. List the behavioral and psychological symptoms of dementia (BPSD), and their associations with various causes of dementia

**PSYCHIAT 932 – PSYCHIATRY ADDICTION CLINICAL ELECTIVE**

1-12 credits.

Etiology, assessment, and treatment of substance use disorders and psychiatric co-morbidity.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate awareness of epidemiology of substance use disorders and biopsychosocial risk factors and deterrents.

Audience: Graduate

2. Demonstrate awareness of the prevalence and treatment of psychiatric comorbidities.

Audience: Graduate

3. Demonstrate awareness of pharmacologic and psychosocial treatment modalities important to detoxification, maintenance, and relapse prevention in substance use disorders.

Audience: Graduate

4. Demonstrate awareness of family dynamic factors, self-help recovery, community treatment resources, and primary care integration of substance abuse treatment.

Audience: Graduate

5. Demonstrate proficiency in interviewing patients with substance abuse and psychiatric disorders and formulating a treatment plan within the context of a multidisciplinary treatment plan.

Audience: Graduate

**PSYCHIAT 933 – PUBLIC HEALTH ADVOCACY AND SERVICE IN PSYCHIATRY**

2 credits.

Broad set of experiences in public health service and public health advocacy, and exposure to a number of community resources and organizations. Spend time within a mental health integrated care setting under faculty supervision. These models of care have been shown to be cost-effective ways of delivering mental health care to large numbers of patients, thereby addressing a public health need given the serious shortage of Psychiatrists. Work with the Wisconsin Medical Society to receive media training and write and record a public service announcement on a Psychiatric public health issue. Receive Advocacy training. Attend meetings of local professional advocacy organizations (e.g., the Wisconsin Medical Society, Dane County Medical Society) with the Course Director, dependent on time of enrollment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discuss the role of socioeconomic, environmental, and cultural determinants of health on the mental health status and mental health care of individuals and populations.

Audience: Graduate

2. Design and record a public service announcement on a Psychiatric public health issue.

Audience: Graduate

3. Appraise the quality of the evidence of peer reviewed medical and public health literature in developing a brief blog on a specific topic related to preventive or public health care in psychiatry

Audience: Graduate

4. List and describe a variety of community resources available to improve the mental health of individuals and populations, especially those who are underserved

Audience: Graduate

5. Engage effectively with Legislators and/or members of professional medical advocacy organizations in discussing Psychiatric public health issues.

Audience: Graduate

**PSYCHIAT 934 – PSYCHIATRY INPATIENT ADVANCED CLINICAL EXPERIENCE**

2-4 credits.

Introduction to common psychiatric diagnoses (mood disorders, psychotic disorders and personality disorders) in the hospital setting. Active participation in patient care under the supervision of 2 Inpatient Attending Faculty and 3 Psychiatry Residents. During daily multidisciplinary rounds, present detailed clinical information about new patients. Provide daily updates on assigned patients. Participate in all aspects of patients' care, and conduct in-depth patient interviews. Attend family meetings and play an integral role in obtaining collateral information from family or outside sources. Write daily progress notes. Present a brief topic review at the end of the rotation.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate awareness of the impact of mental illness on the quality of life and functioning in the adult population

Audience: Graduate

2. Demonstrate knowledge of clinical presentation and the treatment of common psychiatric illnesses in the hospital setting

Audience: Graduate

3. Demonstrate familiarity with and ability to evaluate suicide risk in adults

Audience: Graduate

4. Conduct comprehensive psychiatric interviews and mental status examinations.

Audience: Graduate

5. Plan and implement biopsychosocial treatment plans for patients with psychiatric illness.

Audience: Graduate

**PSYCHIAT 946 – CHILD AND ADOLESCENT PSYCHIATRY CLINICAL ELECTIVE**

1-12 credits.

Introduction to core knowledge and skills in child and adolescent psychiatry including assessment, diagnoses, and treatment of children and adolescents through exposure to inpatient, outpatient, and consultation/liaison settings. Exposure to the intricacies of working with families and systems providing care to child and adolescent patients. Designed for students considering careers in psychiatry, pediatrics, and family practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate clinical knowledge and skills in providing psychiatric care to child and adolescent patients, including: psychotherapeutic and medication management treatment strategies, diagnostic interviewing techniques, working in multidisciplinary teams, and documentation

Audience: Graduate

2. Demonstrate ability to recognize and diagnose common psychiatric conditions in child and adolescent patients

Audience: Graduate

3. Demonstrate the ability to develop a biopsychosocial formulation.

Audience: Graduate

4. Participate in and display an understanding of the differences between a range of child and adolescent psychiatry practice settings, including inpatient, outpatient, and consultation/liaison.

Audience: Graduate

**PSYCHIAT 947 – PSYCHIATRY ASSESSMENT & TREATMENT IN A FORENSIC HOSPITAL SETTING**

4 credits.

Interact with and learn from multiple staff at Mendota Mental Health Institute (MMHI), including forensic psychiatrists, psychologists, nurses, and occupational therapists. Interact with patients who have been committed to MMHI usually for forensic purposes- the patient has been found not guilty by reason of insanity, they are incompetent to stand trial, and/or their conditional release in the community has been revoked. Opportunity to see patients who have been civilly committed. Rotate with multiple psychiatrists, some of whom are specially trained in forensic psychiatry. Learn more about the forensic/legal system, the structure of medium and maximum security forensic psychiatry units, treatment of refractory psychotic and mood disorders, and the basics of forensic assessments. The student is given as much autonomy as possible with individual supervision and discussion.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, for 3 number of completions**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate basic knowledge of forensic psychiatry

Audience: Graduate

2. Demonstrate knowledge of the treatment and assessment of patients who are incompetent to stand trial

Audience: Graduate

3. Demonstrate knowledge and performance of clinical interviews and mental status exams, in formulating diagnoses and planning treatment

Audience: Graduate

4. Demonstrate knowledge in documenting a complete psychiatric history and physical

Audience: Graduate

**PSYCHOLOGY (PSYCH)****PSYCH/ASIAN/COUN PSY/ED PSYCH 120 – THE ART AND SCIENCE OF HUMAN FLOURISHING**

3 credits.

Explore perspectives related to human flourishing from the sciences and humanities; investigate themes such as transformation, resilience, compassion, diversity, gratitude, community; expand self-awareness, enhanced social connectivity, and ability to change; formulate a sense of what it means to lead a flourishing life that sustains meaningful and fulfilling engagement with studies, relationships, community, and career.

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Analyze and describe the relevant concepts and theories on the nature and cultivation of human flourishing from multiple intellectual fields including psychology, neuroscience, anthropology, philosophy, and religious studies.

Audience: Undergraduate

2. Describe and engage with the many dimensions of flourishing, and the various extrinsic and intrinsic factors influencing them.

Audience: Undergraduate

3. Formulate an account of human flourishing.

Audience: Undergraduate

4. Employ contemplative practices in an inquiry that cultivates qualities of human flourishing from within.

Audience: Undergraduate

5. Integrate contemplative practice and knowledge of course materials in order to establish a foundation for flourishing in your life and the communities in which you live.

Audience: Undergraduate

**PSYCH/SOC 160 – HUMAN SEXUALITY: SOCIAL AND PSYCHOLOGICAL ISSUES**

3-4 credits.

Biological, psychological and sociological aspects of sexual relationships and behavior. Presents theoretical and empirical materials on sexuality throughout the life-course, including childhood, adolescence, adulthood, and later life. Attention is given to gender, religion, education and the law as they relate to sexual expression in society.

**Requisites:** Not open to students with credit for SOC/PSYCH 453.**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**PSYCH 202 – INTRODUCTION TO PSYCHOLOGY**

3-4 credits.

Behavior, including its development, motivation, frustrations, emotion, intelligence, learning, forgetting, personality, language, thinking, and social behavior.

**Requisites:** Not open to students with credit for PSYCH 201 or 281

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PSYCH 205 – EXPLORING RESEARCH IN PSYCHOLOGY**

1 credit.

Focuses on a wide range of research in psychology at UW-Madison, such as child development, clinical psychology, perception, biological psychology, cognition, and psychological neuroscience.

**Requisites:** PSYCH 202

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Identify how psychologists study both universals and differences observed across individuals, cultures, and species, spanning all levels of analysis (neurons to neighborhoods).

Audience: Undergraduate

2. Apply critical thinking skills to determine how conclusions are drawn from research questions.

Audience: Undergraduate

3. Evaluate how data can provide insight into important societal issues.

Audience: Undergraduate

4. Recognize opportunities available in the Psychology major.

Audience: Undergraduate

5. Evaluate psychological science through multiple lenses, including such issues as social justice, poverty, psychopathology, and disabilities.

Audience: Undergraduate

6. Analyze research across all of the major subareas of psychology, and address intersections with myriad disciplines (e.g., zoology, philosophy, genetics, linguistics, economics, public policy, art, pediatrics, and music).

Audience: Undergraduate

**PSYCH 210 – BASIC STATISTICS FOR PSYCHOLOGY**

3 credits.

Measures of central tendency, variability; probability, sampling distributions; hypothesis testing, confidence intervals; t-tests; Chi-square; regression and correlation (linear) and introduction to analysis of variance (1-way).

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and (PSYCH 202 or concurrent enrollment)

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain why data beat anecdotes.

Audience: Undergraduate

2. Understand why association is not causation

Audience: Undergraduate

3. Explain the fundamental concepts and apply the basic procedures that underlie descriptive and inferential statistics

Audience: Undergraduate

4. Interpret and draw conclusions from graphical displays and standard output from statistical software packages.

Audience: Undergraduate

5. Understand why statistical significance does not necessarily imply practical importance.

Audience: Undergraduate

6. Demonstrate an awareness of ethical issues associated with sound statistical practice.

Audience: Undergraduate

**PSYCH 212 – SOCIAL SCIENCE TOPICS IN PSYCHOLOGY**

3 credits.

Consider how researchers approach classic and current research findings and controversies related to a specific topic, with a social science emphasis. Popular misconceptions will be addressed through discussions of relevant scientific research. Primary focus on behavioral research approaches, though neuroscientific or computational approaches may be integrated.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 2 number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Think critically about an important topic in psychology with an emphasis in the social science.

Audience: Undergraduate

2. Acquire knowledge about the methods used to study that topic.

Audience: Undergraduate

3. Consider controversies in the field and their impact on theoretical development.

Audience: Undergraduate

4. Compare classic and contemporary theories.

Audience: Undergraduate

5. Write scientifically about issues in psychological science.

Audience: Undergraduate

6. Consider the differences between popular press and scientific approaches to issues in psychology.

Audience: Undergraduate

**PSYCH 225 – RESEARCH METHODS**

4 credits.

General characteristics of scientific method; use of experimental, observational, and correlational research designs; research methods used in psychological science; illustration of core issues in research methods taken from several areas of psychology; lecture, demonstration, and experiments.

**Requisites:** Satisfied Communications A requirement, grade of C in PSYCH 202, and grade of C in (PSYCH 210, STAT 302, STAT 324 or STAT 371)**Course Designation:** Gen Ed - Communication Part B

Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Develop skills to find, read, and understand scientific articles and to synthesize scientific literature

Audience: Undergraduate

2. Through an iterative process, learn how to effectively communicate research in multiple modalities

Audience: Undergraduate

3. Develop critical thinking skills, examine linkages between method and results, consider alternative explanations, and become more knowledgeable consumers of research

Audience: Undergraduate

4. Generate and test hypotheses; design psychological research using different approaches, data collection tools, and analysis techniques

Audience: Undergraduate

5. Correctly interpret and convey statistical results via text, tables, and figures

Audience: Undergraduate

6. Learn key principles of science, including use of evidence, how to evaluate scientific reliability and validity, and how to fairly and thoroughly evaluate research inside and outside the classroom.

Audience: Undergraduate

7. Learn that ethical principles, behavior, and decision-making pertain to all aspects of the research process

Audience: Undergraduate

8. Identify how psychological science can inform societal practices and policies. Review and apply what you learned.

Audience: Undergraduate

**PSYCH 310 – TOPICS IN PSYCHOLOGY: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison Study Abroad Program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 1999

**PSYCH 311 – ISSUES IN PSYCHOLOGY**

1-4 credits.

Topics vary with the instructor. Survey of topical issues.

**Requisites:** PSYCH 202

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PSYCH/GEN&WS 322 – SEXUAL & RELATIONSHIP VIOLENCE RESEARCH & ACTIVISM**

3 credits.

Examine sexual and relationship violence and how they intersect with various aspects of identity (race, gender, sexual orientation, disability, poverty, etc.) in the general community as well as within particular populations (college, military, incarcerated) with a heavy focus on college populations (some of the applied parts of the course will focus here). Learn about power and oppression, as well as ways that both research and practice in these arenas have been marginalized and underfunded. Additional focus on community and campus responses to sexual and relationship violence through a series of speakers as well as about anti-violence activism through course activities and group projects.

**Requisites:** Junior standing and 3 credits in PSYCH or GEN&WS

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the prevalence of sexual and relationship violence, whom it impacts, how it can affect survivors, and service seeking options for survivors.

Audience: Undergraduate

2. Understand the role of identity and intersectional identities in the experience and impact of violence as well as service seeking.

Audience: Undergraduate

3. Understand the role of alcohol and other drugs in sexual and relationship violence and their intersections with personal and social identities.

Audience: Undergraduate

4. Understand the history and practice of advocacy.

Audience: Undergraduate

5. Apply knowledge in determining the medical, mental health, legal, and other options for survivors

Audience: Undergraduate

6. Analyze and apply fourth-wave feminism to anti-violence activism.

Audience: Undergraduate

**PSYCH/ISYE 349 – INTRODUCTION TO HUMAN FACTORS**

3 credits.

Conveys the importance of considering human capabilities and limits in system design and operation. This includes understanding human characteristics from the cognitive, physical, and psychosocial perspectives. Implications of these characteristics are explored through understanding the needs of people, designing to support these needs, and evaluating systems to ensure they serve the intended purpose. Case studies are used to identify the human role in accidents and to identify design improvements. Application domains include consumer product design, human-computer interaction, workplace safety, and complex systems such as healthcare delivery.

**Requisites:** (ISYE 210, ECE 331, MATH/STAT 309, 431, STAT 311, 324, 371, MATH 531, PSYCH 210, or C&E SOC/SOC 360, or concurrent registration), graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the strengths and limits of human perceptual, cognitive and physical abilities and their implications for system design

Audience: Undergraduate

2. Describe human factors tools, techniques and methods commonly used to design and improve system performance

Audience: Undergraduate

3. Evaluate and recommend work and task designs based on human factors and ergonomic principles

Audience: Undergraduate

4. Define the ethical application of human factors in designing products and processes

Audience: Undergraduate

**PSYCH 380 – JUNIOR HONORS SEMINAR**

1 credit.

Discusses the process of research, provide guidance and feedback about writing about research, and offer opportunities to present research issues and findings. The broader goal is to prepare students to conduct a Senior Honors Thesis.

**Requisites:** PSYCH 225 and declared in a College of Letters and Science Honors in the Liberal Arts program or Psychology Honors in the Major

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PSYCH 399 – SERVICE LEARNING IN PSYCHOLOGY**

1-4 credits.

An independent opportunity to provide experience in community service work relevant to psychology.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PSYCH 401 – PSYCHOLOGY, LAW, AND SOCIAL POLICY**

3 credits.

Focuses on the role that psychological principles, research evidence and social science play in the laws of U.S. society, especially in the policies and mechanisms of social control of human behavior. Topics include: the ways society defines membership; the role of psychology determining who should be excluded or restricted from open society; how selected processes work in the legal and social context; students' own roles as citizens in supporting or changing these social processes; clinical-legal processes used to determine the disposition of individuals considered marginal in society; mechanisms used to exclude individuals from open society through criminal and civil court processes; the role of psychology as a science; and the role of psychologists as behavioral experts in criminal and civil courts, and in shaping social policies.

**Requisites:** PSYCH 202

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PSYCH 403 – PSYCHOLOGY OF PERSONALITY**

3 credits.

Organization and development of the personality.

**Requisites:** PSYCH 202

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 405 – ADULT PSYCHOPATHOLOGY**

3-4 credits.

Introduces diagnosis and treatment of major mental disorders. Considers current thinking regarding the biological, psychological, and sociocultural factors that play contributing roles in the etiology and maintenance of these disorders. Historical trends as well as advances in neuroscience will be considered in terms of how they have affected our understanding of psychopathology.

**Requisites:** PSYCH 202**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the main defining features of different major forms of adult psychopathology.

Audience: Undergraduate

2. Differentiate between different types of related disorders.

Audience: Undergraduate

3. Understand the relationship between the different paradigms and ways of conceptualizing psychopathology, assessing and treating mental illness.

Audience: Undergraduate

4. Understand the different research methods used in the study of psychopathology.

Audience: Undergraduate

5. Recognize the continuum between mental health and mental illness.

Audience: Undergraduate

6. Identify different types of stigma that people with severe mental illness may face.

Audience: Undergraduate

**PSYCH 406 – PSYCHOLOGY OF PERCEPTION**

3-4 credits.

Survey the current knowledge about how the brain creates our conscious experience of a surrounding world and of our own bodies. Consider contributions from various approaches, including neurophysiology, psychophysics, computer simulations, perceptual illusions, and patient studies.

**Requisites:** PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2024**PSYCH 414 – COGNITIVE PSYCHOLOGY**

3-4 credits.

How people perceive, learn, remember, plan, solve problems, make decisions, and communicate. The main approach is psychological but will also consider contributions from computer science, linguistics, and neurobiology.

**Requisites:** PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**PSYCH 449 – ANIMAL BEHAVIOR**

3-4 credits.

Evolutionary and physiological mechanisms of animal behavior including aggressive, reproductive, communicative, and social behaviors, behavioral development.

**Requisites:** PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**PSYCH 450 – PRIMATE PSYCHOLOGY: INSIGHTS INTO HUMAN BEHAVIOR**

3-4 credits.

Explore the psychology and biology of our closest living ancestors and how it can provide insights into human behavior and cognition. Learn how a variety of factors (ecological, evolutionary, developmental, and experiential) shape the variation we see across and within primate species. Topics include investigation of similarities and differences across taxa in development, learning, memory, evolution of the brain, spatial navigation, tool-use, social behavior, parental behavior, communication, self-recognition, and theory of mind, as well as ethical issues and conservation.

**Requisites:** PSYCH 202, ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand more than 650+ species that comprise the Order Primates.

Audience: Undergraduate

2. Understand how studying nonhuman primates has helped to inform our knowledge about human behavior and physiology, psychological processes, and environmental factors that influence both other animals and us.

Audience: Undergraduate

3. Apply different levels of analysis (proximate, developmental, evolutionary, and phylogenetic) when asking and answering questions about primates and to understand that these levels of analysis offer complementary insights into primate psychology

Audience: Undergraduate

4. Identify how variation in experience, environments, and development shape individual variation within and across primate species.

Audience: Undergraduate

5. Critically evaluate empirical evidence about primate psychological processes as presented in popular media and scientific research articles.

Audience: Undergraduate

6. Recognize the various methods used to study primates in captive and natural settings, including behavioral, cognitive, physiological, and neuroscience methods.

Audience: Undergraduate

7. Reflect on ethical and animal welfare considerations for nonhuman primates across the settings in which they live.

Audience: Undergraduate

**PSYCH/SOC 453 – HUMAN SEXUALITY**

4 credits.

Provides an interdisciplinary introduction to biological, psychological, and sociological aspects of human sexuality.

**Requisites:** PSYCH 202 or Sophomore standing. Not open to student with credit for SOC/PSYCH 160

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 454 – BEHAVIORAL NEUROSCIENCE**

3-4 credits.

Biological basis of human and animal behaviors, including perception, action, cognition, social interaction and disease. Weekly themes from "Cracking the Neural Code" to "Love and War". Learn, develop and use neural mechanisms to explain and (attempt to) predict what they and others think and do in all facets of life.

**Requisites:** PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 456 – SOCIAL PSYCHOLOGY**

3-4 credits.

Introduce classic and contemporary theories and research in the field, with an emphasis on experimental methodology. Examine the psychological study of the individual in the social world, including social interaction, motivation, attitudes, conformity, communication, leadership, personal relationships, and behavior in small groups.

**Requisites:** PSYCH 202**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Understand the kinds of questions that social psychologists ask and why these questions matter.

Audience: Undergraduate

2. Become an effective consumer of science – i.e., understand the methods that social psychologists use to test their research questions and be able to draw appropriate conclusions from study findings.

Audience: Undergraduate

3. Evaluate whether research evidence provides a good test of theory.

Audience: Undergraduate

4. View everyday social behavior through a social psychological lens.

Audience: Undergraduate

5. Think about how research findings can be used to create interventions to address real-world problems.

Audience: Undergraduate

**PSYCH 460 – CHILD DEVELOPMENT**

3-4 credits.

Biological and behavioral foundations of human development, with an emphasis on experiments and data-driven approaches. Topics will include prenatal development, behavior genetics, motor development, perceptual development, language development, cognitive development, emotional development, social development, and atypical development.

**Requisites:** PSYCH 202**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**PSYCH 462 – ADOLESCENT DEVELOPMENT**

3-4 credits.

Examines research on biological, cognitive, social, and emotional development during the second decade of life. Covers topics most relevant to teenagers, such as pubertal development and its social consequences, changing relationships with parents, self and identity development, the increasingly important role of peers, school adjustment, and high risk behaviors.

**Requisites:** PSYCH 202**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify major subfields of developmental psychology and recognize how each of these areas of research contribute to our understanding of the mind, brain, and behavior in teenagers.

Audience: Undergraduate

2. Understand how various different methodologies (e.g., magnetic resonance imaging, ecological momentary assessment, etc.) are applied with the scientific methods to use in research studies involving teenagers.

Audience: Undergraduate

3. Critically evaluate research claims heard in everyday life (e.g., popular media, educational settings, academia, civic discourse, etc.).

Audience: Undergraduate

4. Differentiate between myths and contemporary scientific evidence regarding teenage development.

Audience: Undergraduate

**PSYCH 464 – ADULT DEVELOPMENT AND AGING**

3 credits.

Physical, cognitive, social, and personality development during the adult years.

**Requisites:** PSYCH 202**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**PSYCH 501 – DEPTH TOPIC IN SOCIAL SCIENCE**

4 credits.

Provides an in-depth treatment of a specific topic in psychology.

**Requisites:** PSYCH 202**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

**PSYCH 502 – COGNITIVE DEVELOPMENT**

4 credits.

Covers the basics of cognitive development during childhood. Topics include theoretical approaches to cognitive development; perceptual, language, memory, and conceptual development; social cognition; problem solving, and academic performance.

**Requisites:** PSYCH 406, 413, 414, 460, 462, or 464

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the basic tenets of major theories of cognitive development and highlight points of similarity and differences among them.

Audience: Undergraduate

2. Identify and explain the major methodological approaches used in the field of cognitive development by researchers who adopt different theoretical perspectives.

Audience: Undergraduate

3. Interpret children's behaviors from different theoretical perspectives and in light of existing knowledge about the development of perception, language, memory, concepts, social cognition, problem solving, and academic skills.

Audience: Undergraduate

4. Describe basic phenomena and theoretical accounts of perceptual development, language development, memory development, concept development, the development of social cognition, the development of problem solving, and the development of academic skills.

Audience: Undergraduate

5. Practice identifying claims about cognitive development in popular press, evaluating those claims based on evidence in the scientific literature, and evaluating popular press articles in light of the alignment between claims and evidence.

Audience: Undergraduate

**PSYCH 503 – SOCIAL DEVELOPMENT**

4 credits.

Explores how infants and children perceive, think about, and interact with the social world. Topics include theory of mind, emotions, early social relationships, peer influences, morality and pro-social behavior, aggression, and social categorization.

**Requisites:** PSYCH 403, 414, 428, 449, 450, 456, 460, 462, or 464

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss historical and contemporary theories of social development

Audience: Undergraduate

2. Read, understand, and evaluate empirical literature on children's social development across a range of topics

Audience: Undergraduate

3. Evaluate a popular press article about a topic related to the course material

Audience: Undergraduate

4. Compose polished writing about a follow-up study related to the course material

Audience: Undergraduate

5. Discuss contemporary theories of social development with others in the course

Audience: Undergraduate

6. Articulate cross-cultural and evolutionary perspectives on infants' and children's social development

Audience: Undergraduate

7. Evaluate major methodologies used to assess infants' and children's social development

Audience: Undergraduate

**PSYCH 505 – DEPTH TOPIC IN BIOLOGICAL SCIENCE**

3-4 credits.

Provides an in-depth treatment of a specific topic in psychology and biology.

**Requisites:** PSYCH 202, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, or (BIOCORE 381 and 382)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PSYCH 507 – INTRODUCTION TO CLINICAL PSYCHOLOGY**

4 credits.

Interdisciplinary introduction to clinical psychology including history, theories, and treatment modalities.

**Requisites:** PSYCH 405

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Differentiate the multiple degree programs associated with clinical psychology.

Audience: Undergraduate

2. Differentiate career options afforded to those with a degree in clinical psychology.

Audience: Undergraduate

3. Identify of a variety of approaches intervention and treatment of psychological disorders.

Audience: Undergraduate

4. Identify the social, legal, ethical, clinical, and political issues surrounding the identification and treatment of disorders.

Audience: Undergraduate

5. Identify abnormality and mental illness from a more positive standpoint through person-first language.

Audience: Undergraduate

6. Analyze into the significance of cultural competencies within clinical psychology.

Audience: Undergraduate

**PSYCH 508 – PSYCHOLOGY OF HUMAN EMOTIONS: FROM BIOLOGY TO CULTURE**

4 credits.

Emotional experience affects and defines every facet of our life, but it seems mysterious and unsuitable for scientific inquiry. Explore how and why emotion is not unsuited to scientific research and provides an in-depth examination of research from all sub-disciplines of the field of Psychology. This includes neuroscience and the biological bases of behavior, questions of the developmental curve for emotional phenomena and the relationship between feeling and thinking, and the study of social groups and culture.

**Requisites:** PSYCH 403, 428, 456, 460, 462, 464, SOC/PSYCH 453, or PSYCH/GEN&WS 522

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the theoretical approaches to emotion and current debates in the psychology of emotion

Audience: Undergraduate

2. Analyze the main questions addressed in research on emotion, and how that research is conducted

Audience: Undergraduate

3. Explore the functioning of numerous components of emotion in addition to subjective experience (feelings) such as bodily and facial expression, physiology, and processes of the brain

Audience: Undergraduate

**PSYCH 510 – CRITICAL ISSUES IN CHILD PSYCHOPATHOLOGY**

4 credits.

Provides in-depth coverage on the study of common mental disorders of childhood and adolescence. Uses a scientific lens to dive into some of the more controversial issues in the field, rather than focusing on basic definitions and classifications, instead. For instance, what factors have led to the rise in ADHD diagnosis in this country, and around the world? Why aren't evidenced-based treatments more widely used in mental health settings? Are antidepressants safe for adolescents, and do they actually work?

**Requisites:** PSYCH 405, 460, or 462

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Identify and explore how cultural factors affect our conceptualization of mental disorders, while learning about individual differences in mental disorders by exploring how they are influenced by the interplay between both biology and environments.

Audience: Undergraduate

2. Refine critical thinking skills and question how conclusions are drawn from the data and to make connections between scientific studies and their applications to the real world.

Audience: Undergraduate

3. Apply research as a tool for affecting change for all people, and not just for selective populations. Explore the tension between science and clinical practice in the field and develop the foundations and skills for bridging this gap (as opposed to widening it by only focusing on one aspect).

Audience: Undergraduate

4. Integrate an array of material from within the psychological sciences (clinical psychology, developmental psychology) as well as from disciplines outside of psychology, including in anthropology, sociology, public health, epidemiology, neuroscience, and genetics.

Audience: Undergraduate

**PSYCH 513 – HORMONES, BRAIN, AND BEHAVIOR**

4 credits.

Complex social behavior emerges from the interplay of hormones, the brain and environmental signals. Introduces how hormones and neurotransmitters shape brain and behavior in animals and humans. Review the mechanisms by which hormones shape brain sex differences and its consequences on juvenile (i.e. play) and adult behavior. Examine how hormones influence sexual behavior using basic animal models, and extend this to human sex differences, including sexual orientation. Additional topics include how hormones shape competitive and affiliative behaviors, eating disorders, and stress and mental health, as well as how individual variation occurs in response to the changing environment and genetic landscape, including epigenetics at an introductory level.

**Requisites:** PSYCH 406, 413, 414, 449, 450, 454, or ZOOLOGY/PSYCH 523

**Course Designation:** Breadth – Either Biological Science or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 515 – ANIMAL COGNITION**

4 credits.

With intricate cultures, impressive technology, and layered social lives, humans seem to stand apart from their animal kin. However, humans and non-human animals share many aspects of their mental lives, and, upon closer inspection, some animals even reveal cognitive abilities far beyond the capacities of humans. Through comparing and contrasting human and non-human cognition, learn about human psychological uniqueness and its evolutionary origins, and fundamental properties of cognitive processes in general.

**Requisites:** PSYCH 406, 414, 449, 450, 454, 460, 462, or 464

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe and and discuss the fundamentals of cognitive science through the lens of comparative cognition

Audience: Undergraduate

2. Analyze the evolutionary process and how human and animal minds are the product of it

Audience: Undergraduate

3. Analyze methods of experimentation in animal cognition and cognitive science

Audience: Undergraduate

4. Read and interpret data from graphs

Audience: Undergraduate

5. Critically evaluate primary research articles, secondary news articles about science, and observations of animal cognition and "intelligence"

Audience: Undergraduate

**PSYCH 521 – THE STRUCTURE OF HUMAN THOUGHT: CONCEPTS, LANGUAGE AND CULTURE**

4 credits.

Topics include the relationship of language to other cognitive and perceptual functions; language evolution; the connection of language and culture, sources of linguistic diversity; linguistic engineering; the role of information technologies in the spread of ideas and its impact on language change. Will draw heavily on empirical research in cognitive and developmental psychology, and to a lesser extent on cognitive neuroscience, animal cognition, anthropology, and linguistics.

**Requisites:** PSYCH 406, 413, 414, or 460

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand the difference between human language and other communication systems

Audience: Undergraduate

2. Learn about the evolution of language

Audience: Undergraduate

3. Understand what is meant by claims that language does or does not affect 'thought' and the kinds of empirical data that support or fail to support these claims

Audience: Undergraduate

4. Intelligently discuss the relationship between language and memory, perception, reasoning, mathematical cognition, and spatial cognition

Audience: Undergraduate

5. Understand what is meant by How does language help or hurt our "thinking?"

Audience: Undergraduate

6. Learn about the role of metaphor in human communication and thought

Audience: Undergraduate

7. Understand the impact of new communication technologies on language

Audience: Undergraduate

8. Understand how to evaluate opposing theoretical positions and empirical results

Audience: Undergraduate

**PSYCH/GEN&WS 522 – PSYCHOLOGY OF WOMEN AND GENDER**

3 credits.

Examination of theories and research on the psychology of women and gender. Explores topics such as sex bias in psychological research; psychological aspects of female sexuality and reproduction; gender-based violence; female achievement and power; lifestyle choices of women; women and mental health; and psychological research with transgender individuals.

**Requisites:** Sophomore standing, a course in PSYCH and (GEN&WS 102 or 103) or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**PSYCH/ZOOLOGY 523 – NEUROBIOLOGY**

3 credits.

Basic mechanisms in cellular neurophysiology: electrophysiology and chemistry of nerve signals, mechanisms in integration, simple nervous pathways and their behavioral correlates.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or BIOCORE 383) and (CHEM 104, CHEM 109, or CHEM 116)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the molecular mechanisms of cellular neurophysiology, including the ionic basis of the resting membrane potential and action potential, and mechanisms of synaptic transmission.

Audience: Undergraduate

2. Understand the basis of sensory perception at the receptor level.

Audience: Undergraduate

3. Demonstrate how neuronal signaling is integrated into simple nervous pathways and their behavioral correlates.

Audience: Undergraduate

4. Apply principles of neuronal function to activity-dependent changes in rhythmic neuronal activity, neuronal plasticity, and memory.

Audience: Undergraduate

5. Understand some of the state-of-the-art approaches to neuronal function.

Audience: Undergraduate

6. Understand key steps in the development of the nervous system and explain and apply the experimental approaches underpinning that understanding.

Audience: Undergraduate

7. Elucidate connections between genetics, pharmacology, and the functioning of the nervous system.

Audience: Undergraduate

8. Understand the mechanisms underlying a subset of disorders of the nervous system and the bases of current treatments.

Audience: Undergraduate

**PSYCH 526 – THE CRIMINAL MIND: FORENSIC AND PSYCHOBIOLOGICAL PERSPECTIVES**

4 credits.

Criminal behavior is an extremely common and costly problem for society. Provides an overview of criminal psychology and the relevant forensic and psychobiological processes in the field.

**Requisites:** PSYCH 401, 403, 405, or 456

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Critically review and analyze research in the field of forensic psychology.

Audience: Undergraduate

2. Review personality and crime with an emphasis on psychopathy assessment, case examples, causal theories, and neurobiological factors

Audience: Undergraduate

3. Examine the connection between mental illness and crime with an emphasis on Not Guilty by Reason of Mental Disease or Defect and Competency to Proceed psychological evaluations

Audience: Undergraduate

4. Consider general theories of causes of crime

Audience: Undergraduate

5. Characterize typologies of people who have committed sexual offenses, causes of sexual offenses, and risk assessment and typologies of people who have committed violent offenses, with a focus on domestic

Audience: Undergraduate

6. Analyze social psychological influences on crime and criminal justice system

Audience: Undergraduate

7. Critique treatment and intervention approaches, with emphasis on what works and why.

Audience: Undergraduate

**PSYCH 528 – CULTURAL PSYCHOLOGY**

4 credits.

Societies are shaped by the people, places, and environments that surround us. Examine the ways that culture and individual psychology make each other up, including how we think about ourselves, how we attend to and reason about the world, how we think about those like us and unlike us, and how these beliefs, attitudes, and cognitions are shared and maintained across groups.

**Requisites:** PSYCH 403, 406, 413, 414, or 456. Not open to students with credit in PSYCH 428.

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Examine naive realism and its associated problems.

Audience: Undergraduate

2. Identify and summarize cultural variation in thinking about what a self is, what responsibilities we have to each other, how we think about groups in society, what is right and wrong, how we should feel, what the world is like, and what the nature of the good life.

Audience: Undergraduate

3. Explain how historical, ecological, and societal factors help to shape cultural variation.

Audience: Undergraduate

4. Understand cultural variation that exists within our own society.

Audience: Undergraduate

5. Hypothesize about factors underlying cultural change and make predictions about the future.

Audience: Undergraduate

**PSYCH 532 – PSYCHOLOGICAL EFFECTS OF THE INTERNET**

4 credits.

Googling the question, "How is the Internet changing the way we think?," renders no shortage of opinions – or fears. Examine empirical evidence for whether the Internet is changing the way we learn, communicate, socialize, attend, develop, and age. Read and synthesize original research literature, which will be augmented with readings and videos from the popular press.

**Requisites:** PSYCH 401, 403, 405, 406, 413, 414, 428, 449, 450, 454, 456, 460, 462, 464, SOC/PSYCH 453, PSYCH/GEN&WS 522, or ZOOLOGY/PSYCH 523

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify nine previous technologies or past-times that were previously feared – and appraise how those fears parallel fears about the internet.

Audience: Undergraduate

2. Assess five principles of learning on which Internet based higher education capitalizes.

Audience: Undergraduate

3. Evaluate five challenges that college students face today and how Internet based education can tackle each challenge.

Audience: Undergraduate

4. Critique the claim that the Internet is making interpersonal communication briefer and less formal.

Audience: Undergraduate

5. Illustrate four intentional and four unintentional incidents in which the Internet has amplified mass communication.

Audience: Undergraduate

6. Connect the social psychological principle of similarity attraction to the popularity of online dating apps; connect interpersonal aggression to the phenomena of online bullying and trolling.

Audience: Undergraduate

7. Interpret how and why emotional contagion spreads through the Internet; hypothesize why there are so many photos, gifs, and videos of cats on the Internet.

Audience: Undergraduate

8. Identify how each of the six sources of motivation can affect Internet use; describe five reasons why people binge watch (TV shows or movies).

Audience: Undergraduate

9. Adjudicate four reasons why the Internet is not changing our attention spans.

Audience: Undergraduate

10. Discriminate three primary decision making heuristics and generate an example of how each applies to internet use

Audience: Undergraduate

11. Relate two positive effects of Internet use on adult and two on child development.

Audience: Undergraduate

12. Explain how much variance in Internet activities is accounted for by personality factors; describe four famous selfies made prior to the Internet.

**PSYCH/ISYE 549 – HUMAN FACTORS ENGINEERING**

3 credits.

Analysis and design of man-machine systems using human performance models and data. Emphasis on systems involving communication and control. Projects using digital and analog computer simulation techniques for system design.

**Requisites:** ISYE/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the topics involved in cognitive human factors and design implications of these concepts

Audience: Both Grad & Undergrad

2. Describe the interactions between human operators and system components including the environment, technology, and organizations

Audience: Both Grad & Undergrad

3. Discuss different human factors perspectives regarding human error and limitations of human performance, especially as these relate to memory, decision-making, action selection, and workload and stress

Audience: Both Grad & Undergrad

4. Identify barriers and limitations to memory and how these must be accounted for in design of systems and displays

Audience: Both Grad & Undergrad

5. Articulate the role of simulation and modeling in system design involving human operators

Audience: Both Grad & Undergrad

6. Use cognitive engineering analysis methods to complete a detailed analysis of a real incident or accident including outlining each layer and component of system failure and proposing possible redesign solutions

Audience: Graduate

**PSYCH 601 – CURRENT TOPICS IN PSYCHOLOGY**

3 credits.

Special topics in Psychology at the advanced undergraduate level. May be repeated for credit with different titles.

**Requisites:** PSYCH 225

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PSYCH 602 – INTERMEDIATE STATISTICS FOR PSYCHOLOGY**

3 credits.

Principles of psychological measurement and test theory, including reliability, validity, and test construction. Introduction to correlation, multiple regression, factor analysis, and other data analytic principles.

**Requisites:** PSYCH 210, SOC/C&E SOC 360, STAT 371, or GEN BUS 303

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**PSYCH 603 – EPIGENETICS AND THE BRAIN**

3 credits.

Explore nature versus nurture by understanding gene by environmental interactions. Study how the environment and our behavior can modify our genome (epigenetics). Focus on how our behavior and overall health can be shaped by markings on our DNA, and how these markings may be passed onto future generations.

**Requisites:** (PSYCH 454 or ZOOLOGY/PSYCH 523) and BOTANY/BIOLOGY/ZOOLOGY 152, PSYCH 225, or (BIOCORE 383 and 384)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Understand the basics of gene x environmental interactions.

Audience: Undergraduate

2. Understand the biological mechanisms of epigenetics.

Audience: Undergraduate

3. Understand multigenerational and transgenerational outcomes of epigenetics.

Audience: Undergraduate

4. Understand epigenetic contributions to disease and mental health.

Audience: Undergraduate

5. Critically read and discuss assigned readings.

Audience: Undergraduate

6. Present a relevant topic of interest to the class and answer questions.

Audience: Undergraduate

7. Design a research project that will answer a specific question and present the project as an oral proposal and a written research proposal.

Audience: Undergraduate

**PSYCH 607 – INTRODUCTION TO PSYCHOTHERAPY**

3 credits.

Theoretical and applied foundations of psychotherapy. Consider issues of ethics, diversity/inclusivity, and research directions related to psychotherapy. Explore basic and theoretical considerations relevant to therapy including transference and countertransference, emotion, defense mechanisms, boundaries, resistance and early development. Discuss aspects of psychotherapy practice including trauma work, parenting issues, play therapy, family therapy, and couples therapy.

**Requisites:** PSYCH 225**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate understanding of interpersonal dynamics relevant to psychotherapy.

Audience: Undergraduate

2. Communicate effectively through written assignments, oral presentations and discussion.

Audience: Undergraduate

3. Develop proficiency in mastering primary sources and critically evaluating research.

Audience: Undergraduate

**PSYCH 610 – DESIGN AND ANALYSIS OF PSYCHOLOGICAL EXPERIMENTS I**

4 credits.

Reliability, validity, one-sample t-test, independent-samples t-test, simple and multiple regression, effect size indicators, analysis of variance (ANOVA), analysis of covariance (ANCOVA), case analysis, model assumptions, transformations, polynomial regression, simple mediation, and moderated mediation.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Master reliability and validity in empirical research

Audience: Graduate

2. Master inferences about a single mean (t-test)

Audience: Graduate

3. Master analysis of single and multiple dichotomous predictors (ANOVA)

Audience: Graduate

4. Master analysis of single and multiple continuous predictors (regression)

Audience: Graduate

5. Master analysis of indirect effects (mediation)

Audience: Graduate

6. Master analysis of non-linear relationships (polynomial regression)

Audience: Graduate

7. Generate publication-level graphs

Audience: Graduate

**PSYCH/NEURODPT/NTP 611 – SYSTEMS NEUROSCIENCE**

4 credits.

Introduction to the anatomy and physiology of the mammalian nervous system. Lectures will cover the neuroanatomy of the major subdivisions of the human brain, the major sensory and motor systems, and higher order functions. Lab/discussion sections will emphasize readings from the primary literature and hands-on dissections.

**Requisites:** NEURODPT/NTP 610 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the organization and structure of mammalian nervous system, including the spinal cord, brainstem, thalamus, cerebral cortex, cerebellum, basal ganglia, limbic system, and their interconnections on a systems level

Audience: Both Grad & Undergrad

2. Demonstrate a solid understanding of the functions of the sensory and motor systems that underlie perception and action

Audience: Both Grad & Undergrad

3. Demonstrate a solid understanding of higher brain functions and behavior, including learning and memory and executive function

Audience: Both Grad & Undergrad

4. Demonstrate knowledge about approaches of modern neuroscience research including neuroanatomy, neurophysiology, functional brain imaging, behavioral assays, and quantitative data analysis methods

Audience: Both Grad & Undergrad

5. Develop and apply critical thinking to evaluate original neuroscience research

Audience: Graduate

6. Develop ability to formulate hypotheses and to apply knowledge learned from the course to design experiments for hypothesis testing

Audience: Graduate

**PSYCH 612 – NEUROPHARMACOLOGY**

3 credits.

Comprehensive review of the field of behavioral neuropharmacology, focusing on methodology, major neurotransmitter systems, critical evaluation of experimental evidence regarding behavioral functions of these transmitter systems and drugs used to treat mental illness.

**Requisites:** (PSYCH 454 or ZOOLOGY/PSYCH 523) and BOTANY/BIOLOGY/ZOOLOGY 152, PSYCH 225, or (BIOCORE 383 and 384)

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the strengths and limitations of the primary methods used in neuropharmacology.

Audience: Undergraduate

2. Understand the basic principles of drug action as applied to neurotransmitters.

Audience: Undergraduate

3. Identify the major neurotransmitter systems, including the location of the synthesizing neurons, and the different receptors and their second messengers for a given neurotransmitter.

Audience: Undergraduate

4. Recognize evidence arguing for specific behavioral actions of select neurotransmitter systems and the limitations associated with this evidence.

Audience: Undergraduate

5. Think critically about data and hypotheses related to neurotransmitter regulation of behavior.

Audience: Undergraduate

6. Develop/refine skills for efficiently extracting key information from technical literature.

Audience: Undergraduate

**PSYCH/ANTHRO/ZOOLOGY 619 – BIOLOGY OF MIND**

3 credits.

Origins and structures of mind, brain, and consciousness. Transitions from early mammalian through primate to hominid intelligence. Genetics and plasticity in brain development. Modern studies of human brain mechanisms and consciousness.

**Requisites:** Junior standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**PSYCH 621 – MENTORED RESEARCH AND SEMINAR**

1-6 credits.

Develop an understanding of primary research in a topic area and participate in designing and conducting research that challenges and/or extends current understanding of the topic. Course reading will include published research studies relevant to the selected topic.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**PSYCH 626 – ISSUES IN PRISONER REENTRY**

3 credits.

Provides a multi-systemic understanding of evidence-based prisoner reentry issues and solutions while including community-based learning experiences. Considers the needs of formerly incarcerated individuals reentering our communities, including meeting the ultimate goal of decreasing recidivism and increasing positive psychological adjustment for former inmates, their families, and all the staff and community members working in various stages of the justice system.

**Requisites:** PSYCH 225 and (PSYCH 401 or concurrent enrollment or PSYCH 526 or concurrent enrollment)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Develop community-based research and engagement skills

Audience: Undergraduate

2. Effectively translate psychological research for a community audience.

Audience: Undergraduate

3. Consider reentry issues from a multisystemic perspective.

Audience: Undergraduate

**PSYCH/ISYE 653 – ORGANIZATION AND JOB DESIGN**

3 credits.

Design of productive organizations and people's roles within them. Issues including boundary location, organizational decision levels, autonomous work groups, implementation and diffusion. Roles of the union. Case studies.

**Requisites:** ISYE/PSYCH 349, graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Apply the work system model

Audience: Both Grad & Undergrad

2. Apply a variety of models and theories of job and organization design to answer questions such as, "What makes for a good job?" and "What makes for a bad job?"

Audience: Both Grad & Undergrad

3. Apply interview and survey methods for analyzing jobs

Audience: Both Grad & Undergrad

4. Identify approaches to implement job redesign

Audience: Both Grad & Undergrad

5. Identify societal trends related to job design

Audience: Both Grad & Undergrad

6. Identify similarities and differences between various models and theories of job and organization design

Audience: Graduate

**PSYCH/NEURODPT/ZOOLOGY 674 – BEHAVIORAL  
NEUROENDOCRINOLOGY SEMINAR**

2 credits.

Behavior results from a complex interplay among hormones, the brain, and environmental factors. Behaviors and their underlying neural substrates have evolved in response to specific environmental conditions, resulting in vast species diversity in behavioral and neuroendocrine solutions to environmental problems. Designed to explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors. A range of taxonomic groups will be discussed, including (but not limited to) mammals, birds, and fish.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Identify how behaviors and their underlying neural substrates have evolved in response to specific environmental conditions

Audience: Both Grad & Undergrad

2. Discuss and explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors

Audience: Both Grad & Undergrad

3. Identify and discuss hormones, the brain, and environmental factors as they relate to behavioral evolution and biological diversity

Audience: Both Grad & Undergrad

4. Develop and apply critical thinking to evaluate neuroendocrinological research

Audience: Graduate

5. Communicate effectively about concepts, theories and approaches of neuroendocrinology and behavioral research

Audience: Graduate

**PSYCH 681 – SENIOR HONORS THESIS**

3 credits.

Individual study for students completing senior honors theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PSYCH 682 – SENIOR HONORS THESIS**

3 credits.

Individual study for students completing senior honors theses as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 686 – SENIOR THESIS SEMINAR IN PSYCHOLOGY**

1 credit.

Focus on the process of conducting, writing, and presenting a senior or honors thesis in Psychology. Discuss the process of research, provide guidance and feedback about writing about research, and offer opportunities to present research issues and findings.

**Requisites:** Concurrent enrollment in PSYCH 681, 682, 691, or 692

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Accelerated Honors (!)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Acquire information and skills necessary to complete a senior honors project successfully (e.g., managing one's role in research, presenting one's research to an audience)

Audience: Undergraduate

2. Learn from others conducting senior honors research -- about other topics, methods, and theories in psychology

Audience: Undergraduate

3. Gain skills relevant to the three main arenas of scientific communication: written papers, talks, and poster presentations

Audience: Undergraduate

4. Learn to ask incisive questions about others' research and to critique others' work

Audience: Undergraduate

5. Learn to respond well to questions about or critiques of your research

Audience: Undergraduate

6. Produce a polished and professional report of your senior thesis.

Audience: Undergraduate

**PSYCH 691 – UNDERGRADUATE THESIS**

1-6 credits.

Undergraduate research including completion of a thesis. Recommended for those intending to do graduate work in psychology.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 692 – UNDERGRADUATE THESIS**

1-6 credits.

Undergraduate research including completion of a thesis. Recommended for those intending to do graduate work in psychology.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PSYCH 699 – DIRECTED STUDY**

1-3 credits.

Independent mentored study with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PSYCH 701 – PROSEMINAR IN PERCEPTION, COGNITION, AND COGNITIVE NEUROSCIENCE**

1 credit.

Discussion of current topics in perception, cognition, and cognitive neuroscience, especially as illustrated by the planned and ongoing research of the graduate students, postdoctoral researchers, and faculty in these areas. Recent journal articles will also be discussed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present research and navigate questions from the group

Audience: Graduate

2. Formulate concise questions about research

Audience: Graduate

3. Evaluate and discuss broader topics in the area of perception, cognitive, and cognitive neuroscience

Audience: Graduate

4. Identify strategies to support their professional development

Audience: Graduate

5. Foster an inclusive community by providing constructive feedback with kindness and a growth mindset

Audience: Graduate

**PSYCH 703 – PROSEMINAR IN SOCIAL PSYCHOLOGY**

1 credit.

Discussion of current topics in social psychology, especially as illustrated by the planned and ongoing research of the graduate students and faculty in social psychology. Recent journal articles will also be discussed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present research and navigate questions from the group

Audience: Graduate

2. Formulate questions to ask of other speakers

Audience: Graduate

3. Evaluate and discuss broad topics across the field of social psychology

Audience: Graduate

4. Identify strategies to support their professional development

Audience: Graduate

5. Foster an inclusive community by providing constructive feedback with kindness and a growth mindset

Audience: Graduate

**PSYCH 704 – PROSEMINAR IN CLINICAL PSYCHOLOGY**

1 credit.

Discussion of current topics in clinical psychology, especially as illustrated by the planned and ongoing research of the graduate students and faculty in clinical psychology. Recent journal articles will also be discussed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present research and navigate questions from the group

Audience: Graduate

2. Formulate questions to ask of other speakers

Audience: Graduate

3. Evaluate and discuss broad topics across the field of clinical psychology

Audience: Graduate

4. Identify strategies to support their professional development

Audience: Graduate

5. Foster an inclusive community by providing constructive feedback with kindness and a growth mindset

Audience: Graduate

6. Apply clinical psychology training models and accreditation practices

Audience: Graduate

7. Analyze and evaluate cutting edge clinical psychology research methods

Audience: Graduate

**PSYCH 706 – PROSEMINAR IN DEVELOPMENTAL PSYCHOLOGY**

1 credit.

Discussion of current topics in developmental psychology, especially as illustrated by the planned and ongoing research of the graduate students and faculty in developmental psychology. Recent journal articles will also be discussed.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present research and navigate questions from the group

Audience: Graduate

2. Formulate questions to ask of other speakers

Audience: Graduate

3. Evaluate and discuss broad topics across the field of developmental psychology

Audience: Graduate

4. Identify strategies to support their professional development

Audience: Graduate

5. Foster an inclusive community by providing constructive feedback with kindness and a growth mindset

Audience: Graduate

**PSYCH 707 – PROSEMINAR IN BIOLOGICAL PSYCHOLOGY**

1 credit.

Discussion of current topics in biological psychology, especially as illustrated by the planned and ongoing research of the graduate students and faculty in clinical psychology. Recent journal articles will also be discussed.

**Requisites:** Declared in Psychology PhD program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present research and navigate questions from the group

Audience: Graduate

2. Formulate questions to ask of other speakers

Audience: Graduate

3. Evaluate and discuss broad topics across the field of biological psychology

Audience: Graduate

4. Identify strategies to support their professional development

Audience: Graduate

5. Foster an inclusive community by providing constructive feedback with kindness and a growth mindset

Audience: Graduate

**PSYCH 709 – PROSEMINAR IN DATA SCIENCE IN HUMAN BEHAVIOR**

1 credit.

Discussion of current topics in human behavioral data science, including discussion of planned capstone projects, discussion of recent journal articles, training and practice in scientific communication to various stakeholders, and professional development activities.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand how central concepts in data science get applied to problems from industry, government, and nonprofit sectors.

Audience: Graduate

2. Develop skills for pitching your ideas to employers, funding agencies, other professionals, and the public.

Audience: Graduate

3. Understand different potential career pathways and how to prepare for each.

Audience: Graduate

4. Learn best practices for effectively communicating complex scientific ideas and outcomes.

Audience: Graduate

**PSYCH 710 – DESIGN AND ANALYSIS OF PSYCHOLOGICAL EXPERIMENTS II**

4 credits.

Statistical power, paired-samples t-test, within-subjects ANOVA, mixed models, mediation in within-subjects designs, contrast analysis (= the analysis of categorical predictors with 3 or more levels), multilevel modeling, linear mixed-effects models, restricted maximum likelihood, signal detection theory, logistic regression, exploratory factor analysis, missing data.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Master analysis of a single and multiple dichotomous within-subject predictors (within-subjects ANOVA)  
Audience: Graduate

2. Master analysis of a single and multiple continuous within-subject predictors (mixed models)  
Audience: Graduate

3. Master analysis of indirect effects in within-subjects designs (mediation)  
Audience: Graduate

4. Master analysis of categorical predictors with 3 or more levels (contrast analysis)  
Audience: Graduate

5. Master power analysis  
Audience: Graduate

6. Master analysis of dichotomous outcome variables (logistic regression)  
Audience: Graduate

**PSYCH 711 – CURRENT TOPICS IN PSYCHOLOGY**

2-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PSYCH 720 – ESSENTIALS OF COGNITIVE NEUROSCIENCE**

3 credits.

Provides a broad overview of principles that underlie our understanding of how the structure and function of the brain give rise to cognition and intelligent behavior, and of the methods with which cognitive neuroscience research is carried out. The content covered can be summarized as neuroscience with direct implications for understanding the neural bases of human behavior, and will include anatomical, cellular, systems, behavioral, neuropsychological, and computational levels of analysis. The emphasis will be on domains of behavior traditionally covered by cognitive psychology and neurology, but with explicit consideration, when applicable, of implications for understanding affect, social behavior, and psychopathology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PSYCH 728 – CLASSIC ISSUES IN SOCIAL PSYCHOLOGY**

3 credits.

A broad survey of theories and research from the field of social psychology. Areas may include: attitudes and attitude change, conformity and compliance, altruism, attribution theory.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH/COUN PSY/RP & SE 729 – ADVANCED SOCIAL PSYCHOLOGY**

3 credits.

Intensive examination of theoretical conceptions in contemporary social psychology, including learning-theoretic, reinforcement, incentive, cognitive, and psychodynamic approaches, and research in selected topic areas reflecting these approaches, such as aggression, attitude formation and change, conformity, limitation and modeling, interpersonal attraction, perception of others, prosocial behavior, and social influence.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PSYCH 733 – PERCEPTUAL AND COGNITIVE SCIENCES**

2 credits.

Current approaches to perceptual and cognitive sciences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**PSYCH 740 – CLINICAL I: ASSESSMENT, ETIOLOGY, AND TREATMENT**

1 credit.

Current approaches to assessment, etiology, and treatment of topic material.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PSYCH 741 – CLINICAL II: ASSESSMENT, ETIOLOGY, AND TREATMENT**

1 credit.

Current approaches to assessment, etiology and treatment of topic material.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**PSYCH 750 – PROGRAMMING FOR HUMAN BEHAVIORAL DATA SCIENCE**

3 credits.

Foundations in programming fundamentals, emphasizing tools and techniques as utilized in human behavioral data science.

**Requisites:** Declared in Psychology: Human Behavioral Data Science MS or Psychology PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. learn Python and best-practices for writing efficient and understandable code, as informed by psychological research and methods for evaluating human behavior

Audience: Graduate

2. learn data wrangling in Python and R

Audience: Graduate

3. learn how to use ggplot to create effective visualizations of complex datasets

Audience: Graduate

4. learn how to scrape data, manage complex data structures, and perform basic analyses using machine vision

Audience: Graduate

5. learn techniques for automating repetitive tasks.

Audience: Graduate

6. learn how to track and analyze mouse movements

Audience: Graduate

7. be able to efficiently use and build on existing open-source APIs

Audience: Graduate

**PSYCH 752 – APPLIED MACHINE LEARNING FOR BEHAVIORAL DATA SCIENCE**

3 credits.

Introduction to computational approaches in machine learning for the behavioral sciences.

**Requisites:** PSYCH 610 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. develop and refine best practices for data wrangling, general programming, and analysis in R.

Audience: Graduate

2. distinguish among a variety of learning settings: supervised learning vs. unsupervised learning, regression vs. classification

Audience: Graduate

3. implement a broad toolbox of well-supported machine-learning methods: decision trees, nearest neighbor, general and generalized linear models, penalized models including ridge, lasso, and elastic-nets, neural nets, support vector machines

Audience: Graduate

4. develop expertise with common feature extraction techniques for quantitative and categorical predictors

Audience: Graduate

5. use natural language processing approaches to extract meaningful features from text data

Audience: Graduate

6. know how to characterize how well their regression and classification models perform and they will employ appropriate methodology for evaluating their: cross validation, ROC and PR curves, hypothesis testing

Audience: Graduate

7. learn to apply their skills to common learning problems in psychology and behavioral sciences more generally

Audience: Graduate

**PSYCH 755 – ENVIRONMENTS AND TOOLS FOR LARGE-SCALE BEHAVIORAL DATA SCIENCE**

3 credits.

Provides students with knowledge and experience conducting large-scale behavioral data science projects, independently and in collaboration with others, using a variety of contemporary software tools and environments.

**Requisites:** PSYCH 750 and 752

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use online crowd-sourcing platforms for collecting behavioral data, such as Amazon Mechanical Turk, and understand issues of design, sampling, and interpretation associated with such platforms.

Audience: Graduate

2. Use integrated tools for conducting, documenting, and publishing complex behavioral data analyses, including JuPyTeR notebooks and R Markdown.

Audience: Graduate

3. Use the GitHub platform to conduct collaborative behavioral data science, including documentation, analysis development, versioning, forking and merging.

Audience: Graduate

4. Use the SQL database management system to manage large behavioral datasets

Audience: Graduate

5. Use docker containers and related tools for ensuring fully transparent and replicable behavioral data science

Audience: Graduate

6. Understand how to access and use high-throughput and high-performance infrastructure for computationally expensive jobs, and when use of these platforms is warranted.

Audience: Graduate

**PSYCH/COMP SCI/ED PSYCH 770 – HUMAN-COMPUTER INTERACTION**

3 credits.

Principles of human-computer interaction (HCI); human subjects research methods and procedures, qualitative and quantitative data analysis; and semester-long research project situated in critical domains of HCI, including applications in ubiquitous, affective, assistive, social, and embodied computing.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PSYCH 790 – CAPSTONE I**

5 credits.

Preparation for the applied capstone project, including identifying the project primary literature, relevant tools, and software and communicating these ideas and plans to relevant stakeholders.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Conduct a literature review to understand the current state of the art in a specific problem domain

Audience: Graduate

2. Connect in-class learning experiences to real world datasets and problems.

Audience: Graduate

3. Use online resources to acquire as-needed libraries, toolsets, and knowledge for solving data-science problems in the study of human behavior.

Audience: Graduate

4. Present a concise overview of an important problem and a proposed solution to different audiences.

Audience: Graduate

5. Write a scope-of-work proposal for partners in industry and government.

Audience: Graduate

6. Develop code implementing a data-science workflow relevant to a specific problem.

Audience: Graduate

**PSYCH 791 – CAPSTONE II**

3 credits.

Conduct applied capstone project, including identifying the project primary literature, relevant tools, and software and communicating these ideas and plans to relevant stakeholders.

**Requisites:** PSYCH 790

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Direct hands-on experience working in a data-science and human behavior setting

Audience: Graduate

2. Understand how data-science tools and concepts from class get applied to large-scale real-world problems

Audience: Graduate

3. Communicate about science with workers and managers in industry, government, nonprofit or lab-based settings

Audience: Graduate

4. Complete a project from conception through design to execution

Audience: Graduate

5. Pitch ideas for solutions to non-experts

Audience: Graduate

6. Prepare for a diverse set of career paths

Audience: Graduate

**PSYCH 799 – INDEPENDENT READING**

2-3 credits.

Directed study projects for graduate students as arranged with faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2018

**PSYCH 800 – COGNITIVE & NEUROPSYCHOLOGICAL ASSESSMENT FOR DIAGNOSIS**

2 credits.

Introduction to the major approaches and techniques used in the psychological assessment of cognitive functioning of children, adolescents, and adults, with special emphasis on intellectual evaluation. Other cognitive areas to receive focus include; attention, memory, executive function, language, and academic achievement.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PSYCH 802 – ASSESSMENT OF PSYCHOPATHOLOGY & PERSONALITY**

2 credits.

Introduces the use of structured and semi-structured interviews typically used in psychodiagnostic settings, including research. The assessment of major/common psychopathologies and personality diagnosis will be covered. Additionally, several of the most commonly used clinical self-report and personality measures will be introduced (e.g., PAI, MMPI, BASC).

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PSYCH 803 – ADVANCED TECHNIQUES IN PSYCHOTHERAPY**

3 credits.

An overview of empirically supported psychotherapeutic movements and their associated history, philosophical underpinnings, and techniques. Oriented toward the theoretical perspective, basic tenets, and the practical techniques/skills of each psychotherapy.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PSYCH 805 – FIELD WORK IN CLINICAL PSYCHOLOGY**

1-3 credits.

Supervised field work in practical clinical situations.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**PSYCH 806 – PRINCIPLES OF PSYCHOTHERAPY RESEARCH**

2 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**PSYCH 807 – INTRODUCTION TO CONDUCTING PSYCHOTHERAPY**

3 credits.

Introduces and allows practice with the skills needed to conduct individual psychotherapy using a cognitive behavioral approach. Includes interviewing skills, planning and initiating CBT interventions, and the administrative demands of clinical practice. Also includes conducting psychotherapy and participating in individual and group supervision of those therapeutic contacts. During supervision, the client's issues, goals, and progress, will be discussed, as well as the clinician's professional presentation, therapeutic approach and techniques, and communication skills.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**PSYCH 808 – CULTURE & DIVERSITY IN CLINICAL PRACTICE**

3 credits.

Becoming competent in working with diverse populations in psychotherapy is a complex interaction of many dimensions that involve broad theoretical, conceptual, research, and practice issues. Build multicultural competencies by increasing knowledge of ethnic, race, gender, sexual identity, religious affiliation, and age differences that contribute to each individual course of therapy. Applied examples of this "knowledge in practice" will be presented. Focuses on introducing the concepts of multicultural counseling and assessment, and more specifically on the diversity characteristics of race, ethnicity, and sexual orientation.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Recognize the importance of sensitivity, responsiveness, knowledge, and understanding about ethnicity, sexual orientation, gender identification, social class, age, ability and other characteristics to the ethical practice of clinical psychology.

Audience: Graduate

2. Understand how socio-political forces define and influence identity-based groups; and how these in turn influence the perception, definition, presentation, and treatment of mental health issues and psychological disorders.

Audience: Graduate

3. Demonstrate increased knowledge of current theories and models of individual development within different identity groups.

Audience: Graduate

4. Use culturally-appropriate interventions in clinical and other applied psychological practice.

Audience: Graduate

5. Self-reflect on their ability for self-reflection and awareness of their own attitudes and beliefs that can bias, both positively and negatively, their perceptions of and interactions with individuals who identify as members of specific groups.

Audience: Graduate

**PSYCH 809 – ETHICAL AND LEGAL ISSUES IN CLINICAL PRACTICE**

3 credits.

An introduction to the legal and ethical issues inherent to the conduct and process of professional clinical psychology. Reviews selected theories of moral philosophy, the American Psychological Association (APA) Ethical Principles and Codes of Conduct for Psychologists, other APA Standards and Guidelines and Wisconsin legal statutes governing the practice of psychology. Integrated with group case discussions and students. Use this as a forum to discuss ethical and legal issues pertinent to their ongoing clinical cases. Focuses on introducing ethical principles; Wisconsin statutes; ethics and legal obligations when clients report suicidal or homicidal thoughts/actions; reporting of neglect and abuse; and record keeping.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Use the process of active ethical acculturation by learning how to read, discuss, and appreciate the ethical dimensions of professional activities and behaviors, and how they fit with your personal values and background.

Audience: Graduate

2. Develop a working knowledge of the ethical principles, practice standards, regulations and laws governing the historical and current practice of clinical psychology.

Audience: Graduate

3. Develop awareness and understanding of the multiplicity of roles, responsibilities, and involvements of the professional clinical psychologist.

Audience: Graduate

4. Engage in ethical reflection and an appreciation of biases, attitudes, values, and beliefs, as part of a greater strategy for maintaining high levels of professional and ethical conduct.

Audience: Graduate

5. Engage in ethical decision making, including a systematic method of applying guidelines evaluating and resolving ethical dilemmas.

Audience: Graduate

6. Document the ethical decision-making process in order to defend professional decisions and actions.

Audience: Graduate

**PSYCH 810 – CLINICAL SUPERVISION, CONSULTATION, & COMMUNITY PSYCHOLOGY**

3 credits.

Introduction to supervision and consultation as unique practices. Focuses on purposes of clinical supervision and consultation, theoretical frameworks and models of supervision and consultation, the roles and relationships related to clinical supervision and consultation, and legal, ethical and multicultural issues associated with clinical supervision and consultation. Also includes skill development in building a working alliance with a supervisee; providing developmentally appropriate performance feedback; planning and communicating strategies to develop rapport and motivation to solve problems in clients; negotiation and mediation to reach consensus and move past barriers; understanding and appreciating the diverse cognitive, behavioral, and effective characteristics of supervisees; applying theoretical material to case presentations and related experiential activities.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Understand the purpose and practice of clinical supervision in different settings and have knowledge of, and be able to describe common theoretical frameworks and models of clinical supervision.

Audience: Graduate

2. Understand the roles and relationships related to clinical supervision and a developing awareness of how personal attitudes and values impact supervision.

Audience: Graduate

3. Identify factors impacting the interpersonal relationship between supervisor and supervisee, and describe steps to promote development of an effective supervisory relationship.

Audience: Graduate

4. Describe various supervision techniques and select appropriate techniques for use in different supervision situations.

Audience: Graduate

5. Assess the needs of therapists in training and develop techniques to help students develop into competent clinical psychologists.

Audience: Graduate

6. Understand the role and process of evaluation in the supervisory process, and be able to select or develop tools for evaluation.

Audience: Graduate

7. Understand the legal, ethical, and multicultural issues associated with clinical supervision, and be able to apply ethical reasoning when presented with dilemmas in practice.

Audience: Graduate

8. Understand of the theory and practice of community psychology.

Audience: Graduate

9. Understand of the theory and practice of consulting psychology

Audience: Graduate

**PSYCH 811 – COGNITIVE BEHAVIOR THERAPY**

1 credit.

Examines the theory and practice of Cognitive-Behavior Therapy (CBT). Focuses on core issues of CBT from both theoretical and applied perspectives through case conceptualization exercises, role-plays, and application of CBT exercises to themselves.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2022**PSYCH/B M I/COMP SCI 841 – COMPUTATIONAL COGNITIVE SCIENCE**

3 credits.

Studies the biological and computational basis of intelligence, by combining methods from cognitive science, artificial intelligence, machine learning, computational biology, and cognitive neuroscience. Requires ability to program.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PSYCH/I SY E 854 – SPECIAL TOPICS IN ORGANIZATION DESIGN**

1-3 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2020**Learning Outcomes:** 1. Apply advanced organizational design tools to solve a variety of industrial engineering problems

Audience: Graduate

2. Analyze rigorously the methods used in organizational design

Audience: Graduate

**PSYCH/I SY E 859 – SPECIAL TOPICS IN HUMAN FACTORS ENGINEERING**

1-3 credits.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**PSYCH 901 – MENTORING IN BEHAVIORAL DATA SCIENCE**

1-2 credits.

Learn how to mentor in the field of behavioral data science. Apply mentoring skills to a more junior student.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Explore multiple strategies for effective mentoring

Audience: Graduate

2. Understand how to apply key areas of mentoring (aligning expectations, effective communication, ethical behavior, active listening, assessing understanding, constructive feedback, time management, etc.)

Audience: Graduate

3. Develop skills for mentoring in behavioral data science

Audience: Graduate

4. Collaborate and problem-solve with peers

Audience: Graduate

5. Articulate mentor philosophy and personal development goals

Audience: Graduate

**PSYCH/ANTHRO 906 – METHODS AND HYPOTHESIS-TESTING FOR BEHAVIORAL ECOLOGISTS**

1-3 credits.

A detailed overview of field methods for behavioral ecologists, focusing specifically on behavioral and ecological sampling techniques. It addresses the challenging process of situating an empirical study within the context of theoretical paradigms.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**PSYCH 910 – PSYCHOMETRICS**

2 credits.

Focus on the construction, analysis, and interpretation of psychometric assessments, with an emphasis on concepts relevant to clinical psychology. Covers evolving issues in test theory. Extends beyond basic measurement concepts (scales, reliability, validity, bias, etc.) and critiques much of common practice from statistical and philosophical perspectives. Emphasizes that assessment always occurs in a societal context, which sometimes threatens validity.

**Requisites:** PSYCH 610 and declared in Psychology PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Learn the tenants of test theories (classical, IRT), with a focus on psychological tests.

Audience: Graduate

2. Learn to write good test items.

Audience: Graduate

3. Use factor analysis and reliability analysis to construct a scale.

Audience: Graduate

4. Evaluate different types of validity.

Audience: Graduate

5. Learn methods of evaluating bias and fairness of tests. Understand the impact of societal forces, such as racial discrimination, in evaluating test bias and fairness.

Audience: Graduate

6. Understand the use of tests for screening, including the roles of specificity, sensitivity, and base rates.

Audience: Graduate

7. Show the ability to engage in scholarly analysis with peers and the instructor by engagement on the discussion boards.

Audience: Graduate

8. Gain experience making narrated video presentations with Powerpoint or Keynote. By doing so, become responsible for part of the course content.

Audience: Graduate

**PSYCH 918 – SEMINAR-GENERAL PSYCHOLOGY**

1-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### PSYCH 930 – SEMINAR-SOCIAL PSYCHOLOGY

2-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

### PSYCH/GEN&WS 932 – PSYCHOLOGY OF WOMEN AND GENDER

3 credits.

Examines research and theory in psychology of women and gender. Topics include feminist approaches to research methods, psychological gender differences and similarities, women of color, mental health and feminist therapy, rape, sexual harassment, transgender issues and research, and public policy issues.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand psychological research and theories on women and gender, at a level of proficiency to be qualified to teach an undergraduate course on the psychology of women and gender, and/or begin to conduct psychological research on gender, and/or conduct more gender-sensitive therapy.

Audience: Graduate

2. Apply feminist approaches and critiques in psychology.

Audience: Graduate

3. Understand the enormous diversity among women and trans folks along dimensions of ethnicity, social class, and sexual orientation.

Audience: Graduate

### PSYCH 954 – SEMINAR-PHYSIOLOGICAL PSYCHOLOGY

2-3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

### PSYCH 990 – RESEARCH

1-12 credits.

Independent experimental, observational, or statistical investigation under the supervision of a staff member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### PSYCH/COUN PSY/ED PSYCH/RP & SE 995 – PREDOCTORAL INTERNSHIP

0 credits.

Registration for Ph.D. students who have successfully defended the dissertation and are in the process of completing the required predoctoral internship.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## PUBLIC AFFAIRS AND PUBLIC POLICY (PUB AFFR)

### PUB AFFR 200 – CONTEMPORARY PUBLIC POLICY ISSUES

3 credits.

Offers a general primer on large-scale policies directed by US federal and state governments, with specific examples in pressing policy areas. Takes existing policies and the policy process as a given, explains them in detail, and puts a policy focus on very specific contemporary questions of concern to policymakers. Gain a broad overall knowledge of how the majority of state and federal funding is spent and the policy outcomes associated with that spending.

**Requisites:** None

**Course Designation:** Breadth - Social Science Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of how the US federal budget is spent and US domestic policies.

Audience: Undergraduate

2. Gain knowledge and demonstrate application of methodological tools utilized in the public policy arena (e.g., policy memo writing,).

Audience: Undergraduate

3. Demonstrate understanding and application of knowledge regarding the policy, being able to apply basic policy concepts to practical cases drawn from the real-world.

Audience: Undergraduate

4. Engage in knowledgeable discussions about policy with researchers and policy experts.

Audience: Undergraduate

5. Assess and interpret empirical analyses of policies, and understand the effect of policy changes.

Audience: Undergraduate

6. Persuasively advocate for a proposed policy change.

Audience: Undergraduate

### **PUB AFFR 201 – INTRODUCTION TO HEALTH POLICY IN THE UNITED STATES**

3 credits.

Offers an introduction to health policy in the United States. Examines the ways in which government plays a role in the provision and regulation of health care. Explores key aspects of health policy including the economics of health care (e.g., paying for and access to health care; the health care workforce; the role of markets and consequences of market/government failures, public policy that supports or promotes health; health care outcomes, quality, and disparities; and tools for evaluation) and special topics of interest such as policy addressing risky health behaviors, aging, mental health, and the Affordable Care Act. Think critically about public and private health issues using the policy analysis process, including policy interventions and their justifications, and gain skills in articulating and communicating policy positions.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the basic organization and financing of the US public health and health care systems.

Audience: Undergraduate

2. Explain the biological, social, environmental, and economic determinants of population health.

Audience: Undergraduate

3. Discuss factors behind rising costs and approaches to health reform.

Audience: Undergraduate

4. Begin to develop skills in the policy analysis process as it relates to health policy.

Audience: Undergraduate

5. Analyze the effects of health policy at the local, state, and national level.

Audience: Undergraduate

6. Analyze special topics in health policy.

Audience: Undergraduate

### **PUB AFFR 230 – ADVANCING PUBLIC POLICY IN A DIVIDED AMERICA**

3 credits.

America is divided: at home, at work, and even in the media. This is true politically, as well. Given this, public policy conflict is all around us. Seek to understand and contextualize the partisan conflict present in modern American politics and policymaking today and explore individual-level tactics that public policy leaders, practitioners, and advocates may use that acknowledge conflict and attempt to move public policymaking forward. Explore ways in which policy conflict can be understood, managed, and channeled for the betterment of public policy decision-making in a divided America.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe methods for navigating, interpreting, and contributing to effective public policy decision-making.

Audience: Undergraduate

2. Apply several strategies for advancing public policy debates and discussions, including civility in dialogue and non-partisan policy analysis tactics.

Audience: Undergraduate

3. Persuasively advocate for a proposed policy change using writing, analytic, and communication skills.

Audience: Undergraduate

**PUB AFFR 240 – EVIDENCE-BASED POLICY MAKING**

3 credits.

Facilitates skill-building to answer questions such as how policymakers use research and evidence in their jobs, how researchers can make their work useful to policymakers, and how legislative support staff and other stakeholders use research and evidence to shape policy. Explore the definition of "evidence-based", learn about different kinds of evidence and how it is used, and learn strategies for judging the rigor of research evidence. Also explore the difference between an education-based approach to working with policymakers versus an advocacy-based approach, learn strategies for communicating research to policy makers (including written and oral presentations and data visualizations), research examples of successful evidence-based policymaking efforts, and understand the limits of using research in policymaking.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and utilize high quality sources of policy research information

Audience: Undergraduate

2. Engage in discussions of policy issues with researchers and policymakers using an education (vs. advocacy) approach

Audience: Undergraduate

3. Translate policy research into accessible written deliverables for policymakers (e.g., issue briefs)

Audience: Undergraduate

4. Develop accessible, useful verbal presentations of policy research for policymakers.

Audience: Undergraduate

**PUB AFFR 242 – FOUNDATIONS OF DATA ANALYSIS FOR HEALTH POLICY**

3 credits.

We have entered a new era of "big data." It is now possible to collect and analyze genetic information, digital health records, and many other types of data quickly, cheaply, and non-invasively from large numbers of people. This new wealth of information creates exciting opportunities for more targeted, individualized approaches to health care and better management of public health risks such as age-related diseases or pandemics. However, it also creates policy challenges such as privacy, discrimination, equality, and fairness. Covers what types of health-relevant data exist, how such data is typically analyzed and used, and discuss what types of applications this enables, what type of policy challenges this brings about, and which options policy makers have to deal with these challenges. Analytic methods will include regression, principal component and cluster analysis, statistical approaches for prediction, how to interpret the results of such analyses and their limitations.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify data sources and data usage that have relevance for public health

Audience: Undergraduate

2. Know and understand basic statistical methods that are frequently used in this context and their limitations

Audience: Undergraduate

3. Understand ethical and policy challenges that different data sources and applications create in the realm of public health

Audience: Undergraduate

4. Understand how to apply policy analysis and policy research to key debates

Audience: Undergraduate

5. Use critical analysis, practical problem-solving, and work inter-professionally

Audience: Undergraduate

### **PUB AFFR 270 – THE PRIVATE AND PUBLIC SECTORS IN POLICYMAKING**

3 credits.

In domestic and international policymaking, stark differences between the private sector (the market) and the public sector (the state) are dissolving. The private sector is being pushed to help achieve public policy goals, while the public sector is being pushed to be customer-oriented. Overall focus on the interplay of the public and private sectors in policymaking. Develops an analytic framework and historical context for understanding how the roles and interactions of states and markets have fluctuated across time. Examines how the policymaking "division of labor" between states and markets has differed across countries. Examines energy, health, telecommunications, finance, transportation, or other policy areas in which governments are wary about letting markets function without state intervention. Apply concepts from political science, economics, public administration, business, sociology, and other fields in order to understand actual policy choices for various policy issues.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Understand the history, context, complexity, and limitations of business/government relations in the U.S. and elsewhere

Audience: Undergraduate

2. Draw on concepts from political science, economics, public administration, business, and other fields to explain why business/government relations fluctuate (both across time and across countries)

Audience: Undergraduate

3. Use their knowledge of specific policy areas to engage in rational public discourse about the appropriate policymaking "division of labor" between the private sector and the public sector

Audience: Undergraduate

### **PUB AFFR 274 – TOPICS IN PUBLIC POLICY**

3 credits.

Intensive study of selected topics in public policy.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate understanding of a public policy issue or question.

Audience: Undergraduate

2. Think critically about solutions to public policy issues.

Audience: Undergraduate

3. Utilize knowledge of social, demographic, economic, and political contexts to analyze policies.

Audience: Undergraduate

### **PUB AFFR 278 – PUBLIC LEADERSHIP**

3 credits.

Aims to demystify the role of leadership in a public setting. Draw on research from public management, psychology and organization studies to help students learn how leadership manifests itself in the public sector. This means understanding how to set goals, the motivation of those around you, how to engage and negotiate with stakeholders, managing change, making decisions, and exhibiting ethical behavior. Mix research with practical examples. Starts with the assumption that while there are some general traits relevant across public, private and non-profit sectors, the nature of these sectors is different, and this affects how these traits function in practice.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate understanding of how leadership matters in current and past public policy debates

Audience: Undergraduate

2. Demonstrate application of methodological tools utilized in the public policy arena (e.g., policy memo writing,).

Audience: Undergraduate

3. Demonstrate understanding and application of knowledge regarding the leadership, but being able to apply basic concepts of leadership research to practical cases drawn from the real-world.

Audience: Undergraduate

4. Are able to reflect upon their own leadership skills, including areas to improve.

Audience: Undergraduate

**PUB AFFR 281 – DISCOVERING WHAT WORKS IN HEALTH POLICY**

3 credits.

Introduces the key conceptual and methodological tools used in public program evaluation, with an emphasis on understanding the forces that shape health and disease as well as various policy solutions. Introduces the Potential Outcomes Framework, also known as the Rubin Causal Model. Establishes the distinction between causation from correlation using counterfactual thinking. Explores a wide variety of experimental and quasi-experimental research methods used to estimate causal effects, including randomized experiments, regression, matching, instrumental variables, fixed effects, regression discontinuity, difference-in-differences, and synthetic control. Many of the causal inference methods that we discuss require statistical and computational training in order to implement. Focuses on the nontechnical conceptual, theoretical, and intuitive underpinnings of these methods that are most salient to policymakers.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Distinguish causal from correlational evidence in both general and academic texts

Audience: Undergraduate

2. Use the Potential Outcomes Framework to identify relevant counterfactuals

Audience: Undergraduate

3. Interpret the external and internal validity of an estimated causal effect

Audience: Undergraduate

4. Conceptually apply quasi-experimental methods to health policy issues

Audience: Undergraduate

5. Communicate the strengths and weaknesses of previous research into the causal effects of various health interventions

Audience: Undergraduate

**PUB AFFR 285 – STRATEGIC PUBLIC MANAGEMENT**

3 credits.

Designed to teach the role that strategy plays in maximizing the effectiveness and efficiency of a public organization. Work in a collaborative environment to learn how to design and implement strategic management plans with a specific focus on measurable goal setting through analytics, how to identify and mitigate organizational risks, motivate employees to execute strategy, and finally how to mobilize adequate financial resources through dynamic budgeting to ultimately achieve success. Learn about careers in the public sector and understand how strategic management will enhance individual performance and that of the public organization.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Learn the basic theory of strategic management in the public sector.

Audience: Undergraduate

2. Build and apply targeted strategies to meet operational goals.

Audience: Undergraduate

3. Measure and analyze the effectiveness of strategic management in the public sector.

Audience: Undergraduate

**PUB AFFR 299 – DIRECTED STUDY**

1-3 credits.

Program of study devised by a student in collaboration with an instructor.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, for 3 number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate understanding of a public policy issue or question.

Audience: Undergraduate

2. Apply knowledge of public policy issue to think critically about solutions to public policy issues.

Audience: Undergraduate

3. Analyze policies through knowledge of social, demographic, economic, and political contexts.

Audience: Undergraduate

**PUB AFFR 327 – ADMINISTRATIVE INTERNSHIP**

3 credits.

Provides opportunities for learning and working in organizations that integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting. Gain valuable applied experience and make professional connections in the field of public policy, apply concepts and practice problem solving-skills learned during the Certificate in Public Policy experience, build a network of contacts, and explore possible career choices. Engage with a wide range of people about their jobs, views, backgrounds, and experiences. Encourages active reflection on this experience and self-assessment through written assignments, reflections, and readings to help students make the most of their internships.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Gain practical professional experience in a public policy work setting and actively reflect on that experience.

Audience: Undergraduate

2. Improve understanding of public policy settings debates, and how to approach questions and research through the lens of public policy analysis.

Audience: Undergraduate

3. Demonstrate understanding and application of knowledge in a policy area of their choice.

Audience: Undergraduate

4. Engage fellow classmates in discussion about types of professional work and skills.

Audience: Undergraduate

5. Hone writing in the form of professional interviews, memos, and other papers.

Audience: Undergraduate

6. Examine experiences in and observations of the internship and to share and reflect on these insights.

Audience: Undergraduate

**PUB AFFR 335 – POLICY ACTORS, INSTITUTIONS, AND THE POLICY PROCESS**

3 credits.

Provides an overview of the variety of political actors (bureaucrats, elected politicians, courts, interest groups, media outlets, the public) involved in the policy process, and what's distinct about policymaking today; a focus on policy implementation, drawing on concepts, tools and theory from public administration, public management, and organizational behavior. Learn concepts and skills through hands-on activities such as case studies, simulations, policy writing, and debates.

**Requisites:** POLI SCI 104 and sophomore standing**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the nature and origins of public policy.

Audience: Undergraduate

2. Identify the key institutions that govern public policy in the United States and how those institutions shape processes and outcomes.

Audience: Undergraduate

3. Articulate strategies for effective development and implementation of public policy.

Audience: Undergraduate

**PUB AFFR 340 – INTERMEDIATE EVIDENCE-BASED POLICYMAKING AND COMMUNICATION**

3 credits.

Many types of evidence can be incorporated into the policy process. Evidence is interpreted while considering quality and ethics, and effectively translated from scientific sources into useful communications and data visualizations. Evidence is examined from across a wide range of policy areas including healthcare, poverty, climate change, among others – all while considering the current reality of big data and algorithmic information environments. A broad understanding is required to translate evidence meaningfully and ethically into the design, implementation, and evaluation of public policy.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) and (ECON 310, PSYCH 210, SOC/C&E SOC 360, STAT 240, 301, 324, or 371)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify different types of evidence and evaluate their appropriateness for policy problems, with a focus on research design, data quality, and ethics.

Audience: Undergraduate

2. Critique the ways that evidence is used (or not used) in the policy process, including analyzing real world cases and decision-making under uncertainty.

Audience: Undergraduate

3. Engage with researchers, policymakers, and the public in informed policy discussions using evidence and strategic communication approaches.

Audience: Undergraduate

4. Synthesize evidence about complex policy problems into professional written and visual communications tailored to different audiences.

Audience: Undergraduate

**PUB AFFR 352 – WOMEN, GENDER, AND PUBLIC POLICY**

3 credits.

Examine women, gender, and sex and their interactions with public policy. Learn about equality, liberty, feminism, and intersectionality, whether these concepts should be incorporated into policymaking, and if so, how that can be accomplished through gender mainstreaming and gender policy analysis. Examine specific policy areas focused on women's social, economic, and political citizenship to understand the causes and consequences of gender discrimination. These specific policy areas include poverty, women's labor market participation, immigration, reproductive rights, sexuality, gender-based violence, climate change, transportation, and peace and security. Understand how gender is embedded in the politics of policymaking, and what strategies have been successful in achieving more gender-equitable policies across the globe.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the extent to which gender influences political and policy interests.

Audience: Undergraduate

2. Illustrate the causes and consequences of current and historical inequities based on gender and sex, and how policymakers have tried to address them.

Audience: Undergraduate

3. Compare similar gendered policy problems across diverse global contexts.

Audience: Undergraduate

4. Apply concepts integral to intersectional gender policy analysis and critique current methods of policy analysis.

Audience: Undergraduate

5. Summarize the role of equity and inclusion in the public policymaking process.

Audience: Undergraduate

**PUB AFFR 360 – WORKSHOP IN HEALTH POLICY**

3 credits.

Provides opportunities to engage in research on health policy issues and possible solutions.

**Requisites:** PUB AFFR 201 and sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Navigate, interpret, and contribute to effective health policy through an applied project

Audience: Undergraduate

2. Apply analytical and methodological tools used in the health sector

Audience: Undergraduate

3. Write and present information with the goal of inspiring evidence based policymaking

Audience: Undergraduate

**PUB AFFR 366 – U.S. ENVIRONMENTAL POLITICS AND PUBLIC POLICY**

3 credits.

Public policies to protect natural resources and the environment are among the most important and controversial issues in local, state, and national government. Social science theories and methods help explain why and how American governments regulate the environment.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Understand how public opinion and political institutions shape American environmental policy.

Audience: Undergraduate

2. Identify the governance regimes that regulate air pollution, water quality, hazardous waste, endangered species, and greenhouse gasses in the United States.

Audience: Undergraduate

3. Advocate effectively for sound governance of environmental quality.

Audience: Undergraduate

**PUB AFFR 369 – WORKSHOP IN PUBLIC POLICY**

3 credits.

Provides opportunities to engage in research on public policy issues and possible solutions.

**Requisites:** PUB AFFR 200 and sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Navigate, interpret, and contribute to effective public policy through an applied project

Audience: Undergraduate

2. Apply analytical and methodological tools used in the public sector

Audience: Undergraduate

3. Write and present information with the goal of inspiring evidence based policymaking

Audience: Undergraduate

**PUB AFFR 380 – ANALYTIC TOOLS FOR PUBLIC POLICY**

3 credits.

Provides training in the analytical skills and tools needed to comprehend, assess, and address complex public policy decisions. Overview of the theory and application of quantitative and qualitative analysis methods relevant to public policy decision-making and policy analysis.

**Requisites:** ECON 101 or A A E 101 (215 prior to Fall 2024)

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize foundational concepts in public policy analysis, including stakeholders, policy instruments, and evaluation techniques.

Audience: Undergraduate

2. Identify and apply methods for evaluating policy effectiveness, efficiency, and equity.

Audience: Undergraduate

3. Illustrate rationales for and limitations to collective action and public policy.

Audience: Undergraduate

4. Be proficient in critically analyzing examples of cost benefit analysis within the context of public policy.

Audience: Undergraduate

5. Communicate complex analyses and policy recommendations clearly through professional writing and presentations.

Audience: Undergraduate

### **PUB AFFR/POLI SCI 419 – ADMINISTRATIVE LAW**

3-4 credits.

Delegation of powers, elements of fair administrative procedure, judicial control over administrative determination. Not open to students with credit for POLI SCI 420 prior to fall 2017

**Requisites:** Sophomore standing and (POLI SCI 104, 184, or LEGAL ST/ POLI SCI 217)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Examine the role that federal administrative agencies play in the U.S. political and legal system.

Audience: Undergraduate

2. Investigate the institutional context and ideological character of administrative law and agency practices.

Audience: Undergraduate

3. Examine classic debates over the origins of regulation.

Audience: Undergraduate

4. Understand competing legal philosophies about democratic administrative regulation.

Audience: Undergraduate

5. Examine political struggles to control the bureaucracy.

Audience: Undergraduate

6. Understand how agencies use adjudication and rulemaking to effectuate their policies.

Audience: Undergraduate

### **PUB AFFR 520 – INEQUALITY, RACE AND PUBLIC POLICY**

3 credits.

Explore the impact of public policies and programs on the distribution of income, wealth and opportunity in the United States. Examines inequalities across various social dimensions with a focus on disparities across racial and ethnic groups. Begin with an introduction to key concepts in the measurement of inequality and poverty and an overview of recent trends. Systematically examine how public policy shapes inequality across a range of topical areas including labor markets, education, taxation, health, housing and criminal justice.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PUB AFFR 523 – POLICY, PRIVACY, AND PERSONAL IDENTITY IN THE POSTGENOMICS ERA**

3 credits.

Social genomics integrates theories and methods in the genomic, social, and population health sciences to answer questions relevant to public health and social well-being. Research topics in social genomics and their implications for social and public policy are covered in this course. Key concepts in human genetics, population genetics, and statistical genetics are introduced, as well as historical and contemporary policy debates surrounding scientific advances in genomics. Fundamental questions include social repercussions of genomics research, the rationale for government intervention, and how to approach policy analysis in an era where the genomic revolution is changing how we think about privacy and personal identity.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Use knowledge of human genetics to engage in rational public discourse on policy issues surrounding genetic discoveries.

Audience: Undergraduate

2. Consider the history, social context, limits, and complexity of genomics research when framing policy problems or making policy recommendations.

Audience: Undergraduate

3. Understand how and to what extent social forces influence the interpretation of scientific findings and policy recommendations.

Audience: Undergraduate

### **PUB AFFR/ECON/POP HLTH 548 – THE ECONOMICS OF HEALTH CARE**

3-4 credits.

Analysis of the health care industry. Markets for hospitals and physicians' care, markets for health manpower, and the role of health insurance.

**Requisites:** ECON 301, ECON 311, or PUB AFFR 880

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PUB AFFR/CIV ENGR 694 – MANAGEMENT OF CIVIL INFRASTRUCTURE SYSTEMS**

3 credits.

Comprehensive systems approach to civil infrastructure and asset management with emphasis on transportation facilities. Social, political, economic factors that influence transportation planning, design, construction, maintenance and operation. Needs assessment, information management, performance measurement, life cycle cost and benefits analysis, prioritization and optimization, budgeting and finance.

**Requisites:** CIV ENGR 494, or graduate/professional standing, or member of Engineering Guest Students

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### **PUB AFFR/ECON/URB R PL 734 – REGIONAL ECONOMIC PROBLEM ANALYSIS**

3 credits.

Examination of major theories of regional economic development, with special emphasis upon the evolution and amelioration of regional economic problems. Selected techniques of regional analysis, including economic base multipliers, input/output models, and shift-share analysis are used in the context of setting regional development goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **PUB AFFR/ED POL/ELPA 765 – ISSUES IN EDUCATIONAL POLICY ANALYSIS**

3 credits.

Theory, research, and practical experience in educational policy analysis, including the social construction of policy problems in education; the design, implementation, and evaluation of policy responses; and the practical and ethical dilemmas of the policy analyst.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **PUB AFFR 799 – INDEPENDENT READING**

1-3 credits.

Program of study devised by a student in collaboration with an instructor.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **PUB AFFR 800 – PUBLIC AFFAIRS PROFESSIONAL DEVELOPMENT WORKSHOP**

1 credit.

Includes sessions on professional writing, presentations, and job search skills training related to policy internships and jobs. Includes presentations from practitioners from the public, private, and non-profit sectors.

**Requisites:** Declared in Public Affairs MPA or International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **PUB AFFR 802 – PUBLIC AFFAIRS SEMINAR SERIES**

1-2 credits.

Provides an opportunity to cross disciplinary boundaries to review and discuss the latest research by top public management, policy, and poverty scholars from on and off campus. The seminar series provides new and unpublished research on these issues as well as practitioner insight.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **PUB AFFR/ED POL/GEN&WS 805 – GENDER ISSUES IN INTERNATIONAL EDUCATIONAL POLICY**

3 credits.

Exploration and analysis of recent debates related to gender issues in international educational policy, including the intersection of education and demographic processes, the play of history and culture, and the social construction of gender.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **PUB AFFR/ENVIR ST/URB R PL 809 – INTRODUCTION TO ENERGY ANALYSIS AND POLICY**

3 credits.

Strategy and policy problems in energy policy, both national and international.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**PUB AFFR/ENVIR ST/URB R PL 810 – ENERGY ANALYSIS AND POLICY CAPSTONE**

3 credits.

Interdisciplinary application of energy knowledge to an analysis project for a real-world client. Integrate and apply technical, economic, political, and social factors in energy decision-making.

**Requisites:** Declared in Energy Analysis and Policy Graduate/Professional Certificate or Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Conduct an original analysis by collecting and interpreting data on an energy-related issue for areal-world client.

Audience: Graduate

2. Integrate and apply multiple disciplinary perspectives such as technical, economic, socio-political, and environmental factors in the context of complex energy problems.

Audience: Graduate

3. Prepare for energy-related careers by: planning and managing a project over multiple months; interacting professionally with client; working effectively in multidisciplinary teams; and producing professional-quality deliverables such as presentations and reports in accordance with scope of work.

Audience: Graduate

4. Analyze the causes and solutions for the sustainability challenge of affordable and clean energy.

Audience: Graduate

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Graduate

**PUB AFFR 818 – INTRODUCTION TO STATISTICAL METHODS FOR PUBLIC POLICY ANALYSIS**

3 credits.

An introduction to the statistical methods used in public policy. Covers the basics of probability, statistics, and quantitative methods in public policy analysis. Stresses interpretation and presentation of data as well as theory.

**Requisites:** Declared in Public Affairs MPA or International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PUB AFFR 819 – ADVANCED STATISTICAL METHODS FOR PUBLIC POLICY ANALYSIS**

3 credits.

A review of intermediate statistics, and an introduction to analytical, quantitative and computer techniques applicable to the analysis of public policy.

**Requisites:** PUB AFFR 818

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PUB AFFR 820 – COMMUNITY ECONOMIC ANALYSIS**

3 credits.

Economic theory (location and growth) applicable to community economic development; the role of private and public sector in local economic development, and techniques for economic analysis of community.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PUB AFFR 827 – ADMINISTRATIVE INTERNSHIP**

1-3 credits.

Provides opportunities for learning and working in organizations that integrate knowledge and theory learned in the classroom with practical application and skills development in a professional setting.

**Requisites:** Declared in Public Affairs MPA or International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**PUB AFFR 850 – INTERNATIONAL GOVERNANCE**

3 credits.

Examines influences arising from international environment on policy makers and those seeking to influence policymaking. Considers role of global economic forces, international and regional organizations, international civil society reflected in non-governmental organizations, and flow of policies across borders.

**Requisites:** Declared in Public Affairs MPA or International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **PUB AFFR 854 – MACROECONOMIC POLICY AND INTERNATIONAL FINANCIAL REGULATION**

3 credits.

An introduction to international macroeconomic and financial policies with an emphasis on the interaction between domestic policies, and international financial markets, regulations and institutions.

**Requisites:** PUB AFFR 880 and declared in International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **PUB AFFR 856 – TRADE, COMPETITION, AND GOVERNANCE IN A GLOBAL ECONOMY**

3 credits.

Policy oriented course in international micro-economics and trade theory; including economic and institutional analysis of U.S. trade policy and the world trading system; issues covered include regional trading average; labor standards, income distribution and the environment.

**Requisites:** PUB AFFR 818 and 880

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### **PUB AFFR 857 – POLITICAL ECONOMY OF CORRUPTION AND GOOD GOVERNANCE**

3 credits.

Surveys wide range of multidisciplinary research on causes and consequences of widespread corruption and experiences of anticorruption reform strategies, with focus on developing countries. Considers role of international organizations, multinational companies, and regional agreements in building good governance globally.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### **PUB AFFR 860 – WORKSHOP IN INTERNATIONAL PUBLIC AFFAIRS**

3 credits.

Workshop in program evaluation and policy analysis taught through student teams working on real-world international issues for agencies in the public, private, and non-profit sectors. Teaches analytical skills, report preparation and writing, and presentation of results.

**Requisites:** PUB AFFR 873 and declared in International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **PUB AFFR 863 – HEALTH SYSTEMS AND POLICY**

3 credits.

Explore factors that influence health outcomes in the United States.

Review policies that affect the organization and financing of health care and public health systems. Apply systems approaches to evaluate health policy and health outcomes in the United States. Apply practical strategies to understand and communicate about health challenges and policy approaches to improve population health within complex, dynamic systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe key historical patterns, events, and groups that have shaped medical care and public health organization, financing and delivery in the US.

Audience: Graduate

2. Identify key factors that influence population health outcomes, and compare those to other industrialized countries.

Audience: Graduate

3. Understand how policy analysis can contribute to advancing approaches to key debates in health policy.

Audience: Graduate

4. Gain skills to approach problems that emerge out of complex, dynamic systems.

Audience: Graduate

5. Build skills in critical analysis, communication, and working interprofessionally.

Audience: Graduate

### **PUB AFFR 864 – HEALTH POLICY AND POLICY DESIGN**

3 credits.

Survey health care policy in the United States, including examination of the design of health policy and the politics of health care reform.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### **PUB AFFR/ENVIR ST/POLI SCI 866 – GLOBAL ENVIRONMENTAL GOVERNANCE**

3 credits.

In-depth examination of the political and policy challenges posed by global environmental degradation. Analysis of international institutions for managing the global environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **PUB AFFR 869 – WORKSHOP IN PUBLIC AFFAIRS**

3 credits.

Workshop in program and policy analysis taught through student teams working on real problems for public agencies and organizations; teaches analytical skills, report preparation and writing; and presentations of results.

**Requisites:** PUB AFFR 873 and declared in Public Affairs MPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate critical thinking skills by examining strengths and weakness of public policy literature, evaluating evidence for and against hypotheses, synthesizing knowledge, and developing conclusions.

Audience: Graduate

2. Effectively summarize and clearly communicate data, real world policy problems, and policy literature for a general audience or policy audience.

Audience: Graduate

3. Apply tools of policy analysis to investigate a policy problem and provide advice to a client audience to mitigate the problem while maintaining fidelity to objective social science-based research methods.

Audience: Graduate

4. Identify and appropriately respond to scenarios involving the ethical and professional responsibilities of public administration and adhere to high levels of professional conduct, ethical decision making and legal and regulatory compliance.

Audience: Graduate

5. Demonstrate the ability to maintain human subject protections when designing studies, collecting data and reporting results.

Audience: Graduate

6. Demonstrate effective project management and teamwork.

Audience: Graduate

### **PUB AFFR/POLI SCI 871 – PUBLIC PROGRAM EVALUATION**

3 credits.

Compares the conceptual, statistical, and ethical issues of experimental, quasi-experimental and non-experimental designs for program evaluation. Definitions of outcomes, sample size issues, statistical biases in measuring causal effects of programs, and the reliability of findings will be emphasized using case studies selected from current public programs.

**Requisites:** PUB AFFR 818

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **PUB AFFR 873 – INTRODUCTION TO POLICY ANALYSIS**

3 credits.

Develops skills in policy analysis in two ways. First, sets out the conceptual foundations for understanding the role of policy analysis in democratic politics. Second, provides training and experience in policy analysis craft.

**Requisites:** PUB AFFR 880 and declared in Public Affairs MPA or International Public Affairs MIPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**PUB AFFR/POLI SCI/URB R PL 874 – POLICY-MAKING PROCESS**

3 credits.

Examines the political, social, and economic contexts that shape and are shaped by policy making processes. Though the focus is on the US, international comparisons will be made, and students are encouraged to think about the American context through comparative and international perspectives. Familiarizes students with dominant theories and models of policymaking process and policy change, starting with the model of the policy cycle. Focuses in on key topics and issues in policy making, specifically, agenda setting, implementation, and the relationships between policymaking and democracy. Reflects on contemporary and emerging issues and dilemmas of the politics of policy making.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify important contextual aspects of policy making processes, of dominant theories, models and conceptual frameworks of policy processes, and of key issues and topics in policy making.

Audience: Graduate

2. Critically analyze theories and evidence presented in readings and describe debates, past and present, surrounding public policy making processes.

Audience: Graduate

3. Read and comprehend academic research, data, and writing as well as journalistic writings on relevant issues of public policy processes and politics.

Audience: Graduate

4. Communicate summaries and analyses of topics, issues and key readings in class discussions, presentations, and writing assignments. Use clear written language and draw on theories, concepts, and evidence to support their arguments and ideas.

Audience: Graduate

5. Maintain fidelity to objective social science-based research methods.

Audience: Graduate

6. Prepare a high-quality presentation and communicate effectively as a speaker.

Audience: Graduate

**PUB AFFR/POLI SCI/URB R PL 878 – PUBLIC MANAGEMENT**

3 credits.

Role of administration in American government; problems of organization, bureaucracy and control; public policy as the output of the administrative process.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**PUB AFFR 880 – MICROECONOMIC POLICY ANALYSIS**

3 credits.

The tools and techniques used in the economic approach to policy analysis. Emphasis is on applying these methodological tools to evaluating existing public policies and policy alternatives, as well as providing a deeper understanding of how the economy operates.

**Requisites:** Declared in Public Affairs MPA or International Public Affairs MIPA**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**PUB AFFR/A A E/ENVIR ST/POP HLTH 881 – BENEFIT-COST ANALYSIS**

3 credits.

Presents the welfare economics underpinnings for evaluating the social benefits and costs of government activities. Issues such as uncertainty, the social discount rate, and welfare weights will be discussed; case studies from the environmental, social policy, and agricultural areas will be studied.

**Requisites:** Graduate/professional standing and (PUB AFFR 818 and 880), or POP HLTH/ISY E 875, or A A E 635**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the basic mechanics of performing a Cost Benefit Analysis, including methods for valuing costs and benefits, aggregating over time, and analyzing uncertainties.

Audience: Graduate

2. Evaluate the strengths and weaknesses of different CBAs and propose strategies to address any shortcomings.

Audience: Graduate

3. Debate the advantages and limitations of CBA for public policy and compare it to other approaches.

Audience: Graduate

4. Create a CBA for a real-world client from beginning to end, including scoping, background research, valuation of costs and benefits, uncertainty analysis, and interpretation.

Audience: Graduate

**PUB AFFR/POLI SCI 885 – ADVANCED PUBLIC MANAGEMENT: CRAFT, CONSTRAINTS AND ACCOUNTABILITY**

3 credits.

Examines how managers in public and not-for-profit agencies can secure and utilize legal authority, human resources, and funds to accomplish organizational goals. Includes strategies for establishing and maintaining effective external relations and for working through other organizations to accomplish objectives.

**Requisites:** URB R PL/POLI SCI/PUB AFFR 878**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023

**PUB AFFR 888 – COMPARATIVE AND NATIONAL SOCIAL POLICY**  
3 credits.

An overview of the American system of public policy toward human resources, with an emphasis on how the American system compares with other nations' approaches to social welfare policy. Other nations include OECD nations as well as emerging middle income countries in Asia and Latin America. Social welfare policy is analyzed as three major branches: health, education and welfare.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PUB AFFR 891 – STATE AND LOCAL GOVERNMENT FINANCE**  
3 credits.

Explores the spending and tax policies of state and local governments. Focus on factors influencing the mix and level of public spending and the choice of revenue sources. Issues to be studied include the fiscal relations between governments and property tax.

**Requisites:** PUB AFFR 880

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**PUB AFFR 892 – PUBLIC BUDGETING**  
3 credits.

Provides an understanding of budget preparation, adoption and execution; proposed reforms of the budget process; and competing theories of the politics of budgeting. Focuses on the expenditure aspect of budgeting.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**PUB AFFR 974 – TOPICS IN PUBLIC AFFAIRS**  
3 credits.

Current issues in the formulation, implementation, and analysis of public policy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**PUBLIC HEALTH (PUBLHLTH)****PUBLHLTH 700 – TOPICS IN PUBLIC HEALTH**  
1-3 credits.

Special topics in public health.

**Requisites:** Declared in Master of Public Health program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Apply, analyze, or evaluate advanced theories, concepts, or methods in public health

Audience: Graduate

## **PUBLHLTH 710 – INTRODUCTION TO GLOBAL HEALTH: HISTORY, CURRENT ISSUES, AND HEALTH STATISTICS**

2 credits.

Provides opportunities that facilitate learning in the areas of global health history and contemporary issues; global health frameworks, policies, and assessing and critically evaluating data; the socioecological model for global health, health equity and disparities; and, global health communication. Presumes some background and understanding of basic principles of health and addresses topics at a graduate level.

**Requisites:** Graduate/professional standing, or declared in the Capstone Certificate in Global Health Online

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare and contrast the current definitions of “global health” from both historical perspectives and usefulness in addressing today’s major global health challenges.

Audience: Graduate

2. Critique the concept that global-local-global continuum thinking can positively impact contemporary problems that affect populations both locally and abroad.

Audience: Graduate

3. Evaluate commonly used global health frameworks (e.g., Alma Atta, MDGs/SDGs) for the likelihood that they will positively impact health in the next 20 years.

Audience: Graduate

4. Debate whether ‘Health as a Human Right’ should be explicitly present in the Sustainable Development Goals.

Audience: Graduate

5. Analyze the intersections of data and policy for their impacts on health outcomes.

Audience: Graduate

6. Assess the importance and challenges of accurate surveillance data in designing policy interventions.

Audience: Graduate

7. Explain social determinates of health and health equity obstacles within global health trends (e.g. urbanization, globalization) and outcomes (global health disparities).

Audience: Graduate

8. Defend the opinion that the Social Ecological Model of well-being can be applied to the field of global health.

Audience: Graduate

9. Evaluate the roles of at least three organizations in maximizing health security and effective health communications.

Audience: Graduate

10. Analyze whether social marketing can not only communicate health information but also improve outcomes.

Audience: Graduate

## **PUBLHLTH 711 – GLOBAL PUBLIC HEALTH AND HEALTHCARE SYSTEMS: ORGANIZATIONS, GOVERNANCE, FINANCING, AND WORKFORCE**

2 credits.

Provides opportunities that facilitate learning in the areas of global health systems, organizations, governance, and financing; global health security; emergency medical services and injury epidemiology; health in complex emergencies, and, health issues in refugee, immigrant, and internally-displaced persons. Presumes some background and understanding of basic principles of health and addresses topics at a graduate level.

**Requisites:** Graduate/professional standing, or declared in the Capstone Certificate in Global Health Online

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze successful and unsuccessful global public health systems using at least five key components

Audience: Graduate

2. Discuss the overlapping roles and governance structures of global health development and oversight organizations (e.g. World Health Organization, World Bank), NGOs (e.g. MSF: Médecins San Frontières) and governments (e.g. Ministries of Health, USAID: United States Agency for International Development )

Audience: Graduate

3. Evaluate the ten action packages established by the Global Health Security Agenda (GHSA) for their potential abilities to enhance health and well-being around the world

Audience: Graduate

4. Prioritize the ten action core principles of the Global Health Security Agenda 2024 framework for their role in addressing one global health issue of your choosing

Audience: Graduate

5. Compare and contrast the abilities of different Global Emergency Medical Services and Emergency Health Systems to decrease the burden of disease of injury worldwide

Audience: Graduate

6. Defend the concept that conflict, terrorism and natural disasters have a greater impact on the health of immigrant and displaced people than on more stable populations

Audience: Graduate

7. Explain the challenges to the successful implementation of disaster management planning and response

Audience: Graduate

8. Recommend and defend at least three ways that “brain drain” in global health workforce could be reduced

Audience: Graduate

9. Explain how interprofessional collaboration impacts global workforce development

Audience: Graduate

**PUBLHLTH 712 – GLOBAL HEALTH: INFECTIOUS DISEASES, ONE HEALTH, AND PREVENTION STRATEGIES**

2 credits.

Provides opportunities that facilitate learning in the areas of communicable disease surveillance, prevention strategies, and management, including AIDS, tuberculosis, malaria; dengue and other vectorborne diseases; neglected tropical diseases; vaccine preventable diseases; One Health and zoonotic diseases; novel disease emergence; WASH programs (water, sanitation, and hygiene); and bioterrorism. Presumes some background and understanding of basic principles of health and addresses topics at a graduate level.

**Requisites:** Graduate/professional standing, or declared in the Capstone Certificate in Global Health Online

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine how the epidemiology of HIV/TB/ malaria and challenges in the management of these diseases impact the effectiveness of control strategies.

Audience: Graduate

2. Analyze how the unique features of vector borne diseases and parameters of climate change impact control strategies.

Audience: Graduate

3. Evaluate the historical and current impacts of immunizations on the epidemiology of vaccine preventable diseases.

Audience: Graduate

4. Analyze the historical factors and current drivers of vaccine hesitancy and evaluate potential strategies to manage this public health challenge.

Audience: Graduate

5. Debate the concept that disparities in resources are the primary driver of the epidemiology of Neglected Tropical Diseases.

Audience: Graduate

6. Differentiate the roles of animals in the primary patterns of “zoonotic diseases” transmission between humans and animals.

Audience: Graduate

7. Compare and contrast the different communicable disease surveillance methodologies.

Audience: Graduate

8. Explain the characteristics of pathogens that are needed to make them bioterrorism weapons.

Audience: Graduate

9. Evaluate the factors that have led to the rise of antimicrobial resistance and the role of antimicrobial stewardship and infection control techniques for prevention.

Audience: Graduate

10. Explain how the following communicable disease transmission patterns differ from one another: “endemic,” “epidemic,” “pandemic,” and “outbreak.”

Audience: Graduate

11. Defend the role of one of the following in the origins of emerging and novel pathogens: pathogen evolution; human behavior; inadequate public health infrastructure; or, ecological factors.

Audience: Graduate

**PUBLHLTH 713 – GLOBAL HEALTH: NON-COMMUNICABLE DISEASES, POVERTY, ENVIRONMENTAL HEALTH, AND FOOD SECURITY**

2 credits.

Provides opportunities that facilitate learning in the areas of globally important non-communicable diseases, including but not limited to type 2 diabetes, hypertension, and developmental and acquired disabilities; the global epidemiology of non-communicable diseases; health determinants and indigenous health beliefs and practices; mental health and wellness, including interpersonal violence and opioid abuse; and, food security, nutrition, and obesity. Presumes some background and understanding of basic principles of health and addresses topics at a graduate level.

**Requisites:** Graduate/professional standing, or declared in the Capstone Certificate in Global Health Online

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare and contrast the principles of demographic transition, epidemiologic transition and nutrition transition.

Audience: Graduate

2. Analyze the role of five categories of social determinants of health in the development and successful management of non-communicable diseases.

Audience: Graduate

3. Predict ways in which traditional medical beliefs/practices could positively and negatively affect health outcomes for a non-communicable disease.

Audience: Graduate

4. Categorize how the challenges of prevention, diagnosis, management and cure are the same or different for communicable and non-communicable diseases.

Audience: Graduate

5. Defend the statement that the “dual burden of disease” reduces the capacity of low-resource health systems to improve public health outcomes.

Audience: Graduate

6. Assess the challenges that both types of malnutrition (over-nutrition, under-nutrition) pose for the health and well-being of individuals, communities and nations.

Audience: Graduate

7. Justify the fundamental relationship between mental health and overall wellbeing, including an evaluation of how societal norms, the legal system and the pharmaceutical supply chain affect the management of mental health.

Audience: Graduate

**PUBLHLTH 714 – GLOBAL HEALTH FIELD WORK  
FUNDAMENTALS: ENGAGEMENT, ETHICS, POLICY, AND  
METHODS**

2 credits.

Provides opportunities that facilitate learning in the areas of global health studies, engagement, and health data; ethics of global health engagement and international aid; global health research and quality improvement, including human subjects research and the IRB processes; and, international travel planning. Presumes some background and understanding of basic principles of health and addresses topics at a graduate level.

**Requisites:** Graduate/professional standing, or declared in the Capstone Certificate in Global Health Online

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine how international health statistics can be used to effectively describe the wellbeing of communities.

Audience: Graduate

2. Develop a framework of ethical considerations for grants and partnerships between HICs and LMICs.

Audience: Graduate

3. Analyze the relationship that power disparities can have in promoting inequalities.

Audience: Graduate

4. Evaluate the impact of systems, research methods and regulations in the complex framework of global health.

Audience: Graduate

5. Recommend and prioritize components of pre-travel planning for international work, including considerations for how to avoid common problems while abroad.

Audience: Graduate

6. Justify the concepts that culture is a very significant factor for effectively working in a global setting and that biases can negatively impact effective communication.

Audience: Graduate

**PUBLHLTH 715 – GLOBAL HEALTH ISSUE ANALYSIS**

1 credit.

A structured independent study experience to research a major global health issue, including interviews with local key informants, integrating previous educational experiences in global health.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Design and execute a professional literature review

Audience: Graduate

2. Find and organize data from global health databases to justify the importance of a chosen global health issue

Audience: Graduate

3. Develop key informant questions and interview key informants to gain meaningful information

Audience: Graduate

4. Analyze key informant data (qualitative analysis) and integrate the information into summary statements

Audience: Graduate

5. Create health intervention plans and policy briefs

Audience: Graduate

6. Defend conclusions and ideas in oral and written communications

Audience: Graduate

**PUBLHLTH 716 – STUDY ABROAD GLOBAL HEALTH FIELD  
EXPERIENCE**

1-4 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Current enrollment in a UW-Madison study abroad program.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Identify and analyze key theories, core concepts, and their application in global health

Audience: Graduate

**PUBLHLTH/NURSING/PHARMACY/PHY ASST/PHY THER 758 – INTERPROFESSIONAL PUBLIC HEALTH LEADERSHIP**

1 credit.

Build skills in collaboration, problem solving, and reflection to approach complex community-based public health problems contribute to becoming a public leader. Explore the six levels of public health leadership through the practices of current and past public health leaders, case studies, and personal experience.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Describe the roles and responsibilities of their profession with all participating health professional students, while examining the roles and responsibilities of all other health professions.  
Audience: Graduate

2. Compare and contrast the diversity of expertise among participating health professions.  
Audience: Graduate

3. Apply their profession's roles and responsibilities to case studies that address complex public health issues.  
Audience: Graduate

4. Describe what it means to be part of an interprofessional team and illustrate how the different professions and systems can complement and facilitate one another in addressing public health issues.  
Audience: Graduate

5. Apply the principles of public health leadership via reflective exercises, case studies and facilitated discussion.  
Audience: Graduate

6. Promote a public health cause or principle through legislative advocacy.  
Audience: Graduate

7. Elucidate the importance of reflection as a life-long learning and leadership tool.  
Audience: Graduate

**PUBLHLTH 777 – CLINICAL MEDICINE AND PUBLIC HEALTH**

2 credits.

Addresses the interface between the practice of clinical medicine and evidence-based approaches to public health needs and issues and community health improvement. A focus on emerging issues and opportunities to work with community-based public health practitioners while exploring career goals and the intersection between clinical medicine and public health.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate the importance of a comprehensive approach to public health and clinical medicine  
Audience: Graduate

2. Compare different career paths available to clinical professionals with public health training  
Audience: Graduate

3. Analyze the healthcare system, function and structures  
Audience: Graduate

4. Evaluate points of synergy between clinical and public health work, especially leveraging both partnering and professional organizations  
Audience: Graduate

5. Develop and apply strategies to work collaboratively in interprofessional groups within the class and with communities  
Audience: Graduate

6. Develop expertise in messaging and framing techniques for clinical medicine and public health advocacy.  
Audience: Graduate

**PUBLHLTH 780 – EVIDENCE-BASED DECISION-MAKING**

3 credits.

An interprofessional course addressing evidence-based approaches to public health needs and issues and community health improvement. Features problem-based learning with a focus on emerging issues and opportunities to work with community-based public health practitioners.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define the basic concepts of evidence-based decision-making.

Audience: Graduate

2. Demonstrate how to locate information on evidence-based approaches in the literature.

Audience: Graduate

3. Describe the importance of interdisciplinary approaches to public health.

Audience: Graduate

4. Describe several applications within public health practice that are based on evidence.

Audience: Graduate

5. Define barriers to evidence-based decision-making in public health settings

Audience: Graduate

6. Discuss emerging public health issues in the context of evidence-based decision-making.

Audience: Graduate

7. Develop and apply strategies to work collaboratively in small groups.

Audience: Graduate

**PUBLHLTH 781 – COMMUNICATING PUBLIC HEALTH EFFECTIVELY I**

1 credit.

Exploration of current public health issues, interprofessional approaches and modes of communication within the MPH Program and the public health practice community. Content will advance students' analytic assessment, communication, and systems-thinking skills.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Identify key issues and problems in public health within the context of the public health foundational competencies.

Audience: Graduate

2. Lead and facilitate group discussions.

Audience: Graduate

3. Communicate public health content appropriately based on the MPH Program's standards in writing and orally.

Audience: Graduate

4. Describe the importance of interdisciplinary approaches to public health practice.

Audience: Graduate

5. Demonstrate knowledge about public health and other resources on the UW campus.

Audience: Graduate

**PUBLHLTH 782 – DETERMINANTS OF HEALTH AND HEALTH EQUITY: A SYSTEMS APPROACH**

3 credits.

The social determinants of health, determined by deep rooted and inequitably distributed resources via institutions and systems that shape our communities and the world that we live in, are the key factors that shape ill health and exacerbate inequities in the health and well being of populations. Provides grounding in the social determinants of health through a health equity framework. Students will learn about health equity frameworks and how to integrate them into their public health practice and research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Critically analyze the social and structural determinants of health for populations.

Audience: Graduate

2. Explain the relationship between health disparities and health inequity.

Audience: Graduate

3. Explain how power structures the conditions that shape health

Audience: Graduate

4. Identify the mechanisms by which structural racism shapes everyone's health across the lifespan

Audience: Graduate

5. Reflect on how your own health has been shaped by structural and social determinants

Audience: Graduate

6. Explain the value of systems thinking using a health equity lens to public health research and practice.

Audience: Graduate

7. Describe the rationale for community involvement in public health actions and the key principles of community-based approaches to public health.

Audience: Graduate

**PUBLHLTH 783 – QUANTITATIVE APPROACHES TO PUBLIC HEALTH**

4 credits.

Gain the fundamental principles of epidemiology and biostatistics with an emphasis on those elements most relevant to applied public health practice. Provides training in epidemiology and biostatistical theory and methods through applied case examples that blend epidemiology principles with foundational statistical knowledge needed to collect and analyze public health data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand methods to describe patterns of health and disease according to person, place, and time.

Audience: Graduate

2. Apply techniques to analyze data from a variety of sources to determine how risk factors are related to health outcomes.

Audience: Graduate

3. Identify the features of epidemiologic and biostatistical study designs, and describe their strengths and limitations in public health research and practice.

Audience: Graduate

4. Read and critically review scientific and public health literature and interpret findings to inform public health research, intervention, and practice.

Audience: Graduate

5. Link biostatistics, epidemiology and public health as data is collected and distributed to individuals and diverse population groups.

Audience: Graduate

6. Identify ways in which biostatistical and epidemiologic techniques relate more broadly to the practice of public health and population health sciences.

Audience: Graduate

## **PUBLHLTH 784 – QUANTITATIVE APPROACHES TO PUBLIC HEALTH II**

3 credits.

Gain an understanding of the fundamental principles of epidemiology and biostatistics with an emphasis on essential aspects in applied public health practice. Case studies provide training in epidemiology and biostatistical theory and methods that blend epidemiology principles with foundational statistical knowledge needed to collect and analyze public health data.

**Requisites:** PUBLHLTH 783

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply common statistical methods for inference.

Audience: Graduate

2. Interpret results of statistical analyses found in public health studies.

Audience: Graduate

3. Apply statistical software to analyze health-related data.

Audience: Graduate

4. Perform univariate data analysis for continuous and categorical variables.

Audience: Graduate

5. Apply descriptive and inferential methodologies according to the type of study design for answering specific research questions.

Audience: Graduate

6. Evaluate the strengths and limitations of epidemiologic reports.

Audience: Graduate

7. Define and discuss the relationship of random error, selection and information bias, and systematic error.

Audience: Graduate

8. Define and explain numerous examples of confounding and effect modification and understand how they differ from each other.

Audience: Graduate

9. Apply knowledge from the entire course to make epidemiologic decisions on varied public health issues, even if given conflicting research results, exercising critical judgment.

Audience: Graduate

10. Describe historical ethical failures in public health research and best practices to perform ethical investigations in public health.

Audience: Graduate

## **PUBLHLTH 785 – PUBLIC HEALTH AND HEALTH CARE SYSTEMS**

3 credits.

Focuses on the fundamental characteristics of the public health and health care systems, including key factors in performance, organization, financing, and delivery of services in major sectors of the U.S. health care system.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare and contrast the public health and health care systems.

Audience: Graduate

2. Recognize important concepts and measures for evaluating the performance of health systems.

Audience: Graduate

3. Develop knowledge of sectors within the health care system.

Audience: Graduate

4. Identify key management and policy issues in contemporary health systems.

Audience: Graduate

5. Analyze strategies for health system improvement.

Audience: Graduate

6. Advance skills in written and oral analysis.

Audience: Graduate

**PUBLHLTH 786 – PLANNING AND MANAGEMENT TO PROMOTE HEALTH**

3 credits.

Gain knowledge about theory, concepts, and methods of program planning and evaluation in the context of health care and community health organizations. Covers content and case studies on planning, designing, and implementing health services and quality improvement projects. Basic principles of tools for budget development and resource management related to grants or projects are included. Class projects provide the opportunity to collaborate in the creation of program plans, logic models, and grant proposals.

**Requisites:** PUBLHLTH 780 (or POP HLTH 780 prior to Fall 2019)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the critical elements of health program planning and evaluation models.

Audience: Graduate

2. Analyze strengths and weaknesses of proposed health programs.

Audience: Graduate

3. Construct a program plan that demonstrates ability to conduct needs assessment, create measurable objectives, design interventions, develop a budget, and conduct process and outcome evaluation.

Audience: Graduate

4. Write a grant.

Audience: Graduate

5. Examine the critical elements of quality process improvement history, methods, and practice.

Audience: Graduate

6. Apply basic quality improvement methodologies to a process in a health care or community health organization.

Audience: Graduate

7. Develop and apply strategies to work collaboratively in small teams.

Audience: Graduate

**PUBLHLTH 787 – MPH APPLIED PRACTICE EXPERIENCE SEMINAR**

1 credit.

Prepares Master of Public Health students for applied practice experience in a community setting.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the applied practice experience process, from identifying a project to reporting the project findings/outcomes

Audience: Graduate

2. Identify and apply strategies/methods that appropriately address a specific project or goals of the applied practice experience

Audience: Graduate

3. Develop the components needed for the completion of the Applied Practice Experience Learning Agreement

Audience: Graduate

4. Be able to plan, conduct, and evaluate an applied practice learning placement and/or Integrated Learning Experience Project

Audience: Graduate

**PUBLHLTH 788 – APPLIED PRACTICE EXPERIENCE**

1-6 credits.

Master of Public Health students gain practical experience in a public health setting as outlined in their learning agreement.

**Requisites:** PUBLHLTH 787

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Integrate public health theory, knowledge, and skills in a community or public health practice setting;

Audience: Graduate

2. Engage with a community public health practice organization to fully understand organizational structure, local and organizational politics, program administration, community relationships, and program coordination;

Audience: Graduate

3. Demonstrate mastery of at least five public health competencies;

Audience: Graduate

4. Contribute to the MPH Practice Portfolio with at least two products for each competency identified;

Audience: Graduate

5. Complete defined projects in an area of public health practice such as needs assessment, program planning, program evaluation, policy development, educational campaign, or applied research project;

Audience: Graduate

6. Gain/expand/develop skills and knowledge in an area of interest not covered in depth elsewhere in the educational plan

Audience: Graduate

**PUBLHLTH 790 – PUBLIC HEALTH AND SOCIAL JUSTICE: TOOLS AND MODELS**

2 credits.

Integrate public health knowledge, skills and practice acquired through didactic and experiential courses to find solutions to complex public health issues using public health tools and models that apply systems thinking, cultural humility and evidence-based decision making, framed within a social justice perspective.

**Requisites:** Declared in Public Health MPH

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Integrate public health theory, knowledge and skills to address current public health problems within a social justice perspective.

Audience: Graduate

2. Describe the historical and current state of structural racism as a cause of health inequities in the US for various populations.

Audience: Graduate

3. Describe the historical and ongoing social inequities and biases leading to discrimination against various disadvantaged populations leading to poor health and reduced quality of life.

Audience: Graduate

4. Demonstrate proficiency in the use of specific public health tools and frameworks to address social justice issues.

Audience: Graduate

5. Demonstrate the ability to develop and deliver written and oral presentations to convey information about the development, effectiveness and outcomes generated from various public health programs and policies for different audiences.

Audience: Graduate

6. Develop skills in facilitating community conversations, gathering and analyzing and reporting on qualitative data and using qualitative data analysis tools.

Audience: Graduate

7. Work efficiently and effectively in teams.

Audience: Graduate

**PUBLHLTH 791 – STRATEGIC HEALTH COMMUNICATION- THEORY AND PRACTICE**

3 credits.

Effective health information communication strategy. Using a theoretical foundation for communication, better understand the factors that influence how individuals form attitudes and beliefs about health topics.

Strategically plan health messaging for diverse audiences. Lead small group discussions and provide constructive peer feedback.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the theoretical foundations for attitude formation and information processing.

Audience: Graduate

2. Identify the role of heuristics in perceptions of health information.

Audience: Graduate

3. Research a target population to understand attitudes and beliefs, as well as motivators and barriers related to health.

Audience: Graduate

4. Analyze the impact of policy and programs on effective health communication.

Audience: Graduate

5. Develop key messages and message strategies that speak to population needs.

Audience: Graduate

6. Recognize strategic partnerships in developing health communication campaigns.

Audience: Graduate

7. Describe the role of visual communication in effective messaging.

Audience: Graduate

8. Develop an informed campaign timeline, factoring in stakeholder engagement, deliverables, and evaluation criteria.

Audience: Graduate

**PUBLHLTH 792 – PUBLIC HEALTH POLICY AND POLITICS**

3 credits.

Gain an understanding of the process of public policy development and an understanding of how and why health policies reflect the political system in which they are developed and implemented.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze the current and historical role of government in health policy, primarily focusing on the United States.

Audience: Graduate

2. Present important concepts, theories, and evidence concerning the impact of politics on public policy and population health.

Audience: Graduate

3. Explain the roles, resources, and strategies of key participants, both inside and outside of government, who influence health policy development and implementation.

Audience: Graduate

4. Compare and contrast how political determinants influence different types of health policy issues (e.g., access to insurance and health services, cost containment, disease and injury prevention).

Audience: Graduate

5. Translate knowledge of health politics and the policy process into more effective strategies for public health advocacy.

Audience: Graduate

6. Gain skills in communication, leadership, and systems thinking through formal and informal analysis of key issues in health politics and policy.

Audience: Graduate

**PUBLHLTH 793 – PUBLIC HEALTH LEADERSHIP**

2 credits.

Gain knowledge and skills in public health leadership attributes and style, communication, collaboration, negotiation, and advocacy, and a framework for advancing population health improvement within and across organizations. Explore the theories and principles of leadership, leadership styles and practices, and the skills and knowledge needed to be a public health leader.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key attributes of successful leaders, across disciplines, working to address complex social problems.

Audience: Graduate

2. Explore the vision of public health leaders and leadership strategies that have motivated others for collaboration, decision-making and evaluation.

Audience: Graduate

3. Develop a personal statement of core values and vision.

Audience: Graduate

4. Develop essential leadership skills and utilize existing tools based on strengths and areas for growth.

Audience: Graduate

5. Build competency in leading organizations to influence difficult social problems, including health related problems

Audience: Graduate

6. Develop strategies for working across organizational boundaries, including in complex multi-sector partnerships, to advance population health improvement

Audience: Graduate

7. Describe how effective interprofessional teams lead to improved team health outcomes

Audience: Graduate

**PUBLHLTH 910 – INDEPENDENT RESEARCH AND APPLIED PRACTICE IN PUBLIC HEALTH**

1-3 credits.

Independent study or research on an individualized research or applied community-oriented project under the direction of a public health teaching faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Conduct public health research and applied practice under the guidance of a public health mentor.

Audience: Graduate

2. Create and follow an independent study plan while demonstrating integrity, accountability, and professionalism for all deliverables.

Audience: Graduate

3. Develop an understanding of public health research design by working collaboratively on research or grant proposals.

Audience: Graduate

4. Apply core public health skills and competency in understanding public health system and issues, including qualitative and quantitative data.

Audience: Graduate

5. Prepare and present study/research findings to public health mentor or teaching faculty.

Audience: Graduate

6. Interpret research results in the context of literature and public health practice.

Audience: Graduate

**RADIOLOGY (RADIOL)****RADIOL/B M E/MED PHYS/PHMCOL-M/PHYSICS 619 – MICROSCOPY OF LIFE**

3 credits.

Survey of state of the art microscopic, cellular and molecular imaging techniques, beginning with subcellular microscopy and finishing with whole animal imaging.

**Requisites:** PHYSICS 104, 202, 208, or 248 or PHYSICS/MED PHYS 265

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RADIOL 813 – RADIOLOGY CLERKSHIP**

1-2 credits.

Introduction to principles and technology of diagnostic radiology. Emphasis on fundamental interpretation skills in chest, abdominal and bone films, and in cross-sectional anatomy. Discussions focused on appropriate, cost efficient radiologic workup and image guided surgery.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**RADIOL 910 – INDEPENDENT READING AND RESEARCH IN RADIOLOGY**

2-8 credits.

Independent research under the supervision of faculty in the Department of Radiology. Student's research projects are individualized to meet individual student research goals within the context of faculty research needs.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research

Audience: Graduate

2. Conduct a thorough literature review of the specific research question

Audience: Graduate

3. Select and apply statistical methodologies appropriate for the proposed analyses

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review

Audience: Graduate

**RADIOL 911 – IMAGING AND EMBRYOLOGY: THE BASIC SCIENCE OF FETAL DYSMORPHOGENESIS**

2 credits.

The diagnosis and management of congenital abnormality requires an understanding of the basic principles of embryology, imaging, and genetics. Replicating how patients enter the medical system, the didactic path begins with ultrasound diagnosis of fetal abnormality. The embryological basis of the fetal malformations will be examined. From this center, exposure to advanced diagnostics, such as fetal echocardiography, fetal MRI, and genetic testing and counseling. Topics extend to early postnatal care (pediatric genetics and pediatric radiology). Participate in the Meriter Perinatal Conference, learn about genetic approaches to the diagnosis of fetal malformation syndromes, and learn the rudiments of an obstetrical sonogram.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate understanding of basic concepts of human dysmorphogenesis

Audience: Graduate

2. Describe various diagnostic approaches to human birth defects

Audience: Graduate

3. Apply basic concepts of embryology and genetics to developmental malformations

Audience: Graduate

4. Explain fundamentals of imaging diagnosis, with an emphasis on prenatal ultrasound

Audience: Graduate

5. Model logical thinking process to organize scientific discussion and presentation

Audience: Graduate

## **RADIOL 912 – INTENSIVE TRAINING IN CLINICAL ULTRASOUND: PHYSICS, ANATOMY, SKILLS, TRANSLATION TO PRACTICE**

2 credits.

Intensive training in clinical ultrasound scanning, including the physical basis of the image generation, the resulting opportunities and limitations of this technique, and ultrasound anatomy and physiology. Practice scanning skills on classmates and phantoms in daily lab sessions and at the UW Simulation Center. Observe and work with expert ultrasound practitioners at clinical sites.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe ultrasound physics and how these physical principles create opportunities, limitations, and artifacts in clinical imaging.

Audience: Graduate

2. Operate ultrasound machines, and acquire and archive different types of ultrasound images (grayscale, color Doppler, and spectral Doppler).

Audience: Graduate

3. Explain anatomy and physiology as presented in ultrasound images.

Audience: Graduate

4. Become proficient in performing and interpreting ultrasound examinations, including basic abdomen, female pelvis, lower extremity arterial/venous, aorta, FAST scan for trauma, basic echocardiography, lung, thyroid/anterior neck, and musculoskeletal (muscle, tendon).

Audience: Graduate

5. Correlate normal and pathologic findings from ultrasound examinations with expected findings from the physical examination. Explain how these techniques complement each other.

Audience: Graduate

6. Identify how ultrasound techniques can be used to solve particular clinical problems.

Audience: Graduate

7. Summarize how the ultrasound examination can be modified to answer unresolved questions.

Audience: Graduate

## **RADIOL 914 – PHYSICIAN FINANCIAL WELLNESS**

1 credit.

Graduating medical students are faced with a wide array of financial planning and wellness challenges. The median medical student debt has continued to increase, and there is a corresponding proliferation of federal repayment and forgiveness options. Other financial planning needs, such as budgeting and insurance, also arise during this time of transition. A unique opportunity to learn key concepts around budgeting, investing, insurance, and negotiation through independent and group learning experiences. This format allows for better analysis on financial decisions and to understand the impact of these decisions on both current and future financial health and wellness.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define budgeting and its role in the trainees' life

Audience: Graduate

2. Explore different budgeting techniques

Audience: Graduate

3. Create an income-adjusted and -appropriate budget for both trainees and physicians early in practice

Audience: Graduate

4. Describe how federal income-driven repayment programs work and how they interact with public service loan forgiveness

Audience: Graduate

5. Describe the requirements for public student loan forgiveness

Audience: Graduate

6. Demonstrate awareness of the NIH loan repayment programs for biomedical or biobehavioral research careers

Audience: Graduate

7. Identify the options in loan repayment (IDR and PSLF, refinancing, and forbearance and deferment)

Audience: Graduate

8. Discern the types of insurance relevant to physicians and evaluate best practices for purchasing insurance

Audience: Graduate

9. Explore basic negotiation theory and how it applies to career and salary negotiations

Audience: Graduate

10. Explore the types of retirement savings accounts and their relative utility during different stages in a physician's career

Audience: Graduate

11. Gain an overview on how to plan for financial wellness

Audience: Graduate

12. Apply all the financial tools to real-life scenarios

Audience: Graduate

13. Identify key terms in financial literacy

Audience: Graduate

**RADIOL 920 – DIAGNOSTIC RADIOLOGY ELECTIVE**

2 credits.

Familiarizes the student with the various imaging and therapeutic procedures that are performed in radiology. In addition to learning about the strengths and limitations of different imaging studies, the student should attempt to relate abnormal radiologic findings to pathophysiology with logic and confidence. Students will be given the opportunity to rotate through the section of their choice for 2 weeks in the Radiology department and are able to tailor their reading room experiences to their interests. They will engage in hands on learning activities, interactive assignments, and learn to communicate in interdisciplinary conversations about patient care when it comes to best practices with radiology.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify how to apply ACR Appropriateness Criteria to all imaging and treatment decisions  
Audience: Graduate

2. Communicates effectively with the Radiology team and participates in interdisciplinary conversations about patient care  
Audience: Graduate

3. Identify core can't miss diagnoses on imaging  
Audience: Graduate

4. Counsel hypothetical patients on the details of relevant imaging tests, including descriptions of risks and benefits  
Audience: Graduate

**RADIOL 923 – CLINICAL NUCLEAR MEDICINE ELECTIVE**

2 credits.

Work directly with faculty in the Nuclear Medicine section of the Department of Radiology. Broad-based experience in a variety of procedures routinely performed by the nuclear medicine service, including nuclear cardiology. Practice in building and presenting a case report.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Nuclear Medicine and the overall role of this specific field in the world of Radiology  
Audience: Graduate

2. Apply knowledge learned to participate in group discussions  
Audience: Graduate

3. Complete a case report according to the guidelines laid out under direction the course directors  
Audience: Graduate

**RADIOL 924 – GENERAL RADIOLOGY ELECTIVE**

2-4 credits.

Elective opportunity to study basic radiological studies and modalities. Gain proficiency in identifying normal structures and can't miss diagnoses on a chest radiograph and abdominal films as well as determining indications for advanced studies (computed tomography CT, magnetic resonance imaging MRI, ultrasound US, angiograms). Practice in building and presenting a case report.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of basic radiologic studies and modalities and pathology presentation within those studies  
Audience: Graduate

2. Apply knowledge learned to participate in diagnostic workup of radiologic images  
Audience: Graduate

3. Complete a case report according to the guidelines laid out under direction the course directors  
Audience: Graduate

**RADIOL 926 – INTERVENTIONAL RADIOLOGY ELECTIVE**

2-4 credits.

High-level procedural experience on a clinical interventional radiology service. Interventional radiology uniquely blends the concepts of imaging anatomy and pathophysiology to provide minimally invasive solutions to patients. Hone clinical and procedural skills while being exposed to a rich background curriculum with the goal of case report publication.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize indications and contraindications for basic IR procedures.

Audience: Graduate

2. Demonstrate interventional radiology table management skills.

Audience: Graduate

3. Perform basic steps needed to obtain central venous access.

Audience: Graduate

4. Describe basics of conscious sedation including reversal medications and doses

Audience: Graduate

5. Demonstrate how to obtain informed consent.

Audience: Graduate

6. Practice skills needed for manuscript submission, review, and discussion.

Audience: Graduate

**RADIOL 928 – SCREENING IN RADIOLOGY**

2 credits.

Clinical experience on diagnostic radiology service. Apply population health and epidemiology principles to screening exam selection in radiology. Participate in interdisciplinary conversations surrounding patient care. Practice in patient-centered communication and in creating a case report.

**Requisites:** MED SC-M 810, 812, 813, and 911

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define and describe the basic elements of a screening test

Audience: Graduate

2. Explain common misconceptions of screening tests and epidemiology

Audience: Graduate

3. Present factors that explain varying rates of screening in different countries and factors that influence decision-making in these regions

Audience: Graduate

4. List the pros and cons of different screening options and compare them to those for invasive alternatives

Audience: Graduate

5. Explain the advantages and disadvantages of screening outcomes to a hypothetical patient

Audience: Graduate

6. Predict and explain potential outcomes and associated next steps after screening to a hypothetical patient

Audience: Graduate

7. Determine the actual costs of screening to patients based on insurance coverage or lack thereof

Audience: Graduate

8. Describe potential sources of bias in screening tests including lead time bias, length time bias, and selection bias. Explain how appropriate study design for screening program evaluation can overcome these sources of bias.

Audience: Graduate

9. Calculate and define sensitivity, specificity, positive predictive value, and negative predictive value of a screening test. Describe how these values will or will not be altered as the disease prevalence changes.

Audience: Graduate

10. Discuss an example of healthcare disparities related to imaging screening

Audience: Graduate

# REAL ESTATE AND URBAN LAND ECONOMICS (REAL EST)

## REAL EST/A A E/ECON/URB R PL 306 – THE REAL ESTATE PROCESS

3 credits.

Introductory overview focused on the key aspects of the real estate process: developing real estate, permitting real estate, buying and selling real estate, understanding the economics of real estate, financing real estate, valuing real estate, leasing real estate, and managing real estate.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop a working knowledge of the real estate process, including the roles of the various key real estate professionals and the unique challenges associated with the real estate asset class.  
Audience: Undergraduate

2. Explain the characteristics, advantages, and disadvantages of the primary commercial real estate property types.  
Audience: Undergraduate

3. Discuss the role of debt and equity in a real estate transaction as well as the fundamental terms, conditions, and requirements of commercial real estate financing.  
Audience: Undergraduate

4. Navigate the basic regulatory framework governing the real estate process, including land use planning, zoning and the required project approvals.  
Audience: Undergraduate

5. Describe the role of leasing in the commercial real estate transaction, including the critical terms and conditions of commercial leases.  
Audience: Undergraduate

## REAL EST 365 – CONTEMPORARY TOPICS

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** Sophomore standing or declared in undergraduate Business Exchange program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## REAL EST 399 – READING AND RESEARCH-URBAN LAND ECONOMICS

1-6 credits.

Individual work suited to the needs of undergraduate students.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

## REAL EST 410 – REAL ESTATE FINANCE

3 credits.

Fundamentals of real estate finance and investment. Qualitative and quantitative characteristics of commercial real estate. Developing and analyzing commercial property cash flow projections. Introduction to three approaches to valuation with emphasis on investing in commercial real estate. In-depth exposure to debt and equity investor returns.

**Requisites:** URB R PL/A A E/ECON/REAL EST 306 and (ECON/FINANCE 300 or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the basic financial aspects of multifamily and commercial real estate.  
Audience: Undergraduate

2. Construct and analyze multifamily and commercial real estate pro forma cash flow statements and property valuations.  
Audience: Undergraduate

3. Apply the abstracting process of the income elements and critical operational components of multifamily and commercial property leases to quantify the financial impact to the property pro forma cash flow statement.  
Audience: Undergraduate

4. Analyze the financial aspects of multifamily and commercial debt and equity capital returns.  
Audience: Undergraduate

5. Articulate multifamily and commercial real estate property and market characteristics, supply and demand drivers, and differences between the various property types.  
Audience: Undergraduate

**REAL EST 411 – REAL ESTATE EXCEL MODELING**

1 credit.

Introduction to real estate modeling. Building a real estate model for acquisition and development transactions for residential and commercial real estate using Excel. How to source market data, draw assumptions from market data, input assumptions, make decisions using reports, perform sensitivity analysis on model inputs, and explain terminology used in residential and commercial real estate.

**Requisites:** REAL EST 410 or (REAL EST 710 or concurrent enrollment)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate key components required to model a real estate transaction program summary, sources and uses of funds, income statement, debt and equity waterfall.

Audience: Both Grad & Undergrad

2. Demonstrate key functions in excel that are used in the real estate profession including, PMT (payment), PV (present value), NPV (net present value), IRR (internal rate of return), EM (equity multiple), Sumproduct, Round, Solver, Data Table, named Ranges, charts, error bars and circular references.

Audience: Both Grad & Undergrad

3. Model acquisition and development transactions for residential and commercial real estate.

Audience: Both Grad & Undergrad

4. Perform management reporting and sensitivity analysis on PV (present value) and IRR (internal rate of return) for various debt and occupancy metrics.

Audience: Graduate

**REAL EST 412 – REAL ESTATE ARGUS MODELING**

1 credit.

Introduction to real estate modeling using ARGUS. ARGUS will be used to build a real estate model for acquisition transactions for office and retail mall properties. Learn how to input assumptions, make decisions using reports, perform sensitivity analysis on model inputs and explain terminology used in Office and Retail real estate.

**Requisites:** REAL EST 410 or (REAL EST 710 or concurrent enrollment)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate key components required to model a real estate transaction including, program summary, sources and uses of funds, income statement, debt waterfall, and reporting.

Audience: Both Grad & Undergrad

2. Demonstrate key calculations in ARGUS that are used in the real estate profession including effective gross income, net operating income, tenant improvements, present value, levered and unlevered returns and internal rate of return.

Audience: Both Grad & Undergrad

3. Model acquisition transactions for office and mall.

Audience: Both Grad & Undergrad

4. Perform management reporting and sensitivity analysis on present value and internal rate of return for various leasing scenarios.

Audience: Graduate

### REAL EST 415 – VALUATION OF REAL ESTATE

3 credits.

Techniques of real estate valuation. Property analysis, market analysis, legal and political analysis, and highest and best use analysis; in-depth exposure to the three approaches to valuation; sales comparison, income, and cost; application to main commercial property types; the role of valuation in real estate investment.

**Requisites:** REAL EST 410, (REAL EST 411 or concurrent enrollment), and (REAL EST 412 or concurrent enrollment)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the concepts, tools, techniques for evaluating individual real estate assets, based on the application of economic theory and principles of urban economics, for the purpose of real estate valuation.

Audience: Undergraduate

2. Analyze commercial real estate market data and forecast rents and vacancy for a commercial property.

Audience: Undergraduate

3. Create a valuation analysis and a compelling appraisal report for a commercial property.

Audience: Undergraduate

4. Demonstrate the technical skills of appraisal, including but not limited to data gathering, market analysis, and cash flow modeling.

Audience: Undergraduate

5. Describe how market dynamics, constrained by the geographic, physical and legal parameters, determine values of individual assets in the market.

Audience: Undergraduate

6. Explain the economic forces that drive real estate value in the market.

Audience: Undergraduate

### REAL EST/ECON/URB R PL 420 – URBAN AND REGIONAL ECONOMICS

3 credits.

Focuses on the study of the allocation of scarce resources across space. Uses economic methods to analyze urban real estate. Topics covered include the determinants of real estate values, the location decisions of households and firms, land use, urban growth and agglomeration, real estate pricing, cycles, development, housing market and policies, and sustainable development.

**Requisites:** (ECON 101 or 111) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the economic forces that drive urban growth and regional development.

Audience: Undergraduate

2. Analyze how business and residential location decisions are made and how these decisions impact housing prices, land use, labor market, and many other aspects of cities.

Audience: Undergraduate

3. Apply the spatial equilibrium concepts to urban development and real estate analysis.

Audience: Undergraduate

4. Develop statistical models to assess residential and commercial real estate and perform sensible business and policy analysis.

Audience: Undergraduate

5. Apply the economic decision-making framework to real estate development decisions.

Audience: Undergraduate

6. Demonstrate understanding of cycles, risks and bubbles in residential and commercial real estate markets.

Audience: Undergraduate

7. Evaluate the challenges in economic, social and environmental sustainability in urban development around the world.

Audience: Undergraduate

8. Apply urban and regional economics to real estate business decisions and policy analysis.

Audience: Undergraduate

**REAL EST 425 – REAL ESTATE LAW**

3 credits.

Analyzes current issues in real estate law with a focus on the acquisition, leasing, financing, and development of real estate projects. Includes a big picture view of these topics as well as analyzing them in the specific context of various development deals underway across the United States.

**Requisites:** (REAL EST 410) and (URB R PL/ECON/REAL EST 420 or concurrent enrollment), or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and apply a foundational understanding of the common tools, concepts, and terminology of real estate law.

Audience: Both Grad & Undergrad

2. Develop an understanding of the site selection and site control process through an evaluation of the interplay between the business and legal decisions involved in the property acquisition process.

Audience: Both Grad & Undergrad

3. Evaluate the role of leasing in the context of different real estate transactions and learn how to prepare a lease abstract.

Audience: Both Grad & Undergrad

4. Explore the various options for financing real estate projects, both public and private, including traditional bank financing, TIF and tax credit financing.

Audience: Both Grad & Undergrad

5. Analyze how land use and zoning approvals are negotiated and obtained during the development process and learn the importance of working effectively with the staff of federal, state and local governments.

Audience: Both Grad & Undergrad

6. Analyze risks and rewards associated with various real estate transactional decisions.

Audience: Graduate

**REAL EST/A A E/URB R PL 520 – COMMUNITY ECONOMIC ANALYSIS**

3 credits.

Economic theory (location and growth) applicable to community economic development; the role of private and public sector in local economic development, and techniques for economic analysis of community.

**Requisites:** ECON 301 or 311 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize an overview of economic theory as applied to small open economies.

Audience: Both Grad & Undergrad

2. Identify the strengths and weaknesses of the community's economy.

Audience: Both Grad & Undergrad

3. Implement alternative processes for affecting change at the community level.

Audience: Both Grad & Undergrad

4. Demonstrate literacy of economic factors affecting change at the local level.

Audience: Both Grad & Undergrad

5. Describe the community within a sustainable systems thinking approach.

Audience: Both Grad & Undergrad

6. Identify appropriate roles for community economic development practitioners in a variety of community settings.

Audience: Graduate

**REAL EST 530 – REAL ESTATE INVESTMENT ANALYSIS**

3 credits.

A capstone focused on comprehensively underwriting commercial real estate. Investment analysis will be performed for a variety of real estate property types from the perspective of various real estate professionals, such as the property/asset manager, finance professional, leasing broker, acquisitions specialist, portfolio manager, and investment legal/risk team. The investment analysis will emphasize the importance of value-creation through capital investment and effective income and expense management.

**Requisites:** REAL EST 415 and (REAL EST 425 or current enrollment), or graduate/professional standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Know the primary elements of professional roles within the real estate industry including asset management, property management, risk management, leasing, and capital markets

Audience: Undergraduate

2. Know the nuances of investing in various commercial real estate property types to analyze the merits of each

Audience: Undergraduate

3. Evaluate the property income stream durability and risk profile through the incorporation of a budget/variance analysis

Audience: Undergraduate

4. Develop an asset management plan to analyze value-add strategies designed to grow property income and value

Audience: Undergraduate

5. Manage and mitigate commercial property investment risk through active property and asset management strategies and processes

Audience: Undergraduate

6. Demonstrate professional presentation skills

Audience: Undergraduate

**REAL EST 540 – PUBLIC REAL ESTATE EQUITY INVESTMENT**

3 credits.

Understanding and applying both investment and real estate concepts to the Real Estate Investment Trust (REIT) market. Emphasis is on applying investment and real estate concepts to a specific REIT.

**Requisites:** (REAL EST 410 or 710) and (FINANCE/ECON 300 or 700)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze company and sector performance in a portfolio investment context.

Audience: Both Grad & Undergrad

2. Demonstrate effective written and oral communication skills to present course concepts.

Audience: Both Grad & Undergrad

3. Demonstrate how macroeconomic conditions affect the commercial property sector and individual company performance.

Audience: Both Grad & Undergrad

4. Explain how firms finance investment and why they source particular kinds of financing.

Audience: Both Grad & Undergrad

5. Explain the internal and external drivers of REIT value, including the impact of capital structure.

Audience: Both Grad & Undergrad

6. Explain what REITs are and how their risk, return, and liquidity characteristics fit in the broader class of real estate assets.

Audience: Both Grad & Undergrad

7. Understand and know how to describe the legal/tax context in which REITs operate.

Audience: Both Grad & Undergrad

8. Utilize a framework to analyze the operating and financial performance of a chosen REIT from a variety of perspectives.

Audience: Both Grad & Undergrad

9. Demonstrate a deeper understanding of capital markets and the pricing of real estate in the public markets.

Audience: Graduate

### **REAL EST 550 – PRIVATE REAL ESTATE EQUITY INVESTMENT I: ANALYSIS AND STRUCTURES**

3 credits.

Introduction to real estate private equity investment focused on the analysis, terms, return metrics, and structures used to make real estate private equity investment decisions.

**Requisites:** REAL EST 415, declared in Business: Real Estate and Urban Land Economics graduate programs, or the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze real estate private equity investment structures

Audience: Both Grad & Undergrad

2. Determine property market growth fundamentals

Audience: Both Grad & Undergrad

3. Generate and evaluate comparable property lease and sale comparables

Audience: Both Grad & Undergrad

4. Model property income and investment waterfalls

Audience: Both Grad & Undergrad

5. Assess private equity investment and sponsor risk

Audience: Both Grad & Undergrad

6. Communicate audience-appropriate analysis of findings

Audience: Both Grad & Undergrad

7. Demonstrate small group leadership skills

Audience: Graduate

### **REAL EST 560 – AFFORDABLE HOUSING**

3 credits.

Gain foundational knowledge on the affordable housing development sector. Includes examination of the political and bureaucratic context and technical and analytical skills necessary to compete for and employ available financial tools to create and preserve affordable housing.

Emphasis is placed on the Low-Income Housing Tax Credit (LIHTC) and common challenges including local resistance.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement, GEN BUS 106, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe the role of affordable housing development in the United States including its impact on vulnerable communities, its challenges, and common criticisms.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge of Low-Income Housing Tax Credit (LIHTC) transactions through financial models, professional memos, and development project plans.

Audience: Both Grad & Undergrad

3. Utilize knowledge of affordable development goals, project fundamentals, and community context to build cases in support of projects and present results in written and presentation format, adjusted for the specific audience.

Audience: Both Grad & Undergrad

4. Evaluate and interpret academic papers, trade publications, and mainstream news sources on and engage in classroom discussions.

Audience: Both Grad & Undergrad

5. Demonstrate aptitude in customizing affordable housing financial models to assume specific funding underwriting rules and scoring criteria.

Audience: Graduate

### REAL EST 611 – RESIDENTIAL PROPERTY DEVELOPMENT

3 credits.

A capstone course. In-depth exposure to the world of the residential builder/developer/subdivider and the necessary tools of analysis--market analysis, zoning/environmental and other entitlements, site planning and design, infrastructure/construction cost analysis, financing, feasibility analysis, deal structuring, renovation/rehabilitation, special needs housing.

**Requisites:** (REAL EST 410 and 415) or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify features of the built environment that distinguish real estate from other asset classes.

Audience: Both Grad & Undergrad

2. Summarize the development process from project conception and financing to asset disposition, with a particular focus on the role of the developer as the strategic coordinator of many disciplines and manager of risk analysis.

Audience: Both Grad & Undergrad

3. Identify and illustrate the "Land Ethic", and that real estate is a social enterprise as well as private business and, therefore, that external benefits, ethical considerations, and sustainability are important criteria for real estate decisions alongside traditional measures of profitability.

Audience: Both Grad & Undergrad

4. Analyze how to network and cooperate with local, state, and national professionals to obtain insights and information needed for the development process, share market data and, perspectives, discuss investment ideas and identify sources of material and financial resources.

Audience: Both Grad & Undergrad

5. Differentiate and apply market, linkage, and macroeconomic data for the purpose of forecasting real estate trends, appraising value, and making prudent and sustainable investment decisions, and prepare a real estate development analysis, financing, and valuation principles.

Audience: Graduate

### REAL EST 640 – REAL ESTATE CAPITAL MARKETS

3 credits.

Thorough discussion of how public real estate investment products such as Mortgage-Backed Securities (MBS) and Real Estate Investment Trusts (REIT) are structured and how investors price them. Exploration of key strategic considerations for institutional investors in their real estate investments. Analysis of the equity side of real estate, review of mortgage math, analysis of MBS and real estate equity investments by looking at specific REITs.

**Requisites:** REAL EST 410

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze real estate from multiple perspectives (e.g. REIT, insurance company, pension funds).

Audience: Undergraduate

2. Conduct advanced analysis of MBS.

Audience: Undergraduate

3. Demonstrate the primary skills of a real estate security analyst (e.g., REIT and MBS valuation).

Audience: Undergraduate

4. Access resources to deepen knowledge and continually learn about real estate capital markets beyond what was learned in this course.

Audience: Undergraduate

5. Broaden network of professional colleagues via interactions with each other, guest speakers, and conferences.

Audience: Undergraduate

### REAL EST 651 – GREEN - SUSTAINABLE DEVELOPMENT

3 credits.

Intended for students who have an interest in Green and Sustainable aspects of housing and commercial property development and operation, the re-use and/or rehabilitation of existing structures, redevelopment of historic buildings into housing or commercial space and related special topics such as financing sources, tax issues, financial structuring, legal issues and energy cost management.

**Requisites:** Sophomore standing or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

## REAL EST 661 – REAL ESTATE INVESTMENT ANALYSIS AND PRESENTATION

3 credits.

Real-world capstone experience of the real estate investment process from project conception to asset disposition with particular focus on analysis and presentation. Provides exposure to best known methods and practices that private equity and development firms use to conduct market research, project selection, financial feasibility, regulatory review, design considerations, construction management, debt financing, equity placements, equity waterfalls, property management, asset management and disposition. Develop an interdisciplinary understanding of the many facets of the acquisition and development process in the U.S. and have an insightful understanding of the risks and rewards along each step of the process.

**Requisites:** (REAL EST 410 or 415) and (REAL EST 411 or concurrent enrollment or REAL EST 631 prior to Fall 2023)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Model acquisition and development transactions for real estate.

Audience: Undergraduate

2. Create a preliminary site design for new construction, allowing for zoning limits, setbacks, storm water, open space, parking and circulation.

Audience: Undergraduate

3. Articulate the role of the developer or fund manager in the development or acquisition process as a catalyst, capital source and risk mitigator.

Audience: Undergraduate

4. Differentiate the risk/reward trade-offs and the gamut of risk mitigation techniques in Real Estate development making and acquisition.

Audience: Undergraduate

5. Demonstrate the effective oral and written communication protocols, skills and techniques necessary for real estate deal- and project assessment.

Audience: Undergraduate

## REAL EST 701 – THE REAL ESTATE PROCESS

2 credits.

Introduction to the survey of institutional context, economics of urbanization, historical pattern and structure of city growth, and public policy issues regarding urban environment and business management. Decision-making processes for the manufacture, marketing, management, and financing of real estate space.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the function and operation of various real estate markets and the impact of government in those markets.

Audience: Graduate

2. Explain the key aspects of various commercial real estate transactions and the roles of the various real estate professionals involved in those transactions.

Audience: Graduate

3. Describe the fundamental terms, conditions and requirements of commercial real estate financing.

Audience: Graduate

4. Develop a working knowledge of the development process, including the unique challenges associated with real estate development.

Audience: Graduate

**REAL EST 702 – COMMERCIAL PROPERTY ANALYSIS**

2 credits.

Introduction to various techniques to analyze commercial real estate value and investment risks. Analysis of real property through an understanding of the legal, physical, and economic characteristics of a site and building. Analyze real estate markets to forecast future rental income and vacancies. Develop an operating pro forma and basic investment model, forecast future cash flows, and learn to estimate the market value of commercial properties.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply the concepts, tools, techniques for evaluating individual real estate assets, for the purpose of real estate valuation and investment analysis.

Audience: Graduate

2. Analyze commercial real estate assets from an investment and valuation perspective, including understanding basic property rights, site characteristics and building characteristics.

Audience: Graduate

3. Analyze commercial real estate market data and forecast rents, vacancy and other income for a commercial property.

Audience: Graduate

4. Construct and analyze a commercial real estate operating pro forma considering commercial lease structures.

Audience: Graduate

**REAL EST 703 – REAL ESTATE INVESTMENT ANALYSIS**

2 credits.

Introduction to static property income proforma and dynamic property discounted cash flow analysis. Applied learning from active real estate private equity offering memoranda. Analyze capital investments across the real estate risk spectrum from low-risk core income-producing properties to value-add opportunities to high-risk development and redevelopment investments.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand real estate private equity investment analysis and structures

Audience: Graduate

2. Analyze property market fundamentals and evaluate lease comparables

Audience: Graduate

3. Model and present property investment returns and risk

Audience: Graduate

**REAL EST 706 – THE REAL ESTATE PROCESS**

3 credits.

Institutional background of real property; economics of urbanization, supply and demand; building industry, real estate credit, cyclical fluctuation, rents and prices, real estate market analysis; city growth, structure and planning, land use control, urban redevelopment and real estate investment analysis.

**Requisites:** Graduate/professional standing and (ECON 301 or 311)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**REAL EST 710 – REAL ESTATE FINANCE**

3 credits.

Evaluating the role of financing and leverage in real estate investment analysis; identifying alternative types of financing; valuation of financial structure; sources of equity financing for real estate; mortgage securitization and the operation of secondary mortgage markets.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the basic financial aspects of multifamily and commercial real estate.

Audience: Graduate

2. Construct and analyze multifamily and commercial real estate pro forma cash flow statements and property valuations.

Audience: Graduate

3. Apply the abstracting process of the income elements and critical operational components of multifamily and commercial property leases to quantify the financial impact to the property pro forma cash flow statement.

Audience: Graduate

4. Analyze the financial aspects of multifamily and commercial debt and equity capital returns.

Audience: Graduate

5. Articulate multifamily and commercial real estate property and market characteristics, supply and demand drivers, and differences between the various property types.

Audience: Graduate

**REAL EST 712 – REAL ESTATE LAW**

3 credits.

Advanced principles of real estate law related to ownership rights, negotiations, brokering, transfers, condominium law, financing, income tax law, real estate property taxation, bankruptcy law, construction and development contracts, and residential and commercial leases, and an overview of international legal systems.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**REAL EST 715 – TECHNIQUES OF REAL ESTATE VALUATION**

3 credits.

Topics include highest and best use and most probable use analysis, statistical methods for developing adjustment factors and comparable selection for the market comparison approach, discounted cash flow analysis and income capitalization, and cost approach methods. Issues in appraisal ethics and federal requirements for appraisal practice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply the concepts, tools, techniques for evaluating individual real estate assets, based on the application of economic theory and principles of urban economics, for the purpose of real estate valuation.

Audience: Graduate

2. Create a valuation analysis and a compelling appraisal report for a commercial property.

Audience: Graduate

3. Demonstrate the technical skills of appraisal, including but not limited to data gathering market analysis, and cash flow modeling.

Audience: Graduate

4. Describe how market dynamics, constrained by the geographic, physical and legal parameters, determine values of individual assets in the market.

Audience: Graduate

5. Explain the economic forces that drive real estate value in the market.

Audience: Graduate

**REAL EST/URB R PL 720 – URBAN ECONOMICS**

3 credits.

Analysis of spatial relationships in the urban economy, including urban land, labor and housing markets; urban transport; city governance and finance; and regional models. Historical and applied focus. Interdisciplinary approach emphasizing economics, geography, and planning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze how urban environmental issues impact real estate markets and development

Audience: Graduate

2. Apply an evidenced-based framework to analyze the different types and roles of cities

Audience: Graduate

3. Demonstrate effective oral and written communication skills in individual and group projects as a means to present course concepts and market analyses

Audience: Graduate

4. Understand the role of urban public policy, particularly land use controls, and evaluate its impact on real estate markets

Audience: Graduate

5. Explain the fundamental determinants of location across and within cities, as well as rents and prices of land and real estate

Audience: Graduate

6. Explain how real estate markets affect, and are affected by, national and regional economic events and processes.

Audience: Graduate

### REAL EST 750 – COMMERCIAL PROPERTY DEVELOPMENT

3 credits.

Creating industrial real estate, office space, shopping centers, and hotel/recreation facilities, including strategy, market and feasibility analysis, site planning/design, capital cost analysis, construction, and financial structuring. Emphasis on case studies and project analysis.

**Requisites:** (REAL EST 710 or concurrent enrollment) and (REAL EST 715 or concurrent enrollment)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain and apply the key components of a commercial real estate development analysis.

Audience: Graduate

2. Articulate the role of the developer in the development process as a catalyst, capital source and risk mitigating agent.

Audience: Graduate

3. Consider the risk/reward trade-offs and the gamut of risk mitigation techniques in real estate.

Audience: Graduate

4. Demonstrate the effective oral and written communication protocols, skills and techniques necessary for real estate deal-making and project assessment.

Audience: Graduate

5. Create a preliminary site design for new construction, allowing for zoning limits, setbacks, storm water, open space, parking and circulation

Audience: Graduate

### REAL EST 760 – LAWYERING THE DEVELOPMENT DEAL: A PRACTICAL GUIDE TO REAL ESTATE LAW

3 credits.

Analyze current issues in real estate law with respect to the acquisition, leasing, financing, and development of real estate projects. Explore topics in the context of specific development projects across the US.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of the site selection and site control process through an evaluation of the interplay between the business and legal decisions involved in the property acquisition process.

Audience: Graduate

2. Evaluate the role of leasing in the context of different real estate transactions and learn how to prepare a lease abstract.

Audience: Graduate

3. Explore the various options for financing real estate projects, both public and private, including traditional bank financing, TIF and tax credit financing.

Audience: Graduate

4. Analyze how land use and zoning approvals are negotiated and obtained during the development process and learn the importance of working effectively with the staff of federal, state and local governments.

Audience: Graduate

### REAL EST 765 – CONTEMPORARY TOPICS

1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### REAL EST 770 – COMMERCIAL REAL ESTATE FINANCE

3 credits.

A capstone focused on advanced topics in commercial real estate finance. The course is broken into three parts: 1) Financial Derivatives, 2) Risk Management, and 3) Structured Finance. Lectures will address relevant topic areas and develop methodological skills. Industry professionals will provide real world markets perspective. case studies will be used to reinforce material presented in class.

**Requisites:** Graduate standing and REAL EST 710

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### REAL EST 799 – READING AND RESEARCH-URBAN LAND ECONOMICS

1-6 credits.

Individual work suited to the needs of graduate students may be arranged both during regular sessions and the intersession periods.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### REAL EST 841 – APPLIED REAL ESTATE INVESTMENT TRACK (AREIT) I

6 credits.

Focuses on investment processes, guidelines, governance, underwriting, company valuation, sector analysis and portfolio analysis. Allows selected students to function as portfolio managers by investing real money (endowment to the real estate program) in listed real estate companies, primarily real estate investment trusts (REITs).

**Requisites:** Graduate/professional standing, (REAL EST 410 or 710), and REAL EST 540, or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Know the various property sectors deeply enough to be able to make stock and sector recommendations

Audience: Graduate

2. Create an economic, capital markets and real estate outlook

Audience: Graduate

3. Create an investment philosophy, process, and strategy

Audience: Graduate

4. Demonstrate audience-appropriate presentation skills (e.g. stock pitches, portfolios, strategy updates, summary reports for external AREIT Board)

Audience: Graduate

5. Manage a portfolio which includes adjusting holdings based on variety of factors

Audience: Graduate

6. Analyze investment performance

Audience: Graduate

7. Demonstrate constructive and productive teamwork skills

Audience: Graduate

### REAL EST 842 – APPLIED REAL ESTATE INVESTMENT TRACK (AREIT) II

3 credits.

An additional experiential learning in the areas of investment processes, guidelines, governance, underwriting, and portfolio analysis. Selected students will function as portfolio managers by investing real money (endowment to the real estate program) in listed real estate companies, primarily real estate investment trusts (REITs).

**Requisites:** REAL EST 841

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Know the various property sectors deeply enough to be able to make stock and sector recommendations

Audience: Graduate

2. Create an economic, capital markets and real estate outlook

Audience: Graduate

3. Create an investment philosophy, process, and strategy

Audience: Graduate

4. Demonstrate audience-appropriate presentation skills (e.g. stock pitches, portfolios, strategy updates, summary reports for external AREIT Board)

Audience: Graduate

5. Manage a portfolio which includes adjusting holdings based on variety of factors

Audience: Graduate

6. Analyze investment performance

Audience: Graduate

7. Demonstrate constructive and productive teamwork skills

Audience: Graduate

### **REAL EST 851 – PRIVATE REAL ESTATE EQUITY INVESTMENT II: UNDERWRITING AND INVESTMENT PROCESSES**

6 credits.

Focuses on the real estate private equity organization through constructing investment criteria statements, vetting investment opportunities, implementing investment processes, and presenting the opportunities to the WREAA Fund Investment Committee.

**Requisites:** Graduate/professional standing and REAL EST 550, or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Construct an investment criteria sheet

Audience: Graduate

2. Build a pipeline of potential investment opportunities

Audience: Graduate

3. Underwrite private equity offering memoranda

Audience: Graduate

4. Evaluate the viability of the real estate investment manager (sponsor)

Audience: Graduate

5. Present offering memoranda analysis and underwriting to the Fund Investment Board

Audience: Graduate

### **REAL EST 852 – PRIVATE REAL ESTATE EQUITY INVESTMENT III: GUIDELINES, GOVERNANCE, AND PORTFOLIOS**

3 credits.

Focuses heavily on building the investment pipeline, analyzing and underwriting new real estate private placement investments, understanding the governance structures, and benchmarking Fund investment returns to industry standards. Investments opportunities that meet investment criteria expectations will be presented to an external Investment Committee of the Wisconsin Real Estate Alumni Association.

**Requisites:** REAL EST 851

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Build a pipeline of potential investment opportunities

Audience: Graduate

2. Underwrite private equity offering equity memoranda

Audience: Graduate

3. Evaluate the viability of the real estate investment manager (sponsor)

Audience: Graduate

4. Present offering memoranda analysis and underwriting to the Fund Investment Board

Audience: Graduate

5. Benchmark Fund investments against industry standards

Audience: Graduate

6. Understand the private equity organization's roles and responsibilities, the investment guidelines, and governance structures

Audience: Graduate

**REAL EST 870 – ADVANCED REAL ESTATE FINANCE THEORY**

3 credits.

An overview of theoretical and empirical research on real estate, with a focus on real estate finance. The topics covered are intended to expose some of the major contributions in real estate research as well as a consideration of the current trends and methodological advances in recent papers.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the ability to read and critique theoretical and empirical papers in real estate and urban land economics  
Audience: Graduate

2. Demonstrate skills needed to undertake and present theoretical and empirical research appropriate for the intended audience  
Audience: Graduate

3. Demonstrate knowledge of some of the main econometric tools and theoretical modeling strategies used in recent papers  
Audience: Graduate

**REAL EST 875 – ADVANCED URBAN LAND ECONOMICS**

3 credits.

Provides an overview of theoretical and empirical research on real estate and urban economics, with a focus on asset liquidity and place-based policies.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and articulate a research question  
Audience: Graduate

2. Summarize literature for a research proposal  
Audience: Graduate

3. Assess the strengths and weaknesses of a research paper  
Audience: Graduate

4. Describe an empirical and/or theoretical model appropriate to address a research question  
Audience: Graduate

5. Effectively present a research paper to an academic audience  
Audience: Graduate

6. Write a research proposal  
Audience: Graduate

**REAL EST 978 – RESEARCH SEMINAR IN REAL ESTATE AND URBAN LAND ECONOMICS**

1 credit.

Explore cutting-edge research on urban economics and real estate being conducted across different universities. Invited speakers will describe current or past research, identify challenges involved in their work, and highlight research conceptualization, approaches, methods, and/or data analysis, to better understand how to execute a research project.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 5 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify a good research question.  
Audience: Graduate

2. Articulate the state-of-the-art empirical methods in empirical research, the pros and cons for each empirical strategy, and how to choose between different empirical strategies.  
Audience: Graduate

3. Analyze the workhorse theoretical models in urban economics and real estate.  
Audience: Graduate

4. Summarize the current state of the real estate and urban economics literature to recognize potential contributions to the literature.  
Audience: Graduate

5. Apply cutting-edge research methodologies to their own research projects.  
Audience: Graduate

6. Demonstrate oral presentation skills in presenting their own research projects to an academic audience.  
Audience: Graduate

7. Expand networks within and beyond the Wisconsin School of Business to serve as a springboard for their careers.  
Audience: Graduate

**REAL EST 990 – REAL ESTATE INDEPENDENT RESEARCH PHD THESIS**

1-12 credits.

Individual work to complete dissertation requirement of Ph.D. program.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## REAL EST 999 – READING AND RESEARCH-REAL ESTATE PHD

1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged both during regular sessions and during the intersession periods.

**Requisites:** Declared in Business PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

# REHABILITATION MEDICINE (RHAB MED)

## RHAB MED 699 – INDEPENDENT STUDY

0-5 credits.

Independent study projects as arranged with faculty or instructional staff.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

## RHAB MED 919 – INDIVIDUALIZED FOURTH YEAR CLINICAL CLERKSHIP

1-12 credits.

Individually arranged fourth year clinical clerkships. (Student must have Fourth Year Committee approval to count for fourth year credit.)

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## RHAB MED 920 – REHABILITATION MEDICINE CLINICAL ELECTIVE

2-4 credits.

Inpatient hospital setting and outpatient clinical setting. Direct supervision by attending physicians and residents. Inpatient activities include rounding on rehabilitation medicine service patients, observing patient therapy sessions, discussing patient cases. Outpatient activities includes seeing clinic patients, participating in procedures like joint injections and fluoroscopic-guided spinal injections, performing electromyography (EMG), discussing patient cases. Evaluate and manage a full spectrum of patients with neurologic and musculoskeletal issues. Exposure to multiple disciplines involved in the rehabilitation process. Inpatient diagnoses commonly encountered include stroke, brain injury, spinal cord injury, orthopedic injuries, debility, amputations. Outpatient diagnoses commonly encountered include developmental disabilities, spine disorders, chronic pain, arthritis, myofascial pain and fibromyalgia, spasticity, and chronic conditions from prior neurologic injuries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis-driven history and musculoskeletal and neurologic exams.

Audience: Graduate

2. Develop and present a weighted differential diagnosis.

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis.

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities.

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members.

Audience: Graduate

6. Complete written documentation in a comprehensive, concise, accurate and timely manner.

Audience: Graduate

7. Review, interpret, and present current literature to support patient care.

Audience: Graduate

8. Develop clinically relevant questions to advance learning.

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members.

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care.

Audience: Graduate

11. Engage patients in shared decision-making regarding tests, orders and procedures.

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families.

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate.

**RHAB MED 923 – PHYSICAL MEDICINE AND REHABILITATION-MARSHFIELD**

2-12 credits.

Clinical elective for fourth year medical students.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**REHABILITATION  
PSYCHOLOGY AND SPECIAL  
EDUCATION (RP & SE)****RP & SE 100 – DISABILITY AND SOCIETY**

3 credits.

Provides introductory and interdisciplinary life-span perspectives on disability, relevant for both education and non-education majors. Introduces theoretical, cultural, and political models of disability and explores the lived experiences of persons with disabilities (or people who are perceived to have disabilities) in society.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**RP & SE 121 – DISABILITY AND SUBSTANCE ABUSE**

3 credits.

Designed to provide an entry-level overview of disability under federal legislation and regulation, substance use and abuse among persons with disabilities as either a primary or secondary disability, the physical, psychological, and socio-cultural effects of drugs, and the impact substance abuse or dependence has on the capacity of individuals with disabilities to live independently, work, and otherwise engage in a full range of life activities.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the variability of definitions of disability in federal legislation or regulations such as the Americans with Disabilities Act, Social Security Act, Individuals with Disabilities Education Act, and the Rehabilitation Act.

Audience: Undergraduate

2. Identify the physiological, psychosocial, cultural, and other factors associated with substance abuse or dependence among persons with disability as a primary or co-morbid impairment.

Audience: Undergraduate

3. Identify the impact on major life areas, such as independent living, work, and leisure associated with substance abuse or dependence.

Audience: Undergraduate

4. Identify and classify major categories of licit and illicit drugs.

Audience: Undergraduate

5. Demonstrate an understanding of the multi-faceted nature and controversy related to substance use and abuse.

Audience: Undergraduate

6. Describe the physical effects of substance use on various body systems (including tolerance, addiction, and withdrawal symptoms) and the capacity of these effects to aggravate or diminish symptoms associated with specific disabilities.

Audience: Undergraduate

7. Develop an understanding of the methods and models used to assess, diagnose, treat, and prevent substance use and abuse across an individual's lifespan among persons with a disability.

Audience: Undergraduate

8. Increase understanding of social and cultural issues in regard to disability and substance use, prevention, public policy, and law.

Audience: Undergraduate

9. Expand knowledge and understanding of current research findings related to disability and substance use, abuse, and current laws.

Audience: Undergraduate

10. Analyze controversial issues surrounding disability and substance abuse.

Audience: Undergraduate

### **RP & SE 125 – HEALTH AND REHABILITATION PROFESSIONS**

3 credits.

An exploration of various health and rehabilitation professions within the United States health care system, including educational requirements, professional expectations, and practice sites. Consideration is given to career planning in health and rehabilitation professions with review of current employment opportunities and workforce trends.

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe roles of professionals in various health and rehabilitation professions.

Audience: Undergraduate

2. Assess current employment opportunities in the health and rehabilitation professions.

Audience: Undergraduate

3. Find and share current literature relating to current issues in the health and rehabilitation professions.

Audience: Undergraduate

4. Using established university career exploration resources, assess interests and aptitudes for various health and rehabilitation professions.

Audience: Undergraduate

5. Summarize similarities and differences between the various health and rehabilitation professions, including their educational requirements and practice settings.

Audience: Undergraduate

6. Assess readiness for a particular health and rehabilitation professional education program and establish a plan to address areas of need.

Audience: Undergraduate

7. Complete an interview with a professional in the area of interest.

Audience: Undergraduate

8. Complete a group project on a current health and rehabilitation professions issue, including a paper and a class presentation.

Audience: Undergraduate

### **RP & SE/LEGAL ST 135 – DISABILITY AND THE CRIMINAL JUSTICE SYSTEM**

3 credits.

Explores the interaction between the criminal justice system and disability. Explores common experiences of persons with disability such as limited access to community services, poverty, and homelessness and the connection of these experiences to mass incarceration. Explores federal disability rights laws and the implementation of these laws in education, legal, and incarceration settings. Introduction to criminal justice reform to address the experiences of persons with disabilities in this system.

**Requisites:** None

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify the causes for over-incarceration of people with disabilities in the United States

Audience: Undergraduate

2. Demonstrate knowledge and understanding of the federal and state policies related to the incarceration and community monitoring of persons with disabilities who have been involved in the criminal justice system

Audience: Undergraduate

3. Demonstrate knowledge of roles and functions that rehabilitation professionals fill within the criminal justice system

Audience: Undergraduate

4. Demonstrate knowledge of treatment programming for individuals with disabilities who are incarcerated and the efficacy of different interventions in increasing community re-integration

Audience: Undergraduate

5. Demonstrate knowledge of community supports for individuals with disabilities subsequent to their release from institutional care

Audience: Undergraduate

6. Develop an awareness of the ethical standards of professional practice that rehabilitation professionals working with individuals with disabilities within the legal system

Audience: Undergraduate

### **RP & SE 200 – ISSUES IN SPECIAL EDUCATION**

3 credits.

Designed for learning about special education, particularly related to careers in this field. Provides information on the history and evolution of special education and special educators' roles.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RP & SE 210 – THE DISABILITY EXPERIENCE**

3 credits.

Introduction to the modern disability experience, with an emphasis on disability justice and advocacy. Examines the societal implications and individual experiences of disability, centering the voices of individuals with disabilities themselves, and discusses strategies that can be used to work toward their full participation and inclusion in society.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Define the term “disability” in multiple ways and in multiple contexts

Audience: Undergraduate

2. Explain various models of disability, including the medical and social models, and describe how those models affect the lives of individuals with disabilities

Audience: Undergraduate

3. Summarize the foundational implications of the disability rights movement and how it relates to current disability justice and advocacy actions

Audience: Undergraduate

4. Describe how societal attitudes affect the lives of people with disabilities and explain strategies to modify them

Audience: Undergraduate

5. Articulate the role of power and the impact of bias, stigma, stereotypes, and prejudice in the lives of individuals with disabilities, and describe ways to reduce them

Audience: Undergraduate

6. Illustrate an intersectional approach to the experience of disability, including the implications of living with multiple minoritized statuses (BIPOC, LGBTQIA+, etc.)

Audience: Undergraduate

7. Examine the ways that people react to the onset of a disability or chronic illness, including coping, acceptance, adaptation, and disability identity development

Audience: Undergraduate

8. Explain the role of families, relationships, human intimacy, and sexuality in the disability experience

Audience: Undergraduate

9. Develop into confident and effective advocates for the full participation and inclusion of individuals with disabilities in everyday society

Audience: Undergraduate

**RP & SE 300 – INDIVIDUALS WITH DISABILITIES**

3 credits.

Designed to expand the knowledge base of future educators, clinicians, and society members to better understand and serve the diverse needs and interests of individuals with disabilities. Introduces the concept of disability as well as the field of special education. The history, etiology, and characteristics of specific categories of disability are examined, as are educational and other federally mandated programs designed to address the needs of both children and adults with disabilities. Topics germane to the study of disability and the field of special education are explored.

**Requisites:** None**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate an understanding of the concepts of ability differences and exceptionality

Audience: Undergraduate

2. Articulate knowledge of the specific categories of disability designated by federal law and characteristics associated with those categories

Audience: Undergraduate

3. Summarize significant legislation and litigation that has affected the education and lives of individuals with disabilities

Audience: Undergraduate

4. Demonstrate knowledge of interventions utilized by professionals who work with people who have disabilities or are at risk of being identified as having a disability

Audience: Undergraduate

**RP & SE 310 – POSITIVE PSYCHOLOGY AND WELL BEING**

3 credits.

Introduction to positive psychology, or the science of human strengths, mental health, and well-being. Covers theory and current research on positive psychology including concepts of optimism, flow, gratitude, and purpose in life. Positive psychology concepts are discussed within the context of health promotion, with an emphasis on minimizing the impact of illness and disability. Learn to apply positive psychology concepts in personal and professional contexts to cultivate fulfilling, healthy, and meaningful lives.

**Requisites:** Sophomore standing**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**RP & SE 311 – INTERNATIONAL PERSPECTIVES ON DISABILITY IN AUSTRALIA**

3 credits.

Examine the lived experience of Australians with disabilities, comparing the treatment of and services provided to disabled US Americans and Australians with respect to the standards outlined in the United Nations' Convention on the Rights of Persons with Disabilities (CRPD) and localized policies abroad, and considering the US and Australia's multicultural landscape and shared colonial background. Understand issues surrounding disability access, inclusion, and rights globally to become effective advocates for positive change. Must have sophomore standing and a valid passport.

**Requisites:** Consent of instructor

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Discuss the implications of the 2007 Convention on the Rights of Persons with Disabilities for individuals with disabilities in the US and Australia

Audience: Undergraduate

2. Describe and compare issues related to access and inclusion of people with disabilities from diversity of cultural backgrounds in the US and Australia

Audience: Undergraduate

3. Describe and compare the services and supports that are provided to individuals with disabilities in the US and Australia

Audience: Undergraduate

4. Articulate international development needs with respect to the rights and services provided to people with disabilities, and work to improve them

Audience: Undergraduate

**RP & SE/COM ARTS/JOURN 312 – DISABILITY AND THE MEDIA**

3 credits.

Examines the interaction between disability and media in modern society. Explore representations of disability in various forms of mass media, including television and film, social media, advertising, and others. Analyze how these representations affect disabled people directly, including the development of their identities, as well as how they influence disability attitudes and stigma throughout society. Discuss overt and casual ableism within media, as well as how the disability community uses media for activism. Discuss issues of access for disabled people (e.g., assistive technology, captions, audio descriptions), as well as the future of disability representations within media.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify key concepts and terminology for understanding the intersection of disability and the media, including the medical and social models of disability, definitions and conceptualizations of disability, ableism, stigma, disability justice, disability identity development, and others.

Audience: Undergraduate

2. Identify how disability is represented within various forms of media, and how these representations affect disabled people both directly and indirectly.

Audience: Undergraduate

3. Describe how technology can facilitate access to media for disabled people

Audience: Undergraduate

4. Discuss how the media is and can be utilized in pursuit of disability justice.

Audience: Undergraduate

### RP & SE 316 – HEALTH PROMOTION FOR INDIVIDUALS WITH DISABILITY AND CHRONIC ILLNESS

3 credits.

Addresses theories and research related to health psychology, health behavior and quality of life. Focus on understanding models of healthy lifestyle interventions, assessment/intervention strategies for health promotion, factors affecting health behavior, public health initiatives. Attention is given to application of practical tools for promoting health and preventing secondary conditions for individuals with disabilities and chronic illness.

**Requisites:** Declared in Rehabilitation Psychology, Health Promotion and Health Equity, or classified as Pre-Rehabilitation Psychology or Pre-Special Education

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify health issues, health promotion and health practices that increase functioning and reduce secondary conditions due to disability and chronic illness.

Audience: Undergraduate

2. Engage in dialogue across professional disciplines related to health and disability

Audience: Undergraduate

### RP & SE 320 – INTRODUCTION TO TEACHING IN SPECIAL EDUCATION

3 credits.

Provides an overview of teaching in early childhood and K-12 special education and introduces the content of and highlights the underlying themes (e.g., inclusion, collaboration) embedded in teacher preparation courses required for licensing in early childhood special education and K-12 special education.

**Requisites:** Declared in Special Education BSE, Elementary Education and Special Education BSE, or Special Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the legal and procedural foundation of education for students with disabilities (e.g., The Individuals with Disabilities Education Act (IDEA), Individualized Family Service Plan (IFSP), Individualized Education Program (IEP), 504 Plan).

Audience: Both Grad & Undergrad

2. Describe the initial preparation standards of early childhood/K-12 special educators, high leverage practices, and recommended practices.

Audience: Both Grad & Undergrad

3. Identify, write, and communicate individualized goals based on students' and families' assets, needs, priorities, and values.

Audience: Both Grad & Undergrad

4. Develop lesson plans that reflect high expectations and individualized goals and promote students' full membership and participation in inclusive programs, schools, and communities.

Audience: Both Grad & Undergrad

5. Articulate the roles and purposes of assessment in teaching in special education.

Audience: Both Grad & Undergrad

6. Apply knowledge of the IFSP/IEP processes to advocate for students with disabilities and their families.

Audience: Graduate

**RP & SE 325 – SELF MANAGEMENT OF CHRONIC ILLNESS AND DISABILITY**

3 credits.

Provides knowledge and understanding of concepts of self-management of chronic illness and disability using both theoretical and empirically-based approaches. Includes discussion of collaboration among healthcare providers in helping individuals manage symptoms of their chronic health conditions, condition-specific education about the typical symptoms and advice about the decisions and actions that the individual with the chronic health condition can take when those symptoms occur, and coping skills that can be facilitated to address the emotional reactions and stress related to chronic health conditions.

**Requisites:** Declared in Health Promotion and Health Equity BS or Rehabilitation Psychology BS

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Define Self-Management in the context of health  
Audience: Undergraduate

2. Analyze the theoretical models and research on condition-specific, empirically based interventions that promote self-management  
Audience: Undergraduate

3. Apply the tripartite approach to specific chronic health conditions  
Audience: Undergraduate

**RP & SE 330 – BEHAVIOR ANALYSIS: APPLICATIONS TO PERSONS WITH DISABILITIES**

3 credits.

Children with exceptional learning and behavior characteristics (contrasting views and practices); a humanistic behavioral approach; development and evaluation of behavior change programs, classification and foundations of exceptional learning and behavior characteristics, and facilitating behavior change in different settings.

**Requisites:** RP & SE 300 and declared in Rehabilitation Psychology, Special Education, Disability Rights and Services Certificate, Special Education MS or classified as Pre-Rehabilitation Psychology or Pre-Special Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RP & SE 335 – INTRODUCTION TO SPORT PSYCHOLOGY**

3 credits.

Examines the psychological factors that influence participation in sport and exercise. Theories and interventions used to understand and enhance performance will be examined. Additionally, mental health, substance use and transition out of sport will be reviewed.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. demonstrate understanding of major theories and approaches of motivation and performance anxiety theories  
Audience: Undergraduate

2. demonstrate understanding of peak performance theories and the skills and the theoretical underpinnings of these skills.  
Audience: Undergraduate

3. demonstrate understanding of clinical mental health diagnoses within the specific population of athletes.  
Audience: Undergraduate

4. demonstrate professional ethics and behaviors with mental health processes, including steps to take for individuals with suicidal ideation.  
Audience: Undergraduate

5. synthesize knowledge and use insight and creativity to better understand and create programs for those working with athletes both with performance and mental health issues.  
Audience: Undergraduate

6. demonstrate understanding of multicultural issues that impact athletic environments and personal performance.  
Audience: Undergraduate

7. demonstrate an understanding of psychosocial theories of injury and aspects associated with athletic injury and possible return to sport or completion of career  
Audience: Undergraduate

8. design and create professional presentations utilizing current research and synthesizing information from finding and professional resources.  
Audience: Undergraduate

9. synthesize knowledge and use insight and creativity to better understand athletic identity as it relates to the process of transition out of sport with a special look at career transition.  
Audience: Undergraduate

**RP & SE 355 – REMOTE SERVICE PROVISION STRATEGIES FOR HEALTH AND REHABILITATION PROVIDERS**

3 credits.

Explore the use of technology to provide evaluation, consultation, and services to the community. Study the creation and use of telecounseling and other remote strategies to provide services that are accessible to individuals unable to receive care in a traditional office setting. Introduce technology for remote service provision and a foundational knowledge to effectively integrate this service modality as this practice evolves.

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**Learning Outcomes:** 1. Demonstrate knowledge of different remote service provision strategies and technology

Audience: Undergraduate

2. Demonstrate an understanding of the ethical implications of remote service provision

Audience: Undergraduate

3. Identify the basic requirements for the delivery of remote services

Audience: Undergraduate

4. Demonstrate the ability to differentiate and apply different telecounseling technologies and practices

Audience: Undergraduate

5. Identify basic remote service provision standards

Audience: Undergraduate

6. Demonstrate knowledge of public concerns regarding new treatment modalities

Audience: Undergraduate

7. Identify methods to promote and advocate the use of remote technologies to overcome geographic barriers to deliver treatment and education

Audience: Undergraduate

**RP & SE/CURRIC 365 – TEACHING MATHEMATICS IN INCLUSIVE SETTINGS**

3 credits.

Introduction to a variety of approaches for teaching mathematics to students in inclusive schools

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Describe and implement principles of systematically designed instruction to develop lesson plans that foster high-quality mathematics instruction for students with disabilities.

Audience: Undergraduate

2. Determine a multitude of tools to assess students' mathematical learning and utilize assessment results to adjust instructional practice.

Audience: Undergraduate

3. Identify, employ, and advocate for instructional practices that promote rich learning experiences and meaningful inclusion of students with disabilities in mathematical settings.

Audience: Undergraduate

4. Evaluate mathematics as a practice, as a philosophy, and how it impacts your own identity as a teacher and the identities of students with disabilities

Audience: Undergraduate

5. Articulate key mathematics concepts relevant to special educators' instruction in K-12 settings.

Audience: Undergraduate

### **RP & SE 390 – COMMUNITY PSYCHIATRIC REHABILITATION**

3 credits.

Overview of the experiences, symptoms, and unique diagnoses of individuals with severe mental health illness along with common co-occurring diagnoses. Introduction to the guiding principles that rehabilitation services and human services use to support these populations.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe symptoms and diagnoses commonly associated with severe mental health illnesses (SMI), including schizophrenia spectrum disorders, bipolar disorder, major depressive disorder, and common co-occurring diagnoses.

Audience: Both Grad & Undergrad

2. Recognize societal barriers commonly experienced by people living with SMI, including the significance of the long-standing and deep-seeded roots of attitudes and discrimination towards this group.

Audience: Both Grad & Undergrad

3. Integrate recovery-oriented practices into the application of medical and psychosocial interventions for individuals with SMI, including consideration for the frequent conflicts between psychiatric rehabilitation practices, professional ethics, and the principles of recovery.

Audience: Both Grad & Undergrad

4. Distinguish between community mental health service options and their usefulness and necessity for collaborating with diverse individuals.

Audience: Both Grad & Undergrad

5. Understand the importance and bidirectional impact of SMI on the individual and their family unit.

Audience: Both Grad & Undergrad

6. Analyze case studies, summarize client strengths and needs, and suggest potential interventions.

Audience: Both Grad & Undergrad

7. Describe the health inequities experienced by people living with SMI and strategies for improving physical health outcomes for this group.

Audience: Both Grad & Undergrad

8. Employ strategies aimed at reducing societal attitudes and stigma experienced by individuals living with SMI.

Audience: Both Grad & Undergrad

9. Complete research on a specific area of study related to community psychiatric rehabilitation and relevant to student long-term career aspirations

Audience: Graduate

### **RP & SE 405 – CURRENT TOPICS IN SPECIAL EDUCATION**

1 credit.

Explores current issues, topics, and trends in special education.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **RP & SE/CURRIC 406 – RACE, INTERSECTIONALITY, AND EQUITY IN EDUCATION**

3 credits.

Addresses a range of issues to help teachers more thoughtfully and equitably serve their students of color and develop a critical and historical understanding of the racism, marginalization, and exclusion that is endemic to the U.S. public school system. Provides an overview of foundational constructs that are essential for pre-service teachers preparing to teach and serve diverse students and families. Explore how race, racism, and racialization in education intersect with class, gender, dis/ability, religion, sexuality, etc. to shape inequitable schooling conditions and experiences for students of color. Analyze the effects at the individual, interactional, institutional, and societal levels Consider how power always-already enables particular policies and practices that reproduce educational inequities and hence sustain white privilege and dominance.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Undergraduate

2. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity.

Audience: Undergraduate

3. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the U.S.

Audience: Undergraduate

4. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

Audience: Undergraduate

**RP & SE 435 – OVERVIEW OF EARLY CHILDHOOD SPECIAL EDUCATION**

3 credits.

An introduction to the Early Childhood Special Education profession including historical, philosophical, social and psychological foundations, awareness of values, ethical and legal issues, staff relations, and the importance of becoming an advocate for children and families. Analyze trends in early education, including diversity, early intervention, early childhood special education, family centered practices, legislation, public policy, and developmentally appropriate practice.

**Requisites:** Declared in Special Education: Early Childhood Special Education/Special Education Dual Certification Birth-Grade 12 BSE, Special Education: Early Childhood Special Education Birth-Grade 3 BSE, or Certificate in Disability Rights and Services

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the curriculum models and instructional and intervention approaches that primarily guide early childhood special education practice.

Audience: Undergraduate

2. Explain key components of early childhood special education practice, including assessment, multi-tiered systems of support, systematic instruction, and collaboration with families and other professionals

Audience: Undergraduate

3. Understand, evaluate, and apply research to support evidence-based practice with young children with disabilities.

Audience: Undergraduate

4. Identify the ethical and legal guidelines that shape the profession of early intervention/early childhood special education.

Audience: Undergraduate

**RP & SE 445 – SPECIAL EDUCATION PRACTICUM: EARLY ADOLESCENCE THROUGH ADOLESCENCE**

3-6 credits.

Approved placement with a qualified cooperating teacher serving students with disabilities in any of grades 6-12, supervised by a qualified university supervisor. Includes observation and supervised practice in the field of special education and discussion focusing on reflection and application of special education theories to practical settings.

**Requisites:** Declared in the Special Education BSE or Special Education: Teacher Certification MS

**Course Designation:** Workplace - Workplace Experience Course  
Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Reflect on their actions and attitudes in the classroom to improve their practice.

Audience: Both Grad & Undergrad

2. Plan and carry out lessons, reflecting a variety of instructional strategies and arrangements, to meet the needs of a wide range of students.

Audience: Both Grad & Undergrad

3. Demonstrate professional communication skills with parents, related services providers, and other members of the education community.

Audience: Both Grad & Undergrad

4. Demonstrate an ability to proactively manage the learning environment

Audience: Both Grad & Undergrad

5. Identify research that supports their instructional decisions and interactions with students.

Audience: Graduate

6. Demonstrate professional leadership and advocacy skills in the school setting.

Audience: Graduate

**RP & SE 455 – EARLY CHILDHOOD SPECIAL EDUCATION METHODS: INCLUSIVE STRATEGIES FOR INFANTS AND TODDLERS**

3 credits.

Explore instructional approaches and practices that support developmentally appropriate, effective, and inclusive early childhood education and evidenced-based intervention for infants and toddlers (i.e., birth-3 years old). Learn strategies to support access to the general education curriculum, participation, and achievement of young children with developmental delays and disabilities. Examines "what" to teach, the selection of developmentally- and individually-appropriate child goals and objectives, and "how" to teach, the practical components of developing and delivering effective, evidenced based instruction and intervention. Emphasis on adapting general early childhood education curriculum and practices in order to support children's individualized goals within inclusive classrooms. Addresses planning and implementing instruction in alignment with state and federal mandates.

**Requisites:** Declared in Special Education: Early Childhood Special Education/Special Education Dual Certification Birth-Grade 12 or Special Education: Early Childhood Special Education Birth-Grade 3 BSE

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write individualized family service outcomes in alignment with policy and quality standards and use said outcomes to determine supports and intervention strategies for young children (Birth-3 years) with developmental delays or disabilities and their families.  
Audience: Undergraduate

2. Apply an understanding of early childhood curriculum, child strengths and support needs, and family preferences, support needs, and characteristics to determine curricular adaptations, instructional strategies, and family support strategies.  
Audience: Undergraduate

3. Identify different methods of family-based practices and family capacity-building practices in order to determine how to partner with and support families and young children (Birth-3 years) from a variety of backgrounds.  
Audience: Undergraduate

**RP & SE 457 – ELEMENTARY STUDENT TEACHING SEMINAR - ELEMENTARY/SPECIAL EDUCATION DUAL MAJOR**  
1 credit.

Addresses professionalism, research and problem solving, assessment, and collaborative skills relevant to the elementary and special education student teaching placement.

**Requisites:** Declared in Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE 460 – EARLY CHILDHOOD SPECIAL EDUCATION METHODS: INCLUSIVE STRATEGIES FOR PRESCHOOL AND EARLY ELEMENTARY**

3 credits.

Covers instructional approaches and practices that support developmentally appropriate, effective, and inclusive early childhood education and evidenced-based intervention for preschool and early elementary-age children (i.e., 3-8 years old). Focuses on strategies for supporting access to the general education curriculum, participation, and achievement of young children with developmental delays and disabilities. Learn "what" to teach, the selection of developmentally- and individually-appropriate child goals and objectives, and "how" to teach, the practical components of developing and delivering effective, evidenced based instruction and intervention. Emphasis is placed on adapting general early childhood education curriculum and practices in order to support children's individualized goals within inclusive classrooms. Addresses planning and implementing instruction in alignment with state and federal mandates.

**Requisites:** Declared in Special Education: Early Childhood Special Education/Special Education Dual Certification Birth-Grade 12 or Special Education: Early Childhood Special Education Birth-Grade 3 BSE

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Write individualized annual goals and short-term objectives in alignment with policy and quality standards and use said goals to determine supports and instructional strategies for young children (Prek-3rd grade) with developmental delays or disabilities.  
Audience: Undergraduate

2. Apply an understanding of early childhood curricular standards, child strengths and support needs, and family preferences and characteristics to determine curricular adaptations and instructional strategies.  
Audience: Undergraduate

3. Distinguish the multiple purposes and processes of progress monitoring and determine appropriate methods of progress monitoring for different types of goals/objectives and instructional contexts.  
Audience: Undergraduate

4. Identify multiple ways to partner with families and other professionals to collaboratively determine and implement supports for young children (Prek-3rd grade) with developmental delays or disabilities.  
Audience: Undergraduate

## RP & SE 464 – DIAGNOSIS, ASSESSMENT, AND INSTRUCTIONAL PLANNING IN SPECIAL EDUCATION

3 credits.

Introduction to assessment terms and tools used to assist in the identification and diagnosis of students with disabilities; provide the skills necessary to collect and use assessment data to promote the successful outcomes in core academic instruction for students with disabilities.

**Requisites:** Declared in Special Education, Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert or Special Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of basic terminology used in assessment

Audience: Both Grad & Undergrad

2. Articulate knowledge of educators, families and other professionals roles in the assessment process

Audience: Both Grad & Undergrad

3. Demonstrate knowledge of different types of assessment including specific uses, limitations and culturally responsive practices

Audience: Both Grad & Undergrad

4. Demonstrate knowledge of how formal and informal assessments can be used for instructional decision-making and monitoring student progress

Audience: Both Grad & Undergrad

5. Articulate knowledge of the legal rights and responsibilities of the IEP team including educators, parents and other members

Audience: Both Grad & Undergrad

6. Articulate understanding of legal mandates and accountability of schools and how they relate to students with disabilities.

Audience: Both Grad & Undergrad

7. Identify current research in the field that supports their decisions about what interventions to include in the IEPs of students with disabilities.

Audience: Graduate

8. Identify research-based practices in the area of collaboration when developing the IEPs of students with disabilities.

Audience: Graduate

## RP & SE 465 – LANGUAGE AND READING INSTRUCTION FOR STUDENTS WITH DISABILITIES

3 credits.

Designed to prepare future special educators to plan and provide language and reading instruction to a broad range of students with disabilities.

**Requisites:** Declared in Special Education, Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert or Special Education MS

**Course Designation:** Gen Ed - Communication Part B

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Articulate an understanding of typical and atypical language development and the ways in which exceptional conditions can interact with a student's experience with and use of language

Audience: Both Grad & Undergrad

2. Articulate an understanding of difficulties that a student with a disability might display in the areas of oral language, phonological awareness, phonics fluency, vocabulary, reading comprehension, and written expression.

Audience: Both Grad & Undergrad

3. Select and carry out appropriate research-based instructional strategies to improve the reading skills of K-12 students, based on knowledge of a wide range of tools, pedagogies, and assessments.

Audience: Both Grad & Undergrad

4. Identify current research in the field that supports their decisions about what interventions to include in reading instructional and intervention plans for students with disabilities.

Audience: Graduate

### **RP & SE 466 – DIVERSITY IN SPECIAL EDUCATION**

3 credits.

Provides an overview of the context and unique considerations for providing special education services to culturally and linguistically diverse learners and their families. Upon completion, describe the diversity of students who receive special education services, including trends over time, and identify deficit orientations toward diversity, culture and disability that limit youths' opportunities to learn.

**Requisites:** Declared in Special Education BSE, Special Education MS, Elementary Education BSE: Middle Childhood Through Early Adolescence/Special Education Dual Cert, or Disability Rights and Services Certificate

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the diversity of students who receive special education services, including trends over time  
Audience: Undergraduate

2. Identify deficit orientations toward diversity, culture and disability that limit youths' opportunities to learn  
Audience: Undergraduate

3. Construct IEP goals that take students' cultural background and linguistic characteristics into account  
Audience: Undergraduate

4. Identify ongoing professional and personal development goals that will increase ability to be responsive to a diversity of learners with disabilities and their families as a future teacher.  
Audience: Undergraduate

### **RP & SE 467 – ELEMENTARY STUDENT TEACHING SEMINAR**

2 credits.

Addresses professionalism, research and problem solving, assessment, and collaborative skills relevant to the elementary special education student teaching placement.

**Requisites:** Declared in Special Education, Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert or Special Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **RP & SE 468 – SECONDARY STUDENT TEACHING SEMINAR**

2 credits.

Addresses professionalism, research and problem solving, assessment, and collaborative skills relevant to the secondary special education student teaching placement.

**Requisites:** Declared in Special Education, Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert or Special Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **RP & SE 472 – METHODS IN TRANSITION AND VOCATIONAL EDUCATION**

3 credits.

Provides information and methods necessary to provide individualized programming in transition and vocational education for students with disabilities, grades six through twelve.

**Requisites:** Declared in Special Education, Elementary Education: Middle Childhood Through Early Adolescence/Special Education Dual Cert or Special Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **RP & SE 473 – CLASSROOM MANAGEMENT FOR INCLUSIVE CLASSROOMS**

3 credits.

Focus on theories and practices to promote positive, proactive, and culturally responsive management of K-12 inclusive classrooms. Topics covered include multi-tiered systems of support, functional behavior assessment, and behavioral intervention plan.

**Requisites:** Declared in Special Education BSE, Special Education MS, or Elementary Education BSE: Middle Childhood Through Early Adolescence/Special Education Dual Cert

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Illustrate the understandings of the various sociocultural factors and contexts influencing interpersonal interactions and behaviors.

Audience: Both Grad & Undergrad

2. Analyze challenging behaviors using culturally responsive and functional approaches.

Audience: Both Grad & Undergrad

3. Apply classroom management theories and approaches to develop behavioral goals and objectives, behavioral assessment systems, and functional behavioral assessment-based interventions.

Audience: Both Grad & Undergrad

4. Evaluate evidence to determine and implement evidence-based classroom management approaches

Audience: Graduate

**RP & SE 475 – SPECIAL EDUCATION PRACTICUM: EARLY CHILDHOOD AND ELEMENTARY**

1-9 credits.

Supervised practicum teaching in an approved placement with a qualified cooperating teacher serving students with disabilities birth through grade 9.

**Requisites:** Declared in Special Education BS, Elementary Education BS, Elementary Education and Special Education BS, or Special Education: Teacher Certification MS

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Reflect on their actions and approaches in the classroom to improve their practice

Audience: Undergraduate

2. Plan and carry out lessons, reflecting a variety of instructional strategies and arrangements, to meet the needs of a wide range of students

Audience: Undergraduate

3. Demonstrate professional communication skills with parents, related service providers, and other members of the education community

Audience: Undergraduate

4. Demonstrate an ability to proactively manage the learning environment

Audience: Undergraduate

**RP & SE 476 – SPECIAL EDUCATION PRACTICUM: SECONDARY (GRADES 4-12)**

1-9 credits.

Practicum teaching in an approved placement with a qualified cooperating teacher serving students with disabilities in any of grades 4-12, supervised by a qualified university supervisor. Placement schedule determined by course instructor.

**Requisites:** Declared in Special Education BSE, Special Education MS, or Elementary Education BSE: Middle Childhood Through Early Adolescence/Special Education Dual Cert

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Reflect on actions and approaches in the classroom to improve practice

Audience: Undergraduate

2. Plan and carry out lessons, reflecting a variety of instructional strategies and arrangements, to meet the needs of a wide range of students

Audience: Undergraduate

3. Demonstrate professional communication skills with parents, related service providers, and other members of the education community

Audience: Undergraduate

4. Demonstrate an ability to proactively manage the learning environment

Audience: Undergraduate

**RP & SE 477 – SPECIAL EDUCATION STUDENT TEACHING:  
ELEMENTARY (PK - GRADE 9)**

6-12 credits.

Full time student teaching in an approved placement with a qualified cooperating teacher serving students with disabilities in any of grades PK-Grade 9, supervised by a qualified university supervisor. Placement schedule follows the host school district calendar.

**Requisites:** Declared in Special Education BSE, Special Education MS, or Elementary Education BSE: Middle Childhood Through Early Adolescence/Special Education Dual Cert

**Course Designation:** Workplace - Workplace Experience Course  
Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Reflect on actions and attitude in the classroom in order to improve practice

Audience: Both Grad & Undergrad

2. Demonstrate ability to plan, implement, and assess learning activities that meet the needs of students

Audience: Both Grad & Undergrad

3. Demonstrate professional communication skills across a variety of formats in contacts with parents, related service providers, and other members of the relevant education community

Audience: Both Grad & Undergrad

4. Recognize and apply principles of ethical and professional conduct.

Audience: Graduate

**RP & SE 478 – SPECIAL EDUCATION STUDENT TEACHING:  
SECONDARY (GRADES 4-12)**

6-12 credits.

Full time student teaching in an approved placement with a qualified cooperating teacher serving students with disabilities in any of grades 4-12, supervised by a qualified university supervisor. Placement schedule follows the host school district calendar.

**Requisites:** Declared in Special Education BSE, Special Education MS, or Elementary Education BSE: Middle Childhood Through Early Adolescence/Special Education Dual Cert

**Course Designation:** Workplace - Workplace Experience Course  
Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Reflect on actions and attitude in the classroom in order to improve practice

Audience: Both Grad & Undergrad

2. Demonstrate ability to plan, implement, and assess learning activities that meet the needs of students

Audience: Both Grad & Undergrad

3. Demonstrate professional communication skills across a variety of formats in contacts with parents, related service providers, and other members of the relevant education community

Audience: Both Grad & Undergrad

4. Recognize and apply principles of ethical and professional conduct.

Audience: Graduate

**RP & SE 480 – PRACTICUM IN TEACHING LITERACY: SECONDARY SPECIAL EDUCATION (GRADES 4-12)**

3 credits.

Learn how to deliver effective literacy instruction to students with disabilities at the secondary level. Includes a supervised teaching experience in an approved special education school setting under the guidance of a qualified cooperating teacher.

**Requisites:** Declared in Special Education BSE, Elementary Education and Special Education BSE, or Special Education MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Use information from a variety of sources to develop a written summary of a student's current literacy performance.

Audience: Both Grad & Undergrad

2. Select, administer, score, interpret, and summarize the findings of literacy assessments.

Audience: Both Grad & Undergrad

3. Develop a literacy-related goal based on assessment data and create a relevant instructional plan to address identified needs.

Audience: Both Grad & Undergrad

4. Deliver effective literacy instruction and reflect on teaching practices and feedback.

Audience: Both Grad & Undergrad

5. Demonstrate professional communication skills across contexts (e.g., seminar, school setting), formats (e.g., spoken, written), and individuals (e.g., instructors, cooperating teacher, university supervisor, students, families) while addressing the literacy needs of secondary students.

Audience: Both Grad & Undergrad

6. Identify and summarize research examining the efficacy of foundational literacy skill interventions for secondary students.

Audience: Graduate

**RP & SE 500 – REHABILITATION-COUNSELING PSYCHOLOGY: FOUNDATIONS**

3 credits.

History, philosophy, principles, legislation, and development of vocational rehabilitation; organizational structure and objectives of the principal community agencies.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE 501 – REHABILITATION-COUNSELING PSYCHOLOGY: APPLICATIONS**

3 credits.

Introduction to rehabilitation and human service programs for people with disabilities and other special needs. Emphasis on communication relevant to professional service, particularly writing.

**Requisites:** Declared in Rehabilitation Psychology and concurrent enrollment in RP & SE 630

**Course Designation:** Gen Ed - Communication Part B

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE 505 – BIOLOGICAL, PSYCHOSOCIAL, AND VOCATIONAL ASPECTS OF DISABILITIES**

3 credits.

Provides an overview of disabilities with an emphasis on biological, psycho-social, and vocational aspects.

**Requisites:** RP & SE 125 or 325

**Course Designation:** Breadth - Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop an understanding of the various definitions of chronic illness and disability.

Audience: Undergraduate

2. Demonstrate basic knowledge of the biological aspects of disability, including health conditions and body functions and structure.

Audience: Undergraduate

3. Demonstrate basic knowledge of the meaning and importance of activity and participation in the lives of people with disabilities.

Audience: Undergraduate

4. Demonstrate basic knowledge of the salient environmental factors that affect the disability experience.

Audience: Undergraduate

5. Demonstrate basic knowledge of the salient personal factors that affect the disability experience.

Audience: Undergraduate

6. Consider the several aspects of disability in combination with regards to the topic of psychosocial adaptation.

Audience: Undergraduate

**RP & SE/CURRIC 506 – STRATEGIES FOR INCLUSIVE SCHOOLING**  
3 credits.

Comparison of historical and current practices in special education; legal, philosophical, and programmatic changes leading to inclusive models of education; emphasis on concepts of collaboration, cooperative learning structures, and curricular and instructional adaptations to accommodate learners with disabilities in general education classrooms.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply disability law to understand students with disabilities in the classroom.

Audience: Both Grad & Undergrad

2. Utilize disability law to create inclusive classroom for students with disabilities

Audience: Both Grad & Undergrad

3. Apply understanding of varied types of disabilities to students

Audience: Both Grad & Undergrad

4. Utilize a general understanding of differentiation and universal design for learning practices

Audience: Graduate

**RP & SE 510 – PARTNERING WITH FAMILIES AND OTHER PROFESSIONALS IN EARLY CHILDHOOD SPECIAL EDUCATION**  
3 credits.

Provides the knowledge and skills to implement federal and state mandates as well as professional organization recommendations for special education and related services programs. Explores collaboration in schools, community systems and families, family functioning, historical perspectives of family life and school involvement, effective relationships between home, school, community, communication among professionals and with families, school-based programs as well as multicultural considerations including those related to race, ethnicity, gender, language, and culture, among others. Gain knowledge of family-centered practices and family systems theory to develop and maintain reciprocal partnerships with families. Apply family capacity-building practices to support families to make informed decisions and advocate for their young children.

**Requisites:** Declared in Special Education: Early Childhood Special Education/Special Education Dual Certification Birth-Grade 12 BSE, Special Education: Early Childhood Special Education Birth-Grade 3 BSE, or Certificate in Disability Rights and Services

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Communicate and collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth

Audience: Undergraduate

2. Engage families in identifying their strengths, priorities, and concerns; support families to achieve the goals they have for their family and their young child's development and learning

Audience: Undergraduate

3. Use a variety of collaborative strategies when working with other adults that are evidence-based, appropriate to the task, culturally and linguistically responsive, and take into consideration the environment and service delivery approach.

Audience: Undergraduate

## RP & SE 515 – ACCESS TO THE GENERAL CURRICULUM FOR STUDENTS WITH DISABILITIES

3 credits.

Prepares special educators to develop curriculum for students with disabilities aligned with general education content. Identifying appropriate Individualized Education Plan goals, supplementary aids and services, and service coordination in inclusive school contexts will be emphasized. Activities will cover three main topics, which will be woven through our activities, class readings, and assignments throughout the semester. These topics are: (a) planning supports for inclusion and access throughout the school day; (b) developing meaningful grade- and standards-aligned Individualized Education Plans; and (c) teaching and adapting general curriculum content.

**Requisites:** Declared in Special Education BSE, Special Education MS, or Elementary Education BSE: Middle Childhood Through Early Adolescence/Special Education Dual Cert

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the components of curriculum planning for students with disabilities.

Audience: Both Grad & Undergrad

2. Analyze curricular materials and adapt them for students with disabilities.

Audience: Both Grad & Undergrad

3. Apply knowledge of curriculum and curricular adaptations to instructional plans for students with disabilities

Audience: Both Grad & Undergrad

4. Identify current research in the field that supports their instructional and curricular adaptation decisions as a teacher.

Audience: Graduate

5. Implement strategies for collaboration and leadership within the school setting that improve access to the general curriculum for students with disabilities.

Audience: Graduate

## RP & SE 520 – CASE MANAGEMENT AND COMMUNITY RESOURCES

3 credits.

Provides an introduction to the concepts and processes of case management, including case planning, service coordination, referral to and utilization of other disciplines, and client advocacy; and integrating community resources and services for rehabilitation planning with persons with disabilities. Emphases on the basic principles of supporting persons with disabilities within clinical and service systems. Fosters knowledge and understanding of how theories and research translate into appropriate case management practices and explores the case management roles and processes involved in integrated, interdisciplinary, and community service settings.

**Requisites:** RP & SE 125, 316, or PSYCH 202

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history and development of counseling case management and understand the roles and functions of case managers in goal development, planning, coordination, and delivery of rehabilitation and mental health services.

Audience: Both Grad & Undergrad

2. Understand the role of benefit and payment systems for health care and rehabilitation including Health Insurance, Worker Compensation, Short and Long-term Disability, Social Security benefit programs, and state, federal, and private sector Vocational Rehabilitation programs.

Audience: Both Grad & Undergrad

3. Describe rehabilitation case management in life care planning, disability management and expert witness testimony.

Audience: Both Grad & Undergrad

4. Identify and critically evaluate community resources relevant to case management in rehabilitation counseling and mental health practice settings and identify techniques for working effectively in teams and across disciplines.

Audience: Both Grad & Undergrad

5. Understand the skills and techniques necessary to manage cases and caseloads during the rehabilitation and mental health counseling process.

Audience: Graduate

6. Demonstrate effective communication and writing skills for case recording and documentation, case planning, coordination, referral, and assisting consumers in accessing other needed services.

Audience: Both Grad & Undergrad

7. Identify legal and ethical issues and responsibilities in case management and advocacy processes needed to address institutional and social barriers that impede access, equity, and success for clients.

Audience: Both Grad & Undergrad

8. Identify culturally competent and relevant strategies for case management.

Audience: Both Grad & Undergrad

**RP & SE 535 – INTRODUCTION TO FORENSIC REHABILITATION**

3 credits.

Overview of the roles and functions of rehabilitation professionals who provide services and expert testimony in matters of litigation, such as worker's compensation, personal injury, product liability, medical/professional malpractice, catastrophic injury, and others. Ethical standards, practices, and common situations found in the litigation process.

**Requisites:** RP & SE 125 or 325

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify the roles and functions that rehabilitation professionals fill within the legal system

Audience: Undergraduate

2. Demonstrate knowledge and understanding of the different characteristics and needs which vocational rehabilitation professionals can address in each of the various legal venues in which they may serve

Audience: Undergraduate

3. Develop an awareness of the ethical standards of professional practice that rehabilitation professionals follow in their work as testifying experts or consultants within the legal system

Audience: Undergraduate

4. Discern and state appropriate actions that the professional should make when confronted by unethical and/or illegal practices, in conjunction with their service as a testifying expert or consultant

Audience: Undergraduate

5. Demonstrate their knowledge, understanding, and the application of outcomes of key cases and precedents governing the admissibility of testimony and evidence that affect professionals in the role of testifying expert or consultant

Audience: Undergraduate

**RP & SE 605 – DEVELOPMENT, LEARNING AND EDUCATION FOUNDATIONS IN SPECIAL EDUCATION**

3 credits.

Key issues and trends in special education today are examined in detail. These issues and trends are discussed within the context of ecological models of human development. Gain knowledge about child and adolescent development within the contexts of families, peer groups, schools, and communities. Apply this knowledge to teaching and practice linking these to current concepts and issues in the field. Examines the role of education and educators in providing effective supports and services to promote student learning and well-being, considering the "whole child". Gain awareness, knowledge and skills to be critical thinkers, effective educators, and leaders in the field of education including special education. Although much of what is covered will have clear implications for intervention and practice, this is not a methods or techniques course with a "how to" focus.

**Requisites:** Declared in Art Education BS, Elementary Education BS, Special Education BS, Elementary Education and Special Education BS, or Special Education: Teacher Certification MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an understanding of theoretical and empirical perspective on student knowledge and skills, and educational program components and services associated with positive outcomes for all students, including students with disabilities and those from diverse backgrounds.

Audience: Both Grad & Undergrad

2. Demonstrate an understanding of how contextual factors interact with the process of human development and use this knowledge to respond to the varying abilities and behaviors of diverse individuals.

Audience: Both Grad & Undergrad

3. Identify strategies and effective practices to promote development and learning of diverse students.

Audience: Both Grad & Undergrad

4. Demonstrate an understanding that professional practice requires on going attention to developmental issues; social justice and equity, and what is and isn't effective practice.

Audience: Both Grad & Undergrad

5. Use discussion to articulate, learn, revise, and expand ideas.

Audience: Both Grad & Undergrad

6. Use self-reflection as a tool for examining authentic problems and issues of practice.

Audience: Both Grad & Undergrad

7. Integrate and communicate course content, experiences, and activities effectively.

Audience: Both Grad & Undergrad

8. Lead peers in a discussion about educational equity, strategies, and effective practices to promote the development and learning of diverse students

Audience: Graduate

**RP & SE 630 – INTERNSHIP IN REHABILITATION OR SPECIAL EDUCATION**

2-6 credits.

Practicum experience in state or community agencies or in public school programs serving individuals with physical, cognitive, emotional, learning, social or behavioral problems.

**Requisites:** Declared in Rehabilitation Psychology, Special Education, Elementary Education: Middle Childhood through Early Adolescence/ Special Education Dual Cert, or Special Education graduate program

**Course Designation:** Workplace - Workplace Experience Course  
Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**RP & SE 660 – SPECIAL TOPICS**

1-3 credits.

Examines a variety of topics related to rehabilitation psychology and special education.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify contemporary disability issues and their significance for educational and/or rehabilitation purposes and practices.  
Audience: Both Grad & Undergrad

2. Critically analyze disability-related policies and issues.  
Audience: Graduate

3. Demonstrate knowledge and reflective responses about specific disability-related issues in the course.  
Audience: Both Grad & Undergrad

**RP & SE 690 – RESEARCH OR THESIS**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**RP & SE 699 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S  
Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**RP & SE 700 – RESEARCH METHODS IN REHABILITATION, MENTAL HEALTH, & SPECIAL EDUCATION**

3 credits.

Research and program evaluation methods and understanding of published research in clinical rehabilitation counseling, mental health counseling, and special education settings.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify basic types and methods of counseling, rehabilitation, and special education research  
Audience: Graduate

2. Describe the reciprocal relationship between research and professional practice and strategies for applying research findings to practice  
Audience: Graduate

3. Identify and describe how ethical, legal, and cultural issues impact research activities  
Audience: Graduate

4. Describe and use basic research methodology and statistics and psychometric concepts to plan simple research studies and critique published research reports  
Audience: Graduate

5. Identify and describe basic methods of needs assessment and program evaluation and how to use information produced in service and program planning  
Audience: Graduate

6. Describe the process of developing and implementing a research study and presenting and publishing the results of the research  
Audience: Graduate

7. Locate and interpret quantitative and qualitative published research literature regarding rehabilitation, counseling, and special education services, identifying evidence-based and best practices  
Audience: Graduate

**RP & SE 710 – MULTICULTURAL ISSUES IN SPECIAL EDUCATION**

3 credits.

Designed to engage in an exploration and discussion of issues and trends in special education as relates to the diversity of populations, based on race/ethnicity, socioeconomic backgrounds, disability label, gender, language dominance, etc., receiving special education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**RP & SE 715 – EQUITY AND FULL PARTICIPATION FOR INDIVIDUALS WITH SIGNIFICANT DISABILITIES**

3 credits.

Analysis of historical and contemporary trends and issues pertaining to persons with significant disabilities (i.e., significant intellectual disability, multiple disabilities, and autism spectrum disorder) across the lifespan. Topics include: an overview of the field of significant disabilities, historical trends, and current directions in curriculum design for students with significant disabilities, and valued outcomes for persons with significant disabilities.

**Requisites:** Declared in Special Education graduate program, Clinical Rehabilitation Counseling, or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**RP & SE/COUN PSY/CURRIC/ED POL/ED PSYCH/ELPA 719 – INTRODUCTION TO QUALITATIVE RESEARCH**

3 credits.

Provides an overview of qualitative inquiry, examining assumptions, standards, and methods for generating and communicating interpretations. Methodological and theoretical works illustrate case study, ethnography, narrative, and action research. Does not include a field method component.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE 720 – CLINICAL REHABILITATION & MENTAL HEALTH COUNSELING - ASSESSMENT**

3 credits.

Psychometric theory and statistics and testing and assessment procedures in clinical rehabilitation and mental health counseling practice.

**Requisites:** Declared in Clinical Rehabilitation Counseling, Counseling, or Rehabilitation Counselor Education graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and explain individual and group educational and psychometric theories related to assessment

Audience: Graduate

2. Identify and analyze ethical issues relevant to assessment

Audience: Graduate

3. Identify, explain, and use the core methodology of assessment procedures (e.g., reliability, validity, standardization) in evaluating assessment procedures

Audience: Graduate

4. Use knowledge of assessment procedures to administer, score, and interpret results using available psychometric statistics

Audience: Graduate

5. Differentiate and explain assessment considerations relevant to gender, racial and ethnic background, disability, and other social and cultural factors related to assessment

Audience: Graduate

6. Identify appropriate assessment tools and methods to gather information for different assessment purposes in different clinical situations

Audience: Graduate

7. Analyze assessment information for individualized planning with the client to support the clinical rehabilitation and mental health counseling process

Audience: Graduate

**RP & SE 721 – ADDICTIONS COUNSELING**

3 credits.

Provides an overview of the evidence-based practices and common practices for the treatment of addiction disorders. Emphasis is placed on training of the interventions used in the treatment of substance abuse and dependence.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **RP & SE 725 – CLINICAL REHABILITATION COUNSELING - CAREER DEVELOPMENT & INTERVENTIONS**

3 credits.

Career development and related interventions in clinical rehabilitation counseling practice.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe theories, models, applications, and evaluation of career development

Audience: Graduate

2. Describe and demonstrate career and leisure counseling, guidance, education, and placement interventions

Audience: Graduate

3. Describe and use labor market information as a resource in the career planning and decision making required for clinical practice

Audience: Graduate

4. Describe advocacy needs related to employment of people with disabilities and demonstrate use of advocacy strategies

Audience: Graduate

5. Describe methods to evaluate the effectiveness of leisure and career development interventions

Audience: Graduate

6. Identify and describe occupational and educational information systems and resources and their use in clinical rehabilitation counseling practice

Audience: Graduate

7. Identify assessment tools relevant to career development and to lifestyle and career decision-making and demonstrate use of those tools in facilitating the decision-making process

Audience: Graduate

### **RP & SE/COUN PSY/PSYCH 729 – ADVANCED SOCIAL PSYCHOLOGY**

3 credits.

Intensive examination of theoretical conceptions in contemporary social psychology, including learning-theoretic, reinforcement, incentive, cognitive, and psychodynamic approaches, and research in selected topic areas reflecting these approaches, such as aggression, attitude formation and change, conformity, limitation and modeling, interpersonal attraction, perception of others, prosocial behavior, and social influence.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **RP & SE/COUN PSY 730 – PROFESSIONAL COUNSELING ORIENTATION**

3 credits.

Provides a broad understanding of professional counselor roles and functions. Also provides a broad understanding of the ethical and legal standards for professional counselors. Gain familiarity with the ACA Code of Ethics, as well as with credentialing standards and organizations relevant to the practice of mental health counseling.

**Requisites:** Declared in a Rehabilitation Psychology or Counseling Psychology graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RP & SE 732 – CLINICAL REHABILITATION COUNSELING - FOUNDATIONS**

3 credits.

History, development, principles, and theories and models of clinical rehabilitation counseling and psychosocial theory and research relevant to disability.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize the history and development of rehabilitation counseling

Audience: Graduate

2. Identify and explain theories and models related to rehabilitation counseling

Audience: Graduate

3. Summarize and explain broad social science theory that addresses psychosocial aspects of disability, including client, family, other supports, and societal considerations

Audience: Graduate

4. Identify the several barriers and facilitators of social participation for clients, including environmental, attitudinal, and individual

Audience: Graduate

5. Identify and explain principles of rehabilitation, including prevention, intervention, wellness, consultation, education, and advocacy

Audience: Graduate

6. Identify roles and settings of rehabilitation counselors and the delivery systems of rehabilitation within the continuum of care, including a consideration of emergency management systems within rehabilitation agencies

Audience: Graduate

7. Identify and explain the legal and ethical considerations specific to clinical rehabilitation counseling

Audience: Graduate

8. Identify professional organizations, preparation standards, and credentials relevant to the practice of rehabilitation counseling (e.g., legislation, discrimination, and assistive technology)

Audience: Graduate

9. Identify and explain cultural factors relevant to rehabilitation counseling

Audience: Graduate

10. Examine professional issues that affect rehabilitation counselors, including independent provider status, third party reimbursement, expert witness status, forensic rehabilitation, and access to and practice privileges within managed care systems

Audience: Graduate

**RP & SE 735 – LEGAL & ETHICAL BASES OF COUNSELING**

3 credits.

Legal and ethical issues for counselors, with an emphasis on the American Counseling Association (ACA) and Commission on Rehabilitation Counselor Certification (CRCC) ethics codes and Wisconsin statutes relevant to counseling practice and research.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify potential ethical concerns in counseling, supervision, and teaching activities

Audience: Graduate

2. Apply and analyze the Commission on Rehabilitation Counselor Certification's (CRCC) code of ethics, the American Counseling Association's (ACA) Ethics Code for counselors, and the relevance of ethics codes to ethical decision making and practice

Audience: Graduate

3. Integrate legal considerations related to professional practice into their ethical decision-making

Audience: Graduate

4. Apply knowledge about statutes and legal issues pertinent to rehabilitation counseling professionals and counseling practice

Audience: Graduate

5. Summarize the nature of an ethical issue/dilemma through ethics awareness

Audience: Graduate

6. Apply an ethical decision making model for case analysis using relevant law, regulations, policies, codes, values and principles to develop options/ plans of action to address identified ethical issues

Audience: Graduate

**RP & SE/COUN PSY/ED PSYCH 736 – SEMINAR IN PSYCHOLOGY OF INDIVIDUAL DIFFERENCES**

3 credits.

Seminar in the psychology of individual differences, providing broad and general coverage of theory and research related to individual and cultural differences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**RP & SE/COUN PSY/ED PSYCH 737 – SEMINAR IN HISTORY AND SYSTEMS OF PSYCHOLOGY**

3 credits.

Seminar in the history of psychology, providing broad and general coverage of the development of psychology as a scientific discipline. Includes coverage of philosophy of science and systems of psychological inquiry, with applications to current research in psychology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**RP & SE 750 – CLINICAL REHABILITATION COUNSELING - MEDICAL & PSYCHOSOCIAL ASPECTS**

3 credits.

Medical and psychosocial information regarding chronic illnesses and disabilities in clinical rehabilitation counseling practice.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define common medical terminology, medical treatments, and procedures

Audience: Graduate

2. Give examples of the functional impact of chronic illnesses and disabilities

Audience: Graduate

3. Identify principles of health and wellness that can improve the lives of persons with chronic illnesses and disabilities; how public health initiatives can be applied to improving health and well-being of individuals with disabilities

Audience: Graduate

4. Use medical and psychosocial information for clinical rehabilitation counseling and rehabilitation planning

Audience: Graduate

5. Identify roles of various health care professionals and the process of interdisciplinary health and rehabilitation teamwork

Audience: Graduate

6. Give examples of medical treatments, complementary and alternative medicine approaches, assistive technology, health promotion, and prevention efforts to reduce or accommodate for the functional limitations of chronic health conditions

Audience: Graduate

7. Identify vocational, psychosocial, and independent living implications of various chronic illnesses and disabilities

Audience: Graduate

**RP & SE 780 – INTRODUCTION TO RESEARCH IN SPECIAL EDUCATION**

3 credits.

Introduction to research in the field of special education and provides an opportunity to acquire knowledge related to research methodology, gain competencies in critically consuming research, and spark interests in conducting action research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze themes and identify gaps in special education research through reviews of existing research

Audience: Graduate

2. Identify and reflect on ethical issues and considerations in special education research (e.g., bias, power dynamic, access, equity, confidentiality)

Audience: Graduate

3. Identify and articulate action research questions based on research interests

Audience: Graduate

4. Select appropriate research methods to answer action research questions

Audience: Graduate

5. Apply knowledge of special education research to engage in action research

Audience: Graduate

6. Apply knowledge of special education research to select, evaluate, and innovate practices

Audience: Graduate

7. Evaluate the quality of four different types of special education research (i.e., qualitative research, correlational research, group design research, and single case design research)

Audience: Graduate

**RP & SE/COUN PSY/CURRIC/ED POL/ED PSYCH/ELPA 788  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS I**

3 credits.

Introductory field methods experience in qualitative research. Learn to define good research questions, determine which methods of data collection and analysis are useful for addressing those questions, engage in these methods, reflect on their utility in education research.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 719

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE/COUN PSY/CURRIC/ED POL/ED PSYCH/ELPA 789  
– QUALITATIVE RESEARCH METHODS IN EDUCATION: FIELD  
METHODS II**

3 credits.

Focus on data analysis and translation of finds and implications. Gain theoretical and practical knowledge and skills regarding coding and analysis techniques, use of qualitative analytic tools, strategies for sharing findings with audiences beyond research team.

**Requisites:** ED PSYCH/COUN PSY/CURRIC/ED POL/ELPA/RP & SE 788

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RP & SE 810 – CLINICAL REHABILITATION COUNSELING -  
COUNSELING TECHNIQUES**

3 credits.

Basic counseling skills and techniques in clinical rehabilitation counseling practice.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe conceptual models of the overall helping process and integrate and use those models to analyze client needs for basic counseling interventions

Audience: Graduate

2. Demonstrate the use of basic and more advanced counseling skills in simulated counseling interactions

Audience: Graduate

3. Use counseling skills in simulated counseling interactions to facilitate understanding on the part of the counselor and the client, along with facilitating self-development

Audience: Graduate

4. Use clinical skills, including identifying client problems and needs, setting goals, and selecting and implementing intervention strategies in simulated counseling interactions

Audience: Graduate

5. Use counseling skills in simulated interactions to facilitate client change

Audience: Graduate

6. Summarize consultation theories and their application in clinical rehabilitation counseling

Audience: Graduate

## RP & SE 820 – CLINICAL REHABILITATION COUNSELING – COUNSELING THEORIES

3 credits.

Theories of counseling and related interventions in clinical rehabilitation counseling practice.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe a broad variety of theoretical models of counseling in-depth, in addition to the research evidence-base supporting them.

Audience: Graduate

2. Describe how a broad variety of theoretical approaches to counseling, and the techniques and strategies emanating from these theories, can be used as interventions to facilitate the personal, vocational, and social adjustment of individuals with a variety of disabilities and special needs

Audience: Graduate

3. Critically evaluate a variety of theories and associated techniques as they relate to the student's own perspective, value system, and the counseling process

Audience: Graduate

4. Critically evaluate a variety of theories and associated techniques as they relate to clients and counselors as individuals with different backgrounds, experiences and priorities

Audience: Graduate

5. Describe some of the major ethical and professional issues confronting counselors and the counseling profession

Audience: Graduate

## RP & SE 830 – CLINICAL REHABILITATION COUNSELING – DIAGNOSIS & TREATMENT PLANNING

3 credits.

Diagnostic assessment and planning of treatment, interventions and services in clinical rehabilitation counseling, including both clinical and career and work-related assessments and interventions, in addition to advocacy.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify strategies to advocate for individuals with disabilities at the individual, group, institutional, and societal levels to: (a) promote opportunity and access, (b) improve the quality of life for individuals with disabilities, and (c) remove potential barriers to the provision of access to services

Audience: Graduate

2. Recognize when disability occurs in tandem with other social justice issues (e.g., poverty, homelessness, trauma) and identify and explain appropriate support to address these issues

Audience: Graduate

3. Conduct diagnostic interviews and mental status examinations and use different classification systems such as the DSM, ICD, ICF for diagnostic purposes

Audience: Graduate

4. Conduct an effective intake interview and gather the necessary information for initial formulation of a treatment plan and a comprehensive understanding of the client and the presenting problems

Audience: Graduate

5. Interpret and use the results of symptom inventories and psychoeducational and personality assessments with case studies

Audience: Graduate

6. Formulate biopsychosocial histories and apply them to writing a treatment plan for a client that includes measurable goals, objectives, cultural considerations, and that includes advocacy as an intervention

Audience: Graduate

7. Identify the role of clinical formulation in treatment planning and document biopsychosocial case conceptualizations

Audience: Graduate

8. Develop comprehensive assessments in vocational rehabilitation and apply assessment results for consumers' career planning

Audience: Graduate

9. Conduct a job analysis and design worksite accommodations

Audience: Graduate

10. Conduct transferable skills analysis and assessment of work readiness

Audience: Graduate

**RP & SE/ELPA 835 – LEADERSHIP FOR INCLUSIVE SCHOOLING**

3 credits.

Examines historical and organizational context of special education administration at the federal, state and local levels. Includes policy implementation, constituency management, coordination, communication, and current issues.

**Requisites:** ELPA 735

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE 840 – CLINICAL REHABILITATION COUNSELING - GROUP COUNSELING**

3 credits.

Theory and technique in group counseling in clinical rehabilitation counseling practice.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and explain theories and models of counseling, as applied to group counseling

Audience: Graduate

2. Identify and describe counselor characteristics and behavior that influence the counseling process, with a focus on group counseling

Audience: Graduate

3. Explain theoretical foundations of group counseling and group work

Audience: Graduate

4. Identify and explain dynamics associated with group process and development

Audience: Graduate

5. Identify and explain therapeutic factors and how they contribute to group effectiveness

Audience: Graduate

6. Identify characteristics and functions of effective group leaders

Audience: Graduate

7. Identify and explain approaches to group formation, including recruiting, screening, and selecting members

Audience: Graduate

8. Identify types of groups and other considerations that affect conducting groups in varied settings

Audience: Graduate

9. Identify and explain ethical and culturally relevant strategies for designing and facilitating groups

Audience: Graduate

10. Use concepts and skills from class in direct experiences as group members in a small group activity, approved by the program, for a minimum of 10 clock hours over the course of the academic term

Audience: Graduate

11. Identify mental health service delivery modalities within the continuum of care, such as inpatient, outpatient, partial treatment, and after care, and the mental health counseling services networks

Audience: Graduate

### **RP & SE/ED POL/ED PSYCH/ELPA 842 – LEGAL FOUNDATIONS OF SPECIAL EDUCATION AND PUPIL SERVICES**

3 credits.

Legal requirements and issues relative to special education and pupil services programs; special education, juvenile justice, programs for English language learners, programs for children who are homeless; examination of applicable federal and state statutes and case law.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe various legal issues and identify those issues inherent in the delivery of pupil services.

Audience: Graduate

2. Explain the foundation created by federal disability law (Section 504, ADA, IDEA).

Audience: Graduate

3. Describe the relationship between state and federal law in the delivery of special education.

Audience: Graduate

4. Apply legal principles to a set of facts.

Audience: Graduate

5. Explain the relationship between statutory and regulatory requirements and practice.

Audience: Graduate

6. Identify various analytic frameworks that guide legal analysis.

Audience: Graduate

7. Apply principles and/or frameworks to a situation or issue.

Audience: Graduate

8. Analyze existing policies and practice from a legal perspective.

Audience: Graduate

9. Explain the dynamic nature of this branch of school law and will identify tools and resources available to help them remain current.

Audience: Graduate

### **RP & SE 855 – CULTURAL-HISTORICAL ACTIVITY THEORY**

3 credits.

Cultural-Historical Activity Theory (CHAT) is a generative, praxis-based theory of learning. CHAT has been used to analyze and transform human-context interactions. Provides a comprehensive review of the foundations, applications, and future directions of CHAT. Reviews the theoretical and empirical CHAT studies in the fields of education, psychology, health, arts, and learning sciences with an interdisciplinary and multi-methodological perspective.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify the foundational concepts in CHAT (e.g., object, contradictions, and agency)

Audience: Graduate

2. Define the four generations of CHAT

Audience: Graduate

3. Apply CHAT as an analytical tool

Audience: Graduate

4. Explain formative intervention methodology and its applications in education, health, arts, and technology

Audience: Graduate

5. Identify the guiding principles of the Utopian methodology in CHAT

Audience: Graduate

### **RP & SE 860 – REHABILITATION COUNSELING PSYCHOLOGY-CLINICAL PRACTICE SEMINAR**

1 credit.

Concurrent seminar for clinical practice students in RP & SE 880, 890, and 900 or 910.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**RP & SE 870 – REHABILITATION COUNSELOR EDUCATION – ASSESSMENT THEORY & RESEARCH**

3 credits.

Review of research and scholarly literature on theory, models, and methods of assessment; and research priorities, approaches, and methods to improving assessment practices in clinical rehabilitation counseling.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Summarize and explain historical perspectives concerning the nature and meaning of assessment and testing in rehabilitation counseling

Audience: Graduate

2. Summarize and explain the importance of research related to assessment in advancing the counseling profession, including how to critique and/or evaluate research related to assessment to inform rehabilitation counseling knowledge and practice

Audience: Graduate

3. Summarize, explain, and use basic measurement concepts, principles, and methodologies, including, standardized and non-standardized assessment practices, norm- and criterion-referenced assessments, group and individual assessments, statistical concepts, including scales of measurement, measures of central tendency, indices of variability, shapes and types of distributions, and correlations, and reliability and validity in the use of assessments

Audience: Graduate

4. Summarize and explain the state of the art in assessment practice, as well as the underlying research base, including issues and trends in different types of assessments, methods of effectively preparing for and conducting initial assessment meetings, including interviewing

Audience: Graduate

5. Summarize and explain implications of the literature for the pre-professional and continuing education needs of practicing rehabilitation counselors and instructional approaches for meeting those needs

Audience: Graduate

6. Explain and illustrate approaches to teaching assessment coursework to students in clinical rehabilitation counseling and closely related fields and provide continuing education to practitioners

Audience: Graduate

7. Explain the conduct of assessment-related research, including instrument development and measuring variables under study in other types of research

Audience: Graduate

8. Use knowledge of assessment theory and research to prepare a scholarly paper on a topic related to assessment that might possibly be published in a rehabilitation or related journal

Audience: Graduate

9. Utilize assessments for diagnostic and intervention planning purposes, assessing aggression or danger to others, self-inflicted harm, or suicide, identifying trauma and abuse, as well as reporting abuse, assessing addiction and substance use disorders as well as assessments relevant to academic/educational, career, social, and personal development

Audience: Graduate

10. Summarize and explain the state of the art in using environmental

**RP & SE 871 – FOUNDATIONS OF SPECIAL EDUCATION**

3 credits.

Engage participants in a critical exploration of Special Education issues and trends as located in social, cultural, philosophical, and historical contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RP & SE 872 – SEMINAR IN SPECIAL EDUCATION RESEARCH**

3 credits.

Equips the knowledge and skills necessary to be thoughtful critically consumers and producers of education and special education research. Designed to: (a) provide an overview of the variety of research methods and approaches typically used in special education and the utility of these methods and approaches in addressing educational problems and issues; (b) critically appraise published peer-reviewed research in special education; (c) develop the skills necessary to summarize, synthesize and expand upon research already conducted on topics of personal and professional relevance; and (d) communicate research ideas, findings, and implications for practice and future research to a variety of audiences in an effective and professional manner.

**Requisites:** RP & SE 871

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RP & SE 873 – PROFESSIONAL DEVELOPMENT FOR FUTURE SPECIAL EDUCATION RESEARCHERS AND FACULTY IN HIGHER EDUCATION**

1 credit.

Provides information and professional development on careers in academia. Designed for students to take multiple times to correspond to their developmental needs and professional development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### RP & SE 875 – MIXED METHODS INQUIRY IN DISABILITY, EDUCATION AND RELATED RESEARCH

3 credits.

Addresses the theory and practice of mixed methods inquiry, particularly within disability-related fields of study. Introduces to mixed methods design, data collection, and analysis approaches. Discuss how mixed methods inquiry builds on experimental and quasi-experimental quantitative research, qualitative research, and general social science frameworks for research inquiry. Additional topics include the history of mixed methods research, various philosophical traditions and paradigms applied when mixing methods, purposes for mixed methods research, and contemporary issues in mixed methods inquiry.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the historical roots of contemporary mixed methods approaches

Audience: Graduate

2. Identify different purposes for mixed methods research and the implications they have for mixed methods design, data collection, and analysis

Audience: Graduate

3. Articulate the various philosophical frameworks and paradigms for mixing methods and the implications they have for mixed methods design, data collection, and analysis

Audience: Graduate

4. Analyze mixed methods studies to identify features of rigorous design and limitations

Audience: Graduate

5. Apply a mixed methods inquiry approach to explore a research topic

Audience: Graduate

### RP & SE 880 – CLINICAL REHABILITATION COUNSELING - SUPERVISED PRACTICUM I

3 credits.

Supervised experience in clinical rehabilitation counseling practice (beginning).

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply knowledge regarding ethical standards of professional counseling organizations and credentialing bodies and related ethical and legal considerations in professional counseling

Audience: Graduate

2. Apply knowledge regarding strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination

Audience: Graduate

3. Apply knowledge regarding general frameworks for understanding differing abilities and strategies for differentiated interventions

Audience: Graduate

4. Apply methods of identifying and using assessment tools and techniques relevant to career planning and decision making

Audience: Graduate

5. Apply knowledge of counseling theories and techniques in developing a personal model of counseling

Audience: Graduate

6. Apply knowledge regarding characteristics and functions of effective group leaders

Audience: Graduate

7. Apply knowledge regarding methods of effectively preparing for and conducting initial assessment meetings

Audience: Graduate

8. Apply knowledge regarding evidence-based counseling practices to identify and implement those practices

Audience: Graduate

9. Apply knowledge regarding social science theory that addresses psychosocial aspects of disability

Audience: Graduate

10. Apply knowledge regarding principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning

Audience: Graduate

11. Apply knowledge and skill in conducting diagnostic interviews, mental status examinations, symptom inventories, psychoeducational and personality assessments, biopsychosocial histories, assessments for treatment planning, and assessments for assistive technology needs

Audience: Graduate

12. Apply knowledge and skill in conducting career- and work-related assessments, including job analysis, work site modification, transferrable skills analysis, job readiness, and work hardening

Audience: Graduate

**RP & SE 890 – CLINICAL REHABILITATION COUNSELING – SUPERVISED PRACTICUM II**

3 credits.

Supervised experience in clinical rehabilitation counseling practice (intermediate).

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply knowledge regarding ethical standards of professional counseling organizations and credentialing bodies and related ethical and legal considerations in professional counseling

Audience: Graduate

2. Apply knowledge regarding strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination

Audience: Graduate

3. Apply knowledge regarding general frameworks for understanding differing abilities and strategies for differentiated interventions

Audience: Graduate

4. Apply methods of identifying and using assessment tools and techniques relevant to career planning and decision making

Audience: Graduate

5. Apply knowledge of counseling theories and techniques in developing a personal model of counseling

Audience: Graduate

6. Apply knowledge regarding characteristics and functions of effective group leaders

Audience: Graduate

7. Apply knowledge regarding methods of effectively preparing for and conducting initial assessment meetings

Audience: Graduate

8. Apply knowledge regarding evidence-based counseling practices to identify and implement those practices

Audience: Graduate

9. Apply knowledge regarding social science theory that addresses psychosocial aspects of disability

Audience: Graduate

10. Apply knowledge regarding principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning

Audience: Graduate

11. Apply knowledge and skill in conducting diagnostic interviews, mental status examinations, symptom inventories, psychoeducational and personality assessments, biopsychosocial histories, assessments for treatment planning, and assessments for assistive technology needs

Audience: Graduate

12. Apply knowledge and skill in conducting career- and work-related assessments, including job analysis, work site modification, transferrable skills analysis, job readiness, and work hardening

Audience: Graduate

**RP & SE 900 – CLINICAL REHABILITATION COUNSELING – SUPERVISED PRACTICUM III**

3 credits.

Supervised experience in clinical rehabilitation counseling practice (advanced).

**Requisites:** Declared in Rehabilitation Counselor Education graduate program and completion of RP & SE 880 and 890

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply knowledge regarding ethical standards of professional counseling organizations and credentialing bodies and related ethical and legal considerations in professional counseling

Audience: Graduate

2. Apply knowledge regarding strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination

Audience: Graduate

3. Apply knowledge regarding general frameworks for understanding differing abilities and strategies for differentiated interventions

Audience: Graduate

4. Apply methods of identifying and using assessment tools and techniques relevant to career planning and decision making

Audience: Graduate

5. Apply knowledge of counseling theories and techniques in developing a personal model of counseling

Audience: Graduate

6. Apply knowledge regarding characteristics and functions of effective group leaders

Audience: Graduate

7. Apply knowledge regarding methods of effectively preparing for and conducting initial assessment meetings

Audience: Graduate

8. Apply knowledge regarding evidence-based counseling practices to identify and implement those practices

Audience: Graduate

9. Apply knowledge regarding social science theory that addresses psychosocial aspects of disability

Audience: Graduate

10. Apply knowledge regarding principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning

Audience: Graduate

11. Apply knowledge and skill in conducting diagnostic interviews, mental status examinations, symptom inventories, psychoeducational and personality assessments, biopsychosocial histories, assessments for treatment planning, and assessments for assistive technology needs

Audience: Graduate

12. Apply knowledge and skill in conducting career- and work-related assessments, including job analysis, work site modification, transferrable skills analysis, job readiness, and work hardening

Audience: Graduate

### RP & SE 903 – REHABILITATION COUNSELOR EDUCATION - PSYCHOSOCIAL THEORY & RESEARCH

3 credits.

Review of theory and research on psychosocial aspects of chronic illness and disability; and research priorities, approaches, and methods to improving understanding of psychosocial factors in clinical rehabilitation counseling.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the concepts of evidence-based practice, culturally-sensitive psychosocial interventions, and psychosocial research methodologies

Audience: Graduate

2. Identify and explain societal attitudes toward people with disabilities and the intersectionality of race/ethnicity, gender, class and disability, with special emphasis on how attitudinal and environmental barriers restrict community integration and participation of people with disabilities especially those facing multiple intersecting oppressions

Audience: Graduate

3. Use strategies through which these attitudes can be modified/become more positive

Audience: Graduate

4. Identify and explain the contributions of theories of personality to the study of psychosocial reactions to loss and disability

Audience: Graduate

5. Describe the role of developmental concepts (e.g., body image, self-concept) in adjusting to disability

Audience: Graduate

6. Summarize models of disability and how the different social constructions of disability affect service delivery and the full inclusion of people with disabilities in society

Audience: Graduate

7. Explain models of depression related to chronic illness and disability

Audience: Graduate

8. Describe models of psychosocial adaptation to physical and traumatic disability (e.g., traumatic brain injuries) with special emphasis on the process (e.g., experiences, reactions, behaviors, phases) of adaptation

Audience: Graduate

9. Identify and explain the commonalities (transpersonal) and individualities (personal) of the experiences and reactions that follow the onset of disability

Audience: Graduate

10. Summarize the literature related to mediators and moderators (e.g., coping and social support) between life stressors and psychosocial adjustment to chronic illness and disability

Audience: Graduate

11. Explain the process of familial psychosocial adaptation to the onset of a disability in one of its members

Audience: Graduate

12. Use counseling/therapeutic intervention strategies to working with people with disabilities (i.e., strategies for coping with adjusting to

### RP & SE 910 – CLINICAL REHABILITATION COUNSELING - INTERNSHIP

6-12 credits.

Full-time supervised experience in clinical rehabilitation counseling.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply knowledge regarding ethical standards of professional counseling organizations and credentialing bodies and related ethical and legal considerations in professional counseling

Audience: Graduate

2. Apply knowledge regarding strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination

Audience: Graduate

3. Apply knowledge regarding general frameworks for understanding differing abilities and strategies for differentiated interventions

Audience: Graduate

4. Apply methods of identifying and using assessment tools and techniques relevant to career planning and decision making

Audience: Graduate

5. Apply knowledge of counseling theories and techniques in developing a personal model of counseling

Audience: Graduate

6. Apply knowledge regarding characteristics and functions of effective group leaders

Audience: Graduate

7. Apply knowledge regarding methods of effectively preparing for and conducting initial assessment meetings

Audience: Graduate

8. Apply knowledge regarding evidence-based counseling practices to identify and implement those practices

Audience: Graduate

9. Apply knowledge regarding social science theory that addresses psychosocial aspects of disability

Audience: Graduate

10. Apply knowledge regarding principles, models, and documentation formats of biopsychosocial case conceptualization and treatment planning

Audience: Graduate

11. Apply knowledge and skill in conducting diagnostic interviews, mental status examinations, symptom inventories, psychoeducational and personality assessments, biopsychosocial histories, assessments for treatment planning, and assessments for assistive technology needs

Audience: Graduate

12. Apply knowledge and skill in conducting career- and work-related assessments, including job analysis, work site modification, transferrable skills analysis, job readiness, and work hardening

Audience: Graduate

13. Apply knowledge and skill in conducting strategies to advocate for

**RP & SE 920 – REHABILITATION COUNSELOR EDUCATION - COUNSELING SUPERVISION**

3 credits.

Supervised experience with concurrent instruction in the individual and group supervision of practicum students in Clinical Rehabilitation Counseling.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the purposes of clinical supervision  
Audience: Graduate

2. Identify theoretical frameworks and models of clinical supervision  
Audience: Graduate

3. Describe roles and relationships related to clinical supervision  
Audience: Graduate

4. Apply and practice skills of clinical supervision  
Audience: Graduate

5. Identify styles of supervision and practice development of a personal style of clinical supervision  
Audience: Graduate

6. Demonstrate assessment techniques for evaluating supervisees' developmental level and other relevant characteristics  
Audience: Graduate

7. Describe modalities of clinical supervision and the use of technology  
Audience: Graduate

8. Identify administrative procedures and responsibilities related to clinical supervision  
Audience: Graduate

9. Describe techniques in evaluation, remediation, and gatekeeping in clinical supervision  
Audience: Graduate

10. Identify legal and ethical issues and responsibilities in clinical supervision  
Audience: Graduate

11. Identify culturally relevant strategies for conducting clinical supervision  
Audience: Graduate

12. Apply and practice strategies for personal and professional self-evaluation and implications for practice  
Audience: Graduate

**RP & SE 930 – REHABILITATION COUNSELOR EDUCATION - TEACHING**

3 credits.

Supervised experience with concurrent instruction in teaching methods with graduate students in clinical rehabilitation counseling and undergraduates in rehabilitation psychology.

**Requisites:** Declared in Rehabilitation Counselor Education or Special Education PHD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the essential elements and implications of Accreditation Standards for graduate-level training in clinical rehabilitation counseling and rehabilitation counselor education  
Audience: Graduate

2. Describe and discuss the implications of role and expectations of rehabilitation counselor educators  
Audience: Graduate

3. Describe and discuss implications of rehabilitation counselor education history and current status  
Audience: Graduate

4. Describe and apply understanding of the multiple factors influencing teaching and learning.  
Audience: Graduate

**RP & SE 940 – REHABILITATION COUNSELOR EDUCATION - SUPERVISED RESEARCH**

1-3 credits.

Supervised experience in rehabilitation research and scholarship.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use the knowledge and skill acquired in classroom courses in statistics, measurement and instrument construction, research design, and scholarly writing in supervised research and scholarly projects in contributing to a scholarly product, whether independently or in collaboration with faculty  
Audience: Graduate

**RP & SE 941 – INTERNSHIP: RESEARCH**

1-3 credits.

Supervised participation in conducting, evaluation, and reporting university level research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**RP & SE 942 – INTERNSHIP IN POSTSECONDARY TEACHING**

3 credits.

Supervised experience with concurrent instruction in teaching methods and development of teaching philosophy with graduate students in special education.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the role and expectations of special education teacher educator

Audience: Graduate

2. Apply models of adult development and learning to instructional strategies, including attention to identities of learners and their importance within instructional settings

Audience: Graduate

3. Utilize research on effective pedagogical strategies in face to face and online settings

Audience: Graduate

4. Understand the process of course design and syllabus development, including selection and management of assessment tools

Audience: Graduate

5. Articulate a personal teaching philosophy as a special education teacher educator

Audience: Graduate

**RP & SE 945 – INTERNSHIP IN REHABILITATION COUNSELOR EDUCATION I**

3 credits.

Supervised experience in counseling and direct service, supervision, teaching, research, and advocacy and leadership.

**Requisites:** Declared in Rehabilitation Counselor Education graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the purposes of clinical supervision, counseling, teaching, research and scholarship, and leadership and advocacy in rehabilitation counselor education.

Audience: Graduate

2. Demonstrate advanced skill in case conceptualization and presentation in clinical supervision, counseling, teaching, research and scholarship, and leadership and advocacy in rehabilitation counselor education.

Audience: Graduate

3. Demonstrate knowledge and skills in rehabilitation counselor education gained through coursework and practical experiences in counseling and direct service, supervision, teaching, research, and/or leadership and advocacy.

Audience: Graduate

4. Demonstrate knowledge and advanced skills in leading peer professional discussion in rehabilitation counselor education.

Audience: Graduate

**RP & SE 955 – INTERNSHIP IN REHABILITATION COUNSELOR EDUCATION II**

3 credits.

Supervised experience in counseling and direct service, supervision, teaching, research, and advocacy and leadership.

**Requisites:** RP & SE 945

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the purposes of clinical supervision, counseling, teaching, research and scholarship, and leadership and advocacy in rehabilitation counselor education

Audience: Graduate

2. Demonstrate advanced skill in case conceptualization and presentation in clinical supervision, counseling, teaching, research and scholarship, and leadership and advocacy in rehabilitation counselor education

Audience: Graduate

3. Demonstrate knowledge and skills in rehabilitation counselor education gained through coursework and practical experiences in counseling and direct service, supervision, teaching, research, and/or leadership and advocacy

Audience: Graduate

4. Demonstrate knowledge and advanced skills in leading peer professional discussion in rehabilitation counselor education

Audience: Graduate

**RP & SE 980 – CLINICAL REHABILITATION COUNSELING - ADVANCED ASSESSMENT PRACTICE**

3 credits.

Advanced assessment practices and interpretation of findings in clinical rehabilitation counseling, including the assessment of intelligence, neuropsychological functioning, and personality.

**Requisites:** Declared in Clinical Rehabilitation Counseling or Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify historical perspectives concerning the nature and meaning of assessment and testing in counseling

Audience: Graduate

2. Evaluate what types of assessment information would be useful for rehabilitation, career, and life planning

Audience: Graduate

3. Identify appropriate assessment tools, including interviews and behavioral observation, to gather the information necessary for diagnosis and treatment planning

Audience: Graduate

4. Summarize the core methodology of assessment procedures (e.g., reliability, validity, standardization)

Audience: Graduate

5. Summarize the process involved to administer, score, and interpret results of assessment procedures with particular emphasis on the WAIS-IV Compose written reports of assessment results

Audience: Graduate

6. Compose written reports of assessment results

Audience: Graduate

7. Identify the implications of client assessment for rehabilitation and vocational/life planning with the client

Audience: Graduate

8. Apply and analyze research, including critical appraisal of research, in interpreting and utilizing cognitive assessments to inform practice

Audience: Graduate

9. Identify the limits and ethical issues relevant to cognitive assessment

Audience: Graduate

10. Summarize assessment considerations relevant to individual differences such as gender, racial and ethnic background, and disability

Audience: Graduate

11. Identify the applications of assessment in a variety of rehabilitation, school and work settings

Audience: Graduate

**RP & SE 983 – REHABILITATION COUNSELOR EDUCATION - LEADERSHIP & PROFESSIONAL ISSUES**

3 credits.

Leadership theory and practice, history, basic philosophy, and professional issues in clinical rehabilitation counseling and rehabilitation counselor education.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine and understand the history and philosophy of counseling and rehabilitation counseling; legislation; current perspectives on rehabilitation counselor educator roles and functions  
Audience: Graduate

2. Identify and discuss leadership and advocacy in counseling and rehabilitation counseling organizations and other institutions  
Audience: Graduate

3. Review professional preparation for rehabilitation counselor educators  
Audience: Graduate

4. Review professional standards (credentialing, qualifications, and affiliations) for counselors, rehabilitation counselors, and rehabilitation counselor educators  
Audience: Graduate

5. Review rehabilitation service delivery systems in terms of organizations, service coordination, community resources, and staff requirements  
Audience: Graduate

6. Identify and discuss contemporary issues related to counseling and rehabilitation counseling  
Audience: Graduate

7. Summarize and explain the importance of research in advancing the counseling profession, including how to critique research to inform counseling practice  
Audience: Graduate

**RP & SE 984 – REHABILITATION COUNSELOR EDUCATION - COUNSELING THEORY & RESEARCH**

3 credits.

Review of research and scholarly literature on theory, models and methods of counseling and related interventions, research priorities, approaches, and methods to improve counseling practices in clinical rehabilitation counseling.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Teach counseling theory and technique in a graduate program in Clinical Rehabilitation Counseling or a related counseling specialty (e.g., techniques, theories, group counseling courses, practicum and internship seminars)  
Audience: Graduate

2. Review and conduct research related to this content  
Audience: Graduate

3. Practice at an advanced level and effectively supervise entry-level counseling students and professionals  
Audience: Graduate

### **RP & SE 985 – ADVANCED METHODOLOGIES IN DISABILITY & REHABILITATION RESEARCH**

3 credits.

Advanced statistical methods, design, instrumentation, and procedures in research and program evaluation in disability and rehabilitation settings.

**Requisites:** Declared in Rehabilitation Counselor Education

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe foundational knowledge of quantitative and qualitative research designs including problems and hypotheses; constructs, variables, and definitions; designs of research; measurements; and data collection  
Audience: Graduate

2. Identify advanced research designs, methods, and multivariate statistics in professional counseling research  
Audience: Graduate

3. Describe classic research in the rehabilitation, counseling, and psychology literature  
Audience: Graduate

4. Outline implications of design issues when working with diverse populations and multicultural topics  
Audience: Graduate

5. Evaluate rehabilitation counseling research proposals with regard to: the sufficiency of the literature review as a foundation for the research questions/hypotheses, the clarity of the research questions/hypotheses, the sufficiency of the reason(s) for conducting the study, and the adequacy of the proposed methodology  
Audience: Graduate

6. Develop crystalized dissertation research ideas  
Audience: Graduate

7. Practice skills in developing a dissertation research proposal. The proposal will contain the research problem (the research questions and why they are important to address), a review of the literature to provide a foundation for the research questions/hypotheses, and the research methodology (e.g., the research design, the sampling population, instrumentation, procedures, and data analysis)  
Audience: Graduate

### **RP & SE 988 – REHABILITATION COUNSELOR EDUCATION - DISSERTATION RESEARCH SEMINAR**

1 credit.

Seminar taken in conjunction with RP & SE 990 to facilitate conceptualization, methodology, presentation, writing, and defense of the dissertation proposal and research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the structure and requirements of the Rehabilitation Counselor Education dissertation process  
Audience: Graduate

2. Demonstrate advanced understanding of the procedures and expectations for the different elements of the dissertation process  
Audience: Graduate

3. Present rehabilitation counseling research effectively  
Audience: Graduate

4. Demonstrate progression toward dissertation completion  
Audience: Graduate

5. Demonstrate advanced understanding of rehabilitation counseling research proposals with regard to: the sufficiency of the literature review as a foundation for the research questions/hypotheses, the clarity of the research questions/hypotheses, the sufficiency of the reason(s) for conducting the study, and the adequacy of the proposed methodology  
Audience: Graduate

6. Demonstrate skills in developing and defending a dissertation research proposal and/or final dissertation draft  
Audience: Graduate

### **RP & SE 990 – RESEARCH OR THESIS**

1-3 credits.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **RP & SE/COUN PSY/ED PSYCH/PSYCH 995 – PREDOCTORAL INTERNSHIP**

0 credits.

Registration for Ph.D. students who have successfully defended the dissertation and are in the process of completing the required predoctoral internship.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**RP & SE 999 – INDEPENDENT READING**

1-3 credits.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**RELIGIOUS STUDIES (RELIG ST)****RELIG ST 101 – RELIGION IN GLOBAL PERSPECTIVE**

3 credits.

Foundational and thematic approaches in the academic study of religion applied across global religious systems.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019**RELIG ST 102 – EXPLORING RELIGION IN SICKNESS AND HEALTH**

3 credits.

An introduction to the study of religion through the lens of health and health through the lens of religion employing approaches from the humanities and social sciences in conversation with health-related disciplines. It asks questions such as, How do religious peoples understand and live in sickness and health? How do people connect physical well-being to spiritual well-being? Medicine to meaning-making? How does looking at religion in sickness and health provide insight into its roles in a variety of cultures and contexts, globally and locally? How do health and religion connect particularly in situations of social marginalization and immigration? How does religion impact understandings of health and sickness beyond the borders of specific religious communities?

**Requisites:** None**Course Designation:** Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**RELIG ST 103 – EXPLORING RELIGION AND SEXUALITY**

3 credits.

An introductory examination of "what religion is" via investigation of how religious traditions imagine, interrogate, and regulate sexuality using several approaches in the discipline of religious studies. Focuses, although not exclusively, on the religions of the Ancient Mediterranean (Greeks, Romans, Rabbinic Jews, and early Christians) and also considers the (re)construction of ideas and practices over time and contexts.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**RELIG ST/FOLKLORE 104 – SACRED PLACES AND JOURNEYS**

3 credits.

An introduction to the study of religion through the lens of sacred places and journeys, including pilgrimage.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Apply key theories in the study of religion to varied religious phenomena in research and essay writing

Audience: Undergraduate

2. Articulate the influence of positionality in the study of religion

Audience: Undergraduate

3. Articulate how places become perceived, constructed and used as sites of sacrality in different religious, spiritual and secular contexts

Audience: Undergraduate

4. Articulate the complex ways that migration and politics affect the perception and use of sacred sites

Audience: Undergraduate

5. Discuss religious matters in a respectful but detached (non-proselytizing) manner

Audience: Undergraduate

**RELIG ST 105 – RELIGION AND POPULAR CULTURE-LOCAL AND GLOBAL**

3 credits.

Introduces religious studies through the lens of popular culture. In recent decades, many have predicted the demise of religion and the "death of God." Indeed, many seem to embrace science and rationality over faith and the supernatural, yet religion, religious language, religious themes permeate popular culture. This raises many questions: What is popular culture? What role is religion playing in it? How can we better understand popular culture using religious studies theory? Explores these questions through theme parks in the U.S. and Japan, Sports, Music, and tattoos.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply some theories in the academic study of religion to examine a variety of religious expression related to popular culture

Audience: Undergraduate

2. Test these theories against the experiences and practices of people across a range of contexts in the U.S. and globally.

Audience: Undergraduate

3. Demonstrate key aspects of global religious literacy and articulate the diversity of ways that religion both reflects and shapes human communities and self-conceptions

Audience: Undergraduate

4. Employ improved skills in critical reading, writing, and thinking

Audience: Undergraduate

**RELIG ST/ART HIST 115 – RELIGION AND ART**

3 credits.

Fundamental to all religions are shared beliefs about human beings' relation to that which they regard as holy, sacred, spiritual, divine, or worthy of reverence. Focuses on how religions around the world, from antiquity to the present, mediate sacred and divine presence through material means, aimed to stimulate the human senses. Considers the questions: What makes particular places sacred? How do architecture and ritual contribute to the fashioning sacred worship spaces or places of pilgrimage and healing in diverse religious traditions? How do some religions use icons/images, painted or sculpted, to mediate divine presence, while others consider figural images to be idols? How do art, architecture, and even landscapes serve as places of memory and convey fundamental beliefs about the afterlife?

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze, compare, and evaluate theories about the material manifestations of religion

Audience: Undergraduate

2. Recognize, describe, compare and differentiate visual images, architecture, landscapes and religious material culture of different religious traditions

Audience: Undergraduate

3. Demonstrate collaborative skills by working in small groups to critically respond to questions about readings prepared in advance or works of art in the museum

Audience: Undergraduate

4. Develop written and oral arguments based on visual and material evidence.

Audience: Undergraduate

5. Employ research skills to interpret religious images and architecture

Audience: Undergraduate

**RELIG ST/CNSR SCI 173 – CONSUMING HAPPINESS**

3 credits.

As the saying goes, money can't buy happiness -- but in modern America, we certainly try. This course will provide an overview of the study of happiness and well-being, examine how consumers engage in consumption in pursuit of happiness, as well as explore the emergence of the experience economy, and the intersection of money and well-being. Students will read academic and popular pieces on positive psychology, prosocial spending and explore the psychology of persuasion in the promises associated with this industry. In addition to integrating visual media, students will have the opportunity to experience first-hand whether the advice works in their own lives.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Differentiate between hedonic and eudaimonic happiness, prosocial spending and pure materialism and the pros and cons of the intersection of faith and happiness

Audience: Undergraduate

2. Theorize via thought-provoking discussions about the quest to “buy happiness” in modern America

Audience: Undergraduate

3. Contrast advice literature with positive and social psychology research

Audience: Undergraduate

4. Evaluate through the research whether one can ‘get happier’ through consumer culture

Audience: Undergraduate

5. Critique diverse materials including popular and academic readings

Audience: Undergraduate

**RELIG ST 200 – INTRODUCTORY TOPICS IN RELIGIOUS STUDIES (HUMANITIES)**

3-4 credits.

Topics in religious studies in the humanities at an introductory level.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**RELIG ST 201 – RELIGION IN/AND EVERYDAY LANGUAGE**

3 credits.

An introduction to the study of religious language and the role of religion in everyday language. Through discourse analytical and linguistic ethnographic tools, explore ritual speech and magic, prayer, song, sermons, conversation, social media, etc., across several religious traditions.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Interpret linguistic data and secondary sources in writing and orally.

Audience: Undergraduate

2. Analyze diverse value and belief systems in various contexts.

Audience: Undergraduate

3. Interpret the interrelationships and impact of religious worldviews and communities in Wisconsin, the United States, and globally.

Audience: Undergraduate

4. Present limited research on a primary source using linguistic and/or ethnographic methods.

Audience: Undergraduate

5. Recognize cultural assumptions and knowledge claims about religion.

Audience: Undergraduate

6. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Undergraduate

7. Apply course concepts to their lives outside the classrooms by respectfully participating in our multicultural society.

Audience: Undergraduate

### RELIG ST/GEN&WS 202 – QUEERING RELIGION

3 credits.

Explore the intersections of religiosity and queerness, including the role of religion in the lives of LGBTQ+ individuals and communities, the role of queerness and LGBTQ inclusion in various religious traditions, and what queerness can add to the study of religion (and vice versa).

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze oral and written materials about religion, queerness, and transness.

Audience: Undergraduate

2. Compare diverse systems of value and belief.

Audience: Undergraduate

3. Interpret the interrelationships and impact of religious worldviews and communities.

Audience: Undergraduate

4. Understand core concepts and debates in queer and trans studies of religion.

Audience: Undergraduate

5. Connect scholarship to the institutions that shape everyday life.

Audience: Undergraduate

### RELIG ST/JEWISH/LEGAL ST 203 – JEWISH LAW, BUSINESS, AND ETHICS

3 credits.

Explores the development of Jewish law from antiquity to modernity, with a focus on legal questions related to business practices and ethics. Consider issues ranging from ethical practices in agriculture to how to run a modern multi billion-dollar kosher industry; from the ethics of Jews celebrating Thanksgiving to regulations governing the preparation, consumption, and sale of coffee.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. articulate the general development and evolution of Jewish law

Audience: Undergraduate

2. apply different strategies that different Jewish communities have used to regulate business and ethical practices

Audience: Undergraduate

3. analyze, in both written and oral form, Jewish legal texts

Audience: Undergraduate

4. apply Jewish legal principles to new material

Audience: Undergraduate

### RELIG ST/HISTORY 205 – THE MAKING OF THE ISLAMIC WORLD: THE MIDDLE EAST, 500-1500

3-4 credits.

Development of society and culture in the Middle East and North Africa from the emergence of Islam (7th century) to early modern times.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### RELIG ST/ASIAN 206 – THE QUR'AN: RELIGIOUS SCRIPTURE & LITERATURE

3 credits.

An introduction to the Qur'an, the sacred scripture of the Islamic religious tradition, focused on Muslim approaches to reading the text, its themes and history, and its use as a source of law, theology, aesthetics, politics, and practices of piety.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Demonstrate knowledge of the content of the complete Qur'an through reading English-language interpretation ("translation"), focused writing assignments, and close listening exercises  
Audience: Undergraduate

2. Identify parameters of Qur'an's study in Muslim and other academic contexts  
Audience: Undergraduate

3. Demonstrate an appreciation of the complexities of the interpretative process within multiple historical contexts, such as key issues and debates  
Audience: Undergraduate

4. Demonstrate knowledge of major movements, trends, or events in the development of Muslim cultures with respect to the Qur'an and Islamic global experience, early period to contemporary expression  
Audience: Undergraduate

5. Apply critical approaches to the "texts"/works and alternative ways of considering them, as per the approach of the academic study of religion  
Audience: Undergraduate

6. Critically and constructively examine "culture," hybridity, and global community in a comparative sense  
Audience: Undergraduate

### RELIG ST/HISTORY 208 – WESTERN INTELLECTUAL AND RELIGIOUS HISTORY TO 1500

3-4 credits.

Survey of key themes in Western intellectual history and religious thought from ancient Greece through the Renaissance, focusing on relationships among classical, Jewish, and Christian traditions.

**Requisites:** Sophomore standing or 3 credits in HISTORY or RELIG ST

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### RELIG ST/HISTORY 209 – WESTERN INTELLECTUAL AND RELIGIOUS HISTORY SINCE 1500

3-4 credits.

A survey of major trends in Western intellectual history and religious thought in the modern era, a period that saw a new range of competing ideas about the divine, the human condition, justice and the social order, and the quest for meaning. Explores shifts in Christian and Jewish thought as well as secular alternatives to religious outlooks. Topics include the impact of the Reformation, Scientific Revolution, and Enlightenment; radical critiques of religion; existentialism; theological responses to World Wars and the Holocaust; and civil rights and social justice. Sources include films, novels, autobiographies, essays, theological works, and political manifestos.

**Requisites:** Sophomore standing or 3 credits in HISTORY or RELIG ST

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### RELIG ST/JEWISH 211 – INTRODUCTION TO JUDAISM

4 credits.

General introduction to Judaism covering the biblical, classical rabbinic, medieval, and modern periods.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### RELIG ST/HISTORY 212 – THE HISTORY OF WESTERN CHRISTIANITY TO 1750

4 credits.

A survey of Christianity from being a small, persecuted sect in the Roman Empire to becoming the dominant religion of western Europe, penetrating into the lives of Europeans, fissuring into multiple churches, and spreading across the globe. Attention is given to doctrine, ritual, worship, architecture, images, and music.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**RELIG ST/JEWISH 215 – THE SABBATH**

3 credits.

What is the "Sabbath"? What does it mean "to rest"? Offers a broad, comparative introduction to the history of the Sabbath, from the Bible to the present day. Explore a range of textual sources from the Jewish and Christian traditions. Topics include the major theological, ritual, and cultural practices that have developed around the Sabbath. Analysis places emphasis on literary representations of the Sabbath across genres. Discuss contemporary political iterations of the Sabbath in modern, secular contexts.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate knowledge of major forms, practices, social conditions, values, and themes that have shaped the history of the "Sabbath" in Jewish and Christian traditions, from antiquity to modernity

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods in religious studies and across disciplinary lines

Audience: Undergraduate

3. Display skills in textual analysis and evaluate a range of formal and structural elements in writing

Audience: Undergraduate

4. Identify and interpret the literary techniques used by Jewish and Christian writers across genres, including relevant stylistic, rhetorical, figurative, and liturgical forms used in the representation of the Sabbath

Audience: Undergraduate

5. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering questions in a range of media

Audience: Undergraduate

6. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness

Audience: Undergraduate

**RELIG ST/ASIAN 218 – HEALTH AND HEALING IN SOUTH ASIA**

3-4 credits.

Study primary and secondary sources to explore how South Asian societies have understood the ideas of health and well-being throughout history. We will consider a number of cases that illustrate uniquely South Asian conceptions of illness and physical dysfunction and the ways in which people in South Asia have attempted (and continue to attempt today) to heal bodies. Students will learn about the traditional healing systems of South Asia, including Ayurveda, Siddha, and Unani, the basic components of each systems' ideas about disease pathology and treatment that have been used for centuries to heal illness, maintain good health, and, in some instances, aspire to a state of super-health that transcends the limitations of bodily existence altogether.

**Requisites:** None**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**RELIG ST/CLASSICS/JEWISH/LITTRANS 227 – INTRODUCTION TO BIBLICAL LITERATURE (IN ENGLISH)**

4 credits.

Introduction to the text, development, history, and social context of the Hebrew Bible/Old Testament. Covers the Torah (Pentateuch), Neviim (Former and Latter Prophets), and Ketuvim (Writings), and provides a brief introduction to early Jewish literature (Pseudepigrapha/Apocrypha). Discusses various methods of analysis and theories of composition. Addresses major theological claims made of the text by Jewish and Christian communities. Explores contextualized interpretations in the ancient and modern day.

**Requisites:** None**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Articulate a self-critical understanding of one's own approach to the biblical text.

Audience: Undergraduate

**RELIG ST/ILS 234 – GENRES OF WESTERN RELIGIOUS WRITING**

3 credits.

Explores literary forms through which religions originating in western culture convey ideas. Focuses on Jewish, Christian, Muslim and related religious texts.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and explain significant genres of religious writing.

Audience: Undergraduate

2. Identify ways in which written religious expressions are employed and deployed across various contexts and themes, such as pluralism, authority, race, identity, and violence.

Audience: Undergraduate

3. Demonstrate proficiency in close reading, interpretation, and written and oral analysis

Audience: Undergraduate

4. Demonstrate proficiency in categorizing, analyzing, and comparing diverse systems of value and belief in a variety of contexts.

Audience: Undergraduate

**RELIG ST/ASIAN 236 – ASIA ENCHANTED: GHOSTS, GODS, AND MONSTERS**

3 credits.

Explores how different cultures in Asia conceive of and relate to the monstrous, ghostly, and divine, both in the past and in the contemporary world. These themes are approached from a range of different disciplinary perspectives, including religious studies, literature, anthropology, and history.

**Requisites:** None

**Course Designation:** Gen Ed - Communication Part B

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Consider the cultural and personal functions of depictions of gods, ghosts, and monsters, both in the past and the present day.

Audience: Undergraduate

2. Practice writing and oral presentations in a variety of forms for a variety of purposes, including critical use and proper citation of primary and secondary sources.

Audience: Undergraduate

3. Practice research skills on previously unfamiliar topics, gaining skills in using both on-campus and online resources.

Audience: Undergraduate

4. Be introduced to different approaches a variety of humanities disciplines (including anthropology, art history, history, film studies, folklore studies, literature, and religious studies) take to the course subject matter.

Audience: Undergraduate

5. Use the course subject matter to improve their knowledge of the cultural geography of Asia.

Audience: Undergraduate

**RELIG ST/LITTRANS/MEDIEVAL 253 – OF DEMONS AND ANGELS. DANTE'S DIVINE COMEDY**

3 credits.

Have you ever wondered about human nature? What is our place in this world? Through readings, videos, and original images, explore and discuss Dante's answers from one of the greatest world literary classics, his Divine Comedy. From Hell, through Purgatory to Paradise, we will travel together with Dante in a universal tale of the journey of the human soul. Along the way, learn about Dante, his life and his works, development of literary history, historical and socio-political context of medieval Europe, the Mediterranean and the Middle East. Make connections that cross today's geographic and cultural lines in an exploration of literary topics, the history of ideas, and shared history, pondering universal concepts and patterns in the development of civilization that can still be observed today.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Learn about Dante Alighieri, his life, and works  
Audience: Undergraduate

2. Understand medieval civilization and its human culture(s)

Audience: Undergraduate

3. Describe literary, historical, cultural concepts and phenomena

Audience: Undergraduate

4. Analyze from multiple perspectives a text, a situation, a context

Audience: Undergraduate

5. Synthesize information acquired from primary and secondary sources

Audience: Undergraduate

6. Learn the dangers of anachronism

Audience: Undergraduate

**RELIG ST/ENVIR ST 270 – THE ENVIRONMENT: RELIGION & ETHICS**

3-4 credits.

What are sources on which members of religious communities draw in order to understand and address environmental change? Explores how religious persons and communities confront global environmental questions and challenges today, with case studies drawn from culturally and religiously plural societies such as India and Indonesia. Introducing diverse varieties of Christianity, Islam, and Hindu and Buddhist systems, gives overview of some approaches in the environmental humanities related to philosophy, history, sociology and anthropology, and ethics.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**RELIG ST/GERMAN/SOC 273 – GOD & MONEY**

3 credits.

Explores the historical connections between capitalism and religion. Considers if and how religious ideas and practices facilitated the rise of capitalism; asks whether religious institutions have supported the reproduction of social inequalities, unjust labor practices, and exploitative economies; and studies the role played by religious actors in the critique of capitalism. Pays attention to the historical specificity of the capitalist system, its conditions of emergence in the Christian West, and the effects of its globalization on non-Christian traditions. Covers topics including classical social theories of religion and capitalism; contemporary examples of religious practice and capital accumulation; and the relationship between religious movements and social-economic justice.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Demonstrate knowledge of debates surrounding the historical and theoretical relationship between religion and capitalism  
Audience: Undergraduate2. Discern and integrate divergent and contradictory perspectives on the relationship between religion and capitalism across a range of fields (e.g., philosophy, history, sociology) and contexts (e.g., America, Europe, Middle East, and South Asia)  
Audience: Undergraduate3. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in a range of media  
Audience: Undergraduate4. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering textual questions  
Audience: Undergraduate5. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness  
Audience: Undergraduate**RELIG ST/ASIAN 274 – RELIGION IN SOUTH ASIA**

3 credits.

Introductory survey of Hinduism, Buddhism, Islam, Sikhism, etc., and an examination of the cultural, historical, ritual, and philosophical foundations of South Asian religion. Not open to students with credit for LCA 274 prior to Fall 2019.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

### RELIG ST 280 – WITCHES AND WIZARDS: FROM HECATE TO HARRY POTTER

3 credits.

Consider tales of witchcraft and wizardry, examining how they tap into concerns and debates about religion and the supernatural. Debate historic representations of witchcraft and wizardry, especially from sixteenth- and seventeenth-century England, asking the questions, "What is religion?" and "What is magic?" Consider contemporary depictions of witchcraft and wizardry in children's stories and young-adult fiction, and discuss issues concerning religion, science, language and the nature of "reality".

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Compare diverse systems of religious belief in a variety of contexts, developing a strong trans-historical understanding of the ways in which magic and religion (especially western religions) interact  
Audience: Undergraduate

2. Analyze written texts about magic and witchcraft, especially through the lens of religious studies  
Audience: Undergraduate

3. Utilize a variety of resources and methods of research across disciplinary lines, including, especially, the disciplines of religious studies, and literary and historical research  
Audience: Undergraduate

4. Demonstrate knowledge of major forms, techniques, social conditions, values, and genres that shaped the representation of magic in the English-speaking world  
Audience: Undergraduate

5. Compare contradictory critical perspectives  
Audience: Undergraduate

6. Question critical assumptions  
Audience: Undergraduate

7. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness  
Audience: Undergraduate

### RELIG ST 300 – AMERICA AND RELIGIONS

3 credits.

Explores the colorful, contested relationship of religion and American (U.S.) culture. Surveys a variety of themes from Native American-European encounters to the present. Significant court cases focus on the tension between a quest for American consensus and an abiding religious and cultural pluralism.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. articulate the changing meaning of the First Amendment in the U.S.A.  
Audience: Undergraduate

2. develop your own explanations of the consequences of these changing meanings on a variety of religious communities in the U.S.  
Audience: Undergraduate

3. identify, evaluate, and interpret the interrelationships of global religious worldviews and their religious expression in communities in Wisconsin and throughout the U.S.  
Audience: Undergraduate

4. hone your close reading and interpretive skills in both your writing and your oral presentations  
Audience: Undergraduate

5. exhibit their knowledge, application and explication of primary disciplinary tools in Religious Studies as demonstrated in advanced research and its presentation  
Audience: Graduate

**RELIG ST 302 – CHRISTIANITY: INTERPRETATION AND PRACTICE**  
3 credits.

A comparative, thematic exploration of major Christian theological ideas and their relationships to practices across varieties of Christianity and contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss and write in the common language and themes of Christianity.

Audience: Undergraduate

2. Analyze theological texts, connect texts to contexts and practices, and make scholarly comparison of texts and their interpretations.

Audience: Undergraduate

3. Articulate how Christian interpretation is a dynamic process as evidenced in Christian texts and local examples of Christian communal practice.

Audience: Undergraduate

4. Participate in fruitful, academically-informed discussion of difficult and often passionately debated theological ideas.

Audience: Undergraduate

5. Articulate how Christianity functions as a complex, global religion in the variety and continuity of its interpretation and practice.

Audience: Undergraduate

**RELIG ST/ASIAN 303 – JAINISM: RELIGION AND CULTURE OF NONVIOLENCE**  
3 credits.

Introduction to the Jain tradition. Despite being a small minority religion, core Jain ethical and philosophical concepts of ahimsa (non-violence) and anekantavada (non-absolutism) have influenced all other major traditions in India and secular Indian society. Examines how Jain philosophy, ritual, social relations, and politics are informed by a commitment to ascetic ethics that uphold ahimsa as the greatest virtue for renouncers (monks and nuns) and lay practitioners, tracing the evolution of Jain ethical engagements with modern social and political issues including environmental and animal rights activism, business and finance, and medicine and bioethics. Course covers canonical texts and scholarly literature on Jainism to understand how ahimsa has been historically articulated within Jain philosophy and doctrine, re-articulated in modern social movements, and how it has been constructed in academic studies of Jainism.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and explain basic concepts, ideas, and terminology relating to Jainism from both the monastic and lay perspectives

Audience: Undergraduate

2. Compare and differentiate between the basic tenets of Jainism, Hinduism, and Buddhism.

Audience: Undergraduate

3. Apply anthropological and religious studies concepts and theories to the relationship of Jain rituals, theology, and experience as well as the larger world of South Asian religions

Audience: Undergraduate

4. Make connections between historical and current practice of Jainism in both living and historical situations

Audience: Undergraduate

5. Analyze a social, cultural, historical, visual, or textual aspect of Jain philosophy in a research project to support their interpretations of course material and apply them to the student's own local and global context

Audience: Undergraduate

**RELIG ST/GEN&WS 305 – WOMEN, GENDER AND RELIGION**  
3 credits.

Explores themes significant to the impact of religion on women and women on religion, historically and today, across a diverse range of contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RELIG ST/ASIAN 306 – HINDUISM**

3 credits.

A historical survey of Hindu scriptures, rituals, philosophies, and ethics from the ancient to the contemporary world. Concepts such as karma, yoga, and reincarnation will be put in the broader contexts of Hindu theism, worship, and law. Not open to students who completed RELIG ST 355 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Recognize and understand the fundamental rituals, social systems, philosophical schools, and devotional traditions that make up the many forms of the Hindu religion.

Audience: Undergraduate

2. Explore important conceptual categories in Hinduism and significant sociohistorical developments in India.

Audience: Undergraduate

3. Consider, through close readings and discussions of philosophical texts, law books, devotional literature, and mythologies the ways in which Hinduism influences the everyday lives of Hindu women and men, Hindus of different classes and castes, and Hindus in different locations in India and throughout the world.

Audience: Undergraduate

**RELIG ST/ASIAN 307 – A SURVEY OF TIBETAN BUDDHISM**

3 credits.

By studying the distinctively Tibetan forms of Buddhism, we also examine more general issues, such as the relationship between theory and practice, ancient meditation and mind training, the politics of "world making", and the connection between identity and experience. Not open to students with credit for LCA 421 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the core practical and theoretical aspects of Tibetan Buddhism and Buddhism in general.

Audience: Undergraduate

2. Apply multiple variations of meditation for personal use and demonstrate for others.

Audience: Undergraduate

3. Summarize and explain Buddhist perspectives of true mode of existence of internal and external phenomena, the environment and its habitants, mental factors and external physical matter.

Audience: Undergraduate

**RELIG ST/ASIAN/HISTORY 308 – INTRODUCTION TO BUDDHISM**

3-4 credits.

The basic thought, practices and history of Buddhism, including selflessness and relativity, practices of meditation, merit- making and compassion from both local and translocal perspectives. Includes a discussion of Buddhism as a contemporary, North American religion. Not open to students with credit for E ASIAN or LCA 308 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RELIG ST/HISTORY/MEDIEVAL 309 – THE CRUSADES: CHRISTIANITY AND ISLAM**

3-4 credits.

An examination of the Crusades from both Christian and Islamic perspectives; the historical, social, and religious context and significance of the Crusades for both Christians and Muslims.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RELIG ST 311 – SECTS AND CULTS**

3 credits.

An introduction to new religious movements in the U.S. frequently referred to as "sects," "cults," and "fringe religions."

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Articulate the complexities of defining new religious movements.

Audience: Undergraduate

2. Describe and assess a variety of arguments about religion, brainwashing and representation.

Audience: Undergraduate

3. Demonstrate skills of analysis, persuasive writing, oral communication.

Audience: Undergraduate

4. Articulate and better understand your own definition of religion.

Audience: Undergraduate

**RELIG ST 320 – PROPHETS AND POETS: WOMEN, WRITING AND RELIGION IN A TIME OF WAR, 1642-1660**

3 credits.

How does the study of religion affect the ways we interpret the past? Can we ever recover and understand the beliefs and values held by people who lived in different countries and previous centuries? Draws on the disciplines of religious studies, history and literature to evaluate the different frameworks that scholars have used in their investigations of women's spiritual writing during the turbulent English civil wars (1642-1660). Unable to fight with swords or speak out in church because they were denied ordination, women raised their pens to express their partisanship in the conflict. Positioning themselves as faithful spouses and devout Christians, these women endorsed religious injunctions about feminine modesty and spirituality at the same time as they secretly worked as messengers and spies. Involves some discussion of violence concerning the ways in which this period of conflict and religious turmoil paradoxically accorded some women a powerful literary voice.

**Requisites:** Satisfied Communications A requirement and sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. analyze the major forms, techniques, social conditions, values, and genres that shaped English literature and language in the early modern period, specifically in relation to religious studies and the study of the English civil wars

Audience: Undergraduate

2. utilize a variety of resources and methods of research across disciplinary lines, including, especially, the disciplines of religious studies, and literary and historical research;

Audience: Undergraduate

3. compare divergent and contradictory critical perspectives;

Audience: Undergraduate

4. question critical and historical assumptions;

Audience: Undergraduate

5. write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

**RELIG ST/CLASSICS/JEWISH 323 – THE BIBLE AND FILM: LITERATURE AND MEDIA**

3 credits.

An introduction to the study of the Bible as literature and of biblical reception in the medium of film, from early Hollywood to the present day. Explores the way in which the Bible (including both Hebrew and Greek Testaments), one of the foundational literary corpora of American society, has been interpreted, reinterpreted, and misinterpreted through the medium of film over the past century. We will begin each segment of the course by reading portions of the biblical text that have experienced significant interpretation, in order to understand the literary text that has been received in film. How beholden are filmmakers to the interpretations of communities that view these texts as authoritative, and where are they free to depart from their sources? Is it possible to "translate" biblical narratives into film without losing something in the translation? These questions will focus our study on ways the literature has been interpreted in this new medium.

**Requisites:** Sophomore standing

**Course Designation:** Gen Ed - Communication Part B

Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Develop understanding of film as a form of biblical reception.

Audience: Undergraduate

5. Hone close reading and film-watching skills so as to be able to read a literary text with deeper attention to detail and sharper interpretive instincts, as well as increase ability to articulate their observations.

Audience: Undergraduate

6. Demonstrate skills in critical reading, logical thinking, and the use of evidence.

Audience: Undergraduate

7. Demonstrate skills in the use of appropriate style and disciplinary conventions in writing and speaking.

Audience: Undergraduate

8. Demonstrate skills in the use of core library resources specific to the ancient Near Eastern world.

Audience: Undergraduate

**RELIG ST/FOLKLORE 326 – THE SUPERNATURAL IN THE MODERN WORLD**

3 credits.

Explores evidence of belief in the supernatural in the modern world as it appears in the context of folk religion, folk medicine, legends, folk drama, ritual and custom, and media accounts and presentations. Surveys scholarly approaches to the topic. Course not available to students with credits for Folklore 415 before Fall 2023.

**Requisites:** Satisfied Communications A requirement or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize and explore different types of supernatural narratives, practices, and beliefs from around the world and throughout history.

Audience: Undergraduate

2. Analyze the roles that supernatural narratives, practices, and beliefs play in human societies, and in the lives of individuals.

Audience: Undergraduate

3. Analyze “the supernatural” in relationship to historical memories, cultural anxieties, folk traditions, spiritual beliefs, physiological sensations, political conflicts, environmental disasters, and existential imperatives.

Audience: Undergraduate

4. Engage with the course themes via analytical and creative written responses, experiential learning experiments, and the active documentation of folklore.

Audience: Undergraduate

**RELIG ST/JEWISH/LITTRANS 328 – CLASSICAL RABBINIC LITERATURE IN TRANSLATION**

3-4 credits.

Introduction to the literature of the Classical Rabbinic or Talmudic period of Judaism (2nd to 7th centuries CE). Historical and intellectual background; the interrelation of liturgy, legal and non-legal literature.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**RELIG ST/HIST SCI/MED HIST 331 – SCIENCE, MEDICINE AND RELIGION**

3 credits.

Introduction to the study of religion, science, and medicine. Focus on how religion, science, and medicine have shaped practices of knowledge production and meaning making with respect to human life, by considering theories of human history and racial progress; how logics of contagion structure human relationships and communal boundaries; the variety of ways of understanding and caring for bodies; and the place of humans within broader ecologies.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. read and interpret critically primary and secondary source texts about religion, science, and medicine

Audience: Both Grad & Undergrad

2. access and utilize a variety of resources and methods for critical inquiry and research in religious studies, history of science and medicine, and science and religion

Audience: Both Grad & Undergrad

3. categorize, analyze, and compare core concepts in religious studies, the history of science and medicine, and science and religion, such as the conflict thesis; knowledge production; creation/evolution; eugenics; race; gender; embodiment; care; health/healing; capitalism; and progress narratives

Audience: Both Grad & Undergrad

4. identify, evaluate, and interpret the interrelationships and impact of religious and scientific worldviews as related to health, bodies and communities

Audience: Both Grad & Undergrad

5. perform textual analysis, primary source research and synthesis of scholarly ideas, in persuasive writing, oral communication, active listening, and with critical empathy

Audience: Both Grad & Undergrad

6. create conversations about complex topics that seek academic excellence, honesty, and integrity

Audience: Both Grad & Undergrad

7. engage with the academic literature on religion, science, and medicine that is pertinent to the student’s specific research area and apply it to facilitate original primary source analysis

Audience: Graduate

**RELIG ST/CLASSICS/HEBR-BIB/JEWISH/LITTRANS 332 – PROPHETS OF THE BIBLE**

4 credits.

An introduction to the thought, literature, and history of the prophets of ancient Israel (in English).

**Requisites:** RELIG ST/CLASSICS/JEWISH/LITTRANS 227 or Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Compare ancient Near Eastern prophetic voices to modern prophetic voices.

Audience: Undergraduate

**RELIG ST 333 – EARLY CHRISTIAN LITERATURE: MATTHEW-REVELATION**

3 credits.

An exploration of Christianity's charter documents in the light of what modern scholarship has discovered about the New Testament's sociohistorical context, composition, theologies, and presentations of Jesus.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RELIG ST/CLASSICS/JEWISH 335 – KING DAVID IN HISTORY AND TRADITION**

3 credits.

An exploration of the literary and historical aspects of the text of 1-2 Samuel + 1 Kings 1-2; the history and archaeology of Jerusalem during the tenth century B.C.E.; and the varieties of ways in which the figure of King David has been received in subsequent religious and secular literature, visual art, music, television, and cinema.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate a critical understanding of the reception of David in various media.

Audience: Undergraduate

### **RELIG ST/JEWISH 340 – THE AMERICAN JEWISH LIFE OF DNA** 3 credits.

Explores the range of relationships between DNA and American Jewish life. It begins with the "prehistory" of the relationship between Jewishness and genetic science, from Biblical genealogies to early twentieth century racial science. It then turns to America in the second half of the twentieth century, when the discovery of the double helix and the atrocities of Auschwitz reinvigorated and reshaped American Jewish relationships to DNA.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. articulate informed answers to central questions at the intersection of Jewish Studies and Science and Technology Studies  
Audience: Undergraduate

2. identify key themes, movements, and people in twentieth century American Jewish Studies and the history of the biological sciences  
Audience: Undergraduate

3. analyze a range of sources, including material objects and digital media as well as written texts from religious, ethnic, and scientific communities  
Audience: Undergraduate

4. employ an expanded range of religious literacy, including skills for identifying, evaluating, and interpreting the interrelationships and impact of religious and scientific worldviews and communities in the United States via a variety of theoretical ideas and methodologies in the social sciences and humanities  
Audience: Undergraduate

5. employ stronger research and writing skills, including textual analysis, primary source analysis, synthesis of scholarly ideas, persuasive writing, oral communication, active listening, and critical empathy  
Audience: Undergraduate

6. participate more effectively in creating open, engaging, fun, and collaborative learning environments that seek academic excellence, honesty, and integrity  
Audience: Undergraduate

### **RELIG ST/FOLKLORE/MEDIEVAL/SCAND ST 342 – NORDIC MYTHOLOGY** 3 credits.

Mythology, literature, ritual, traditions, medieval folklore, and religion from Nordic areas and Scandinavia.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, describe and analyze cultural phenomena, specifically pre-Christian Nordic Religion, and put it into context.

Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning medieval Nordic mythology and religion.  
Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.  
Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.  
Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.  
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline.  
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view  
Audience: Undergraduate

### **RELIG ST/ANTHRO 343 – ANTHROPOLOGY OF RELIGION** 3-4 credits.

Anthropological approaches. Illustrated by critical considerations of outstanding contributions. Selected religious systems; areal and topical comparative studies; religion as an ethnographic problem.

**Requisites:** ANTHRO 104 or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

### RELIG ST/FOLKLORE 352 – SHAMANISM

3 credits.

Survey of shamanism as a religious tradition and sociocultural force in Siberian, Asian, and Native American societies. Exploration of shamanic rituals, roles, cosmology. Cultural and political uses of shamanism in traditional and modern contexts.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

### RELIG ST/ENGL/HISTORY 360 – EARLY MEDIEVAL ENGLAND

3 credits.

Introduction to the peoples and cultures of Early Medieval England (c450-c1100), with primary emphasis on texts written in Old English and Latin. Interdisciplinary approach including history, literature, religion, and material culture. Attention to literary genres ranging from elegy to riddles; the development of Christianity; encounters with Romans, Vikings, and Normans; and other political and social concerns. All readings in translation.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Recognize and discuss major forms, techniques, social conditions, values, and genres that have shaped the history of English literature, language, and culture.

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives, identify and question assumptions, and assess evidence and methods related to Early Medieval England.

Audience: Undergraduate

3. Write original, coherent, and compelling arguments about assigned texts and/or objects that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness.

Audience: Undergraduate

### RELIG ST 361 – EARLY CHRISTIAN LITERATURE: PAULINE CHRISTIANITY

3 credits.

By conventional reckoning, Paul was a major contributor to the development of Christianity. Analyzes both Paul's and other contemporary writings to assess the extent to which he contributed to the development of the early church.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### RELIG ST/AFRICAN/ASIAN 370 – ISLAM: RELIGION AND CULTURE

3-4 credits.

The emergence and development of Islam; schism; theology; asceticism; speculative and popular mysticism; literatures in diverse Islamic languages. Not open to students with credit for LCA 370 prior to Fall 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### **RELIG ST/ART HIST 373 – MECCA, CAIRO, ISTANBUL, DELHI: GREAT CITIES OF ISLAM**

3 credits.

Have you always wanted to visit the Taj Mahal? Are you intrigued by the annual pilgrimage of millions of Muslims to Mecca in Saudi Arabia? Do you wonder how ancient cities like Cairo or Istanbul preserve their history while operating as modern, global megacities? Explore the development of some of the world's most fascinating cities – Mecca (Saudi Arabia), Cairo (Egypt), Istanbul (Turkey), and Delhi (India). Through images, texts, films, sounds, and even food, examine the development of architectural wonders and the urban fabric from the time of their foundation to the present day.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Interpret architecture and urban development in ways that take into account the historical contexts in which they were produced and received.

Audience: Undergraduate

2. Recognize distinct architectural languages in various Islamic cities over time.

Audience: Undergraduate

3. Understand the role of architecture in articulating urban/national narratives about the past and the present.

Audience: Undergraduate

4. Improve in ability to understand complex scholarly arguments, beginning to judge the strength of the visual and textual evidence presented.

Audience: Undergraduate

5. Communicate about architecture and urban history in written and oral form.

Audience: Undergraduate

6. Locate, assess, and use research resources in both print and digital form.

Audience: Undergraduate

### **RELIG ST/COM ARTS 374 – THE RHETORIC OF RELIGION**

3 credits.

Rhetorical character of religious controversy and sectarian persuasion in Western religion.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

**Learning Outcomes:** 1. Identify and describe key theories, concepts, and methods used to analyze religious communication within their historical, technical, cultural, social or political contexts

Audience: Undergraduate

2. Identify and describe key theories, concepts, and methods used to analyze how media shape the flow of information, policy law, culture, and power in relation to religious communication

Audience: Undergraduate

3. Apply key theories, concepts, and methods in the analysis of religious communication

Audience: Undergraduate

### **RELIG ST 400 – TOPICS IN RELIGIOUS STUDIES - HUMANITIES**

3-4 credits.

Topics may include religion in specific societies or regions; religion in the arts; contemporary themes in religion.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **RELIG ST 401 – TOPICS IN RELIGIOUS STUDIES - SOCIAL STUDIES**

3-4 credits.

Topics in religious studies in the social sciences.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**RELIG ST 403 – TOPICS IN RELIGIOUS STUDIES-US ETHNIC STUDIES**

3-5 credits.

Topics in historical or contemporary religious culture and society pertaining to persistently marginalized racial or ethnic groups in the United States.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**RELIG ST/ASIAN 405 – GODS AND GODDESSES OF SOUTH ASIA**

3 credits.

Introduces some of the most important deities of South Asia through visual representation, mythical narratives and rituals of worship. Topics include the development of iconographic forms and concepts, masculine and feminine aspects of the divine, the belief in human embodiments of divinities, the phenomenon of possession, modes of domestic and public worship and the symbolism of the temple structure.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand ways of conceiving of divinity and its presence in the world and in the life of the practitioner

Audience: Both Grad & Undergrad

2. Interpret forms of religious expression, representations of deities and their function in ritual

Audience: Both Grad & Undergrad

3. Critically examine taken-for-granted notions and stereotypes pertaining to image worship and to inquire into the process of their construction

Audience: Both Grad & Undergrad

4. Articulate in writing a critical perspective on image worship and devotional practices

Audience: Both Grad & Undergrad

5. Learn critical analysis and research skills

Audience: Both Grad & Undergrad

6. Improve skills in delivering oral presentations

Audience: Both Grad & Undergrad

7. Refine writing skills

Audience: Both Grad & Undergrad

8. Become familiar with multiple perspectives scholars use to study gods and goddesses of South Asia and use these perspectives in self-reflective thinking

Audience: Graduate

9. Refine critical analysis and research skills

Audience: Graduate

**RELIG ST 406 – THE AMISH**

3 credits.

An exploration of the faith and life of one of America's most familiar yet widely misunderstood religious groups, the Old Order Amish.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**RELIG ST/AFRICAN 408 – EVERYDAY RELIGION IN AFRICA**

3 credits.

Explore the diverse lived experiences of religion in Africa, examine the role of religion in shaping individual and communal identities, and understand the complex ways in which religion is practiced, experienced, and expressed in various African contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Analyze diverse value and belief systems in various contexts.

Audience: Both Grad & Undergrad

2. Define key terms in religious studies and African studies.

Audience: Both Grad & Undergrad

3. Communicate effectively through close reading, writing, oral presentations, and discussion.

Audience: Both Grad & Undergrad

4. Interpret the interrelationships and impact of religious worldviews and communities in Africa.

Audience: Both Grad & Undergrad

5. Recognize cultural assumptions and knowledge claims as they relate to Africa and religion.

Audience: Both Grad & Undergrad

6. Demonstrate empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

7. Utilize the terminology and methodology of cultural studies and religious studies in speech and writing.

Audience: Graduate

8. Construct complex arguments using primary and secondary sources to support arguments about lived religion in Africa.

Audience: Graduate

**RELIG ST/HISTORY 409 – CHRISTIANITY IN THE ATLANTIC WORLD, 1500-1800**

3 credits.

Between the late Middle Ages and the era of democratic revolutions Western Christianity saw a series of sweeping changes that altered its global profile and helped form the modern world - examines some of these shifts and their impact. Questions explored include: Why did the Reformations of the 16th century occur and with what effects on people's lives and on early modern societies? What was the relationship between European colonization, the Atlantic slave trade, new theories of race, and the spread of Christianity to the "New World"? How was the Christian religion resisted, received, and reshaped by Native Americans and people of African descent? What sparked movements of reform and renewal - including new Catholic religious orders and the Protestant Evangelical Awakening - and with what consequences for modern Christianity? How did the nature of Christian belief and identity change under the impact of religious conflict, political revolution, and new intellectual movements?

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and explain the significance of key trends, thinkers, and texts in the history of early modern Christianity

Audience: Undergraduate

2. Analyze and evaluate some of the scholarly debates in the field of early modern Christianity

Audience: Undergraduate

3. Interpret complex writings from the past contextually, critically, and empathetically

Audience: Undergraduate

4. Construct strong historical arguments based on evidence and careful reasoning

Audience: Undergraduate

5. Compose clear analytical and argumentative written prose

Audience: Undergraduate

**RELIG ST 410 – CHILDREN AND RELIGION IN AMERICA**

3 credits.

Based upon the assumption children are important participants in religious communities; that they co-create their religious traditions. Through studies of children's lives in various religious communities in America (mostly), explore how including children's perspectives shifts general claims about religious groups and their practices.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RELIG ST/HISTORY 411 – THE ENLIGHTENMENT AND ITS CRITICS**  
3 credits.

European intellectual history in the 17th and 18th centuries, from the Wars of Religion to the French Revolution. Examines the rise of Enlightenment thought in relation to political and religious conflict, revolutions in science and philosophy, and the emergence of the public sphere. Special attention is paid to the Enlightenment's relationship to religion and to contemporary critiques made of Enlightenment thinking, including those of the early Romantic movement.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**RELIG ST/AFRICAN 414 – ISLAM IN AFRICA AND THE DIASPORA**  
3 credits.

Explore African Muslim communities and Black Muslim communities in the US as an under-examined archive of Islamic authenticity and authority. Involves close readings of ethnographies, fiction, films, and other forms of cultural expression and examination of the practice of Islam and representation of Muslims in Africa and Muslims of African ancestry in the US. Through both primary and secondary sources, explore themes of not just authenticity and authority but also related issues of representation, positionality, difference, otherness, essentialism, and normativity. Ultimately, form a deeper understanding of the diversity and complexity of Islam and Muslims of African ancestry.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of major theories, approaches, concepts, and current and classical research findings in African and diaspora literary, cultural studies, and religious studies related to Islam and Muslims.

Audience: Both Grad & Undergrad

2. Communicate effectively through close reading, essays, oral presentations, and discussion about Islam and Muslims, to share knowledge, wisdom, and values with others across social and professional settings.

Audience: Both Grad & Undergrad

3. Write and speak across disciplinary boundaries with regard to existing research about Africa, the diaspora, and Islam in the humanities.

Audience: Both Grad & Undergrad

4. Access, appraise, and utilize a variety of resources and methods for research across disciplinary lines

Audience: Both Grad & Undergrad

5. Analyze and compare diverse systems of value and belief in a variety of contexts

Audience: Both Grad & Undergrad

6. Demonstrate global and local religious literacy by identifying, evaluating, and interpreting the interrelationships and impact of religious worldviews and communities in the United States and globally

Audience: Both Grad & Undergrad

7. Articulate how the past has affected present day circumstances regarding race and racial inequalities in the US, Africa, and other African diasporic communities.

Audience: Both Grad & Undergrad

8. Recognize and question cultural assumptions and knowledge claims as they relate to race and ethnicity.

Audience: Both Grad & Undergrad

9. Demonstrate self-awareness and empathy toward the cultural perspectives and worldviews of others.

Audience: Both Grad & Undergrad

10. Apply course concepts to their lives outside the classroom by respectfully participating in our multicultural society.

**RELIG ST 420 – RELIGIOUS STUDIES COLLOQUIUM**

1 credit.

Explores why and how religious studies matters as a helpful interpretative field across a variety of topics of interdisciplinary interest and societal concern.

**Requisites:** Declared in Religious Studies, Certificate in Religious Studies, or Religious Studies Doctoral Minor

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Articulate awareness of significant current issues related to religion and its study

Audience: Undergraduate

2. Apply Religious Studies methods to social concerns and interdisciplinary topics

Audience: Undergraduate

3. Talk about and contribute to analysis of religion in an informed scholarly manner in an interdisciplinary conversation

Audience: Undergraduate

**RELIG ST/ASIAN 430 – INDIAN TRADITIONS IN THE MODERN AGE**

3 credits.

Explores how ancient Indian traditions have been reframed for the modern age. Topics include the Ramayana in popular media, negotiations over sacred spaces, and popular Tantra. We will also examine recent controversies, such as the one surrounding the ancient Jain practice of fasting until death (sallekhana) in the modern age.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**RELIG ST/POLI SCI 433 – RELIGION AND POLITICS**

3-4 credits.

Explores the relationships and interactions between religion and politics from a comparative perspective. Discuss the appropriate relationship between religion and state. Investigate the implications of the various ways in which the religion-state relationship have been involved in political conflict. Building on this, turn to several of the current issues in religion and politics asking: Why is religion apparently more important than ever despite an increasingly secular world? What is religious nationalism? What is fundamentalism? How can we explain the similarities and differences between religious fundamentalist movements across the globe? How should democratic states cope with the emergence of fundamentalist movements? In order to begin answering these questions, integrate the theoretical frameworks we develop with explorations of the historical and local context of relevant case-studies from around the world.

**Requisites:** Sophomore standing and (POLI SCI 140, 120, RELIG ST 101, 102, 103, or INTL ST 101) or (POLI SCI 103 or 106 prior to fall 2017)

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Examine the relationships and interactions between religion and politics from a comparative perspective.

Audience: Undergraduate

2. Analyze the appropriate relationship between religion and state.

Audience: Undergraduate

3. Discuss the implications of the various ways in which the religion-state relationship have been involved in political conflict.

Audience: Undergraduate

**RELIG ST/ENGL 434 – MILTON**

3 credits.

Study of John Milton's poems and selected prose.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RELIG ST/ITALIAN/MEDIEVAL 440 – POVERTY, ECOLOGY AND THE ARTS: ST. FRANCIS OF ASSISI**

3 credits.

Focuses on literature about Francis of Assisi, from medieval accounts to contemporary literature, and related artistic portrayals of St. Francis as a religious symbol and model for economic, political and environmental justice.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Articulate the significance of Francis of Assisi as a multi-faceted historical, literary and symbolic figure, especially in relation to economic and environmental justice and reform.

Audience: Both Grad & Undergrad

2. Read and assess critically a range of literary genres that employ and depict Francis.

Audience: Both Grad & Undergrad

3. Compare interpretive models of Francis in literature and related artistic media over time and contexts.

Audience: Both Grad & Undergrad

4. Craft cogent written analysis of a literary and religious model such as Francis via selected interdisciplinary methods from religious studies, literary and historical scholarship.

Audience: Both Grad & Undergrad

5. Produce a research paper on a critical aspect of the presentation of Francis in selected works, employing one or more disciplinary approaches covered in the course.

Audience: Graduate

**RELIG ST/ASIAN 444 – INTRODUCTION TO SUFISM (ISLAMIC MYSTICISM)**

3 credits.

The rise and development of mysticism in Islam; basic Sufi doctrines, values and practices; life and works of important speculative and popular Sufi saints; Sufi brotherhoods in the Middle East, South Asia and North Africa.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**RELIG ST/ASIAN 460 – THE HISTORY OF YOGA**

3 credits.

Explores the history of Yoga techniques from the ancient to the modern period. Not open to students with credit for RELIG ST 623 prior to Spring 2019.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1.

Audience: Undergraduate

2.

Audience: Graduate

**RELIG ST/AFRICAN/JEWISH/MEDIEVAL 462 – MUSLIMS AND JEWS**

3 credits.

Explores the historical relationship between Muslims and Jews in a variety of contexts from the seventh century to the present. Surveys literary and cultural exchanges against the background of shifting political and social conditions across the Middle East, Europe, and the United States. Considers also the parallel legacies of anti-Semitism, Orientalism, and Islamophobia. Major themes include comparative religion, secularization, migration, and colonialism, as well as the politics of history and cultural memory. Introduces readings in English translation of medieval and modern texts originally written across languages, and especially in Hebrew and Arabic.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate contextual knowledge of major historical events, figures, social conditions, religious communities, and geographies of Muslim Iberia (al-Andalus) from the eighth to sixteenth centuries

Audience: Undergraduate

2. Situate al-Andalus in relation to wider developments in politics, culture, and religion of the Middle East and North Africa, from the eighth century to the present

Audience: Undergraduate

3. Understand the terms and conditions that have shaped Muslim-Jewish relations from the seventh century until the present, including frameworks of theology, lived religious experience, and Orientalist representation

Audience: Undergraduate

4. Integrate relevant theoretical frameworks, debates, and conversations regarding the distinction between historical writing and cultural memory

Audience: Undergraduate

5. Discern divergent and contradictory representations of the history of al-Andalus in contemporary memory culture

Audience: Undergraduate

6. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in written and visual materials across genres (philosophy, literature, religion, film) as well as in primary and secondary historical sources

Audience: Undergraduate

7. Generate original ideas and texts, through coherent writing and compelling argumentation, by experimenting and taking risks, solving problems, and answering questions in a range of media

Audience: Undergraduate

**RELIG ST/ASIAN 466 – BUDDHIST THOUGHT**

3 credits.

Survey of the fundamental trends in Buddhist thought through the works of major philosophers. Themes include the concept of "selflessness" and concomitant theories of essencelessness, perception, language and rationality. Not open to students with credit for E ASIAN or LCA 466 prior to Fall 2019.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**RELIG ST/ASIAN 473 – MEDITATION IN INDIAN BUDDHISM AND HINDUISM**

3 credits.

Examines contemplative practices in the two major Indian religions, Buddhism and Hinduism. Covers practices described in ancient texts but also provides an overview of selected modern practices.

**Requisites:** Sophomore standing (not open to students with credit for LCA 624 prior to Fall 2019)

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Ability to understand the historical context of meditation practices;

Audience: Undergraduate

2. Explain the complex nature and interdependence of contemporary meditation practices;

Audience: Undergraduate

3. Articulate in writing a critical perspective on practices using evidence as support.

Audience: Undergraduate

### RELIG ST 475 – RELIGION, GLOBAL AND PUBLIC HEALTH

3 credits.

Explores health issues and practices in religious communities and their interaction with public health concerns and programs in U.S. and international contexts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Articulate significances of religion/spirituality for public health and a variety of ways that religious communities, particularly marginalized communities, address health concerns and interact with community health in the U.S. and internationally.

Audience: Undergraduate

2. Read, annotate, assess and employ substantial academic works in religious studies and related areas more productively.

Audience: Undergraduate

3. Employ short writing assignments (preliminary reports, summaries) in reading comprehension and participation in complex group discussion more effectively.

Audience: Undergraduate

4. Apply terminology and analysis in religious studies, public/global health and associated disciplines to health-related contexts and sources.

Audience: Undergraduate

5. Research, produce and present an academic project contributing to the understanding of religion for public/global health.

Audience: Undergraduate

6. Participate in creating informed, collegial, engaging and productive conversation about religion and health concerns.

Audience: Undergraduate

### RELIG ST/ART HIST 478 – ART AND RELIGIOUS PRACTICE IN MEDIEVAL JAPAN

3 credits.

A study of spaces, objects, and images within the context of religious belief and practice in Japan between 1300 and 1600, when great Zen monasteries grew up alongside older Buddhist/Shinto religious "megaplexes," and new salvationist sects spread throughout Japan.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### RELIG ST 500 – ADVANCED TOPICS IN RELIGIOUS STUDIES

2-4 credits.

Topics may include religion in specific contexts, religion and other disciplines or specific themes in Religious Studies.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

### RELIG ST/PHILOS 501 – PHILOSOPHY OF RELIGION

3-4 credits.

Analysis of religious experience and activity, and examination of principal religious ideas in light of modern psychology, philosophy, science, and anthropology.

**Requisites:** Junior standing or 3 Credits in PHILOS

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### RELIG ST/ASIAN 505 – THE PERFECTIBLE BODY IN RELIGIONS, MEDICINES, AND POLITICS

3 credits.

Looking at the cultural institutions of politics, medicine, and religion in multiple cultures and historical times, students will explore ideas about what constitutes a perfect body, how and why different parts of the body are privileged over others, and how and why the notion of bodily perfectibility differs for men and women, children and adults, and humans and gods. Readings encourage such questions as: Is the perfect body attainable and, if so, how? And, who benefits from bodily perfection (or the rhetoric of the bodily perfection)? We will ask these questions with comparative intent: we want both to learn about cultures other than our own and, in the process of understanding the other, we will ask how this new knowledge might empower us to be more observant and critical of the role(s) and treatment of the body in our own society historically and today.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**RELIG ST/CURRIC/ED POL 516 – RELIGION AND PUBLIC EDUCATION**

3 credits.

Examines theories and practices related to the role of religion in public schooling and its accompanying tensions: political and philosophical, practical and personal.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**RELIG ST/CLASSICS/HISTORY 517 – RELIGIONS OF THE ANCIENT MEDITERRANEAN**

3 credits.

Ancient religions in their political, social and cultural contexts; topics include ritual, literary and artistic representations, religious persecutions, and/or modern approaches to the study of ancient religions. Chronological and geographical focus will vary between Greece, Rome, Judaea and Egypt.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of Classical and ancient Near Eastern societies and cultures.

Audience: Undergraduate

2. Examine, analyze, and interpret ancient texts in translation and material culture.

Audience: Undergraduate

3. Critique ancient Greek, Roman, and/or Near Eastern societies and cultures and compare them to other societies and cultures.

Audience: Undergraduate

4. Demonstrate knowledge of ancient Mediterranean religions.

Audience: Undergraduate

**RELIG ST 600 – RELIGION IN CRITICAL PERSPECTIVE**

3 credits.

Theory and analysis of religion as a human phenomenon.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**RELIG ST 601 – SENIOR CAPSTONE RESEARCH AND COLLOQUIUM**

4 credits.

Integrated capstone course combining discussion of research methods, conduct of senior thesis research, and presentation and discussion of research results.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**RELIG ST/ASIAN 650 – PROSEMINAR IN BUDDHIST THOUGHT**

2-3 credits.

Advanced topics in theories focused on the mechanisms of contemplative practices such as mindfulness, focused attention and compassion practices, with special emphasis on the interaction of traditional theories from contemplative traditions such as Buddhism and more recent theoretical accounts in psychology and cognitive science.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**RELIG ST 681 – SENIOR HONORS THESIS**

3 credits.

Independent research undertaken by students in the honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**RELIG ST 682 – SENIOR HONORS THESIS**

3 credits.

Independent research undertaken by students in the honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**RELIG ST 699 – DIRECTED STUDY**

1-4 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### RELIG ST 799 – INDEPENDENT RESEARCH

1-6 credits.

Independent research for graduate students.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### RELIG ST 999 – INDEPENDENT WORK

1-6 credits.

Individual tutorial on topics in religious studies.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

## RISK MANAGEMENT AND INSURANCE (R M I)

### R M I 300 – PRINCIPLES OF RISK MANAGEMENT

3 credits.

Nature of risk, principal techniques of risk management, including insurance markets, and the bases for decision-making in managing risk effectively.

**Requisites:** (ECON 101 or 111) or declared in undergraduate Business Exchange program. Not open to graduate/professional students

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize the general types and characteristics of situations involving risk, how to identify them, and why they are important

Audience: Undergraduate

2. Possess the skills and knowledge to measure and assess risk

Audience: Undergraduate

3. Know the basics of how risk management tools work and their benefits/costs in any given situation

Audience: Undergraduate

4. Apply the risk management process in a simple situation involving risk

Audience: Undergraduate

5. Explain the value that sound risk management provides individuals, organizations, and society

Audience: Undergraduate

### R M I 365 – CONTEMPORARY TOPICS

1-3 credits.

Exploration of subject areas possibly to be introduced into the business curriculum.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### R M I 399 – READING AND RESEARCH-RISK MANAGEMENT

1-6 credits.

Individual work suited to the needs of undergraduate students may be arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

### R M I/ECON 530 – INSURING LIFE'S RISKS: HEALTH, AGING, AND POLICY

3 credits.

Covers risks related to health and aging, rationales for social insurance programs to protect against these risks, and costs and benefits of these programs. Broad topics include health insurance, disability insurance, and Social Security and pension policy.

**Requisites:** (ECON 301 or 311) and ECON 310; or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe and interpret models of risk and insurance

Audience: Undergraduate

2. Identify and interpret the basic features (and rationales) of major US social insurance programs related to health and aging

Audience: Undergraduate

3. Apply knowledge from Learning Outcomes 1 and 2 to be able to critique and evaluate the merits of recent research articles

Audience: Undergraduate

### R M I 620 – EMPLOYEE BENEFITS MANAGEMENT

3 credits.

Nongovernmental schemes for treating the risks of superannuation of members of a group; property, liability, legal expense, life and health coverages available to groups; organizational characteristics, benefit structure and pricing of risk transfer schemes for groups; characteristics and funding of various types of pension plans; effects of ERISA.

**Requisites:** R M I 300 or graduate standing or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**R M I 635 – CAPTIVE INSURANCE**

1-2 credits.

Examines how captive insurance works, the different structures of captives, and advantages and disadvantages of their use in various settings. In addition, the captive feasibility process, as well as techniques for measuring financial performance, will be covered.

**Requisites:** R M I 300, 700, or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Summarize the advantages and disadvantages of captives

Audience: Both Grad & Undergrad

2. Explain how captives financially and operationally work

Audience: Both Grad & Undergrad

3. Differentiate the types of captive structures

Audience: Both Grad & Undergrad

4. Manage a captive feasibility study

Audience: Both Grad & Undergrad

5. Conduct analyses to choose a captive domicile and select service providers

Audience: Both Grad & Undergrad

6. Design a captive

Audience: Both Grad & Undergrad

7. Summarize complex concepts, present information succinctly and with logical flow, respond effectively to questions, and listen to critiques

Audience: Graduate

**R M I 636 – INSURER FINANCIAL STATEMENT ANALYSIS AND CAPTIVE INSURANCE**

1-3 credits.

Comprehensive overview of insurer financial statement analysis and captive insurance. Examine the construction of insurer financial statements, including premiums, expenses, and losses. Financial statement analysis focusing on the statutory statement with differences from GAAP highlighted. Assess captive insurance, covering its structures, feasibility studies, and financial performance measurement.

**Requisites:** (R M I 300 or 700) or declared in undergraduate Business Exchange Program. Not open to students with credit for R M I 635.

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the construction of insurer financial statements.

Audience: Undergraduate

2. Analyze insurer financial statements to assess an insurer's strategy and solvency.

Audience: Undergraduate

3. Summarize the advantages and disadvantages of captive insurance.

Audience: Undergraduate

4. Conduct a captive feasibility study of captive insurance, including actuarial loss projections and financial pro formas.

Audience: Undergraduate

5. Differentiate between various captive structures and domiciles.

Audience: Undergraduate

### **R M I 637 – REINSURANCE**

1 credit.

Focuses on reinsurance, a key component to the successful implementation of the insurance mechanism. Provides exposure to the types and uses of reinsurance, its specific regulatory requirements, how it affects and is affected by primary insurance, and general market mechanisms.

**Requisites:** R M I 300 or 700

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the uses of reinsurance, and the types of reinsurance most beneficial for each use

Audience: Undergraduate

2. Distinguish across the various markets of reinsurance, benefits and detriments of each

Audience: Undergraduate

3. Differentiate regulation of reinsurance compared with regulation of other financial transactions

Audience: Undergraduate

4. Identify how to price reinsurance contracts

Audience: Undergraduate

5. Describe the strategic approaches to use of reinsurance

Audience: Undergraduate

### **R M I 640 – MANAGEMENT OF INSURANCE ENTERPRISE**

3 credits.

Functional analysis of the operations of insurance organizations; legal organization, marketing systems, management and control, underwriting, rating, financial analysis, rate making and regulation.

**Requisites:** (R M I 300 or 700) or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the economic role of insurance in society through various coverages.

Audience: Undergraduate

2. Explain the major technical functions that exist within an insurance company.

Audience: Undergraduate

3. Demonstrate how insurers utilize risk aggregation as the centerpiece of their operations.

Audience: Undergraduate

4. Utilize insurer data and extract information from insurer financial statements.

Audience: Undergraduate

5. Present an analysis in a confident, organized, and coherent manner.

Audience: Undergraduate

### **R M I 645 – COMMERCIAL INSURANCE**

3 credits.

Consideration of the structure, use, benefits, and limitations of corporate insurance products. Fundamental to the material is the economic underpinning of the insurance contract structure. The major commercial property and liability insurance products will be analyzed in detail with the purpose of illustrating these economic principles and applying them to specific organizational situations.

**Requisites:** (R M I 300 or 700) or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and evaluate risk management issues associated with property and liability exposures.

Audience: Undergraduate

2. Anticipate the types of risks that can be transferred effectively through commercial insurance products.

Audience: Undergraduate

3. Articulate the reasons why commercial insurance products are frequently constructed as they are.

Audience: Undergraduate

4. Analyze loss situations and explain why or why not that situation is covered by commercial insurance.

Audience: Undergraduate

## **R M I 650 – SUSTAINABILITY, ENVIRONMENTAL AND SOCIAL RISK MANAGEMENT**

2-3 credits.

The assessment, control, financing and management of risks deriving from pressures on and damages to the environment, workers and local/foreign communities. Risks include liability and directors and officers law suits, boycotts, regulations and competitors' actions.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the manner and extent to which organizations and individuals contribute to degradation of the world's ecosystems, including a historical perspective  
Audience: Undergraduate

2. Recognize legal obligations of organizations and individuals in protecting the environment and conducting business as it relates to workers, customers, and the community at large  
Audience: Undergraduate

3. Compare methods to identify, evaluate, and manage risks associated with environmental and social justice issues  
Audience: Undergraduate

4. Evaluate organizations' sustainability risk management strategies  
Audience: Undergraduate

5. Design effective sustainability risk management strategies  
Audience: Undergraduate

6. Demonstrate that investment in sustainability risk management is value enhancing (that is, make the business case for it)  
Audience: Undergraduate

## **R M I 655 – RISK FINANCING TECHNIQUES**

3 credits.

Study of advanced risk management tools and markets for financing loss costs. Topics include: insurance, self-insurance, retrospective premium plans, risk retention and purchasing groups, reinsurance, insurance subsidiaries (captives), and other policyholder-owned facilities.

**Requisites:** (R M I 300 or graduate/professional standing) and (GEN BUS 306, 704, ECON 310, STAT/MATH 309, 431, or MATH 331), and (FINANCE/ECON 300 or FINANCE 700), or declared in the Business Exchange program

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the objective of risk management for corporations, and summarize and interpret how risk management creates value for corporations  
Audience: Undergraduate

2. Apply the enterprise risk management process for a corporation  
Audience: Undergraduate

3. Use statistical tools (regression, Value-at-Risk, and simulation analysis) to quantify and analyze risk exposures and how they impact the value of a corporation  
Audience: Undergraduate

4. Classify and differentiate the institutions, contracts, and strategies available to finance risks  
Audience: Undergraduate

5. Evaluate the potential risks to a corporation and generate recommendations regarding the risk management strategy that leads to the greatest increase in corporate value  
Audience: Undergraduate

**R M I 660 – RISK ANALYTICS AND BEHAVIORAL SCIENCE**

3 credits.

Learning to effectively navigate uncertainty is a key issue for all areas of business and especially for those engaged in explicit risk-management activities. The skills for success in these environments include knowing how to formulate the right questions to ask, how to identify the information that is valuable for answering those questions, understanding how to process incoming information to distinguish signal from noise, and how to use that information to put structure to uncertain environments so that one can take good calculated risks. This collective set of skills are at the heart of "decision analysis", which is a structured rational approach to making decisions under uncertainty.

**Requisites:** (R M I 300 or graduate/professional standing) and (GEN BUS 306, 704, 705, ECON 310, MATH/STAT 309, 431, or MATH 331), or declared in the Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize situations where potential biases in perceptions, understanding, and decisions related to risk management are likely to arise

Audience: Both Grad & Undergrad

2. Articulate the behavioral factors and psychological processes that may generate bias in that situation

Audience: Both Grad & Undergrad

3. Employ appropriate decision/evaluation process and business analytics to help improve decisions in the face of potential bias. These techniques include Monte Carlo Simulation, Decision Tree Analysis, and Expected Value Maximization

Audience: Both Grad & Undergrad

4. Diagnose risk management failures for corporations and suggest techniques and alternative management approaches that could mitigate these risk management issues

Audience: Graduate

**R M I 670 – CYBER RISK & REGULATIONS**

2-3 credits.

Defines cyber risk and studies prominent case examples to become familiar with the many challenges it poses. Includes an in-depth look at the current state of data privacy law both in the US and globally. Establishes a framework and some basic methods to quantify cyber risk. Explores current cyber risk management options in the market including the implementation of internal risk controls as well as options in the burgeoning market for cyber insurance.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and evaluate exposures, perils, and hazards of cyber risk that companies face

Audience: Both Grad & Undergrad

2. Assess cyber risk and employ basic measurement frameworks

Audience: Both Grad & Undergrad

3. Comply with cyber laws and regulations across geographies with legal exposure

Audience: Both Grad & Undergrad

4. Implement behavioral risk controls to manage the human side of cyber risk

Audience: Both Grad & Undergrad

5. Analyze available cyber risk management options for most efficient use of capital

Audience: Both Grad & Undergrad

6. Explain current cyber risk transfer options in the market

Audience: Both Grad & Undergrad

7. Analyze company cyber risk practices from an enterprise risk perspective

Audience: Graduate

8. Apply a multidisciplinary approach to design organizational data privacy policies

Audience: Graduate

9. Negotiate strategic business contracts with an understanding of rapidly developing data privacy law and compliance

Audience: Graduate

**R M I 700 – PRINCIPLES OF RISK MANAGEMENT**

3 credits.

Nature of risk, principal techniques of risk management, including insurance markets, and the bases for decision-making in managing risk effectively.

**Requisites:** Graduate/professional standing. Not open to students with credit for R M I 300

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize the general types and characteristics of situations involving risk, how to identify them, and why they are important

Audience: Graduate

2. Explain risk preferences and how they impact risk management decisions

Audience: Graduate

3. Apply the risk management process in a situation involving risk

Audience: Graduate

4. Use statistical tools to value, summarize, and analyze risk

Audience: Graduate

5. Differentiate the methods for managing risk: avoidance, risk control, retention, and transfer

Audience: Graduate

6. Judge the effectiveness of a risk management technique for particular risk or portfolio of risks

Audience: Graduate

7. Use statistical tools to demonstrate the benefits of risk pooling

Audience: Graduate

8. Explain the value that sound risk management provides individuals, organizations and society

Audience: Graduate

**R M I/GEN BUS 701 – MANAGING LEGAL RISKS**

3 credits.

Legal implications for business managers of selected areas of the law including negligence, contract, intellectual property, officer/director liability, financing the business enterprise, and employment and trade regulation; introduction to the legal process, including alternative dispute resolution systems.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**R M I 705 – RISK MANAGEMENT AND TECHNOLOGIES IN A DIGITAL AGE**

3 credits.

Develop insight into the principles of risk management, including institutions engaged in identifying, assessing, preventing, mitigating, and transferring risk. Specific focus is given to how the digitization of data, technology, and analytics are creating a new risk landscape, and how conventional risk management approaches can adapt to meet these emerging business needs.

**Requisites:** Graduate/professional standing. Not open to students with credit for R M I 300 or 700.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain risk, including differentiation from uncertainty, and frameworks for risk mitigation and management.

Audience: Graduate

2. Assess, quantify, and categorize emerging risk factors associated with the digital landscape, and how conventional management and mitigation strategies will have to adjust.

Audience: Graduate

3. Anticipate how insurance and risk management operations, institutions, markets, and regulation will evolve due to digital transformation.

Audience: Graduate

4. Support the development of novel risk management, mitigation, and transfer solutions supported by digital technology.

Audience: Graduate

**R M I 710 – RISK MANAGEMENT**

2 credits.

The purpose of risk management is to minimize the adverse consequences of variability. Topics include the general philosophy of risk management, environmental factors affecting risk, options to manage risk, and decision processes to select among those options.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**R M I 765 – CONTEMPORARY TOPICS**

1-4 credits.

Exploration of advanced subject areas possibly to be introduced into the business curriculum.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### R M I 799 – READING AND RESEARCH-RISK MANAGEMENT

1-6 credits.

Individual work suited to the needs of graduate students may be arranged.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### R M I 820 – ADVANCED TOPICS IN RISK MANAGEMENT

3 credits.

Examination of data collection and analysis methods for risk management decisions. Analysis of qualitative and quantitative data to support transfer, retention, and loss control decisions, including loss trending, and evaluation of regulatory controls.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply complex risk management and insurance concepts to solve real world business challenges.

Audience: Graduate

2. Demonstrate analytical and problem-solving skills.

Audience: Graduate

3. Exhibit capabilities to interact effectively with industry leaders.

Audience: Graduate

4. Deploy skills in leadership, project management, teamwork, communication, analytics, and strategy.

Audience: Graduate

5. Apply course concepts to a project with a large organization and present results to the client.

Audience: Graduate

### R M I 875 – SEMINAR-RISK MANAGEMENT AND INSURANCE

3 credits.

Applied learning in risk management and insurance.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply risk management and insurance concepts within an actual business context.

Audience: Graduate

2. Demonstrate analytical and problem-solving skills.

Audience: Graduate

3. Exhibit capabilities to interact effectively with industry members.

Audience: Graduate

4. Deploy skills in leadership, project management, teamwork, communication, analytics, and strategy.

Audience: Graduate

5. Apply course concepts to a project with a large organization and present results to the client.

Audience: Graduate

### R M I 920 – SEMINAR IN ACTUARIAL SCIENCE, RISK MANAGEMENT & INSURANCE I

3 credits.

Doctoral seminar in actuarial science, risk management and insurance with emphasis on developing an appreciation of existing literature and appropriate skills to conduct own scholarly work in the field.

**Requisites:** Graduate/professional standing or declared in graduate Business Exchange program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze and critique existing literature in actuarial science, risk management and insurance.

Audience: Graduate

2. Develop skills to conduct scholarly work that makes significant contributions to the body of knowledge in the field.

Audience: Graduate

### R M I 990 – RISK & INSURANCE INDEPENDENT RESEARCH PHD THESIS

1-12 credits.

Individual work to complete dissertation requirement of Ph.D. program.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## **R M I 999 – READING AND RESEARCH-RISK MANAGEMENT AND INSURANCE PHD**

1-6 credits.

Individual work suited to the needs of Ph.D. students may be arranged.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

## **SCANDINAVIAN STUDIES (SCAND ST)**

### **SCAND ST 101 – FIRST SEMESTER NORWEGIAN**

4 credits.

For beginning learners of Norwegian; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **SCAND ST 102 – SECOND SEMESTER NORWEGIAN**

4 credits.

For beginning learners of Norwegian; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** SCAND ST 101

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SCAND ST 111 – FIRST SEMESTER SWEDISH**

4 credits.

For beginning learners of Swedish; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **SCAND ST 112 – SECOND SEMESTER SWEDISH**

4 credits.

For beginning learners of Swedish; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** SCAND ST 111

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### **SCAND ST 121 – FIRST SEMESTER DANISH**

4 credits.

For beginning learners of Danish; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **SCAND ST 122 – SECOND SEMESTER DANISH**

4 credits.

For beginning learners of Danish; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** SCAND ST 121

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SCAND ST 131 – FIRST SEMESTER FINNISH**

4 credits.

For beginning learners of Finnish; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SCAND ST 132 – SECOND SEMESTER FINNISH

4 credits.

For beginning learners of Finnish; emphasis on proficiency through speaking, listening, reading, and writing, and on communication in cultural context.

**Requisites:** SCAND ST 131

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### SCAND ST 201 – SECOND YEAR NORWEGIAN

4 credits.

Reading of selections from Norwegian writers, grammar review and conversation.

**Requisites:** SCAND ST 102

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Communicate in intermediate language (increasingly complex conversations and short essays) through speaking and writing.

Audience: Undergraduate

2. Comprehend spoken and written texts in Norwegian, including a novel.

Audience: Undergraduate

3. Explore the intersections of language and culture in a Norwegian and Scandinavian context.

Audience: Undergraduate

4. Learn about various aspects of Norwegian culture, including how these compare to an American context.

Audience: Undergraduate

5. Develop strategies for studying language, which may apply to other fields of study.

Audience: Undergraduate

6. Deepen an understanding of language as a system, increasing appreciation for language in general, including their own language(s).

Audience: Undergraduate

### SCAND ST 202 – SECOND YEAR NORWEGIAN

4 credits.

Rapid reading of suitable Norwegian texts by modern writers.

**Requisites:** SCAND ST 201

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SCAND ST 211 – SECOND YEAR SWEDISH

4 credits.

Reading of selections from Swedish writers, grammar review and conversation.

**Requisites:** SCAND ST 112

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SCAND ST 212 – SECOND YEAR SWEDISH

4 credits.

Reading of selections from Swedish writers, grammar review and conversation.

**Requisites:** SCAND ST 211

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SCAND ST 221 – SECOND YEAR DANISH

4 credits.

Reading of selections from Danish writers, grammar review and conversation.

**Requisites:** SCAND ST 122

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SCAND ST 222 – SECOND YEAR DANISH

4 credits.

Reading of selections from Danish writers, grammar review and conversation.

**Requisites:** SCAND ST 221

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SCAND ST/FOLKLORE/MEDIEVAL 235 – THE WORLD OF SAGAS**

3 credits.

The Icelandic sagas viewed in their social, cultural, and literary contexts. An introduction to one of the greatest bodies of vernacular literature of the early Middle Ages.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, describe and analyze shifting geographic, cultural, and ethnic/racial factors in the Northern European region during the Viking Age, and put it into context  
Audience: Undergraduate

2. Identify and distinguish between different types of sources used in the study of the Nordic region during the Viking Age  
Audience: Undergraduate

3. Demonstrate a general understanding of major scholarly approaches, concepts and current research findings concerning the Nordic region during the Viking Age  
Audience: Undergraduate

4. Synthesize information, engage in discussion and research, and argue persuasively about key topics in the Nordic region during the Viking Age  
Audience: Undergraduate

5. Analyze the connections between images of the Vikings Age and the wider workings of modern culture  
Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline  
Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view  
Audience: Undergraduate

**SCAND ST 250 – INTRODUCTION TO SCANDINAVIA**

3 credits.

Provides an introductory survey of Scandinavia and Northern Europe. Approaches the source material by focusing on concepts such as environment and sustainability, nation, migration, diversity, family, childhood, happiness, and melancholy. Learn about modern and contemporary Northern European cultures through literature, film, television, music, and other media from Norway, Denmark, Sweden, Iceland, Finland, Sápmi, or the Baltic countries.

**Requisites:** None

**Course Designation:** Breadth – Humanities

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. gain a knowledge of contemporary Scandinavian, Northern Europe, and the Baltic region in a broad cultural, literary and social context  
Audience: Undergraduate

2. interpret specific literary texts, major figures, and ideas in Northern European cultures  
Audience: Undergraduate

3. develop skills for interpreting and writing about literary texts, films, and other media  
Audience: Undergraduate

4. investigate the Nordic and Baltic countries' roles and contributions as small nations in a globalizing world  
Audience: Undergraduate

**SCAND ST 251 – READINGS IN NORWEGIAN LITERATURE**

3-4 credits.

Prose, poetry, and drama read in Norwegian. Taught extensively in Norwegian.

**Requisites:** SCAND ST 202

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Frgn Lang – 5th + semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SCAND ST 261 – READINGS IN SWEDISH LITERATURE**

3-4 credits.

Prose, poetry, and drama read in Swedish. Taught extensively in Swedish.

**Requisites:** SCAND ST 212

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### SCAND ST 271 – READINGS IN DANISH LITERATURE

3-4 credits.

Prose, poetry, and drama read in Danish. Taught extensively in Danish.

**Requisites:** SCAND ST 222

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Frng Lang - 5th + semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

### SCAND ST 276 – CULTURE & COMMUNITY IN SCANDINAVIA

3 credits.

An extensive, wide-ranging introduction to the cultures of and community in the Scandinavian and Nordic Countries. Through a diverse series of guest lectures and discussions, explore the culture, arts, geography, history, religion, languages, music, literature, politics etc. of the Scandinavian countries.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Gain the ability to identify and understand the various categories of information given about Scandinavia.

Audience: Undergraduate

2. Analyze and discuss the important features of the categories of information presented.

Audience: Undergraduate

3. Compose and produce writing that applies the concepts introduced to describe, analyze, and differentiate the categories, knowledge, and readings in the class.

Audience: Undergraduate

4. Place Scandinavia in a historical context from Early Stone Age to Contemporary Times.

Audience: Undergraduate

5. Demonstrate profound knowledge of The Scandinavian Countries in a cultural, historical, political, financial, literary, artistic, educational, and diverse setting.

Audience: Undergraduate

### SCAND ST 299 – DIRECTED STUDY

1-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### SCAND ST/LITTRANS 320 – THE NORDIC CHILD

3 credits.

Astrid Lindgren's Pippi Longstocking is an icon of childhood in the Nordic countries and beyond. Pippi has come to symbolize the Nordic "autonomous" child par excellence. Takes up a diverse selection of books and films that represent both the common ideas of the Nordic Child, as well as various elaborations of and exceptions to the idealized norm. Examines a number of the prevalent forms and themes in Nordic children's culture, such as nature, play, school, sexuality, death, loss, and storytelling.

**Requisites:** Satisfied Communications A requirement or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate an informed understanding of diverse Nordic childhoods and how these are represented in a variety of texts.

Audience: Both Grad & Undergrad

2. Build and show skills of creative and critical thinking, historical thinking, and literary and media analysis through class discussion, short writing assignments, and formal papers.

Audience: Both Grad & Undergrad

3. Develop and demonstrate skills of literary analysis by interpreting texts in multiple genres--including novels, tales, and short stories--in class discussion and especially in writing.

Audience: Both Grad & Undergrad

4. Demonstrate and apply knowledge of current scholarship in the fields of children's literature, childhood studies, and Nordic literary studies in class discussion and formal papers.

Audience: Graduate

**SCAND ST/FOLKLORE/MEDIEVAL/RELIG ST 342 – NORDIC MYTHOLOGY**

3 credits.

Mythology, literature, ritual, traditions, medieval folklore, and religion from Nordic areas and Scandinavia.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize, describe and analyze cultural phenomena, specifically pre-Christian Nordic Religion, and put it into context.

Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning medieval Nordic mythology and religion.

Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.

Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.

Audience: Undergraduate

6. Guide, mentor and support peers to achieve excellence in practice of the discipline.

Audience: Undergraduate

7. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view

Audience: Undergraduate

**SCAND ST/FOLKLORE/LITTRANS/MEDIEVAL 345 – THE NORDIC STORYTELLER**

3 credits.

Exploring the oral nature and performance traditions of folklore, ethnography, tales and ballads, literature and culture from Nordic areas and Scandinavia.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize, describe and analyze cultural phenomena, specifically Nordic Narrative, and put it into context.

Audience: Undergraduate

2. Demonstrate an understanding of the major theories, approaches, concepts and current research findings concerning Nordic Narrative and folklore studies.

Audience: Undergraduate

3. Synthesize the written and material information and use insight and creativity to demonstrate an understanding of the knowledge base from the field.

Audience: Undergraduate

4. Communicate effectively through written essays, oral presentations and discussion.

Audience: Undergraduate

5. Retrieve, analyze, and interpret the professional and lay literature providing information to both professionals and public.

Audience: Undergraduate

6. Work in multi-disciplinary teams to analyze the cultural material from various disciplinary points of view.

Audience: Undergraduate

### SCAND ST 348 – THE SECOND WORLD WAR IN NORDIC CULTURE

3 credits.

How have the wartime issues of occupation, resistance, collaboration, neutrality, and the Holocaust been addressed in Nordic culture? During the Second World War, Norway and Denmark were invaded and occupied by Nazi Germany, while Sweden remained neutral and Finland fought against the Soviet Union. Resistance movements developed in the occupied countries, but some Norwegians and Danes collaborated with the occupying power and were tried for treason after the war. Become familiar with the basic history of the period by reading texts of various sorts (essays, novels, diaries, poetry, memoir) that were written during the war years and since. Through analyzing films and works of fiction, in addition to historical writing, learn how the Second World War and the Holocaust have been represented and remembered in the Nordic countries.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain the history of the Nordic region during the Second World War, including the key differences between the war experiences of each Nordic country  
Audience: Both Grad & Undergrad

2. Analyze literary, historical, and cultural texts in terms of how they address and represent issues such as occupation, collaboration, resistance, neutrality, Nazism, and the Holocaust  
Audience: Both Grad & Undergrad

3. Interpret how films and memoirs reflect and embody cultural memories of war and occupation, and how they address social and historical issues related to the Second World War  
Audience: Both Grad & Undergrad

4. Conduct research about the Second World War, the Holocaust, and the Nordic countries using English-language sources  
Audience: Both Grad & Undergrad

5. Conduct research about the Second World War, the Holocaust, and the Nordic countries using Nordic-language sources (Swedish, Danish, Norwegian, or Finnish)  
Audience: Graduate

### SCAND ST 355 – AUTOBIOGRAPHY

3 credits.

Investigate the genre of autobiography in historical, cultural, and literary contexts, with a highlight of Nordic authors. Analyze autobiographical writing in the context of race, ethnicity, gender, and sexuality, while problematizing concepts such as "fiction," "truth" and "self."

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain autobiography as a genre in a historical, a cultural, and a literary context.

Audience: Both Grad & Undergrad

2. Apply theoretical terms to the analysis of autobiographies and autobiographical acts.

Audience: Both Grad & Undergrad

3. Historicize and contextualize concepts such as "fiction" "self" and "truth."

Audience: Both Grad & Undergrad

4. Analyze the complex relationship between form and content.  
Audience: Both Grad & Undergrad

5. Interpret autobiography in relation to gendered and racialized myths and models of national identity.  
Audience: Both Grad & Undergrad

6. Understand how autobiography pervades contemporary culture across media and materialities.  
Audience: Both Grad & Undergrad

7. Enter into dialogue with autobiographical theory and conduct independent research on autobiographical writing.  
Audience: Graduate

### SCAND ST 373 – MASTERPIECES OF SCANDINAVIAN LITERATURE: FROM THE MIDDLE AGES TO 1900

3-4 credits.

During the late Middle Ages, Scandinavian literature reached its first high point: The Old Norse sagas and poems. Study Scandinavian literature from the sagas to the prose and drama of the golden age of the late 19th century.

**Requisites:** SCAND ST 202, 212, or 222

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

### SCAND ST 374 – MASTERPIECES OF SCANDINAVIAN LITERATURE: THE TWENTIETH CENTURY

3-4 credits.

Through a selection of short texts, novels, and plays, we'll be learning from some of the best: Nobel Laureates (Knut Hamsun, Pär Lagerkvist), medical doctors (P.C. Jersild), and other provocateurs (August Strindberg, Isak Dinesen, Ingmar Berman, Peter Hoeg, and the rest).

**Requisites:** SCAND ST 202, 212, or 222

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SCAND ST 401 – CONTEMPORARY SCANDINAVIAN LANGUAGES

3 credits.

Intensive work in spoken and written Danish, Norwegian, and Swedish, based on contemporary readings.

**Requisites:** SCAND ST 251, 261, 271, or graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### SCAND ST 404 – LANGUAGES OF NORTHERN EUROPE

2-4 credits.

Introduction to languages of Northern Europe not covered by other department courses (e.g., Sami, Estonian). Practice in language, accompanied by introduction to grammar, culture, and literature. Other language-related topics offered occasionally; check timetable for details.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### SCAND ST/MEDIEVAL 407 – INTRODUCTORY OLD NORSE

3 credits.

Designed with a linguistic purpose: to obtain a reading knowledge of Old Norse-Icelandic through the study of Old Icelandic grammar and selections of Old Norse-Icelandic texts.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate a basic understanding of Old Norse-Icelandic phonology and grammar with a focus on nominal and verbal inflection.

Audience: Undergraduate

2. Read and understand basic Old Norse-Icelandic texts in normalized editions and access more challenging texts with the help of a dictionary.  
Audience: Undergraduate

3. Identify the characteristic features of the various genres of Old Norse-Icelandic texts.  
Audience: Undergraduate

### SCAND ST/MEDIEVAL 408 – INTERMEDIATE OLD NORSE

3 credits.

Designed with a linguistic purpose: to obtain a reading knowledge of Old Norse-Icelandic through the study of Old Icelandic grammar and selections of Old Norse-Icelandic texts.

**Requisites:** SCAND ST/MEDIEVAL 407

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate sufficient knowledge of Old Norse-Icelandic grammar and vocabulary to read Old Norse-Icelandic texts.  
Audience: Undergraduate

2. Read and understand basic Old Norse-Icelandic texts in normalized editions and access more challenging texts with the help of a dictionary.  
Audience: Undergraduate

### SCAND ST/MEDIEVAL 409 – SURVEY OF OLD NORSE-ICELANDIC LITERATURE

3 credits.

Eddic and skaldic poetry; homilies and saints' lives, kings' sagas, sagas of the Icelanders; mythical-heroic sagas and romances; rimur.

**Requisites:** MEDIEVAL/SCAND ST 407 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SCAND ST 410 – INTRODUCTION TO SCANDINAVIAN LINGUISTICS**

3 credits.

Scandinavia as a linguistic area. The main historical developments and structural features of the Scandinavian languages.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SCAND ST 411 – AREAS IN SCANDINAVIAN LITERATURE**

1 credit.

Concentrated study of topics within Scandinavian literature.

**Requisites:** SCAND ST 251, 261, 271, or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SCAND ST 415 – HISTORY OF THE SCANDINAVIAN LANGUAGES II: STANDARD LANGUAGES**

3 credits.

Study of Scandinavian languages from the early Scandinavian period to the present day.

**Requisites:** Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**SCAND ST 419 – SCANDINAVIAN CHILDREN'S LITERATURE**

4 credits.

Forms and themes of Scandinavian children's literature from the nineteenth century to the present. Exploration of the dominant concerns of authors, adult and non-adult audiences. Film adaptations and Scandinavian-American materials included.

**Requisites:** Junior standing and SCAND ST 202, 212, or 222, or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SCAND ST 421 – ADVANCED TOPICS IN NORDIC STUDIES**

1-3 credits.

Study of topics in Nordic and Nordic-American history, culture, and/or folklore.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**SCAND ST 422 – THE DRAMA OF HENRIK IBSEN**

4 credits.

Intensive study of dramatic production and the part played by Ibsen as the founder of modern drama.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**SCAND ST 424 – NINETEENTH-CENTURY SCANDINAVIAN FICTION**

3-4 credits.

Readings in such authors as Hans Christian Andersen, Steen Steensen Blicher, C.J.L. Almquist, Alexis Kivi, Bjornstjerne Bjornson, Jonas Lie, Alexander Kielland, Jens Peter Jacobsen, Henrik Pontoppidan, August Strindberg, Selma Lagerlof, and Johs V. Jensen.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SCAND ST 426 – KIERKEGAARD AND SCANDINAVIAN LITERATURE

3 credits.

An introduction to Danish philosopher Søren Kierkegaard and existentialism in Scandinavian literature. An overview into Kierkegaard's work in translation and his influence on a number of Scandinavian writers from the 19th century to the 21st.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Explain the basic tenet of Kierkegaard's philosophy

Audience: Both Grad & Undergrad

2. Apply his philosophy to the reading of other writers.

Audience: Both Grad & Undergrad

3. Historicize existentialism.

Audience: Both Grad & Undergrad

4. Analyze literary works with an existential perspective.

Audience: Both Grad & Undergrad

5. Interpret discourses of existentialism across different medias.

Audience: Both Grad & Undergrad

6. Enter into dialogue with existing Kierkegaard scholarship and conduct independent research on literary existentialism.

Audience: Graduate

### SCAND ST 427 – CONTEMPORARY SCANDINAVIAN LITERATURE

4 credits.

Twentieth-century literary traditions and experiments, with attention to major movements, genres, and authors.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### SCAND ST/LITTRANS 428 – MEMORY AND LITERATURE FROM PROUST TO KNAUSGARD

3 credits.

Investigates the relations between theories of memory, both individual and collective, and modern literary representations of remembering.

Survey seminal conceptions of memory in the interdisciplinary field of memory studies, investigating topics such as nostalgia, trauma, personal and cultural identity, war and Holocaust, sites of memory, and autobiographical narrative. Through the avenues opened up by these theoretical frameworks, consider the narrative forms as well as the ethical and political dimensions of remembering in major novels by Marcel Proust, W. G. Sebald, and Karl Ove Knausgard.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### SCAND ST/MEDIEVAL 430 – THE VIKINGS

4 credits.

Within a historical framework, a thorough introduction to the culture, literature, and religion of the Vikings.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2022

### SCAND ST/HISTORY 431 – HISTORY OF SCANDINAVIA TO 1815

3 credits.

Political, social, economic, and cultural developments of Scandinavia through the "Viking Age" to the break-up of Sweden-Finland and Denmark-Norway; emphasis on the interplay between social and political forces and institutions and the area's relationship with the rest of Europe.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SCAND ST/HISTORY 432 – HISTORY OF SCANDINAVIA SINCE 1815**  
3 credits.

Political, social, economic, and cultural development: political realignments and rise of nationalism, industrialization and rise of liberalism and socialism, democratization, independence struggles and social conflict, evolution of welfare states, World War II and its aftermath.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Either Humanities or Social Science Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the significance of major historical events, figures, processes, and periods in the Nordic region since 1815.

Audience: Both Grad & Undergrad

2. Analyze modern and contemporary Scandinavian culture, politics, and society from an informed historical perspective.

Audience: Both Grad & Undergrad

3. Interpret historical information, engage in discussion and debate, and argue persuasively about significant topics in the Nordic history.

Audience: Both Grad & Undergrad

4. Graduate students will be able to do all of the above with reference to a larger amount of academic scholarship and secondary literature written in both English and the Nordic languages.

Audience: Graduate

**SCAND ST 434 – THE ART OF ISAK DINESEN/KAREN BLIXEN**  
4 credits.

Blixen's tales and biographical fiction; themes of gender, power, dreams, and love.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**SCAND ST/LITTRANS 435 – THE SAGAS OF ICELANDERS IN ENGLISH TRANSLATION**  
3 credits.

The prose narratives of medieval Iceland. Gain an understanding of saga literature as a genre and of the cultural history of Iceland in the Viking Era and the Middle Ages, based on the interplay between pagan codes of honor and Christian ethics. In addition, gain an understanding of the methodological problems involved in studying sagas as historical documents.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Demonstrate understanding of approaches, concepts, and current and classical findings in the area of concentration.

Audience: Undergraduate

2. Appropriately apply major theories in terms of analyzing Old Norse-Icelandic texts.

Audience: Undergraduate

3. Analyze Old Norse-Icelandic texts, especially with a view to historical knowledge and jurisprudence.

Audience: Undergraduate

**SCAND ST 436 – TOPICS IN SCANDINAVIAN LITERATURE**  
3-4 credits.

An examination of selected topics in Scandinavian literature.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SCAND ST/GEN&WS/LITTRANS 438 – SEXUAL POLITICS IN SCANDINAVIA**

3 credits.

Read and discuss works by Scandinavian writers of the nineteenth and twentieth century reflecting sexual politics and the roles of women in literature. Course taught in English.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify and understand the categories depicting sexual politics and the position of women in Scandinavia as portrayed through various works of literature

Audience: Undergraduate

2. Analyze and discuss the important features characterizing sexual politics and the position of women in Scandinavia as portrayed through various works of literature

Audience: Undergraduate

3. Compose and produce writing that applies the concepts introduced to describe, analyze, and differentiate sexual politics and the position of women as portrayed through various works of literature about Scandinavian women.

Audience: Undergraduate

### **SCAND ST 439 – NORDIC FILMMAKERS**

3 credits.

Analyze English translations of key works by Nordic filmmakers as well as theories, histories, and the changing meaning of film authorship in the Nordic region.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Recognize and describe the central issues at stake in the works of a selection of Nordic filmmakers

Audience: Both Grad & Undergrad

2. Understand critical texts about film authorship and film analysis, and incorporate these readings to discussing film in the Nordic region

Audience: Both Grad & Undergrad

3. Demonstrate a basic vocabulary of film analysis to guide close readings, analysis and arguments

Audience: Both Grad & Undergrad

4. Analyze a selection of Nordic films using a variety of methods common within cinema and Scandinavian studies

Audience: Both Grad & Undergrad

5. Discuss and write critically about film and film authorship in the Nordic region

Audience: Both Grad & Undergrad

6. Demonstrate an understanding of theoretical frameworks in cinema and other relevant studies

Audience: Graduate

7. Incorporate and communicate relevant theoretical frameworks effectively to guide critical discussion and analysis of selected films

Audience: Graduate

### **SCAND ST/FOLKLORE 440 – SCANDINAVIAN AMERICAN FOLKLORE**

3 credits.

Examines the verbal, musical, customary, and material folklore of Scandinavian Americans, with emphasis on the upper Midwest.

**Requisites:** Junior standing

**Course Designation:** Breadth – Humanities

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**SCAND ST/FOLKLORE 443 – SAMI CULTURE, YESTERDAY AND TODAY**

4 credits.

Interdisciplinary study of Sami (Lapp) people of Scandinavia past and present. Indigenous modes of expression and worldview, contemporary cultural and political activism. Extensive discussion of connections to Native American and Inuit experiences; rise of U.S. and other indigenous peoples' movements.

**Requisites:** Junior standing**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SCAND ST/MEDIEVAL 444 – KALEVALA AND FINNISH FOLKLORE**

4 credits.

Kalevala - the national epic of Finland - and the oral literature of Finland.

**Requisites:** Junior standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2022**SCAND ST/FOLKLORE/MEDIEVAL 446 – CELTIC-SCANDINAVIAN CULTURAL INTERRELATIONS**

3 credits.

Examination of shared traditions and historical connections between the North and Northwest of Europe. Readings of medieval and pre-modern Scandinavian, Scottish, Welsh and Irish sagas, histories, tales. Discussion of the role of folklore in modern Celtic and Scandinavian societies.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2022**SCAND ST 450 – SCANDINAVIAN DECADENCE IN ITS EUROPEAN CONTEXT**

3-4 credits.

Examines the European context of literary decadence (Baudelaire, Huysmans, Wilde) and how it inspired some of Scandinavia's most important writers (Strindberg, Hamsun, Jacobsen).

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SCAND ST 475 – THE WRITINGS OF HANS CHRISTIAN ANDERSEN FOR SCANDINAVIAN MAJORS**

4 credits.

In-depth discussion of selected texts, historical and literary background material, application and discussion of pertinent literary criticism.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**SCAND ST 476 – SCANDINAVIAN LIFE AND CIVILIZATION II**

4 credits.

Scandinavian culture in all its aspects ranging from past history up to contemporary trends in politics and ideologies.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2019**SCAND ST 510 – TOPICS IN SCANDINAVIAN LINGUISTICS**

3 credits.

Hands-on introduction to a topic in Scandinavian language study.

**Requisites:** Graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2022

**SCAND ST 511 – PALEOGRAPHY AND PHILOLOGY - OLD NORSE**

3 credits.

A history of writing in Iceland 1150-1550 on the basis of manuscripts as principal sources of evidence for Old Norse-Icelandic.

**Requisites:** MEDIEVAL/SCAND ST 407 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**SCAND ST 520 – SPECIAL TOPICS**

3 credits.

Special topics in Scandinavian culture, literature, and linguistics.

**Requisites:** Junior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**SCAND ST/HISTORY 577 – CONTEMPORARY SCANDINAVIA: POLITICS AND HISTORY**

3-4 credits.

Social, economic, and ideological changes, institutions, and movements and their relationships with the political processes and structures in the Nordic states.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**SCAND ST 634 – SURVEY OF SCANDINAVIAN LITERATURE:****1500-1800**

3 credits.

Survey representative literary texts from Scandinavia spanning through Reformation, Renaissance, Baroque, Rococo and Pre-Romanticism, including historical context.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Comprehend, and employ various approaches to interpreting and creating cultural artifacts, in particular, representative Scandinavian literary texts from 1500 to 1800.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge of major movements, trends, or events in the development of world cultures, in particular, Reformation, Renaissance, Baroque, Rationalism, Rococo, Pre-Romanticism.

Audience: Both Grad & Undergrad

3. Demonstrate an appreciation of the complexities of the interpretative process within historical and cultural contexts

Audience: Both Grad & Undergrad

4. Apply critical approaches to the works and alternative ways of considering them

Audience: Both Grad & Undergrad

5. Think critically about and appreciate the complexities of one's own culture and larger global communities

Audience: Both Grad & Undergrad

6. Make use of and improve Nordic language skills.

Audience: Both Grad & Undergrad

7. Articulate research problems, potentials, and limits with respect to theory, knowledge, or practice within the fields of literary scholarship surrounding the Baroque and Rococo.

Audience: Graduate

8. Create research and scholarship that makes a substantive contribution.

Audience: Graduate

9. Be prepared for the M.A. exam in Scandinavian Literature and Culture.

Audience: Graduate

**SCAND ST 635 – SURVEY OF SCANDINAVIAN LITERATURE:  
1800-1890**

3 credits.

Survey representative literary texts from Scandinavia spanning eras including Romanticism, Realism, and Naturalism; includes historical context.

**Requisites:** SCAND ST 202, 212, 222 or graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SCAND ST 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**SCAND ST 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**SCAND ST 698 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 1991

**SCAND ST 699 – DIRECTED STUDY**

1-6 credits.

Advanced directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SCAND ST 710 – TOPICS IN DEPTH**

1-2 credits.

Penetrating study of an important Scandinavian literary or linguistic topic.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**SCAND ST 799 – INDEPENDENT STUDY**

1-6 credits.

Faculty-guided in depth study of a topic.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SCAND ST 901 – SEMINAR IN SPECIAL TOPICS**

2-3 credits.

In-depth study of topic of faculty's choice.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SCAND ST 990 – RESEARCH AND THESIS**

1-6 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**SCAND ST 999 – INDEPENDENT READING**

1-6 credits.

Advanced level mentored reading and research for students with dissertator status.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2011

# SCIENCE AND TECHNOLOGY STUDIES (STS)

## STS 201 – WHERE SCIENCE MEETS SOCIETY

3 credits.

An overview of science and technology studies. Explores science and technology as central institutions in modern societies. Teaches approaches to analyzing social dimensions of recent advances in areas such as genetics, environment, Internet, surveillance, and nanotechnology..

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Either Humanities or Social Science Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## STS 699 – DIRECTED STUDY

1-3 credits.

Advanced directed study projects as arranged with a faculty member. Requires completion of STS 201.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

## STS/CURRIC 733 – PUBLIC ENGAGEMENT WITH SCIENCE

3 credits.

Examines the influence of science in everyday life. Provides both academic context (research and theory) and a firsthand look at how science matters to people who are not themselves scientists.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify and critique common claims about the importance and value of science literacy, public understanding of science, and public engagement with science

Audience: Graduate

2. Describe the different ways in which researchers have attempted to measure and otherwise evaluate science literacy etc.

Audience: Graduate

3. Understand and be able to recognize the implications of social and cultural forces that shape particular episodes of public engagement with science.

Audience: Graduate

4. Describe and discuss the complex relevance of science in one particular public setting.

Audience: Graduate

5. Discuss the merits and challenges associated with common strategies for improving public engagement with science through formal education, museums, and sponsored outreach activities.

Audience: Graduate

## STS/CURRIC 734 – SCIENCE STUDIES AND SCIENCE EDUCATION

3 credits.

Examination of the key ideas from the field of science and technology studies (history, philosophy, sociology of science, etc.) and how they have been taken up in both the school science curriculum as well as the science education research community.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

## STS 901 – SCIENCE, TECHNOLOGY AND MEDICINE IN SOCIETY

3 credits.

Key themes, issues and scholarship in the interdisciplinary fields of science and technology studies. Explores how different disciplinary perspectives contribute to and influence the questions, methods and theoretical approaches within particular fields of science studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### STS 902 – CURRENT TOPICS IN SCIENCE AND TECHNOLOGY STUDIES

1 credit.

Key themes, issues and scholarship in the interdisciplinary field of science and technology studies (STS). Participating faculty and speakers will be drawn from the social sciences, humanities, and physical and life sciences.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### STS 903 – SPECIAL TOPICS IN SCIENCE AND TECHNOLOGY STUDIES

3 credits.

An interdisciplinary exploration of one or more high profile issues motivated debate and discussion among science and technology studies scholars.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

### STS 999 – INDEPENDENT STUDY IN SCIENCE AND TECHNOLOGY STUDIES

1-6 credits.

Independent study as arranged with a faculty member. Topics, readings, assignments and meetings will be outlined in a student-faculty "contract."

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

## SENIOR MEDICAL PROGRAM (SR MED)

### SR MED 913 – EXTRAMURAL ELECTIVE-PREVENTIVE MEDICINE

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

### SR MED 921 – EXTRAMURAL ELECTIVE-ANESTHESIOLOGY

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### SR MED 922 – EXTRAMURAL ELECTIVE-FAMILY MEDICINE

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### SR MED 923 – EXTRAMURAL ELECTIVE-HUMAN ONCOLOGY

1-26 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

### SR MED 924 – EXTRAMURAL ELECTIVE-MEDICINE

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### SR MED 925 – EXTRAMURAL ELECTIVE-NEUROLOGY

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SR MED 926 – EXTRAMURAL ELECTIVE-OBSTETRICS AND GYNECOLOGY**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SR MED 927 – EXTRAMURAL ELECTIVE-OPHTHALMOLOGY**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SR MED 928 – EXTRAMURAL ELECTIVE-PATHOLOGY**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SR MED 929 – EXTRAMURAL ELECTIVE-PEDIATRICS**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SR MED 931 – EXTRAMURAL ELECTIVE-PSYCHIATRY**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SR MED 932 – EXTRAMURAL ELECTIVE-RADIOLOGY**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SR MED 933 – EXTRAMURAL ELECTIVE-REHABILITATION MEDICINE**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SR MED 934 – EXTRAMURAL ELECTIVE-SURGERY**

1-44 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SR MED 935 – EXTRAMURAL ELECTIVE-PRIMARY CARE**

1-16 credits.

Individually arranged elective for Phase 3 outside of the UW Madison Statewide Campus. Engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SR MED 936 – EXTRAMURAL ELECTIVE-EMERGENCY MEDICINE**

2-12 credits.

Clinical elective for fourth year medical students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SR MED 937 – EXTRAMURAL ELECTIVE CLERKSHIP IN INTERNATIONAL HEALTH**

1-8 credits.

One to eight week elective as a site outside the U.S. Students will engage in the provision of primary or specialty patient care in ambulatory and/or hospital settings. May include community public health, prevention, and health education learning activities.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**SR MED 951 – TRAINING IN URBAN MEDICINE AND PUBLIC HEALTH (TRIUMPH) I: SEMINAR AND PROJECTS**

2 credits.

Introduces third year students to health disparities in Milwaukee and community and public health improvement projects. Students will devote four hours per week to projects under the guidance of community mentors and faculty.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SR MED 953 – TRAINING IN URBAN MEDICINE AND PUBLIC HEALTH (TRIUMPH) II: MILWAUKEE**

2 credits.

Introduces third year medical students to the communities, neighborhoods, healthcare systems and public health initiatives in Milwaukee.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SR MED 955 – TRAINING IN URBAN MEDICINE AND PUBLIC HEALTH (TRIUMPH) III: LEADERSHIP**

2 credits.

Provides fourth year medical students with advanced leadership skill building exercises to address community and public health challenges in Milwaukee.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SR MED 957 – TRAINING IN URBAN MEDICINE AND PUBLIC HEALTH (TRIUMPH) IV: ADVANCED SEMINAR**

2 credits.

A continuation of TRIUMPH I (SR MED 951) that will enable fourth year medical students to explore and address health disparities and to complete a community or public health improvement project with colleagues in Milwaukee.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

## SLAVIC (SLAVIC LANGUAGES) (SLAVIC)

**SLAVIC 101 – FIRST SEMESTER RUSSIAN**

4 credits.

Introduction to speaking, listening, reading and writing in Russian, with an introduction to Russian culture.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**SLAVIC 102 – SECOND SEMESTER RUSSIAN**

4 credits.

Introduction to speaking, listening, reading and writing in Russian, with an introduction to Russian culture.

**Requisites:** SLAVIC 101**Course Designation:** Frgn Lang - 2nd semester language course Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**SLAVIC 105 – FIRST SEMESTER UKRAINIAN**

3 credits.

An introduction to the basics of the Ukrainian language and culture. Acquire elementary Ukrainian language skills in the four main areas: reading, writing, listening, and speaking. Pronunciation, formal/informal language, and colloquialisms.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. read and write simple texts in Ukrainian

Audience: Undergraduate

2. initiate, sustain and close a conversation in Ukrainian, on a variety of everyday topics

Audience: Undergraduate

3. understand how the grammar of the language contributes to the clarity of written and spoken communication

Audience: Undergraduate

4. acquire basic sociolinguistic and pragmatic proficiency in Ukrainian

Audience: Undergraduate

5. develop a metalinguistic understanding of Ukrainian grammar and learn to successfully apply it in practice

Audience: Undergraduate

6. gain an understanding of a variety of aspects of the Ukrainian language and Ukrainian culture in general

Audience: Undergraduate

**SLAVIC 111 – FIRST SEMESTER POLISH**

4 credits.

Introduction to speaking, listening, reading and writing in Polish, with an introduction to Polish culture.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SLAVIC 112 – SECOND SEMESTER POLISH**

4 credits.

Introduction to speaking, listening, reading and writing in Polish, with an introduction to Polish culture.

**Requisites:** SLAVIC 111**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 115 – FIRST SEMESTER CZECH**

4 credits.

Introduction to speaking, listening, reading and writing in Czech, with an introduction to Czech culture.

**Requisites:** None**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**SLAVIC 116 – SECOND SEMESTER CZECH**

4 credits.

Introduction to speaking, listening, reading and writing in Czech, with an introduction to Czech culture.

**Requisites:** SLAVIC 115**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**SLAVIC 117 – INTENSIVE SECOND YEAR RUSSIAN**

4 credits.

Intensive development of speaking, listening, reading and writing skills in Russian, with continued study of Russian culture.

**Requisites:** SLAVIC 102**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Build upon previous skills in Russian speaking, listening, reading, and writing, in everyday situations and contexts

Audience: Undergraduate

2. Navigate travel and daily life in a Russian-speaking community

Audience: Undergraduate

3. Recall important Russian cultural figures and events

Audience: Undergraduate

4. Read excerpts of famous Russian literature

Audience: Undergraduate

5. Write short written compositions on the topics covered

Audience: Undergraduate

### SLAVIC 118 – INTENSIVE SECOND YEAR RUSSIAN

4 credits.

Intensive development of speaking, listening, reading and writing skills in Russian, with continued study of Russian culture.

**Requisites:** SLAVIC 117

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Build upon previous skills in Russian speaking, listening, reading, and writing, in everyday situations and contexts

Audience: Undergraduate

2. Navigate travel and daily life in a Russian-speaking community

Audience: Undergraduate

3. Recall important Russian cultural figures and events

Audience: Undergraduate

4. Read excerpts of famous Russian literature

Audience: Undergraduate

5. Write short written compositions on the topics covered

Audience: Undergraduate

### SLAVIC 141 – FIRST SEMESTER SERBO-CROATIAN

3 credits.

Introduction to primary language (speaking, listening, reading and writing) in Serbo-Croatian.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### SLAVIC 142 – SECOND SEMESTER SERBO-CROATIAN

3 credits.

Introduction to primary language (speaking, listening, reading and writing) in Serbo-Croatian.

**Requisites:** SLAVIC 141

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### SLAVIC 203 – THIRD SEMESTER RUSSIAN

4 credits.

Development of speaking, listening, reading and writing skills in Russian, with continued study of Russian culture.

**Requisites:** SLAVIC 102

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SLAVIC 204 – FOURTH SEMESTER RUSSIAN

4 credits.

Development of speaking, listening, reading and writing skills in Russian, with continued study of Russian culture.

**Requisites:** SLAVIC 203

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SLAVIC 207 – THIRD SEMESTER POLISH

4 credits.

Development of speaking, listening, reading and writing skills in Polish, with continued study of Polish culture.

**Requisites:** SLAVIC 112

**Course Designation:** Frgn Lang - 3rd semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SLAVIC 208 – FOURTH SEMESTER POLISH

4 credits.

Development of speaking, listening, reading and writing skills in Polish, with continued study of Polish culture.

**Requisites:** SLAVIC 207

**Course Designation:** Frgn Lang - 4th semester language course  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SLAVIC/LITTRANS 215 – LOVE AND DEATH: INTRODUCTION TO POLISH LITERATURE & CULTURE

3 credits.

Examines major traditions, narratives, and ideas that have shaped Polish literature and culture from their beginnings to World War II. Gain broad and contextualized knowledge of Polish civilization by closely reading and analyzing literary and cultural texts in their historical context. Course contents are organized into four major paradigms: Christianity, Sarmatism, Romanticism, and Modernity.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. identify and describe the main characteristics of various literary and cultural texts in Polish (and European) culture;

Audience: Undergraduate

2. define major themes, concepts, events, and ideas that shape Poland's literary and cultural history;

Audience: Undergraduate

3. analyze literary texts in their historical context using basic tools of literary analysis (genres, critical concepts, etc.)

Audience: Undergraduate

4. develop, compare, and effectively express ideas about literary texts and their underlying semantic structures;

Audience: Undergraduate

### SLAVIC 217 – THIRD SEMESTER CZECH

4 credits.

Development of speaking, listening, reading and writing skills in Czech.

**Requisites:** SLAVIC 116

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### SLAVIC 218 – FOURTH SEMESTER CZECH

4 credits.

Development of speaking, listening, reading and writing skills in Czech.

**Requisites:** SLAVIC 217

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### SLAVIC 231 – HISTORY AND ETHICS ON FILM: POLISH CINEMA

3 credits.

What constitutes heroism in the absence of universally shared moral frameworks? Who are we as individuals? What responsibility do we have for the way we represent reality to ourselves and to others? What constitutes "good life"? Engage with these questions and examine Polish cinematic tradition from the so-called Polish Film School to the present. Explore key works, themes, and creators of Polish cinema, and probe the ethical and existential dimensions these films open up. Consider various challenges faced by individuals when they lose connection to social, national, political, religious, and existential frameworks that used to define their identity, along with the strategies -- successful or not -- for maintaining one's selfhood and moral integrity in such crises

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. understand the idea of film as an art form engaged in ethical problems

Audience: Undergraduate

2. identify, analyze, and evaluate ways through which films address and attempt to resolve ethical challenges

Audience: Undergraduate

3. analyze films from the ethical perspective using a variety of critical methodologies

Audience: Undergraduate

4. recognize and explain the central themes and developments of Polish cinematic tradition

Audience: Undergraduate

5. discuss film's position in Poland's shifting social, cultural, and political landscape

Audience: Undergraduate

6. develop, compare, and effectively express ideas about films and their underlying semantic structures

Audience: Undergraduate

### SLAVIC/LITTRANS 238 – LITERATURE AND REVOLUTION

3 credits.

Take a literary journey from St. Petersburg to Moscow, following the shifting cultural and political currents in Russia from the years preceding the 1917 Revolution to the rise of Stalinism in the 1930s. Topics in translation will include: revolutionary violence and terror, civil war and emigration, Futurism and the birth of Russian avant-garde art, Soviet feminism and the engineering of the "New Man," technological utopias and totalitarian dystopias, literature and early Soviet economic policy.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Conduct close readings of literary texts that take into consideration both form and content.

Audience: Undergraduate

2. Acquire a greater awareness of another culture and become more adept at engaging with perspectives and ways of thinking that are different from the student's own.

Audience: Undergraduate

3. Develop a sensitivity to the way texts and ideas are rooted in their unique historical and political contexts, while having a life span that stretches far beyond them.

Audience: Undergraduate

### SLAVIC 239 – PERFORMANCE AND POWER

3 credits.

What does it mean "to perform" and what does performance do? How does performance help impose or challenge oppressive structures of power? Focusing on artists and authors like Sergei Eisenstein, Bertold Brecht, Marina Abramovic, and Pussy Riot, learn about political theater in the 20th and 21st centuries, the emergence and evolution of performance art and art actionism, the aesthetic and juridical functions of documentary theater and film, and the recent performative turn in New Left poetry.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Build the necessary historical and theoretical foundation for analyzing a broad range of performances and other artistic works through discussion of critical and theoretical readings.

Audience: Undergraduate

2. Acquire a greater awareness of other cultures and become more adept at engaging with perspectives and ways of thinking that are different from their own.

Audience: Undergraduate

3. Consider and describe the ways that ideas and works of art are rooted in their unique cultural and political contexts, while having a life span that stretches far beyond them.

Audience: Undergraduate

### SLAVIC 242 – LITERATURES AND CULTURES OF EASTERN EUROPE

3 credits.

Introduction to the literature, culture and art of Eastern Europe.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**SLAVIC 243 – CONTEMPORARY RUSSIA: HISTORY, POLITICS, AND CULTURE**

3 credits.

Post-Soviet Russia has been shaped by the tension between growing state violence and the slowly emerging public sphere of protest and activism.

Crossing boundaries between literary, political, cultural, and art studies, draw on investigative journalism as well as contemporary Russian film, fiction, and art in order to explore the peculiar, yet not unprecedented cult of violence that underlies the Russian political climate and the alternatives suggested by activist opposition.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Acquire basic knowledge of Russia's history, literature, performance arts, and film of the last two decades

Audience: Undergraduate

2. Develop an ability to interpret politics through a cultural lens

Audience: Undergraduate

3. Improve and refine academic writing skills.

Audience: Undergraduate

**SLAVIC 245 – TOPICS IN SLAVIC LITERATURES**

3 credits.

Exploration of various topics - periods, genres, individual writers, themes, problems, etc. in Russian and Eastern European literature.

**Requisites:** None**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**SLAVIC 246 – ESCAPING UTOPIA: CULTURES AFTER COMMUNISM**

3 credits.

The swift collapse of communist regimes across Central and Eastern Europe came as a surprise to both their opponents and political clients. How did culture mediate the experience of this political, social, and economic revolution? How does the experience of communism shape the historiography, identity, and vision(s) of the future of the affected nations? What is the condition of postcommunism? These are some of the questions we will be exploring as we examine Polish, Russian, Ukrainian, Czech, and South Slavic literature in translation and cinema from the decades following the dissolution of the Soviet Union.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. identify and discuss main events, figures, themes, concepts, aesthetic devices, ideas, and social changes that have shaped the culture of the region since the collapse of communist regimes

Audience: Undergraduate

2. define "postcommunism/post-socialism" as a cultural phenomenon in the context of East-Central Europe

Audience: Undergraduate

3. apply basic methods of literary, cinematic, and cultural analysis to interpret a wide range of cultural texts produced in East-Central European countries in the years following the collapse of communism

Audience: Undergraduate

4. develop, compare, and effectively express ideas about cultural texts and their underlying semantic structures

Audience: Undergraduate

**SLAVIC 251 – THIRD SEMESTER SERBO-CROATIAN**

3 credits.

Development of speaking, listening, reading and writing in Serbo-Croatian.

**Requisites:** SLAVIC 142**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019**SLAVIC 252 – FOURTH SEMESTER SERBO-CROATIAN**

3 credits.

Development of speaking, listening, reading and writing in Serbo-Croatian.

**Requisites:** SLAVIC 251**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020

**SLAVIC/GEOG/HISTORY/POLI SCI 253 – RUSSIA: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of Russian civilization from its beginnings through the present day.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SLAVIC/GEOG/HISTORY/POLI SCI 254 – EASTERN EUROPE: AN INTERDISCIPLINARY SURVEY**

4 credits.

Comprehensive interdisciplinary survey of East European culture, society, politics, and literature from its beginnings to the present day.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SLAVIC/LITTRANS 259 – ADVENTURE IN LITERATURE AND FILM**

3 credits.

How do we define adventure? Who gets to experience it and on what terms? What role has it played in ancient and modern cultures? What do its ever-changing definitions, heroes, and genres tell us about our evolving values? Address these and similar questions on our intellectual journey through some of the most iconic adventures in Western cultural tradition, from Homer's The Odyssey to Spielberg's Raiders of the Lost Ark, and beyond.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. identify the conventions of adventure narratives across different periods, traditions, and genres

Audience: Undergraduate

2. apply basic methods of literary, cinematic, and cultural analysis to close readings of cultural texts, be they epics, romances, novels, or films

Audience: Undergraduate

3. develop, compare, and effectively express ideas about cultural texts and their underlying semantic structures

Audience: Undergraduate

4. discuss how adventure tropes evolve to reflect and often mediate social and cultural changes

Audience: Undergraduate

5. explain the function of adventure as a social construct, both historically and in the context of today's globalized world.

Audience: Undergraduate

### SLAVIC/LITTRANS 266 – ELEMENTARY SPECIAL TOPICS IN RUSSIAN LITERATURE & CULTURE

1-3 credits.

Exploration of various topics – periods, genres, individual writers, themes, problems, etc. in Russian and Eastern European literature.

**Requisites:** None

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain basic knowledge of Russia's history, literature, performance arts, and films.

Audience: Undergraduate

2. Develop an ability to interpret politics through a cultural lens

Audience: Undergraduate

3. Improve academic writing skills beyond the elementary level

Audience: Undergraduate

4. Place works of literature in their social, historical, and political context

Audience: Undergraduate

5. Analyze literary texts in their historical and cultural context

Audience: Undergraduate

6. Integrate information from primary and secondary sources

Audience: Undergraduate

### SLAVIC 275 – THIRD YEAR RUSSIAN I

3 credits.

A thorough review of several major aspects of Russian grammar, focusing on the use of complex syntax in speech and writing. Read and discuss literary works and other Russian-language texts. Develop writing proficiency through compositions on a variety of topics.

**Requisites:** SLAVIC 118 or 204

**Course Designation:** Breadth – Humanities

Frqn Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Gain an increased understanding and better control of the Russian case system and verbal conjugations.

Audience: Undergraduate

2. Write and speak with greater proficiency in Russian about topics including education, social media, religion, appearance, cities, family, immigration and gender stereotypes

Audience: Undergraduate

3. Employ features of complex syntax in order to speak and write in paragraph-length discourse in Russian.

Audience: Undergraduate

4. Demonstrate improved listening comprehension skills.

Audience: Undergraduate

**SLAVIC 276 – THIRD YEAR RUSSIAN II**

3 credits.

A thorough review of several major aspects of Russian grammar, focusing on the use of complex syntax in speech and writing. Read and discuss literary works and other Russian-language texts. Develop writing proficiency through compositions on a variety of topics.

**Requisites:** SLAVIC 275**Course Designation:** Breadth – Humanities

Frgn Lang – 5th + semester language course

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Gain an increased understanding and better control of the Russian case system and verbal conjugations

2. Write and speak with greater proficiency in Russian about topics including education, social media, religion, appearance, cities, family, immigration and gender stereotypes

Audience: Undergraduate

3. Employ features of complex syntax in order to speak and write in paragraph-length discourse in Russian.

Audience: Undergraduate

4. Demonstrate improved listening comprehension skills

Audience: Undergraduate

**SLAVIC 277 – THIRD YEAR POLISH I**

3 credits.

Review of Polish grammar. Reading, oral practice, and composition.

**Requisites:** SLAVIC 208**Course Designation:** Frgn Lang – 5th + semester language course

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 278 – THIRD YEAR POLISH II**

3 credits.

Review of Polish grammar. Reading, oral practice, and composition.

**Requisites:** SLAVIC 277**Course Designation:** Frgn Lang – 5th + semester language course

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 285 – SLAVIC CULTURE IN CONTEXT: AN HONORS COURSE**

3 credits.

Writing and discussion intensive seminar that introduces students to one or more Slavic (Russian, Polish, Serbian, Czech, Croatian, Bosnian) languages, literatures, and/or cultures within a global context.

**Requisites:** Declared in an Honors program**Course Designation:** Breadth – Humanities

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2020**SLAVIC 299 – DIRECTED STUDY**

1 credit.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2015**SLAVIC 301 – INTRODUCTION TO INTENSIVE POLISH**

3 credits.

Intensive coverage of the structure of the Polish language. Rapid introduction to reading and speaking.

**Requisites:** Consent of instructor**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**SLAVIC 304 – FOURTH SEMESTER INTENSIVE POLISH**

4 credits.

Advanced grammar and reading: reading selections from various sources in Polish literature, history, and culture.

**Requisites:** SLAVIC 301**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SLAVIC 305 – FIFTH SEMESTER INTENSIVE POLISH**

3 credits.

Vocabulary reinforced through literature, film and journalism. Readings and discussions related to issues of contemporary Polish society. Continued work on grammar and vocabulary with written exercises and compositions.

**Requisites:** SLAVIC 304**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024

**SLAVIC 306 – SIXTH SEMESTER INTENSIVE POLISH**

3 credits.

Continuation of 305. Reading selections from twentieth century Polish literature. Focus on intensive writing.

**Requisites:** SLAVIC 305

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**SLAVIC 307 – STUDY ABROAD IN POLAND**

1-4 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SLAVIC 308 – POLISH CULTURE AND AREA STUDIES ON STUDY ABROAD**

1-4 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SLAVIC 309 – RUSSIAN AREA STUDIES ON STUDY ABROAD**

1-4 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SLAVIC 310 – TOPICS IN RUSSIAN: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2001

**SLAVIC 315 – RUSSIAN LANGUAGE AND CULTURE I**

3 credits.

Emphasizes speaking and listening skills. Converse on different stylistic levels, with varying degrees of formality, according to the rules of Russian speech etiquette.

**Requisites:** SLAVIC 118 or 204

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Improve listening comprehension and speaking skills and work towards developing Advanced level proficiency in Russian.

Audience: Undergraduate

2. Expand vocabulary on topics related to education, careers, social issues, economy, and travel.

Audience: Undergraduate

3. Develop skills in understanding of Russian syntax and conversational patterns.

Audience: Undergraduate

4. Develop critical thinking skills and comprehension while reading texts in Russian.

Audience: Undergraduate

5. Develop academic discussion skills in Russian.

Audience: Undergraduate

### **SLAVIC 316 – RUSSIAN LANGUAGE AND CULTURE II**

3 credits.

Emphasizes speaking and listening skills, learn to converse on different stylistic levels, with varying degrees of formality, according to the rules of Russian speech etiquette.

**Requisites:** SLAVIC 315

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Improve listening comprehension and speaking skills and work towards developing Advanced level proficiency in Russian.

Audience: Undergraduate

2. Expand vocabulary on topics related to education, careers, social issues, economy, and travel.

Audience: Undergraduate

3. Develop skills in understanding of Russian syntax and conversational patterns.

Audience: Undergraduate

4. Develop critical thinking skills and comprehension while reading texts in Russian.

Audience: Undergraduate

5. Develop academic discussion skills in Russian.

Audience: Undergraduate

### **SLAVIC 321 – FOURTH YEAR RUSSIAN I**

3 credits.

Improvement of Russian proficiency in all four skills. Read texts from literature and media, watch video clips from contemporary media sources, write and make presentations on current topics in the Russian-speaking world.

**Requisites:** SLAVIC 276

**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Read, interpret, analyze, and discuss a variety of texts from Russian literature and contemporary Russian media at the Intermediate High and Advanced levels.

Audience: Undergraduate

2. Listen to, interpret, and discuss excerpts from contemporary Russian media sources at the Intermediate High and Advanced levels.

Audience: Undergraduate

3. Discuss, present, and write cohesive essays and presentations about topics relevant to contemporary life in the Russian-speaking world, including education, work and professional life, leisure and the arts, family life, and housing and urban/suburban life. Students will also write response papers to the assigned literary texts.

Audience: Undergraduate

4. Reflect on and compare aspects of culture in Russian-speaking countries with US culture in the above-mentioned areas of contemporary life, and through critical reading of Russian literary texts.

Audience: Undergraduate

**SLAVIC 322 – FOURTH YEAR RUSSIAN II**

3 credits.

Improvement of Russian proficiency in all four skills. Progress in language proficiency from the Intermediate to the Advanced level in reading and listening, and to the Intermediate High level in speaking and writing. In addition, enriches knowledge about contemporary Russia through discussion of recent essays, journalism, and news articles.

**Requisites:** SLAVIC 321**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Read, interpret, analyze, and discuss a variety of texts from Russian literature and contemporary Russian media at the Intermediate High and Advanced levels

Audience: Undergraduate

2. Listen to, interpret, and discuss excerpts from contemporary Russian media sources at the Intermediate High and Advanced levels.

Audience: Undergraduate

3. Discuss, present, and write cohesive essays and presentations about topics relevant to contemporary life in the Russian-speaking world, including education, work and professional life, leisure and the arts, family life, and housing and urban/suburban life. Students will also write response papers to the assigned literary texts.

Audience: Undergraduate

Audience: Undergraduate

**SLAVIC 331 – FOURTH YEAR POLISH I**

3 credits.

Extensive reading, discussion, composition, and grammar review.

**Requisites:** SLAVIC 278**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 332 – FOURTH YEAR POLISH II**

3 credits.

Extensive reading, discussion, composition, and grammar review.

**Requisites:** SLAVIC 331**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 341 – FIRST SEMESTER INTENSIVE SERBO-CROATIAN**

3 credits.

Rapid introduction to Serbo-Croatian grammar, reading, and speaking.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2018**SLAVIC 342 – INTRODUCTION TO SERBIAN AND CROATIAN LITERATURE**

3 credits.

Introduction to the fundamentals of Serbian and Croatian literature.

Learn how to speak, write and use the basic concepts of literary analysis: character, plot, setting, style, etc.

**Requisites:** SLAVIC 341**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2019**SLAVIC 351 – FIRST SEMESTER INTENSIVE CZECH**

3 credits.

Rapid introduction to Czech grammar, reading, and speaking.

**Requisites:** Consent of instructor**Course Designation:** Frgn Lang - 1st semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**SLAVIC 352 – SECOND SEMESTER INTENSIVE CZECH**

3 credits.

Rapid introduction to Czech grammar, reading, and speaking.

**Requisites:** SLAVIC 351**Course Designation:** Frgn Lang - 2nd semester language course

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023

**SLAVIC/LITTRANS 357 – INTERMEDIATE SPECIAL TOPICS IN SLAVIC LANGUAGES AND LITERATURES**

3 credits.

Special topics in Slavic and Central and Eastern European Languages and Literatures.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define, explain, and contextualize literary periods, genres, individual writers, themes, and problems in Polish, Central European, Slavic, and East-Central European literatures and cultures  
Audience: Undergraduate

2. Apply learned knowledge to contemporary issues in cultures and societies of East-Central Europe in their literary and cultural contexts  
Audience: Undergraduate

3. Communicate effectively through written reports and essays, oral presentations, classroom discussions, and other  
Audience: Undergraduate

4. Demonstrate understanding of the methods, theories, and sources used by scholars of literature and culture  
Audience: Undergraduate

5. Develop and learn to utilize techniques, skills, and concepts of literary and cultural criticism in a variety of contexts  
Audience: Undergraduate

**SLAVIC/LITTRANS 361 – LIVING AT THE END OF TIMES: CONTEMPORARY POLISH LITERATURE AND CULTURE**

3 credits.

The collapse of communism and the posthumous triumph of the Solidarity movement started a new era in Polish culture. However, living in "posthistory" comes with its own set of problems. Examine contemporary Polish literature, film, and other cultural forms as they struggle with the country's turbulent past while trying to forge new collective identities for the future. How does culture mediate our relationship with the past? How does it help us understand the present and prepare for the future?

**Requisites:** SLAVIC/LITTRANS 215 or SLAVIC 111

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. identify and define major themes, concepts, events, and ideas that shape Poland's cultural history since 1989  
Audience: Undergraduate

2. develop, compare, and effectively express ideas about various cultural texts and their underlying semantic structures  
Audience: Undergraduate

3. demonstrate an understanding of contemporary cultural, social, and political issues that shape collective identities in Poland and, more broadly, East-Central Europe  
Audience: Undergraduate

4. apply the concepts learned in classroom to select contemporary debates in Polish culture and society  
Audience: Undergraduate

### SLAVIC/CURRIC/THEATRE 362 – DRAMA FOR TEACHING AND LEARNING

3 credits.

Methods for all involved in teaching and learning, including foreign languages. Introduction to philosophy, methodology, and practice of the use of drama and performance techniques in any educational or recreational settings. Focus on creativity and embodied and contextual learning, based on current neurological, psychological, and sociological research. A practical class which includes demonstration and practice with children.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Articulate the importance of drama in the education of all children.

Audience: Both Grad & Undergrad

2. Connect drama to multiple forms of expressing and receiving experiences, ideas, and feelings.

Audience: Both Grad & Undergrad

3. Apply the basic terms, skills, philosophies, and methodologies for leading drama sessions

Audience: Both Grad & Undergrad

4. Articulate the difference and similarities between the drama methodologies offered in the course.

Audience: Both Grad & Undergrad

5. Connect the use of drama with current brain based research

Audience: Both Grad & Undergrad

6. Demonstrate ability to design, implement, and evaluate activities and lesson plans with sound objectives and goals.

Audience: Both Grad & Undergrad

7. Connect school and community-making connections between community-based knowledge and school knowledge in theory and practice of drama.

Audience: Both Grad & Undergrad

8. Demonstrate ability to design, implement, and evaluate lesson plans that focus on inclusion and diversity in theory, practice, and pedagogy.

Audience: Graduate

9. Articulate the value of drama in relation to children's social, cultural, cognitive, linguistic, emotional, and moral development.

Audience: Graduate

### SLAVIC/LITTRANS 366 – INTERMEDIATE SPECIAL TOPICS IN RUSSIAN LITERATURE & CULTURE

3 credits.

Exploration of various topics – periods, genres, individual writers, themes, problems, etc. in Russian and Eastern European literature at the intermediate level.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain a greater awareness of another culture and become more adept at engaging with perspectives and ways of thinking that are different from your own.

Audience: Undergraduate

2. Develop a sensitivity to the way texts and ideas are rooted in their unique historical and political contexts, while having a life span that stretches far beyond them.

Audience: Undergraduate

3. Be able to conduct a close reading of a literary text that takes into consideration both its form and content.

Audience: Undergraduate

### SLAVIC 405 – WOMEN IN RUSSIAN LITERATURE

3-4 credits.

The portrayal and perspectives of women, first in literature written by men in the nineteenth-century and then, primarily, by women writers in nineteenth-, twentieth- and twenty-first-century Russian literature. Examine works in their literary, historical, and cultural contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

### SLAVIC 420 – CHEKHOV

3-4 credits.

Examine works of Anton Chekhov in their literary, historical, and cultural context.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SLAVIC 421 – GOGOL

3–4 credits.

Examine works of Nikolai Gogol in their literary, historical, and cultural contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

### SLAVIC 422 – DOSTOEVSKY

3–4 credits.

Examine works of Dostoevsky in their literary, historical, and cultural contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### SLAVIC 424 – TOLSTOY

3–4 credits.

Examine works of Leo Tolstoy in their literary, historical, and cultural contexts.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### SLAVIC 433 – HISTORY OF RUSSIAN CULTURE

3 credits.

Focuses on those topics in Russian cultural history that are most often discussed by Russians and serve as the basis for contemporary political and media discourse.

**Requisites:** SLAVIC 321

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### SLAVIC 434 – CONTEMPORARY RUSSIAN CULTURE

3 credits.

Focuses on those topics in Russian cultural history that are most often discussed by Russians and serve as the basis for contemporary political and media discourse.

**Requisites:** SLAVIC 433

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### SLAVIC/FOLKLORE 444 – SLAVIC AND EAST EUROPEAN FOLKLORE

3 credits.

Oral traditional literature of Eastern Europe: ritual and lyric poetry, epic, and folktale.

**Requisites:** Junior standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### SLAVIC 449 – HISTORY OF SERBO-CROATIAN LITERATURE

3 credits.

Major literary movements of Serbian and Croatian literatures from the medieval period until the formation of the Yugoslav state in 1919. Readings in Serbo-Croatian.

**Requisites:** SLAVIC 342

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### SLAVIC 451 – THIRD SEMESTER INTENSIVE CZECH

3 credits.

Reading selections from various sources in Czech literature, history, and culture.

**Requisites:** SLAVIC 352

**Course Designation:** Frgn Lang – 3rd semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### SLAVIC 452 – FOURTH SEMESTER INTENSIVE CZECH

3 credits.

Reading selections from various sources in Czech literature, history, and culture.

**Requisites:** SLAVIC 451

**Course Designation:** Frgn Lang – 4th semester language course

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### SLAVIC 465 – ADVANCED READINGS IN RUSSIAN LITERATURE & CULTURE

3 credits.

A focus on development of reading, writing, and speaking skills and on the interpretation of texts in their historical and cultural context.

**Requisites:** SLAVIC 321

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read and discuss a variety of texts from Russian literature and on Russian culture at the ACTFL Intermediate High and Advanced levels.

Audience: Undergraduate

2. Watch, listen to, and discuss films, excerpts from films, and other relevant videos related to the texts assigned for this class at the ACTFL Intermediate High and Advanced levels.

Audience: Undergraduate

3. Analyze and interpret literary and culturally salient texts in themselves and in their historical and cultural context.

Audience: Undergraduate

4. Write analytical essays on the assigned texts and their historical and cultural context.

Audience: Undergraduate

5. Give engaging presentations on the historical and cultural context of assigned works.

Audience: Undergraduate

### SLAVIC/LITTRANS 467 – ADVANCED SPECIAL TOPICS IN SLAVIC LANGUAGES AND LITERATURES

3 credits.

Special topics in Slavic and Central and Eastern European Languages and Literatures.

**Requisites:** Junior standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. list, define, and discuss the main figures, theories, and concepts related to the course's advanced topic

Audience: Undergraduate

2. apply methods of literary, cinematic, and cultural analysis in interpreting a wide range of cultural texts

Audience: Undergraduate

3. develop, compare, and effectively express ideas about cultural texts and their underlying semantic structures, informed by contextual knowledge and literary critical techniques

Audience: Undergraduate

4. hone critical and analytical skills through a close reading of fictional, philosophical, political, and theological texts in connection to social, political, and ethical issues

Audience: Undergraduate

### SLAVIC 470 – HISTORY OF POLISH LITERATURE UNTIL 1863

3 credits.

Intensive study of major writers such as Kochanowski, Sep Szarzynski, Krasicki, Mickiewicz, and Slowacki. Readings in Polish.

**Requisites:** SLAVIC 302 or Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### SLAVIC 472 – HISTORY OF POLISH LITERATURE AFTER 1863

3 credits.

A comprehensive survey of Polish literature and its historical background from 1863 to the present. Readings in Polish.

**Requisites:** SLAVIC 470 or Graduate/professional standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**SLAVIC 555 – ADVANCED RUSSIAN LISTENING & SPEAKING**

3 credits.

Development of advanced skills in Russian listening and speaking proficiency, with an emphasis on formal registers. Covers a variety of areas related to contemporary Russian-language media and culture necessary for a professional-level command of the language, regardless of the student's discipline.

**Requisites:** SLAVIC 321**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Read, interpret, and analyze a variety of Russian-language news articles.

Audience: Undergraduate

2. Listen to, interpret, and analyze a variety of Russian-language media sources relevant to recent history and current affairs (news reports, interviews, debates, documentary films, and similar).

Audience: Undergraduate

3. Discuss current affairs in Russia and some of the Russian-speaking world in paragraph-length discourse, in the past and present, and discuss possible outcomes of current events in the future tense and conditional ("what if").

Audience: Undergraduate

4. Describe news-making figures and narrate current news events, using vocabulary accessible to the general interlocutor in Russian.

Audience: Undergraduate

5. Compare and analyze various Russian-language news and media sites.

Audience: Undergraduate

6. Present on topics of interest in historical and current events and respond to peers' questions at the ACTFL Advanced level, in at least paragraph-length discourse.

Audience: Undergraduate

7. Apply knowledge of Russian-language news sites, and, as appropriate, of historical and current events discussed in this course, to your discipline.

Audience: Undergraduate

**SLAVIC 560 – CAPSTONE SEMINAR IN RUSSIAN LITERATURE AND CULTURE**

3 credits.

History of Russian social and political satire in depth. Taught in Russian.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**Learning Outcomes:** 1. Examine how various authors and texts offer complex views and interpretations of society, culture, and history.

Audience: Undergraduate

2. Recognize explicit and implicit messages embedded in literary texts of various genres.

Audience: Undergraduate

3. Analyze and interpret textual detail, establish connections among observations and draw logical inferences while learning to use Russian literary terminology and utilize Russian sources.

Audience: Undergraduate

**SLAVIC 681 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Summer 2012**SLAVIC 682 – SENIOR HONORS THESIS**

3 credits.

Individual mentored study for seniors completing theses for Honors in the Major as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2015**SLAVIC 699 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

**SLAVIC 701 – SURVEY OF OLD RUSSIAN LITERATURE**

2 credits.

Readings of Russian Literature from the Byzantine through the 17th century.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**SLAVIC 702 – EIGHTEENTH-CENTURY RUSSIAN LITERATURE**

2 credits.

Readings of Russian Literature in the 18th century and beyond.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SLAVIC 703 – FOUNDATIONS IN RUSSIAN ROMANTICISM**

3 credits.

Introduction to Russian Romanticism. Provides a solid foundation in both primary texts and secondary scholarship in the field.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SLAVIC 705 – SPECIAL TOPICS IN RUSSIAN LANGUAGE/ LINGUISTICS**

3 credits.

Topics in Russian Language and Linguistics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**SLAVIC 707 – FOUNDATIONS IN RUSSIAN REALISM (~1840-1890S)**

3 credits.

Covers masterworks of the 19th century and the broader literary, historical, political, intellectual and cultural contexts in which they arose and which they shaped.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**SLAVIC 708 – FOUNDATION IN RUSSIAN MODERNISM (~1890S-1930S)**

3 credits.

Introduction to various trends in Russian Modernist literature from the 1890s through the 1930s.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SLAVIC 709 – FOUNDATION IN SOVIET, EMIGRE, AND POST-SOVIET LITERATURE (~1930-PRESENT)**

3 credits.

Covers Soviet, Emigre, and Post-Soviet periods of Russian literature.

Engage with the movements and conceptual issues shaping and influencing the production of Russian/Soviet literary texts from 1917 until the present day: e.g., realism, socialist realism, exile (internal and external), dissidence, postmodernism.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SLAVIC 755 – TOPICS IN SLAVIC LITERATURE**

1-3 credits.

Topics in Russian and Slavic literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**SLAVIC 799 – INDEPENDENT STUDY**

1-6 credits.

Advanced independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**SLAVIC 800 – PROSEMINAR-SLAVIC LITERATURE AND CULTURE**

1 credit.

An introduction to SLAVIC faculty, the Slavic field in general, and research methods in Slavic.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SLAVIC 801 – SLAVIC CRITICAL THEORY AND PRACTICE**

3 credits.

Introduction to the original works of major trends representing literary theory in the Slavic world and wider: formalism, materialism, structuralism, semiotics, deconstruction, psychoanalysis, gender-based theory and other relevant theories that have influenced the way we treat literature as a cultural and aesthetic practice.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**SLAVIC 802 – THE STRUCTURE OF RUSSIAN**

2 credits.

Provides a theoretical and practical introduction to the linguistic structure of Contemporary Standard Russian.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 803 – INTRODUCTION TO OLD CHURCH SLAVONIC AND THE HISTORY OF RUSSIAN LITERARY LANGUAGE**

2 credits.

Introduction to Old Church Slavonic (OCS) and its impact on the formation of Russian literary language.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2023**SLAVIC 804 – METHODS OF TEACHING SLAVIC LANGUAGES**

2 credits.

Investigate the history of foreign language instruction, various models of adult foreign language acquisition, methods for teaching Russian, the creation of testing instruments, issues relevant to course design, and criteria for textbook selection.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SLAVIC 820 – COLLEGE TEACHING OF RUSSIAN**

1 credit.

Provides important professional development in course design, lesson planning, and assessment for teaching assistants. Work cooperatively to develop course activities and assessment instruments, and learn how to identify and solve problems in the classroom. Must be a teaching assistant in Russian.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**SLAVIC 900 – SEMINAR: SLAVIC LITERATURE AND CULTURE**

1-3 credits.

Seminar topics related to Slavic literature and culture.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**SLAVIC 991 – INDIVIDUAL RESEARCH-SLAVIC LITERATURE**

1-12 credits.

Independent research and writing under the supervision of a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## SOCIAL AND ADMINISTRATIVE PHARMACY (S&A PHM)

### S&A PHM/NURSING/SOC WORK 105 – HEALTH CARE SYSTEMS: INTERDISCIPLINARY APPROACH

2 credits.

Introduction to health care systems. Factors affecting health and the value placed on health, the delivery of health care in different settings, the roles of various health workers, and the sociological and economic aspects of health care.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Discuss selected contemporary problems, issues, and trends in health care services for individuals, groups, and populations from local, regional, and global perspectives.

Audience: Undergraduate

2. Describe and compare the impact of health and medical services, including environmental, behavioral, genetic, and biological factors, on personal and public health.

Audience: Undergraduate

3. Discuss the influences of technological, social, cultural, economic, and political forces on the organization of health care systems and delivery of health care services.

Audience: Undergraduate

4. Critically evaluate similarities and differences in health care systems and service conceptualization, organization, and delivery from national and international perspectives.

Audience: Undergraduate

### S&A PHM/HIST SCI 401 – HISTORY OF PHARMACY

2 credits.

Pharmaceutical field, from antiquity to modern medical care; professional; structuring in principal countries of the West.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Outline the key theoretical issues in the history of medicine and pharmacy

Audience: Undergraduate

2. Explain the relationship, using models of change, between medicines, pharmacy practice, and society

Audience: Undergraduate

3. Assess critically the historiographies of the history of medicine and pharmacy

Audience: Undergraduate

4. Evaluate the reputations of pharmacy practices, organizations, and key actors

Audience: Undergraduate

5. Communicate effectively conclusions regarding the history of medicines and pharmacy

Audience: Undergraduate

6. Apply historical understandings to contemporary issues regarding pharmacy, drug regulation, and political conflicts

Audience: Undergraduate

**S&A PHM 411 – PHARMACY IN THE HEALTH CARE SYSTEM**

3 credits.

Orientation to the US health care system and pharmacy's integral role within it. Address roles and responsibilities of different individuals and organizations involved in the provision of health care, issues of insurance coverage, reimbursement, and payment for health care services. Apply principles of personnel management in pharmacy practice.

**Requisites:** Declared in Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify characteristics of the U.S. health care system and explain how individuals and organizations interact to provide health care services.

Audience: Graduate

2. Solve problems by applying important concepts related to insurance coverage.

Audience: Graduate

3. Recognize, describe, and analyze issues affecting health care systems.

Audience: Graduate

4. Recognize and apply principles of personnel management in pharmacy work environments.

Audience: Graduate

5. Effectively communicate in oral and written forms with the interprofessional health care team.

Audience: Graduate

**S&A PHM 414 – SOCIAL AND BEHAVIORAL ASPECTS OF PHARMACY PRACTICE**

3 credits.

Introduction to psychosocial and behavioral aspects of pharmacy practice and patient care, including professional, ethical decision-making; the pharmacist's role in patient care and public health; patient perspectives and factors related to health and medication use; and patient-pharmacist interaction and communication.

**Requisites:** S&A PHM 411

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify ethical issues in health care, apply a problem-solving framework to analyze dilemmas, and make decisions regarding appropriate courses of action

Audience: Graduate

2. Effectively communicate in oral and written forms with patients, caregivers, and the interprofessional healthcare team

Audience: Graduate

3. Apply social and behavioral principles in the provision of patient care services

Audience: Graduate

4. Identify health disparities and public health problems and address these issues incorporating awareness of sociocultural issues

Audience: Graduate

5. Develop patient-centered culturally aware disease management programs

Audience: Graduate

**S&A PHM 490 – SELECTED TOPICS IN SOCIAL AND ADMINISTRATIVE PHARMACY**

1-4 credits.

Specialized subject matter of current interest to undergraduate and professional students.

**Requisites:** Declared in Doctor of Pharmacy program

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**S&A PHM 514 – MANAGING PHARMACY SYSTEMS FOR PATIENT CARE**

2 credits.

Introduces concepts and principles related to managing pharmacy operations and systems for patient care, and managing financial aspects of pharmacies.

**Requisites:** Declared in Doctor of Pharmacy program with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Interpret and apply common financial statements in a pharmacy context

Audience: Undergraduate

2. Describe pharmacy operations and revenue sources in retail/community, hospital, and ambulatory clinic settings

Audience: Undergraduate

3. Plan and evaluate a pharmacy service, including quality, satisfaction, and financial considerations

Audience: Undergraduate

4. Write a business plan for a pharmacy service

Audience: Undergraduate

**S&A PHM 611 – PHARMACY LAW AND REGULATION**

2-3 credits.

Federal and Wisconsin laws related to drug manufacture, drug distribution, drug use, and pharmacy practice.

**Requisites:** S&A PHM 514

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify, locate, and use reputable sources of legal information

Audience: Undergraduate

2. Describe, interpret, and apply relevant federal and state statutes and regulations affecting pharmacy practice

Audience: Undergraduate

3. Analyze “real world” pharmacy practice situations from a variety of perspectives

Audience: Undergraduate

4. Identify potential legal problems in pharmacy practice before they may occur

Audience: Undergraduate

5. Demonstrate advocacy for the pharmacy profession and patient welfare

Audience: Undergraduate

**S&A PHM 652 – PHARMACIST COMMUNICATION: EDUCATIONAL AND BEHAVIORAL INTERVENTIONS**

2 credits.

Intermediate principles of pharmacist communication with patients and other care givers; weekly communications laboratory provides opportunity to refine skills in listening, interviewing, counseling, and use of various educational and behavioral strategies to improve drug use.

**Requisites:** S&A PHM 411 and Declared in the Doctor of Pharmacy Program with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply and tailor a counseling framework to the needs of an individual patient and provider

Audience: Undergraduate

2. Demonstrate an empathic response to a patient

Audience: Undergraduate

3. Conduct motivational interviewing with patients and staff

Audience: Undergraduate

4. Evaluate and use a variety of resources to consult with patients who have limited English proficiency

Audience: Undergraduate

5. Demonstrate several types of probes for patient interviewing

Audience: Undergraduate

6. Evaluate patient understanding during your consultation

Audience: Undergraduate

7. Collect feedback from patients and staff to identify pharmacy program/service needs

Audience: Undergraduate

8. Conduct a SWOT analysis

Audience: Undergraduate

9. Design an intervention based on your assessment

Audience: Undergraduate

10. Diagram flowcharts of a proposed pharmacy service intervention and its implementation with staff

Audience: Undergraduate

11. Conduct a cost-benefit analysis of a pharmacy service

Audience: Undergraduate

12. Write a proposal

Audience: Undergraduate

13. Make a group presentation on a proposed pharmacy-based intervention

Audience: Undergraduate

### **S&A PHM 699 – ADVANCED INDEPENDENT STUDY**

0-3 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **S&A PHM 701 – GRANT WRITING FOR HEALTH SERVICES RESEARCH**

2 credits.

Prepare to enter professional careers requiring knowledge of grant-writing. Mechanics of proposal writing and social aspects of "grantsmanship," skill development in identifying sources of grant funding, practice research to support applications, and tailor proposals to specific audience interests. Utilizing an iterative and peer supported process, draft parts of an R36 dissertation grant.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of where to find grant opportunities and the general procedures for grant submissions  
Audience: Graduate

2. Demonstrate knowledge of the components of an NIH grant and the contents expected within each section  
Audience: Graduate

3. Demonstrate the ability to succinctly synthesize the literature on a significant and timely topic and identify a gap in knowledge that is worthy of investigation  
Audience: Graduate

4. Generate objectives/aims and hypotheses for a project that fill the identified knowledge gap  
Audience: Graduate

5. Generate a compelling description of the expected benefit of completing the project objectives.  
Audience: Graduate

6. Demonstrate the ability to combine the literature summary, aims, and expected benefits into a Specific Aims page of an NIH grant on a significant and timely topic in the field.  
Audience: Graduate

7. Demonstrate the ability to combine the literature summary and description of the importance of the chosen research topic in a Significance Section.  
Audience: Graduate

8. Demonstrate the ability to describe the novel aspects of the research question identified or approach selected to complete the research objective in an Innovation Section.  
Audience: Graduate

9. Outline an Approach section that describes the methods to be used to complete the objective, including potential problems and alternative strategies.  
Audience: Graduate

10. Demonstrate the ability to critically review one's own grant and iteratively improve it.  
Audience: Graduate

11. Demonstrate the ability to receive critical feedback and revise research ideas in response to feedback.  
Audience: Graduate

12. Demonstrate the ability to give constructive, critical feedback to colleagues about research ideas.

### **S&A PHM 702 – MIXED METHODS FOR HEALTH SCIENCES: PURPOSE, DESIGN AND APPROACH**

2 credits.

Increase awareness, understanding, and knowledge about how mixed methods research fits into the broader world of health services research. Exposure to research and lay literature in health services research in pharmacy and related fields. Improve ability to write technically, read and interpret mixed methods research articles, and discuss implications of research findings.

**Requisites:** Graduate standing only or declared in the Doctor of Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use appropriate language to talk about mixed-methods research as a third family of research designs alongside the two monomethod families of quantitative and qualitative designs.

Audience: Graduate

2. Develop a study proposal based on research questions for which a mixed-methods design would be appropriate.

Audience: Graduate

3. Develop skills in communicating mixed methods research ideas to colleagues, funding agencies, policymakers, and journal audiences.

Audience: Graduate

### **S&A PHM 703 – COMMUNITY ENGAGEMENT IN HEALTH SERVICES RESEARCH**

2 credits.

Apply principles of community engagement in the field of health services research. Read and interpret relevant articles, and discuss implications of these readings. Learn existing models and practical approaches for successfully partnering with community stakeholders to address health and medication-related needs through research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Delineate the types of community stakeholders and processes for entering communities based on the Wisconsin idea

Audience: Graduate

2. Identify existing infrastructure to conduct community engaged research projects and develop sustainable partnerships

Audience: Graduate

3. Apply principles and models for designing community engaged research

Audience: Graduate

4. Develop a grant proposal and a community stakeholder engagement plan using principles of team science

Audience: Graduate

### **S&A PHM 704 – DISSEMINATION, IMPLEMENTATION AND SUSTAINMENT OF CHANGE IN HEALTH SERVICES RESEARCH**

2 credits.

Apply Dissemination and Implementation (DI) as well as sustainability concepts and principals to support organizational change efforts in different healthcare settings or learn how to conduct Sustainability research in their professional careers. Identify DI frameworks, appropriate implementation strategies, study designs and outcomes to address the implementation of an evidence-based practice or a specific organizational change.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand the importance of designing for dissemination and how to promote your innovation to key stakeholders.

Audience: Graduate

2. Differentiate between dissemination and implementation, understand the different D&I frameworks, and have knowledge on how to select the most appropriate framework.

Audience: Graduate

3. Understand how selected D&I frameworks (CFIR, Re-Aim, EPIS and a selected few other frameworks) have been applied in the field.

Audience: Graduate

4. Differentiate between different research designs and evaluation approaches in D&I research, and to understand the difference between the different hybrid trials, and how they have been applied in the field

Audience: Graduate

5. Identify the different implementation strategies that can be utilized in D&I research and how selected strategies have been applied in different D&I research studies.

Audience: Graduate

6. Describe how different implementation strategies that could be applied in a pharmacy D&I project and discuss the importance of facilitated implementation as an effective implementation strategy

Audience: Graduate

7. Describe the different types of outcomes in D&I research, understand how they have been applied in the field, and discuss what these outcomes might look like in a pharmacy setting.

Audience: Graduate

8. Understand about D&I research has been applied in other areas of healthcare.

Audience: Graduate

9. Discuss the importance of implementation fidelity and understand how to assess fidelity in D&I research.

Audience: Graduate

10. Describe the importance of sustainability in D&I research and understand about D&I research has been applied in other areas of healthcare.

Audience: Graduate

11. Understand the importance of conducting an economic analysis in D&I research and describe how they might conduct such an analysis.

Audience: Graduate

### **S&A PHM 711 – RESEARCH METHODS FOR PHARMACEUTICAL OUTCOMES AND POLICY RESEARCH**

3 credits.

Development of skills in the methods, techniques, and problems encountered in conducting evaluations of pharmaceutical services, programs, and policies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and conceptualize problems and critically evaluate information and past research (i.e., literature) related to a problem

Audience: Graduate

2. Analyze the literature related to research methods and the application of research methods

Audience: Graduate

3. Evaluate concepts and techniques related to study variable conceptualization, operationalization, and measurement

Audience: Graduate

4. Analyze data using concepts and techniques presented in class

Audience: Graduate

5. Evaluate measurement and data analysis concepts and techniques that are uniquely associated with health services research in pharmacy

Audience: Graduate

6. Use STATA software to analyze data and answer questions related to measurement and data analysis techniques

Audience: Graduate

### **S&A PHM 715 – SOCIAL BEHAVIORAL THEORIES IN PHARMACY, DRUG USE, AND HEALTH BEHAVIOR**

3 credits.

Critical review and application of social behavioral theories, methodologies, and research to current problems in pharmacy, pharmacist communication and interaction with consumers and other providers, use of prescription and nonprescription drugs, and self-care.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Critically analyze selected theories and models as they relate to pharmacy/drug use/health behavior

Audience: Graduate

2. Identify alternative methods of testing and operationalizing theories

Audience: Graduate

3. Critique research approaches, design and measures

Audience: Graduate

4. Identify research needs and social behavioral strategies for improving care outcomes

Audience: Graduate

### **S&A PHM 716 – ADVANCED HOSPITAL PHARMACY ADMINISTRATION**

2 credits.

Various components necessary to become an accomplished administrator of a pharmacy department in a hospital or organized health care setting.

**Requisites:** Declared in MS Pharmacy program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **S&A PHM 911 – RESEARCH SEMINAR IN SOCIAL & ADMINISTRATIVE PHARMACY**

1 credit.

Exposes students to research related to SAS topics, discuss strategies for writing research theses and articles, discuss various methodological approaches to answering research questions, and improve oral and written communication skills. Seminars may involve presenting completed and/or planned research, leading discussions among seminar participants about research topics, and discussing written assignments.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Delineate the types of community stakeholders and processes for entering communities based on the Wisconsin idea  
Audience: Graduate

2. Identify existing infrastructure to conduct community engaged research projects and develop sustainable partnerships  
Audience: Graduate

3. Apply principles and models for designing community engaged research  
Audience: Graduate

4. Develop a grant proposal and a community stakeholder engagement plan using principles of team science  
Audience: Graduate

### **S&A PHM 990 – RESEARCH**

1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **S&A PHM 999 – ADVANCED INDEPENDENT STUDY**

1-12 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## **SOCIAL WORK (SOC WORK)**

### **SOC WORK 100 – SO YOU WANT TO CHANGE THE WORLD?**

3 credits.

Examine ideas and values related to making a difference, think critically about the meaning and methods of changing the world, and integrate thoughtful evidence with your values and beliefs about doing good in the world. With a focus on the profession of social work and other helping professions, consider a variety of social problems, and investigate and critique various approaches to creating change to improve social problems.

**Requisites:** First year students or first year transfer students only

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop a better understanding of motivations and skills for changing the world.  
Audience: Undergraduate

2. Develop the ability to examine the multiple and complex causes of social problems.  
Audience: Undergraduate

3. Develop an understanding of multiple approaches to social change and the ability to critically evaluate pros and cons of different approaches.  
Audience: Undergraduate

4. Develop an understanding of how social work and other professions contribute to understanding and addressing social problems.  
Audience: Undergraduate

5. Further skills in collaborating with peers, providing and incorporating feedback, and communicating knowledge and ideas orally in writing.  
Audience: Undergraduate

**SOC WORK/NURSING/S&A PHM 105 – HEALTH CARE SYSTEMS: INTERDISCIPLINARY APPROACH**

2 credits.

Introduction to health care systems. Factors affecting health and the value placed on health, the delivery of health care in different settings, the roles of various health workers, and the sociological and economic aspects of health care.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Discuss selected contemporary problems, issues, and trends in health care services for individuals, groups, and populations from local, regional, and global perspectives.

Audience: Undergraduate

2. Describe and compare the impact of health and medical services, including environmental, behavioral, genetic, and biological factors, on personal and public health.

Audience: Undergraduate

3. Discuss the influences of technological, social, cultural, economic, and political forces on the organization of health care systems and delivery of health care services.

Audience: Undergraduate

4. Critically evaluate similarities and differences in health care systems and service conceptualization, organization, and delivery from national and international perspectives.

Audience: Undergraduate

**SOC WORK 205 – INTRODUCTION TO THE FIELD OF SOCIAL WORK**

4 credits.

Historical development, formation of social welfare policies, and the role of the social work professional.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC WORK 206 – INTRODUCTION TO SOCIAL POLICY**

4 credits.

Provides an awareness of problems and concepts of the policy process in the U.S. Explores the political, economic, and institutional frameworks which structure public social welfare choices.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC WORK 275 – CONTEMPORARY ISSUES IN SOCIAL WELFARE**

1-3 credits.

Topics will vary, reflecting new issues and trends in social justice, social welfare, or social work.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Examine the multiple and complex causes of social problems.

Audience: Undergraduate

2. Explain social work theories and approaches related to topic area

Audience: Undergraduate

3. Discuss societies and the larger global community.

Audience: Undergraduate

**SOC WORK 299 – DIRECTED STUDY**

1-3 credits.

Program of study devised by a student in collaboration with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2017

**SOC WORK 316 – POWER, POSSIBILITY, AND THE PRACTICE OF SOCIAL JUSTICE**

3 credits.

Theory and practice of social justice. Concepts of justice, values and ethics, critical theoretical frameworks, and practical strategies for organizing and advocacy provide the building blocks for this discussion based applied course. Concrete examples of ongoing theory and practice at the local, state, national, and global levels. Advocacy and organizing skills in projects relating to individual priorities.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Contrast diverse definitions of social justice.

Audience: Undergraduate

2. Analyze how personal values and ethics shape social justice priorities.

Audience: Undergraduate

3. Contribute to social change/social justice work connected to personal priorities.

Audience: Undergraduate

4. Analyze a range of perspectives and theories regarding the practice of social change.

Audience: Undergraduate

5. Demonstrate concrete teamwork, leadership, engagement, organizing, and communication skills in the classroom and in social justice work.

Audience: Undergraduate

**SOC WORK 336 – MAKING SENSE OF MENTAL HEALTH & MENTAL ILLNESS**

3 credits.

Examine critical perspectives of contemporary psychiatry and the mental health system, considering power structures, global and national cultural perspectives on mental health and illness, and the history, values, norms, and preferences of those served.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate awareness of their own assumptions and values related to 'mental health', 'mental illness' and experiences that influence their perspectives.

Audience: Undergraduate

2. Identify the strengths and limitations of the approaches, services and systems designed to address mental health and mental illness currently and historically.

Audience: Undergraduate

3. Understand the importance of the historical and cultural background of individuals and communities for developing and delivering culturally sensitive and socially just mental health interventions.

Audience: Undergraduate

4. Understand and assess how critical theories challenge mainstream western conceptions and treatment approaches for mental illness and demonstrate the ability to critically evaluate the merits and limitations of these critical theories.

Audience: Undergraduate

5. Analyze alternatives for the treatment and care of severe mental illnesses that provide sustained support, choice, and empowerment to services users.

Audience: Undergraduate

**SOC WORK 375 – CONTEMPORARY ISSUES IN SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting current issues and trends in social justice, social welfare, and social work.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize and communicate knowledge regarding contemporary social welfare issues

Audience: Undergraduate

2. Demonstrate knowledge of social work theories and approaches related to topic area

Audience: Undergraduate

3. Think critically about societies and the larger global community

Audience: Undergraduate

**SOC WORK 400 – FIELD PRACTICE AND INTEGRATIVE SEMINAR I**

2-6 credits.

An approved generalist field seminar and social work community agency placement. Seminar and placement require a minimum of 16 hours/week. The first course of the two-semester generalist field sequence.

**Requisites:** Declared in Social Work BSW or Social Work MSW

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Workplace – Workplace Experience Course

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC WORK 401 – FIELD PRACTICE AND INTEGRATIVE SEMINAR II**

2-6 credits.

An approved generalist field seminar and social work agency placement. Seminar and placement require a minimum of 16 hours per week. The second course of the two-semester generalist field sequence.

**Requisites:** SOC WORK 400 and declared in Bachelor or Master of Social Work program

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Workplace – Workplace Experience Course

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC WORK 420 – POVERTY AND SOCIAL WELFARE**

3 credits.

Nature and dimensions of poverty in the U.S. Individual and social consequences of poverty. Historic and contemporary approaches. Poverty and social welfare policy and programs.

**Requisites:** Sophomore standing and SOC WORK 206

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC WORK/SOC 422 – SOCIAL ISSUES IN AGING**

3 credits.

Origins, nature, scope and dynamics of the social problems of older adults and their families in the U.S. and to acquaint students with programs and services available to older adults.

**Requisites:** Sophomore standing and (SOC WORK 205, SOC 181, SOC/ C&E SOC 140, 210 or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC WORK 441 – GENERALIST PRACTICE WITH INDIVIDUALS, FAMILIES AND GROUPS**

3 credits.

Develops generalist social work knowledge and skills for working with and on behalf of individuals, families, and groups. Focus on development of basic social work direct practice skills.

**Requisites:** Declared in Social Work BSW or Social Work MSW

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and apply knowledge of how extant social and institutional factors might impact individuals and group interviews

Audience: Graduate

2. Demonstrate ethical and professional behavior

Audience: Both Grad & Undergrad

3. Engage with Individuals, Families, Groups

Audience: Both Grad & Undergrad

4. Assess Individuals, Families, Groups

Audience: Both Grad & Undergrad

5. Intervene with Individuals, Families, Groups

Audience: Both Grad & Undergrad

6. Evaluate Practice with Individuals, Families, Groups

Audience: Both Grad & Undergrad

### **SOC WORK 442 – GENERALIST PRACTICE WITH COMMUNITIES AND ORGANIZATIONS**

1-2 credits.

Exposes students to the theory and practice of planned change in communities and organizations and helps them incorporate a generalist model into practice at these levels of intervention.

**Requisites:** Declared in Social Work BSW or Social Work MSW

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **SOC WORK 453 – SUBSTANCE USE DISORDERS**

3 credits.

Presentation of social, historical, legal, political, and ethical considerations surrounding the use and abuse of alcohol and psychotropic drugs in the U.S.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define basic terminology used in the field and differentiate between substance use, misuse, abuse, and dependence.

Audience: Undergraduate

2. Identify and evaluate common conceptual models used to understand problematic substance use.

Audience: Undergraduate

3. Discuss and understand social, historical, legal, political, biological, psychological, and ethical considerations surrounding the use and abuse of alcohol and psychoactive drugs in the U.S.

Audience: Undergraduate

### **SOC WORK 454 – SMALL GROUPS IN SOCIAL WORK PRACTICE**

3 credits.

Exploration and application of theory to the formation and development of small groups deliberately used by social workers to effect specified change in interpersonal relationships.

**Requisites:** Sophomore standing and SOC WORK 205

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

### **SOC WORK 457 – HUMAN BEHAVIOR AND THE ENVIRONMENT**

3 credits.

Physiological, psychological, and social changes throughout the life cycle. Major crisis and developmental tasks at each point in terms of their implications for social work practice.

**Requisites:** Junior standing and declared in Social Welfare or Social Work undergraduate program

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SOC WORK 462 – CHILD WELFARE**

3 credits.

History and current policies, statutes, and best practices that shape child welfare practice locally, nationally, and internationally. Gain knowledge and awareness to prevent and protect children from neglect, physical abuse, sexual abuse, and emotional abuse by strengthening, supporting and empowering their families. Explore various settings where children and families often receive social work services to engage in critical review on the purpose and organization of the setting, the role of social work, and evidence-based practices when working with children and families.

**Requisites:** Sophomore standing. Not open to students with credit for SOC WORK 646 or 656.

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and understand multifaceted aspects of the child welfare system.

Audience: Undergraduate

2. Integrate various aspects of generalist social work practice into the field of child welfare.

Audience: Undergraduate

3. Identify child welfare policies, services, and issues that impact the lives of children and families.

Audience: Undergraduate

4. Operationalize generalist social work knowledge, ethics, advocacy, and solution focused practice in public child welfare.

Audience: Undergraduate

**SOC WORK/MEDICINE/NURSING/PHM PRAC 467 – INTERPROFESSIONAL COLLABORATIVE PRACTICE IN HIV CARE**

1 credit.

Gain foundational knowledge and skills in interprofessional collaborative practice and HIV care. Explore the roles of medicine, nursing, pharmacy, and social work in the HIV care continuum. Discuss quality team-based care as a member of an interprofessional student team.

**Requisites:** Declared in Nursing BSN (Traditional, Collaborative, Accelerated), Social Work BSW, Medicine MD, Pharmacy PharmD, or Social Work MSW.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history and epidemiology of the HIV epidemic.

Audience: Both Grad & Undergrad

2. Define Interprofessional Collaborative Practice (ICP) and describe the characteristics of effective ICP.

Audience: Both Grad & Undergrad

3. Describe the natural history of HIV disease with and without antiretroviral therapy (ART).

Audience: Both Grad & Undergrad

4. Discuss US Dept of Health and Human Services guidelines and recommendations for prevention, screening, diagnosis, treatment, and management of HIV infection and HIV-related diseases in the United States.

Audience: Both Grad & Undergrad

5. Describe the HIV care continuum including testing, entry and retention in care, and treatment including associated stigma and discrimination as barriers.

Audience: Both Grad & Undergrad

6. Discuss dimensions of wellness (emotional, environmental, financial, intellectual, occupational, physical, social and spiritual).

Audience: Both Grad & Undergrad

7. Identify potential co-morbid conditions in the HIV infected population.

Audience: Both Grad & Undergrad

8. Discuss stigma and discrimination as barriers to prevention, care, and treatment.

Audience: Both Grad & Undergrad

9. Discuss the history of the Ryan White Care Act and other federal and state policies and their current importance in HIV prevention and HIV care.

Audience: Both Grad & Undergrad

10. Identify HIV care needs and common health issues among high risk and vulnerable populations.

Audience: Both Grad & Undergrad

11. Develop a plan of care for an HIV positive individual as part of an interprofessional team.

Audience: Both Grad & Undergrad

12. Develop skills working with mixed teams including undergraduate students

Audience: Graduate

13. Demonstrate higher level skills in identifying and resolving barriers to

**SOC WORK 578 – HOMELESSNESS: A SERVICE LEARNING COURSE**

4 credits.

Introduction to the complex issues surrounding homelessness in America including epidemiology, demographics, history and public beliefs and attitudes. It explores structural conditions and personal attributes posited as causes of contemporary homelessness. Varying social policies and service needs of homeless persons are discussed.

**Requisites:** Junior standing and declared in Social Welfare undergraduate program

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC WORK 579 – SPECIAL TOPICS IN SOCIAL WORK**

1 credit.

Intensive study of selected topics in the field of social work.

**Requisites:** Junior standing and declared in Social Welfare or Social Work undergraduate program

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

### **SOC WORK 612 – PSYCHOPATHOLOGY IN GENERALIST SOCIAL WORK PRACTICE**

2 credits.

Addresses major mental health concerns across the lifespan, using the Diagnostic and Statistical Manual of Mental Disorders (DSM) as the organizing framework for reviewing major mental disorders and critiquing the current "medical model" approach to mental health in the United States. Approaches mental health issues from a generalist perspective, including the role of the social environment, culture, and stigma in mental health services, access, and policy.

**Requisites:** Declared in Social Work BSW, Social Work MSW, Social Work Advanced Standing MSW, Preparation for Admission to Graduate/Professional, or Professional or Personal Enrichment Program

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recognize DSM criteria for major mental health conditions across the lifespan, including a critique of the medical model approach employed in mental health diagnosis and treatment in the United States.

Audience: Undergraduate

2. Apply critical thinking to major mental health conditions considering social work values, a critique of the medical model approach, as well as a strengths-based, biopsychosocial framework.

Audience: Undergraduate

3. Examine the mental healthcare system, the process of mental health diagnosis, and current events in mental health through a sociocultural lens, exploring the impacts of stigma, disparities, poverty, and oppression on mental health/illness.

Audience: Undergraduate

### **SOC WORK 623 – INTERPERSONAL VIOLENCE**

3 credits.

An overview of risk and protective factors, theories, services, research, and activism related to interpersonal violence. Models of prevention and intervention will be discussed. Skills related to social work practice with individuals and communities affected by interpersonal violence will be practiced.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explore how forms of oppression affect common perceptions of interpersonal violence.

Audience: Both Grad & Undergrad

2. Describe theories as to why interpersonal violence occurs.

Audience: Both Grad & Undergrad

3. Discuss prevention and intervention strategies to address interpersonal violence.

Audience: Both Grad & Undergrad

4. Evaluate and apply interpersonal violence research findings to social work practice.

Audience: Graduate

### **SOC WORK 624 – SOCIAL WORK WITH THE SMALL GROUP**

2-3 credits.

Exploration of the small group as the interventive unit; major models and techniques; principles guiding the selection of the small group approach to intervention based on research knowledge of problems, processes, and outcomes.

**Requisites:** Declared in Social Work BSW or Social Work MSW

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**SOC WORK 627 – SEX TRAFFICKING AND SEX TRADING**

2 credits.

Anti-oppressive approaches to analyzing the dynamics of sex trading (including sex trafficking and sex work) as well as implications for practice and policy. Integrates diverse and conflicting perspectives of survivors, practitioners, and researchers to deconstruct sex trafficking risk, prevention, identification, and intervention strategies.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate Ethical and Professional Behavior by understanding the challenges of one's agency in victimization and the criminal justice system and direct practice

Audience: Both Grad & Undergrad

2. Define the extent and nature of the problem; including prevalence, experiences of survivors, types of trafficking and exploitation, methods of traffickers, the role of weak social institutions, cultural dynamics, and global power dynamics

Audience: Both Grad & Undergrad

3. Engage Diversity and Difference in Practice by understanding the interrelated inequities related to gender, sex, sexual orientation, gender identity, power, class, opportunity, education, culture, conflict, politics, race, ethnicity and sexual objectification are among the social phenomena that contribute to those who enter into systems of exploitation, including sex trafficking.

Audience: Both Grad & Undergrad

4. Advance Human Rights and Social, Economic and Environmental Justice by understanding how systems of oppression intersect with sex trafficking risk, and how people at risk of sex trafficking can be supported by client-centered policies (macro level) and practices (micro level).

Audience: Both Grad & Undergrad

5. Engage with Individuals, Families, Groups affected by sex trafficking

Audience: Both Grad & Undergrad

6. Engage In Practice-informed Research and Research-informed Practice in the context of the current sex trafficking literature.

Audience: Graduate

7. Assess Individuals, Families and Groups by demonstrating knowledge of trafficking identification, indicators, and needs

Audience: Graduate

**SOC WORK/AMER IND 636 – SOCIAL WORK IN AMERICAN INDIAN COMMUNITIES: THE INDIAN CHILD WELFARE ACT**

3 credits.

The role of social workers and social services in American Indian and tribal communities, particularly compliance with the Indian Child Welfare Act. Historical context includes land removal and loss, the boarding school and adoption eras, and social determinants of health including the impacts of historical and intergenerational trauma.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage diversity and difference in practice

Audience: Graduate

2. Advance Human Rights and Social, Economic, and Environmental Justice

Audience: Graduate

3. Engage in Policy Practice

Audience: Graduate

4. Engage with Individuals, Families, Groups, Organizations, and Communities

Audience: Graduate

5. Assess Individuals, Families, Groups, Organizations, and Communities

Audience: Graduate

6. Intervene with Individuals, Families, Groups, Organizations and Communities

Audience: Graduate

7. Evaluate Practice with Individuals, Families, Groups, Organizations and Communities

Audience: Graduate

8. Demonstrate awareness of the history of American Indian Tribes, including historical and intergenerational trauma and the impact on the Present experience of American Indians.

Audience: Undergraduate

9. Demonstrate the ability to recognize and question assumptions regarding American Indian Tribes and people.

Audience: Undergraduate

10. Apply knowledge learned in this course to practice in a multicultural society

Audience: Undergraduate

### **SOC WORK 639 – SOCIAL WORK PRACTICE WITH LGBTQIA2S+ INDIVIDUALS AND COMMUNITIES**

3 credits.

Affirming social work practice with lesbian, gay, bisexual, transgender, nonbinary, queer, intersex, asexual, Two-Spirit, and other LGBTQIA2S+ individuals and communities.

**Requisites:** Junior standing and (SOC WORK 205 or 708), or declared in Social Work Advanced Standing MSW

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize key concepts and terms related to LGBTQIA2S+ individuals and communities.

Audience: Both Grad & Undergrad

2. Identify strategies for affirming social work practice with LGBTQIA2S+ individuals.

Audience: Both Grad & Undergrad

3. Describe the historical and contemporary policy and practice context for working with LGBTQIA2S+ communities.

Audience: Both Grad & Undergrad

4. Apply core tenets of LGBTQIA2S+-affirming practice to a subpopulation and/or practice setting of interest.

Audience: Both Grad & Undergrad

5. Critically evaluate the acceptability and effectiveness of interventions with LGBTQIA2S+ individuals and communities.

Audience: Graduate

### **SOC WORK 640 – DIVERSITY, OPPRESSION AND SOCIAL JUSTICE IN SOCIAL WORK**

3 credits.

Foundational knowledge for generalist social work practice in a multicultural society. Examines the experiences of diverse populations with interpersonal and institutional oppression, and implications are drawn for social policy.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Ethnic St – Counts toward Ethnic Studies

requirement

Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Engage diversity and difference in practice.

Audience: Undergraduate

2. Advance human rights and social, economic, and environment justice.

Audience: Undergraduate

3. Develop awareness of history's impact on the present

Audience: Undergraduate

4. Develop ability to recognize and question assumptions

Audience: Undergraduate

5. Develop consciousness of self and other

Audience: Undergraduate

6. Examine effective participation in a multicultural society

Audience: Undergraduate

**SOC WORK 644 – ISSUES IN DEVELOPMENTAL DISABILITIES**

3 credits.

Definition, incidence, etiology, and prevention of developmental disabilities. Examines the life-cycle needs of this population, as well as social-welfare issues, social services available, and the social worker's role.

**Requisites:** Junior standing and (SOC WORK 205 or 708), or declared in Social Work Advanced Standing MSW or the Professional or Personal Enrichment Program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand the historical context of developmental disability

Audience: Both Grad & Undergrad

2. Compare models of disability and their implications

Audience: Both Grad & Undergrad

3. Differentiate typical development from atypical development

Audience: Both Grad & Undergrad

4. Classify different developmental disability diagnoses

Audience: Both Grad & Undergrad

5. Describe the ways in which developmental disabilities impact individuals and families

Audience: Both Grad & Undergrad

6. Understand the way in which disability intersects with other identities

Audience: Both Grad & Undergrad

7. Advance human rights and social and economic justice for people with disabilities.

Audience: Graduate

**SOC WORK 646 – CHILD ABUSE AND NEGLECT**

2 credits.

Examination of physical, emotional and sexual abuse of children, child neglect, and exploitation.

**Requisites:** Junior standing or declared in the Professional or Personal Enrichment Program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop awareness of personal values and implicit biases related to child maltreatment.

Audience: Both Grad & Undergrad

2. Describe the complex nature of child maltreatment and how this complexity engenders ethical issues, both systemic and personal, and affects professional work with children and families.

Audience: Both Grad & Undergrad

3. Know the roles of historical social, racist, political, and institutional constructs as well as societal and cultural values intertwined with child maltreatment with a particular emphasis on those stereotypes related to race, class, religion, gender preferences, and sexual orientation.

Audience: Both Grad & Undergrad

4. Understand the role of poverty in the etiology of child maltreatment.

Audience: Both Grad & Undergrad

5. Define common safety, risk and protective factors for assessing different forms of child maltreatment.

Audience: Both Grad & Undergrad

6. Describe the impact of child maltreatment and social welfare policies on diverse groups of children and families (e.g., from various racial, cultural, and ethnic backgrounds, people who identify as LGBTQ+, single parents, etc.).

Audience: Both Grad & Undergrad

7. Understand the history and power vested in the institutional systems that form the basis for governmental design and white supremacy in child welfare practice and structure in the U.S.

Audience: Graduate

8. Identify gaps in knowledge within professions responsive to child maltreatment and understand the resulting implications for practice and advocacy with children and families and the systems that have been created to respond to their needs.

Audience: Graduate

**SOC WORK 648 – SOCIAL WORK PRACTICE IN PALLIATIVE CARE**

2 credits.

Addressing psychosocial, cultural, existential, ethical, and team-based aspects of care with individuals and families across the life course who are impacted by serious illness.

**Requisites:** Senior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define the concepts of serious illness, palliative care, hospice, and end-of-life care and differentiate among the terms.

Audience: Both Grad & Undergrad

2. Recognize how the psychosocial, cultural, and existential domains of palliative care can influence patient and family experience of serious illness.

Audience: Both Grad & Undergrad

3. Identify personal attitudes and values related to serious illness and end of life.

Audience: Both Grad & Undergrad

4. Describe the roles of social workers on palliative care teams and how those roles are distinct from (and similar to) the activities of other team members.

Audience: Both Grad & Undergrad

5. Describe the roles of other healthcare professionals (e.g., physicians, nurses, pharmacists, chaplains) on palliative care teams.

Audience: Both Grad & Undergrad

6. Examine ethical challenges that can arise in the setting of serious illness and end-of-life care.

Audience: Both Grad & Undergrad

7. Define approaches to screening, assessment, and intervention of psychosocial aspects of care.

Audience: Graduate

**SOC WORK 650 – METHODS OF SOCIAL WORK RESEARCH**

2-3 credits.

Social research and problems of project design and programming. Distinctive characteristics of investigations directed to planning, administrative, and scientific objectives.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**SOC WORK 656 – CHILD WELFARE PRACTICE IN FOSTER AND KINSHIP CARE, PERMANENCY, AND ADOPTION**

2 credits.

A multi-level exploration of out-of-home care and permanency in the child welfare field. Includes local, state and national perspectives, as well as research, policy and practice issues in foster care, kinship care, adoption and other permanency options.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an understanding of the logistical context of foster and kinship care, including history, relevant federal legislation, public child welfare processes, and foster home licensing.

Audience: Both Grad & Undergrad

2. Describe the benefits of placement with kin and compare outcomes of children placed with kin/like kin and children placed in traditional foster care placements.

Audience: Both Grad & Undergrad

3. Distinguish between policies, programs, and practices and investigate each against various outcomes.

Audience: Both Grad & Undergrad

4. Examine how intersecting identities including race, gender, sexual orientation, age and class impact all stages of the child welfare and out-of-home care process.

Audience: Both Grad & Undergrad

5. Appraise various permanency outcomes for children and families.

Audience: Both Grad & Undergrad

6. Analyze problems in the public child welfare system such as disparities related to race and investigate individual and systemic factors that may be contributing to these disparities.

Audience: Graduate

**SOC WORK 662 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting issues and trends in social policy and social work.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**SOC WORK 663 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting social issues/social problems relevant to social welfare and social work.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2019

**SOC WORK 664 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting new issues and trends in fields of practice such as child welfare, health, or mental health.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**SOC WORK 672 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting issues and trends in social work for non-social workers.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**SOC WORK 673 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary and designed to meet MSW Program requisites.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2020

**SOC WORK 674 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting emerging issues and trends in social work for social welfare, generalist and advanced practice students.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

**SOC WORK 675 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting current issues and trends in social justice, social welfare, and social work.

**Requisites:** Junior standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of contemporary social welfare issues

Audience: Both Grad & Undergrad

2. Examine social work theories and approaches related to topic area

Audience: Both Grad & Undergrad

3. Think critically about societies and the larger global community

Audience: Both Grad & Undergrad

4. Advance human rights and social and economic justice

Audience: Graduate

**SOC WORK 679 – TOPICS IN CONTEMPORARY SOCIAL WELFARE**

2-3 credits.

Topics will vary, reflecting trends in policy and practice for social welfare, generalist, and advanced students.

**Requisites:** Junior standing and declared in Social Welfare or Social Work

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**SOC WORK 681 – SENIOR HONORS THESIS**

3 credits.

First of two semesters of undergraduate research for students in the honors program leading to completion of thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**SOC WORK 682 – SENIOR HONORS THESIS**

3 credits.

Second of two semesters of undergraduate research for students in the honors program including completion of a thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**SOC WORK 691 – SENIOR THESIS**

2 credits.

First of two semesters of undergraduate research leading to completion of thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2003

**SOC WORK 692 – SENIOR THESIS**

2 credits.

Second of two semesters of undergraduate research including completion of a thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2004

**SOC WORK 699 – DIRECTED STUDY**

1-3 credits.

Independent study for undergraduates under the direction of a Social Work instructor. Only juniors and seniors will be given permission to enroll.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC WORK 700 – PART-TIME MSW PROGRAM EXEMPTION TERM**

0 credits.

Course for students in the Part-Time MSW Program to maintain UW-Madison status when they have partial exemptions and no other courses available.

**Requisites:** Declared in Social Work, MSW, or Part-Time MSW, Madison, or Part-Time MSW, Eau Claire

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC WORK 705 – BASIC STATISTICS FOR SOCIAL WORK**

3 credits.

An overview of statistical methods covering the topics required for social work professional degrees, such as distributions, standard error, regression, correlation assumptions and limitations, and basic ideas of experimental design.

**Requisites:** Graduate/professional standing or declared in the Preparation for Admission to Graduate or Professional School Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Engage in Practice Informed Research and Research Informed Practice

Audience: Graduate

2. Use basic statistical concepts in measurement, sampling, probability, and data description, presentation, and interpretation.

Audience: Graduate

3. Apply various approaches to asking research questions, explore relationships between and among variables, and test hypotheses using basic bivariate and multivariate analytical techniques.

Audience: Graduate

4. Develop foundational skills to be a critical consumer of empirical research involving quantitative data.

Audience: Graduate

**SOC WORK 708 – THE FIELD OF SOCIAL WORK**

2 credits.

Nature, purpose, function, and organizational content of the profession. Historical development; a consideration of the development of the social welfare institutions, formation of social welfare policies and their impact on practice, and the role of the social work professional.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss the historical foundations of the social work profession, including successes, failures, and controversies historically and contemporarily.

Audience: Graduate

2. Identify and define common theories used in social work practice.

Audience: Graduate

3. Identify and apply different Social Work ethics and values.

Audience: Graduate

4. Discuss the history of social policy-making in the U.S., including social work's role.

Audience: Graduate

**SOC WORK 709 – SOCIAL POLICY**

2 credits.

Analysis of policy issues as applied to such fields as poverty, discrimination, crime, physical and mental health on both national and state levels.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Compare a variety of perspectives on social problem analysis, including poverty

Audience: Graduate

2. Examine the scope and limitations of social policy

Audience: Graduate

3. Analyze social policy at the local, state, federal and global level that affects well-being, human rights and justice, service delivery, and access to social services.

Audience: Graduate

4. Critique the structures of social policies and services and the role of policy in service delivery through anti-oppressive and anti-racist lenses.

Audience: Graduate

**SOC WORK 710 – DIVERSITY, OPPRESSION AND SOCIAL JUSTICE IN SOCIAL WORK**

2 credits.

Foundational preparation for social work practice in a multicultural society. Examines the experiences of diverse populations with interpersonal and institutional oppression and implications are drawn for social policy.

**Requisites:** Declared in Social Work MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage diversity and difference in practice.

Audience: Graduate

2. Advance human rights and social, economic, and environment justice.

Audience: Graduate

**SOC WORK 711 – HUMAN BEHAVIOR AND THE ENVIRONMENT**

2 credits.

The literature on human behavior and the environment is reviewed from a bio-psychosocial perspective. Special attention is given to understanding individual and family behavior and development as a function of reciprocal interactions with groups, communities, organizations, and society.

**Requisites:** Declared in Social Work MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC WORK 712 – PSYCHOPATHOLOGY FOR SOCIAL WORK PRACTICE IN MENTAL HEALTH**

3 credits.

Focuses on a biopsychosocial understanding of mental health from a social work and social environment perspective, giving special attention to the person-in-environment and current classification systems available to the practitioner.

**Requisites:** SOC WORK 612 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply knowledge of the social work perspective, examine the critical influence of culture, class, race and ethnicity, religion, and social values of the individual, family, group, and social institutions in the assessment of client strengths, vulnerabilities, and mental health symptomatology

Audience: Graduate

2. Employ a multidimensional framework that includes a biopsychosocial assessment, the DSM-5 TR and other classification systems, culturally relevant variables and contemporary research when assessing, diagnosing, and treating the subjective distress of their clients

Audience: Graduate

3. Differentiate diagnostic criteria of the major mental health conditions across the lifespan

Audience: Graduate

4. Demonstrate skills necessary for diagnostic interviewing, formulation, and case presentation

Audience: Graduate

5. Synthesize and effectively communicate findings through written reports and oral presentations to inform clinical practice

Audience: Graduate

6. Apply clinical judgment, professional and ethical responsibility to inform practice

Audience: Graduate

**SOC WORK/URB R PL 721 – METHODS OF PLANNING ANALYSIS**

3 credits.

Research methods and statistics used in analyzing planning problems: conceptualization, design, and implementation of planning research; statistical methods for analyzing data including review of inferential statistics, analysis of variance, correlation, and multiple regression; use of computer; review of sources of planning data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### **SOC WORK 741 – INTERVENTIONS WITH CHILDREN, YOUTH, AND FAMILIES**

2 credits.

Addresses multi-level interventions with children, youth, and families across multiple service systems, with an emphasis on practice innovations.

**Requisites:** (SOC WORK 441 and graduate/professional standing) or declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate ways to engage a diverse population through an intersectional framework.

Audience: Graduate

2. Articulate the forms and interventions that address and mitigate the impact of oppression and discrimination on the lived experience & circumstances of individuals, groups, and/or communities served.

Audience: Graduate

3. Articulate social work ethics and values, practice dilemmas, and ethical decision making.

Audience: Graduate

4. Determine, customize, and implement the most appropriate intervention(s) based on information, including the person's preferences, strengths, and cultural considerations.

Audience: Graduate

5. Identify, implement, and analyze evidence-informed interventions to achieve the goals of clients.

Audience: Graduate

6. Critically analyze outcomes and effectiveness of social work practice.

Audience: Graduate

### **SOC WORK 742 – ASSESSING AND TREATING CHILDREN AND ADOLESCENTS**

2 credits.

Explore evidence-based services through a holistic perspective that looks at a person in their environment, using a person-centered approach.

Assessment, treatment, and generalization of change strategies; problem solving; resource development; intervention planning; current trends in mental health and other practice issues are explored.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use a client-centered approach to assess and analyze a client and their family's needs and strengths, through a person in their environment lens.

Audience: Graduate

2. Identify a client and their family's varying needs and demonstrate the ability to incorporate those needs into well designed service/treatment goals that create a framework for interventions that create sustainable change.

Audience: Graduate

3. Understand a wide variety of evidence-based treatment modalities that can be used to address the identified problem and support service/treatment goals and be able to articulate, incorporate, and effectively demonstrate a multitude of evidence-based interventions that address the identified problem and use a client and their family's strengths.

Audience: Graduate

4. Understand the importance of practice evaluation and how evaluation measures are applied to assess, evaluate, and improve service providing, including applying the NASW Code of Ethics to identify, deconstruct, and create a plan of action for any ethical dilemmas that may present in the course of practice.

Audience: Graduate

5. Evaluate personal bias, societal privileges (or non-privileged), and systemic elements of racism, discrimination, and oppression, as well as create practice measures that advocate and facilitate positive change for all clients.

Audience: Graduate

**SOC WORK/NURSING/PHM PRAC 746 – INTERDISCIPLINARY CARE OF CHILDREN WITH SPECIAL HEALTH CARE NEEDS**

3 credits.

Interdisciplinary team care of children with special health care needs across the trajectory of illness presented within the context of family, culture, social determinants of health, community, and healthcare policy. Students introduced to interdisciplinary, collaborative, family-centered team care.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the interdisciplinary team approach to the care of the child with a chronic illness from the perspective of a child with a chronic illness and their family, community care providers, and each of the disciplines involved, including the student's own.

Audience: Graduate

2. Demonstrate an understanding of issues relating to larger social and cultural context for the care of children with chronic illness.

Audience: Graduate

3. Identify and assess healthcare delivery systems and financing for children with chronic illness.

Audience: Graduate

4. Describe ways to advocate for pediatric patients with chronic disease and their families at an individual level and a policy level.

Audience: Graduate

**SOC WORK 799 – INDEPENDENT STUDY**

1-6 credits.

Independent study for MSW graduate students.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**SOC WORK 800 – FIELD PRACTICE AND INTEGRATIVE SEMINAR III**

2-6 credits.

An approved advanced practice social work field seminar and placement.

**Requisites:** Graduate/professional standing and SOC WORK 401, or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Evaluate and render ethical decisions by applying the standards of the NASW Code of Ethics, relevant federal and state laws and regulations, agency regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics in a focus area.

Audience: Graduate

2. Exercise continual self-reflection and self-awareness in order to understand personal values, beliefs and biases, and how they may potentially influence practice, and ethical issues and decisions that arise in a focus area.

Audience: Graduate

3. Demonstrate ethical professional demeanor in behavior; appearance; oral, written, and electronic communication and use of technology in a focus area.

Audience: Graduate

4. Employ supervision and consultation to monitor professional judgments, behavior and guide ethical decision-making in a focus area.

Audience: Graduate

5. Demonstrate and communicate a recognition and understanding of the important role that diversity plays in shaping life experiences at the micro, mezzo, and macro levels of practice in a focus area.

Audience: Graduate

6. Present oneself as a learner to clients and constituencies, and engage them as experts of their own culture and experience in a focus area.

Audience: Graduate

7. Exercise continual self-reflection and self-awareness in order to understand personal values, beliefs and biases regarding diversity, and the potential role they may play in working with diverse clients and constituencies in a focus area.

Audience: Graduate

8. Demonstrate advanced knowledge and understanding of social, economic, and environmental justice necessary to advocate for human rights at the micro, mezzo, and macro levels of practice in a focus area.

Audience: Graduate

9. Assess how mechanisms of oppression and discrimination impact clients and constituencies in a focus area.

Audience: Graduate

10. Engage in practices of advocacy and social change that advance social, economic and environmental justice for clients and constituencies in a focus area.

Audience: Graduate

11. Use practice experience and theory to inform social work interventions in a focus area.

Audience: Graduate

12. Autonomously apply critical thinking in analysis of research methods

## **SOC WORK 801 – FIELD PRACTICE AND INTEGRATIVE SEMINAR IV**

2-6 credits.

An approved advanced practice social work field seminar and placement.

**Requisites:** SOC WORK 800

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Evaluate and render ethical decisions by applying the standards of the NASW Code of Ethics, relevant federal and state laws and regulations, agency regulations, models for ethical decision-making, ethical conduct of research, and additional codes of ethics in a focus area.  
Audience: Graduate

2. Exercise continual self-reflection and self-awareness in order to understand personal values, beliefs and biases, and how they may potentially influence practice, and ethical issues and decisions that arise in a focus area.  
Audience: Graduate

3. Demonstrate ethical professional demeanor in behavior; appearance; oral, written, and electronic communication and use of technology in a focus area.  
Audience: Graduate

4. Employ supervision and consultation to monitor professional judgments, behavior and guide ethical decision-making in a focus area.  
Audience: Graduate

5. Demonstrate and communicate a recognition and understanding of the important role that diversity plays in shaping life experiences at the micro, mezzo, and macro levels of practice in a focus area.  
Audience: Graduate

6. Present oneself as a learner to clients and constituencies, and engage them as experts of their own culture and experience in a focus area.  
Audience: Graduate

7. Exercise continual self-reflection and self-awareness in order to understand personal values, beliefs and biases regarding diversity, and the potential role they may play in working with diverse clients and constituencies in a focus area.  
Audience: Graduate

8. Demonstrate advanced knowledge and understanding of social, economic, and environmental justice necessary to advocate for human rights at the micro, mezzo, and macro levels of practice in a focus area.  
Audience: Graduate

9. Assess how mechanisms of oppression and discrimination impact clients and constituencies in a focus area.  
Audience: Graduate

10. Engage in practices of advocacy and social change that advance social, economic and environmental justice for clients and constituencies in a focus area.  
Audience: Graduate

11. Use practice experience and theory to inform social work interventions in a focus area.  
Audience: Graduate

12. Autonomously apply critical thinking in analysis of research methods and research findings to inform practice.

## **SOC WORK 815 – SOCIAL WORK PRACTICE IN SCHOOLS I**

2 credits.

Practice and coursework in educational settings to conceptualize social work skills in schools and to integrate knowledge of social work theory and practice.

**Requisites:** Graduate/professional standing and concurrent enrollment in SOC WORK 800, or declared in the Professional or Personal Enrichment Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and understand the unique aspects of and advocate for the role of school social work within a school setting.  
Audience: Graduate

2. Apply models of ethical decision making and application of the supplemental school social work standards and ethics in all areas of school social work  
Audience: Graduate

3. Understand and identify inequalities in access to school and community programing and the dynamics of risk factors for school failure and the strategies to address them.  
Audience: Graduate

4. Use state and national laws involving special education and mental health evaluations, assessments, and supports, including student's learning, behavior, and attitudes in various settings, IEP's and 504 plans.  
Audience: Graduate

5. Demonstrate skills in providing group and individual counseling, crisis intervention, and other mental health services in schools. Also demonstrate skills in providing student casework and case management and supporting classroom instruction and curriculum development.  
Audience: Graduate

6. Use practice literature and empirically based knowledge in the areas of children, youth, families, and schools to evaluate programs and services within the educational setting.  
Audience: Graduate

## **SOC WORK 816 – SOCIAL WORK PRACTICUM IN SCHOOLS I**

1 credit.

Practicum and supervision in school settings.

**Requisites:** Declared in Post-Bachelor's Personal Professional Development program and concurrent enrollment in SOC WORK 815

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate ethical and professional behavior  
Audience: Graduate

2. Engage Diversity and Difference in Practice

Audience: Graduate

3. Advance Human Rights and Social, Economic, and Environmental Justice

Audience: Graduate

4. Engage in Practice-informed Research and Research informed Practice

Audience: Graduate

5. Engage in Policy Practice

Audience: Graduate

## **SOC WORK 817 – SOCIAL WORK PRACTICE IN SCHOOLS II**

2 credits.

Advanced practice and coursework in educational settings to conceptualize social work skills in schools and to integrate knowledge of social work theory and practice.

**Requisites:** Graduate/professional standing and concurrent enrollment in SOC WORK 801 or declared in the Professional or Personal Enrichment Program.

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Educate families, schools, and communities on the role and impact of school social work in promoting student success.  
Audience: Graduate

2. Understand and apply policy formation and implementation to analyze, influence and advocate for student and family supports in educational settings.

Audience: Graduate

3. Challenge norms, practices, and structural barriers that promote social inequities and educational disparities, structural racism, and school to prison pipeline. Utilize social work, anti-racist, and social justice theories for service delivery in schools.

Audience: Graduate

4. Promote and utilize data-informed decision-making through collecting and assessing data based on equity-based data management strategies applicable in schools.

Audience: Graduate

5. Engage in prevention-oriented systems of support, which may include behavior management, continuum of service provisions, and social-emotional support.

Audience: Graduate

6. Develop cooperative and collaborative relationships with community agencies and organizations and interdisciplinary teams to improve students' educational outcomes.

Audience: Graduate

7. Design and implement practice strategies and assessments with persons from diverse backgrounds as applicable in educational settings.

Audience: Graduate

**SOC WORK 818 – SOCIAL WORK PRACTICUM IN SCHOOLS II**

1 credit.

Practicum and supervision in school settings.

**Requisites:** Declared in Post-Bachelor's Personal Professional Development program, SOC WORK 816, and concurrent enrollment in SOC WORK 817

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate ethical and professional behavior.

Audience: Graduate

2. Engage Diversity and Difference in Practice

Audience: Graduate

3. Advance Human Rights and Social, Economic, and Environmental Justice

Audience: Graduate

4. Engage in Practice-informed Research and Research informed Practice

Audience: Graduate

5. Engage in Policy Practice

Audience: Graduate

**SOC WORK 821 – SOCIAL WORK PRACTICE IN AGING AND MENTAL HEALTH**

2 credits.

Addresses mental health needs of older adults and their family members.

Examines common mental health conditions, assessment, planning, evidence-based individual, family and group interventions, resources, cultural competence, ethical issues, and contexts for practice.

**Requisites:** (SOC WORK 441 and graduate/professional standing) or declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate ways to engage a diverse population through an intersectional framework.

Audience: Graduate

2. Articulate the forms and interventions that address and mitigate the impact of oppression and discrimination on the lived experience and circumstances of individuals, groups, and/or communities served.

Audience: Graduate

3. Articulate social work ethics and values, practice dilemmas, and ethical decision making.

Audience: Graduate

4. Determine, customize, and implement the most appropriate intervention(s) based on information, including the person's preferences, strengths, and cultural considerations.

Audience: Graduate

5. Identify, implement, and analyze evidence-informed interventions to achieve the goals of clients.

Audience: Graduate

6. Critically analyze outcomes and effectiveness of social work practice.

Audience: Graduate

**SOC WORK/LAW 822 – FAMILY LAW: MARRIAGE AND DIVORCE**

2-4 credits.

Marriage and less formal spousal relationships, husband-wife relationships in on-going marriage; divorce and its economic and custody consequences; post-divorce relationships.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC WORK/LAW 823 – FAMILY LAW: PARENT AND CHILD**

3-4 credits.

The relationship of parent and child; the rights of unmarried mothers and fathers and their children; parental rights to custody vis a vis third parties; parents' rights to make decisions affecting children; neglect; termination of parental rights; the foster care system and adoption.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SOC WORK 825 – GRIEF, DEATH, LOSS, AND LIFE**

2 credits.

Explores the nature and centrality of the experience of loss and subsequent grief, preparing individuals with strategies to intervene with individuals, families, and communities in response to a diversity of losses throughout the lifespan.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify key losses throughout human development beyond death.

Audience: Graduate

2. Apply theoretical models to a myriad of losses that will assist in understanding the grief experience.

Audience: Graduate

3. Use respectful and appropriate assessment methods with diverse populations.

Audience: Graduate

4. Develop effective interventions with grieving people across the lifespan.

Audience: Graduate

5. Recognize personal barriers to professional work with grieving people and how to create meaningful self-care routines.

Audience: Graduate

**SOC WORK 835 – ADVANCED SOCIAL WORK PRACTICE IN MENTAL HEALTH**

2 credits.

Focuses on the core practice theories, conceptual frameworks, and intervention skills necessary for social work practice in mental health.

**Requisites:** (SOC WORK 441 and graduate/professional standing) or declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate ways to engage a diverse population through an intersectional framework.

Audience: Graduate

2. Articulate the forms and interventions that address and mitigate the impact of oppression and discrimination on the lived experience and circumstances of individuals, groups, and/or communities served.

Audience: Graduate

3. Articulate social work ethics and values, practice dilemmas, and ethical decision making.

Audience: Graduate

4. Determine, customize, and implement the most appropriate intervention(s) based on information, including the person's preferences, strengths, and cultural considerations.

Audience: Graduate

5. Identify, implement, and analyze evidence-informed interventions to achieve the goals of clients.

Audience: Graduate

6. Critically analyze outcomes and effectiveness of social work practice.

Audience: Graduate

**SOC WORK 836 – MENTAL HEALTH POLICIES AND SERVICES**

2 credits.

Preparation for leadership roles in mental health programs, agencies, and organizations. Examine mental health policies and services that influence care and treatment of persons with mental illness and shape mental health care systems, programs and services

**Requisites:** SOC WORK 709 or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the history, organization, and implementation of US social welfare policies within the focal area  
Audience: Graduate

2. Articulate how social welfare issues and problems are defined, created, framed, and prioritized in the focal area  
Audience: Graduate

3. Understand the policymaking process, including the historical context, legislative activities, and the role of advocacy within the focal area  
Audience: Graduate

4. Analyze social welfare problems in the focal area and evaluate policy alternatives  
Audience: Graduate

5. Examine how social welfare policies in the focal area impact the lives of individuals, including those from marginalized, oppressed, or underserved communities, intentionally and unintentionally  
Audience: Graduate

6. Evaluate social welfare policies and advocate for reform in social welfare systems within the focal area  
Audience: Graduate

**SOC WORK 838 – PRINCIPLES OF PSYCHEDELIC HEALING**

2 credits.

Foundational knowledge of contemporary psychedelic healing and integration practices.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the current legal landscape of psychedelic-assisted therapies and healing practices at federal, state, and local levels.

Audience: Graduate

2. Examine ethical implications and considerations engaging with psychedelic healing as a licensed social worker.  
Audience: Graduate

3. Examine the historical and present-day impacts of colonialism, capitalism, and xenophobia on psychedelic healing practices and research.  
Audience: Graduate

4. Examine racial health and justice inequities in access and use of psychedelic healing therapies and research, and overall drug policy.  
Audience: Graduate

5. Become familiar with clinical protocols and effects for ketamine, MDMA, and psilocybin.  
Audience: Graduate

6. Develop integration skills and activities for supporting clients who have engaged in psychedelic-assisted therapies, research, underground or international work, and other experiences with mystical and/or non-ordinary states of consciousness.  
Audience: Graduate

### **SOC WORK 840 – ADVANCED MACRO PRACTICE**

2 credits.

Explore multiple approaches social workers use to foster social justice across organizations, communities, and societal levels. Practice advanced skills for addressing complex macro level practice issues.

**Requisites:** (Graduate/professional standing and SOC WORK 442) or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe concepts, theories, and models of advanced macro practice.

Audience: Graduate

2. Identify strategies, tools, and skills for creating change at organizational, community, and societal levels.

Audience: Graduate

3. Apply ethical principles of social justice to leadership, management, advocacy, and community organizing.

Audience: Graduate

4. Demonstrate macro advocacy skills using a social justice lens.

Audience: Graduate

### **SOC WORK 842 – SUPERVISION AND LEADERSHIP IN SOCIAL WORK AND HUMAN SERVICES ORGANIZATIONS**

3 credits.

Learn patterns, principles and methods of supervision and consultation.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze the historical progression of organizational theories and their relevance to modern social work settings, fostering a critical understanding of how these concepts translate into more effective and just practices.

Audience: Graduate

2. Articulate the distinctive roles of administrative, educational, and supportive functions in social work supervision.

Audience: Graduate

3. Evaluate supervisory and leadership attributes, methods, roles, and relationships against best practice standards to develop strategies for ethical supervision with cultural humility.

Audience: Graduate

4. Critique the formation and operation of staff groups in social work, including barriers to leadership and strategies for balancing individual and collective needs.

Audience: Graduate

5. Apply culturally responsive and anti-oppressive supervisory practices that respect ethical principles and legal repercussions within the hiring and retention processes.

Audience: Graduate

### **SOC WORK 852 – INFLUENCING POLITICAL SYSTEMS FOR SOCIAL CHANGE**

2 credits.

The focus on Social Work political advocacy strategies in public policy and government settings. To best prepare social workers seeking to impact public policy and social change and improve the social and economic status of individuals, families, communities and systems, examine the knowledge and political skills, strategies, techniques and actions which influence elected officials and policy makers and the policies, practices, programs, services and resources they establish for people in need through local, state and federal units of government.

**Requisites:** Declared in Social Work MSW, or Public Affairs MPA

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**SOC WORK 854 – CRISIS INTERVENTION**

2 credits.

Meaning of crisis to client systems and social work practitioners; principles guiding rational decision to intervene at the point of "critical incident".

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply healing-informed de-escalation approaches.

Audience: Graduate

2. Identify and use triage and anticipatory guidance in disaster response and client-centered safety planning honoring survivorship.

Audience: Graduate

3. Develop and practice teamwork skills essential to crisis care via collaborative case consultation.

Audience: Graduate

4. Understand ways that crisis experience is compounded by structural inequity, scarcity, and marginalization.

Audience: Graduate

5. Understand ways that belonging, information-seeking, and adaptability are protective factors.

Audience: Graduate

6. Explore ethical dilemmas common to crisis situations.

Audience: Graduate

**SOC WORK 861 – RECENT DEVELOPMENTS IN SOCIAL WORK**

1-3 credits.

Topics vary and focus on advanced practice.

**Requisites:** Declared in Social Work MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2020

**SOC WORK 863 – RECENT DEVELOPMENTS IN SOCIAL WORK**

2-3 credits.

Topics vary and focus on social problems/social issues.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Advance human rights and social and economic justice

Audience: Graduate

2. Critically examine contemporary issues in social work

Audience: Graduate

3. Demonstrate strategies and interventions designed to address social issues.

Audience: Graduate

**SOC WORK 870 – COGNITIVE AND BEHAVIORAL MENTAL HEALTH TREATMENTS FOR ADULTS**

2 credits.

Evidence-based cognitive and behavioral interventions used by social workers in the treatment of mental health challenges.

**Requisites:** SOC WORK 612 and graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss the benefits and limitations of cognitive and behavioral interventions for adults in the provision of culturally responsive social work practice.

Audience: Graduate

2. Understand and explain the theoretical tenets, rationale and concepts of cognitive behavioral therapy (CBT).

Audience: Graduate

3. Apply the principles and methods of cognitive behavioral therapy in mental health assessment, intervention and evaluation for a variety of mental health conditions.

Audience: Graduate

4. Formulate a CBT case conceptualization and treatment plan.

Audience: Graduate

### **SOC WORK 873 – SOCIAL WORK PRACTICE IN HEALTH CARE**

2 credits.

Advanced practice knowledge and skills for social workers practicing in health and health care settings.

**Requisites:** (SOC WORK 441 and graduate/professional standing) or declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Articulate ways to engage a diverse population through an intersectional framework.

Audience: Graduate

2. Articulate the forms and interventions that address and mitigate the impact of oppression and discrimination on the lived experience and circumstances of individuals, groups, and/or communities served.

Audience: Graduate

3. Articulate social work ethics and values, practice dilemmas, and ethical decision making.

Audience: Graduate

4. Determine, customize, and implement the most appropriate intervention(s) based on information, including the person's preferences, strengths, and cultural considerations.

Audience: Graduate

5. Identify, implement, and analyze evidence-informed interventions to achieve the goals of clients.

Audience: Graduate

6. Critically analyze outcomes and effectiveness of social work practice.

Audience: Graduate

### **SOC WORK 874 – HEALTH, AGING, AND DISABILITY PRACTICE FOR THE 21ST CENTURY**

2 credits.

Advanced practice knowledge and skills essential for social workers practicing in health, aging, and disability care settings.

**Requisites:** (Graduate/professional standing, SOC WORK 441, and 442) or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand public benefits, insurance and funding that pays for services clients in health, aging and disability practice settings often utilize.

Audience: Graduate

2. Develop advanced practice knowledge and skills for interprofessional practice in health, aging and disability practice settings.

Audience: Graduate

3. Demonstrate knowledge of the needs of clients across the life span, including the needs of special populations and the impact health care disparities, socio-economic factors, age, gender, sexual orientation, disability, ethnicity and intersectionality have on client outcomes.

Audience: Graduate

4. Understand the values and ethics of the profession in relation to health, aging and disability practice settings.

Audience: Graduate

**SOC WORK 875 – HEALTH, AGING, AND DISABILITY POLICY AND SERVICES**

2 credits.

Contemporary organization of health care. Policies and services for older adults and people with disabilities.

**Requisites:** SOC WORK 709 or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the history, organization, and implementation of US social welfare policies within the focal area.

Audience: Graduate

2. Articulate how social welfare issues and problems are defined, created, framed, and prioritized in the focal area.

Audience: Graduate

3. Understand the policymaking process, including the historical context, legislative activities, and the role of advocacy within the focal area.

Audience: Graduate

4. Analyze social welfare problems in the focal area and evaluate policy alternatives.

Audience: Graduate

5. Examine how social welfare policies in the focal area impact the lives of individuals, including those from marginalized, oppressed, or underserved communities, intentionally and unintentionally.

Audience: Graduate

6. Evaluate social welfare policies and advocate for reform in social welfare systems within the focal area.

Audience: Graduate

**SOC WORK/ED PSYCH/HDFS/NURSING 880 – PREVENTION SCIENCE**

3 credits.

Theoretical, empirical and practical foundation for prevention science as it relates to the prevention of human social problems. Research and evaluation methods, program design strategies, best practices and policy as they relate to the field of prevention are also examined.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC WORK/ED PSYCH/HDFS/NURSING 881 – CAPSTONE SEMINAR IN PREVENTION SCIENCE**

1 credit.

An opportunity to meet with prevention professionals and scholars from across campus and the community to explore current and emerging issues of prevention research and professional practice. Students must complete HDFS/ED PSYCH/NURSING/SOC WORK 880 before taking this course.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SOC WORK 890 – THESIS-RESEARCH**

1-6 credits.

Research and thesis for MSW students who wish to submit a master's thesis or conduct independent research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2021

## **SOC WORK 920 – CHILD, YOUTH, AND FAMILY POLICIES AND SERVICES**

2 credits.

Considers legislation, policies, and institutional structures that affect children, youth, and families across multiple service systems.

**Requisites:** SOC WORK 709 or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the history, organization, and implementation of US social welfare policies within the focal area.

Audience: Graduate

2. Articulate how social welfare issues and problems are defined, created, framed, and prioritized in the focal area.

Audience: Graduate

3. Understand the policymaking process, including the historical context, legislative activities, and the role of advocacy within the focal area.

Audience: Graduate

4. Analyze social welfare problems in the focal area and evaluate policy alternatives.

Audience: Graduate

5. Examine how social welfare policies in the focal area impact the lives of individuals, including those from marginalized, oppressed, or underserved communities, intentionally and unintentionally.

Audience: Graduate

6. Evaluate social welfare policies and advocate for reform in social welfare systems within the focal area.

Audience: Graduate

## **SOC WORK 921 – CHILD WELFARE POLICIES AND SERVICES**

2 credits.

Implications of knowledge from the social and behavioral sciences and public welfare policy on child welfare problems and services.

**Requisites:** SOC WORK 709 or Declared in Social Work Advanced Standing MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the history, organization, and implementation of US social welfare policies within the focal area.

Audience: Graduate

2. Articulate how social welfare issues and problems are defined, created, framed, and prioritized in the focal area.

Audience: Graduate

3. Understand the policymaking process, including the historical context, legislative activities, and the role of advocacy within the focal area.

Audience: Graduate

4. Analyze social welfare problems in the focal area and evaluate policy alternatives.

Audience: Graduate

5. Examine how social welfare policies in the focal area impact the lives of individuals, including those from marginalized, oppressed, or underserved communities, intentionally and unintentionally.

Audience: Graduate

6. Evaluate social welfare policies and advocate for reform in social welfare systems within the focal area.

Audience: Graduate

## **SOC WORK 924 – FAMILY PROBLEMS AND SOCIAL WORK**

2-3 credits.

Review of family theory and its relevance for social work practice; an analysis of family subsystems in the U.S.; current research on the American family.

**Requisites:** Declared in Social Work MSW

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**SOC WORK 929 – SOCIAL WORK AND SUBSTANCE MISUSE**

2 credits.

Learn to work with individuals impacted by substance misuse. The history, current understanding, assessment, and treatment of problematic substance use will be described.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the biopsychosocial approach and its relevance to substance misuse and addiction

Audience: Graduate

2. Recognize standard tools used to screen and assess substance misuse and Substance Use Disorders (SUDs)

Audience: Graduate

3. Identify different types of strategies and interventions designed to address problematic substance use.

Audience: Graduate

4. Create treatment plans to help coordinate care for individuals impacted by substance misuse or diagnosed with SUDs.

Audience: Graduate

5. Recognize the critical components of a treatment plan for addressing substance misuse

Audience: Graduate

**SOC WORK/ED PSYCH 945 – EVALUATION RESEARCH**

3 credits.

A comprehensive introduction to practice of program evaluation research in social welfare and human development. Developments in descriptive, experimental, quasi-experimental, theory-driven, and naturalistic evaluations detailed. Topics include assessment, evaluation design, monitoring, outcome evaluation, selection bias, program theory, meta-analysis and utilization.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SOC WORK 946 – FACULTY RESEARCH SEMINAR**

1 credit.

Further the socialization of students to the Ph.D. program. Provides opportunities for faculty to discuss research interests and doctoral education.

**Requisites:** Declared in Social Welfare graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC WORK 947 – STUDENT RESEARCH SEMINAR**

1 credit.

Provides a forum to discuss experiences, success strategies and research interests; receive feedback on research and later, on colloquia they prepare for job searches.

**Requisites:** Declared in Social Welfare graduate program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC WORK 948 – PROSEMINAR**

1-3 credits.

Quantitative research methods seminars for research in the social and behavioral sciences.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SOC WORK 949 – PROSEMINAR**

1-3 credits.

Qualitative research methods seminars for research in the social and behavioral sciences.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC WORK 950 – PHD PROSEMINAR**

1-3 credits.

Social policy seminars. Contemporary social welfare policy concerns are addressed utilizing a policy analytics framework. Poverty and Income Support Policy; Family Theory Policy; Child Development and Policy; and Social Determinants of Health and Policy are examples of topics offered.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC WORK 951 – PHD PROSEMINAR**

1-3 credits.

Applied theory seminars. Provide a model of the application of social theory to social problems. Adult Mental Health; Microeconomic Theory Applied to Social Problems; and Child Welfare are examples of topics offered.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC WORK 952 – PHD PROSEMINAR**

3 credits.

Application of research methods seminars. Practical experience and application of research knowledge and skills. Applied data analysis, proposal and grant Writing, and research methods in communities of color are examples of topics addressed.

**Requisites:** Graduate Students Only**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**SOC WORK 990 – THESIS-RESEARCH**

2-3 credits.

Dissertation preparation.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**SOC WORK 999 – INDEPENDENT READING**

1-9 credits.

Focused work on a topic or problem of graduate student interest under supervision of social work instructors.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025

## SOCIOLOGY (SOC)

**SOC 120 – MARRIAGE AND FAMILY**

3-4 credits.

Sociology of the family. Demographic, social-psychological, economic, and historical aspects. Union formation and dissolution. Childbearing and childrearing. Social stratification and the family. Intergenerational support. Social consequences of family behaviors.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC 125 – AMERICAN SOCIETY: HOW IT REALLY WORKS**

3-4 credits.

Explanation of US performance in realizing the values of freedom, fairness, and democracy. Topics include markets, capitalism, democracy, capitalist democracy; class, race, and gender inequalities; militarism and US international role; and US electoral politics, media, and social mobilization.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC/LEGAL ST 131 – CRIMINAL JUSTICE IN AMERICA**

3-4 credits.

Day-to-day functioning of the elements of the criminal justice system in the U.S. Nature of crime in the U.S., ideas about causes and solutions. Emphasis on the sociology of the components of criminal justice system--organization and roles of police, lawyers, court and correctional personnel.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Assess evidence and critically evaluate research-based arguments concerning criminal justice in academic journals, policy studies, or popular media.

Audience: Undergraduate

2. Build arguments clearly and effectively and critically analyze evidence in both oral presentations and papers.

Audience: Undergraduate

3. Think critically about the functioning of law and its effects on society, going beyond the surface of crime as a social phenomenon, discovering the "why" and "how" of the socio-legal order, and assessing alternate explanations for phenomena.

Audience: Undergraduate

4. Analyze sentencing and carceral practices of the United States criminal legal system in the context of larger political, social, legal, and economic forces.

Audience: Undergraduate

5. Evaluate social phenomena and diversity in global perspective, comparing how different cultures, groups, and societies understand and respond to crime.

Audience: Undergraduate

6. Work effectively in groups, responding to group dynamics among people from different backgrounds with different strengths and weaknesses.

Audience: Undergraduate

### **SOC 134 – SOCIOLOGY OF RACE & ETHNICITY IN THE UNITED STATES**

3-4 credits.

The nature of inter-group relations; emphasis on various forms of racism, discrimination, and white privilege; historical background and characteristics of American Indians, African Americans, Hispanic Americans, Asian Americans and other racial and ethnic minorities; a consideration of economic, housing, political, legal, educational, familial, and health challenges faced by minority groups in US society.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate an understanding of the impact of America's racial history on the present.

Audience: Undergraduate

2. Recognize race and ethnicity in both institutional and interpersonal contexts.

Audience: Undergraduate

3. Recognize and question hidden racial assumptions in social discourses.

Audience: Undergraduate

4. Develop an improved ability to successfully participate in a multicultural society.

Audience: Undergraduate

5. Collect data, analyze results, and draw conclusions.

Audience: Undergraduate

6. Read and critically evaluate published research in academic journals.

Audience: Undergraduate

7. Improve academic and professional communication skills.

Audience: Undergraduate

### **SOC 138 – THE SOCIOLOGY OF GENDER**

3-4 credits.

A sociological examination of the status and roles of women and men in society, including the experiences of marriage, parenthood, employment and occupational attainment, socialization into sex roles and cultural reinforcement of these. Attention will be given to both existing patterns and change in those patterns.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SOC/C&E SOC 140 – INTRODUCTION TO COMMUNITY AND ENVIRONMENTAL SOCIOLOGY**

4 credits.

Sociological examination of the linkages between the social and biophysical dimensions of the environment. Key topics include community organizing, local food systems, energy transitions, environmental justice, resource dependence, and sustainable development.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand how social science arguments are constructed and evaluated.

Audience: Undergraduate

2. Learn and practice core elements of sociological reasoning, including making connections between a social phenomenon and its larger context; evaluating the "situated" nature of knowledge; and recognizing the paradigms, or knowledge frameworks, that structure our thinking about social issues.

Audience: Undergraduate

3. Gain experience critically evaluating various sources of knowledge and data about social issues.

Audience: Undergraduate

4. Become familiar with key concepts such as: "community," "development," "growth," "economic security," "environmental justice," "sustainability," "globalization," and "neoliberalism;" learn how these concepts are involved in contemporary debates about what is fair, just, and desirable for the places where we live and the world as a whole.

Audience: Undergraduate

5. Become familiar with important actors in the social processes that affect our communities and environment, including government, corporations, transnational institutions and social movements; also learn about historical shifts in the relationships among these actors.

Audience: Undergraduate

6. Develop skills and frameworks for analyzing how social processes disparately affect different groups of people.

Audience: Undergraduate

7. Make connections between sociological theories and concepts and your own experiences.

Audience: Undergraduate

**SOC 144 – WELLBEING & SOCIETY**

3-4 credits.

Investigate how society shapes our vision of a good life and our capability to live well by surveying classical and recent sociological perspectives. Examine how social contexts and interactions create our understandings of a good life, including why we consider some things to be valuable, moral, or pleasurable. Develop an understanding of ways our wellbeing is contingent upon the actions of others. Evaluate conventional wisdom and scientific claims about what it means to live well and apply these concepts in your own life.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Apply sociological principles and research to explain how social processes shape cultural ideas about a good life and individuals' life goals

Audience: Undergraduate

2. Critically analyze assumptions undergirding common wisdom about wellbeing

Audience: Undergraduate

3. Articulate how various domains of social life enhance or diminish wellbeing using social research

Audience: Undergraduate

4. Assess the relevance of the social phenomena to private psychological experiences

Audience: Undergraduate

5. Apply sociological principles and research to understand one's impact on others' wellbeing

Audience: Undergraduate

**SOC/PSYCH 160 – HUMAN SEXUALITY: SOCIAL AND PSYCHOLOGICAL ISSUES**

3-4 credits.

Biological, psychological and sociological aspects of sexual relationships and behavior. Presents theoretical and empirical materials on sexuality throughout the life-course, including childhood, adolescence, adulthood, and later life. Attention is given to gender, religion, education and the law as they relate to sexual expression in society.

**Requisites:** Not open to students with credit for SOC/PSYCH 453.**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 170 – POPULATION PROBLEMS**

3-4 credits.

Social, economic, and political problems affected by birth and death rates, population size and distribution, voluntary and forced migration. World ecology, limits to growth, economic development, international conflict, environmental quality, metropolitan expansion, segregation by age, race, and wealth. Policies affecting reproduction, nuptiality, morbidity, mortality, migration.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC 181 – HONORS INTRODUCTORY SEMINAR-THE SOCIOLOGICAL ENTERPRISE**

3-4 credits.

An introduction to the paradigms, methods and substance of sociology.

**Requisites:** Declared in an Honors program and satisfied Communications A requirement. Not open to students with credit for C&E SOC/SOC 210 or 211.

**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**SOC 196 – ELEMENTARY SPECIAL TOPICS IN SOCIOLOGY**

3-4 credits.

Introduction to sociology concepts and methods.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Explain that sociology is a social science that uses research to answer questions about the relationships between individuals and social patterns and institutions.

Audience: Undergraduate

2. Demonstrate the ability to think critically about received explanations of social phenomena.

Audience: Undergraduate

3. Demonstrate a basic understanding of sociological research and methods.

Audience: Undergraduate

4. Reflect upon how the class materials allow them to better understand themselves and their societies by engaging with multiple and diverse perspectives.

Audience: Undergraduate

**SOC 198 – DIRECTED STUDY**

1-3 credits.

Program of study devised by a student in collaboration with a faculty member. Open only to freshmen and sophomores.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2014**SOC 199 – DIRECTED STUDY**

1-3 credits.

Program of study devised by a student in collaboration with a faculty member. Open only to Freshmen and sophomores.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2021**SOC/GEN&WS 200 – INTRODUCTION TO LESBIAN, GAY, BISEXUAL, TRANSGENDER AND QUEER+ STUDIES**

3-4 credits.

A multidisciplinary introduction to lesbian, gay, bisexual, transgender, and queer+ (LGBTQ+) studies, including theories of identity formation, different societal interaction with LGBTQ+ communities, LGBTQ+ cultures in history, and contemporary legal and political issues. Course materials explore the intersections between LGBTQ+ identities and other socially marginalized identities, including (but not limited to) those based on race, ethnicity, religion and disability.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**SOC 205 – INTERCULTURAL DIALOGUES**

3 credits.

Promotes diversity by bringing students of different backgrounds together for discussion, projects, and gatherings. Gain intergroup and critical thinking skills to promote diversity and equity in classroom and professional settings. Introduces sociological analysis of race, ethnicity, and other intersecting categories.

**Requisites:** Consent of instructor**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**SOC 206 – LEADERSHIP IN INTERCULTURAL DIALOGUES**

3 credits.

Gain skills for designing and facilitating effective dialogue on topics pertaining to race, ethnicity, and other categories of social difference as a facilitator and/or apprentice for SOC 205. Completion of SOC 205 required.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2022**SOC/C&E SOC 210 – SURVEY OF SOCIOLOGY**

3-4 credits.

Introduction to the field of American sociology, its subfields and specialized areas of research, theoretical traditions and research methods.

**Requisites:** Satisfied Communications A requirement. Not open to students with credit for SOC 181 or C&E SOC/SOC 211**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**SOC/C&E SOC 211 – THE SOCIOLOGICAL ENTERPRISE**

3 credits.

Basic principles and definitions of sociology. Readings and discussion of the perspectives of sociology, the individual and society, groups and social process, stratification, organizations and power, demography, and social change.

**Requisites:** Not open to students with credit for SOC 181 or C&E SOC/ SOC 210

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze and discuss what sociologists (and scholars in "neighboring" disciplines) have written.

Audience: Undergraduate

2. Perform some forms of sociological research and writing.

Audience: Undergraduate

**SOC/ASIAN AM 220 – ETHNIC MOVEMENTS IN THE UNITED STATES**

3-4 credits.

Sociological analysis of historical and recent ethnic/racial conflict and movements in the U.S., including the relations between European Americans, African Americans, Mexican Americans, Native Americans, and Asian Americans, with additional material on other groups and relations.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC/C&E SOC 222 – FOOD, CULTURE, AND SOCIETY**

3 credits.

Social and cultural dimensions of food production and consumption. Uses historical and cross-cultural analytical frameworks. Treats a wide variety of topics including indigenous, racial, and ethnic foodways, industrialized food systems, sustainable agriculture, movements for food justice.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge about how the system of food production, distribution and consumption in the United States is organized, how it has changed, and how it is changing.

Audience: Undergraduate

2. Understand the ways that technologies, globalization, and social movements have affected the food system.

Audience: Undergraduate

3. Present clearly written, persuasive arguments in response to academic questions.

Audience: Undergraduate

4. Prepare for and present in oral discussion by offering points with evidence.

Audience: Undergraduate

5. Recognize, challenge and avoid false analogies, overgeneralizations, and other logical fallacies.

Audience: Undergraduate

**SOC 236 – BASCOM COURSE**

3 credits.

Developing skills in critical reading, logical thinking, use of evidence, and use of library resources. Emphasis on writing in the conventions of specific fields.

**Requisites:** Satisfied Communications A requirement

**Course Designation:** Gen Ed - Communication Part B

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SOC/ASIAN/GEOG/HISTORY/POLI SCI 244 – INTRODUCTION TO SOUTHEAST ASIA: VIETNAM TO THE PHILIPPINES**

4 credits.

As an introduction to Southeast Asia, covers the ethnic, cultural, religious, and political histories of the region from the classical states period to the present, with an emphasis on colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century, including an exposure to region's contemporary literature. Not open to students who completed LCA 244 prior to Fall 2019.

**Requisites:** None**Course Designation:** Breadth – Either Humanities or Social Science Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the ethnic, cultural, religious, and political histories of Southeast Asia from the classical states period to the present.

Audience: Undergraduate

2. Analyze colonialism, nationalism, decolonization, and the emergence of modern political and social systems into the 21st century in Southeast Asia.

Audience: Undergraduate

3. Explore contemporary literature in Southeast Asia.

Audience: Undergraduate

**SOC/C&E SOC 245 – TECHNOLOGY AND SOCIETY**

3 credits.

Covers technology, the social forces shaping its development, and social impacts of its adoption. Examine one's assumptions about technology and its relationship to society.

**Requisites:** None**Course Designation:** Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC/C&E SOC/F&W ECOL 248 – ENVIRONMENT, NATURAL RESOURCES, AND SOCIETY**

3 credits.

Introduces the concerns and principles of sociology through examination of human interaction with the natural environment. Places environmental issues such as resource depletion, population growth, food production, environmental regulation, and sustainability in national and global perspectives.

**Requisites:** None**Course Designation:** Breadth – Social Science

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**SOC/C&E SOC/HISTORY/POLI SCI 259 – FORWARD? THE WISCONSIN IDEA, PAST AND PRESENT**

1-3 credits.

Engage in ongoing reflection and dialogue on the Wisconsin Idea and how it informs the mission of the University of Wisconsin. Consider the Wisconsin Idea as it has developed since its beginnings, with a focus on what it means today and what it can mean in the future.

**Requisites:** Junior or senior standing only**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Listen respectfully to different opinions, respond rationally rather than emotionally, make reasoned arguments.

Audience: Undergraduate

2. Respond to another point of view with research and substantive comments or questions, present and support your own position, and thus engage in a wider conversation.

Audience: Undergraduate

3. Consider a specific question ("What makes an idea a Wisconsin Idea...?") and present a reasoned argument supporting the conclusion. (1-credit students)

Audience: Undergraduate

4. Deeply analyze an argument and respond by applying it to the student's own educational strengths and weaknesses. (3-credit students)

Audience: Undergraduate

5. Use course content to explain a controversial issue and suggest a course of action to address it, stating reasons, and anticipating counterarguments. (3-credit students)

Audience: Undergraduate

**SOC/AFROAMER/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/  
POLI SCI/SPANISH 260 – LATIN AMERICA: AN INTRODUCTION**  
3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None

**Course Designation:** Breadth - Social Science

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**SOC/GERMAN/RELIG ST 273 – GOD & MONEY**

3 credits.

Explores the historical connections between capitalism and religion. Considers if and how religious ideas and practices facilitated the rise of capitalism; asks whether religious institutions have supported the reproduction of social inequalities, unjust labor practices, and exploitative economies; and studies the role played by religious actors in the critique of capitalism. Pays attention to the historical specificity of the capitalist system, its conditions of emergence in the Christian West, and the effects of its globalization on non-Christian traditions. Covers topics including classical social theories of religion and capitalism; contemporary examples of religious practice and capital accumulation; and the relationship between religious movements and social-economic justice.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Demonstrate knowledge of debates surrounding the historical and theoretical relationship between religion and capitalism

Audience: Undergraduate

2. Discern and integrate divergent and contradictory perspectives on the relationship between religion and capitalism across a range of fields (e.g., philosophy, history, sociology) and contexts (e.g., America, Europe, Middle East, and South Asia)

Audience: Undergraduate

3. Cultivate skills in textual analysis and evaluate a range of formal and structural elements in a range of media

Audience: Undergraduate

4. Generate original ideas and texts, experimenting and taking risks, solving problems, and answering textual questions

Audience: Undergraduate

5. Write original, coherent, and compelling arguments that push beyond summary to analysis and independent and critical thinking in clear prose that meets expectations for grammatical correctness

Audience: Undergraduate

**SOC/AFRICAN/AFROAMER/ANTHRO/GEORG/HISTORY/  
POLI SCI 277 – AFRICA: AN INTRODUCTORY SURVEY**

4 credits.

African society and culture, polity and economy in multidisciplinary perspectives from prehistory and ancient kingdoms through the colonial period to contemporary developments, including modern nationalism, economic development and changing social structure.

**Requisites:** None

**Course Designation:** Breadth – Either Humanities or Social Science Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze African society and culture from a multidisciplinary perspective.

Audience: Undergraduate

2. Discuss polity and economy from prehistory and ancient kingdoms through the colonial period to contemporary developments.

Audience: Undergraduate

3. Study contemporary nationalism, economic development and changing social structure.

Audience: Undergraduate

**SOC 300 – SOCIOLOGY OF RACE, CLASS, GENDER, AND SEXUALITY**

3 credits.

A sociological examination of race, class, gender and sexuality – four central axes of social stratification, identity and experience that have real consequences in people's lives, the opportunities they have, and the challenges they face. Topics include sociological perspectives on how identities and differences are socially constructed and reproduced, and how these categories manifest themselves in inequities in institutions such as schools, workplaces, housing, and the law.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Understand each core concept from a sociological perspective, as a social construction that helps to rationalize and justify social inequality.

Audience: Undergraduate

2. Understand, in particular, the key role of race and ethnicity in the history of the United States, and how this influences students' daily lives.

Audience: Undergraduate

3. Understand the relationships among them: how race, class, gender, and sexuality intersect to shape individual experiences, interpersonal interactions, and society more broadly.

Audience: Undergraduate

4. Draw conclusions from an examination of how these differences and inequalities matter in a variety of institutional contexts, including the media, schools, the economy, and the legal and criminal justice system.

Audience: Undergraduate

5. Suggest and critically assess solutions to social inequality, and discuss strategies for social change.

Audience: Undergraduate

**SOC 320 – RESEARCH PRACTICUM IN SOCIOLOGY**

1-3 credits.

Practical experience in techniques of social research through work on a research project for the semester.

**Requisites:** SOC/C&E SOC 357

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**SOC/ASIAN 334 – GENDER, WORK, AND FAMILY IN EAST ASIA**  
3 credits.

An examination of contemporary East Asia (mainly South Korea, Japan, Taiwan, and China) by using concepts and frameworks from history, anthropology, sociology, political science, economics, and law. An emphasis will be on the intersection of multiple structures of inequality such as gender, race/ethnicity, citizenship, class, and sexuality.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain how institutional processes, including the labor market, family, and education generate, maintain, and change the cultural understandings of gender.

Audience: Undergraduate

2. List past and current studies on how and why female labor force participation and gender wage gap are different across Korea, Japan, Taiwan, and China.

Audience: Undergraduate

3. Answer the question of “Can women in East Asia have it all?” and of how social development influence women’s aspirations and choices, producing the patterned behaviors that we observe.

Audience: Undergraduate

4. Develop a comparative lens in constructing your own argument on whether – if so, how – different speeds of social change and development influence institutions and cultures of a society.

Audience: Undergraduate

5. Draw a conceptual map of cultural and structural foundations of gender inequality in the context of East Asia.

Audience: Undergraduate

**SOC/ASIAN 336 – SOCIAL CHANGE IN CONTEMPORARY SOUTH KOREA**  
3 credits.

An exploration of social continuity and change of contemporary South Korea. Covers different institutions of a society – political, economic, and societal/cultural spheres. Incorporates material from anthropology, sociology, political science, economics, and law. Focus on South Korea after the division of the 'two Koreas'.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Through a critique of the status quo in class, gender, and racial/ethnic dynamics of contemporary Korean society, an intermediate to advanced level of understanding of modern Korean society and its location in the modern world will be achieved.

Audience: Undergraduate

2. Discern the patterns, rules, and logic that undergird a social system and the consequences of these for social change and continuity within the Korean context.

Audience: Undergraduate

3. Be able to explain in your own language, how individuals’ lives are shaped by social institutions such as the family, education, and work.

Audience: Undergraduate

4. Increase the social science literacy of contemporary Korea.

Audience: Undergraduate

5. Create your own viewpoint on social issues, with the capability to support your arguments.

Audience: Undergraduate

**SOC/A A E/C&E SOC 340 – ISSUES IN FOOD SYSTEMS**  
3-4 credits.

With primary emphasis on the U.S., the course covers social, economic and biological dimensions of food systems. Using classroom and community experience, the course combines academic approaches with practitioner knowledge. A community project is required.

**Requisites:** SOC/C&E SOC 140, SOC 181, 210, or 211

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC/C&E SOC 341 – LABOR IN GLOBAL FOOD SYSTEMS**

3 credits.

Overview of our current food system and how new technologies and globalization are reshaping it, focusing especially on the implications for workers throughout the food chain. Learn about the ways that social movements are working to reshape commodity chains by promoting local production, fair trade, and labor justice.

**Requisites:** 3 credits in C&E SOC or SOC

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SOC/C&E SOC 343 – SOCIOLOGY OF HEALTH AND MEDICINE**

3 credits.

Social, cultural, and structural factors in shaping definitions of health and illness, distribution of disparate health outcomes, and the organization of health professions and healthcare.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand how concepts such as “disease” and “health” are socially constructed.

Audience: Undergraduate

2. Identify and describe how social contexts (e.g. race and gender) shape health outcomes and structure disparities.

Audience: Undergraduate

3. Identify the social and cultural shifts in medicine and healthcare.

Audience: Undergraduate

4. Critically analyze their own experiences with health, illness, and medicine using course material.

Audience: Undergraduate

5. Demonstrate understanding and engagement with course material and produce thoughtful and compelling arguments in assigned work.

Audience: Undergraduate

**SOC/C&E SOC/GEN&WS 347 – GENDER AND SEXUALITY IN RURAL PLACES**

3 credits.

A sociological examination of the influence of rurality and place on gender and sexual performances, norms, and identities in rural geographies.

**Requisites:** GEN&WS 101, 102, 103, C&E SOC/SOC 140, 210, 211, or SOC 181

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain the role of social organization and social change in shaping equities and disparities in environment, health, and community.

Audience: Undergraduate

2. Describe how rurality and place influence gender norms and performance in private and public spheres.

Audience: Undergraduate

3. Critique ideas related to gender, sexuality, and rurality, including anti-urbanism, metronormativity, the rural idyll, natural/unnatural, and visibility politics.

Audience: Undergraduate

4. Assess how discourses and ideas about gender and sexuality influence dominant and minority groups.

Audience: Undergraduate

**SOC 351 – INTRODUCTION TO SURVEY METHODS FOR SOCIAL RESEARCH**

3-4 credits.

Introduction to principles and basic techniques in surveys for social research. Specific topics include the basic concepts of sampling and survey measurement. Learn how survey researchers apply the methods presented and practice applying the concepts and methods learned. The techniques used in this class are relevant for many kinds of data collection and standardized measurement. Provides a substantial experience with practical research skills that are relevant in many academic and private sector contexts.

**Requisites:** Sophomore standing and (C&E SOC/SOC 357, 360, STAT 301, 371, ECON 310, PSYCH 210, GEOG 360, or MATH/STAT 310)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify basic sampling concepts and apply them when drawing and documenting a sample.

Audience: Undergraduate

2. Describe basic concepts of error in surveys, total survey error, variable errors and bias.

Audience: Undergraduate

3. Analyze the components of experiments with a variety of outcomes and designs relevant to survey methodology.

Audience: Undergraduate

4. Apply fundamental methods for question testing.

Audience: Undergraduate

5. Apply principles of question design in developing survey questions.

Audience: Undergraduate

6. Analyze split-ballot experiment, contextualize analysis with well-focused review of relevant literature, accurately describe results, and draw appropriate conclusions.

Audience: Undergraduate

7. Document work in professionally written reports.

Audience: Undergraduate

**SOC/C&E SOC 357 – METHODS OF SOCIOLOGICAL INQUIRY**

3-4 credits.

Scientific methods in the study of society; procedures for testing sociological theory: problem definition, hypothesis construction, collection and evaluation of data. Practical experience conducting small research projects.

**Requisites:** Sophomore standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**SOC/C&E SOC 360 – STATISTICS FOR SOCIOLOGISTS I**

4 credits.

Presentation of sociological data; descriptive statistics; probability theory and statistical inference; estimation and tests of hypotheses; regression and correlation and the analysis of contingency tables.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use the methods of quantitative social research to assemble, describe, and draw inference from quantitative data.

Audience: Undergraduate

2. Execute and present elementary statistical analyses.

Audience: Undergraduate

3. Critically evaluate statistical evidence in both academic and popular settings.

Audience: Undergraduate

**SOC/C&E SOC 361 – STATISTICS FOR SOCIOLOGISTS II**

4 credits.

Applied linear regression modeling for social scientists. Bivariate and multiple regression, dummy variables, interactions, nonlinear relationships, indirect effects and omitted variable bias, outliers, heteroskedasticity, and multicollinearity; associated diagnostics and corrections. Use of Stata and/or SAS for dataset creation and analysis.

**Requisites:** C&E SOC/SOC 360, ECON 310, PSYCH 210, GEOG 360, MATH/STAT 310, STAT 301, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Prepare oneself to conduct one's own research using linear and logistic regression analysis and secondary data sources, at a level befitting beginning research assistants on faculty research projects.

Audience: Both Grad & Undergrad

2. Find, download, and format social science data suitable for analysis.

Audience: Both Grad & Undergrad

3. Make, interpret, and critique advanced specifications involving dummy variables, interactions, and nonlinear transformations.

Audience: Both Grad & Undergrad

4. Use diagnostics for various threats to model fit and interpretation.

Audience: Both Grad & Undergrad

5. Establish a solid foundation for studying the many methods that are extensions of linear regression (including logistic regression).

Audience: Both Grad & Undergrad

6. Achieve a deep understanding of ordinary least squares regression (OLS).

Audience: Both Grad & Undergrad

7. Become expert at presenting quantitative results from OLS models in a substantively meaningful and accessible way.

Audience: Both Grad & Undergrad

8. Understand and critique the ways in which OLS is used in the field.

Audience: Both Grad & Undergrad

9. Prepare oneself to write an article-length description of an independent research project that uses linear or logistic regression.

Audience: Graduate

**SOC 362 – STATISTICS FOR SOCIOLOGISTS III**

4 credits.

Generalized linear models with selected applications to social science data. Topics: Review of multiple regression; properties of estimators; general linear restrictions; instrumental variables; two-stage least squares; panel data; fixed and random effects; logit, probit, and related models.

**Requisites:** C&E SOC/SOC 361, STAT 302, ECON 400, 410, MATH/STAT 309, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

Honors - Accelerated Honors (!)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize what statistical techniques are appropriate to extract answers for common sociological questions from data in a variety of realistic scenarios.

Audience: Both Grad & Undergrad

2. Acquire the necessary tools to become critical readers of the majority of quantitative research in sociology.

Audience: Both Grad & Undergrad

3. Use skills to execute quantitative empirical research and decide which specialized course they should take next in order to participate at the research frontier.

Audience: Graduate

**SOC/C&E SOC 365 – DATA MANAGEMENT FOR SOCIAL SCIENCE RESEARCH**

3-4 credits.

Understanding the structure of different types of social scientific data, techniques for data evaluation, cleaning, documentation and visual display, merging data from multiple sources, restructuring data for analysis.

**Requisites:** C&E SOC/SOC 360, PSYCH 210, STAT 301, ECON 310, MATH/STAT 310, or GEOG 360

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 375 – INTRODUCTION TO MATHEMATICAL SOCIOLOGY**

3 credits.

Explores mathematical models of social structure, focusing especially on social network analysis and related methods. Makes extensive use of matrix algebra and mathematical software.

**Requisites:** C&E SOC/SOC 360, PSYCH 210, STAT 301, ECON 310, MATH/STAT 310, or GEOG 360

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**SOC 376 – MATHEMATICAL MODELS OF SOCIAL SYSTEMS**

3 credits.

Explores mathematical models of social process employing dynamical systems, Markov chains, and simulation analysis. Examples will address a wide range of sociological topics including cultural evolution, demography, social influence, social-network formation, religion, residential segregation, and social movements.

**Requisites:** Junior standing and (SOC 375, MATH 320, 340, 341, or 375)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**SOC/GEN&WS/LEGAL ST 406 – LAW, SEXUALITY, & SOCIETY**

3–4 credits.

Examines the legal and social development and implications of laws governing sexual behavior, human reproduction, media, privacy, and topics related to sexuality, sex and gender. Includes historical analyses of laws connected to present day regulations of sexuality, demonstrating the origins of many of the world's most frequently debated civil rights issues. Chief focus on the United States legal system, with some content including examinations of institutions around the world. Investigates taken-for-granted knowledge and assumptions about sexuality and look at legal, cultural and social constructions of sex in society. Covers intersectional social implications, including race, (dis)ability, class, etc. Topics include: obscenity, pornography, sex work, sexual surrogacy, birth control, abortion, sex education, sexual violence, sex offenders, sexual citizenship rights, trans and intersex legal topics.

**Requisites:** GEN&WS 101, 102, 103 or SOC/LEGAL ST 131

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss social theory about law and human behavior, particularly human sexuality

Audience: Undergraduate

2. Explain historical roots of modern sexuality-related laws and legal systems worldwide

Audience: Undergraduate

3. Analyze topics related to sexuality and society; constructing arguments based on academic, peer-reviewed research

Audience: Undergraduate

4. Examine sociolegal governance over a wide variety of sexual behaviors and gender/sex topics in a critical, thorough, and thoughtful manner

Audience: Undergraduate

5. Comprehend and apply legal history, precedent, and course concepts to specific sociolegal cases concerning sexuality

Audience: Undergraduate

**SOC 421 – PROCESSES OF DEVIANT BEHAVIOR**

3–4 credits.

Factors and conditions that underlie disagreement about fundamental values which inform views and conceptualizations of deviance; their relation to personal and social maladjustment; deviant behavior across different social contexts.

**Requisites:** Junior standing or (SOC/LEGAL ST 131, SOC 181, C&E SOC/ SOC 210, or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**SOC/SOC WORK 422 – SOCIAL ISSUES IN AGING**

3 credits.

Origins, nature, scope and dynamics of the social problems of older adults and their families in the U.S. and to acquaint students with programs and services available to older adults.

**Requisites:** Sophomore standing and (SOC WORK 205, SOC 181, SOC/ C&E SOC 140, 210 or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC/ILS/JEWISH 423 – MODERN JEWISH THOUGHT**

3 credits.

How do Jews fit into the modern world? While the "Jewish Question" initially referred to debates about Jewish emancipation (the struggle for equal citizenship and social integration that started with the French Revolution), it later served to describe modern Jewish political and social thought about the identity, place, and role of the Jews in the modern world. Beginning in the late 19th century, as cultural assimilation, economic impoverishment in eastern Europe, and rising antisemitism sowed doubts about the viability of emancipation and traditionalism alike, Jewish thinkers proposed new answers to the Jewish question. Learn about some of the major answers they debated, including revolutionary universalistic utopias (socialism and Communism), various forms of Jewish nationalism, hyphenated identities, cultural pluralism, and cosmopolitanism. Work to contextualize these ideas historically while also considering whether and how they remain relevant to the present.

**Requisites:** Sophomore standing**Course Designation:** Breadth – Social Science

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Engage with major figures, ideas, and debates in the social and political thought of Jews about the "Jewish Question" from the late 19th century until the mid-20th century

Audience: Undergraduate

2. Understand these ideas in relation to the historical contexts in which they were produced

Audience: Undergraduate

3. Enter into a dialogue with past thinkers, critically assessing whether and how their ideas may remain relevant to the changed circumstances of the present

Audience: Undergraduate

**SOC/GEN&WS/LEGAL ST 425 – CRIME, GENDER AND JUSTICE**

3 credits.

Focuses on the intersection between gender, crime and justice from a cross-cultural perspective. The gendered nature of the criminal justice system, female experiences of crime, prosecution and incarceration as well as the extent to which women are victims, offenders, and participants in the criminal justice system will be explored. Special emphasis will be placed on the theoretical implications of offending behavior and the intersection of gender with sexuality, race, ethnicity and class. The goal of this course is to provide a foundation for critically assessing the often controversial issues surrounding race, gender, crime, and criminal justice in society.

**Requisites:** SOC/LEGAL ST 131, GEN&WS 101, 102, 103 or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Analyze the U.S. criminal justice system, including incarceration, sentencing, and policing, through the lens of gender studies

Audience: Undergraduate

2. Identify and describe criminological theories, specifically those focused on gender, race, class, and feminist academic thought

Audience: Undergraduate

3. Explore inequalities amongst gender groups and various other social intersections (race, class, ability, sexuality, age, parenthood, etc).

Audience: Undergraduate

4. Investigate topics related to gender and justice by conducting thorough literature reviews and preparing policy briefs with recommendations for legal change.

Audience: Undergraduate

5. Examine and discuss real-world experiences in criminal justice systems, both in the U.S. and abroad.

Audience: Undergraduate

**SOC/CHICLA/LEGAL ST 440 – ETHNICITY, RACE, AND JUSTICE**

3–4 credits.

An examination of ethnicity, race, and justice, with a specific emphasis on US Latinos, the largest minority group in the United States.

**Requisites:** C&E SOC/SOC 140, 210, 211, SOC 181, FOLKLORE/AFROAMER/AMER IND/ASIAN AM/CHICLA 102, CHICLA 201, CHICLA 210, CHICLA 230, POLI SCI/CHICLA 231, HISTORY/CHICLA/GEN&WS 245, LEGAL ST/SOC 131, or POLI SCI/LEGAL ST 217

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Discuss ethnic and racial differences in crime and criminal justice outcomes and analyze these patterns through the application of theory and empirical data in the social sciences.

Audience: Undergraduate

2. Engage major theoretical debates in social and legal scholarship. Why are there racial/ethnic disparities in crime and violence? How and why have these disparities changed over time? Are minorities treated differently by legal officials? Has mass incarceration mitigated or exacerbated racial and ethnic inequality? How has the Supreme Court viewed issues of ethnicity, race, and the law?

Audience: Undergraduate

3. Competently interpret representations of data and critically analyze study design in published research on ethnicity, race, and justice.

Audience: Undergraduate

4. Critically assess the often-controversial issues surrounding ethnicity, race, crime, and the law in society, drawing on readings and class discussion.

Audience: Undergraduate

**SOC 441 – CRIMINOLOGY**

3–4 credits.

Theoretical explanations of criminal behavior. Measurement of crime and evaluation of criminological research. Current issues in criminology and crime-related public policy.

**Requisites:** Junior standing or (SOC/LEGAL ST 131, SOC 181, C&E SOC/SOC 210, or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**SOC/CHICLA/LEGAL ST 443 – IMMIGRATION, CRIME, AND ENFORCEMENT**

3–4 credits.

A study of immigration, crime, and border enforcement, engaging both historical and present-day debates, focusing on Latino immigration and the U.S.-Mexico border.

**Requisites:** C&E SOC/SOC 140, 210, 211, SOC 181, FOLKLORE/AFROAMER/AMER IND/ASIAN AM/CHICLA 102, CHICLA 201, CHICLA 210, CHICLA 230, POLI SCI/CHICLA 231, HISTORY/CHICLA/GEN&WS 245, LEGAL ST/SOC 131, or POLI SCI/LEGAL ST 217

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Discuss trends in immigration, crime, and border enforcement in recent decades and analyze these patterns through the application of theory in the social sciences and empirical data.

Audience: Undergraduate

2. Engage major theoretical debates in migration scholarship. Why do people (not) move? How are migration decisions made? What effect does migration have on (a) receiving societies, (b) sending societies, and (c) migrants themselves? How is migration organized by gender? What differentiates forced and unforced migration? How are immigrants incorporated into new societies?

Audience: Undergraduate

3. Develop a broader understanding of border enforcement through critical analysis of immigration policies and practices from an international perspective. That is, are recent trends in border enforcement unique to the United States?

Audience: Undergraduate

4. Critically assess the often-controversial issues surrounding ethnicity, race, crime, and the law in society, drawing on readings and class discussion.

Audience: Undergraduate

### **SOC 444 – SOCIAL PSYCHOLOGY: A SOCIOLOGICAL PERSPECTIVE**

3-4 credits.

The systematic study of the individual in a social context, including social interaction, motivation, attitudes, conformity, communication, leadership, personal relationships, and behavior in small groups.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use the basic principles of critical thinking to understand, evaluate, and critique or justify the multitude of positions one might take in social psychology or any other field of inquiry.

Audience: Undergraduate

2. Become broadly familiar with the field of social psychology, including its theories, methods, and controversies, and to see how social psychology may fit into broader sociological research.

Audience: Undergraduate

3. Learn to read, summarize, and evaluate research in social psychology critically and intelligently, and to write on it clearly.

Audience: Undergraduate

4. Become more reflective by identifying the various social influences on their own attitudes, behaviors, and personalities, including family, friends, mass media, groups, and culture, and by analyzing their own everyday interactions using social psychology theories and research.

Audience: Undergraduate

### **SOC 446 – JUVENILE DELINQUENCY**

3-4 credits.

Concepts of childhood and delinquency. Measurement of delinquent behavior. Application of competing theories to relationships within the family, school, and peer group. Evaluation of programs for treatment, prevention, and control. The rise of the juvenile system.

**Requisites:** Junior standing or (SOC/LEGAL ST 131, SOC 181, C&E SOC/ SOC 210, or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

### **SOC/LEGAL ST 451 – RACE, FAMILY & THE STATE**

3 credits.

Examines the politics of state involvement in family life in America, particularly in poor and minoritized families. Investigates the state's role in the regulation of the family through systems of governance such as criminal justice, immigration, and welfare that shape the legal possibilities for family life. Incorporates sociological, historical, and legal scholarship to critically assess the structural influences shaping the experiences, choices, and legal possibilities for families of color.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify and describe key social science theories of race, ethnicity, and racism.

Audience: Undergraduate

2. Articulate how the concept of family is a social construct.

Audience: Undergraduate

3. Enumerate the ways state institutions intervene in family life, and how the role of race and racism these processes.

Audience: Undergraduate

4. Explain how cultural assumptions about the meanings and purpose attached to families influence policy making.

Audience: Undergraduate

5. Apply sociological research findings to evaluate family policy positions

Audience: Undergraduate

6. Communicate contemporary family policy issues to non-specialists through public speaking and writing.

Audience: Undergraduate

### **SOC/PSYCH 453 – HUMAN SEXUALITY**

4 credits.

Provides an interdisciplinary introduction to biological, psychological, and sociological aspects of human sexuality.

**Requisites:** PSYCH 202 or Sophomore standing. Not open to student with credit for SOC/PSYCH 160

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 460 – STUDY ABROAD IN DEMOGRAPHY AND ECOLOGY**

1-6 credits.

Provides a sociology area equivalency for demography and ecology courses taken in study abroad programs that do not equate exactly to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**SOC 461 – STUDY ABROAD IN ADDITIONAL METHODS AND STATISTICS**

1-6 credits.

Provides a sociology area equivalency for additional methods and statistics courses taken in study abroad programs that do not equate exactly to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**SOC 462 – STUDY ABROAD IN ADDITIONAL THEORY**

1-6 credits.

Provides a sociology area equivalency for additional theory courses taken in study abroad programs that do not equate exactly to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**SOC 463 – STUDY ABROAD IN DEVIANT BEHAVIOR**

1-6 credits.

Provides a sociology area equivalency for deviant behavior courses taken in study abroad programs that do not equate to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**SOC 464 – STUDY ABROAD IN SOCIAL PSYCHOLOGY**

1-6 credits.

Provides a sociology area equivalency for social psychology courses taken in study abroad programs that do not equate exactly to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**SOC 465 – STUDY ABROAD IN SOCIAL ORGANIZATION**

1-6 credits.

Provides a sociology area equivalency for social organization courses taken in study abroad programs that do not equate exactly to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**SOC/CHICLA 470 – SOCIODEMOGRAPHIC ANALYSIS OF MEXICAN MIGRATION**

3 credits.

Introduces students to social and demographic analysis and explanations of the historical and present day causes and consequences of migration of the largest immigrant group to the United States in the 20th century.

**Requisites:** SOC 134, 170, 181, SOC/ASIAN AM 220, SOC/C&E SOC 140, 210, 211, CHICLA 201, CHICLA 210, or POLI SCI/CHICLA 231; or graduate/professional standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Describe micro-level and macro-level patterns in Mexico-U.S. migration and analyze these patterns through the application of theory and empirical data in the social sciences.

Audience: Undergraduate

2. Examine major theoretical debates in migration scholarship. Why do people (not) move? How are migration decisions made? What effect does migration have on (a) receiving societies, (b) sending societies, and (c) migrants themselves? How is migration organized by gender? What differentiates forced and unforced migration? How are immigrants incorporated into new societies?

Audience: Undergraduate

3. Apply empirical findings on Mexico-U.S. migration to evaluate theories in migration scholarship.

Audience: Undergraduate

4. Competently interpret representations of social science data on Mexico-U.S. migration.

Audience: Undergraduate

5. Critically analyze study design in published social science research on Mexico-U.S. migration.

Audience: Undergraduate

**SOC/C&E SOC 475 – CLASSICAL SOCIOLOGICAL THEORY**

3 credits.

Classical theory; Marx, Durkheim, Weber, and other important classical theorists and schools of thought.

**Requisites:** Sophomore standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 476 – CONTEMPORARY SOCIOLOGICAL THEORY**

3 credits.

Norm and norm emergence, Preference formation, Ideology, Bounded Rationality, Rational Choice, Prospect Theory, Framing processes, Models of Collective Behaviors, Symbolic Interactionism, Communicative Action, Game Theory, Processes of Social Influence.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**SOC 496 – TOPICS IN SOCIOLOGY**

1-3 credits.

Intensive study of selected topics in sociology.

**Requisites:** Junior standing or (SOC 181, C&E SOC/SOC 210, or 211)

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC 497 – STUDY ABROAD IN SOCIOLOGY**

1-6 credits.

Provides a sociology area equivalency for courses taken in study abroad programs that do not equate to existing sociology courses. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2001

**SOC/C&E SOC 532 – HEALTH CARE ISSUES FOR INDIVIDUALS, FAMILIES AND SOCIETY**

3 credits.

Issues related to health and health care delivery in our society. Topics include social, cultural and ethical influences on consumer definitions of health and use of medical care, and on the health care system's responses.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**SOC/C&E SOC 533 – PUBLIC HEALTH IN RURAL & URBAN COMMUNITIES**

3 credits.

Sociological approaches to community, rural, and public health. Examines epidemiological evidence for and policy solutions to health issues that impact vulnerable populations in diverse geographic and social settings. Topics include mental health, environmental and occupational health, preventive care, substance abuse.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC 535 – TALK AND SOCIAL INTERACTION**

3 credits.

Focus on the systematic observation and analysis of face-to-face interaction. Sociological approaches to naturally occurring interaction--i.e., human talk and behavior that has been observed, audiorecorded, or videorecorded--will be explored. The approaches include ethnomethodology, conversational analysis, and Goffmanian sociology.

**Requisites:** Junior standing or (SOC 181, C&E SOC/SOC 210, or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SOC/C&E SOC/ENVIR ST 540 – SOCIOLOGY OF INTERNATIONAL DEVELOPMENT, ENVIRONMENT, AND SUSTAINABILITY**

3 credits.

Sociological analysis of relationships among economic growth, environmental sustainability and social justice in the developing world. Considers frameworks for understanding poverty, hunger, educational and technological inequality, and the impact of globalization on prospects for socially and ecologically sustainable development.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SOC/C&E SOC 541 – ENVIRONMENTAL STEWARDSHIP AND SOCIAL JUSTICE**

3 credits.

Application of sociological theory and analysis to environmental issues. Examines the ways in which environmental stewardship and conflict are embedded within broader cultural, social, and political contexts.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, 211, F&W ECOL/C&E SOC/SOC 248, ENVIR ST 112, 113, GEOG/ENVIR ST 139, 337, 339, GEOG 101, or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 543 – COLLECTIVE BEHAVIOR**

3 credits.

Emergence of various forms of collective behavior from social interactions, collective action problem, game theory, prospect theory, social networks, network effects, information cascade, increasing returns, social influence, epidemics, social movements, mass media.

**Requisites:** Junior standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 550 – COMPARATIVE RACIAL INEQUALITY**

3 credits.

An introduction to the sociological study of racial orders in comparative and historical perspective. As W.E.B. Du Bois famously wrote, "The problem of the twentieth century is the problem of the color line," but as he also insisted, the social meaning of race is shaped by specific historical and economic contexts. Half of the content focuses on the American experience, especially over the last 50 years, exploring historical and contemporary meanings of race in America, and how racial dynamics have changed (and not changed) across time. The other half continues to explore the American experience, but now using a comparative historical approach, discussing patterns of racial inequality and social change in South Africa and Brazil, both to understand how these issues have played out in those contexts, and to gain new insights into our experiences in the United States.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explore some of the effects the past has had on present day circumstances, perceptions of, and disparities in, race, both specifically in the U.S., and in comparison with other countries marked by racial disparities.

Audience: Undergraduate

2. Recognize and question cultural assumptions, rules, biases, and knowledge claims as they relate to race and ethnicity.

Audience: Undergraduate

3. Examine questions and make decisions with consideration for the cultural perspectives and worldviews of others.

Audience: Undergraduate

4. Use historical comparison to strengthen what CW Mills calls the 'sociological imagination,' especially by exploring similarities and differences across historical contexts.

Audience: Undergraduate

5. Explore theories of social change, with a focus on how transnational social movements can alter local political dynamics.

Audience: Undergraduate

6. Apply course content to their lives outside the classroom by respectfully participating in our multicultural society.

Audience: Undergraduate

**SOC/C&E SOC 573 – COMMUNITY ORGANIZATION AND CHANGE**

3 credits.

Examines theories of community change and different models of community organizing.

**Requisites:** Junior standing or (SOC 181, SOC/C&E SOC 140, 210, or 211)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**SOC 575 – SOCIOLOGICAL PERSPECTIVES ON THE LIFE COURSE AND AGING**

3 credits.

Age as a basis of societal differentiation in modern and premodern societies; social psychological, demographic, sociobiological, socioeconomic, and sociohistorical views of age-graded events and behaviors; examination of the life course and aging as sociological variables.

**Requisites:** Junior standing or SOC/C&E SOC 357

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**SOC/AMER IND/C&E SOC 578 – POVERTY AND PLACE**

3 credits.

The allocation of economic and social rewards in the United States; emphasis on persistently poor regions and communities; analysis of selected minority groups and their poverty statuses; poverty programs and their consequences for structural and cultural changes.

**Requisites:** SOC/C&E SOC 140, 210, 211, or SOC 181

**Course Designation:** Ethnic St – Counts toward Ethnic Studies requirement

Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC/C&E SOC/URB R PL 617 – COMMUNITY DEVELOPMENT**

3 credits.

Social, cultural and personality factors influencing community development, with reference to developing countries as well as contemporary rural communities; consideration of theoretical and operational issues.

**Requisites:** SOC/C&E SOC 140, 210, 211, SOC 181, or graduate/professional standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SOC/C&E SOC 618 – SOCIAL NETWORK ANALYSIS**

3 credits.

Social network analysis is a social scientific approach examining individuals as embedded in networks of social relations. Covers the fundamentals of network thinking, network tools, and the analysis and presentation of social network data. Direct practice with network data using software R.

**Requisites:** Junior standing and (C&E SOC/SOC 360, STAT 301, STAT 371, ECON 310, PSYCH 210, GEOG 360, STAT/MATH 310, or GEN BUS 303)

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify when data are suitable for network analysis.

Audience: Both Grad & Undergrad

2. Choose the appropriate network analysis techniques to answer one's research questions.

Audience: Both Grad & Undergrad

3. Use the R software and packages to perform the analyses.

Audience: Both Grad & Undergrad

4. Critically read network studies from across the social sciences.

Audience: Both Grad & Undergrad

5. Prepare a substantive social network analysis up to publication standards.

Audience: Graduate

**SOC 624 – POLITICAL SOCIOLOGY**

3 credits.

Theory of democracy, political culture, comparative studies of voting behavior, political decisions, collective violence, regime breakdowns, social movements, mobilization processes, frame analysis.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 626 – SOCIAL MOVEMENTS**

3 credits.

Role of social structure, authorities and movement participants, and leadership in the origins, mobilization, participation, strategy and tactics, and potential for success of social movements.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2024

**SOC/C&E SOC 630 – SOCIOLOGY OF DEVELOPING SOCIETIES/THIRD WORLD**

3 credits.

Review of problems and prospects of so-called "developing societies." Includes theory of economic/social development, political economic organizations of "developing" societies, history of colonialism/imperialism, attempts to industrialize and results of those attempts.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**SOC 631 – APPLIED QUALITATIVE METHODS FOR SOCIAL SCIENCE**

3-4 credits.

Introduction to qualitative research methods most commonly used by practitioners in business, marketing and communications, healthcare, education, government, social service organizations, and think tanks. Produce high-quality data using open-ended survey questions, interviews, focus groups, observations and media/content analysis. Techniques for analyzing and presenting qualitative data, including text-based and visual reports.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of the pros and cons of different qualitative methods for answering different types of research questions

Audience: Undergraduate

2. Produce high quality qualitative data

Audience: Undergraduate

3. Analyze qualitative data to answer questions found in many types of workplaces in which applied social science research is conducted

Audience: Undergraduate

4. Effectively communicate the findings from qualitative data to a variety of audiences and practitioners.

Audience: Undergraduate

**SOC 632 – SOCIOLOGY OF ORGANIZATIONS**

3-4 credits.

Sociological perspectives on the structures and processes of large-scale formal organizations in Western society; a wide ranging examination of contemporary organizational theory and research, with illustrations from business, governmental, military, political and educational organizations.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC 633 – SOCIAL STRATIFICATION**

3 credits.

Classical and contemporary theories of the nature of social inequality; recent patterns and trends in inequality in the US; analysis of inequalities based on class, race, gender; the relationship of inequality to globalization, immigration, and politics.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 640 – SOCIOLOGY OF THE FAMILY**

3 credits.

Examines family life from a sociological perspective, drawing on insights from demography, economics, history and anthropology. Considers theories and empirical evidence about families as social institutions; patterns of family change; and families and inequality.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SOC/LAW/LEGAL ST 641 – SOCIOLOGY OF LAW**

3–4 credits.

Theory and research on the social origins, processes and effects of law; examination of law-related behavior, legal institutions, law and social structure, and law and social change; linkage to contemporary theoretical and political debates.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC/C&E SOC/URB R PL 645 – MODERN AMERICAN COMMUNITIES**

3 credits.

Relevance of the concept of community to American society. Review of several basic theories of community and analysis of the nature of community in the broader political and economic context.

**Requisites:** SOC/C&E SOC 140, 210, 211, SOC 181, or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021**SOC 647 – SOCIOLOGY OF SPORT**

3 credits.

Sport as a social institution; social characteristics and problems of sport at the youth, school, college, and professional levels.

**Requisites:** Junior standing or (SOC 181, C&E SOC/SOC 210, or 211)**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SOC/ED POL 648 – SOCIOLOGY OF EDUCATION**

3 credits.

Utilizes a sociological lens to examine American schools and schooling, with a particular focus on social inequality in the U.S. and how class, race, and gender intersect in the experiences of students. Examine how schools and schooling relate to broader social structures, institutions, and practices with a focus on inequality in public education.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Articulate the relationship between education and social inequality in the U.S. along various dimensions

Audience: Both Grad &amp; Undergrad

2. Apply critical thinking skills to your understanding of educational institutions and individual educational experiences

Audience: Both Grad &amp; Undergrad

3. Effectively communicate what you learned about the sociology of education both orally and in writing

Audience: Both Grad &amp; Undergrad

4. Read and evaluate sociological research on education and schooling

Audience: Undergraduate

5. Read and evaluate sociological research on education and schooling and relate to own methodological and theoretical backgrounds

Audience: Graduate

**SOC/C&E SOC 650 – SOCIOLOGY OF AGRICULTURE**

3 credits.

Introduction to sociology of agriculture in advanced industrial-capitalist societies, including theoretical, historical, and empirical issues of agriculture in the United States.

**Requisites:** SOC 181, SOC/C&E SOC 140, 210, or 211**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**SOC/C&E SOC 652 – SOCIOLOGY OF ECONOMIC INSTITUTIONS**

3 credits.

Sociological perspectives on the organization of the firm, financial markets, and work, intermediate associations (unions, ethnic economies), the state, and the international economy. Contrast between neoclassical, traditional institutionalist, post-fordist, and neo-fordist perspectives on the nature and evolution of these institutions.

**Requisites:** Junior standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC/HISTORY 670 – CAPITALISM, SOCIALISM, AND DEMOCRACY IN AMERICA SINCE 1890**

3–4 credits.

Political institutional arrangements which have emerged since 1890 and how they have influenced social and economic policies implemented since the Second World War. Why the working class has been politically weak in America; policy consequences of this weakness.

**Requisites:** Junior standing and (SOC 181, SOC/C&E SOC 140, 210, 211, HISTORY 102 or 109), or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SOC 674 – DEMOGRAPHIC TECHNIQUES I**

3 credits.

Methods of measurement for enumeration and registration data; construction of life tables; measures of fertility, nuptiality and migration; examination of census variables.

**Requisites:** SOC/C&E SOC 357, 360, STAT 301, 371, ECON 310, PSYCH 210, GEOG 360, MATH/STAT 310, or graduate/professional standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC 678 – SOCIOLOGY OF PERSECUTION**

3 credits.

Persecution as an object of sociological investigation with special focus on the perpetrators' motivations, the machinery of persecution policies, the behaviors of state agents, and the attitudes and strategies displayed by the potential victims.

**Requisites:** Junior standing and (SOC 181, SOC/C&E SOC 140, 210, or 211), or graduate/professional standing**Course Designation:** Breadth – Social Science

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing Honors in the Major.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual research and study for students completing Honors in the Major.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC 691 – SENIOR THESIS**

2–3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 692 – SENIOR THESIS**

2–3 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC/C&E SOC 693 – PRACTICUM IN ANALYSIS AND RESEARCH**

3 credits.

Practical experience in techniques of social research through assignment to a research project for the semester. Focuses on the art and practice of research and the writing of research reports.

**Requisites:** SOC/C&E SOC 357, 361 and declared in Sociology: Concentration in Analysis and Research**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Honors – Accelerated Honors (!)

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**SOC/LEGAL ST 694 – CRIMINAL JUSTICE FIELD OBSERVATION**

2-3 credits.

Field placements and seminar sessions to develop sociological understanding of criminal justice processes. Placement in criminal justice agencies and lectures and discussions applying concepts and theories to field experience.

**Requisites:** Declared in Criminal Justice certificate and LEGAL ST/ SOC 131

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the role that mental health or substance abuse can play in one's contact with the criminal legal system.

Audience: Undergraduate

2. Assess how an individual's race and socio-economic class can impact the likelihood of contact with the American criminal legal system, as well as how it impacts their experience.

Audience: Undergraduate

3. Evaluate how consideration of a client's/ individual's cultural heritage and practices can improve one's effectiveness in providing services.

Audience: Undergraduate

4. Analyze the potential effects of trauma exposure on a practitioner or service provider and compare self-care strategies to deal with this.

Audience: Undergraduate

5. Conduct client interviews based on knowledge of the steps needed to prepare for interviews and document the information gathered.

Audience: Undergraduate

6. Describe the breadth of stakeholders to the work being conducted by community agencies.

Audience: Undergraduate

**SOC 698 – DIRECTED STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC 699 – DIRECTED STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC 700 – INTRODUCTORY PROSEMINAR FOR GRADUATE STUDENTS**

1 credit.

An introduction to current issues in sociology and its subfields.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SOC/C&E SOC/ISY E/NE 708 – SOCIETAL RISK MANAGEMENT OF TECHNOLOGICAL HAZARDS**

3 credits.

Issues involved in decision-making regarding technological risks and risk management in areas such as nuclear power, hazardous waste disposal, and pollution control. Risk perception and cognitive biases; risk analysis and decision analysis; political issues in risk management; regulatory mechanisms; and risk communication. Selected case studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**SOC/C&E SOC 724 – INTERMEDIATE POLITICAL SOCIOLOGY**

3 credits.

Critical examination of theories and research in political sociology. Topics include: power and interests, state-formation, social movements, class and political behavior, revolutions, ideology, and states and social policy.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC/C&E SOC 730 – INTERMEDIATE SOCIAL PSYCHOLOGY: THE INDIVIDUAL AND SOCIETY**

3 credits.

Major social psychological theories and research that focus on the individual in social context. Topics include: perspectives on socialization, the self, social perception and attribution, attitudes, language and nonverbal communication, and attraction and relationships.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**SOC 735 – ETHNOMETHODOLOGY & CONVERSATION ANALYSIS**

3 credits.

Analysis of everyday, local practices for assembling coherent and stable social environments. The focus on everyday practices derives from both ethnomethodological and conversation analytic literatures and investigations. Instruction will involve both didactic or illustrative presentations and hands-on work with interactional data from a variety of social settings, whether informal telephone calls, or more formal work or organizational settings.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2019**SOC/C&E SOC 750 – RESEARCH METHODS IN SOCIOLOGY**

3 credits.

Application of scientific methods to the analysis of social phenomena; methodological orientations in sociology; types of research procedure: nature of sociological variables.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 751 – SURVEY METHODS FOR SOCIAL RESEARCH**

3 credits.

Theoretical and practical issues involved in the design of surveys and their components. Apply knowledge of survey research techniques to a specific and complete research project.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2018**SOC 752 – MEASUREMENT AND QUESTIONNAIRES FOR SURVEY RESEARCH**

3 credits.

Analysis and presentation of survey results through contingency table analysis. Techniques for assessing the quality of data produced by survey methods. Practical application of material to a specific research problem through research reports and other exercises involving data analysis.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC 753 – COMPARATIVE AND HISTORICAL METHODS IN SOCIOLOGY**

3 credits.

Comparative strategies and historical methods through methodological readings, exercises, and evaluations of exemplary analyses in which investigators of organizational structures, institutional relationships, political conflicts, and cultural patterns bring theory and historical-comparative evidence to bear on one another.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2024**SOC 754 – QUALITATIVE RESEARCH METHODS IN SOCIOLOGY**

3 credits.

Teaches how qualitative research can be used to advance sociological theory. Topics include inductive and deductive research designs in qualitative research, conducting and analyzing interviews, content analysis, conducting observations, focus groups and data management in qualitative research.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**SOC/C&E SOC/ED POL 755 – METHODS OF QUALITATIVE RESEARCH**

3 credits.

Introduces qualitative, or ethnographic, research methods, emphasizing those suitable for educational and other organizational settings. Considers strengths and limitations of qualitative approaches in relation to varied research problems. Explores methodological procedures from entry into the field through writing.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**SOC 756 – DEMOGRAPHIC TECHNIQUES II**

3 credits.

Intermediate to advanced tools used by demographers for studying the behavior of human populations: multiple decrement processes, stable population model, demographic relations in non-stable populations, model age patterns of vital events, indirect estimation methods.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023

**SOC 773 – INTERMEDIATE CLASSICAL THEORY**

3 credits.

Intensive and critical examination of the major theoretical traditions involved in sociology's development since the 19th century.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC/POP HLTH 797 – INTRODUCTION TO EPIDEMIOLOGY**

3 credits.

Design, implementation and interpretation of epidemiologic studies; emphasis on methodologic problems in the measurement of disease frequency, natural history and risk factors.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Calculate and interpret measures of health used to characterize morbidity and mortality in populations.

Audience: Graduate

2. Identify features of epidemiologic study designs, their strengths and limitations, and measures of association used to determine the relation between exposures and outcomes of interest.

Audience: Graduate

3. Describe major sources of bias and confounding in epidemiologic research, and how they can be addressed.

Audience: Graduate

4. Evaluate causal inferences between risk factors and health.

Audience: Graduate

5. Identify and interpret the presence of interaction between multiple risk factors in relation to an outcome.

Audience: Graduate

**SOC/FRENCH/GERMAN/HISTORY/POLI SCI 804 – INTERDISCIPLINARY WESTERN EUROPEAN AREA STUDIES SEMINAR**

3 credits.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOC/C&E SOC 875 – SPECIAL TOPICS**

1-4 credits.

Advanced topics in sociology. Topics vary.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC 901 – SEMINAR: TOPICS IN CURRENT SOCIOLOGY**

2-3 credits.

Critical review of most recent research in sociology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/C&E SOC/GEN&WS 904 – SOCIOLOGICAL PERSPECTIVES ON GENDER**

3 credits.

Advanced topics in the analysis of gender relations in society.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**SOC/ED POL 908 – SEMINAR-SOCIOLOGY OF EDUCATION**

3 credits.

Selected topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC 915 – SEMINAR-SOCIOLOGICAL THEORY**

3 credits.

Coordination of current theories and methods of relevance for sociological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC 918 – SEMINAR IN COMPARATIVE SOCIOLOGY OF CONTEMPORARY CAPITALISM**

3 credits.

Origins and consequences of inter-regime and inter-temporal variation in the institutions of capitalism. The evolution and current trajectory of contemporary capitalism across North America, Europe, and East Asia. Theoretical debates on the dynamics, contradictions and variations of capitalist systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**SOC 919 – SEMINAR: TOPICS IN ECONOMIC SOCIOLOGY**

3 credits.

Explores the frontiers of research in economic sociology, drawing on recently published major work and on ongoing research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate an understanding of the place of economic sociology within the overall discipline.

Audience: Graduate

2. Demonstrate knowledge of a particular topic within economic sociology.

Audience: Graduate

3. Acquire skill in presenting a narrow topic and leading an in-depth seminar discussion of it.

Audience: Graduate

**SOC/C&E SOC 922 – SEMINAR-RACE AND ETHNIC RELATIONS**

3 credits.

Theoretical, methodological, and current research problems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/C&E SOC 923 – SEMINAR-SOCIAL STRATIFICATION**

3 credits.

Advanced study of current research in social stratification, e.g., historical and comparative studies of inequality; mathematical and econometric modeling of mobility and achievement processes; demographic approaches to power and inequality.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**SOC/URB R PL 924 – SEMINAR-POLITICAL SOCIOLOGY**

3 credits.

Selected topics in political sociology, e.g., social movements, citizenship, civic engagement, weakening of postwar "social democratic consensus" under financialized globalization pressures.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/ANTHRO/C&E SOC/ECON 925 – SEMINAR: SOCIO-ECONOMIC CHANGE IN UNDERDEVELOPED AREAS**

2-3 credits.

Social and economic factors relating to stability, growth, and change in the non-Western areas of the contemporary world.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/C&E SOC 940 – SEMINAR-SOCIOLOGY OF ECONOMIC CHANGE**

3 credits.

Theoretical and technical problems in research concerning organizational and socio-psychological aspects of changes in large scale social systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SOC/C&E SOC 945 – SEMINAR-RURAL SOCIOLOGY**

3 credits.

Theory and research in alternate semesters in rural aspects of population, stratification, social change, and groups and institutions.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC/C&E SOC 948 – SEMINAR: ENVIRONMENTAL SOCIOLOGY**

3 credits.

Examines topics such as theories of environment and society, the treadmill of production, environmental movements, political ecology, environmental justice, consumption, ecological modernization, sustainability, environmental risk, and the sociology of environmental science.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**SOC 952 – SEMINAR-MATHEMATICAL AND STATISTICAL APPLICATIONS IN SOCIOLOGY**

3 credits.

Selected topics in measurement and model construction in social research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/ED POL 955 – SEMINAR-QUALITATIVE METHODOLOGY**

3 credits.

An intensive, practice-oriented exploration of one qualitative research method such as participant-observation, interviewing, narrative analysis, oral history or ethnography. Treatment of the method includes: logics of inquiry, analysis of data obtained through the method, and uses of the method.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC/C&E SOC 960 – SEMINAR-CURRENT METHODOLOGICAL ISSUES IN SOCIAL PSYCHOLOGY**

3 credits.

Alternative research designs and processes, measurement, and analytical techniques in social psychology; experience in developing and utilizing research plans and techniques.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**SOC/C&E SOC 971 – SEMINAR-TOPICS IN DEMOGRAPHY AND ECOLOGY**

3 credits.

Advanced study of selected topics related to population and society, including health and inequality across the life course, environmental and spatial demography, biodemography.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SOC/C&E SOC 977 – SEMINAR-HUMAN ECOLOGY**

3 credits.

Review of ecological theory and research; critical assessment of the ecological complex (population, organization, environment, and technology); problems of measurement.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SOC/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/ POLI SCI/PORTUG/SPANISH 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC 983 – RESEARCH: ECONOMIC SOCIOLOGY AND COMPARATIVE POLITICAL ECONOMY**

1-3 credits.

Presentation and discussion of on-going research in the area of comparative political economy and economic sociology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SOC 984 – RESEARCH: SOCIOLOGY OF GENDER TRAINEES**

1-3 credits.

Workshop featuring presentations and discussion of current debates within the sociology of gender.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/C&E SOC 985 – RESEARCH: COMMUNITY AND ENVIRONMENTAL SOCIOLOGY**

1-3 credits.

Critical analysis of recent theoretical and methodological issues through presentations of research in progress.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOC/C&E SOC 987 – RESEARCH: RACE AND ETHNIC STUDIES**

1-3 credits.

Analysis of recent research and theory, based on reviews of literature and presentations of research in progress.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **SOC 990 – THESIS**

1-12 credits.

Mentored research for the Master's thesis or doctoral dissertation.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **SOC 992 – RESEARCH: SOCIAL ORGANIZATION TRAINEES POLITICS, CULTURE, AND SOCIETY**

1-3 credits.

Workshop on current topics in political, cultural, and comparative historical sociology (e.g., social movements, citizenship, collective identities, political behaviors, attitudes).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **SOC/C&E SOC 993 – RESEARCH: SOCIOLOGY OF ECONOMIC CHANGE TRAINEES**

1-3 credits.

Presentations of research in progress concerning social and economic change in developing countries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

### **SOC 994 – COLLOQUIUM IN CRITICAL SOCIOLOGY**

1-3 credits.

Selected topics in critical sociology taught in intensive units.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2019

### **SOC/C&E SOC 995 – RESEARCH: METHODOLOGY TRAINEES**

1-3 credits.

Workshop on social science research methods and professional development, e.g. ethics, communication, data management, novel research methods.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **SOC/C&E SOC 997 – RESEARCH: DEMOGRAPHY AND ECOLOGY TRAINEES**

1-3 credits.

Interdisciplinary training workshop on current research in population science from scholars at research and teaching institutions around the world.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

### **SOC 999 – READING AND RESEARCH IN SOCIOLOGY**

1-12 credits.

Independent reading and research.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## SOIL SCIENCE (SOIL SCI)

### SOIL SCI/ENVIR ST 101 – FORUM ON THE ENVIRONMENT

1-2 credits.

Lectures and discussions about environmental issues. Historical and contemporary environmental impacts of humans on the biosphere. Global futures: population, technology, societal values, resources and prospects for sustainable management.

**Requisites:** None

**Course Designation:** Breadth – Either Social Science or Natural Science  
Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the breadth of the environmental sciences field

Audience: Undergraduate

2. Explain how research contributes to understanding of contemporary environmental issues

Audience: Undergraduate

3. Provide examples of the relationships between science, issues, and solutions in environmental topics

Audience: Undergraduate

4. Apply critical reading skills to understand issues and evaluate reliability of information sources

Audience: Undergraduate

5. Communicate and collaborate with a team of peers

Audience: Undergraduate

6. Explain how to pursue interests in environmental issues within and outside of the classroom

Audience:

### SOIL SCI 131 – EARTH'S SOIL: NATURAL SCIENCE AND HUMAN USE

1 credit.

A overview of the soils of the world and the grand environmental challenges that face humanity. Soils of the USA and Wisconsin included.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize knowledge of the diversity of soils in the world

Audience: Undergraduate

2. Describe what are important soil characteristics

Audience: Undergraduate

3. Discuss how soils relate to the grand environmental challenges that confront humanity

Audience: Undergraduate

**SOIL SCI/ATM OCN 132 – EARTH'S WATER: NATURAL SCIENCE AND HUMAN USE**

3 credits.

Water is central to the functioning of planet Earth. As humans increase their impact on Earth's systems and cohabitants, our understanding of the multiple roles of water becomes critical to finding sustainable strategies for human and ecosystem health. Explores the science of Earth's hydrosphere, with constant attention to human uses and impacts.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and summarize the connections amongst stocks and flows in the hydrosphere.

Audience: Undergraduate

2. Analyze chemical, physical and biological indicators of water quality and their influence in human health.

Audience: Undergraduate

3. Identify human impacts on water quality and quantity in local, regional and global perspectives, and in a changing global climate.

Audience: Undergraduate

4. Illustrate and summarize the dependence of the global food supply on water.

Audience: Undergraduate

5. Analyze the causes of and solutions for the sustainability challenge of clean water and sanitation, contrasting issues in developed and developing countries.

Audience: Undergraduate

6. Apply sustainability principles to addressing the challenge of competing water uses in the US, particularly among water use for Food Production, Hygiene and Sanitation, Recreation and Environmental Flows.

Audience: Undergraduate

**SOIL SCI 211 – SOILS AND CLIMATE CHANGE**

2 credits.

Soil represents the largest terrestrial pool of carbon, and our management of soil will play a key role in the future of our planet. Course topics include overviews of basic soil science and climate change science; how climate affects soil formation, soil carbon and soil organic matter; soil carbon dynamics in urban areas, the tropics, and the arctic; how humans influence soil carbon stocks around the globe.

**Requisites:** None**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Explain the role of climate as a soil forming factor.

Audience: Undergraduate

2. Describe the components of the terrestrial carbon cycle and how land management decisions and other human actions affect each component.

Audience: Undergraduate

3. Explain the social, economic, and environmental dimensions of the sustainability challenge of enhancing soil carbon sequestration to mitigate climate change.

Audience: Undergraduate

4. Describe the social, economic, and environmental dimensions of conversion from traditional agriculture to regenerative agriculture and identify potential tradeoffs and interrelationships among these dimensions at a level appropriate to the course.

Audience: Undergraduate

5. Predict how warming in the arctic may affect the release of greenhouse gasses, including CO<sub>2</sub>, N<sub>2</sub>O, and CH<sub>4</sub> using reasonable assumptions and basic calculations.

Audience: Undergraduate

**SOIL SCI/ENVIR ST/GEOG 230 – SOIL: ECOSYSTEM AND RESOURCE**

3 credits.

Soils are fundamental to ecosystem science. A systems approach is used to investigate how soils look and function. Topics investigated include soil structure, biology, water, fertility, and taxonomy as well as the human impact on the soil environment.

**Requisites:** Not open to students with credit for SOIL SCI 301

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the significance of soil and its properties

Audience: Undergraduate

2. Identify and describe key components of soil solids and pores

Audience: Undergraduate

3. Explain and predict the interaction of water with soil

Audience: Undergraduate

4. Interpret basic nomenclature used in soil science

Audience: Undergraduate

5. Analyze that causes and solutions for sustainability of soil resources

Audience: Undergraduate

6. Quantify the interaction of clay surfaces with a soil solution

Audience: Undergraduate

7. Describe the role of soils in many different ecosystems

Audience: Undergraduate

8. Link soil orders with biomes and describe soil's edaphic character

Audience: Undergraduate

9. Analyze sustainability issues using a systems-based approach

Audience: Undergraduate

**SOIL SCI 250 – INTRODUCTION TO ENVIRONMENTAL SCIENCE**

3 credits.

Discuss how Planet Earth is an interconnected system dominated by the ever-present exchange of materials and energy that control the fitness and fate of all living organisms. Designed to introduce the interdisciplinary field of Environmental Science by providing a broad overview of the basic concepts used to make sense of the environment. Explore how natural systems work, the services they provide, important environmental challenges facing these systems, and how people are working to address them. Includes professionals in the field as guest speakers to discuss a future in Environmental Sciences.

**Requisites:** None

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. define and apply terminology commonly used in environmental science

Audience: Undergraduate

2. apply the scientific process to environmental issues and articulate its pros and cons

Audience: Undergraduate

3. demonstrate an understanding of the flow and accumulation of energy and materials within a systems context

Audience: Undergraduate

4. identify abiotic and biotic components of the environment and describe their interactions

Audience: Undergraduate

5. examine environmental challenges and approaches to their remediation

Audience: Undergraduate

6. compare and contrast careers in environmental science

Audience: Undergraduate

7. apply systems thinking to understand environmental challenges

Audience: Undergraduate

**SOIL SCI 289 – HONORS INDEPENDENT STUDY**

1-2 credits.

Research work under direct guidance of a Soil Science faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor. Intended for students in the CALS Honors Program.

**Requisites:** Consent of instructor

**Course Designation:** Honors – Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies

Audience: Undergraduate

4. Effectively communicate findings

Audience: Undergraduate

**SOIL SCI 299 – INDEPENDENT STUDY**

1-3 credits.

Research work under direct guidance of a faculty or instructional academic staff member. Students are responsible for arranging the work and credits with the supervising instructor.

**Requisites:** Consent of instructor

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies

Audience: Undergraduate

4. Effectively communicate findings

Audience: Undergraduate

**SOIL SCI 301 – GENERAL SOIL SCIENCE**

3 credits.

Physical chemical and biological properties of soils as they affect soil-plant-water relations, soil classification and suitability for agricultural and other uses.

**Requisites:** (CHEM 103, 109, or 115) and (MATH 112, 114, 171 or placement into MATH 221), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define and describe the basic chemical, physical and biological principles of soils.

Audience: Both Grad & Undergrad

2. Use the acquired knowledge of soil properties to make land use decisions.

Audience: Both Grad & Undergrad

3. Perform quantitative calculations about nutrient status of soil, water content and flow rate, and carbon and greenhouse gas fluxes of soils.

Audience: Both Grad & Undergrad

4. Classify soils based on their properties.

Audience: Both Grad & Undergrad

5. Relate the principles of soil science to the Soil Science Society of America's Four Grand Challenges: Human and Ecosystem Health, Waste Treatment and Water Quality, Food Energy and Security, and Climate Change.

Audience: Both Grad & Undergrad

6. Create a work of art (poem, song, story, etc.) that demonstrates their mastery of soil science.

Audience: Both Grad & Undergrad

7. Apply principles of soil science to make predictions about a contemporary issue in soil science.

Audience: Graduate

### SOIL SCI 302 – MEET YOUR SOIL: SOIL ANALYSIS AND INTERPRETATION LABORATORY

1 credit.

Hands-on laboratory on soil analysis and interpretation of soil properties for different uses, such as food production, waste management, water quality, stormwater control, and environmental sustainability.

**Requisites:** (GEOG/ENVIR ST/SOIL SCI 230 or SOIL SCI 301, or concurrent enrollment) or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Complete laboratory procedures of a variety of physical and chemical properties of soil, using the detailed methodology provided by instructor.

Audience: Both Grad & Undergrad

2. Demonstrate proficiency in technical writing and data presentation in scientific format.

Audience: Both Grad & Undergrad

3. Analyze and contrast the soil dataset for assignment of appropriate soil uses at different scales.

Audience: Both Grad & Undergrad

4. Integrate analytical results with soil science principles.

Audience: Both Grad & Undergrad

5. Discuss and communicate appropriate sustainable agronomical and environmental services for the studied soil.

Audience: Graduate

### SOIL SCI 323 – SOIL BIOLOGY

3 credits.

Nature, activities and role of organisms inhabiting soil. Effects of soil biota on ecosystem function, response to cultural practices, and impacts on environmental quality, including bioremediation of contaminated soils.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 152, or ZOOLOGY/BIOLOGY 101 and 102, or BOTANY/BIOLOGY 130, or BIOCORE 384) and (CHEM 104, 109, or 116), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Use scientific vocabulary and conceptual models to describe microorganisms and fauna in soil

Audience: Both Grad & Undergrad

2. Describe challenges of living in the soil ecosystem and examples of life history traits adaptive to the soil habitat

Audience: Both Grad & Undergrad

3. Explain the relationship between soil organisms, soil organic matter, and nutrient cycling

Audience: Both Grad & Undergrad

4. Explain the importance of the roots and the soil rhizosphere

Audience: Both Grad & Undergrad

5. Discuss the concept of soilborne disease, the general life history traits of soilborne pathogens, and their relationship with the soil food web

Audience: Both Grad & Undergrad

6. Outline the techniques used in soil biology

Audience: Both Grad & Undergrad

7. Connect basic knowledge of soil biology with current global issues

Audience: Both Grad & Undergrad

8. Evaluate current and relevant research and review papers on soil biology

Audience: Both Grad & Undergrad

9. Analyze and explain a specific topic in soil biology that interests you

Audience: Both Grad & Undergrad

10. Examine peer reviewed literature related to topics in soil biology and design a discussion to evaluate findings

Audience: Graduate

### **SOIL SCI/ENVIR ST 324 – SOILS AND ENVIRONMENTAL QUALITY**

3 credits.

Interaction of soils with environmental contaminants and the role of soils in pollution control.

**Requisites:** CHEM 104, 109, 116, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain and illustrate the functions of soil resources in food production

Audience: Both Grad & Undergrad

2. Identify, and summarize the connections between the soil resource and the water cycle, with special attention to its roles in water quality control, groundwater recharge, and flood buffering

Audience: Both Grad & Undergrad

3. Identify and summarize the role of soils in carbon sequestration and waste management

Audience: Both Grad & Undergrad

4. Integrate and analyze the effect of human activities on soil properties and its functions in the agricultural system, water cycling, carbon sequestration, and waste management

Audience: Both Grad & Undergrad

5. Identify, monitor and revise the policies, programs, projects, and other activities intended to protect and bolster the functions of the soil resource

Audience: Both Grad & Undergrad

6. Develop critical reading skills to understand environmental issues and design/plan effective management practices

Audience: Graduate

### **SOIL SCI 326 – PLANT NUTRITION MANAGEMENT**

3 credits.

Functions, requirements and uptake of essential plant nutrients; chemical and microbial processes affecting nutrient availability; diagnosis of plant and soil nutrient status; fertilizers and efficient fertilizer use in different tillage systems.

**Requisites:** (CHEM 103, 109, or 115 and SOIL SCI/ENVIR ST/GEOG 230) or SOIL SCI 301, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the essential plant nutrients and their biological functions

Audience: Both Grad & Undergrad

2. Explain sampling and analytical methods used to determine macronutrients sufficiency for healthy plant growth

Audience: Both Grad & Undergrad

3. Discuss the primary fertilizer materials used in agriculture, their sources and limitations

Audience: Both Grad & Undergrad

4. Analyze and interpret experimental data collected in the laboratory about plant growth and nutrient use efficiency

Audience: Both Grad & Undergrad

5. Describe the environmental impact of fertilizer manufacture, the impacts of nutrient loss by leaching and runoff, and best-known practices for improved fertilizer efficiency and mitigation of nutrient loss to the environment

Audience: Both Grad & Undergrad

6. Synthesize soil, cropping systems, and other critical on-farm details needed to develop a comprehensive nutrient management plan

Audience: Graduate

**SOIL SCI 327 – ENVIRONMENTAL MONITORING AND SOIL CHARACTERIZATION**

3 credits.

Characterization of a soil in the field. Monitoring water flow, nutrient (e.g., nitrate and phosphorus) transport, heat exchange, carbon sequestration, greenhouse gas emission, and soil contamination (e.g., heavy metals, organic pollutants) using soil physical equations and state-of-the-art soil sensing technologies.

**Requisites:** CHEM 103, 109, 115, or graduate/professional standing

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain soil variations across the landscape within the Critical Zone

Audience: Undergraduate

2. Explain the processes that control differences and similarities in soils

Audience: Undergraduate

3. Summarize how soils are described, mapped, and classified

Audience: Undergraduate

4. Explain the concepts of the soil physical properties used to describe the characteristics of soil solid, liquid, and gas phases.

Audience: Undergraduate

5. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of the Critical Zone

Audience: Undergraduate

6. Obtain field experience in soil description and collection of soil sensor measurements to monitor water, nutrient, heat, and gas transport and heavy metal contamination in soils

Audience: Undergraduate

**SOIL SCI 330 – HAZARDOUS WASTE OPERATIONS AND EMERGENCY RESPONSE (HAZWOPER) AND FIELD SAFETY TRAINING**

1 credit.

Conforms to the guidelines covered under the Occupational Safety and Health Administration (OSHA) standard 29 CFR part 1910.120 for providing Hazardous Wasted Operations and Emergency Response (HAZWOPER) 40-hour certification, required for workers involved in clean-up operations, voluntary clean-up operations, emergency response operations, and the storage, disposal, or treatment of hazardous substances or uncontrolled hazardous waste sites. Beyond satisfying OSHA standards, provides safety training for personnel conducting field sampling operations in proximity of heavy equipment (e.g. excavators, drilling rigs, dump trucks) through guest lectures and videos. Additionally, case studies relating to field safety operations will be examined.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify site hazards (ionizing radiation, oxidizer, biological, safety, and electrical) and exposure routes of hazardous materials into the human body.

Audience: Undergraduate

2. Identify the dangers associated with oxygen deficiency, heat stress, cold and noise exposure, and confined space entry.

Audience: Undergraduate

3. Explain the types, uses, and limitations of personal protective equipment including self-contained breathing apparatus, supplied air and air-purifying respirators, and chemical protective clothing.

Audience: Undergraduate

4. Demonstrate the donning and operation of different levels of personal protective equipment.

Audience: Undergraduate

5. Interpret a Health and Safety Plan, and air monitoring device data.

Audience: Undergraduate

6. Explain the roles and responsibilities of field sampling personnel and equipment operators

Audience: Undergraduate

**SOIL SCI 332 – TURFGRASS NUTRIENT AND WATER MANAGEMENT**

3 credits.

Nutrient requirements of turfgrasses; nature of turfgrass response to fertilization; soil and tissue testing methodology and interpretation; irrigation scheduling; irrigation water quality; use of irrigation and fertilizer to minimize environmental impact; writing effective nutrient management plans.

**Requisites:** SOIL SCI 326 or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**Learning Outcomes:** 1. Carry out common calculations necessary for a career in turfgrass management

Audience: Both Grad & Undergrad

2. Develop a detailed fertility plan for a turf area of your choice based on principles of turfgrass nutrition and soil science

Audience: Both Grad & Undergrad

3. Interpret a variety of soil test reports

Audience: Both Grad & Undergrad

4. Interpret a detailed water quality analysis report and make judgments of the suitability of that water for a given soil type and turfgrass area

Audience: Both Grad & Undergrad

5. Schedule irrigation applications based on knowledge of soil type, weather, water quality, and water needs of the turfgrass

Audience: Both Grad & Undergrad

6. Integrate your knowledge of fertility, irrigation management, water quality, and the environment to develop a nutrient management plan that complies with Wisconsin Department of Natural Resources rules

Audience: Both Grad & Undergrad

7. Critically evaluate and synthesize peer-reviewed literature on turfgrass nutrient and water management and communicate the best practices, strategies and solutions for minimizing the impact of turfgrass management on the environment to a stakeholder group (regulatory bodies, turf managers, or environmental advocacy groups)

Audience: Graduate

**SOIL SCI/BSE/CIV ENGR 372 – ON-SITE WASTE WATER TREATMENT AND DISPERSAL**

2 credits.

On-site treatment and dispersal of waste water from homes, commercial sources and small communities. Sources, pretreatment units, nutrient removal units, constructed wetlands, surface and soil dispersal systems, recycle and reuse systems, regulations, alternative collection systems.

**Requisites:** CHEM 103, 109, or 115

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify, formulate, solve complex wastewater management and engineering problems by applying engineering and science principles to design a complete residential onsite wastewater treatment system.

Audience: Undergraduate

2. Use engineering design to produce wastewater management solutions that meet treatment goals with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.

Audience: Undergraduate

3. Communicate effectively with the instructor and other students during in-class discussions.

Audience: Undergraduate

4. Recognize ethical and professional responsibilities in onsite wastewater management and engineering situations and make informed design assumptions/judgments, which must consider the impact of wastewater management solutions in global, economic, environmental, and societal context.

Audience: Undergraduate

5. Analyze and interpret data related to wastewater flow, source, and characteristics, soil/site characteristics, and use engineering judgement to select appropriate design solutions.

Audience: Undergraduate

6. Acquire and apply new knowledge regarding advanced treatment processes for residential wastewater treatment.

Audience: Undergraduate

**SOIL SCI 375 – SPECIAL TOPICS**

1-3 credits.

Special topics on contemporary issues relevant to soil science.

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate an ability to understand soils within the context of either its biological, physical, or chemical properties

Audience: Undergraduate

2. Communicate soil properties and function either in written or oral form

Audience: Undergraduate

3. Explain soil characteristics and function within a larger context whether it be societal, economic, international, or local

Audience: Undergraduate

4. Link soil function to soil characteristics that demonstrate understanding of their importance

Audience: Undergraduate

**SOIL SCI 399 – COORDINATIVE INTERNSHIP/COOPERATIVE EDUCATION**

1-8 credits.

An internship under guidance of a Soil Science faculty or instructional academic staff member and internship site supervisor. Students are responsible for arranging the work and credits with the Soil Science faculty or instructional academic staff member and the internship site supervisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2024

**Learning Outcomes:** 1. Apply concepts learned in coursework to authentic professional situations

Audience: Undergraduate

2. Demonstrate professional skills appropriate for the industry

Audience: Undergraduate

3. Identify and reflect on how concepts learned in coursework apply to specific work settings and situations

Audience: Undergraduate

**SOIL SCI 400 – STUDY ABROAD IN SOIL SCIENCE**

1-6 credits.

Provides an area equivalency for courses taken on Madison Study Abroad Programs that do not equate to existing UW courses. Current enrollment in a UW-Madison study abroad program

**Requisites:** None

**Repeatable for Credit:** Yes, unlimited number of completions

**SOIL SCI/MICROBIO 425 – ENVIRONMENTAL MICROBIOLOGY**

3 credits.

Microbial interactions in soils, water, extreme environments and biofilms.

Modern methods for studying microbial ecology. role of microbes in nutrient cycles and biogeochemistry. Use of microbes for mitigating manmade environmental problems of industrial, agricultural, and domestic origin.

**Requisites:** MICROBIO 303 and (CHEM 341 or 343), or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Build intuition and an ability to predict which kinds of organisms will be found in different ecosystems using quantitative reasoning when possible.

Audience: Undergraduate

2. Gain familiarity with research tools and applications in environmental microbiology, along with an appreciation for their limitations.

Audience: Undergraduate

3. Critically evaluate published research carried out in the field and think creatively about new potential research questions and applications.

Audience: Undergraduate

4. Work collaboratively in a team to enhance learning and solve complex problems.

Audience: Undergraduate

**SOIL SCI 430 – SOIL POLLUTION AND HUMAN HEALTH**

3 credits.

Environmental pollution on global, regional, and local scales is one of humanity's most pressing issues, and will remain so for the foreseeable future. Examine the sources and properties of anthropogenic soil pollution including emerging contaminants such as PFAS, nanomaterials, and microplastics. Understand the contaminant mobility in the environment and in turn, how these contaminants affect human and ecosystem health. Apply epidemiological, toxicological, and risk assessment methods to assess soil contamination impacts on local populations. Through case studies from around the world explore issues of soil contamination and interventions to mitigate health impacts.

**Requisites:** CHEM 103, 108, 109, 115, or graduate/professional student standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify the nature and sources of common and emerging environmental soil pollutants.

Audience: Both Grad & Undergrad

2. Recognize how contaminant mobility and bioavailability impact human and ecosystem health.

Audience: Both Grad & Undergrad

3. Analyze case studies to understand environmental and human health impacts and applicable contamination mitigation techniques.

Audience: Both Grad & Undergrad

4. Apply epidemiology, toxicology, and risk assessment methods to assess soil contamination impacts on local populations.

Audience: Both Grad & Undergrad

5. Evaluate scientific published literature and synthesize results for oral presentations.

Audience: Graduate

**SOIL SCI/F&W ECOL 451 – ENVIRONMENTAL BIOGEOCHEMISTRY**

3 credits.

Explores long and short-term cycles of carbon, nitrogen, phosphorus, sulfur, and metals as well as water and energy cycles between water, the atmosphere, terrestrial vegetation, and soils. Emphasizes the linkage between terrestrial vegetation and soils across global biomes for managed and unmanaged ecosystems. Investigates biogeochemical processes through their biochemical constituents, conceptual models and exploration of isotopic and chemical data. Provides a practical understanding of the interactions between components and fluxes of terrestrial ecosystems and how data is developed and employed.

**Requisites:** CHEM 104, 109, 116, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe global biogeochemical cycles of C, N, P, K, S, Fe, energy, and water and their importance

Audience: Both Grad & Undergrad

2. Explain the importance of human perturbations to and management of biogeochemical cycles

Audience: Both Grad & Undergrad

3. Describe key methods used to study biogeochemistry and explain their limitations

Audience: Both Grad & Undergrad

4. Predict which biogeochemical reactions would be likely across different environments and conditions

Audience: Both Grad & Undergrad

5. Discuss and critically evaluate scientific papers in biogeochemistry at a graduate level

Audience: Graduate

6. Discuss and critically evaluate scientific papers in biogeochemistry at an advanced undergraduate level

Audience: Undergraduate

7. Characterize elemental cycling within a system of interest, comparing and contrasting different elements

Audience: Graduate

8. Characterize elemental cycling within a system of interest

Audience: Undergraduate

## **SOIL SCI/AN SCI/DY SCI/FOOD SCI 472 – ANIMAL AGRICULTURE AND GLOBAL SUSTAINABLE DEVELOPMENT**

1 credit.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; food security, the role of women in agriculture, and the role of dairy products in a healthy diet.

**Requisites:** None

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply sustainability principles and/or framework to addressing the challenge of feeding an increasing world population sustainably.

Audience: Undergraduate

2. Define and characterize sustainability, sustainable agriculture and Sustainable Development

Audience: Undergraduate

3. Analyze the contributions of animal agriculture to the Sustainable Development Goals both in developing and developed countries.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenges of diverse animal agricultural systems both in developing and developed countries.

Audience: Undergraduate

5. Evaluate the role of livestock in communities where poverty, hunger and marginalization are embedded as a way of life.

Audience: Undergraduate

6. Critically evaluate the causes of –and ways to break– the chains of hunger and poverty among the poorest of the poor.

Audience: Undergraduate

## **SOIL SCI/AN SCI/DY SCI/FOOD SCI 473 – INTERNATIONAL FIELD STUDY IN ANIMAL AGRICULTURE AND SUSTAINABLE DEVELOPMENT**

2 credits.

Examines issues related to global agriculture and healthy sustainable development. Using a regional approach and focusing on crops and livestock case studies, students will learn the interdependence between US agriculture and agriculture in emerging economies. Some topics covered include population and food, immigration, the environment; crop and livestock agriculture; global trade; sustainability; and the role of women in agriculture and the role of dairy products in a healthy diet.

**Requisites:** DY SCI/AN SCI/FOOD SCI/SOIL SCI 472

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Improve communication and interpersonal skills associated with participating in team-based intercultural experiences

Audience: Undergraduate

2. Be better prepared for professional success in an interconnected world by navigating unfamiliar cultural norms and societal differences

Audience: Undergraduate

3. Reflect on US-centric personal and cultural values while building an appreciation and respect for the Latin America culture.

Audience: Undergraduate

4. Explain the social, economic, and/or environmental dimensions of the sustainability challenge of alleviating poverty and malnutrition in Mexico

Audience: Undergraduate

5. Apply sustainability principles and/or framework to addressing the challenge of fostering prosperity in marginalized indigenous communities

Audience: Undergraduate

6. Analyze both from their own disciplinary lens and from an interdisciplinary lens the contributions of dairy farming to the Sustainable Development Goals

Audience: Undergraduate

7. Evaluate the sustainability of subsistence, market-oriented, and industrial-scale farming systems

Audience: Undergraduate

### SOIL SCI 499 – SOIL MANAGEMENT

3 credits.

A capstone applying independent and team problem solving, critical thinking and oral and written communication skills to issues in soil and environmental sciences.

**Requisites:** Senior standing only and declared in Soil Science or Environmental Sciences

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Apply their expertise and skills from previous coursework

Audience: Undergraduate

2. Practice working together in teams to accomplish goals

Audience: Undergraduate

3. Submit a product that addresses the challenge being addressed

Audience: Undergraduate

4. Communicate effectively in both written and oral form

Audience: Undergraduate

### SOIL SCI/MICROBIO 523 – SOIL MICROBIOLOGY AND BIOCHEMISTRY

3 credits.

Transformations of nutrients and contaminants in soils and groundwater by microorganisms: emphasis on enzymatic mechanisms and metabolic pathways. Approaches for analyzing microbial populations and activities including molecular techniques. Applications of microbial activities for bioremediation of contaminated soils and groundwater. Students should have completed one course in either Soil Science or Microbiology to feel comfortable with the course content.

**Requisites:** Senior standing, (CHEM 104, 109, or 116) and (ZOOLOGY/ BIOLOGY 102, BOTANY/BIOLOGY 130, or ZOOLOGY/BIOLOGY/ BOTANY 151), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the soil environment from the perspective of a microbe

Audience: Both Grad & Undergrad

2. Explain the importance of soil microbes for globally important issues such as climate change, nutrient cycling, and biodiversity

Audience: Both Grad & Undergrad

3. Describe key methods used to study soil microbes and explain their limitations

Audience: Both Grad & Undergrad

4. Analyze microbial community data to answer the question, are the organisms in these communities different, and how

Audience: Both Grad & Undergrad

5. Discuss and critically evaluate scientific papers in soil microbiology at an advanced undergraduate level

Audience: Undergraduate

6. Conduct, analyze, and interpret a research project

Audience: Undergraduate

7. Discuss and critically evaluate scientific papers in soil microbiology at a graduate level

Audience: Graduate

8. Design, conduct, analyze, and interpret a research project, drawing on the broader literature

Audience: Graduate

**SOIL SCI/GEOG 525 – SOIL GEOMORPHOLOGY**

3 credits.

Soil development as related to landscape throughout the Quaternary; focusing on the relationship of soils to climate and vegetation, landscape evolution, and time; principles of soil stratigraphy; case histories of soil geomorphic studies; field trips. Students should have completed one course in geomorphology to feel comfortable with the course content.

**Requisites:** SOIL SCI 325 or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**SOIL SCI/GEOG 526 – HUMAN TRANSFORMATIONS OF EARTH SURFACE PROCESSES**

3 credits.

Takes an earth systems approach to explore the role of human societies in shaping earth surface processes from local to global scales. We address how alterations to our landscapes and waterways affect biological, physical and chemical interactions among our biosphere, geosphere, hydrosphere and atmosphere. We discuss methods used to distinguish the "human impact" from background variability.

**Requisites:** Junior standing or ENVIR ST/GEOG 120

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SOIL SCI 527 – THE WISCONSIN SOIL TOUR**

2 credits.

Focuses on soil distribution and soil forming factors for Wisconsin. Teaches skills in describing soil variations across the landscape, characterization of soils in the field, collecting soil samples, use of state-of-the-art soil sensing technologies, processing soil data from proximal soil sensors, report writing and presentation.

**Requisites:** SOIL SCI/ENVIR ST/GEOG 230, SOIL SCI 301, or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Explain soil variations within the profile and across the Wisconsin landscape

Audience: Both Grad & Undergrad

2. Explain the processes that control differences and similarities in soils

Audience: Both Grad & Undergrad

3. Summarize how soils are described, mapped, and classified

Audience: Both Grad & Undergrad

4. Critically evaluate scientific articles on soil issues in Wisconsin

Audience: Graduate

**SOIL SCI/ENVIR ST 575 – ASSESSMENT OF ENVIRONMENTAL IMPACT**

3 credits.

Overview of methods for collecting and analyzing information about environmental impacts on agricultural and natural resources, including monitoring the physical environment and relating impacts to people and society.

**Requisites:** Junior standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe various methods used for environmental assessment, particularly in the context of land use, resource extraction, and environmental pollution

Audience: Both Grad & Undergrad

2. Measure and evaluate environmental impacts and the effects of human activities on physical and biological resources, including soil, water, air, and biota

Audience: Both Grad & Undergrad

3. Explain the role of environmental impact statement laws and regulations in decision-making processes

Audience: Both Grad & Undergrad

4. Organize, analyze, and visualize environmental data spatially

Audience: Both Grad & Undergrad

5. Use models to understand complex interactions between natural systems and human activities

Audience: Both Grad & Undergrad

6. Analyze how environmental changes affect communities, health, and well-being

Audience: Both Grad & Undergrad

7. Evaluate the role of environmental assessment in policy-making, enforcement, and information dissemination

Audience: Both Grad & Undergrad

8. Analyze environmental data for trends and patterns

Audience: Graduate

9. Integrate data from multiple databases

Audience: Graduate

10. Critically evaluate environmental impact assessment methodologies

Audience: Graduate

**SOIL SCI 585 – USING R FOR SOIL AND ENVIRONMENTAL SCIENCES**

3 credits.

Data science techniques are increasingly important in soil and environmental science, improving the efficiency and repeatability of data analysis and enhancing fundamental understanding of soil and environmental issues. Various R packages will be introduced and used to analyze and process soil and environmental data collected using a variety of in situ, ground-based, and remote sensing platforms. R software will be applied to detailed case studies covering soil and environmental data processing, manipulation, and modeling.

**Requisites:** (STAT 240, 301, 324, 371, or F&W ECOL/STAT 571) and (BSE 301, ENVIR ST/CIV ENGR/GEOG 377, LAND ARC/ENVIR ST/F&W ECOL/G L E/GEOG/GEOSCI 371, or 372), or graduate/professional standing

**Course Designation:** Breadth – Physical Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use R software for basic data manipulation, processing, and visualization.

Audience: Both Grad & Undergrad

2. Use R software for basic statistical analysis and hypothesis tests.

Audience: Both Grad & Undergrad

3. Use R software for spatial and temporal analysis on soil and environmental datasets.

Audience: Both Grad & Undergrad

4. Become familiar with the use of electromagnetic induction, portable visible near-infrared spectroscopy, and portal X-ray fluorescence spectroscopy for estimating soil and environmental variables in the lab and in the field.

Audience: Both Grad & Undergrad

5. Build machine learning models using R software for mapping and predicting soil and environmental variables in space and time.

Audience: Both Grad & Undergrad

6. Access, process, and build models using various open-source soil and environmental datasets from USDA, USGS, NASA, and other sources.

Audience: Both Grad & Undergrad

7. Become competent in the oral presentation.

Audience: Both Grad & Undergrad

8. Apply the various R packages to your own research datasets for solving problems in your own disciplines.

Audience: Graduate

9. Explain the social, economic, and environmental dimensions of the sustainability challenges of soil and environmental monitoring and management.

Audience: Both Grad & Undergrad

10. Analyze sustainability issues and/or practices on soil and environment using a systems-based approach.

Audience: Both Grad & Undergrad

**SOIL SCI 621 – SOIL AND ENVIRONMENTAL CHEMISTRY**

3 credits.

Sources, reactions, transport, effects, and fates of chemical species in soils and associated water and air environments. Emphasis on the chemical behavior of elements and compounds and the phenomena affecting natural and anthropogenic materials in soils.

**Requisites:** CHEM 104, 109, 116, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify basic reaction and chemical species of chemicals in soil

Audience: Both Grad & Undergrad

2. Predict soil chemical reactions using equations

Audience: Both Grad & Undergrad

3. Describe solid phases in soils and their surface properties

Audience: Both Grad & Undergrad

4. Critically evaluate soil chemistry literature

Audience: Both Grad & Undergrad

5. Analyze environmental and agricultural problems from a soil chemistry perspective

Audience: Both Grad & Undergrad

6. Apply concepts in environmental soil chemistry to propose research-based solutions to current issues

Audience: Graduate

**SOIL SCI 622 – SOIL PHYSICS**

3 credits.

Physical properties of soils. Water retention and transmission in soils.

Transport of heat, gas, and solutes. Physical environment of soil organisms and soil-plant-water relations.

**Requisites:** (MATH 211, 217, or 221) and (PHYSICS 104, 202, 208, or 248) and SOIL SCI 301, or graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the various physical models governing water, heat, gas and solute transport in soils

Audience: Both Grad & Undergrad

2. Summarize and compare the principles of various soil sensors used to measure water, heat, gas and solute status and transport in soils

Audience: Both Grad & Undergrad

3. Use Hydrus software to simulate water, heat, gas and solute transport in soils

Audience: Both Grad & Undergrad

4. Present soils physics research to scientific audience

Audience: Both Grad & Undergrad

5. Apply various soil physical models to real-world examples for improved natural resources management

Audience: Both Grad & Undergrad

6. Describe recent advances in soil physics and soil sensing technologies and identify the main research gaps in soil physics

Audience: Graduate

**SOIL SCI 630 – FIELD METHODS FOR ENVIRONMENTAL CHARACTERIZATION, ANALYSIS, AND MONITORING**

2 credits.

Introduce standard operating procedures and guidance for intrusive and non-intrusive sampling techniques for assessing soil, sediment, surface water, and ground water. Prepare boring logs and install groundwater monitoring well. Properly prepare samples for preservation and shipment. Prepare and maintain defensible field documentation. Use quality control sampling, data verification and validation, and data quality assessment. Decontaminate drilling and field sampling equipment and manage investigative-derived waste.

**Requisites:** Declared in Environmental Remediation and Management MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Select appropriate non-intrusive or intrusive field sampling methods for environmental site characterization.

Audience: Graduate

2. Design and interpret a defensible environmental sampling program using USEPA Data Quality Objectives process.

Audience: Graduate

3. Demonstrate the use of field screening instruments.

Audience: Graduate

4. Install, develop, and sample a groundwater monitoring well

Audience: Graduate

5. Demonstrate appropriate sample preparation, quality control sampling, documentation, and shipment procedures

Audience: Graduate

6. Perform data quality assessment and interpret laboratory quality assurance/control reports.

Audience: Graduate

**SOIL SCI/CIV ENGR/M&ENVTOX 631 – TOXICANTS IN THE ENVIRONMENT: SOURCES, DISTRIBUTION, FATE, & EFFECTS**

3 credits.

Nature, sources, distribution, and fate of contaminants in air, water, soil, and food and potential for harmful exposure.

**Requisites:** (CHEM 104, 109, or 116) and (MATH 211, 217, or 221) and (PHYSICS 104, 202, 208, or 248), or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe how the physicochemical properties of an organic chemical and equilibrium and kinetic principles influence the distribution of the chemical in the environment

Audience: Both Grad & Undergrad

2. Estimate the physico-chemical properties of organic compounds using linear free energy relationships

Audience: Both Grad & Undergrad

3. Predict the behavior of hazardous organic chemicals in the environment

Audience: Both Grad & Undergrad

4. Derive and use equilibrium and kinetic box models for determining the fate of organic pollutants in the environment

Audience: Graduate

**SOIL SCI 681 – SENIOR HONORS THESIS**

2-4 credits.

Individual study for majors completing theses for Soil Science Honors degrees as arranged with a faculty member. Requires consent of supervising instructor. Enrolled in CALS Honors Program.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Begin structuring and writing a thesis based on original research

Audience: Undergraduate

**SOIL SCI 682 – SENIOR HONORS THESIS**

2-4 credits.

Continuation of 681.

**Requisites:** Consent of instructor

**Course Designation:** Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Review and analyze scientific literature

Audience: Undergraduate

2. Identify and use appropriate research methodologies to address a research question

Audience: Undergraduate

3. Write a thesis based on original research

Audience: Undergraduate

**SOIL SCI/ENVIR ST/LAND ARC 695 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN NATURAL RESOURCES**

3 credits.

Modern GIS desktop and web-based workflows, analyses, and visualizations related to natural resource and environmental planning issues and communication. Guest lectures from agency and industry professionals.

**Requisites:** LAND ARC 311, ENVIR ST/CIV ENGR/GEOG 377, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop and apply appropriate geospatial analysis workflows related to the study and conservation of natural resources.

Audience: Both Grad & Undergrad

2. Identify and evaluate sources of primary and secondary geospatial data.

Audience: Both Grad & Undergrad

3. Develop methods for collecting primary geospatial data

Audience: Both Grad & Undergrad

4. Communicate analytical results in visual and graphical forms.

Audience: Both Grad & Undergrad

5. Evaluate literature related to geospatial technologies in environmental science and natural resource issues.

Audience: Graduate

**SOIL SCI 699 – SPECIAL PROBLEMS**

1-3 credits.

Individual study for majors completing theses for Soil Science degrees as arranged with a faculty member. Requires consent of supervising instructor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

2. Apply the scientific method and engage in constructive problem solving

Audience: Undergraduate

3. Demonstrate application of research skills and methodologies

Audience: Undergraduate

4. Effectively communicate findings

Audience: Undergraduate

**SOIL SCI 710 – SYSTEMATIC REVIEWS IN AGRICULTURE AND THE ENVIRONMENT**

3 credits.

Covers how to develop a publishable systematic review for dissertations and professional work. Understand the distinguishing features of systematic review typologies and apply this understanding to selecting and conducting systematic reviews applicable to a variety of research questions in agricultural sciences.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify the fundamentals of systematic review procedures and identify systematic review typologies requirements, strategies for repeatability/reproducibility, and publication development.  
Audience: Graduate

2. Use guides (e.g. PICO) and tools (e.g. Rayyan) with an emphasis on developing your own open access toolkit.  
Audience: Graduate

3. Assess the need and question the development of proposed systematic review.  
Audience: Graduate

4. Develop and register a systematic review protocol.  
Audience: Graduate

5. Search and evaluate peer-reviewed and grey literature.  
Audience: Graduate

6. Conduct eligibility screening, data extraction and coding using inclusion-exclusion criteria, tools for collaborative and rapid review, extraction templates and best practices, combining raw and summary data.  
Audience: Graduate

7. Synthesize results of a systematic review.  
Audience: Graduate

8. Characterize bias including types of bias and resulting study limitations.  
Audience: Graduate

**SOIL SCI 728 – GRADUATE SEMINAR**

1 credit.

Topical oral presentations by guest speakers and graduate students on contemporary concerns and issues involving land and soils.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Present to an academic audience comprised of your peers, faculty, and practitioners in and outside UW-Madison  
Audience: Graduate

2. Assess and discuss the presentation of research related to soil science  
Audience: Graduate

3. Engage in a public question and answer discourse related to the presentation topic  
Audience: Graduate

4. Respond to constructive feedback for the purpose of assessment and self-reflection  
Audience: Graduate

**SOIL SCI 730 – COLLOQUIUM: ENVIRONMENTAL REMEDIATION AND MANAGEMENT**

1 credit.

Topical oral presentations by students, faculty, staff, and guest speakers on contemporary concerns and issues designed to increase knowledge and foster understanding of environmental contamination and remediation of soils and groundwater. Includes instruction and practice in public speaking, presentation visuals, resumes, and networking.

**Requisites:** Declared in Environmental Remediation and Management MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Research current topics in environmental contamination and remediation  
Audience: Graduate

2. Develop and deliver an effective and engaging oral presentation  
Audience: Graduate

3. Utilize effective visual presentation techniques  
Audience: Graduate

4. Compose a written abstract summarizing presentation  
Audience: Graduate

**SOIL SCI 799 – PRACTICUM IN SOIL SCIENCE TEACHING**

1-3 credits.

Instructional orientation to teaching at the higher education level in the agricultural and life sciences, direct teaching experience under faculty supervision, experience in testing and evaluation of students, and the analysis of teaching performance.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop a list of one or more learning outcomes for the activity consistent with a backward design model

Audience: Graduate

2. Communicate soil science content using the modality appropriate to the chosen audience

Audience: Graduate

3. Develop and execute an assessment plan to evaluate the learning outcomes

Audience: Graduate

4. Engage in metacognitive reflection on teaching experiences to deepen understanding, identify areas for growth, and refine instructional practices

Audience: Graduate

**SOIL SCI 875 – SPECIAL TOPICS**

1-4 credits.

Special topics on contemporary issues relevant to soil science.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SOIL SCI 990 – RESEARCH**

1-12 credits.

Independent research and writing to complete dissertation requirements.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Devise an engaging overview of a research area

Audience: Graduate

2. Explain background, methods, results, and a discussion of experimental data

Audience: Graduate

3. Design charts/tables that effectively communicate data

Audience: Graduate

4. Assess peers on the effectiveness of a scientific presentation

Audience: Graduate

5. Generate goals to improve presentation skills

Audience: Graduate

## SPANISH (SPANISH AND PORTUGUESE) (SPANISH)

**SPANISH 101 – FIRST SEMESTER SPANISH**

4 credits.

All basic language skills: listening comprehension, speaking, reading, and writing. Requires no previous knowledge of Spanish.

**Requisites:** None

**Course Designation:** Frgn Lang - 1st semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**SPANISH 102 – SECOND SEMESTER SPANISH**

4 credits.

Continuation of SPANISH 101. All basic language skills: listening comprehension, speaking, reading, and writing.

**Requisites:** SPANISH 101 or placement into SPANISH 102

**Course Designation:** Frgn Lang - 2nd semester language course  
Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SPANISH 103 – FIRST YEAR INTENSIVE SPANISH**

6 credits.

Accelerated introduction to Spanish language practice through writing, reading, speaking and listening. Course equivalent to SPANISH 101 and 102.

**Requisites:** Not open to students with credit for SPANISH 102.

**Course Designation:** Frgn Lang - 2nd semester language course

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2020

**Learning Outcomes:** 1. Communicate effectively orally and in writing in Spanish, spoken with level-appropriate language for contextualized situations based on course/textbook content.

Audience: Undergraduate

2. Comprehend and interpret basic, level-appropriate common auditory and written inputs.

Audience: Undergraduate

3. Produce level-appropriate grammar and vocabulary, especially in written work.

Audience: Undergraduate

4. Develop awareness of certain aspects of Hispanic culture.

Audience: Undergraduate

### **SPANISH 203 – THIRD SEMESTER SPANISH**

4 credits.

Intermediate-level language review, Hispanic readings, culture, and patterns of conversation.

**Requisites:** SPANISH 102, 103 or placement into SPANISH 203

**Course Designation:** Frgn Lang - 3rd semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Produce, with few to no errors in spelling, Spanish vocabulary related to family, cultural customs, traditions and values, food, politics, and historical figures.

Audience: Undergraduate

2. Produce, with few to no errors in grammar, simple and compound sentences that are comprehensible to a native speaker of Spanish with experience in English.

Audience: Undergraduate

3. Read, discuss, and comment upon brief non-fiction and full-length literary texts adapted for intermediate-level Spanish learners.

Audience: Undergraduate

### **SPANISH 204 – FOURTH SEMESTER SPANISH**

4 credits.

Intermediate-level language review, extensive Hispanic readings and culture, intensive written and oral activities.

**Requisites:** SPANISH 203 or placement into SPANISH 204

**Course Designation:** Frgn Lang - 4th semester language course

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SPANISH/CHICLA 215 – BORDER AND MIGRATION STUDIES OF LATINX AMERICA**

3 credits.

Drawing from cultural studies, border studies, migration and race theory, explores through cultural and literary texts the social and political issues regarding migration, contact zones, transculturation, and/or diaspora. Considers the various meanings of the word "border" or "frontera". What is a border geographically speaking? What does it mean in political and legal terms? How do we conceive the border in cultural, literary, linguistic, political, judicial, and personal ways? What is like to live on the border or on the margins? It is said that the border is a contact zone, a meeting point, a way to transfer and share information, an invitation to (in)tolerance and ex/inclusion. Read texts from history, politics, cultural anthropology, literature, and theatre to grasp the vast understanding of what is life on the border. Focus on the humanities, paying close attention to how visual artists (theater, performance, documentaries) understand and confront life on the border.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Either Humanities or Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and analyze the historical and political impact of the U.S.-Mexico border zone and Latin America.

Audience: Undergraduate

2. Demonstrate empathy for those impacted by border interventions.

Audience: Undergraduate

3. Explain the importance of speaking about borders and how borders have impacted present day circumstances regarding race and racial inequalities in the U.S.

Audience: Undergraduate

4. Recognize and question previously held assumptions about the border and migration.

Audience: Undergraduate

5. Demonstrate knowledge of artistic and literary interventions on and about the border.

Audience: Undergraduate

6. Explore the contemporary political and economic effects of border policy through a humanistic approach

Audience: Undergraduate

7. Apply important historical concepts and terms to draw conclusions on and about border literature, art, and theater.

Audience: Undergraduate

8. Interpret how literature, theatre, and performance explore a humanistic approach to a geopolitical dilemma.

Audience: Undergraduate

**SPANISH/CHICLA 222 – INTRODUCTION TO LATINX CULTURES**

3 credits.

Offers an introduction to the culture and history of the Mexican and Latin American origin people in the United States. Emphasis on diversity, emergence of new imagined communities, and cultural hybridity. Focusing on key issues such as U.S. imperial expansion, colonialism, nation and community formations, migration, urban spaces, and the dynamics of race, class, gender, ethnicity, and sexuality, study a range of socio-political, historical, literary, and artistic expressions that inform the whole process of culture and reveal the way Latinos and Latinas negotiate their presence, cultural difference, and creativity in the U.S.

**Requisites:** SPANISH 226 or concurrent enrollment, or SPANISH 311 or concurrent enrollment**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Frng Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Identify and analyze the factors that have shaped the presence of Mexican and Latin American origin peoples in the U.S., and the historical processes by which Latinos/as have been culturally, politically, and legally constructed in the United States.

Audience: Undergraduate

2. Demonstrate knowledge of the varied make-up of Latinos and the role that race, ethnicity, gender, class, and migration have played in their own histories.

Audience: Undergraduate

3. Demonstrate an understanding of how Latinidad is constructed and contested in the United States by various communities, institutions, and individuals.

Audience: Undergraduate

4. Demonstrate knowledge on how Latinos/as negotiate or respond to situations of internal colonialism, social disparities, lack of political representation, migration, generational conflicts, assimilation and transnational issues, gender roles, and transnational situations.

Audience: Undergraduate

5. Learn and employ diverse tools and critical thinking in the analysis of Latinx cultural production.

Audience: Undergraduate

6. Demonstrate further mastering of Spanish speaking and writing skills necessary for articulating arguments in field of study.

Audience: Undergraduate

### SPANISH 223 – INTRODUCTION TO HISPANIC CULTURES

3 credits.

Introduction to the issues which shape the national cultures and the cultural practices of the Hispanic world. Emphasis on diversity, emergence of new imagined communities, cultural hybridity, and social movements within a historical framework.

**Requisites:** SPANISH 226 or concurrent enrollment, or SPANISH 311 or concurrent enrollment

**Course Designation:** Breadth – Humanities

Frgn Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Know and remember key periods and figures in the culture of Spain and Latin America.

Audience: Undergraduate

2. Identify and use the vocabulary and conceptual tools to both analyze a wide range of topics in Hispanic cultures and have informed, meaningful discussion regarding their relevance.

Audience: Undergraduate

3. Acquire the fundamental knowledge for more advanced course offerings in Hispanic culture.

Audience: Undergraduate

4. Develop and refine communication skills in Spanish.

Audience: Undergraduate

### SPANISH 224 – INTRODUCTION TO HISPANIC LITERATURES

3 credits.

An introduction to reading and analyzing literary works, with special emphasis on development of oral and written skills for the discussion of literature. Concentration on methods of analyzing basic literary forms, conventions, genres, and representative short texts in Spanish.

**Requisites:** SPANISH 226 or concurrent enrollment, or SPANISH 311 or concurrent enrollment

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Frgn Lang – 5th + semester language course

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Acquire knowledge of the main genres, authors and literary periods and movements in Hispanic literatures.

Audience: Undergraduate

2. Learn and apply basic terminology and methods of literary analysis to written texts, both in isolation and in the context of the particular social, cultural, and historical milieus in which the texts were created.

Audience: Undergraduate

3. Develop oral and written skills in Spanish, both in general terms and for the discussion of literature in particular.

Audience: Undergraduate

### **SPANISH 225 – LYING, SWEARING, AND BREAKING THE RULES: AN INTRODUCTION TO THE LINGUISTIC STUDY OF SPANISH**

3 credits.

Introduction to the basic concepts of linguistics as a discipline and explore real-world Spanish use (e.g., blogs and vlogs, language corpora, press, film, recorded conversations, class visitors, etc.) and how that use varies across regions, speakers, and communicative contexts. Through examination of how different Spanish speakers deploy language in contexts such as confronting social taboos, expressing humor, being polite (or impolite), persuading particular audiences, and negotiating individual and cultural identities, students will gain a foundational understanding of several areas of linguistic study, including phonetics/ phonology, morphosyntax, pragmatics, sociolinguistics, language ideologies, and language variation and change.

**Requisites:** SPANISH 226 or concurrent enrollment, or SPANISH 311 or concurrent enrollment

**Course Designation:** Breadth - Humanities

Frng Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of linguistic, pragmatic, sociolinguistic, and stylistic features of written and spoken Spanish, understand how they influence meaning, and apply these features in level-appropriate ways in writing and speech.

Audience: Undergraduate

2. Demonstrate awareness of the social, cultural, and linguistic diversity that characterizes the Spanish-speaking world.

Audience: Undergraduate

3. Apply basic methods of linguistic analysis to understand the structure and communicative intent of various written and oral Spanish texts.

Audience: Undergraduate

### **SPANISH 226 – INTERMEDIATE LANGUAGE PRACTICE WITH EMPHASIS ON WRITING AND GRAMMAR**

3 credits.

Intensive practice in reading, writing, and grammar.

**Requisites:** SPANISH 204 or placement into SPANISH 226 or SPANISH 311

**Course Designation:** Frng Lang - 5th + semester language course

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **SPANISH 228 – FROM BAD BUNNY TO BAD HOMBRES: THE (MIS)REPRESENTATION AND (IN)VISIBILITY OF SPANISH IN THE US**

3 credits.

Survey and analysis of the historical and contemporary presence of the Spanish language and its speakers in U.S. communities, pop culture, media, schools and politics. Examination through linguistic, sociolinguistic, raciolinguistic and linguistic-anthropological lenses of how Spanish is used (and misused) by speakers and non-speakers alike to uphold, reproduce or perhaps transform ethnolinguistic, racialized and other social identities, attitudes and ideologies associated with Spanish in the U.S.

**Requisites:** None

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the social, cultural, and linguistic diversity that characterizes Spanish-speaking communities in the U.S.

Audience: Undergraduate

2. Analyze how Spanish is (mis)used in the U.S. to variously assert, silence, promote or oppress social, cultural and political identities and causes.

Audience: Undergraduate

3. Identify and critically assess linguistic, sociolinguistic and raciolinguistic attitudes and ideologies surrounding the presence of Spanish and communities of Spanish speakers in the U.S.

Audience: Undergraduate

4. Explain how history has affected present-day circumstances regarding ethnoracial and linguistic inequalities in the U.S.

Audience: Undergraduate

5. Reflect on how the racialization of language impacts their own lives.

Audience: Undergraduate

**SPANISH 230 – THE BEAUTIFUL GAME: CULTURAL POLITICS OF SOCCER**

3 credits.

In the last three decades, soccer has been transformed from being a very popular game in certain regions of the world to what is now considered a multicultural phenomenon. Soccer has caught the attention of not only the international media but also of disciplines such as sociology, psychology and cultural studies, as well as art forms like photography and filmmaking, digital art and comics. However, more than just a form of entertainment soccer is considered a national sport in most of Latin America. How is it that a game that originated in 19th Century England was adopted by a large and varied culture as a matter of national identity and pride? Focuses on the history of soccer and on soccer as a cultural phenomenon intimately linked to nation building and to notions of progress and national self-image.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Identify the milestones in the history of soccer.

Audience: Undergraduate

2. Recognize the national impact soccer has in Latin American societies.

Audience: Undergraduate

3. Demonstrate an understanding of different kinds of texts about soccer.

Audience: Undergraduate

4. Apply the content of the readings with individual experiences in today's world.

Audience: Undergraduate

**SPANISH/AFROAMER/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/POLI SCI/SOC 260 – LATIN AMERICA: AN INTRODUCTION**

3-4 credits.

Latin American culture and society from an interdisciplinary perspective; historical developments from pre-Columbian times to the present; political movements; economic problems; social change; ecology in tropical Latin America; legal systems; literature and the arts; cultural contrasts involving the US and Latin America; land reform; labor movements; capitalism, socialism, imperialism; mass media.

**Requisites:** None**Course Designation:** Breadth - Social Science

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Analyze Latin American culture and society from an interdisciplinary perspective.

Audience: Undergraduate

2. Examine historical developments from pre-Columbian times to the present.

Audience: Undergraduate

3. Identify political movements, economic problems, social change, and ecology in Latin America.

Audience: Undergraduate

**SPANISH/LACIS 285 – RACE AND CULTURE IN THE AMERICAS**

3 credits.

Examine how the experiences of marginalized groups in the U.S. are profoundly intertwined with hemispheric historical processes. Review the categories that emerged to conceptualize human difference as European colonizers dispossessed indigenous peoples of their lands and inaugurated the forced migration and enslavement of peoples from Africa. Focus on how race was transformed after the revolutions of independence, exploring key concepts such as the one drop rule, mestizaje, racial democracy, and color-blindness. Explore how race intersects with gender, class, and migration, as well as with slavery, anti-colonial struggles, and US expansionism. Examine common assumptions in comparisons of race relations –e.g., the idea of a more "fluid" understanding of race in Latin American countries, versus the binary models of the U.S.

**Requisites:** None**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify different forms in which race and ethnicity have been constructed across the Americas, the ways in which the histories of certain groups have been devalued or overlooked, and the implications for our present.

Audience: Undergraduate

2. Identify different understandings of race and ethnicity –for example, the tension between cultural difference and structural domination– and question assumptions commonly held in political discourse, media, arts, and literature.

Audience: Undergraduate

3. Discuss with one another how race and ethnicity condition experiences of social mobility, justice, and a sense of community, reflecting an increasingly multicultural global environment.

Audience: Undergraduate

4. Recognize social inequalities and intervene in contemporary discussions on racism through an appropriate use of evidence, critical tools, and analysis.

Audience: Undergraduate

5. Identify how different disciplinary frameworks (ethnic studies, Latinx Studies, and critical race theory, etc.) can be used to understand the racialized nature of the major questions of the present, including climate change, public health, surveillance, violence, and mass incarceration.

Audience: Undergraduate

6. Present research in a clear, concise, and engaging manner.

Audience: Undergraduate

7. Produce evidence-based, original arguments through both written and oral assignments.

Audience: Undergraduate

**SPANISH 299 – DIRECTED STUDY**

1-3 credits.

Directed study projects for freshmen and sophomores as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2018**SPANISH 311 – ADVANCED LANGUAGE PRACTICE**

3 credits.

Advanced language practice, including intensive writing and work in pertinent areas of grammar and stylistics.

**Requisites:** SPANISH 226 or placement into SPANISH 311**Course Designation:** Frgn Lang - 5th + semester language course

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SPANISH 317 – SPANISH FOR NURSING**

3 credits.

Covers professional oral and written Spanish communication skills to prepare for interactions with Spanish-speaking patients in a clinical setting. Conducted entirely in Spanish.

**Requisites:** (Declared in Nursing BSN or classified as Pre-Nursing PRN and SPANISH 203) or declared in Nursing Practice DNP or Nursing PhD**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Acquire specific Spanish technical vocabulary and grammatical structures on key topics related to the field of nursing.

Audience: Undergraduate

2. Demonstrate the ability to navigate nurse-patient interactions in oral and written Spanish using appropriate linguistic devices.

Audience: Undergraduate

3. Identify and reflect on cultural beliefs about health and methods of treatment that could influence nurse-patient interactions and demonstrate sensitivity to them.

Audience: Undergraduate

**SPANISH 318 – SPANISH FOR PHARMACY**

3 credits.

Teaches professional oral and written Spanish communication skills for use in the setting of a pharmacy to communicate with Spanish-speaking patients. Conducted entirely in Spanish. A minimum of three semesters of undergraduate Spanish coursework recommended.

**Requisites:** Declared in Doctor of Pharmacy program

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Acquire specific Spanish technical vocabulary and grammatical structures on key topics related to working in a pharmacy, such as clinical descriptions of medications and their potential side effects.

Audience: Undergraduate

2. Demonstrate the ability to navigate pharmacist-patient interactions in oral and written Spanish using appropriate linguistic devices.

Audience: Undergraduate

3. Identify and reflect on cultural beliefs about health and methods of treatment that could influence pharmacist-patient interactions and demonstrate sensitivity to them.

Audience: Undergraduate

**SPANISH 319 – TOPICS IN SPANISH LANGUAGE PRACTICE**

1-3 credits.

Intensive oral and written practice in major areas of Spanish professional usage. Each offering will focus on an important field in which students tend to apply their language skills (journalism, commerce, medicine, law, social services, etc.).

**Requisites:** SPANISH 311

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SPANISH 320 – SPANISH PHONETICS**

3 credits.

Practice course for improvement of pronunciation, and introduction to transcription and phonetic and phonemic analysis.

**Requisites:** SPANISH 225

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**SPANISH 321 – THE STRUCTURE OF MODERN SPANISH**

3 credits.

Structure and usage of modern Spanish through an examination of linguistic phenomena found throughout the Spanish-speaking world. Analyze authentic speech and texts of varied genres (newspaper articles, literature, advertisements, blogs, etc.) both to understand the conventions of modern Spanish structure and usage, and to investigate how grammatical structure may be manipulated by Spanish speakers (including themselves) to accomplish particular communicative goals.

**Requisites:** SPANISH 225

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**SPANISH 322 – SURVEY OF EARLY HISPANIC LITERATURE**

3 credits.

Selected readings, discussions, and literary history of Spain and Spanish America through 1700.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Interpret literary texts from Spain and Spanish America through 1700

Audience: Undergraduate

2. Identify fundamental aspects of literary analysis and apply them to texts written in Spanish from the Medieval time period through 1700

Audience: Undergraduate

3. Examine the historical, social, and cultural contexts of the readings.

Audience: Undergraduate

**SPANISH 324 – SURVEY OF MODERN SPANISH LITERATURE**

3 credits.

Readings, discussions, literary history. Eighteenth century to present.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**Learning Outcomes:** 1. Recall the literary and artistic culture of modern and contemporary Spain.

Audience: Undergraduate

2. Interpret Spanish literary texts from different periods, paying attention to formal and aesthetic questions, cultural movements, and sociopolitical issues.

Audience: Undergraduate

3. Identify connections between other cultures and the students' own cultures.

Audience: Undergraduate

**SPANISH 325 – ADVANCED CONVERSATION**

3 credits.

Practice and improve conversational Spanish. Form and present opinions about a variety of cultural and social issues that affect Latin America and the US by using appropriate vocabulary and language.

**Requisites:** SPANISH 226 or 311**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SPANISH 326 – SURVEY OF SPANISH AMERICAN LITERATURE**

3 credits.

Introduction to the study of Spanish American literature; reading, discussions, literary history. Eighteenth century to present.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Converse, read, and write critically in Spanish about Spanish American literary texts from various periods and genres using specialized technical vocabulary

Audience: Undergraduate

2. Identify periods and movements in Spanish American literary and cultural history that continue to shape creative expression in the present.

Audience: Undergraduate

3. Assess the cultural, economic, and political factors that differentiate Spanish American literary production from that of other regions and continue to shape life in the region.

Audience: Undergraduate

**SPANISH 327 – INTRODUCTION TO SPANISH LINGUISTICS**

3 credits.

Introduction to the linguistic analysis of Spanish, including morphology, syntax, dialectology, history of the language, language acquisition, and sociolinguistic variation.

**Requisites:** SPANISH 225**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**SPANISH 328 – ADVANCED MEDICAL SPANISH**

3 credits.

Focuses on the study of medical Spanish terminology and the cultural issues related to successful interactions with Spanish-speaking patients and their families in the clinical encounter. Introduces a wide array of vocabulary particular to the medical field, as well as a cultural understanding of medicine and illness in the Spanish-speaking world. Prepares to work with Spanish-speaking patients in future careers in medicine, nursing, social work, translation/interpretation, or mental health settings. Addresses cultural issues that may affect the clinical encounter with Spanish-speaking patients and their families.

**Requisites:** SPANISH 311**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Describe common medical conditions, procedures, and pharmaceuticals.

Audience: Undergraduate

2. Identify cultural nuances and sensitivities in healthcare interactions with Spanish-speaking patients.

Audience: Undergraduate

3. Develop listening, speaking, reading, and writing skills, with a focus on medical dialogues.

Audience: Undergraduate

4. Apply complex grammatical structures, tenses (e.g., subjunctive, conditional), and sentence construction relevant to medical contexts.

Audience: Undergraduate

5. Conduct medical interviews, take medical histories, and provide explanations and recommendations to patients in Spanish.

Audience: Undergraduate

6. Develop fluency to work confidently and effectively in Spanish-speaking healthcare environments

Audience: Undergraduate

**SPANISH/INTL BUS 329 – SPANISH FOR BUSINESS**

3 credits.

Spanish lexicon and linguistic style for management, banking, accounting, capital investment, personnel and office systems, production of goods and services, marketing, finance, and import/export; includes translation and interpretive activities.

**Requisites:** SPANISH 311**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**SPANISH 331 – SPANISH APPLIED LINGUISTICS**

3 credits.

Provides an overview of second language acquisition theories and processes as they pertain to Spanish second language learners and characterizes the linguistic challenge that specific Spanish structures pose for English-speakers in particular.

**Requisites:** SPANISH 225**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SPANISH 359 – SPANISH BUSINESS AREA STUDIES**

3 credits.

Spanish business language, culture and practice within Spanish-speaking economic markets.

**Requisites:** SPANISH 311**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**SPANISH 361 – SPANISH CIVILIZATION**

3 credits.

Cultural evolution from medieval period through the present; illustrated lectures. Taught in Spanish.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify specific cultural traits of Spanish society and trace their historical development within the broader European context.

Audience: Undergraduate

2. Describe characteristics of Spanish national identity and explain how they are represented in historical and modern cultural artefacts and spaces

Audience: Undergraduate

3. Analyze verbal and visual representations of urban and rural spaces and phenomena throughout the history of Spain

Audience: Undergraduate

**SPANISH 363 – SPANISH AMERICAN CIVILIZATION**

3 credits.

Cultural evolution of Spanish America from pre-Hispanic days through the present. Conducted in Spanish.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify specific cultural traits of Spanish American society and trace their historical development within the broader context of indigenous American civilizations and influences from other regions of the world (Africa, Asia, Europe, etc.)

Audience: Undergraduate

2. Describe characteristics of national identity of Spanish American societies and explain how they are represented in historical and modern cultural artefacts and spaces.

Audience: Undergraduate

3. Analyze verbal and visual representations of urban and rural spaces and phenomena throughout the history of Spanish America.

Audience: Undergraduate

**SPANISH/CHICLA 364 – SURVEY OF LATINX/E POPULAR CULTURE**

3 credits.

Analysis of Latinx/e popular culture to consider the varied make-up of Latinx/e populations, their specific histories, social dynamics, and politics through their creative expressions, performances, and cultural contestations. Covers key terms and concepts, cultural developments, and diverse interpretations while focusing in the analysis of Latinx/e music, performance art, film and media, sports, food, and car culture. Other topics include the production, circulation, and reception of Latinx/e popular culture, the use of Spanish and English languages, issues of identity, migration, and interculturality, the role of the cultural industry, and the context of globalization. Broadly explores the intersectionality of race, ethnicity, class, gender, sexuality, and nation regarding Latinx/e populations. Taught in Spanish.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Explain the varied make-up of Latinx/e populations and their place and political positions in the United States.

Audience: Undergraduate

2. Analyze the dilemmas, debates, and creativity reflected in Latinx/e popular culture.

Audience: Undergraduate

3. Employ tools and critical perspectives in analyzing Latinx/e popular culture and the intersection of nation, ethnicity, race, gender, and sexuality.

Audience: Undergraduate

4. Explain how Latinidad is constructed and contested in the United States by various communities, institutions, and individuals.

Audience: Undergraduate

5. Engage in cross-disciplinary conversations relevant to the current field of Latinx/e studies.

Audience: Undergraduate

### SPANISH/MEDIEVAL 414 – LITERATURE OF THE CASTILIAN MIDDLE AGE (XII-XV CENTURIES)

3 credits.

The study of a particular author, work, topic, or literary genre of the Middle Ages and/or Early Renaissance (through the 15th century): Poema de mio Cid, mester de juglaria, Libro de buen amor, mester de clerecia, El conde Lucanor, La Celestina, etc.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Analyze Castilian medieval literary texts (12th to 15th century).

Audience: Undergraduate

2. Describe the historical, political, social, and cultural context of medieval Castile.

Audience: Undergraduate

3. Apply communication skills in reading, speaking, listening, and writing in Spanish to analyze the form and content of Medieval texts.

Audience: Undergraduate

### SPANISH 420 – ADVANCED SPANISH PHONETICS

3 credits.

Connects the topics discussed in SPANISH 320 with concrete, physical speech signals. Learn to detect vocal fold vibration, evidence of tongue position, degree of closure between two organs, and friction caused by organ configuration, among other features, through the use of specialized software. Discuss sound experimental designs. Identify a specific set of sound system challenges that speakers of English face when learning Spanish. With regard to all of these issues, discuss address perception and production data, and data coming from native speakers and second language learners. Comparisons between Spanish data and those of English and other Romance languages.

**Requisites:** SPANISH 320

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate the ability to navigate various functions in phonetics software in order to accurately measure acoustic variables.

Audience: Undergraduate

2. Acquire appropriate terminology related to acoustic measurements and knowledge of well-developed phonetic experimental designs.

Audience: Undergraduate

3. Identify key acoustic differences between the sound systems of Spanish and English and acquisitional challenges related to them.

Audience: Undergraduate

4. Demonstrate the ability to carry out an independent research project that incorporates the three prior learning outcomes.

Audience: Undergraduate

### SPANISH/FRENCH/ITALIAN/PORTUG 429 – INTRODUCTION TO THE ROMANCE LANGUAGES

3 credits.

Introduction to structural similarities and differences apparent in major Romance languages (French, Italian, Portuguese, Spanish) and to their historical developments, with reference to basic linguistic features of each language: phonology, morphology, syntax, and lexicon.

**Requisites:** SPANISH 226, FRENCH 228, ITALIAN 311, or PORTUG 226

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**SPANISH 430 – SPANISH IN THE UNITED STATES**

3 credits.

Focus on the Spanish language in the United States from a sociolinguistic perspective. Comprises three goals: 1) presentation of the main linguistic characteristics represented in the Spanish of the United States (from both speakers that brought their variety from their home country, and Spanish speakers born in the United States); 2) examination of the main aspects related to the acquisition of Spanish as a minority language and phenomena related to English-Spanish language contact; and 3) understanding the socio-cultural aspects connected with the presence and vitality of Spanish in the United States (e.g., Spanish in the public, political, and educational contexts; linguistic identity, linguistic discrimination).

**Requisites:** SPANISH 225**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Demonstrate a basic understanding of linguistic, pragmatic, sociolinguistic, and stylistic features of the Spanish language.

Audience: Undergraduate

2. Demonstrate awareness of the linguistic diversity that characterizes the Spanish-speaking world at present.

Audience: Undergraduate

3. Apply linguistic concepts and features to the analysis of language, in general, and of Spanish, in particular.

Audience: Undergraduate

4. Develop critical thinking and analytical abilities in the area of language variation and sociolinguistics as related to the topic of Spanish in the United States.

Audience: Undergraduate

5. Develop analytical skills to assess critically different claims about how language is used, and how it varies according to social and linguistic factors (using specific examples from Spanish).

Audience: Undergraduate

**SPANISH 435 – CERVANTES**

3 credits.

Development of Cervantes as a craftsman and thinker; linguistic and philosophical commentaries on Don Quixote and significant major works.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**Learning Outcomes:** 1. Conduct close readings of Cervantes' works, such as Don Quixote.

Audience: Undergraduate

2. Analyze literary, aesthetic, philosophical, and linguistic aspects of the texts.

Audience: Undergraduate

3. Examine the historical, social, and cultural context of Early Modern Spain.

Audience: Undergraduate

**SPANISH/ENVIR ST 445 – CULTURE AND THE ENVIRONMENT IN THE LUSO-HISPANIC WORLD**

3 credits.

Investigates how economy and culture work together, consuming and/or restoring their environments in divergent scenarios of the Hispanic World.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224**Course Designation:** Breadth - Humanities

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. State the interconnectedness of culture, environment, and economy in the Hispanic world.

Audience: Undergraduate

2. Recognize various socio-environmental conflicts in Latin America.

Audience: Undergraduate

3. Examine various new socio-economic visions emerging aimed at improving human relationships with the environment in the Hispanic World.

Audience: Undergraduate

4. Describe how Latin American indigenous knowledges and values could help us rethink our culture and economy.

Audience: Undergraduate

### SPANISH 446 – TOPICS IN SPANISH LINGUISTICS

3 credits.

Advanced descriptive, historical, or applied topics in Spanish linguistics.

**Requisites:** SPANISH 225

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### SPANISH 451 – LITERATURE OF THE EIGHTEENTH AND NINETEENTH CENTURIES

3 credits.

Historical survey of the literature of the eighteenth and nineteenth centuries. Major authors and representative works in all genres covering Neo-Classicism, Romanticism, Realism, and Naturalism. Important currents in intellectual history.

**Requisites:** SPANISH 223 and 224

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### SPANISH 453 – LITERATURE OF THE TWENTIETH CENTURY

3 credits.

Historical survey of the literature of the Twentieth Century. Major authors and representative works in all genres beginning with the Generation of 1898 to the present. Important currents in intellectual history.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**Learning Outcomes:** 1. Recall the literary and artistic culture of modern Spanish literature of the twentieth and twenty-first centuries.

Audience: Undergraduate

2. Interpret Spanish literary texts from of the twentieth and twenty-first centuries, paying attention to formal and aesthetic questions, cultural movements, and sociopolitical issues.

Audience: Undergraduate

3. Identify connections between Spanish culture and literature and their own culture.

Audience: Undergraduate

### SPANISH 455 – CONTEMPORARY MAYAS: A CULTURE OF NATURE

3 credits.

Explore the enduring wisdom and resilience of the Maya civilization amidst historical challenges and contemporary dynamics. Delve into Maya philosophy, history, and current affairs, with a focus on their relationship with the environment. Analyze pivotal questions: Did the Maya civilization collapse or undergo intentional transformation? Why did the Maya army refrain from sacking the colonial capital during a major rebellion? Examine the impact of modern politics and economics on Maya culture. Uncover the role of Maya bioculture in cultural resistance and survival, and the interconnectedness of spirituality, health, and ethics with nature. Investigate the complexities of Maya perspectives on present-day issues.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Examine the intricate relationship between the indigenous Maya people and their natural environment. Compare and contrast the Mayan view of nature with Western conceptualizations.

Audience: Undergraduate

2. Critically evaluate theories surrounding the collapse or intentional transformation of the Maya civilization.

Audience: Undergraduate

3. Explore the history of Mayan resistance from colonial to contemporary times and analyze how their connection to nature has influenced this resistance.

Audience: Undergraduate

4. Evaluate the impact of 20th and 21st-century politics and economic systems on Maya culture.

Audience: Undergraduate

5. Develop a critical understanding of the multifaceted socio-environmental conflicts in Maya territories.

Audience: Undergraduate

6. Acquire knowledge about current Mayan activism and efforts to safeguard their land and traditional knowledge.

Audience: Undergraduate

7. Engage in reflection on decolonial and transdisciplinary approaches to thinking, researching, and traversing Maya lands.

Audience: Undergraduate

8. Articulate the connections between Maya spirituality, health, ethics, and nature.

Audience: Undergraduate

**SPANISH 460 – SPANISH AMERICAN LITERATURE**

3 credits.

A monograph on a particular author, work or literary current of Latin America: Modernismo, the novel of protest, Latin American theater, etc.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Critically examine contemporary Spanish American literary texts using specialized critical vocabulary beyond that learned in the prerequisite courses.

Audience: Undergraduate

2. Summarize, analyze and interpret the literary texts to develop and substantiate evaluative arguments about them.

Audience: Undergraduate

3. Identify and assess the cultural, economic and political factors that determine Spanish American literary production and differentiate it from that of other regions.

Audience: Undergraduate

**SPANISH 461 – THE SPANISH AMERICAN SHORT STORY**

3 credits.

Development of the short story throughout Spanish America from its origins in the 19th century to the present.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Identify key themes, motifs, literary devices, and main characters in short stories and illustrate their importance in constructing the main themes/topics.

Audience: Undergraduate

2. Compare and contrast the construction of relevant plots and characters in targeted short stories.

Audience: Undergraduate

3. Analyze the representation of main themes/topics in Spanish American short stories and assess the connections of those representations with other arts forms (e. g. cinema) and with the political, philosophical and literary history in contemporary Spanish American societies.

Audience: Undergraduate

4. Evaluate and appraise various scholarly interpretations of key themes in Spanish American short stories, offering reasoned arguments for their positions.

Audience: Undergraduate

5. Formulate and defend an original thesis on the portrayal of key themes in Spanish American short stories.

Audience: Undergraduate

### SPANISH 464 – SPANISH AMERICAN POETRY AND ESSAY

3 credits.

Readings in the work of major Spanish American poets and essayists within a historical framework.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Recognize the most important elements of a poem through analyses of Spanish American poems

Audience: Undergraduate

2. Identify the relationship between a poem and an essay by the same author.

Audience: Undergraduate

3. Explain how a poem works through analyses of Spanish American poems

Audience: Undergraduate

4. Write well-argued and sound response papers about Spanish American poetry

Audience: Undergraduate

### SPANISH/CHICLA 467 – US LATINO LITERATURE

3 credits.

Study the literature of Latinos and Latinas in the United States, particularly of writers of Mexican, Puerto Rican, Cuban, Dominican and Central American descent. Examines the impact of race and how individuals and communities negotiate situations of internal colonialism, migration, generational conflicts, tensions between assimilation and cultural preservation, gender roles, literary traditions, and transnational situations. Considers the linguistic, cultural and formal singularity of Latinx literature, the use of Spanish and English languages, the advent of feminist and queer writing, and the vision of the United States in their works regarding its past, its present and its future. Explores the intersectionality of race, ethnicity, class, gender, sexuality, and literary forms. Diverse theories and ways to read literary texts will be explored. Literary texts - novels, short stories, poetry and essays - will be read in English or Spanish, or a combination of both. Taught in Spanish

**Requisites:** SPANISH 223 and 224

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Achieve an understanding of how the past affected present day circumstances to Latinx people regarding race and racial inequalities and patterns of oppression in the U.S.

Audience: Undergraduate

2. Develop critical thinking skills to recognize and question cultural assumptions, situations of privilege, and knowledge claims as they relate to race and ethnicity.

Audience: Undergraduate

3. Demonstrate self-awareness about their own racial and ethnic identities and empathy towards the perspectives and histories of others.

Audience: Undergraduate

4. Apply key cultural concepts to a diverse array of literary texts in relation to lives outside the classroom.

Audience: Undergraduate

**SPANISH 468 – TOPICS IN HISPANIC CULTURE**

3 credits.

In-depth study of important cultural-historical issues concerning the Hispanic world.

**Requisites:** (CHICLA/SPANISH 222 and SPANISH 224), (SPANISH 223 and 224), SPANISH 361, 363, or CHICLA/SPANISH 364

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe works of art and/or artistic, cultural and political events, currents and movements in the Spanish-speaking world that pertain to specific topics in historical time periods and/or the present day.

Audience: Undergraduate

2. Analyze and critique works of art and secondary literature on artistic, cultural and political events, currents and movements in the Spanish-speaking world that pertain to specific topics in historical time periods and/or the present day.

Audience: Undergraduate

3. Develop novel analyses and interpretations of works of art and/or artistic, cultural and political events, currents and movements in the Spanish-speaking world that pertain to specific topics in historical time periods and/or the present day.

Audience: Undergraduate

**SPANISH/CHICLA 469 – TOPICS IN LATINX CULTURE**

3 credits.

Focuses on the cultural evolution of Chicanos, Puerto Ricans, Cuban-Americans, and other U.S. Latinos in relation to their countries of origin.

Topics vary.

**Requisites:** (CHICLA/SPANISH 222 and SPANISH 224), (SPANISH 223 and 224), SPANISH 361, 363, or CHICLA/SPANISH 364

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize the place of migration in the development of the U.S. as a nation, of migration as an integral social phenomena, and of Mexican migration in particular.

Audience: Undergraduate

2. Apply various analytical tools and perspectives to grasp diverse practices of cultural retention, cultural transformation, hybridity, transnationalism, and plural identities.

Audience: Undergraduate

3. Recognize the intersectionality of ethnicity, race, gender, nation, and sexuality.

Audience: Undergraduate

4. Identify various cultural expressions in critical dialogue with hegemonic/dominant cultures.

Audience: Undergraduate

**SPANISH 470 – UNDERGRADUATE SEMINARS IN HISPANIC LITERATURE/CULTURE/LINGUISTICS**

3 credits.

Discussion and research of advanced topics related to Hispanic literature, linguistics, or culture.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223), SPANISH 224, 225, and 311

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Summarize primary and secondary literature pertaining to a specific topic on literature, cultural studies or linguistics in the Spanish-speaking world.

Audience: Undergraduate

2. Critique primary and secondary literature pertaining to a specific topic on literature, cultural studies or linguistics in the Spanish-speaking world.

Audience: Undergraduate

3. Propose novel analyses or interpretations of literary or cultural works of art from the Spanish-speaking world or design experiments to test novel hypotheses about linguistic phenomena pertaining to Spanish speakers.

Audience: Undergraduate

**SPANISH 472 – HISPANIC SCREEN STUDIES**

3 credits.

An introduction to audiovisual media in the Spanish-speaking world. Topics may include cinema, television, video and video gaming. Learn basic technical vocabulary, analytical concepts and industrial history for specific media and consider theoretical issues relating to the integration of those media in various local cultures. Special attention will be paid to the economic, technological, social and political conditions that have determined the differential development of the various screen arts in Spanish-speaking countries.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Converse, read and write in Spanish about screen media using specialized technical vocabulary.

Audience: Undergraduate

2. Analyze and critique texts in these media using categories and concepts prevailing in professional and academic discourse.

Audience: Undergraduate

3. Describe and evaluate the potentialities and limitations of screen media in the sociohistorical context of contemporary Spanish America.

Audience: Undergraduate

4. Identify and explain cultural, financial and political factors that production and consumption of screen media discourses in Spanish America from that in other regions.

Audience: Undergraduate

**SPANISH 473 – STUDY ABROAD IN SPANISH LANGUAGE PRACTICE**

1-4 credits.

Treatment of a topic in Spanish language in a course carried with a UW-Madison resident study abroad program that has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SPANISH 474 – STUDY ABROAD IN SPANISH LINGUISTICS**

1-4 credits.

Treatment of a topic in Spanish linguistics in a course carried with a UW-Madison resident study abroad program that has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SPANISH 475 – STUDY ABROAD IN HISPANIC LITERATURES**

1-4 credits.

Treatment of a topic in Hispanic literatures in a course carried with a UW-Madison resident study abroad program that has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SPANISH 476 – STUDY ABROAD IN HISPANIC CULTURES**

1-4 credits.

Treatment of a topic in Hispanic cultures in a course carried with a UW-Madison resident study abroad program that has no equivalent on this campus. Enrollment in a UW-Madison resident study abroad program

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**SPANISH 477 – LATIN AMERICAN ROCK CULTURES**

3 credits.

Rock'n'roll music emerged in the USA in the 1950s, and almost immediately became a global phenomena, intimately associated to the scheme of Western modernity, informing music and cultural expressions in many parts of world. Study this transnational process, and the culture and music that were produced in Latin America.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Describe music's role in societies and the idea of the nation as a sonic territory whose musical performances define national, cultural, racial, class, and gender identities.

Audience: Undergraduate

2. Analyze what makes Latin American rock strictly Latin American and what role it has played in dictatorial and post-dictatorial societies.

Audience: Undergraduate

3. Explain how Latin American youth have claimed their agency, identity, and social leading roles through rock music.

Audience: Undergraduate

4. Explain how the market, media, and the music industry have shaped and influenced the development of rock.

Audience: Undergraduate

5. Explain the position and presence of women, non-heterosexuals, and Indigenous in the Latin American rock cultures.

Audience: Undergraduate

### SPANISH/CHICLA 478 – BORDER AND RACE STUDIES IN LATIN AMERICA

3 credits.

Drawing from cultural studies, border studies and/or critical race theory, this course explores through cultural and literary texts the social and political issues regarding migration, contact zones, transculturation, and/or diaspora.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224. Not open to students with credit for CHICLA/SPANISH 215.

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain political and historical issues between the U.S. and Latin America.

Audience: Undergraduate

2. Analyze the ways in which literature, theatre, and performance represent a humanistic approach to a geopolitical dilemma

Audience: Undergraduate

3. Recognize the visual arts (theatre and performance) as a way to explore issues of and about immigration.

Audience: Undergraduate

### SPANISH 479 – LATIN AMERICAN LITERATURE AND HUMAN RIGHTS

3 credits.

Explores the literary culture that emerged in Latin American countries after the military dictatorships in the seventies and eighties. Engage with cultural responses to human rights abuses in order to determine what kind of memory was invoked through available cultural venues and what kind of memory market has been created as a response to neo-liberal economic project. Looks into the means by which literary and cultural responses are produced, circulated and consumed, what seems to be remembered and forgotten as well as who takes ownership of memories and how the state produced official story compares with individual as well as community generated accounts.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Examine human rights issues using specialized technical vocabulary in Spanish.

Audience: Undergraduate

2. Analyze and critique fictional and non-fictional texts related to human rights abuses using categories and concepts prevailing in professional and academic discourse.

Audience: Undergraduate

3. Describe and formulate the representation of human rights issues in Spanish American fictional and testimonial genres and assess the connections of those representations with other art forms (e.g. cinema) and with the political, philosophical and literary history in contemporary Spanish America.

Audience: Undergraduate

4. Identify, evaluate and appraise various scholarly interpretations of cultural, literary and political factors that production and consumption of literary discourses related to human rights in Spanish America entails.

Audience: Undergraduate

### SPANISH 480 – TOPICS IN LATIN AMERICAN PERFORMANCE/ VISUAL STUDIES

3 credits.

Latin American culture and politics through the study of selected aspects of performance and/or visual culture. Topics vary.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize contemporary Caribbean art.

Audience: Undergraduate

2. Identify and appraise contemporary racial, environmental, and cultural theories relevant to the Caribbean context.

Audience: Undergraduate

3. Create a critical reflection of artistic forms in the context of contemporary cultural and conceptual trends.

Audience: Undergraduate

4. Identify the methods of Visual Culture as a field of study.

Audience: Undergraduate

5. Illustrate Visual Culture theories and methods, especially approaches to the analysis of gender, sexuality, and race.

Audience: Undergraduate

### SPANISH 490 – RACE, RELIGION AND ETHNICITY IN THE AGE OF EMPIRE

3 credits.

Drawing mainly from early modern Spanish and Colonial texts, covers encounters and relations with different forms of "otherness". Move from America to Spain and across the Mediterranean world to Istanbul, from the late 15th century to the 17th. Discuss issues of race, ethnicity, and religious affiliation. Spain's long history of relations between Muslims, Jews and Christians will form a backdrop to interactions with Amerindians, sub-Saharan Africans, Jews, Moriscos, Gypsies, North African Muslims and Turks. One of the millions of slaves during this period was Miguel de Cervantes, author of Don Quixote. He and many other writers would reflect profoundly on questions of "otherness" in works that would have universal implications and continue to connect with our concerns in the 21st century.

**Requisites:** (CHICLA/SPANISH 222 or SPANISH 223) and SPANISH 224

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Identify and explain issues related to Spain and its cultural "others," both internal (within Spain) and external (from the Americas to the Mediterranean).

Audience: Undergraduate

2. Develop comparisons between the historical and geographical contexts of the course and contemporary issues involving race, ethnicity, and religious affiliation.

Audience: Undergraduate

3. Apply skills in reading, speaking, listening, and writing in Spanish in the comprehension of Spanish texts from the 15th - 17th centuries.

Audience: Undergraduate

### SPANISH/MEDIEVAL 503 – SURVEY OF MEDIEVAL LITERATURE

3 credits.

Introduction to major 13th and 14th-century Castilian works.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

### SPANISH/MEDIEVAL 541 – OLD SPANISH

3 credits.

Historical Spanish phonology, morphology, and syntax, with application to theories of language variation and change.

**Requisites:** Graduate/professional standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**SPANISH 545 – COLLEGE TEACHING OF SPANISH**

2 credits.

Introduction to Spanish teaching methodology: classroom procedures, lesson planning, drilling techniques, preparation and evaluation of testing devices, current trends in language teaching, audio-visual aids, review of key grammatical concepts, etc.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2018**SPANISH 564 – THEORY AND PRACTICE OF HISPANIC THEATRE**

4 credits.

An in-depth study of Hispanic theatre through the analysis of dramatic texts as well as the production of live performance. By reading and staging a final play students explore the full value of dramatic arts.

**Requisites:** SPANISH 223 and 224**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2020**SPANISH 630 – TOPICS IN HISPANIC LINGUISTICS**

3 credits.

Advanced course focusing on particular theories, approaches, and/or methodologies concerned with Spanish linguistics.

**Requisites:** Graduate/professional standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**SPANISH 681 – SENIOR HONORS THESIS**

3 credits.

First semester independent study with the goal to do the preliminary research to write a senior honors thesis in Spanish.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Fall 2023**SPANISH 682 – SENIOR HONORS THESIS**

3 credits.

Second semester independent study with the goal to complete a senior honors thesis in Spanish. SPANISH 681

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No**Last Taught:** Spring 2024**SPANISH 691 – FIRST SEMESTER SENIOR THESIS**

3 credits.

First semester independent study with the goal to do the preliminary research to write a senior thesis in Spanish.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**SPANISH 692 – SECOND SEMESTER SENIOR THESIS**

3 credits.

Second semester independent study with the goal to complete a senior thesis in Spanish. SPANISH 691

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**SPANISH 699 – DIRECTED STUDY**

1-6 credits.

Directed study projects for juniors and seniors as arranged with a faculty member.

**Requisites:** Consent of instructor**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**SPANISH 701 – TEXTUAL CRITICISM**

3 credits.

Multiple alterities: religious affiliations, ethnicities, race, and gender in early modern America, Spain and the Mediterranean.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2019**SPANISH/MEDIEVAL 718 – TOPICS IN MEDIEVAL SPANISH LITERATURE**

3 credits.

An advanced topics course focusing on themes, particular authors, individual works, or literary genres in medieval Spanish literature.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2019

### SPANISH 770 – INTRODUCTION TO THE PROFESSION

3 credits.

Introduction to Spanish teaching methodology: classroom procedures, lesson planning, preparation and evaluation of testing devices, current trends in language teaching, audio visual aids, etc. Other aspects of working in academia are incorporated as well, such as research (intertwining it with teaching, abstracts, conferences, publishing, etc.) and professionalization (building a CV, the job market, cover letters, research statements, teaching philosophies, etc.), both of which are guided by the instructor and faculty visitors from the Department of Spanish Portuguese.

**Requisites:** Graduate Students Only

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and evaluate various approaches to and tools used in communicative language teaching

Audience: Graduate

2. Understand variables involved in second language acquisition

Audience: Graduate

3. Understand the steps involved in developing academic research

Audience: Graduate

4. Critically evaluate research on Hispanic and Lusophone culture, literature, and linguistics

Audience: Graduate

5. Understand what goes into getting an academic job and being an academic

Audience: Graduate

### SPANISH 771 – WRITING FOR THE PROFESSION

3 credits.

Overview of relevant academic genres through readings and extensive practice in writing, critiquing and editing. Genres include conference paper writing and delivery; grant applications; how to prepare an article for submission, how to choose a journal or a press, and the editorial process from consideration of a manuscript until final publication; to prepare a dissertation proposal, write a dissertation chapter, and an abstract for the job market. Students will work on their choice projects throughout the semester.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge concerning various genres related to conference presentations and scholarly publication

Audience: Graduate

2. Utilize the techniques, skills and modern tools necessary for generating original, coherent, and compelling writing at various levels depending on your needs

Audience: Graduate

3. Produce a substantial written piece or combination of pieces of publishable quality, such as a polished article manuscript that is ready for submission to an academic journal

Audience: Graduate

4. Be prepared for careers as researchers

Audience: Graduate

5. Demonstrate professional and ethical responsibility

Audience: Graduate

### SPANISH 801 – SEMINAR-SPANISH AMERICAN LITERATURE

3 credits.

Seminar focusing on literature, literary criticism, or theory relevant to colonial and 19th-century Spanish American literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

### SPANISH 802 – SEMINAR-SPANISH AMERICAN LITERATURE

3 credits.

Seminar focusing on literature, literary criticism, culture or theory relevant to 20th and 21st Spanish American Lit.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SPANISH 815 – SEMINAR IN LANGUAGE: MODERN SPANISH**

3 credits.

Seminar focusing on theoretical, methodological, and applied approaches to a specific topic related to current Spanish (e.g., Second Language acquisition, Applied Linguistics, Syntax, Semantics, Phonetics, Phonology, Language variation and change).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2019

**SPANISH/MEDIEVAL 842 – SEMINAR-MEDIEVAL LITERATURE**

3 credits.

Seminar focusing on literary, textual criticism or theoretical topics relevant to Medieval Spanish literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**SPANISH 851 – SEMINAR IN GOLDEN AGE PROSE: CERVANTES DON QUIJOTE**

3 credits.

In-depth reading of Cervantes' masterpiece, including a thorough study of its historical context and its place in the history of fiction.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SPANISH 852 – SEMINAR IN GOLDEN AGE PROSE**

3 credits.

Studies in the emergence of the modern novel with the invention of short and long novel forms as well as the development of intellectual and scientific works, including literature about other parts of the world, picaresque novels, courtly novels, pastoral novels, Moorish novels, autobiographies, travel narratives, mystic writings, humanistic dialogues, histories, geographies, and treatises on a wide array of topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2023

**SPANISH 861 – SEMINAR-MODERN SPANISH LITERATURE**

3 credits.

Literary, cultural, or theoretical topics relevant to Modern Peninsular Literature.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SPANISH 899 – INDEPENDENT READING**

1-3 credits.

Directed study projects for graduate students as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SPANISH/A A E/ANTHRO/C&E SOC/GEOG/HISTORY/LACIS/ POLI SCI/PORTUG/SOC 982 – INTERDEPARTMENTAL SEMINAR IN THE LATIN-AMERICAN AREA**

1-3 credits.

Interdisciplinary inquiry in Latin American society and culture.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**SPANISH 990 – THESIS**

1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

# STATISTICS (STAT)

## STAT 240 – DATA SCIENCE MODELING I

4 credits.

Introduces reproducible data management, modeling, analysis, and statistical inference through a practical, hands-on case studies approach. Topics include the use of an integrated statistical computing environment, data wrangling, the R programming language, data graphics and visualization, random variables and concepts of probability including the binomial and normal distributions, data modeling, statistical inference in one- and two- sample settings for proportions and means, simple linear regression, and report generation using R Markdown with applications to a wide variety of data to address open-ended questions.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. wrangle data: transform data, possibly from multiple sources, into a form convenient for analysis

Audience: Undergraduate

2. explore data: visualize and summarize data, generate questions/hypotheses, and address them

Audience: Undergraduate

3. program: write R code using the R Studio integrated statistical computing environment to carry out reproducible data analysis

Audience: Undergraduate

4. model data: use probability and random variables in statistical computing environment to carry out reproducible data analysis

Audience: Undergraduate

5. interpret data: explain what can be inferred from the data analysis and make predictions

Audience: Undergraduate

6. communicate: use R Markdown to integrate prose, visualizations, code, interpretation, and results

Audience: Undergraduate

7. collaborate: work with other students to solve data challenges

Audience: Undergraduate

8. make statistical inferences: employ confidence intervals and hypothesis tests using both computational and standard methods such as binomial and t-tests

Audience: Undergraduate

## STAT 301 – INTRODUCTION TO STATISTICAL METHODS

3 credits.

Distributions, measures of central tendency, dispersion and shape, the normal distribution; experiments to compare means, standard errors, confidence intervals; effects of departure from assumption; method of least squares, regression, correlation, assumptions and limitations; basic ideas of experimental design.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement. Not open to students with credit for STAT 302, 324, or 371

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe statistics as a discipline and why statistics can be useful for furthering scientific research

Audience: Undergraduate

2. Demonstrate a general understanding of the core concepts of statistics, including probability, sampling distributions, estimation, confidence intervals, and hypothesis testing

Audience: Undergraduate

3. Create useful graphs and summaries of data, and perform basic statistical analyses when appropriate, including one- and two-sample and paired tests for means, chi-squared tests, correlations, and simple linear regressions

Audience: Undergraduate

4. Correctly interpret statistical graphs and results in terms of the original scientific context in which the data was gathered, and identify common pitfalls that lead to compromised or misleading results

Audience: Undergraduate

5. Recognize when to seek statistical help and have a sufficient understanding of statistical terminology to communicate meaningfully with a professional statistician

Audience: Undergraduate

**STAT 303 – R FOR STATISTICS I**

1 credit.

An understanding of the commonly used statistical language R. Topics will include using R to manipulate data and perform exploratory data analysis.

**Requisites:** STAT 240, 301, 302, 312, 324, 371, MATH/STAT 310, ECON 310, GEN BUS 303, 304, 306, 307, 317, PSYCH 210, B M E 325, I S Y E 210, SOC/C&E SOC 360, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use basic R vocabulary

Audience: Undergraduate

2. Manipulate data in R

Audience: Undergraduate

3. Produce graphics and reports

Audience: Undergraduate

4. Apply statistical methods

Audience: Undergraduate

5. Run basic simulations

Audience: Undergraduate

**STAT 304 – R FOR STATISTICS II**

1 credit.

Provides an understanding of the commonly used statistical language R. Topics will include writing conditional expressions, loops, and functions; manipulating data matrices and arrays; extracting data from text; and making high level visualizations of data.

**Requisites:** STAT 303

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT 305 – R FOR STATISTICS III**

1 credit.

Provides an understanding of the commonly used statistical language R. Learn to combine R with high performance computing tools to do scientific computing.

**Requisites:** STAT 304

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT/MATH 309 – INTRODUCTION TO PROBABILITY AND MATHEMATICAL STATISTICS I**

3 credits.

Probability and combinatorial methods, discrete and continuous, univariate and multivariate distributions, expected values, moments, normal distribution and derived distributions, estimation.

**Requisites:** MATH 234, 376, or concurrent enrollment. Not open to students with credit for STAT/MATH 431 or STAT 311

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recall the definitions of fundamental objects and concepts underlying probability theory (e.g. sample spaces and events, the axioms of probability, the notions of conditional probability and independence, random variables and their probability distributions, mathematical expectation, and the joint distribution of one or more random variables) and demonstrate understanding of their properties

Audience: Undergraduate

2. Perform important operations in probability (e.g. calculate the probabilities of events, derive the probability distributions of random variables, compute moments and the expectation of functions of random variables, calculate covariances and correlations, and obtain conditional distributions and conditional expectations) and interpret the results

Audience: Undergraduate

3. Explain the meaning of key results in probability theory that are especially important in mathematical statistics (e.g. Bayes' Theorem, probabilistic tail inequalities such as Markov's and Chebyshev's inequalities, the Law of Large Numbers, and the Central Limit Theorem)

Audience: Undergraduate

4. Identify, utilize, and understand the key properties of, probability distributions that are especially important in statistics, including discrete families of distributions (e.g. the binomial, Poisson, geometric, and negative binomial distributions) and continuous families of distributions (e.g. the uniform, exponential, gamma, and normal distributions)

Audience: Undergraduate

**STAT/MATH 310 – INTRODUCTION TO PROBABILITY AND MATHEMATICAL STATISTICS II**

3 credits.

Mathematical statistical inference aims at providing an understanding of likelihood's central role to statistical inference, using the language of mathematical statistics to analyze statistical procedures, and using the computer as a tool for understanding statistics. Specific topics include: samples and populations, estimation, hypothesis testing, and theoretical properties of statistical inference.

**Requisites:** (STAT/MATH 309, STAT 311, STAT/MATH 431, or MATH 531) and (STAT 240, STAT 301, STAT 302, STAT 324, STAT 371, or ECON 310), or graduate/professional standing

**Course Designation:** Breadth - Natural Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Construct point estimators including maximum likelihood estimators, understand the theoretical properties of point estimation methods, and evaluate their performance

Audience: Undergraduate

2. Construct hypothesis tests including likelihood ratio tests, interpret their results, evaluate their performance, and understand the theoretical properties of hypothesis testing methods

Audience: Undergraduate

3. Construct interval estimators to quantify uncertainty, understand the theoretical properties of interval estimation methods, and interpret their results

Audience: Undergraduate

4. Mathematically derive key quantities required for statistical inference methods and be familiar with simulation-based techniques for obtaining those quantities

Audience: Undergraduate

5. Describe the Bayesian approach to inference and contrast it with the frequentist approach

Audience: Undergraduate

6. Identify and describe the assumptions underlying methods of statistical inference and explain their importance

Audience: Undergraduate

**STAT 311 – INTRODUCTION TO THEORY AND METHODS OF MATHEMATICAL STATISTICS I**

3 credits.

Elements of probability, important discrete distributions, acceptance sampling by attributes, sample characteristics, probability distributions and population characteristics, the normal distribution, acceptance sampling plans based on sample means and variances, sampling from the normal, the central limit theorem, point and interval estimation.

**Requisites:** MATH 234, 376, or concurrent enrollment or graduate/professional standing. Not open to students with credit for STAT/MATH 309 or STAT/MATH 431

**Course Designation:** Breadth - Natural Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT 312 – INTRODUCTION TO THEORY AND METHODS OF MATHEMATICAL STATISTICS II**

3 credits.

Unbiased estimation, maximum likelihood estimation, confidence intervals, tests of hypotheses, Neyman-Pearson lemma, likelihood ratio test, regression, analysis of variance with applications.

**Requisites:** STAT/MATH 309, STAT 311, STAT/MATH 431, MATH 531, or graduate/professional standing

**Course Designation:** Breadth - Natural Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Be able to use probability theory to understand and utilize three principal tools of statistical inference: point estimators, confidence intervals, and hypothesis tests.

Audience: Undergraduate

2. Understand and be able to use standard statistical procedures for analyzing numerical data in certain contexts. These include inference for the mean based on a single random sample; comparing two means based on two random samples; Analysis of Variance; simple linear regression.

Audience: Undergraduate

3. Understand and be able to use standard statistical procedures for analyzing binary and categorical data in certain contexts. These include one- and two-sample inference for proportions, and the analysis of one- and two-way contingency tables for multi-category data.

Audience: Undergraduate

4. Identify the assumptions behind statistical procedures and understand their importance. Be able to recognize when techniques based on standard reference distributions (normal, chi-square, T- and F-distribution) are valid or not, and be able to utilize certain alternatives such as exact or nonparametric methods when they are required or preferable.

Audience: Undergraduate

**STAT 324 – INTRODUCTION TO STATISTICS FOR SCIENCE AND ENGINEERING**

3 credits.

Descriptive statistics, probability concepts and distributions, random variables. Hypothesis tests and confidence intervals for one- and two-sample problems. Linear regression, model checking, and inference. Analysis of variance and basic ideas in experimental design. Utilizes the R programming language.

**Requisites:** MATH 211, 217, or 221. Not open to students with credit for STAT 371.

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate the basics of probability and statistics.

Audience: Undergraduate

2. Make numeric and graphical summaries of simple data

Audience: Undergraduate

3. Produce appropriate statistical analyses of simple data sets

Audience: Undergraduate

4. Design simple experiments with data that will suit basic statistical analysis

Audience: Undergraduate

5. Use R for statistical computations and graphs

Audience: Undergraduate

6. Learn additional statistical methods

Audience: Undergraduate

**STAT 333 – APPLIED REGRESSION ANALYSIS**

3 credits.

An introduction to regression with emphasis on the practical aspects.

Topics include: straight-line model, role of assumptions, residual analysis, transformations, multiple regression (with some use of matrix notation), multicollinearity, subset selection, and a brief introduction to mixed models.

**Requisites:** (STAT 240, 301, 302, 312, 324, 371, ECON 310, B M E 325, or I SY E 210) and (STAT 327 or 303, or concurrent enrollment)

**Course Designation:** Gen Ed - Quantitative Reasoning Part B

Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Correctly choose and apply common regression methods that are used in practice to analyze data, including simple and multiple linear regressions, ANOVAs/ANCOVAs, generalized linear models (e.g. logistic and Poisson) and fixed/random/mixed effect models

Audience: Undergraduate

2. Identify the underlying assumptions behind common regression methods and utilize diagnostic tools to detect violations of said assumptions

Audience: Undergraduate

3. Correctly interpret and explain results from regression methods, including interpretation of the coefficients, the p-values, R-squared, and other statistical summaries from regression

Audience: Undergraduate

4. Apply these methods to real data using the free statistical software R

Audience: Undergraduate

**STAT 340 – DATA SCIENCE MODELING II**

4 credits.

Teaches how to explore, model, and analyze data using R. Topics include basic probability models; the central limit theorem; Monte Carlo simulation; one- and two-sample hypothesis testing; Bayesian inference; linear and logistic regression; ANOVA; the bootstrap; random forests and cross-validation. Features the analysis of real-world data sets and the communication of findings in a clear and reproducible manner within a project setting.

**Requisites:** (MATH 211, 217, or 221) and STAT 240

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and apply basic concepts in probability; combine basic probability models to build more complicated ones; and critique models and their assumptions

Audience: Undergraduate

2. Formulate statistical hypotheses for different kinds of research questions and test those hypotheses using both classical and Monte Carlo methods.

Audience: Undergraduate

3. Understand and apply principles of statistical estimation and prediction, including fitting models and assessing model quality, in the context of both linear and logistic regression.

Audience: Undergraduate

4. Apply statistical tools to answer research questions using real-world data and present these findings clearly in both spoken and written form to non-experts.

Audience: Undergraduate

**STAT 349 – INTRODUCTION TO TIME SERIES**

3 credits.

Autocorrelation; stationarity and non-stationarity; heteroscedasticity; dynamic models; auto-regressive and moving average models; identification and fitting; forecasting; seasonal adjustment; applications for financial time series, social sciences and environmental studies.

**Requisites:** STAT 333, 340, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**STAT 351 – INTRODUCTORY NONPARAMETRIC STATISTICS**

3 credits.

Distribution free statistical procedures or methods valid under nonrestrictive assumptions: basic tools; counting methods; order statistics, ranks, empirical distribution functions; distribution free tests and associated interval and point estimators; sign test; signed rank tests; rank tests; Mann Whitney Wilcoxon procedures; Kolmogorov Smirnov tests; permutation methods; kernel density estimation; kernel and spline regression estimation; computer techniques and programs; discussion and comparison with parametric methods.

**Requisites:** STAT 333, 340, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT 360 – TOPICS IN STATISTICS STUDY ABROAD**

1-3 credits.

Credit is awarded for students having completed an advanced statistics course in a study abroad program for which there is no direct equivalence to the statistics department course offerings. The study abroad course must be pre-approved by the statistics department. Enrollment in a UW-Madison resident study abroad program.

**Requisites:** None

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**STAT 371 – INTRODUCTORY APPLIED STATISTICS FOR THE LIFE SCIENCES**

3 credits.

Introduction to modern statistical practice in the life sciences, using the R programming language. Topics include: exploratory data analysis, probability and random variables; one-sample testing and confidence intervals, role of assumptions, sample size determination, two-sample inference; basic ideas in experimental design, analysis of variance, linear regression, goodness-of fit; biological applications.

**Requisites:** (MATH 112 and placed out of MATH 113), (MATH 113 and placed out of MATH 112), (MATH 112 and 113), MATH 114, 171, 211, 221, or placement in MATH 221. Not open to students with credit for STAT 302 or 324

**Course Designation:** Gen Ed - Quantitative Reasoning Part B  
Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Articulate the basics of probability and statistics

Audience: Undergraduate

2. Make numeric and graphical summaries of simple data

Audience: Undergraduate

3. Produce appropriate statistical analyses of simple data sets

Audience: Undergraduate

4. Design simple experiments whose data will suit basic statistical analysis

Audience: Undergraduate

5. Use RStudio, a free statistical software package, for statistical computations and graphs

Audience: Undergraduate

6. Study and learn additional statistical methods

Audience: Undergraduate

**STAT/COMP SCI/L I S 401 – UNDERGRADUATE COOPERATIVE EDUCATION**

1 credit.

Full time work experience which combines classroom theory with practical knowledge related to Computer Sciences, Data Science, Statistics, or Information Science.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 3 number of completions

**Learning Outcomes:** 1. Apply academic experience gained through coursework in a professional setting.

Audience: Undergraduate

2. Experience the nature and demands of a professional career in computer science, information science, and/or statistics/data science

Audience: Undergraduate

3. Develop professional and transferable skills like time management, collaboration, problem-solving, and communication in the workplace.

Audience: Undergraduate

**STAT/COMP SCI 403 – INTERNSHIP COURSE IN COMP SCI AND DATA SCIENCE**

1 credit.

Enables students with outside internships to earn academic credit connected to their work experience related to the Computer Sciences or Data Science programs.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, for 3 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the challenges and opportunities in Computer Sciences and Data Science professions

Audience: Undergraduate

2. Be prepared to find, apply and interview for a job and/or additional education

Audience: Undergraduate

3. Articulate your career goals and long-term trajectory

Audience: Undergraduate

**STAT 405 – DATA SCIENCE COMPUTING PROJECT**

3 credits.

The development of tools necessary for collecting, managing, and analyzing large data sets. Examples of techniques and programs used include Linux, R, distributed computing, text editor(s), git/github, and other related tools. Work in teams to research, develop, write, and make presentations related to a variety of data analysis projects.

**Requisites:** (STAT 240 or 303) and (COMP SCI 200, 220, 300, or placement into COMP SCI 300), or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Collect and manage data and write programs and documentation viatools suited to large computations including an operating system, an editor, and a version control system.

Audience: Undergraduate

2. Run analyses too large for a laptop on cluster, grid, and/or cloudcomputing environments.

Audience: Undergraduate

3. Work in teams to research, develop, write, and make presentations on a data analysis proposal, a draft data analysis, and a revised dataanalysis.

Audience: Undergraduate

**STAT 411 – AN INTRODUCTION TO SAMPLE SURVEY THEORY AND METHODS**

3 credits.

An introduction to the methods used to design sample surveys and analyze the results. Topics covered include: basic tools, simple random sampling, ratio and regression estimation, stratification, systematic sampling, cluster (area) sampling, two-stage sampling, unequal probability sampling, non-sampling errors, and missing data. For illustration and clarification, examples are drawn from diverse areas of application.

**Requisites:** STAT 333, 340, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**STAT 421 – APPLIED CATEGORICAL DATA ANALYSIS**

3 credits.

Analysis of multidimensional contingency tables, Poisson regression, and logistic regression, with emphasis on practical applications. Use of computer programs for such analyses. Model selection, testing goodness of fit, estimation of parameters, measures of association and methods for detecting sources of significance.

**Requisites:** STAT 333, 340, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**STAT/M E 424 – STATISTICAL EXPERIMENTAL DESIGN**

3 credits.

Introduction to statistical design and analysis of experiments. Topics include: principles of randomization, blocking and replication, randomized blocking designs, Latin square designs, full factorial and fractional factorial designs and response surface methodology. Substantial focus will be devoted to engineering applications.

**Requisites:** STAT 240, 301, 302, 312, 324, 371, or MATH/STAT 310

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe key concepts in the design and analysis of experiments.

Audience: Undergraduate

2. Generate experimental designs and apply appropriate analysis techniques.

Audience: Undergraduate

3. Compare different experimental design and analysis methods in various scenarios.

Audience: Undergraduate

4. Apply experimental design and analysis methods in real-world projects.

Audience: Undergraduate

5. Implement experimental design and analysis methods in statistical software like R.

Audience: Undergraduate

### STAT/MATH 431 – INTRODUCTION TO THE THEORY OF PROBABILITY

3 credits.

Topics covered include axioms of probability, random variables, the most important discrete and continuous probability distributions, expectation and variance, moment generating functions, conditional probability and conditional expectations, multivariate distributions, Markov's and Chebyshev's inequalities, laws of large numbers, and the central limit theorem.

**Requisites:** MATH 234 or 376 or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties used in probability theory (e.g., probability spaces, random variables and random vectors and their probability distributions, named distributions, conditional probability, independence, linearity of expectation, etc.).

Audience: Undergraduate

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., whether certain events or random variables are independent or not, whether a random variable has one of the named distributions, whether or not a sequence of random variables is exchangeable, etc.).

Audience: Undergraduate

3. Recall and state the standard theorems of probability theory. (e.g., Bayes' theorem, the law of large numbers, the central limit theorem, etc.), and apply these theorems to solve problems in probability theory.

Audience: Undergraduate

4. Use multiple approaches to compute and estimate probabilities and expectations (e.g., using the indicator method, using conditioning, estimating probabilities using normal or Poisson approximation etc.).

Audience: Undergraduate

5. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.

Audience: Undergraduate

6. Convey his or her arguments in oral and written forms using English and appropriate mathematical terminology and notation (and grammar).

Audience: Undergraduate

7. Model simple real-life situations using techniques in probability theory and calculate probabilities and expectations associated with those models.

Audience: Undergraduate

### STAT 433 – DATA SCIENCE WITH R

3 credits.

Perform Data Science as an iterative (back and forth) process of four different types of activities (data collection, data wrangling, data analysis, communication). Traverse through the five requisite stances (scientist, coder, mathematician, methodologist, skeptic). Develop and hone a broad set of computational tools in R (but not the broadest) and a broad set of statistical/machine learning tools (but not the broadest). Focus on doing these with agility to make the coding "transparent" and serve the large goals of the project.

**Requisites:** (STAT 333 or 340) and (MATH 320, 340, 341, 345, or 375), graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Describe and apply the key steps taken in most data science projects and how these steps fit into a coherent whole

Audience: Undergraduate

2. Identify how a data set can be used for a specific purpose

Audience: Undergraduate

3. Clean and analyze data

Audience: Undergraduate

4. Communicate the results of data analysis

Audience: Undergraduate

5. Develop agile and reproducible code that enables iterative development of a data science project using the tools in the tidyverse

Audience: Undergraduate

**STAT 436 – STATISTICAL DATA VISUALIZATION**

3 credits.

Techniques for visualization within data science workflows. Topics include data preparation; exploratory data analysis; spatial, tabular, and graph structured data; dimensionality reduction; model visualization and interpretability; interactive queries and navigation.

**Requisites:** (STAT 240 or 303), graduate professional/standing, or declared in Statistics VISP

**Course Designation:** Breadth – Natural Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply preprocessing strategies, including outlier removal, missing data imputation, and tidying, in a way that supports downstream visualization

Audience: Undergraduate

2. Develop a vocabulary of visual encoding that support exploration of geospatial, temporal, tree-structured, and network data, and demonstrate facility implementing them using packages in the R programming language

Audience: Undergraduate

3. Design dynamic queries that support interactive visualization of heterogeneous data and demonstrate facility implementing them using the shiny package in the R programming language

Audience: Undergraduate

4. Design effective visualizations to summarize the results of dimensionality reduction and clustering algorithms

Audience: Undergraduate

5. Use visual artifacts derived from complex statistical machine learning models to discuss the patterns they learn and mistakes they make

Audience: Undergraduate

6. Recognize chart junk in real-world visualizations and propose improved alternatives

Audience: Undergraduate

**STAT 443 – CLASSIFICATION AND REGRESSION TREES**

3 credits.

Introduction to algorithms and applications of classification and regression trees. Recursive partitioning, pruning, and cross-validation estimation of prediction error. Class priors and misclassification costs. Univariate and linear splits. Linear and kernel discriminant analysis and nearest-neighbor classification. Unbiased variable selection and importance scoring of variables. Least-squares, quantile, Poisson, logistic, and proportional hazards regression tree models. Tree ensembles. Subgroup identification of differential treatment effects. Multiple and longitudinal response variables. Missing values and multiple missing value codes. Comparisons with neural networks, support vector machines, and other methods. Bootstrap calibration and post-selection inference. Applications to business, social science, engineering, biology, medicine, and other fields.

**Requisites:** STAT 333, 340, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth – Either Social Science or Natural Science  
Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**Learning Outcomes:** 1. Know the weaknesses and limitations of traditional statistical modeling methods

Audience: Undergraduate

2. Understand the strengths and capabilities of the classification and regression tree approach

Audience: Undergraduate

3. Learn to analyze data with missing values without missing value imputation

Audience: Undergraduate

4. Learn to analyze data containing circular or periodic variables, such as angle of impact, time of day, day of week, and month of year

Audience: Undergraduate

5. Learn how to build regression tree models for least squares regression, logistic regression, Poisson regression, quantile regression, and proportional hazards regression

Audience: Undergraduate

6. Learn how to build prediction models for univariate, multivariate, longitudinal, and censored dependent variables

Audience: Undergraduate

7. Learn to use GUIDE and R software for algorithms such as AMELIA and MICE (for missing value imputation), and RPART, MOB, random Forest (for tree and forest models)

Audience: Undergraduate

## STAT 451 – INTRODUCTION TO MACHINE LEARNING AND STATISTICAL PATTERN CLASSIFICATION

3 credits.

Pattern classification, regression analysis, clustering, and dimensionality reduction. For each category, covers fundamental algorithms and selections of contemporary, current state-of-the-art algorithms. Focus on evaluation of machine learning models using statistical methods. Statistical pattern classification approaches, including maximum likelihood estimation and Bayesian decision theory, algorithmic and nonparametric approaches. Practical use of machine learning algorithms using open source libraries from the Python programming ecosystem.

**Requisites:** MATH 320, 321, 340, 341, 345, 375, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the different subfields of machine learning, such as supervised and unsupervised learning and being familiar with essential algorithms from each subfield.

Audience: Undergraduate

2. Identify whether machine learning is appropriate for solving a given problem task and which class of algorithms is best suited for real-world problem solving.

Audience: Undergraduate

3. Use statistical learning theory to combine multiple machine learning models via ensemble methods.

Audience: Undergraduate

4. Apply best-practices for statistical model evaluation, model selection and algorithm comparisons including suitable statistical hypothesis tests.

Audience: Undergraduate

5. Use contemporary programming languages and machine learning libraries for implementing machine learning algorithms such that they can be readily applied for practical problem solving.

Audience: Undergraduate

6. Connect concepts from probability theory with supervised learning by implementing models based on Bayes' theorem.

Audience: Undergraduate

## STAT 453 – INTRODUCTION TO DEEP LEARNING AND GENERATIVE MODELS

3 credits.

Deep learning is a field that specializes in discovering and extracting intricate structures in large, unstructured datasets for parameterizing artificial neural networks with many layers. Since deep learning has pushed the state-of-the-art in many research and application areas, it's become indispensable for modern technology. Focuses on a understanding deep, artificial neural networks by connecting it to related concepts in statistics. Beyond covering deep learning models for predictive modeling, focus on deep generative models. Besides explanations on a mathematical and conceptual level, emphasize the practical aspects of deep learning. Open-source computing provides hands-on experience for implementing deep neural nets, working on supervised learning tasks, and applying generative models for dataset synthesis.

**Requisites:** MATH 320, 321, 340, 341, 345, 375, graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an advanced understanding of deep learning and generative models, which represent state-of-the-art approaches for predictive modeling in today's data-driven world.

Audience: Undergraduate

2. Identify scenarios where it makes sense to deep learning for real-world problem-solving.

Audience: Undergraduate

3. Build a repertoire of different algorithms and approaches to deep learning and understanding their various strengths and weaknesses.

Audience: Undergraduate

4. Employ the Python programming language and Python's scientific computing stack for implementing deep learning algorithms to 1) enhance the learning experience, 2) conduct research and be able to develop novel algorithms, and 3) apply deep learning to problem-solving in various fields and application areas.

Audience: Undergraduate

5. Apply both the theoretical and practical concepts taught in this class to creative, real-world problem solving and communicating the outcome professionally in form of a scientific paper and a formal oral presentation.

Audience: Undergraduate

**STAT 456 – APPLIED MULTIVARIATE ANALYSIS**

3 credits.

Theory and applications of multivariate statistical methods. Basic concepts and statistical reasoning which underlie the techniques of multivariate analysis. Ideas rather than derivations stressed although basic models discussed to provide a sense of adequacy in particular situations. Acquaintance with and use of existing computer programs in the multivariate analysis area.

**Requisites:** (STAT 333 or 340) and (MATH 320, 340, 341, 345, or 375), graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth – Natural Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the purpose and basic concepts of multivariate analysis, distinguishing it from other common forms of statistical analysis such as regression analysis.

Audience: Undergraduate

2. Define fundamental concepts of multivariate analysis, such as covariance and correlation, and explain their meaning.

Audience: Undergraduate

3. Explain common methods of multivariate analysis such as principal components analysis, factor analysis, multidimensional scaling, and clustering; this includes identifying situations in which these methods would be useful, describing how they are performed, and explaining how to interpret their outputs.

Audience: Undergraduate

4. Use statistical software such as R to create meaningful visualizations of multivariate data, and to carry out multivariate analyses.

Audience: Undergraduate

5. Properly interpret, contextualize, and communicate the results of an applied multivariate analysis.

Audience: Undergraduate

**STAT 461 – FINANCIAL STATISTICS**

3 credits.

Stochastic models and statistical methodologies are widely employed in modern finance. The models and their inferences are very important for academic research and financial practices. Financial stochastic models and their statistical inferences with applications to volatility analysis and risk management, introduction to discrete models such as binomial trees and GARCH and stochastic volatility models as well as simple continuous models like the Black-Scholes model. The focus will be on statistical inference, data analysis and risk management regarding these models.

**Requisites:** (STAT 333, 340, or ECON 410) and (MATH/STAT 309, STAT 311, MATH 331, MATH/STAT 431, or MATH 531), graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand basic stochastic models used in pricing financial instruments.

Audience: Undergraduate

2. Develop statistical inferences for financial applications to volatility analysis and risk management.

Audience: Undergraduate

3. Use computer packages to perform statistical analysis of financial data.

Audience: Undergraduate

4. Interpret statistical analysis in the context of financial applications

Audience: Undergraduate

### STAT/COMP SCI 471 – INTRODUCTION TO COMPUTATIONAL STATISTICS

3 credits.

Classical statistical procedures arise where closed-form mathematical expressions are available for various inference summaries (e.g. linear regression; analysis of variance). A major emphasis of modern statistics is the development of inference principles in cases where both more complex data structures are involved and where more elaborate computations are required. Topics from numerical linear algebra, optimization, Monte Carlo (including Markov chain Monte Carlo), and graph theory are developed, especially as they relate to statistical inference (e.g., bootstrapping, permutation, Bayesian inference, EM algorithm, multivariate analysis).

**Requisites:** STAT/MATH 310 and (STAT 333 or 340), graduate/professional standing, or declared in Statistics VISP

**Course Designation:** Breadth - Natural Science  
Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**Learning Outcomes:** 1. Use computational tools (alongside mathematical ones) to extract information from (a) the likelihood function, the central object of interest in frequentist statistics, and (b) the posterior distribution, the central object of interest in Bayesian statistics  
Audience: Undergraduate

2. Describe, understand the theoretical properties of, and implement basic algorithms for optimizing likelihood functions, including least squares and the IRLS algorithm, and the EM algorithm  
Audience: Undergraduate

3. Understand random numbers and pseudorandom numbers and how to distinguish them, and utilize a variety of techniques for generating random variates from a probability distribution  
Audience: Undergraduate

4. Use Monte Carlo methodology for such purposes as (a) carrying out a simulation study to study the properties of a statistical method, or (b) performing statistical inference via the bootstrap, or MCMC  
Audience: Undergraduate

5. Understand the use of graphical models for representing the structure of complex joint distributions, and be able to use computational tools to extract information from graphical models  
Audience: Undergraduate

### STAT/COMP SCI/MATH 475 – INTRODUCTION TO COMBINATORICS

3 credits.

Problems of enumeration, distribution, and arrangement. Inclusion-exclusion principle. Generating functions and linear recurrence relations. Combinatorial identities. Graph coloring problems. Finite designs. Systems of distinct representatives and matching problems in graphs. Potential applications in the social, biological, and physical sciences. Puzzles. Problem solving.

**Requisites:** (MATH 320, 340, 341, or 375) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science  
Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand basic counting strategies, such as staged thought-experiments, inclusion/exclusion, generating functions, and recurrence relations, and apply these strategies to solve a wide variety of counting problems.  
Audience: Undergraduate

2. Recall basic objects that are used in combinatorics, such as permutations and combinations of sets and multisets, binomial and multinomial coefficients, the Catalan numbers, the Stirling numbers, and the partition numbers.  
Audience: Undergraduate

3. Analyze a given combinatorial problem using the standard theorems of combinatorics, such as the pigeonhole principle, the Newton binomial theorem, the multinomial theorem, the Ramsey theorem, the Dilworth theorem, the Burnside theorem, and the Polya counting theorem.  
Audience: Undergraduate

4. Construct mathematical arguments related to combinatorial problems using the above definitions, properties, theorems, and counting strategies; including the construction of examples and counterexamples.  
Audience: Undergraduate

5. Convey his or her arguments in oral and written form in English, using appropriate mathematical terminology, notation, and grammar.  
Audience: Undergraduate

### STAT 479 – SPECIAL TOPICS IN STATISTICS

1-3 credits.

Special topics of interest in undergraduate students.

**Requisites:** None

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**STAT/COMP SCI/ISY E/MATH 525 – LINEAR OPTIMIZATION**

3 credits.

Introduces optimization problems whose constraints are expressed by linear inequalities. Develops geometric and algebraic insights into the structure of the problem, with an emphasis on formal proofs. Presents the theory behind the simplex method, the main algorithm used to solve linear optimization problems. Explores duality theory and theorems of the alternatives.

**Requisites:** MATH 320, 340, 341, 375, or 443 or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Use linear programming to formulate real world decision problems.

Audience: Both Grad & Undergrad

2. Apply algorithms to solve linear programming problems and demonstrate their correctness.

Audience: Both Grad & Undergrad

3. Combine different proving techniques explored in class in an original way to show new results.

Audience: Graduate

**STAT/B M I 541 – INTRODUCTION TO BIOSTATISTICS**

3 credits.

Course designed for the biomedical researcher. Topics include: descriptive statistics, hypothesis testing, estimation, confidence intervals, t-tests, chi-squared tests, analysis of variance, linear regression, correlation, nonparametric tests, survival analysis and odds ratio. Biomedical applications used for each topic.

**Requisites:** Graduate/professional standing. Not open to students with credit for STAT 511 or POP HLTH/B M I 551

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand building blocks and fundamentals that support core themes of Biostatistics in the application of biomedicine and public health

Audience: Both Grad & Undergrad

2. Conduct basic statistical analyses of biomedical data

Audience: Both Grad & Undergrad

3. Use R for statistical computing

Audience: Both Grad & Undergrad

4. Critique methods and evidence from others' studies

Audience: Graduate

5. Collaborate effectively with biostatisticians

Audience: Graduate

**STAT/B M I 542 – INTRODUCTION TO CLINICAL TRIALS I**

3 credits.

Intended for biomedical researchers interested in the design and analysis of clinical trials. Topics include definition of hypotheses, measures of effectiveness, sample size, randomization, data collection and monitoring, and issues in statistical analysis.

**Requisites:** B M I/STAT 541**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Develop skills to critically review clinical trials literature

Audience: Graduate

2. Formulate focused research questions, specific aims, and key outcomes

Audience: Graduate

3. Recognize the strengths and weaknesses of alternative clinical trials designs and design components

Audience: Graduate

4. Develop related technical skills, including basic sample size calculations and survival analysis

Audience: Graduate

5. Write a clinical trial protocol with all its core components

Audience: Graduate

**STAT/F&W ECOL 571 – STATISTICAL METHODS FOR BIOSCIENCE I**

4 credits.

Descriptive statistics, distributions, one- and two-sample normal inference, power, one-way ANOVA, simple linear regression, categorical data, non-parametric methods; underlying assumptions and diagnostic work.

**Requisites:** Graduate/professional standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**STAT/F&W ECOL 572 – STATISTICAL METHODS FOR BIOSCIENCE II**

4 credits.

Polynomial regression, multiple regression, two-way ANOVA with and without interaction, split-plot design, subsampling, analysis of covariance, elementary sampling, introduction to bioassay.

**Requisites:** STAT/F&W ECOL 571**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**STAT 575 – STATISTICAL METHODS FOR SPATIAL DATA**

3 credits.

Detecting, quantifying, and modeling spatial patterns and structure in data. Variograms and covariance functions, linear predictions with uncertainty qualification, and conditional simulations. Spectral domain models and spectral densities. Spatial point processes. Contemporary applications and Gaussian process model fitting at scale.

**Requisites:** (STAT 333 or 340) and (MATH 320, 340, 341, or 375), graduate/professional standing, or declared in Statistics VISP**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**Learning Outcomes:** 1. Undertake exploratory analysis of spatial and spatio-temporal data with nonparametric estimators like empirical variograms.

Audience: Both Grad &amp; Undergrad

2. Fit parametric and semi-parametric mean and covariance models to spatial and spatio-temporal data for the purposes of prediction and uncertainty quantification.

Audience: Both Grad &amp; Undergrad

3. Understand important differences between interpolation and extrapolation and how to choose and design models more effectively for each application.

Audience: Both Grad &amp; Undergrad

4. Use the R programming language to load, manipulate, and effectively work with spatial data in popular file formats like CSV, NetCDF, HDF5.

Audience: Undergraduate

5. Use several popular software libraries and modeling paradigms for spatial and spatio-temporal problems like estimation and prediction.

Audience: Both Grad &amp; Undergrad

6. Understand problems of identifiability and consistency in popular modeling paradigms.

Audience: Graduate

**STAT 601 – STATISTICAL METHODS I**

4 credits.

Provides a thorough grounding in modern statistical methods. The specific learning outcomes for the course are to understand data collection in context (how/why data were collected, key questions under study); explore data by effective graphical and numerical summaries; understand probability concepts and models as tools for studying random phenomena and for statistical inference; analyze data using appropriate, modern statistical models, methods, and software; understand the statistical concepts underlying methods; develop the ability to interpret results and critically evaluate the methods used; communicate data analysis and key findings in context.

**Requisites:** Graduate/professional standing or declared in Statistics VISP

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT 602 – STATISTICAL METHODS II**

4 credits.

Provides a thorough grounding in modern statistical methods. The specific learning outcomes for the course are to understand data collection in context (how/why data were collected, key questions under study); explore data by effective graphical and numerical summaries; understand probability concepts and models as tools for studying random phenomena and for statistical inference; analyze data using appropriate, modern statistical models, methods, and software; understand the statistical concepts underlying methods; develop the ability to interpret results and critically evaluate the methods used; communicate data analysis and key findings in context.

**Requisites:** STAT 601

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**STAT 605 – DATA SCIENCE COMPUTING PROJECT**

3 credits.

The development of tools necessary for collecting, managing, and analyzing large data sets. Examples of techniques and programs utilized include Linux, R, distributed computing, powerful editor(s), git/github, and other related tools. Work in the class will be done in teams to research, develop, write, and make presentations related to a variety of data analysis projects.

**Requisites:** Declared in Statistics MS or Statistics VISP

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Collect and manage data and write programs and documentation via tools suited to large computations. Use the Linux operating system and write shell scripts. Use an editor to write and manage local and remote files. Use the git/github version control system to track changes and manage collaboration.

Audience: Graduate

2. Be able to use Linux, R, and the Slurm job scheduler to run tens of parallel jobs on the Statistics High Performance Computing (HPC) Cluster. Use Linux, R, and distributed high-throughput computing via HTCondor to run thousands of parallel jobs at UW's Center for High-Throughput Computing (CHTC).

Audience: Graduate

3. Work in teams to research, develop, write, and make three presentations including one on a data analysis proposal consisting of data, a question, and a suggested analysis; one on a draft data analysis; and one on a revised data analysis.

Audience: Graduate

**STAT 606 – COMPUTING IN DATA SCIENCE AND STATISTICS**

3 credits.

A survey of some of the tools and frameworks that are currently popular among data scientists and statisticians working in both academia and industry. Begins with an accelerated introduction to the Python programming language and brief introductions to object-oriented and functional programming. Covers some of the scientific computing platforms available in Python, including tools for numerical and scientific computing; training basic machine learning models; and data visualization. Discusses collecting data from the web both by scraping and using APIs. Concludes with a brief survey of distributed computing platforms, focusing on the MapReduce framework.

**Requisites:** Declared in Statistics MS or Statistics VISP (undergraduate)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and apply the basics of the Python programming language and basic programming patterns in both the object-oriented and functional programming frameworks

Audience: Graduate

2. Collect and clean data from a variety of data sources including markup languages from the web, databases, and by using APIs

Audience: Graduate

3. Understand the MapReduce framework and apply it to large-scale data sets in a distributed environment using modern cloud computing platforms

Audience: Graduate

4. Use numerical and scientific computing libraries to build and fit statistical models on large datasets

Audience: Graduate

**STAT 609 – MATHEMATICAL STATISTICS I**

3 credits.

Review of probability, random variables and vectors and their distributions, moments and inequalities, generating functions, transformations of random variables, sampling and distribution theory, convergence concepts for sequences of random variables, laws of large numbers, central limit and other limit theorems.

**Requisites:** Graduate/professional standing or declared in Statistics VISP

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**STAT 610 – INTRODUCTION TO STATISTICAL INFERENCE**

4 credits.

Conditioning, distribution theory, approximation to distributions, modes of convergence, limit theorems, statistical models, parameter estimation, comparison of estimators, confidence sets, theory of hypothesis tests, introduction to Bayesian inference and nonparametric estimation.

**Requisites:** Graduate/professional standing or declared in Statistics VISP

**Course Designation:** Breadth - Physical Sci. Counts toward the Natural Sci req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT 611 – STATISTICAL MODELS FOR DATA SCIENCE**

3 credits.

Probability, random variables and their distributions, joint and conditional distributions, moments and inequalities, generating functions, transformations of random variables, sampling and distribution theory, convergence concepts and limit theorems for sequences of random variables.

**Requisites:** Declared in Data Science MS or Data Engineering MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the foundations of probability theory, including: the axioms of probability, the concepts of sample space and probability measure, events and their probabilities, and the notions of conditional probability and independence

Audience: Graduate

2. Explain the concepts of random variables and probability distributions, and calculate or otherwise utilize key mathematical objects and results related to them, including: random number generation, expected values and moments, moment-based probabilistic inequalities, moment generating functions, joint probability distributions of multiple random variables

Audience: Graduate

3. Identify the most important probability distributions used in Statistics, cite their properties, create computer visualizations of them, and simulate random variates from these distributions. This includes the normal distribution, the binomial distribution, the exponential distribution, the Poisson distribution, and more

Audience: Graduate

4. Apply, and explain the significance of, key results related to the limits of sequences of random variables, including laws of large numbers, the Central Limit Theorem, and the delta method

Audience: Graduate

5. Grasp important elements of sampling theory, including: random samples and how to generate them; statistics, such as the sample mean and sample variance, and how to derive or simulate their sampling distributions; and the distributions that arise from a normal random sample, namely the chi-square, T, and F distributions.

Audience: Graduate

**STAT 612 – STATISTICAL INFERENCE FOR DATA SCIENCE**

3 credits.

Statistical models, methods and theory for parameter estimation, Bayesian approach to parameter estimation, methods and theory for hypothesis tests, confidence sets, two-sample testing and ANOVA, categorical data analysis, linear regression.

**Requisites:** STAT 611

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Construct point estimators including maximum likelihood estimators, understand the theoretical properties of point estimation methods, evaluate their performance using mathematical derivations and simulation-based techniques, and identify optimal point estimators

Audience: Graduate

2. Describe the Bayesian approach to point estimation and contrast it with the frequentist approach

Audience: Graduate

3. Construct and evaluate hypothesis tests (such as likelihood ratio tests) using mathematical derivations or simulation-based techniques, interpret their results, understand theoretical properties of hypothesis testing methods, and identify optimal hypothesis tests

Audience: Graduate

4. Construct and evaluate interval estimators using mathematical and simulation-based techniques, understand the theoretical properties of interval estimation methods, and interpret their results

Audience: Graduate

5. Identify and describe the assumptions underlying methods of statistical inference and explain their importance

Audience: Graduate

6. Fit models and carry out statistical inference in classical situations: namely: the comparison of two or more samples (ANOVA), the analysis of categorical data, linear regression, generalized linear models, and random and mixed effects models

Audience: Graduate

**STAT 613 – STATISTICAL METHODS FOR DATA SCIENCE**

3 credits.

Provides a thorough grounding in modern statistical methods. Introduces statistical techniques and methods of data analysis, including data description, linear regression models, diagnostic tools, prediction and model selection, and experimental design.

**Requisites:** Declared in Data Science MS or Data Engineering MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Strategize and select a regression equation, examine residuals, transform data, recognize biases due to excluded variables and measurement error

Audience: Graduate

2. Conduct general linear modeling for exponential family data and specifically models for binary, count, and categorical data, perform model fitting and inference

Audience: Graduate

3. Develop the concepts and relevant methodology and ability to design and analyze experiments

Audience: Graduate

4. Use and interpret computer package for regression programs

Audience: Graduate

5. Present clear data structure and analysis in the context of data drawn from real-world applications

Audience: Graduate

**STAT 615 – STATISTICAL LEARNING**

3 credits.

The development of a variety of mathematical theories and statistical concepts (1) to understand the properties of those models and methods used for the purpose of prediction from data or decision making from data, and (2) to criticize such models, methods and their consequences. Specifically, the theories and tools that will be developed will include complexity theory, Hilbert spaces, Gaussian processes, Variational Analysis, and concentration inequalities.

**Requisites:** Declared in Statistics: Statistics and Data Science MS, Data Science MS, Data Engineering MS, or Statistics VISP

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of statistical theories, methodologies, and applications as tools in scientific inquiries.

Audience: Graduate

2. Select and utilize the most appropriate statistical methodologies and practices.

Audience: Graduate

3. Synthesize information pertaining to questions in empirical studies.

Audience: Graduate

4. Communicate data concepts and analysis results clearly.

Audience: Graduate

5. Recognize and apply principles of ethical and professional conduct.

Audience: Graduate

6. Demonstrate knowledge of theoretical properties of many procedures used in machine learning for the purposes of classification, regression, and beyond.

Audience: Graduate

7. Demonstrate knowledge of classical and modern notions in statistical learning theory including concentration inequalities, measures of statistical complexity, kernel methods for learning, Gaussian processes, and basics of variational inference.

Audience: Graduate

**STAT/B M I 620 – STATISTICS IN HUMAN GENETICS**

3 credits.

Provides a comprehensive survey of statistical methods in human genetics research. Covered topics include linkage analysis, genome-wide association study, rare variant association analysis, meta-analysis, genome and variant annotation, heritability estimation, multi-trait modeling techniques, multi-omic data integration, and genetic risk prediction.

**Requisites:** STAT 333, 340, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize problems in human genetics that are appropriate for statistical modeling

Audience: Both Grad & Undergrad

2. Identify appropriate statistical procedures and computational algorithms for different tasks

Audience: Both Grad & Undergrad

3. Gain practical experience in applying a select set of statistical methods on real data and evaluate its outputs

Audience: Both Grad & Undergrad

4. Evaluate the strengths and weaknesses of different statistical and computational approaches designed for a specific biological problem

Audience: Graduate

**STAT 627 – PROFESSIONAL SKILLS IN DATA SCIENCE**

1-3 credits.

Covers important aspects of professional development in statistics, including skills with internet tools, sophisticated use of statistical languages (such as R) and other emerging topics.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**STAT 628 – DATA SCIENCE PRACTICUM**

3 credits.

Provides an understanding of and experience with turning statistics concepts into practice through data science practicums inspired by realistic projects. Combine theory and methods expertise with communications skills to translate from a vaguely stated project description and complex data set into a concisely summarized analysis, including both written and graphical interpretation that can be used by decision makers in an organization.

**Requisites:** Declared in Statistics: Statistics and Data Science MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Frame real-world data problems into testable and solvable statistical problems.

Audience: Graduate

2. Develop analysis/solutions that are fast, scalable, and robust

Audience: Graduate

3. Communicate solutions concisely and clearly, creating understandable and accurate visual/tabular summaries of the data analysis, and responding to audience questions clearly

Audience: Graduate

**STAT/ISYE/MATH/OTM 632 – INTRODUCTION TO STOCHASTIC PROCESSES**

3 credits.

Topics include discrete-time Markov chains, Poisson point processes, continuous-time Markov chains, and renewal processes. Applications to queueing, branching, and other models in science, engineering and business.

**Requisites:** (STAT/MATH 431, 309, STAT 311 or MATH 531) and (MATH 320, 340, 341, 375, 421 or 531) or graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Recall and state the formal definitions of the mathematical objects and their properties for stochastic processes (e.g., discrete space Markov chains, Poisson processes, renewal processes, branching processes, etc.).

Audience: Both Grad & Undergrad

2. Use such definitions to argue that a mathematical object does or does not have the condition of being a particular type or having a particular property (e.g., irreducibility, aperiodicity, recurrence, transience, the Markov property, etc.).

Audience: Both Grad & Undergrad

3. Recall and state the standard theorems of stochastic processes. (e.g., laws of large numbers for Markov chains, existence of limiting/stationary distributions, law of large numbers for renewal processes, etc.) and recall the arguments for these theorems and the underlying logic of their proofs.

Audience: Both Grad & Undergrad

4. Construct mathematical arguments related to the above definitions, properties, and theorems, including the construction of examples and counterexamples.

Audience: Both Grad & Undergrad

5. Convey arguments in oral and written forms using English and appropriate mathematical terminology, notation and grammar.

Audience: Both Grad & Undergrad

6. Model simple real life situations by means of discrete-space stochastic processes and calculate probabilities associated with those processes.

Audience: Both Grad & Undergrad

7. Identify applications of course content in current areas of research.

Audience: Graduate

**STAT/BMI 641 – STATISTICAL METHODS FOR CLINICAL TRIALS**

3 credits.

Statistical issues in the design of clinical trials, basic survival analysis, data collection and sequential monitoring.

**Requisites:** STAT/MATH 310 or graduate/professional standing

**Course Designation:** Breadth - Natural Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**STAT/BMI 642 – STATISTICAL METHODS FOR EPIDEMIOLOGY**

3 credits.

Methods for analysis of case-control, cross sectional, and cohort studies.

Covers epidemiologic study design, measures of association, rates, classical contingency table methods, and logistic and Poisson regression.

**Requisites:** STAT/MATH 310 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize key concepts of statistical methods in epidemiology study: study design, association, causation

Audience: Both Grad & Undergrad

2. Build parametric or semiparametric model for analyzing categorical data and survival data

Audience: Both Grad & Undergrad

3. Utilize model design tools for model performance assessment

Audience: Both Grad & Undergrad

4. Build semiparametric model for analyzing categorical data and survival data

Audience: Graduate

**STAT/B M I 643 – CLINICAL TRIAL DESIGN, IMPLEMENTATION, AND ANALYSIS**

3 credits.

Gain an understanding of fundamental elements of clinical trials (such as objectives, endpoints, surrogate endpoints, and statistical decisions) and statistical design considerations (such as randomization and blinding).

Designs of clinical trials for Phase I, II, and III studies including single-arm, two-arm, and drug combination trials. Introduction to adaptive designs for precision medicine and master protocol designs such as umbrella trials and basket trials.

**Requisites:** STAT 609, 610, B M I/STAT 641, or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Summarize the objectives of clinical trials and key statistical design components

Audience: Both Grad & Undergrad

2. Design the clinical trials and investigate the operating characteristics of the design to implement clinical trials

Audience: Both Grad & Undergrad

3. Write the protocol section of statistical considerations and communicate the design of clinical trials to both statisticians and clinicians

Audience: Both Grad & Undergrad

4. Build sequential and adaptive methods for clinical trials

Audience: Graduate

**STAT 678 – INTRODUCTION TO STATISTICAL CONSULTING**

3 credits.

Develop statistical consulting skills to be able to communicate design and analysis to non-technical research collaborators. Provides a supportive environment to experiment with statistical consulting in practice, which will sometimes be uncomfortable and strange. Consulting problems typically do not have a "right" answer, and mistakes are encouraged. Take risks in sharing developing ideas in class. Connections with external organizations, such as the private sector and government agencies, will be made through possible internship experiences.

**Requisites:** Declared in Statistics MS

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. summarize findings with graphs and non-technical writing

Audience: Graduate

2. ask questions to reveal problem design and study details

Audience: Graduate

3. present design, analysis approach and findings orally in plain language

Audience: Graduate

4. manage time and project workflow effectively

Audience: Graduate

5. contribute as an active member of a research team

Audience: Graduate

**STAT 679 – SPECIAL TOPICS IN STATISTICS**

1-3 credits.

Special topics in statistics at the master's level. Subject matter varies.

**Requisites:** Graduate/professional standing or declared in Statistics VISP

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**STAT 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual study for students writing honors thesis, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**STAT 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual study for students writing honors thesis, as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT 698 – DIRECTED STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**STAT 699 – DIRECTED STUDY**

1-6 credits.

Directed study projects as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**STAT 701 – APPLIED TIME SERIES ANALYSIS, FORECASTING AND CONTROL I**

3 credits.

Theory and application of discrete time series models illustrated with forecasting problems. Principles of iterative model building. Representation of dynamic relations by difference equations. Autoregressive integrated Moving Average models. Identification, fitting, diagnostic checking of models. Seasonal model application to forecasting in business, economics, ecology, and engineering used at each stage, which the student analyzes using computer programs which have been specially written and extensively tested.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT/MATH 709 – MATHEMATICAL STATISTICS I**

4 credits.

An introduction to measure theoretic probability, random variables, and high-dimensional statistics; conditional expectation, sufficiency, and unbiased estimation; methods of large sample theory including laws of large numbers and central limit theorems.

**Requisites:** Declared in Statistics MS, Statistics PhD, Biomedical Data Science PhD, Biomedical Data Science MS, or Statistics Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Define statistical estimation problems using rigorous mathematical languages

Audience: Graduate

2. Derive basic statistical properties of an estimator such as bias and variance

Audience: Graduate

3. Analyze and compare different statistical estimators, and articulate the strengths and weaknesses of each method

Audience: Graduate

4. Apply theoretical tools such as concentration inequalities to new statistical problems in the form of mathematical proofs

Audience: Graduate

5. Articulate the distinctions between classical large-sample statistical theory and high-dimensional statistical theory, and critique recent statistical research

Audience: Graduate

**STAT/MATH 710 – MATHEMATICAL STATISTICS II**

4 credits.

Estimation theory, efficiency, Neyman-Pearson theory of hypothesis testing, confidence regions, decision theory, likelihood ratio theory, current research topics in mathematical statistics.

**Requisites:** STAT/MATH 709

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Define and distinguish different notions of optimality in point estimation, hypothesis testing, and confidence sets.

Audience: Graduate

2. Apply standard techniques to derive optimal estimators, hypothesis tests, and confidence sets.

Audience: Graduate

3. Study statistical inference procedures for parametric and non-parametric models.

Audience: Graduate

4. Investigate asymptotic analysis of point estimators, hypothesis tests, and confidence sets.

Audience: Graduate

5. Understand and critique current research in mathematical statistics.

Audience: Graduate

**STAT/COMP SCI/ISY E/MATH 726 – NONLINEAR OPTIMIZATION I**

3 credits.

Theory and algorithms for nonlinear optimization, focusing on unconstrained optimization. Line-search and trust-region methods; quasi-Newton methods; conjugate-gradient and limited-memory methods for large-scale problems; derivative-free optimization; algorithms for least-squares problems and nonlinear equations; gradient projection algorithms for bound-constrained problems; and simple penalty methods for nonlinearly constrained optimization. Students are strongly encouraged to have knowledge of linear algebra and familiarity with basic mathematical analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**STAT/B M I 727 – THEORY AND METHODS OF LONGITUDINAL DATA ANALYSIS**

3 credits.

Theory and methods of fundamental statistical models for the analysis of longitudinal data, including repeated measures analysis of variance, linear mixed models, generalized linear mixed models, and generalized estimating equations. Introduction of how to implement these methods in statistical softwares such as in R and/or SAS, within the context of appropriate statistical models and carry out and interpret analyses.

**Requisites:** STAT 610

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Analyze longitudinal data in a variety of settings and with a variety of outcome variables

Audience: Graduate

2. Apply statistical methods in fitting longitudinal data models for addressing scientific questions

Audience: Graduate

3. Perform longitudinal data analyses in statistical softwares such as R and/or SAS

Audience: Graduate

4. Interpret and communicate the scientific meanings of the results to both statisticians and non-statisticians (such as clinicians and scientists)

Audience: Graduate

**STAT 732 – LARGE SAMPLE THEORY OF STATISTICAL INFERENCE**

3 credits.

Stochastic modes of convergence. Asymptotic theory of normed sums of random variables with applications to asymptotic normality of estimators. Methods for deriving limit distributions of nonlinear statistics. Asymptotic relative efficiencies. Asymptotic confidence regions and tests of hypotheses. Models of non-identically distributed or dependent random variables.

**Requisites:** STAT 610 or MATH/STAT 709

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**STAT/MATH 733 – THEORY OF PROBABILITY I**

3 credits.

An introduction to measure theoretic probability and stochastic processes. Topics include foundations, independence, zero-one laws, laws of large numbers, convergence in distribution, characteristic functions, central limit theorems, random walks, conditional expectations. Familiarity with basic measure theory (e.g. MATH 629 or 721) or concurrent registration in MATH 721 is strongly recommended.

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**STAT/MATH 734 – THEORY OF PROBABILITY II**

3 credits.

Possible topics include martingales, weak convergence of measures, introduction to Brownian motion.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**STAT/B M I 741 – SURVIVAL ANALYSIS THEORY AND METHODS**

3 credits.

Theory and practice of analytic methods for censored survival data, including nonparametric and parametric methods, the proportional hazards regression model, and a review of current topics in survival analysis.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Summarize the features of censored data and their implications in drawing inference

Audience: Graduate

2. Implement proper non- and semi-parametric methods for analysis of various types of data

Audience: Graduate

3. Recognize and check the assumptions needed for estimation and inference

Audience: Graduate

4. Implement the inference procedures to solve real-world problems using statistical packages such as R (or SAS)

Audience: Graduate

5. Interpret and present the analytic results in a clear and coherent way to answer substantive questions

Audience: Graduate

**STAT 760 – MULTIVARIATE ANALYSIS I**

3 credits.

Multivariate normal distribution, estimation of mean and covariance matrix; Wishart distribution; distribution of partial and multiple correlation coefficients; Hotelling's T-squared, principal components.

**Requisites:** STAT 610 or MATH/STAT 710

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**STAT 761 – DECISION TREES FOR MULTIVARIATE ANALYSIS**

3 credits.

Tree construction, including finding splits, tree-pruning and error estimation. Categorical predictor variables, missing or censored data, prior class-probabilities, and unequal misclassification costs. Selection bias. Comparison with other statistics and machine-learning methods. Extensions to piecewise linear and non-least squares regression models.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**STAT/B M I 768 – STATISTICAL METHODS FOR MEDICAL IMAGE ANALYSIS**

3 credits.

Introduce key statistical methods and concepts for analyzing various medical images. Analyze publicly available and student/instructor supplied imaging data using the most up-to-date methods and tools.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement the key concepts of biomedical image processing and analysis

Audience: Graduate

2. Describe the key concepts of statistical inference procedures for single and multiple images

Audience: Graduate

3. Apply scalable computation in breaking bigger imaging problems into smaller computable problems

Audience: Graduate

4. Describe functional data analysis (FA), geometric data analysis (GDA) and topological data analysis (TDA) methods in analyzing biomedical images

Audience: Graduate

**STAT 771 – COMPUTATIONAL STATISTICS**

4 credits.

Statistical inference from the perspective of computation. Statistical problems include data reduction, parameter estimation, hypothesis testing, prediction, statistical modeling, and both Bayesian and non-Bayesian inference. Computational issues include algorithms for model fitting (optimization), computing standard errors, calculating various model properties (integration), as well as systems to organize and manage data and to deploy computations.

**Requisites:** Declared in Statistics MS, Statistics PhD, Biomedical Data Science PhD, Biomedical Data Science MS, Business PhD, or Statistics Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain, evaluate, and avoid the ill-effects of finite-precision arithmetic in statistical calculations

Audience: Graduate

2. Construct summary statistics from data using multiple algorithms, including best-practice approaches

Audience: Graduate

3. Identify problems for which Monte Carlo simulation is appropriate, and deploy schemes to simulate random variables

Audience: Graduate

4. Recognize statistical model fitting situations where tools from numerical linear algebra are required, and deploy various matrix decompositions for these situations

Audience: Graduate

5. Demonstrate knowledge of basic convex analysis and how this is used to solve statistical optimization problems

Audience: Graduate

6. Describe and deploy algorithmic strategies for both nonlinear and constrained optimization problems that arise in fitting statistical models

Audience: Graduate

7. Construct confidence sets for a parameter, standard errors for an estimator, a p-value for a hypothesis test, or a prediction accuracy estimate for a predictor in both standard and non-standard statistical settings

Audience: Graduate

8. Use graph-based approaches to deploy Bayesian posterior analysis

Audience: Graduate

9. Design, deploy, and justify various Markov-chain Monte Carlo algorithms for statistical inference

Audience: Graduate

10. Outline the structure of specialized optimization tools used in statistics

Audience: Graduate

11. Deploy computations on a variety of data structures using R programming tools

Audience: Graduate

**STAT 772 – LINEAR RANDOMIZED ALGORITHMS FOR DATA SCIENCE**

3 credits.

Introduce new algorithms that leverage randomization to address the scale, speed, and sensitivity needs of modern data science. Develop the mathematical foundations of such randomized algorithms. Criticize these algorithms through the lens of computational resource utilization. Implement these algorithms to address linear problems in data science.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Apply common (constructive and inductive) thinking and reasoning patterns used in randomized algorithms for deriving solutions to linear problems arising in data science

Audience: Graduate

2. Transform constructive mathematical reasoning patterns into numerical algorithms, and criticize the computational resource utilization of these algorithms

Audience: Graduate

3. Implement numerical algorithms using the Julia programming language, and become familiar with assistive tools such as debuggers and profilers

Audience: Graduate

4. Create and implement rigorous numerical experiments to test and compare different algorithms and implementations, and draw appropriate conclusions from the results of these experiments

Audience: Graduate

**STAT/ECON/GEN BUS 775 – BAYESIAN STATISTICS**

3 credits.

Introduces the theory, methods, and computational procedures needed to perform advanced Bayesian data analyses. Predictive and decision-theoretic motivations including subjective probability, risk, admissibility, and exchangeability; highlights key components of Bayesian analysis (i.e., prior, likelihood, posterior, and predictive distributions) within standard parametric models and advanced hierarchical and multilevel models; demonstrates the iterative process of model specification, implementation, criticism, and revision with applied case studies; implements computational techniques (e.g., Markov chain Monte Carlo, variational inference) in modern probabilistic programming languages.

**Requisites:** STAT 609, 610, 611, STAT/MATH 709, ECON 709, POLI SCI 818, or COMP SCI/E C E 761

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Justify the use of probability for coherent uncertainty quantification

Audience: Graduate

2. Explain how Bayesian updating occurs in conjugate models and hierarchical models

Audience: Graduate

3. Compare and contrast the conceptual and practical benefits and challenges of different posterior approximation strategies like MCMC and variational inference

Audience: Graduate

4. Implement posterior approximation algorithms in modern statistical and probabilistic programming languages such as R or Stan

Audience: Graduate

5. Specify, fit, criticize, and revise Bayesian models in practice

Audience: Graduate

**STAT 780 – INTRODUCTION TO QUANTUM DATA SCIENCE**

3 credits.

Quantum computation issues, including probability, statistics, sensing, information, machine learning, and applying data science to quantum information science.

**Requisites:** STAT 601, (STAT 609 and 610), or (STAT 611 and 612)

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate understanding of quantum probability, including axioms, observable, outcome, expectation, and distribution.

Audience: Graduate

2. Master quantum statistics methods such as likelihood, information inequality, quantum hypothesis test, and quantum tomography (quantum sensing).

Audience: Graduate

3. Comprehend concept of quantum computation and quantum information, including qubit and its properties, quantum entropy, and quantum cryptography.

Audience: Graduate

4. Understand essential elements of quantum algorithms and quantum machine learning.

Audience: Graduate

5. Understand statistics in quantum computational advantage (supremacy) studies.

Audience: Graduate

**STAT 801 – ADVANCED FINANCIAL STATISTICS**

3 credits.

Statistical theory and methodology for modern financial data. Topics include financial stochastic models based on time series and stochastic calculus, modern statistical inference, and statistical learning for financial data as well as their applications to financial problems.

**Requisites:** STAT 601 or 701

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

**STAT/MATH 803 – EXPERIMENTAL DESIGN I**

3 credits.

Summary of matrix algebra required, theory of estimable functions, incomplete blocks, balanced incomplete block designs, partially balanced incomplete block designs.

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**STAT 809 – NON PARAMETRIC STATISTICS**

3 credits.

Statistical procedures valid under unrestrictive assumptions; sign test; confidence intervals; efficiency comparisons; signed rank procedures; Walsh sums; point estimators; two sample rank tests; zeros, ties, and other problems of discrete data; order statistics; Winsorized and truncated point estimators and connection with gross error models; permutation procedures; combinatorial problems, and computer applications.

**Requisites:** STAT 610 or MATH/STAT 710**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**STAT/B M I 828 – SEMIPARAMETRIC METHODS IN DATA SCIENCE**

3 credits.

Review of statistical convergence modes, M-estimation, and basics of Hilbert space. Introduction of how to derive the nuisance tangent space, its complement, and the corresponding efficient influence function, from the geometric perspective of semiparametric models. Introduction of how to estimate nuisance functions using machine learning methods, and their implementations in R and/or Python. Introduction of a variety of semiparametric models in missing data analysis, causal inference, dimension reduction, precision medicine, semi-supervised learning, transfer learning and domain adaptation.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Derive the nuisance tangent space, its complement, and the corresponding efficient influence function in semiparametric models

Audience: Graduate

2. Apply a variety of semiparametric methods and models in applications ranging from biomedical studies to social sciences

Audience: Graduate

3. Perform machine learning algorithms for estimating nuisance functions in software such as R and/or Python

Audience: Graduate

**STAT/MATH 833 – TOPICS IN THE THEORY OF PROBABILITY**

3 credits.

Advanced topics in probability and stochastic processes.

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**STAT 834 – EMPIRICAL PROCESSES AND SEMIPARAMETRIC INFERENCE**

1-3 credits.

Empirical process methods in statistics; semiparametric models; stochastic convergence in metric spaces; Glivenko-Cantelli and Donsker theorems; entropy calculations; bootstrapped empirical processes; functional delta method; Z-estimators; M-estimators; rates of convergence; semiparametric efficiency; semiparametric estimating equations; nonparametric maximum likelihood.

**Requisites:** STAT 610 or MATH/STAT 710**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2019**STAT 841 – NONPARAMETRIC STATISTICS AND MACHINE LEARNING METHODS**

3 credits.

Statistical function estimation and classification; reproducing kernel machines, support vector machines; high dimensional model selection and estimation; Bayesian, empirical Bayesian interpretation of nonparametric learning methods; log density ANOVA and graphical models; tree ensemble methods including bagging, boosting, and random forest.

**Requisites:** STAT 610 or MATH/STAT 710**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2019

**STAT 849 – ADVANCED STATISTICAL METHODS**

4 credits.

Gain thorough grounding in modern statistical methods and theory. Classical and modern statistical techniques, including linear regression models, diagnostic tools, prediction, generalized linear regression models, random effect models, experimental design, and model selection. Apply these techniques to dataset in specific contexts.

**Requisites:** Declared in Statistics MS, Statistics PhD, Biomedical Data Science PhD, Biomedical Data Science MS, Business PhD, or Statistics Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Build appropriate regression models given specific contexts.

Audience: Graduate

2. Conduct estimation and inference for regression models: Calculate important quantities, such as MLE and test statistics. Derive important statistical properties, such as distributions of statistics and conducting hypothesis testing

Audience: Graduate

3. Analyze the performance of linear models: The use of goodness-of-fit measurements of models. Describe common issues of model building. Use statistical methods to select between models. Provide interpretation of the built models.

Audience: Graduate

4. Master the concepts and relevant theory for general linear model, especially the inference procedure for binary, multinomial, count and categorical data.

Audience: Graduate

5. Understand the theory and methods for random effect models and experiment design including blocking, nesting, replication.

Audience: Graduate

**STAT/COMP SCI/E C E 861 – THEORETICAL FOUNDATIONS OF MACHINE LEARNING**

3 credits.

Advanced mathematical theory and methods of machine learning. Statistical learning theory, Vapnik-Chevronenkis Theory, model selection, high-dimensional models, nonparametric methods, probabilistic analysis, optimization, learning paradigms.

**Requisites:** E C E/COMP SCI 761 or E C E 830

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**STAT/B M I 877 – STATISTICAL METHODS FOR MOLECULAR BIOLOGY**

3 credits.

Statistical and computational methods in statistical genomics for human and experimental populations. Review methods for quality control, experimental design, clustering, network analysis, and other downstream analysis of next-generation sequencing studies along with methods for genome wide association studies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Understand the statistical and computational background underlying many state-of-the-art techniques for the pre-processing and analysis of high-throughput genomics datasets

Audience: Graduate

2. Identify the appropriateness and limitations of such methods in a variety of settings.

Audience: Graduate

3. Discuss scientific problems and identify the statistical and computational aspects embedded in the processing and analysis of genomics datasets.

Audience: Graduate

4. Become proficient in select software packages commonly used in analysis of next-generation sequencing data.

Audience: Graduate

**STAT/E C E/MATH 888 – TOPICS IN MATHEMATICAL DATA SCIENCE**

1-3 credits.

Advanced topics in the mathematical foundations of data science

**Requisites:** Graduate/professional standing or member of the Pre-Masters Mathematics (Visiting International) Program

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply advanced mathematical concepts to solve a variety of data science problems

Audience: Graduate

2. Analyze rigorously the mathematical properties of methods used in data science

Audience: Graduate

**STAT 990 – RESEARCH**

1-12 credits.

Independent research and writing for graduate students under the supervision of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**STAT 992 – SEMINAR**

1-3 credits.

Special topics in statistics at the graduate level. Subject matter varies.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**STAT 998 – STATISTICAL CONSULTING**

3 credits.

Consulting apprenticeship.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

## SURGERY (SURGERY)

**SURGERY 699 – INDEPENDENT STUDY**

0-5 credits.

Independent study projects as arranged with faculty or instructional staff.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop critical, analytical, and independent thinking skills

Audience: Undergraduate

**SURGERY 909 – SURGERY INTERNSHIP PREPARATION**

1 credit.

High-yield topics that a surgery intern should know to start of residency. Routine communication skills needed in residency, including writing comprehensive orders and effectively handing off patients. Communication and teamwork skills with healthcare team members. Communication and interpersonal skills in difficult situations, including obtaining informed consent, talking with parents of patients who choose to decline recommended management options, and disclosing complications. Common pediatric skills, including IV placement, umbilical line placement, defibrillation, airway management, lumbar puncture, and suturing. Based on the national Educational Curriculum that was developed by the American College of Surgeons, American Program Director Society, and the Association for Surgical Education, which focuses on focused on essential skills for medical students and PGY-1 residents to successfully navigate the first year of surgical residency.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Write comprehensive admit, transfer, and discharge orders for surgical patients.

Audience: Graduate

2. Manage common electrolyte abnormalities in the surgical patient.

Audience: Graduate

3. Interpret common ancillary testing in the surgical patient (imaging, EKG, labs).

Audience: Graduate

4. Assess and intervene on basic perioperative situations in the surgical patient.

Audience: Graduate

5. Safely function in the role of first responder to an urgent patient situation.

Audience: Graduate

6. Use universal precautions and maintain sterility appropriately.

Audience: Graduate

7. Master the bedside procedures and minor procedures covered in the course.

Audience: Graduate

8. Suture and tie knots using basic techniques.

Audience: Graduate

9. Describe the basics of wound care and management.

Audience: Graduate

10. Prepare for participation in the operating room.

Audience: Graduate

11. Identify key professional and unprofessional behavioral traits in surgical trainees.

Audience: Graduate

12. Develop strategies for addressing professionally challenging situations in surgical residency.

Audience: Graduate

13. Delineate negative connotations of communication failures.

## **SURGERY 910 – INDEPENDENT READING AND RESEARCH IN SURGERY**

2-8 credits.

Independent research under the direct supervision of Surgery, Orthopedics, or Urology faculty. Projects are individualized to meet research goals within the context of faculty research needs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis generating research

Audience: Graduate

2. Conduct a thorough literature review of the specific research question

Audience: Graduate

3. Select and apply statistical knowledge methodologies appropriate for the proposed analyses

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review

Audience: Graduate

## **SURGERY 911 – AORTIC DISEASE FROM BENCH TO BEDSIDE**

2 credits.

The basics of vascular biology, as it applies to abdominal aortic aneurysm disease. Gain an understanding of pathophysiology of aneurysm disease, animal models of aortic aneurysm, and knowledge on experimental approaches to develop biomarkers and therapeutic strategies. Experience medical treatment of aneurysm disease in the clinic, and how risk factors identified from basic science techniques are applied at the bedside.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Demonstrate mastery of the basics of vascular biology and how this relates to vascular disease

Audience: Graduate

2. Practice techniques involved in studying various aspects of vascular biology

Audience: Graduate

3. Describe the application of vascular biology technique to the study of vascular disease observed in the clinic

Audience: Graduate

4. Demonstrate understanding of the pathophysiology involved in aneurysm development (patient factors and cell biology)

Audience: Graduate

5. Describe how pathophysiology is studied in each of the following: animal models, cell culture, and aortic modeling

Audience: Graduate

6. Identify the factors for aneurysm growth and rupture

Audience: Graduate

**SURGERY 912 – AORTIC DISEASE FROM BENCH TO BOARDROOM**

2 credits.

The anatomy applicable to abdominal aortic aneurysm repair, how this influenced the development of endografts, and how that development is regulated. Investigate the issues involved in aneurysm screening, and experience aneurysm screening in the clinic and aneurysm repair in the operating room. Discuss what is involved in medical device regulation, and how the medical device industry interacts with physicians to develop and distribute technology. Evaluate how the cost of medical devices is distributed to patients.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe how aortic aneurysm physiology have informed trials that established criteria for repair

Audience: Graduate

2. Describe how aortic aneurysm anatomy influences options for endovascular or surgical repair

Audience: Graduate

3. Describe the biological, clinical, and public health factors influencing successful endograft development

Audience: Graduate

4. Explain the process for regulatory evaluation of devices from an engineering standpoint to a patient's perspective.

Audience: Graduate

5. Describe the anatomical details involved in evaluating an endograft for device regulation

Audience: Graduate

6. Describe the science behind the imaging techniques involved in regulating and following endografts clinically.

Audience: Graduate

7. Describe the anatomy and physiology relevant to open abdominal aortic aneurysm repair, and how this may influence a patient's operative course.

Audience: Graduate

8. Describe the anatomy and physiology behind endoleaks, and how this influences post-operative endograft surveillance and need for re-intervention.

Audience: Graduate

9. Explain the biological, clinical, and socio-economic factors involved in advocacy to implement screening for abdominal aortic aneurysm

Audience: Graduate

10. Analyze the costs and charges associated with specific procedures and how this influences treatment choice for specific patient populations

Audience: Graduate

11. Synthesize acquired knowledge of basic science and public health implications of aortic aneurysm disease, clinic trials, repair options, and regulatory evaluation of devices to defend application of a device to specific patient populations.

Audience: Graduate

**SURGERY 913 – APPLIED IMMUNOLOGY**

2 credits.

Basic, clinical, and translational immunological techniques and advanced/experimental concepts related to immuno-oncology, regenerative medicine, and infectious disease, with relevance to contemporary clinical transplantation.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate knowledge of the basic science principles of immunologic foundations of transplantation.

Audience: Graduate

2. Develop familiarity with common immunologic assays.

Audience: Graduate

3. Select patients for treatment, including immunological assessment of risk after transplant.

Audience: Graduate

4. Explain the balance between infectious risks vs oncological vs immunological considerations in solid organ transplantation.

Audience: Graduate

5. Describe new approaches to apply personalized medicine to the immune system in the context of the UW history of regenerative medicine.

Audience: Graduate

6. Describe the scientific method used in a clinical and translational research study.

Audience: Graduate

7. Describe the application of scientific research to patient care.

Audience: Graduate

8. Describe how clinical and translational research findings are discussed with patients.

Audience: Graduate

## **SURGERY 919 – INDIVIDUALIZED PHASE 3 CLINICAL ELECTIVE IN SURGERY**

2-4 credits.

Care for hospitalized patients on general surgery or surgical specialty services. Admit new patients, round on previously admitted patients, participate in multidisciplinary rounds, and work to transition patients to the next level of care. Evaluate and manage patient with both common inpatient conditions and medically complex patients requiring collaboration with consulting specialties. Direct supervision by house staff and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Complete other patient care related learning activities as assigned by instructors.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

## **SURGERY 920 – GENERAL SURGERY ELECTIVE**

2-4 credits.

Direct supervision by General Surgery senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 938 – INPATIENT ACTING INTERNSHIP-SURGERY**

4 credits.

Provides an in-depth exposure to inpatient and operative management of complicated surgical patients. Work under the direct supervision of a senior resident, fellows and faculty. This rotation will provides an opportunity to function at the intern level and play an active role in inpatient management of surgical patients.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an evidenced-based understanding of the pathophysiology and appropriate management options for common surgical disorders.

Audience: Graduate

2. Discuss the surgical anatomy, common procedural indications, comorbidities, and prophylactic strategies to reduce post-operative complications.

Audience: Graduate

3. Demonstrate basic knowledge regarding common post-operative complications and the appropriate management of each.

Audience: Graduate

4. Describe indications and list the appropriate preoperative evaluations including lab tests, radiographic imaging, and ECG.

Audience: Graduate

5. Identify and describe use of common instruments used in surgery.

Audience: Graduate

6. Discuss common intraoperative complications associated with procedures and the appropriate management of each.

Audience: Graduate

7. Gather a history and perform a physical examination for a surgical patient

Audience: Graduate

8. Prioritize a differential diagnosis following a clinical encounter

Audience: Graduate

9. Recommend and interpret common diagnostic and screening tests

Audience: Graduate

10. Enter and discuss patient orders

Audience: Graduate

11. Document a clinical encounter in the patient record

Audience: Graduate

12. Provide an oral presentation of a clinical encounter

Audience: Graduate

13. Form clinical questions and retrieve evidence to advance patient care

Audience: Graduate

14. Give or receive a patient handover to transition care responsibility

Audience: Graduate

15. Collaborate as a member of an interprofessional team

Audience: Graduate

**SURGERY 939 – ADULT ORTHOPEDICS FOR THE FUTURE ORTHOPEDIST ELECTIVE**

2-4 credits.

Direct supervision by orthopedic Surgery senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Present a case of interest based on involvement in and a brief literature review on the treatment or condition. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SURGERY 940 – ADULT ORTHOPEDICS FOR THE NON-ORTHOPEDIST ELECTIVE**

2-4 credits.

Direct supervision by community orthopedic senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SURGERY 944 – UPPER EXTREMITY ORTHOPAEDIC CLERKSHIP-MARSHFIELD CLINIC**

2-12 credits.

Clinical elective for fourth year medical students.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**SURGERY 948 – OTOLARYNGOLOGY ELECTIVE**

2-4 credits.

Direct supervision by Otolaryngology senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 954 – PERIPHERAL VASCULAR ELECTIVE**

2-4 credits.

Direct supervision by Peripheral Vascular Surgery senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 956 – PLASTIC AND RECONSTRUCTIVE SURGERY ELECTIVE**

2-4 credits.

Direct supervision by Plastic Surgery senior residents and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

**SURGERY 960 – TRANSPLANTATION ELECTIVE**

2-4 credits.

Direct supervision by Transplant fellows and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 962 – SURGICAL CRITICAL CARE ELECTIVE**

2-4 credits.

Direct supervision by General Surgery senior residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 963 – CARDIOTHORACIC SURGERY ELECTIVE**

2-4 credits.

Direct supervision by Cardiothoracic fellows and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned general surgery service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 967 – UROLOGY ELECTIVE**

2-4 credits.

Direct supervision by Urology residents, fellows, and attending physicians. Participate in regularly scheduled supervisor-student meetings, which involve some or all of the following: rounding on service patients, participating in scheduled operative procedures, presenting cases and teaching topics, and discussing patient cases. Complete independent activities including some or all of the following: reading about patient conditions and preparing for direct patient care as needed. Attend conferences associated with the assigned Urology service. Complete other patient care related learning activities as assigned by instructors; these are dependent on the individual student, the patients under the student's care, and the location.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**Learning Outcomes:** 1. Perform a hypothesis driven history and complete a targeted exam

Audience: Graduate

2. Develop and present a weighted differential diagnosis for medical and surgical conditions

Audience: Graduate

3. Using clinical evidence, adapt and justify the working diagnosis

Audience: Graduate

4. Present a diagnostic plan including laboratory and imaging modalities

Audience: Graduate

5. Correctly interpret imaging and laboratory findings and communicate results to patients and team members

Audience: Graduate

6. Develop and implement effective patient management plans

Audience: Graduate

7. Complete written documentation in a comprehensive, concise, accurate and timely manner

Audience: Graduate

8. Review, interpret, and present current literature to support patient care

Audience: Graduate

9. Communicate effectively with patients, families, physicians and non-physician team members

Audience: Graduate

10. Communicate and collaborate with consultants and/or primary team and other providers to coordinate care

Audience: Graduate

11. Engage patients in shared decision making regarding tests, orders, and procedures

Audience: Graduate

12. Avoid medical jargon when communicating with patients and families

Audience: Graduate

13. Recognize limitations and seek assistance as appropriate

Audience: Graduate

14. Observe the process of obtaining informed consent prior to surgical

**SURGERY 973 – OPTIMIZING VALUE, QUALITY AND SAFETY IN HEALTHCARE**

2 credits.

An in-depth understanding of the key concepts of value, quality and safety is critical to the education of future physicians. The majority of adverse events experienced by hospitalized patients occur in surgery. Surgery offers the ideal setting to explore these three components critical to improving the US healthcare system. Examine factors that influence the care we provide and critically consider the value of this care. Observe efforts to improve value in surgery focusing on quality, safety and appropriate utilization of critical resources and consider areas for improvement. Follow patients in all processes of care from clinic, to the operating room, through their postoperative course, to discharge, and consider how important measures to secure safety and quality are encountered and impact care in the clinical arena. Consider price and allocation of scarce resources. Gather information for their analysis of the patient experience.

**Requisites:** MED SC-M 810, 811, 812, and 813**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Demonstrate understanding of system efforts to promote high value healthcare.

Audience: Graduate

2. Integrate understanding of complex care for individuals with policy or institutional level strategies to improve health

Audience: Graduate

3. Identify processes or attitudes that may (or may not) provide for the fair and just distribution of healthcare resources.

Audience: Graduate

### **SURGERY 974 – PATIENT EDUCATION AS A STRATEGY FOR ADVOCACY**

2 credits.

Develop knowledge of how people learn, adult learning principles, and how these apply to medicine. Learn and practice effective interpersonal communication techniques. Reflect on your own strategies for communicating with patients, and develop and implement a plan to improve your communication with patients. Effective communication and patient education allows physicians to act as advocates for their patients. Discuss barriers to patient education, and strategies to mitigate those barriers. Gain insight into communication and education strategies for patients with communication issues.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate understanding of how people learn and adult learning principles and how these apply to medicine  
Audience: Graduate

2. Apply effective interpersonal communication techniques.  
Audience: Graduate

3. Recognize how effective communication and patient education allows physicians to act as advocates for their patients.  
Audience: Graduate

4. Identify barriers to patient education and use strategies to mitigate those barriers.  
Audience: Graduate

5. Demonstrate knowledge of communication and education strategies for patients with communication issues.  
Audience: Graduate

### **SURGERY 975 – MULTIDISCIPLINARY APPROACHES TO COLON CANCER PREVENTION/TREATMENT**

2 credits.

Explore the reasons behind failure of colorectal cancer screening programs. Learn the standard of care for prevention, diagnosis, and treatment of colorectal cancer. Focus on all facets of the disease, with active engagement in dialogue to improve screening programs for colorectal cancer. Learn to identify methods to improve medical care and population health. Explore background studies to integrate emerging information on individual's biologic and genetic risk with population-level factors when deciding upon prevention and treatment options. Work with the various members of the healthcare team involved in treating colorectal cancer and educate the public on the importance of colorectal cancer screening.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify the principles of developing a successful cancer screening program.  
Audience: Graduate

2. Identify the limitations of current cancer screening strategies.  
Audience: Graduate

3. Identify barriers to participation in colon cancer screening program.  
Audience: Graduate

4. Identify the pros and cons of various tests to screen for colorectal cancer and determine which are ideal from the physician's and patient's perspective as well as from the public health perspective.  
Audience: Graduate

5. Identify the group of patients who will benefit from chemotherapy and radiation therapy.  
Audience: Graduate

6. Identify the goals of radiation therapy.  
Audience: Graduate

7. Identify the negative side effects of various therapies.  
Audience: Graduate

8. Examine the role of surgery in the treatment of colorectal cancer.  
Audience: Graduate

9. Effectively utilize the principles and optimal timing of the workup of colorectal cancer.  
Audience: Graduate

10. Better identify the genetics of colorectal cancer and the impact on screening programs.  
Audience: Graduate

**SURGERY 976 – THE SCIENCE OF OBESITY AND DIABETES**

2 credits.

The science of diabetes and obesity as it correlates to the clinical setting. The history of endocrinology and discovery of insulin will provide the basis for understanding hormonal mechanisms controlling fuel metabolism and how these processes become dysfunctional in different disease states.

Topics will include pancreatic and extrapancreatic control of metabolism, and diseases linked with obesity, including PCOS, type 2 diabetes, and cancer. Lifestyle, medical, and surgical treatments of obesity and diabetes, including pharmacologic mechanisms of insulin and non-insulin diabetes therapeutics and bariatric surgery, will be highlighted. The public health perspective will shine light on societal factors that influence obesity and diabetes care. Provides an advanced scientific foundation with which to approach evidence-based care and treatment of individuals with obesity and/or diabetes.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the prevalence of obesity and diabetes and discuss the impact of these conditions on health care costs

Audience: Graduate

2. Describe the history of endocrinology and the discovery of insulin and illustrate how key scientific contributions have influenced the modern practice of medicine

Audience: Graduate

3. Discuss the biology of digestion and calorie expenditure on weight regulation and the development of obesity.

Audience: Graduate

4. Illustrate the interplay among neurological, microbiota, and hormonal effects driving insulin resistance, obesity, and type 2 diabetes.

Audience: Graduate

5. Illustrate the roles of insulin-sensitive tissues in the development of the pathological inflammatory, hyperglycemic, and dyslipidemic state(s) of obesity and diabetes.

Audience: Graduate

6. Identify obesity-related diseases and syndromes, and discuss unique challenges these pose in the care of the obese/diabetic patient

Audience: Graduate

7. Discuss the mechanisms behind pediatric obesity and summarize the effects on childhood development and ways to combat and prevent pediatric obesity

Audience: Graduate

8. Identify the unique challenges in assessing the adult patient with obesity, including history and physical considerations as well as lab abnormalities commonly seen in the obese

Audience: Graduate

9. Discuss the available lifestyle, medical, and surgical treatments for obesity and diabetes, demonstrating knowledge of the science behind these treatments

Audience: Graduate

10. Identify ways that discrimination and prejudice of obese/diabetic patients exists and affects their care and outcomes

Audience: Graduate

**SURGERY 977 – INJURY AND VIOLENCE PREVENTION**

4 credits.

The concept of injury prevention is inherently challenging, despite the systemic global public health problem of violence and injuries. Provides a foundation to approach injury prevention and control. Incorporates curriculum from TEACH-VIP (Training, Educating, and Advancing Collaboration in Health on Violence and Injury Prevention).

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Identify resources for injury prevention at the state, national, and international level

Audience: Graduate

2. Identify community partners at the local and state level in injury prevention

Audience: Graduate

3. Place an injury into the Haddon matrix and identify places for intervention

Audience: Graduate

4. Explain the concept of cost-effective analysis and demonstrate basic use of cost-effective analysis.

Audience: Graduate

5. Describe a variety of successful injury prevention interventions.

Audience: Graduate

6. Examine the role of legislation in injury prevention.

Audience: Graduate

**SURGERY 980 – SEX, GENDER, AND SEXUALITY HEALTH EQUITY**

2 credits.

An overview of how concepts of sex, gender, and sexuality in society and medicine impact medical care and lived experience for patients who are LGBTQ, transgender, gender-diverse and/or have variations in sex characteristics (VSC). Topics include shared decision-making, allyship, trauma-informed care, gender-affirming care, and unique health disparities in patients who are LGBTQ, transgender, gender-diverse and/or those with VSC. Gain insight into patient experience of medical care through patient-centered shadowing/observer opportunities.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Describe differences between the terms “sex,” “gender,” and “sexuality,” identify potential for conflation of these terms, and apply these terms correctly in the context of clinical care and daily life.  
Audience: Graduate

2. Summarize how historical approaches to medical care for those with variations in sex characteristics (VSC) have impacted the patient-provider relationship on the individual and community level, and identify ethical principles that influence decision-making for early childhood medical care for people with VSC.  
Audience: Graduate

3. Identify how medical and non-medical systems level barriers and societal awareness of needs unique to these populations impact health care interactions and overall health of patients with variations in sex characteristics (VSC), trans and gender-diverse patients, and LGBTQ patients.  
Audience: Graduate

4. Integrate knowledge of health disparities experienced by LGBTQI+ patients and apply understanding of available resources and care support for these populations in future clinical practice.  
Audience: Graduate

**SURGERY 981 – MINDFULNESS TRAINING FOR RESIDENCY**

1 credit.

Gain familiarity with Mindfulness-Based Stress Reduction interventions that have been shown to increase physician well-being and build resiliency. Cultivate non-judgmental and calm awareness of the present moment. Learn and practice formal and informal mindfulness meditation practices. Research mindfulness skills and their benefits to physicians. Understand guided mindful activities. Adapt individualized mindfulness techniques.  
**Requisites:** Declared in Doctor of Medicine program with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Effectively practice the principles of mindfulness-based stress reduction  
Audience: Graduate

2. Gain experience and practice in contemplative movement, 3-point body scan, and breath awareness practice  
Audience: Graduate

3. Develop body and breath awareness and how they can be used to be present with emotions and sensations present during everyday clinical practice  
Audience: Graduate

4. Explore the evidence surrounding the neuroscience and clinical applications of meditation  
Audience: Graduate

5. Develop self-compassion and loving-kindness meditations and practices  
Audience: Graduate

6. Enhance communication skills and compassionate relationships with patients and colleagues  
Audience: Graduate

**SURGERY 982 – SURGICAL AND PROCEDURAL CARE EDUCATION  
TEACHING ELECTIVE**

2 credits.

Learn effective methods of teaching procedural skills and of small group case-based learning (CBL) facilitation. Demonstrate effective teaching strategies when instructing more junior medical students in in-person procedural skills (e.g., suturing, knot-tying, ultrasound/doppler, intubation) and facilitating virtual CBL learning. Bolster mastery in surgical and procedural education.

**Requisites:** MED SC-M 810, 811, 812, and 813 and declared in Doctor of Medicine with fourth-year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use effective surgical and procedural teaching practices.

Audience: Graduate

2. Develop effective small-group facilitation skills.

Audience: Graduate

3. Demonstrate effective teaching strategies alongside resident and faculty teachers in the Sim lab and CBL didactic sessions

Audience: Graduate

4. Mentor Phase 2 (more junior) students and assist them in their introduction to surgical and procedural care

Audience: Graduate

5. Reflect on specific feedback on applied education and facilitation skills

Audience: Graduate

**SURGERY 983 – COMMON ANORECTAL DISEASES**

2 credits.

The diagnosis and treatment of common anorectal diseases in the context of anatomical and physiological basis as it correlates to the clinical setting. The medical and surgical treatment of anorectal disorders will be discussed from the historical background to modern management algorithms. Topics will include fissures, perirectal abscess, fistula-in-ano, external and internal hemorrhoidal diseases, pruritus ani, fecal incontinence, rectal prolapse, obstructive defecation, sexually transmitted infections, and various anorectal manifestations of irritable bowel disease. Symptomatic presentation and natural progression of each of these disease processes will be discussed. Provide a sound scientific foundation with which to approach evidence-based diagnosis, triage, and treatment of patients with acute versus chronic anorectal disorders.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Describe the normal anatomy of the male and female pelvic floor, structural relationships of the pelvic organs, with special focus on the rectum, anal canal, and perianal spaces

Audience: Graduate

2. Describe the physiology and function of the anal sphincter complex and various defecatory reflexes

Audience: Graduate

3. Discuss the biology of stool formation, propulsion, and expulsion

Audience: Graduate

4. Describe the dietary roles of soluble and insoluble fiber in digestion, and its role in treatment strategies of benign anorectal disorders

Audience: Graduate

5. Describe the anatomical basis of symptomatic internal and external hemorrhoidal disorders in relation to their presentation and natural progression

Audience: Graduate

6. Discuss the surgical options in the treatment of different grades of internal hemorrhoids and the complications associated with each

Audience: Graduate

7. Discuss the etiology of perirectal abscesses and their progression/relationship to fistula-in-ano

Audience: Graduate

8. Describe the various types of fistula-in-ano, diagnostic techniques and imaging modalities, and treatment strategies

Audience: Graduate

9. Explain the rationale for medical versus surgical treatment options for anal fissures

Audience: Graduate

10. Identify the various lifestyle and dietary etiologies for pruritis ani, and explain the rationale for treatment algorithm

Audience: Graduate

11. Differentiate between presentations of thrombosed external hemorrhoid, strangulated or prolapsed internal hemorrhoid, and rectal prolapse

Audience: Graduate

**SURGERY/MED HIST 984 – TRANSPLANT ETHICS**

2 credits.

Understand and analyze the ethics of transplantation practice and policy in the U.S. health care system, especially considering ethical criticisms made by and on behalf of the diverse populations it serves. Gain an understanding of philosophical debates over important issues in transplant ethics. Hone the craft of constructing ethical arguments, and foreseeing and responding to potential objections.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Demonstrate understanding of transplant-related dimensions of the U.S. health care system.

Audience: Graduate

2. Critically analyze transplant candidate evaluation, deceased donor allocation policy, ethics of living donation, and novel transplant and procurement techniques using the tools of ethical analysis.

Audience: Graduate

3. Exposit others' ethical claims and arguments about transplant ethics clearly, concisely, and charitably.

Audience: Graduate

## SURGICAL SCIENCES (SURG SCI)

**SURG SCI 501 – RADIOGRAPHIC ANATOMY OF THE DOG AND CAT**

1 credit.

Normal radiographic anatomy of the dog and cat. This will include soft tissue structures as well as the skeletal system. Clinical case material to emphasize the need for a thorough knowledge of normal radiographic anatomy.

**Requisites:** Declared in Doctor of Veterinary Medicine with first year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Recognize normal anatomic structures of the dog, cat and bird on radiographs

Audience: Undergraduate

2. By comparing to normal, name the site of a radiographic abnormality

Audience: Undergraduate

3. Identify locations of ossification centers and physes

Audience: Undergraduate

4. Recall basic principles of radiography

Audience: Undergraduate

**SURG SCI 542 – VETERINARY OPHTHALMOLOGY**

2 credits.

Provides basic instruction in the application of ophthalmic diagnostics and therapeutics to small and large domestic animals. Acquire skills and knowledge to accurately diagnose, treat, prognose or refer domestic animals with common ophthalmic disorders.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify common ophthalmic diseases and abnormalities in veterinary patients.

Audience: Undergraduate

2. Interpret ophthalmic examination findings from descriptions and/or pictures.

Audience: Undergraduate

3. Interpret results of basic ophthalmic tests routine performed in general practice.

Audience: Undergraduate

4. Formulate differential diagnoses for ophthalmic examination findings.

Audience: Undergraduate

5. Devise a treatment plan for common ophthalmic diseases.

Audience: Undergraduate

### **SURG SCI 543 – FUNDAMENTALS OF ANESTHESIOLOGY I**

1 credit.

Covers basic principles of sedation, pain physiology, anesthetic drugs, anesthetic monitoring, and the practical considerations in performing anesthesia on healthy veterinary species. Case-based and interactive where appropriate.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand and remember the pharmacodynamics and pharmacokinetics of anesthetic drugs

Audience: Graduate

2. Identify the components of the anesthesia machine and describe their function.

Audience: Graduate

3. Identify anesthetic monitors and techniques and describe their function and data collected.

Audience: Graduate

4. Design effective monitoring and supportive care plans for patients.

Audience: Graduate

5. Identify pain in animals and select appropriate treatment.

Audience: Graduate

### **SURG SCI 544 – SURGERY FUNDAMENTALS**

2 credits.

Introductory material on the scientific foundations of surgery. Preparation for clinical work in veterinary surgery and medicine.

**Requisites:** Declared in Doctor of Veterinary Medicine with second year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe intended use of common surgical instruments in veterinary surgical procedures

Audience: Undergraduate

2. Describe the differences between the various methods of sterilization and disinfection

Audience: Undergraduate

3. Perform simple suture patterns and secure knot tying techniques

Audience: Undergraduate

4. Describe basic properties of suture material and needles

Audience: Undergraduate

5. Apply sterile technique to patient preparation for surgery

Audience: Undergraduate

6. Describe how various tissues respond to injury

Audience: Undergraduate

7. Describe the steps necessary to complete a preoperative assessment of a surgical patient

Audience: Undergraduate

8. Describe the basic concepts of postoperative care of a surgical patient

Audience: Undergraduate

**SURG SCI 545 – FUNDAMENTALS OF ANESTHESIOLOGY II**

1 credit.

Focus on anesthetic management of common veterinary species with concurrent medical disease. Covers advanced pain management principles and techniques, anesthesia for exotic animal species, and breed considerations in anesthesia. Case-based and interactive where appropriate.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Implement the pharmacodynamics and pharmacokinetics of anesthetic drugs.

Audience: Undergraduate

2. Design individualized anesthetic plans for patients with co-existing disease.

Audience: Undergraduate

3. Identify abnormalities in anesthetized patients and demonstrate effective ways to remedy the abnormalities.

Audience: Undergraduate

4. Design effective monitoring and supportive care plans for patients.

Audience: Undergraduate

5. Identify pain in animals and select appropriate treatment.

Audience: Undergraduate

6. Demonstrate knowledge associated with euthanasia.

Audience: Undergraduate

7. Demonstrate knowledge of CPR.

Audience: Undergraduate

**SURG SCI/F&W ECOL 548 – DISEASES OF WILDLIFE**

3 credits.

Provides an overview of the issues involved across a wide range of wildlife diseases, presented within the context of ecosystem health or "one health". Content will be on the biological, epidemiological, clinical, public health and, in some cases, sociopolitical ramifications of wildlife diseases. Covers a wide variety of wildlife diseases caused by bacteria, viruses, parasites, prions, and environmental contaminants. Consequences associated with environmental changes on the manifestation of wildlife diseases will also be discussed. This range of diseases will be presented in order to familiarize the many facets involved in disease management, from animal and human health issues, to ecological and environmental considerations, to the role of society in contributing to, and managing, these diseases.

**Requisites:** BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain how an infection differs from disease.

Audience: Undergraduate

2. Recognize different groups of infectious microorganisms: viruses, bacteria, fungi, parasites, prions, etc.

Audience: Undergraduate

3. Define and describe ecosystem health or one health.

Audience: Undergraduate

4. Define the terms zoonosis, zoonoses, and zoonotic.

Audience: Undergraduate

5. Evaluate how anthropogenic influences exacerbate transmission of zoonotic diseases.

Audience: Undergraduate

6. Describe and explain the epidemiological concepts related to each wildlife disease presented in this course.

Audience: Undergraduate

7. Recognize diseases that are specific to animal groups or humans, or are nonspecific, having the potential to infect many different species.

Audience: Undergraduate

### **SURG SCI 630 – SMALL ANIMAL SURGERY**

4 credits.

The pathophysiology and diagnosis of common general, orthopedic, and neurologic surgical diseases of small animals are presented. The operative management and postoperative care of small animal surgical patients are discussed in detail.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Describe the problems that may benefit from surgical intervention that are typically encountered in a given organ system, how these diseases or problems present, and what surgical interventions are typically implemented to improve the problem.

Audience: Undergraduate

2. Explain the surgical techniques employed for treatment of disease/problems in a given organ system and the complications that may arise related to surgery.

Audience: Undergraduate

3. Compare both short- and long-term prognoses for diseases or clinical problems in a given organ system with and without surgical treatment to facilitate assessment of the benefits of surgery versus other courses of action such as conservative management.

Audience: Undergraduate

4. Summarize the principles that guide the evaluation of a lame dog or cat.

Audience: Undergraduate

5. Describe the principles of physical examination of a lame dog or cat.

Audience: Undergraduate

6. Take a history of a lame dog or cat and list likely differential diagnoses for the patient.

Audience: Undergraduate

7. Select appropriate diagnostic tests for evaluation of patients with locomotor system disease and interpret abnormal results and their significance.

Audience: Undergraduate

8. Choose appropriate medical or surgical therapy to enable effective management of animals with locomotor system disease.

Audience: Undergraduate

9. Offer appropriate advice on prognosis and complications for clients owning animals with locomotor system disease.

Audience: Undergraduate

10. List the common congenital, developmental and acquired locomotor system diseases of the dog and cat, and describe how these alter locomotor system function.

Audience: Undergraduate

11. Describe the etiology and pathogenesis of common locomotor diseases in the dog and cat and recognize pathological lesions associated with these diseases.

Audience: Undergraduate

12. Describe the alterations that take place in bone, cartilage, tendon and ligament in response to disease.

Audience: Undergraduate

### **SURG SCI 631 – LARGE ANIMAL SURGERY: ORTHOPEDIC AND SOFT TISSUE**

3 credits.

Examination techniques, diagnostic aids and surgical procedures relevant to the gastrointestinal, integumentary, musculoskeletal, respiratory and genitourinary systems of the equine and food animal species.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize key concepts in large animal surgery, including but not limited to common signalments, relevant history, risk factors, diagnostic methods, and pathophysiology for commonly encountered diseases in upper airway surgery, urogenital surgery, orthopedic surgery, gastrointestinal surgery, wounds and laceration care.

Audience: Undergraduate

2. Describe the basic elements of lameness evaluation, localization, and diagnosis in the horse.

Audience: Undergraduate

3. Explain specific treatment options, both surgical and non-surgical, for common diseases including potential benefits and complications associated with prescribed therapeutics.

Audience: Undergraduate

4. Describe factors that contribute to outcomes and prognosis for specific large animal patients and surgical procedures.

Audience: Undergraduate

5. Apply concepts of anatomy, diagnostic imaging, clinical pathology and other relevant areas, to the evaluation, treatment, and prognosis of large animals with surgical conditions.

Audience: Undergraduate

**SURG SCI 632 – SMALL ANIMAL SURGERY LABORATORY**

2 credits.

Basic skills necessary for participation in the surgical management of small animals in the Veterinary Medical Teaching Hospital.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe the function of common surgical instruments

Audience: Undergraduate

2. Identify and describe the important properties of common suture materials and understand the indications for their use

Audience: Undergraduate

3. Perform a comprehensive physical examination of a small animal patient and determine pertinent differential diagnoses, if any based on that physical exam

Audience: Undergraduate

4. Perform a complete surgical station set-up, including selection and knowledge of appropriate intra- operative patient monitoring equipment and thermoregulatory units

Audience: Undergraduate

5. Demonstrate proper aseptic surgical technique including open and closed gloving, re-gloving, gowning, draping, rough and sterile patient surgical preparation

Audience: Undergraduate

6. Demonstrate proficiency with various surgical techniques, including but not limited to the creation and closing of an incision, proper tissue handling techniques, and instrument handling and appropriate suture patterns and knot tying

Audience: Undergraduate

7. Perform post-operative incision care and recognize and differentiate post-operative complications

Audience: Undergraduate

8. Maintain proper medical records for a routine surgical case

Audience: Undergraduate

**SURG SCI 634 – SMALL ANIMAL ANESTHESIA LABORATORY**

1 credit.

Apply principles and techniques of veterinary anesthesiology to common companion animals.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and summarize the important properties of common pharmaceuticals administered pre, intra and post-operatively for sedation, analgesia, induction, and maintenance of anesthesia

Audience: Undergraduate

2. Identify and summarize the important properties of common patient monitoring equipment, including but not limited to: pulse oximeter (heart rate & SpO<sub>2</sub>), Doppler (blood pressure & heart rate), temperature probes, capnometers/capnographs (EtCO<sub>2</sub> & respiration)

Audience: Undergraduate

3. Perform a comprehensive physical examination of a small animal patient, determine pertinent differential diagnoses based on that physical exam, prioritize and perform relevant diagnostic tests and therapeutics to resolve any health problems as part of a pre-anesthetic work-up

Audience: Undergraduate

4. Perform complete anesthetic station set-up, including selection and knowledge of appropriate intra- operative patient monitoring equipment and thermoregulatory units

Audience: Undergraduate

5. Demonstrate proper anesthetic technique for the following- intravenous catheterization, intramuscular, subcutaneous and intravenous injections, anesthetic induction, intubation, patient positioning and maintenance and recovery of general anesthesia in a small animal patient

Audience: Undergraduate

6. Calculate proper intravenous fluid amounts, set up a proper fluid administration set for each patient, and deliver prescribed amounts of fluids both subcutaneously and intravenously peri-operative

Audience: Undergraduate

7. Show proficiency with various anesthetic breathing systems (Modified Mapleson D systems) and rebreathing systems (F & Y circle systems) and machines (Drager's & Versa II's), including set-up, pressure checking, and checking/filling inhalant levels

Audience: Undergraduate

8. Recognize, differentiate and mitigate peri-operative anesthetic complications and pain

Audience: Undergraduate

9. Complete pre- anesthetic SOAP work-up and intra-operative anesthetic record keeping

Audience: Undergraduate

### **SURG SCI 638 – VETERINARY DIAGNOSTIC IMAGING**

2 credits.

Veterinary radiology principles, physical background and diagnostic techniques will be taught and emphasized in laboratory exercises.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Learn principals of Image formation in Radiography, CT, MRI, Ultrasound and Nuclear Medicine

Audience: Undergraduate

2. Learn principles of Image interpretation in the 5 modalities

Audience: Undergraduate

3. Learn principles of Contrast media used in Radiography, CT, MRI and Ultrasound

Audience: Undergraduate

4. Learn principles of Biological effects, operator hazards and protective measures in the 5 modalities

Audience: Undergraduate

5. Develop a technique to "read" radiographs and learn to recognize lesions - laboratories on Wednesday afternoons are where students can hone their interpretation skills

Audience: Undergraduate

6. Learn imaging features of common diseases of: Small and large animal musculoskeletal diseases and Small animal neurological, thoracic and abdominal diseases

Audience: Undergraduate

7. Learn advantages and limitations of each of the 5 imaging modalities in examining various organ systems

Audience: Undergraduate

8. Develop skills in clear and logical client-directed and peer communication of: Pertinent radiographic signs

Audience: Undergraduate

9. Develop skills in clear and logical client-directed and peer communication of: Prioritized differential diagnoses for each Roentgen sign

Audience: Undergraduate

10. Develop skills in clear and logical client-directed and peer communication of: Prioritized basic plan for additional clinical tests and treatment

Audience: Undergraduate

### **SURG SCI 642 – LARGE ANIMAL SURGERY: CLINICAL ROTATION**

2 credits.

Learn the admission, examination, preoperative management, surgical procedures and postoperative management of large animals presented to the Veterinary Medical Teaching Hospital. Hands-on experience in the Large Animal Surgery Service.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Effectively communicate patient signalment and pertinent case information to colleagues to develop a differential diagnosis

Audience: Undergraduate

2. Select, perform, and interpret pre- and post-operative diagnostic tests

Audience: Undergraduate

3. Integrate findings from patient history, physical exam, and tests and imaging to formulate comprehensive diagnostic and treatment plans for surgical patients

Audience: Undergraduate

4. Describe basic surgical principles in large animal surgery such as wound management and common surgical procedures

Audience: Undergraduate

5. Recognize situational limitations or indications for patient referral to a specialist

Audience: Undergraduate

6. Describe introductory level of knowledge in equine lameness including the basic elements of lameness evaluation, nerve blocks, etc.

Audience: Undergraduate

7. Document procedures and treatments in medical records, treatment sheets, and surgical reports

Audience: Undergraduate

8. Create patient discharge instructions using appropriate language for client communication, understanding, and compliance

Audience: Undergraduate

**SURG SCI 644 – CLINICS-SMALL ANIMAL ORTHOPEDIC SURGERY**

2 credits.

Rotation through orthopedic and neurosurgical clinics and surgery.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Obtain a complete history and understand and complete the steps to a physical exam and orthopedic assessment

Audience: Undergraduate

2. Prioritize a differential diagnosis and refined problem list based on patient history and physical exam

Audience: Undergraduate

3. Design appropriate diagnostic and therapeutic plans for patients

Audience: Undergraduate

4. Effectively communicate patient signalment, history, and diagnostic and therapeutic plan to colleagues

Audience: Undergraduate

5. Describe and identify indications for patient referral

Audience: Undergraduate

6. Describe common orthopedic surgical procedures and post-operative care

Audience: Undergraduate

7. Report procedures and treatments in medical records, treatment sheets, and surgical reports

Audience: Undergraduate

**SURG SCI 645 – SENIOR ROTATION IN SMALL ANIMAL GENERAL SURGERY**

2 credits.

Hands-on diagnosis and treatment of general surgical diseases of small animal species.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop prioritized differential diagnoses based on patient history, comprehensive physical exam, and refined problem list

Audience: Undergraduate

2. Effectively communicate patient signalment and pertinent case information to colleagues

Audience: Undergraduate

3. Select, perform, and interpret pre- and post-operative diagnostic tests

Audience: Undergraduate

4. Describe indications for patient referral to a surgical specialist

Audience: Undergraduate

5. Adapt client communication style for gaining client trust and understanding

Audience: Undergraduate

6. Describe surgical principles of wound management and common surgical procedures

Audience: Undergraduate

7. Report procedures and treatments in medical records, treatment sheets, and surgical reports

Audience: Undergraduate

8. Create patient discharge instructions using appropriate language for client communication understanding, and compliance

Audience: Undergraduate

### **SURG SCI 646 – VETERINARY ANESTHESIOLOGY-CLINICAL ROTATION**

2 credits.

Clinical anesthesia and pain management techniques including pre-anesthetic evaluation, induction procedures, intraoperative anesthetic and analgesic care and recovery management of small, large and exotic animal species. Critical patient care, novel anesthetic and analgesic techniques and cardiopulmonary resuscitation.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Obtain an oral history and perform a complete physical examination to identify clinical problems and abnormalities  
Audience: Undergraduate

2. Apply foundational anesthetic principles and management and patient history to create an anesthetic work-up plan  
Audience: Undergraduate

3. Evaluate and administer appropriate drugs (type/dose/volumes) and monitors based on work-up plan  
Audience: Undergraduate

4. Monitor anesthetic depth during procedures and adapt treatment plan according to physical parameters  
Audience: Undergraduate

5. Describe and apply appropriate drug administration and CPR techniques for emergent patients  
Audience: Undergraduate

6. Report procedures and treatments in medical records, treatment sheets, and surgical reports  
Audience: Undergraduate

### **SURG SCI 647 – RADIOLOGY CLINICS**

2 credits.

Clinical clerkship in the Veterinary Medical Teaching Hospital. Provides exercises in technical and interpretive diagnostic radiology.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Model low-stress handling and humane restraint of live animals

Audience: Undergraduate

2. Demonstrate appropriate radiographic techniques and radiation safety to obtain quality diagnostic images  
Audience: Undergraduate

3. Label images appropriately and interpret abnormal imaging findings using Roentgen sign approach  
Audience: Undergraduate

4. Prioritize a list of differential diagnoses based on available information and classify diseases associated with radiographic findings  
Audience: Undergraduate

5. Develop a diagnostic plan and describe indications for additional tests or referrals  
Audience: Undergraduate

### **SURG SCI 675 – SPECIAL TOPICS**

1-5 credits.

Topics vary.

**Requisites:** Declared in Doctor of Veterinary Medicine

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop competence and professional skills in veterinary medicine

Audience: Undergraduate

2. Explore current topics and trends in veterinary medicine  
Audience: Undergraduate

3. Developing breadths of experiences related to veterinary medicine  
Audience: Undergraduate

**SURG SCI 676 – SPECIAL SPECIES HEALTH**

2 credits.

Basic principles of the clinical management of exotic pet species, with an emphasis on small mammals (rabbits, rodents, etc), birds and reptiles commonly kept as companion animals.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Provide the correct husbandry recommendations for small mammals, birds and reptiles maintained as pets

Audience: Undergraduate

2. Identify common disorders in small mammals, birds and reptiles maintained as pets

Audience: Undergraduate

3. Demonstrate a basic understanding anatomy and physiology of small mammals, birds, and reptiles

Audience: Undergraduate

**SURG SCI 677 – VETERINARY DENTISTRY ELECTIVE**

1 credit.

Introduction to veterinary dentistry principles and practice.

**Requisites:** Declared in Doctor of Veterinary Medicine with third year standing

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe indications and techniques for the safe administration of regional oral anesthesia

Audience: Undergraduate

2. Safely perform single and multi-rooted dental extractions with surgical flaps and tension free closure

Audience: Undergraduate

3. Compare and contrast various oral pathologic conditions and describe various treatment options associated with each

Audience: Undergraduate

4. Recognize clinical signs and symptoms associated with periodontal and/or endodontic disease and list appropriate treatment options

Audience: Undergraduate

5. Describe various oral trauma symptoms, imaging modalities and treatment options

Audience: Undergraduate

6. List and describe conditions unique to feline oral disease and their treatment

Audience: Undergraduate

**SURG SCI 699 – DIRECTED STUDY**

1-5 credits.

Projects in the laboratory and/or through library work in specific subject area under the direct guidance of a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply foundational veterinary knowledge and critical thinking to identify problems in veterinary medicine

Audience: Undergraduate

2. Develop professional veterinary medicine skills of interest by performing select techniques and procedures

Audience: Undergraduate

3. Communicate in written and/or verbal reports to veterinary colleagues and supervisors

Audience: Undergraduate

**SURG SCI 710 – SPECIAL SPECIES CLINICAL ROTATION**

2 credits.

Develop clinical proficiency in the basic veterinary care of common exotic pet species routinely seen in general veterinary practice. Learn how to obtain comprehensive medical histories, how to safely restrain, obtain samples and administer drugs in a variety of common exotic pet species. Develop a solid understanding on how to manage common disorders seen in small exotic mammals, pet birds and pet reptiles.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 1 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Safely restrain and handle a variety of common exotic pet species

Audience: Graduate

2. Perform complete physical examinations in a variety of common exotic pet species

Audience: Graduate

3. Suggest effective and safe sedation protocols for a variety of common exotic pet species

Audience: Graduate

4. Become proficient in the in the intramuscular and subcutaneous drug administration in various exotic pet species

Audience: Graduate

5. Formulate a problem list, diagnostic plan, prognosis and make therapeutic suggestions for a variety of common disorders seen in exotic pets

Audience: Graduate

**SURG SCI 711 – WILDLIFE REHABILITATION MEDICINE ROTATION**

2 credits.

Rotation is a partnership between the UW Vet School, Dane County Humane Society's Wildlife Center and the Wisconsin Humane Societies' (WHS) Wildlife Center in Milwaukee. Develop clinical proficiency in wildlife rehabilitation. Work closely with licensed wildlife rehabilitators at wildlife centers to learn more about native wildlife in rehabilitation settings. Participate in veterinary patient rounds, which are led by UW veterinarians at wildlife centers. Cadaver laboratories, topic presentations and radiograph and blood smear reviews will complement the patient-based learning.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 1 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Safely restrain and handle a variety of common native wildlife species

Audience: Graduate

2. Perform complete physical examinations in a variety of common native wildlife species

Audience: Graduate

3. Suggest effective and safe sedation protocols for a variety of native wildlife species

Audience: Graduate

4. Become proficient in the in the intramuscular and subcutaneous drug administration in a variety of native wildlife species

Audience: Graduate

5. Formulate a problem list, diagnostic plan, prognosis and make therapeutic suggestions for a variety of common disorders seen in native wildlife species

Audience: Graduate

**SURG SCI 712 – ZOOLOGICAL MEDICINE CLINICAL ROTATION**

2 credits.

Practice medical management of zoological species kept in small- to medium-sized zoological facilities and wildlife rehabilitation cases, in collaboration with local facilities, such as Henry Vilas Zoo, Ochsner Park Zoo, and the Dane County Humane Society's Wildlife Center. Prepare for clinical cases, provide on-site medical evaluations, and complete medical records.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 2 number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Conduct visual and physical health assessments on a variety of zoological species

Audience: Graduate

2. Create a preventive health plan (including routine vaccine recommendations) for a variety of zoological species

Audience: Graduate

3. Suggest effective and safe sedation or anesthesia protocols, including methods of drug administration, for a variety of zoological species

Audience: Graduate

4. Apply knowledge of domestic animal medicine, clinical pathology, and radiographic anatomy to a variety of zoological species

Audience: Graduate

5. Formulate a problem list, diagnostic plan, differential diagnosis list, prognosis, and therapeutic plan for a variety of common disorders seen in zoological species

Audience: Graduate

### **SURG SCI 714 – SMALL ANIMAL RADIATION ONCOLOGY ROTATION**

1-2 credits.

Apply clinical veterinary medicine in a small animal oncology setting that focuses on radiotherapy. Work alongside veterinarians and veterinary technicians with expertise in veterinary oncology. Participate in case management and client communication. Expand general knowledge about cancer in dogs and cats, including diagnosis and treatment. Learn about the role of radiotherapy in the treatment of cancer. Understand the patient experience during cancer treatment, specifically related to radiation. Learn about alternative treatment options when radiotherapy is not feasible.

Practice clinical skills including physical examination, venipuncture, fine needle aspiration, tissue biopsy, image interpretation, and record keeping.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, for 1 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Become familiar with tumor types treated with radiotherapy and their biologic behavior.

Audience: Graduate

2. Understand when and why radiotherapy is used and how it works.

Audience: Graduate

3. Learn about radiation side effects and how to manage them.

Audience: Graduate

4. Become familiar with the animal's and pet-owner's experience during radiotherapy including with daily anesthesia.

Audience: Graduate

5. Understand the benefits of conformal radiation delivery techniques.

Audience: Graduate

6. Understand the history of tomotherapy at the University of WI-Madison.

Audience: Graduate

7. Be familiar with alternative treatment options when radiotherapy is not feasible.

Audience: Graduate

8. Interpret radiographs and CT scans used in the diagnosis of tumors and in the planning of radiation.

Audience: Graduate

9. Practice the following clinical skills: performing physical examinations, creating and implementing diagnostic and treatment plans, performing tissue sampling including fine needle aspiration and biopsy, venipuncture, and record keeping.

Audience: Graduate

10. Practice communication skills involved in getting a history from a pet-owner/client, client education, and clinical team collaboration.

Audience: Graduate

### **SURG SCI 741 – CLINICAL OPHTHALMOLOGY ROTATION**

2 credits.

Provides experience in ocular examination, problem solving skills, and formulation of diagnostic and therapeutic plans for animals presenting with eye disease. Ocular examination as part of the complete physical examination and ocular manifestations of systemic diseases are emphasized.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Perform a complete ophthalmic examination using appropriate instrumentation to identify common ophthalmic diseases and abnormalities in veterinary patients

Audience: Graduate

2. Execute and interpret the results of basic ophthalmic tests

Audience: Graduate

3. Formulate differential diagnoses for ophthalmic examination and diagnostic findings

Audience: Graduate

4. Integrate history, ophthalmic/physical examination findings, and diagnostic test results to make an accurate clinical diagnosis(es)

Audience: Graduate

5. Devise a treatment plan for the most common ophthalmic diseases in animals

Audience: Graduate

### **SURG SCI 743 – ADVANCED ANESTHESIOLOGY/CRITICAL CARE MEDICINE**

2 credits.

Provides advanced, in-depth training in the areas of small, large and exotic animal anesthesia and pain management.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize & describe indicators of medical instability in critical patients  
Audience: Graduate

2. Apply appropriate basic procedural skills on patients in critical care  
Audience: Graduate

3. Demonstrate effective collaboration with critical care team to implement treatment plans  
Audience: Graduate

4. Demonstrate effective oral and/or written communication with critical care team and clients  
Audience: Graduate

### **SURG SCI 744 – RESTRAINT AND ANESTHESIA OF EXOTIC ANIMALS**

2 credits.

Provides advanced, directed anesthetic and restraint techniques for multiple exotic animal species such as rodents, rabbits, amphibians, reptiles, primates, fish and birds. The unique pharmacology and physiology of each species will be emphasized.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Apply the variations in anatomy and physiology of non-domestic species to provide tailored anesthetic care to a variety of species  
Audience: Graduate

2. Solve challenges associated with the presentation of a novel species by integrating the skills and knowledge learned in this course with self-guided research of the differences in anatomy, physiology, and pharmacology of the novel species  
Audience: Graduate

3. Construct and implement a complete perianesthetic plan for non-domestic classes and families of animals including birds, rabbits, rodents, fish, frogs, and reptiles  
Audience: Graduate

4. Apply and interpret the information obtained by anesthetic monitors and realize their individual strengths and limitations in a variety of species.  
Audience: Graduate

**SURG SCI 746 – FOOD ANIMAL SURGERY**

2 credits.

Provides didactic and surgical experience in the major, common surgical diseases of cattle and pigs.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Effectively communicate patient signalment and pertinent case information to colleagues to develop a differential diagnosis

Audience: Graduate

2. Select, perform, and interpret pre- and post-operative diagnostic tests

Audience: Graduate

3. Integrate findings from patient history, physical exam, and tests and imaging to formulate comprehensive diagnostic and treatment plans for surgical patients

Audience: Graduate

4. Describe basic surgical principles in food animal surgery such as wound management and common surgical procedures

Audience: Graduate

5. Document procedures and treatments in medical records, treatment sheets, and surgical reports

Audience: Graduate

**SURG SCI 748 – DENTISTRY AND ORAL SURGERY ROTATION**

1-3 credits.

Dentistry, oral medicine and surgery as well as comprehensive patient care through the use of progressive methods, hospital resources and interdisciplinary specialists.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand and complete the steps to a complete oral health assessment

Audience: Graduate

2. Use appropriate techniques to acquire dental radiographs and interpret image findings

Audience: Graduate

3. Safely administer appropriate dental nerve blocks for general dental procedures

Audience: Graduate

4. Properly extract maxillary canine, mandibular canine, maxillary fourth premolar tooth and mandibular molar tooth in cadaveric lab exercises

Audience: Graduate

5. Integrate findings from patient history, oral exam, and dental radiograph to formulate a comprehensive oral health treatment plan

Audience: Graduate

### **SURG SCI 750 – SMALL ANIMAL ULTRASOUND ELECTIVE**

1 credit.

Introduction to hands-on ultrasound imaging and expand on selected portions of ultrasound physics, literature and problem-based case studies.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Model low-stress handling and humane restraint of small animal patients

Audience: Graduate

2. Apply basic ultrasound techniques to identify organs, recognize imaging artifacts, and obtain diagnostic quality images

Audience: Graduate

3. Interpret abnormal imaging findings and prioritize a list of differential diagnoses based on available information

Audience: Graduate

4. Design appropriate diagnostic and therapeutic plans for small animal patients based on ultrasound results and clinical information

Audience: Graduate

### **SURG SCI 775 – EXTERNSHIP**

1-24 credits.

Offers opportunities for faculty coordinated experience in the veterinary medical profession outside School of Veterinary Medicine.

**Requisites:** Declared in Doctor of Veterinary Medicine with fourth year standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**Learning Outcomes:** 1. Understand real-world applications of foundational veterinary medical knowledge and skills

Audience: Graduate

2. Apply foundational veterinary knowledge and critical thinking to solve real-world problems

Audience: Graduate

3. Perform select techniques and procedures to develop various skills professional in veterinary medicine

Audience: Graduate

## **THEATRE AND DRAMA (THEATRE)**

### **THEATRE 100 – EXPERIENCING THEATRE**

2-3 credits.

By attending live theatre performances, watching films of theatrical productions and participating in colloquiums with theatre professionals, explore how theatre is made through the lens of various theatre artists. Through this exploration, develop an understanding and a deeper appreciation of performative events as well as critically think about those experiences. Explores performance and the human condition, using acquired knowledge to build empathy and appreciation for the complexities of one's own and other people's perspectives.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Demonstrate knowledge of theatrical terminology

Audience: Undergraduate

2. Demonstrate an understanding of how theatre artists collaborate

Audience: Undergraduate

3. Employ various approaches to critically evaluate the art and craft of theatre

Audience: Undergraduate

4. Identify the responsibilities of various artists/individuals involved in theatre

Audience: Undergraduate

5. Use learned knowledge to build empathy and appreciation for the complexities of one's own and other people's perspectives

Audience: Undergraduate

### **THEATRE/ENGL 120 – INTRODUCTION TO THEATRE AND DRAMATIC LITERATURE**

3-4 credits.

Reading important plays, attending stage productions, writing and thinking critically about theatre and drama. Emphasis on developing analytic skills in dramatic literature and theatre production.

**Requisites:** None

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**THEATRE 130 – FUNDAMENTALS OF THEATRICAL DESIGN**

3 credits.

Foundational elements of theatrical design and developing the skills to translate text into visual and/or aural content. Involves an introduction to script analysis; visual, aural, and dramaturgical research; problem solving skills; creative exploration and visual communication. Relevant to designers, directors, actors, stage managers, technicians, and informed audience members.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**THEATRE 140 – VOICE 1: EFFECTIVE COMMUNICATION**

3 credits.

Introduces and explores the fundamentals and discipline of voice and speech. Provides a foundation from which the student will begin to access and engage healthful, practical, and creative vocal and speech function. Introduction to methods of expression for acting and public speaking.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**THEATRE 150 – ACTING I: INTRODUCTION TO ACTING**

3 credits.

Provides a basic introduction to the craft of acting. Develops disciplines and tools of the actor as they relate to voice, movement, language skills, and engaging communication. Explores how actor training skills can be a benefit in a wide context of professional and personal endeavors.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**THEATRE 160 – TECHNICAL THEATRE FUNDAMENTALS**

3 credits.

Learn how to mount a theatrical production. Through scenery, costumes, lighting, sound, and stage management explore the relationship between the technical components of the production process. Includes lectures as well as practical experience in University Theatre productions.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**THEATRE 161 – BACKSTAGE LABORATORY I**

2 credits.

Learn through practical participation in University Theatre productions; lab choices include scenery and costume construction, lighting, and sound.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2019**THEATRE 199 – DIRECTED STUDY**

1-3 credits.

Collaborate with instructor for personalized curriculum.

**Requisites:** Consent of instructor**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2008**THEATRE 200 – ACTING SKILLS FOR LIFE**

2-3 credits.

Learn how to apply acting skills to presentations and interactions in non-arts settings (business, education, etc.), such as enhancing confidence and communication in interviews presentations, elevator pitches, authentically connecting on a personal level with others, and how to avoid or better deal with stage fright.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Gain a deeper understanding and awareness of their physical/vocal presence.

Audience: Undergraduate

2. Effectively communicate their work to different audiences.

Audience: Undergraduate

3. Adjust their behavior in real time to respond to audience feedback.

Audience: Undergraduate

4. Manipulate their vocal and physical presence to communicate more effectively.

Audience: Undergraduate

5. Gain confidence in public speaking and leadership presence.

Audience: Undergraduate

6. Develop greater self-awareness and how acting techniques can benefit all areas of connection with others.

Audience: Undergraduate

**THEATRE 213 – DIGITAL DESIGN VISUALIZATION FOR ENTERTAINMENT**

3 credits.

Offers the fundamental principles and the practical knowledge of design visualization for theatrical productions and entertainment events. Focuses on building students' capability of producing clear and effective visual presentations of their creative design concepts by using the most cutting edge 2D and 3D digital applications.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Transform 2D sketches, technical drawings into 3D shapes with multiple choices including digital modeling tools, sculpting tools and 2.5D postproduction tools including transfer files among the applications.

Audience: Undergraduate

2. Apply the basic surface textures to the 3D objects with graphic and dimensional qualities.

Audience: Undergraduate

3. Enrich the digitally designed environment with lights and atmosphere such as basic illumination, theatrical lighting effects, environmental fog and particles.

Audience: Undergraduate

4. Demonstrate the basic digital rendering technique and the use of different render engines, virtual camera, camera animation, render output selection and settings.

Audience: Undergraduate

5. Demonstrate the basic special effects and simulations such as fractures, cloth, water surface with collision, physics and basic particles.

Audience: Undergraduate

6. Discuss the basic concept and demonstrate the use of the digital game engine for design visualization.

Audience: Undergraduate

7. Search, compare and select the most suitable and efficient applications as the project centric tool and technology setting.

Audience: Undergraduate

**THEATRE/DANCE 218 – AFRICAN DANCE PERFORMANCE**

2 credits.

Technique, practice and performance of complex African and African-based dances in relation to polyrhythmic musical and percussive accompaniment. Study of historical and cultural contexts of these forms. Development of improvisational skills in dialogue with musicians.

**Requisites:** DANCE 118**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2017**THEATRE 219 – UNDERGRADUATE TOPICS IN THEATRE AND DRAMA**

1-3 credits.

Undergraduate study in subjects of current interest in design, performance, technology, history, dramatic theory, literature criticism, or theatre/drama education.

**Requisites:** None**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**THEATRE 220 – SCENIC STUDIO PRACTICUM**

1 credit.

Hone skills learned in Technical Theater Fundamentals while working side-by-side with designers and technicians building University Theatre productions.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and use equipment found in the Scenic Studio safely and effectively.

Audience: Undergraduate

2. Demonstrate Professionalism through prompt attendance, engagement and effective teamwork.

Audience: Undergraduate

3. Improve on skills and techniques of theatrical set construction and the usage of tools, hardware and materials as learned in TD 160.

Audience: Undergraduate

4. Execute verbal instructions with preciseness and skill.

Audience: Undergraduate

5. Develop new skills such as the interpretation of drawn images and their translation into three-dimensional objects through scenic construction.

Audience: Undergraduate

**THEATRE 221 – COSTUME STUDIO PRACTICUM**

1 credit.

Hone skills learned in Technical Theater Fundamentals while working side-by-side with designers and technicians building University Theatre productions.

**Requisites:** THEATRE 160

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and use equipment found in the Costume Studio safely and effectively.

Audience: Undergraduate

2. Demonstrate Professionalism through prompt attendance, engagement and effective teamwork.

Audience: Undergraduate

3. Improve on skills and techniques in creating costumes and accessories for theatrical productions as learned in TD 160.

Audience: Undergraduate

4. Execute verbal instructions with preciseness and skill.

Audience: Undergraduate

5. Develop new skills such as the interpretation of drawn images and their translation into three-dimensional objects through costume construction and fabric manipulation.

Audience: Undergraduate

**THEATRE 222 – LIGHTING & SOUND STUDIO PRACTICUM**

1 credit.

Hone skills learned in Technical Theater Fundamentals while working side-by-side with designers and technicians building University Theatre productions.

**Requisites:** THEATRE 160

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Identify and use equipment found in the Lighting and Sound Studio safely and effectively.

Audience: Undergraduate

2. Develop new skills such as the interpretation of drafted plots and paperwork and translate them into realized designs.

Audience: Undergraduate

3. Improve on skills and techniques in light hanging and focusing, rigging and speaker installation for theatrical productions.

Audience: Undergraduate

4. Execute verbal instructions with preciseness and skill.

Audience: Undergraduate

5. Demonstrate Professionalism through prompt attendance, engagement and effective teamwork.

Audience: Undergraduate

**THEATRE 230 – ENVIRONMENT DESIGN FOR GAMES AND OTHER VIRTUAL STORYTELLING SPACES**

3 credits.

Video game environments by their nature are designed to support storytelling. Develop the skills needed to create rich virtual worlds using theatrical storytelling techniques and three-dimensional modeling.

**Requisites:** THEATRE 130

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Relate game design concepts to theatrical performance and design practices.

Audience: Undergraduate

2. Analyze the relationship between theatre and games using specific examples of "gamified" theatre.

Audience: Undergraduate

3. Demonstrate the basics of 3D modeling using tools and techniques to create assets.

Audience: Undergraduate

4. Apply assets and tools to solve visual storytelling problems.

Audience: Undergraduate

5. Compose a 3D scene that supports narrative.

Audience: Undergraduate

6. Develop a storytelling project from scratch to finish through all stages of an ordered workflow.

Audience: Undergraduate

**THEATRE 234 – COLLABORATIVE PROBLEM SOLVING**

3 credits.

Theatre is the manifestation of collaborative problem solving.

Collaboration is a process involving two or more individuals working toward a common goal, through interdependent behavior with individual accountability. Build collaborative and creative problem-solving skills to generate innovative solutions to complex problems and practices.

**Requisites:** THEATRE 100, or concurrent enrollment in THEATRE 100

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Identify and demonstrate competency in the common elements in collaborative frameworks.

Audience: Undergraduate

2. Collaborate effectively in various theatrical organizational roles and structures.

Audience: Undergraduate

3. Employ various methods in problem-solving and idea-generation in pursuit of a common team goal.

Audience: Undergraduate

### **THEATRE 240 – INTERMEDIATE VOICE TRAINING**

3 credits.

Techniques and practice for increasing vocal strength, range, flexibility and the study of diction. Attention to individual problems in tone production, resonance, and articulation.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **THEATRE 250 – FUNDAMENTALS OF ACTING**

3 credits.

Focuses on developing fundamental acting techniques (voice, characterization, physicality) and learn to apply skills in individual performance and scene study of contemporary dramatic texts.

**Requisites:** THEATRE 150

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### **THEATRE 256 – VIDEO GAMES AS PERFORMANCE: A HISTORICAL PERSPECTIVE**

2 credits.

Using a video games-as-performance framework, explore the history, business, and technology of video games. Study the cultural, artistic, and technological evolution of major video game consoles, handheld systems, and personal/gaming computers, as well as a look at the business, technology, and people behind the games. Contemplate video games as theatrical performance while journeying into a different segment of gaming each week and examining their cultural impact on each era.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Identify iconic video game consoles, characters, companies, people, themes, and key attributes across video gaming generations to place key developments in video games into broader social, cultural, and historical contexts.

Audience: Undergraduate

2. Describe key aspects of the video games as performance framework.

Audience: Undergraduate

3. Employ various approaches to critically evaluate the artistic, societal, and cultural impact of video games as performance.

Audience: Undergraduate

4. Demonstrate knowledge of major movements, trends, and events in the development of video games as cultural artifacts in global society.

Audience: Undergraduate

5. Examine game characteristics through practical play and/or observing playthroughs using a theatrical lens.

Audience: Undergraduate

### **THEATRE/DANCE 259 – COLLABORATIVE ARTS PERFORMANCE LAB: DEVISING COLLABORATIVE PERFORMANCE THROUGH HIP HOP ARTS**

1-2 credits.

Work together to create a repertory company which produces performances of short hip hop theater and other collaborative performance art works for public viewing. Experimental works are researched and developed. Involves the development of collaborative and small group pieces as well as artistic training with a focus on individual and multi-voice work, theater improvisation, dance/movement.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2023

**THEATRE 260 – PRODUCING THEATRE**

3 credits.

Focuses on the fundamental principles and practical operational knowledge of different theatrical business models. Topics include: planning, scheduling, marketing, fundraising, budgeting, hiring, commercial vs. not-for-profit, legal concerns, and public relations.

**Requisites:** None**Repeatable for Credit:** No**Last Taught:** Spring 2025**THEATRE 262 – BACKSTAGE PRACTICUM**

1 credit.

Participation as a backstage run crew member for one University Theatre production. Crew positions vary per production and may include wardrobe, deck, light board operator, sound board operator, backstage microphone technician, and follow spot operator. In-person attendance for all production calls is mandatory.

**Requisites:** Consent of instructor**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2025**Learning Outcomes:** 1. Explain the production process through hands-on experience.

Audience: Undergraduate

2. Demonstrate the ability to problem-solve collaboratively.

Audience: Undergraduate

3. Explain basic theatrical terminology and the responsibilities of various roles involved in producing theatre.

Audience: Undergraduate

4. Execute verbal instructions with precision and skill.

Audience: Undergraduate

**THEATRE 266 – FUNDAMENTALS OF STAGE LIGHTING****TECHNOLOGY**

3 credits.

Theories and techniques for the use of stage lighting equipment, special effects, and other stage electric devices.

**Requisites:** THEATRE 160**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2022**THEATRE 270 – FUNDAMENTALS OF STAGECRAFT**

3-4 credits.

Theory and techniques of stagecraft for theatrical production. When taken for 4 credits, a lab component required.

**Requisites:** THEATRE 160**Course Designation:** Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**THEATRE 298 – DIRECTED STUDY**

1-3 credits.

Collaborate with instructor for personalized curriculum.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2004**THEATRE 299 – DIRECTED STUDY**

1-3 credits.

Collaborate with instructor for personalized curriculum.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024**THEATRE 324 – TRADITIONS IN DRAMATIC LITERATURE**

3 credits.

Multiple approaches to reading plays from a variety of important periods in dramatic literature with an emphasis on the life of older plays in the contemporary repertory. When possible, some course materials are linked to University Theatre production.

**Requisites:** THEATRE/ENGL 120**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2017**THEATRE 327 – HISTORY OF COSTUME FOR THE STAGE**

3 credits.

Examines dress in Western civilization through the cultural context of history, art and fashion and related to theatrical costume design through a comparison of theatre designs to their primary visual sources.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2018

**THEATRE 328 – MATERIAL CULTURE FOR PERFORMANCE DESIGN**

3 credits.

Introduction to art, architecture, interior design, objects, and clothing history, including social and economic factors that influenced development. Through research and critical thinking, demonstrate knowledge of historical and contemporary art movements, architecture, and clothing for application in performance design.

**Requisites:** THEATRE 130, ART 100, or DS 120

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Synthesize research and knowledge learned about global material cultures for its significance, potential application, and understanding of its relationship to the time/culture in which it was created.

Audience: Undergraduate

2. Facilitate and contribute to a discussion around a material culture different from their own or new to them.

Audience: Undergraduate

3. Review evidence and hypothesize how an object's impact might be changed by re-contextualizing for use in performance design.

Audience: Undergraduate

4. Synthesize research and knowledge learned about global material cultures and apply that within a design process to devise a culturally competent historical world for use in performance design.

Audience: Undergraduate

**THEATRE 329 – INTRODUCTION TO AFRICAN-AMERICAN PERFORMANCE**

3-4 credits.

Introduction to historical, social and political contexts of African-American artistic expression in theatre and performance. Offers critical analyses of theatre, films, and/or dance forms that reflect cultural values, ideologies and performance aesthetics rooted in African-American and West African traditions.

**Requisites:** Junior standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**THEATRE/LITTRANS 335 – IN TRANSLATION: THE DRAMA OF HENRIK IBSEN**

3-4 credits.

Often considered "the father of modern drama," the Norwegian playwright Henrik Ibsen (1828-1906) is a major figure of world literature whose dramatic works remain fascinating and globally influential, both as texts and through performance and adaptation. Read and discuss Ibsen in English translation, with a focus on Ibsen's historical contexts, dramatic techniques, social and political thought, and the reception and adaptation of his work in modern culture.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**THEATRE/LITTRANS 336 – IN TRANSLATION: THE DRAMA OF AUGUST STRINDBERG**

3-4 credits.

Provides in-depth knowledge of the artistic career of the influential Swedish playwright, August Strindberg (1849-1912), and a general knowledge of the literary, artistic, and intellectual history that shaped his artistic production.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2018

**THEATRE 341 – FUNDAMENTALS OF IMPROVISATION**

3 credits.

Study, discuss, and perform the central principles of improvisation for the stage, which have useful applications in a range of personal and professional settings. Skills and tools to foster comfort, ease, authenticity, and confidence in performance, public speaking, and everyday interactions.

**Requisites:** None**Course Designation:** Breadth - Humanities

Level - Elementary

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Articulate and demonstrate comprehension of the central tenets and historical movements of improvisational theatre with examples (verbally and in writing)

Audience: Undergraduate

2. Utilize creative and collaborative concepts and tools that support effective improvisation, including the "Yes-and" principle, and establishing location, character, relationship, and objective in given circumstances

Audience: Undergraduate

3. Describe how the principles and practices of improvisation can be applied in a range of professional and personal settings

Audience: Undergraduate

4. Demonstrate the principles, concepts, and tools of improvisation via performance in improv exercises, games, and scenes

Audience: Undergraduate

5. Provide and integrate feedback with specificity and care

Audience: Undergraduate

**THEATRE 342 – FUNDAMENTALS OF MOVEMENT FOR THE STAGE**

1-3 credits.

Development of the actor's awareness of habitual patterns of tension. Elements of movement including space, time, energy. Introduction to improvisation skills.

**Requisites:** Sophomore standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**THEATRE 350 – ACTING REALISM**

3 credits.

Intensive scene study from the major works of selected modern playwrights, concentrating on realism.

**Requisites:** Consent of instructor**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**THEATRE 351 – FUNDAMENTALS OF ASIAN STAGE DISCIPLINE**

3 credits.

Intensive movement discipline using Asian martial art techniques and mask work as a preparation for performance.

**Requisites:** Sophomore standing**Course Designation:** Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2020**THEATRE 352 – AUDITIONING FOR STAGE AND SCREEN**

3 credits.

Student actors develop career-focused skills and confidence in auditioning for theatre and on-camera projects. Includes exercises in handling "cold" readings, prepared monologues, interviews, and improvisational auditioning. Student will also learn to look at auditions from the casting director's point of view.

**Requisites:** THEATRE 150 and 250**Repeatable for Credit:** No**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Demonstrate skills to effectually audition for professional and academic theatre

Audience: Undergraduate

2. Demonstrate skills to effectually audition for commercials, film and television work

Audience: Undergraduate

3. Self-tape auditions for digital submissions

Audience: Undergraduate

4. Perform a personalized repertoire of audition material

Audience: Undergraduate

**THEATRE 357 – INTRODUCTION TO THEATRE FOR CULTURAL AND SOCIAL AWARENESS**

3 credits.

Analysis of sensitive subject matter in U.S. workplace and school/ community settings through theatre and drama. Examines race relations, cultural diversity, gender, sexual orientation and other topics in plays, films, and current events. Develops theatrical models to encourage healthy dialogue.

**Requisites:** Consent of instructor

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Humanities

Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025

**THEATRE 360 – PERFORMANCE IN PRACTICE**

1-3 credits.

Students gain practical theatrical experience, skills, and knowledge by working on a University Theatre production. The assignments will involve responsibilities as Actor, Director, Assistant Director, Stage Manager, Assistant Stage Manager, or other approved performance related positions on a University Theatre production.

**Requisites:** Consent of instructor

**Course Designation:** Workplace - Workplace Experience Course

**Repeatable for Credit:** Yes, for 5 number of completions

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Exhibit the capability of taking a production from page to stage

Audience: Undergraduate

2. Demonstrate professional deportment

Audience: Undergraduate

3. Display a practical understanding of collaboration on a theatrical production

Audience: Undergraduate

4. Recognize the role and responsibilities expected of each collaborator within the production

Audience: Undergraduate

**THEATRE 361 – BACKSTAGE LABORATORY II**

1-2 credits.

Emphasis on student's involvement with a specific responsibility within theatrical production.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**THEATRE/CURRIC/SLAVIC 362 – DRAMA FOR TEACHING AND LEARNING**

3 credits.

Methods for all involved in teaching and learning, including foreign languages. Introduction to philosophy, methodology, and practice of the use of drama and performance techniques in any educational or recreational settings. Focus on creativity and embodied and contextual learning, based on current neurological, psychological, and sociological research. A practical class which includes demonstration and practice with children.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**Learning Outcomes:** 1. Articulate the importance of drama in the education of all children.

Audience: Both Grad & Undergrad

2. Connect drama to multiple forms of expressing and receiving experiences, ideas, and feelings.

Audience: Both Grad & Undergrad

3. Apply the basic terms, skills, philosophies, and methodologies for leading drama sessions

Audience: Both Grad & Undergrad

4. Articulate the difference and similarities between the drama methodologies offered in the course.

Audience: Both Grad & Undergrad

5. Connect the use of drama with current brain based research

Audience: Both Grad & Undergrad

6. Demonstrate ability to design, implement, and evaluate activities and lesson plans with sound objectives and goals.

Audience: Both Grad & Undergrad

7. Connect school and community-making connections between community-based knowledge and school knowledge in theory and practice of drama.

Audience: Both Grad & Undergrad

8. Demonstrate ability to design, implement, and evaluate lesson plans that focus on inclusion and diversity in theory, practice, and pedagogy.

Audience: Graduate

9. Articulate the value of drama in relation to children's social, cultural, cognitive, linguistic, emotional, and moral development.

Audience: Graduate

**THEATRE 363 – COSTUME DESIGN I**

3 credits.

An introduction to costume design theory and techniques for performance. Emphasis on script analysis for costume design and visual communication skills. Projects will explore design by using analytical and problem-solving skills to interpret a text, supporting a text through design choices, and achieving mastery of drawing and costume rendering techniques using analog techniques and/or digital media.

**Requisites:** THEATRE 130, ART 100, or DS 120

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Analyze a text to create costume designs and defend those choices.

Audience: Undergraduate

2. Synthesize research to tell a visual story.

Audience: Undergraduate

3. Engage in culturally competent creative practices.

Audience: Undergraduate

4. Communicate costume designs through effective costume renderings and supporting research.

Audience: Undergraduate

5. Demonstrate a level of skill and proficiency in costume rendering in analog or digital methods.

Audience: Undergraduate

**THEATRE 364 – MAKEUP FOR THE THEATRE**

3 credits.

An introduction to makeup design for the theater. Learn the aesthetics of makeup, color theory, and the technical aspects of applying makeup. Topics include the importance of developing a character through makeup, techniques of physically applying makeup to the actor and special effects makeup such as old age and prosthetic makeup appliances.

**Requisites:** Sophomore standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**THEATRE 365 – SEWING FOR THE THEATRE**

3 credits.

Intermediate sewing techniques used to create theatrical garments.

**Requisites:** THEATRE 263

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**THEATRE/ART 366 – STAGE LIGHTING I**

3 credits.

Application of lighting design to the stage and natural environment. Color principles, lighting instruments, and control equipment. Production participation and labs.

**Requisites:** THEATRE 130, ART 100, or DS 120

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Observe light in its natural, artistic, and theatrical environments, and discuss its controllable qualities and functions.

Audience: Undergraduate

2. Summarize the role of a lighting designer and the roles of other members of a production team.

Audience: Undergraduate

3. Understand theatrical lighting production planning and implementation methods, including: lighting hang and focus, lighting control, instrument design and selection.

Audience: Undergraduate

4. Develop the analytical skills needed to read a script, communicate ideas, and establish a design aesthetic and personal design process.

Audience: Undergraduate

5. Design the lighting for a play and produce all relevant paperwork and documentation, including drafting a full light plot.

Audience: Undergraduate

**THEATRE 367 – SCRIPT ANALYSIS**

3 credits.

A study of dramatic structure and examination of the basic elements of theatrical text. Introduction to applied methods of script analysis as an approach to researching, writing, directing, designing, performing and critiquing plays and screenplays.

**Requisites:** None

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**THEATRE 368 – FUNDAMENTALS OF DIRECTING**

3 credits.

Principles and practice of play direction; motivational analysis, composition, movement, stage business and rehearsal techniques. Student directs a final project.

**Requisites:** THEATRE 367

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### THEATRE 370 – DRAFTING FOR THE THEATRE

3–4 credits.

Methods and development of techniques used in theatrical drafting.

**Requisites:** THEATRE 160 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### THEATRE 371 – SOUND FOR THEATRE

3–4 credits.

Audio equipment and its use in the theatre; the integration of sound as a design element of live theatrical performance.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2017

### THEATRE/ART 372 – SET DESIGN I

3 credits.

Principles of composition, scale, perspective, and color applied to the stage; production of ground plans, elevations, sketches, and models.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### THEATRE 379 – INTRODUCTION TO STAGE MANAGEMENT

3 credits.

Principles of stage management from auditions through closing night. Class work and supplementary production experience.

**Requisites:** THEATRE 160 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### THEATRE/GEN&WS 415 – INTRODUCTION TO CONTEMPORARY FEMINIST THEATRE AND CRITICISM

3 credits.

Introduction to the history, literature and theory of feminist theatre and of feminist criticism of mainstream theatre in the United States from 1960 to the present.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

### THEATRE/LITTRANS 423 – IN TRANSLATION: SLAVIC DRAMA IN CONTEXT

3 credits.

Slavic playwrights and the European tradition of theatre and drama.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### THEATRE 424 – CONTEMPORARY WORLD THEATRE AND DRAMATIC LITERATURE

3 credits.

Considers important current trends in performance and dramatic literature worldwide. Writing component includes both literary and performance criticism. When possible, some course materials are linked to University Theatre productions.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### THEATRE 431 – HISTORY OF THEATRES AND STAGING

3 credits.

Theatre architecture, scenery, costume, acting, directing, and modes of staging in Europe from 500 B.C.

**Requisites:** Sophomore standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### THEATRE 440 – MUSICAL PERFORMANCE FOR THE ACTOR

3 credits.

Styles and genres of the modern American and British musical theatre for performers. Their application to audition techniques and scene/song presentations.

**Requisites:** THEATRE 140 and 150 or graduate/professional standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**THEATRE 450 – ACTING STYLES**

1-3 credits.

Study and demonstration of the various acting styles from the Greek to the modern. Concentration on two specific styles in a semester.

**Requisites:** Consent of instructor

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2021

**THEATRE 451 – ACTING FOR THE CAMERA**

4 credits.

Focuses on the principles of acting for the camera including industry terms, auditioning techniques, and acting techniques for film/television, industrials, and commercials. Learn tools for script analysis, character development, and on-camera performance which will be recorded and critiqued in class.

**Requisites:** THEATRE 250

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Demonstrate the basic vocabulary, etiquette, and procedures involved in acting for the camera.

Audience: Undergraduate

2. Develop text analysis skills and implement research into performance.

Audience: Undergraduate

3. Expressively perform for the camera through active listening, reacting, subtext, and business.

Audience: Undergraduate

4. Apply the necessary adaptations in acting techniques from the stage to the screen.

Audience: Undergraduate

5. Exhibit critical on-camera audition skills.

Audience: Undergraduate

6. Identify the various production roles of on-camera and "behind the camera" personnel.

Audience: Undergraduate

**THEATRE 464 – COSTUME TECHNOLOGY TOPICS**

3-4 credits.

Examines techniques used to create costumes. Rotating topics including draping, period patternmaking, tailoring, crafts, and painting. When taken for 4 credits, a lab component required.

**Requisites:** Consent of instructor

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**THEATRE 466 – STAGE LIGHTING DESIGN II**

3-4 credits.

Detailed study of lighting design techniques and professional practices for commercial and resident theatres.

**Requisites:** THEATRE/ART 366 and THEATRE 370

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**THEATRE 469 – INTERDISCIPLINARY STUDIES IN THE ARTS**

1-4 credits.

Guest artists offer interdisciplinary courses on topics appropriate to their specializations.

**Requisites:** None

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2022

**THEATRE 472 – SCENIC PAINTING**

3 credits.

Painting scenery for the stage. Techniques for painting drops, flats, and props in a range of illusion effects.

**Requisites:** Sophomore standing

**Course Designation:** Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**THEATRE/ENGL 477 – DIASPORA AND THEATRE**

3 credits.

Study of the drama and theatre of a variety of immigrant communities in three Western locations: Britain, the United States, and Canada. Focuses on current theories of diaspora and transnationalism, the place of theatre in diasporic writing, and the literary, performative, and material dimensions of the genre.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Literature. Counts toward the Humanities req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**THEATRE 500 – THE BUSINESS OF THE BUSINESS**

3 credits.

Explores the real-world practicalities of the business side of show business, and gives students the business tools and resources necessary to be successful as directors, designers, stage managers, and technicians. Addresses the unique business demands of working artists.

**Requisites:** None

**Course Designation:** Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**THEATRE 501 – THE BUSINESS OF ACTING**

3 credits.

Teaches actors the vital, non-performance skills and knowledge needed to launch professional acting careers. Knowledge of self-promoting, marketing, unions, networking, headshot/resumes, agents, casting directors, trade publications, and more will empower the actor and ease their transition into the professional world.

**Requisites:** Junior standing

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**THEATRE 526 – THE THEATRES OF CHINA AND JAPAN**

3 credits.

An advanced study of the theatres of China and Japan in relation to aesthetics and form.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**THEATRE 541 – ACTING SHAKESPEARE**

1-3 credits.

Studio presentation of Shakespearean drama with emphasis on language and verse structure; techniques for enhancing performances skills.

**Requisites:** THEATRE 240 and 350 or graduate/professional standing

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**THEATRE 550 – ADVANCED SCENE STUDY**

1-3 credits.

Intensive scene study from the major works of selected modern playwrights.

**Requisites:** Consent of instructor

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2022

**THEATRE 561 – BACKSTAGE LABORATORY III**

1-2 credits.

Emphasis on fulfilling one major assignment in theatre performance or production situation such as actor, stage manager, master carpenter, wardrobe master, properties master.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**THEATRE 563 – COSTUME DESIGN II**

3 credits.

Problems in use of line, form, color, texture, and movement in the design of costumes for the stage. Class projects include investigation into classical and contemporary drama.

**Requisites:** THEATRE 363

**Course Designation:** Breadth – Humanities

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**THEATRE 570 – ADVANCED STAGECRAFT**

3 credits.

An intensive study of stage rigging, scenic locomotion, set construction and structural analysis techniques.

**Requisites:** THEATRE 270 and THEATRE 370 (or concurrent enrollment in THEATRE 370) or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2017

**THEATRE/ART 572 – SET DESIGN II**

3 credits.

Historical survey of visual theatre, painting, and architectural styles adapted to various dramatic forms. Application of design elements and styles to contemporary theatre productions.

**Requisites:** THEATRE/ART 372

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**THEATRE/ENGL 575 – BRITISH DRAMA, 1914 TO PRESENT**

3 credits.

Plays and playwrights from the first World War to the present, including movements leading to the "revolt" of 1956 and subsequent proletarian and absurdist drama. Plays by Shaw, O'Casey, Maugham, Coward, Eliot, Osborne, Beckett, Pinter, Stoppard, Arden, Wesker, Bond, Churchill and others.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**THEATRE/ENGL 576 – SURVEY: THEORIES OF DRAMA**

3 credits.

Selected major critical and theoretical sources, from Aristotle to the present day; the influences of theories upon playwriting and modes of theatrical production.

**Requisites:** Junior standing

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**THEATRE/ENGL 577 – POSTCOLONIAL THEATRE: DRAMA, THEORY AND PERFORMANCE IN THE GLOBAL SOUTH**

3 credits.

Study of drama, dramatic theory and theatrical practices in postcolonial cultures, primarily in Asia, Africa and the Caribbean. Considers status of drama/theatre in postcolonial studies and focuses on issues of form, language, intertextuality, trans-culturation, material organization and reception.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**THEATRE/ENGL 578 – MODERN AMERICAN DRAMA AND THEATRE**

3 credits.

Representative twentieth-century plays from Glaspell and O'Neill to the present considered within contemporary cultural, theatrical and academic context.

**Requisites:** Junior standing

**Course Designation:** Breadth - Literature. Counts toward the Humanities req

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**THEATRE 579 – ADVANCED CONCEPTS IN STAGE MANAGEMENT**

2 credits.

Advanced study of organizational behaviors, theatre infrastructures, styles communication techniques in relation to Stage Management.

**Requisites:** THEATRE 379

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**THEATRE 595 – TOPICS IN THEATRE AND DRAMA: STUDY ABROAD**

1-6 credits.

A course carried with a UW-Madison study abroad program which has no equivalent on this campus.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2002

**THEATRE 597 – INTERNSHIP IN THEATRE**

1-6 credits.

Enables theatre majors with a supervised internship to earn academic credit while engaged in a professional setting outside of the University and directly related to their field of study.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**THEATRE 619 – SPECIAL TOPICS IN THEATRE AND DRAMA**

1-3 credits.

Specialized subjects of current interest in design, performance, technology, history, dramatic theory, literature criticism, and theatre/drama education.

**Requisites:** Sophomore standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**THEATRE 631 – THEORIES OF ACTING**

3 credits.

Interdisciplinary and cross-cultural seminar on the historical, cultural, performative, aesthetic, and ideological construction of acting on stage.

**Requisites:** THEATRE/ENGL 120 or Graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**THEATRE 661 – ADVANCED PRODUCTION PRACTICUM**

1-3 credits.

Provides students the opportunity to apply their knowledge in a production setting. Enrollment is limited to designated Dramaturg, Lighting Designer, Costume Designer, Set Designer, Technical Director, Assistant Dramaturg, Assistant Designers, or Assistant Technical Director on a season production for the University Theatre.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**THEATRE 681 – SENIOR HONORS THESIS**

3 credits.

Mentored individual study for students completing honor theses. For further information, consult the department's Undergraduate Advisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Fall 2018

**THEATRE 682 – SENIOR HONORS THESIS**

3 credits.

Mentored individual study for students completing honor theses. For further information, consult the department's Undergraduate Advisor.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**THEATRE 691 – SENIOR THESIS**

2-3 credits.

Mentored individual study for students completing theses.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**THEATRE 692 – SENIOR THESIS**

2-3 credits.

Mentored individual study for students completing theses.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**THEATRE 698 – DIRECTED STUDY**

1-6 credits.

Collaborate with instructor for personalized curriculum.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2015

**THEATRE 699 – DIRECTED STUDY**

1-6 credits.

Collaborate with instructor for personalized curriculum.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**THEATRE 713 – ADVANCED DIGITAL DESIGN VISUALIZATION FOR ENTERTAINMENT**

3 credits.

Offers advanced knowledge of design visualization for theatrical productions and entertainment events. Focuses on producing clear and effective visual presentations of creative design concepts by using the most cutting edge digital applications that include 3D contents modeling, texturing, still and animated rendering, VR and interactive output packaging.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No

**Learning Outcomes:** 1. Transform 2D sketches, technical drawings into 3D shapes with multiple choices including digital modeling tools, sculpting tools and 2.5D postproduction tools including transfer files among the applications.

Audience: Graduate

2. Apply the multiple types of textures to the 3D objects with high level graphic and dimensional qualities, include unwrapping UVW, normal map, bump map, displacement map.

Audience: Graduate

3. Demonstrate advanced effects of lighting, atmosphere, physics, particles within the digital environment.

Audience: Graduate

4. Demonstrate the high-end digital rendering technique and the use of different render engines, virtual camera setting for animation, render output selection and settings.

Audience: Graduate

5. Develop the concept and demonstrate the use of the digital game engine for design visualization.

Audience: Graduate

6. Research, compare and employ the most suitable and efficient applications as the project centered tool and technology setting.

Audience: Graduate

**THEATRE/ENGL 731 – ADVANCED THEATRE HISTORY 500 BC TO 1700**

3 credits.

Problems of scholarship in the dramatic, performance and staging practices of major traditions of world theatre history between 500 BCE and 1700 including the theatres of ancient Greece and Rome; medieval, Renaissance and early modern Europe; and the Muromachi and Tokugawa eras in Japan.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2020**THEATRE/ENGL 732 – ADVANCED THEATRE HISTORY 1700 TO PRESENT**

3 credits.

Problems of scholarship in the dramatic, performance and staging practices of major traditions of world theatre history since 1700, including melodrama, naturalism, the avant-garde, and other movements that helped shaped contemporary theatre.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**THEATRE 763 – COSTUME DESIGN III**

3 credits.

Advanced problems in costume design for the stage.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**THEATRE 799 – INDEPENDENT STUDY**

1-6 credits.

Collaborate with instructor for personalized curriculum.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**THEATRE 911 – SEMINAR-PROBLEMS IN THEATRE AND DRAMA**

2-3 credits.

Topics variable.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2018**THEATRE 990 – RESEARCH AND THESIS**

1-9 credits.

Independent research and writing under the supervision of a staff member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Summer 2021**THEATRE 999 – INDEPENDENT STUDY**

1-3 credits.

Independent pursuit of a creative project designed by the student and supervised by a staff member.

**Requisites:** Consent of instructor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2015

# URBAN AND REGIONAL PLANNING (URB R PL)

## URB R PL 215 – WELCOME TO YOUR URBAN FUTURE

3 credits.

We live in an increasingly urban world and anticipate that 70% of the world's population will live in urban areas by 2050. For many of us, our shared future experience will be urban and interconnected. How can we make the future of urban areas as bright as possible for everyone? The answer begins with us. Building equitable and sustainable urban futures for everyone will require the efforts of a diverse group of people from many disciplines, backgrounds, and ways of thinking. Guest presenters introduce different disciplines and perspectives through major themes related to the planning and design of urban systems and environments. Imagine and develop your plan to effect positive change in an urban area focused on relevant topics like community food systems, water conservation, multimodal and active transportation, affordable housing, and urban nature.

**Requisites:** None

**Course Designation:** Breadth - Humanities

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Recognize and articulate the challenges facing the future of urban systems from academic and practitioner points of view.

Audience: Undergraduate

2. Integrate different disciplinary perspectives and relate them to solving problems in cities.

Audience: Undergraduate

3. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of future cities.

Audience: Undergraduate

4. Identify opportunities and appreciate careers that are relevant for innovating in cities domestically and globally.

Audience: Undergraduate

5. Analyze sustainability issues and/or practices using a systems-based approach (e.g., urban metabolism).

Audience: Undergraduate

6. Understand the interactions between diverse groups living together in cities, and analyze the tensions and possibilities.

Audience: Undergraduate

7. Translate course concepts into opportunities for leadership and action from the private, non-profit, and public sectors within cities, especially as it relates to being an urban leader grounded in equity and social justice.

Audience: Undergraduate

8. Frame complex public issues concisely in writing to city leaders about the issues.

Audience: Undergraduate

## URB R PL/GEOG 305 – INTRODUCTION TO THE CITY

3-4 credits.

Investigates urbanization as a general process, as well as the resulting contemporary physical, social, cultural and political- economic forms of cities. Emphasis will be placed on the history and current forms of spatial and social segregation of cities by race, class, ethnicity, and gender. The myriad ways that cities have addressed the tensions emerging from this history of spatial and social segregation will be highlighted. Further, emphasis will be placed on understanding the experiences of those most-affected by historical and continuing segregation.

**Requisites:** Sophomore standing

**Course Designation:** Ethnic St - Counts toward Ethnic Studies requirement

Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

## URB R PL/A A E/ECON/REAL EST 306 – THE REAL ESTATE PROCESS

3 credits.

Introductory overview focused on the key aspects of the real estate process: developing real estate, permitting real estate, buying and selling real estate, understanding the economics of real estate, financing real estate, valuing real estate, leasing real estate, and managing real estate.

**Requisites:** (ECON 101, 111, A A E 101, or 215 prior to Fall 2024) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth - Social Science

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Develop a working knowledge of the real estate process, including the roles of the various key real estate professionals and the unique challenges associated with the real estate asset class.

Audience: Undergraduate

2. Explain the characteristics, advantages, and disadvantages of the primary commercial real estate property types.

Audience: Undergraduate

3. Discuss the role of debt and equity in a real estate transaction as well as the fundamental terms, conditions, and requirements of commercial real estate financing.

Audience: Undergraduate

4. Navigate the basic regulatory framework governing the real estate process, including land use planning, zoning and the required project approvals.

Audience: Undergraduate

5. Describe the role of leasing in the commercial real estate transaction, including the critical terms and conditions of commercial leases.

Audience: Undergraduate

**URB R PL/JOURN/POLI SCI 373 – INTRODUCTION TO SURVEY RESEARCH**

3-4 credits.

Theory and practice of survey research; questionnaire design, sampling, data visualization, statistical analysis.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Formulate and construct logical arguments about political phenomena and evaluate those arguments using survey research

Audience: Undergraduate

2. Explain the theoretical components of survey research

Audience: Undergraduate

3. Interpret survey results in general with a particular focus on political polling

Audience: Undergraduate

4. Design and assess political surveys, including questionnaire design, question wording, survey mode, sample size, nonresponse, survey experiments, standard error, and margin of error

Audience: Undergraduate

5. Demonstrate statistical analysis skills in the context of political surveys including: hypothesis testing, confidence intervals, difference of means tests, data visualization and linear regression

Audience: Undergraduate

6. Recognize ethical issues in survey research

Audience: Undergraduate

7. Assess the state of a body of scholarly literature related to course themes, identify gaps in that literature, and formulate an original research question in the context of those gaps.

Audience: Graduate

**URB R PL 375 – SPECIAL TOPICS**

1-3 credits.

Exploration of special issues or problems in urban planning.

**Requisites:** Sophomore standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Demonstrate critical thinking and the ability to explore ideas and synthesize information, both independently and in collaboration with interdisciplinary team members.

Audience: Undergraduate

2. Understand, apply and evaluate the principles, theories and research findings underlying urban planning.

Audience: Undergraduate

3. Integrate social, cultural, ecological and technological dimensions in solving design and urban planning problems.

Audience: Undergraduate

### URB R PL 411 – MARKETPLACES AND ENTREPRENEURSHIP

3 credits.

The history, practices, processes, and prospects of marketplaces generally and farmers markets in particular. Includes the history, practices, and processes, of entrepreneurship and the tight fit between markets and entrepreneurship. Explores marketplaces and entrepreneurship in through the lens of economic development, food justice, and political regionalism.

**Requisites:** Sophomore standing

**Course Designation:** Gen Ed – Communication Part B

Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2021

**Learning Outcomes:** 1. Apply concepts of social scientific analysis

Audience: Undergraduate

2. Understand the history of marketplaces, and more recently, of farmers markets, how they developed

Audience: Undergraduate

3. Evaluate their relationship to trends in economic development, food justice, and political regionalism

Audience: Undergraduate

4. Distinguish and judge the various legal and social practices and processes that unfold in establishing markets and market entrepreneurs/farmers, as well as distinguishing descriptive from normative concerns

Audience: Undergraduate

5. Describe how markets relate to bioregionalism, places, and place making

Audience: Undergraduate

6. Understand and apply basic knowledge of entrepreneurship, social entrepreneurship, and community economic development, as well as how these embody normative concerns and bioregional/placemaking interests

Audience: Undergraduate

7. Apply knowledge from the course in executing research on markets and vendors in order to contribute to an existing market in Wisconsin or elsewhere

Audience: Undergraduate

### URB R PL/ECON/REAL EST 420 – URBAN AND REGIONAL ECONOMICS

3 credits.

Focuses on the study of the allocation of scarce resources across space. Uses economic methods to analyze urban real estate. Topics covered include the determinants of real estate values, the location decisions of households and firms, land use, urban growth and agglomeration, real estate pricing, cycles, development, housing market and policies, and sustainable development.

**Requisites:** (ECON 101 or 111) or declared in undergraduate Business Exchange program

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Explain the economic forces that drive urban growth and regional development.

Audience: Undergraduate

2. Analyze how business and residential location decisions are made and how these decisions impact housing prices, land use, labor market, and many other aspects of cities.

Audience: Undergraduate

3. Apply the spatial equilibrium concepts to urban development and real estate analysis.

Audience: Undergraduate

4. Develop statistical models to assess residential and commercial real estate and perform sensible business and policy analysis.

Audience: Undergraduate

5. Apply the economic decision-making framework to real estate development decisions.

Audience: Undergraduate

6. Demonstrate understanding of cycles, risks and bubbles in residential and commercial real estate markets.

Audience: Undergraduate

7. Evaluate the challenges in economic, social and environmental sustainability in urban development around the world.

Audience: Undergraduate

8. Apply urban and regional economics to real estate business decisions and policy analysis.

Audience: Undergraduate

**URB R PL/ECON/ENVIR ST/POLI SCI 449 – GOVERNMENT AND NATURAL RESOURCES**

3-4 credits.

Problems of public policy and administration for development and use of natural resources.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**URB R PL/LAND ARC 463 – EVOLUTION OF AMERICAN PLANNING**

3 credits.

The nature and cultural significance of contemporary methods for the systematic formulation of public policies for community, metropolitan, and state development through comprehensive planning. Historic roots, recent trends and new directions in American planning concepts, institutions and professional specializations.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**URB R PL/GEOG 503 – RESEARCHING THE CITY: QUALITATIVE STRATEGIES**

3 credits.

Explores, and applies, qualitative methods in the field of urban geography. An introduction to debates around the analysis and interpretation of qualitative data is provided, grounded in concrete urban research. Participation in a three-day field course is required.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**URB R PL/GEOG 505 – URBAN SPATIAL PATTERNS AND THEORIES**

3 credits.

Various urban empirical regularities and theories which explain them.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**URB R PL 512 – GENTRIFICATION AND URBAN RESTRUCTURING**

3 credits.

An intensive analysis of the process of gentrification through its historical and spatial development within moments of post-fordist urban restructuring in the United States. Highlights urban theory and methodological questions important to the study of gentrification that are relevant to the fields of urban planning, geography and sociology. Case study investigation of particular locations will provide examples to test the applicability of the various analytical frameworks presented in the class.

**Requisites:** Junior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand the development of gentrification from its origin as an urban anomaly in the eastern seaboard and rustbelt region during a period of “crisis-generated restructuring” to a “global urban strategy” of urban development.

Audience: Both Grad & Undergrad

2. Analyze the complicated urban processes behind gentrification and the forces and actors that work to create them.

Audience: Both Grad & Undergrad

3. Evaluate important concepts in urban planning theory through questions regarding development and the negative consequences associated with the process of gentrification.

Audience: Both Grad & Undergrad

4. Understand the role of urban planning in the gentrification process and the forms of resistance/mediation communities have used to challenge gentrification.

Audience: Both Grad & Undergrad

5. Apply and strengthen research skills through written, oral, and graphic communication with written reflections, formal essays, and in-class engagement around the material as well as a final project that asks students to operationalize the concept of gentrification.

Audience: Both Grad & Undergrad

6. Apply urban theory to an original research project on gentrification for the final project.

Audience: Graduate

7. Analyze the primary theoretical approaches to gentrification and urban restructuring through particular and additional focus on relevant theory-based scholarly articles.

Audience: Graduate

**URB R PL/A A E/REAL EST 520 – COMMUNITY ECONOMIC ANALYSIS**

3 credits.

Economic theory (location and growth) applicable to community economic development; the role of private and public sector in local economic development, and techniques for economic analysis of community.

**Requisites:** ECON 301 or 311 or graduate/professional standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Synthesize an overview of economic theory as applied to small open economies.

Audience: Both Grad & Undergrad

2. Identify the strengths and weaknesses of the community's economy.

Audience: Both Grad & Undergrad

3. Implement alternative processes for affecting change at the community level.

Audience: Both Grad & Undergrad

4. Demonstrate literacy of economic factors affecting change at the local level.

Audience: Both Grad & Undergrad

5. Describe the community within a sustainable systems thinking approach.

Audience: Both Grad & Undergrad

6. Identify appropriate roles for community economic development practitioners in a variety of community settings.

Audience: Graduate

**URB R PL/ENVIR ST/GEOG/LAND ARC 532 – APPLICATIONS OF GEOGRAPHIC INFORMATION SYSTEMS IN PLANNING**

3 credits.

Explores planning-related Geographic Information System (GIS) data, applications, analytical tools, and implementation issues.

**Requisites:** GEOG/CIV ENGR/ENVIR ST 377 or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

**Learning Outcomes:** 1. Identify how planning agencies use GIS.

Audience: Both Grad & Undergrad

2. Explain the nature, characteristics, and possible ways of analyzing spatial data in a planning context.

Audience: Both Grad & Undergrad

3. Communicate geospatial data and analyses effectively.

Audience: Both Grad & Undergrad

4. Obtain and analyze geospatial data using a range of spatial analysis tools for a number of planning practices.

Audience: Both Grad & Undergrad

5. Conduct site-selection and land-suitability analysis.

Audience: Both Grad & Undergrad

6. Identify ethical issues surrounding access to and use of geospatial data.

Audience: Both Grad & Undergrad

7. Analyze and provide written feedback on undergraduate student presentations.

Audience: Graduate

8. Produce a memo on land-suitability analysis.

Audience: Graduate

### URB R PL 550 – TRANSPORTATION AND THE BUILT ENVIRONMENT

3 credits.

Investigation of multi-modal transportation, travel behavior, and urban form. Attention to site, neighborhood, regional, and global scales. Consideration of public health, environmental, economic, and social equity outcomes.

**Requisites:** Senior standing

**Course Designation:** Breadth – Social Science

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Understand major debates, issues, and theories in transportation, land use, urban design, and travel behavior at the site, neighborhood, regional, and global scales.

Audience: Both Grad & Undergrad

2. Develop and apply strategies for collecting and analyzing data representing built environment and transportation issues such as travel behavior.

Audience: Both Grad & Undergrad

3. Appreciate the roles of officials, stakeholders, and community members in making decisions about transportation and built environments.

Audience: Both Grad & Undergrad

4. Appreciate economic, social, cultural, technological, and environmental factors in urban and regional growth and change.

Audience: Both Grad & Undergrad

5. Develop one's professional identity by envisioning a future self (and possibly make plans that build on the course experience), evaluating one's own learning, and assessing one's own strengths and weaknesses.

Audience: Graduate

### URB R PL 551 – CLIMATE ACTION PLANNING: SUSTAINABLE TRANSPORTATION

3 credits.

Learn fundamental concepts of climate action planning and sustainable transportation through hands-on collaborations with the University of Wisconsin-Madison Office of Sustainability, Transportation Services, and other partners. Work with real world data to analyze policies, programs, and plans to reduce greenhouse gas emissions from travel, as well as the potential health and well-being co-benefits of sustainable transportation interventions. Analyze further reduction of the campus and community carbon footprints through practice-oriented green fleet management, behavior-based tools to support participation in active travel, modifications to the built environment, and other interventions.

**Requisites:** Senior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**Learning Outcomes:** 1. Locate specific climate governance relationships and actors as they relate to sustainable transportation (i.e., climate action in higher ed nested within intergovernmental context)

Audience: Both Grad & Undergrad

2. Employ the mechanics of climate action plans and processes in the context of sustainable transportation

Audience: Both Grad & Undergrad

3. Explain policy and planning issues in sustainable transportation broadly and with a focus on fuels, vehicles, and vmt-reduction

Audience: Both Grad & Undergrad

4. Relate travel behavior and its application to climate change mitigation;

Audience: Both Grad & Undergrad

5. Create a GHG emissions analysis/assessment using relevant methods and applied to sustainable campus transportation in its community context

Audience: Both Grad & Undergrad

6. Explain the social, economic, and/or environmental dimensions of the sustainability challenge(s) of urban transportation systems.

Audience: Both Grad & Undergrad

7. Apply sustainability principles and/or frameworks to addressing the challenge of climate change mitigation in the transportation sector.

Audience: Both Grad & Undergrad

8. Expand one's professional self-awareness through group leadership, facilitation, and cooperation

Audience: Graduate

**URB R PL/A A E/CIV ENGR/ENVIR ST 561 – ENERGY MARKETS**

3 credits.

Energy resources are an essential element of the world's business, political, technical and environmental landscape. Analytic tools provided by the discipline of economics expands our understanding of this critical issue. Energy supply markets reviewed include both fossil fuels and renewable resources. Energy demand sectors include residential, commercial, industrial and transportation. Electricity represents an intermediate energy market. The interactions among these markets participants indicate how scarce resources are allocated among competing needs in the world economy.

**Requisites:** A A E 101 (215 prior to Fall 2024), ECON 101, 111, or graduate/professional standing

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**URB R PL 590 – CONTEMPORARY TOPICS IN URBAN AND REGIONAL PLANNING**

1-3 credits.

Examination of special issues or problems in urban and regional planning and development, such as mineral development in Wisconsin or fringe development in Madison. Topic and faculty vary.

**Requisites:** Senior standing

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**URB R PL 595 – LANDSCAPE AND URBAN STUDIES CAPSTONE**

3 credits.

Consider, synthesize, and culminate educational experiences. Engage with Landscape and Urban Studies (LUS) learning community and community of practice through thoughtful inquiry and reflection, respectful and collegial discussion, and communication of perspectives, findings, and recommendations through written work and class presentations. Develop critical thinking, creativity, and innovation for effective solutions to real-world challenges.

**Requisites:** Declared in Landscape and Urban Studies undergraduate program and senior standing

**Course Designation:** Gen Ed - Communication Part B

Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Synthesize knowledge from various disciplines to address complex design and planning challenges and opportunities.

Audience: Undergraduate

2. Identify relevant, reliable, and high-quality research sources appropriate to the subject and discipline.

Audience: Undergraduate

3. Make productive use of the writing process, including brainstorming, outlining, drafting, incorporating feedback, and revising, to develop a fledgling idea into a formal paper, presentation, and/or project.

Audience: Undergraduate

4. Share community-engaged research, course content, or creative activity in writing and at least one other mode of communication relevant to the discipline. Other modes of communication might include presentations using one or more media, debate, discussion, poster presentations, and other forms of expression that convey course content.

Audience: Undergraduate

5. Use knowledge to build empathy and appreciation for the complexities of one's own and other people's perspectives.

Audience: Undergraduate

6. View issues from multiple perspectives and think critically about their own societies and the larger global community.

Audience: Undergraduate

**URB R PL 597 – UNIVERCITY YEAR GUIDED EXPERIENCE**

1 credit.

Orientation to the UniverCity Year program and underlying theory and applied knowledge around community engagement, the function of local governments, and working with local officials and professional staff. Gain core competencies for applied, community-based learning projects and the importance of place-based learning. Includes multidisciplinary approaches to problem-solving, access and use of information resources, reflection and action on ethical and professional issues, consideration of social and systemic roots of issues faced by local municipalities, and preparing written reports.

**Requisites:** Junior standing**Course Designation:** Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2019

**Learning Outcomes:** 1. Understand concepts of community-based learning and their application to community-based projects.

Audience: Undergraduate

2. Understand local government structure and opportunities for engagement in light of existing strategic plans, priorities, and initiatives.

Audience: Undergraduate

3. Observe and understand professional relationships with project clients and other community partners

Audience: Undergraduate

4. Understand the UniverCity Year program and how individual projects fit within a larger context of UW-Madison's civic engagement and community-based learning efforts.

Audience: Undergraduate

5. Understand the role of students as ambassadors of UW-Madison

Audience: Undergraduate

**URB R PL 601 – SITE PLANNING**

3 credits.

Survey of site planning theory and methods; standards for municipal review of site plans and related design proposals. Topics include architecture, vehicle circulation and parking, pedestrian circulation, stormwater management, landscaping, outdoor lighting, and signage.

**Requisites:** Senior standing**Course Designation:** Breadth - Either Humanities or Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2024**URB R PL 611 – URBAN DESIGN: THEORY AND PRACTICE**

3 credits.

Focusing on three basic components of the built environment (buildings, transportation systems, and open spaces), addresses the forces that shape land use and transportation patterns, the effects of urban form on public health, safety, and welfare, and ways that communities can make their built environments more livable and environmentally sustainable.

**Requisites:** Senior standing**Course Designation:** Level - Intermediate

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2025**URB R PL/C&E SOC/SOC 617 – COMMUNITY DEVELOPMENT**

3 credits.

Social, cultural and personality factors influencing community development, with reference to developing countries as well as contemporary rural communities; consideration of theoretical and operational issues.

**Requisites:** SOC/C&E SOC 140, 210, 211, SOC 181, or graduate/professional standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**URB R PL/C&E SOC/SOC 645 – MODERN AMERICAN COMMUNITIES**

3 credits.

Relevance of the concept of community to American society. Review of several basic theories of community and analysis of the nature of community in the broader political and economic context.

**Requisites:** SOC/C&E SOC 140, 210, 211, SOC 181, or graduate/professional standing**Course Designation:** Breadth - Social Science

Level - Advanced

L&amp;S Credit - Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2021

**URB R PL/A A E/ECON/ENVIR ST 671 – ENERGY ECONOMICS**

3 credits.

The method, application, and limitations of traditional economic approaches to the study of energy problems. Topics include microeconomic foundations of energy demand and supply; optimal pricing and allocation of energy resources; energy market structure, conduct, and performance; macro linkages of energy and the economy; and the economics of regulatory and other public policy approaches to the social control of energy.

**Requisites:** Graduate/professional standing or (senior standing and ECON 101, 111, A A E 101, or 215 prior to Fall 2024)

**Course Designation:** Breadth - Social Science

Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2020

**Learning Outcomes:** 1. Understand fundamentals of energy sources and technologies.

Audience: Both Grad & Undergrad

2. Be familiar with microeconomic theory with applications to energy industries and markets.

Audience: Both Grad & Undergrad

3. Build analytical skills in economic analysis and be able to apply the economic thinking to historical and contemporary energy-related issues.

Audience: Graduate

4. Analyze the causes of and solutions for the sustainability challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

5. Apply sustainability principles and/or frameworks to addressing the challenge of affordable and clean energy.

Audience: Both Grad & Undergrad

**URB R PL 699 – DIRECTED STUDY**

1-6 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**URB R PL 711 – PLANNING FOR FOOD SYSTEMS AND MARKETPLACES**

3 credits.

Planning for and improving the quality of US metropolitan markets and food systems. Topics include public markets, community food security, urban agriculture, and the public health impact of food systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2022

**URB R PL/CIV ENGR/ENVIR ST 717 – WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR I**

1 credit.

The first of two seminars for planning the activities of the practicum.

**Requisites:** Declared in Water Resources Management MS or Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**URB R PL/CIV ENGR/ENVIR ST 718 – WATER RESOURCES MANAGEMENT PRACTICUM PLANNING SEMINAR II**

2 credits.

The second of two seminars for planning the field work, analysis, and reporting of the practicum.

**Requisites:** Declared in Water Resources Management MS or Doctoral Minor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**URB R PL/CIV ENGR/ENVIR ST 719 – WATER RESOURCES MANAGEMENT SUMMER PRACTICUM**

4 credits.

Interdisciplinary team of students and staff working with agency personnel, citizen groups, and/or private sector representatives on the analysis of a contemporary, problem-oriented water resource issue. Physical, biological, economic and social aspects of the issue analyzed. Comprehensive written report results, practicum's findings and management recommendations.

**Requisites:** URB R PL/CIV ENGR/ENVIR ST 718

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**URB R PL/REAL EST 720 – URBAN ECONOMICS**

3 credits.

Analysis of spatial relationships in the urban economy, including urban land, labor and housing markets; urban transport; city governance and finance; and regional models. Historical and applied focus. Interdisciplinary approach emphasizing economics, geography, and planning.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Analyze how urban environmental issues impact real estate markets and development

Audience: Graduate

2. Apply an evidenced-based framework to analyze the different types and roles of cities

Audience: Graduate

3. Demonstrate effective oral and written communication skills in individual and group projects as a means to present course concepts and market analyses

Audience: Graduate

4. Understand the role of urban public policy, particularly land use controls, and evaluate its impact on real estate markets

Audience: Graduate

5. Explain the fundamental determinants of location across and within cities, as well as rents and prices of land and real estate

Audience: Graduate

6. Explain how real estate markets affect, and are affected by, national and regional economic events and processes.

Audience: Graduate

**URB R PL/SOC WORK 721 – METHODS OF PLANNING ANALYSIS**

3 credits.

Research methods and statistics used in analyzing planning problems: conceptualization, design, and implementation of planning research; statistical methods for analyzing data including review of inferential statistics, analysis of variance, correlation, and multiple regression; use of computer; review of sources of planning data.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**URB R PL 731 – INTRODUCTION TO REGIONAL PLANNING**

3 credits.

Broad coverage of regional planning--basic concepts, history, influences of the political, economic, and social environment, techniques of analysis and substantive tasks and problems in preparing regional plans.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2019

**URB R PL/ECON/PUB AFFR 734 – REGIONAL ECONOMIC PROBLEM ANALYSIS**

3 credits.

Examination of major theories of regional economic development, with special emphasis upon the evolution and amelioration of regional economic problems. Selected techniques of regional analysis, including economic base multipliers, input/output models, and shift-share analysis are used in the context of setting regional development goals.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

**URB R PL 741 – INTRODUCTION TO PLANNING**

3 credits.

Evolution of contemporary urban and regional planning thought. Major conceptual dilemmas in theory and practice. Emerging trends in planning, e.g., forecasting and futurism.

**Requisites:** Declared in Urban and Regional Planning MS or PhD

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

### URB R PL 742 – PLANNING ORIENTATION SEMINAR

1 credit.

Introduction to the field of planning and orientation to graduate study in urban and regional planning at UW-Madison. Explore planning as a tool for problem solving, planning and social change, the multiple roles in which planners find themselves, useful skills and perspectives, and areas of planning practice. Addresses core values, sustainability, equity and social justice, professional skills, and the role of plans in relation to policies and programs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Explain the purpose and meaning of planning: why planning is undertaken by communities and what impact it is expected to have.

Audience: Graduate

2. Interpret relationships between past, present, and future in planning.

Audience: Graduate

3. Recognize and articulate the core values of planning (e.g., equity and social justice, public interest, sustainability, healthy and prosperous communities, diversity, democratic engagement, transparency) and their application in planning practice.

Audience: Graduate

4. Understand and analyze interconnected roles of officials, stakeholders, and community members in participation and governance for planned change.

Audience: Graduate

5. Develop capacity and a conceptual foundation for evaluating and critiquing planning process and applications.

Audience: Graduate

6. Apply sustainability frameworks to analyze challenges and opportunities in urban and regional planning.

Audience: Graduate

### URB R PL 751 – INTRODUCTION TO FINANCIAL PLANNING

3 credits.

State and local financial planning with emphasis on the functional importance of expenditure; special problems in financing city and metropolitan governments; intergovernmental fiscal relations and the use of various budgetary techniques as integral parts of the planning process.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### URB R PL 761 – CENTRAL CITY PLANNING: ISSUES AND APPROACHES

3 credits.

Social, economic, environmental, and fiscal trends affecting larger, older American cities, critical policy issues confronting central city decision-makers, and major programmatic responses to these issues; the role of planning in response to these trends and issues.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2020

### URB R PL 781 – PLANNING THOUGHT AND PRACTICE

3 credits.

Intensive analysis of selected planning cases highlighting important issues that planners deal with in practice. Examine case studies in the context of broader framework of planning history, decision making process models and planner role models. Explore subnational planning and regional development issues in developing countries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**URB R PL 791 – VISUAL COMMUNICATION FOR PLANNERS**

3 credits.

Visual communication in planning addresses the communication of plans – specifically in the form of site plans, master plans, comprehensive plans, illustrative design codes, cartography, analyses maps, among other. Provides a planning and design graphics foundation to help realize the procedures in communication and information management within today's interdisciplinary planning process. Develop skills in graphic communication from techniques currently used in the planning, architecture, engineering, landscape architecture and urban design fields and review several digital graphic representation programs as a means of developing a planning graphics toolkit.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Create visual communication strategies that lead to more focused planning conversations with stakeholders

Audience: Graduate

2. Organize digital planning tools within multi-team member workflows to efficiently produce exhibits, presentations, and report documents

Audience: Graduate

3. Transform 2D planning data into 3D models to better convey written policies and their impacts on the physical environment

Audience: Graduate

4. Integrate emerging technology, such as virtual reality, into public engagement, analysis and planning studies

Audience: Graduate

**URB R PL/ENVIR ST/PUB AFFR 809 – INTRODUCTION TO ENERGY ANALYSIS AND POLICY**

3 credits.

Strategy and policy problems in energy policy, both national and international.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Fall 2024**URB R PL/ENVIR ST/PUB AFFR 810 – ENERGY ANALYSIS AND POLICY CAPSTONE**

3 credits.

Interdisciplinary application of energy knowledge to an analysis project for a real-world client. Integrate and apply technical, economic, political, and social factors in energy decision-making.

**Requisites:** Declared in Energy Analysis and Policy Graduate/Professional Certificate or Doctoral Minor**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**Learning Outcomes:** 1. Conduct an original analysis by collecting and interpreting data on an energy-related issue for areal-world client.

Audience: Graduate

2. Integrate and apply multiple disciplinary perspectives such as technical, economic, socio-political, and environmental factors in the context of complex energy problems.

Audience: Graduate

3. Prepare for energy-related careers by: planning and managing a project over multiple months; interacting professionally with client; working effectively in multidisciplinary teams; and producing professional-quality deliverables such as presentations and reports in accordance with scope of work.

Audience: Graduate

4. Analyze the causes and solutions for the sustainability challenge of affordable and clean energy.

Audience: Graduate

5. Analyze sustainability issues and/or practices using a systems-based approach.

Audience: Graduate

**URB R PL/LAW 830 – LAND USE CONTROLS**

3 credits.

Limitations imposed upon the use of privately owned land by the court-made law of nuisance, by private covenant, and by public action; master plan, official map, subdivision regulation, zoning, and urban redevelopment.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025

**URB R PL 833 – PLANNING AND THE LEGAL SYSTEM**

3 credits.

An examination of how the legal system influences community planning. Overview of the institutional framework for planning and the legal authority for tools used to create healthy and sustainable communities.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**URB R PL 841 – URBAN FUNCTIONS, SPATIAL ORGANIZATION AND ENVIRONMENTAL FORM**

2-3 credits.

Influence of social, economic, and political systems, technological innovations, and architectural concepts on the spatial organization and environmental form of cities and urban areas; the adaptability of urban physical structure to developmental change; planned, conceptual organization and form versus unplanned and ecological organization and form.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**URB R PL/ENVIR ST 843 – LAND USE POLICY AND PLANNING**

3 credits.

Critical evaluation and analysis of land use policies and programs in relation to comprehensive planning and growth management issues in the U.S. The role of legislative and judicial processes and emerging public land use social values and philosophies in the development, regulation, and effectuation of innovative land use policies. Alternative land policy and growth guidance systems of select European countries.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**URB R PL 844 – HOUSING AND PUBLIC POLICY**

3 credits.

Issues and methodological problems encountered in the production, financial, and consumption sectors of housing program design; comparisons with European and Third World country housing and public policy programs.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**URB R PL/ECON 845 – ADVANCED TOPICS IN PUBLIC FINANCE**

1-4 credits.

Advanced public finance problems and literature, research; subject changes each semester; may be repeated. Modules.

**Requisites:** ECON 713 and 714

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2020

**URB R PL/ENVIR ST 865 – WATER RESOURCES INSTITUTIONS AND POLICIES**

3 credits.

Governmental processes and policies for water resources management: major substantive problems and issues; political processes of decision making; problems of governmental organization and intergovernmental arrangements.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**URB R PL/POLI SCI/PUB AFFR 874 – POLICY-MAKING PROCESS**

3 credits.

Examines the political, social, and economic contexts that shape and are shaped by policy making processes. Though the focus is on the US, international comparisons will be made, and students are encouraged to think about the American context through comparative and international perspectives. Familiarizes students with dominant theories and models of policymaking process and policy change, starting with the model of the policy cycle. Focuses in on key topics and issues in policy making, specifically, agenda setting, implementation, and the relationships between policymaking and democracy. Reflects on contemporary and emerging issues and dilemmas of the politics of policy making.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024**Learning Outcomes:** 1. Identify important contextual aspects of policy making processes, of dominant theories, models and conceptual frameworks of policy processes, and of key issues and topics in policy making.

Audience: Graduate

2. Critically analyze theories and evidence presented in readings and describe debates, past and present, surrounding public policy making processes.

Audience: Graduate

3. Read and comprehend academic research, data, and writing as well as journalistic writings on relevant issues of public policy processes and politics.

Audience: Graduate

4. Communicate summaries and analyses of topics, issues and key readings in class discussions, presentations, and writing assignments. Use clear written language and draw on theories, concepts, and evidence to support their arguments and ideas.

Audience: Graduate

5. Maintain fidelity to objective social science-based research methods.

Audience: Graduate

6. Prepare a high-quality presentation and communicate effectively as a speaker.

Audience: Graduate

**URB R PL/POLI SCI/PUB AFFR 878 – PUBLIC MANAGEMENT**

3 credits.

Role of administration in American government; problems of organization, bureaucracy and control; public policy as the output of the administrative process.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Spring 2025**URB R PL 912 – PLANNING WORKSHOP**

4 credits.

Selected problems in planning to emphasize the interdisciplinary character of planning practice and to give opportunity to apply socioeconomic analysis, physical planning, and implementation techniques.

**Requisites:** URB R PL 791**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Understand and generally appreciate the purpose and meaning of planning, including ideas about planning and the role of planners, and the institutional contexts within which planning occurs  
Audience: Graduate

2. Develop skills in communication, plan creation, planning process methods, and leadership, including methods for stakeholder involvement, project management, facilitation, and public participation techniques  
Audience: Graduate

3. Understand and apply ethical principles to planning in a democratic society and understand key issues of ethical planning practice, including issues of governance and participation  
Audience: Graduate

**URB R PL/ENVIR ST 917 – PUBLIC PARTICIPATION FOR PLANNING AND POLICY MAKING**

3 credits.

Examines public participation for planning and policymaking in both urban and natural environments; considers different types of participation from agency consultation to negotiation; designing, conducting, and evaluating citizen participation are major features.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** No**Last Taught:** Fall 2023**URB R PL/SOC 924 – SEMINAR-POLITICAL SOCIOLOGY**

3 credits.

Selected topics in political sociology, e.g., social movements, citizenship, civic engagement, weakening of postwar "social democratic consensus" under financialized globalization pressures.

**Requisites:** Graduate/professional standing**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025

### URB R PL 932 – SEMINAR-RESEARCH REVIEW AND CRITICISM

1-3 credits.

Group consideration of thesis or equivalent projects during their preparation; individual reports on successive stages of work.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### URB R PL 945 – SEMINAR IN LAND USE AND COMMUNITY DEVELOPMENT ISSUES

3 credits.

The social, economic, and political setting of urban blight and the current measures, including urban renewal and model cities programs, to cope with the condition. Attention to social change, concept of neighborhood, and cross-cultural perspectives to renewal and community development.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### URB R PL/DS/F&W ECOL 955 – PRACTICAL RESEARCH DESIGN AND METHODS OF EMPIRICAL INQUIRY

3 credits.

Provides a practical introduction to basic concepts of research question formulation, research designs and alternative methods of inquiry, implications for internal validity of the research and generalizability of the findings, operational definitions and measurement validity, reliability, utility and precision.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2022

### URB R PL 990 – RESEARCH AND THESIS

1-5 credits.

Individual mentored research and study for completing theses, as arranged with a faculty member

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

### URB R PL 999 – INDEPENDENT WORK

1-3 credits.

Independent study as arranged with a faculty member.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

## UROLOGY (UROLOGY)

### UROLOGY 910 – INDEPENDENT READING AND RESEARCH IN UROLOGY

2-8 credits.

Independent research under the direct supervision of Urology faculty. Projects are individualized to meet student research goals within the context of faculty research needs.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Formulate a hypothesis or specific objective if study does not involve hypothesis-generating research

Audience: Graduate

2. Conduct a thorough literature review of the specific research question.

Audience: Graduate

3. Select and apply statistical knowledge methodologies appropriate for the proposed analyses.

Audience: Graduate

4. Interpret results correctly and in context of previous findings from literature review.

Audience: Graduate

5. Present findings.

Audience: Graduate

**UROLOGY 938 – INPATIENT ACTING INTERNSHIP-UROLOGY**

4 credits.

An in-depth exposure to inpatient and operative management of complicated urologic patients, under the direct supervision of a senior resident, fellows, and faculty. Function at the intern level and have an active role in inpatient management of urologic patients.

**Requisites:** MED SC-M 810, 811, 812, and 813

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Develop evidence-based understanding of the pathophysiology and appropriate management options for common urologic disorders.

Audience: Graduate

2. Discuss the surgical anatomy, common procedural indications, comorbidities, and prophylactic strategies to reduce post-operative complications.

Audience: Graduate

3. Summarize basic knowledge regarding common post-operative complications and the appropriate management of each.

Audience: Graduate

4. Describe indications and list the appropriate preoperative evaluations, including lab tests, radiographic imaging, and ECG.

Audience: Graduate

5. Identify and describe the use of common instruments used in surgery.

Audience: Graduate

6. Discuss common intraoperative complications associated with procedures and the appropriate management of each.

Audience: Graduate

7. Gather a history and perform a physical examination for a surgical patient.

Audience: Graduate

8. Prioritize a differential diagnosis following a clinical encounter.

Audience: Graduate

9. Recommend and interpret common diagnostic and screening tests.

Audience: Graduate

10. Enter and discuss patient orders.

Audience: Graduate

11. Document a clinical encounter in the patient record.

Audience: Graduate

12. Provide an oral presentation of a clinical encounter.

Audience: Graduate

13. Form clinical questions and retrieve evidence to advance patient care.

Audience: Graduate

14. Give or receive a patient handover to transition care responsibility.

Audience: Graduate

15. Collaborate as a member of an interprofessional team.

Audience: Graduate

16. Recognize a patient requiring urgent or emergent care and initiate evaluation and management.

**ZOOLOGY (ZOOLOGY)****ZOOLOGY/BIOLOGY 101 – ANIMAL BIOLOGY**

3 credits.

General biological principles. Topics include: evolution, ecology, animal behavior, cell structure and function, genetics and molecular genetics and the physiology of a variety of organ systems emphasizing function in humans.

**Requisites:** Not open to students with credit for BOTANY/BIOLOGY/ZOOLOGY 151 or 152

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY/BIOLOGY 102 – ANIMAL BIOLOGY LABORATORY**

2 credits.

General concepts of animal biology at an introductory level emphasizing the evolutionary relationships between animals. Learn about general body plans and strategies used to accomplish the basic tasks of staying alive in major animal groups using preserved and live animals. Study the diversity within each group of animals by integrating the body plans with the lifestyle and ecology of animals. Dissections of earthworm, freshwater mussel, squid, sea star, and rat aid the study of these general principles.

**Requisites:** Not open to students with credit for BOTANY/BIOLOGY/ZOOLOGY 151 or 152

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level - Elementary

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY 115 – FRESHWATER: PAST, PRESENT, AND FUTURE**

3 credits.

Freshwater is one of our most valuable resources, and the basis for life itself. Explores contemporary threats and issues relating to freshwater ecosystems (lakes, rivers, wetlands) ranging from local to global. Covers a broad range of topics in freshwater sciences (invasive species, harmful algal blooms, overfishing, pathogens in drinking water) to provide a representative cross-section of the field. Material will tie directly to local and global societal issues. Integrates insights from biology with other disciplines (chemistry, geosciences, social sciences) to offer a deeper understanding of the threats to freshwater ecosystems, and how this affects human well-being.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Learning Outcomes:** 1. Describe the status and threats to freshwater organisms and ecosystems – both in Wisconsin and globally

Audience: Undergraduate

2. Apply knowledge of water and the hydrologic cycle to understanding the ecology of freshwater organisms (harmful algal blooms) and ecosystems (specifically rivers, lakes, and wetlands)

Audience: Undergraduate

3. Demonstrate an understanding of contemporary environmental issues relating to freshwater ecosystems (harmful algal blooms, invasive species, overfishing, pathogens in drinking water)

Audience: Undergraduate

4. Recognize the role and importance of freshwater ecosystems in their own lives – how our society and well-being depend on healthy freshwater ecosystems and resources

Audience: Undergraduate

**ZOOLOGY/BIOLOGY/BOTANY 151 – INTRODUCTORY BIOLOGY**

5 credits.

Topics include: cell structure and function, cellular metabolism (enzymes, respiration, photosynthesis), information flow (DNA, RNA, protein), principles of genetics and selected topics in Animal Physiology.

**Requisites:** Not open to students with credit for BIOLOGY/ ZOOLOGY 101, 102 or BIOLOGY/BOTANY 130**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ZOOLOGY/BIOLOGY/BOTANY 152 – INTRODUCTORY BIOLOGY**

5 credits.

Topics include: selected topics in plant physiology, a survey of the five major kingdoms of organisms, speciation and evolutionary theory, and ecology at multiple levels of the biological hierarchy.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151**Course Designation:** Gen Ed – Communication Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ZOOLOGY 153 – INTRODUCTORY BIOLOGY**

3 credits.

Topics include: cell structure and function, cellular metabolism (enzymes, respiration, photosynthesis), information flow (DNA, RNA, protein), principles of genetics, and selected topics in Animal Physiology. Designed for engineering majors that do not need a lab component.

**Requisites:** Not open to students with credit for BIOLOGY/ ZOOLOGY 101, 102 or BIOLOGY/BOTANY 130**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025

## ZOOLOGY/PL PATH 154 – TINY EARTH: ANTIBIOTIC DISCOVERY RESEARCH

2 credits.

Learn basic methodology in scientific research and discovery, including laboratory techniques, quantitative reasoning, scientific communication, and collaboration. Gain hands-on laboratory experience working with microbes to test original hypotheses concerning the discovery of potential antibiotic compounds while addressing the world's antibiotic resistance crisis by contributing data to the global "Tiny Earth" network of researchers to advance potential drug development. Tiny Earth seeks to encourage students to pursue careers in science through real-world, applied research experiences and aims to address a worldwide health threat of the diminishing supply of effective antibiotics by "student-sourcing antibiotic discovery." Concurrent enrollment in BIOLOGY/BOTANY/ZOOLOGY 152 is required for permission to enroll.

**Requisites:** Consent of instructor

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate basic knowledge of microbes and antibiotic resistance by (1) sufficiently explaining the process of natural selection with the accurate use of terminology, (2) describing morphological and physiological variation in bacteria and how this relates to bacterial taxonomy, and (3) summarizing mechanisms of the spread of antibiotic resistance genes across the microbial world.

Audience: Undergraduate

2. Demonstrate scientific competency as shown by their ability to (1) propose an original research question and hypothesis, (2) develop a biological rationale for the hypothesis, (3) select appropriate protocols to test the hypothesis, and (4) perform the research collaboratively with group members in a cordial and respectful way.

Audience: Undergraduate

3. Demonstrate proper techniques in basic micro- and molecular biology by (1) pipetting fluids with volume accuracy, (2) plating microbes via spread, patch, and streak methods, (3) using proper sterile technique, and (4) performing protocols for polymerase chain reaction (PCR), gel electrophoresis, and BLAST analysis for DNA amplification and sequencing.

Audience: Undergraduate

4. Demonstrate quantitative reasoning as shown by their ability to (1) select an appropriate statistical analysis for a given data set and research question, (2) carry out the statistical analysis using a vetted program (e.g. online statistical calculator tool such as Vassarstats.com), and (3) accurately interpret and the translate the results into a meaningful statement.

Audience: Undergraduate

5. Demonstrate scientific communication as shown by their ability to (1) clearly express a hypothesis, general methodology, and results in formal writing, (2) accurately visualize numerical results in the form of graph, (3) satisfactorily deliver aspects of the research project and findings via oral presentation and scientific poster presentation.

Audience: Undergraduate

## ZOOLOGY 199 – DIRECTED STUDY

1-3 credits.

Directed study/independent research. Experience hypothesis development, research through faculty mentorship.

**Requisites:** Consent of instructor

**Course Designation:** Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

## ZOOLOGY 200 – TOPICS IN BIOLOGY

1-3 credits.

Introductory topics in biological sciences.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Develop an understanding of various basic key concepts in biological sciences from molecular biology to ecosystem ecology.

Audience: Undergraduate

2. Make connections among biological concepts.

Audience: Undergraduate

3. Appreciate biological sciences in a natural world

Audience: Undergraduate

4. Make connections between biology and societal issues

Audience: Undergraduate

## ZOOLOGY/BOTANY/ENVIR ST 260 – INTRODUCTORY ECOLOGY

3 credits.

The relationships of organisms and the environment. Population dynamics and community organization, human-environment relationships, action programs.

**Requisites:** None

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY 275 – BIOLOGY OF THE DINOSAURS**

3 credits.

Biology, ecology and evolution of dinosaurs. Use anatomical correlates and phylogeny to understand physiology, adaptation, and evolutionary transitions. Examples include predator-prey interactions, the evolutionary transition to flight, and how late Mesozoic ecology gave rise to our modern world.

**Requisites:** None**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Elementary

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Summer 2025**Learning Outcomes:** 1. Demonstrate comprehension of paleobiological processes, and awareness of major concepts and debates.

Audience: Undergraduate

2. Connect the role of phylogeny in shaping terrestrial ecosystems past and present.

Audience: Undergraduate

3. Identify anatomical correlates of physiological processes.

Audience: Undergraduate

4. Assess how changing environments drive major evolutionary transitions.

Audience: Undergraduate

5. Develop initial competency reading scientific articles.

Audience: Undergraduate

6. Evaluate scientific claims about living and extinct animals.

Audience: Undergraduate

**ZOOLOGY 299 – DIRECTED STUDIES IN ZOOLOGY**

1-3 credits.

Directed study/independent research. Experience hypothesis development, research through faculty mentorship.

**Requisites:** Consent of instructor**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2025**ZOOLOGY 300 – INVERTEBRATE BIOLOGY AND EVOLUTION**

3 credits.

Introduction to invertebrate diversity and biology, with emphasis on anatomy, development, and systematic relationships of the main animal phyla. Phyla are discussed in the context of major themes in animal evolution, such as the origin of tissue layers, the diversity of feeding mechanisms, the evolution of terrestrialization, patterns of diversification through time, and the conservation of transcriptional circuitry. Focus on animal diversity from a phylogenetic and developmental perspective.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), (ZOOLOGY/BIOLOGY/BOTANY 151 and 152) or BIOCORE 381**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**ZOOLOGY 301 – INVERTEBRATE BIOLOGY AND EVOLUTION LAB**

2 credits.

Introduction to invertebrate diversity and biology, with emphasis on anatomy, development, and systematic relationships of the main animal phyla. Phyla are discussed in the context of major themes in animal evolution, such as the origin of tissue layers, the diversity of feeding mechanisms, the evolution of terrestrialization, patterns of diversification through time, and the conservation of transcriptional circuitry. Focus on animal diversity from a phylogenetic and developmental perspective.

**Requisites:** Concurrent enrollment in ZOOLOGY 300**Course Designation:** Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2023**ZOOLOGY/ENTOM 302 – INTRODUCTION TO ENTOMOLOGY**

4 credits.

Principles including morphology and classification.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY 153, or BIOCORE 381**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ZOOLOGY 303 – AQUATIC INVERTEBRATE BIOLOGY**

3 credits.

The form, function, development, basic physiology and ecology of the freshwater and marine invertebrates in the context of their environment. Study live invertebrate specimens, their habitat selection, adaptation and diversity.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024

**ZOOLOGY 304 – MARINE BIOLOGY**

2 credits.

Explore the biological and ecological systems of the oceans and marginal seas. Focus on understanding how marine organisms interact with their physical environment and how the biological components of the oceans are interconnected through trophic interactions and habitat selection.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Describe the oceanic environment, its chemical and physical factors and life in a fluid medium.

Audience: Undergraduate

2. Explain the processes in the open sea: Nutrients, productivity, food webs.

Audience: Undergraduate

3. Identify and describe marine organisms in their habitats: How they function and adapt.

Audience: Undergraduate

4. Explain the drivers behind the diversity of marine life: Habitat stability and diversity, evolutionary and ecological connections.

Audience: Undergraduate

5. Explain and discuss the human impact on the sea: Agricultural land to the seas, point and non-point sources of nutrients, increased primary productivity, over fishing.

Audience: Undergraduate

**ZOOLOGY/ENVIR ST 315 – LIMNOLOGY-CONSERVATION OF AQUATIC RESOURCES**

2 credits.

General limnology. Physical, chemical and biological characteristics and processes of lakes. Environmental problems and rehabilitation of lakes.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381 or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ZOOLOGY 316 – LABORATORY FOR LIMNOLOGY-CONSERVATION OF AQUATIC RESOURCES**

2-3 credits.

Biological, physical, and chemical characteristics and their interrelationships in Wisconsin lakes and streams.

**Requisites:** ZOOLOGY/ENVIR ST 315 or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ZOOLOGY 320 – FIELD MARINE BIOLOGY**

3 credits.

Provides a hands-on, research-driven experience within a marine environment, centering on exposure to 1) the diverse organisms and ecological interactions of coastal marine habitats 2) conservation issues relevant in these habitats 3) the research process from formulating interesting biological questions to conducting scientific research. Features immersion in a variety of marine habitats along with presentations by experts on marine conservation issues.

**Requisites:** (BIOCORE 381 and 382), (ZOOLOGY/BIOLOGY 101 and 102), or ZOOLOGY/BIOLOGY/BOTANY 152

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Be able to describe how habitat structures marine fish and invertebrate communities

Audience: Undergraduate

2. Identify common marine fish and invertebrate species and their adaptations to the unique challenges of feeding, predator avoidance, and reproduction in the marine environment

Audience: Undergraduate

3. Describe threats to marine biodiversity and strategies used to mitigate these threats

Audience: Undergraduate

4. Formulate testable scientific hypotheses/questions

Audience: Undergraduate

5. Develop and execute a data collection plan for investigating the hypotheses/questions

Audience: Undergraduate

6. Communicate research findings verbally and in writing, including using data and figures

Audience: Undergraduate

**ZOOLOGY/F&W ECOL 335 – HUMAN/ANIMAL RELATIONSHIPS: BIOLOGICAL AND PHILOSOPHICAL ISSUES**

3 credits.

An interdisciplinary approach to our complex and often contradictory relationships with non-human animals, including information about the nature, needs and behavior of human and non-human animals in relation to our personal and professional interactions with them.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ZOOLOGY/ENTOM/M M & I/PATH-BIO 350 – PARASITOLOGY**

3 credits.

The biology of water-borne, food-borne, soil-borne and vector-borne parasites of animals including humans. Parasites are explored in the context of transmission, associated disease, diagnosis and treatment options, and environmental, cultural and socioeconomic drivers of disease epidemiology.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, or ZOOLOGY/BIOLOGY/BOTANY 152 or ZOOLOGY 153, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Be conversant in terminology used in the field of Parasitology.

Audience: Undergraduate

2. Recall scientific and common names for parasites and hosts, and the name of the resulting disease in humans or animals.

Audience: Undergraduate

3. Attribute parasite behavior and characteristics to specific disease features in the host.

Audience: Undergraduate

4. Identify appropriate means to diagnose infections with parasites.

Audience: Undergraduate

5. Describe and identify factors that determine when, where, and why parasitic diseases exist.

Audience: Undergraduate

6. Integrate terminology, scientific nomenclature, diagnostic features and demographics to solve case studies where the parasitic culprit is unknown.

Audience: Undergraduate

7. Compare and contrast commonalities in parasite life cycles to demonstrate how flexibility in those life cycles has resulted in many different potential means of transmission.

Audience: Undergraduate

8. Deconstruct the impact of parasitic diseases on human and animal health, from disease symptoms and pathology in an individual, to socioeconomics in communities and countries.

Audience: Undergraduate

9. Identify reliable resources (primarily internet-based) available for researching the biology and epidemiology parasitic diseases.

Audience: Undergraduate

**ZOOLOGY/ENVIR ST/F&W ECOL 360 – EXTINCTION OF SPECIES**

3 credits.

A comprehensive treatment of the ecology, causes, and consequences of species extinction. Ecology and problems of individual species, habitat alteration and degradation, socio-economic pressures and conservation techniques and strategies.

**Requisites:** Sophomore standing and ZOOLOGY/BIOLOGY/BOTANY 151, (ZOOLOGY/BIOLOGY 101 and 102), BIOLOGY/BOTANY 130, or (BIOCORE 381 and 382)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY 370 – GENERAL MOLECULAR BIOLOGY**

3 credits.

Develop a broad understanding of how life works at the molecular level. Covers structure, chemistry, and functions of macromolecules, focusing primarily on how nucleic acids carry out their central roles in cells, rather than transmission genetics. Other topics include the governing principles by which life evolved, functions, and is organized; the experimental methods used to study these processes; and the historical context for our understanding of them. In other words: soup-to-nuts of nucleic acid biology and chemistry.

**Requisites:** (ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 383) and (CHEM 104, 109, or 116)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Describe the molecular basis of life and the relationship between the structure and function of biological macromolecules

Audience: Undergraduate

2. Explain the means by which genetic information is stored and organized in biological cells.

Audience: Undergraduate

3. Explain the means by which the genetic information is replicated.

Audience: Undergraduate

4. Explain how information is transformed from the genetic code to structural and catalytic molecular forms.

Audience: Undergraduate

5. Describe the nature, causes, and consequences of changes in the genetic code.

Audience: Undergraduate

6. Define the laboratory techniques of modern biology.

Audience: Undergraduate

7. Describe the nature of the genetic material and its roles in inheritance, evolution and cellular function.

Audience: Undergraduate

8. Be able to integrate the nature of molecular biology with the cultural and historical factors surrounding the scientific enterprise.

Audience: Undergraduate

9. Become equipped to critically assess the primary scientific literature in molecular biology.

Audience: Undergraduate

**ZOOLOGY/ENTOM 371 – MEDICAL ENTOMOLOGY: BIOLOGY OF VECTOR AND VECTOR-BORNE DISEASES**

3-4 credits.

Explore the biological and molecular adaptations of parasitic arthropods that allow them to feed on vertebrate host and facilitate the transmission of vector-borne pathogens. Examines how anthropogenic activities, behaviors, and effects on climate affect the biology of vectors, the pathogens they transmit, and the emergence of vector-borne epidemics in the world. Emphasis on the molecular and physiological interaction between pathogens, their vector, and the vertebrate host and the fundamentals on how vectors and vector-borne pathogens cause disease in humans. Evaluate real control programs deployed globally for the control of vector-borne diseases.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383, ZOOLOGY 153, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify vector-borne pathogens of public health importance and their respective vectors.

Audience: Both Grad & Undergrad

2. Distinguish how biological and physiological adaptations facilitate the relationship between vectors and particular pathogens.

Audience: Both Grad & Undergrad

3. Apply information on disease epidemiology, vector ecology, vector distribution, and disease manifestation to solve hypothetical scenarios of vector-borne disease transmission.

Audience: Both Grad & Undergrad

4. Discuss current issues delaying the development of diagnostics, prevention, treatment, and control of vector-borne diseases.

Audience: Both Grad & Undergrad

5. Evaluate vector control programs currently deployed internationally based on knowledge of vector biology.

Audience: Both Grad & Undergrad

6. Design project proposals to study different aspects of vector physiology, biology, ecology, and pathogen-vector interactions.

Audience: Graduate

**ZOOLOGY 400 – TOPICS IN BIOLOGY**

1-3 credits.

Various intermediate level topics in Biology. Each section will explore a different topic in biology.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ZOOLOGY 401 – TOPICS IN BIOLOGY**

1-3 credits.

Explore various intermediate level topics in biological sciences through lecture and lab courses. Each section will explore a different topic.

**Requisites:** Sophomore standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Learning Outcomes:** 1. Develop an understanding of various concepts and methods in biological sciences

Audience: Undergraduate

2. Make connections among biological concepts

Audience: Undergraduate

3. Identify the connection between the biological concepts and natural processes.

Audience: Undergraduate

4. Develop laboratory based research skills for scientific inquiry

Audience: Undergraduate

5. Apply scientific methods to investigate various biological processes

Audience: Undergraduate

**ZOOLOGY 405 – INTRODUCTION TO MUSEUM STUDIES IN THE NATURAL SCIENCES**

2-3 credits.

Provides an overview of natural history museums, including history, field collecting, specimen preparation, collection preservation, ethics, education and employment opportunities. Introduces the natural science museums and library collections located on the UW campus.

**Requisites:** Junior standing

**Course Designation:** Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ZOOLOGY/ANTHRO/BOTANY 410 – EVOLUTIONARY BIOLOGY**

3 credits.

Evolutionary biology, emphasizing how modern scientists study evolution. Topics include: nature and mechanisms of microevolution, macroevolution, adaptation, speciation; systematics and taxonomy; quantitative genetics and measurement of natural selection; phylogenetic analyses of behavior, physiology, morphology, biochemistry; current controversies in evolution.

**Requisites:** ZOOLOGY/BIOLOGY 101, BIOLOGY/BOTANY 130, ZOOLOGY/BIOLOGY/BOTANY 152, BIOCORE 381, (ANTHRO 105 and satisfied QR-A requirement), or graduate/professional standing

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY 415 – GENETICS OF HUMAN HISTORY**

3 credits.

Covers a range of topics related to human genetics and evolution.

Explores questions about what genetic differences between humans tell us about our species' evolutionary and demographic history, and conversely, how our history has shaped the genetic diversity of people living today. At a time of rapidly increasing ability to sequence huge numbers of genomes such questions play a central role in understanding how genetics impacts individuals' disease risks, how to interpret reported ancestry and family history from direct-to-consumer genotyping kits, and how genetics can (or importantly, cannot) inform descriptions of human diversity and concepts of race. Includes topics of diversity and inclusion in genomics studies, with a focus on the application and limits of results obtained from one group to our understanding of other groups.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381

**Course Designation:** Breadth - Biological Sci. Counts toward the Natural Sci req

Level - Intermediate

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Read different types of sources covering current scientific topics

Audience: Undergraduate

2. Learn the vocabulary and concepts needed to read and discuss advances in genomics research, human evolution, and the genetics of diversity

Audience: Undergraduate

3. Read and discuss material where the scientific consensus is unclear, uncertain, or controversial

Audience: Undergraduate

4. Synthesize scientific information as an evolving understanding of complex topics shaped both by new scientific discoveries and broader society

Audience: Undergraduate

5. Explain the science behind our understanding of human genetics

Audience: Undergraduate

**ZOOLOGY 425 – BEHAVIORAL ECOLOGY**

3 credits.

Explore how organisms make decisions and how these decisions affect their survival. These decisions are key aspects of an organism's life, e.g. foraging behavior, mating behavior, anti-predator behavior, and habitat selection. Approaches these questions with the perspective that understanding the proximal and ultimate basis of behavior requires understanding the ecological and evolutionary context of behavior.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 152, (ZOOLOGY/BIOLOGY 101 and BOTANY/BIOLOGY 130), or (BIOCORE 381 and 382)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ZOOLOGY 430 – COMPARATIVE ANATOMY OF VERTEBRATES**

5 credits.

Basic vertebrate anatomical systems and a consideration of variations, using functional embryological and evolutionary approaches. Lab dissection and study of representative vertebrate material.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ZOOLOGY 444 – NEURONAL CELL BIOLOGY IN HEALTH AND DISEASE**

2 credits.

Provides an advanced understanding of cell biology as it relates to the nervous system. Covers the neuronal cytoskeleton, molecular motors and their cargos, the secretory system and how it functions in neurons, formation and maintenance of pre- and post-synaptic structures, neuronal organelles and their functions. Discussion of what is known about the disruptions to cell biology of neurons that contributes to neurodevelopmental and neurodegenerative diseases such as Alzheimer's disease, Parkinson's disease, Amyotrophic Lateral Sclerosis, Charcot Marie Tooth Disease, Spinal Muscular Atrophy, and others.

**Requisites:** ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY/ZOOLOGY 152, or BIOCORE 384

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Learning Outcomes:** 1. Understand vocabulary used to describe and understand cell biology in the context of neuroscience

Audience: Undergraduate

2. Read and critique primary literature related to neuronal cell biology  
Audience: Undergraduate

3. Synthesize and disseminate knowledge related to neuroscience, cell biology, and the relationship between concepts discussed and human disease  
Audience: Undergraduate

4. Summarize the state of the field of cellular neuroscience  
Audience: Undergraduate

5. Ask critical, open questions that have yet to be addressed at the basic science level and in relation to disruptions associated with neurological disease  
Audience: Undergraduate

**ZOOLOGY/BOTANY 450 – MIDWESTERN ECOLOGICAL ISSUES: A CASE STUDY APPROACH**

2 credits.

How ecological principles can be used to address contemporary environmental issues such as water quality, invasive species, and population growth. Emphasis on midwestern issues, practical approaches, the role of history, and geographic context.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, (ZOOLOGY/BIOLOGY 101 and ZOOLOGY/BIOLOGY 102), or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY/BOTANY/F&W ECOL 460 – GENERAL ECOLOGY**

4 credits.

Ecology of individual organisms, populations, communities, ecosystems, landscapes, and the biosphere. The interaction of organisms with each other and their physical environment. These relationships are studied, often in quantitative terms, in both field and laboratory settings.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, (ZOOLOGY/BIOLOGY 101 and 102), BIOCORE 381, or BOTANY/BIOLOGY 130, or graduate/professional standing

**Course Designation:** Gen Ed – Quantitative Reasoning Part B

Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**ZOOLOGY 470 – INTRODUCTION TO ANIMAL DEVELOPMENT**

3 credits.

Introduction to the major features and mechanisms of early embryonic development in animals, including (1) the major stages of early development, (2) how form arises in the embryo (morphogenesis), (3) how differences arise between cells in the embryo, and (4) how specific genes control these processes.

**Requisites:** ZOOLOGY/BIOLOGY/BOTANY 151, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ZOOLOGY/BOTANY/ENTOM 473 – PLANT-INSECT INTERACTIONS**

3 credits.

Multiple ways in which arthropods exploit plants, plant traits that deter or augment insects, environmental mediation of these interactions, effects on population dynamics, community ecology and co-evolution, and implications to natural resource management, environmental quality, and sustainable development.

**Requisites:** F&W ECOL/BOTANY/ZOOLOGY 460, FW ECOL 500, ENTOM/BOTANY/PL PATH 505, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ZOOLOGY 500 – UNDERGRADUATE NEUROBIOLOGY SEMINAR**

1 credit.

A wide range of topics in neurobiology research from molecular neurobiology to integrative systems. Topics discussed by invited UW-Madison faculty researchers might include: ion channels and synaptic plasticity, neural development, sensory and cognitive physiology, biological basis of behavioral disorders and cognitive decline.

**Requisites:** Declared in Neurobiology and ZOOLOGY/PSYCH 523 or concurrent enrollment.

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

### **ZOOLOGY/ENVIR ST 510 – ECOLOGY OF FISHES**

3 credits.

Interactions of fishes with their physical, chemical, and biotic environment; physiological ecology, community ecology and fisheries sciences. Lake Mendota perch fishery and Shedd Aquarium field trips.

**Requisites:** (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, or BIOCORE 381

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Use facts to guide conceptual thinking and hypothesis tests about ecological systems.

Audience: Undergraduate

2. Draw upon aspects of fish evolution, ecology, and conservation to produce an integrated perspective.

Audience: Undergraduate

3. Summarize the diversity of fishes on Earth, including phylogenetic and geographic patterns.

Audience: Undergraduate

4. Analyze the relationship between form and function of individual fish.

Audience: Undergraduate

5. Place fish in the context of the broader food web and ecological community.

Audience: Undergraduate

6. Describe the management and use of fish by human society.

Audience: Undergraduate

7. Describe the conservation challenges faced by fish now and in the future.

Audience: Undergraduate

8. Write clear, concise scientific reports both individually and in teams.

Audience: Undergraduate

9. Present effective, informative, and persuasive arguments in writing and orally.

Audience: Undergraduate

### **ZOOLOGY/ENVIR ST 511 – ECOLOGY OF FISHES LAB**

2 credits.

Anatomy and taxonomy of Wisconsin fishes and projects in fish ecology.

**Requisites:** ZOOLOGY/ENVIR ST 510 or concurrent enrollment

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ZOOLOGY/BOTANY/ENVIR ST/F&W ECOL 516 – CONSERVATION BIOLOGY

3 credits.

Investigate the science behind the protection of nature and preservation of biodiversity by focusing on both the biological and socioeconomic factors that underlie the challenges to and the impacts of conservation efforts. Explore the theory, research, and application of biological conservation from an interdisciplinary, international, solutions-focused perspective. Learn about the many threats to Earth's biodiversity but also examine in-depth and apply approaches to overcome them.

**Requisites:** Satisfied Quantitative Reasoning (QR) A requirement and ZOOLOGY/BIOLOGY/BOTANY 152, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY 101, BIOCORE 381, or graduate/professional standing

**Course Designation:** Gen Ed – Quantitative Reasoning Part B  
Breadth – Biological Sci. Counts toward the Natural Sci req  
Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S  
Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Distinguish conservation biology from other scientific disciplines and describe its over-arching principles.

Audience: Both Grad & Undergrad

2. Articulate many reasons why the conservation of biological diversity (at many levels) is important.

Audience: Both Grad & Undergrad

3. Quantify biodiversity at the individual, population, and species level by applying various commonly used models and indices.

Audience: Both Grad & Undergrad

4. Explain orally and in writing the principal threats to biodiversity, to both scientific and layperson audiences (habitat loss and fragmentation; industrial agriculture; climate change; overexploitation; invasive species; pollution) and the specific biological effects of these threats.

Audience: Both Grad & Undergrad

5. Outline strategies to implement at the personal, local, and global scales for solving the biodiversity crisis.

Audience: Both Grad & Undergrad

6. Critically analyze, apply, and communicate recommendations for changing personal behaviors to mitigate the biodiversity and climate crises.

Audience: Both Grad & Undergrad

7. Assess the strengths and weaknesses of various conservation strategies or policy approaches.

Audience: Both Grad & Undergrad

8. Synthesize multiple investigations of conservation strategies to assess tradeoffs and synergies among them.

Audience: Graduate

9. Make science-based recommendations for the appropriate conservation approach or strategy for a given situation.

Audience: Graduate

10. Manipulate quantitative data using multi-step arguments to evaluate, interpret, and express solutions to problems in biodiversity estimation, population monitoring, and genetics in the context of conservation.

Audience: Both Grad & Undergrad

### ZOOLOGY/AN SCI/F&W ECOL 520 – ORNITHOLOGY

3 credits.

Introduction to bird biology, ecology, and behavior. Topics include the evolutionary origin of birds and flight, anatomy and physiology, functional morphology, migration, communication, reproductive strategies, ecological adaptations and roles, and biogeographical patterns.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ZOOLOGY/AN SCI/F&W ECOL 521 – BIRDS OF SOUTHERN WISCONSIN

3 credits.

Outdoor and indoor labs/lectures emphasizing identification of southern Wisconsin birds by sight and vocalization. Two required Saturday field trips in Southern Wisconsin.

**Requisites:** ZOOLOGY/BIOLOGY 101 and 102, ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

### ZOOLOGY/PSYCH 523 – NEUROBIOLOGY

3 credits.

Basic mechanisms in cellular neurophysiology: electrophysiology and chemistry of nerve signals, mechanisms in integration, simple nervous pathways and their behavioral correlates.

**Requisites:** (ZOOLOGY/BIOLOGY/BOTANY 151, ZOOLOGY/BIOLOGY 101, or BIOCORE 383) and (CHEM 104, CHEM 109, or CHEM 116)

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Summer 2025

**Learning Outcomes:** 1. Understand the molecular mechanisms of cellular neurophysiology, including the ionic basis of the resting membrane potential and action potential, and mechanisms of synaptic transmission.

Audience: Undergraduate

2. Understand the basis of sensory perception at the receptor level.

Audience: Undergraduate

3. Demonstrate how neuronal signaling is integrated into simple nervous pathways and their behavioral correlates.

Audience: Undergraduate

4. Apply principles of neuronal function to activity-dependent changes in rhythmic neuronal activity, neuronal plasticity, and memory.

Audience: Undergraduate

5. Understand some of the state-of-the-art approaches to neuronal function.

Audience: Undergraduate

6. Understand key steps in the development of the nervous system and explain and apply the experimental approaches underpinning that understanding.

Audience: Undergraduate

7. Elucidate connections between genetics, pharmacology, and the functioning of the nervous system.

Audience: Undergraduate

8. Understand the mechanisms underlying a subset of disorders of the nervous system and the bases of current treatments.

Audience: Undergraduate

### ZOOLOGY/ENTOM 540 – THEORETICAL ECOLOGY

3 credits.

Introduction to theoretical ecology, including hands-on experience in computer modeling.

**Requisites:** STAT/F&W ECOL 571

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2023

### ZOOLOGY/GEOSCI 542 – INVERTEBRATE PALEONTOLOGY

3 credits.

The evolutionary history, morphology, and ecology of fossil invertebrates. Labs emphasize fossil identification and recognition of basic morphological features.

**Requisites:** (GEOSCI 110 or 204), (ZOOLOGY/BIOLOGY 101 and 102), ZOOLOGY/BIOLOGY/BOTANY 152, (BIOCORE 381 and 382), or graduate/professional standing.

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ZOOLOGY 555 – LABORATORY IN DEVELOPMENTAL BIOLOGY

3 credits.

Developmental anatomy and laboratory manipulations of representative animal embryos used extensively for analysis of developmental phenomena (sea urchins, amphibia, annelids, molluscs, ascidians, insects, chicks, fish, mice).

**Requisites:** ZOOLOGY 470, 625, ZOOLOGY/PSYCH 523, or BIOCORE 587

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

### ZOOLOGY/F&W ECOL/LAND ARC 565 – PRINCIPLES OF LANDSCAPE ECOLOGY

2 credits.

Emphasizes the importance of spatial patterns at broad scales. Concepts and applications are covered.

**Requisites:** (ZOOLOGY/BOTANY/F&W ECOL 460 or F&W ECOL 550) and (STAT 301, 371, or F&W ECOL/STAT 571), or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2019

**ZOOLOGY 570 – CELL BIOLOGY**

3 credits.

Comprehensive course on modern aspects of cell biology.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 383**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2024**ZOOLOGY 603 – ENDOCRINOLOGY**

3-4 credits.

An introduction to the role that hormones play in a variety of physiological processes and behaviors from a molecular to a systems level. Topics include hormonal involvement in growth, development, homeostasis, reproduction, and behavior, with an emphasis on vertebrate systems.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383 or graduate/professional standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Fall 2023**ZOOLOGY 604 – COMPUTER-BASED GENE AND DISEASE/DISORDER RESEARCH LAB**

2 credits.

Learn to navigate open access biological and biomedical databases that include a wealth of information regarding genes, gene expression, gene pathways, behavioral characteristics, and disorders or diseases. This includes extracting information to develop new ideas, and using multiple databases to develop new ideas on which genes may be playing important, but previously underappreciated or unknown roles.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 381, or graduate/professional standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No**Last Taught:** Spring 2024**ZOOLOGY 611 – COMPARATIVE AND EVOLUTIONARY PHYSIOLOGY**

3 credits.

Examines general physiological principles by comparing taxa from diverse evolutionary histories and ecological adaptations. Examples include adaptation to environments differing in salinity, temperature, altitude, pressure, or pollution, and examines how nervous and endocrine systems evolved to support the adaptations.

**Requisites:** ZOOLOGY/BIOLOGY 101, BOTANY/BIOLOGY 130, ZOOLOGY/BIOLOGY/BOTANY 151, or BIOCORE 381**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ZOOLOGY 612 – COMPARATIVE PHYSIOLOGY LABORATORY**

2 credits.

Investigating physiological adaptations in different animals. Design and execute experiments.

**Requisites:** ZOOLOGY 611 or concurrent enrollment**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Spring 2025**ZOOLOGY/ANTHRO/PSYCH 619 – BIOLOGY OF MIND**

3 credits.

Origins and structures of mind, brain, and consciousness. Transitions from early mammalian through primate to hominid intelligence. Genetics and plasticity in brain development. Modern studies of human brain mechanisms and consciousness.

**Requisites:** Junior standing**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

**Repeatable for Credit:** No**Last Taught:** Fall 2023**ZOOLOGY 620 – NEUROETHOLOGY SEMINAR**

2 credits.

A group discussion of primary literature articles relevant to the neural basis of behavior with a purpose to understand the neural basis of behavior in animals, to learn to read papers critically and improve discussion leading skills.

**Requisites:** PSYCH/ZOOLOGY 523 or graduate/professional standing**Course Designation:** Level – Advanced

L&amp;S Credit – Counts as Liberal Arts and Science credit in L&amp;S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions**Last Taught:** Spring 2024

### **ZOOLOGY/ENTOM/GENETICS 624 – MOLECULAR ECOLOGY**

3 credits.

Basic principles of molecular ecology. Lecture topics include population genetics, molecular phylogenetics, rates and patterns of evolution, genome evolution, and molecular ecology.

**Requisites:** GENETICS 466, 467, BIOCORE 383, or graduate student standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Intermediate

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe common molecular genetic techniques.

Audience: Both Grad & Undergrad

2. Demonstrate knowledge about the significance of genetic diversity in species biology.

Audience: Both Grad & Undergrad

3. Differentiate how ecological and evolutionary processes shape genetic variation.

Audience: Both Grad & Undergrad

4. Analyze genetic data and communicate the results.

Audience: Both Grad & Undergrad

5. Evaluate whether genetic data are appropriate for answering scientific questions.

Audience: Both Grad & Undergrad

6. Summarize and critique the primary literature in the field of Molecular Ecology.

Audience: Graduate

### **ZOOLOGY 655 – MODELING NEURODEVELOPMENTAL DISEASE**

3 credits.

Systematically explores current animal models of human diseases that affect the central nervous system. Topics will include birth defects that disrupt normal brain architecture (holoprosencephaly and neural tube closure defects), birth defects affecting the visual system, and postnatal disease, e.g. neurodegeneration and stroke.

**Requisites:** GENETICS 466, ZOOLOGY/PSYCH 523, ZOOLOGY 470 ZOOLOGY 470, or 570

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. apply and enhance their understanding of genetics and cell biology

Audience: Undergraduate

2. understand the concepts and methods used to model human disease

Audience: Undergraduate

3. read and critically evaluate current scientific literature

Audience: Undergraduate

4. develop and present short lectures on selected topics

Audience: Undergraduate

5. prepare review-style articles based on primary literature research

Audience: Undergraduate

**ZOOLOGY/F&W ECOL 660 – CLIMATE CHANGE ECOLOGY**

3 credits.

The evidence that the Earth's climate is changing at unprecedented rates is now overwhelming. Environmental tipping points are being crossed and many species are adapting or failing to adapt. Climate change poses a significant problem for conserving and managing wildlife and their habitats. Climate change, its ecological impacts, and the principle of climate change adaptation in natural resources conservation will be discussed.

**Requisites:** BOTANY/BIOLOGY/ZOOLOGY 152, (BIOLOGY/ZOOLOGY 101 and 102), BIOCORE 381, or BIOLOGY/BOTANY 130, or graduate/professional standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. explain historic and future trends in climate change within an ecological context.

Audience: Both Grad & Undergrad

2. identify the eco-evolutionary impacts of climate change on biological communities (including changes in phenology and ranges, community dynamics, and altered trophic interactions).

Audience: Both Grad & Undergrad

3. develop a climate change vulnerability assessment for a given species or community.

Audience: Both Grad & Undergrad

4. analyze and incorporate climate and biological data in vulnerability assessments.

Audience: Graduate

**ZOOLOGY/BOTANY/F&W ECOL 672 – HISTORICAL ECOLOGY**

2 credits.

Study the importance of past events for current ecosystems. Emphasizes concepts and applications.

**Requisites:** Senior standing

**Course Designation:** Breadth – Biological Sci. Counts toward the Natural Sci req

Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ZOOLOGY/NEURODPT/PSYCH 674 – BEHAVIORAL NEUROENDOCRINOLOGY SEMINAR**

2 credits.

Behavior results from a complex interplay among hormones, the brain, and environmental factors. Behaviors and their underlying neural substrates have evolved in response to specific environmental conditions, resulting in vast species diversity in behavioral and neuroendocrine solutions to environmental problems. Designed to explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors. A range of taxonomic groups will be discussed, including (but not limited to) mammals, birds, and fish.

**Requisites:** ZOOLOGY/BIOLOGY 101, ZOOLOGY/BIOLOGY/BOTANY 151, BIOCORE 383 or graduate/professional standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

Grad 50% – Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2021

**Learning Outcomes:** 1. Identify how behaviors and their underlying neural substrates have evolved in response to specific environmental conditions

Audience: Both Grad & Undergrad

2. Discuss and explore the primary literature on the neuroendocrine underpinnings of behavior spanning from feeding to sex differences in complex social behaviors

Audience: Both Grad & Undergrad

3. Identify and discuss hormones, the brain, and environmental factors as they relate to behavioral evolution and biological diversity

Audience: Both Grad & Undergrad

4. Develop and apply critical thinking to evaluate neuroendocrinological research

Audience: Graduate

5. Communicate effectively about concepts, theories and approaches of neuroendocrinology and behavioral research

Audience: Graduate

**ZOOLOGY 677 – INTERSHIP IN ECOLOGY**

2 credits.

Provides support and structure for those interested in gaining hands-on experience working as a volunteer with local environmental, ecological or conservation groups.

**Requisites:** Junior standing

**Course Designation:** Level – Advanced

L&S Credit – Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2023

**ZOOLOGY 681 – SENIOR HONORS THESIS**

1-6 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ZOOLOGY 682 – SENIOR HONORS THESIS**

1-4 credits.

Mentored individual research and study for students completing a thesis in an Honors program.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

Honors - Honors Only Courses (H)

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ZOOLOGY 691 – SENIOR THESIS**

1-6 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ZOOLOGY 692 – SENIOR THESIS**

1-4 credits.

Mentored individual research and study for students completing a senior thesis.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ZOOLOGY 698 – DIRECTED STUDY**

1-6 credits.

Selected research projects for juniors and seniors.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ZOOLOGY 699 – DIRECTED STUDIES IN ZOOLOGY**

1-6 credits.

Selected research projects for juniors and seniors.

**Requisites:** Consent of instructor

**Course Designation:** Level - Advanced

L&S Credit - Counts as Liberal Arts and Science credit in L&S

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ZOOLOGY/BOTANY 725 – ECOSYSTEM CONCEPTS**

3 credits.

Scope and objectives of ecosystem ecology; roles of theory, long-term studies, comparative studies, and large-scale experiments; scaling problems; ecosystem services and ecological economics; adaptive ecosystem assessment and management.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**ZOOLOGY/ATM OCN/ENVIR ST/GEOSCI 750 – PROBLEMS IN OCEANOGRAPHY**

3 credits.

Introduction to techniques used in the study of the biology, chemistry, geology, and physics of the marine environment.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ZOOLOGY/NEURODPT 765 – DEVELOPMENTAL NEUROSCIENCE**

3 credits.

Analysis of neural development with emphasis on experimental approaches. Combination of lectures and discussions of primary literature. Topics include neural induction, patterning, mechanisms of axon guidance, neural crest cell migration and differentiation, cortical development, and synapse formation and elimination.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Gain an extensive understanding of mechanisms of neural development

Audience: Graduate

2. Acquire the ability to critically analyze current studies in neural development

Audience: Graduate

**ZOOLOGY 799 – INDEPENDENT STUDY**

1-6 credits.

Advanced topics in zoology explored through individual research projects.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025

**ZOOLOGY 800 – ADVANCED TOPICS IN THE BIOLOGICAL SCIENCES**

1-3 credits.

Various advanced topics in the Biological Sciences

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Apply, analyze, evaluate advanced theories, concepts and methods in the biological Sciences.

Audience: Graduate

2. Identify and describe key theories, concepts and methods in the biological sciences.

Audience: Graduate

3. Explore new approaches in the biological science research, and apply the knowledge gained to own research.

Audience: Graduate

**ZOOLOGY/BOTANY/ENTOM/GENETICS 820 – FOUNDATIONS OF EVOLUTION**

2 credits.

Explore some of the most important themes and debates that have permeated evolutionary biology over the last 50 years. Read key papers related to each controversial topic, debate the pros and cons of competing viewpoints, and reflect on the relevance of the issue to contemporary evolutionary biology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**ZOOLOGY/BOTANY/ENTOM/F&W ECOL 821 – FOUNDATIONS OF ECOLOGY**

2 credits.

Foundational ideas in the field of ecology. Discussion topics trace the development of ecology as a discipline, and the roots of modern ecological thought, as well as the research approaches in ecology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Identify and describe key debates in the history of ecology and ongoing controversies in the field.

Audience: Graduate

2. Differentiate ecological processes and how they sustain ecological systems.

Audience: Graduate

3. Moderate and participate in discussions about the significance of important ecological concepts.

Audience: Graduate

4. Summarize, interpret, and synthesize conceptual theories of ecology orally and in writing.

Audience: Graduate

5. Evaluate peer work and provide constructive, professional feedback.

Audience: Graduate

**ZOOLOGY/BOTANY/F&W ECOL 879 – ADVANCED LANDSCAPE ECOLOGY**

3 credits.

Emphasizes spatial patterning (its development and importance for ecological processes) and often focuses on large regions. Learn concepts, methods, and applications of landscape ecology.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Spring 2024

**ZOOLOGY/ATM OCN/BOTANY/CIV ENGR/ENVIR ST/GEOSCI 911 – LIMNOLOGY AND MARINE SCIENCE SEMINAR**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ZOOLOGY/AGROECOL/ATM OCN/BOTANY/ENTOM/ENVIR ST/  
F&W ECOL/GEOG 953 – INTRODUCTION TO ECOLOGY  
RESEARCH AT UW-MADISON**

1-2 credits.

Introduction to diverse ecological research across the UW-Madison Campus. Discussions on adapting to graduate school and graduate-level ecological research, key topics in professional development, and research presentations by faculty members.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** No

**Last Taught:** Fall 2024

**Learning Outcomes:** 1. Develop an appreciation for the foundations and legacy of ecology research and conservation science at UW-Madison

Audience: Graduate

2. Recognize the diversity and strength of current research in ecology at UW-Madison

Audience: Graduate

3. Differentiate expectations between undergraduate education and those of independent research for graduate degrees in ecology

Audience: Graduate

4. Develop appropriate expectations for advisors and advisees

Audience: Graduate

5. Reason through hypothetical ethical challenges and identify potential solutions based on professional codes of ethics

Audience: Graduate

6. Develop an understanding of the suite of skills associated with success in graduate school and in science

Audience: Graduate

**ZOOLOGY/AN SCI/OBS&GYN 954 – SEMINAR IN  
ENDOCRINOLOGY-REPRODUCTIVE PHYSIOLOGY**

0-1 credits.

Promotes scientific and professional development. Presenters develop and deliver research presentations to a scientific audience, field questions, and receive critiques about their presentation style and scientific approach. Additional presentations include professional development, career advancement opportunities, and topics of interest to the endocrinology and reproduction community at large.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**Learning Outcomes:** 1. Demonstrate knowledge of cutting-edge research in and related to one's research area through the development and delivery of research presentations

Audience: Graduate

2. Communicate complex ideas in research presentations and questions in a clear and understandable manner

Audience: Graduate

3. Evaluate presentations and providing effective feedback

Audience: Graduate

**ZOOLOGY 955 – SEMINAR-LIMNOLOGY**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ZOOLOGY 956 – SEMINAR-ECOLOGY**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ZOOLOGY 957 – SEMINAR-EVOLUTION**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Fall 2024

**ZOOLOGY 960 – SEMINAR IN CELLULAR BIOLOGY**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ZOOLOGY 962 – SEMINAR-ETHOLOGY**

1 credit.

Sections in various fields of zoological research.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2025

**ZOOLOGY/ATM OCN/BOTANY/ENVIR ST/F&W ECOL/GEOG/  
GEOSCI 980 – EARTH SYSTEM SCIENCE SEMINAR**

1 credit.

Topics in earth system science. Emphasis on the coupling between atmospheric, oceanic and land surface systems, involving physical geochemical and biological processes, and including interactions with human systems.

**Requisites:** Graduate/professional standing

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Spring 2024

**ZOOLOGY 990 – RESEARCH**

1-9 credits.

Advanced research in biology as part of graduate program requirements arranged with mentoring faculty.

**Requisites:** Consent of instructor

**Course Designation:** Grad 50% - Counts toward 50% graduate coursework requirement

**Repeatable for Credit:** Yes, unlimited number of completions

**Last Taught:** Summer 2025
